RE: Consumer Complaint Against Meade Co Water District

To Whom It May Concern:

I am submitting this complaint regarding the conduct of Meade County Water District in connection with a disputed water bill involving an inaccurate utility meter and ongoing collection and disconnection threats.

I received a water bill reflecting extremely high water usage that was inconsistent with the normal historical usage at my property. In response, I retained a licensed plumber to inspect the property for leaks or customer-side plumbing issues. The plumber found no leaks or defects and advised that the issue appeared to originate from the utility meter.

The utility subsequently acknowledged that the meter was inaccurate and/or faulty. Despite this acknowledgement, the utility has refused to make an appropriate adjustment to the charges generated by the inaccurate meter and continues to demand payment for the disputed amount.

I filed a complaint with the Kentucky Public Service Commission regarding the matter. However, before I received any formal notice, findings, or dismissal from the Commission, the utility's attorney sent correspondence stating that the PSC complaint had been dismissed. To date, I have not received any direct confirmation from the PSC supporting that representation.

Additionally, the utility has threatened disconnection of my water service unless I pay the disputed charges, despite the unresolved dispute and the acknowledged meter irregularities.

I believe the utility's conduct raises serious concerns regarding:

- Unfair or deceptive billing practices;
- Collection efforts involving disputed charges;
- Threatened termination of essential utility service during an unresolved dispute;
- And potential misrepresentation concerning the status of a regulatory complaint.

I respectfully request that the Office of Consumer Protection review this matter and investigate whether the utility has engaged in improper or deceptive practices in handling this dispute.

Attached are copies of:

- The disputed bills;
- Plumber findings or invoices;

- Correspondence from the utility and/or its attorney;
- My PSC complaint materials

Thank you in advance for your time and consideration. I appreciate any assistance or review your office can provide.

Sincerely,

A handwritten signature in black ink, appearing to read "Kelley".

DESCRIPTION OF WORK

Turned main water off in the basement and checked the meter. The meter is standing still and not spinning at all. Also checked crawlspace hatch to see if there's any leaks and cannot find anything leaking. Tenant had to run to an appointment in E-town - going to pause job for now. She said we can return anytime tomorrow so we can test toilets to make sure they're not leaking through.

3/12 - Came back and put dyes in toilet and walked through the house for signs of leaks. Found nothing wrong on her side for water. Took picture of meter when I got here and had customer not run any water. Looked at meter after a while and found that it didn't move. Nothing is wrong on customer's side. Water district need to come out and take a look. Spoke to neighbor and she said she went through the same thing a little bit ago and water district ended up changing meter to fix the problem.

**Re: Guidance Regarding Service Discontinuance Following PSC Complaint Closure –
Complaint No. 2026-00662**

Brett:

This letter is offered in guidance on the District's next steps regarding nonpayment by the above-referenced customer following closure of the Kentucky Public Service Commission (PSC) complaint.

The PSC Consumer Inquiry System record reflects Complaint No. 2026-00662 was entered on April 13, 2026 regarding "Billing (High bill/consumption)" for customer Kelley Jeans at 165 Diana Lane, Vine Grove, KY 40175. MCWD filed a response to the complaint, describing its investigation, meter testing and replacement, and conclusion that the prior meter was under-registering rather than over-registering. As you know, the PSC's standard protection during a pending billing complaint is that "the utility will not discontinue service while a billing complaint is pending so long as the customer pays the undisputed amount and continues to pay regular monthly bills." Because the PSC matter identified above is no longer pending, that temporary protection no longer applies.

Subject to applicable notice requirements and the District's tariff and policies, MCWD may proceed with its ordinary collection and service-discontinuance procedures for nonpayment on this account. MCWD determined that the previously installed meter was under-registering, replaced the meter, and confirmed the new meter operates within applicable accuracy standards. Because the prior meter was under-registering, no billing adjustment is warranted under 807 KAR 5:066 § 15, which applies to meters found to be *over-registering* beyond allowable accuracy thresholds. MCWD's investigation concluded that any elevated usage occurred downstream of the meter within the customer's plumbing or service line and outside the District's control. Accordingly, the amounts billed remain the customer's responsibility.

As we discussed, high bills that are not attributed to an underground leak are often result from on-premise conditions such as leaking fixtures (especially constant running toilets), irrigation system leaks, filling swimming pools, and seasonal usage changes.

MCWD's tariff provides a leak-adjustment mechanism only for an underground leak and only if specific conditions are met, including: (a) the customer must inform MCWD and a District employee must inspect the underground leak prior to repair; (b) adjustments are limited to no more than three in ten years; (c) one billing period only; (d) leak usage must be at least three times normal usage; and (e) prior to granting an adjustment, the customer must submit a request form, provide a list of materials used to make the required repair, a statement from the plumber who made the repairs, and identify the exact location of the leak. Based on the current record, the customer has not identified an underground leak specified by Section U. On this record, the customer does not qualify for a leak adjustment under the tariff. If the customer later documents an underground leak and satisfies all Section U requirements, MCWD can evaluate eligibility for a one-period adjustment at that time.

Below is the result of your feedback form. It was submitted by (kaljeans@yahoo.com) on Monday, March 23, 2026 at 10:31 AM

Name: Kelley Jeans
Address: 165 Diana Lane
City: Vine Grove
State: KY
Zip Code: 40175
Phone number where you can be reached: [REDACTED]
Home phone:

Utility Name: Meade County Water District
State the nature of your concern: On March 11, I received an automated call from Meade Co Water District saying I had higher than normal usage and then the call disconnected with no further information. I reached out to someone there who stated the meter reading showed I used 70,000 gallons over the course of the month when the meter was read on March 3. I typically use around 1500 gallons per month and end up only being billed the minimum charge that MCWD charges since I moved here January 2022. Two plumbers and the owner of Knights Mechanical in Elizabethtown came to my house over the course of two days and checked everything that could possibly leak - all four toilets, sinks, faucets, tubs, water heater - they found no issues at all on my side of the meter. When they pulled the meter cover to check if the leak indicator was spinning (it was not), they had to pull the wires for the antenna out of the dirt and grass where they had been intertwined with the growth. When we called MCWD back, their immediate response was the issue was on my side without looking at anything at all. After MUCH prodding, they finally came out to pull a usage report. The usage report showed the high usage stopped almost to the second when the plumbers took the lid off the meter and pulled the wires out of the dirt/grass. MCWD continued to insist the issue is on my side of the meter. After much prodding AGAIN, MCWD came out on or about March 16th to replace the original meter that was here when the house was built in the late 90s/early 2000s. They took that meter back to the shop and tested it. They told us that the meter is NOT working correctly, but that it is running slow and that I had higher usage and that I should be paying more money. Even though the plumber certified no issues, even though the usage stopped when the meter lid was taken off, even though MCWD admits the meter is faulty and they cannot give an accurate reading of what was actually used, they will not discount the \$750 bill or whatever will be charged for usage between the March 3 reading and March 11th when the usage mysteriously went down. When asked to come back to read the new meter again this week to ensure its not still running crazy, they refused and said they would come back to read it again for the April reading. This water department routinely tells us to conserve water during summer months due to lack of supply from Hardin County but they seem completely uninterested in conserving water themselves. Additionally, summer of 2024, the fire hydrant in my yard leaked the better part of the summer. They refused to fix that as well until I didnt pay my standard \$25/mo bill and they came out to turn my water off and saw the amount of water in my yard. Im not sure what policies MCWD operates by, but it is not done in the interest of the community or their customers.

KY PSC Utility Inquiry

From: KY Public Service Commission (pscfilings@ky.gov)

To: [REDACTED]

Date: Wednesday, April 8, 2026 at 11:45 AM EDT

Below is the result of your feedback form. It was submitted by (kaljeans@yahoo.com) on Wednesday, April 8, 2026 at 11:45 AM

Name: Kelley Jeans
Address: 165 Diana Lane
City: Vine Grove
State: KY
Zip Code: 40175
Phone number where you can be reached: [REDACTED]
Home phone: [REDACTED]
Utility Name: Meade County Water District

State the nature of your concern: I previously filed a complaint against Meade Co Water Department on 3/23/26 regarding substantial usage billed to my account. Today, I received a call from MCWD that I again have high usage for the March billing period. This is a continuing concern because after MCWD put in a new meter and verified that the old meter was not working correctly, they refused to come back out and check the new meter to make sure it was not running out of control. They advised they would read the meter again on our about April 3 and I would have to wait until then. Additionally, when mowing my yard for the first time this season over this past weekend, I discovered MCWD had not properly replaced the cover to the meter and had not only left the bolt unfastened, but also left the lid at an angle so that when I mowed, the blade hit the cover, broke it, and also dented my \$4000.00 zero turn mower. I dont know if this was intentional but it is certainly on par with the very sloppy work this water department performs on a regular basis. To sum up events to date: March 11 - MCWD calls with auto message that February usage was high March 11 - Knights Mechanical (ETown) came out to check for leaks; nothing was found; high water usage stopped (according to hourly usage reports) when the plumber took the cover off the meter and pulled the wires out of the ground where they had grown in ~March 18 - MCWD pulls hourly report from old meter (not sure of date as they said they came out four days prior and talked to me (I never saw anyone) but later said they came out on a later date ~March 20 - MCWD changes out meter; confirms it is not running correctly but says its slow and that I should be glad theyre not charging me more even though they cannot verify how many gallons were used - or NOT used. -March 24 - Requested meter be checked again to make sure its not running high; MCWD refuses; says to wait until they read meter again in early April -April 8 - Receive another automated call from MCWD that usage for March is high

April 8, 2026

Mr. Brett Pyles
Meade County Water District
1003 Armory Place
Brandenburg, KY 40108

RE: Account Number: [REDACTED]
Customer Name: Kolley Jeans
Service Address: 165 Diana Lane, Vine Grove

Mr. Pyles,

I am writing to formally dispute my recent water bill with a due date of 4/10/26, associated with the above referenced account.

I have been informed by MCWD that the water meter at my property has been identified as faulty. Given this acknowledgement, as well as the fact the high usage stopped at the same time the plumber took the cover off the meter to check the usage and had to dig the wires out of the ground, I do not believe the charges reflected on the bill accurately represent my actual water usage. The amount billed is significantly higher than my typical usage, further supporting the conclusion that the meter malfunction has resulted in an incorrect reading.

In light of this, I respectfully request the following:

- An immediate review and adjustment of the disputed bills (February and March overages)
- Recalculation of my water usage based on historical averages or other appropriate methods
- Confirmation that the faulty meter has been repaired or replaced to prevent future inaccuracies.

Additionally, I need to formally report property damage resulting from related equipment failure/improper actions by MCWD employees. As a direct result of this issue, my property sustained the following damage:

When mowing my yard for the first time this season on April 5, 2026, I discovered MCWD employees had not re-secured the cover for the meter when they replaced it. It was neither bolted, nor even set flush in the ground. My mower blade hit it, breaking the blade and denting the mower deck. I have since bolted the cover back on correctly but had to replace parts on my mower.

Given that MCWD has acknowledged the meter was faulty and replaced it, I believe the resulting damage is directly connected to this failure. I am requesting that your company take responsibility for these damages and initiate a claims process for repair and reimbursement.

Please advise on the next steps for filing a formal property damage claim, including any required forms or timelines.

Please be advised that, due to the seriousness of this matter and the lack of timely resolution, I have filed a formal complaint with the Public Service Commission regarding the faulty meter, the resulting inaccurate billing, and the associated property damage.

While I would prefer to resolve this matter directly with MCWD, I am prepared to pursue all available remedies to ensure a fair and timely resolution. I request a written response within ten days confirming the actions being taken to correct my bill and address the property damage claim.

I also request confirmation that my account will not be subject to penalties, late fees, or service interruption while this dispute is under review. The Public Service Commission has advised me to make only the standard payment and nothing toward the disputed amount. That payment is enclosed.

Thank you for your prompt attention to this matter. I look forward to your response.

Utility Name: Meade County Water District

State the nature of your concern: I previously filed a complaint against Meade Co Water Department on 3/23/26 regarding substantial usage billed to my account. Today, I received a call from MCWD that I again have high usage for the March billing period. This is a continuing concern because after MCWD put in a new meter and verified that the old meter was not working correctly, they refused to come back out and check the new meter to make sure it was not running out of control. They advised they would read the meter again on our about April 3 and I would have to wait until then. Additionally, when mowing my yard for the first time this season over this past weekend, I discovered MCWD had not properly replaced the cover to the meter and had not only left the bolt unfastened, but also left the lid at an angle so that when I mowed, the blade hit the cover, broke it, and also dented my \$4000.00 zero turn mower. I dont know if this was intentional but it is certainly on par with the very sloppy work this water department performs on a regular basis. To sum up events to date: March 11 - MCWD calls with auto message that February usage was high March 11 - Knights Mechanical (ETown) came out to check for leaks; nothing was found; high water usage stopped (according to hourly usage reports) when the plumber took the cover off the meter and pulled the wires out of the ground where they had grown in ~March 18 - MCWD pulls hourly report from old meter (not sure of date as they said they came out four days prior and talked to me (I never saw anyone) but later said they came out on a later date ~March 20 - MCWD changes out meter; confirms it is not running correctly but says its slow and that I should be glad theyre not charging me more even though they cannot verify how many gallons were used - or NOT used. -March 24 - Requested meter be checked again to make sure its not running high; MCWD refuses; says to wait until they read meter again in early April -April 8 - Receive another automated call from MCWD that usage for March is high

Have you contacted the utility about the problem: Yes

RE: Account Number: [REDACTED]
 Customer Name: Kelley Jeans
 Service Address: 165 Diana Lane, Vine Grove

Mr. Pyles,

I have received no response either from your office or the Public Service Commission in response to my complaint about charges on my account from a faulty meter or the damages to my mower from an improperly installed meter cover.

Based on PSC's directive to refrain from paying any portion of the disputed amount of my bill which includes meter usage from 02/03/26 – 03/11/26, I am submitting payment for my standard water usage average of \$28.00.

Thank you,

Kelley Jeans

Thank you, Mr. Pyles.

I did contact the PSC. They say they have not made a determination yet and are not sure who you spoke with in their office because they had not even spoken with me yet.

In addition to forwarding them the latest traffic from your office, I will also forward the entire packet to the Division of Water and the AG's office as well.

Subject: Kelley Jeans - 165 Diana Lane Billing Dispute

Good morning, Mr. Pyles.

I have received your phone messages yesterday and today. I requested a response in writing for two reasons: first, to protect you and me in this dispute. Second, I am hearing impaired and want to make sure I understand any conversation completely.

Your message seemed to indicate, though my name is Jeans, not James, that I have not filed a formal complaint with the PSC. The copies of the two complaints I sent to you were the courtesy copies the PSC emailed to me after I filed the complaint through their "Online Complaint Form." They appear to be very clear in how to file a formal complaint on their website. Please see this link:

[Utility Service Complaint Instructions](#)

Utility Service Complaint Instructions

KY PSC

Additionally, please note their guidance to customers filing complaints with utility service companies:

THE UTILITY WILL NOT DISCONTINUE YOUR SERVICE if you have a billing complaint pending before the Commission as long as you pay the undisputed amount of your bill and continue to pay your regular monthly bills.

Since the PSC still has not responded, I will send all documentation by certified mail to their office in Frankfort. I would like to get this resolved as soon as possible and still, quite frankly, am confused as to why this is a dispute at all. I've never had excessive usage. Actual licensed plumbers came out on March 11 and found no sign of leakage anywhere - faucets, toilets, underground, yet the usage went back to normal at the exact same time they pulled the cover off the meter. This was indicated very clearly by your own hourly usage report. Your own office stated the old meter wasn't running correctly and you yourself told my property manager that the meter was years past time when it should have been replaced. Given that there was no excessive usage before and none since the meter cover was taken off and the meter was subsequently replaced, this seems to be a clear issue with the meter.

I will forward you a copy of the hard copy complaint I'm filing with the PSC along with my next water bill payment.

Good afternoon -

I have submitted two complaints regarding Meade Co Water District and have received no response. I'm attaching further information - the hourly read for the old meter - note the decreased usage on 3/11 at noon when the plumbers from Knights Mechanical showed up and took the cover off the meter. They had to dig all the wires out of the dirt and grass to even be able to take the cover off the meter. I'm also attaching the invoice from Knights Mechanical with the report of their findings. Additionally, I'm including a letter sent to me by Brett Pyles at Meade Co Water one day after telling me I had not filed a formal complaint with the PSC.

I received a call today that MCWD will turn off my water tomorrow for non-payment ahead of the long weekend for the holiday. I would really appreciate a reply so that I know which direction to go since they should not be able to turn off my water while you're investigating the dispute. I would hope you would have communicated with me, the person who filed the complaint, about the status of the complaint instead of the organization against whom I filed a complaint.

RE: Formal Billing Dispute, Preservation of Evidence Demand, and Notice
Regarding Threatened Disconnection

Account Number: [REDACTED]
Customer Name: Kelley Jeans
Service Address: 165 Diana Lane, Vine Grove

Mr. Pyles,

I am formally disputing the excessive water charges associated with the above-referenced account.

After receiving a bill reflecting unusually high water usage inconsistent with my historical consumption, I retained a licensed plumber to inspect the property for leaks or other internal causes. The plumber found no leaks or plumbing defects within the property and identified the water meter as the likely source of the inaccurate readings.

Your department has acknowledged that the meter was inaccurate and/or faulty. Despite this acknowledgement, the utility has refused to make an appropriate adjustment to the disputed charges and continues to demand payment for usage that cannot be verified as accurate.

I have filed a complaint with the Kentucky Public Service Commission regarding this matter. To date, I have not received any formal notice, dismissal order, or other communication from the Commission indicating that my complaint has been dismissed or resolved. However, your attorney has represented in writing that the Commission dismissed the complaint. If that representation is inaccurate, I consider it extremely serious and request immediate clarification.

Additionally, your department has threatened disconnection of my water service over the disputed amount. I dispute both the validity and enforceability of the excess charges and object to any attempt to disconnect service while this billing dispute remains unresolved.

Accordingly, you are hereby placed on notice to preserve all evidence related to this matter, including but not limited to:

1. The original water meter removed from service.
2. Any testing, calibration, inspection, or accuracy reports relating to the meter.
3. Meter replacement records.

4. Historical usage data for my account.
5. Internal notes, emails, and communications regarding this dispute.
6. Communications with legal counsel regarding my PSC complaint.
7. Any records concerning the decision to threaten disconnection or collection activity.

Destruction, alteration, disposal, or failure to preserve relevant evidence after receipt of this notice may constitute spoliation of evidence.

I also formally request copies of:

1. All meter testing documentation
2. The date of the meter's last calibration or inspection
3. Any reports supporting the claimed usage
4. Any written policy relied upon in refusing to adjust the disputed charges
5. Any documentation indicating the PSC complaint was dismissed.

Nothing in this correspondence shall be construed as an admission of responsibility for the disputed charges.

I request written confirmation within ten (10) business days that:

1. The account will not be disconnected while the dispute remains pending; and
2. All relevant evidence has been preserved.

Please direct all future communications regarding this matter to me in writing.

Thank you,

Kelley Jeans

RE: Formal Dispute of Water Charges/Preservation of Evidence

Dear Mr. Shufelt,

I am writing in response to your correspondence regarding the disputed water charges associated with my MCWD account at 165 Diana Lane, Vine Grove.

As you are aware, I disputed these charges after receiving an abnormally high bill reflecting excessive water usage inconsistent with the property's historical consumption. I retained a licensed plumber to inspect the property, and no leaks or customer-side defects were identified. The plumber advised that the issue appeared to originate from the meter itself. The utility has since acknowledged that the meter was inaccurate.

Despite this acknowledgement, the utility continues to demand payment for disputed excess charges and has threatened disconnection of service.

I also filed a complaint with the Kentucky Public Service Commission regarding this matter. Your letter states that the PSC complaint has been dismissed; however, I have received no dismissal order, communication, findings, or other notification directly from the PSC confirming that assertion. Until verified directly through the Commission, I dispute the accuracy of that representation.

Please consider this correspondence formal notice that:

1. I dispute the excess charges associated with the inaccurate meter;
2. I dispute any attempt to characterize the matter as resolved absent written confirmation from the PSC;
3. I object to any attempt to disconnect water service while this billing dispute remains unresolved; and
4. I demand preservation of all evidence related to this matter.

Accordingly, the utility and its agents are directed to preserve all documents, electronically stored information, physical evidence, and communications related to:

1. The disputed meter;
2. Meter testing, calibration, inspection, and replacement records
3. Historical use data;
4. Billing calculations;
5. Internal communications;

6. Internal communications regarding my account;
7. Communications with the PSC;
8. Photographs, field notes, and technician reports; and
9. Any communications concerning collection activity or disconnection of service.

If the meter has been removed, altered, discarded, or destroyed, please provide the date of removal and the identity of all persons involved in its handling and testing.

Any attempt to disconnect service while the disputed charges remain under review may constitute wrongful termination of essential utility service and may result in additional legal and regulatory action.

I remain willing to resolve this matter reasonably and in good faith. However, I expect the utility to suspend collection and disconnection efforts pending proper review of the disputed charges and the meter irregularities already identified.

Please direct all future communications regarding this matter to me in writing.

Sincerely,

Kelley Jeans

RE: Request for Escalation and Immediate Review of Utility Billing Dispute

Complaint Number: Unknown
Complaint Date: 4/8/2026
Utility: Meade County Water District
Account Number: [REDACTED]

To Whom It May Concern:

I am requesting immediate review and escalation of my complaint regarding disputed water charges assessed by Meade County Water District.

This dispute began after I received a water bill reflecting abnormally high usage that was entirely inconsistent with the historical consumption at my property. In response, I retained a licensed plumber to inspect the property for leaks or other customer-side causes. The plumber found no leaks or plumbing defects and advised the issue appeared to originate from the utility meter itself.

The utility subsequently acknowledged that the meter was inaccurate and/or faulty. Despite this acknowledgement, the utility has refused to make an appropriate adjustment to the disputed charges and continues to demand payment for alleged excess usage generated by the inaccurate meter.

I filed a complaint with the Commission seeing review of this matter. However, I have received no formal dismissal order, findings, decision, or other communication from the PSC regarding the status of my complaint.

Despite this, the utility's attorney recently sent correspondence stating that that PSC complaint had been dismissed. Because I have not received any notification directly from the Commission confirming that statement, I am requesting immediate clarification regarding:

- The current status of my complaint;
- Whether any dismissal or closure has occurred;
- Whether the utility accurately represented the status of the matter; and
- Whether the utility may pursue disconnection during an unresolved billing dispute involving an acknowledge inaccurate meter.

Additionally, the utility has threatened disconnection of my water service if I do not pay the disputed charges. I believe this action is improper while the dispute remains unresolved and while questions regarding meter accuracy remain outstanding.

I respectfully request that the Commission:

1. Review and reopen or escalate this complaint if necessary;
2. Investigate the utility's handling of the disputed charges;
3. Determine whether the utility improperly represented the status of the PSC complaint;
4. Require preservation and production of meter testing and billing records;
5. Prevent disconnection of service pending resolution of the dispute.

I am attaching supporting documentation including:

- The disputed bills;
- Plumber findings/report;
- Correspondence from the utility and/or its attorney
- My prior dispute communications

Thank you in advance for your attention to this matter. I respectfully request written confirmation of the complaint status and any next steps required by the Commission.

Sincerely,

Kelley Jeans
