HAND DELIVERED

Jeff R. Derouen Executive Director Public Service Commission 211 Sower Boulevard P.O. Box 615 Frankfort, KY 40602-0615

RECEIVED MAR 3 0 2012 PUBLIC SERVICE COMMISSION

RE: Case No. 2009-00459

Dear Mr. Derouen:

Enclosed please find the original and ten copies of Kentucky Power Company's 2011 Reliability Report. It is being filed in conformity with paragraph 5(d) the Commission's June 28, 2010 Order in Case No. 200-00459.

Please do not hesitate to contact me if you have any questions.

Very truly yours,

STITES & HARBISON, PLLC Mark R. Overstreet

MRO

cc: Dennis G. Howard II (with enclosure) Michael L. Kurtz (with enclosure)

COMMONWEALTH OF KENTUCKY

BEFORE THE PUBLIC SERVICE COMMISSION

RECEIVED

MAR 30 2012 PUBLIC SERVICE COMMISSION

RESPONSE OF KENTUCKY POWER COMPANY IN CONFORMITY WITH PARAGRAPH 5(d) OF THE UNANIMOUS SETTLEMENT AGREEMENT, APPENDIX A TO THE COMMISSION ORDER IN CASE NO. 2009-00459 DATED JUNE 28, 2010

March 30, 2012

KPSC Case No. 2009-00459 In Conformity With Paragraph 5(d) Of the Unanimous Settlement Agreement Page 1 of 2 Filed March 30, 2012

In accordance with the Public Service Commission's Order dated June 28, 2010, in Case No. 2009-00459, Kentucky Power makes the following report regarding its distribution vegetation management program for the 2011 calendar year:

System Performance (SAIFI, CAIDI, and SAIDI)

The first set of reliability information includes the Kentucky Power System Average Interruption Frequency Index, the Customer Average Interruption Duration Index, and the System Average Interruption Duration Index for the reporting period, known in the industry as SAIFI, CAIDI, and SAIDI, respectively. Kentucky Power has included these system performance numbers, excluding major events as defined by IEEE standard 1366, for the past five years:

Calendar Year	SAIFI	CAIDI	SAIDI
2007	2.276	146.9	334.2
2008	2.904	170.9	496.3
2009	2.556	194.5	497.1
2010	2.470	169.4	418.4
2011	3.085	195.4	602.8

The increase in SAIDI for 2011 is largely attributed to the extraordinary weather experienced during the year. This is evidenced by the fact that 2011 was a record year for precipitation in eastern Kentucky as we experienced a record level of 62.46 inches (NWS at Huntington, WV) or 48% above the average annual precipitation of 43.1 inches.

Since there was plenty of moisture to support tree growth, we did experience an increase of outages and SAIDI for "Vegetation Inside R/W" outage cause. With the additional rain saturating the ground, we also experienced a large increase in trees uprooting and falling into the line as well as trees sliding down the mountain into the line.

In addition, rainy weather has an influence on the failed equipment outages. Cutout failures are the biggest contributor to failed equipment. It has been demonstrated that most defective cutouts will cause outages after rain has dampened the pole and hardware.

2011 Distribution Vegetation Management (VM) Work by Circuit

See Attachment 1 for vegetation management work performed on each distribution circuit for 2011. The units reported are miles completed, acres of brush cut, acres of brush sprayed, trees removed and trees trimmed.

2011 Distribution Operation & Maintenance VM Work by Circuit

See Attachment 1 for the total expenditures for vegetation management work on each distribution circuit in 2011. RWM, AEP's software program for tracking vegetation work and expenditures, does not separate the O&M and Capital expenditures for the circuits worked during the year. Therefore the costs in Attachment 1 represent the total O&M and Capital expenditures for each circuit in 2011.

Also, expenditures shown in this attachment do not include all costs associated with the Vegetation Maintenance Program. Expenses associated with Internal Company Labor & Fleet, unscheduled hotspot and trouble restoration work, incentive program for tree contractor employees, materials (herbicides for the Spray Program), contract foresters, tree contractor's field supervision, and contract work planners are not allocated to a circuit.

2011 Distribution Vegetation Management Plan - Additional Information

Kentucky Power's Distribution Vegetation Management Program changed midyear 2010 from a performance-based maintenance program to a full-circuit maintenance program aimed at moving our VM Program to a cycle-based approach. The transition to a cycle-based program is estimated to take 7 years.

Maintenance was completed on 1,871 miles of line while our goal was to achieve maintenance on 2,295 miles of line. This goal was not achieved due to underestimating the amount of work required to re-clear some circuits which had not been maintained for a number of years. 2,064 acres were sprayed, which exceeded the company's goal of 2,006 acres.

The total 2011 O&M expenditures for the VM Program were \$17,245,255, or \$7,290 above the Settlement annual amount of \$17,237,965, as shown below.

Total VMP O&M	\$ 17,245,255
Settlement Agreement Paragraph 5(a)	\$ 7,237,965
Settlement Agreement Paragraph 5(b)	\$ 10,000,000
Total Settlement Agreement	\$ 17,237,965
Amount spent above the agreement	\$ 7,290
