RE: PSC Case No. 2012-00178  
Farmdale Water District

Dear Ms. Faulkner:

Construction of the above referenced project started in July 2012. The project is now approximately 85% complete and we anticipate substantial completion in late May 2013. As directed, Farmdale has prepared the attached sample testing program for the iPerl meters.

If you have any questions or need additional information, please call.

Sincerely,

  
David R. Johnson  
Farmdale Water District

**Proposed iPERL sampling test plan:**

The following proposed plan shall represent Farmdale Water District's compliance with the requested additional testing for the iPERL meter technology. A total of 2700 5/8" x 3/4" water meters were installed during a complete meter system change out and upgrade to vehicle based radio read technology. The installed meter technology (iPERL) exceeds the current ANSI/AWWA standard C-700 and C-710 for accuracy and pressure loss standards and also complies with AWWA testing procedures for flow rate and accuracy percentage. The manufacturer test results are included in this document as "figure 1".

The proposed testing to verify the technology is accurate and reliable shall include a monthly random sample of 12 meters be removed and tested on a Kentucky Public Service Commission certified bench and operator to verify the accuracy based upon AWWA Meter test table for displacement type meters as this is the toughest standard for accuracy. The monthly testing shall continue for a period of twelve months for a total of 144 random meters throughout the system. This total shall provide a 5% representative sample of the whole district and illustrate to the PSC the reliability and accuracy of the proposed technology. Upon completion of the 12 monthly test (April 2013 – April 2014) the additional sampling program will be discontinued with the expectation that all meters will meet or exceed the accuracy requirements and provide the necessary data to satisfy and PSC concerns.
