Re: Case No. 2012-00013
Subject: RF 100-Meter Pilot Project

Dear Mr. Derouen:

Licking Valley RECC has ten (10) meters and collectors installed for the RF 100 – Meter Pilot Project. These meters are collecting and recording data. Scheduling for all the equipment and meters to be installed and scheduling employee training is taking longer than anticipated by Licking Valley RECC and the contractor, therefore results are not available.

Licking Valley RECC is asking for an extension until February 20, 2016 to submit results of the pilot project to the Commission. If the results of the “100-Meter Pilot Project” are successful Licking Valley will follow-up with a letter and file for a CPCN, requesting system-wide application and installation of Landis+Gyr digital meters.

Thank you for your consideration in this matter.

Sincerely,

Kerry K. Howard
General Manager/CEO
