GENERAL SERVICE RATE\* AMENDED

(RATE GS)

Rate:

Customer Charge:

\$3.50 per meter per month for single-phase service  
\$7.50 per meter per month for three-phase service

Winter Rate: (Applicable during 8 monthly billing periods  
of October through May)

All kilowatt-hours per month 5.850¢ per Kwh

Summer Rate: (Applicable during 4 monthly billing periods  
of June through September)

All kilowatt-hours per month 6.603¢ per Kwh

Minimum Bill:

The minimum bill for single-phase service shall be  
the customer charge.

The minimum bill for three-phase service shall be the  
customer charge; provided, however, in unusual circum-  
stances where annual kilowatt-hour usage is less than  
1,000 times the kilowatts of capacity required, Company  
may charge a minimum bill of not more than 85¢ per  
month per kilowatt of connected load.

SPECIAL RATE FOR NON-RESIDENTIAL ELECTRIC  
SPACE HEATING SERVICE - RATE GS\*

Rate:

For all consumption recorded on the separate meter during  
the heating season the rate shall be 4.203¢ per kilowatt-  
hour. This special rate shall be subject to the Primary  
Service Discount, Fuel Clause and Prompt Payment Provision  
as are embodied in Rate GS. During the four non-heating  
season months any electric usage recorded on the separate  
space heating meter shall be billed at the Kwh charge under  
Rate GS.

Minimum Bill:

\$6.10 per month for each month of the "heating season".  
This minimum charge is in addition to the regular  
monthly minimum of Rate GS to which this rider applies.

\* The monthly kilowatt-hour usage shall be subject to plus or  
minus an adjustment per Kwh determined in accordance with  
the Fuel Adjustment Clause.

Interruptible Service

Applicable:

To Large Commercial Rate LC and Industrial Power Rate LP.

Availability:

Available for separately metered interruptible service to any customer whose interruptible contract demand is at least 1,000 kilowatts.

Rate:

The monthly bill for service under this rider shall be determined in accordance with the provisions of either Rate LC or Rate LP, except there shall be an interruptible demand credit determined in accordance with one of the following categories of interruptible service:

<u>Interruptible Service Categories</u>	<u>Maximum Annual Hours of Interruption</u>	<u>Monthly Demand Credit (\$/Kw/Mo)</u>
1	150	1.14
2	200	1.49
3	250	1.86

The interruptible demand credit shall be applied to the monthly billing demand for interruptible service determined in accordance with the determination of billing demand provision under either Rate LC or Rate LP as applicable, except the billing demand shall not be less than 50 percent of the customer's contract demand.

Interruption of Service:

The Company will be entitled to require customer to interrupt service at any time and for any reason upon providing at least 10 minutes' prior notice. Such interruption shall not exceed 10 hours duration per interruption.

Penalty for Unauthorized Use:

In the event customer fails to comply with a Company request to interrupt either as to time or amount of power used, the customer shall be billed for the monthly billing period of such occurrence at the rate of \$15.00 per kilowatt of monthly billing demand. Failure to interrupt may also result in the termination of the contract.

Special Terms and Conditions:

1. The customer shall arrange his wiring so that interruptible service supplied under this rider shall be separately metered and segregated from firm service supplied under Rate LC or Rate LP.
2. Company will provide meter enclosure and furnish, place and maintain necessary suitable meter for measurement of service rendered hereunder. Customer will be responsible for installing and wiring the meter enclosure.
3. The minimum original contract period shall be one year and thereafter until terminated by giving at least 6 months previous written notice, but Company may require that a contract be executed for a longer initial term when deemed necessary by the size of the load or other conditions.
4. Except as specified above, all other provisions of Rate LC or Rate LP shall apply.

Supplemental or Standby Service

Applicable:

To Large Commercial Rate LC and Industrial Power Rate LP.

Availability:

Available to customers whose premises or equipment are regularly supplied with electric energy from generating facilities other than those of Company and who desire to contract with Company for reserve, breakdown, supplemental or standby service.

Rate:

Electric service actually used each month will be charged for in accordance with the provisions of the applicable rate schedule; provided, however, that the monthly bill shall in no case be less than an amount calculated at the rate of \$5.05 per kilowatt applied to the Contract Demand.

## RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

### Gas Service Restrictions

#### 2. New Customers.

(a) For Service Under Rate G-1. Single family dwelling units individually metered. Commercial and industrial customers and multi-family residences served through a single meter, provided the connected gas space heating load is not more than 4,000 cubic feet per hour. Company will have the right to limit the total connected load of all facilities to a maximum of 8,000 cubic feet per hour, when in Company's judgement such is necessary in order to enable it to continue to supply reliable service to existing customers.

(b) For Service Under Rate G-8. Commercial and industrial customers with connected gas space heating loads in excess of 4,000 cubic feet per hour; provided, however, that Company will not be obligated to supply such loads in excess of 40,000 cubic feet per hour. (When space heating service is supplied under Rate G-8, non-space heating load may be supplied under another rates schedule.)

(c) For Service Under Other Rate Schedules. Company may undertake to serve new customers with requirements in excess of those allowable under either of the above rate schedules when in its judgement actual and potential gas supplies are sufficient to enable it to do so. Company will designate the applicable rate schedule under which such service will be supplied.

#### 3. Increase in Service to Existing Customers.

(a) Additional Service Under Rate G-1. The Company will permit the addition of connected gas loads under Rate G-1; provided, however, that the total connected load of space heating equipment as increased shall not exceed 4,000 cubic feet per hour. Company will have the right to limit the total connected load of all facilities to a maximum of 8,000 cubic feet per hour, when in Company's judgement such is necessary in order to enable it to continue to supply reliable service to existing customers.

(c) Additional Service Under Other Rate Schedules.

Company may undertake to serve existing customers with additional requirements in excess of those allowable under either of the above rate schedules when in its judgement actual and potential gas supplies are sufficient to enable it to do so. Company will designate the applicable rate schedule under which such service will be supplied.

6. Transfer from G-8 to G-1. Any existing customer served under Rate G-8 may, upon application, be transferred to Rate G-1 if his total connected gas space heating load is not more than 4,000 cubic feet per hour. Company will not be obligated to make such transfer where the total connected gas load exceeds 8,000 cubic feet per hour.
8. Priority Considerations. If at any time, the Company is required to select among applicants for service as provided for in Paragraphs 2(c) or 3(c) above, it will, to the extent practicable, observe the following priorities in the order named:
  - (a) Schools, hospitals and similar institutions.
  - (b) Other commercial establishments.
  - (c) Industrial process and feedstock uses.
  - (d) Other industrial applications.

Curtailement Rules

1. Definitions.

Base Period: The 12 months ended with the October 1973 billing period; or, such subsequent period where new customers were added or increases in connected loads to existing customers were permitted in accordance with the Company's Gas Service Restrictions.

3. Pro-rata Curtailment. In order to meet seasonal and daily sendout requirements, to preserve underground storage deliverability, and to provide for adequate and timely underground storage injections, Company will implement pro-rata curtailment with respect to the classes of customers here listed.

- (a) Large Industrial Customers served on Rate G-1.
- (b) All customers served on Rate G-6.
- (c) Fort Knox, Non-domestic Usage.

Company will assign Monthly Base Period Volumes to each customer in the above classes. Not less than two weeks prior to the beginning of any monthly billing period, Company will notify in writing each customer in the classes named above of the percentage curtailment from such customer's Monthly Base Period Volume to be in effect in said monthly billing period, stating the Authorized Monthly Volume such customer is authorized to take during said monthly billing period.

During each month of the Winter Season curtailment will be first applied to Rate G-6 customers until such curtailment reaches 100% of Base Period Volumes (allowing, however, for continuation of Pilot Light Requirements in connection with alternate fuels). When the required curtailment level exceeds 100% as applied to Rate G-6 customers, the additional curtailment required will be apportioned at a uniform percentage to other customers subject to pro-rata curtailment under this Section 3. Provided, however, during any month of the Winter Season when Rate G-6 customers are being furnished all or a part of their Base Period Volumes, such service may be completely interrupted when and to the extent that Company deems such interruption necessary to preserve storage deliverability or to otherwise meet seasonal or daily sendout requirements.

During each month of the Summer Season the percentage of curtailment shall be uniform for all classes to which it applies.

Provided, however, in the case of Large Industrial Customers served under Rate G-1, Authorized Monthly Volumes shall be established so as to aggregate not less than 10,000 Mcf for a 12-month period.
