

COMMONWEALTH OF KENTUCKY  
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

THE APPLICATION OF MONROE COUNTY )  
WATER DISTRICT, OF MONROE COUNTY, )  
KENTUCKY, FOR APPROVAL OF CON- ) CASE NO. 9589  
STRUCTION AND FINANCING )

O R D E R

On January 21, 1987, an Order in this matter granted a certificate of public convenience and necessity to the Monroe County Water District ("Monroe Water"). Said certificate was for the construction of an \$823,100 waterworks improvements project financed by \$39,400 in applicant contributions and \$783,000 from the Farmers Home Administration (\$391,000 loan and \$392,000 grant).

The Commission's January Order mentioned the \$95,000 underrun from bids and stipulated that construction of a storage tank for the KY 100 service area east of Tompkinsville would be the first priority for additional construction. Monroe Water was ordered to prepare engineering documents for advertisement and construction of the tank and to obtain Commission approval for its construction. Said documents as prepared by GRW Engineers, Inc., of Nashville, Tennessee, ("Engineer") have been approved by the Division of Water of the Natural Resources and Environmental Protection Cabinet.

The Commission, after consideration of the plans for the proposed additional construction, is of the opinion and finds that:

1. The Order entered January 21, 1987, in this matter should be amended to include construction of a water storage tank for the KY 100 service area east of Tompkinsville.

2. The proposed storage tank is a standpipe type tank with a storage capacity of 20,700 gallons. The low bid including miscellaneous appurtenances in the amount of \$46,800 was submitted by the Caldwell Tank Company. Funds needed for this work including cost of the tank site, engineering design and construction inspection fees, etc., will total about \$59,500.

3. Construction of the proposed storage tank will satisfy that part of the January 21, 1987, Order which required construction of a storage tank. All other findings and orders set forth therein are applicable to the construction approved herein and should remain in effect until said construction has been completed and all pertinent documents have been filed as required.

IT IS THEREFORE ORDERED that:

1. Monroe Water be and it hereby is granted a certificate of public convenience and necessity to proceed with the proposed construction as set forth in the plans and specifications of record herein.

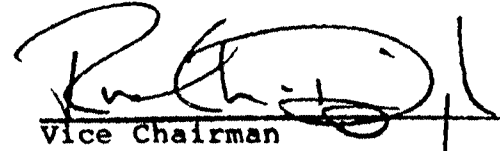

2. Financing of the construction by funds made available by construction bids below the Engineer's estimates as stipulated in the January 21, 1987, Order is hereby approved.

3. Monroe Water shall comply with findings 5 through 8 of the Commission's January 21, 1987, Order the same as if each were individually ordered herein.

Done at Frankfort, Kentucky, this 27th day of July, 1987.
