O R D E R

On June 21, 1988, the hearing on Case No. 9673 was continued generally for the sole purpose of receiving additional testimony and evidence from Western Fleming County Water District ("Western Fleming"). By letter dated August 5, 1988, Western Fleming was asked to file information by August 15, 1988, yet the record reflects no response was received. Western Fleming, through counsel, was contacted by phone August 24, 1988 and further by letter of August 25, 1988, requesting confirmation that Western Fleming had nothing more to add to the record and further hearings would not be needed. Again, no response was received.

The Commission after review of the record and being advised finds that since no further evidence or testimony has been presented on behalf of Western Fleming that no additional hearings are required and the case should stand submitted for a decision.
