Page 2 man and his 79 year old wife except there was the possibility of a leaky water closet, water faucets, or leak in the water line from the meter to the Complainant's house.

The Complainant employed a plumber to check for leaks in all water appliances and in the water lines. None was found. This complainant has requested an adjustment of the said statement for water usage for the period 8-15-91 to 11-15-91, but the Kentucky American Water Company has steadfastly refused to make an adjustment.

The report of the Commission staff as a result of its investigation was that it appears the Kentucky American Water Company has properly billed my account. This complaint does not contest that based on rates approved by the Commission for the water usage billed, that the billing was proper, but cannot see how this complainant and his wife, both elderly (83 and 79 years respectively) could possibly use 135,000 gallons of water in 82 days or 1600 plus gallons of water per day and there were no leaks in the water lines or appliances. Aside from the bill in question the balance of 1991 (three billing periods) averaged \$37.91 per period.

Wherefore, complainant asks that the Kentucky American Water Company make some reasonable (Specifically state the adjustment to compensate for the unexplained 500% plus increase for the period in question. If the bill cannot be relief desired.)

adjusted to equal the average of the other three periods in 1991, then the cost should be shared equally.
