IN RE: PUBLIC NOTICE - PUBLIC SERVICE COMMISSION OF KY
CASE NO. 95-446

To Whom It May Concern:

I am in receipt of Sam McNamara's letter of October 9 regarding the proposed construction and operation of a cellular radio telecommunication service. I am writing this letter to state my objections to the proposal to the Public Service Commission. There are a number of reasons why I feel the proposed tower should be placed in a more appropriate area and not at the proposed location.

My property lies at the edge of Eminence, Kentucky, near a densely populated residential area. My farm operates with both crop production and livestock. I have a cow/calf operation. I am particularly concerned that the proposed tower may result in increased electro-magnetic radiation which has been linked to cancer, stillborn calves, and other medical problems in both farm animals and humans. I do not feel it is necessary or appropriate to put the health of the citizens of Eminence at risk, nor do I feel that I should have my cattle exposed to such a risk.

Although I am currently operating agricultural business on my farm, which consists of approximately three hundred and seventy-five (375) acres, there is always the underlying realization that at some point in the future, I may chose to subdivide the acreage and convert its use from agricultural to residential. My acreage is in a prime location for residential use due to it lying at the edge of Eminence near existing residential areas. In light of this, the size, location and unsightly appearance of the proposed 400' tower would greatly reduce the value of my land.

Henry County should have numerous other available cites for the proposed structure which would be more appropriate. I do not feel that my farm animals or my real estate's value, nor the citizens of Eminence should bear the adverse consequences of placing the tower at the proposed site.

Very truly yours,

Joyce S. Puckett
