O R D E R

On July 24, 2001, Crown Communication Inc. and Cellco Partnership d/b/a Verizon Wireless ( Applicants ) filed an application seeking a Certificate of Public Convenience and Necessity to construct and operate a wireless telecommunications facility. The proposed facility consists of a guyed antenna tower not to exceed 375 feet in height, with attached antenna, to be located at 738 Mitchell Road, Burna, Livingston County, Kentucky. The coordinates for the proposed facility are North Latitude 37° 15 4.01 by West Longitude 88° 20 43.15 .

The Applicants have provided information regarding the structure of the tower, safety measures, and antenna design criteria for the proposed facility. Based upon the application, the design of the tower and foundation conforms to applicable nationally

recognized building standards, and a Licensed Professional Engineer has certified the plans.

The Applicants have filed applications with the Federal Aviation Administration ( FAA ) and the Kentucky Airport Zoning Commission ( KAZC ) seeking approval for the construction and operation of the proposed facility. Both decisions are pending.

The Applicants have filed evidence of the appropriate notices provided pursuant to Administrative Regulation 807 KAR 5:063. The notices solicited any comments and informed the recipients of their right to request intervention. On August 15, 2001, the Commission granted intervention to Michael H. and Deborah J. Alexander and Robert D. and Pearl Mitchell. A telephonic informal conference was held at the Commission on February 20, 2002 to discuss the matters of this case with the Applicants and the intervenors. On July 2, 2002, Mr. and Mrs. Alexander and Mr. and Mrs. Mitchell each filed with the Commission a waiver of their objection and a motion to withdraw their intervention.

The Commission, having considered the evidence of record and being otherwise sufficiently advised, finds that the Applicants have demonstrated that a facility is necessary to provide adequate utility service and therefore a Certificate of Public Convenience and Necessity to construct the proposed facility should be granted.

Pursuant to KRS 278.280, the Commission is required to determine proper practices to be observed when it finds, upon complaint or on its own motion, that the facilities of any utility subject to its jurisdiction are unreasonable, unsafe, improper, or insufficient. To assist the Commission in its efforts to comply with this mandate, the Applicants should notify the Commission if they do not use this antenna tower to provide

service in the manner set out in their application and this Order. Upon receipt of such notice, the Commission may, on its own motion, institute proceedings to consider the proper practices, including removal of the unused antenna tower, which should be observed by the Applicants.

IT IS THEREFORE ORDERED that:

1. The motions of Michael H. and Deborah J. Alexander and Robert D. and Pearl Mitchell to withdraw as Intervenors are granted.

2. The Applicants are granted a Certificate of Public Convenience and Necessity to construct a wireless telecommunications facility. The proposed facility consists of a guyed antenna tower not to exceed 375 feet in height, with attached antenna, and is to be located at 738 Mitchell Road, Burna, Livingston County, Kentucky. The coordinates for the proposed facility are North Latitude  $37^{\circ} 15' 4.01''$  by West Longitude  $88^{\circ} 20' 43.15''$ .

3. The Applicants shall file a copy of the final decisions regarding the pending FAA and KAZC applications for the proposed construction within 10 days of receiving the decisions.

4. The Applicants shall immediately notify the Commission in writing, if, after the antenna tower is built and utility service is commenced, the tower is not used for a period of 3 months in the manner authorized by this Order.

Done at Frankfort, Kentucky, this 7<sup>th</sup> day of August, 2002.

By the Commission

ATTEST:
