PARTNERSHIP BY CELLCO PARTNERSHIP)	
D/B/A VERIZON WIRELESS FOR ISSUANCE OF)	CASE NO.
A CERTIFICATE OF PUBLIC CONVENIENCE)	2025-00190
AND NECESSITY TO CONSTRUCT A WIRELESS)	
COMMUNICATIONS FACILITY IN THE)	
COMMONWEALTH OF KENTUCKY IN THE)	
COUNTY OF MARSHALL)	

ORDER

On June 13, 2025, TowerCom VI-C, LLC, a Delaware limited liability company and Kentucky RSA No. 1 Partnership by Cellco Partnership d/b/a Verizon Wireless (Verizon Wireless) (Applicants) filed an application seeking a Certificate of Public Convenience and Necessity (CPCN) to construct and operate a wireless telecommunications facility. The proposed facility consists of a tower not to exceed 300 feet in height, with attached antennas, to be located 313 Cole Cemetery Road, Benton, KY 42025 (36° 49' 18.57" North latitude, 88° 24' 39.72" West longitude).

Pursuant to 807 KAR 5:063, Applicants have filed statements of having provided the required notifications regarding the proposed construction.¹ Pursuant to 807 KAR 5:063, Applicants have filed evidence that the county judge/executive² and all property owners within 500 feet and contiguous to the cell site have been notified of the proposed

¹ Application, Exhibit J.

² Application, Exhibit L.

construction.³ The notices solicited any comments and informed the recipients of their right to request intervention.⁴ As of the date of this Order, one public comment was received on July 1, 2025. Applicants responded to the public comment on July 18, 2025, in the record.

Applicants filed applications with the Federal Aviation Administration and the Kentucky Airport Zoning Commission seeking approval for the construction and operation of the proposed facility. Both applications have been approved.

Applicants have provided information regarding the structure of the tower, safety measures, and antenna design criteria for the proposed facility.⁵ Based upon the application, the design of the tower and foundation conforms to applicable nationally recognized building standards, and a licensed professional engineer has certified the plans.

Applicants have provided information, including a radio frequency analysis, that the proposed facility is required to provide adequate service and improve its service coverage.⁶ Applicants have also provided information that there is no reasonable opportunity to co-locate its equipment on existing structures.⁷

To obtain a CPCN, Applicants must demonstrate a need for such facilities and an absence of wasteful duplication.⁸

³ Application, Exhibit K.

⁴ Application, Exhibit K.

⁵ Application, Exhibit B.

⁶ Application, Exhibit N.

⁷ Application, at 4.

⁸ *Kentucky Utilities Co. v. Public Service Com'n*, 252 S.W.2d 885 (Ky. 1952).

“Need” requires “a showing of a substantial inadequacy of existing service, involving a consumer market sufficiently large to make it economically feasible for the new system or facility to be constructed or operated.”⁹ “Wasteful duplication” is defined as “an excess of capacity over need” and “an excessive investment in relation to productivity or efficiency, and an unnecessary multiplicity of physical properties.”¹⁰ The wireless market is competitive and, other than the placement of towers and interconnection with other telecommunications providers, the Commission has little jurisdiction over wireless providers, including no jurisdiction over the rates and earnings of a wireless provider.¹¹

Having considered the evidence of record and being otherwise sufficiently advised, the Commission finds that Applicants have demonstrated that there is a need for the proposed facility as a result of increasing demand for telecommunications services, to assure adequate coverage in the area, and to improve cell service in Marshall County by providing interconnection between Applicants’ other sites forming a more cohesive network.

The Commission also finds that the proposed facility will not result in wasteful duplication. Building a new tower to improve telecommunication services and assure adequate coverage when there are no reasonable opportunities to co-locate the equipment required to do so is not wasteful duplication. The Commission, therefore, finds that a CPCN to construct the proposed facility should be granted.

⁹ *Kentucky Utilities Co. v. Public Service Com’n*, 252 S.W.2d 885, 890 (Ky. 1952).

¹⁰ *Kentucky Utilities Co. v. Public Service Com’n*, 252 S.W.2d 885, 890 (Ky. 1952).

¹¹ See KRS 278.54611.

Pursuant to KRS 278.280, the Commission is required to determine proper practices to be observed when it finds, upon complaint or on its own motion, that the facilities of any utility subject to its jurisdiction are unreasonable, unsafe, improper, or insufficient. To assist the Commission in its efforts to comply with this mandate, Applicants should immediately notify the Commission in writing if, after the antenna tower is built and utility service is commenced, the antenna tower is not used for three consecutive months in the manner authorized by this Order. Upon receipt of such notice, the Commission may, on its own motion, institute proceedings to consider the proper practices, including removal of the unused antenna tower, which shall be observed by Applicants.

IT IS THEREFORE ORDERED that:

1. Applicants are granted a CPCN to construct a wireless telecommunications facility. The proposed facility consists of a tower not to exceed 300 feet in height, with attached antennas, to be located at 313 Cole Cemetery Road, Benton, KY 42025 (36° 49' 18.57" North latitude, 88° 24' 39.72" West longitude).
2. Applicants shall immediately notify the Commission in writing if, after the antenna tower is built and utility service is commenced, the tower is not used for three consecutive months in the manner authorized by this Order.
3. Documents filed, if any, in the future pursuant to ordering paragraph 2 herein shall reference this case number and shall be retained in the post-case correspondence file.
4. This case is closed and removed from the Commission's docket.
