APPENDIX A

1. Select the month to be used as the base period (b). Include a comprehensive, detailed explanation of the factors considered in the selection of this month as being representative of the net generating cost per KWH, which LG&E can reasonably expect to incur during the next 2-year period.

2. Provide a calculation of the fossil fuel costs F(b) that LG&E proposes to use in calculating the base period fuel cost. This calculation should show each component of F as defined by 807 KAR 5:056. A detailed explanation of why the fuel cost in the selected base period is representative of the level of fuel cost which LG&E expects to incur during the next 2-year period should also be provided.

3. Provide a schedule showing each component of sales as defined by 807 KAR 5:056 in the selected base period (b). Give a detailed explanation of the reasons for LG&E's belief that the sales in the selected base period (b) are representative of the level of KWH sales which LG&E expects to derive from the level of fuel cost incurred during the selected base period (b).

4. Provide a schedule showing the calculation of LG&E's proposed increase or decrease in its base fuel cost per KWH to be transferred (rolled-in) to its base rate.
