

PRELIMINARY MAY 2007 DATA NOTIFICATION

BellSouth Telecommunications, Inc., d/b/a AT&T Kentucky (“AT&T Kentucky”) is considering making the changes described in this document to generate results for the May 2007 data month. Results for the May 2007 data month will be posted as follows:

Preliminary results June 20, 2007
Final results July 02, 2007

AT&T Kentucky provides Data Notifications each month in compliance with the SQM Plan. This order specifies that when AT&T Kentucky proposes making any changes to the methods by which performance data is calculated, it must provide written notice. This notice must be provided on the first business day of the month before the data month in which the change will be made. AT&T Kentucky must also provide notification if it is considering making changes to the method of calculating data for the following month.

ENCORE Releases may affect monthly data flows from the source systems (e.g., LEO, LESOG, etc.) that PMAP uses to calculate measurements. AT&T Kentucky will make changes to PMAP to ensure that data continues to be correctly captured as ENCORE Releases are implemented.

Ordering Measurements

- (1) *Affected Measures:* OSS-1 (ARI)

Description of Change: Currently, PMAP does not calculate the interval for transactions that receive a timeout response in LENS. AT&T Kentucky proposes to modify PMAP to calculate an interval for these transactions and include them in the overall interval calculations. (RQ7274)

Impact of Change: For July 2006 data, the LENS RSAG BY TN transactions changed from an average interval of 1.24 seconds without timeouts to 1.25 seconds with timeouts.

Collocation Measurements

- (2) *Affected Measures:* C-1 (ART), C-2 (AT), C-3 (MDD)

Description of Change: Prior to the implementation of the Regional SQM in each of the nine Southeastern states, each state’s Collocation measurements were mapped according to their “in effect” SQM. Now that the Regional SQM has been adopted by all states, AT&T Kentucky is proposing to provide efficiencies for membership mapping and coding for all Collocation measures. The nature of

the change will not affect the data, but will allow for greater expediency in data processing and report production. (RQ8899)

Impact of Change: No change to reported results.

Special Access Measurements

(3) *Affected Measures:* SA-1, SA-2, SA-3

Description of Change: Currently, PMAP is not excluding certain possible variations of the NO ORDER message, which is manually typed into the ASR. AT&T Kentucky proposes to add additional variations of this field, which has the intent of "No Order." (RQ8991)

Impact of Change: No change to reported results.
