Re: Case No 2002-00149
Kentucky Mountain Power, LLC
Enviropower, LLC
Merchant Power plant.

Dear Mr Norman,

I am Pauline Stacey

I live on 1087 the road that Kentucky
Mountain Power LLC, wants to use for
a haul road for the construction of
the Merchant power plant.

I live close to the road 1087
the dust and mud as well as the
increased diesel emissions as well
has the noise will have a risk to
my home and land, as we have a health

Bulan, Ky
7-10-02

risk for my husband, He has bad lungs
only 25% breathing. I also have bad lungs.

The 420 additional vehicles as
well as the tractor trailers plus regular
traffic would be substantially risk for
not only KY 1087 but KY 476 the roads
aren't not wide enough.

The mud hauled off
the site would turn to dust when
it dries up, it is bad enough right now
the company doesn't care what people
takes. I can't keep anything clean or get
out and sit on my porch or yard you
can't breath out side for the dust. The trucks
stop in front of my house, making
diesel emission and noise. If 420
more trucks are allowed, this would
also be a public risk, because of school
buses traveling the road. This could
cause accidents. The mud is so slick
I have seen tractor trailer almost hit
school buses in front of my house.

I am asking you to make
the company to use the other access road.

Bulan, Ky
7-10-02

they have that goes straight on to
Ky 80 or built the bridge the state
is supposed to built them straight from
Ky 80 to the construction site, this
would eliminate the potential adverse
effect on citizens living on Ky. 1087

I am asking for a formal hearing
on this matter. Please the siting board
should require the company to do what
they said they would do.

I also don't think the transmission
lines for a total of some 25.5 miles should
disturb local land owners. I look forward
hearing from the board.

Thank you
Pauline Stacy
