**Written Comment Form**  
Must be received by January 2, 2002.

Dear Sir,

I wanted to let you know I oppose the  
trash burning facility being considered near  
Winchester, Ky. I have friends who live near  
the proposed area and they are concerned about  
health issues such as air quality and long term  
effects on the environment.

Sincerely,

Dan Taulbee

No impacts to the general public's health and safety would be expected from the combustion of RDF. Incremental increases in air emissions from operation of the CTs and cooling tower would be a very small fraction of the relevant federal and state ambient air quality standards (less than 1 percent for gaseous pollutants such as nitrogen dioxide, sulfur dioxide, and carbon monoxide and less than 4 percent of the federal 24-hour PM<sub>10</sub> standard). There would be no significant short- or long-term air quality impacts and health risks are expected to be minor.
