

REQUEST: The ILEC parties and CLEC parties shall provide the following:

- a. The aggregated annual (including annualized revenues for new customer accounts of less than one year) revenues generated from all customer accounts by wirecenter in the service area must be identified for those customers utilizing high-capacity switch (DS1 and higher) services. In calculating revenues, if there are revenues flowing to affiliated companies for other services such as wireless, data or Internet provision, identify and include these revenues in the aggregated revenue calculation for 2001, 2002 and year-to-date 2003.
- b. The annual revenue generated by the smallest (in terms of revenue and in number of lines) DS1 service customer account in each wirecenter in 2002 and year-to-date 2003.
- c. The number of DS1 service customer accounts and the aggregate revenue in each wirecenter which has been lost to competitors in 2001, 2002 and year-to-date 2003.

ORIGINAL RESPONSE:

- a. BellSouth is currently in the process of gathering this information. BellSouth needs additional time to respond to this interrogatory request and will supplement this response as soon as possible, but in any event, no later than November 21, 2003.
- b. BellSouth is in the process of investigating this request and will provide a supplemental response as soon as possible.
- c. BellSouth is in the process of investigating this request and will provide a supplemental response as soon as possible.

SUPPLEMENTAL RESPONSE:

- a. Attached are the revenues by wire center for customers utilizing DS1 and higher services for the periods requested. All revenues were earned by BellSouth Telecommunications, Inc. with none flowing to affiliated companies. Since the revenue associated with new customer accounts is not readily available from the Company's accounting records, no annualization of revenue from new accounts is included in this response. This information is proprietary and is being provided pursuant to the confidentiality petition filed herewith.

- b. BellSouth does not maintain accounting records to determine the smallest (in terms of revenue and in number of lines) DS1 service customer account in each wire center. To assist staff, BellSouth has calculated the tariff rates it would charge a customer using BellSouth's Primary Rate Interface ("PRI") service. This calculation assumes that the PRI is equipped at one-third of its full capacity, e.g., eight Basic Rate channels. A customer would pay \$1002 per month on a twelve month contract.

- c. BellSouth has attached responsive information. This information is proprietary and is being provided pursuant to the confidentiality petition filed herewith.
