**Re: Response of Comcast Business Communications, Inc. to the Commission's Data Request Regarding Implementation of the Federal Communications Commission's Triennial Review PSC 2003-00379**

Dear Ms. Chambers:

By this letter, Comcast Business Communications, Inc. ("CBC") advises BellSouth Telecommunications, Inc. ("BellSouth") that it has no local exchange operations, competitive access or facilities-based in the state of Kentucky. CBC's operations in Kentucky are currently limited to the switchless resale of interexchange service to a very small number of interexchange customers in the state. As such, CBC believes that its operations in Kentucky are outside the scope of BellSouth's inquiry in the above captioned matter.

As noted above, CBC believes that the request for interrogatories and production of documents does not apply to CBC, that they were served on CBC in error, and that the company is not required to prepare or submit responses to BellSouth or other parties to this proceeding.

If you have any questions with respect to this letter, please contact the undersigned.

Sincerely,

John G. Sullivan  
Vice President & Chief Counsel  
Comcast Phone, LLC
