To Whom It May Concern:

I wanted to write to voice my opposition to Kentucky American Water Company's proposed rate adjustment. While their proposed discount to low income customers is admirable and should be maintained, the request for a rate increase is likely tied to the vast amount of money they have spent on the legal bills associated with fighting the local takeover, and any rate increase at this point is unconscionable and an unfair penalty to their customers.

I hope you will deny their request for a rate increase.

Respectfully submitted,

Leila Salisbury
