

## **PRELIMINARY MAY 2009 DATA NOTIFICATION**

BellSouth Telecommunications, Inc., d/b/a AT&T Kentucky (“AT&T Kentucky”) is considering making the changes described in this document to generate results for the May 2009 data month. Results for the May 2009 data month will be posted as follows:

Preliminary results	June 19, 2009
Final results	June 30, 2009

AT&T Kentucky provides Data Notifications each month in compliance with the SQM Plan. The Plan specifies that when AT&T Kentucky proposes making any changes to the methods by which performance data is calculated, it must provide written notice. The notice is provided on the first business day of the month before the data month in which the change will be made. The Plan also requires AT&T Kentucky to provide notification if it is considering making changes to the method of calculating data for the following month.

ENCORE Releases may affect monthly data flows from the source systems (e.g., LEO, LESOG, etc.) that PMAP uses to calculate measurements. AT&T Kentucky will make changes to PMAP to ensure that data continues to be correctly captured as ENCORE Releases are implemented.

System releases related to the merger between BellSouth and AT&T may affect monthly data flows from the source systems that PMAP uses to calculate measurements. AT&T Kentucky will make changes to PMAP to ensure that data continues to be correctly captured as system changes are implemented.

### **Collocation Measurements**

- (1) *Affected Measures:* ART  
C-1 Collocation Average Response Time [ART]

*Description of Change:* Currently AT&T Kentucky does not capture records for the Collocation Average Response Time measurement where a CLEC has negotiated due dates. AT&T Kentucky proposes to modify the code in accordance with the business rules so that records with negotiated due dates are included. (RQ9802)

*Impact of Change:*

For the January 2009 data-month, in Georgia two negotiated Physical Cageless - Augment records were excluded. The Physical Cageless - Augment results would change from twelve days to respond to a collocation application to nine days to respond to a collocation application.

For the January 2009 data-month, in Georgia six negotiated Physical Caged - Augment records were excluded. The Physical Caged - Augment results would change from seven days to respond to a collocation application to eight days to respond to a collocation application.

This change has no impact to reported metric results for Florida.
