

PRELIMINARY JULY 2008 DATA NOTIFICATION

BellSouth Telecommunications, Inc., d/b/a AT&T Kentucky (“AT&T Kentucky”) is considering making the changes described in this document to generate results for the July 2008 data month. Results for the July 2008 data month will be posted as follows:

Preliminary results	August 20, 2008
Final results	August 29, 2008

AT&T Kentucky provides Data Notifications each month in compliance with the SQM Plan. This order specifies that when AT&T Kentucky proposes making any changes to the methods by which performance data is calculated, it must provide written notice. This notice must be provided on the first business day of the month before the data month in which the change will be made. AT&T Kentucky must also provide notification if it is considering making changes to the method of calculating data for the following month.

ENCORE Releases may affect monthly data flows from the source systems (e.g., LEO, LESOG, etc.) that PMAP uses to calculate measurements. AT&T Kentucky will make changes to PMAP to ensure that data continues to be correctly captured as ENCORE Releases are implemented.

System releases related to the merger between BellSouth and AT&T may affect monthly data flows from the source systems that PMAP uses to calculate measurements. AT&T Kentucky will make changes to PMAP to ensure that data continues to be correctly captured as system changes are implemented.

Ordering Measurements

- (1) *Affected Measures:* O-8 (RI – Reject Interval)

Description of Change: This measure should only capture responses that AT&T Kentucky sends to a CLEC’s LSR or ASR that are clarifications. AT&T Kentucky discovered that for Local Interconnection Trunks, when the CLEC sends in a corrected ASR, these CLEC corrections are being counted as clarifications in error. AT&T Kentucky proposes to modify the code to be in accordance with the business rules so that these CLEC corrections are not counted as clarifications by AT&T Kentucky. (RQ9401)

Impact of Change: For July 2007 the Florida metric would have changed from 84.06% to 100.00%.
