**Carrier Notification
SN91085039**

Date: February 25, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) – **REVISED** - Triennial Review Remand Order (TRRO) -
Unbundling Rules (Originally posted on February 11, 2005)

On February 4, 2005, the Federal Communications Commission (FCC) released its permanent unbundling rules in the Triennial Review Remand Order (TRRO).

The TRRO has identified a number of former Unbundled Network Elements (“UNE”) that will no longer be available as of March 11, 2005, except as provided in the TRRO. These former UNEs include all switching¹, as well as certain high capacity loops in specified central offices², and dedicated transport between a number of central offices having certain characteristics,³ as well as dark fiber⁴ and entrance facilities⁵.

The FCC, recognizing that it removed significant unbundling obligations formerly placed on Incumbent Local Exchange Carriers (ILEC), adopted transition plans to move the embedded base of these former UNEs to alternative serving arrangements.⁶ The FCC provided that the transition period for each of these former UNEs (loops, transport and switching), would commence on March 11, 2005.⁷ The FCC made provisions to include these transition plans in existing Interconnection Agreements through the appropriate change of law provisions. It also provided that rates for these former UNEs during the transition period would be trued up back to the effective date of the TRRO to reflect the increases in the prices of those former UNEs that were approved by the FCC in the TRRO.

The FCC took a different direction with regard to the issue of “new adds” involving these former UNEs. With regard to each of the former UNEs the FCC identified, the FCC provided that no “new adds” would be allowed as of March 11, 2005, the effective date of the TRRO. For instance, with regard to switching, the FCC said, “This transition period shall apply only to the embedded customer base, and does not permit competitive LECs to add new customers using unbundled access to local circuit switching.”⁸ The FCC also said “This transition period shall apply only to the embedded customer base, and does not permit competitive LECs to add new UNE-P arrangements using unbundled access to local circuit switching pursuant to section 251 (c)(3) except as otherwise specified in this Order.” (footnote omitted)⁹

¹ TRRO, ¶199

² TRRO, ¶¶174 (DS3 loops), 178 (DS1 loops)

³ TRRO, ¶¶126 (DS1 transport), 129 (DS3 transport),

⁴ TRRO, ¶¶133 (dark fiber transport), 182 (dark fiber loops)

⁵ TRRO, ¶141

⁶ TRRO, ¶¶142 (transport), 195 (loops), 226 (switching)

⁷ TRRO, ¶¶143 (transport), 196 (loops) 227 (switching)

⁸ TRRO, ¶199

⁹ TRRO, ¶227

The FCC clearly intended the provisions of the TRRO related to “new adds” to be self-effectuating. First, the FCC specifically stated that “Given the need for prompt action, the requirements set forth herein shall take effect on March 11, 2005. . .”¹⁰ Further, the FCC specifically stated that its order would not “...supersede any alternative arrangements that carriers voluntarily have negotiated on a commercial basis. . .,”¹¹ but made no such finding regarding existing Interconnection Agreements. Consequently, in order to have any meaning, the TRRO’s provisions regarding “new adds” must be effective March 11, 2005, without the necessity of formal amendment to any existing Interconnection Agreements. Therefore, while BellSouth will not breach its Interconnection Agreements, nor act unilaterally to modify its agreements, the FCC’s actions clearly constitute a generic self-effectuating change for all Interconnection Agreements with regard to “new adds” for these former UNEs.

Thus, pursuant to the express terms of the TRRO, effective March 11, 2005, for “new adds,” BellSouth is no longer required to provide unbundled local switching at Total Element Long Run Incremental Cost (“TELRIC”) rates or Unbundled Network Element-Platform (“UNE-P”) and as of that date, BellSouth will no longer accept orders that treat those items as UNEs.

Further, effective March 11, 2005, BellSouth is no longer required to provide high capacity UNE loops, **including copper loops capable of providing High-bit Rate Digital Subscriber Line (HDSL) services**, in certain central offices or to provide UNE transport between certain central offices. As of that date, BellSouth will no longer accept orders that treat these items as UNEs, except where such orders are certified pursuant to paragraph 234 of the TRRO. In addition, as of March 11, 2005, BellSouth is no longer required to provide new UNE dark fiber loops or UNE entrance facilities under any circumstances and we will not accept orders for these former UNEs.

Prior to the effective date of the TRRO, BellSouth will provide comprehensive information to CLECs regarding those central offices where UNE DS1, **HDSL** and DS3 loops are no longer available, and the routes between central offices where UNE DS1, DS3 and dark fiber transport are no longer available.

CLECs will continue to have several options involving switching, loops and transport available to serve their new customers. To this end, with regard to the combinations of switching and loops that constituted UNE-P, BellSouth is offering CLECs these options:

- Short Term (3-6 month) Commercial Agreement to provide a bridge between the effective date of the Order and the negotiation of a longer term commercial agreement,
- Long Term Commercial Agreement (3 years, effective January 1, 2005, with transitional discounts available under those agreements executed by March 10, 2005)

In addition, most CLECs, if not all, already have the option of ordering these former UNEs, and particularly the combination of loops and switching, as resale, pursuant to existing Interconnection Agreements.

To be clear, in the event one of the above options is not selected and a CLEC submits a request for new UNE-P on March 11, 2005 or after, the order will be returned to the CLEC for clarification and resubmission under one of the available options set forth above. CLECs that have already signed a Commercial Agreement may continue to request new service pursuant to their Commercial Agreement.

With regard to the former high capacity loop and transport UNEs, including dark fiber and entrance facilities, that BellSouth is no longer obligated to offer, BellSouth has two options for CLECs to consider. Specifically, CLECs may either elect to order resale of BellSouth’s Private Line Services or alternatively, may request Special Access service in lieu of the former TELRIC-priced UNEs. Any

orders submitted for new unbundled high capacity loops and unbundled dedicated interoffice transport in those non-impaired areas after March 11, 2005, without the required certifications, will be returned to the CLEC for clarification and resubmission under one of the above options.
