RE: Case No. 2004-00442 - Application to Adjust CATV Pole Attachment Rates

Dear Ms. O'Donnell,

Clark Energy is submitting an Application requesting the Commission authorize an adjustment to CATV pole attachment rates. Administrative Case No. 251 issued by the Commission in 1982 recognizes pole attachments maintained by CATV companies on regulated utilities' poles as a unique type of customer. Similarly, Administrative Case No. 251 prescribes a uniform methodology through which all regulated utilities may revise their CATV pole attachment rates without the requirements of preparing a full rate case. Our proposed CATV pole attachment rates follow Commission prescribed methods and reflect current costs for calendar year 2003. Similarly, Clark's Application is consistent with our previous CATV rate adjustment and settlement agreement with the Kentucky Cable Telecommunications Association approved by the Commission in Case No. 2000-529.

The Application and all supporting documentation is being filed using the procedures and guidelines of the Commission's electronic filing process. Commission staff has already assigned our Application to Case No. 2004-00442 and assigned Clark Energy a user ID and password to facilitate filing. The Application and all supporting materials filed electronically in connection with Case No. 2004-00442 are a true, accurate, and complete representation of the original documents. The Commission is being notified of Clark Energy's filing by e-mailing this transmittal letter under filename "Read1st_111604.pdf" to pscfileing@mail.state.ky.us.

Please contact Shannon Messer, System Engineer (smesser@clarkenergy.com) at Clark Energy should you have any questions or need additional information.

Respectfully,

A handwritten signature in black ink, appearing to read "Overt L. Carroll".

Overt L. Carroll
President & CEO
