NOTICE OF PROCEDURAL SCHEDULE

On May 31, 2005, the Illinois Municipal Electric Agency (“IMEA”) and the Indiana Municipal Power Agency (“IMPA”) filed a joint application with the Board for approval of their partnership with Louisville Gas and Electric Company (“LG&E”) and Kentucky Utilities Company (“KU”) in a project to construct a 750 MW addition to the existing generating station in Trimble County, Kentucky. IMEA and IMPA are also partners in Unit 1 at the existing generating station. LG&E and KU currently have a pending application with the Public Service Commission¹ for their share of the addition. The original application in this case was found by the Board to be deficient as described in its July 19, 2005 Order. The application now before the Board is a re-filing of the original application.

¹ Case No. 2004-00507, Joint Application of Louisville Gas and Electric Company and Kentucky Utilities Company For a Certificate of Public Convenience and Necessity, and a Site Compatibility Certificate For the Expansion of the Trimble County Generating Station.

In an attached motion, IMEA and IMPA requested that the Board set the case on a schedule so that it would be completed in 60 days. The statutory requirements, however, make processing it in 60 days virtually impossible. To ensure that all parties have an opportunity to participate fully in this proceeding, the Board issues the attached new procedural schedule, under which the Board should be able to issue a final Order within 90 days of the new filing.
