

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: Mike Miller

1. Refer to paragraph 8 of Kentucky-American's Amended Petition. Kentucky-American states that, by keeping 5/8-inch meters in service for five years longer, Kentucky-American will save the time and expense of changing out meters and will need to purchase fewer meters. Provide a detailed analysis of the financial benefit to Kentucky-American, including depreciation, water loss cost, and labor cost savings.

Response: Please see the attached.

**Kentucky-American Water Company
Analysis of Annual Capital Expenditure Savings
From Moving to a 15 Year Replacement Program**

Note analysis is based on current costs

Meter Capital Cost Savings:

| | | | |
|--|---------|--------------|-----------------|
| Number of 5/8 Meters in System | 108,516 | | |
| Number Replaced over a 10 Yr. Change-out Cycle | | 10,852 | |
| Number Replaced over a 15 Yr. Change-out Cycle | | <u>7,234</u> | |
| Annual Meter Purchase Savings | | | 3,617 |
| Cost of Meter - With MIU | | | <u>\$127.41</u> |
| Meter Capital Cost Savings | | | \$460,867.45 |

Capitalized Labor Savings:

| | | | |
|---|--|--|---------------------|
| Contract Price to Install Direct Read 5/8 Meter | | | <u>\$23.50</u> |
| Capitalized Contract Labor Savings | | | <u>\$85,004.20</u> |
| Total Capital Expenditure Savings Related To Moving to a 15 Year Meter Replacement Program | | | \$545,871.65 |

**Kentucky American Water Company
Analysis of Annual Revenue Requirement Savings Related
To Movement to 15 Year Replacement of 5/8 Meters**

Based on Currently Authorized WACC & Depreciation Rates

| | |
|--|-----------------------------|
| Capital Expenditure Savings (from Schedule 2) | (\$545,871.65) |
| Less: Depreciation @ 2.87% | \$15,666.52 |
| Deferred Income Tax | <u>\$6,168.35</u> |
| Annual Rate Base Savings | (\$524,036.79) |
| Currently Authorized Weighted Average Cost of Capital | <u>7.98%</u> |
| UOI | (\$41,818.14) |
| Currently Authorized Revenue Conversion Factor | <u>1.6519988</u> |
| Subtotal Revenue on Rate Base | (\$69,083.51) |
| Add: Annual Depreciation Expense | (\$15,666.52) |
| Annual Deferred Income Tax Expense | <u>(\$6,168.35)</u> |
| Annual Revenue Requirement Savings Related to Move To 15 Year Replacement of 5/8 Meters | <u>(\$90,918.38)</u> |

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

2. Refer to paragraph 8 of Kentucky-American's Amended Petition. Kentucky-American states that "[a]ll these benefits will be passed along to customers in the form of reduced costs". Detail how Kentucky-American anticipates that these savings will benefit individual customers.

Response: The benefits will be passed through to customers in subsequent rate case applications, with the capital cost reductions reducing the revenue requirement.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: Jarold Jackson

3. Refer to paragraph 6 of Kentucky-American's Amended Petition. Kentucky-American states that "[t]his Petition reports the final results of the study. As the attached report concludes, the 5/8 inch meters studied in the pilot remain accurate for 15 years." Supply all raw test data for all test years of the pilot, including the following:

- Meter Number, i.e., serial number;
- Manufacturer;
- Model;
- Installation date;
- Test date;
- Low, Medium, High percentage test results reported to the nearest 0.1%;
- Pass/Fail rating for each of the Low, Medium, and High test conditions;
- and
- Overall rating for each meter.

Report all data in a format compatible with Microsoft Excel.

Response: Attached are the reports of this information filed in this docket since 1998, except for the 2006 report, which is missing from our records. No testing was performed in 2003.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: Jarold Jackson

4. Of the 106,961 residential "Year End Customers," provide the total number of meters of a given vintage by age group and manufacturer, i.e., "A" meters are from zero to ten years old, "B" meters are from ten to 11 years old, etc., for the entire installed population of 5/8-inch residential meters.

Response: See the reports attached to the response to question 3, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provide the requested information for the meters in the study.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: Jarold Jackson

5. For each subgroup above, state the total number of failed 5/8-inch meters that have been replaced by the manufacturer since the beginning of the pilot study in 1997. Note failure mode, i.e., catastrophic (stuck), low range, medium, or high reading

Response: See the reports attached to the response to question 3, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provide the most responsive information KAW has.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

6. Provide a complete list of the jurisdictions in which American Water Works Company, Inc. ("American Water") or any of its subsidiaries are authorized to provide residential water service. In these areas, do any allow the five-year extension (or longer) requested in this case?

Response: Attached is a chart showing meter replacement and/or testing practices in various states. In some cases the schedule is based on state law; in others, it reflects actual practice. In some instances, those two are one and the same, such as in Tennessee where state law requires a utility to have a meter replacement program, but gives no guidelines. There Tennessee American Water provides for its program in its tariff.

Changeout/Testing Period In Years

| AW Company | 5/8" | 3/4" | 1" | 2" | COMMENTS |

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

7. Which of these jurisdictions include American Water's use of 5/8-inch meters?

Response: See the chart attached to the response to question 6, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provides the best information KAW has in response to this question.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

8. For each applicable jurisdiction, for how many years are 5/8-inch meters allowed to remain in service without being tested, absent a deviation or other variance?

Response: See the chart attached to the response to question 6, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provides the best information KAW has in response to this question.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

9. In which jurisdiction(s) has American Water requested to lengthen the amount of time that a 5/8-inch meter can remain in service without being tested? For each, state the jurisdiction, case name, case number, and the decision of the applicable regulatory agency. Provide explanations for all test requests that have been rejected, and provide data submitted.

Response: See the chart attached to the response to question 6, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provides the best information KAW has in response to this question.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

10. For each jurisdiction in which American Water has requested and been permitted to keep 5/8-inch meters in service without being tested for more than 10 years, provide the following information:

- What were the cost savings in years 11-15?
- How were cost savings calculated?
- How were cost savings passed on to the end-user?

Response: See the chart attached to the response to question 6, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provides the best information KAW has in response to this question.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

11. Are there any jurisdictions where American Water has experienced an unacceptable degree of accuracy of its 5/8-inch meters between the years 11-15? If yes, explain.

Response: See the chart attached to the response to question 6, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provides the best information KAW has in response to this question.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: A. W. Turner, Jr.

12. Has American Water conducted a pilot study in any other jurisdiction prior to seeking authorization to lengthen the number of years that a 5/8-inch meter can remain in service without being tested? If so, when and where?

Response: See the chart attached to the response to question 6, which, in accordance with the discussion at the May 12, 2010 informal conference in this matter, provides the best information KAW has in response to this question.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2009-00253
COMMISSION STAFF'S FIRST DATA REQUEST**

Witness: Dillard Griffin

13. Explain the following statement: “An average of the low test that under-registers by below 10% or over-registers by 1% will be considered an indication of inaccuracy.”

Response: This statement comes from the AWWA standard and from the KY PSC regulations for a meter that has been repaired. See the attached.

Water Meters—Selection, Installation, Testing, and Maintenance

Authoritative Resource on Safe Drinking Water

Highest registration occurs at approximately 7 to 10 percent of maximum capacity. Altering of change-gear ratio shifts curve vertically but does not affect shape of curve.

Figure 5-1 Effect of modifying change-gear combinations in typical $\frac{5}{8}$ -in. (15-mm) meter

ACCURACY LIMITS

Accuracy limits are established to ensure that water meters record as accurately as possible. Meters have an inherent variation of 2 to 3 percent in registration over the entire range of flows, except very low flows just above those that the meter will not register. As an example, a $\frac{5}{8}$ -in. (15-mm) water meter in good condition will register within the following limits: 95 percent or higher at $\frac{1}{4}$ -gpm ($0.06\text{-m}^3/\text{h}$) flow, a rise to a maximum of 101.5 percent at 2 gpm ($0.45\text{ m}^3/\text{h}$) (usually 10 percent of rated meter capacity), and then a falling off on a flat curve to not less than 98.5 percent at 20 gpm ($4.5\text{ m}^3/\text{h}$). This is the rated meter capacity for a $\frac{5}{8}$ -in. (15-mm) meter (refer to Figure 5-1 for an illustration of a typical performance curve).

It may not be economically feasible to repair older meters to meet the accuracy requirements for new meters. The water utility should carefully weigh all costs to make a specific determination. For this reason, separate accuracy limits are shown in Table 5-3 for new and repaired meters on the minimum-flow test. The limits set for repaired meters represent those that require good meter-shop procedures. Meter repair work is not acceptable if repaired meters do not register at least 90 percent on this test. A higher percentage is recommended for desirable shop-quality standards.

In many cases, meter manufacturers have provided revenue-maintenance programs in the form of replacement measuring-chamber assemblies, wherein the accuracy of the repaired meter can be restored to the same level as that of a new meter.

Determining Accuracy Limits for Meter Types

For displacement, multi-jet, propeller, and turbine meters, a typical method of establishing test-flow-percent accuracy is the algebraic sum of 15% of the low flow results, 70% of the intermediate flow results, and 15% of the maximum flow results. For compound and fire-service meters, the normal test-flow-percent accuracy should be one third of the algebraic sum of the accuracy results at the maximum test-flow rate of the main line meter and the maximum and intermediate test-flow rates of the bypass meter.

Accuracy Limits for Removal From Service

Meters with determined accuracy limits beyond those shown in Table 5-1 should not remain in service unless repaired. Determining the optimum number of years a meter should remain in service between tests is achieved by testing 5 percent of those meters

| TEST REQUIREMENTS FOR NEW, REBUILT, AND REPAIRED COLD WATER METERS* | | | | | | | | | | | | | |
|---|---------------------------|---------------|-----------------|-------------------|---------------------------------|---------------|-----------------|-------------------|--------------------------------|---------------|-----------------|-------------------------|--------------------------|
