RE: Motion for Intervention
in Kentucky-American Water Co's
Demand for a Rate Increase

Notice is given of a Request for an Intervention
in KY-American Water's Demand for a Rate Increase
for the following reasons:

1. I predicted, when they got their rate increase last year, that they'd soon be back for more, like overfed pigs at the trough. Voters never approved their most recent hare-brained scheme, that they now want to force down our throats. It's now become an annual event for these thieves, to see how much they can rob us. 3% increase, why not make it 100%? The PSC needs to limit all utilities to one small increase every 5 years. And all customers have a substantial interest in stopping these thieves.
2. Any rate hike would be discriminatory towards disabled and retired people, such as myself, who have had no cost of living increase in over a year. We're struggling to get by already.

John Thompson

Respectfully Submitted,
John Thompson
