Their last increase (18%) our community received was June 2009, less than 9 months ago. The recent Notice I received in the mail indicated that the "percentage of increase will be an overall increase of 37.7%." When you review the info provided, the residential rate per 1,000 gallons consumed is currently \$3.77200 and the proposed increase is \$5.76133 for a difference of \$1.98413 or an **increase of 52.6015%**. This is quite a bit more than the overall increase of 37.7%. Deception!

I hope you guys will vote with your conscience this time and **disallow any rate increase whatsoever!!!**
