Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

To pay high as it is! leave it the way
it is. money is 2 short as is

Incluya por favor su nombre, la dirección, la ciudad, y el código postal:

Juan Padilla 1521 Cambridge, Apt. B

Su proveedor local de la agua, la Compañía de Agua de Kentucky-American, ha propuesto un aumento en las tasas que engendran un adicional \$25.8 millones por año. Eso es un aumento de aproximadamente 37%. Eso significa que la cuenta media de agua aumentará de \$25.44 a \$34.88 por mes.

Kentucky American dice que el motivo principal para este aumento es de pagar por la construcción de una nueva facilidad de tratamiento de agua en el Condado de Owen y un ducto de esa facilidad a Lexington.

Escriba por favor cómo este aumento afectará su hogar. Sus comentarios escritos serán adelantados a la Comisión del servicio a la comunidad:

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission: At the present time water is included within my rental amount. However if this continues to increase my rental property owner will be forced to request additional monies for water outside rental amount or raise rental prices. It will affect me in that I sought utilities to be included within my rent so that it would be affordable. I thought you just got an increase. Why do you ask for so many? If I ask you, is it always the poor that have to suffer and seem to get the worst service, I mean old pipes, dirty water and low pressure?

Right now I'm staying with my sister along with my husband and son. When we moved in two weeks we will be paying water. When I heard about the increase I wasn't really surprised because that's all this world is about money, money, money. As if we haven't learned already about what the greed of this world and the greed of people has done to affect the state ~~that~~ of good hard working citizens. Why is it going up to increase the bank accounts of CEO's and other business people in the water company. While people who only want one thing but to take care of their family families and live in peace without ~~worrying about~~ debating what ^{bills} to pay. ~~and what to~~ It's not fair that people have to continue to struggle for no reason. I'm a young mother and wife and the hardest thing to deal with is knowing that you are doing all you can to provide and still can't take care of the necessary things to keep your family healthy and safe. I went without water for a few days with a sick son and I explain ~~remorse~~ remorse. Let's stop thinking about ~~are~~ they had no and think about others and watch how the ~~self~~ self for once begining to change in this world. ~~people's~~ people's attitude

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I am really concerned that this increase does not reflect the recession that we are in. As a taxpayer and a government worker, I have had to practically beg for our 3% cost of living increase. My household has one income and that 37% increase will keep me from being able to assist my grandparent with her increase in water.

What will the increase be next year?! It is an insult to the consumer to raise an already raised rate. It is deplorable that KAWC has a monopoly on this utility. This will have a great negative effect on my household.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

Due to the recent economic crisis my household will be greatly affected. We have tried to decrease bills in our home to accommodate our family's needs. The increase that KAWC is proposing is going to add a strain to our budget. A \$9-10 increase per month may appear to be minor but just that small amount of money is a great help in other areas (school lunch, help with fuel, etc.). If there is any other way you all can raise the money for the new treatment center would greatly be appreciated. Thank you very much for considering how this rate increase will affect the people of our community and our households.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I am a wife and mother of 6 children, my husband has to work 2 jobs just to make ends meet. We need water in order for our full household to function and if there is an increase it would call for extra money that we do not have, it is hard enough to make it with the economy the way it is let alone having a large family to provide for. It is not fair that we have to pay for something that we did not ~~not~~ have the opportunity to decide upon. And it is not the right of the Kentucky American water to make this decision. ~~that~~ The decision that says we are going to take from you what you are struggling to get and maintain and that is money ~~and~~ you are attempting to take food out of my kids mouth and that doesn't settle well with me.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

As a single woman + mother, this increase will greatly affect my household - I am presently taking care of 2 grand children, and it can be very costly. At times besides normal use of water, bathing, laundry, at times they like to be sprayed or play outside on their slip & slide, and they don't understand the "cost" of water when I have to say, "WE can't afford it." Also, water ~~is~~ used to be the cheapest utility, but now, it's as much as the others almost, I am self-employed, and my business is very slow, (HAIRSTYLIST), due to having hair done is not a necessity - so I'm barely making ends meet. Rent, Mortgage, utilities, are the main priority of people, so this increase will affect me greatly.

Thank you

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

This increase is already affecting my household, and the increase hasn't been approved. The thought that I got to adjust my paychecks and manage to come up with a new way to adjust my income. That raise will have the ability to stress my finances to the limit.

Just by adjusting to the increase, would put a strain on my household usage of certain appliances.

~~Coming from a~~

As a young mother increasing the rate of water by 37% would not only negatively affect me financially, but also mentally and physically. Although this change would only mean a few more dollars a month, those few dollars would be digging a bigger hole in my monthly financial budget. Each month I set aside money to pay my bills and another set for food, by time I'm done taking care of all that, it only leaves me with a few dollars. In theory those few dollars should mean leisure funds right? Wrong! With that so called leisure funds, ~~im usually~~ I get back in forth to the doctors (because of my New baby), school and any where else that I might need to go, such as the store when my son runs out of things that he needs, I also use those leisure funds for emergencies that might occur, such like for instance if I was to need more food because I miscalculated my funds. ~~at~~ This being

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

To whom it may concern,
The increase in the water Bill is one that will affect my household even more than it is already being affected due to the increase in the utilities and the fluctuation of the gas prices. I understand that the increase is suppose to offset building of future lines for the water, but is the increase really necessary. Is there not other ways that we can help w/ the offset. Or every individual w/ Kentucky American water paying an extra \$1.00 a month wouldn't help. The increase is a tremendous leap. If won't benefit the company if you increase the rates and the citizens of ky are unable to pay their water bills. In the end it will do more damage. Increase in the bill will increase the amount of people who are unable to pay the cost it is now. We need to reconsider ways to increase the amount of money Kentucky American water needs for projects in other ways besides increasing the bill.

The increase in the price of water is one that will affect my household as well as others in many ways. If the increase is implemented that will be an extra 120⁰⁰ a year that this community will be responsible for although we are not receiving extra raises. I understand that the increase is to help other resources being built by KAW, but are there other methods such as fundraising that will offset the expense of building KAW may be responsible for. During this economy raising the rates will affect the community even more than the lack of employment we are facing @ the moment.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

37%? Wow!! I haven't seen an increase in any labor force that provided that much of a cost of living increase! Perhaps a decrease in the salaries of those involved in this "construction" can justify the increase in the water bill.

S. Colman

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

My main concern with the increase is the well being of my teenage son who suffers from Crohn's disease. He suffers from frequent flare-ups and can spend hours in the bathroom daily. At any given time he may use the bathroom up to 20 times per day. This is only the first issue that comes to mind, of course there are several others. I could not imagine telling him he will have to flush less frequently, because I cannot afford to pay the water bill. This will not only affect my ability to provide for my children, but the self esteem of a teenager who has already been given a difficult disease to manage.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

IF kentucky - American water company increases their rates, it would make it harder on poverty stricken people. we already have a hard time making ends meet. People have children that they have to take care of and if rates are increased it would just cause more stress on families, especially with the economy and not many jobs available.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

The 37% increase would definitely impact for my family. I am a single mother of 3 children and water is a necessity that I rely on. Being the only income the increase would greatly impact ^{what} I have to spend each month with already a tight budget that I am barely maintaining to survive and take care of my children. If the water company could look at other avenues to generate the funds they need or incorporate increases at a smaller amount it would be more beneficial so customer services will not be interrupted, because ^{they} can not afford to pay their water bill. I personally am a customer that does not qualify for any type of assistance through community programs. So I would fall in a category of services being disconnected or trying to make payment arrangements I am barely able to keep now. Please consider the request to consider other options.

Thank you. a KAWC customer

Being for progress but wondering why those responsible for the project cannot finance it themselves. It is rather a paradox to make such demands on in the name of progress on those who have or had ^{made} none of the decision ~~was~~ to do such. Those benefiting ^{monetarily} the most are obviously those associated with the water company. Where is the benefit for the average Jane or John Doe. This is ^{tremendously} an additional expensive burden on those least able to come up with the money monthly.

An increase - especially one so large, would affect my monthly budget. I work full time, but even after putting in 40 hours a week I live on a tight budget. I worry about families I work with now who have a difficult time paying their monthly bills, an increase such as this would put them in a difficult situation. They may have to choose paying for water and going without food.

Ten dollars ^{extra a month} may not seem like much to Corporation, but it is a lot of money to someone who lives on ~~the~~ tight budgets and are struggling to make ends meet as it is.

Name	Address	City	Zip Code
Nancy Foreack	504 Amberley	Box	55415

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

A 37% increase in rates would ^{have a} major impact on our household. Our family just as well as other families have been impacted by the economy and it would increase our financial burden as we have a large family. In addition, a rate increase would only add stress to an already strained family budget.

Please include your name, address, city, and zip code:

Everyday life seems to get harder and harder everyday. 37% may not mean much to some families, but for a family that struggles already like mine, it means alot. That 10 dollar jump comes right out of my budget for the month. That is equivalent to the amount of money that can feed my 2 small children for up to 4 days. This amount of money could also be the money I was depending on for a pack of diapers that would last me around 2 weeks. Please be considerate and understanding that although it doesnt seem like too much to ask, that there are families whos money is budgeted so tight they hold their breath and keep their fingers crossed just hoping they make it through the month.

The increase will affect my household ⁱⁿ several ways.

- ① more money out of pocket
- ② addition to the family in 2011 will require more water usage.
- ③ will make it harder to budget & pay bill on time.
- ④ feel the need to do less activities especially in summer with children outside.

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

It will have an affect on my parents because they have a hard enough time paying for their medicine.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I think this increase will effect a lot of families in a negitive way. Paying for utilities is very exspesive anyways, and an increase rate would just add stress to an already stressful situtation. A lot of people don't have a job, or can not work, and right now would be a really bad time to exspect more out of families, when they already are struggling. I also think that apartment complexes will have to raise their rates and require ~~also~~ their tenants to pay their ^{own} utilities (When they were included before) because of the raise in the rates on not just water but electric, gas, etc. Please don't raise the rates. I will be praying about this. God Bless you.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

Honestly this increase affects every aspect of my home. Paying more for water will affect my income and make it harder to buy more food, buy household items, price of gas is already high and 37% is very high. This will affect people like me that are already struggling to pay for needs now. Please reconsider raising the water.

We are a family of four, my husband lost his job in Aug 2009, I work part time so this would be an extra increase in bills we are already struggling to pay. We only receive assistance w/ insurance through the state and pay for those as well. We strongly discourage a raise in water prices as our water bill is 40-45mth but sewer taxes our bill has been over \$100.00. Low income families can not afford this. You either pay or feed your child. There are limited funds to help, so what choice should we make?

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

Being unemployed (at the moment), it is hard enough to pay the minimum amount. If there is an increase in the water bill, it will put me in a harder position and will force me to have to ask for help paying that up. I am sure there are a lot more people just like me who are unemployed and have a hard time paying their bills. I vote against a raise in water bill. If KAWC needs to pay for their new plant, find the money in other funds or cut pay of the employees, like the ones in upper management who make tons of money.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

It will cause me to be unable to afford to pay my water bill. At this time my wages have been less than \$3000 gross pay this year due to medical illness. Currently I am considering and will accept a job for more than a \$10/hr. pay reduction just in order to work. Therefore a 37% increase is too extreme during this economy when most people are losing their jobs or not even receiving the slightest percentage in a pay raise.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

My income is quite limited since I work at a small non-profit and attend graduate school, so this sort of significant increase places an added burden on me. It requires that I find another few dollars in a budget that is extremely limited. I was always under the impression that these sorts of public works projects were financed through bonds, or that we would at least have an opportunity to vote/comment on this decision. I know that there are many options/decisions in this sort of construction including environmental impact/sustainability, and I believe that if I'm expected to pay for the construction I should be allowed to express my opinions on the topic. In addition, Ky American has a huge customer base, and I know that the bill will not decrease once this project is paid off, but instead will simply line the pockets of the corporation. I believe that this is unfair and will negatively impact my life and financial situation.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I am a 30 year old single mother of one, a full time college student, and I work part-time. My income is much less than my bills and expenses. An increase in the water would mean an extra decrease in my finances. I am struggling to make due as it is and for you to pass this increase would make matters worse for me and my family and so many others that I know that are in the same or even worse predicament as I. I pray that you will reconsider and not increase the rates on water. Think about those who are less fortunate and are barely making it. Those who are just a paycheck away from living on the street. We need to be working towards lowering the poverty level not increasing it.

Thank you

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

Living as a single individual I currently live on a VERY tight budget. A 37% increase to one of my bills makes this area even tighter. The Kentucky American water corporation sees enough profit during a fiscal year that this increase seems unwarranted and unnecessary. Also working for a business that due to financial constraints does not grant raises, an increase in necessary utilities means an overall decrease of yearly income in the long run.

Lexington, Ky

DATE: August 1st, 2010

RE; PROPOSED WATER INCREASE

On January 1, 2010 we were hit with a \$712.80 per month cost for Water Quality Management Fee. We have 252 units on the property which comes to a cost of \$2.83 per unit per month.

Now we are informed that we could be looking at 37% increase in cost for water. Due to the fact that we pay over \$120,000 per year for the water which we furnish to the residents the 37% increase comes out to \$45,354.60 per year. Or \$3,779.55 per month. With 252 units this cost will be \$15.00 per month.

We have not been able to raise rents for over two years yet you expect us to eat a \$17.53 per unit cost without it hurting us.

I was told that it would only be a \$9.44 per unit increase. \$9.44 times 52 units times 12 equals \$28,546.56. This is funny math as it does not take into effect the cost for common areas such as Clubhouse, swimming pool, irrigation system, etc.

These are very tough economic times in this country so how are we to pass on this \$17.83 per month to the residents. We are trying to keep our heads above water with the \$2.83 increase along with other cost. We have residents moving out now due to job loss or job hours being cut back.

I am not just speaking for myself but for everyone with Multi-Family Units in the Lexington area. I also do not see many homeowners being able to afford the \$9.83 per month increase.

859-244-2219

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

This rate increase will be incredibly damaging to my business. We own and operate a 222 unit apartment community that provides housing to the working poor. A rate increase of this magnitude will add \$65,000 dollars to our operating expenses which ultimately we will be forced to pass on to our fragile resident base who often do not have money for basic life necessities. This rate increase is highly punitive to businesses and the customers we serve. The

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

This is bad news. The utility company isn't thinking about their customers. How is this new pipeline going to benefit me? Why should I pay for it? I recently lost my job and asked the water company for an extension on my bill, and they told me they don't give extensions. I hope they consider giving out extensions since we are already having a hard time paying the cost.

VRR

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I will not be able to afford an increase due to my bills increasing; my income is at a plateau! This will be a major hardship for a single mother of 3 beautiful children.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

An increase in the water bill for me (and many others) will be an ADDITIONAL STRAIN on an already strained household budget. My household of two employed, post-secondary educated adults will again have to find a way to creatively manage limited resources to accommodate the ever-growing utility rates. I give the demographics of my household only to make this impression: If such is the case with my household, how much more detrimental would an increase be to the many households with fewer sources and even less income. To my knowledge the water meters are not on "sliding scales". This means the meter of a household of a working divorced parent with 4 children will move at the same rate and create the same financial obligation as the meter at my household of 5, which includes two working parents and two sources of income.

I am concerned about the implications not just (not even primarily) for me but for others as well. Please consider what such an increase of an average of 9.44/month could do to folks that currently start the month off with more financial responsibility than financial resource.

As a concerned citizen of Lexington, KY and recently unemployed, I am 100% against another rate increase that will not only have a negative impact against me but against other consumers that are even less fortunate than me.

I have been recently laid-off from work and am not financially able to afford another rate increase from Kentucky American Water. You cannot try to continue to squeeze additional money out of money that is no longer coming in. This is not only a burden to me and other citizens but to agencies that assist low income residents with water payments. It is not fair that every additional dollar that Kentucky American Water Company needs to promote their agenda will help them but cause hardship for the consumer. I am a consumer advisory council member for the state of Kentucky and maybe it's time for the council to address this issue. You have to be fair and reasonable and this is far from reasonableness and fairness.

We cannot afford to continue to be victims of these type of increases. Water is a necessity but if you continue to nickel and dime the citizens with this burden, I am afraid to think of how some will suffer.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

The increase affects my household greatly because our utilities ~~are~~ all increased but the cost of living has not increased to help with these ~~rates~~ ~~charges~~. There is no reason for this. There are families that are having enough trouble paying the cost now. Over the past year my water bill has increase tremendously. I will have a hard time paying for more of an increase.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I am a divorced mother of two, one in college and one in middle school. I am barely making it now, I do not receive any public assistance, I work hard every day to provide for my family. The gas prices have already taken a toll on my family, a height in the water bill will almost do us in. That will take away from food or ^{the} ability to keep putting gas in the car. Please reconsider this price increase.

Thank You,

MARY Ann Bennett
1029 Merrick Drive, APT. 122A
Lexington, KY 40502

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

My income will truly be negatively affected. My husband and I provide for four young children and can barely afford the amount of my water bill now. Neither me nor my husband foresee a raise in the near future, so this is definitely not feasible. Moreover, utility companies should consider that this type of increase could take food out of the mouths of dependent children. Do such companies not care about quality of life? Or is capital gain your only concern?

Please include your name, address, city, and zip code:

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

• Negative impact on my household!!

I am a single mother and it is hard enough to make ends meet now. I absolutely CANNOT spare the few extra dollars a month if the rate was to increase. This increase would literally take food out of my daughter's mouth. More people, including myself would face possible cut-off for failure to come up w/ funds. The rate increase CAN produce NO positives for low & middle income customers. PLEASE reconsider this rate increase!!

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

With increases in all utilities + families not getting a raise in their pay checks, it makes it extremely difficult for the majority of families to even pay another increase in their water bill.

Utility companies need to take a minute to look at how this impacts hundreds, if not thousands, of central Kentucky families.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

I am currently here, at Community Action council, with an overdue water bill and an overdue electric bill. I am self employed and a single mom of 2 young boys. I understand that it is expensive to run a new pipeline but to hit your customers w/ a 37% increase to me seems unconscionable, especially in these difficult economic times. When I have to pay for a large purchase I stretch my payments out over a long period so that I don't get overwhelmed. Seems to me KAWC could do the same.

This increase will greatly affect my household. Currently, my water bill never under \$75.00 and that is already very unmanageable for me. Water is a necessity in every household across the country. How can you increase water rates when people can barely keep or find jobs? Water is a BASIC NEED! We need water to keep ourselves clean, our houses sanitary, our clothes clean, we need water to cook with (to eat) and many other things. Can we propose ANYTHING else to increase rates on? How about materialistic things such as cable, internet and home phone. What type of country is this when we can afford materialistic things but we can't afford a basic need? Can we get a lifetime guarantee on our utility bills?!

Name	Address	City	Zip Code

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

Most Families will be able to pay the increase, but many seniors and poor ~~and~~ this will present ~~and~~ real problems. Ask for a 30-40% Increase in wages for your company and see what they tell you, raise pay in a economic recession, all you for real!! No way!!

Please include your name, address, city, and zip code:

An increase in any utility in these rough economic times will have adverse effects on families. It is hard enough as it is to keep our head above water as a family with two children. Please consider the increased costs of living that have already forced parents to struggle to keep a roof over their family's head and food on the table. Please don't add stress to families that are already stressed by finances. My family would not be able to maintain with an added 37%. Please do not increase.

An increase of this amount will mean less things I can do with my children, I have 3 kids and we get by but are able to save very little from one month to the next. With an increase of this size we will save next to nothing. I don't feel I should have to pay for another county's water treatment facility.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

It does not seem right, nor fair, that the Lexington customers should be facing a rate increase to solve the problem in Owen County. Who is going to take care of Lexington when we are in need? Lexington customers will ---- with another rate increase. The price of everything is going up, therefore, putting a burden on everybody to make ends meet. I have one income to cover all my expenses, along with the cost of everything increasing. I don't think I should be penalized with a rate increase, to solve another county's problem. It's hard enough to make ends meet, without adding someone else's expense to my monthly budget.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:

It has been extremely hard to make ends meet since my husband lost 1/3 of his heart due to heart attacks a year ago. In addition to the unending medical bills I now have the responsibility of raising two of my grandchildren. Our water bills currently run \$60.00 + the increase to \$82 would put additional pressure to our budget. Times are tough for most people these days. I also have an issue with the increase being used for a water treatment plant in Owen Co. Fayette Co taxes and cost of living is already high enough without making us pay for other locations.

I'm a single mother of 4 kids and I think that this would be a very bad thing for my family. It's already hard on me to pay all my bills now. Not only me but I sure for other families also. So I feel that our local water provider should stop thinking about how much money they can make off use and leave it how it is.

To whom it may concern,

I am totally against the water^{bill} increase. I am a mother of five children and I struggle enough as it is to keep my water on each month. If the proposed increase passes, this will be devastating to my family and may mean that my family might very well be ~~being~~ in danger of not being able to afford water for my family. Please do not increase the water bill ~~so~~ so those of us who struggle will not lose our water that is a necessity.
