RE: Submission of Plans and Profiles for Phase Five of the Electric Transmission Line by Southern Indiana Gas & Electric Co. d/b/a Vectren Energy Delivery of Indiana, Inc. Pursuant to Order of the Kentucky State Board on Electric Generation and Transmission Siting, Case No. 2010-00223

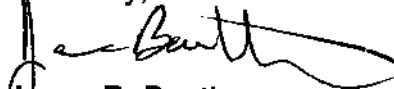

Dear Mr. Derouen:

Southern Indiana Gas & Electric Co. d/b/a Vectren Energy Delivery of Indiana, Inc. (hereafter, Vectren), tenders herewith its Plans and Profiles for construction of Phase Five (5) of its 345kV Interstate Electric Transmission Line.

The attached document constitutes the final location of the line and its appurtenances for Phase Five of the project, which is the next phase ready for construction. As with the plans and profiles for all other segments submitted to date, All of the facilities in Phase Five are wholly within the corridor and located along center line of the route approved by the Board. Phase Five begins with support structure identified as #140, and ends at support structure #155.

As pre-construction work on the next Phase of the project is completed, Vectren will tender its Plans and Profiles for that phase of construction. Thank you, again, for your attention to this matter. Vectren truly appreciates the work of the Siting Board and the staff in this interstate baseline reliability project.

Sincerely,

Jason R. Bentley  
Attorney for Vectren Energy Delivery of Indiana
