RE: CASE NO. 2011-00313.

This submission represents the Owen Electric Cooperative Corporation response to PSC staff's first information request per order dated Jan 9, 2012.

There are four (4) PDF files included in this electronic filing.

One file contains the overall response to the subject information request.

The remaining three files are also PDF and contain the information requested in #14. These are the voltage drop summary reports from the engineering study. The summary was chosen due to the fact that a fully-detailed report for these three files would have been 23,000 pages and 150 Mbytes of disk space. Permission was obtained to send only the summaries for these 3 data outputs – which will be much more useful due to their report-by-exception nature and their greatly reduced size. The detailed summaries are available for viewing at the Owen Headquarters.

I certify that this electronically filed document is a true and complete representation of the original document.

James Bridges, P.E.

VP Engineering Owen Electric (DSS)
