#### Electric Distribution Utility Annual Reliability Report

#### **SECTION 1: CONTACT INFORMATION**

UTILITY NAME Kentucky Power Company
REPORT PREPARED BY Everett G. Phillips

E-MAIL ADDRESS OF PREPARER egphillips@aep.com

PHONE NUMBER OF PREPARER (606) 327-2610

#### **SECTION 2: REPORT YEAR**

CALENDAR YEAR OF REPORT 2023

#### **SECTION 3: MAJOR EVENT DAYS**

| TMED                              | 28.7353   |
|-----------------------------------|-----------|
| FIRST DATE USED TO DETERMINE TMED | 1-Jan-18  |
| LAST DATE USED TO DETERMINE TMED  | 31-Dec-22 |
| NUMBER OF MED IN REPORT YEAR      | 3         |

NOTE: Per IEEE 1366 TMED should be calculated using the daily SAIDI values for the five prior years. If five years of data are not available, then utilities should use what is available until five years are accumulated.

#### SECTION 4: SYSTEM RELIABILITY INFORMATION AND RESULTS

#### **System Wide Information**

Total Customers 161,642 Total Circuits 234

#### **Excluding MED**

|       | 5 Year Average |       | Reporting Year |  |  |  |
|-------|----------------|-------|----------------|--|--|--|
| SAIDI | 421.39         | SAIDI | 331.76         |  |  |  |
| SAIFI | 2.097          | SAIFI | 1.848          |  |  |  |

#### **Including MED**

|       | 5 Year Average | Reporting Year |
|-------|----------------|----------------|
| SAIDI | 1505.80        | 718.32         |
| SAIFI | 2.609          | 2.347          |

#### Notes:

- 1) All duration indices (SAIDI) are to be reported in units of minutes.
- 2) Reports are due on the first business day of May of each year
- 3) Reports cover the calendar year ending in the December before the reports are due.
- 4) IEEE 1366 (latest version) is used to define SAIDI, SAIFI and TMED

### Electric Distribution Utility Annual Reliability Report

#### **SECTION 5: CIRCUIT REPORTING**

#### (CIRCUITS WITH SAIDI AND/OR SAIFI EXCEEDING 5 YEAR AVERAGE)

#### (CIRCUIT NUMBERS SHOULD BE REPORTED EXCLUDING MED)

#### **CIRCUIT #1:**

- 1. SUBSTATION NAME AND NUMBER
- 2. SUBSTATION LOCATION (COUNTY-ROAD-TOWN)
- 3. CIRCUIT NAME AND NUMBER
- 4. CIRCUIT LOCATION (TOWN-ROAD-GENERAL AREA)
- 5. TOTAL CIRCUIT LENGTH (MILES)
- 6. CUSTOMER COUNT FOR THIS CIRCUIT
- 7. DATE OF LAST CIRCUIT TRIM (VM)
- 8. LIST OUTAGE CAUSES FOR CIRCUIT ALONG WITH PERCENTAGE OF TOTAL OUTAGE
  NUMBERS REPRESENTED BY EACH CAUSE
- 9. CIRCUIT 5 YEAR AVERAGE (SAIDI)
- 10. REPORTING YEAR (SAIDI)
- 11. CIRCUIT 5 YEAR AVERAGE (SAIFI)
- 12. REPORTING YEAR (SAIFI)
- 13. CORRECTIVE ACTION PLAN

# REPEAT INFORMATION FOR EACH CIRCUIT EXCEEDING ITS 5 YEAR AVERAGE FOR SAIDI AND/OR SAIFI

Please see Attachment 1 for Section 5: Circuit Reporting

Note: Circuits sorted according to reporting year SAIDI

## Electric Distribution Utility Annual Reliability Report

|   |  |  |  |  |  |  |  |

#### **SECTION 7: UTILITY COMMENTS**

Overall, Kentucky Power improved reliability for the year 2023 as compared to 2022. Below is additional information and context regarding the Company's improved reliability in 2023.

#### Excluding MED

The Company SAIDI for 2023 of 331.76 minutes represents a 32.4% improvement over the 2022 SAIDI performance of 490.62 minutes. The Company SAIFI for 2023 of 1.848 represents a 19.3% improvement over the 2022 SAIFI performance of 2.289.

#### Including MED

The Company SAIDI for 2023 of 718.32 minutes represents a 58% improvement over the 2022 SAIDI performance of 1710.61 minutes. The Company SAIFI for 2023 of 2.347 represents a 17% improvement over the 2022 SAIFI performance of 2.837.

#### Additional Comments

The weather in the Company's service territory in 2023 was relatively mild when compared to previous years. Mild weather, in conjunction with the Company's targeted reliability improvement efforts, had a significant effect on the annual and five-year reliability index averages, as described in Section 4 and above in this section. The Company plans to continue these targeted reliability improvement efforts.

Although the weather was relatively mild, the service territory still experienced a few major storms. To illustrate the effect of major storms on the volatility of reliability indices, the three storms occurring on March 3, March 25, and April 1, 2023 represented over 62.4 million customer minutes of interruption ("CMI"), and accounted for 53.8% of the Company's total CMI in 2023.

Finally, at the end of 2023, the Company had completed targeted widening, as part of its Tree Outside Right-of-Way widening program, on 65 of 234 distribution circuits, or 27.7% of the circuits. Widening activities have been completed on approximately 533.17 miles (6.4%) of the Company's overhead primary distribution miles.

# COMMONWEALTH OF KENTUCKY BEFORE THE PUBLIC SERVICE COMMISSION

Single phase right-of-way near end segment of Big Sandy Burnaugh North Circuit

This segment was last cleared in Year 2020, photo taken March 2024

# 2023 DISTRIBUTION VEGETATION MANAGEMENT REPORT AND 2024 DISTRIBUTION VEGETATION MANAGEMENT WORK PLAN OF KENTUCKY POWER COMPANY APRIL 1, 2024

In accordance with the Public Service Commission's June 22, 2015 Order in Case No. 2014-00396, as modified by its January 18, 2018 Order in Case No. 2017-00179, its January 13, 2021 Order in Case No. 2020-00174 and its January 19, 2024 Order in Case No. 2023-00159, Kentucky Power Company provides the following report regarding the operation of its 2023 Distribution Vegetation Management Program and its 2024 Distribution Vegetation Management Work Plan (see attachments 2, 3, and 4).

#### **Introduction and Background**

Kentucky Power began a five-year distribution vegetation management cycle January 1, 2019, and concluded that cycle period on December 31, 2023. The Company commenced a second five-year distribution vegetation management cycle on January 1, 2024. Vegetation growth in the Company's rights-of-way as of January 1, 2024 averages 4.99 years.

Kentucky Power performs cycle-based vegetation management maintenance work on its distribution rights-of-way. The principal characteristics of the Company's distribution rights-of-way vegetation management program are:

- Vegetation within Kentucky Power's distribution system rights-of-way is re-cleared on a continuous five-year cycle. The Company on average will re-clear approximately one fifth of the total miles of rights-of-way each year;
- Annual O&M expenditures for the five-year cycle will average approximately \$22.421 million as established in Case No. 2023-00159;
- Kentucky Power will notify the Commission and obtain approval for any deviations from the filed work plan that equal or exceed ten percent of the aggregate planned O&M expenditures; and
- The one-way balancing account established by the Commission's June 22, 2015 order in Case No. 2014-00396 remains in place. Expenditures are credited against the annual budget. Any annual shortfall or excess in expenditures is to be applied to the account balance. Overall program expenditures in excess of the targeted amount are \$318,351 as of December 31, 2023.

For 2023, planned operations and maintenance ("O&M") expenditures for targeted distribution vegetation management were \$21.447 million. The amount of O&M embedded in 2023 base rates for vegetation management expenditures was \$21,586,046 as provided by the Commission's Order in Case No. 2020-00174.

#### **2023 Distribution Vegetation Management Expenditures**

#### **And Rights-of-Way Work Performed**

The Company's 2023 distribution vegetation management O&M expenditures were \$21,491,040 or 0.06% greater (\$13,957) than the 2023 budget of \$21,477,083.

The Company's 2023 distribution vegetation management capital expenditures were \$8,752,272. This includes capital investment made in connection with O&M expenditures and a reliability widening pilot program (Trees Outside Rights-Of-Way, or "TOR") in the Pikeville district to combat established threats (*i.e.*, Oak Wilt disease, multiple species Root Rot, Emerald Ash Borer, White Pine blister rust, and Hemlock Wooly Adelgid) to Eastern Kentucky forests. In the Commission's January 19, 2024 Order in Case No. 2023-00159 at page 78 it stated "The Commission notes that the...additional Vegetation Management TOR Pilot program that is showing success in reducing customer outages. The Commission encourages Kentucky Power to continue the TOR Pilot program. In addition, the Commission expects that once sections of circuit ROW have been widened, those widened sections will be incorporated into the ongoing Vegetation Management program as those circuits are cleared in future cycle years." The Company has and will continue to incorporate this into its Vegetation Management Work Plan.

#### 2023 Vegetation Management Mileage Cleared, Expenditures, and Cost / Unit

Kentucky Power's 2023 Work Plan was broken down into four major actions: cycle maintenance (field personnel completing cycle maintenance), internal personnel (provide planning and oversight), spray (future control of regrowth brush and population density of trees within rights-of-way), and reactive maintenance (field personnel completing maintenance to circuits outside plan to address immediate vegetation-reliability issues). **Table 1** below provides a comparison of the 2023 work completed, actual expenditures, and Cost / Unit to the projection for each of its actions within its 2023 Vegetation Work Plan.

|                      | Table 1: 2023 Vegetation Work Plan |              |           |             |              |           |  |  |  |  |
|----------------------|------------------------------------|--------------|-----------|-------------|--------------|-----------|--|--|--|--|
| Action Description   |                                    | Targeted     |           | Actual      |              |           |  |  |  |  |
| Action Description   | Miles/Acres                        | Expenses     | Cost/Unit | Miles/Acres | Expenses     | Cost/Unit |  |  |  |  |
| Cycle Maint. (Miles) | 1,623.7                            | \$17,722,858 | \$10,915  | 1,396.6     | \$18,313,514 | \$13,113  |  |  |  |  |
| Internal             | -                                  | \$654,225    | \$403     | -           | \$444,020    | \$318     |  |  |  |  |
| Spray (Acres)        | 4,500.0                            | \$2,700,000  | \$600     | 7,580.0     | \$2,518,563  | \$332     |  |  |  |  |
| Reactive Maint.      | -                                  | \$400,000    | \$246     | -           | \$214,942    | \$154     |  |  |  |  |
| TOTALS               | -                                  | \$21,477,083 | \$12,164  | -           | \$21,491,039 | \$13,917  |  |  |  |  |

Kentucky Power targeted 1,623.7 miles of annual cycle maintenance and completed 1,396.6 miles (86.01%) of the 2023 targeted miles. Associated O&M expenditures were \$18,313,514 (3.3%) or \$590,656 above the budget target of \$17,722,858. The Company's cost

per unit for field cycle maintenance was approximately \$2,198 (20.1%) higher per mile than targeted. The elevated cost per mile is attributed to 402.9 miles (28.8%) of the completed 1,396.6 miles being in more remote and difficult to access areas within the service territory and increases in contract costs described below.

The Company targeted 4,500.0 acres of spray in 2023 and completed 7,580.0 total acres in foliar, cut stubble, and vine applications. Foliar spray comprised 5,777.1 (76.2%) of the total acres treated; cut stubble treatments comprised 1,679.8 (22.2%) of the total acres treated; and vine applications comprised 123.1 (1.6%) of the total acres treated. In year 2023 the Company continued utilizing third-party providers to complete scheduled foliar spray work, which reflects improved efficiency as well as lower cost-per-acre of application.

Kentucky Power's 2023 expenditures for reactive maintenance totaled \$185,058 less than the targeted work plan. The sustaining practice and components of the Company's cyclebased maintenance programs continue to reduce the volume of reactive work and enable the Company to direct the funds toward other vegetation maintenance actions.

Internal Forestry Staff O&M expenditures totaled \$210,205 less than the targeted work plan of \$654,225 for year 2023.

The Overall 2023 O&M cost-per-unit of \$13,917 was \$1,753 or (14.4%) above the targeted cost-per-unit of \$12,164. The elevated cost-per-unit reflects aggregated contract labor and equipment costs that increased by 6.5% and 3.8%, respectively, compared to the previous year.

O&M and Capital work associated with the 2023 Vegetation Management activities included trimming 49,323 trees, removing 175,079 trees, and clearing 3,534.9 acres of brush.

#### **2023 Distribution Vegetation Management Work by District**

<u>Table 2</u> below details the Company's 2023 O&M vegetation management expenditures by district. Certain O&M expenditures are not reflected in <u>Table 2</u>, such as unscheduled hotspot maintenance, trouble restoration work, tree ticket investigation, auditor expenses, third party flagging expenditures, and tree contractor's field supervision.

| Table 2: 2023 District Level O&M Expenditures by District |             |             |             |              |  |  |  |  |  |  |
|---|-------------|-------------|-------------|--------------|--|--|--|--|--|--|
| Nature of Expense Ashland Hazard Pikeville Total          |             |             |             |              |  |  |  |  |  |  |
| Annual Cycle Maintenance                                  | \$5,839,289 | \$5,864,892 | \$8,559,345 | \$20,263,526 |  |  |  |  |  |  |
| Internal  | \$184,973   | \$121,111   | \$137,936   | \$444,020    |  |  |  |  |  |  |
| TOTALS  | \$6,024,262 | \$5,986,003 | \$8,697,281 | \$20,707,546 |  |  |  |  |  |  |

<u>Table 3</u> below provides the 2023 vegetation management work by District in terms of miles cleared and acres sprayed.

| Table 3: 2023 District Level Cycle Work Performed |          |          |          |          |  |  |  |  |  |  |
|---|----------|----------|----------|----------|--|--|--|--|--|--|
| Work Performed Ashland Hazard Pikeville Total     |          |          |          |          |  |  |  |  |  |  |
| Annual Cycle Miles Cleared                        | 488.49   | 450.95   | 457.17   | 1,396.61 |  |  |  |  |  |  |
| Acres Sprayed                                     | 1,044.48 | 3,880.91 | 2,654.64 | 7,580.03 |  |  |  |  |  |  |

Attachment 1 to this report provides detail for the 2023 annual cycle vegetation management work and expenditures per district and by circuit. The attachment provides the associated cost for the miles completed during scheduled maintenance, as well as the number of trees trimmed, number of trees removed, acres of brush cut, and acres of brush sprayed on a per circuit basis.

#### **Measures of Improvement in System Reliability**

(SAIFI, CAIDI, SAIDI, and CMI)

<u>Table 4</u> below provides total system reliability indices for Kentucky Power's distribution system from year 2010 (when the Vegetation Management Program began), through December 31, 2023. Excluded from the calculation of the indices in both <u>Tables 4 and 5</u> are major events as defined by IEEE Standard 1366.

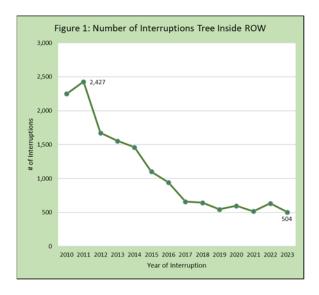

| Table 4: Fourteen Year Reporting Indicies for All Outage Cause Codes |       |       |       |  |  |  |  |  |
|--|-------|-------|-------|--|--|--|--|--|
| Year   | SAIFI | CAIDI | SAIDI |  |  |  |  |  |
| 2010   | 2.47  | 169.4 | 418.4 |  |  |  |  |  |
| 2011   | 3.09  | 195.4 | 602.8 |  |  |  |  |  |
| 2012   | 2.42  | 189.5 | 458.0 |  |  |  |  |  |
| 2013   | 2.14  | 178.5 | 382.7 |  |  |  |  |  |
| 2014   | 2.37  | 212.9 | 505.3 |  |  |  |  |  |
| 2015   | 2.47  | 189.8 | 468.1 |  |  |  |  |  |
| 2016   | 2.17  | 205.7 | 445.8 |  |  |  |  |  |

| 2023  | 0.046                                 | 194.3                                 | 8.9                                   |  |  |  |  |  |

<u>Table 5</u> highlights the improvements driven by the Company's Distribution Vegetation Management Program. The 2023 Tree Inside Rights-of-Way SAIFI and SAIDI are respectively 74.9% and 77.1% below the average Tree Inside Rights-of-Way SAIFI and SAIDI metrics for the previous thirteen-year period of 2010 through 2022. The CAIDI value also decreased 7.8% from the thirteen-year period average duration of 210.7 to 194.3 in year 2023. CAIDI measures the time for crews to respond, assess and identify the trouble, remove any debris that may have caused the outage, complete repairs, and restore service.

Since Kentucky Power's Distribution Vegetation Management Program began in July 2010, the annual number of Tree Inside Rights-of-Way Interruptions (excluding major event days) has declined by approximately 79.2% from a peak of 2,427 interruptions in year 2011 to 504 interruptions in year 2023. The annual number of customer minutes of interruption (CMI) associated with these events has also declined by approximately 91.2% from a peak of 16,388,594 in year 2011 to 1,442,741 over the same period (Figures 1 and 2).

The number of vegetation-related service interruptions for trees inside rights-of-way outages decreased 20.4% percent from 633 in year 2022, to 504 in year 2023. The number of customer minutes interrupted due to trees inside rights-of-way decreased 42.7% from the previous three-year average of 2,517,377 minutes of interruption.

Vine-related outages are included in the reported inside rights-of-way outages. For year 2023, vine-related outages constituted approximately 60.1% of inside rights-of-way interruptions.

Tree Inside Rights-of-Way interruptions are expected to remain mostly unchanged for the following reasons:

- The Company has completed end-to-end maintenance clearing for the entire primary distribution system and maintains control of its rights-of-way;
- Refusals of customers to allow the Company to clear rights-of-way to the Company's vegetation specifications are not expected to decline; and
- Outages on secondary distribution lines constitute a greater portion of the remaining total outages, limiting a reduction in the total number of outages beyond the current numbers. The Company's distribution vegetation management work has less effect on secondary distribution lines because secondary lines, including service to home attachments, are positioned lower on the poles and are subject to interference from customer planted trees and tall shrubs that become overgrown.

#### **Vegetation Management Program-to-Date Expenditures**

Kentucky Power filed vegetation management plans projecting the expenditures of \$284,377,905 in Vegetation Management O&M from the beginning of the program on July 1, 2010, through December 31, 2023. In that period, the Company spent \$286,336,063; or \$1,958,158 (0.68%) more than planned.

Kentucky Power has trimmed 931,341 trees; removed 3,223,295 trees; cleared 40,156.6 acres (62.74 square miles) of brush; and sprayed 47,916.4 acres (74.87 square miles) of brush since the Company's vegetation management program began July 1, 2010.

#### **Balancing Account**

Paragraph 8 (e)(ii) of the Settlement Agreement in Case No. 2014-00396 established a one-way balancing account beginning July 1, 2015. Any regulatory liability associated with the balancing account would "continue to be recorded on the Company's books until the Commission set base rates in the Company's next base rate case." The Commission's January 18, 2018 Order in Case No. 2017-00179, January 13, 2021 Order in Case No. 2020-00174, and January 19, 2024 Order in Case No. 2023-00159 continued the balancing account. The required annual expenditures were modified to reflect the amounts detailed in Table 5 of Mr. Phillips's direct testimony in Case No. 2020-00174.

The December 31, 2023 balancing account balance of \$318,351 (expenditures in excess of the targeted amounts) is shown in **Table 6** below:

| Table 6: Kentucky Power Balancing Account Vegetation Management Program Dollars |                         |                       |            |  |  |  |  |  |  |

| 2023  | \$21,447,083            | \$21,491,040          | \$43,957   |  |  |  |  |  |  |
| Total   | \$198,306,277           | \$198,624,628         | \$318,351  |  |  |  |  |  |  |

#### **Attachment Description**

The following attachments are incorporated in this report:

<u>Attachment 1</u> – provides a detailed summary of annual cycle maintenance work completed in year 2023 at a circuit level within each district.

<u>Attachment 2</u> – provides the annual cycle maintenance plan for year 2024 at a circuit level by district reflecting circuit level updates to the Company's previous Vegetation Management Plan filed April 3, 2023.

Attachment 3 – provides the annual spray plan for year 2024 at the district level.

<u>Attachment 4</u> – provides a recapitulation of planned 2024 O&M expenditures (including amounts that cannot be allocated on a circuit basis) by district and projected 2024 capital expenditures by district. The 2024 capital expenditures include, as was detailed in the Company's 2023 Vegetation Management Plan, a pilot capital investment program to widen the Company's existing rights-of-way to address outside the rights-of-way causes of outages, including particularly the mitigation of threats posed by diseased and dead trees.
