

**BEFORE THE
KENTUCKY PUBLIC SERVICE COMMISSION**

**IN RE: APPLICATION OF KENTUCKY UTILITIES)
COMPANY FOR AN ADJUSTMENT OF) CASE NO. 2012-00221
ITS ELECTRIC RATES)**

**APPLICATION OF LOUISVILLE GAS AND)
ELECTRIC COMPANY FOR AN)
ADJUSTMENT OF ITS ELECTRIC AND)
GAS RATES, A CERTIFICATE OF) CASE NO. 2012-00222
PUBLIC CONVENIENCE AND)
NECESSITY, APPROVAL OF OWNERSHIP)
OF GAS SERVICE LINES AND RISERS,)
AND A GAS LINE SURCHARGE)**

ERRATA

**DIRECT TESTIMONY
AND EXHIBITS OF
MICHAEL J. MAJOROS, JR.**

**ON BEHALF OF THE
KENTUCKY INDUSTRIAL UTILITY CUSTOMERS, INC.**

October 2012

1	Kentucky Utilities	\$348,401,594	\$365,054,959
2	Louisville Gas and Electric	\$274,607,374	\$286,215,127
3	Total	\$623,008,968	\$651,270,086

4 In other words the two companies' have collected almost \$651 million of net salvage
5 expense over and above the actual net salvage they have incurred. This includes all
6 utility functions including LG&E gas.

7 **Q. Where did you obtain these numbers?**

8 A. I obtained them from page 280 of their parent Company's 2011 10-K filing to the SEC.

9 **Q. How firm are these numbers?**

10 A. In my opinion, they are rock solid. These are the Companies numbers. They reported
11 these regulatory liabilities to their shareholders and the SEC. They are the Companies'
12 numbers, and they were required to report in order to get a "clean" audit opinion. If the
13 Companies did not believe the numbers and reporting were correct, they should not have
14 reported them in their financial statements and they should have taken a "qualified" audit
15 opinion.

16 **Q. What is a regulatory liability?**

17 A. A regulatory liability is an amount owed to ratepayers for excessive collections, not used
18 for their intended purpose.

19 **Q. Do you mean these Companies collectively owe almost \$651 million to their**
20 **ratepayers?**

21 A. Yes, unless they spend the money on its intended purpose.

22 ~~**Q. What is the likelihood they will spend the money on its intended purpose?**~~

1 | ~~A. In my opinion, it is not very likely because they do not have any legal obligation to spend~~
2 | ~~the money on anything at all. If they want to, they can keep the money.~~

3 | **Q. What is the likelihood they will spend the money on its intended purpose?**

4 | A. In my opinion, it is not very likely. They do not have any legal obligation to spend the
5 | money on cost of removal. That is why the FERC calls these “non-legal” asset retirement
6 | obligations. The Companies do not have any legal obligation to dismantle and tear down
7 | their power plants once they are retired. Instead, it is much more likely that the retired
8 | power plants will simply be fenced off and left in place. .

9 | **XIII. Replacement Costs**

10 | **Q. Is there a way to stem the buildup of this regulatory liability that is consistent with**
11 | **accrual accounting and the USoA?**

12 | A. Yes, a majority of the Companies’ recorded cost of removal results from the Companies’
13 | allocation of replacement costs to “cost of removal.” The USoA defines cost of removal
14 | as follows:

15 | 10. *Cost of removal* means the cost of demolishing, dismantling,
16 | tearing down or otherwise removing electric plant, including the
17 | cost of transportation and handling incidental thereto. It does not
18 | include the cost of removal activities associated with asset
19 | retirement obligations that are capitalized as part of the tangible
20 | long-lived assets that give rise to the obligation. (18 CFR Ch.1,
21 | Subchapter C, Part 101, Definition 10.)
22 |

23 | The FERC USoA also defines replacements as follows:

24 | 32. A. *Replacing* or *replacement*, when not otherwise indicated in
25 | the context, means the construction or installation of electric
26 | plant in place of property retired, together with the removal of the
27 | property retired.
28 | (*Id.*, Definition 32.)
29 |
