The fair value of intangible assets and liabilities (e.g. contracts that have favorable or unfavorable terms relative to market), including coal contracts and power purchase agreements, as well as emission allowances, have been reflected on the Balance Sheets with offsetting regulatory assets or liabilities. Prior to the acquisition, KU recovered the cost of the coal contracts, power purchases and emission allowances and this rate treatment will continue after the acquisition. As a result, management believes the regulatory assets and liabilities created to offset the fair value adjustments meet the recognition criteria established by existing accounting guidance and eliminate any ratemaking impact of the fair value adjustments. KU’s customer rates will continue to reflect these items (e.g. coal, purchased power, emission allowances) at their original contracted prices.

KU also considered whether a separate fair value should be assigned to KU’s rights to operate within its various electric service areas but concluded that these rights only provided the opportunity to earn a regulated return and barriers to market entry, which in management’s judgment is not considered a separately identifiable intangible asset under applicable accounting guidance; rather, it is considered going-concern value, or goodwill.

Note 3 - Rates and Regulatory Matters

The Company is subject to the jurisdiction of the FERC, Kentucky Commission, Virginia Commission and the Tennessee Regulatory Authority in virtually all matters related to electric utility regulation and as such, its accounting is subject to the regulated operations guidance of the FASB ASC. Given its position in the marketplace and the status of regulation in Kentucky and Virginia, there are no plans or intentions to discontinue the application of the regulated operations guidance of the FASB ASC.

KU’s Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and notes payable) including certain regulatory adjustments to exclude non-regulated investments and environmental compliance plans recovered separately through the ECR mechanism. No regulatory assets or regulatory liabilities recorded at the time base rates were determined were excluded from the return on capitalization utilized in the calculation of Kentucky base rates. Therefore, a return is earned on all Kentucky regulatory assets existing at the time base rates were determined, except where such regulatory assets were offset by associated liabilities and thus, have no net impact on capitalization.

As a result of purchase accounting, certain fair value amounts, reflecting contracts that have favorable or unfavorable terms relative to market, were recorded on the Balance Sheets with offsetting regulatory assets or liabilities. Prior to the acquisition, KU recovered in customer rates the cost of the coal contracts, power purchases and emission allowances and this rate treatment will continue after the recognition criteria established by existing accounting guidance and eliminate any ratemaking impact of the fair value adjustments. KU’s customer rates will continue to reflect these items (e.g. coal, purchased power, emission allowances) at their original contracted prices.

KU’s Virginia base rates are calculated based on a return on rate base. All regulatory assets and liabilities are excluded from the return on rate base utilized in the calculation of Virginia base rates.

KU’s wholesale requirements rates for municipal customers are calculated based on annual updates to a rate formula that utilizes a return on rate base. All regulatory assets and liabilities are excluded from the return on rate base utilized in the development of municipal rates.

2010 Purchase and Sale Agreement with PPL

On April 28, 2010, E.ON U.S. announced that a Purchase and Sale Agreement (the “Agreement”) had been entered into among E.ON US Investments Corp., PPL and E.ON.

The transaction was subject to customary closing conditions, including the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Act, receipt of required regulatory approvals (including the FERC and state regulators in Kentucky, Virginia and Tennessee) and the absence of injunctions or restraints imposed by governmental entities.

Change of control and financing-related applications were filed on May 28, 2010 with the Kentucky Commission and on June 15, 2010 with the Virginia Commission and the Tennessee Regulatory Authority. An application with the FERC was filed on June 28, 2010. During the second quarter of 2010, a number of parties were granted intervenor status in the Kentucky Commission proceedings and data request filings and responses occurred. Early termination of the Hart-Scott-Rodino waiting period was received on August 2, 2010.

A hearing in the Kentucky Commission proceedings was held on September 8, 2010 at which time a unanimous settlement agreement was presented. In the settlement, KU committed that no base rate increases would take effect before January 1, 2013. The KU rate increases that took effect on August 1, 2010, were not impacted by the settlement. Under the terms of the settlement, KU retains the right to seek approval for the deferral of "extraordinary and uncontrollable costs." Interim rate adjustments will continue to be permissible during that period for existing fuel, environmental and demand-side management cost trackers. The agreement also substitutes an acquisition savings shared deferral mechanism for the requirement that the Utilities file a synergies plan with the Kentucky Commission. This mechanism, which will be in place until the earlier of five years or the first day of the year in which a base rate increase becomes effective, permits KU to earn up to a 10.75% return on equity. Any earnings above a 10.75% return on equity will be shared with customers on a 50%/50% basis. On September 30, 2010, the Kentucky Commission issued an Order approving the transfer of ownership of KU via the acquisition of E.ON U.S. by PPL, incorporating the terms of the submitted settlement. On October 19, 2010 and October 21, 2010, respectively, Orders approving the acquisition of E.ON U.S. by PPL were received from the Virginia Commission and the Tennessee Regulatory Authority. The Commissions' Orders contained a number of other commitments with regard to operations, workforce, community involvement and other matters.

In mid-September 2010, KU and other applicants in the FERC change of control proceeding reached an agreement with the protesters, whereby such protests have been withdrawn. The agreement, which was filed for consideration with the FERC, includes various conditional commitments, such as a continuation of certain existing undertakings with protesters in prior cases, an agreement not to terminate certain KU municipal customer contracts prior to January 2017, an exclusion of any transaction-related costs from wholesale energy and tariff customer rates to the extent that KU has agreed not to seek the same transaction-related costs from retail customers and agreements to coordinate with protesters in certain open or ongoing matters. A FERC Order approving the transaction was received on October 26, 2010 and the transaction was completed November 1, 2010.

2010 Kentucky Rate Case

In January 2010, KU filed an application with the Kentucky Commission requesting an increase in electric base rates of approximately 12%, or $135 million annually. In June 2010, KU and all of the intervenors, except the AG, agreed to stipulations providing for an increase in electric base rates of $98 million annually and filed a request with the Kentucky Commission to approve such settlement. An Order in the proceeding was issued in July 2010, approving all the provisions in the stipulations, including a return on equity range of 9.75 – 10.75%. The new rates became effective on August 1, 2010.

Virginia Rate Case

In June 2009, KU filed an application with the Virginia Commission requesting an increase in electric base rates for its Virginia jurisdictional customers in an amount of $12 million annually or approximately 21%. The proposed increase reflected a proposed rate of return on rate base of 8.586% based on a return on equity of 12%. During December 2009, KU and the Virginia Commission Staff agreed to a Stipulation and Recommendation authorizing base rate revenue increases of $11 million annually and a return on rate base of 7.846% based on a 10.5% return on common equity. In March 2010, the Virginia Commission issued an Order approving the stipulation, with the increased rates to be put into effect as of April 1, 2010. As part of the stipulation, KU refunded $1 million in interim rate amounts in excess of the ultimate approved rates.

FERC Wholesale Rate Case

In September 2008, KU filed an application with the FERC for increases in electric base rates applicable to wholesale power sales contracts or interchange agreements involving, collectively, twelve Kentucky municipalities. The application requested a shift from an all-in stated unit charge rate to an unbundled formula rate, including an annual adjustment mechanism. In 2009, the FERC issued an Order approving a settlement among the parties in the case, incorporating increases of approximately 3% from prior rates and a return on equity of 11%. In May 2010, KU submitted to the FERC the proposed current annual adjustments to the formula rates which incorporated certain proposed increases. Updated rates, including certain further adjustments from a review process involving wholesale requirements customers, became effective as of July 1, 2010, subject to certain review procedures by the wholesale requirements customers and the FERC.

By mutual agreement, the parties' settlement of the 2008 application left outstanding the issue of whether KU must allocate to the municipal customers a portion of renewable resources it may be required to procure on behalf of its retail ratepayers. An Order was issued by the FERC in July 2010, indicating that KU is not required to allocate a portion of any renewable resources to the twelve municipalities, thus resolving the remaining issue.

2008 Kentucky Rate Case

In July 2008, KU filed an application with the Kentucky Commission requesting an increase in electric base rates. In January 2009, KU, the AG, the KIUC and all other parties to the rate case filed a settlement agreement with the Kentucky Commission, under which KU's electric base rates decreased by $9 million annually. An Order approving the settlement agreement was received in February 2009. The new rates were implemented effective February 6, 2009.

Regulatory Assets and Liabilities

The following regulatory assets and liabilities were included in the Balance Sheets as of December 31:

	Successor 2010	Predecessor 2009
Current regulatory assets:		
ECR (a)	$ -	$ 28
FAC (a)	-	1
Coal contracts (b)	4	-
MISO exit (c)	-	2
Other (d)	5	1
Total current regulatory assets	$ 9	$ 32
Non-current regulatory assets:		
Pension and postretirement benefits (e)	$ 117	$ 105
Other non-current regulatory assets:		
Storm restoration (c)	57	59
ARO (f)	2	30
Unamortized loss on bonds (c)	12	12
Coal contracts (b)	14	-
MISO exit (a)	5	9
Unamortized debt expense	5	-
Other (d)	10	7
Subtotal other non-current regulatory assets	105	117
Total non-current regulatory assets	$ 222	$ 222
Current regulatory liabilities:		
Coal contracts	$ 16	$ -
ECR	12	-
FAC	2	-
DSM	5	3
Emission allowances	6	-
Other (g)	-	1
Total current regulatory liabilities	$ 41	$ 4
Non-current regulatory liabilities:		
Accumulated cost of removal of utility plant	$ 348	$ 335
Other non-current regulatory liabilities:		
Coal contracts	126	-
OVEC power purchase contract	38	-
Deferred income taxes – net	6	9
Postretirement benefits	10	9
Other (g)	6	7
Subtotal other non-current regulatory liabilities	186	25
Total non-current regulatory liabilities	$ 534	$ 360

(a) The FAC and ECR regulatory assets have separate recovery mechanisms with recovery within twelve months.
(b) Offsetting regulatory asset for fair value purchase accounting adjustments. See Note 2, Acquisition by PPL, for information on the purchase accounting adjustments.
(c) These regulatory assets are recovered through base rates.
(d) Other regulatory assets include:
   - The CMRG and KCCS contributions, an EKPC FERC transmission settlement agreement and rate case expenses, which are recovered through base rates.
   - The FERC jurisdictional portion of the EKPC FERC transmission settlement agreement included in current and non-current regulatory assets, recovered through the application of the annual OATT formula rate updates.
   - FERC jurisdictional pension expense, which will be requested in a future FERC rate case.
   - Offsetting regulatory asset for fair value purchase accounting adjustment for leases. See Note 2, Acquisition by PPL, for information on the purchase accounting adjustments.
   - The Virginia levelized fuel factor, which is a separate recovery mechanism with recovery within twelve months.
(e) KU generally recovers this asset through pension expense included in the calculation of base rates.
(f) When an asset with an ARO is retired, the related ARO regulatory asset will be offset against the associated ARO regulatory liability, ARO asset and ARO liability.
(g) Other regulatory liabilities includes the emission allowance purchase accounting offset, MISO exit and a change in accounting method for FERC jurisdictional spare parts.

ECR

KU recovers the costs of complying with the Federal Clean Air Act pursuant to Kentucky Revised Statute 278-183 as amended and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from facilities utilized for production of energy from coal, through the ECR mechanism. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism.

The Kentucky Commission requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. In December 2010, the Kentucky Commission initiated a six-month review of the Utilities' environmental surcharge for the billing period ending October 2010. An order is expected in the second quarter of 2011. Also, in December 2010, an Order was issued approving the charges and credits billed through the ECR during the six-month period ending April 2010, as well as approving billing adjustments for under-recovered costs and the rate of return on capital. In May 2010, an Order was issued approving the amounts billed through the ECR during the six-month period ending October 2009, and the rate of return on capital and allowing recovery of the under-recovery position in subsequent monthly filings. In December 2009, an Order was issued approving the charges and credits billed through the ECR during the two-year period ending April 2009, an increase in the jurisdictional revenue requirement, a base rate roll-in and a revised rate of return on capital. In July 2009, an Order was issued approving the charges and credits billed through the ECR during the six-month period ending October 2008, as well as approving billing adjustments for under-recovered costs and the rate of return on capital. In August 2008, an Order was issued approving the charges and credits billed through the ECR during the six-month periods ending April

2008 and October 2007, and the rate of return on capital. In March 2008, an Order was issued approving the charges and credits billed through the ECR during the six-month and two-year periods ending October 2006 and April 2007, respectively, as well as approving billing adjustments, roll-in adjustments to base rates, revisions to the monthly surcharge filing and the rates of return on capital.

In June 2009, the Company filed an application for a new ECR plan with the Kentucky Commission seeking approval to recover investments in environmental upgrades and operations and maintenance costs at the Company's generating facilities. During 2009, KU reached a unanimous settlement with all parties to the case and the Kentucky Commission issued an Order approving KU's application. Recovery on customer bills through the monthly ECR surcharge for these projects began with the February 2010 billing cycle. At December 31, 2009, the Company had a regulatory asset of $28 million, which changed to a regulatory liability in the first quarter of 2010, as a result of these roll-in adjustments to base rates. At December 31, 2010, the regulatory liability balance was $12 million.

In February 2009, the Kentucky Commission approved a settlement agreement in the rate case which provides for an authorized return on equity applicable to the ECR mechanism of 10.63% effective with the February 2009 expense month filing, which represents a slight increase over the previously authorized 10.50%. The 10.63% return on equity for the ECR mechanism was affirmed in the 2010 rate case.

FAC

KU's retail rates contain an FAC, whereby increases and decreases in the cost of fuel for generation are reflected in the rates charged to retail customers. The FAC allows the Company to adjust billed amounts for the difference between the fuel cost component of base rates and the actual fuel cost, including transportation costs. Refunds to customers occur if the actual costs are below the embedded cost component. Additional charges to customers occur if the actual costs exceed the embedded cost component. The amount of the regulatory asset or liability is the amount that has been under- or over-recovered due to timing or adjustments to the mechanism.

The Kentucky Commission requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel clause and transfer of the then current fuel adjustment charge or credit to the base charges. In December 2010, May 2010, November 2009, January 2009, June 2008 and January 2008, the Kentucky Commission issued Orders approving the charges and credits billed through the FAC for the six-month periods ending April 2010, August 2009, April 2009, April 2008, October 2007 and April 2007, respectively. In January 2009 the Kentucky Commission initiated routine examinations of the FAC for the two-year periods November 1, 2006 through October 31, 2008. The Kentucky Commission issued an Order in June 2009 approving the charges and credits billed through the FAC during the review periods.

KU also employs an FAC mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The Virginia levelized fuel factor allows fuel recovery based on projected fuel costs for the coming year plus an adjustment for any over- or under-recovery of fuel expenses from the prior year. At December 31, 2010 and 2009, KU had a regulatory asset of $5 million and less than $1 million, respectively.

In February 2010, KU filed an application with the Virginia Commission seeking approval of a decrease in its fuel cost factor beginning with service rendered in April 2010. An Order was issued in April 2010, resulting in an agreed upon decrease of 23% from the fuel factor in effect for April 2009 through March 2010.

In February 2009, KU filed an application with the Virginia Commission seeking approval of a 29% increase in its fuel cost factor beginning with service rendered in April 2009. In February 2009, the Virginia Commission issued an Order allowing the requested change to become effective on an interim basis. The Virginia Staff testimony filed in April 2009 recommended a slight decrease in the factor filed by KU. The Company indicated the Virginia Staff proposal was acceptable. A hearing was held in May 2009, with general resolution of remaining issues. In May 2009, the Virginia Commission issued an Order approving the revised fuel factor, representing an increase of 24%, effective May 2009.

In February 2008, KU filed an application with the Virginia Commission seeking approval of a decrease in its fuel cost factor applicable during the billing period, April 2008 through March 2009. The Virginia Commission allowed the new rates to be in effect for the April 2008 customer billings. In April 2008, the Virginia Commission Staff recommended a change to the fuel factor KU filed in its application, to which KU agreed. Following a public hearing and an Order in May 2008, the recommended change became effective in June 2008, resulting in a decrease of 0.482 cents/kWh from the factor in effect for the April 2007 through March 2008 period.

Coal Contracts

In November 2010, purchase accounting adjustments were recorded for the fair value of KU’s coal contracts. Offsetting regulatory asset or liability for fair value purchase accounting adjustments eliminate any ratemaking impact of the fair value adjustments.

MISO

Following receipt of applicable FERC, Kentucky Commission and other regulatory Orders, related to proceedings that had been underway since July 2003, KU withdrew from the MISO effective September 1, 2006. Since the exit from the MISO, KU has been operating under a FERC approved OATT. KU now contracts with the TVA to act as its transmission reliability coordinator and SPP to function as its independent transmission operator, pursuant to FERC requirements. The contractual obligations with the TVA extend through August 2011 and with SPP through August 2012.

KU and the MISO agreed upon overall calculation methods for the contractual exit fee to be paid by the Company following its withdrawal. In October 2006, the Company paid $20 million to the MISO and made related FERC compliance filings. The Company’s payment of this exit fee was with reservation of its rights to contest the amount, or components thereof, following a continuing review of its calculation and supporting documentation. KU and the MISO resolved their dispute regarding the calculation of the exit fee and, in November 2007, filed an application with the FERC for approval of a recalculation agreement. In March 2008, the FERC approved the parties’ recalculation of the exit fee and the approved agreement providing KU with recovery of $4 million, of which $1 million was immediately recovered in 2008, with the remainder to be recovered over the seven years from 2008 through 2014 for credits realized from other payments the MISO will receive, plus interest.

In accordance with Kentucky Commission Orders approving the MISO exit, KU established a regulatory asset for the MISO exit fee, net of former MISO administrative charges collected via base rates through the base rate case test year ended April 30, 2008. The net MISO exit fee is subject to adjustment for possible future MISO credits and a regulatory liability for certain revenues associated with former MISO administrative charges, which were collected via base rates until February 6, 2009. The approved 2008 base rate case settlement provided for MISO administrative charges collected through base rates from May 1, 2008 to February 6, 2009, and any future adjustments to the MISO exit fee, to be established as a regulatory liability until the amounts can be amortized in future base rate cases. This regulatory liability balance as of October 31, 2009, was included in the base rate case application filed on January 29, 2010. MISO exit fee credit amounts subsequent to October 31, 2009, will continue to accumulate as a regulatory liability until they can be amortized in future base rate cases.

In November 2008, the FERC issued Orders in industry-wide proceedings relating to MISO RSG calculation and resettlement procedures. RSG charges are amounts assessed to various participants active in the MISO trading market which generally seek to compensate for uneconomic generation dispatch due to regional transmission or power market operational considerations, with some customer classes eligible for payments, while others may bear charges. The FERC Orders approved two requests for significantly altered formulas and principles, each of which the FERC applied differently to calculate RSG charges for various historical and future periods. Based upon the 2008 FERC Orders, the Company established a reserve during the fourth quarter of 2008 of less than $1 million relating to potential RSG resettlement costs for the period ended December 31, 2008. However, in May 2009, after a portion of the resettlement payments had been made, the FERC issued an Order on the requests for rehearing on one November 2008 Order which changed the effective date and reduced almost all of the previously accrued RSG resettlement costs. Therefore, these costs were reversed and a receivable was established for amounts already paid of less than $1 million. The MISO began refunding the amounts to the Company in June 2009 with full repayment by September 2009. In June 2009, the FERC issued an Order in the rate mismatch RSG proceeding, stating it will not require resettlements of the rate mismatch calculation from April 1, 2005 to November 4, 2007. An accrual had previously been recorded in 2008 for the rate mismatch issue for the time period April 25, 2006 to August 9, 2007, but no accrual had been recorded for the time period November 5, 2007 to November 9, 2008 based on the prior Order. Accordingly, the accrual for the former time period was reversed and an accrual for the latter time period was recorded in June 2009, with a net effect of $1 million of expense, substantially all of which was paid by September 2009.

In August 2009, the FERC determined that the MISO had failed to demonstrate that its proposed exemptions to real-time RSG charges were just and reasonable. In November 2009, the MISO made a compliance filing incorporating the rulings of the FERC Orders and a related task force, with a primary open issue being whether certain of the tariff changes are applied prospectively only or retroactively to approximately January 6, 2009.

In November 2009, the Utilities filed an application with the FERC to approve certain independent transmission operator arrangements to be effective upon the expiration of their current contract with SPP in September 2010. The application sought authority for KU and LG&E to function after such date as the administrators of their own OATT for most purposes. However, due to the lack of FERC approval for such an approach and the approaching expiration of the SPP contract, the Utilities determined the approach was no longer reasonably achievable without unacceptable delay and uncertainty. In July 2010, the Utilities entered into a new agreement with SPP to provide independent transmission operator services for a specified, limited time and removed its application for authority of administering its own OATT. The TVA, which currently acts as reliability coordinator, has also been retained under the existing service contract. The new agreement extends TVA services to August 2011 with no alterations or changes to the party's duties or responsibilities.

In August 2010, the FERC issued three Orders accepting most facets of several MISO RSG compliance filings. The FERC ordered the MISO to issue refunds for RSG charges that were imposed by the MISO on the assumption that there were rate mismatches for the period beginning November 5, 2007 through the present. There is no financial statement impact to the Company from this Order, as the MISO had anticipated that the FERC would require these refunds and had preemptively included them in the resettlements paid in 2009. The FERC denied the MISO's proposal to exempt certain resources from RSG charges, effective prospectively. The FERC accepted portions and rejected portions of the MISO's proposed RSG rate Redesign Proposal, which will be effective when the software is ready for implementation subject to further compliance filings. The impact of the Redesign Proposal on the Company cannot be estimated at this time.

Pension and Postretirement Benefits

KU accounts for pension and postretirement benefits in accordance with the compensation – retirement benefits guidance of the FASB ASC. This guidance requires employers to recognize the over-funded or under-funded status of a defined benefit pension and postretirement plan as an asset or liability on the Balance Sheets and to recognize through other comprehensive income the changes in the funded status in the year in which the changes occur. Under the regulated operations guidance of the FASB ASC, KU can defer recoverable costs that would otherwise be charged to expense or equity by non-regulated entities. Current rate recovery in Kentucky and Virginia is based on the compensation – retirement benefits guidance of the FASB ASC. Regulators have been clear and consistent with their historical treatment of such rate recovery; therefore, the Company has recorded a regulatory asset representing the change in funded status of its pension plan that is expected to be recovered and a regulatory liability representing the change in funded status of its postretirement benefit plan. The regulatory asset and liability will be adjusted annually as prior service cost and actuarial gains and losses are recognized in net periodic benefit cost.

Storm Restoration

In January 2009, a significant ice storm passed through KU's service area causing approximately 199,000 customer outages, followed closely by a severe wind storm in February 2009, causing approximately 44,000 customer outages. An application was filed with the Kentucky Commission in April 2009, requesting approval to establish a regulatory asset and defer for future recovery approximately $62 million in incremental operation and maintenance expenses related to the storm restoration. In September 2009, the Kentucky Commission issued an Order allowing the establishment of a regulatory asset of up to $62 million based on actual costs for storm damages and service restoration due to the January and February 2009 storms. In September 2009, a regulatory asset of $57 million was established for actual costs incurred and approval was received in KU's 2010 base rate case to recover this asset over a ten year period beginning August 1, 2010.

In September 2008, high winds from the remnants of Hurricane Ike passed through the service area causing significant outages and system damage. In October 2008, an application was filed with the

Kentucky Commission requesting approval to establish regulatory assets and defer for future recovery approximately $3 million of expenses related to the storm restoration. In December 2008, the Kentucky Commission issued an Order allowing the establishment a regulatory asset of up to $3 million based on actual costs for storm damages and service restoration due to Hurricane Ike. In December 2008, a regulatory asset of $2 million was established for actual costs incurred and KU received approval in its 2010 base rate case to recover this asset over a ten year period, beginning August 1, 2010.

Unamortized Loss on Bonds

The costs of early extinguishment of debt, including call premiums, legal and other expenses, and any unamortized balance of debt expense are amortized using the straight-line method, which approximates the effective interest method, over the life of either the replacement debt (in the case of refinancing) or the original life of the extinguished debt.

CMRG and KCCS Contributions

In July 2008, KU and LG&E, along with Duke Energy Kentucky, Inc. and Kentucky Power Company, filed an application with the Kentucky Commission requesting approval to establish regulatory assets related to contributions to the CMRG for the development of technologies for reducing carbon dioxide emissions and the KCCS to study the feasibility of geologic storage of carbon dioxide. The filing companies proposed that these contributions be treated as regulatory assets to be deferred until recovery is provided in the next base rate case of each company, at which time the regulatory assets will be amortized over the life of each project: four years with respect to the KCCS and ten years with respect to the CMRG. KU and LG&E jointly agreed to provide $2 million over two years to the KCCS and up to $2 million over ten years to the CMRG. In October 2008, an Order approving the establishment of the requested regulatory assets was received. KU received approval from the Kentucky Commission in the Company's 2010 Kentucky base rate case to recover these regulatory assets over the requested period beginning August 1, 2010.

Rate Case Expenses

KU incurred $1 million in expenses related to the development and support of the 2008 Kentucky base rate case. The Kentucky Commission approved the establishment of a regulatory asset for these expenses and authorized amortization over three years beginning in March 2009.

KU incurred $2 million in expenses related to the development and support of the 2010 Kentucky base rate case. The Kentucky Commission approved the establishment of a regulatory asset for these expenses and authorized amortization over three years beginning in August 2010.

FERC Jurisdictional Pension Costs

Other regulatory assets include pension costs of $5 million incurred by the Company and allocated to its FERC jurisdictional ratepayers. The Company will seek recovery of this asset in the next FERC rate proceeding.

Deferred Storm Costs

Based on an Order from the Kentucky Commission in June 2004, KU reclassified from maintenance expense to a regulatory asset $4 million related to costs not reimbursed from the 2003 ice storm. These costs were amortized through June 2009. KU earned a return of these amortized costs, which were included in jurisdictional operating expenses.

DSM

DSM consists of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. KU's rates contain a DSM provision which includes a rate mechanism that provides for concurrent recovery of DSM costs and provides an incentive for implementing DSM programs. The provision allows KU to recover revenues from lost sales associated with the DSM programs based on program plan engineering estimates and post-implementation evaluations.

In July 2007, KU and LG&E filed an application with the Kentucky Commission requesting an order approving enhanced versions of the existing DSM programs along with the addition of several new cost effective programs. The total annual budget for these programs is approximately $26 million. In March 2008, the Kentucky Commission issued an Order approving the application, with minor modifications. KU and LG&E filed revised tariffs in April 2008, under authority of this Order, which were effective in May 2008.

Emission Allowances

In November 2010, purchase accounting adjustments were recorded for the fair market value of KU's SO_2, NOx ozone season and NOx annual emission allowances. Offsetting regulatory assets or liabilities for fair value purchase accounting adjustments eliminate any ratemaking impact of the fair value adjustments. KU is granted SO_2 emission allowances through 2040 and NOx ozone season and NOx annual emission allowances through 2011.

Accumulated Cost of Removal of Utility Plant

As of December 31, 2010 and 2009, KU segregated the cost of removal, previously embedded in accumulated depreciation, of $348 million and $335 million, respectively, in accordance with FERC Order No. 631. For reporting purposes on the Balance Sheets, KU presented this cost of removal as a "Regulatory liability" pursuant to the regulated operations guidance of the FASB ASC.

OVEC Power Purchase Contract

In November 2010, purchase accounting adjustments were recorded for the fair value of the power purchase agreement between KU and OVEC. Offsetting regulatory liability for fair value purchase accounting adjustment eliminate any ratemaking impact of the fair value adjustments.

Deferred Income Taxes – Net

These regulatory liabilities represent the future revenue impact from the reversal of deferred income taxes required for unamortized investment tax credits, the allowance for funds used during construction and deferred taxes provided at rates in excess of currently enacted rates.

Other Regulatory Matters

Kentucky Commission Report on Storms

In November 2009, the Kentucky Commission issued a report following review and analysis of the effects and utility response to the September 2008 wind storm and the January 2009 ice storm and possible utility industry preventative measures relating thereto. The report suggested a number of proposed or recommended preventative or responsive measures, including consideration of selective hardening of facilities, altered vegetation management programs, enhanced customer outage communications and similar measures. In March 2010, the Utilities filed a joint response reporting on their actions with respect to such recommendations. The response indicated implementation or completion of substantially all of the recommendations, including, among other matters, on-going reviews of system hardening and vegetation management procedures, certain test or pilot programs in such areas and fielding of enhanced operational and customer outage-related systems.

Wind Power Agreements

In August 2009, KU and LG&E filed a notice of intent with the Kentucky Commission indicating their intent to file an application for approval of wind power purchase contracts and cost recovery mechanisms. The contracts were executed in August 2009 and were contingent upon KU and LG&E receiving acceptable regulatory approvals. Pursuant to the proposed 20-year contracts, KU and LG&E would jointly purchase respective assigned portions of the output of two Illinois wind farms totaling an aggregate 109.5 Mw. In September 2009, the Utilities filed an application and supporting testimony with the Kentucky Commission. In October 2009, the Kentucky Commission issued an Order denying the Utilities' request to establish a surcharge for recovery of the costs of purchasing wind power. The Kentucky Commission stated that such recovery constitutes a general rate adjustment and is subject to the regulations of a base rate case. The Kentucky Commission Order provided for the request for approval of the wind power agreements to proceed independently from the request to recover the costs thereof via surcharges. In November 2009, KU and LG&E filed for rehearing of the Kentucky Commission's Order and requested that the matters of approval of the contract and recovery of the costs thereof remain the subject of the same proceeding. During December 2009, the Kentucky Commission issued data requests on this matter. In March 2010, the Utilities delivered notices of termination under provisions of the wind power contracts. The Utilities also filed a motion with the Kentucky Commission noting the termination of the contracts and seeking withdrawal of their application in the related regulatory proceeding. In April 2010, the Kentucky Commission issued an Order allowing the Utilities to withdraw their pending application.

Trimble County Asset Purchase and Depreciation

In July 2009, the Utilities notified the Kentucky Commission of the proposed sale from the Utilities of certain ownership interests in certain existing Trimble County generating station assets which were anticipated to provide joint or common use in support of the jointly-owned TC2 generating unit under construction at the station. The undivided ownership interests sold provide KU an ownership interest in these common assets proportional to its interest in TC2 and the assets' role in supporting both TC1 and TC2. In December 2009, the Utilities completed the sale transaction at a price of $48 million, representing the current net book value of the assets multiplied by the proportional interest being sold.

In August 2009, the Utilities jointly filed an application with the Kentucky Commission to approve new depreciation rates for applicable jointly-owned TC2-related generating, pollution control and other plant equipment and assets. During December 2009, the Kentucky Commission extended the data discovery process through January 2010 and authorized the Utilities on an interim basis to begin using the depreciation rates for TC2 as proposed in the application. In March 2010, the Kentucky Commission issued a final Order approving the use of the proposed depreciation rates on a permanent basis.

TC2 CCN Application and Transmission Matters

An application for a CCN for construction of TC2 was approved by the Kentucky Commission in November 2005. CCNs for two transmission lines associated with TC2 were issued by the Kentucky Commission in September 2005 and May 2006. All regulatory approvals and rights of way for one transmission line have been obtained.

KU's and LG&E's CCN for a transmission line associated with the TC2 construction has been challenged by certain property owners in Hardin County, Kentucky. Certain proceedings relating to CCN challenging and federal historic preservation permit requirements have concluded with outcomes in the Utilities' favor.

Completion of the transmission lines are also subject to standard construction permit, environmental authorization and real property or easement acquisition procedures. Certain Hardin County landowners have raised challenges to the transmission line in some of these forums as well.

With respect to the remaining on-going dispute, KU obtained various successful rulings during 2008 at the Hardin County Circuit Court confirming its condemnation rights. In August 2008, several landowners appealed such rulings to the Kentucky Court of Appeals and received a temporary stay preventing KU from accessing their properties. In May 2010, the Kentucky Court of Appeals issued an Order affirming the Hardin Circuit Court's finding that KU had the right to condemn easements on the properties. In May 2010, the landowners filed a petition for reconsideration with the Court of Appeals. In July 2010, the Court of Appeals denied that petition. In August, 2010, the landowners filed for discretionary review of that denial by the Kentucky Supreme Court.

Settlement discussions with the Hardin County property owners involved in the appeals of the condemnation proceedings have been unsuccessful to date. During the fourth quarter of 2008, KU and LG&E entered into settlements with certain Meade County landowners and obtained dismissals of prior litigation they brought challenging the same transmission line.

As a result of the aforementioned unresolved litigation delays encountered in obtaining access to certain properties in Hardin County, KU obtained easements to allow construction of temporary transmission facilities, bypassing those properties while the litigated issues are resolved. In September 2009, the Kentucky Commission issued an Order stating that a CCN was necessary for two segments of the proposed temporary facilities. In December 2009, the Kentucky Commission granted the CCNs for the relevant segments and the property owners have filed various motions to intervene, stay and appeal certain elements of the Kentucky Commission's recent orders. In January 2010, in respect of two of such proceedings, the Franklin County circuit court issued Orders denying the property owners' request for a stay of construction and upholding the prior Kentucky Commission denial of their intervenor status.

Consistent with the regulatory authorizations and the favorable outcome of the legal proceedings, the Utilities completed construction activities on the permanent transmission line easements. During 2010, the Utilities placed the transmission line into operation. While the Utilities are not currently able to predict the ultimate outcome and possible financial effects of the remaining legal proceedings, the Utilities do not believe the matter involves relevant or continuing risks to operations.

Utility Competition in Virginia

The Commonwealth of Virginia passed the Virginia Electric Utility Restructuring Act in 1999. This act gave customers the ability to choose their electric supplier and capped electric rates through December 2010. KU subsequently received a legislative exemption from the customer choice requirements of this law. In April 2007, however, the Virginia General Assembly amended the Virginia Electric Utility Restructuring Act, thereby terminating this competitive market and commencing re-regulation of utility rates. The new act ended the cap on rates at the end of 2008. Pursuant to this legislation, the Virginia Commission adopted regulations revising the rules governing utility rate increase applications. As of January 2009, a hybrid model of regulation is being applied in Virginia. Under this model, utility rates are reviewed every two years. KU's exemption from the requirements of the Virginia Electric Utility Restructuring Act in 1999, however, discharges the Company from the requirements of the new hybrid model of regulation. In lieu of submitting an annual information filing, the Company has the option of requesting a change in base rates to recover prudently incurred costs by filing a traditional base rate case. KU is also subject to other utility regulations in Virginia, including, but not limited to, the recovery of prudently incurred fuel costs through an annual fuel factor charge and the submission of integrated resource plans.

Market-Based Rate Authority

In July 2006, the FERC issued an Order in KU's market-based rate proceeding accepting the Company's further proposal to address certain market power issues the FERC claimed would arise upon an exit from the MISO. In particular, the Company received permission to sell power at market-based rates at the interface of balancing areas in which it may be deemed to have market power, subject to a restriction that such power will not be collusively re-sold back into such balancing areas. However, restrictions exist on sales by KU of power at market-based rates in the KU and LG&E and Big Rivers Electric Company balancing areas. In June 2007, the FERC issued Order No. 697 implementing certain reforms to market-based rate regulations, including restrictions similar to those previously in place for the Company's power sales at balancing area interfaces. In December 2008, the FERC issued Order No. 697-B potentially placing additional restrictions on certain power sales involving areas where market power is deemed to exist. As a condition of receiving and retaining market-based rate authority, KU must comply with applicable affiliate restrictions set forth in the FERC regulation. During September 2008, the Company submitted a regular triennial update filing under market-based rate regulations.

In June 2009, the FERC issued Order No. 697-C which generally clarified certain interpretations relating to power sales and purchases at balancing area interfaces or into balancing areas involving market power. In July 2009, the FERC issued an Order approving the Company's September 2008 application for market-based rate authority. During July 2009, affiliates of KU completed a transaction terminating certain prior generation and power marketing activities in the Big Rivers Electric Company balancing area, which termination should ultimately allow a filing to request a determination that the Company no longer is deemed to have market power in such balancing area.

KU conducts certain of its wholesale power sales activities in accordance with existing market-based rate authority principles and interpretations. Future FERC proceedings relating to Orders 697 or market-based rate authority could alter the amount of sales made at market-based versus cost-based rates. The Company's sales under market-based rate authority totaled less than $1 million for the year ended December 31, 2010.

Mandatory Reliability Standards

As a result of the EPAct 2005, certain formerly voluntary reliability standards became mandatory in June 2007 and authority was delegated to various Regional Reliability Organizations ("RROs") by the NERC, which was authorized by the FERC to enforce compliance with such standards, including promulgating new standards. Failure to comply with mandatory reliability standards can subject a registered entity to sanctions, including potential fines of up to $1 million per day, as well as non-monetary penalties, depending upon the circumstances of the violation. The Utilities are members of the SERC, which acts as KU's and LG&E's RRO. During December 2009 and April, July and August 2010, the Utilities submitted ten self-reports relating to various standards, which self-reports remain in the early stages of RRO review, and therefore, the Utilities are unable to estimate the outcome of these matters. Mandatory reliability standard settlements commonly also include non-penalty elements, including compliance steps and mitigation plans. Settlements with SERC proceed to NERC and FERC review before becoming final. While the Utilities believe they are in compliance with the mandatory reliability standards, events of potential non-compliance may be identified from time-to-time. The Utilities cannot predict such potential violations or the outcome of self-reports described above.

Integrated Resource Planning

Integrated resource planning ("IRP") regulations in Kentucky require major utilities to make triennial IRP filings with the Kentucky Commission. In April 2008, KU and LG&E filed their 2008 joint IRP with the Kentucky Commission. The IRP provides historical and projected demand, resource and financial data and other operating performance and system information. The Kentucky Commission issued a staff report and Order closing this proceeding in December 2009. Pursuant to the Virginia Commission's December 2008 Order, KU filed its IRP in July 2009. The filing consisted of the 2008 Joint IRP filed by KU and LG&E with the Kentucky Commission along with additional data. The Virginia Commission has not established a procedural schedule for this proceeding. KU expects to file their next IRP in April 2011.

PUHCA 2005

PPL, KU's ultimate parent, is a holding company under PUHCA 2005. PPL, its utility subsidiaries, including KU, and certain of its non-utility subsidiaries, are subject to extensive regulation by the FERC with respect to numerous matters, including electric utility facilities and operations, wholesale sales of power and related transactions, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties, payments of dividends out of capital and surplus, financial matters and inter-system sales of non-power goods and services. KU believes that it has adequate authority, including financing authority, under existing FERC Orders and regulations to conduct its business and will seek additional authorization when necessary.

EPAct 2005

The EPAct 2005 was enacted in August 2005. Among other matters, this comprehensive legislation contains provisions mandating improved electric reliability standards and performance; granting enhanced civil penalty authority to the FERC; providing economic and other incentives relating to transmission, pollution control and renewable generation assets; increasing funding for clean coal generation incentives; repealing the Public Utility Holding Company Act of 1935; enacting PUHCA 2005; and expanding FERC jurisdiction over public utility holding companies and related matters via the Federal Power Act and PUHCA 2005.

In February 2006, the Kentucky Commission initiated an administrative proceeding to consider the requirements of the EPAct 2005, Subtitle E Section 1252, Smart Metering, which concerns time-based metering and demand response, and Section 1254, Interconnections. EPAct 2005 requires each state regulatory authority to conduct a formal investigation and issue a decision on whether or not it is appropriate to implement certain Section 1252 standards within eighteen months after the enactment of EPAct 2005 and to commence consideration of Section 1254 standards within one year after the enactment of EPAct 2005. Following a public hearing with all Kentucky jurisdictional electric utilities, in December 2006, the Kentucky Commission issued an Order in this proceeding indicating that the EPAct 2005 Section 1252 and Section 1254 standards should not be adopted. However, all five Kentucky Commission jurisdictional utilities were required to file real-time pricing pilot programs for their large commercial and industrial customers. KU developed a real-time pricing pilot program for large industrial and commercial customers and filed the details of the plan with the Kentucky Commission in April 2007. In February 2008, the Kentucky Commission issued an Order approving the real-time pricing pilot program proposed by KU for implementation within approximately eight months. The tariff was filed in October 2008, with an effective date of December 1, 2008. KU files annual reports on the program within 90 days of each plan year end for the three-year pilot period.

Green Energy Riders

In February 2007, KU and LG&E filed a Joint Application and Testimony for Proposed Green Energy Riders. In May 2007, a Kentucky Commission Order was issued authorizing KU to establish Small and Large Green Energy Riders, allowing customers to contribute funds to be used for the purchase of renewable energy credits. During November 2009, KU and LG&E filed an application to both continue and modify the existing Green Energy Programs. In February 2010, the Kentucky Commission approved the Utilities’ application, as filed.

Home Energy Assistance Program

In July 2007, KU filed an application with the Kentucky Commission for the establishment of a Home Energy Assistance program. During September 2007, the Kentucky Commission approved the five-year program as filed, effective in October 2007. The programs were scheduled to terminate in September 2012 and is funded through a $0.10 per month meter charge. Effective February 6, 2009, as a result of the settlement agreement in the 2008 base rate case, the program is funded through a $0.15 per month meter charge. As a condition in the settlement in the change of control proceeding before the Kentucky Commission in the PPL acquisition, the program was extended to September 2015.

Collection Cycle Revision

As part of its base rate case filed on July 29, 2008, LG&E proposed to change the due date for customer bill payments from 15 days to 10 days to align its collection cycle with KU. In addition, in its rate case filed on July 29, 2008, KU proposed to include a late payment charge if payment is not received within 15 days from the bill issuance date to align with LG&E. The settlement agreements approved in the rate cases in February 2009 changed the due date for customer bill payments to 12 days after bill issuance for both KU and LG&E and permitted KU's implementation of a late payment charge if payment is not received within 15 days from the bill issuance date.

Depreciation Study

In December 2007, KU filed a depreciation study with the Kentucky Commission as required by a previous Order. In August 2008, the Kentucky Commission issued an Order consolidating the depreciation study with the base rate case proceeding. The approved settlement agreements in the rate cases established new depreciation rates effective February 2009. KU also filed the depreciation study with the Virginia Commission which approved the implementation of the new depreciation rates effective February 2009. Approval by the Virginia Commission does not preclude the rates from being raised as an issue by any party in KU's future base rate cases in Virginia.

Brownfield Development Rider Tariff

In March 2008, KU received Kentucky Commission approval for a Brownfield Development Rider, which offers a discounted rate to electric customers who meet certain usage and location requirements, including taking new service at a Brownfield site, as certified by the appropriate Kentucky state agency. The rider permits special contracts with such customers which provide for a series of declining partial rate discounts over an initial five-year period of a longer service arrangement. The tariff is intended to promote local economic redevelopment and efficient usage of utility resources by aiding potential reuse of vacant Brownfield sites.

Interconnection and Net Metering Guidelines

In May 2008, the Kentucky Commission on its own motion initiated a proceeding to establish interconnection and net metering guidelines in accordance with amendments to existing statutory requirements for net metering of electricity. The jurisdictional electric utilities and intervenors in this case presented proposed interconnection guidelines to the Kentucky Commission in October 2008. In a January 2009 Order, the Kentucky Commission issued the Interconnection and Net Metering Guidelines – Kentucky that were developed by all parties to the proceeding. KU does not expect any financial or other impact as a result of this Order. In April 2009, KU filed revised net metering tariffs and application forms pursuant to the Kentucky Commission's Order. The Kentucky Commission issued an Order in April 2009, which suspended for five months all net metering tariffs filed by the jurisdictional electric utilities. This suspension was intended to allow sufficient time for review of the filed tariffs by the Kentucky Commission Staff and intervening parties. In June 2009, the Kentucky Commission Staff held an informal conference with the parties to discuss issues related to the net metering tariffs filed by KU. Following this conference, the intervenors and KU resolved all issues and KU filed revised net metering tariffs with the Kentucky Commission. In August 2009, the Kentucky Commission issued an Order approving the revised tariffs.

EISA 2007 Standards

In November 2008, the Kentucky Commission initiated an administrative proceeding to consider new standards as a result of the Energy Independence and Security Act of 2007 ("EISA 2007"), part of which amends the Public Utility Regulatory Policies Act of 1978 ("PURPA"). There are four new PURPA standards and one non-PURPA standard applicable to electric utilities. The proceeding also considers two new PURPA standards applicable to natural gas utilities. EISA 2007 requires state regulatory commissions and non-regulated utilities to begin consideration of the rate design and smart grid investments no later than December 19, 2008 and to complete the consideration by December 19, 2009. The Kentucky Commission established a procedural schedule that allowed for data discovery and testimony through July 2009. In October 2009, the Kentucky Commission held an informal conference for the purpose of discussing issues related to the standard regarding the consideration of Smart Grid investments. A public hearing has not been scheduled in this matter.

Note 4 - Asset Retirement Obligations

A summary of KU's net ARO assets, ARO liabilities and regulatory assets established under the asset retirement and environmental obligations guidance of the FASB ASC follows:

	ARO Net Assets	ARO Liabilities	Regulatory Assets
As of December 31, 2008, Predecessor	$ 5	$ (32)	$ 28
ARO accretion and depreciation	(1)	(2)	2
As of December 31, 2009, Predecessor	4	(34)	30
ARO accretion and depreciation	-	(2)	2
Reclassification for retired assets	(1)	-	1
ARO revaluation - change in estimates	22	(24)	2
As of October 31, 2010, Predecessor	25	(60)	35
ARO accretion and depreciation	(1)	-	1
Purchase accounting - fair value adjustment	28	6	(34)
As of December 31, 2010, Successor	$ 52	$ (54)	$ 2

In September 2010, the Company performed a revaluation of its AROs as a result of recently proposed environmental legislation and improved ability to forecast asset retirement costs due to recent construction and retirement activity.

In November 2010, the Company recorded a purchase accounting adjustment to fair value AROs due to the PPL acquisition.

Pursuant to regulatory treatment prescribed under the regulated operations guidance of the FASB ASC, an offsetting regulatory credit was recorded in "Depreciation and amortization" in the Statements of Income for the Successor of $1 million in 2010 and $2 million for the Predecessor for the ARO accretion and depreciation expense. The offsetting regulatory credit recorded was $2 million in 2009 and 2008 for the ARO accretion and depreciation expense. The ARO liabilities are offset by cash settlements that have not yet been applied. Therefore, ARO net assets, ARO liabilities and regulatory assets balances do not net to zero due to the cash settlements.

KU's AROs are primarily related to the final retirement of assets associated with generating units. KU transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, under the asset retirement and environmental obligations guidance of the FASB ASC, no material asset retirement obligations are recorded for transmission and distribution assets.

Note 5 – Derivative Financial Instruments

KU is subject to interest rate and commodity price risk related to on-going business operations. The Company's policies allow for the interest rate risk to be managed through the use of fixed rate debt, floating rate debt and interest rate swaps. Although the Company's policies allow for the use of interest rate swaps, as of December 31, 2010 and 2009, KU had no interest rate swaps outstanding. At December 31, 2010, KU's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was less than $1 million.

The Company does not net collateral against derivative instruments.

Energy Trading and Risk Management Activities

KU conducts energy trading and risk management activities to maximize the value of power sales from physical assets it owns. Energy trading activities are principally forward financial transactions to manage price risk and are accounted for as non-hedging derivatives on a mark-to-market basis in accordance with the derivatives and hedging guidance of the FASB ASC.

Energy trading and risk management contracts are valued using prices based on active trades from Intercontinental Exchange Inc. In the absence of a traded price, midpoints of the best bids and offers are the primary determinants of valuation. When sufficient trading activity data is unavailable, other inputs include prices quoted by brokers or observable inputs other than quoted prices, such as one-sided bids or offers as of the balance sheet date. Quotes are verified quarterly using an independent pricing source of actual transactions. Quotes for combined off-peak and weekend timeframes are allocated between the two timeframes based on their historical proportional ratios to the integrated cost. No other adjustments are made to the forward prices. No changes to valuation techniques for energy trading and risk management activities occurred during 2010 or 2009. Changes in market pricing, interest rate and volatility assumptions were made during both years.

KU's financial assets and liabilities as of December 31, 2010 and December 31, 2009, arising from energy trading and risk management contracts not designated as hedging instruments accounted for at fair value total less than $1 million and are recorded in prepayments and other current assets and other current liabilities, respectively.

The Company maintains credit policies intended to minimize credit risk in wholesale marketing and trading activities by assessing the creditworthiness of potential counterparties prior to entering into transactions with them and continuing to evaluate their creditworthiness once transactions have been initiated. To further mitigate credit risk, KU seeks to enter into netting agreements or require cash deposits, letters of credit and parental company guarantees as security from counterparties. The Company uses ratings of S&P, Moody's and definitive qualitative and quantitative data to assess the financial strength of counterparties on an on-going basis. If no external rating exists, KU assigns an internally generated rating for which it sets appropriate risk parameters. As risk management contracts are valued based on changes in market prices of the related commodities, credit exposures are revalued and monitored on a daily basis. At December 31, 2010, 100% of the trading and risk management commitments were with counterparties rated BBB-/Baa3 equivalent or better. The Company has reserved against counterparty credit risk based on KU's own creditworthiness (for net liabilities) and its counterparty's creditworthiness (for net assets). The Company applies historical default rates within varying credit ratings over time provided by S&P or Moody's. At December 31, 2010 and December 31, 2009, counterparty credit reserves related to energy trading and risk management contracts were less than $1 million.

The net volume of electricity based financial derivatives outstanding at December 31, 2010 and December 31, 2009, was 129,199 Mwh and 315,600 Mwh, respectively. Cash collateral related to the energy trading and risk management contracts was less than $1 million at December 31, 2010 and December 31, 2009. Cash collateral related to the energy trading and risk management contracts is recorded in "Prepayments and other current assets" on the Balance Sheets.

KU manages the price risk of its estimated future excess economic generation capacity using market-traded forward contracts. Hedge accounting treatment has not been elected for these transactions; therefore, realized and unrealized gains and losses are included in the Statements of Income.

The following table presents the effect of market-traded forward contract derivatives not designated as hedging instruments on income:

		Successor	Predecessor		
		November 1, 2010	January 1, 2010	Year Ended	
Loss Recognized		through	through	December 31,	
in Income	Location	December 31, 2010	October 31, 2010	2009	2008
Unrealized gain (loss)	Electric revenues	$ -	$ -	$ (1)	$ 1

Net realized gains and losses were zero for the period ended December 31, 2010 and less than $1 million for the periods ended October 31, 2010, December 31, 2009 and December 31, 2008.

Credit Risk Related Contingent Features

Certain of KU's derivative contracts contain credit contingent provisions which would permit the counterparties with which KU is in a net liability position to require the transfer of additional collateral upon a decrease in KU's credit rating. Some of these provisions would require KU to transfer additional collateral or permit the counterparty to terminate the contract if KU's credit rating were to fall below investment grade. Some of these provisions also allow the counterparty to require additional collateral upon each decrease in the credit rating at levels that remain above investment grade. In either case, if KU's credit rating were to fall below investment grade (i.e., below BBB- for S&P or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent provisions require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization by KU on derivative instruments in net liability positions.

Additionally, certain of KU's derivative contracts contain credit contingent provisions that require KU to provide "adequate assurance" of performance if the other party has reasonable grounds for insecurity regarding KU's performance of its obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. A demand for additional assurance would typically involve negotiations among the parties.

To determine net liability positions, KU uses the fair value of each agreement. At December 31, 2010, there were no energy trading and risk management derivative contracts with credit risk related contingent features that are in a liability position and collateral of less than $1 million was posted in the normal course of business. At December 31, 2010, a downgrade of the Company's credit rating below investment grade would have no effect on the energy trading and risk management derivative contracts or collateral required.

Note 6 - Fair Value Measurements

KU adopted the fair value guidance in the FASB ASC in two phases. Effective January 1, 2008, the Company adopted it for all financial instruments and non-financial instruments accounted for at fair value on a recurring basis, and effective January 1, 2009, the Company adopted it for all non-financial instruments accounted for at fair value on a non-recurring basis. The FASB ASC guidance clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, the FASB ASC guidance establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value.

The carrying values and estimated fair values of KU's non-trading financial instruments follow:

	Successor		Predecessor	
	December 31, 2010		December 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term bonds	$ 1,841	$ 1,728	$ 351	$ 351
Long-term debt to affiliated company	-	-	1,331	1,401

The long-term fixed rate pollution control bond valuations reflect prices quoted by investment banks, which are active in the market for these instruments. First mortgage bond valuations reflect prices quoted from a third party service. The fair value of the long-term debt due to affiliated company is determined using an internal valuation model that discounts the future cash flows of each loan at current market rates as determined based on quotes from investment banks that are actively involved in capital markets for utilities and factor in KU's credit ratings and default risk. The fair values of cash and cash equivalents, accounts receivable, cash surrender value of key man life insurance, accounts payable and notes payable are substantially the same as their carrying values.

KU has classified the applicable financial assets and liabilities that are accounted for at fair value into the three levels of the fair value hierarchy, as defined by the fair value measurements and disclosures guidance of the FASB ASC, as discussed in Note 1, Summary of Significant Accounting Policies.

The Company classifies its derivative cash collateral balances within level 1 based on the funds being held in a demand deposit account. The Company classifies its derivative energy trading and risk management contracts within level 2 because it values them using prices actively quoted for proposed or executed transactions, quoted by brokers or observable inputs other than quoted prices.

KU's financial assets and liabilities as of December 31, 2010 and 2009, arising from energy trading and risk management contracts accounted for at fair value on a recurring basis total less than $1 million. Cash collateral related to the energy trading and risk management contracts was less than $1 million at December 31, 2010 and December 31, 2009 each year.

There were no level 3 measurements for the periods ending December 31, 2010 and December 31, 2009.

Note 7 - Goodwill and Intangible Assets

In connection with PPL's acquisition of LKE, KU recorded goodwill on November 1, 2010. In addition, as of November 1, 2010, certain intangible assets were adjusted to their fair value and new intangible assets were recorded. See Note 2, Acquisition by PPL, for further information.

Goodwill

The Company performs its required annual goodwill impairment test in the fourth quarter. Impairment tests are performed between the annual tests when the Company determines that a triggering event has occurred that would, more likely than not, reduce the fair value of a reporting unit below its carrying value. The goodwill impairment test is comprised of a two-step process. In step 1, the Company identifies a potential impairment by comparing the estimated fair value of the regulated utilities (the goodwill reporting unit) to their carrying value, including goodwill, on the measurement date. If the estimated fair value exceeds its carrying amount, goodwill is not considered impaired. If the fair value is less than the carrying value, then step 2 is performed to measure the amount of impairment loss, if any. The step 2 calculation compares the implied fair value of the goodwill to the carrying value of the goodwill. The implied fair value of goodwill is equal to the excess of the Company estimated fair value over the fair values of its identified assets and liabilities. If the carrying value of goodwill exceeds the implied fair value of goodwill, an impairment loss is recognized in an amount equal to that excess (but not in excess of the carrying value).

In connection with PPL's acquisition of LKE on November 1, 2010, goodwill of $607 million was recorded on November 1, 2010. The allocation of the goodwill to KU was based on the net asset value of the Company. The goodwill represents value paid for the rate regulated business located in a defined service area with a constructive regulatory environment, which provides for future investment, earnings and cash flow growth, as well as the talented and experienced workforce. KU's franchise values are being attributed to the going concern value of the business and thus were recorded as goodwill rather than a separately identifiable intangible asset. None of the goodwill recognized is expected to be deductible for income tax purposes or included in customer rates. See Note 2, Acquisition by PPL, for further information.

For the 2010 annual impairment test, the primary valuation technique used was an income methodology based on management's estimates of forecasted cash flows for the Company, with those cash flows discounted to present value using rates commensurate with the risks of those cash flows. Management also took into consideration the acquisition price paid by PPL. The discounted cash flows for the Company was based on discrete financial forecasts developed by management for planning purposes and consistent with those given to PPL. Cash flows beyond the discrete forecasts were estimated using a terminal-value calculation, which incorporated historical and forecasted financial trends for the Company. No impairment resulted from the fourth quarter test, as the determined fair value of the Company was greater than its carrying value.

Other Intangible Assets

The gross carrying amount and the accumulated amortization of other intangible assets were as follows:

	Successor	
	December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:		
Coal contracts (a)	$ 145	$ 3
Land rights (b)	8	-
Emission allowances (c)	9	-
OVEC power purchase agreement (d)	39	1
Total other intangible assets	$ 201	$ 4

(a) The gross carrying amount represents the fair value of coal contracts recognized as a result of the 2010 acquisition by PPL. The weighted average amortization period of these contracts is 3 years. See Note 2, Acquisition by PPL, for further information.

(b) The gross carrying amount represents the fair value of land rights recognized as a result of adopting PPL's accounting policies in the Successor period. The weighted average amortization period of these rights is 17 years. See Note 1, Summary of Significant Accounting Policies, for further information.
(c) The gross carrying amount represents the fair value of emission allowances recognized as a result of the 2010 acquisition by PPL, as well as the reclassification of amounts from inventory to intangible assets as a result of adopting PPL's accounting policies in the Successor period. The weighted average amortization period of these emission allowances is 3 years. See Note 2, Acquisition by PPL, for further information.
(d) The gross carrying amount represents the fair value of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. The weighted average amortization period of the power purchase agreement is 8 years. See Note 2, Acquisition by PPL, for further information.

Current intangible assets and long-term intangible assets are included in "Other intangible assets" in their respective areas on the Balance Sheets in 2010. Intangible assets resulting from purchase accounting adjustments are not recoverable in rates.

Amortization expense, excluding consumption of emission allowances, was $4 million for the Successor in 2010. The estimated aggregate amortization expense for each of the next five years is as follows:

	Estimated Expense in Period Ended				
	2011	2012	2013	2014	2015
Aggregate amortization expense	$ 43	$ 25	$ 27	$ 24	$ 26

Note 8 - Concentrations of Credit and Other Risk

Credit risk represents the accounting loss that would be recognized at the reporting date if counterparties failed to perform as contracted. Concentrations of credit risk (whether on- or off-balance sheet) relate to groups of customers or counterparties that have similar economic or industry characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

All of KU's customer receivables arise from deliveries of electricity. During 2010, the Company's ten largest customers accounted for less than 19% of volumes.

Effective August 4, 2009, KU and its employees represented by the IBEW Local 2100 entered into a three-year collective bargaining agreement. The agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-openers. KU and its employees represented by the USWA Local 9447-01 entered into a three-year collective bargaining agreement in August 2008. This agreement provides for negotiated increases or changes to wages, benefits or other provisions and for annual wage re-openers. The employees represented by these two bargaining units comprise approximately 15% of the Company's workforce at December 31, 2010.

Note 9 - Pension and Other Postretirement Benefit Plans

KU employees benefit from both funded and unfunded retirement benefit plans. Its defined benefit pension plan covers employees hired by December 31, 2005. Employees hired after this date participate in the Retirement Income Account ("RIA"), a defined contribution plan. The postretirement plan includes health care benefits that are contributory, with participants' contributions adjusted annually. The Company uses December 31 as the measurement date for its plans.

Obligations and Funded Status

The following tables provide a reconciliation of the changes in the defined benefit plans' obligations, the fair value of assets and the funded status of the plans for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor:

	Pension Benefits			Other Postretirement Benefits		
	Successor	Predecessor		Successor	Predecessor	
	2010	2010	2009	2010	2010	2009
Change in benefit obligation:						
Benefit obligation at beginning of period	$ 355	$ 316	$ 306	$ 84	$ 80	$ 75
Service cost	1	5	6	-	1	2
Interest cost	3	16	18	1	4	4
Benefits paid, net of retiree contributions	(3)	(14)	(18)	(1)	(4)	(5)
Actuarial (gain) loss and other	(2)	32	4	(1)	3	4
Benefit obligation at end of period	$ 354	$ 355	$ 316	$ 83	$ 84	$ 80

	Pension Benefits			Other Postretirement Benefits		
	Successor	Predecessor		Successor	Predecessor	
	2010	2010	2009	2010	2010	2009
Change in plan assets:						
Fair value of plan assets at beginning of period	$ 237	$ 219	$ 183	$ 20	$ 17	$ 12
Actual return on plan assets	7	20	41	-	1	3
Employer contributions	-	13	13	2	6	7
Benefits paid, net of retiree contributions	(3)	(14)	(18)	(1)	(4)	(5)
Administrative expenses and other	-	(1)	-	-	-	-
Fair value of plan assets at end of period	$ 241	$ 237	$ 219	$ 21	$ 20	$ 17
Funded status at end of period	$ (113)	$ (118)	$ (97)	$ (62)	$ (64)	$ (63)

Amounts Recognized in the Balance Sheets

The following tables provide the amounts recognized in the Balance Sheets and information for plans with benefit obligations in excess of plan assets plans for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor:

	Pension Benefits			Other Postretirement Benefits		
	Successor	Predecessor		Successor	Predecessor	
	2010	2010	2009	2010	2010	2009
Regulatory assets	$ 117	$ 125	$ 105	$ -	$ -	$ -
Regulatory liabilities	-	-	-	(10)	(9)	(9)
Accrued benefit liability (non-current)	(113)	(118)	(97)	(62)	(64)	(63)

Amounts recognized in regulatory assets and liabilities for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor:

	Pension Benefits			Other Postretirement Benefits		
	Successor	Predecessor		Successor	Predecessor	
	2010	2010	2009	2010	2010	2009
Transition obligation	$ -	$ -	$ -	$ 2	$ 2	$ 3
Prior service cost	3	4	5	1	1	2
Accumulated loss (gain)	114	121	100	(13)	(12)	(14)
Total regulatory assets and liabilities	$ 117	$ 125	$ 105	$ (10)	$ (9)	$ (9)

Additional information for plans with accumulated benefit obligations in excess of plan assets for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor:

	Pension Benefits			Other Postretirement Benefits		
	Successor	Predecessor		Successor	Predecessor	
	2010	2010	2009	2010	2010	2009
Benefit obligation	$ 354	$ 355	$ 316	$ 83	$ 84	$ 80
Accumulated benefit obligation	299	299	268	-	-	-
Fair value of plan assets	241	237	219	21	20	17

The amounts recognized in regulatory assets and liabilities for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor:

	Pension Benefits			Other Postretirement Benefits		
	Successor	Predecessor		Successor	Predecessor	
	2010	2010	2009	2010	2010	2009
Net (gain) loss arising during the period	$ (6)	$ 26	$ (22)	$ (1)	$ 2	$ 2
Amortization of prior service cost	-	(1)	(1)	-	-	-
Amortization of transitional obligation	-	-	-	-	(2)	(1)
Amortization of loss	(2)	(5)	(9)	-	-	-
Total amounts recognized in regulatory assets and liabilities	$ (8)	$ 20	$ (32)	$ (1)	$ -	$ 1

For discussion of the pension and postretirement regulatory assets, see Note 3, Rates and Regulatory Matters.

Components of Net Periodic Benefit Cost

The following tables provide the components of net periodic benefit cost for pension and other postretirement benefit plans. The tables include the costs associated with both KU employees and Servco employees who provide services to KU. The Servco costs are allocated to KU based on employees' labor charges and are approximately 51%, 49% and 46% of Servco's costs for 2010, 2009 and 2008, respectively.

	Pension Benefits					
	Successor			Predecessor		
	November 1, 2010 through December 31, 2010			January 1, 2010 through October 31, 2010		
	KU	Servco Allocation to KU	Total KU	KU	Servco Allocation to KU	Total KU
Service cost	$ 1	$ 1	$ 2	$ 5	$ 5	$ 10
Interest cost	3	2	5	16	6	22
Expected return on plan assets	(3)	(1)	(4)	(14)	(5)	(19)
Amortization of prior service cost	-	-	-	1	1	2
Amortization of actuarial gain	2	-	2	5	2	7
Net periodic benefit cost	$ 3	$ 2	$ 5	$ 13	$ 9	$ 22

	Pension Benefits					
	Predecessor - Year Ended December 31, 2009			Predecessor - Year Ended December 31, 2008		
	KU	Servco Allocation to KU	Total KU	KU	Servco Allocation to KU	Total KU
Service cost	$ 6	$ 5	$ 11	$ 6	$ 4	$ 10
Interest cost	18	7	25	18	6	24
Expected return on plan assets	(15)	(4)	(19)	(21)	(5)	(26)
Amortization of prior service cost	1	1	2	1	1	2
Amortization of actuarial gain	9	2	11	-	-	-
Net periodic benefit cost	$ 19	$ 11	$ 30	$ 4	$ 6	$ 10

	Other Postretirement Benefits					
	Successor			Predecessor		
	November 1, 2010 through December 31, 2010			January 1, 2010 through October 31, 2010		
	KU	Servco Allocation to KU	Total KU	KU	Servco Allocation to KU	Total KU
Service cost	$ -	$ -	$ -	$ 1	$ 1	$ 2
Interest cost	1	-	1	4	-	4
Expected return on plan assets	-	-	-	(1)	-	(1)
Amortization of transition obligation	-	-	-	1	-	1
Net periodic benefit cost	$ 1	$ -	$ 1	$ 5	$ 1	$ 6

	Other Postretirement Benefits					
	Predecessor - Year Ended December 31, 2009			Predecessor Year Ended December 31, 2008		
	KU	Servco Allocation to KU	Total KU	KU	Servco Allocation to KU	Total KU
Service cost	$ 1	$ 1	$ 2	$ 1	$ 1	$ 2
Interest cost	5	-	5	5	-	5
Expected return on plan assets	(1)	-	(1)	(1)	-	(1)
Amortization of transition obligation	1	-	1	1	-	1
Net periodic benefit cost	$ 6	$ 1	$ 7	$ 6	$ 1	$ 7

The estimated amounts that will be amortized from regulatory assets and liabilities into net periodic benefit cost in 2011 are shown in the following table:

	Pension Benefits	Other Postretirement Benefits
Regulatory assets and liabilities:		
Net actuarial loss	$ 8	$ -
Prior service cost	1	1
Transition obligation	-	1
Total regulatory assets and liabilities amortized during 2011	$ 9	$ 2

The weighted average assumptions used in the measurement of KU's pension and postretirement benefit obligations for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor are shown in the following table:

	Successor	Predecessor	
	December 31, 2010	October 31, 2010	December 31, 2009
Discount rate – pension benefits	5.52%	5.46%	6.13%
Discount rate – postretirement benefits	5.12%	4.96%	5.82%
Rate of compensation increase	5.25%	5.25%	5.25%

For the first ten months of 2010, the discount rates used to determine the pension and postretirement benefit obligations and the period expense were determined using the Mercer Pension Discount Yield Curve. This model takes the plans' cash flows and matches them to a yield curve that provides the equivalent yields on zero-coupon corporate bonds for each maturity. The discount rate is the single rate that produces the same present value of cash flows. The selection of the various discount rates represents the equivalent single rate under a broad-market AA yield curve constructed by Mercer.

For the last two months of 2010, the Towers Watson Yield Curve was used to determine the discount rate. This model also starts with an analysis of the expected benefit payment stream for its plans. This information is first matched against a spot-rate yield curve. A portfolio of Aa-graded non-callable (or callable with make-whole provisions) bonds, with a total amount outstanding in excess of $667 billion, serves as the base from which those with the lowest and highest yields are eliminated to develop the ultimate yield curve. The results of this analysis are considered together with other economic data and movements in various bond indices to determine the discount rate assumption.

The weighted average assumptions used in the measurement of KU's pension and postretirement net periodic benefit costs for November 1, 2010 through December 31, 2010, for the Successor, and for January 1, 2010 through October 31, 2010, and January 1, 2009 through December 31, 2009, for the Predecessor are shown in the following table:

	Successor	Predecessor		
	2010	2010	2009	2008
Discount rate - pension	5.45%	5.46%	6.25%	6.66%
Discount rate - postretirement	4.94%	5.82%	6.36%	6.56%
Expected long-term return on plan assets	7.25%	7.75%	8.25%	8.25%
Rate of compensation increase	5.25%	5.25%	5.25%	5.25%

To develop the expected long-term rate of return on assets assumption, KU considered the current level of expected returns on risk free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested and the expectations for future returns of each asset class. The expected return for each asset class was then weighted based on the current asset allocation to develop the expected long-term rate of return on assets assumption for the portfolio. The Company has determined that the 2011 expected long-term rate of return on assets assumption should be 7.25%.

The following describes the effects on pension benefits by changing the major actuarial assumptions discussed above:

- A 1% change in the assumed discount rate would have a $39 million positive or negative impact to the 2010 accumulated benefit obligation and an approximate $51 million positive or negative impact to the 2010 projected benefit obligation.
- A 25 basis point change in the expected rate of return on assets would have resulted in less than a $1 million positive or negative impact to 2010 pension expense.
- A 25 basis point increase in the rate of compensation increase would have a $3 million negative impact to the 2010 projected benefit obligation.

Assumed Health Care Cost Trend Rates

For measurement purposes, an 8% annual increase in the per capita cost of covered health care benefits was assumed for the first ten months of 2010. The rate was assumed to decrease gradually to 4.5% by 2029 and remain at that level thereafter. For the last two months of 2010, an 8% annual increase in the per capita cost of covered health care benefits was assumed and the rate was assumed to decrease gradually to 5.5% by 2019. For 2011, a 9% annual increase in the per capita cost of covered health care benefits is assumed and the rate is assumed to decrease gradually to 5.5% by 2019. This change in the length of the health care trend was made to conform to PPL's accounting policies.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A 1% change in assumed health care cost trend rates would have resulted in an increase or decrease of less than $1 million to the 2010 total of service and interest costs components and an increase or decrease of $4 million in year end 2010 postretirement benefit obligations.

Expected Future Benefit Payments and Medicare Subsidy Receipts

The following list provides the amount of expected future benefit payments, which reflect expected future service costs and the estimated gross amount of Medicare subsidy receipts:

	Pension Benefits	Other Postretirement Benefits	Medicare Subsidy Receipts
2011	$ 18	$ 6	$ 1
2012	18	6	-
2013	18	6	1
2014	18	7	-
2015	18	7	1
2016-2020	106	36	3

Plan Assets

The following table shows the pension plan's weighted average asset allocation by asset category at December 31:

	Target Range	Successor 2010	Predecessor 2009
Equity securities	45% - 75%	56%	59%
Debt securities	30% - 50%	24%	40%
Other	0% - 10%	20%	1%
Totals		100%	100%

The investment policy of the pension plans was developed in conjunction with financial and actuarial consultants, investment advisors and legal counsel. The goal of the investment policy is to preserve the capital of the pension plans' assets and maximize investment earnings in excess of inflation with acceptable levels of volatility. The return objective is to exceed the benchmark return for the policy index comprised of the following: Russell 3000 Index, MSCI-EAFE Index, Barclays Capital Aggregate and Barclays Capital U.S. Long Government/Credit Bond Index in proportions equal to the targeted asset allocation.

Evaluation of performance focuses on a long-term investment time horizon over rolling three and five-year periods. The assets of the pension plans are broadly diversified within different asset classes (equities, fixed income securities and cash equivalents).

To minimize the risk of large losses in a single asset class, no more than 5% of the portfolio will be invested in the securities of any one issuer with the exclusion of the U.S. government and its agencies. The equity portion of the fund is diversified among the market's various subsections to diversify risk, maximize returns and avoid undue exposure to any single economic sector, industry group or individual security. The equity subsectors include, but are not limited to, growth, value, small capitalization and international.

In addition, the overall fixed income portfolio may have an average weighted duration, or interest rate sensitivity which is within +/- 20% of the duration of the overall fixed income benchmark. Foreign bonds in the aggregate shall not exceed 10% of the total fund. The portfolio may include a limited investment of up to 20% in below investment grade securities provided that the overall average portfolio quality remains "AA" or better. The below investment grade securities include, but are not limited to, medium-term notes, corporate debt, non-dollar and emerging market debt and asset backed securities. The cash investments should be in securities that are either short maturities (not to exceed 180 days) or readily marketable with modest risk.

Derivative securities are permitted only to improve the portfolio's risk/return profile, to modify the portfolio's duration or to reduce transaction costs and must be used in conjunction with underlying physical assets in the portfolio. Derivative securities that involve speculation, leverage, interest rate anticipation, or any undue risk whatsoever are not deemed appropriate investments.

The investment objective for the postretirement benefit plan is to provide current income consistent with stability of principal and liquidity while maintaining a stable net asset value of $1.00 per share. The postretirement funds are invested in a prime cash money market fund that invests primarily in a portfolio of short-term, high-quality fixed income securities issued by banks, corporations and the U.S. government.

KU has classified plan assets that are accounted for at fair value into the three levels of the fair value hierarchy, as defined by the fair value measurements and disclosures guidance of the FASB ASC. See Note 6, Fair Value Measurements, for further information.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

A description of the valuation methodologies used to measure plan assets at fair value is provided below:

Money market funds: These investments are public investment vehicles valued using $1 for the net asset value. The money market funds are classified within level 2 of the valuation hierarchy.

Common/collective trusts: Valued based on the beginning of year value of the plan's interests in the trust plus actual contributions and allocated investment income (loss) less actual distributions and allocated administrative expenses. Quoted market prices are used to value investments in the trust, with the exception of the GAC. The fair value of certain other investments for which quoted market prices are not available are valued based on yields currently available on comparable securities of issuers with similar credit ratings. The common/collective trusts are classified within level 2 of the valuation hierarchy.

The preceding methods described may produce a fair value that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Prior to the acquisition, the GAC was considered an immediate participation guarantee contract which was not included in the fair value table. In accordance with the plan accounting guidance of the FASB ASC, the cost incurred to purchase the GAC prior to March 20, 1992, was permitted to be carried at contract value, since it is a contract with an insurance company and prior to the acquisition it was excluded from the table above. The cost incurred to fund the GAC after March 20, 1992, was carried at contract value in accordance with the plan accounting guidance of the FASB ASC, since it was a contract that incorporates mortality and morbidity risk. Contract value represents cost plus interest income less distributions for benefits and administrative expenses. To conform to PPL's accounting methods, the John Hancock GAC was classified in the fair value table as a level 3 and as "other" rather than "debt securities" in the asset allocation table for the period ended December 31, 2010.

The following table sets forth, by level within the fair value hierarchy, the plan's assets at fair value at December 31:

	Successor		Predecessor	
	Level 2	Level 3	Level 2	Level 3
Money market funds	$ 2	$ -	$ 2	$ -
Common/collective trusts	213	-	186	-
John Hancock - GAC	-	47	-	-
Total investments at fair value	$ 215	$ 47	$ 188	$ -

The following table sets forth a reconciliation of changes in the fair value of the plan's level 3 assets for the following period:

	Successor
Balance at November 1, 2010	$ -
Purchases	1
Transfers into level 3	46
Balance at December 31, 2010	$ 47

There are no assets categorized as level 1 as of December 31, 2010 and December 31, 2009.

Contributions

KU made discretionary contributions to the pension plan of $13 million in 2010 and 2009. Servco made $9 million and $8 million in discretionary contributions to its pension plan in 2010 and 2009, respectively. The amount of future contributions to the pension plan will depend upon the actual return on plan assets and other factors, but the Company funds its pension obligations in a manner consistent with the Pension Protection Act of 2006. The Company made contributions totaling $43 million in January 2011.See Note 18, Subsequent Events, for further information.

The Company made contributions to its other postretirement benefit plan of $8 million in 2010 and $7 million in 2009. In 2011, the Company anticipates making voluntary contributions to fund Voluntary Employee Beneficiary Association trusts to match the annual postretirement expense and funding the 401(h) plan up to the maximum amount allowed by law.

Pension Legislation

The Pension Protection Act of 2006 was enacted in August 2006. New rules regarding funding of defined benefit plans are generally effective for plan years beginning in 2008. Among other matters, this comprehensive legislation contains provisions applicable to defined benefit plans which generally (i) mandate full funding of current liabilities within seven years; (ii) increase tax-deduction levels regarding contributions; (iii) revise certain actuarial assumptions, such as mortality tables and discount rates; and (iv) raise federal insurance premiums and other fees for under-funded and distressed plans. The legislation also contains a number of provisions relating to defined-contribution plans and qualified and non-qualified executive pension plans and other matters. The Company's plan met the minimum funding requirements as defined by the Pension Protection Act of 2006 for years ended December 31, 2010 and 2009.

Thrift Savings Plans

KU has a thrift savings plan under section 401(k) of the Internal Revenue Code. Under the plan, eligible employees may defer and contribute to the plan a portion of current compensation in order to provide future retirement benefits. KU makes contributions to the plan by matching a portion of the employees' contributions. The costs of this matching were $3 million in 2010, 2009 and 2008.

KU also makes contributions to RIAs within the thrift savings plans for certain employees not covered by the non-contributory defined benefit pension plan. These employees consist of those hired after December 31, 2005. The Company makes these contributions based on years of service and the employees' wage and salary levels, and makes them in addition to the matching contributions discussed above. The amounts contributed by the Company under this arrangement were less than $1 million in 2010, 2009 and 2008.

Health Care Reform

In March 2010, Health Care Reform (the Patient Protection and Affordable Care Act of 2010) was signed into law. Many provisions of Health Care Reform do not take effect for an extended period of time and many aspects of the law which are currently unclear or undefined will likely be clarified in future regulations.

During 2010, KU recorded an income tax expense of less than $1 million to recognize the impact of the elimination of the tax deduction related to the Medicare Retiree Drug Subsidy that becomes effective in 2013.

Specific provisions within Health Care Reform that may impact KU include:

- Beginning in 2011, requirements extend dependent coverage up to age 26, remove the $2 million lifetime maximum and eliminate cost sharing for certain preventative care procedures.
- Beginning in 2018, a potential excise tax is expected on high-cost plans providing health coverage that exceeds certain thresholds.

The Company has evaluated these provisions of Health Care Reform on its benefit programs in consultation with its actuarial consultants and has determined that the excise tax will not have an impact on its postretirement medical plans. The requirement to extend dependent coverage up to age 26 is not expected to have a significant impact on active or retiree medical costs. The Company will continue to monitor the potential impact of any changes to the existing provisions and implementation guidance related to Health Care Reform on its benefit programs.

Note 10 - Income Taxes

KU's federal income tax return is included in a United States consolidated income tax return filed by LKE's direct parent. Prior to October 31, 2010 the return was included in the consolidated return of E.ON US Investments Corp. Due to the acquisition by PPL, the return will be included in the consolidated PPL return beginning November 1, 2010, for each tax period. Each subsidiary of the consolidated tax group, including KU, calculates its separate income tax for each period. The resulting separate-return tax cost or benefit is paid to or received from the parent company or its designee. The Company also files income tax returns in various state jurisdictions. While 2007 and later years are open under the federal statute of limitations, Revenue Agent Reports for 2007-2008 have been received from the IRS, effectively closing these years to additional audit adjustments. Tax years beginning with 2007 were examined under an IRS program, Compliance Assurance Process ("CAP"). This program accelerates the IRS's review to begin during the year applicable to the return and ends 90 days after the return is filed. KU had no adjustments for the 2007 federal tax return. For 2008, the IRS allowed additional deductions in connection with the Company's application for a change in repair deductions and disallowed certain bonus depreciation claimed on the original return. The net temporary tax impact for the Company was a $12 million reduction in tax and was recorded in the second quarter of 2010. The 2009 federal return was filed in the third quarter of 2010 and the IRS issued a Partial Acceptance Letter in connection with CAP. The IRS is continuing to review bonus depreciation, storms and other repairs. No net material adverse impact is expected from these remaining areas. The short tax year beginning January 1, 2010 through October 31, 2010, is also being examined under CAP. No material items have been raised by the IRS at this time. The two month period beginning November 1, 2010 and ending December 31, 2010 is not currently under examination.

Additions and reductions of uncertain tax positions during 2010, 2009 and 2008 were less than $1 million. Possible amounts of uncertain tax positions for KU that may decrease within the next 12 months total less than $1 million and are based on the expiration of the audit periods as defined in the statutes. If recognized, the less than $1 million of unrecognized tax benefits would reduce the effective income tax rate.

The amount KU recognized as interest expense and interest accrued related to unrecognized tax benefits was less than $1 million for the twelve month periods ended and as of December 31, 2010, 2009 and 2008. The interest expense and interest accrued is based on IRS and Kentucky Department of Revenue large corporate interest rates for underpayment of taxes. At the date of adoption, the Company accrued less than $1 million in interest expense on uncertain tax positions. KU records the interest as “Interest expense” and penalties, if any, as “Operating expenses” on the Statements of Income and “Other current liabilities” on the Balance Sheets, on a pre-tax basis. No penalties were accrued by the Company through December 31, 2010.

Components of income tax expense are shown in the table below:

	Successor	Predecessor		
	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Current:				
Federal	$ 13	$ 46	$ (5)	$ 46
State	3	9	1	10
Deferred:				
Federal – net	4	20	43	(10)
State – net	-	3	7	(3)
Investment tax credit – deferred	-	-	21	25
Total income tax expense	$ 20	$ 78	$ 67	$ 68

In June 2006, KU and LG&E filed a joint application with the U.S. Department of Energy (“DOE”) requesting certification to be eligible for an investment tax credit applicable to the construction of TC2. In November 2006, the DOE and the IRS announced that KU and LG&E were selected to receive the tax credit. A final IRS certification required to obtain the investment tax credit was received in August 2007. In September 2007, KU received an Order from the Kentucky Commission approving the accounting of the investment tax credit, which includes a full depreciation basis adjustment for the amount of the credit. KU’s portion of the TC2 tax credit is approximately $101 million. Based on eligible construction expenditures incurred, KU recorded an investment tax credit of $21 million and $25 million in 2009 and 2008, respectively, decreasing current federal income taxes. As of December 31, 2009, KU had recorded its maximum credit of $101 million. The income tax expense impact from amortizing this credit over the life of the related property began when the facility was placed in service in January 2011.

In March 2008, certain environmental and preservation groups filed suit in federal court in North Carolina against the DOE and IRS claiming the investment tax credit program was in violation of certain environmental laws and demanded relief, including suspension or termination of the program. The plaintiffs voluntarily dismissed their complaint in August 2010.

Components of deferred income taxes included in the Balance Sheets are shown below:

	Successor December 31, 2010	Predecessor December 31, 2009
Deferred income tax liabilities:		
Depreciation and other plant-related items	$ 347	$ 303
Regulatory assets and other	133	69
Total deferred income tax liabilities	480	372
Deferred income tax assets:		
Regulatory liabilities and other	80	-
Income taxes due to customers	2	4
Pensions and related benefits	9	17
Liabilities and other	19	18
Total deferred income tax assets	110	39
Net deferred income tax liabilities	$ 370	$ 333
Balance sheet classification:		
Prepayments and other current assets	$ (6)	$ (3)
Deferred income taxes (non-current)	376	336
Net deferred income tax liabilities	$ 370	$ 333

The Company expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

A reconciliation of differences between the income tax expense at the statutory U.S. federal income tax rate and KU's actual income tax expense follows:

	Successor	Predecessor		
	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Statutory federal income tax expense	$ 19	$ 77	$ 70	$ 79
State income taxes – net of federal benefit	2	8	5	5
Qualified production activities deduction	(1)	(4)	(1)	(3)
Dividends received deduction related to EEI investment	-	-	(3)	(8)
Reversal of excess deferred taxes	-	(2)	(2)	(1)
Other differences – net	-	(1)	(2)	(4)
Income tax expense	$ 20	$ 78	$ 67	$ 68
Effective income tax rate	36.4%	35.8%	33.5%	30.1%

The Tax Relief, Unemployment Reauthorization and Job Creation Act of 2010, enacted December 17, 2010 provided, among other provisions, certain incentives related to bonus depreciation and 100% expensing of qualifying capital expenditures. KU benefited from these new provisions by reducing its 2010 current federal income tax expense. This reduction in federal taxable income for KU does, however, result in a reduction of KU's Section 199 Manufacturing deduction, which is based on manufacturing taxable income and correspondingly increases income tax expense. The impact from these changes on 2010 was not material; however, KU anticipates a significant reduction of taxable income in 2011 and 2012 and a corresponding loss of most, if not all, of the Section 199 Manufacturing deduction for the following two years.

Note 11 - Long-Term Debt

As summarized below, at December 31, 2010, long-term debt consisted of first mortgage bonds and secured pollution control bonds. At December 31, 2009, long-term debt and the current portion of long-term debt consisted primarily of pollution control bonds and long-term loans from affiliated companies.

	Successor		Predecessor	
	2010		2009	
Current portion of long-term debt to affiliates	$	-	$	33
Long-term debt to affiliated companies		-		1,298
Secured first mortgage bonds, net of debt discount and amortization of debt discount		1,500		-
Pollution control revenue bonds, collateralized by first mortgage bonds		351		351
Fair value adjustment from purchase accounting		1		-
Unamortized discount		(11)		-
Total long-term debt		1,841		1,682
Less current portion		-		261
Long-term debt, excluding current portion	$	1,841	$	1,421

	Stated Interest Rates	Maturities	Debt Amounts	
Successor				
Outstanding at December 31, 2010:				
Current portion	N/A	N/A	$	-
Non-current portion	Variable – 6.00%	2015-2040		1,841
Predecessor				
Outstanding at December 31, 2009:				
Current portion	Variable – 4.240%	2010-2034	$	261
Non-current portion	Variable – 7.035%	2011-2037		1,421

As of December 31, 2009, long-term debt includes $228 million of pollution control bonds that were classified as current portion because these bonds are subject to tender for purchase at the option of the holder and to mandatory tender for purchase upon the occurrence of certain events. These bonds include Carroll County 2002 Series A and B, 2004 Series A, 2006 Series B and 2008 Series A; Muhlenberg County 2002 Series A; and Mercer County 2000 Series A and 2002 Series A. Maturity dates for these bonds range from 2023 to 2034. As of December 31, 2009, the bonds were classified as current portion of long-term debt because investors could put the bonds back to the Company within one year. As of December 31, 2010, the bonds were reclassified as long-term debt. See Note 1, Summary of Significant Accounting Policies, for changes in classification.

Pollution control bonds are obligations of KU issued in connection with tax-exempt pollution control bonds by various counties in Kentucky. A loan agreement obligates the Company to make debt service payments to the counties in amounts equal to the debt service due from the counties on the related pollution control bonds. Depending on the type of expense, the Successor capitalized debt expenses in long-term other regulatory assets or long-term other assets to align with the term of the debt for which the expenses were related. The Predecessor capitalized debt expenses in current or long-term other regulatory assets or other current or long-term other assets based on the amount of expense expected to be recovered within the next year through rate recovery. Both Predecessor and Successor amortized debt expenses over the lives of the related bond issues. The Predecessor presentation and the Successor presentation are both appropriate under regulatory practices and GAAP.

In October 2010, in order to secure their respective obligations with respect to the pollution control bonds, KU issued first mortgage bonds to the pollution control bond trustees. KU's first mortgage bonds contain terms and conditions that are substantially parallel to the terms and conditions of the counties' debt, but provide that obligations are deemed satisfied to the extent of payments under the related loan agreement, and thus generally require no separate payment of principal and interest except under certain circumstances, including should KU default on the respective loan agreement. Also in October 2010, one national rating agency revised downward the short-term credit rating of the pollution control bonds and the Company's issuer rating as a result of the pending acquisition by PPL.

Several series of KU's pollution control bonds are insured by monoline bond insurers whose ratings have been reduced due to exposures relating to insurance of sub-prime mortgages. At December 31, 2010, KU had an aggregate $351 million of outstanding pollution control indebtedness, of which $96 million is in the form of insured auction rate securities wherein interest rates are reset every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. Since 2008, interest rates increased and the Company experienced "failed auctions" when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture.

The average annualized interest rates on the auction rate bonds follow:

Successor	Predecessor	
November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	December 31, 2009
0.53%	0.51%	0.44%

The instruments governing this auction rate bond permit KU to convert the bond to other interest rate modes, such as various short-term variable rates, long-term fixed rates or intermediate-term fixed rates that are reset infrequently.

As a result of downgrades of the monoline insurers by all of the rating agencies to levels below that of the Company's rating, the debt ratings of the Company's insured bonds are all based on the Company's senior secured debt rating and are not influenced by the monoline bond insurer ratings.

In connection with the PPL acquisition, on November 1, 2010, KU borrowed $1,331 million from a PPL subsidiary, in order to repay loans from a subsidiary of E.ON. KU used the net proceeds received from the sale of the first mortgage bonds to repay the debt owed to the PPL subsidiary arising from the borrowing.

In November 2010, KU issued first mortgage bonds totaling $1,500 million and used the proceeds to repay the loans from a PPL subsidiary mentioned above and for general corporate purposes. The first mortgage bonds were issued at a discount as described in the table below:

First Mortgage Bonds	Principal	Discount Price	First Mortgage Bonds Proceeds (a)
Series due 2015	$ 250	99.650%	$ 249
Series due 2020	500	99.622%	498
Series due 2040	750	98.915%	742
Total	$ 1,500		$ 1,489

(a) Before expenses other than discount to Purchaser

The first mortgage bonds were issued by KU in accordance with the rules of Section 144A of the Securities Act of 1933. KU has entered into a registration rights agreement in which it has agreed to file a registration statement with the SEC relating to an offer to exchange the first mortgage bonds for publicly tradable securities having substantially identical terms. If ultimate registration and/or certain milestones are not completed by certain dates in mid- and late 2011, the Company has agreed to pay liquidated damages to the bondholders. The liquidated damages would total 0.25% per annum of the principal amount of the bonds for the first 90 days and 0.50% per annum of the principal amount thereafter until the conditions described above have been cured.

There were no redemptions or maturities of long-term debt for 2009. Redemptions and maturities of long-term debt for 2010 are summarized below:

Year	Description	Principal Amount	Rate	Secured/ Unsecured	Maturity
Successor					
2010	Due to PPL Investment Corp.	$ 1,331	4.24%-7.035%	Unsecured	2010-2037
2010	Due to E.ON affiliates	1,331	4.24%-7.035%	Unsecured	2010-2037

Issuances of long-term debt for 2010 and 2009 are summarized below:

Year	Description	Principal Amount	Rate	Secured/ Unsecured	Maturity
Successor					
2010	Due to PPL Investment Corp.	$ 1,331	4.24%-7.035%	Unsecured	2010-2037
2010	First mortgage bonds	250	1.625%	Secured	2015
2010	First mortgage bonds	500	3.25%	Secured	2020
2010	First mortgage bonds	750	5.125%	Secured	2040
Predecessor					
2009	Due to E.ON affiliates	50	4.445%	Unsecured	2019
2009	Due to E.ON affiliates	50	4.81%	Unsecured	2019
2009	Due to E.ON affiliates	50	5.28%	Unsecured	2017

As of December 31, 2010, all of the Company's long-term debt is secured by a first mortgage lien on substantially all of the real and tangible personal property of the Company located in Kentucky.

Long-term debt maturities for KU are shown in the following table:

2011	$ -
2012	-
2013	-
2014	-
2015	250
Thereafter	1,601
	$ 1,851

KU was in compliance with all debt covenants at December 31, 2010.

See Note 1, Summary of Significant Accounting Policies, for certain debt refinancing and associated transactions completed by KU in connection with the PPL acquisition, Note 2, Acquisition by PPL, for the adjustment made to the pollution control bonds to reflect fair value and Note 15, Related Party Transactions, for long-term debt payable to affiliates.

Note 12 - Notes Payable and Other Short-Term Obligations

Intercompany Revolving Line of Credit

KU participates in an intercompany money pool agreement wherein LKE and/or LG&E make funds available to KU at market-based rates (based on highly rated commercial paper issues) of up to $400 million. Details of the balances are as follows:

	Total Money Pool Available	Amount Outstanding	Balance Available	Average Interest Rate
December 31, 2010, Successor	$ 400	$ 10	$ 390	0.25%
December 31, 2009, Predecessor	400	45	355	0.20%

LKE maintains revolving credit facilities totaling $300 million at December 31, 2010 and $313 million at December 31, 2009, to ensure funding availability for the money pool. At December 31, 2010, the LKE facility is with PPL Investment Corp. LKE pays PPL Investment Corp. an annual commitment fee based on the Utilities' current bond ratings on the unused portion of the commitment. At December 31, 2009, one facility, totaling $150 million, was with E.ON North America, Inc., while the remaining line, totaling $163 million, was with Fidelia, both affiliated companies of E.ON. The balances are as follows:

	Total Available	Amount Outstanding	Balance Available	Average Interest Rate
December 31, 2010, Successor	$ 300	$ -	$ 300	N/A
December 31, 2009, Predecessor	313	276	37	1.25%

Bank Revolving Line of Credit

As of December 31, 2010, the Company maintained a $400 million revolving line of credit with a group of banks maturing in December 2014. The revolving line of credit allows KU to issue letters of credit or borrow funds up to $400 million. Outstanding letters of credit reduce the facility's available borrowing capacity. The Company pays the banks an annual commitment fee based on current bond ratings on the unused portion of the commitment. At December 31, 2010, there was no amount borrowed under this facility although letters of credit totaling $198 million have been issued under this facility. This credit agreement contains financial covenants requiring the borrower's debt to total capitalization ratio to not exceed 70%, as calculated pursuant to the credit agreement, and other customary covenants.

As of December 31, 2009, the Company maintained a $35 million bilateral line of credit with an unaffiliated financial institution maturing in June 2012. The Company paid the banks an annual commitment fee on the unused portion of the commitment. At December 31, 2009, there was no balance outstanding under this facility. This facility was terminated on November 1, 2010, in conjunction with the PPL acquisition.

On December 1, 2010, KU replaced the letters of credit issued under prior letter of credit facilities with letters of credit of the same amount issued under the revolving line of credit. The four letter of credit facilities were subsequently terminated.

KU was in compliance with all line of credit covenants at December 31, 2010.

See Note 1, Summary of Significant Accounting Policies, for certain debt refinancing and associated transactions completed by KU in connection with the PPL acquisition and Note 15, Related Party Transactions, for long-term debt payable to affiliates.

Note 13 - Commitments and Contingencies

Operating Leases

KU leases office space, office equipment, plant equipment, real estate, railcars, telecommunications and vehicles and accounts for these leases as operating leases. In addition, KU reimburses LG&E for a portion of the lease expense paid by LG&E for KU's usage of office space leased by LG&E. Total lease expense was $10 million, $10 million and $9 million for 2010, 2009 and 2008, respectively. The future minimum annual lease payments for operating leases for years subsequent to December 31, 2010, are shown in the following table:

2011	$	8
2012		7
2013		5
2014		5
2015		3
Thereafter		1
	$	29

Owensboro Contract Litigation and Termination

In May 2004, the City of Owensboro, Kentucky and OMU commenced a suit against KU concerning a long-term power supply contract (the "OMU Agreement") with KU. In May 2009, KU and OMU executed a settlement agreement resolving the matter on a basis consistent with prior court rulings and KU has received the agreed settlement amounts. Pursuant to the settlement's operation, the OMU Agreement terminated in May 2010.

Sale and Leaseback Transaction

The Company is a participant in a sale and leaseback transaction involving its 62% interest in two jointly owned CTs at KU's E.W. Brown generating station (Units 6 and 7). Commencing in December 1999, KU and LG&E entered into a tax-efficient, 18-year lease of the CTs. The Utilities have provided funds to fully defease the lease and have executed an irrevocable notice to exercise an early purchase option contained in the lease after 15.5 years. The financial statement treatment of this transaction is no different than if the Utilities had retained its ownership interest. The leasing transaction was entered into following receipt of required state and federal regulatory approvals. At December 31, 2010, the Balance Sheets included these assets at a value of $65 million, which is reflected in "Regulated utility plant – electric."

In case of default under the lease, the Company is obligated to pay to the lessor its share of certain fees or amounts. Primary events of default include loss or destruction of the CTs, failure to insure or maintain the CTs and unwinding of the transaction due to governmental actions. No events of default currently exist with respect to the lease. Upon any termination of the lease, whether by default or expiration of its term, title to the CTs reverts jointly to KU and LG&E.

At December 31, 2010, the maximum aggregate amount of default fees or amounts was $7 million, of which KU would be responsible for 62% (approximately $4 million). The Company has made arrangements with LKE, via guarantee and regulatory commitment, for LKE to pay its full portion of any default fees or amounts.

Letters of Credit

KU has provided letters of credit as of December 31, 2010 and 2009, for on-balance sheet obligations totaling $198 million to support bonds of $195 million and letters of credit for off-balance sheet obligations totaling less than $1 million to support certain obligations related to workers' compensation.

Commodity Purchases

OVEC

KU has a contract for power purchases with OVEC, terminating in 2026, for various Mw capacities. KU holds a 2.5% investment interest in OVEC with ten other electric utilities. KU is not the primary beneficiary; therefore, the investment is not consolidated into the Company's financial statements, but is recorded on the cost basis. OVEC is located in Piketon, Ohio, and owns and operates two coal-fired power plants, Kyger Creek Station in Ohio, and Clifty Creek Station in Indiana. KU is contractually entitled to 2.5% of OVEC's output, approximately 60 Mw of nameplate generation capacity. Pursuant to the OVEC power purchase contract, the Company may be conditionally responsible for a 2.5% pro-rata share of certain obligations of OVEC under defined circumstances. These contingent liabilities may include unpaid OVEC indebtedness as well as shortfall amounts in certain excess decommissioning costs and postretirement benefits other than pension. KU's contingent potential proportionate share of OVEC's December 31, 2010 outstanding debt was $35 million. Future obligations for power purchases from OVEC are demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses, and are shown in the following table:

2011	$	9
2012		10
2013		10
2014		10
2015		10
Thereafter		114
	$	163

Coal and Natural Gas Transportation Purchase Obligations

KU has contracts to purchase coal and natural gas transportation. Future obligations are shown in the following table:

2011	$	439
2012		200
2013		144
2014		93
2015		91
Thereafter		14
	$	981

Construction Program

KU had approximately $116 million of commitments in connection with its construction program at December 31, 2010.

In June 2006, KU entered into a construction contract regarding the TC2 project. The contract is generally in the form of a turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price. During 2009 and 2010, KU received several contractual notices from the TC2 construction contractor asserting historical force majeure and excusable event claims for a number of adjustments to the contract price, construction schedule, commercial operations date, liquidated damages or other relevant provisions. In September 2010, KU and the construction contractor agreed to a settlement to resolve the force majeure and excusable event claims occurring through July 2010, under the TC2 construction contract, which settlement provided for a limited, negotiated extension of the contractual commercial operations date and/or relief from liquidated damage calculations. With limited exceptions the Company took care, custody and control of TC2 on January 22, 2011, and has dispatched the unit to meet customer demand since that date. KU and the contractor agreed to a further amendment of the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. KU cannot currently estimate the ultimate outcome of these matters.

TC2 Air Permit

The Sierra Club and other environmental groups filed a petition challenging the air permit issued for the TC2 baseload generating unit which was issued by the KDAQ in November 2005. In September 2007, the Secretary of the Kentucky Environmental and Public Protection Cabinet issued a final Order upholding the permit. The environmental groups petitioned the EPA to object to the state permit and subsequent permit revisions. In determinations made in September 2008 and June 2009, the EPA rejected most of the environmental groups' claims but identified three permit deficiencies which the KDAQ addressed by revising the permit. In August 2009, the EPA issued an Order denying the remaining claims with the exception of two additional deficiencies which the KDAQ was directed to address. The EPA determined that the proposed permit subsequently issued by the KDAQ satisfied the conditions of the EPA Order although the agency recommended certain enhancements to the administrative record. In January 2010, the KDAQ issued a final permit revision incorporating the proposed changes to address the two EPA objections. In March 2010, the Sierra Club submitted a petition to the EPA to object to the permit revision, which is now pending before the EPA. The Company believes that the final permit as revised should not have a material adverse effect on its financial condition or results of operations. However, until the EPA issues a final ruling on the pending petition and all applicable appeals have been exhausted, the Company cannot predict the final outcome of this matter.

Environmental Matters

The Company's operations are subject to a number of environmental laws and regulations in each of the jurisdictions in which it operates governing, among other things, air emissions, wastewater discharges, the use, handling and disposal of hazardous substances and wastes, soil and groundwater contamination and employee health and safety. As indicated below and summarized at the conclusion of this section, evolving environmental regulations will likely increase the level of capital and operating and maintenance expenditures incurred by the Company during the next several years. Based upon prior regulatory precedent, the Company believes that many costs of complying with such pending or future requirements would likely be recoverable under the ECR or other potential cost-recovery mechanisms, but the Company can provide no assurance as to the ultimate outcome of such proceedings before the regulatory authorities.

Ambient Air Quality

The Clean Air Act requires the EPA to periodically review the available scientific data for six criteria pollutants and establish concentration levels in the ambient air sufficient to protect the public health and welfare with an extra margin for safety. These concentration levels are known as NAAQS. Each state must identify "nonattainment areas" within its boundaries that fail to comply with the NAAQS and develop a SIP to bring such nonattainment areas into compliance. If a state fails to develop an adequate plan, the EPA must develop and implement a plan. As the EPA increases the stringency of the NAAQS through its periodic reviews, the attainment status of various areas may change, thereby triggering additional emission reduction obligations under revised SIPs aimed to achieve attainment.

In 1997, the EPA established new NAAQS for ozone and fine particulates that required additional reductions in SO_2 and NOx emissions from power plants. In 1998, the EPA issued its final "NOx SIP Call" rule requiring reductions in NOx emissions of approximately 85% from 1990 levels in order to mitigate ozone transport from the midwestern U.S. to the northeastern U.S. To implement the new federal requirements, Kentucky amended its SIP in 2002 to require electric generating units to reduce their NOx emissions to 0.15 pounds weight per MMBtu on a company-wide basis. In 2005, the EPA issued the CAIR which required additional SO_2 emission reductions of 70% and NOx emission reductions of 65% from 2003 levels. The CAIR provided for a two-phase cap and trade program, with initial reductions of NOx and SO_2 emissions due by 2009 and 2010, respectively, and final reductions due by 2015. In 2006, Kentucky proposed to amend its SIP to adopt state requirements similar to those under the federal CAIR.

In July 2008, a federal appeals court issued a ruling finding deficiencies in the CAIR and vacating it. In December 2008, the Court amended its previous Order, directing the EPA to promulgate a new regulation but leaving the CAIR in place in the interim. The remand of the CAIR results in some uncertainty with respect to certain other EPA or state programs and proceedings and the Utilities' compliance plans relating thereto due to the interconnection of the CAIR with such associated programs.

In January 2010, the EPA proposed a revised NAAQS for ozone which would increase the stringency of the standard. In addition, the EPA published final revised NAAQS standards for NO_2 and SO_2 in February 2010 and June 2010, respectively, which are more stringent than previous standards. Depending on the level of action determined necessary to bring local nonattainment areas into compliance with the revised NAAQS standards, KU's power plants are potentially subject to requirements for additional reductions in SO_2 and NOx emissions.

In July 2010, the EPA issued the proposed CATR, which serves to replace the CAIR. The CATR provides for a two-phase SO_2 reduction program with Phase I reductions due by 2012 and Phase II reductions due by 2014. The CATR provides for NOx reductions in 2012, but the EPA advised that it is studying whether additional NOx reductions should be required for 2014. The CATR is more stringent than the CAIR as it accelerates certain compliance dates and provides for only intrastate and limited interstate trading of emission allowances. In addition to its preferred approach, the EPA is seeking comment on an alternative approach which would provide for individual emission limits at each power plant. The EPA has announced that it will propose additional "transport" rules to address compliance with revised NAAQS standards for ozone and particulate matter which will be issued by the EPA in the future, as discussed below.

Hazardous Air Pollutants

As provided in the Clean Air Act, the EPA investigated hazardous air pollutant emissions from electric utilities and submitted a report to Congress identifying mercury emissions from coal-fired power plants as warranting further study. In 2005, the EPA issued the CAMR establishing mercury standards for new power plants and requiring all states to issue new SIPs including mercury requirements for existing power plants. The EPA issued a model rule which provides for a two-phase cap and trade program with initial reductions due by 2010 and final reductions due by 2018. The CAMR provided for reductions of

70% from 2003 levels. The EPA closely integrated the CAMR and CAIR programs to ensure that the 2010 mercury reduction targets would be achieved as a "co-benefit" of the controls installed for purposes of compliance with the CAIR.

In February 2008, a federal appellate court issued a decision vacating the CAMR. The EPA has entered into a consent decree requiring it to promulgate a utility Maximum Achievable Control Technology rule to replace the CAMR with a proposed rule due by March 2011 and a final rule by November 2011. Depending on the final outcome of the rulemaking, the CAMR could be replaced by new rules with different or more stringent requirements for reduction of mercury and other hazardous air pollutants. Kentucky has also repealed its corresponding state mercury regulations.

Acid Rain Program

The Clean Air Act imposed a two-phased cap and trade program to reduce SO_2 emissions from power plants that were thought to contribute to "acid rain" conditions in the northeastern U.S. The Clean Air Act also contains requirements for power plants to reduce NOx emissions through the use of available combustion controls.

Regional Haze

The Clean Air Act also includes visibility goals for certain federally designated areas, including national parks, and requires states to submit SIPs that will demonstrate reasonable progress toward preventing future impairment and remedying any existing impairment of visibility in those areas. In 2005, the EPA issued its Clean Air Visibility Rule detailing how the Clean Air Act's BART requirements will be applied to facilities, including power plants built between 1962 and 1974 that emit certain levels of visibility impairing pollutants. Under the final rule, as the CAIR provided for more visibility improvement than BART, states are allowed to substitute CAIR requirements in their regional haze SIPs in lieu of controls that would otherwise be required by BART. The final rule has been challenged in the courts. Additionally, because the regional haze SIPs incorporate certain CAIR requirements, the remand of the CAIR could potentially impact regional haze SIPs. See "Ambient Air Quality" above for a discussion of CAIR-related uncertainties.

Installation of Pollution Controls

Many of the programs under the Clean Air Act utilize cap and trade mechanisms that require a company to hold sufficient emissions allowances to cover its authorized emissions on a company-wide basis and do not require installation of pollution controls on every generating unit. Under cap and trade programs, companies are free to focus their pollution control efforts on plants where such controls are particularly efficient and utilize the resulting emission allowances for smaller plants where such controls are not cost effective. KU met its Phase I SO_2 requirements primarily through installation of FGD equipment on Ghent Unit 1. KU's strategy for its Phase II SO_2 requirements, which commenced in 2000, includes the installation of additional FGD equipment, as well as using accumulated emission allowances and fuel switching to defer certain additional capital expenditures and continue to evaluate improvements to further reduce SO_2 emissions. KU believes its costs in reducing SO_2, NOx and mercury emissions to be comparable to those of similarly situated utilities with like generation assets. KU's compliance plans are subject to many factors including developments in the emission allowance and fuels markets, future legislative and regulatory enactments, legal proceedings and advances in clean air technology. KU will continue to monitor these developments to ensure that its environmental obligations are met in the most efficient and cost-effective manner. KU expects to incur additional capital expenditures currently approved in its ECR plans totaling approximately $500 million during the 2011 through 2013 time period to achieve emissions reductions and manage coal combustion residuals. Monthly recovery is subject to periodic review by the Kentucky Commission.

GHG Developments

In 2005, the Kyoto Protocol for reducing GHG emissions took effect, obligating 37 industrialized countries to undertake substantial reductions in GHG emissions. The U.S. has not ratified the Kyoto Protocol and there are currently no mandatory GHG emission reduction requirements at the federal level. As discussed below, legislation mandating GHG reductions has been introduced in the Congress, but no federal legislation has been enacted to date. In the absence of a program at the federal level, various states have adopted their own GHG emission reduction programs, including 11 northeastern U.S. states and the District of Columbia under the Regional GHG Initiative program and California. Substantial efforts to pass federal GHG legislation are on-going. The current administration has announced its support for the adoption of mandatory GHG reduction requirements at the federal level. The United States and other countries met in Copenhagen, Denmark, in December 2009, in an effort to negotiate a GHG reduction treaty to succeed the Kyoto Protocol, which is set to expire in 2013. In Copenhagen, the U.S. made a nonbinding commitment to, among other things, seek to reduce GHG emissions to 17% below 2005 levels by 2020 and provide financial support to developing countries. The United States and other nations met in Cancun, Mexico, in December 2010 to continue negotiations toward a binding agreement.

GHG Legislation

KU is monitoring on-going efforts to enact GHG reduction requirements and requirements governing carbon sequestration at the state and federal level and is assessing potential impacts of such programs and strategies to mitigate those impacts. In June 2009, the U.S. House of Representatives passed the American Clean Energy and Security Act of 2009, which was a comprehensive energy bill containing the first-ever nation-wide GHG cap and trade program. The bill provided for reductions in GHG emissions of 3% below 2005 levels by 2012, 17% by 2020 and 83% by 2050. In order to cushion potential rate impacts for utility customers, approximately 43% of emissions allowances would have initially been allocated at no cost to the electric utility sector, with this allocation gradually declining to 7% in 2029 and zero thereafter. The bill would have also established a renewable electricity standard requiring utilities to meet 20% of their electricity demand through renewable energy and energy efficiency by 2020. The bill contained additional provisions regarding carbon capture and sequestration, clean transportation, smart grid advancement, nuclear and advanced technologies and energy efficiency.

In September 2009, the Clean Energy Jobs and American Power Act, which was largely patterned on the House legislation, was introduced in the U.S. Senate. The Senate bill raised the emissions reduction target for 2020 to 20% below 2005 levels and did not include a renewable electricity standard. While the initial bill lacked detailed provisions for the allocation of emissions allowances, a subsequent revision incorporated allowance allocation provisions similar to the House bill. Although Senators Kerry and Lieberman and others worked to reach a consensus on GHG legislation, no bill passed the Senate in 2010. The Company is closely monitoring the progress of pending energy legislation, but the prospect for passage of comprehensive GHG legislation in 2011 is uncertain.

GHG Regulations

In April 2007, the U.S. Supreme Court ruled that the EPA has the authority to regulate GHG under the Clean Air Act. In April 2009, the EPA issued a proposed endangerment finding concluding that GHGs endanger public health and welfare, which is an initial rulemaking step under the Clean Air Act. A final endangerment finding was issued in December 2009. In September 2009, the EPA issued a final GHG reporting rule requiring reporting by facilities with annual GHG emissions equivalent to at least 25,000 tons of carbon dioxide. A number of the Company's facilities are required to submit annual reports commencing with calendar year 2010. In May 2010, the EPA issued a final GHG "tailoring" rule, effective January 2011, requiring new or modified sources with GHG emissions equivalent to at least 75,000 tons of carbon dioxide to obtain permits under the Prevention of Significant Deterioration Program. Such new or modified facilities would be required to install Best Available Control Technology. While the Company is unaware of any currently available GHG control technology that might be required for installation on new or modified power plants, it is currently assessing the potential impact of the rule. The final rule will apply to new and modified power plants beginning in January 2011. The Company is unable to predict whether mandatory GHG reduction requirements will ultimately be enacted through legislation or regulations. In December 2010, the EPA announced that it plans to promulgate GHG New Source Performance Standards for power plants, including both new and existing facilities. A proposed rule is expected by July 2011, while a final rule is expected by May 2012. In the absence of either a proposed or final regulation, KU is unable to assess the potential impact of any future regulation.

GHG Litigation

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting facilities. In October 2009, a three judge panel of the United States Court of Appeals for the 5th Circuit in the case of Comer v. Murphy Oil reversed a lower court, holding that private plaintiffs have standing to assert certain common law claims against more than 30 utility, oil, coal and chemical companies. In March 2010, the court vacated the opinion of the three-judge panel and granted a motion for rehearing but subsequently denied the appeal due to the lack of a quorum. The appellate ruling leaves in effect the lower court ruling dismissing the plaintiffs' claims. In January 2011, the Supreme Court denied petitioner's petition for review, which effectively brings the case to an end. The Comer complaint alleged that GHG emissions from the defendants' facilities contributed to global warming which increased the intensity of Hurricane Katrina. E.ON, the former indirect parent of the Utilities, was named as a defendant in the complaint but was not a party to the proceedings due to the failure of the plaintiffs to pursue service under the applicable international procedures. KU continues to monitor relevant GHG litigation to identify judicial developments that may be potentially relevant to operations.

Ghent Opacity NOV

In September 2007, the EPA issued an NOV alleging that KU had violated certain provisions of the Clean Air Act's operating rules relating to opacity during June and July of 2007 at Units 1 and 3 of KU's Ghent generating station. The parties have met on this matter and KU has received no further communications from the EPA. The Company is not able to estimate the outcome or potential effects of these matters, including whether substantial fines, penalties or remedial measures may result.

Ghent New Source Review NOV

In March 2009, the EPA issued an NOV alleging that KU violated certain provisions of the Clean Air Act's rules governing new source review and prevention of significant deterioration by installing FGD and SCR controls at its Ghent generating station without assessing potential increased sulfuric acid mist emissions. KU contends that the work in question, as pollution control projects, was exempt from the requirements cited by the EPA. In December 2009, the EPA issued a Section 114 information request seeking additional information on this matter. In March 2010, the Company received an EPA settlement proposal providing for imposition of additional permit limits and emission controls and anticipates continued settlement negotiations with the EPA. Negotiations between the EPA and KU are ongoing. Depending on the provisions of a final settlement or the results of litigation, if any, resolution of this matter could involve significant increased operating and capital expenditures. The Company is currently unable to determine the final outcome of this matter or the impact of an unfavorable determination on the Company's financial position or results of operations.

Ash Ponds and Coal-Combustion Byproducts

The EPA has undertaken various initiatives in response to the December 2008 impoundment failure at the TVA's Kingston power plant, which resulted in a major release of coal combustion byproducts into the environment. The EPA issued information requests to utilities throughout the country, including KU, to obtain information on their ash ponds and other impoundments. In addition, the EPA inspected a large number of impoundments located at power plants to determine their structural integrity. The inspections included several of KU's impoundments, which the EPA found to be in satisfactory condition. In June 2010, the EPA published proposed regulations for coal combustion byproducts handled in landfills and ash ponds. The EPA has proposed two alternatives: (1) regulation of coal combustion byproducts in landfills and ash ponds as a hazardous waste or (2) regulation of coal combustion byproducts as a solid waste with minimum national standards. Under both alternatives, the EPA has proposed safety requirements to address the structural integrity of ash ponds. In addition, the EPA will consider potential refinements of the provisions for beneficial reuse of coal combustion byproducts.

Water Discharges and PCB Regulations

The EPA has also announced plans to develop revised effluent limitation guidelines governing discharges from power plants and standards for cooling water intake structures. The EPA has further announced plans to develop revised standards governing the use of polychlorinated biphenyls ("PCB") in electrical equipment. The Company is monitoring these ongoing regulatory developments but will be unable to determine the impact until such time as new rules are finalized.

Impact of Pending and Future Environmental Developments

As a company with significant coal-fired generating assets, KU will likely be substantially impacted by pending or future environmental rules or legislation requiring mandatory reductions in GHG emissions or other air emissions, imposing more stringent standards on discharges to waterways, or establishing additional requirements for handling or disposal of coal combustion byproducts. These evolving environmental regulations will likely require an increased level of capital expenditures and increased incremental operating and maintenance costs by the Company over the next several years. Due to the uncertain nature of the final regulations that will ultimately be adopted by the EPA, including the reduction targets and the deadlines that will be applicable, the Company cannot finalize estimates of the potential compliance costs, but should the final rules incorporate additional emission reduction requirements, require more stringent emissions controls or implement more stringent byproducts storage and disposal practices, such costs will likely be significant. With respect to NAAQS, CATR, CAMR replacement and coal combustion byproducts developments, based upon a preliminary analysis of proposed regulations, the Company may be required to consider actions such as upgrading existing emissions controls, installing additional emissions controls, upgrading byproducts disposal and storage and possible early replacement of coal-fired units. Capital expenditures for KU associated with such actions are preliminarily estimated to be in the $1.5 to $1.7 billion range over the next ten years, although final costs may substantially vary. With respect to potential developments in water discharge, revised PCB standards or GHG initiatives, costs in such areas cannot be estimated due to the preliminary status or uncertain outcome of such developments, but would be in addition to the above amount and could be substantial. Ultimately, the precise impact on the Company's operations of these various environmental developments cannot be determined prior to the finalization of such requirements. Based upon prior regulatory precedent, the Company believes that many costs of complying with such pending or future requirements would likely be recoverable under the ECR or other potential cost-recovery mechanisms, but the Company can provide no assurance as to the ultimate outcome of such proceedings before the regulatory authorities.

TC2 Water Permit

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County generating station. In October 2010, the hearing officer issued a report and recommended Order providing for dismissal of the claims raised by the petitioners. In December 2010, the Secretary issued a final Order dismissing all claims and upholding the permit which petitioners subsequently appealed to Trimble County Circuit Court.

General Environmental Proceedings

From time to time, KU appears before the EPA, various state or local regulatory agencies and state and federal courts regarding matters involving compliance with applicable environmental laws and regulations. Such matters include a prior Section 114 information request from the EPA relating to new-source review issues at KU's Ghent unit 2; completed settlement with state regulators regarding compliance with particulate limits in the air permit for KU's Tyrone generating station; remediation obligations or activities for or other risks relating to elevated PCB levels at existing properties; liability under the Comprehensive Environmental Response, Compensation and Liability Act for cleanup at various off-site waste sites; and on-going claims regarding the GHG emissions from the Company's generating stations. Based on analysis to date, the resolution of these matters is not expected to have a material impact on the Company's operations.

Note 14 - Jointly Owned Electric Utility Plant

TC2 is a jointly owned unit at the Trimble County site. KU and LG&E own undivided 60.75% and 14.25% interests, respectively. Of the remaining 25%, IMEA owns a 12.12% undivided interest and IMPA owns a 12.88% undivided interest. Each company is responsible for its proportionate share of capital cost during construction and fuel, operation and maintenance cost when TC2 is in-service. With limited exceptions the Company took care, custody and control of TC2 on January 22, 2011, and has dispatched the unit to meet customer demand since that date. KU and the contractor agreed to a further amendment of the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. In December 2009 and June 2008, LG&E sold assets to KU related to the construction of TC2 with a net book value of $48 million and $10 million, respectively.

The following data represent shares of the jointly owned property (capacity based on nameplate rating):

	TC2				
	KU	LG&E	IMPA	IMEA	Total
Ownership interest	60.75%	14.25%	12.88%	12.12%	100%
Mw capacity	509	119	108	102	838

KU's 60.75% ownership:		LG&E's 14.25% ownership:	
Plant held for future use	$ 62	Plant held for future use	$ 2
Construction work in progress	703	Construction work in progress	187
Accumulated depreciation	(1)	Accumulated depreciation	-
Net book value	$ 764	Net book value	$ 189

KU and LG&E jointly own the following CTs and related equipment (capacity based on net summer capability) as of December 31, 2010:

	KU				LG&E				Total			
Ownership Percentage	Mw Capacity	Cost	Depr.	Net Book Value	Mw Capacity	Cost	Depr.	Net Book Value	Mw Capacity	Cost	Depr.	Net Book Value
KU 47%, LG&E 53% (a)	129	$ 43	$ -	$ 43	146	$ 48	$ -	$ 48	275	$ 91	$ -	$ 91
KU 62%, LG&E 38% (b)	190	64	(2)	62	118	40	(2)	38	308	104	(4)	100
KU 71%, LG&E 29% (c)	228	63	(1)	62	92	26	-	26	320	89	(1)	88
KU 63%, LG&E 37% (d)	404	109	(1)	108	236	64	(1)	63	640	173	(2)	171
KU 71%, LG&E 29% (e)	n/a	4	-	4	n/a	2	-	2	n/a	6	-	6

(a) Comprised of Paddy's Run 13 and E.W. Brown 5. In addition to the above jointly owned utility plant, there is an inlet air cooling system attributable to unit 5 and units 8-11 at the E.W. Brown facility. This inlet air cooling system is not jointly owned, however, it is used to increase production on the units to which it relates, resulting in an additional 88 Mw of capacity for KU.

(b) Comprised of units 6 and 7 at the E.W. Brown facility.
(c) Comprised of units 5 and 6 at the Trimble County facility.
(d) Comprised of CT Substation 7-10 and units 7, 8, 9 and 10 at the Trimble County facility.
(e) Comprised of CT Substation 5 and 6 and CT Pipeline at the Trimble County facility.

Both KU's and LG&E's participating share of direct expenses of the jointly owned plants is included in the corresponding operating expenses on each company's respective Statements of Income (i.e., fuel, maintenance of plant, other operating expense).

Note 15 - Related Party Transactions

KU and subsidiaries of LKE and PPL engage in related party transactions. Transactions between KU and LKE subsidiaries are eliminated on consolidation of LKE. Transactions between KU and PPL subsidiaries are eliminated on consolidation of PPL. These transactions are generally performed at cost and are in accordance with FERC regulations under PUHCA 2005 and the applicable Kentucky Commission and Virginia Commission regulations.

Intercompany Wholesale Sales and Purchases

KU and LG&E jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are recorded as intercompany wholesale sales and purchases are recorded by each company at a price equal to the seller's fuel cost. Savings realized from purchasing electricity intercompany instead of generating from their own higher costs units or purchasing from the market are shared equally between the Utilities. The volume of energy each company has to sell to the other is dependent on its native load needs and its available generation.

These sales and purchases are included in the Statements of Income as "Operating revenues", "Power purchased" expenses and "Other operation and maintenance expenses". KU's intercompany electric revenues and power purchased expenses were as follows:

	Successor	Predecessor		
	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Electric operating revenues from LG&E	$ 2	$ 13	$ 21	$ 80
Power purchased and related operations and maintenance expenses from LG&E	21	79	101	109

Interest Charges

See Note 11, Long-Term Debt, and Note 12, Notes Payable and Other Short-Term Obligations, for details of intercompany borrowing arrangements. Intercompany agreements do not require interest payments for receivables related to services provided when settled within 30 days.

KU's interest expense to affiliated companies was as follows:

	Successor	Predecessor		
	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Interest on money pool loans	$ -	$ -	$ -	$ 2
Interest on PPL loans	2	-	-	-
Interest on Fidelia loans	-	62	69	56

Interest paid to LKE on the money pool arrangement was less than $1 million for 2010 and 2009.

Dividends

In September 2010, the Company paid dividends of $50 million to its sole shareholder, LKE.

Capital Contributions

The Company received no capital contributions in 2010, but received capital contributions of $75 million and $145 million from its sole shareholder, LKE, in 2009 and 2008, respectively.

Sale of Assets

In 2010, KU sold and bought assets of less than $1 million to and from LG&E. In December 2009, LG&E sold assets to KU related to the construction of TC2 with a net book value of $48 million.

Other Intercompany Billings

Servco provides the Company with a variety of centralized administrative, management and support services. Associated charges include payroll taxes paid by Servco on behalf of KU, labor and burdens of Servco employees performing services for KU, coal purchases and other vouchers paid by Servco on behalf of KU. The cost of these services is directly charged to the Company, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and/or other statistical information. These costs are charged on an actual cost basis.

In addition, the Utilities provide services to each other and to Servco. Billings between the Utilities relate to labor and overheads associated with union and hourly employees performing work for the other utility, charges related to jointly-owned generating units and other miscellaneous charges. Billings from KU to Servco include cash received by Servco on behalf of KU, tax settlements and other payments made by the Company on behalf of other non-regulated businesses which are reimbursed through Servco.

Intercompany billings to and from KU were as follows:

	Successor	Predecessor		
	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Servco billings to KU	$ 46	$ 233	$ 169	$ 227
LG&E billings to KU	14	49	44	5
KU billings to Servco	12	11	14	3
KU billings to LG&E	-	-	78	75

Intercompany Balances

The Company had the following balances with its affiliates:

	Successor	Predecessor
	December 31, 2010	December 31, 2009
Accounts receivable from LKE	$ 12	$ 9
Accounts payable to LG&E	22	53
Accounts payable to Servco	23	20
Accounts payable to Fidelia	-	15
Notes payable to LKE	10	45
Long-term debt to Fidelia	-	1,331

Note 16 - Selected Quarterly Data (Unaudited)

	For the 2010 Periods Ended (a)				
	Predecessor				Successor
	March 31	June 30	September 30	October 31	December 31
Operating revenues	$ 380	$ 350	$ 416	$ 102	$ 263
Operating income	87	71	105	22	65
Net income	44	31	54	11	35

(a) Periods ended March 31, June 30 and September 30 represent three months then ended. Period ended October 31 represents one month then ended and period ended December 31 represents two months then ended.

	For the 2009 Quarters Ended			
	Predecessor			
	March 31	June 30	September 30	December 31
Operating revenues	$ 363	$ 305	$ 341	$ 346
Operating income	19	53	125	72
Net income	7	26	66	34

Note 17 - Accumulated Other Comprehensive Income (Loss)

Accumulated other comprehensive income (loss) consisted of the following:

	Pre-Tax Accumulated Derivative Gain (Loss)	Income Taxes	Net
Balance at December 31, 2009, Predecessor	$ -	$ -	$ -
Equity investee's other comprehensive income (loss)	(3)	1	(2)
Balance at October 31, 2010, Predecessor	(3)	1	(2)
Effect of PPL acquisition	3	(1)	2
Balance at December 31, 2010, Successor	$ -	$ -	$ -

Note 18 - Subsequent Events

Subsequent events have been evaluated through February 25, 2011, the date of issuance of these statements. These statements contain all necessary adjustments and disclosures resulting from that evaluation.

On January 31, 2011, KU filed a notice of intent to file a rate case with the Virginia Commission for the test year ended December 31, 2010. The case is expected to be filed on or after April 1, 2011.

With limited exceptions the Company took care, custody and control of TC2 on January 22, 2011, and has dispatched the unit to meet customer demand since that date. LG&E and KU and the contractor agreed to a further amendment of the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages.

On January 14, 2011, KU contributed $43 million to its pension plan.

pwc

Report of Independent Auditors

To Stockholder of Kentucky Utilities Company

In our opinion, the accompanying balance sheet and the related statements of income, retained earnings, comprehensive income, cash flows, and capitalization present fairly, in all material respects, the financial position of Kentucky Utilities Company (Successor Company) at December 31, 2010 and the results of its operations and its cash flows for the period from November 1, 2010 to December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assertion of the effectiveness of internal control over financial reporting, included in "Management's Report of Internal Controls Over Financial Reporting" which appears on page 50. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) and in accordance with the auditing and attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 2 to the financial statements, on November 1, 2010, PPL Corporation completed its acquisition of LG&E and KU Energy LLC and its subsidiaries. The push-down basis of accounting was used at the acquisition date.

A company's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial

PricewaterhouseCoopers LLP, 500 West Main Street, Ste. 1800, Louisville, KY 40202-2941

pwc

statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and those charged with governance and (iii) provide reasonable assurance regarding prevention or timely detection and correction of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Report of Independent Auditors

To Stockholder of Kentucky Utilities Company

In our opinion, the accompanying balance sheet and the related statements of income, retained earnings, comprehensive income, cash flows, and capitalization present fairly, in all material respects, the financial position of Kentucky Utilities Company (Predecessor Company) at December 31, 2009 and the results of its operations and its cash flows for the period from January 1, 2010 to October 31, 2010 and for each of the two years in the period ended December 31, 2009 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with generally accepted auditing standards as established by the Auditing Standards Board (United States) and in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 2 to the financial statements, on November 1, 2010, PPL Corporation completed its acquisition of LG&E and KU Energy LLC and its subsidiaries. The push-down basis of accounting was used at the acquisition date.

Section 7 - Regulation FD

Item 7.01 Regulation FD Disclosure

On June 18, 2012, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU", and together with LG&E, the "Companies") delivered a notification to the Kentucky Public Service Commission ("KPSC") indicating their intention to terminate their pending Asset Purchase Agreement ("Agreement") entered into on September 15, 2011 with Bluegrass Generation Company L.L.C. ("Bluegrass"). The Agreement contemplated the purchase by the Companies of Bluegrass' 495 MW natural gas combustion turbine generating plant in LaGrange, Kentucky for an aggregate price of $110 million. The Companies anticipate delivering applicable contractual notices of termination to Bluegrass on or about June 19, 2012.

In May 2012, the proposed transaction was approved by the KPSC, but received conditional authorization from the Federal Energy Regulatory Commission ("FERC"), subject to approval by FERC of satisfactory market-power mitigation measures. After review of available potential mitigation options, the Companies determined that the available options were not commercially justifiable.

The planned acquisition did not relate to current power supply requirements of the Companies, but rather to anticipated longer-term needs, and the Companies will continue to review options for estimated future energy requirements. The termination of the Agreement does not alter the Companies' previously announced plans to construct a new 640 MW natural gas combined-cycle generation plant at an existing plant site and retire 797 MW of older, coal-fired generating units prior to 2016.

Statements in this Current Report, including statements with respect to future events and their timing, including the Companies' proposed activities, such as the planned construction, retirement and acquisition of generating units, as well as other statements as to future costs or expenses, regulation, corporate strategy and performance, are "forward-looking statements" within the meaning of the federal securities laws. Although PPL Corporation, LG&E and KU Energy LLC and the Companies believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these expectations, assumptions and statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: subsequent phases of contracting for, purchase of and construction of the new facilities or component equipment; subsequent regulatory approval or permitting proceedings; market demand and prices for electricity, fuel and electrical generating facilities; and political, regulatory or economic conditions in states, regions or countries where the Companies conduct business. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation's, LG&E and KU Energy LLC's and the Companies' Form 10-K and other reports on file with the Securities and Exchange Commission .

Section 7 - Regulation FD

Item 7.01 Regulation FD Disclosure

and

Section 8 - Other Events

Item 8.01 Other Events

On June 8, 2012, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU", and together with LG&E, the "Companies") issued press releases announcing that they anticipate filing requests with the Kentucky Public Service Commission ("KPSC") for increases in annual base electric rates of $62.1 million and $82.4 million at LG&E and KU, respectively, and an increase in annual base gas rates of $17.2 million at LG&E.

The Companies anticipate filing the rate increase applications with the KPSC on or after June 29, 2012. Subject to KPSC review and approval, the rate increases could become effective on or after January 1, 2013.

In connection with the rate application, LG&E also anticipates filing with the KPSC a request for a certificate of public convenience and necessity, including a rate tracking mechanism, to allow it to acquire and repair certain existing customer-owned gas line connection equipment and recover the costs associated with such activities, as well as certain other gas system projects. The LG&E gas line tracker would encompass approximate total revenues of $120 million over an initial 5 year period from 2013-2017.

The Companies' anticipated requested increases represent increases in base electric rates of approximately 6.9 percent and 6.5 percent at LG&E and KU, respectively, and in LG&E base gas rates of approximately 7.0 percent. The Companies' anticipated applications include requests for authorized returns-on-equity at LG&E and KU of 11 percent each.

Copies of the press releases are furnished as Exhibits 99.1 and 99.2.

Section 9 - Financial Statements and Exhibits

Item 9.01 Financial Statements and Exhibits

(d) Exhibits

99.1 - Press Release dated June 8, 2012 of Louisville Gas and Electric Company.

99.2 - Press Release dated June 8, 2012 of Kentucky Utilities Company.

Statements in this report and the accompanying press release, including statements with respect to future events and their timing, including the Companies' proposed regulatory filings, such as the requested rate increases and rate mechanisms and the future rates or returns on equity ultimately authorized or achieved, as well as other statements as to future costs or expenses, regulation, corporate strategy and performance, are "forward-looking statements" within the meaning of the federal securities laws. Although the Companies believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these expectations, assumptions and statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: subsequent phases of rate relief and regulatory cost recovery; market demand and prices for electricity; political, regulatory or economic conditions in states, regions or countries where the Companies conduct business; and the pace and magnitude of actual purchase or repair of assets subject to tracker mechanisms. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation's, LG&E and KU Energy LLC's and the Companies' Form 10-K and other reports on file with the Securities and Exchange Commission.

LG&E Requests Rate Change for Improved Service and Reliability

Increase amounts to less than 25 cents per day for electric and natural gas customers, to be effective January 2013, if approved by the Kentucky Public Service Commission

LOUISVILLE, Ky., (June 8, 2012) – Louisville Gas and Electric Company announced today it plans to file a request with the Kentucky Public Service Commission later this month to increase base electric rates by $62.1 million primarily to recover costs associated with improving service and reliability. The company is also requesting a $17.2 million base natural gas rate increase.

LG&E and its sister utility, Kentucky Utilities Company, have invested more than $1 billion over the last 29 months to meet energy demands and improve service and reliability. More than 4,000 generation, transmission and electric and gas distribution projects have occurred during that time.

Some of the largest investments were to meet customers' continued growing energy needs and enhance reliability–the new 585-megawatt unit at the Trimble County 2 Generating Station, one of the cleanest coal-fired units in the country, upgrades to the distribution and transmission systems and upgrades at Ohio Falls, the hydroelectric plant on the Ohio River. LG&E also made considerable investments in its natural gas business as part of its continued 615-mile natural gas main replacement project and increased leak surveying.

In addition, LG&E is requesting a Certificate of Public Convenience and Necessity for a proposed five-year natural gas line program, similar to what many other gas utilities around the country have done, to relieve customers from the responsibility of maintaining the part of the gas infrastructure called the "riser" – the pipe from the ground to the meter – and allow LG&E to make necessary repairs on it. As part of the program, LG&E would proactively replace certain gas risers and take ownership of the natural gas line segment that runs from the customer property line to the LG&E gas meter. The costs associated with this program and the continuation of the gas main replacement project would be recovered under a new rate mechanism called a "gas line tracker," which would appear as a separate line item on LG&E natural gas customers' bills.

The utilities have taken significant steps to improve service by creating nearly 175 new jobs since the last rate case. Many of the positions are located in Morganfield at LG&E's and KU's new customer care center, where approximately 50 employees were hired.

The utilities also have created a number of jobs to help meet tighter federal cyber security standards as well as more stringent transmission reliability requirements. LG&E and KU were honored last year for superior commitment to reliability performance by SERC Reliability Corporation, the nonprofit organization responsible for promoting and improving system reliability.

"We are creating additional jobs, adding cleaner energy and improving our service to ensure that we continue to deliver safe and reliable energy at the lowest cost possible," said Victor A. Staffieri, chairman, CEO and president of LG&E and KU. "We continue to be ranked as an industry leader in areas such as low rates, safety, reliability and operational excellence, and, just as a vehicle needs regular maintenance, we must continue to invest in our system."

For a residential LG&E electric customer using 1,000 kWh per month, this will mean an increase of approximately $7.21 per month, or less than 25 cents per day. For a natural gas customer using 60 Ccf per month, the base rate increase will be approximately $3.44 per month, or 11 cents per day. The initial cost associated with the gas line tracker would be approximately $2.35 per month beginning 2013.

LG&E will file for the increase on June 29 and, if approved, the increases will not occur until January 2013. Customers can visit www.lge-ku.com/rates for more information concerning the requested rate adjustments.

To help offset the requested rate increases, customers are encouraged to take action and enroll in the company's energy efficiency programs designed to help customers save energy and money. Visit www.lge-ku.com/savingenergy for a complete list of energy efficiency programs and services.

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com .

Kentucky Utilities Requests Rate Change for Improved Service and Reliability
Increase amounts to less than 25 cents per day, to be effective January 2013, if approved by the Kentucky Public Service Commission

LEXINGTON, Ky., (June 8, 2012) – Kentucky Utilities Company announced today it plans to file a request with the Kentucky Public Service Commission later this month to increase base electric rates by $82.4 million primarily to recover costs associated with improving service and reliability.

KU and its sister utility, Louisville Gas and Electric Company, have invested nearly $1 billion in the last 29 months to meet energy demands and improve service and reliability. More than 4,000 generation, transmission and electric and gas distribution projects have occurred during that time.

Some of the largest investments were to meet customers' continued growing energy needs and enhance reliability–the new 585-megawatt unit at the Trimble County 2 Generating Station, one of the cleanest coal-fired units in the country, upgrades to the distribution system and transmission systems, enhanced substation reliability and upgrades at Dix Dam, the hydroelectric plant on Lake Herrington.

The utilities have taken significant steps to improve service by creating nearly 175 new jobs since the last rate case. Many of the positions are located in Morganfield at LG&E's and KU's new customer care center, where approximately 50 employees were hired.

The utilities also have created a number of jobs to help meet tighter federal cyber security standards as well as more stringent transmission reliability requirements. KU and LG&E were honored last year for superior commitment to reliability performance by SERC Reliability Corporation, the non-profit organization responsible for promoting and improving system reliability.

"We are creating additional jobs, adding cleaner energy and improving our service to ensure that we continue to deliver safe and reliable energy at the lowest cost possible," said Victor A. Staffieri, chairman, CEO and president of LG&E and KU. "We continue to be ranked as an industry leader in areas such as low rates, safety, reliability and operational excellence, and, just as a vehicle needs regular maintenance, we must continue to invest in our system."

For a residential KU customer using 1,000 kWh per month, this will mean an increase of approximately $6.98 per month, or less than 25 cents per day.

KU will file for the increase on June 29 and, if approved, the increase will not occur until January 2013. Customers can visit www.lge-ku.com/rates for more information concerning the requested rate adjustments.

To help offset the requested rate increase, customers are encouraged to take action and enroll in the company's energy efficiency programs designed to help customers save energy and money. Visit www.lge-ku.com/savingenergy for a complete list of energy efficiency programs and services.

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. PPL Reports First-Quarter Earnings

- First-quarter earnings increase over prior year
- Per share earnings from ongoing operations down on higher shares outstanding
- Company on track to achieve ongoing earnings forecast for 2012

ALLENTOWN, Pa. (May 4, 2012) — PPL Corporation (NYSE: PPL) on Friday (5/4) announced first-quarter 2012 reported earnings of $541 million, or $0.93 per share, up from $401 million, or $0.82 per share, a year ago.

Excluding special items, PPL's earnings from ongoing operations for the quarter were $409 million, or $0.70 per share, compared with $407 million, or $0.84 per share, a year ago.

PPL's first-quarter earnings from ongoing operations reflect dilution of $0.14 per share as a result of the April 2011 common stock issuance to fund the acquisition that substantially expanded PPL's regulated utility operations in the United Kingdom.

"Our first-quarter results keep us solidly on track to achieve our earnings forecast for 2012," said William H. Spence, PPL's chairman, president and chief executive officer. "They were in line with our expectations, despite lower electricity sales due to extraordinarily mild winter weather in the eastern U.S."

"The successful execution of our Midlands integration plan in the U.K. is driving cost savings and operational improvements, demonstrating again the value of our expansion into diverse markets and the attainment of a more predictable earnings profile. At the same time, our competitive supply segment is successfully navigating through challenging commodity markets," Spence said.

PPL reaffirmed its 2012 forecast of $2.15 to $2.45 per share in earnings from ongoing operations. Its 2012 forecast of reported earnings is $2.38 to $2.68 per share, reflecting special items recorded through the first quarter of 2012.

First-Quarter 2012 Earnings Details

PPL's reported earnings for the first quarter of 2012 included net special item credits of $0.23 per share, reflecting a credit of $0.26 per share in adjusted energy-related economic activity. Included in this energy-related economic activity is a credit of $0.17 per share, representing the change in fair value during the first quarter of 2012 for transactions that were previously recorded as cash flow hedges at Dec. 31, 2011. These transactions will be recognized in PPL's earnings from ongoing operations in 2012 and 2013 as the transactions settle.

Reported earnings are calculated in accordance with U.S. generally accepted accounting principles (GAAP). Earnings from ongoing operations is a non-GAAP financial measure that is adjusted for special items. Special items include the impact of adjusted energy-related economic activity (principally changes in fair value of economic hedges and the ineffective portion of qualifying cash flow hedges), acquisition-related adjustments, as well as other impacts fully detailed at the end of this news release.

(Dollars in millions, except for per share amounts)

	1st Quarter 2012	1st Quarter 2011	% Change
Reported Earnings	$541	$401	+35%
Reported Earnings Per Share	$0.93	$0.82	+13%
Earnings from Ongoing Operations	$409	$407	-
Per Share Earnings from Ongoing Operations	$0.70	$0.84	-17%

(See the tables at the end of this news release for details as to the reconciliation of earnings from ongoing operations to reported earnings.)

First-Quarter 2012 Earnings by Business Segment

The following chart shows PPL's earnings by business segment for the first quarter of 2012, compared with the same period of 2011.

	1st Quarter 2012	1st Quarter 2011
	(per share)

(For more details and a breakout of special items by segment, see the reconciliation tables at the end of this news release.)

Key Factors Impacting Business Segment Earnings from Ongoing Operations

Kentucky Regulated Segment

PPL's Kentucky regulated segment primarily consists of the regulated electricity and natural gas operations of Louisville Gas and Electric Company and Kentucky Utilities Company.

Segment earnings from ongoing operations in the first quarter of 2012 declined by $0.09 per share compared with a year ago. This decline was primarily due to lower retail volumes as a result of extraordinarily mild winter weather, higher operation and maintenance expense, higher depreciation, and dilution of $0.01 per share.

U.K. Regulated Segment
PPL's U.K. regulated segment consists of the regulated electricity delivery operations of Western Power Distribution, serving Southwest and Central England and South Wales. This segment, formerly known as the international regulated segment, has been renamed to more specifically denote the U.K. focus.

Segment earnings from ongoing operations in the first quarter of 2012 rose by $0.15 per share compared with a year ago. This increase was primarily due to the strong operating results of the Midlands businesses, which were not included in the 2011 results. Also contributing to segment earnings were higher operating results at WPD's legacy delivery operations due to higher delivery revenues, partially offset by higher pension expense. These net positive results were partially offset by higher U.S. income taxes and dilution of $0.06 per share.

Pennsylvania Regulated Segment
PPL's Pennsylvania regulated segment consists of the regulated electricity delivery operations of PPL Electric Utilities.

Segment earnings from ongoing operations in the first quarter of 2012 declined by $0.05 per share compared with a year ago. This decline was primarily due to lower retail volumes as a result of extraordinarily mild winter weather, higher operation and maintenance expense, higher depreciation, and dilution of $0.01 per share.

Supply Segment
PPL's supply segment consists primarily of the competitive domestic electricity generation and the energy marketing operations of PPL Energy Supply.

Segment earnings from ongoing operations in the first quarter of 2012 declined by $0.15 per share compared with a year ago. This decline was primarily due to lower Eastern energy margins as a result of lower energy and capacity prices, which were partially offset by higher nuclear generation. Also contributing to the decline were higher operation and maintenance expense, higher depreciation, and dilution of $0.06 cents per share. These net negative earnings drivers were partially offset by lower income taxes.

2012 Earnings from Ongoing Operations Forecast by Business Segment

Earnings (per share)	**2012 (Forecast) midpoint**	**2011 (Actual)**
Kentucky Regulated	$0.33	$0.40
U.K. Regulated	1.07	0.87
Pennsylvania Regulated	0.20	0.31
Supply	0.70	1.15
Total	$2.30	$2.73

PPL expects lower earnings in 2012 compared with 2011, primarily due to lower energy margins in the supply segment, partially offset by a full year of earnings from the Midlands businesses. These projected earnings also reflect dilution of $0.13 per share associated with PPL's April 2011 issuance of common stock to finance the Midlands acquisition.

Kentucky Regulated Segment
PPL projects lower segment earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expense and higher depreciation, which are expected to be partially offset by higher margins. Dilution for 2012 is expected to be $0.02 per share.

U.K. Regulated Segment
PPL projects higher segment earnings in 2012 compared with 2011, primarily driven by four additional months of earnings from the Midlands businesses and higher electricity delivery revenue. Partially offsetting these positive earnings drivers are higher income taxes, higher operation and maintenance expense, higher depreciation, higher financing costs and a less favorable currency exchange rate. Dilution for 2012 is expected to be $0.06 per share.

Pennsylvania Regulated Segment
PPL expects lower segment earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expense, higher depreciation, and lower distribution revenue, which are expected to be partially offset by higher transmission revenue and lower financing costs. Dilution for 2012 is expected to be $0.01 per share.

Supply Segment
PPL expects lower segment earnings in 2012 compared with 2011. The decrease is primarily driven by lower energy margins as a result of lower energy and capacity prices and higher fuel costs, higher operation and maintenance expense, and higher depreciation, which are expected to be partially offset by higher baseload generation. Dilution for 2012 is expected to be $0.04 per share.

PPL Corporation, headquartered in Allentown, Pa., owns or controls about 19,000 megawatts of generating capacity in the United States, sells energy in key U.S. markets, and delivers electricity and natural gas to about 10 million customers in the United States and the United Kingdom. More information is available at www.pplweb.com .

###

(*Note: All references to earnings per share in the text and tables of this news release are stated in terms of diluted earnings per share.*)

Conference Call and Webcast

PPL invites interested parties to listen to a live Internet webcast of management's teleconference with financial analysts about first-quarter 2012 financial results at 9 a.m. EDT Friday, May 4. The meeting is available online live, in audio format, along with slides of the presentation, on PPL's website: www.pplweb.com. The webcast will be available for replay on the PPL website for 30 days. Interested individuals also can access the live conference call via telephone at 702-696-4769 (ID#74989631).

"Earnings from ongoing operations" should not be considered as an alternative to reported earnings, or net income attributable to PPL, which is an indicator of operating performance determined in accordance with generally accepted accounting principles (GAAP). PPL believes that "earnings from ongoing operations," although a non-GAAP financial measure, is also useful and meaningful to investors because it provides management's view of PPL's fundamental earnings performance as another criterion in making investment decisions. PPL's management also uses "earnings from ongoing operations" in measuring certain corporate performance goals. Other companies may use different measures to present financial performance.

"Earnings from ongoing operations" is adjusted for the impact of special items. Special items include:

- *Adjusted energy-related economic activity (as discussed below).*
- *Foreign currency-related economic hedges.*
- *Gains and losses on sales of assets not in the ordinary course of business.*
- *Impairment charges (including impairments of securities in the company's nuclear decommissioning trust funds).*
- *Workforce reduction and other restructuring impacts.*
- *Acquisition-related adjustments.*
- *Other charges or credits that are, in management's view, not reflective of the company's ongoing operations.*

Adjusted energy-related economic activity includes the changes in fair value of positions used economically to hedge a portion of the economic value of PPL's generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in earnings from ongoing operations over the delivery period of the item that was hedged or upon realization. Management believes that adjusting for such amounts provides a better matching of earnings from ongoing operations to the actual amounts settled for PPL's underlying hedged assets. Please refer to the Notes to the Consolidated Financial Statements and MD&A in PPL Corporation's periodic filings with the Securities and Exchange Commission for additional information on energy-related economic activity.

Statements contained in this news release, including statements with respect to future earnings, cash flows, financing, regulation and corporate strategy, are "forward-looking statements" within the meaning of the federal securities laws. Although PPL Corporation believes that the expectations and assumptions reflected in these forward-looking statements are reasonable, these statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: market demand and prices for energy, capacity and fuel; weather conditions affecting customer energy usage and operating costs; competition in power markets; the effect of any business or industry restructuring; the profitability and liquidity of PPL Corporation and its subsidiaries; new accounting requirements or new interpretations or applications of existing requirements; operating performance of plants and other facilities; the length of scheduled and unscheduled outages at our plants; environmental conditions and requirements and the related costs of compliance, including environmental capital expenditures and emission allowance and other expenses; system conditions and operating costs; development of new projects, markets and technologies; performance of new ventures; asset or business acquisitions and dispositions, and PPL Corporation's ability to realize the expected benefits from acquired businesses, including the 2010 acquisition of Louisville Gas and Electric Company and Kentucky Utilities Company and the 2011 acquisition of the Central Networks electricity distribution businesses in the U.K.; any impact of hurricanes or other severe weather on our business, including any impact on fuel prices; receipt of necessary government permits, approvals, rate relief and regulatory cost recovery; capital market conditions and decisions regarding capital structure; the impact of state, federal or foreign investigations applicable to PPL Corporation and its subsidiaries; the outcome of litigation against PPL Corporation and its subsidiaries; stock price performance; the market prices of equity securities and the impact on pension income and resultant cash funding requirements for defined benefit pension plans; the securities and credit ratings of PPL Corporation and its subsidiaries; political, regulatory or economic conditions in states, regions or countries where PPL Corporation or its subsidiaries conduct business, including any potential effects of threatened or actual terrorism or war or other hostilities; foreign exchange rates; new state, federal or foreign legislation, including new tax legislation; and the commitments and liabilities of PPL Corporation and its subsidiaries. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation's Form 10-K and other reports on file with the Securities and Exchange Commission.

Enhancing Value Through Active Hedging

	2012	2013
Baseload		
Expected Generation [1] (Million MWhs)	**51.5**	**53.1**
East	43.5	44.8
West	8.0	8.3
Current Hedges (%)	**94-98%**	**79-83%**
East	96-100%	82-86%
West	82-86%	65-69%
Average Hedged Price (Energy Only) ($/MWh) [2] [3]		
East	$54-55	$49-51
West	$50-52	$46-49
Current Coal Hedges (%)	**100%**	**97%**
East	100%	96%
West	100%	100%
Average Hedged Consumed Coal Price (Delivered $/Ton)		
East	$76-79	$80-88
West	$23-28	$23-29
Intermediate/Peaking		
Expected Generation [1] (Million MWhs)	7.6	7.0
Current Hedges (%)	58%	6%

Capacity revenues are expected to be $385 million and $590 million for 2012 and 2013, respectively.

As of March 31, 2012

(1) Represents expected sales of Supply segment based on current business plan assumptions.
(2) The 2012 average hedge energy prices are based on the fixed price swaps as of March 31, 2012; the prior collars have all been converted to fixed swaps.
(3) The 2013 ranges of average energy prices for existing hedges were estimated by determining the impact on the existing collars resulting from 2013 power prices at the 5th and 95th percentile confidence levels.

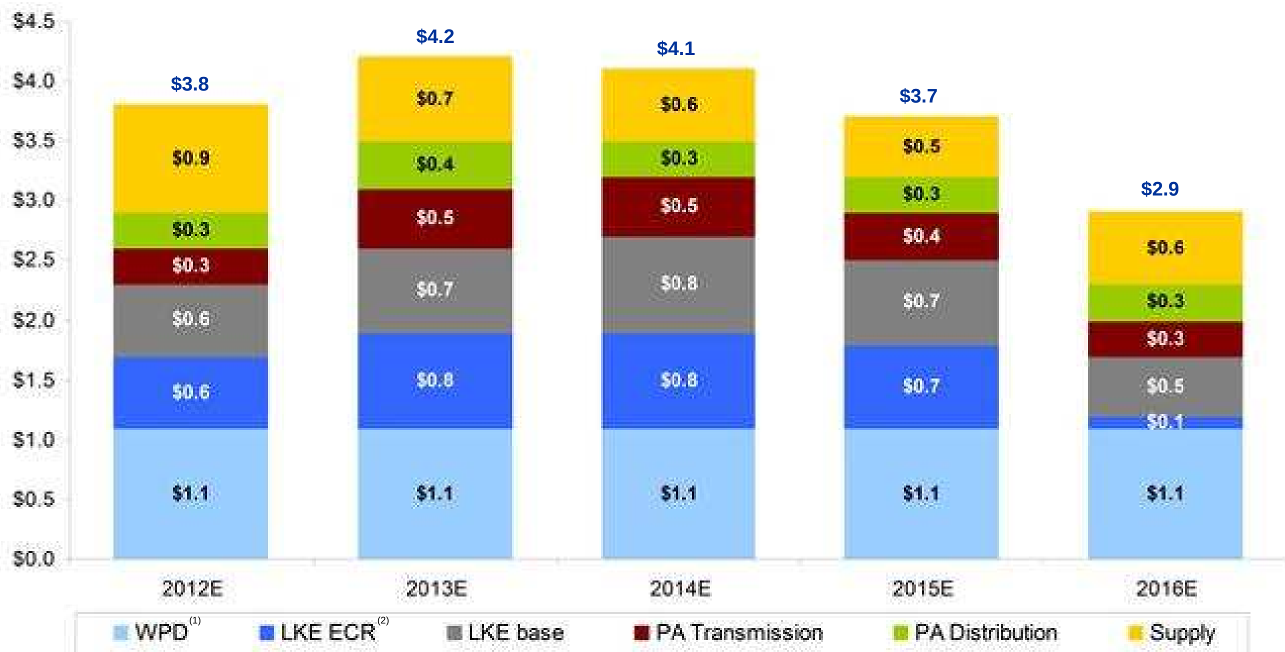
Market Prices

	Balance of 2012	2013
ELECTRIC		
PJM		
On-Peak	$39	$44
Off-Peak	$27	$32
ATC(1)	$32	$37
Mid-Columbia		
On-Peak	$23	$31
Off-Peak	$14	$23
ATC(1)	$19	$27
GAS(2)		
NYMEX	$2.50	$3.47
TZ6NNY	$2.71	$3.76
PJM MARKET		
HEAT RATE(3)	14.2	11.7
CAPACITY PRICES *(Per MWD)*	$123.63	$187.49
EQA	87%	90%

(1) 24-hour average.
(2) NYMEX and TZ6NNY forward gas prices on 3/30/2012.
(3) Market Heat Rate = PJM on-peak power price divided by TZ6NNY gas price.

Capital Expenditures

($ in billions)

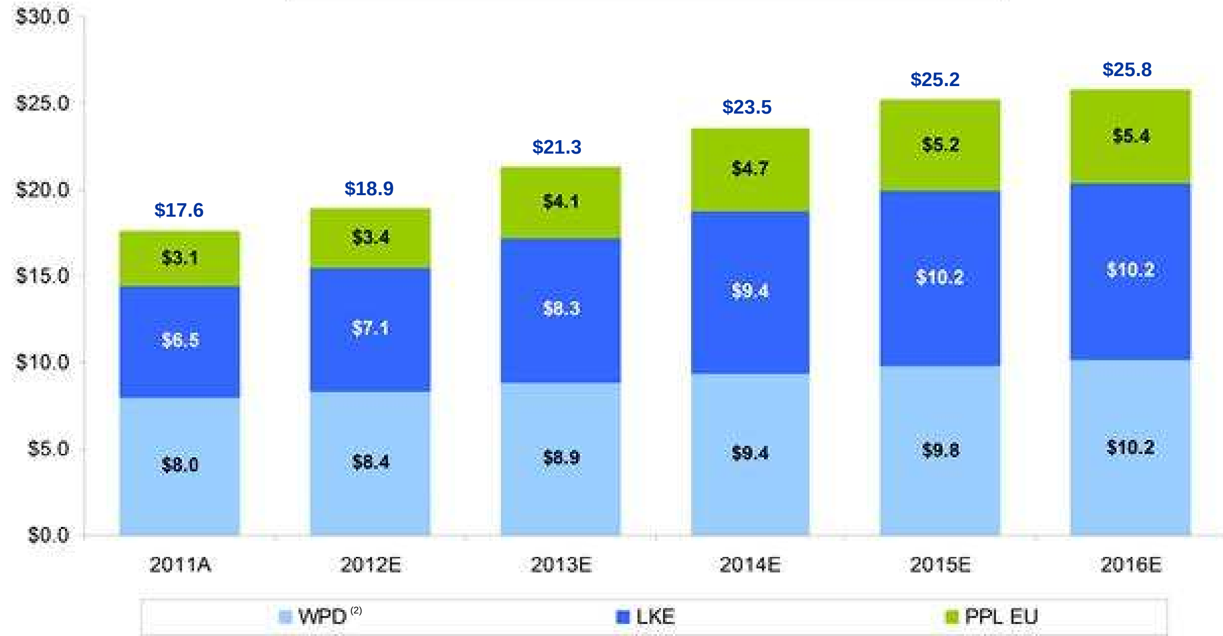


(1) Includes capex for WPD Midlands. Figures based on assumed exchange rate of $1.57 / GBP.
(2) Expect between 80% and 90% to receive timely returns via ECR mechanism based on historical experience and future projections.

Projected Regulated Rate Base Growth

2012E - 2016E Regulatory Asset Base (1) CAGR: 7.9%

($ in billions)



(1) Represents capitalization for LKE, as LG&E and KU rate constructs are based on capitalization. Represents Regulatory Asset Value (RAV) for WPD.
(2) Includes RAV for WPD Midlands. Figures based on assumed exchange rate of $1.57 / GBP and are as of year-end December 31.

Free Cash Flow before Dividends

Forward-Looking Information Statement

Statements contained in this presentation, including statements with respect to future earnings, cash flows, financing, regulation and corporate strategy are "forward-looking statements" within the meaning of the federal securities laws. Although PPL Corporation believes that the expectations and assumptions reflected in these forward-looking statements are reasonable, these statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: market demand and prices for energy, capacity and fuel; weather conditions affecting customer energy usage and operating costs; competition in power markets; the effect of any business or industry restructuring; the profitability and liquidity of PPL Corporation, its subsidiaries and customers; new accounting requirements or new interpretations or applications of existing requirements; operating performance of plants and other facilities; the length of scheduled and unscheduled outages at our generating plants; environmental conditions and requirements and the related costs of compliance, including environmental capital expenditures and emission allowance and other expenses; system conditions and operating costs; development of new projects, markets and technologies; performance of new ventures; asset or business acquisitions and dispositions, and PPL Corporation's ability to realize the expected benefits from acquired businesses, including the 2010 acquisition of Louisville Gas and Electric Company and Kentucky Utilities Company and the 2011 acquisition of the Central Networks electricity distribution businesses in the U.K.; any impact of hurricanes or other severe weather on our business, including any impact on fuel prices; receipt of necessary government permits, approvals, rate relief and regulatory cost recovery; capital market conditions and decisions regarding capital structure; the impact of state, federal or foreign investigations applicable to PPL Corporation and its subsidiaries; the outcome of litigation against PPL Corporation and its subsidiaries; stock price performance; the market prices of equity securities and the impact on pension income and resultant cash funding requirements for defined benefit pension plans; the securities and credit ratings of PPL Corporation and its subsidiaries; political, regulatory or economic conditions in states, regions or countries where PPL Corporation or its subsidiaries conduct business, including any potential effects of threatened or actual terrorism or war or other hostilities; foreign exchange rates; new state, federal or foreign legislation, including new tax legislation; and the commitments and liabilities of PPL Corporation and its subsidiaries. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation's Form 10-K and other reports on file with the Securities and Exchange Commission.

Definitions of Non-GAAP Financial Measures

"Earnings from ongoing operations" should not be considered as an alternative to reported earnings, or net income attributable to PPL, which is an indicator of operating performance determined in accordance with generally accepted accounting principles (GAAP). PPL believes that "earnings from ongoing operations," although a non-GAAP financial measure, is also useful and meaningful to investors because it provides management's view of PPL's fundamental earnings performance as another criterion in making investment decisions. PPL's management also uses "earnings from ongoing operations" in measuring certain corporate performance goals. Other companies may use different measures to present financial performance.

"Earnings from ongoing operations" is adjusted for the impact of special items. Special items include:

- *Adjusted energy-related economic activity (as discussed below).*
- *Foreign currency-related economic hedges.*
- *Gains and losses on sales of assets not in the ordinary course of business.*
- *Impairment charges (including impairments of securities in the company's nuclear decommissioning trust funds).*
- *Workforce reduction and other restructuring impacts.*
- *Acquisition-related adjustments.*
- *Other charges or credits that are, in management's view, not reflective of the company's ongoing operations.*

Adjusted energy-related economic activity includes the changes in fair value of positions used economically to hedge a portion of the economic value of PPL's generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in earnings from ongoing operations over the delivery period of the item that was hedged or upon realization. Management believes that adjusting for such amounts provides a better matching of earnings from ongoing operations to the actual amounts settled for PPL's underlying hedged assets. Please refer to the Notes to the Financial Statements and MD&A in PPL Corporation's periodic filings with the Securities and Exchange Commission for additional information on energy-related economic activity.

Free cash flow before dividends is derived by deducting capital expenditures and other investing activities-net, from cash flow from operations. Free cash flow before dividends should not be considered as an alternative to cash flow from operations, which is determined in accordance with GAAP. PPL believes that free cash flow before dividends, although a non-GAAP measure, is an important measure to both management and investors, as it is an indicator of the company's ability to sustain operations and growth without additional outside financing beyond the requirement to fund maturing debt obligations. Other companies may calculate free cash flow before dividends in a different manner.

Definitions of Non-GAAP Financial Measures

"Kentucky Gross Margins" is a single financial performance measure of the Kentucky Regulated segment's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expense and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. As a result, this measure represents the net revenues from the Kentucky Regulated segment's operations.

"Pennsylvania Gross Delivery Margins" is a single financial performance measure of the Pennsylvania Regulated segment's electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance-" expense, which is primarily Act 129 costs, and in "Taxes, other than income," which is primarily gross receipts tax. These mechanisms allow for recovery of certain expenses; therefore, certain expenses and revenues offset with minimal impact on earnings. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)." As a result, this measure represents the net revenues from the Pennsylvania Regulated segment's electric delivery operations.

"Unregulated Gross Energy Margins" is a single financial performance measure of the Supply segment's competitive energy non-trading and trading activities. In calculating this measure, the Supply segment's energy revenues, which include operating revenues associated with certain Supply segment businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain Supply segment businesses that are classified as discontinued operations. This performance measure is relevant to PPL due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)." PPL excludes from "Unregulated Gross Energy Margins" the Supply segment's energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization.

KPSC Approves New Natural Gas Generation at LG&E and KU
Project Expected to Begin This Year; 250 Construction Jobs Anticipated At Peak

LOUISVILLE, Ky. (May 3, 2012) – The Kentucky Public Service Commission today approved plans for Louisville Gas and Electric Company and Kentucky Utilities Company to build and buy new natural gas generation to meet the energy needs of their customers.

As a result of stricter federal Environmental Protection Agency regulations, several of the utilities' older, coal-fired units — representing more than 13 percent of the utilities' coal fleet — must be retired by 2016.

Today's ruling is a key milestone in the process. Subject to receipt of other permits, LG&E and KU plan to build the 640-megawatt, natural gas combined-cycle (NGCC), generating unit at the existing Cane Run site in southwestern Louisville.

The ruling also moves the utilities a step closer to the purchase of three additional simple-cycle natural gas combustion turbines from Bluegrass Generation Company located in LaGrange. The purchase of the Bluegrass units, which will provide up to 495 megawatts of peak generation supply, is still subject to Federal Energy Regulatory Commission approval.

"With this regulatory approval, we can begin focusing on this significant investment in our system. We worked diligently to develop a least-cost solution to meet the federal regulatory mandates and we're pleased that the KPSC has approved the plan," said Lonnie Bellar, vice president of State Regulation and Rates for LG&E and KU.

The NGCC is expected to cost approximately $583 million and the Bluegrass plant is expected to cost approximately $110 million. Recovery of the additional costs is not part of today's ruling, but will be included in future rate proceedings.

Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed. Construction of the NGCC is expected to begin this year and be complete in 2015. At the peak of the construction phase, approximately 250 jobs are expected to be created.

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com .

Certain statements contained in this news release, including statements with respect to future earnings, cash flow and business conditions, are "forward-looking statements" within the meaning of the federal securities laws. Although PPL Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: market demand and prices for energy, capacity and fuel; competition; accounting requirements; operating performance and costs of plants and other facilities; political, regulatory or economic developments and conditions; disposition proceeds; and regulatory approvals. Any such forward-looking statements should be considered in light of such factors and in conjunction with PPL Corporation's, Louisville Gas and Electric Compan'sy and Kentucky Utilities Company's Form 10-K's and other reports on file with the Securities and Exchange Commission.

Section 8 - Other Events

Item 8.01 Other Events

On December 15, 2011, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU" and, collectively with LG&E, the "Companies") received Kentucky Public Service Commission ("KPSC") approval in their proceedings before the KPSC relating to environmental cost recovery ("ECR") plans. The KPSC order approves the terms of the previously announced Settlement Agreement, dated November 9, 2011, entered into between the Companies and the parties to the current proceedings ("Settlement Agreement"). The KPSC order authorizes the installation of environmental upgrades at certain of the Companies' plants during 2012-2016 representing approximate capital costs of $1.4 billion at LG&E and $896 million at KU.

In connection with the approved projects, the KPSC order allows recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and grants Certificates of Public Convenience and Necessity for their construction. The KPSC order also confirms an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans of the Companies and provides for an authorized return on equity of 10.10% for the approved projects in their 2011 ECR proceedings.

The KPSC order notes KU's consent in the Settlement Agreement to defer requested approval for certain environmental upgrades at its E.W. Brown plant, which represented an estimated $218 million in capital costs. KU retains the right to operate and dispatch the E.W. Brown plant in accordance with applicable environmental standards and the right to request approval of the deferred projects in future regulatory proceedings.

Under the terms of the KPSC order, the Companies will increase funding levels for certain heating assistance programs for low-income customers.

Statements in this report and the accompanying press release, including statements with respect to future events and their timing, including the proposed transactions contemplated in the Companies' regulatory filing, such as the new environmental facilities construction, the eventual operation of such facilities, the actual capital costs and operating expenses associated therewith and the rate recovery or returns on equity ultimately achieved, as well as other statements as to future costs or expenses, regulation, corporate strategy and performance, are "forward-looking statements" within the meaning of the federal securities laws. Although the Companies believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these expectations, assumptions and statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements:, receipt of any remaining necessary government permits, approvals, subsequent phases of rate relief and regulatory cost recovery; market demand and prices for electricity; political, regulatory or economic conditions in states, regions or countries where the Companies conduct business; and new state, federal or foreign legislation, including new tax or environmental legislation or regulation. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation's Form 10-K, each Company's respective Form S-4 registration statement and other reports on file with the Securities and Exchange Commission.

KPSC Approves LG&E and KU ECR Settlement Agreement
$2.3 Billion in Upgrades Expected to Meet Stricter EPA Regulations

(LOUISVILLE, Ky.) – The Kentucky Public Service Commission today approved the unanimous settlement agreement in the environmental cost recovery case for Louisville Gas and Electric Company and Kentucky Utilities Company.

As approved by the KPSC, LG&E will invest $1.4 billion and KU will invest $896 million for a total of $2.3 billion in environmental upgrades to meet new, stricter Environmental Protection Agency regulations. As filed in the original application, LG&E will modernize the flue gas desulfurization systems, better known as scrubbers, at the Mill Creek generating station as well as install fabric-filter baghouse systems for increased particulate and mercury control on all units at Mill Creek and for Unit 1 at the Trimble County generating station. KU will install the same type of fabric-filter baghouse systems for increased particulate and mercury control on all units at the Ghent generating station and on unit 3 at the Brown generating station. Brown will also be converting its current coal ash pond to a dry storage landfill.

As part of the settlement agreement, units 1 and 2 at the Brown plant will continue to operate as they have been. The installation of the fabric filter baghouse system for particulate emission reductions on the Brown units 1 and 2 will be deferred two years until the EPA provides a clearer understanding of the requirements of the new National Ambient Air Standard rule for ozone that is due to be released in late 2012.

As part of the agreement, the companies also will provide an additional $500,000 in shareholder funds to the LG&E and KU Home Energy Assistance programs -- $250,000 in 2011 and the remaining $250,000 in 2012. The current HEA program will increase the current per meter charge from 15 to 16 cents.

“We are glad to have the commission’s approval on our environmental improvement plans. The parties to the case worked hard to reach the unanimous settlement agreement and, now, we can focus on the large scale projects we have ahead of us,” said Lonnie Bellar, vice president of state rates and regulatory.

(more)

The companies will continue to earn the existing 10.63 percent return on equity for projects remaining from earlier ECR plans and will earn 10.10 percent return on equity on projects in the 2011 ECR applications.

In addition to LG&E and KU, the settling parties were the Kentucky Attorney General, the Community Action Council, Kentucky Industrial Utility Customers, the Kroger Company, Lexington-Fayette Urban County Government, Metro Housing, the Sierra Club/National Resource Defense Council and the U.S. Department of Defense.

###

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com .

Section 1 – Registrants' Business and Operations

Item 1.01 Entry into a Material Definitive Agreement

On November 9, 2011, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU" and, collectively with LG&E, the "Companies") entered into a settlement agreement ("Settlement Agreement") with the intervenors in their proceedings ("Proceedings") commenced in June 2011 before the Kentucky Public Service Commission ("KPSC") relating to environmental cost recovery ("ECR") plans. The original applications sought approval to install environmental upgrades at certain of the Companies' plants during 2012-2016, including recovery through the ECR rates mechanism of approximate capital costs of $1.4 billion at LG&E and $1.1 billion at KU, plus operating expenses.

The Settlement Agreement provides that the parties will favorably recommend to the KPSC for approval, or not oppose, approximately $2.25 billion of the Companies' $2.5 billion in capital projects for which approval was originally requested, constituting approximately $1.4 billion and $850 million at LG&E and KU, respectively. Under the Settlement Agreement, the $250 million in remaining capital costs are deferred and may be the subject of future regulatory proceedings for approval to construct the deferred projects and recover the associated costs through the ECR rate mechanism. The deferred projects relate to certain proposed environmental upgrades at KU's E.W. Brown plant, for which plant KU retains the right to operate and dispatch in accordance with applicable environmental standards. The Settlement Agreement confirms an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans of the Companies and provides for an authorized return on equity of 10.10% for projects in their 2011 ECR applications.

The Settlement Agreement also contains other provisions whereby the Companies will increase funding levels for certain heating assistance programs for low-income customers.

The settling parties have agreed to recommend, or in some cases to not challenge, the approval by the KPSC of the adjusted ECR applications. The Settlement Agreement remains subject to approval by the KPSC. An order with respect to the Proceedings is anticipated from the KPSC in December 2011.

AMENDMENT NO. 1 TO CREDIT AGREEMENT

AMENDMENT dated as of October 19, 2011 (this " **Amendment** ") to the Revolving Credit Agreement dated as of October 19, 2010 (as amended, amended and restated or otherwise modified from time to time, the " **Credit Agreement** ") among PPL ENERGY SUPPLY, LLC (the " **Borrower** "), the LENDERS party thereto (the " **Lenders** ") and WELLS FARGO BANK, NATIONAL ASSOCIATION, as Administrative Agent, Issuing Lender and Swingline Lender (the " **Agent** ").

W I T N E S S E T H :

WHEREAS, the parties hereto desire to amend the Credit Agreement to (i) extend the scheduled Termination Date from December 31, 2014 to October 19, 2016, (ii) modify the definition of "Applicable Percentage" and (iii) make certain other amendments as provided herein.

NOW, THEREFORE, the parties hereto agree as follows:

SECTION 1 . *Defined Terms; References* . Unless otherwise specifically defined herein, each term used herein that is defined in the Credit Agreement has the meaning assigned to such term in the Credit Agreement. Each reference to "hereof", "hereunder", "herein" and "hereby" and each other similar reference and each reference to "this Agreement" and each other similar reference contained in the Credit Agreement shall, after this Amendment becomes effective, refer to the Credit Agreement as amended hereby.

SECTION 2 . *Extension of Termination Date.* The definition of "Termination Date" in Section 1.01 of the Credit Agreement is amended by changing the date specified therein from "December 31, 2014" to "October 19, 2016."

SECTION 3 . *Reduction of Interest Rates.* The chart set forth in the definition of "Applicable Percentage" in Section 1.01 of the Credit Agreement (the " **Existing Pricing Schedule** ") is deleted and replaced by the chart set forth below (the " **New Pricing Schedule** "). The New Pricing Schedule shall apply to interest and fees accruing under the Credit Agreement on and after the date hereof. The Existing Pricing Schedule shall continue to apply to interest and fees accruing under the Credit Agreement prior to the date hereof.

	Borrower's Ratings (S&P /Moody's)	Applicable Percentage for Commitment Fees	Applicable Percentage for Base Rate Loans	Applicable Percentage for Euro-Dollar Loans and Letter of Credit Fees
Category A	> A from S&P / A2 from Moody's	0.100%	0.000%	1.000%
Category B	> A- from S&P / A3 from Moody's	0.125%	0.125%	1.125%
Category C	BBB+ from S&P / Baa1 from Moody's	0.175%	0.250%	1.250%
Category D	BBB from S&P / Baa2 from Moody's	0.200%	0.500%	1.500%
Category E	BBB- from S&P / Baa3 from Moody's	0.250%	0.625%	1.625%
Category F	≤BB+ from S&P / Ba1 from Moody's	0.350%	0.875%	1.875%

SECTION 4 . *Administrative Agent's Fees.* Section 8.10 of the Credit Agreement is hereby amended to read in its entirety:

> "The Borrower shall pay to the Administrative Agent for its own account fees in the amount and at the times agreed to and accepted by the Borrower, pursuant to that certain fee letter dated as of September 20, 2011 among the Borrower, the Administrative Agent, Bank of America, N.A., The Royal Bank of Scotland plc, Wells Fargo Securities, Merrill Lynch, Pierce, Fenner & Smith Incorporated and RBS Securities Inc."

SECTION 5 . *Changes in Commitments.* W ith effect from and including the Amendment Effective Date, (i) each Person listed on Schedule 1 hereto that is not a party to the Credit Agreement (each, a " **New Lender** " and, together with each Lender that is not an Exiting Lender, the " **Continuing Lenders** ") shall become a Lender party to the Credit Agreement, (ii) the Commitment of each Lender shall be the amount set forth opposite the name of such Lender on Schedule 1 and (iii) the Commitment Appendix set forth on Schedule 1 hereto shall replace the Commitment Appendix attached to the Credit Agreement. On the Amendment Effective Date, any Lender whose Commitment is changed to zero (each, an " **Exiting Lender** ") shall cease to be a Lender party to the Credit Agreement, and all accrued fees and other amounts payable under the Credit Agreement for the account of each Exiting Lender shall be due and payable on such date; provided that the provisions of Sections 2.12, 2.16, 2.17 and 9.03 of the Credit Agreement shall continue to inure to the benefit of each Exiting Lender after the Amendment

Effective Date. On the Amendment Effective Date, the Commitment Ratio of the Continuing Lenders shall be redetermined giving effect to the adjustments to the Commitments referred to in this Section 5, and the participations of the Continuing lenders in and the obligations of the Continuing Lenders in respect of any Letters of Credit outstanding on the Amendment Effective Date shall be reallocated to reflect such redetermined Commitment Ratio.

SECTION 6 . *Representations and Warranties.* The following sections of Article V of the Credit Agreement are amended as follows:

(a) The references to "December 31, 2009" in Section 5.04(a) and Section 5.04(c) of the Credit Agreement are changed to "December 31, 2010" and Section 5.04(b) of the Credit Agreement is hereby amended to read in its entirety:

> "The unaudited consolidated balance sheet of the Borrower and its Consolidated Subsidiaries as of June 30, 2011 and the related unaudited consolidated statements of income and cash flows for the six months then ended fairly present, in conformity with GAAP applied on a basis consistent with the financial statements referred to in subsection (a) of this Section, the consolidated financial position of the Borrower and its Consolidated Subsidiaries as of such date and their consolidated results of operations and cash flows for such six-month period (subject to normal year-end audit adjustments)."

(b) Each reference to "Escrow Closing Date" in Section 5.11 of the Credit Agreement shall be deemed to be a reference to the "Amendment Effective Date," and Schedule 5.11 of the Credit Agreement is deleted and replaced by the new Schedule 5.11 set forth below.

Restricted Subsidiaries [1]

Restricted Subsidiary	**Jurisdiction of Organization**
PPL Generation, LLC	Delaware
PPL Montana Holdings, LLC	Delaware
PPL Montana, LLC	Delaware
PPL Martins Creek, LLC	Delaware
PPL Brunner Island, LLC	Delaware
PPL Montour, LLC	Delaware
PPL Susquehanna, LLC	Delaware

[1] As of October 19, 2011

PPL Holtwood, LLC	Delaware
PPL EnergyPlus, LLC	Pennsylvania
PPL Investment Corporation	Delaware

SECTION 7 . *Letter of Credit Fees.* Section 2.07(b) of the Credit Agreement is amended by changing the rate specified therein from "0.25%" to "0.20%."

SECTION 8 . *Full Force and Effect; Ratification* . Except as expressly modified herein, all of the terms and conditions of the Credit Agreement are unchanged, and, as modified hereby, the Borrower confirms and ratifies all of the terms, covenants and conditions of the Credit Agreement. This Amendment constitutes the entire and final agreement among the parties hereto with respect to the subject matter hereof and there are no other agreements, understandings, undertakings, representations or warranties among the parties hereto with respect to the subject matter hereof except as set forth herein.

SECTION 9 . *Governing Law* . This Amendment shall be governed by and construed in accordance with the laws of the State of New York.

SECTION 10 . *Counterparts* . This Amendment may be signed in any number of counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

SECTION 11 . *Effectiveness* . This Amendment shall become effective as of the first date when (i) the Agent shall have received, for the account of each Lender, repayment of all outstanding Loans in full together with interest thereon and all accrued but unpaid fees thereunder, including under Section 2.12 of the Credit Agreement, for the period up to but excluding the Amendment Effective Date (it being understood that the principal amount so repaid may, at the Borrower's request and subject to the conditions set forth herein and in the Credit Agreement, be reborrowed on the Amendment Effective Date in accordance with the Commitments in effect at such time giving effect to the adjustments in Section 5 above) and (ii) each of the following conditions are met (the " **Amendment Effective Date** "):

(a) the Agent shall have received from the Borrower, each Exiting Lender and each Continuing Lender a counterpart hereof signed by such party or facsimile or other written confirmation (in form satisfactory to the Agent) that such party has signed a counterpart hereof;

(b) the Agent shall have received a duly executed revised Note for the account of each Lender requesting delivery of such Note pursuant to Section 2.05 of the Credit Agreement;

(c) the Agent shall have received satisfactory opinions of counsel for the Borrower, dated the Amendment Effective Date;

(d) the Agent shall have received a certificate dated the Amendment Effective Date signed on behalf of the Borrower by the Chairman of the Board, the President, any Vice President, the Treasurer or the Assistant Treasurer of the Borrower stating that (A) on the Amendment Effective Date and after giving effect to this Amendment, no Default shall have occurred and be continuing and (B) the representations and warranties of the Borrower contained in the Credit Agreement after giving effect to this Amendment are true and correct on and as of the Amendment Effective Date, except to the extent that such representations and warranties specifically refer to an earlier date, in which case they were true and correct as of such earlier date and except for the representations in Section 5.16 of the Credit Agreement, which were true and correct as of the Effective Date;

(e) the Agent shall have received (i) a certificate of the Secretary of State of the State of Delaware, dated as of a recent date, as to the good standing of the Borrower and (ii) a certificate of the Secretary or an Assistant Secretary of the Borrower dated the Amendment Effective Date and certifying (A) that attached thereto is a true, correct and complete copy of (x) the Borrower's certificate of formation certified by the Secretary of State of the State of Delaware and (y) the limited liability company agreement of the Borrower, (B) as to the absence of dissolution or liquidation proceedings by or against the Borrower, (C) that attached thereto is a true, correct and complete copy of resolutions adopted by the managers of the Borrower authorizing the execution, delivery and performance of this Amendment and each other document delivered in connection herewith and that such resolutions have not been amended and are in full force and effect on the date of such certificate and (D) as to the incumbency and specimen signatures of each officer of the Borrower executing this Amendment or any other document delivered in connection herewith;

(f) all necessary governmental (domestic or foreign), regulatory and third party approvals, if any, in connection with the transactions contemplated by this Amendment and the other Loan Documents shall have been obtained and remain in full force and effect, in each case without any action being taken by any competent authority which could restrain or prevent such transaction or impose, in the reasonable judgment of the Agent, materially adverse conditions upon the consummation of such transactions; provided that any such approvals with respect to elections by the Borrower to increase the Commitment as contemplated by Section 2.19 of the Credit Agreement need not be obtained or provided until the Borrower makes any such election; and

(g) the Agent shall have received all costs, fees and expenses due to the Agent, the Joint Lead Arrangers (as such term is defined in the Commitment Letter) and the Lenders.

SECTION 12. *Miscellaneous*. This Amendment shall constitute a Loan Document for all purposes of the Credit Agreement and the other Loan Documents. The provisions of this Amendment are deemed incorporated into the Credit Agreement as if fully set forth therein. The Borrower shall pay all reasonable out-of-pocket costs and expenses of the Agent incurred in connection with the negotiation, preparation and execution of this Amendment and the transactions contemplated hereby.

AMENDMENT NO. 1 TO CREDIT AGREEMENT

AMENDMENT dated as of October 19, 2011 (this " **Amendment** ") to the Revolving Credit Agreement dated as of December 31, 2010 (as amended, amended and restated or otherwise modified from time to time, the " **Credit Agreement** ") among PPL ELECTRIC UTILITIES CORPORATION (the " **Borrower** "), the LENDERS party thereto (the " **Lenders** ") and WELLS FARGO BANK, NATIONAL ASSOCIATION, as Administrative Agent, Issuing Lender and Swingline Lender (the " **Agent** ").

W I T N E S S E T H :

WHEREAS, the parties hereto desire to amend the Credit Agreement to (i) extend the scheduled Termination Date from December 31, 2014 to October 19, 2016, (ii) modify the definition of "Applicable Percentage" and (iii) make certain other amendments as provided herein.

NOW, THEREFORE, the parties hereto agree as follows:

SECTION 1 . *Defined Terms; References* . Unless otherwise specifically defined herein, each term used herein that is defined in the Credit Agreement has the meaning assigned to such term in the Credit Agreement. Each reference to "hereof", "hereunder", "herein" and "hereby" and each other similar reference and each reference to "this Agreement" and each other similar reference contained in the Credit Agreement shall, after this Amendment becomes effective, refer to the Credit Agreement as amended hereby.

SECTION 2 . *Extension of Termination Date.* The definition of "Termination Date" in Section 1.01 of the Credit Agreement is amended by changing the date specified therein from "December 31, 2014" to "October 19, 2016."

SECTION 3 . *Reduction of Interest Rates.* The chart set forth in the definition of "Applicable Percentage" in Section 1.01 of the Credit Agreement (the " **Existing Pricing Schedule** ") is deleted and replaced by the chart set forth below (the " **New Pricing Schedule** "). The New Pricing Schedule shall apply to interest and fees accruing under the Credit Agreement on and after the date hereof. The Existing Pricing Schedule shall continue to apply to interest and fees accruing under the Credit Agreement prior to the date hereof.

	Borrower's Ratings (S&P /Moody's)	Applicable Percentage for Commitment Fees	Applicable Percentage for Base Rate Loans	Applicable Percentage for Euro-Dollar Loans and Letter of Credit Fees
Category A	≥ A from S&P / A2 from Moody's	0.100%	0.000%	1.000%
Category B	≥ A- from S&P / A3 from Moody's	0.125%	0.125%	1.125%
Category C	BBB+ from S&P / Baa1 from Moody's	0.175%	0.250%	1.250%
Category D	BBB from S&P / Baa2 from Moody's	0.200%	0.500%	1.500%
Category E	BBB- from S&P / Baa3 from Moody's	0.250%	0.625%	1.625%
Category F	≤BB+ from S&P / Ba1 from Moody's	0.350%	0.875%	1.875%

SECTION 4 . *Administrative Agent's Fees.* Section 8.10 of the Credit Agreement is hereby amended to read in its entirety:

"The Borrower shall pay to the Administrative Agent for its own account fees in the amount and at the times agreed to and accepted by the Borrower, pursuant to that certain fee letter dated as of September 20, 2011 among the Borrower, the Administrative Agent, Bank of America, N.A., The Royal Bank of Scotland plc, Wells Fargo Securities, Merrill Lynch, Pierce, Fenner & Smith Incorporated and RBS Securities Inc."

SECTION 5 . *Changes in Commitments.* W ith effect from and including the Amendment Effective Date, (i) each Person listed on Schedule 1 hereto that is not a party to the Credit Agreement (each, a " **New Lender** " and, together with each Lender that is not an Exiting Lender, the " **Continuing Lenders** ") shall become a Lender party to the Credit Agreement, (ii) the Commitment of each Lender shall be the amount set forth opposite the name of such Lender on Schedule 1 and (iii) the Commitment Appendix set forth on Schedule 1 hereto shall replace the Commitment Appendix attached to the Credit Agreement. On the Amendment Effective Date, any Lender whose Commitment is changed to zero (each, an " **Exiting Lender** ") shall cease to be a Lender party to the Credit Agreement, and all accrued fees and other amounts payable under the Credit Agreement for the account of each Exiting Lender shall be due and payable on such date; provided that the provisions of Sections 2.12, 2.16, 2.17 and 9.03 of the Credit Agreement shall continue to inure to the benefit of each Exiting Lender after the Amendment Effective Date. On the Amendment Effective Date, the Commitment Ratio of the Continuing Lenders shall be redetermined giving effect to the adjustments to the Commitments referred to in this Section 5, and the participations of the Continuing lenders in and the obligations of the Continuing Lenders in respect of any Letters of Credit outstanding on the Amendment Effective Date shall be reallocated to reflect such redetermined Commitment Ratio.

SECTION 6 . *Letter of Credit Fees.* Section 2.07(b) of the Credit Agreement is amended by changing the rate specified therein from "0.25%" to "0.20%."

SECTION 7 . *Representations and Warranties.* The following sections of Article V of the Credit Agreement are amended as follows:

(a) The references to "December 31, 2009" in Section 5.04(a) and Section 5.04(c) of the Credit Agreement are changed to "December 31, 2010" and Section 5.04(b) of the Credit Agreement is hereby amended to read in its entirety:

> "The unaudited consolidated balance sheet of the Borrower and its Consolidated Subsidiaries as of June 30, 2011 and the related unaudited consolidated statements of income and cash flows for the six months then ended fairly present, in conformity with GAAP applied on a basis consistent with the financial statements referred to in subsection (a) of this Section, the consolidated financial position of the Borrower and its Consolidated Subsidiaries as of such date and their consolidated results of operations and cash flows for such six-month period (subject to normal year-end audit adjustments)."

(b) References in Section 5.08 of the Credit Agreement to the PUC Order shall be deemed to include any orders of the Pennsylvania Public Utility Commission (" **PUC** ") delivered pursuant to Section 11(f) of this Amendment.

SECTION 8 . *Full Force and Effect; Ratification* . Except as expressly modified herein, all of the terms and conditions of the Credit Agreement are unchanged, and, as modified hereby, the Borrower confirms and ratifies all of the terms, covenants and conditions of the Credit Agreement. This Amendment constitutes the entire and final agreement among the parties hereto with respect to the subject matter hereof and there are no other agreements, understandings, undertakings, representations or warranties among the parties hereto with respect to the subject matter hereof except as set forth herein.

SECTION 9 . *Governing Law* . This Amendment shall be governed by and construed in accordance with the laws of the State of New York.

SECTION 10 . *Counterparts* . This Amendment may be signed in any number of counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

SECTION 11 . *Effectiveness* . This Amendment shall become effective as of the first date when each of the following conditions are met (the " **Amendment Effective Date** "):

(a) the Agent shall have received from the Borrower and each Continuing Lender and Lenders constituting Required Lenders a counterpart hereof signed by such party or facsimile or other written confirmation (in form satisfactory to the Agent) that such party has signed a counterpart hereof;

(b) the Agent shall have received a duly executed revised Note for the account of each Lender requesting delivery of such Note pursuant to Section 2.05 of the Credit Agreement;

(c) the Agent shall have received satisfactory opinions of counsel for the Borrower, dated the Amendment Effective Date;

(d) the Agent shall have received a certificate dated the Amendment Effective Date signed on behalf of the Borrower by the Chairman of the Board, the President, any Vice President, the Treasurer or the Assistant Treasurer of the Borrower stating that (A) on the Amendment Effective Date and after giving effect to this Amendment, no Default shall have occurred and be continuing and (B) the representations and warranties of the Borrower contained in the Credit Agreement after giving effect to this Amendment are true and correct on and as of the Amendment Effective Date, except to the extent that such representations and warranties specifically refer to an earlier date, in which case they were true and correct as of such earlier date;

(e) the Agent shall have received (i) a certificate of the Secretary of State of the Commonwealth of Pennsylvania, dated as of a recent date, as to the good standing of the Borrower and (ii) a certificate of the Secretary or an Assistant Secretary of the Borrower dated the Amendment Effective Date and certifying (A) that attached thereto is a true, correct and complete copy of (x) the Borrower's articles of incorporation certified by the Secretary of State of the Commonwealth of Pennsylvania and (y) the bylaws of the Borrower, (B) as to the absence of dissolution or liquidation proceedings by or against the Borrower, (C) that attached thereto is a true, correct and complete copy of resolutions adopted by the board of directors of the Borrower authorizing the execution, delivery and performance of this Amendment and each other document delivered in connection herewith and that such resolutions have not been amended and are in full force and effect on the date of such certificate and (D) as to the incumbency and specimen signatures of each officer of the Borrower executing this Amendment or any other document delivered in connection herewith;

(f) all necessary governmental (domestic or foreign), regulatory and third party approvals, including, without limitation, the order of the PUC and any required approvals of the Federal Energy Regulatory Commission, authorizing borrowings hereunder in connection with the transactions contemplated by this Amendment and the other Loan Documents shall have been obtained and remain in full force and effect, in each case without any action being taken by any competent authority which could restrain or prevent such transaction or impose, in the reasonable judgment of the Agent, materially adverse conditions upon the consummation of such transactions; provided that any such approvals with respect to elections by the Borrower to increase the Commitment as contemplated by Section 2.19 of the Credit Agreement need not be obtained or provided until the Borrower makes any such election;

(g) there shall be no outstanding Loans; and

(h) the Agent shall have received all costs, fees and expenses due to the Agent, the Joint Lead Arrangers (as such term is defined in the Commitment Letter) and the Lenders.

SECTION 12 . *Miscellaneous* . This Amendment shall constitute a Loan Document for all purposes of the Credit Agreement and the other Loan Documents. The provisions of this Amendment are deemed incorporated into the Credit Agreement as if fully set forth therein. The Borrower shall pay all reasonable out-of-pocket costs and expenses of the Agent incurred in connection with the negotiation, preparation and execution of this Amendment and the transactions contemplated hereby.

AMENDMENT NO. 2 TO CREDIT AGREEMENT

AMENDMENT dated as of October 19, 2011 (this " **Amendment** ") to the Revolving Credit Agreement dated as of November 1, 2010 (as amended, amended and restated or otherwise modified from time to time, the " **Credit Agreement** ") among LOUISVILLE GAS AND ELECTRIC COMPANY (the " **Borrower** "), the LENDERS party thereto (the " **Lenders** ") and WELLS FARGO BANK, NATIONAL ASSOCIATION, as Administrative Agent, Issuing Lender and Swingline Lender (the " **Agent** ").

W I T N E S S E T H :

WHEREAS, the parties hereto desire to amend the Credit Agreement to (i) extend the scheduled Termination Date from December 31, 2014 to October 19, 2016, (ii) modify the definition of "Applicable Percentage" and (iii) make certain other amendments as provided herein.

NOW, THEREFORE, the parties hereto agree as follows:

SECTION 1 . *Defined Terms; References* . Unless otherwise specifically defined herein, each term used herein that is defined in the Credit Agreement has the meaning assigned to such term in the Credit Agreement. Each reference to "hereof", "hereunder", "herein" and "hereby" and each other similar reference and each reference to "this Agreement" and each other similar reference contained in the Credit Agreement shall, after this Amendment becomes effective, refer to the Credit Agreement as amended hereby.

SECTION 2 . *Extension of Termination Date.* The definition of "Termination Date" in Section 1.01 of the Credit Agreement is amended by changing the date specified therein from "December 31, 2014" to "October 19, 2016."

SECTION 3 . *Reduction of Interest Rates.* The chart set forth in the definition of "Applicable Percentage" in Section 1.01 of the Credit Agreement (the " **Existing Pricing Schedule** ") is deleted and replaced by the chart set forth below (the " **New Pricing Schedule** "). The New Pricing Schedule shall apply to interest and fees accruing under the Credit Agreement on and after the date hereof. The Existing Pricing Schedule shall continue to apply to interest and fees accruing under the Credit Agreement prior to the date hereof.

	Borrower's Ratings (S&P /Moody's)	Applicable Percentage for Commitment Fees	Applicable Percentage for Base Rate Loans	Applicable Percentage for Euro-Dollar Loans and Letter of Credit Fees
Category A	≥ A from S&P / A2 from Moody's	0.100%	0.000%	1.000%
Category B	≥ A- from S&P / A3 from Moody's	0.125%	0.125%	1.125%
Category C	BBB+ from S&P / Baa1 from Moody's	0.175%	0.250%	1.250%
Category D	BBB from S&P / Baa2 from Moody's	0.200%	0.500%	1.500%
Category E	BBB- from S&P / Baa3 from Moody's	0.250%	0.625%	1.625%
Category F	≤BB+ from S&P / Ba1 from Moody's	0.350%	0.875%	1.875%

SECTION 4 . *Administrative Agent's Fees.* Section 8.10 of the Credit Agreement is hereby amended to read in its entirety:

"The Borrower shall pay to the Administrative Agent for its own account fees in the amount and at the times agreed to and accepted by the Borrower, pursuant to that certain fee letter dated as of September 20, 2011 among the Borrower, the Administrative Agent, Bank of America, N.A., The Royal Bank of Scotland plc, Wells Fargo Securities, Merrill Lynch, Pierce, Fenner & Smith Incorporated and RBS Securities Inc."

SECTION 5 . *Changes in Commitments.* W ith effect from and including the Amendment Effective Date, (i) each Person listed on Schedule 1 hereto that is not a party to the Credit Agreement (each, a " **New Lender** " and, together with each Lender that is not an Exiting Lender, the " **Continuing Lenders** ") shall become a Lender party to the Credit Agreement, (ii) the Commitment of each Lender shall be the amount set forth opposite the name of such Lender on Schedule 1 and (iii) the Commitment Appendix set forth on Schedule 1 hereto shall replace the Commitment Appendix attached to the Credit Agreement. On the Amendment Effective Date, any Lender whose Commitment is changed to zero (each, an " **Exiting Lender** ") shall cease to be a Lender party to the Credit Agreement, and all accrued fees and other amounts payable under the Credit Agreement for the account of each Exiting Lender shall be due and payable on such date; provided that the provisions of Sections 2.12, 2.16, 2.17 and 9.03 of the Credit Agreement shall continue to inure to the benefit of each Exiting Lender after the Amendment Effective Date. On the Amendment Effective Date, the Commitment Ratio of the Continuing Lenders shall be redetermined giving effect to the adjustments to the

Commitments referred to in this Section 5, and the participations of the Continuing lenders in and the obligations of the Continuing Lenders in respect of any Letters of Credit outstanding on the Amendment Effective Date shall be reallocated to reflect such redetermined Commitment Ratio.

SECTION 6. *Letter of Credit Fees.* Section 2.07(b) of the Credit Agreement is amended by changing the rate specified therein from “0.25%” to “0.20%.”

SECTION 7. *Representations and Warranties.* The following sections of Article V of the Credit Agreement are amended as follows:

(a) The references to “December 31, 2009” in Section 5.04(a) and Section 5.04(c) of the Credit Agreement are changed to “December 31, 2010” and Section 5.04(b) of the Credit Agreement is hereby amended to read in its entirety:

> “The unaudited consolidated balance sheet of the Borrower and its Consolidated Subsidiaries as of June 30, 2011 and the related unaudited consolidated statements of income and cash flows for the six months then ended fairly present, in conformity with GAAP applied on a basis consistent with the financial statements referred to in subsection (a) of this Section, the consolidated financial position of the Borrower and its Consolidated Subsidiaries as of such date and their consolidated results of operations and cash flows for such six-month period (subject to normal year-end audit adjustments).”

(b) Section 5.05 of the Credit Agreement is hereby amended to add the following clause immediately prior to the clause “or otherwise furnished in writing to the Administrative Agent and each Lender,”:

> “or in any subsequent report of the Borrower filed with the SEC on Form 10-K, 10-Q or 8-K,”

(c) References in Section 5.08 of the Credit Agreement to the KPSC Order shall be deemed to include any orders of the Kentucky Public Service Commission (“ **KPSC** ”) delivered pursuant to Section 11(f) of this Amendment.

(d) Section 5.13(a)(i) and Section 5.13(b) of the Credit Agreement are each hereby amended to add the following clause immediately prior to the clause “or otherwise furnished in writing to the Administrative Agent and each Lender,”:

> “or in any subsequent report of the Borrower filed with the SEC on Form 10-K, 10-Q or 8-K,”

(e) Section 5.15 of the Credit Agreement is hereby deleted.

SECTION 8 . *Full Force and Effect; Ratification* . Except as expressly modified herein, all of the terms and conditions of the Credit Agreement are unchanged, and, as modified hereby, the Borrower confirms and ratifies all of the terms, covenants and conditions of the Credit Agreement. This Amendment constitutes the entire and final agreement among the parties hereto with respect to the subject matter hereof and there are no other agreements, understandings, undertakings, representations or warranties among the parties hereto with respect to the subject matter hereof except as set forth herein.

SECTION 9 . *Governing Law* . This Amendment shall be governed by and construed in accordance with the laws of the State of New York.

SECTION 10 . *Counterparts* . This Amendment may be signed in any number of counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

SECTION 11 . *Effectiveness* . This Amendment shall become effective as of the first date when each of the following conditions are met (the " **Amendment Effective Date** "):

(a) the Agent shall have received from the Borrower and each Continuing Lender and Lenders constituting Required Lenders a counterpart hereof signed by such party or facsimile or other written confirmation (in form satisfactory to the Agent) that such party has signed a counterpart hereof;

(b) the Agent shall have received a duly executed revised Note for the account of each Lender requesting delivery of such Note pursuant to Section 2.05 of the Credit Agreement;

(c) the Agent shall have received satisfactory opinions of counsel for the Borrower, dated the Amendment Effective Date;

(d) the Agent shall have received a certificate dated the Amendment Effective Date signed on behalf of the Borrower by the Chairman of the Board, the President, any Vice President, the Treasurer or the Assistant Treasurer of the Borrower stating that (A) on the Amendment Effective Date and after giving effect to this Amendment, no Default shall have occurred and be continuing and (B) the representations and warranties of the Borrower contained in the Credit Agreement after giving effect to this Amendment are true and correct on and as of the Amendment Effective Date, except to the extent that such representations and warranties specifically refer to an earlier date, in which case they were true and correct as of such earlier date;

(e) the Agent shall have received (i) a certificate of the Secretary of State of the Commonwealth of Kentucky, dated as of a recent date, as to the good standing of the Borrower and (ii) a certificate of the Secretary or an Assistant Secretary of the Borrower dated the Amendment Effective Date and certifying (A) that attached thereto is a true, correct and complete copy of (x) the Borrower's articles of incorporation certified by the Secretary of State of the Commonwealth of Kentucky and (y) the bylaws of the Borrower, (B) as to the absence of dissolution or liquidation proceedings by or against the Borrower, (C) that attached thereto is a true, correct and complete copy of resolutions adopted by the board of directors of the Borrower authorizing the execution, delivery and performance of this Amendment and each other document delivered in connection herewith and that such resolutions have not been amended and are in full force and effect on the date of such certificate and (D) as to the incumbency and specimen signatures of each officer of the Borrower executing this Amendment or any other document delivered in connection herewith;

(f) all necessary governmental (domestic or foreign), regulatory· and third party approvals, including, without limitation, the order of the KPSC and any required approvals of the Federal Energy Regulatory Commission, authorizing borrowings hereunder in connection with the transactions contemplated by this Amendment and the other Loan Documents shall have been obtained and remain in full force and effect, in each case without any action being taken by any competent authority which could restrain or prevent such transaction or impose, in the reasonable judgment of the Agent, materially adverse conditions upon the consummation of such transactions; provided that any such approvals with respect to elections by the Borrower to increase the Commitment as contemplated by Section 2.19 of the Credit Agreement need not be obtained or provided until the Borrower makes any such election;

(g) there shall be no outstanding Loans; and

(h) the Agent shall have received all costs, fees and expenses due to the Agent, the Joint Lead Arrangers (as such term is defined in the Commitment Letter) and the Lenders.

SECTION 12 . *Miscellaneous* . This Amendment shall constitute a Loan Document for all purposes of the Credit Agreement and the other Loan Documents. The provisions of this Amendment are deemed incorporated into the Credit Agreement as if fully set forth therein. The Borrower shall pay all reasonable out-of-pocket costs and expenses of the Agent incurred in connection with the negotiation, preparation and execution of this Amendment and the transactions contemplated hereby.

AMENDMENT NO. 2 TO CREDIT AGREEMENT

AMENDMENT dated as of October 19, 2011 (this " **Amendment** ") to the Revolving Credit Agreement dated as of November 1, 2010 (as amended, amended and restated or otherwise modified from time to time, the " **Credit Agreement** ") among KENTUCKY UTILITIES COMPANY (the " **Borrower** "), the LENDERS party thereto (the " **Lenders** ") and WELLS FARGO BANK, NATIONAL ASSOCIATION, as Administrative Agent, Issuing Lender and Swingline Lender (the " **Agent** ").

W I T N E S S E T H :

WHEREAS, the parties hereto desire to amend the Credit Agreement to (i) extend the scheduled Termination Date from December 31, 2014 to October 19, 2016, (ii) modify the definition of "Applicable Percentage" and (iii) make certain other amendments as provided herein.

NOW, THEREFORE, the parties hereto agree as follows:

SECTION 1 . *Defined Terms; References* . Unless otherwise specifically defined herein, each term used herein that is defined in the Credit Agreement has the meaning assigned to such term in the Credit Agreement. Each reference to "hereof", "hereunder", "herein" and "hereby" and each other similar reference and each reference to "this Agreement" and each other similar reference contained in the Credit Agreement shall, after this Amendment becomes effective, refer to the Credit Agreement as amended hereby.

SECTION 2 . *Extension of Termination Date.* The definition of "Termination Date" in Section 1.01 of the Credit Agreement is amended by changing the date specified therein from "December 31, 2014" to "October 19, 2016."

SECTION 3 . *Reduction of Interest Rates.* The chart set forth in the definition of "Applicable Percentage" in Section 1.01 of the Credit Agreement (the " **Existing Pricing Schedule** ") is deleted and replaced by the chart set forth below (the " **New Pricing Schedule** "). The New Pricing Schedule shall apply to interest and fees accruing under the Credit Agreement on and after the date hereof. The Existing Pricing Schedule shall continue to apply to interest and fees accruing under the Credit Agreement prior to the date hereof.

	Borrower’s Ratings (S&P /Moody’s)	Applicable Percentage for Commitment Fees	Applicable Percentage for Base Rate Loans	Applicable Percentage for Euro-Dollar Loans and Letter of Credit Fees
Category A	≥ A from S&P / A2 from Moody’s	0.100%	0.000%	1.000%
Category B	≥ A- from S&P / A3 from Moody’s	0.125%	0.125%	1.125%
Category C	BBB+ from S&P / Baa1 from Moody’s	0.175%	0.250%	1.250%
Category D	BBB from S&P / Baa2 from Moody’s	0.200%	0.500%	1.500%
Category E	BBB- from S&P / Baa3 from Moody’s	0.250%	0.625%	1.625%
Category F	≤BB+ from S&P / Ba1 from Moody’s	0.350%	0.875%	1.875%

SECTION 4 . *Administrative Agent’s Fees.* Section 8.10 of the Credit Agreement is hereby amended to read in its entirety:

> “The Borrower shall pay to the Administrative Agent for its own account fees in the amount and at the times agreed to and accepted by the Borrower, pursuant to that certain fee letter dated as of September 20, 2011 among the Borrower, the Administrative Agent, Bank of America, N.A., The Royal Bank of Scotland plc, Wells Fargo Securities, Merrill Lynch, Pierce, Fenner & Smith Incorporated and RBS Securities Inc.”

SECTION 5 . *Changes in Commitments.* W ith effect from and including the Amendment Effective Date, (i) each Person listed on Schedule 1 hereto that is not a party to the Credit Agreement (each, a “ **New Lender** ” and, together with each Lender that is not an Exiting Lender, the “ **Continuing Lenders** ”) shall become a Lender party to the Credit Agreement, (ii) the Commitment of each Lender shall be the amount set forth opposite the name of such Lender on Schedule 1 and (iii) the Commitment Appendix set forth on Schedule 1 hereto shall replace the Commitment Appendix attached to the Credit Agreement. On the Amendment Effective Date, any Lender whose Commitment is changed to zero (each, an “ **Exiting Lender** ”) shall cease to be a Lender party to the Credit Agreement, and all accrued fees and other amounts payable under the Credit Agreement for the account of each Exiting Lender shall be due and payable on such date; provided that the provisions of Sections 2.12, 2.16, 2.17 and 9.03 of the Credit Agreement shall continue to inure to the benefit of each Exiting Lender after the Amendment Effective Date. On the Amendment Effective Date, the Commitment Ratio of the Continuing Lenders shall be redetermined giving effect to the adjustments to the Commitments referred to in this Section 5, and the participations of the

Continuing lenders in and the obligations of the Continuing Lenders in respect of any Letters of Credit outstanding on the Amendment Effective Date shall be reallocated to reflect such redetermined Commitment Ratio.

SECTION 6 . *Letter of Credit Fees.* Section 2.07(b) of the Credit Agreement is amended by changing the rate specified therein from "0.25%" to "0.20%."

SECTION 7 . *Representations and Warranties.* The following sections of Article V of the Credit Agreement are amended as follows:

(a) The references to "December 31, 2009" in Section 5.04(a) and Section 5.04(c) of the Credit Agreement are changed to "December 31, 2010" and Section 5.04(b) of the Credit Agreement is hereby amended to read in its entirety:

> "The unaudited consolidated balance sheet of the Borrower and its Consolidated Subsidiaries as of June 30, 2011 and the related unaudited consolidated statements of income and cash flows for the six months then ended fairly present, in conformity with GAAP applied on a basis consistent with the financial statements referred to in subsection (a) of this Section, the consolidated financial position of the Borrower and its Consolidated Subsidiaries as of such date and their consolidated results of operations and cash flows for such six-month period (subject to normal year-end audit adjustments)."

(b) Section 5.05 of the Credit Agreement is hereby amended to add the following clause immediately prior to the clause "or otherwise furnished in writing to the Administrative Agent and each Lender,":

> "or in any subsequent report of the Borrower filed with the SEC on Form 10-K, 10-Q or 8-K,"

(c) References in Section 5.08 of the Credit Agreement to the KPSC Order, TRA Order and VSCC Order shall be deemed to include any orders of the Kentucky Public Service Commission (" **KPSC** "), Tennessee Regulatory Authority (" **TRA** ") and Virginia State Corporation Commission (" **VSCC** ") delivered pursuant to Section 11(f) of this Amendment.

(d) Section 5.13(a)(i) and Section 5.13(b) of the Credit Agreement are each hereby amended to add the following clause immediately prior to the clause "or otherwise furnished in writing to the Administrative Agent and each Lender,":

"or in any subsequent report of the Borrower filed with the SEC on Form 10-K, 10-Q or 8-K,"

(e) Section 5.15 of the Credit Agreement is hereby deleted.

SECTION 8 . *Full Force and Effect; Ratification* . Except as expressly modified herein, all of the terms and conditions of the Credit Agreement are unchanged, and, as modified hereby, the Borrower confirms and ratifies all of the terms, covenants and conditions of the Credit Agreement. This Amendment constitutes the entire and final agreement among the parties hereto with respect to the subject matter hereof and there are no other agreements, understandings, undertakings, representations or warranties among the parties hereto with respect to the subject matter hereof except as set forth herein.

SECTION 9 . *Governing Law* . This Amendment shall be governed by and construed in accordance with the laws of the State of New York.

SECTION 10 . *Counterparts* . This Amendment may be signed in any number of counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

SECTION 11 . *Effectiveness* . This Amendment shall become effective as of the first date when each of the following conditions are met (the " **Amendment Effective Date** "):

(a) the Agent shall have received from the Borrower and each Continuing Lender and Lenders constituting Required Lenders a counterpart hereof signed by such party or facsimile or other written confirmation (in form satisfactory to the Agent) that such party has signed a counterpart hereof;

(b) the Agent shall have received a duly executed revised Note for the account of each Lender requesting delivery of such Note pursuant to Section 2.05 of the Credit Agreement;

(c) the Agent shall have received satisfactory opinions of counsel for the Borrower, dated the Amendment Effective Date;

(d) the Agent shall have received a certificate dated the Amendment Effective Date signed on behalf of the Borrower by the Chairman of the Board, the President, any Vice President, the Treasurer or the Assistant Treasurer of the Borrower stating that (A) on the Amendment Effective Date and after giving effect to this Amendment, no Default shall have occurred and be continuing and (B) the representations and warranties of the Borrower contained in the Credit Agreement after giving effect to this Amendment are true and correct on and as of the Amendment Effective Date, except to the extent that such representations and warranties specifically refer to an earlier date, in which case they were true and correct as of such earlier date;

(e) the Agent shall have received (i) a certificate of the Secretary of State of the Commonwealth of Kentucky and a certificate of the Secretary of State of the Commonwealth of Virginia, each dated as of a recent date, as to the good standing of the Borrower and (ii) a certificate of the Secretary or an Assistant Secretary of the Borrower dated the Amendment Effective Date and certifying (A) that attached thereto is a true, correct and complete copy of (x) the Borrower's articles of incorporation certified by the Secretary of State of the Commonwealth of Kentucky and the Secretary of State of the Commonwealth of Virginia and (y) the bylaws of the Borrower, (B) as to the absence of dissolution or liquidation proceedings by or against the Borrower, (C) that attached thereto is a true, correct and complete copy of resolutions adopted by the board of directors of the Borrower authorizing the execution, delivery and performance of this Amendment and each other document delivered in connection herewith and that such resolutions have not been amended and are in full force and effect on the date of such certificate and (D) as to the incumbency and specimen signatures of each officer of the Borrower executing this Amendment or any other document delivered in connection herewith;

(f) all necessary governmental (domestic or foreign), regulatory and third party approvals, including, without limitation, the orders of the KPSC, TRA, VSCC and any required approvals of the Federal Energy Regulatory Commission, authorizing borrowings hereunder in connection with the transactions contemplated by this Amendment and the other Loan Documents shall have been obtained and remain in full force and effect, in each case without any action being taken by any competent authority which could restrain or prevent such transaction or impose, in the reasonable judgment of the Agent, materially adverse conditions upon the consummation of such transactions; provided that any such approvals with respect to elections by the Borrower to increase the Commitment as contemplated by Section 2.19 of the Credit Agreement need not be obtained or provided until the Borrower makes any such election;

(g) there shall be no outstanding Loans; and

(h) the Agent shall have received all costs, fees and expenses due to the Agent, the Joint Lead Arrangers (as such term is defined in the Commitment Letter) and the Lenders.

SECTION 12 . *Miscellaneous* . This Amendment shall constitute a Loan Document for all purposes of the Credit Agreement and the other Loan Documents. The provisions of this Amendment are deemed incorporated into the Credit Agreement as if fully set forth therein. The Borrower shall pay all reasonable out-of-pocket costs and expenses of the Agent incurred in connection with the negotiation, preparation and execution of this Amendment and the transactions contemplated hereby.

Section 8 - Other Events

Item 8.01 Other Events

On September 15, 2011, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU", and together with LG&E, the "Companies") issued a press release announcing that they anticipate retiring three older-coal-fired electric generating stations and have commenced certain steps to acquire additional generating units to replace power currently provided by the coal-fired plants.

The Companies filed a certificate of public convenience and necessity with the Kentucky Public Service Commission ("KPSC") on September 15, 2011, requesting approval to build a 640-megawatt, natural gas-fired combined-cycle gas turbine ("NGCC") at the existing Cane Run station site. KU will own a 78% undivided interest, and LG&E will own a 22% undivided interest, in the new NGCC. In addition, the Companies also requested approval to purchase three additional natural gas combustion turbines from Bluegrass Generation Company, L.L.C. that are expected to provide up to 495 megawatts ("MW") of peak generation supply (as defined below, the “Bluegrass Plant”). In conjunction with these matters, at the end of 2015 the Companies plan to retire three coal-fired generating units at LG&E's Cane Run station and also coal-fired generating units at KU's Tyrone and Green River stations. These generating stations represent approximately 797 MW of aggregate summer capacity.

<u>Plant Retirement and NGCC Construction</u>

The Environmental Protection Agency has issued rules that would require the Companies to implement new technologies to reduce the amount of sulfur dioxide, nitrogen oxide, mercury and other particulates emitted from coal-fired plants. In view of the cost to retrofit aging plants, the Companies have considered the most cost-effective options to replace energy that is currently delivered by these older coal-fired generating units. In connection with the filing of their 2011 Integrated Resource Plan with the KPSC in April 2011, the Companies determined that building the NGCC at the existing Cane Run station site would be the most cost-effective method to replace retired generation. The Companies anticipate that the NGCC construction and Bluegrass Plant acquisition could require up to $800 million in capital costs. The Companies' previously disclosed estimates of future capital expenditures included these estimated costs. Formal requests for recovery of the costs associated with NGCC were not included in the Companies' September 15, 2011 filing with the KPSC, but are expected to be included in a future base rate case filing.

Construction of the NGCC is subject to various regulatory approvals, including approval by the KPSC and receipt of certain environmental and construction-related permits. The Companies also anticipate filing an application to the Virginia State Corporation Commission ("VSCC") in connection with the new NGCC plant construction. Once all approvals are received, construction on the NGCC at Cane Run will begin in 2012 and is expected to be complete by 2016.

<u>Bluegrass Plant Acquisition</u>

On September 15, 2011, the Companies entered into an Asset Purchase Agreement ("APA") with Bluegrass Generation Company, L.L.C. for the purchase of three existing natural gas simple cycle combustion turbine facilities in LaGrange, Kentucky, aggregating approximately 495 MW, plus limited associated contractual arrangements required for operation of the plant (collectively, the "Bluegrass Plant"), for a purchase price of approximately $110 million. Pursuant to the APA, the Companies will jointly acquire the Bluegrass Plant as tenants in common, with LG&E as owner of a 69% undivided interest, and KU as owner of a 31% undivided interest, in the purchased assets. The purchase is subject to receipt of approvals from the KPSC, the VSCC, the Federal Energy Regulatory Commission, certain permit assignments or local approvals, and other conditions. Either party can terminate the APA should a closing of the purchase transaction fail to have occurred by June 30, 2012.

Statements in this report and the accompanying press release, including statements with respect to future events and their timing, including the proposed transactions contemplated in the Companies’ regulatory filing, such as the new NGCC construction, the retirement of older plants or the Bluegrass Plant acquisition, as well as other statements as to future costs or expenses, asset acquisition or retirement, regulation, corporate strategy and generating capacity and performance, are “forward-looking statements” within the meaning of the federal securities laws. Although the Companies believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these expectations, assumptions and statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: receipt of necessary government permits, approvals, rate relief and regulatory cost recovery; market demand and prices for electricity; market demand for and costs of construction, materials, equipment and labor; environmental conditions and requirements and the related costs of compliance; political, regulatory or economic conditions in states, regions or countries where the Companies conduct business; and new state, federal or foreign legislation, including new tax or environmental legislation or regulation. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation’s Form 10-K, each Company’s respective Form S-4 and other reports on file with the Securities and Exchange Commission.

**EPA Changes Force LG&E, KU to Retire Three Coal-fired Power Plants,
Company to Build Natural Gas-Fired Generation at Cane Run,
Purchase Peaking Units**

(LOUISVILLE, Ky.) – Louisville Gas and Electric Company and Kentucky Utilities Company announced today that they will be forced to retire three older coal-fired electric generating stations to meet new, stricter federal Environmental Protection Agency's regulations.

In a certificate of public convenience and necessity filing with the Kentucky Public Service Commission today, the companies requested approval to build a 640-megawatt, natural gas combined cycle generating unit (NGCC) at the existing Cane Run site in southwestern Louisville. In addition, the companies requested approval to purchase from Bluegrass Generation Company three additional simple-cycle natural gas combustion turbines located in LaGrange that will provide up to 495 megawatts of peak generation supply. Today's filings, and the planned retirements of Cane Run, Tyrone and Green River, are the results of the ongoing EPA regulation analysis and last December's Request for Proposal submittals.

As outlined in the companies' 2011 Integrated Resource Plan, the NGCC is the least-cost method of generation. Consistent with previous disclosures, these two actions for replacement generation are expected to cost up to $800 million, of which approximately $110 million is for the Bluegrass plant. Recovery of the additional costs is not part of today's filing, but will be included in a future base rate case filing. While preliminary evaluations had estimated increases of 5 percent for LG&E and 2 percent for KU, based on the respective ownership allocations, it is now expected that LG&E customers will not experience an increase in rates due to this construction, while KU customers will see about a 4 percent increase.

"While we have had a long history of being an environmental leader in the industry, the ever more stringent environmental regulations have forced us to take a hard look at how we generate electricity, how we will comply with the new federal EPA requirements, and how to best limit the potential cost increase on our customers and the community," said Paul W. Thompson, senior vice president of Energy Services for LG&E and KU. “The bottom-line is that achieving environmental compliance under the EPA’s present fragmented framework will have a significant impact on our company, our customers and our Commonwealth.”

While fewer employees will ultimately be needed to run the NGCC plant, the company is still determining the full extent of the workforce impact. Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed. As we have done in the past, the companies will look for opportunities to utilize as many existing employees as possible.

Currently, about 97 percent of the electricity in the companies’ generation fleet is produced by coal. After the construction of the NGCC and plant retirements, LG&E and KU will remain 90 percent coal-fired. The EPA’s new regulations will require many of the companies’ existing coal-fired plants to implement additional technologies, controls and processes no later than 2016 in order to maintain compliance.

The financial impact of these rules will be especially significant in Kentucky, since more than 95 percent of Kentucky’s electricity is being generated by coal. The companies estimate that complying with the new federal requirements under the clean air regulations – through upgrades and new construction -- could cost approximately $4 billion in capital expenditures by 2019, with over $3 billion of that amount incurred by the end of 2016.

“Given the enormous cost and strict compliance timetable required to retrofit some of our aging generation units with additional technology, we’ve had to explore a lower-cost option that results in retiring older coal-fired generating units and replacing them with natural gas units,” added Thompson.

The companies filed an application with the Louisville Metro Air Pollution Control District for an air permit on June 13 and hope to have approval by spring of 2012. They are requesting that the KPSC rule on the CPCN by April. Once all approvals are received, construction on a NGCC at Cane Run will begin in 2012 and is expected to be complete by 2016, replacing coal generation at that facility with natural gas. The three peaking units are expected to be available for use during next summer’s cooling season. This transaction is also subject to various other regulatory approvals, including the Federal Energy Regulatory Commission and the Virginia State Corporation Commission.

###

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com .

Re: ***Kentucky Utilities Company - Report of Certain Material Changes***
Case No. 2006-00390

Dear Mr. DeRouen:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to January 2010, KU believes it would have filed a Form 8-K for the following events:

- KU filed an application requesting an increase in base electric rates in Kentucky

Should you have any questions in this regard, please do not hesitate to contact me.

Sincerely,

Lonnie E. Bellar

Re: ***Kentucky Utilities Company - Report of Certain Material Changes***
Case No. 2006-00390

Dear Mr. DeRouen:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to July 2010, KU believes it would have filed a Form 8-K for the following event:

- Issuance of the Commission's Order approving the Stipulation and Recommendation in KU's base electric rate case.

Should you have any questions in this regard, please do not hesitate to contact me.

Sincerely,

Lonnie E. Bellar

Re: ***Kentucky Utilities Company - Report of Certain Material Changes***
Case No. 2006-00390

Dear Mr. DeRouen:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt. However, in connection with the recently issued First Mortgage Bonds, referenced below, KU anticipates filing registration statements with the Securities and Exchange Commission ("SEC") during mid-2011. Upon such statements being declared effective by the SEC, KU would thereafter resume periodic SEC reporting, including Form 8-K's.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to November 2010, KU believes it would have filed a Form 8-K for the following events:

- The official closing of the transfer of ownership of KU via the acquisition of E.ON US LLC by PPL Corporation
- Issuance of $1.5 billion of First Mortgage Bonds
- Issuance of 21 promissory notes for $1.331 billion to PPL Investment Corporation (which were repaid with proceeds of the First Mortgage Bonds listed above) to replace prior notes from Fidelia Corporation
- Entering into a multi-year revolving credit facility totaling $400 million
- Entering into employment-related arrangements with KU management in connection with the PPL transaction
- Appointments to the KU board associated with the PPL transaction

 "In November 2010, E.ON U.S. LLC was renamed LG&E and KU Energy LLC."

Should you have any questions in this regard, please do not hesitate to contact me.

Sincerely,

Lonnie E. Bellar

PUBLIC SERVICE COMMISSION

Dear Mr. DeRouen:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt. However, in connection with the issuance of First Mortgage Bonds on November 16, 2010, KU anticipates filing registration statements with the Securities and Exchange Commission ("SEC") during mid-2011. Upon such statements being declared effective by the SEC, KU would thereafter resume periodic SEC reporting, including Form 8-K's.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to December 2010, KU believes it would have filed a Form 8-K for the following events:

- Issuance of four letters-of-credit under the previously-reported $400 million revolving credit facility, which letters-of-credit provide collateral support to certain existing KU pollution control bond series and were in replacement of parallel letters-of-credit under a prior facility being terminated
- Selection of Ernst and Young LLP as independent auditors for the Company for 2011

Should you have any questions in this regard, please do not hesitate to contact me.

Re: ***Kentucky Utilities Company - Report of Certain Material Changes***
Case No. 2006-00390

Dear Mr. DeRouen:

Pursuant to the Commission's Order, dated January 22, 2007, in the aforementioned case, Kentucky Utilities Company ("KU") hereby files a report of material changes that KU would have had to disclose to the Securities and Exchange Commission ("SEC") on a Form 8-K if the company had continued to have publicly held secured debt.

In compliance with this Commission order, KU is submitting this letter as its report. With respect to May 2011, KU believes it would have filed a Form 8-K for the following events:

- KU filed a notice of intent for an amended environmental compliance plan, a revised surcharge to recover environmental costs, and Certificates of Public Convenience and Necessity for the construction of environmental equipment

Please note that, effective June 1, 2011, KU's Registration Statement on Form S-4 was declared effective by the SEC. Therefore, KU has now commenced SEC periodic reporting obligations under the Securities Exchange Act of 1934.

Therefore, this letter will be the final letter of this type delivered to the Commission under this docket. In the future, KU will annually submit copies of relevant SEC filings, including Form 8-K's, pursuant to the requirements of Orders 10296, 89-374, 97-300, 2000-095, 2001-00104, and 2010-00104.

Should you have any questions in this regard, please do not hesitate to contact me.

Sincerely,

Lonnie E. Bellar

Table of Contents

This combined Form 10-Q is separately filed by the following individual registrants: PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf, and no registrant makes any representation as to information relating to any other registrant, except that information under "Forward-Looking Information" relating to PPL Corporation subsidiaries is also attributed to PPL Corporation and information relating to the subsidiaries of LG&E and KU Energy LLC is also attributed to LG&E and KU Energy LLC.

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its current and former subsidiaries

Central Networks - collectively Central Networks East plc, Central Networks Limited and certain other related assets and liabilities. On April 1, 2011, PPL WEM Holdings plc (formerly WPD Investment Holdings Limited) purchased all of the outstanding ordinary share capital of these companies from E.ON AG subsidiaries. Central Networks West plc (subsequently renamed Western Power Distribution (West Midlands) plc), wholly owned by Central Networks Limited (subsequently renamed WPD Midlands Holdings Limited), and Central Networks East plc (subsequently renamed Western Power Distribution (East Midlands) plc) are British regional electricity distribution utility companies.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LKE - LG&E and KU Energy LLC (formerly E.ON U.S. LLC), a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries. PPL acquired E.ON U.S. LLC in November 2010 and changed the name to LG&E and KU Energy LLC. Within the context of this document, references to LKE also relate to the consolidated entity.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides services for LKE and its subsidiaries. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

PPL - PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, LKE and other subsidiaries.

PPL Capital Funding - PPL Capital Funding, Inc., a wholly owned financing subsidiary of PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL that transmits and distributes electricity in its Pennsylvania service area and provides electric supply to retail customers in this area as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Energy Supply, PPL Global (effective January 2011) and other subsidiaries.

PPL EnergyPlus - PPL EnergyPlus, LLC, a subsidiary of PPL Energy Supply that markets and trades wholesale and retail electricity and gas, and supplies energy and energy services in competitive markets.

PPL Energy Supply - PPL Energy Supply, LLC, a subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interests of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding.

PPL Generation - PPL Generation, LLC, a subsidiary of PPL Energy Supply that owns and operates U.S. generating facilities through various subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that primarily owns and operates a business in the U.K., WPD, that is focused on the regulated distribution of electricity. In January 2011, PPL Energy Supply, PPL Global's former parent, distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to its parent, PPL Energy Funding.

PPL Martins Creek - PPL Martins Creek, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Montana - PPL Montana, LLC, an indirect subsidiary of PPL Generation that generates electricity for wholesale sales in Montana and the Pacific Northwest.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides services for PPL and its subsidiaries.

PPL Susquehanna - PPL Susquehanna, LLC, the nuclear generating subsidiary of PPL Generation.

PPL WEM - PPL WEM Holdings plc (formerly WPD Investment Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WEM indirectly wholly owns both WPD (East Midlands) and WPD (West Midlands).

PPL WW - PPL WW Holdings Limited (formerly Western Power Distribution Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WW Holdings indirectly wholly owns WPD (South Wales) and WPD (South West).

WPD - refers to PPL WW and PPL WEM and their subsidiaries.

WPD (East Midlands) - Western Power Distribution (East Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks East plc) was acquired and renamed in April 2011.

WPD Midlands - refers to Central Networks, which was renamed after the acquisition.

WPD (South Wales) - Western Power Distribution (South Wales) plc, a British regional electricity distribution utility company.

WPD (South West) - Western Power Distribution (South West) plc, a British regional electricity distribution utility company.

WPD (West Midlands) - Western Power Distribution (West Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks West plc) was acquired and renamed in April 2011.

WKE - Western Kentucky Energy Corp., a subsidiary of LKE that leased certain non-utility generating plants in western Kentucky until July 2009. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

Other terms and abbreviations

£ - British pound sterling.

2010 Equity Unit(s) - a PPL equity unit, issued in June 2010, consisting of a 2010 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018.

2010 Purchase Contract(s) - a contract that is a component of a 2010 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to July 1, 2013.

2011 Bridge Facility - the £3.6 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, and lenders party thereto, used to fund the April 1, 2011 acquisition of Central Networks, as amended by Amendment No. 1 thereto dated April 15, 2011.

2011 Equity Unit(s) - a PPL equity unit, issued in April 2011, consisting of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019.

2011 Form 10-K - Annual Report to the SEC on Form 10-K for the year ended December 31, 2011.

2011 Purchase Contract(s) - a contract that is a component of a 2011 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to May 1, 2014.

Acid Rain Program - allowance trading system established by the Clean Air Act to reduce levels of sulfur dioxide. Under this program, affected power plants are allocated allowances based on their fuel consumption during specified baseline years and a specific emissions rate.

Act 129 - became effective in October 2008. The law amends the Pennsylvania Public Utility Code and creates an energy efficiency and conservation program and smart metering technology requirements, adopts new PLR electricity supply procurement rules, provides remedies for market misconduct and makes changes to the existing Alternative Energy Portfolio Standard.

AFUDC - Allowance for Funds Used During Construction, the cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

A.M. Best - A.M. Best Company, a company that reports on the financial condition of insurance companies.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Baseload generation - includes the output provided by PPL's nuclear, coal, hydroelectric and qualifying facilities.

Basis - when used in the context of derivatives and commodity trading, the commodity price differential between two locations, products or time periods.

Bcf - billion cubic feet.

Bluegrass CTs - three natural gas combustion turbines owned by Bluegrass Generation. LG&E and KU entered into an Asset Purchase Agreement with Bluegrass Generation for the purchase of these combustion turbines, subject to certain conditions including receipt of applicable regulatory approvals and clearances.

Bluegrass Generation - Bluegrass Generation Company, L.L.C., an exempt wholesale electricity generator in LaGrange, Kentucky.

BREC - Big Rivers Electric Corporation, a power-generating rural electric cooperative in western Kentucky.

CAIR - t he EPA's Clean Air Interstate Rule.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

COLA - license application for a combined construction permit and operating license from the NRC for a nuclear plant.

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of any plant, equipment, property or facility for furnishing of utility service to the public.

CSAPR - Cross-State Air Pollution Rule, the CSAPR implements Clean Air Act requirements concerning the transport of air pollution from power plants across state boundaries. The CSAPR replaces the 2005 CAIR, which the U.S. Court of Appeals for the D.C. Circuit ordered the EPA to revise in 2008. The court has granted a stay allowing CAIR to remain in place pending a ruling on the legal challenges to the CSAPR.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

Depreciation not normalized - the flow-through income tax impact related to the state regulatory treatment of depreciation-related timing differences.

Dodd-Frank Act - the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DOE - Department of Energy, a U.S. government agency.

DPCR4 - Distribution Price Control Review 4, the U.K. 5-year rate review period applicable to WPD that commenced April 1, 2005.

DRIP - Dividend Reinvestment and Direct Stock Purchase Plan.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of DSM programs and revenues lost by implementing those programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, effective January 1993, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which apply to coal combustion and by-products from the production of energy from coal.

E.ON AG - a German corporation and the parent of E.ON UK plc, the former parent of Central Networks, and the indirect parent of E.ON US Investments Corp., the former parent of LKE.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

Equity Units - refers collectively to the 2011 and 2010 Equity Units.

ESOP - Employee Stock Ownership Plan.

Euro - the basic monetary unit among participating members of the European Union.

FERC - Federal Energy Regulatory Commission, the federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch - Fitch, Inc., a credit rating agency.

FTR - financial transmission rights, which are financial instruments established to manage price risk related to electricity transmission congestion. They entitle the holder to receive compensation or require the holder to remit payment for certain congestion-related transmission charges based on the level of congestion in the transmission grid.

Fundamental Change - as it relates to the terms of the 2011 and 2010 Equity Units, will be deemed to have occurred if any of the following occurs with respect to PPL, subject to certain exceptions: (i) a change of control; (ii) a consolidation with or merger into any other entity; (iii) common stock ceases to be listed or quoted; or (iv) a liquidation, dissolution or termination.

GAAP - Generally Accepted Accounting Principles in the U.S.

GBP - British pound sterling.

GHG - greenhouse gas(es).

GWh - gigawatt-hour, one million kilowatt-hours.

Intermediate and peaking generation - includes the output provided by PPL's oil- and natural gas-fired units.

Ironwood Acquisition - In April 2012, PPL Ironwood Holdings, LLC, an indirect, wholly owned subsidiary of PPL Energy Supply, completed the acquisition from a subsidiary of The AES Corporation of all of the equity interests of AES Ironwood, L.L.C. (subsequently renamed PPL Ironwood, LLC) and AES Prescott, L.L.C. (subsequently renamed PPL Prescott, LLC), which own and operate, respectively, the Ironwood Facility.

Ironwood Facility - a natural gas-fired power plant in Lebanon, Pennsylvania with a summer rating of 657 MW.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

LIBOR - London Interbank Offered Rate.

Long Island generation business - includes a 79.9 MW gas-fired plant in the Edgewood section of Brentwood, New York and a 79.9 MW oil-fired plant in Shoreham, New York and related tolling agreements. This business was sold in February 2010.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

NDT - PPL Susquehanna's nuclear plant decommissioning trust.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas-fired combined-cycle turbine.

NPDES - National Pollutant Discharge Elimination System.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception receive accrual accounting treatment.

NRC - Nuclear Regulatory Commission, the federal agency that regulates nuclear power facilities.

OCI - other comprehensive income or loss.

Ofgem - Office of Gas and Electricity Markets, the British agency that regulates transmission, distribution and wholesale sales of electricity and related matters.

Opacity - the degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity in power plant stack gas emissions.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined nameplate capacities of 2,390 MW.

PADEP - the Pennsylvania Department of Environmental Protection, a state government agency.

PJM - PJM Interconnection, L.L.C., operator of the electric transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply to retail customers within its delivery area who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

Predecessor - refers to the LKE, LG&E and KU pre-acquisition activity covering the time period prior to November 1, 2010.

PUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

Purchase Contract(s) - refers collectively to the 2010 and 2011 Purchase Contracts.

RAV - regulatory asset value. This term is also commonly known as RAB or regulatory asset base.

RECs - renewable energy credits.

Registrants - PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU, collectively.

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

Rev. Proc(s). - Revenue Procedure(s), an official published statement by the IRS of a matter of procedural importance to both taxpayers and the IRS concerning administration of the tax laws.

RMC - Risk Management Committee.

S&P - Standard & Poor's Ratings Services, a credit rating agency.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

SCR - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber - an air pollution control device that can remove particulates and/or gases (such as sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency whose primary mission is to protect investors and maintain the integrity of the securities markets.

Securities Act of 1933 - the Securities Act of 1933, 15 U.S. Code, Sections 77a-77aa, as amended.

SIFMA Index - the Securities Industry and Financial Markets Association Municipal Swap Index.

SMGT - Southern Montana Electric Generation & Transmission Cooperative, Inc., a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019.

SNCR - selective non-catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases using ammonia.

Successor - refers to the LKE, LG&E and KU post-acquisition activity covering the time period after October 31, 2010.

Superfund - federal environmental legislation that addresses remediation of contaminated sites; states also have similar statutes.

TC2 - Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2 or 549 MW of the capacity.

Tolling agreement - agreement whereby the owner of an electric generating facility agrees to use that facility to convert fuel provided by a third party into electricity for delivery back to the third party.

TRA - Tennessee Regulatory Authority, the state agency that has jurisdiction over the regulation of rates and service of utilities in Tennessee.

VaR - value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VIE - variable interest entity.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

VWAP - as it relates to the 2011 and 2010 Equity Units issued by PPL, the per share volume-weighted-average price as displayed under the heading Bloomberg VWAP on Bloomberg page "PPL <EQUITY> AQR" (or its equivalent successor if such page is not available) in respect of the period from the scheduled open of trading on the relevant trading day until the scheduled close of trading on the relevant trading day (or if such volume-weighted-average price is unavailable, the market price of one share of PPL common stock on such trading day determined, using a volume-weighted-average method, by a nationally recognized independent investment banking firm retained for this purpose by PPL).

FORWARD-LOOKING INFORMATION

Statements contained in this Form 10-Q concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although the Registrants believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in each Registrant's 2011 Form 10-K and in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-Q report, the following are among the important factors that could cause actual results to differ materially from the forward-looking statements.

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the length of scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- potential expansion of alternative sources of electricity generation;
- potential laws or regulations to reduce emissions of "greenhouse" gases or other emissions and the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against the Registrants and their subsidiaries;
- potential effects of threatened or actual terrorism, war or other hostilities, cyber-based intrusions or natural disasters;
- the commitments and liabilities of the Registrants and their subsidiaries;
- market demand and prices for energy, capacity, transmission services, emission allowances, RECs and delivered fuel;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in the NDT funds and in defined benefit plans, and the potential cash funding requirements if fair value declines;
- interest rates and their effect on pension, retiree medical, and nuclear decommissioning liabilities, and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- the profitability and liquidity, including access to capital markets and credit facilities, of the Registrants and their subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- changes in securities and credit ratings;
- foreign currency exchange rates;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional NRC requirements;
- political, regulatory or economic conditions in states, regions or countries where the Registrants or their subsidiaries conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation, including new tax, environmental, healthcare or pension-related legislation;
- state, federal and foreign regulatory developments;
- the outcome of any rate cases or other cost recovery filings by PPL Electric at the PUC or the FERC, by LG&E at the KPSC, by KU at the KPSC, VSCC, TRA or the FERC, or by WPD at Ofgem in the U.K.;
- the impact of any state, federal or foreign investigations applicable to the Registrants and their subsidiaries and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;

- performance of new ventures; and
- business dispositions or acquisitions and our ability to successfully operate such acquired businesses and realize expected benefits from business acquisitions, including PPL's 2011 acquisition of WPD Midlands and 2010 acquisition of LKE.

Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents of the Registrants on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for the Registrants to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and the Registrants undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.

Combined Notes to Condensed Financial Statements (Unaudited)

1. Interim Financial Statements

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Capitalized terms and abbreviations appearing in the unaudited combined notes to condensed financial statements are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, do not include all of the information and footnotes required by accounting principles generally accepted in the U.S. for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation in accordance with accounting principles generally accepted in the U.S. are reflected in the condensed financial statements. All adjustments are of a normal recurring nature, except as otherwise disclosed. Each Registrant's Balance Sheet at December 31, 2011 is derived from that Registrant's 2011 audited Balance Sheet. The financial statements and notes thereto should be read in conjunction with the financial statements and notes contained in each Registrant's 2011 Form 10-K. The results of operations for the three months ended March 31, 2012, are not necessarily indicative of the results to be expected for the full year ending December 31, 2012, or other future periods, because results for interim periods can be disproportionately influenced by various factors and developments and seasonal variations.

The classification of certain prior period amounts has been changed to conform to the presentation in the March 31, 2012 financial statements.

(PPL)

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. Therefore, 2012 includes three months of operating results of WPD Midlands with no comparable amounts for the same period in 2011. See Note 8 for additional information.

PPL consolidates WPD, including WPD Midlands, on a one-month lag. Material intervening events, such as debt issuances that occur in the lag period, are recognized in the current period financial statements. Events that are significant but not material are disclosed.

2. Summary of Significant Accounting Policies

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The following accounting policy disclosures represent updates to Note 1 in each Registrant's 2011 Form 10-K and should be read in conjunction with those disclosures.

Accounts Receivable *(PPL, PPL Energy Supply and PPL Electric)*

PPL Electric's customers may choose an alternative supplier for their generation supply. In accordance with a PUC-approved purchase of accounts receivable program, PPL Electric continues to purchase certain accounts receivable from alternative suppliers at a nominal discount, which reflects a provision for uncollectible accounts. The alternative suppliers (including PPL Electric's affiliate, PPL EnergyPlus) have no continuing involvement or interest in the purchased accounts receivable. The purchased accounts receivable are initially recorded at fair value using a market approach based on the purchase price paid and are classified as Level 2 in the fair value hierarchy. PPL Electric receives a nominal fee for administering its program. During the three months ended March 31, 2012, PPL Electric purchased $287 million of accounts receivable from unaffiliated third parties and $98 million from its affiliate, PPL EnergyPlus. During the three months ended March 31, 2011, PPL Electric purchased $254 million of accounts receivable from unaffiliated third parties and $61 million from its affiliate, PPL EnergyPlus.

New Accounting Guidance Adopted *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Fair Value Measurements

Effective January 1, 2012, the Registrants prospectively adopted accounting guidance that was issued to clarify existing fair value measurement guidance as well as enhance fair value disclosures. The additional disclosures required by this guidance include quantitative information about significant unobservable inputs used for Level 3 measurements, qualitative information about the sensitivity of recurring Level 3 measurements, information about any transfers between Level 1 and 2 of the fair value hierarchy, information about when the current use of a non-financial asset is different from the highest and best use, and the hierarchy classification for assets and liabilities whose fair value is disclosed only in the notes to the financial statements.

The adoption of this standard resulted in additional footnote disclosure but did not have a significant impact on the Registrants. See Note 13 for additional disclosures required by this guidance.

Testing Goodwill for Impairment

Effective January 1, 2012, the Registrants prospectively adopted accounting guidance which allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of goodwill. If, based on this assessment, the entity determines it is not more likely than not the fair value of a reporting unit is less than the carrying amount, the two-step goodwill impairment test is not necessary. However, the first step of the impairment test is required if an entity concludes it is more likely than not the fair value of a reporting unit is less than the carrying amount based on the qualitative assessment.

The adoption of this standard did not have a significant impact on the Registrants.

3. Segment and Related Information

(PPL)

See Note 2 in PPL's 2011 Form 10-K for a discussion of reportable segments. In 2012, the International Regulated segment was renamed the U.K. Regulated segment to more specifically reflect the focus of this segment. Other than the name change, there were no other changes to this segment. Since the acquisition of WPD Midlands occurred on April 1, 2011, the operating results of the U.K. Regulated segment are not comparable between 2012 and 2011.

Financial data for the segments are:

	Three Months Ended March 31,	
	2012	**2011**
Income Statement Data		
Revenues from external customers		
Kentucky Regulated	$ 705	$ 766
U.K. Regulated	562	225
Pennsylvania Regulated	457	554
Supply (a)	2,388	1,365
Total	$ 4,112	$ 2,910
Intersegment electric revenues		
Pennsylvania Regulated	$ 1	$ 4
Supply	21	6
Net Income Attributable to PPL		
Kentucky Regulated	$ 42	$ 75
U.K. Regulated	165	55
Pennsylvania Regulated	33	52
Supply (a)	301	219
Total	$ 541	$ 401

	March 31, 2012	December 31, 2011
Balance Sheet Data		
Total Assets		
Kentucky Regulated (b)	$ 10,225	$ 10,229
U.K. Regulated	13,779	13,364
Pennsylvania Regulated	5,600	5,610
Supply (b)	14,478	13,445
Total	$ 44,082	$ 42,648

(a) Includes unrealized gains and losses from economic activity. See Note 14 for additional information.
(b) A portion of the goodwill related to the 2010 LKE acquisition has been attributed to PPL's supply segment.

4. Earnings Per Share

(PPL)

Basic EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding during the period. Diluted EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of shares outstanding that are increased for additional shares that would be outstanding if potentially dilutive non-participating securities were converted to common shares as calculated using the treasury stock method. In 2012 and 2011, these securities included stock options and performance units granted under incentive compensation plans. Additionally, the Purchase Contracts associated with the Equity Units will be dilutive under the treasury stock method if the average VWAP of PPL's common stock for a certain period exceeds approximately $30.99 and $28.80, for the 2011 and 2010 Purchase Contracts. The Purchase Contracts were excluded from the diluted EPS calculations for 2012 because they did not meet this criteria during the first quarter of 2012. The 2010 Purchase Contracts were excluded from the diluted EPS calculation for 2011 because they did not meet this criteria during the first quarter of 2011. Subject to antidilution adjustments at March 31, 2012, the maximum number of shares issuable to settle the Purchase Contracts was 99,743,870 shares, including 86,552,565 shares that could be issued under standard provisions of the Purchase Contracts and 13,191,305 shares that could be issued under make-whole provisions in the event of early settlement upon a Fundamental Change. In April 2012, PPL entered into forward sale agreements for PPL common stock. See Note 7 for additional information.

Reconciliations of the amounts of income and shares of PPL common stock (in thousands) for the three months ended March 31 used in the EPS calculation are:

	2012	2011
Income (Numerator)		
Income from continuing operations after income taxes attributable to PPL	$ 541	$ 398
Less amounts allocated to participating securities	3	2
Income from continuing operations after income taxes available to PPL common shareowners	$ 538	$ 396
Income (loss) from discontinued operations (net of income taxes) available to PPL	$	$ 3
Net income attributable to PPL	$ 541	$ 401
Less amounts allocated to participating securities	3	2
Net income available to PPL common shareowners	$ 538	$ 399
Shares of Common Stock (Denominator)		
Weighted-average shares - Basic EPS	579,041	484,138
Add incremental non-participating securities:		
Stock options and performance units	486	207
Weighted-average shares - Diluted EPS	579,527	484,345
Basic EPS		
Available to PPL common shareowners:		
Income from continuing operations after income taxes	$ 0.93	$ 0.82
Net Income	$ 0.93	$ 0.82
Diluted EPS		
Available to PPL common shareowners:		
Income from continuing operations after income taxes	$ 0.93	$ 0.82
Net Income	$ 0.93	$ 0.82

During the three months ended March 31, 2012, PPL issued 276,582 shares of common stock related to the exercise of stock options, vesting of restricted stock and restricted stock units and conversion of stock units granted to directors under its stock-based compensation plans. In addition, PPL issued 279,945 and 558,019 shares of common stock related to its ESOP and DRIP.

For the three months ended March 31, the following stock options to purchase PPL common stock and performance units were excluded from the computations of diluted EPS because the effect would have been antidilutive.

(Shares in thousands)	2012	2011
Stock options	5,682	6,614
Performance units	195	6

5. Income Taxes

Reconciliations of income tax expense are:

(PPL)

	Three Months Ended March 31, 2012	2011
Reconciliation of Income Tax Expense		
Federal income tax on Income from Continuing Operations Before Income Taxes at statutory tax rate - 35%	$ 281	$ 219
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	24	25
State valuation allowance adjustments (a)		11
Impact of lower U.K. income tax rates	(21)	(8)
U.S. income tax on foreign earnings - net of foreign tax credit (b)	2	(6)
Foreign tax reserve adjustments	3	
Federal income tax credits	(4)	(5)
Amortization of investment tax credit	(2)	(3)
Depreciation not normalized (a)	(2)	(4)
State deferred tax rate change (c)	(11)	
Net operating loss carryforward adjustment (d)	(6)	
Other	(5)	(6)
Total increase (decrease)	(22)	4
Total income taxes from continuing operations	$ 259	$ 223

(a) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal tax purposes. Due to the decrease in projected taxable income related to bonus depreciation, PPL recorded state deferred income tax expense during the three months ended March 31, 2011 related to valuation allowances.

Additionally, the 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation. The federal provision for 100% bonus depreciation generally applies to property placed in service before January 1, 2012. The placed in service deadline is extended to January 1, 2013 for property that exceeds $1 million, has a production period longer than one year and has a tax life of at least ten years.

(b) During the three months ended March 31, 2011, PPL recorded a $7 million federal income tax benefit related to U.K. pension contributions.

(c) During the three months ended March 31, 2012, PPL recorded an $11 million adjustment related to state deferred tax liabilities.

(d) During the three months ended March 31, 2012, PPL recorded an adjustment to deferred taxes related to net operating loss carryforwards of LKE.

(PPL Energy Supply)

	Three Months Ended March 31, 2012	2011
Reconciliation of Income Tax Expense		
Federal income tax on Income from Continuing Operations Before Income Taxes at statutory tax rate - 35%	$ 170	$ 124
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	23	17
State valuation allowance adjustments (a)		6
Federal income tax credits	(4)	(5)
State deferred tax rate change (b)	(11)	
Other	(1)	
Total increase (decrease)	7	18
Total income taxes from continuing operations	$ 177	$ 142

(a) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal tax purposes. Due to the decrease in projected taxable income related to bonus depreciation, PPL Energy Supply recorded a $6 million state deferred income tax expense during the three months ended March 31, 2011 related to valuation allowances.

(b) During the three months ended March 31, 2012, PPL Energy Supply recorded an $11 million adjustment related to state deferred tax liabilities.

(PPL Electric)

	Three Months Ended March 31,	
	2012	2011
Reconciliation of Income Tax Expense		
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 20	$ 28
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	2	4
Federal and state tax reserve adjustments	(1)	(2)
Federal and state income tax return adjustments (a)		(2)
Depreciation not normalized (a)	(1)	(3)
Other		(2)
Total increase (decrease)		(5)
Total income taxes	$ 20	$ 23

(a) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation. The federal provision for 100% bonus depreciation generally applies to property placed in service before January 1, 2012.

(LKE)

	Three Months Ended March 31,	
	2012	2011
Reconciliation of Income Tax Expense		
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 26	$ 47
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	2	5
Net operating loss carryforward adjustment (a)	(6)	
Other	(1)	(3)
Total increase (decrease)	(5)	2
Total income taxes	$ 21	$ 49

(a) During the three months ended March 31, 2012, LKE recorded a prior period adjustment to deferred taxes related to net operating loss carryforwards. The impact of this adjustment was not material to any previously reported financial statements, and is not expected to be material to the financial statements for the full year of 2012.

(LG&E)

	Three Months Ended March 31,	
	2012	2011
Reconciliation of Income Tax Expense		
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 14	$ 21
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	1	2
Amortization of investment tax credit	(1)	(1)
Other	1	
Total increase (decrease)	1	1
Total income taxes	$ 15	$ 22

(KU)

	Three Months Ended March 31,	
	2012	2011
Reconciliation of Income Tax Expense		
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 21	$ 31
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	2	3
Other	(1)	(2)
Total increase (decrease)	1	1
Total income taxes	$ 22	$ 32

Unrecognized Tax Benefits *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Changes to unrecognized tax benefits were as follows:

	Three Months Ended March 31,	
	2012	2011
PPL		
Beginning of period	$ 145	$ 251
Additions based on tax positions of prior years	4	
Reductions based on tax positions of prior years	(27)	
Additions based on tax positions related to the current year	1	
Reductions based on tax positions related to the current year		(1)
Lapse of applicable statutes of limitations	(2)	(2)
Effects of foreign currency translation		3
End of period	$ 121	$ 251
PPL Energy Supply		
Beginning of period	$ 28	$ 183
Additions based on tax positions of prior years	4	
Reductions based on tax positions of prior years	(1)	
Derecognition (a)		(155)
End of period	$ 31	$ 28
PPL Electric		
Beginning of period	$ 73	$ 62
Reductions based on tax positions of prior years	(26)	
Additions based on tax positions related to the current year	1	
Reductions based on tax positions related to the current year		(1)
Lapse of applicable statutes of limitations	(2)	(2)
End of period	$ 46	$ 59

(a) Represents unrecognized tax benefits derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding.

LKE's, LG&E's and KU's unrecognized tax benefits and changes in those unrecognized tax benefits were insignificant for the three months ended March 31, 2012 and 2011.

At March 31, 2012, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase or decrease by the following amounts. For LKE, LG&E and KU, no significant changes in unrecognized tax benefits are reasonably possible over the next 12 months.

	Increase	Decrease
PPL	$ 17	$ 111
PPL Energy Supply	1	31
PPL Electric	23	39

These potential changes could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the creditability of foreign taxes, the timing and utilization of foreign tax credits and the related impact on alternative minimum tax and other credits, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

At March 31, the total unrecognized tax benefits and related effects that, if recognized, would decrease the effective tax rate were as follows. The amounts for LKE, LG&E and KU were insignificant.

	2012	2011
PPL	$ 41	$ 181
PPL Energy Supply	14	12
PPL Electric	6	12

Other *(PPL, PPL Energy Supply and PPL Electric)*

PPL changed its method of accounting for repair expenditures for tax purposes effective for its 2008 tax year for the Pennsylvania generation, transmission and distribution operations. The same change was made for the Montana generation operations for 2009.

In August 2011, the IRS issued Rev. Procs. 2011-42 and 2011-43. Rev. Proc. 2011-42 provides guidance regarding the use and evaluation of statistical samples and sampling estimates. Rev. Proc. 2011-43 provides a safe harbor method of determining whether the repair expenditures for electric transmission and distribution property can be currently deducted for tax purposes. If PPL adopts the safe harbor method of Rev. Proc. 2011-43, the amount of deductible versus capitalizable expenditures will likely be different from PPL's current method. PPL does not believe any resulting adjustment to unrecognized tax benefits or income tax liabilities will have a significant impact on net income.

The IRS has not issued guidance to provide a safe harbor method for repair expenditures for generation property. The IRS may assert and ultimately conclude that PPL's deduction for generation-related expenditures should be disallowed in whole or in part. PPL believes that it has established an adequate liability for this issue.

Tax Litigation *(PPL)*

In 1997, the U.K. imposed a Windfall Profits Tax (WPT) on privatized utilities, including WPD. PPL filed its tax returns for years subsequent to its 1997 and 1998 claim for refund on the basis that the U.K. WPT was creditable. In September 2010, the U.S. Tax Court (Tax Court) ruled in PPL's favor in a dispute with the IRS, concluding that the U.K. WPT is a creditable tax for U.S. tax purposes. As a result, and with finalization of other issues, PPL recorded a $42 million tax benefit in 2010. In January 2011, the IRS appealed the Tax Court's decision to the U.S. Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision, holding that the U.K. WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a $39 million expense in the fourth quarter of 2011. In February 2012, PPL filed a petition for rehearing of the Third Circuit opinion. In March 2012, the Third Circuit denied PPL's petition. PPL is considering whether to file a petition for a writ of certiorari with the U.S. Supreme Court.

6. Utility Rate Regulation

(PPL, PPL Electric, LKE, LG&E and KU)

The following table provides information about the regulatory assets and liabilities of cost-based rate regulated utility operations.

	PPL		PPL Electric	
	March 31, 2012	December 31, 2011	March 31, 2012	December 31, 2011
Current Regulatory Assets:				
Gas supply clause	$ 7	$ 6		
Fuel adjustment clause	8	3		
Total current regulatory assets	$ 15	$ 9		
Noncurrent Regulatory Assets:				
Defined benefit plans	$ 605	$ 615	$ 273	$ 276
Taxes recoverable through future rates	293	289	293	289
Storm costs	149	154	30	31
Unamortized loss on debt	106	110	74	77

Gas supply clause	6	6	$ 6	$ 6		
Other	6	7	4	4	2	3
Total current regulatory liabilities	$ 21	$ 20	$ 10	$ 10	$ 11	$ 10
Noncurrent Regulatory Liabilities:						
Accumulated cost of removal of utility plant	$ 658	$ 651	$ 287	$ 286	$ 371	$ 365
Coal contracts (a)	170	180	73	78	97	102
Power purchase agreement - OVEC (a)	114	116	79	80	35	36
Net deferred tax assets	38	39	31	31	7	8
Defined benefit plans	9	9			9	9
Other	8	8	3	3	5	5
Total noncurrent regulatory liabilities	$ 997	$ 1,003	$ 473	$ 478	$ 524	$ 525

(a) These regulatory assets and liabilities were recorded as offsets to certain intangible assets and liabilities that were recorded at fair value upon the acquisition of LKE.

Regulatory Matters

Kentucky Activities *(PPL, LKE, LG&E and KU)*

CPCN Filing

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. LG&E will own a 22% undivided interest, and KU will own a 78% undivided interest in the new NGCC. In addition, LG&E and KU also requested approval to purchase the Bluegrass CTs which are expected to provide up to 495 MW of peak generation supply. LG&E will own a 69% undivided interest, and KU will own a 31% undivided interest in the purchased assets. In November 2011, LG&E and KU filed an application with the FERC requesting approval to purchase the Bluegrass CTs. In conjunction with these developments, in 2015, LG&E and KU anticipate retiring three coal-fired generating units at LG&E's Cane Run plant and also one coal-fired generating unit at KU's Tyrone plant and two at KU's Green River plant. These generating units represent 797 MW of combined summer capacity.

LG&E and KU anticipate that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. See Note 8 for additional information. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. In May 2012, the KPSC issued an order approving the request to build the NGCC and purchase the Bluegrass CTs. Also, on May 4, 2012, the FERC issued an order conditionally authorizing the acquisition of the Bluegrass CTs, subject to implementation of satisfactory mitigation measures to address market-power concerns. FERC approval of the proposed mitigation measures is required. LG&E and KU are reviewing the order's conditions and their impact on the closing conditions under the Bluegrass CTs purchase contract, as well as other regulatory, operational and economic aspects of the transaction. PPL, LKE, LG&E and KU cannot currently predict the ultimate outcome of this matter.

Kentucky Acquisition Commitments

In connection with the September 2010 approval of PPL's acquisition of LKE, LG&E and KU agreed to implement the Acquisition Savings Sharing Deferral (ASSD) methodology whereby LG&E's and KU's adjusted jurisdictional revenues, expenses, and net operating income are calculated each year. If LG&E's or KU's actual earned rate of return on common equity exceeds 10.75%, half of the excess amount will be deferred as a regulatory liability and ultimately returned to customers. The first ASSD filing with the KPSC was made on March 30, 2012 based on the 2011 calendar year. Based upon the actual earned rate of return on common equity for 2011 and the current estimates of the outcome of an ASSD filing in 2012, LG&E and KU have not recognized any impact of the ASSD in the financial statements. The ASSD methodology for each of LG&E's and KU's utility operations will terminate on the earlier of the end of 2015 or the first day of the calendar year during which new base rates go into effect.

Pennsylvania Activities *(PPL and PPL Electric)*

PUC Investigation of Retail Market

In April 2011, the PUC opened an investigation of Pennsylvania's retail electricity market to be conducted in two phases. Phase one addressed the status of the existing retail market and explored potential changes. Questions issued by the PUC for this phase of the investigation focused primarily on default service issues. Phase two was initiated in July 2011 to develop specific proposals for changes to the retail market and default service model. In December 2011, the PUC issued a final order providing guidance to EDCs on the design of their next default service procurement plan filings. In December 2011, the PUC also issued a tentative order proposing an intermediate work plan to address issues raised in the investigation. In March 2012, the PUC entered a final order on the intermediate work plan. In March 2012, the PUC Staff issued three possible models for the default service "end state" and the PUC held a hearing regarding those three models. PPL Electric cannot predict the outcome of the investigation.

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation authorizing the PUC to approve regulatory procedures and mechanisms to provide more timely recovery of a utility's costs. In the first quarter of 2012, the Governor signed an amended version of the legislation (Act 11 of 2012), which became effective April 14, 2012. The legislation authorizes the PUC to approve two specific ratemaking mechanisms -- a fully projected future test year and, subject to certain conditions, a distribution system improvements charge. Such alternative ratemaking procedures and mechanisms are important to PPL Electric as it begins a period of significant increasing capital investment to maintain and enhance the reliability of its delivery system, including the replacement of aging distribution assets. The PUC staff has initiated a process to develop filing guidelines and a model tariff for the distribution system improvements charge. No petition requesting permission to establish a distribution system improvements charge may be filed with the PUC before January 1, 2013.

Federal Matters *(PPL and PPL Electric*)

FERC Formula Rates

Transmission rates are regulated by the FERC. PPL Electric's transmission revenues are billed in accordance with a FERC-approved PJM open access transmission tariff that utilizes a formula-based rate recovery mechanism.

In May 2010, PPL Electric initiated its formula rate 2010 Annual Update. In November 2010, a group of municipal customers taking transmission service in PPL Electric's transmission zone filed a preliminary challenge to the update and, in December 2010, filed a formal challenge. In August 2011, the FERC issued an order substantially rejecting the formal challenge and accepting PPL Electric's 2010 Annual Update. The group of municipal customers filed a request for rehearing of that order.

In June 2011, PPL Electric initiated its formula rate 2011 Annual Update. In October 2011, the group of municipal customers filed a preliminary challenge to the update and, in December 2011, filed a formal challenge. PPL Electric filed a response to that formal challenge. PPL Electric cannot predict the outcome of these two proceedings, which remain pending before the FERC.

In March 2012, PPL Electric filed a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives that transferred regulatory jurisdiction of certain transmission assets from the PUC to FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is included in "Other Noncurrent Assets - Regulatory assets" on the Balance Sheets at March 31, 2012 and December 31, 2011. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

U.K. Activities *(PPL)*

Ofgem Review of Line Loss Calculation

WPD has a $173 million liability recorded at March 31, 2012 compared with $170 million at December 31, 2011, calculated in accordance with Ofgem's accepted methodology, related to the close-out of line losses for the prior price control period, DPCR4. Ofgem is currently consulting on the methodology used to calculate the final line loss incentive/penalty for the DPCR4. In October 2011, Ofgem issued a consultation paper citing two potential changes to the methodology, both of which would result in a reduction of the liability. In March 2012, Ofgem issued a decision regarding the preferred methodology and in April 2012, WPD submitted further data as requested by Ofgem. PPL cannot predict the outcome of this matter, but expects resolution to occur before the end of 2012.

7. Financing Activities

Credit Arrangements and Short-term Debt

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The Registrants maintain credit facilities to enhance liquidity and provide credit support, and as a backstop to commercial paper programs, when necessary. The following credit facilities were in place at:

	March 31, 2012					December 31, 2011	
	Expiration Date	Capacity	Borrowed (a)	Letters of Credit Issued and Commercial Paper Backstop	Unused Capacity	Borrowed (a)	Letters of Credit Issued and Commercial Paper Backstop
PPL							
WPD Credit Facilities							
PPL WW Syndicated Credit Facility (b)	Jan. 2013	£ 150	£ 110	n/a	£ 40	£ 111	n/a
WPD (South West) Syndicated Credit Facility (c)	Jan. 2017	245		n/a	245		n/a
WPD (East Midlands) Syndicated Credit Facility	Apr. 2016	300		£ 70	230		£ 70

Letter of Credit Facility	Apr. 2014	198	n/a	$ 198		n/a	$ 198
Total KU Credit Facilities		$ 598		$ 198	$ 400		$ 198

(a) Amounts borrowed are recorded as "Short-term debt" on the Balance Sheets.

(b) The borrowing outstanding at March 31, 2012 was a USD-denominated borrowing of $174 million, which equated to £110 million at the time of borrowing and bore interest at approximately 1.458%.

(c) In January 2012, WPD (South West) entered into a new £245 million 5-year syndicated credit facility to replace its existing £210 million 3-year syndicated credit facility that was set to expire in July 2012. Under the facility, WPD (South West) has the ability to make cash borrowings but cannot request the lenders to issue letters of credit. WPD (South West) pays customary commitment fees under this facility and borrowings bear interest at

LIBOR-based rates plus a margin. The credit facility contains financial covenants that require WPD (South West) to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facility.

(d) At March 31, 2012, the unused capacity of the WPD credit facilities was approximately $1.3 billion.

(e) All credit facilities at PPL Energy Supply, PPL Electric, LG&E and KU also apply to PPL on a consolidated basis for financial reporting purposes.

(f) In April 2012, PPL Electric increased the capacity of its syndicated credit facility to $300 million.

(g) PPL Electric participates in an asset-backed commercial paper program through which PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary has pledged these assets to secure loans from a commercial paper conduit sponsored by a financial institution.

At March 31, 2012 and December 31, 2011, $260 million and $251 million of accounts receivable and $75 million and $98 million of unbilled revenue were pledged by the subsidiary under the credit agreement related to PPL Electric's and the subsidiary's participation in the asset-backed commercial paper program. Based on the accounts receivable and unbilled revenue pledged at March 31, 2012, the amount available for borrowing under the facility was limited to $82 million. PPL Electric's sale to its subsidiary of the accounts receivable and unbilled revenue is an absolute sale of assets, and PPL Electric does not retain an interest in these assets. However, for financial reporting purposes, the subsidiary's financial results are consolidated in PPL Electric's financial statements. PPL Electric performs certain record-keeping and cash collection functions with respect to the assets in return for a servicing fee from the subsidiary.

(h) All credit facilities at LG&E and KU also apply to LKE on a consolidated basis for financial reporting purposes.

(PPL and PPL Energy Supply)

PPL Energy Supply maintains a $500 million Facility Agreement expiring June 2017, whereby PPL Energy Supply has the ability to request up to $500 million of committed letter of credit capacity at fees to be agreed upon at the time of each request, based on certain market conditions. At March 31, 2012, PPL Energy Supply has not requested any capacity for the issuance of letters of credit under this arrangement.

PPL Energy Supply, PPL EnergyPlus, PPL Montour and PPL Brunner Island maintain an $800 million secured energy marketing and trading facility, whereby PPL EnergyPlus will receive credit to be applied to satisfy collateral posting obligations related to its energy marketing and trading activities with counterparties participating in the facility. The credit amount is guaranteed by PPL Energy Supply, PPL Montour and PPL Brunner Island. PPL Montour and PPL Brunner Island have granted liens on their respective generating facilities to secure any amount they may owe under their guarantees. The facility expires in November 2015, but is subject to automatic one-year renewals under certain conditions. There were no secured obligations outstanding under this facility at March 31, 2012.

In April 2012, PPL Energy Supply increased the capacity of its commercial paper program from $500 million to $750 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At March 31, 2012, PPL Energy Supply had $500 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheet, at a weighted-average interest rate of approximately 0.47%.

(PPL and PPL Electric)

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at March 31, 2012.

(PPL, LKE, LG&E and KU)

In February 2012, LG&E and KU each established a commercial paper program for up to $250 million to provide an additional financing source to fund their short-term liquidity needs. Commercial paper issuances will be supported by LG&E and KU's Syndicated Credit Facilities. LG&E and KU had no commercial paper outstanding at March 31, 2012.

(PPL Energy Supply, LKE, LG&E and KU)

See Note 11 for discussion of intercompany borrowings.

Long-term Debt and Equity Securities

(PPL)

In April 2012, PPL made a registered underwritten public offering of 9.9 million shares of its common stock. In conjunction with that offering, the underwriters exercised an option to purchase an additional 590,880 shares of PPL common stock solely to cover over-allotments.

In connection with the registered public offering, PPL entered into forward sale agreements with two counterparties covering the 9.9 million shares of PPL's common stock. Settlement of these initial forward sale agreements will occur no later than April 2013. As a result of the underwriters' exercise of the overallotment option, PPL entered into additional forward sale agreements covering the additional 590,880 shares of common stock. Settlement of the subsequent forward sale agreements will occur in July 2013. Upon any physical settlement of any forward sale agreement, PPL will issue and deliver to the forward counterparties shares of its common stock in exchange for cash proceeds per share equal to the forward sale price. The forward sale price will be calculated based on an initial forward price of $27.02 per share reduced during the period the contracts are outstanding as specified in the forward sale agreements. PPL may, in certain circumstances, elect cash settlement or net share settlement for all or a portion of its rights or obligations under the forward sale agreements.

PPL will not receive any proceeds or issue any shares of common stock until settlement of the forward sale agreements. PPL intends to use any net proceeds that it receives upon settlement to repay short-term debt obligations and for other general corporate purposes.

The forward sale agreements will be classified as equity transactions. As a result, no amounts will be recorded in the consolidated financial statements until the settlement of the forward sale agreements. Prior to those settlements, the only impact to the financial statements will be the inclusion of incremental shares within the calculation of diluted EPS using the treasury stock method.

Also in April 2012, WPD (East Midlands) issued £100 million aggregate principal amount of 5.25% Senior Notes due 2023. WPD (East Midlands) received proceeds of approximately £111 million, which equated to $178 million at the time of issuance, net of underwriting fees. The net proceeds will be used for general corporate purposes.

(PPL and PPL Energy Supply)

In April 2012, an indirect, wholly owned subsidiary of PPL Energy Supply completed the Ironwood Acquisition. See Note 8 for information on the transaction and the debt of PPL Ironwood, LLC assumed through consolidation as part of the acquisition.

(PPL and PPL Electric)

In April 2012, PPL Electric gave notice that it had elected to redeem all 2.5 million shares of its 6.25% Series Preference Stock, par value $100 per share, on June 18, 2012. The price to be paid for the redemption is the par value, without premium ($250 million in the aggregate). The Preference Stock is reflected on PPL's Balance Sheets in "Noncontrolling Interests" and in "Preferred Securities" on PPL Electric's Balance Sheets at March 31, 2012 and December 31, 2011.

(PPL and LKE)

In April 2012, LKE filed a Form S-4 Registration Statement with the SEC, as required by a registration rights agreement entered into in connection with the issuance of senior notes in September 2011 in a transaction not registered under the Securities Act of 1933. The Form S-4 relates to an offer to exchange the senior notes issued in September 2011, with similar but registered securities. See Note 7 in PPL's and LKE's 2011 Form 10-K for additional information.

Legal Separateness

(PPL, PPL Energy Supply, PPL Electric and LKE)

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of PPL Energy Supply, PPL Electric and LKE are each separate legal entities. These subsidiaries are not liable for the debts of PPL Energy Supply, PPL Electric and LKE. Accordingly, creditors of PPL Energy Supply, PPL Electric and LKE may not satisfy their debts from the assets of their subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL Energy Supply, PPL Electric and LKE are not liable for the debts of their subsidiaries, nor are their subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of PPL Energy Supply, PPL Electric and LKE (or their other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions and Capital Contributions

(PPL)

In February 2012, PPL declared its quarterly common stock dividend, payable April 2, 2012, at 36.0 cents per share (equivalent to $1.44 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

During the three months ended March 31, 2012, the following distributions occurred:

	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
Dividends/distributions paid to parent/member	$ 557	$ 35	$ 25	$ 15	$ 24

(PPL, LKE, LG&E and KU)

In February 2012, LG&E and KU filed an application with the FERC seeking authorization to pay dividends in the future based on earnings reinvested balances, which would be calculated ignoring the impact of the accounting for the acquisition by PPL. If approved, as of March 31, 2012, this would increase the balance available for dividends from LG&E by $809 million and KU by $1.4 billion. LG&E and KU do not anticipate changing their dividend practices as a result of the filing.

8. Acquisitions, Development and Divestitures

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The Registrants periodically evaluate opportunities for potential acquisitions, divestitures and development projects. Development projects are periodically reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results.

Acquisitions

Ironwood Acquisition *(PPL and PPL Energy Supply)*

In April 2012, an indirect, wholly owned subsidiary of PPL Energy Supply completed the acquisition from a subsidiary of The AES Corporation of all of the equity interests of AES Ironwood, L.L.C. (subsequently renamed PPL Ironwood, LLC) and AES Prescott, L.L.C. (subsequently renamed PPL Prescott, LLC), which own and operate, respectively, the Ironwood Facility. The Ironwood Facility began operation in 2001 and, since 2008, PPL EnergyPlus has supplied natural gas for the operation of the Ironwood Facility and received the facility's full electricity output and capacity value pursuant to a tolling agreement that expires in 2021. The acquisition provides PPL Energy Supply, through its subsidiaries, operational control of additional combined-cycle gas generation in PJM.

At the date of acquisition, total future minimum lease payments to be made by PPL EnergyPlus to PPL Ironwood, LLC under the tolling agreement were $270 million. These payments will continue to be made by PPL EnergyPlus to PPL Ironwood, LLC following the acquisition. The tolling agreement obligation of PPL Ironwood, LLC will be recognized as a liability at fair value on the acquisition date. This liability of PPL Ironwood, LLC, and the existing assets recognized by PPL

EnergyPlus (which represent PPL EnergyPlus' rights to and the related accounting for the tolling agreement), will eliminate in consolidation because PPL Ironwood, LLC is now a subsidiary of PPL Energy Supply as a result of the acquisition. Any difference between these assets and the liability recorded will result in a gain or loss on the acquisition date. PPL Energy Supply cannot estimate the amount of this gain or loss at this time. See Note 11 in PPL's and PPL Energy Supply's 2011 Form 10-K for additional information on the tolling agreement.

The consideration paid for this acquisition, subject to working capital, net indebtedness and fair value adjustments, was as follows.

Aggregate enterprise consideration	$	302
Less: estimated long-term debt outstanding assumed through consolidation (net of restricted cash reserves)		217
Cash consideration paid for equity interests (including estimated working capital adjustments)	$	85

The estimated long-term debt outstanding assumed through consolidation consisted of $226 million of 8.857% senior secured bonds due 2025, plus $8 million of debt service reserve loans, net of $17 million of restricted cash reserves.

PPL Energy Supply has not completed its analysis of the allocation of the fair value of the acquired assets and liabilities assumed due to the timing of the closing of the transaction. PPL Energy Supply cannot estimate at this time the amount of goodwill, if any, that will result from this acquisition.

Acquisition of WPD Midlands *(PPL)*

See Notes 1 and 10 in PPL's 2011 Form 10-K for information on PPL's April 1, 2011 acquisition of WPD Midlands.

Separation Benefits - U.K. Regulated Segment

In connection with the 2011 acquisition, PPL completed a reorganization designed to transition WPD Midlands from a functional structure to a regional structure requiring a smaller combined support structure, reducing duplication and implementing more efficient procedures. More than 700 employees of WPD Midlands will have received separation benefits as a result of the reorganization by the end of 2012.

Separation benefits totaling $104 million, pre-tax, were associated with the reorganization, of which $93 million were recorded in the second half of 2011. Additional severance compensation was recorded during the three months ended March 31, 2012, as shown in the table below. The separation benefits are included in "Other operation and maintenance" on the Statement of Income.

The carrying amount of accrued severance was as follows.

Accrued severance at December 31, 2011	$	21
Severance compensation		6
Severance paid		(8)
Accrued severance at March 31, 2012	$	19

Pro forma Information

The pro forma operating revenues and net income attributable to PPL for the three months ended March 31, which includes WPD Midlands as if the acquisition had occurred January 1, 2010, are as follows.

		2011
Operating Revenues - PPL consolidated pro forma	$	3,215
Net Income Attributable to PPL - PPL consolidated pro forma		526

The pro forma financial information presented above has been derived from the historical consolidated financial statements of PPL and from the historical combined financial statements of WPD Midlands. Income (loss) from discontinued operations (net of income taxes), which was not significant, was excluded from the pro forma amounts above.

The pro forma adjustments include adjustments to depreciation, net periodic pension costs, interest expense, nonrecurring adjustments and the related income tax effects. Nonrecurring adjustments for the three months ended March 31 include the following pre-tax credits (expenses).

	Income Statement Line Item	2011
2011 Bridge Facility costs	Interest Expense	$ (7)
Net hedge losses	Other Income (Expense) - net	(7)
Other acquisition-related costs (a)	Other Income (Expense) - net	(11)

(a) Primarily includes advisory, accounting and legal fees.

Pending Bluegrass CTs Acquisition *(PPL, LKE, LG&E and KU)*

In September 2011, LG&E and KU entered into an Asset Purchase Agreement with Bluegrass Generation for the purchase of the Bluegrass CTs, aggregating approximately 495 MW, plus limited associated contractual arrangements required for operation of the units, for a purchase price of $110 million. Pursuant to the Asset Purchase Agreement, LG&E and KU will jointly acquire the Bluegrass CTs as tenants in common, with LG&E as owner of a 69% undivided interest, and KU as owner of a 31% undivided interest, in the purchased assets. In May 2012, the KPSC issued an order approving the purchase of the Bluegrass CTs. Also, on May 4, 2012, the FERC issued an order conditionally authorizing the acquisition of the Bluegrass CTs, subject to implementation of satisfactory mitigation measures to address market-power concerns. FERC approval of the proposed mitigation measures is required. LG&E and KU are reviewing the order's conditions and their impact on the closing conditions under the Bluegrass CTs purchase contract, as well as other regulatory, operational and economic aspects of the transaction. Either party can terminate the Asset Purchase Agreement should the purchase transaction fail to occur by June 30, 2012. PPL, LKE, LG&E and KU cannot currently predict the ultimate outcome of this matter.

Development

NGCC Construction *(PPL, LKE, LG&E and KU)*

In September 2011, LG&E and KU requested KPSC approval to build a 640 MW NGCC at the existing Cane Run plant site in Kentucky. In May 2012, the KPSC issued an order approving the request to build the NGCC. Subject to entering into contracting agreements, completing remaining permitting activities and building schedules, construction is expected to begin in 2012 and be completed during 2015. The project, which includes building a natural gas supply pipeline, has an expected cost of approximately $580 million.

In conjunction with this request and to meet new, stricter federal EPA regulations, LG&E and KU anticipate retiring six older coal-fired electric generating units at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. The Cane Run and Green River coal units are anticipated to remain operational until the replacement generation and associated transmission projects are completed. See Note 6 for additional information.

Bell Bend COLA *(PPL and PPL Energy Supply)*

The NRC continues to review the COLA submitted by a PPL Energy Supply subsidiary, PPL Bell Bend, LLC (PPL Bell Bend) for the proposed Bell Bend nuclear generating unit (Bell Bend) to be built adjacent to the Susquehanna plant. PPL Bell Bend has made no decision to proceed with construction of Bell Bend and expects that such decision will not be made for several years given the anticipated lengthy NRC license approval process. Additionally, PPL Bell Bend has announced that it does not expect to proceed with construction absent favorable economics, a joint arrangement with other interested parties and a federal loan guarantee or other acceptable financing. PPL Bell Bend is currently authorized to spend up to $162 million through 2012 on the COLA and other permitting costs (including land costs) necessary for construction. At March 31, 2012 and December 31, 2011, $137 million and $131 million of costs associated with the licensing application were capitalized and are included on the Balance Sheets in noncurrent "Other intangibles." PPL Bell Bend believes it is probable that these costs are ultimately recoverable following NRC approval of the COLA either through construction of the new nuclear unit, transfer of the COLA rights to a joint venture, or sale of the COLA rights to another party. PPL Bell Bend remains active in the DOE Federal loan guarantee application process. See Note 8 in PPL's and PPL Energy Supply's 2011 Form 10-K for additional information.

Susquehanna-Roseland Transmission Line *(PPL and PPL Electric)*

PPL Electric has experienced delays in obtaining necessary National Park Service (NPS) approvals for the Susquehanna-Roseland transmission line and anticipates a delay of the line's in-service date to 2015. In March 2012, the NPS announced that the route proposed by PPL Electric and PSE&G, previously approved by the Pennsylvania and New Jersey public utility commissions, is the preferred route for the line under the NPS's National Environmental Policy Act review. The NPS has stated that it expects to issue its record of decision in October 2012. An appeal of the New Jersey Board of Public Utilities approval of the line is pending before the New Jersey Superior Court Appellate Division. PPL Electric cannot predict the ultimate outcome or timing of the NPS approval or any further legal challenges to the project. PJM has developed a strategy to manage potential reliability problems until the line is built. PPL Electric cannot predict what additional actions, if any, PJM might take in the event of a further delay to its scheduled in-service date for the new line. See Note 8 in PPL's and PPL Electric's 2011 Form 10-K for additional information.

9. Defined Benefits

(PPL, PPL Energy Supply and PPL Electric)

Prior to January 1, 2012, the majority of PPL's Montana and Pennsylvania employees were eligible for pension benefits under PPL Montana's cash balance pension plan or PPL's qualified and non-qualified non-contributory defined benefit pension plans with benefits based on length of service and final average pay, as defined by the plans. Effective January 1, 2012, these plans were closed to newly hired salaried employees. Newly hired bargaining unit employees will continue to be eligible under these plans based on their collective bargaining agreements. Salaried employees hired on or after January 1, 2012 will be eligible to participate in the new PPL Retirement Savings Plan, a 401 (k) savings plan with enhanced employer matching. The changes to the plans are not expected to have a significant near-term cost impact.

(PPL, PPL Energy Supply, LKE and LG&E)

Following are the net periodic defined benefit costs (credits) of the plans sponsored by PPL, PPL Energy Supply, LKE and LG&E for the three months ended March 31.

	Pension Benefits				Other Postretirement Benefits	
	U.S.		U.K.			
	2012	2011	2012	2011	2012	2011
PPL						
Service cost	$ 26	$ 24	$ 13	$ 5	$ 3	$ 3
Interest cost	56	55	84	39	8	8
Expected return on plan assets	(66)	(62)	(111)	(52)	(6)	(6)
Amortization of:						
Transition obligation					1	
Prior service cost	6	6	1	1		
Actuarial (gain) loss	10	6	20	14	1	2
Net periodic defined benefit costs (credits)	$ 32	$ 29	$ 7	$ 7	$ 7	$ 7
PPL Energy Supply						
Service cost	$ 1	$ 1				
Interest cost	2	2				
Expected return on plan assets	(2)	(2)				
Amortization of:						
Actuarial (gain) loss	1					
Net periodic defined benefit costs (credits)	$ 2	$ 1				
LKE						
Service cost	$ 6	$ 6			$ 1	$ 1
Interest cost	17	17			2	3
Expected return on plan assets	(18)	(16)			(1)	(1)
Amortization of:						
Prior service cost	1	1			1	1
Actuarial (gain) loss	5	5				
Net periodic defined benefit costs (credits)	$ 11	$ 13			$ 3	$ 4
LG&E						
Interest cost	$ 4	$ 4				
Expected return on plan assets	(5)	(4)				
Amortization of:						
Prior service cost	1					
Actuarial (gain) loss	3	3				
Net periodic defined benefit costs (credits)	$ 3	$ 3				

(PPL Energy Supply, PPL Electric, LG&E and KU)

In addition to the specific plans they sponsor, PPL Energy Supply and its subsidiaries are also allocated costs of defined benefit plans sponsored by PPL Services and LG&E is allocated costs of defined benefit plans sponsored by LKE based on their participation in those plans, which management believes are reasonable. PPL Electric and KU do not directly sponsor any defined benefit plans. PPL Electric is allocated costs of defined benefit plans sponsored by PPL Services and KU is allocated costs of defined benefit plans sponsored by LKE based on their participation in those plans, which management believes are reasonable. PPL Services allocated the following net periodic benefit costs to PPL Energy Supply and PPL

Electric and LKE allocated the following net periodic benefit costs to LG&E and KU, including amounts applied to accounts that are further distributed between capital and expense for the three months ended March 31.

	2012	2011
PPL Energy Supply	$ 10	$ 7
PPL Electric	8	6
LG&E	3	4
KU	4	6

Expected Cash Flows - U.K. Pension Plans

(PPL)

During the three months ended March 31, 2012, WPD adjusted its expected pension contributions for 2012 to $307 million from $161 million as disclosed in PPL's 2011 Form 10-K. As of April 30, 2012, contributions of $186 million have been made. The increased contributions are being made to prepay future contribution requirements to fund pension plan deficits.

10. Commitments and Contingencies

Energy Purchase Commitments

(PPL and PPL Energy Supply)

In 2008, PPL EnergyPlus acquired the rights to an existing long-term tolling agreement associated with the output of the Ironwood Facility. Under the agreement, PPL EnergyPlus has control over the plant's dispatch into the electricity grid and supplies the natural gas necessary to operate the plant. The tolling agreement extends through 2021. In April 2012 an indirect, wholly owned subsidiary of PPL Energy Supply acquired the owner of the Ironwood Facility. See Note 8 for information on the Ironwood Acquisition.

(PPL and PPL Electric)

In 2009, the PUC approved PPL Electric's procurement plan for the period January 2011 through May 2013. To date, PPL Electric has conducted 11 of its 14 planned competitive solicitations. The solicitations include a mix of long-term and short-term purchases ranging from five months to ten years to fulfill PPL Electric's obligation to provide for customer supply as a PLR. In May 2012, PPL Electric filed a plan with the PUC to purchase its electric supply for default customers for the period June 2013 through May 2015. The plan proposes to buy this electricity twice a year, beginning in April 2013.

(PPL Energy Supply and PPL Electric)

See Note 11 for information on the power supply agreements between PPL EnergyPlus and PPL Electric.

Legal Matters

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL and its subsidiaries are involved in legal proceedings, claims and litigation in the ordinary course of business. PPL and its subsidiaries cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

TC2 Construction *(PPL, LKE, LG&E and KU)*

In June 2006, LG&E and KU, as well as the Indiana Municipal Power Agency and Illinois Municipal Electric Agency (collectively, TC2 Owners), entered into a construction contract regarding the TC2 project. The contract is generally in the form of a turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price. During 2009 and 2010, the TC2 Owners received several contractual notices from the TC2 construction contractor asserting historical force majeure and excusable event claims for a number of adjustments to the contract price, construction schedule, commercial operations date, liquidated damages or other relevant provisions. In September 2010, the TC2 Owners and the construction contractor agreed to a settlement to resolve the force majeure and excusable event claims occurring through July 2010, under the TC2 construction contract, which settlement provided for a limited, negotiated extension of the contractual commercial operations date and/or relief from liquidated damage calculations. With limited exceptions, the TC2 Owners took care, custody and control of TC2 in January 2011. Pursuant to certain amendments to the construction agreement, the contractor will complete modifications to the combustion system prior to certain dates to allow operation of TC2 on all specified fuels categories. The provisions of the construction agreement relating to liquidated damages were also amended. In September 2011, the TC2 Owners and the construction contractor entered into a further amendment to the construction agreement settling, among other matters, certain historical change order, labor rate and prior liquidated damages amounts. The remaining issues are still under discussion with the contractor. PPL, LKE, LG&E and KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project.

(PPL and PPL Energy Supply)

Montana Hydroelectric Litigation

In November 2004, PPL Montana, Avista Corporation (Avista) and PacifiCorp commenced an action for declaratory judgment in Montana First Judicial District Court seeking a determination that no lease payments or other compensation for their hydroelectric facilities' use and occupancy of certain riverbeds in Montana can be collected by the State of Montana. This lawsuit followed dismissal on jurisdictional grounds of an earlier federal lawsuit seeking such compensation in the U.S. District Court of Montana. The federal lawsuit alleged that the beds of Montana's navigable rivers became state-owned trust property upon Montana's admission to statehood, and that the use of them should, under a 1931 regulatory scheme enacted after all but one of the hydroelectric facilities in question were constructed, trigger lease payments for use of land beneath. In July 2006, the Montana state court approved a stipulation by the State of Montana that it was not seeking compensation for the period prior to PPL Montana's December 1999 acquisition of the hydroelectric facilities.

Following a number of adverse trial court rulings, in 2007 Pacificorp and Avista each entered into settlement agreements with the State of Montana providing, in pertinent part, that each company would make prospective lease payments for use of the State's navigable riverbeds (subject to certain future adjustments), resolving the State's claims for past and future compensation.

Following an October 2007 trial of this matter on damages, in June 2008, the Montana District Court awarded the State retroactive compensation of approximately $35 million for the 2000-2006 period and approximately $6 million for 2007 compensation. Those unpaid amounts accrued interest at 10% per year. The Montana District Court also deferred determination of compensation for 2008 and future years to the Montana State Land Board. In October 2008, PPL Montana appealed the decision to the Montana Supreme Court, requesting a stay of judgment and a stay of the Land Board's authority to assess compensation for 2008 and future periods. In March 2010, the Montana Supreme Court substantially affirmed the 2008 Montana District Court decision.

In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition, and in February 2012 the U.S. Supreme Court issued a decision overturning the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, in the fourth quarter of 2011, PPL Montana reversed its total loss accrual of $89 million ($53 million after-tax) which had been recorded prior to the U.S. Supreme Court decision. PPL Montana believes the U.S. Supreme Court decision resolves certain questions of liability in this case in favor of PPL Montana and leaves open for reconsideration by Montana courts, consistent with the findings of the U.S. Supreme Court, certain other questions. In March 2012, the case was returned to the Montana Supreme Court and in April 2012 remanded to the Montana First Judicial District Court. PPL Montana has concluded it is no longer probable, but it remains reasonably possible, that a loss has been incurred. While unable to estimate a range of loss, PPL Montana believes that any such amount should not be material.

Bankruptcy of SMGT

In October 2011, SMGT, a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019 (SMGT Contract), filed for protection under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the District of Montana. At the time of the bankruptcy filing, SMGT was PPL EnergyPlus' largest unsecured credit exposure.

The SMGT Contract provided for fixed volume purchases on a monthly basis at established prices. Pursuant to a court order and subsequent stipulations entered into between the SMGT bankruptcy trustee and PPL EnergyPlus, since the date of its Chapter 11 filing through January 2012, SMGT continued to purchase electricity from PPL EnergyPlus at the price specified in the SMGT Contract, and made timely payments for such purchases, but at lower volumes than as prescribed in the SMGT Contract. In January 2012, the trustee notified PPL EnergyPlus that SMGT would not purchase electricity under the SMGT Contract for the month of February. In March 2012, the U.S. Bankruptcy Court for the District of Montana issued an order approving the request of the SMGT trustee and PPL EnergyPlus to terminate the SMGT Contract. As a result, the SMGT

Contract was terminated effective April 1, 2012, allowing PPL EnergyPlus to resell the electricity previously contracted to SMGT under the SMGT Contract to other customers.

PPL EnergyPlus' receivable under the SMGT Contract totaled approximately $22 million at March 31, 2012, which has been fully reserved. No assurance can be given as to the collectability of the receivable.

At this time, PPL Energy Supply cannot predict the prices and other terms on which it will be able to market to third parties the power that SMGT will not purchase from PPL EnergyPlus due to the termination of the SMGT Contract.

Regulatory Issues

(PPL, PPL Electric, LKE, LG&E and KU)

See Note 6 for information on regulatory matters related to utility rate regulation.

Enactment of Financial Reform Legislation *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

In July 2010, the Dodd-Frank Act was signed into law. The Dodd-Frank Act includes provisions that impose derivative transaction reporting requirements and require most over-the-counter derivative transactions to be executed through an exchange and to be centrally cleared. The Dodd-Frank Act also provides that the U.S. Commodity Futures Trading Commission (CFTC) may impose collateral and margin requirements for over-the-counter derivative transactions, as well as capital requirements for certain entity classifications. Final rules on major provisions in the Dodd-Frank Act are being established through rulemakings, and the CFTC generally has postponed implementation until the later of July 16, 2012 or when required key final rules are issued (e.g. definitional rules for "swap" and "swap dealer"). In April 2012, the CFTC approved the Final Rule (Final Rule) defining key terms such as "swap dealer." The definition of swap dealer, among other things, provides a significantly higher *de minimis* threshold amount of annual derivative transactions in which a party must have engaged in order to be classified as a swap dealer than was provided for in the CFTC's proposed rule, and is an amount that would not currently result in the Registrants being deemed swap dealers. There are numerous other provisions in the Final Rule, however, that the Registrants have not yet analyzed that could result in their being subject to the more onerous compliance requirements applicable to swap dealers. Even if the Registrants are not ultimately subject to the compliance requirements applicable to swap dealers, the Dodd-Frank Act and its implementing regulations nevertheless will impose on them significant additional and potentially costly recordkeeping and reporting requirements. Also, the Registrants could face significantly higher operating costs or may be required to post additional collateral if they are subject to margin requirements as ultimately adopted in the implementing regulations of the Dodd-Frank Act. The Registrants will continue to evaluate the provisions of the Dodd-Frank Act and its implementing regulations. At this time, the Registrants cannot predict the impact that the law or its implementing regulations will have on their businesses or operations, or the markets in which they transact business, but could incur material costs related to compliance with the Dodd-Frank Act.

New Jersey Capacity Legislation *(PPL, PPL Energy Supply and PPL Electric)*

In January 2011, New Jersey enacted a law that intervenes in the wholesale capacity market exclusively regulated by the FERC: S. No. 2381, 214th Leg. (N.J. 2011) (the Act). To create incentives for the development of new, in-state electric generation facilities, the Act implements a "long-term capacity agreement pilot program (LCAPP)." The Act requires New Jersey utilities to pay a guaranteed fixed price for wholesale capacity, imposed by the New Jersey Board of Public Utilities (BPU), to certain new generators participating in PJM, with the ultimate costs of that guarantee to be borne by New Jersey ratepayers. PPL believes the intent and effect of the LCAPP is to encourage the construction of new generation in New Jersey even when, under the FERC-approved PJM economic model, such new generation would not be economic. The Act could depress capacity prices in PJM in the short term, impacting PPL Energy Supply's revenues, and harm the long-term ability of the PJM capacity market to incent necessary generation investment throughout PJM. In February 2011, the PJM Power Providers Group (P3), an organization in which PPL is a member, filed a complaint before the FERC seeking changes in PJM's capacity market rules designed to ensure that subsidized generation, such as may result from the implementation of the LCAPP, will not be able to set capacity prices artificially low as a result of their exercise of buyer market power. In April 2011, the FERC issued an order granting in part and denying in part P3's complaint and ordering changes in PJM's capacity rules consistent with a significant portion of P3's requested changes. Several parties have filed appeals of the FERC's order. PPL, PPL Energy Supply and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

In addition, in February 2011, PPL, and several other generating companies and utilities filed a complaint in U.S. District Court in New Jersey challenging the Act on the grounds that it violates well-established principles under the Supremacy Clause and the Commerce Clause of the U.S. Constitution. In this action, the plaintiffs request declaratory and injunctive relief barring implementation of the Act by the Commissioners of the BPU. In October 2011, the court denied the BPU's motion to dismiss the proceeding and the litigation is moving forward. PPL, PPL Energy Supply and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

Maryland Capacity Order

In April 2012, the Maryland Public Service Commission (MD PSC) ordered three electric utilities in Maryland to enter into long-term contracts to support the construction of new electric generating facilities in Maryland, specifically a 661 MW natural gas-fired combined-cycle generating facility to be owned by CPV Maryland, LLC. PPL believes the intent and effect of the action by the MD PSC is to encourage the construction of new generation in Maryland even when, under the FERC-approved PJM economic model, such new generation would not be economic. The MD PSC action could depress capacity prices in PJM in the short term, impacting PPL Energy Supply's revenues, and harm the long-term ability of the PJM capacity market to encourage necessary generation investment throughout PJM.

In April 2012, PPL and several other generating companies filed a complaint in U.S. District Court in Maryland challenging the MD PSC order on the grounds that it violates well-established principles under the Supremacy and Commerce clauses of the U.S. Constitution. In this action, the plaintiffs request declaratory and injunctive relief barring implementation of the order by the Commissioners of the MD PSC. PPL, PPL Energy Supply, and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

Pacific Northwest Markets *(PPL and PPL Energy Supply)*

Through its subsidiaries, PPL Energy Supply made spot market bilateral sales of power in the Pacific Northwest during the period from December 2000 through June 2001. Several parties subsequently claimed refunds at FERC as a result of these sales. In June 2003, the FERC terminated proceedings to consider whether to order refunds for spot market bilateral sales made in the Pacific Northwest, including sales made by PPL Montana, during the period December 2000 through June 2001. In August 2007, the U.S. Court of Appeals for the Ninth Circuit reversed the FERC's decision and ordered the FERC to consider additional evidence. In October 2011, FERC initiated proceedings to consider additional evidence.

Although PPL and its subsidiaries believe that they have not engaged in any improper trading or marketing practices affecting the Pacific Northwest markets, PPL and PPL Energy Supply cannot predict the outcome of the above-described proceedings or whether any subsidiaries will be the subject of any additional governmental investigations or named in other lawsuits or refund proceedings. Consequently, PPL and PPL Energy Supply cannot estimate a range of reasonably possible losses, if any, related to this matter.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

FERC Market-Based Rate Authority

In 1998, the FERC authorized LG&E and KU and PPL EnergyPlus to make wholesale sales of electric power and related products at market-based rates. In those orders, the FERC directed LG&E and KU and PPL EnergyPlus, respectively, to file an updated market analysis within three years after the order, and every three years thereafter. Since then, periodic market-based rate filings with the FERC have been made by LG&E and KU, and PPL EnergyPlus, PPL Electric, PPL Montana and most of PPL Generation's subsidiaries. These filings consisted of a Northwest market-based rate filing for PPL Montana and a Northeast market-based rate filing for most of the other PPL subsidiaries in PJM's region. In June 2011, FERC approved PPL's market-based rate update for the Eastern region and PPL's market-based rate update for the Western region. Also, in June 2011, PPL filed its market-based rate update for the Southeast region, including LG&E and KU in addition to PPL EnergyPlus. In June 2011, the FERC issued an order approving LG&E's and KU's request for a determination that they no longer be deemed to have market power in the BREC balancing area and removing restrictions on their market-based rate authority in such region.

Currently, a seller granted FERC market-based rate authority may enter into power contracts during an authorized time period. If the FERC determines that the market is not workably competitive or that the seller possesses market power or is not charging "just and reasonable" rates, it may institute prospective action, but any contracts entered into pursuant to the FERC's market-based rate authority remain in effect and are generally subject to a high standard of review before the FERC can order changes. Recent court decisions by the U.S. Court of Appeals for the Ninth Circuit have raised issues that may make it more difficult for the FERC to continue its program of promoting wholesale electricity competition through market-based rate authority. These court decisions permit retroactive refunds and a lower standard of review by the FERC for changing power contracts, and could have the effect of requiring the FERC in advance to review most, if not all, power contracts. In June 2008, the U.S. Supreme Court reversed one of the decisions of the U.S. Court of Appeals for the Ninth Circuit, thereby upholding the higher standard of review for modifying contracts. At this time, PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU cannot predict the impact of these court decisions on the FERC's future market-based rate authority program or on their businesses.

Energy Policy Act of 2005 - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. The FERC has indicated it intends to vigorously enforce the Reliability Standards using, among other means, civil penalty authority. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations. The first group of Reliability Standards approved by the FERC became effective in June 2007.

LG&E, KU , PPL Electric and certain subsidiaries of PPL Energy Supply monitor their compliance with the Reliability Standards and continue to self-report potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a number of potential violations is pending. Any regional reliability entity determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC. The Registrants cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any, other than the amounts currently recorded.

In the course of implementing its program to ensure compliance with the Reliability Standards by those PPL affiliates subject to the standards, certain other instances of potential non-compliance may be identified from time to time.

Environmental Matters - Domestic

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Due to the environmental issues discussed below or other environmental matters, it may be necessary for the Registrants to modify, curtail, replace or cease operating certain facilities or operations to comply with statutes, regulations and other requirements of regulatory bodies or courts.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Air

To comply with air emissions requirements and certain other environmental requirements as described below, PPL's forecast for capital expenditures reflects a best estimate projection of expenditures that may be required within the next five years. Such projections total $3.1 billion for LG&E and KU and include $100 million for LG&E and $400 million for KU associated with approved ECR plans through 2013 to achieve emissions reductions and manage coal combustion residuals. The projections also include $1.4 billion for LG&E and $900 million for KU associated with the recently approved 2011 ECR Plans for additional expenditures to comply with new clean air rules and manage coal combustion residuals and an additional $300 million for other environmental expenditures. Such projections for PPL Energy Supply are $130 million. Actual costs (including capital, allowance purchases and operational modifications) may be significantly lower or higher depending on the final requirements and market conditions. Certain environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are subject to recovery through the ECR.

CSAPR (formerly Clean Air Transport Rule)

In July 2011, the EPA adopted the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. The CSAPR replaces the EPA's previous CAIR which was invalidated by the U.S. Court of Appeals for the District of Columbia Circuit (the Court) in July 2008. CAIR subsequently was effectively reinstated by the Court in December 2008, pending finalization of the Transport Rule. Like CAIR and the proposed Transport Rule, the CSAPR only applies to PPL's fossil-fueled generating plants located in Kentucky and Pennsylvania.

The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxides. The CSAPR establishes new sulfur dioxide emission allowance cap and trade programs that are completely independent of, and more stringent than, the current Acid Rain Program. The CSAPR also establishes nitrogen oxides emission allowance cap and trade programs to replace the existing programs. All trading is more restrictive than previously under CAIR. The CSAPR provides for two-phased programs of sulfur dioxide and nitrogen oxide emissions reductions, with initial reductions in 2012 and more stringent reductions in 2014.

In December 2011, the Court stayed implementation of the CSAPR and left CAIR in effect pending a final decision on the validity of the rule. In February, the EPA made revisions to the rule. Oral argument on legal challenges to the CSAPR has been held, and a final decision on the validity of the rule is expected in 2012.

With respect to the Kentucky fossil-fueled generating plants, the stay of the CSAPR will initially only impact the unit dispatch order. With the return of the CAIR and the Kentucky companies' significant number of sulfur dioxide allowances, those units will be dispatched with lower operating cost, but slightly higher sulfur dioxide and nitrogen oxide emissions. However, a key component of the Court's final decision, even if the CSAPR is upheld, will be whether the ruling delays the implementation of the CSAPR by one year for both Phases I and II, or instead continues to require the significant sulfur dioxide and nitrogen oxide reductions associated with Phase II to begin in 2014. LG&E's and KU's CSAPR compliance strategy is based on over-compliance during Phase I to generate allowances sufficient to cover the expected shortage during the first two years of Phase II (2014 and 2015) when additional pollution control equipment will be installed. Should Phase I of the CSAPR be shortened to one year, it will be more difficult and costly to provide enough excess allowances in one year to meet the shortage projected for 2014 and 2015.

PPL Energy Supply's fossil-fueled generating plants can meet both the CAIR and the stayed CSAPR sulfur dioxide emission requirements with the existing scrubbers that were placed in service in 2008 and 2009. To meet nitrogen oxide standards, under both the CAIR and the stayed CSAPR, PPL Energy Supply would need to buy allowances or make operational changes, the costs of which are not anticipated to be significant.

National Ambient Air Quality Standards

In addition to the reductions in sulfur dioxide and nitrogen oxide emissions required under the CSAPR for the Pennsylvania and Kentucky plants, PPL's fossil-fueled generating plants, including those in Montana, may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates.

In June 2010, the EPA finalized a new one-hour standard for sulfur dioxide, and states are required to identify areas that meet those standards and areas that are in non-attainment. For non-attainment areas, states are required to develop plans by 2014 to achieve attainment by 2017. For areas in attainment or that are unclassifiable, states are required to develop maintenance plans by mid-2013 that demonstrate continued attainment.

PPL, PPL Energy Supply, LKE, LG&E and KU anticipate that some of the measures required for compliance with the CAIR or the CSAPR such as upgraded or new sulfur dioxide scrubbers at some of their plants or, in the case of LG&E and KU, upgraded or new sulfur dioxide scrubbers at the Mill Creek plant and retirement of the Cane Run, Green River, and Tyrone plants, will also be necessary to achieve compliance with the new one-hour sulfur dioxide standard. If additional reductions were to be required, the economic impact could be significant.

Mercury and Other Hazardous Air Pollutants

In May 2011, the EPA published a proposed regulation providing for stringent reductions of mercury and other hazardous air pollutants. On February 16, 2012, the EPA published the final rule, known as the Mercury and Air Toxics Standards (MATS), with an effective date of April 16, 2012. The rule is being challenged by industry groups and states.

The rule provides for a three-year compliance deadline with the potential for a one-year extension as provided under the statute. Based on their assessment of the need to install pollution control equipment to meet the provisions of the proposed rule, LG&E and KU filed requests with the KPSC for environmental cost recovery to facilitate moving forward with plans to install environmental controls including sorbent injection and fabric-filter baghouses to remove certain hazardous air pollutants. Recovery of the cost of certain controls was granted by a KPSC order issued in December 2011. The cost for these controls is reflected in the combined costs of $3.1 billion for LG&E and KU noted under "Air" above. LG&E and KU have also filed requests with the KPSC for retirement of coal-fired generating units at the Cane Run, Green River, and Tyrone plants and replacement of those units with natural gas-fired generating units to be constructed or purchased. With the publication of the final MATS rule, LG&E and KU are currently assessing whether changes in the final rule warrant revision of their approved compliance plans.

With respect to PPL Energy Supply's Pennsylvania plants, PPL believes that these plants may require installation of chemical additive systems, the cost of which is not expected to be material. With respect to the PPL Montana plants, modifications to the current air pollution controls installed on Colstrip may be required, the cost of which also is not expected to be material. For the Corette plant, additional controls are being evaluated, the cost of which could be significant. PPL Energy Supply, LG&E and KU are continuing to conduct in-depth reviews of the MATS.

Regional Haze and Visibility

In January 2012, the EPA proposed limited approval of the Pennsylvania Regional Haze State Implementation Plan. That proposed action would essentially approve PPL's analysis that further particulate controls at PPL Energy Supply's Pennsylvania plants are not warranted. The limited approval does not address deficiencies of the state plan arising from the remand of the CAIR rule. Previously, the EPA had determined that implementation of the CAIR requirements would meet regional haze BART (Best Available Retrofit Technology) requirements for sulfur dioxide and nitrogen oxides. In December 2011, the EPA proposed that implementation of the CSAPR would also meet the BART. The EPA is expected to make a final rule this year. This is expected to address that deficiency.

In Montana, the EPA Region 8 is developing the regional haze plan as the Montana Department of Environmental Quality declined to develop a BART state implementation plan at this time. PPL submitted to the EPA its analyses of the visibility impacts of sulfur dioxide, nitrogen oxides and particulate matter emissions for Colstrip Units 1 and 2 and Corette. PPL's analyses concluded that further reductions are not warranted. PPL has also submitted data and a high-level analysis of various air emission control options to reduce air emissions related to the non-BART-affected emission sources of Colstrip Units 3 and 4 under the Reasonable Further Progress goals of the Regional Haze rules. The analysis shows that any incremental reductions would not be cost effective and that further analysis is not warranted.

In March 2012, the EPA issued its draft Federal Implementation Plan (FIP) of the Regional Haze Rule for Montana. The draft FIP identified no additional controls for Corette or Colstrip 3 and 4. Under the draft FIP, Colstrip Units 1 and 2 would require additional controls (such as, SNCR, separated overfire air on the low nitrogen oxide burners, lime injection and additional scrubber vessels) to meet the proposed more stringent nitrogen oxide and sulfur dioxide limits. The cost of these potential additional controls could be significant. PPL Energy Supply is currently analyzing the draft FIP and assessing various courses of action.

LG&E and KU also submitted analyses of the visibility impacts of their Kentucky BART-eligible sources to the Kentucky Division for Air Quality (KDAQ). Only LG&E's Mill Creek plant was determined to have a significant regional haze impact. The KDAQ has submitted a regional haze state implementation plan (SIP) to the EPA which requires the Mill Creek plant to reduce its sulfuric acid mist emissions from Units 3 and 4. After approval of the Kentucky SIP by the EPA and revision of the Mill Creek plant's Title V air permit, LG&E intends to install sorbent injection controls at the plant to reduce sulfuric acid mist emissions. In the event that the EPA determines that compliance with the CSAPR would be insufficient to meet the BART requirements, it would be necessary for LG&E and KU to reassess their planned compliance measures.

New Source Review (NSR)

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act. In April 2009, PPL received EPA information requests for its Montour and Brunner Island plants. The requests are similar to those that PPL received several years ago for its Colstrip, Corette and Martins Creek plants. PPL and the EPA have exchanged certain information regarding this matter. In January 2009, PPL and other companies that own or operate the Keystone plant in Pennsylvania received a notice of violation from the EPA alleging that certain projects were undertaken without proper NSR compliance. PPL and PPL Energy Supply cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In addition, in August 2007, LG&E and KU received information requests for their Mill Creek, Trimble County, and Ghent plants, but have received no further communications from the EPA since providing their responses. PPL, LKE, LG&E and KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In March 2009, KU received a notice alleging that KU violated certain provisions of the Clean Air Act's rules governing NSR and prevention of significant deterioration by installing sulfur dioxide scrubbers and SCR controls at its Ghent generating plant without assessing potential increased sulfuric acid mist emissions. KU contends that the work in question, as pollution control projects, was exempt from the requirements cited by the EPA. In December 2009, the EPA issued an information request on this matter. KU has exchanged settlement proposals and other information with the EPA regarding imposition of additional permit limits and emission controls and anticipates continued settlement negotiations. In addition, any settlement or future litigation could potentially encompass a September 2007 notice of violation alleging opacity violations at the plant. Depending on the provisions of a final settlement or the results of litigation, if any, resolution of this matter could involve significant increased operating and capital expenditures. PPL, LKE and KU cannot predict the final outcome of this matter, but currently do not expect such outcome to result in material losses above the respective amounts accrued by KU.

If PPL subsidiaries are found to have violated NSR regulations, PPL would, among other things, be required to meet permit limits reflecting Best Available Control Technology (BACT) for the emissions of any pollutant found to have significantly increased due to a major plant modification. The costs to meet such limits, including installation of technology at certain units, could be significant.

States and environmental groups also have initiated enforcement actions and litigation alleging violations of the NSR regulations by coal-fired generating plants, and PPL is unable to predict whether such actions will be brought against any of PPL's plants.

TC2 Air Permit (PPL, LKE, LG&E and KU)

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an Order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which were incorporated into a final revised permit issued by the KDAQ in January 2010. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, PPL, LKE, LG&E and KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Global Climate Change

There is concern nationally and internationally about global climate change and the possible contribution of GHG emissions including, most significantly, carbon dioxide, from the combustion of fossil fuels. This has resulted in increased demands for carbon dioxide emission reductions from investors, environmental organizations, government agencies and the international community. These demands and concerns have led to federal legislative proposals, actions at regional, state and local levels, litigation relating to GHG emissions and the EPA regulations on GHGs.

Greenhouse Gas Legislation

While climate change legislation was considered prior to 2010, the outcome of the 2010 elections has halted the debate on such legislation. The timing and elements of any future legislation addressing GHG emission reductions are uncertain at this time. In the current Congress, legislation barring the EPA from regulating GHG emissions under the existing authority of the Clean Air Act has been passed by the U.S. House of Representatives. Various bills providing for barring or delaying the EPA from regulating GHG emissions have been introduced in the U.S. Senate, but the prospects for passage of such legislation remain uncertain. At the state level, the results of the 2010 elections in Pennsylvania reduced the likelihood of GHG legislation in the near term, and there are currently no prospects for such legislation in Kentucky or Montana.

Greenhouse Gas Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has the authority under the Clean Air Act to regulate GHG emissions from new motor vehicles, in April 2010 the EPA and the U.S. Department of Transportation issued light-duty vehicle emissions standards that apply to 2012 model year vehicles. The EPA has also clarified that this standard, beginning in 2011, also authorizes regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act. As a result, any new sources or major modifications to existing GHG sources causing a net significant emissions increase requires the BACT permit limits for GHGs. The EPA has proposed guidance for conducting a BACT analysis for projects that trigger such a review. In addition, in April 2012, the EPA proposed New Source Performance Standards (NSPS) for carbon dioxide emissions from new coal-fired generating units, combined-cycle natural gas units, and integrated gasification combined-cycle units.

At the regional level, ten northeastern states signed a Memorandum of Understanding (MOU) agreeing to establish a GHG emission cap-and-trade program, called the Regional Greenhouse Gas Initiative (RGGI). The program commenced in January 2009 and calls for stabilizing carbon dioxide emissions, at base levels established in 2005, from electric power plants with capacity greater than 25 MW. The MOU also provides for a 10% reduction by 2019 in carbon dioxide emissions from base levels.

Pennsylvania has not stated an intention to join the RGGI, but enacted the Pennsylvania Climate Change Act of 2008 (PCCA). The PCCA established a Climate Change Advisory Committee to advise the PADEP on the development of a Climate Change Action Plan. In December 2009, the Advisory Committee finalized its Climate Change Action Report which identifies specific actions that could result in reducing GHG emissions by 30% by 2020. Some of the proposed actions, such as a mandatory 5% efficiency improvement at power plants, could be technically unachievable. To date, there have been no regulatory or legislative actions taken to implement the recommendations of the report. In addition, legislation has been introduced that would, if enacted, accelerate solar supply requirements and restrict eligible solar projects to those located in Pennsylvania. PPL cannot predict at this time whether this legislation will be enacted.

Eleven Western states, including Montana and certain Canadian provinces, are members of the Western Climate Initiative (WCI). The WCI has established a goal of reducing carbon dioxide emissions 15% below 2005 levels by 2020 and is currently developing GHG emission allocations, offsets, and reporting recommendations.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. To date the state has yet to issue a final plan. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting plants, and the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of AEP v. Connecticut reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the lower court and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In Comer v. Murphy Oil, the U.S. Court of Appeals for the Fifth Circuit declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the Comer case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Court of Appeals' ruling. In May 2011, the plaintiffs in the Comer case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including KU and three other indirect subsidiaries of LKE, under a Mississippi statute that allows the re-filing of an action in certain circumstances. In March 2012, the court granted defendants' motions to dismiss the state common law claims because plaintiffs had previously raised the same claims, plaintiffs lacked standing, plaintiff's claims were displaced by the Clean Air Act, and other grounds. In April 2012, plaintiffs filed a notice of appeal in the U.S. Court of Appeals for the Fifth Circuit. Additional litigation in federal and state courts over these issues is continuing. PPL, LKE and KU cannot predict the outcome of this litigation or estimate a range of reasonably possible losses, if any.

In 2011, PPL's power plants emitted approximately 74 million tons of carbon dioxide compared with 68 million tons in 2010. The 2011 total reflects 36 million tons from PPL Generation and 38 million tons from LG&E's and KU's generating fleet. All tons are U.S. short tons (2,000 lbs/ton).

Renewable Energy Legislation (PPL and PPL Energy Supply)

There has been interest in renewable energy legislation at both the state and federal levels. At the federal level, House and Senate bills proposed in the 111th Congress would have imposed mandatory renewable energy supply and energy efficiency requirements in the 15% to 20% range by approximately 2020. Earlier in 2011, there were discussions regarding a Clean Energy Standard (CES) that addressed not only renewables but also encouraged clean energy requirements (as yet to be defined). At this time, neither the renewable energy debate nor the CES discussion is expected to gain momentum at the federal or state levels (beyond what is otherwise already required in Pennsylvania and Montana) in the near term.

PPL believes there are financial, regulatory and logistical uncertainties related to GHG reductions and the implementation of renewable energy mandates. These will need to be resolved before the impact of such requirements on PPL can be meaningfully estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation oversupply that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy. These uncertainties are not directly addressed by proposed legislation. PPL and PPL Energy Supply cannot predict at this time the effect on their future competitive position, results of operation, cash flows and financial position of any GHG emissions, renewable energy mandate or other global climate change requirements that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs) (PPL, PPL Energy Supply, LKE, LG&E and KU)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The first approach would regulate CCRs as a hazardous waste under Subtitle C of the RCRA. This approach would have very significant impacts on any coal-fired plant, and would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through generation, transportation, and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. Specifically, hazardous waste regulation could accelerate retirements of coal-fired plants. The second approach would regulate CCRs as a solid waste under Subtitle D of the RCRA. This approach would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, PPL expects that several of its plants in Kentucky and Montana could be significantly impacted by the requirements of Subtitle D of the RCRA, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. PPL has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several PPL plants and PPL has implemented certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) that requests comments on selected documents that the EPA received during the comment period for the proposed regulations. Comments were submitted on the NODA in November 2011. In addition, the U.S. House of Representatives in October 2011 approved a bill to modify Subtitle D of the RCRA to provide for the proper management and disposal of CCRs and that would preclude the EPA from regulating CCRs under Subtitle C of the RCRA. The bill has been introduced in the Senate and the prospect for passage of this legislation is uncertain.

In January 2012, a coalition of environmental groups filed a 60-day notice of intent to sue the EPA for failure to perform nondiscretionary duties under RCRA, which could require a hard deadline for EPA to issue strict CCR regulations. In February 2012, a CCR recycling company also issued a 60-day notice of intent to sue the EPA over its timeliness in issuing CCR regulations, but that company requests that the EPA take a Subtitle D approach that would allow for continued recycling of CCRs. The coalition filed its lawsuit in April 2012. The EPA has indicated that they will issue another NODA later this spring to request comments on the extensive data that the EPA collected from coal-fired power plant operators as part of the EPA's Effluent Limitations Guideline rule modification process which the EPA wants to use in the CCR regulatory development process.

PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on their facilities, but the economic impact could be significant.

Martins Creek Fly Ash Release (PPL and PPL Energy Supply)

In 2005, there was a release of approximately 100 million gallons of water containing fly ash from a disposal basin at the Martins Creek plant used in connection with the operation of the plant's two 150 MW coal-fired generating units. This resulted in ash being deposited onto adjacent roadways and fields, into a nearby creek and the Delaware River. PPL determined that the release was caused by a failure in the disposal basin's discharge structure. PPL conducted extensive clean-up and completed studies, in conjunction with a group of natural resource trustees and the Delaware River Basin Commission, evaluating the effects of the release on the river's sediment, water quality and ecosystem.

The PADEP filed a complaint in Pennsylvania Commonwealth Court against PPL Martins Creek and PPL Generation, alleging violations of various state laws and regulations and seeking penalties and injunctive relief. PPL and the PADEP have settled this matter. The settlement also required PPL to submit a report on the completed studies of possible natural resource damages. PPL subsequently submitted the assessment report to the Pennsylvania and New Jersey regulatory agencies and has continued discussing potential natural resource damages and mitigation options with the agencies. Subsequently, in August 2011 the PADEP submitted its National Resource Damage Assessment report to the court and to the interveners. In December 2011, the interveners commented on the PADEP report and in February 2012 the PADEP and PPL filed separate responses with the court. In March 2012, the court dismissed the interveners' case, but the interveners have appealed the dismissal to the Pennsylvania Supreme Court. The settlement agreement for the Natural Resources Damage Claim has not yet been submitted for public comments, which is the next phase in the process of finalizing the claim.

Through March 31, 2012, PPL Energy Supply has spent $28 million for remediation and related costs and an insignificant remediation liability remains on the balance sheet. PPL and PPL Energy Supply cannot be certain of the outcome of the natural resource damage assessment or the associated costs, the outcome of any lawsuit that may be brought by citizens or businesses or the exact nature of any other regulatory or other legal actions that may be initiated against PPL, PPL Energy Supply or their subsidiaries as a result of the disposal basin release. However, PPL and PPL Energy Supply currently do not expect such outcomes to result in material losses above the amounts currently recorded.

Seepages and Groundwater Infiltration - Pennsylvania, Montana and Kentucky

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various PPL plants. PPL has completed or is completing assessments of seepages or groundwater infiltration at various facilities and has completed or is working with agencies to implement abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

(PPL and PPL Energy Supply)

In 2007, six plaintiffs filed a lawsuit in the Montana Sixteenth Judicial District Court against the Colstrip plant owners asserting property damage due to seepage from wastewater ponds at Colstrip. A settlement agreement was reached in July 2010 which would have resulted in a payment by PPL Montana, but certain of the plaintiffs later alleged the settlement was not final. The Colstrip plant owners filed a motion to enforce the settlement and in October 2011 the court granted the motion and ordered the settlement to be completed in 60 days. The plaintiffs have appealed the October order to the Montana Supreme Court, and the court's decision is expected in the second half of 2012. The settlement ordered by the district court is, therefore, not final and PPL and PPL Energy Supply cannot predict the outcome of the appeal, although PPL Montana's share of any final settlement in excess of amounts recorded is not expected to be significant.

Clean Water Act 316(b) (PPL, PPL Energy Supply, LKE, LG&E and KU)

The EPA finalized requirements in 2004 for new or modified cooling water intake structures. These requirements affect where generating plants are built, establish intake design standards and could lead to requirements for cooling towers at new and modified power plants. In 2009, however, the U.S. Supreme Court ruled that the EPA has discretion to use cost-benefit analysis in determining the best technology available for minimizing adverse environmental impact to aquatic organisms. The EPA published the proposed rule in April 2011. The industry and PPL reviewed the proposed rule and submitted comments. The EPA is evaluating comments and meeting with industry groups to discuss options. The final rule is expected to be issued in 2012. The proposed rule contains two requirements to reduce impact to aquatic organisms. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens regardless of the levels of mortality actually occurring or the cost of achieving the requirements. The second requirement is to determine and install the best technology available to reduce mortality of aquatic organisms that are pulled through the plant's cooling water system. A form of cost-benefit analysis is allowed for this second requirement. This process involves a site-specific evaluation based on nine factors including impacts to energy delivery reliability and remaining useful life of the plant. PPL, PPL Energy Supply, LKE, LG&E and KU will be unable to determine the exact impact until a final rule is issued, the required studies have been completed, and each state in which they operate has decided how to implement the rule.

Effluent Limitations Guidelines and Standards (PPL, PPL Energy Supply, LKE, LG&E and KU)

In October 2009, the EPA released its Final Detailed Study of the Steam Electric Power Generating effluent limitations guidelines and standards. The EPA is expected to propose modifications to these regulations in 2012 and issue the final regulations in 2014. PPL expects the revised guidelines and standards to be more stringent than the current standards especially for sulfur dioxide scrubber wastewater and ash basin discharges, which could result in more stringent discharge permit limits. In the interim, PPL, PPL Energy Supply, LKE, LG&E and KU are each unable to predict whether the EPA and the states may impose more stringent limits on a case-by-case best professional judgment basis under existing authority as permits are renewed.

Other Issues (PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

In 2006, the EPA significantly decreased to 10 parts per billion (ppb) the drinking water standards related to arsenic. In Pennsylvania, Montana and Kentucky, this arsenic standard has been incorporated into the states' water quality standards and could result in more stringent limits in NPDES permits for PPL's Pennsylvania, Montana and Kentucky plants. Subsequently, the EPA developed a draft risk assessment for arsenic that increases the cancer risk exposure by more than 20 times, which would lower the current standard from 10 ppb to 0.1 ppb. If the lower standard becomes effective, costly treatment would be required to attempt to meet the standard and, at this time, there is no assurance that it could be achieved. PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict the outcome of the draft risk assessment and what impact, if any, it would have on their plants, but the costs could be significant.

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxics Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all PCB-containing equipment. The EPA is planning to propose the revised regulations in late 2012 or 2013. PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on their facilities, but the costs could be significant.

PPL has signed a Consent Order and Agreement (the Brunner COA) with the PADEP under which it agreed, under certain conditions, to take further actions to minimize the possibility of fish kills at its Brunner Island plant. Fish are attracted to warm water in the power plant discharge channel, especially during cold weather. Debris at intake pumps can result in a unit trip or reduction in load, causing a sudden change in water temperature. PPL has constructed a barrier to prevent debris from entering the river water intake area at a cost that was not material.

PPL has also investigated alternatives to exclude fish from the discharge channel and submitted three alternatives to the PADEP. According to the Brunner COA, once the cooling towers at Brunner Island became operational, PPL must implement one of these fish exclusion alternatives if a fish kill occurs in the discharge channel due to thermal impacts from the plant . Following start-up of the cooling towers in April 2010, several hundred dead fish were found in the cooling tower intake basket although there were no sudden changes in water temperature. In the third quarter of 2010, PPL discussed this matter with the PADEP and both parties agreed that this condition was not one anticipated by the Brunner COA, thereby concluding it did not trigger a need to implement a fish exclusion project. At this time, no fish exclusion project is planned.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to state court. PPL, LKE, LG&E, and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the United States" (WOUS) subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Superfund and Other Remediation

PPL Electric is a potentially responsible party at several sites listed by the EPA under the federal Superfund program, including the Columbia Gas Plant site, the Metal Bank site and the Ward Transformer site. Clean-up actions have been or are being undertaken at all of these sites, the costs of which have not been significant to PPL Electric. However, should the EPA require different or additional measures in the future, or should PPL Electric's share of costs at multi-party sites increase significantly more than currently expected, the costs could be significant.

PPL Electric, LG&E and KU are remediating or have completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which PPL Electric, LG&E and KU may be liable for remediation. These include a number of former coal gas manufacturing plants in Pennsylvania and Kentucky previously owned or operated or currently owned by predecessors or affiliates of PPL Electric, LG&E and KU. There are additional sites, formerly owned or operated by PPL Electric, LG&E and KU predecessors or affiliates, for which PPL Electric, LG&E and KU lack information on current site conditions and are therefore unable to predict what, if any, potential liability they may have.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which PPL currently lacks information, the costs of remediation and other liabilities could be substantial. PPL and its subsidiaries also could incur other non-remediation costs at sites included in current consent orders or other contaminated sites which could be significant. PPL is unable to estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require several PPL subsidiaries to take more extensive assessment and remedial actions at former coal gas manufacturing plants. PPL cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, PPL undertakes remedial action in response to spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from PPL's operations, and undertakes similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these general environmental matters is not expected to have a material adverse impact on PPL's operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in material additional costs for the Registrants.

Environmental Matters - WPD *(PPL)*

WPD's distribution businesses are subject to environmental regulatory and statutory requirements. PPL believes that WPD has taken and continues to take measures to comply with the applicable laws and governmental regulations for the protection of the environment.

Other

Nuclear Insurance *(PPL and PPL Energy Supply)*

PPL Susquehanna is a member of certain insurance programs that provide coverage for property damage to members' nuclear generating plants. Facilities at the Susquehanna plant are insured against property damage losses up to $2.75 billion under these programs. PPL Susquehanna is also a member of an insurance program that provides insurance coverage for the cost of replacement power during prolonged outages of nuclear units caused by certain specified conditions.

Under the property and replacement power insurance programs, PPL Susquehanna could be assessed retroactive premiums in the event of the insurers' adverse loss experience. At March 31, 2012, this maximum assessment was $44 million. Effective April 1, 2012, this maximum assessment was increased to $48 million.

In the event of a nuclear incident at the Susquehanna plant, PPL Susquehanna's public liability for claims resulting from such incident would be limited to $12.6 billion under provisions of The Price-Anderson Act Amendments under the Energy Policy Act of 2005. PPL Susquehanna is protected against this liability by a combination of commercial insurance and an industry assessment program.

In the event of a nuclear incident at any of the reactors covered by The Price-Anderson Act Amendments under the Energy Policy Act of 2005, PPL Susquehanna could be assessed up to $235 million per incident, payable at $35 million per year.

At March 31, 2012, the property, replacement power and nuclear incident insurers maintained an A.M. Best financial strength rating of A ("Excellent").

Guarantees and Other Assurances

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

In the normal course of business, the Registrants enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries enter.

(PPL)

PPL fully and unconditionally guarantees all of the debt securities of PPL Capital Funding.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The table below details guarantees provided as of March 31, 2012. The total recorded liability at March 31, 2012 and December 31, 2011 was $15 million and $14 million for PPL and $11 million for both periods for LKE. Other than as noted in the descriptions for "WPD guarantee of pension and other obligations of unconsolidated entities," the probability of expected payment/performance under each of these guarantees is remote.

		Exposure at March 31, 2012 (a)	Expiration Date
PPL			
Indemnifications related to the WPD Midlands acquisition		(b)	
WPD indemnifications for entities in liquidation and sales of assets	$	295 (c)	2014 - 2018
WPD guarantee of pension and other obligations of unconsolidated entities		90 (d)	2015
Tax indemnification related to unconsolidated WPD affiliates		8 (e)	2012
PPL Energy Supply (f)			
Letters of credit issued on behalf of affiliates		21 (g)	2012 - 2014
Retrospective premiums under nuclear insurance programs		44 (h)	
Nuclear claims assessment under The Price-Anderson Act Amendments under The Energy Policy Act of 2005		235 (i)	
Indemnifications for sales of assets		262 (j)	2012 - 2025
Indemnification to operators of jointly owned facilities		6 (k)	
Guarantee of a portion of a divested unconsolidated entity's debt		22 (l)	2018
PPL Electric (m)			
Guarantee of inventory value		16 (n)	2016
LKE (m)			
Indemnification of lease termination and other divestitures		301 (o)	2021 - 2023
LG&E and KU (p)			
LG&E and KU guarantee of shortfall related to OVEC		(q)	

(a) Represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee.

(b) Prior to PPL's acquisition, WPD Midlands Holdings Limited had agreed to indemnify certain former directors of a Turkish entity, in which WPD Midlands Holdings Limited previously owned an interest, for any liabilities that may arise as a result of an investigation by Turkish tax authorities, and PPL WEM has received a cross-indemnity from E.ON AG with respect to these indemnification obligations. Additionally, PPL subsidiaries agreed to provide indemnifications to subsidiaries of E.ON AG for certain liabilities relating to properties and assets owned by affiliates of E.ON AG that were transferred to WPD Midlands in connection with the acquisition. The maximum exposure and expiration of these indemnifications cannot be estimated because the maximum potential liability is not capped and the expiration date is not specified in the transaction documents.

(c) In connection with the liquidation of wholly owned subsidiaries that have been deconsolidated upon turning the entities over to the liquidators, certain affiliates of PPL Global have agreed to indemnify the liquidators, directors and/or the entities themselves for any liabilities or expenses arising during the liquidation process, including liabilities and expenses of the entities placed into liquidation. In some cases, the indemnifications are limited to a maximum amount that is based on distributions made from the subsidiary to its parent either prior or subsequent to being placed into liquidation. In other cases, the maximum amount of the indemnifications is not explicitly stated in the agreements. The indemnifications generally expire two to seven years subsequent to the date of dissolution of the entities. The exposure noted only includes those cases in which the agreements provide for a specific limit on the amount of the indemnification, and the expiration date was based on an estimate of the dissolution date of the entities.

In connection with their sales of various businesses, WPD and its affiliates have provided the purchasers with indemnifications that are standard for such transactions, including indemnifications for certain pre-existing liabilities and environmental and tax matters. In addition, in connection with certain of these sales, WPD and its affiliates have agreed to continue their obligations under existing third-party guarantees, either for a set period of time following the transactions or upon the condition that the purchasers make reasonable efforts to terminate the guarantees. Finally, WPD and its affiliates remain secondarily responsible for lease payments under certain leases that they have assigned to third parties.

(d) As a result of the privatization of the utility industry in the U.K., certain electric associations' roles and responsibilities were discontinued or modified. As a result, certain obligations, primarily pension-related, associated with these organizations have been guaranteed by the participating members. Costs are allocated to the members based on predetermined percentages as outlined in specific agreements. However, if a member becomes insolvent, costs can be reallocated to and are guaranteed by the remaining members. At March 31, 2012, WPD has recorded an estimated discounted liability based on its current allocated percentage of the total expected costs for which the expected payment/performance is probable. Neither the expiration date nor the maximum amount of potential payments for certain obligations is explicitly stated in the related agreements. Therefore, they have been estimated based on the types of obligations.

(e) Two WPD unconsolidated affiliates were refinanced during 2005. Under the terms of the refinancing, WPD has indemnified the lender against certain tax and other liabilities.

(f) Other than the letters of credit, all guarantees of PPL Energy Supply, on a consolidated basis, also apply to PPL on a consolidated basis for financial reporting purposes.

(g) Standby letter of credit arrangements under PPL Energy Supply's credit facilities for the purposes of protecting various third parties against nonperformance by PPL. This is not a guarantee by PPL on a consolidated basis.

(h) PPL Susquehanna is contingently obligated to pay this amount related to potential retrospective premiums that could be assessed under its nuclear insurance programs. See "Nuclear Insurance" above for additional information.

(i) This is the maximum amount PPL Susquehanna could be assessed for each incident at any of the nuclear reactors covered by this Act. See "Nuclear Insurance" above for additional information.

(j) PPL Energy Supply's maximum exposure with respect to certain indemnifications and the expiration of the indemnifications cannot be estimated because, in the case of certain indemnification provisions, the maximum potential liability is not capped by the transaction documents and the expiration date is based on the applicable statute of limitations. The exposure and expiration dates noted are only for those cases in which the agreements provide for specific limits. The indemnification provisions described below are in each case subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchaser of the Long Island generation business for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including liabilities relating to certain renewable energy facilities which were previously owned by one of the PPL subsidiaries sold in the transaction but which were unrelated to the Long Island generation business. The indemnification provisions for most representations and warranties expired in the third quarter of 2011.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchasers of the Maine hydroelectric facilities for damages arising out of any breach of the representations, warranties and covenants under the respective transaction agreements and for damages arising out of certain other matters, including liabilities of the PPL Energy Supply subsidiary relating to the pre-closing ownership or operation of those hydroelectric facilities. The indemnification provisions for certain representations and warranties expired in the second quarter of 2011.

Subsidiaries of PPL Energy Supply have agreed to provide indemnification to the purchasers of certain non-core generation facilities sold in March 2011 for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreements and for damages arising out of certain other matters relating to the facilities that were the subject of the transaction, including certain reduced capacity payments (if any) at one of the facilities in the event specified PJM rule changes are proposed and become effective. The indemnification provisions for most representations and warranties expired in the first quarter of 2012.

(k) In December 2007, a subsidiary of PPL Energy Supply executed revised owners agreements for two jointly owned facilities, the Keystone and Conemaugh generating plants. The agreements require that in the event of any default by an owner, the other owners fund contributions for the operation of the generating plants, based upon their ownership percentages. The non-defaulting owners, who make up the defaulting owner's obligations, are entitled to the generation entitlement of the defaulting owner, based upon their ownership percentage. The exposure shown reflects the PPL Energy Supply subsidiary's share of the maximum obligation. The agreements do not have an expiration date.

(l) A PPL Energy Supply subsidiary owned a one-third equity interest in Safe Harbor Water Power Corporation (Safe Harbor) that was sold in March 2011. Beginning in 2008, PPL Energy Supply guaranteed one-third of any amounts payable with respect to certain senior notes issued by Safe Harbor. Under the terms of the sale agreement, PPL Energy Supply continues to guarantee the portion of Safe Harbor's debt, but received a cross-indemnity from the purchaser, secured by a lien on the purchaser's stock of Safe Harbor, in the event PPL Energy Supply is required to make a payment under the guarantee. Exposure noted reflects principal only.

(m) All guarantees of PPL Electric and LKE, on a consolidated basis, also apply to PPL on a consolidated basis for financial reporting purposes.

(n) PPL Electric entered into a contract with a third party logistics firm that provides inventory procurement and fulfillment services. Under the contract, the logistics firm has title to the inventory purchased for PPL Electric's use. Upon termination of the contract, PPL Electric has guaranteed to purchase any remaining inventory that has not been used or sold by the logistics firm at the weighted-average cost at which the logistics firm purchased the inventory, thus protecting the logistics firm from reductions in the fair value of the inventory.

(o) LKE provides certain indemnifications, the most significant of which relate to the termination of the WKE lease in July 2009. These guarantees cover the due and punctual payment, performance and discharge by each party of its respective present and future obligations. The most comprehensive of these guarantees is the LKE guarantee covering operational, regulatory and environmental commitments and indemnifications made by WKE under the WKE Transaction Termination Agreement. This guarantee has a term of 12 years ending July 2021, and a cumulative maximum exposure of $200 million. Certain items such as non-excluded government fines and penalties fall outside the cumulative cap. Another guarantee with a maximum exposure of $100 million covering other indemnifications expires in 2023. Certain matters are currently under discussion among the parties, including one matter currently in arbitration and a further matter for which LKE is contesting the applicability of the indemnification requirement. The matter in arbitration may be ruled upon during mid-2012, which may result in increases or decreases to the estimated liability LKE has currently recorded. The ultimate outcome of both matters cannot be predicted at this time. Additionally, LKE has indemnified various third parties related to historical obligations for other divested subsidiaries and affiliates. The indemnifications vary by entity and the maximum exposures range from being capped at the sale price to no specified maximum; however, LKE is not aware of formal claims under such indemnities made by any party at this time. LKE could be required to perform on these indemnifications in the event of covered losses or liabilities being claimed by an indemnified party. No additional material loss is anticipated by reason of such indemnification.

(p) All guarantees of LG&E and KU also apply to LKE on a consolidated basis for financial reporting purposes.

(q) Pursuant to a power purchase agreement with OVEC, LG&E and KU are obligated to pay a demand charge which includes, among other charges, decommissioning costs, postretirement and post employment benefits. The demand charge is expected to cover LG&E's and KU's shares of the cost of these items over the term of the contract. However, in the event there is a shortfall in covering these costs, LG&E and KU are obligated to pay their share of the excess. The maximum exposure and the expiration date of these potential obligations are not presently determinable.

The Registrants provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage requires a maximum $4 million deductible per occurrence and provides maximum aggregate coverage of $200 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

PLR Contracts/Purchase of Accounts Receivable *(PPL Energy Supply and PPL Electric)*

PPL Electric holds competitive solicitations for PLR generation supply. PPL EnergyPlus has been awarded a portion of the PLR generation supply through these competitive solicitations. See Note 10 for additional information on the solicitations. PPL Electric's purchases from PPL EnergyPlus for the three months ended March 31, 2012 and 2011 totaled $22 million and $6 million. The sales and purchases are included in the Statements of Income as "Wholesale energy marketing to affiliate" by PPL Energy Supply, and as "Energy purchases from affiliate" by PPL Electric.

Under the standard Supply Master Agreement for the solicitation process, PPL Electric requires all suppliers to post collateral once credit exposures exceed defined credit limits. PPL EnergyPlus is required to post collateral with PPL Electric when the aggregate credit exposure with respect to electricity, capacity and other related products to be delivered by PPL EnergyPlus exceeds a contractual credit limit. Based on the current credit rating and tangible net worth of PPL Energy Supply, as guarantor, PPL EnergyPlus' credit limit was $35 million at March 31, 2012. In no instance is PPL Electric required to post collateral to suppliers under these supply contracts.

PPL Electric's customers may choose an alternative supplier for their generation supply. See Note 2 for additional information regarding PPL Electric's purchases of accounts receivable from alternative suppliers, including PPL EnergyPlus.

At March 31, 2012, PPL Energy Supply had a net credit exposure of $42 million to PPL Electric from its commitment as a PLR supplier and from the sale of its accounts receivable to PPL Electric.

Wholesale Sales and Purchases *(LG&E and KU)*

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost. Savings realized from such intercompany transactions are shared equally between the two companies. The volume of energy each company has to sell to the other is dependent on its native load needs and its available generation.

Allocations of Corporate Service Costs *(PPL Energy Supply, PPL Electric, LKE)*

PPL Services provides corporate functions such as financial, legal, human resources and information technology services. PPL Services charges the respective PPL subsidiaries for the cost of such services when they can be specifically identified. The cost of the services that is not directly charged to PPL subsidiaries is allocated to applicable subsidiaries based on an average of the subsidiaries' relative invested capital, operation and maintenance expenses and number of employees. PPL Services charged the following amounts, which PPL management believes are reasonable, including amounts applied to accounts that are further distributed between capital and expense:

	Three Months Ended March 31,	
	2012	2011
PPL Energy Supply	$ 57	$ 50
PPL Electric	42	39
LKE	5	5

Intercompany Billings by LKS *(LG&E and KU)*

LKS provides LG&E and KU with a variety of centralized administrative, management and support services. The cost of these services is directly charged to the company or, for general costs that cannot be directly attributed, charged based on predetermined allocation factors, including the following measures: number of customers, total assets, revenues, number of employees and/or other statistical information. LKS charged the amounts in the table below, which LKE management believes are reasonable, including amounts that are further distributed between capital and expense:

	Three Months Ended March 31,	
	2012	2011
LG&E	$ 41	$ 33
KU	46	49

In addition, LG&E and KU provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges.

Intercompany Borrowings

(PPL Energy Supply)

A PPL Energy Supply subsidiary periodically holds revolving demand notes from certain affiliates. At March 31, 2012, there were no balances outstanding. At December 31, 2011, a note with PPL Energy Funding had an outstanding balance of $198 million, which was reflected in "Note receivable from affiliate" on the Balance Sheet. Interest earned on these revolving facilities is included in "Interest Income from Affiliates" on the Statements of Income. The interest rates on borrowings are equal to one-month LIBOR plus a spread. For the three months ended March 31, 2012 and 2011, interest earned on borrowings was insignificant.

(LKE)

LKE maintains a $300 million revolving demand note with a PPL Energy Supply subsidiary whereby LKE can borrow funds on a short-term basis at market-based rates. The interest rates on borrowings are equal to one-month LIBOR plus a spread. At March 31, 2012 and December 31, 2011, there was no balance outstanding. Interest on the revolving demand note with the PPL Energy Supply subsidiary was not significant for 2012 and 2011.

After PPL's acquisition of LKE in November 2010, LKE held a note receivable from a PPL affiliate. At March 31, 2012, $5 million was outstanding compared with $15 million at December 31, 2011. The interest rates on the outstanding borrowings were 2.24% and 2.26% for the three months ended March 31, 2012 and 2011. Interest income on this note was not significant for the three months ended March 31, 2012 and 2011.

(LG&E)

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $500 million at an interest rate based on a market index of commercial paper issues. At March 31, 2012 and December 31, 2011, there was no balance outstanding. The interest rate for the three months ended March 31, 2012 was 0.41%. Interest expense incurred on the money pool agreement with LKE and/or KU was not significant for the three months ended March 31, 2012 and 2011.

(KU)

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to $500 million at an interest rate based on a market index of commercial paper issues. At March 31, 2012 and December 31, 2011, there was no balance outstanding. The interest rate for the three months ended March 31, 2012 was 0.41%. Interest expense incurred on the money pool agreement with LKE and/or LG&E was not significant for the three months ended March 31, 2012 and 2011.

Trademark Royalties *(PPL Energy Supply)*

A PPL subsidiary owns PPL trademarks and billed certain affiliates for their use. This agreement was terminated in December 2011. PPL Energy Supply was charged $10 million of this license fee for the three months ended March 31, 2011, which was included primarily in "Other operation and maintenance" on the Statement of Income.

Other *(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

See Note 7 for a discussion regarding capital transactions by PPL Energy Supply, PPL Electric, LKE, LG&E and KU. For PPL Energy Supply, PPL Electric, LG&E and KU, refer to Note 9 for discussions regarding intercompany allocations associated with defined benefits.

12. Other Income (Expense) - net

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The breakdown of "Other Income (Expense) - net" was:

	PPL		PPL Energy Supply	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2012	2011	2012	2011
Other Income				
Earnings on securities in NDT funds	$ 8	$ 15	$ 8	$ 15
Interest income	1	2		1
AFUDC	2	1		
Miscellaneous - Domestic	2	3	1	1
Total Other Income	13	21	9	17
Other Expense				
Economic foreign currency exchange contracts (Note 14)	18	2		
Charitable contributions	4	3	1	
WPD Midlands acquisition-related costs (Note 8)		11		
Net hedge losses associated with the 2011 Bridge Facility		7		
Miscellaneous - Domestic	6	2	3	3
Miscellaneous - U.K.	2	1		
Total Other Expense	30	26	4	3
Other Income (Expense) - net	$ (17)	$ (5)	$ 5	$ 14

The components of "Other Income (Expense) - net" for the three months ended March 31, 2012 and 2011 for PPL Electric, LKE, LG&E and KU are not significant.

13. Fair Value Measurements and Credit Concentration

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. At March 31, 2012, there were no transfers between Level 1 and Level 2.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	March 31, 2012				December 31, 2011			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
PPL

(a) Current portion is included in "Restricted cash and cash equivalents" and long-term portion is included in "Other noncurrent assets" on the Balance Sheets.
(b) Included in "Other investments" on the Balance Sheets.
(c) Current portion is included in "Other current assets" on the Balance Sheets. Such amounts were insignificant at March 31, 2012 and December 31, 2011. Long-term portion is included in "Other noncurrent assets" on the Balance Sheets.
(d) Current portion is included in "Other current liabilities" and long-term portion is included in "Price risk management liabilities" on the Balance Sheets.

A reconciliation of net assets and liabilities classified as Level 3 for the three months ended March 31 is as follows:

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)						
	2012				2011		
	Energy Commodities, net	Auction Rate Securities	Cross-Currency Swaps	Total	Energy Commodities, net	Auction Rate Securities	Total
PPL							
Balance at beginning of period	$ 13	$ 24	$ 4	$ 41	$ (3)	$ 25	$ 22
Total realized/unrealized gains (losses)							
Included in earnings	18			18	1		1
Included in OCI (a)	2		2	4	1		1
Purchases					2		2
Sales					(3)		(3)
Settlements	(6)			(6)	22		22
Transfers out of Level 3	(8)		(3)	(11)	12		12
Balance at end of period	$ 19	$ 24	$ 3	$ 46	$ 32	$ 25	$ 57
PPL Energy Supply							
Balance at beginning of period	$ 13	$ 19		$ 32	$ (3)	$ 20	$ 17
Total realized/unrealized gains (losses)							
Included in earnings	18			18	1		1
Included in OCI (a)	2			2	1		1
Purchases					2		2
Sales					(3)		(3)
Settlements	(6)			(6)	22		22
Transfers out of Level 3	(8)			(8)	12		12
Balance at end of period	$ 19	$ 19		$ 38	$ 32	$ 20	$ 52

(a) "Energy Commodities" and "Cross-Currency Swaps" are included in "Qualifying derivatives" on the Statements of Comprehensive Income.

The significant unobservable inputs used in the fair value measurement of assets and liabilities classified as Level 3 for the three months ended March 31 are as follows:

	Quantitative Information about Level 3 Fair Value Measurements			
	2012			
	Fair Value, net Asset (Liability)	Valuation Technique	Unobservable Input(s)	Range (Weighted Average) (a)
PPL				
Energy commodities				
Retail natural gas contracts (b)	29	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	20% - 100% (69%)
Electric contracts (c)	(6)	Discounted cash flow	Basis price between delivery points	28% - 33% (28%)
Other contracts (d)	(4)	Discounted cash flow	Various	22% - 100% (65%)
Auction rate securities (e)	24	Discounted cash flow	Modeled from SIFMA Index	15% - 90% (66%)
Cross-currency swaps (f)	3	Discounted cash flow	Credit valuation adjustment	23% - 37% (32%)
PPL Energy Supply				
Energy commodities				
Retail natural gas contracts (b)	29	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	20% - 100% (69%)
Electric contracts (c)	(6)	Discounted cash flow	Basis price between delivery points	28% - 33% (28%)
Other contracts (d)	(4)	Discounted cash flow	Various	22% - 100% (65%)
Auction rate securities (e)	19	Discounted cash flow	Modeled from SIFMA Index	15% - 90% (65%)

(a) For energy commodities and auction rate securities, the range and weighted average represent the percentage of fair value derived from the unobservable inputs. For cross-currency swaps, the range and weighted average represent the percentage decrease in fair value due to the unobservable inputs used in the model to calculate the credit valuation adjustment.
(b) Retail natural gas contracts extend through 2017. $15 million of the fair value is scheduled to deliver within the next 12 months. As the price of natural gas increases/(decreases), the fair value of the contracts (decreases)/increases.
(c) Electric contracts extend through 2014. $(3) million of the fair value is scheduled to deliver within the next 12 months. As the price of electric increases/(decreases), the fair value of the contracts (decreases)/increases.
(d) Other includes FTR and capacity contracts. The models used to calculate the fair value of these contracts use historical settlement prices and extrapolation of observable forward curves. Increases/(decreases) in the historical settled prices or forward prices will (decrease)/increase the fair value.
(e) Auction rate securities have a weighted average contractual maturity of 24 years. The model used to calculate fair value incorporates significant assumptions, including the assumptions that the auctions will continue to fail and that the securities will be held to maturity. As the modeled forward rates of the SIFMA Index increase/(decrease), the fair value of the securities increases/(decreases).
(f) Cross-currency swaps extend through 2021. The credit valuation adjustment incorporates projected probabilities of default and estimated recovery rates. As the credit valuation adjustment increases/(decreases), the fair value of the swaps (decreases)/increases.

Net gains and losses on assets and liabilities classified as Level 3 and included in earnings for the three months ended March 31 are reported in the Statements of Income as follows:

	2012			
	Energy Commodities, net			
	Unregulated Retail Electric and Gas	Wholesale Energy Marketing	Net Energy Trading Margins	Energy Purchases
PPL and PPL Energy Supply				
Total gains (losses) included in earnings for the period	$ 16	$ 4	$ (1)	$ (1)
Change in unrealized gains (losses) relating to positions still held at the reporting date	46	(18)	(1)	(5)

	2011			
	Energy Commodities, net			
	Unregulated Retail Electric and Gas	Wholesale Energy Marketing	Net Energy Trading Margins	Energy Purchases
PPL and PPL Energy Supply				
Total gains (losses) included in earnings for the period	$ 1	$ 1	$ (5)	$ 4
Change in unrealized gains (losses) relating to positions still held at the reporting date	1		(1)	19

(PPL and PPL Energy Supply)

Price Risk Management Assets/Liabilities - Energy Commodities

Energy commodity contracts are generally valued using the income approach, except for exchange-traded derivative gas, oil and emission allowance contracts, which are valued using the market approach and are classified as Level 1. When observable inputs are used to measure all or most of the value of a contract, the contract is classified as Level 2. Level 2 contracts are valued using quotes obtained from an exchange (where there is insufficient market liquidity to warrant inclusion in Level 1), binding and non-binding broker quotes, prices posted by ISOs or published tariff rates. Furthermore, independent quotes are obtained from the market to validate the forward price curves. These contracts include forwards, swaps, options and structured deals for electricity, gas, oil, and/or emission allowances and may be offset with similar positions in exchange-traded markets. To the extent possible, fair value measurements utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these contracts may be valued using models, including standard option valuation models and standard industry models. For example, the fair value of a structured deal that delivers power to an illiquid delivery point may be measured by valuing the nearest liquid trading point plus the value of the basis between the two points. The basis input may be from market quotes, FTR prices, or historical prices.

When unobservable inputs are significant to the fair value measurement, a contract is classified as Level 3. Contracts classified as Level 3 represent contracts for which delivery is at a location where pricing is unobservable or the delivery dates are beyond the dates for which independent quotes are available. To measure the fair value of these contracts, PPL uses internally developed models that project forward prices. Forward transactions, including forward transactions classified as Level 3, are analyzed by PPL's Risk Management department, which reports to the Chief Financial Officer (CFO). Accounting personnel, who also report to the CFO, interpret the analysis quarterly to appropriately classify the forward transactions in the fair value hierarchy. Valuation techniques are evaluated periodically. Additionally, Level 2 and Level 3 fair value measurements include adjustments for credit risk based on PPL's own creditworthiness (for net liabilities) and its counterparties' creditworthiness (for net assets). PPL's credit department assesses all reasonably available market information to calculate the credit valuation adjustment.

In certain instances, energy commodity contracts are transferred between Level 2 and Level 3. The primary reasons for the transfers during 2012 and 2011 were changes in the availability of market information and changes in the significance of the unobservable portion of the contract. As the delivery period of a contract becomes closer, market information may become available. When this occurs, the model's unobservable inputs are replaced with observable market information.

(PPL, LKE and LG&E)

Price Risk Management Assets/Liabilities - Interest Rate Swaps/Foreign Currency Contracts/Cross-Currency Swaps

To manage interest rate risk, PPL, LKE and LG&E use interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. To manage foreign currency exchange risk, PPL uses foreign currency contracts such as forwards, options and cross-currency swaps that contain characteristics of both interest rate and foreign currency contracts. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates) and forward foreign currency exchange rates (e.g., GBP and Euro), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. The primary reason for the transfers out of Level 3 for 2012 was the change in the significance of the credit valuation adjustment. Cross-currency swaps classified as Level 3 are valued by PPL's Corporate Finance department, which reports to the CFO. Accounting personnel, who also report to the CFO, interpret the analysis quarterly to appropriately classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

(PPL and PPL Energy Supply)

NDT Funds

The market approach is used to measure the fair value of equity securities held in the NDT funds.

- The fair value measurements of equity securities classified as Level 1 are based on quoted prices in active markets and are comprised of securities that are representative of the Wilshire 5000 index, which is invested in approximately 70% large-cap stocks and 30% mid/small-cap stocks.

- Investments in commingled equity funds are classified as Level 2 and represent securities that track the S&P 500 index and the Wilshire 4500 index. These fair value measurements are based on firm quotes of net asset values per share, which are not obtained from a quoted price in an active market.

Debt securities are generally measured using a market approach, including the use of matrix pricing. Common inputs include reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as benchmark yields, credit valuation adjustments, reference data from market research publications, monthly payment data, collateral performance and new issue data.

The debt securities held by the NDT funds at March 31, 2012 have a weighted-average coupon of 4.44% and a weighted-average maturity of 8.30 years.

Auction Rate Securities

Auction rate securities include Federal Family Education Loan Program guaranteed student loan revenue bonds, as well as various municipal bond issues. The exposure to realize losses on these securities is not significant.

The fair value of auction rate securities is estimated using an income approach with inputs for the underlying structure and credit quality of each security; the present value of future interest payments, estimated based on forward rates of the SIFMA Index, and principal payments discounted using interest rates for bonds with a credit rating and remaining term to maturity similar to the stated maturity of the auction rate securities; and the impact of auction failures or redemption at par. Auction rate securities are classified as Level 3 because the model used to calculate fair value incorporates significant assumptions. Auction rate securities are valued by PPL's Treasury department, which reports to the CFO. Accounting personnel, who also report to the CFO, interpret the analysis quarterly to appropriately classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

Financial Instruments Not Recorded at Fair Value *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

The carrying amounts of contract adjustment payments related to the Purchase Contract component of the Equity Units and long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values of these instruments were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates and are classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	March 31, 2012		December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
PPL				
Contract adjustment payments (a)	$ 175	$ 176	$ 198	$ 198
Long-term debt	18,076	19,837	17,993	19,392
PPL Energy Supply				
Long-term debt	3,024	3,420	3,024	3,397
PPL Electric				
Long-term debt	1,718	2,014	1,718	2,012
LKE				
Long-term debt	4,074	4,338	4,073	4,306
LG&E				
Long-term debt	1,112	1,168	1,112	1,164
KU				
Long-term debt	1,842	2,017	1,842	2,000

(a) Reflected in "Other current liabilities" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

The carrying value of short-term debt, when outstanding, represents or approximates fair value due to the variable interest rates associated with the financial instruments and is classified as Level 2. The carrying value of held-to-maturity, short-term investments at December 31, 2011 approximated fair value due to the liquid nature and short-term duration of these instruments.

Credit Concentration Associated with Financial Instruments

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Contracts are entered into with many entities for the purchase and sale of energy. Many of these contracts qualify for NPNS and, as such, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 14 for information on credit policies used to manage credit risk, including master netting arrangements and collateral requirements.

(PPL)

At March 31, 2012, PPL had credit exposure of $3.6 billion from energy trading partners, excluding the effects of netting arrangements and collateral. As a result of netting arrangements and collateral, PPL's credit exposure was reduced to $954 million. The top ten counterparties accounted for $460 million, or 48%, of the net exposure and all had investment grade credit ratings from S&P or Moody's.

(PPL Energy Supply)

At March 31, 2012, PPL Energy Supply had credit exposure of $3.6 billion from energy trading partners, excluding exposure from related parties and the effects of netting arrangements and collateral. As a result of netting arrangements and collateral, this credit exposure was reduced to $953 million. The top ten counterparties accounted for $460 million, or 48%, of the net exposure and all had investment grade credit ratings from S&P or Moody's.

(PPL Electric)

At March 31, 2012, PPL Electric had no credit exposure under energy supply contracts (including its supply contracts with PPL EnergyPlus).

(LKE, LG&E and KU)

At March 31, 2012, LKE's, LG&E's and KU's credit exposure was not significant.

14. Derivative Instruments and Hedging Activities

Risk Management Objectives

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL has a risk management policy approved by the Board of Directors to manage market risk and counterparty credit risk. The RMC, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, verification of risk and transaction limits, VaR analyses, portfolio stress tests, gross margin at risk analyses, sensitivity analyses, and daily portfolio reporting, including open positions, determinations of fair value, and other risk management metrics.

Market Risk

Market risk is the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument. Forward contracts, futures contracts, options, swaps and structured deals, such as tolling agreements, are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices, volumes of full-requirement sales contracts, basis exposure, interest rates and/or foreign currency exchange rates. All derivatives are recognized on the Balance Sheets at their fair value, unless they qualify for NPNS.

PPL is exposed to market risk from foreign currency exchange risk primarily associated with its investments in U.K. affiliates, as well as additional market risk from certain subsidiaries, as described below.

PPL Energy Supply is exposed to market risk from:

- commodity price, basis and volumetric risks for energy and energy-related products associated with the sale of electricity from its generating assets and other electricity and gas marketing activities (including full-requirement sales contracts) and the purchase of fuel and fuel-related commodities for generating assets, as well as for proprietary trading activities;

- interest rate and price risk associated with debt used to finance operations, as well as debt and equity securities in NDT funds and defined benefit plans; and
- foreign currency exchange rate risk associated with firm commitments in currencies other than the applicable functional currency.

PPL Electric is exposed to market and volumetric risks from PPL Electric's obligation as PLR. The PUC has approved a cost recovery mechanism that allows PPL Electric to pass through to customers the cost associated with fulfilling its PLR obligation. This cost recovery mechanism substantially eliminates PPL Electric's exposure to market risk. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement supply agreements to serve its PLR customers. These supply agreements transfer the volumetric risk associated with the PLR obligation to the energy suppliers.

By definition, the regulatory environments for PPL's other regulated entities, LKE (through its subsidiaries LG&E and KU) and WPD, significantly mitigate market risk. LG&E's and KU's rates are set to permit the recovery of prudently incurred costs, including certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses. WPD does not have supply risks in the distribution business.

LG&E also utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on interest expense. WPD utilizes over-the-counter cross currency swaps to limit exposure to market fluctuations on interest and principal payments from foreign currency exchange rates.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance, including defaults on payments and energy commodity deliveries.

PPL is exposed to credit risk from interest rate and foreign currency derivatives with financial institutions, as well as additional credit risk through certain of its subsidiaries, as discussed below.

PPL Energy Supply is exposed to credit risk from commodity derivatives with its energy trading partners, which include other energy companies, fuel suppliers and financial institutions.

LG&E is exposed to credit risk from interest rate derivatives with financial institutions.

The majority of credit risk stems from commodity derivatives for multi-year contracts for energy sales and purchases. If PPL Energy Supply's counterparties fail to perform their obligations under such contracts and PPL Energy Supply could not replace the sales or purchases at the same or better prices as those under the defaulted contracts, PPL Energy Supply would incur financial losses. Those losses would be recognized immediately or through lower revenues or higher costs in future years, depending on the accounting treatment for the defaulted contracts. In the event a supplier of LKE (through its subsidiaries LG&E and KU) or PPL Electric defaults on its obligation, those entities would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by these entities would be recoverable from customers in future rates.

PPL and its subsidiaries have credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request the additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade or their exposures exceed an established credit limit. See Note 13 for credit concentration associated with financial instruments.

Master Netting Arrangements

Net derivative positions are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL's and PPL Energy Supply's obligation to return counterparty cash collateral under master netting arrangements was $213 million and $147 million at March 31, 2012 and December 31, 2011.

PPL Electric, LKE and LG&E had no obligation to return cash collateral under master netting arrangements at March 31, 2012 and December 31, 2011.

PPL Energy Supply and PPL Electric had not posted any cash collateral under master netting arrangements at March 31, 2012 and December 31, 2011.

PPL, LKE and LG&E had posted cash collateral under master netting arrangements of $27 million at March 31, 2012 and $29 million at December 31, 2011.

Commodity Price Risk (Non-trading)

(PPL and PPL Energy Supply)

Commodity price and basis risks are among PPL's and PPL Energy Supply's most significant risks due to the level of investment that PPL and PPL Energy Supply maintain in their competitive generation assets, as well as the extent of their marketing and proprietary trading activities. Several factors influence price levels and volatilities. These factors include, but are not limited to, seasonal changes in demand, weather conditions, available generating assets within regions, transportation/transmission availability and reliability within and between regions, market liquidity, and the nature and extent of current and potential federal and state regulations.

PPL and PPL Energy Supply enter into financial and physical derivative contracts, including forwards, futures, swaps and options, to hedge the price risk associated with electricity, gas, oil and other commodities. Certain contracts qualify for NPNS or are non-derivatives and are therefore not reflected in the financial statements until delivery. PPL and PPL Energy Supply segregate their remaining non-trading activities into two categories: cash flow hedges and economic activity, as discussed below.

Cash Flow Hedges

Many derivative contracts have qualified for hedge accounting so that the effective portion of a derivative's gain or loss is deferred in AOCI and reclassified into earnings when the forecasted transaction occurs. The cash flow hedges that existed at March 31, 2012 range in maturity through 2016. At March 31, 2012, the accumulated net unrecognized after-tax gains (losses) that are expected to be reclassified into earnings during the next 12 months were $341 million for PPL and PPL Energy Supply. Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedge transaction is probable of not occurring. For the three months ended March 31, 2012 and 2011, such reclassifications were insignificant.

For the three months ended March 31, 2012 and 2011, after-tax hedge ineffectiveness associated with energy derivatives was insignificant.

Certain cash flow hedge positions were dedesignated during the three months ended March 31, 2012. The fair value of the hedges at December 31, 2011 remained in AOCI because the original forecasted transaction is still expected to occur. A pre-tax gain of $169 million, which represented the change in fair value of these positions during the three months ended March 31, 2012, was recorded as economic activity in "Wholesale energy marketing - Unrealized" on the Statement of Income.

Economic Activity

Certain derivative contracts economically hedge the price and volumetric risk associated with electricity, gas, oil and other commodities but do not receive hedge accounting treatment. These derivatives hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and unregulated full-requirement and retail contracts, which are subject to changes in fair value due to market price volatility and volume expectations. Additionally, economic activity includes the ineffective portion of qualifying cash flow hedges (see "Cash Flow Hedges" above). The derivative contracts in this category that existed at March 31, 2012 range in maturity through 2019.

Examples of economic activity include hedges on sales of baseload generation; certain purchase contracts used to supply full-requirement sales contracts; FTRs or basis swaps used to hedge basis risk associated with the sale of competitive generation or supplying unregulated full-requirement sales contracts; spark spreads (sale of electricity with the simultaneous purchase of fuel); retail electric and gas activities; and fuel oil swaps used to hedge price escalation clauses in coal transportation and other fuel-related contracts. PPL Energy Supply also uses options, which include the sale of call options and the purchase of put options tied to a particular generating unit. Since the physical generating capacity is owned, the price exposure is limited to the cost of the particular generating unit and does not expose PPL Energy Supply to uncovered market price risk.

Unrealized activity associated with monetizing certain full-requirement sales contracts was also included in economic activity during the three months ended March 31, 2012 and 2011.

The net fair value of economic positions at March 31, 2012 and December 31, 2011 was a net asset (liability) of $816 million and $(63) million for PPL Energy Supply. The unrealized gains (losses) for economic activity for the three months ended March 31 were as follows.

	2012	2011
PPL Energy Supply		
Operating Revenues		
Unregulated retail electric and gas	$ 10	$ 4
Wholesale energy marketing	852	57
Operating Expenses		
Fuel	2	23
Energy purchases	(591)	18

The net gains (losses) recorded in "Wholesale energy marketing" resulted primarily from hedges of baseload generation; certain full-requirement sales contracts for which PPL Energy Supply did not elect NPNS, from hedge ineffectiveness and dedesignations, as discussed in "Cash Flow Hedges" above, and from the monetization of certain full-requirement sales contracts in 2010. The net gains (losses) recorded in "Energy purchases" resulted primarily from certain purchase contracts to supply the full-requirement sales contracts noted above for which PPL Energy Supply did not elect hedge treatment, from hedge ineffectiveness and from purchase contracts that no longer hedge the full-requirement sales contracts that were monetized in 2010.

(PPL and PPL Energy Supply)

Commodity Price Risk (Trading)

PPL Energy Supply also executes energy contracts to take advantage of market opportunities. As a result, PPL Energy Supply may at times create a net open position in its portfolio that could result in significant losses if prices do not move in the manner or direction anticipated. PPL Energy Supply's trading activity is shown in "Net energy trading margins" on the Statements of Income.

Commodity Volumetric Activity

PPL Energy Supply currently employs four primary strategies to maximize the value of its wholesale energy portfolio. As further discussed below, these strategies include the sales of baseload generation, optimization of intermediate and peaking generation, marketing activities, and proprietary trading activities. The tables within this section present the volumes of PPL Energy Supply's derivative activity, excluding those that qualify for NPNS, unless otherwise noted.

Sales of Baseload Generation

PPL Energy Supply has a formal hedging program for its competitive baseload generation fleet, which includes 7,252 MW of nuclear, coal and hydroelectric generating capacity. The objective of this program is to provide a reasonable level of near-term cash flow and earnings certainty while preserving upside potential of power price increases over the medium term. PPL Energy Supply sells its expected generation output on a forward basis using both derivative and non-derivative instruments. Both are included in the following tables.

The following table presents the expected sales, in GWh, from competitive baseload generation and tolling arrangements that are included in the baseload portfolio based on current forecasted assumptions for 2012-2014.

2012 (a)	2013	2014
39,733	53,136	53,502

(a) Represents expected sales for the balance of the current year.

The following table presents the percentage of expected baseload generation sales shown above that has been sold forward under fixed price contracts and the related percentage of fuel that has been purchased or committed at March 31, 2012.

Year	Derivative Sales (a)	Total Power Sales (b)	Fuel Purchases (c)	
			Coal	Nuclear
2012 (d)	91%	95%	100%	100%
2013	75%	82%	97%	100%
2014 (e)	8%	13%	70%	100%

(a) Excludes non-derivative contracts and contracts that qualify for NPNS. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.
(b) Amount represents derivative (including contracts that qualify for NPNS) and non-derivative contracts. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option. Percentages are based on fixed-price contracts only.
(c) Coal and nuclear contracts receive accrual accounting treatment, as they are not derivative contracts. Percentages are based on both fixed- and variable-priced contracts.
(d) Represents the balance of the current year.
(e) Volumes for derivative sales contracts that deliver in future periods total 1,635 GWh and 20.2 Bcf.

In addition to the fuel purchases above, PPL Energy Supply attempts to economically hedge the fuel price risk that is within its fuel-related and coal transportation contracts, which are tied to changes in crude oil or diesel prices. PPL Energy Supply has also entered into contracts to financially hedge the physical sale of oil. The following table presents the net volumes (in thousands of barrels) of derivative (sales)/purchase contracts used in support of these strategies at March 31, 2012.

	2012 (a)	2013	2014
Oil Swaps	162	285	240

(a) Represents the balance of the current year.

Optimization of Intermediate and Peaking Generation

In addition to its competitive baseload generation activities, PPL Energy Supply attempts to optimize the overall value of its competitive intermediate and peaking fleet, which includes 3,256 MW of gas and oil-fired generation. The following table presents the net volumes of derivative (sales)/purchase contracts used in support of this strategy at March 31, 2012.

	Units	2012 (a)	2013	2014 (b)
Net Power Sales	GWh	(2,076)	(408)	
Net Fuel Purchases (c)	Bcf	16.9	2.6	(0.3)

(a) Represents the balance of the current year.
(b) Volumes for derivative contracts used in support of these strategies that deliver in future periods are insignificant.
(c) Included in these volumes are non-options and exercised option contracts that converted to non-option derivative contracts. Volumes associated with option contracts are insignificant.

Marketing Activities

PPL Energy Supply's marketing portfolio is comprised of full-requirement sales contracts and their related supply contracts, retail natural gas and electricity sales contracts and other marketing activities. The obligations under the full-requirement sales contracts include supplying a bundled product of energy, capacity, RECs, and other ancillary products. The full-requirement sales contracts PPL Energy Supply is awarded do not provide for specific levels of load, and actual load could vary significantly from forecasted amounts. PPL Energy Supply uses a variety of strategies to hedge its full-requirement sales contracts, including purchasing energy at a liquid trading hub or directly at the load delivery zone, purchasing capacity and RECs in the market and supplying the energy, capacity and RECs with its generation. The following table presents the volume of (sales)/purchase contracts, excluding FTRs, RECs, basis and capacity contracts, used in support of these activities at March 31, 2012.

	Units	2012 (a)	2013	2014
Energy sales contracts (b)	GWh	(10,945)	(6,612)	(3,261)
Related energy supply contracts (b)				
Energy purchases	GWh	7,718	2,873	955
Volumetric hedges (c)	GWh	73	80	65
Generation supply	GWh	2,630	3,049	2,234
Retail gas sales contracts	Bcf	(11.4)	(6.0)	(1.8)
Retail gas purchase contracts	Bcf	11.2	5.8	1.7

(a) Represents the balance of the current year.
(b) Includes NPNS and contracts that are not derivatives, which receive accrual accounting.

(c) PPL Energy Supply uses power and gas options, swaps and futures to hedge the volumetric risk associated with full-requirement sales contracts since the demand for power varies hourly. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.

Proprietary Trading Activity

At March 31, 2012, PPL Energy Supply's proprietary trading positions, excluding FTR, basis and capacity contract activity that is included in the tables below, were insignificant.

Other Energy-Related Positions

FTRs and Other Basis Positions

PPL Energy Supply buys and sells FTRs and other basis positions to mitigate the basis risk between delivery points related to the sales of its generation, the supply of its full-requirement sales contracts and retail contracts, as well as for proprietary trading purposes. The following table represents the net volumes of derivative FTR and basis (sales)/purchase contracts at March 31, 2012.

	Units	2012 (a)	2013	2014
FTRs	GWh	7,207		
Power Basis Positions (b)	GWh	(13,316)	(8,244)	(2,628)
Gas Basis Positions (b)	Bcf	7.1	(5.2)	(4.0)

(a) Represents the balance of the current year.
(b) Net volumes that deliver in future periods are (677) GWh and (4.0) Bcf.

Capacity Positions

PPL Energy Supply buys and sells capacity related to the sales of its generation and the supply of its full-requirement sales contracts. These contracts qualify for NPNS and receive accrual accounting. PPL Energy Supply also sells and purchases capacity for proprietary trading purposes. These contracts are marked to fair value through earnings. The following table presents the net volumes of derivative capacity (sales)/purchase contracts at March 31, 2012.

	Units	2012 (a)	2013	2014 (b)
Capacity	MW-months	(7,102)	(3,366)	(2,578)

(a) Represents the balance of the current year.
(b) Net volumes that deliver in future periods are 989 MW-months.

Interest Rate Risk

(PPL, PPL Energy Supply, LKE and LG&E)

PPL and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges *(PPL and PPL Energy Supply)*

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. Financial interest rate swap contracts may be entered into to hedge floating interest rate risk associated with both existing and anticipated debt issuances. For PPL, outstanding interest rate swap contracts ranged in maturity through 2022 and had a notional value of $175 million at March 31, 2012. PPL Energy Supply had no such interest rate swap contracts outstanding at March 31, 2012.

PPL WEM holds a notional position in cross-currency interest rate swaps totaling $960 million that mature through 2021 to hedge the interest payments and principal of its U.S. dollar-denominated senior notes. Additionally, PPL WW holds a notional position in cross-currency interest rate swaps totaling $302 million that mature through 2028 to hedge the interest payments and principal of its U.S. dollar-denominated senior notes.

For the three months ended March 31, 2012 and 2011, hedge ineffectiveness associated with these interest rate derivatives was insignificant for PPL and PPL Energy Supply.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified to earnings once it is determined that the hedge transaction is probable of not occurring. PPL and PPL Energy Supply had no such reclassifications for the three months ended March 31, 2012 and March 31, 2011.

At March 31, 2012, the accumulated net unrealized after-tax gains (losses) on qualifying derivatives that are expected to be reclassified into earnings during the next 12 months were $(12) million for PPL. Amounts are reclassified as the hedged interest payments are made.

Fair Value Hedges *(PPL and PPL Energy Supply)*

PPL and PPL Energy Supply are exposed to changes in the fair value of their debt portfolios. To manage this risk, financial contracts may be entered into to hedge fluctuations in the fair value of existing debt issuances due to changes in benchmark interest rates. At March 31, 2012, PPL held contracts that range in maturity through 2047 and had a notional value of $99 million. PPL Energy Supply did not hold any such contracts at March 31, 2012. PPL and PPL Energy Supply did not recognize gains or losses resulting from the ineffective portion of fair value hedges or from a portion of the hedging instrument being excluded from the assessment of hedge effectiveness or from hedges of debt issuances that no longer qualified as fair value hedges for the three months ended March 31, 2012 and 2011.

Economic Activity *(PPL, LKE and LG&E)*

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. At March 31, 2012, LG&E held contracts with a notional amount of $179 million that range in maturity through 2033. The fair values of these contracts were recorded as liabilities of $53 million and $60 million at March 31, 2012 and December 31, 2011 with equal offsetting amounts recorded as regulatory assets.

Foreign Currency Risk

(PPL and PPL Energy Supply)

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL and PPL Energy Supply may be exposed to foreign currency risk associated with firm commitments in currencies other than the applicable functional currency.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including net investments, firm commitments, recognized assets or liabilities and anticipated transactions. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

(PPL)

Net Investment Hedges

PPL enters into foreign currency contracts on behalf of a subsidiary to protect the value of a portion of its net investment in WPD. The contracts outstanding at March 31, 2012 had a notional amount of £55 million (approximately $89 million based on contracted rates). The settlement dates of these contracts range from June 2012 through September 2012. The fair value of these contracts at March 31, 2012 and December 31, 2011 was insignificant and $7 million. For the three months ended March 31, 2012 and 2011, PPL recognized insignificant amounts of net investment hedge gains and losses in the foreign currency translation adjustment component of AOCI. At March 31, 2012, PPL included $17 million of accumulated net investment hedge gains, after tax, in the foreign currency translation adjustment component of AOCI, compared to $19 million of gains, after-tax, recorded by PPL at December 31, 2011.

Cash Flow Hedges

PPL held no foreign currency derivatives that qualified as cash flow hedges during the three months ended March 31, 2012 and 2011.

Fair Value Hedges

PPL held no foreign currency derivatives that qualified as fair value hedges during the three months ended March 31, 2012 and 2011.

Economic Activity

PPL enters into foreign currency contracts on behalf of a subsidiary to economically hedge anticipated earnings denominated in GBP. At March 31, 2012, the total exposure hedged by PPL was £761 million and the net fair value of these positions was an asset (liability) of $(9) million. These contracts had termination dates ranging from April 2012 through September 2013. Realized and unrealized gains and (losses) on these contracts are included in "Other Income (Expense) - net" on the Statements of Income and were $(18) million for the three months ended March 31, 2012. At December 31, 2011, the total exposure hedged by PPL was £288 million and the net fair value of these positions was a net asset of $11 million. Realized and unrealized gains and (losses) were insignificant for the three months ended March 31, 2011.

In anticipation of the repayment of a portion of the borrowings under the 2011 Bridge Facility with U.S. dollar proceeds received from PPL's April 2011 issuance of common stock and 2011 Equity Units and the issuance of senior notes by PPL WEM, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. The total notional amount of the contracts outstanding at March 31, 2011 was £2.1 billion (approximately $3.3 billion based on contracted rates). Realized and unrealized gains and (losses) on these contracts are included in "Other Income (Expense) - net" on the Statement of Income. PPL recorded $(7) million of pre-tax, net losses for the three months ended March 31, 2011.

Accounting and Reporting

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless they qualify for NPNS. NPNS contracts for PPL and PPL Energy Supply include full-requirement sales contracts, other physical sales contracts and certain retail energy and physical capacity contracts, and for PPL Electric include certain full-requirement purchase contracts and other physical purchase contracts. Changes in the derivatives' fair value are recognized currently in earnings unless specific hedge accounting criteria are met, except for the change in fair value of LG&E's interest rate swaps which are recognized as regulatory assets. See Note 6 for amounts recorded in regulatory assets at March 31, 2012 and December 31, 2011.

See Notes 1 and 19 in each Registrant's 2011 Form 10-K for additional information on accounting policies related to derivative instruments.

(PPL)

The following tables present the fair value and location of derivative instruments recorded on the Balance Sheets.

	March 31, 2012				December 31, 2011			
	Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments (a)		Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments (a)	
	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities
Current:								
Price Risk Management Assets/Liabilities (b):								
Interest rate swaps	$ 3	$ 1		$ 4	$ 3	$ 3		$ 5
Cross-currency swaps		2				2		
Foreign currency contracts	1		$ 4	13	7		$ 11

Total current	124	3	3,106	2,146	882	8	1,666	1,562
Noncurrent:								
Price Risk Management Assets/Liabilities (b):								
Interest rate swaps				49				55
Cross-currency swaps	37				24			
Commodity contracts	48	1	1,101	1,024	42	2	854	783
Total noncurrent	85	1	1,101	1,073	66	2	854	838
Total derivatives	$ 209	$ 4	$ 4,207	$ 3,219	$ 948	$ 10	$ 2,520	$ 2,400

(a) $816 million and $237 million of net gains associated with derivatives that were no longer designated as hedging instruments are recorded in AOCI at March 31, 2012 and December 31, 2011.
(b) Represents the location on the Balance Sheet.

The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $471 million and $527 million at March 31, 2012 and December 31, 2011. The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $663 million and $695 million at March 31, 2011 and December 31, 2010.

The following tables present the pre-tax effect of derivative instruments recognized in income, OCI or regulatory assets for the three months ended March 31.

Derivatives in Fair Value Hedging Relationships	Hedged Items in Fair Value Hedging Relationships	Location of Gain (Loss) Recognized in Income	Gain (Loss) Recognized in Income on Derivative 2012	Gain (Loss) Recognized in Income on Derivative 2011	Gain (Loss) Recognized in Income on Related Item 2012	Gain (Loss) Recognized in Income on Related Item 2011

(a) $816 million and $237 million of net gains associated with derivatives that were no longer designated as hedging instruments are recorded in AOCI at March 31, 2012 and December 31, 2011.

(b) Represents the location on the balance sheet.

The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $522 million and $605 million at March 31, 2012 and December 31, 2011. The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $662 million and $733 million at March 31, 2011 and December 31, 2010. At March 31, 2011, AOCI reflects the effect of PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, PPL Energy Funding.

The following tables present the pre-tax effect of derivative instruments recognized in income or OCI for the three months ended March 31.

Derivative Relationships	Derivative Gain (Loss) Recognized in OCI (Effective Portion) 2012	Derivative Gain (Loss) Recognized in OCI (Effective Portion) 2011	Location of Gains (Losses) Recognized in Income	2012 Gain (Loss) Reclassified from AOCI into Income (Effective Portion)	2012 Gain (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	2011 Gain (Loss) Reclassified from AOCI into Income (Effective Portion)	2011 Gain (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)

Interest rate swaps	Regulatory assets	$ 7	$ 2

Credit Risk-Related Contingent Features *(PPL, PPL Energy Supply, LKE and LG&E)*

Certain derivative contracts contain credit risk-related contingent provisions which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, PPL Energy Supply, LKE and LG&E, or certain of their subsidiaries. Most of these provisions would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these provisions also would allow the counterparty to require additional collateral upon each decrease in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent provisions require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent provisions that require "adequate assurance" of performance be provided if the other party has reasonable grounds for insecurity regarding the performance of PPL's obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" provisions.

At March 31, 2012, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit contingent features and were in a net liability position is summarized as follows.

	PPL	PPL Energy Supply	LKE	LG&E
Aggregate fair value of derivative instruments in a net liability position with credit contingent provisions	$ 211	$ 168	$ 36	$ 36
Aggregate fair value of collateral posted on these derivative instruments	53	26	27	27
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)	175	158	9	9

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

15. Goodwill

(PPL)

The changes in the carrying amounts of goodwill by segment were:

	Kentucky Regulated	U.K. Regulated	Supply	Total
PPL				
Balance at December 31, 2011 (a)	$ 662	$ 3,032	$ 420	$ 4,114
Effect of foreign currency exchange rates		47		47
Balance at March 31, 2012 (a)	$ 662	$ 3,079	$ 420	$ 4,161

(a) There were no accumulated impairment losses related to goodwill.

16. Asset Retirement Obligations

(PPL, PPL Energy Supply, LKE, LG&E and KU)

The changes in the carrying amounts of AROs were as follows.

	PPL	PPL Energy Supply	LKE	LG&E	KU
ARO at December 31, 2011	$ 497	$ 359	$ 118	$ 57	$ 61
Accretion expense	9	6	2	1	1
Changes in estimated cash flow or settlement date	2	2			
Obligations settled	(4)	(4)			
ARO at March 31, 2012	$ 504	$ 363	$ 120	$ 58	$ 62

Substantially all of the ARO balances are classified as noncurrent at March 31, 2012 and December 31, 2011.

(PPL, LKE, LG&E and KU)

Accretion and depreciation expense recorded by LG&E and KU is offset with a regulatory credit on the income statement, such that there is no earnings impact.

(PPL and PPL Energy Supply)

The most significant ARO recorded by PPL and PPL Energy Supply relates to the decommissioning of the Susquehanna nuclear plant. The accrued nuclear decommissioning obligation was $298 million and $292 million at March 31, 2012 and December 31, 2011.

Assets in the NDT funds are legally restricted for purposes of settling PPL's and PPL Energy Supply's ARO related to the decommissioning of the Susquehanna plant. The aggregate fair value of these assets was $693 million and $640 million at March 31, 2012 and December 31, 2011, and is included in "Nuclear plant decommissioning trust funds" on the Balance Sheets. See Notes 13 and 17 for additional information on these assets.

17. Available-for-Sale Securities

(PPL, PPL Energy Supply, LKE and LG&E)

Certain short-term investments and securities held by the NDT funds and auction rate securities are classified as available-for-sale. Available-for-sale securities are carried on the Balance Sheet at fair value. Unrealized gains and losses on these securities are reported, net of tax, in OCI or are recognized currently in earnings when a decline in fair value is determined to be other-than-temporary. The specific identification method is used to calculate realized gains and losses.

(PPL and PPL Energy Supply)

The following table shows the amortized cost, the gross unrealized gains and losses recorded in AOCI and the fair value of available-for-sale securities.

	March 31, 2012				December 31, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total	$ 482	$ 232	$ 2	$ 712	$ 474	$ 187	$ 2	$ 659

There were no securities with credit losses at March 31, 2012 and December 31, 2011.

The following table shows the scheduled maturity dates of debt securities held at March 31, 2012.

	Maturity Less Than 1 Year	Maturity 1-5 Years	Maturity 5-10 Years	Maturity in Excess of 10 Years	Total
PPL					
Amortized cost	$ 9	$ 77	$ 64	$ 81	$ 231
Fair value	9	80	70	86	245
PPL Energy Supply					
Amortized cost	$ 9	$ 77	$ 64	$ 76	$ 226
Fair value	9	80	70	81	240

The following table shows proceeds from and realized gains and losses on sales of available-for-sale securities for the three months ended March 31.

	2012	2011
PPL		
Proceeds from sales of NDT securities (a)	$ 34	$ 75
Other proceeds from sales		163
Gross realized gains (b)	6	17
Gross realized losses (b)	1	5
PPL Energy Supply		
Proceeds from sales of NDT securities (a)	$ 34	$ 75
Gross realized gains (b)	6	17
Gross realized losses (b)	1	5

(a) These proceeds are used to pay income taxes and fees related to managing the trust. Remaining proceeds are reinvested in the trust.

(b) Excludes the impact of other-than-temporary impairment charges recognized in the Statements of Income.

(PPL, LKE and LG&E)

At December 31, 2010, LG&E held $163 million aggregate principal amount of tax-exempt revenue bonds issued by Louisville/Jefferson County, Kentucky on behalf of LG&E that were purchased from the remarketing agent in 2008. During the three months ended March 31, 2011, LG&E received $163 million for its investments in these bonds when they were remarketed to unaffiliated investors. No realized or unrealized gains (losses) were recorded on these securities, as the difference between carrying value and fair value was not significant.

18. New Accounting Guidance Pending Adoption

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, the Registrants will retrospectively adopt accounting guidance issued to enhance disclosures about financial instruments and derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

Upon adoption, the enhanced disclosure requirements are not expected to have a significant impact on the Registrants.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with PPL's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL's 2011 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL and its business strategy, a summary of Net Income Attributable to PPL Corporation and a discussion of certain events related to PPL's results of operations and financial condition.

- "Results of Operations" provides a summary of PPL's earnings, a review of results by reportable segment and a description of factors by segment expected to impact future earnings. This section ends with explanations of significant changes in principal items on PPL's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL's liquidity position and credit profile.

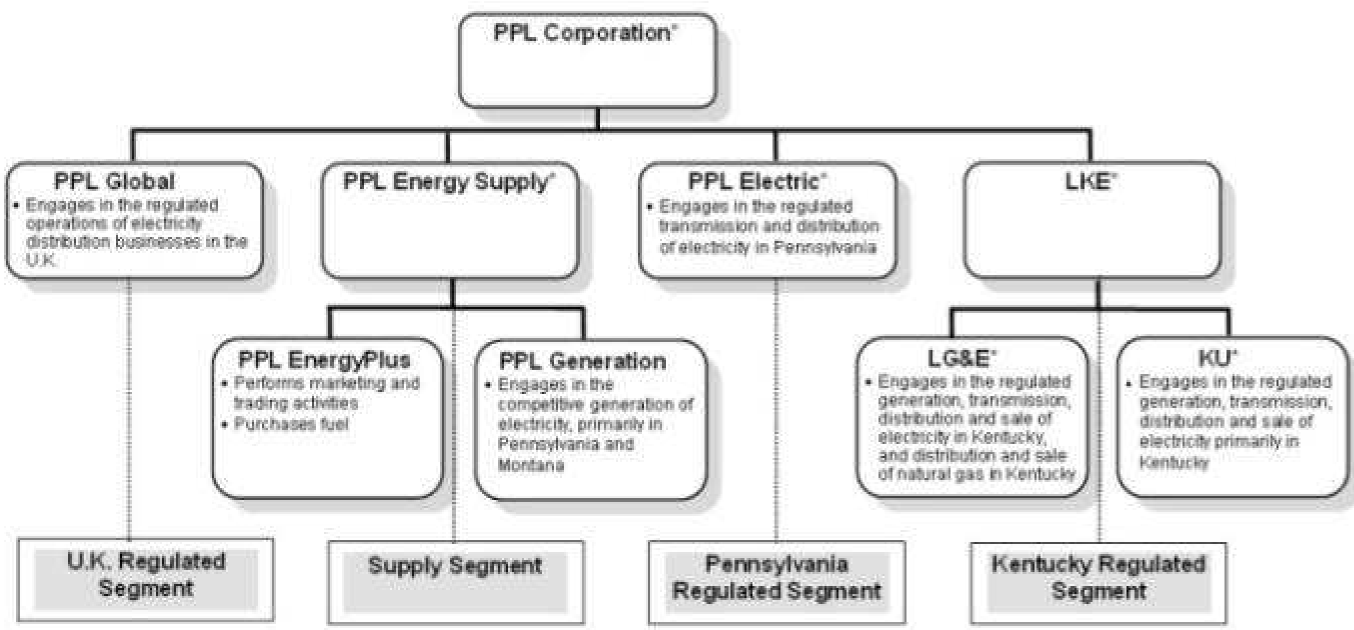
- "Financial Condition - Risk Management" provides an explanation of PPL's risk management programs relating to market and credit risk.

Overview

Introduction

PPL is an energy and utility holding company with headquarters in Allentown, Pennsylvania. Through subsidiaries, PPL generates electricity from power plants in the northeastern, northwestern and southeastern U.S., markets wholesale and retail energy primarily in the northeastern and northwestern portions of the U.S., delivers electricity to customers in Pennsylvania, Kentucky, Virginia, Tennessee and the U.K. and delivers natural gas to customers in Kentucky.

PPL's principal subsidiaries are shown below (* denotes an SEC registrant):



Business Strategy

PPL's overall strategy is to achieve stable, long-term growth in its regulated electricity delivery businesses through efficient operations and strong customer and regulatory relations, and disciplined optimization of energy supply margins in its energy supply business while mitigating volatility in both cash flows and earnings. In pursuing this strategy, PPL acquired LKE in November 2010 and WPD Midlands in April 2011. These acquisitions have reduced PPL's overall business risk profile and reapportioned the mix of PPL's regulated and competitive businesses by increasing the regulated portion of its business and enhancing rate-regulated growth opportunities as the regulated businesses make investments to improve infrastructure and customer reliability.

The increase in regulated assets is expected to provide earnings stability through regulated returns and the ability to recover costs of capital investments, in contrast to the competitive energy supply business where earnings and cash flows are subject to commodity market volatility. The pro forma impacts of the acquisition of WPD Midlands on income from continuing operations (after income taxes) for the three months ended March 31 are as follows.

	2011					
	Pro forma			Actual		
Regulated	$	310	59%	$	201	48%
Competitive		216	41%		216	52%
	$	526		$	417	

Note: Pro forma and actual amounts exclude non-recurring items identified in Note 8 to the Financial Statements.

Results for periods prior to the acquisition of WPD Midlands are not comparable with, or indicative of, results for periods subsequent to the acquisition.

With the purchase of WPD Midlands and the related growth of the portion of PPL's overall earnings translated from British pounds sterling, the related foreign currency risk is more substantial. The U.K. subsidiaries also have currency exposure to the U.S. dollar associated with their U.S. dollar-denominated debt. To manage these risks, PPL generally uses contracts such as forwards, options and cross currency swaps that contain characteristics of both interest rate and foreign currency exchange contracts.

PPL's strategy for its competitive energy supply business is to optimize the value from its unregulated generation and marketing portfolio. PPL endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk.

To manage financing costs and access to credit markets, a key objective of PPL's business strategy is to maintain a strong credit profile. PPL continually focuses on maintaining an appropriate capital structure and liquidity position. In addition, PPL has adopted financial and operational risk management programs that, among other things, are designed to monitor and manage its exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Developments

Net Income Attributable to PPL Corporation

Net Income Attributable to PPL Corporation for the three months ended March 31, 2012, was $541 million compared to $401 million for the same period in 2011, an increase of 35%. Net Income Attributable to PPL Corporation by segment was:

	Three Months Ended March 31,			
	2012		2011	
Kentucky Regulated	$	42	$	75
U.K. Regulated (a)		165		55
Pennsylvania Regulated		33		52
Supply		301		219
Net Income Attributable to PPL Corporation	$	541	$	401
EPS - basic	$	0.93	$	0.82
EPS - diluted	$	0.93	$	0.82

(a) As a result of the WPD Midlands acquisition on April 1, 2011, the U.K. Regulated segment includes WPD Midlands' results for the three months ended March 31, 2012. PPL consolidates WPD, including WPD Midlands, on a one-month lag. Material intervening events are recognized in the current period financial statements; events that are significant but not material are disclosed.

The changes in Net Income Attributable to PPL Corporation from period to period were, in part, attributable to certain items that management considers special. See "Results of Operations" for further discussion of the results of PPL's business segments, details of special items and analysis of the consolidated results of operations.

Ironwood Acquisition

In April 2012, an indirect, wholly owned subsidiary of PPL Energy Supply completed the acquisition from a subsidiary of The AES Corporation of all of the equity interests of AES Ironwood, L.L.C. (subsequently renamed PPL Ironwood, LLC) and AES Prescott, L.L.C. (subsequently renamed PPL Prescott, LLC), which own and operate, respectively, the Ironwood Facility. The Ironwood Facility began operation in 2001 and, since 2008, PPL EnergyPlus has supplied natural gas for the operation of the Ironwood Facility and received the facility's full electricity output and capacity value pursuant to a tolling agreement that expires in 2021. The acquisition provides PPL Energy Supply, through its subsidiaries, operational control of additional combined-cycle gas generation in PJM. See Note 8 to the Financial Statements for additional information.

Equity Forward Contract

In April 2012 PPL made a registered underwritten public offering of 9.9 million shares of its common stock. In conjunction with that offering, the underwriters exercised an option to purchase an additional 590,880 shares of PPL common stock solely to cover over-allotments. In connection with the registered public offering, PPL entered into forward sale agreements with two counterparties covering the 9.9 million shares of PPL's common stock. Settlement of these initial forward sale agreements will occur no later than April 2013. As a result of the underwriters' exercise of the overallotment option, PPL entered into additional forward sale agreements covering the additional 590,880 shares of common stock. Settlement of the subsequent forward sale agreements will occur in July 2013.

PPL will not receive any proceeds or issue any shares of common stock until settlement of the forward sale agreements. PPL intends to use any net proceeds that it receives upon settlement to repay short-term debt obligations and for other general corporate purposes.

The forward sale agreements will be classified as equity transactions. As a result, no amounts will be recorded in the consolidated financial statements until the settlement of the forward sale agreements. Prior to those settlements, the only impact to the financial statements will be the inclusion of incremental shares within the calculation of diluted EPS using the treasury stock method. See "Financial Condition - Liquidity and Capital Resources - Long Term Debt and Equity Securities" for additional information.

Redemption of PPL Electric Preference Stock

In April 2012, PPL Electric gave notice that it had elected to redeem all 2.5 million shares of its 6.25% Series Preference Stock, par value $100 per share, on June 18, 2012. The price to be paid for the redemption is the par value, without premium ($250 million in the aggregate). The Preference Stock is reflected on PPL's Balance Sheets in "Noncontrolling Interests."

Bankruptcy of SMGT

In October 2011, SMGT, a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019 (SMGT Contract), filed for protection under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the District of Montana. At the time of the bankruptcy filing, SMGT was PPL EnergyPlus' largest unsecured credit exposure.

The SMGT Contract provided for fixed volume purchases on a monthly basis at established prices. Pursuant to a court order and subsequent stipulations entered into between the SMGT bankruptcy trustee and PPL EnergyPlus, since the date of its Chapter 11 filing through January 2012, SMGT continued to purchase electricity from PPL EnergyPlus at the price specified in the SMGT Contract, and made timely payments for such purchases, but at lower volumes than as prescribed in the SMGT Contract. In January 2012, the trustee notified PPL EnergyPlus that SMGT would not purchase electricity under the SMGT Contract for the month of February. In March 2012, the U.S. Bankruptcy Court for the District of Montana issued an order approving the request of the SMGT bankruptcy trustee and PPL EnergyPlus to terminate the SMGT Contract. As a result, the SMGT Contract was terminated effective April 1, 2012, allowing PPL EnergyPlus to resell the electricity previously contracted to SMGT under the SMGT Contract to other customers.

PPL EnergyPlus' receivable under the SMGT Contract totaled approximately $22 million at March 31, 2012, which has been fully reserved. No assurance can be given as to the collectability of the receivable.

At this time, PPL Energy Supply cannot predict the prices and other terms on which it will be able to market to third parties the power that SMGT will not purchase from PPL EnergyPlus due to the termination of the SMGT Contract.

Tax Litigation

In 1997, the U.K. imposed a Windfall Profits Tax (WPT) on privatized utilities, including WPD. PPL filed its tax returns for years subsequent to its 1997 and 1998 claim for refund on the basis that the U.K. WPT was creditable. In September 2010, the U.S. Tax Court (Tax Court) ruled in PPL's favor in a dispute with the IRS, concluding that the U.K. WPT is a creditable tax for U.S. tax purposes. As a result, and with finalization of other issues, PPL recorded a $42 million tax benefit in 2010. In January 2011, the IRS appealed the Tax Court's decision to the U.S. Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision, holding that the U.K. WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a $39 million expense in the fourth quarter of 2011. In February 2012, PPL filed a petition for rehearing of the Third Circuit opinion. In March 2012, the Third Circuit denied PPL's petition. PPL is considering whether to file a petition for a writ of certiorari with the U.S. Supreme Court.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, LG&E and KU anticipate retiring six older coal-fired electric generating units. These units are located at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. LG&E and KU also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply. In November 2011, LG&E and KU filed an application with the FERC under the Federal Power Act requesting approval to purchase the Bluegrass CTs.

LG&E and KU anticipate that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. In May 2012, the KPSC issued an order approving the request to build the NGCC and purchase the Bluegrass CTs. Also, on May 4, 2012, the FERC issued an order conditionally authorizing the acquisition of the Bluegrass CTs, subject to implementation of satisfactory mitigation measures to address market-power concerns. FERC approval of the proposed mitigation measures is required. LG&E and KU are reviewing the order's conditions and their impact on the closing conditions under the Bluegrass CTs purchase contract, as well as other regulatory, operational and economic aspects of the transaction. See Notes 6 and 8 to the Financial Statements for additional information.

Regional Transmission Line Expansion Plan

PPL Electric has experienced delays in obtaining necessary National Park Service (NPS) approvals for the Susquehanna-Roseland transmission line and anticipates a delay of the line's in-service date to 2015. In March 2012, the NPS announced that the route proposed by PPL Electric and PSE&G, previously approved by the Pennsylvania and New Jersey public utility commissions, is the preferred route for the line under the NPS's National Environmental Policy Act review. The NPS has stated that it expects to issue its record of decision in October 2012. An appeal of the New Jersey Board of Public Utilities approval of the line is pending before the New Jersey Superior Court Appellate Division. PPL Electric cannot predict the ultimate outcome or timing of the NPS approval or any further legal challenges to the project. PJM has developed a strategy to manage potential reliability problems until the line is built. PPL Electric cannot predict what additional actions, if any, PJM might take in the event of further delay to its scheduled in-service date for the new line. See Note 8 in PPL's 2011 Form 10-K for additional information.

Ofgem Review of Line Loss Calculation

WPD has a $173 million liability recorded at March 31, 2012 compared with $170 million at December 31, 2011, calculated in accordance with Ofgem's accepted methodology, related to the close-out of line losses for the prior price control period, DPCR4. Ofgem is currently consulting on the methodology used to calculate the final line loss incentive/penalty for the DPCR4. In October 2011, Ofgem issued a consultation paper citing two potential changes to the methodology, both of which would result in a reduction of the liability. In March 2012, Ofgem issued a decision regarding the preferred methodology and in April 2012 WPD submitted further data as requested by Ofgem. PPL cannot predict the outcome of this matter, but expects resolution to occur before the end of 2012.

Results of Operations

The following discussion provides a review of results by reportable segment and a description of factors by segment expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

On April 1, 2011, PPL completed its acquisition of WPD Midlands. As a result, the results of operations of WPD Midlands are included in PPL's results for the three months ended March 31, 2012, with no comparable amounts for the same period in 2011. When discussing PPL's results of operations for 2012 compared with 2011, the results of WPD Midlands are isolated for purposes of comparability. WPD Midlands' results are included within the U.K. Regulated segment (formerly the International Regulated segment, renamed in 2012). See Note 8 to the Financial Statements for additional information regarding the acquisition.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Tables analyzing changes in amounts between periods within "Segment Results" and "Statement of Income Analysis" are presented on a constant U.K. foreign currency exchange rate basis, where applicable, in order to isolate the impact of the change in the exchange rate on the item being explained. Results computed on a constant U.K. foreign currency exchange rate basis are calculated by translating current year results at the prior year weighted-average U.K. foreign currency exchange rate.

Segment Results

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LKE's results from the operation of regulated electricity generation, transmission and distribution assets, primarily in Kentucky, as well as in Virginia and Tennessee. This segment also includes LKE's results from the regulated distribution and sale of natural gas in Kentucky.

Net Income Attributable to PPL Corporation includes the following results:

	Three Months Ended March 31,		
	2012	2011	% Change
Utility revenues	$ 705	$ 766	(8)
Fuel and energy purchases	287	322	(11)
Other operation and maintenance	206	181	14
Depreciation	86	81	6
Taxes, other than income	11	9	22
Total operating expenses	590	593	(1)
Other Income (Expense) - net	(3)	(1)	200
Interest Expense (a)	55	54	2
Income Taxes	15	43	(65)
Net Income Attributable to PPL Corporation	$ 42	$ 75	(44)

(a) Includes allocated interest expense of $17 million in 2012 and $18 million in 2011 related to the 2010 Equity Units and interest rate swaps.

The changes in the components of the Kentucky Regulated segment's results between these periods were due to the following factors, which are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

Kentucky Gross Margins	$ (28)
Other operation and maintenance	(22)
Depreciation	(4)
Taxes, other than income	(2)
Other Income (Expense) - net	(2)
Interest Expense	(1)
Income Taxes	22
Special Items, after-tax	4
Total	$ (33)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Kentucky Gross Margins.

- Higher other operation and maintenance expense due to $11 million of higher steam maintenance costs primarily resulting from an increased scope of scheduled plant outages, a $6 million credit to establish a regulatory asset recorded in the first quarter of 2011 related to 2009 storm costs and $3 million of higher storm restoration and vegetation management costs.

- Lower income taxes primarily due to the change in pre-tax income.

The following after-tax amounts, which management considers special items, also impacted the Kentucky Regulated segment's results.

	Income Statement Line Item	Three Months Ended March 31, 2012	2011
Special items gains (losses), net of tax (expense) benefit:			
LKE acquisition-related adjustments:			
Net operating loss carryforward and other tax related adjustments	Income Taxes and Other O&M	$ 4	
Total		$ 4	

Outlook

Excluding special items, PPL projects lower segment earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expense and higher depreciation, which are expected to be partially offset by higher margins.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

U.K. Regulated Segment

The U.K. Regulated segment consists primarily of the electric distribution operations of WPD in the U.K.

Net Income Attributable to PPL Corporation includes the following results:

	Three Months Ended March 31, 2012	2011	% Change
Utility revenues	$ 228	$ 216	6
Energy-related businesses	10	9	11
Total operating revenues	238	225	6
Other operation and maintenance	55	42	31
Depreciation	31	30	3
Taxes, other than income	14	13	8
Energy-related businesses	5	4	25
Total operating expenses	105	89	18
Other Income (Expense) - net	(21)	(1)	2,000
Interest Expense (a)	47	40	18
Income Taxes	19	21	(10)
WPD Midlands, after-tax (b)	123		n/a
WPD Midlands acquisition-related costs, net of tax	(4)	(19)	(79)
Net Income Attributable to PPL Corporation	$ 165	$ 55	200

(a) 2012 includes allocated interest expense of $12 million related to the 2011 Equity Units.
(b) Represents the operations of WPD Midlands for the three months ended March 31, 2012 including revenue from external customers of $324 million (pre-tax). This amount excludes acquisition-related costs incurred by WPD Midlands.

The changes in the components of the U.K. Regulated segment's results between these periods were due to the following factors, which are adjusted for certain items that management considers special. See additional detail of these special items in the table below. The amounts for PPL WW are presented on a constant U.K. foreign currency exchange rate basis in order to isolate the impact of the change in the exchange rate.

PPL WW	
Utility revenues	$ 15
Other operation and maintenance	(10)
Interest expense	4
Other	(2)
Income taxes	(2)
WPD Midlands, after-tax	124
U.S.	
Interest expense and other	(18)
Income taxes	(3)
Special items	2
Total	$ 110

PPL WW

- Higher utility revenues due to $36 million from a price increase in April 2011, partially offset by $13 million from lower volumes resulting from the downturn in the economy and weather, and $7 million of lower regulatory recovery due to a charge to income from an estimated over-recovery position in 2012, compared to a credit to income in 2011.

- Higher other operation and maintenance expense due to $5 million of higher pension expense resulting from higher amortization of prior period actuarial losses.

U.S.

- Higher U.S. interest expense and other due to $12 million of higher interest expense as a result of the 2011 Equity Units issued to finance the WPD Midlands acquisition.

The following after-tax amounts, which management considers special items, also impacted the U.K. Regulated segment's results.

	Income Statement Line Item	Three Months Ended March 31, 2012	2011
Special items gains (losses), net of tax (expense) benefit:			
Foreign currency-related economic hedges, net of tax of $7, $1 (a)	Other Income-net	$ (14)	$ (1)
WPD Midlands acquisition-related adjustments:			
2011 Bridge Facility costs, net of tax of $0, $2 (b)	Interest Expense		(5)
Net hedge losses, net of tax of $0, $3 (c)	Other Income-net		(4)
Separation benefits, net of tax of $2, $0 (d)	Other O&M	(4)	
Other acquisition-related costs, net of tax of $0, $1 (e)	Other Income-net		(10)
Total		$ (18)	$ (20)

(a) Represents unrealized gains (losses) on contracts that economically hedge anticipated earnings denominated in GBP.
(b) Represents amortization of fees incurred in connection with establishing the 2011 Bridge Facility.
(c) Primarily represents unrealized losses on foreign currency economic hedges associated with the repayment of the 2011 Bridge Facility.
(d) Represents severance compensation expense for employees separating from the WPD Midlands companies as a result of a reorganization to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales).
(e) Represents advisory, accounting and legal fees.

Outlook

Excluding special items, PPL projects higher segment earnings in 2012 compared with 2011, primarily driven by four additional months of earnings from the WPD Midlands businesses and higher electricity delivery revenue. Partially offsetting these positive earnings drivers are higher income taxes, higher operation and maintenance expense, higher depreciation, higher financing costs and a less favorable currency exchange rate.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment includes the regulated electric delivery operations of PPL Electric.

Net Income Attributable to PPL Corporation includes the following results:

	Three Months Ended March 31,		
	2012	2011	% Change
Operating revenues			
External	$ 457	$ 554	(18)
Intersegment	1	4	(75)
Total operating revenues	458	558	(18)
Energy purchases			
External	153	251	(39)
Intersegment	21	6	250
Other operation and maintenance	140	130	8
Depreciation	39	33	18
Taxes, other than income	26	35	(26)
Total operating expenses	379	455	(17)
Other Income (Expense) - net	2		n/a
Interest Expense	24	24	
Income Taxes	20	23	(13)
Net Income	37	56	(34)
Net Income Attributable to Noncontrolling Interests	4	4	
Net Income Attributable to PPL Corporation	$ 33	$ 52	(37)

The changes in the components of the Pennsylvania Regulated segment's results between these periods were due to the following factors.

Pennsylvania gross delivery margins	$ (13)
Other operation and maintenance	(6)
Depreciation	(6)
Other	3
Income Taxes	3
Total	$ (19)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.

- Higher other operation and maintenance expense due to $3 million of higher payroll related costs, $3 million of higher support group costs and $2 million of higher vegetation management costs, partially offset by $5 million of lower PUC reportable storm costs.

- Higher depreciation expense due to a $5 million depreciation impact from PP&E additions, primarily related to the ongoing efforts to maintain and enhance the reliability of the delivery system, including the replacement of aging infrastructure.

- Lower income taxes primarily due to lower pre-tax income, which reduced income taxes by $9 million, partially offset by $4 million of benefits recorded in 2011 related to Pennsylvania Department of Revenue interpretive guidance on bonus depreciation.

Outlook

Excluding special items, PPL projects lower segment earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expense, higher depreciation, and lower distribution revenue, which are expected to be partially offset by higher transmission revenue and lower financing costs.

In March 2012, PPL Electric filed a request with the PUC to increase distribution rates by approximately $105 million. The PUC's review of the distribution rate increase is expected to take about nine months. The proposed distribution revenue rate increase would result in a 2.9% increase over PPL Electric's present rates and would be effective January 1, 2013. PPL Electric cannot predict the outcome of this proceeding.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Supply Segment

The Supply segment primarily consists of the energy marketing and trading activities, as well as the competitive generation and development operations of PPL Energy Supply.

Net Income Attributable to PPL Corporation includes the following results:

	Three Months Ended March 31,		
	2012	2011	% Change
Energy revenues			
External (a)	$ 2,290	$ 1,253	83
Intersegment	21	6	250
Energy-related businesses	98	112	(13)
Total operating revenues	2,409	1,371	76
Fuel and energy purchases			
External (a)	1,458	555	163
Intersegment	1	1	
Other operation and maintenance	248	233	6
Depreciation	72	64	13
Taxes, other than income	18	16	13
Energy-related businesses	97	109	(11)
Total operating expenses	1,894	978	94
Other Income (Expense) - net	5	15	(67)
Other-Than-Temporary Impairments		1	(100)
Interest Expense	48	49	(2)
Income Taxes	171	142	20
Income (Loss) from Discontinued Operations		3	(100)
Net Income Attributable to PPL Corporation	$ 301	$ 219	37

(a) Includes the impact from energy-related economic activity. See "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements for additional information.

The changes in the components of the Supply segment's results between these periods were due to the following factors, which are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

Unregulated gross energy margins	$ (87)
Other operation and maintenance	(11)
Depreciation	(8)
Other Income (Expense) - net	(10)
Other	(2)
Income Taxes	65
Discontinued operations, after-tax - excluding certain revenues and expenses included in margins	3
Special items, after-tax	132
Total	$ 82

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.

- Higher other operation and maintenance expense due to $6 million of higher costs at the Susquehanna plant due to a combination of higher payroll-related costs, contractor costs and timing of projects, and $4 million of higher expenses at PPL EnergyPlus due primarily to payroll-related costs.

- Higher depreciation expense due to the depreciation impact of higher PP&E additions.

- Lower other income (expense) primarily due to $6 million of lower NDT fund earnings.

- Lower income taxes due to lower pre-tax income which reduced income taxes by $41 million, an $11 million benefit from a state tax rate adjustment recorded in 2012, and $11 million of Pennsylvania net operating loss valuation allowances recorded in 2011, driven primarily by the impact of bonus depreciation.

The following after-tax amounts, which management considers special items, also impacted the Supply segment's results.

	Income Statement Line Item	Three Months Ended March 31, 2012	2011
Special items gains (losses), net of tax (expense) benefit:			
Adjusted energy-related economic activity, net, net of tax of ($102), ($12)	(a)	$ 150	$ 17
Impairments:			
Emission allowances, net of tax of $0, $0	Other O&M		(1)
Renewable energy credits, net of tax of $0, $1	Other O&M		(2)
Adjustments - nuclear decommissioning trust investments, net of tax of ($1), ($1)	Other Income-net	1	1
LKE acquisition-related adjustments:			
Sale of certain non-core generation facilities, net of tax of $0, ($1)	Disc. Operations		(1)
Other:			
Counterparty bankruptcy, net of tax of $5, $0 (b)	Other O&M	(6)	
Ash basin leak remediation adjustment, net of tax of ($1), $0	Other O&M	1	
Total		$ 146	$ 14

(a) See "Reconciliation of Economic Activity" below.
(b) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. PPL EnergyPlus recorded an allowance for unpaid amounts under the long-term power contract. In March 2012, the U.S. Bankruptcy Court for the District of Montana approved the request to terminate the contract, effective April 1, 2012.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net."

	Three Months Ended March 31, 2012	2011
Operating Revenues		
Unregulated retail electric and gas	$ 10	$ 4
Wholesale energy marketing	852	57
Operating Expenses		
Fuel	2	23
Energy Purchases	(591)	18
Energy-related economic activity (a)	273	102
Option premiums (b)		5
Adjusted energy-related economic activity	273	107
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010	21	78
Adjusted energy-related economic activity, net, pre-tax	$ 252	$ 29
Adjusted energy-related economic activity, net, after-tax	$ 150	$ 17

(a) See Note 14 to the Financial Statements for additional information.
(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statements of Income.

Outlook

Excluding special items, PPL projects lower segment earnings in 2012 compared with 2011. The decrease is primarily driven by lower energy margins as a result of lower energy and capacity prices and higher fuel costs, higher operation and maintenance expense and higher depreciation, which are expected to be partially offset by higher baseload generation.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

<u>Non-GAAP Financial Measures</u>

The following discussion includes financial information prepared in accordance with GAAP, as well as three non-GAAP financial measures: "Kentucky Gross Margins," "Pennsylvania Gross Delivery Margins" and "Unregulated Gross Energy Margins." These measures are not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL believes that these measures provide additional criteria to make investment decisions. These performance measures are used, in conjunction with other information, internally by senior management and the Board of Directors to manage the Kentucky Regulated, Pennsylvania Regulated and Supply segment operations, analyze each respective segment's actual results compared with budget and, in certain cases, to measure certain corporate financial goals used in determining variable compensation.

PPL's three non-GAAP financial measures include:

- "Kentucky Gross Margins" is a single financial performance measure of the Kentucky Regulated segment's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expense and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. As a result, this measure represents the net revenues from the Kentucky Regulated segment's operations.

- "Pennsylvania Gross Delivery Margins" is a single financial performance measure of the Pennsylvania Regulated segment's electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance" expense, which is primarily Act 129 costs, and in "Taxes, other than income," which is primarily gross receipts tax. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)" in the table below. As a result, this measure represents the net revenues from the Pennsylvania Regulated segment's electric delivery operations.

- "Unregulated Gross Energy Margins" is a single financial performance measure of the Supply segment's competitive energy non-trading and trading activities. In calculating this measure, the Supply segment's energy revenues, which include operating revenues associated with certain Supply segment businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain Supply segment businesses that are classified as discontinued operations. This performance measure is relevant to PPL due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)" in the table below. PPL excludes from "Unregulated Gross Energy Margins" the Supply segment's adjusted energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization.

Reconciliation of Non-GAAP Financial Measures

The following table reconciles "Operating Income" to PPL's three non-GAAP financial measures for the three months ended March 31.

	2012					2011				
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues										
Utility	$ 705	$ 457		$ 552 (c)	$ 1,714	$ 766	$ 554		$ 216 (c)	$ 1,536
PLR intersegment utility revenue (expense) (d)		(21)	$ 21				(6)	$ 6		
Unregulated retail electric and gas			214	9 (g)	223			143	4	147
Wholesale energy marketing										
Realized			1,204	4 (e)	1,208			1,022	16 (e)	1,038
Unrealized economic activity				852 (f)	852				57 (f)	57
Net energy trading margins			8		8			11		11
Energy-related businesses				107	107				121	121
Total Operating Revenues	705	436	1,447	1,524	4,112	766	548	1,182	414	2,910
Operating Expenses										
Fuel	213		214	(3) (g)	424	215		284	(24) (g)	475
Energy purchases										
Realized	74	153	636	20 (e)	883	107	251	227	86 (e)	671
Unrealized economic activity				591 (f)	591				(18) (f)	(18)
Other operation and maintenance	22	22	4	658	706	21	18	4	540	583
Depreciation	13			251	264	12			196	208
Taxes, other than income		25	8	58	91		33	7	33	73
Energy-related businesses				102	102				113	113
Intercompany eliminations		(1)	1				(4)	1	3	
Total Operating Expenses	322	199	863	1,677	3,061	355	298	523	929	2,105
Discontinued operations								12	(12) (h)	
Total	$ 383	$ 237	$ 584	$ (153)	$ 1,051	$ 411	$ 250	$ 671	$ (527)	$ 805

(a) Represents amounts that are excluded from Margins.
(b) As reported on the Statement of Income.
(c) Primarily represents WPD's utility revenue.
(d) Primarily related to PLR supply sold by PPL EnergyPlus to PPL Electric.
(e) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. The three months ended March 31, 2012, includes a net pre-tax loss of $21 million related to the monetization of certain full-requirement sales contracts. The three months ended March 31, 2011 includes a net pre-tax gain of $5 million related to the amortization of option premiums and a net pre-tax loss of $78 million related to the monetization of certain full-requirement sales contracts.
(f) Represents energy-related economic activity, which is subject to fluctuations in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(g) Includes economic activity as described in "Commodity price risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(h) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL's three non-GAAP financial measures for the three months ended March 31, as well as the change between periods. The factors that gave rise to the changes are described below the table.

	2012	2011	Change
Kentucky Gross Margins	$ 383	$ 411	$ (28)
PA Gross Delivery Margins by Component			
Distribution	$ 189	$ 208	$ (19)
Transmission	48	42	6
Total	$ 237	$ 250	$ (13)
Unregulated Gross Energy Margins by Region			
Non-trading			
Eastern U.S.	$ 489	$ 578	$ (89)
Western U.S.	87	82	5
Net energy trading	8	11	(3)
Total	$ 584	$ 671	$ (87)

Kentucky Gross Margins

Lower Kentucky gross margins due to $23 million of lower retail electric margins as volumes were impacted by unseasonably mild weather in the first quarter of 2012 as total heating degree days decreased by 26%.

Pennsylvania Gross Delivery Margins

Distribution

Margins decreased as weather had an unfavorable impact of $16 million on base distribution revenues.

Transmission

Margins increased primarily due to increased investment in plant and the recovery of additional costs through the FERC formula-based rates.

Unregulated Gross Energy Margins

Eastern U.S.

The changes in Eastern U.S. non-trading margins for the three months were:

Baseload energy and capacity (a)	$	(82)
Margins on the intermediate and peaking units (b)		(22)
Impact of non-core generation facilities sold in the first quarter of 2011		(12)
Higher nuclear fuel prices		(5)
Full-requirement sales contracts		(5)
Gas optimization and storage		(5)
Margins from retail electric business		7
Net coal and hydroelectric unit availability (c)		10
Nuclear generation volume (d)		25
	$	(89)

(a) Energy prices and capacity prices were lower in 2012.
(b) Capacity prices were lower in 2012.
(c) Coal unit availability was higher in 2012 compared to 2011, however, volumes were lower as a result of economic reductions.
(d) Volumes were higher due to an unplanned outage in March 2011 and an uprate in the third quarter of 2011.

Western U.S.

Non-trading margins were $13 million higher due to higher net wholesale prices, partially offset by $7 million of lower wholesale volumes.

Utility Revenues

The increase (decrease) in utility revenues was due to:

		Three Months Ended March 31, 2012 vs. March 31, 2011
Domestic:		
PPL Electric (a)		
Transmission rate base	$	6
Revenue related to delivery		
Price		14
Volume (b)		(28)
Revenue related to PLR energy supply (c)		(89)
Total PPL Electric		(97)
LKE		
Price (d)		10
Volume (e)		(78)
Other		7
Total LKE		(61)
Total Domestic		(158)

	Three Months Ended March 31, 2012 vs. March 31, 2011
U.K.:	
PPL WW	
Price (f)	36
Volume (g)	(13)
Recovery of allowed revenues (h)	(7)
Other	(4)
Total PPL WW	12
WPD Midlands (i)	324
Total U.K.	336
Total	$ 178

(a) See "Pennsylvania Gross Delivery Margins" for further information.
(b) Unseasonably mild weather had a $16 million unfavorable impact on volume.
(c) These changes in revenue had a minimal impact on earnings as the cost of supplying this energy as a PLR is passed through to the customer with no additional mark-up. These revenues are offset primarily with energy purchases in "Pennsylvania Gross Delivery Margins."
(d) Primarily due to an increase in the price of recoverable fuel costs. This change in revenue had a minimal impact on earnings as this revenue is offset primarily with fuel costs in "Kentucky Gross Margins."
(e) Primarily due to lower volumes resulting from unseasonably mild weather. This change in revenue is partially offset by a reduction in fuel costs and energy purchases in "Kentucky Gross Margins."
(f) Due to a price increase effective April 1, 2011.
(g) Primarily due to the downturn in the economy and weather.
(h) Primarily due to an estimated over-recovery position in 2012, compared to a credit to income in 2011.
(i) There are no comparable amounts in the 2011 period as WPD Midlands was acquired in April 2011.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Domestic:	
Uncollectible accounts (a)	$ 14
Susquehanna nuclear plant costs	6
Stock based compensation	8
Pension and other postretirement benefit costs	5
LKE steam maintenance plant costs (b)	11
LKE storm costs (c)	6
Other	6
U.K.:	
PPL WW (d)	10
WPD Midlands (e)	57
Total	$ 123

(a) In October 2011, SMGT filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. This increase primarily reflects an $11 million increase to a reserve on unpaid amounts.
(b) Increase primarily due to steam maintenance costs, resulting from an increased scope of scheduled outages.
(c) A $6 million credit to establish a regulatory asset was recorded in the first quarter of 2011 related to 2009 storm costs.
(d) Increase includes $5 million of higher pension expenses resulting from the amortization of prior period actuarial losses.
(e) There are no comparable amounts in the 2011 period as WPD Midlands was acquired in April 2011.

Depreciation

The increase (decrease) in depreciation expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Additions to PP&E	$ 20
WPD Midlands (a)	36
Total	$ 56

(a) There are no comparable amounts in the 2011 period as WPD Midlands was acquired in April 2011.

Taxes, Other Than Income

The increase (decrease) in taxes, other than income was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Pennsylvania gross receipts tax (a)	$ (7)
WPD Midlands (b)	22
Other	3
Total	$ 18

(a) Primarily due to a decrease in taxable electric revenues. This tax is included in "Unregulated Gross Energy Margins" and "Pennsylvania Gross Delivery Margins."
(b) There are no comparable amounts in the 2011 period as WPD Midlands was acquired in April 2011.

Other Income (Expense) - net

The $12 million decrease in other income (expense) - net for the three months ended March 31, 2012 compared with the same period in 2011 was primarily due to:

- a $7 million decrease in earnings on securities in NDT funds;
- a $16 million increase in a loss from economic foreign currency exchange contracts; partially offset by
- a $7 million loss from foreign currency forward contracts in 2011 that hedged the anticipated repayment of borrowings under the 2011 Bridge Facility; and
- $11 million of WPD Midlands acquisition-related costs recorded in 2011.

See Note 12 to the Financial Statements for additional information.

Interest Expense

The increase (decrease) in interest expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Interest rates (excluding 2011 Equity Units) (a)	$ (11)
Debt balances (excluding 2011 Equity Units)	4
WPD Midlands (b)	56
2011 Bridge Facility costs related to the acquisition of WPD Midlands	(7)
2011 Equity Units (c)	12
Hedging activities	9
Other	(7)
Total	$ 56

(a) Lower average long-term interest rates due to a weighted average rate of 4.75% for the three months ended March 31, 2012 compared with a rate of 5.03% for the same period in 2011.
(b) There are no comparable amounts in the 2011 period as WPD Midlands was acquired in April 2011.
(c) Interest related to the issuance in April 2011 to support the WPD Midlands acquisition.

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Higher pre-tax book income	$ 7
State valuation allowance adjustments (a)	(11)
Federal and state tax return adjustments	3
U.S. income tax on foreign earnings net of foreign tax credit (b)	8
Net operating loss carryforward adjustment (c)	(6)
Depreciation not normalized (a)	2
WPD Midlands (d)	34
State deferred tax rate change (e)	(11)
Intercompany interest on WPD financing entities	6
Other	4
Total	$ 36

(a) In February 2011 the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal tax purposes. Due to the decrease in projected taxable income related to bonus depreciation, PPL recorded an $11 million state deferred income tax expense during the three months ended March 31, 2011 related to valuation allowances.

Additionally, the 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation. The federal provision for 100% bonus depreciation generally applies to property placed in service before January 1, 2012. The placed in service deadline is extended to January 1, 2013 for property that exceeds $1 million, has a production period longer than one year and has a tax life of at least 10 years.
(b) During the three months ended March 31, 2011, PPL recorded a $7 million federal income tax benefit related to U.K. pension contributions.
(c) During the three months ended March 31, 2012, PPL recorded an adjustment to deferred taxes related to net operating loss carryforwards of LKE.
(d) There are no comparable amounts in the 2011 period as WPD Midlands was acquired in April 2011.
(e) During the three months ended March 31, 2012, PPL recorded an $11 million adjustment related to state deferred tax liabilities.

See Note 5 to the Financial Statements for additional information on income taxes .

Financial Condition

Liquidity and Capital Resources

PPL had the following at:

	March 31, 2012	December 31, 2011
Cash and cash equivalents	$ 1,103	$ 1,202
Short-term investments		16
	$ 1,103	$ 1,218
Short-term debt	$ 674	$ 578

At March 31, 2012, $501 million of cash and cash equivalents were denominated in GBP. If these amounts would be remitted as dividends, PPL may be subject to additional U.S. taxes, net of allowable foreign tax credits. Historically, dividends paid by foreign subsidiaries have been distributions of the current year's earnings. See Note 5 to the Financial Statements in PPL's 2011 Form 10-K for additional information on undistributed earnings of WPD.

The $99 million decrease in PPL's cash and cash equivalents position was primarily the net result of:

- $682 million of capital expenditures; and
- the payment of $203 million of common stock dividends; partially offset by
- $728 million of cash provided by operating activities; and
- a net increase in short-term debt of $93 million.

PPL's cash provided by operating activities increased $532 million for the three months ended March 31, 2012 compared with the same period in 2011. The increase was primarily due to:

- cash from components of working capital of $238 million, primarily related to changes in counterparty collateral;
- lower defined benefit plan contributions of $223 million; and
- operating cash provided by WPD Midlands of $150 million.

Credit Facilities

At March 31, 2012, PPL's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backstop	Unused Capacity
PPL Energy Supply Credit Facilities	$ 3,200		$ 778	$ 2,422
PPL Electric Credit Facilities (a)	350		1	349
LG&E Credit Facility	400			400
KU Credit Facilities	598		198	400
Total Domestic Credit Facilities (b)	$ 4,548		$ 977	$ 3,571
PPL WW Credit Facility	£ 150	£ 110	n/a	£ 40
WPD (South West) Credit Facility (c)	245		n/a	245
WPD (East Midlands) Credit Facility	300		£ 70	230
WPD (West Midlands) Credit Facility	300		71	229
Total WPD Credit Facilities (d)	£ 995	£ 110	£ 141	£ 744

(a) In April 2012, PPL Electric increased the capacity of its syndicated credit facility from $200 million to $300 million.

Committed capacity includes a $150 million credit facility related to an asset-backed commercial paper program through which PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary pledges these assets to secure loans of up to an aggregate of $150 million from a commercial paper conduit sponsored by a financial institution. At March 31, 2012, based on accounts receivable and unbilled revenue pledged, the amount available for borrowing under the facility was limited to $82 million.

(b) The commitments under PPL's domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 9% of the total committed capacity.

(c) In January 2012, WPD (South West) entered into a new £245 million syndicated credit facility to replace its existing £210 million syndicated credit facility. Under the new facility, WPD (South West) has the ability to make cash borrowings but cannot request the lenders to issue letters of credit. WPD (South West) pays customary commitment fees under this facility, and borrowings bear interest at LIBOR-based rates plus a margin. The facility contains financial covenants that require WPD (South West) to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facility.

(d) At March 31, 2012, the unused capacity of WPD's committed credit facilities was approximately $1.2 billion. The commitments under WPD's credit facilities are provided by a diverse bank group with no one bank providing more than 16% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL's credit facilities.

Commercial Paper

In April 2012, PPL Energy Supply increased the capacity of its commercial paper program from $500 million to $750 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At March 31, 2012, PPL Energy Supply had $500 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheet, at a weighted-average interest rate of approximately 0.47%.

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at March 31, 2012.

In February 2012, LG&E and KU each established a commercial paper program for up to $250 million to provide an additional financing source to fund their short-term liquidity needs. Commercial paper issuances will be supported by LG&E and KU's Syndicated Credit Facilities. LG&E and KU had no commercial paper outstanding at March 31, 2012.

Long-term Debt and Equity Securities

In April 2012, PPL made a registered underwritten public offering of 9.9 million shares of its common stock. In conjunction with that offering, the underwriters exercised an option to purchase an additional 590,880 shares of PPL common stock solely to cover over-allotments.

In connection with the registered public offering, PPL entered into forward sale agreements with two counterparties covering the 9.9 million shares of PPL's common stock. Settlement of these initial forward sale agreements will occur no later than April 2013. As a result of the underwriters' exercise of the overallotment option, PPL entered into additional forward sale agreements covering the additional 590,880 shares of common stock. Settlement of the subsequent forward sale agreements will occur in July 2013. Upon any physical settlement of any forward sale agreement, PPL will issue and deliver to the forward counterparties shares of its common stock in exchange for cash proceeds per share equal to the forward sale price. The forward sale price will be calculated based on an initial forward price of $27.02 per share reduced during the period the contracts are outstanding as specified in the forward sale agreements. PPL may, in certain circumstances, elect cash settlement or net share settlement for all or a portion of its rights or obligations under the forward sale agreements.

PPL will not receive any proceeds or issue any shares of common stock until settlement of the forward sale agreements. PPL intends to use any net proceeds that it receives upon settlement to repay short-term debt obligations and for other general corporate purposes.

The forward sale agreements will be classified as equity transactions. As a result, no amounts will be recorded in the consolidated financial statements until the settlement of the forward sale agreements. Prior to those settlements, the only impact to the financial statements will be the inclusion of incremental shares within the calculation of diluted EPS using the treasury stock method.

Also in April 2012, WPD (East Midlands) issued £100 million aggregate principal amount of 5.25% Senior Notes due 2023. WPD (East Midlands) received proceeds of approximately £111 million, which equated to $178 million at the time of issuance, net of underwriting fees. The net proceeds will be used for general corporate purposes.

In April 2012, an indirect, wholly owned subsidiary of PPL Energy Supply completed the Ironwood Acquisition. See Note 8 to the Financial Statements for information on the transaction and the debt of PPL Ironwood, LLC assumed through consolidation as part of the acquisition.

In April 2012, PPL Electric gave notice that it had elected to redeem all 2.5 million shares of its 6.25% Series Preference Stock, par value $100 per share, on June 18, 2012. The price to be paid for the redemption is the par value, without premium ($250 million in the aggregate). The Preference Stock is reflected on PPL's Balance Sheets in "Noncontrolling Interests" as of March 31, 2012 and December 31, 2011.

In April 2012, LKE filed a Form S-4 Registration Statement with the SEC, as required by a registration rights agreement entered into in connection with the issuance of senior notes in September 2011, in a transaction not registered under the Securities Act of 1933. The Form S-4 relates to an offer to exchange the senior notes issued in September 2011, with similar but registered securities. See Note 7 in PPL's and LKE's 2011 Form 10-K for additional information.

See Note 7 to the Financial Statements for additional information about long-term debt and equity securities.

Common Stock Dividends

In February 2012, PPL declared its quarterly common stock dividend, payable April 2, 2012, at 36.0 cents per share (equivalent to $1.44 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt and preferred securities of PPL and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL and its subsidiaries are based on information provided by PPL and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act, PPL is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL's ratings, but without stating what ratings have been assigned to PPL or its subsidiaries, or their securities. The ratings assigned by the rating agencies to PPL and its subsidiaries and their respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is hereby explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to PPL and its subsidiaries.

In January 2012, S&P affirmed its rating and revised its outlook to stable from positive for PPL Montana's Pass Through Certificates due 2020.

In February 2012, Fitch assigned ratings to the two newly established commercial paper programs for LG&E and KU.

In March 2012, Moody's affirmed the following ratings:

- the long-term ratings of the First Mortgage Bonds for LG&E and KU;
- the issuer ratings for LG&E and KU; and
- the bank loan ratings for LG&E and KU.

Also in March 2012, Moody's and S&P each assigned short-term ratings to the two newly established commercial paper programs for LG&E and KU.

Following the announcement of the then-pending acquisition of AES Ironwood, L.L.C. in February 2012, the rating agencies took the following actions:

In March 2012, Moody's placed AES Ironwood, L.L.C.'s senior secured bonds under review for possible ratings upgrade.

In April 2012, S&P affirmed the rating of AES Ironwood, L.L.C.'s senior secured bonds.

Ratings Triggers

PPL and PPL Energy Supply have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate and foreign currency instruments, which contain provisions requiring PPL and PPL Energy Supply to post additional collateral, or permit the counterparty to terminate the contract, if PPL's or PPL Energy Supply's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at March 31, 2012. At March 31, 2012, if PPL's and PPL Energy Supply's credit ratings had been below investment grade, PPL would have been required to prepay or post an additional $527 million of collateral to counterparties for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations and interest rate and foreign currency contracts.

For additional information on PPL's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL's 2011 Form 10-K.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about PPL's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

PPL segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL's generation assets, full-requirement sales contracts and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. The fair value of economic positions at March 31, 2012 and December 31, 2011 was a net asset of $816 million and a net liability of $63 million. The change in fair value is largely attributable to the dedesignation of cash flow hedges that are now classified as economic hedges. See Note 14 to the Financial Statements for additional information.

To hedge the impact of market price volatility on PPL's energy-related assets, liabilities and other contractual arrangements, PPL both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL's non-trading commodity derivative contracts mature at various times through 2019.

The following table sets forth the change in net fair value of PPL's non-trading commodity derivative contracts. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)	
	Three Months Ended March 31,	
	2012	2011
Fair value of contracts outstanding at the beginning of the period	$ 1,082	$ 947
Contracts realized or otherwise settled during the period	(279)	(43)
Fair value of new contracts entered into during the period (a)	(1)	(16)
Other changes in fair value	413	109
Fair value of contracts outstanding at the end of the period	$ 1,215	$ 997

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of PPL's non-trading commodity derivative contracts at March 31, 2012, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
Source of Fair Value	**Maturity Less Than 1 Year**	**Maturity 1-3 Years**	**Maturity 4-5 Years**	**Maturity in Excess of 5 Years**	**Total Fair Value**
Prices based on significant other observable inputs	$ 854	$ 349	$ (17)	$ 10	$ 1,196
Prices based on significant unobservable inputs	10	5	4		19
Fair value of contracts outstanding at the end of the period	$ 864	$ 354	$ (13)	$ 10	$ 1,215

PPL sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties (or their own counterparties) with which it has energy contracts and other factors could affect PPL's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future. In connection with its bankruptcy proceedings, a significant counterparty, SMGT, had been purchasing lower volumes of electricity than prescribed in the contract and effective April 1, 2012 the contract was terminated. At this time, PPL Energy Supply cannot predict the prices or other terms on which it will be able to market to third parties the power that SMGT will not purchase from PPL EnergyPlus due to the termination of this contract. See Note 10 to the Financial Statements for additional information.

Commodity Price Risk (Trading)

PPL's trading commodity derivative contracts mature at various times through 2016. The following table sets forth changes in the net fair value of PPL's trading commodity derivative contracts. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses) Three Months Ended March 31,	
	2012	**2011**
Fair value of contracts outstanding at the beginning of the period	$ (4)	$ 4
Contracts realized or otherwise settled during the period		2
Fair value of new contracts entered into during the period (a)	6	3
Other changes in fair value		(2)
Fair value of contracts outstanding at the end of the period	$ 2	$ 7

(a) Represents the fair value of contracts at the end of the quarter of their inception.

Unrealized losses of approximately $5 million will be reversed over the next three months as the transactions are realized.

The following table segregates the net fair value of trading commodity derivative contracts at March 31, 2012, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
Source of Fair Value	**Maturity Less Than 1 Year**	**Maturity 1-3 Years**	**Maturity 4-5 Years**	**Maturity in Excess of 5 Years**	**Total Fair Value**
Prices based on significant other observable inputs	$ (8)	$ 8	$ 2		$ 2
Fair value of contracts outstanding at the end of the period	$ (8)	$ 8	$ 2		$ 2

VaR Models

A VaR model is utilized to measure commodity price risk in domestic gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's conservative hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the period was as follows.

	Trading VaR		Non-Trading VaR	
	Three Months Ended March 31, 2012	Twelve Months Ended December 31, 2011	Three Months Ended March 31, 2012	Twelve Months Ended December 31, 2011
95% Confidence Level, Five-Day Holding Period				
Period End	$ 2	$ 1	$ 7	$ 6
Average for the Period	2	3	8	5
High	2	6	9	7
Low	1	1	7	4

The trading portfolio includes all speculative positions, regardless of the delivery period. All positions not considered speculative are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at March 31, 2012.

Interest Rate Risk

PPL and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL's debt portfolio due to changes in the absolute level of interest rates.

At March 31, 2012, PPL's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL is also exposed to changes in the fair value of its domestic and U.K. debt portfolios. PPL estimated that a 10% decrease in interest rates at March 31, 2012 would increase the fair value of its debt portfolio by $620 million.

At March 31, 2012, PPL had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)
Cash flow hedges			
Interest rate swaps (c)	$ 175		$ (4)
Cross-currency swaps (d)	1,262	$ 35	(185)
Fair value hedges			
Interest rate swaps (e)	99	3	
Economic hedges			
Interest rate swaps (f)	179	(54)	(4)

(a) Includes accrued interest, if applicable.
(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
(c) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any changes in the fair value of such cash flow hedges are recorded in equity. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at March 31, 2012 mature in 2022.
(d) PPL WEM, through PPL, and PPL WW use cross-currency swaps to hedge the interest payments and principal of their U.S. dollar-denominated senior notes. The maturity dates of positions outstanding at March 31, 2012 range from May 2016 to December 2028. While PPL is exposed to changes in the fair value of these instruments, any change in the fair value of these instruments is recorded in equity and reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in both interest rates and foreign currency exchange rates.
(e) PPL utilizes various risk management instruments to adjust the mix of fixed and floating interest rates in its debt portfolio. The change in fair value of these instruments, as well as the offsetting change in the value of the hedged exposure of the debt, is reflected in earnings. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at March 31, 2012 mature in 2047.
(f) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic hedges are recoverable through regulated rates

and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at March 31, 2012 mature through 2033.

Foreign Currency Risk

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL's domestic operations may make purchases of equipment in currencies other than U.S. dollars.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

At March 31, 2012, PPL had the following foreign currency hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)
Net investment hedges (b)	£ 55	$ 1	$ (9)
Economic hedges (c)	761	(9)	(112)

(a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
(b) To protect the value of a portion of its net investment in WPD, PPL executes forward contracts to sell GBP.
(c) To economically hedge the translation of expected income denominated in GBP to U.S. dollars, PPL enters into a combination of average rate forwards and average rate options to sell GBP. The forwards and options outstanding at March 31, 2012, have termination dates ranging from April 2012 through September 2013.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the Susquehanna nuclear plant. At March 31, 2012, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on PPL's Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its NDT policy statement. At March 31, 2012, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated $48 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's 2011 Form 10-K for additional information.

Foreign Currency Translation

The value of the British pound sterling fluctuates in relation to the U.S. dollar. Changes in these exchange rates resulted in a foreign currency translation gain of $76 million for the three months ended March 31, 2012, which primarily reflected a $141 million increase to PP&E offset by an increase of $65 million to net liabilities. Changes in these exchange rates resulted in a foreign currency translation gain of $67 million for the three months ended March 31, 2011, which primarily reflected a $158 million increase to PP&E offset by an increase of $91 million to net liabilities. The impact of foreign currency translation is recorded in AOCI.

Related Party Transactions

PPL is not aware of any material ownership interests or operating responsibility by senior management of PPL, PPL Energy Supply, PPL Electric, LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with PPL. See Note 11 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

See Note 8 to the Financial Statements for information on the April 2012 Ironwood Acquisition.

See Note 10 to the Financial Statements in PPL's 2011 Form 10-K and Note 8 to the Financial Statements for information on PPL's April 2011 acquisition of WPD Midlands.

Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Protection of the environment is a priority for PPL and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to PPL's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the cost for their products or their demand for PPL's services. See "Item 1. Business - Environmental Matters" in PPL's 2011 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Notes 2 and 18 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: price risk management, defined benefits, asset impairment, loss accruals, AROs, income taxes, regulatory assets and liabilities and business combinations - purchase price allocation. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL's 2011 Form 10-K for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with PPL Energy Supply's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL Energy Supply's 2011 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL Energy Supply and its business strategy, a summary of Net Income Attributable to PPL Energy Supply and a discussion of certain events related to PPL Energy Supply's results of operations and financial condition.

- "Results of Operations" provides a summary of PPL Energy Supply's earnings and a description of factors expected to impact future earnings. This section ends with explanations of significant changes in principal items on PPL Energy Supply's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Energy Supply's liquidity position and credit profile.

- "Financial Condition - Risk Management" provides an explanation of PPL Energy Supply's risk management programs relating to market and credit risk.

Overview

Introduction

PPL Energy Supply is an energy company with headquarters in Allentown, Pennsylvania. Through its subsidiaries, PPL Energy Supply is primarily engaged in the generation and marketing of electricity in two key markets - the northeastern and northwestern U.S.

Business Strategy

PPL Energy Supply's overall strategy is to achieve disciplined optimization of energy supply margins while mitigating volatility in both cash flows and earnings. More specifically, PPL Energy Supply's strategy is to optimize the value from its unregulated generation and marketing portfolio. PPL Energy Supply endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk.

To manage financing costs and access to credit markets, a key objective of PPL Energy Supply's business is to maintain a strong credit profile. PPL Energy Supply continually focuses on maintaining an appropriate capital structure and liquidity position. In addition, PPL Energy Supply has financial and operational risk management programs that, among other things, are designed to monitor and manage its exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Developments

Net Income Attributable to PPL Energy Supply

	Three Months Ended March 31,		
	2012	2011	% Change
Net Income Attributable to PPL Energy Supply	$ 309	$ 214	44

See "Results of Operations" for a discussion and analysis of PPL Energy Supply's earnings.

Ironwood Acquisition

In April 2012, an indirect, wholly owned subsidiary of PPL Energy Supply completed the acquisition from a subsidiary of the AES Corporation of all of the equity interests of AES Ironwood, L.L.C. (subsequently renamed PPL Ironwood, LLC) and AES Prescott, L.L.C. (subsequently renamed PPL Prescott, LLC), which own and operate, respectively, the Ironwood Facility. The Ironwood Facility began operation in 2001 and, since 2008, PPL EnergyPlus has supplied natural gas for the operation of the Ironwood Facility and received the facility's full electricity output and capacity value pursuant to a tolling agreement that expires in 2021. The acquisition provides PPL Energy Supply, through its subsidiaries, operational control of additional combined-cycle gas generation in PJM.

See Note 8 to the Financial Statements for additional information.

Bankruptcy of SMGT

In October 2011, SMGT, a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019 (SMGT Contract), filed for protection under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the District of Montana. At the time of the bankruptcy filing, SMGT was PPL EnergyPlus' largest unsecured credit exposure.

The SMGT Contract provided for fixed volume purchases on a monthly basis at established prices. Pursuant to a court order and subsequent stipulations entered into between the SMGT bankruptcy trustee and PPL EnergyPlus, since the date of its Chapter 11 filing through January 2012, SMGT continued to purchase electricity from PPL EnergyPlus at the price specified in the SMGT Contract, and made timely payments for such purchases, but at lower volumes than as prescribed in the SMGT Contract. In January 2012, the trustee notified PPL EnergyPlus that SMGT would not purchase electricity under the SMGT Contract for the month of February. In March 2012, the U.S. Bankruptcy Court for the District of Montana issued an order approving the request of the SMGT bankruptcy trustee and PPL EnergyPlus to terminate the SMGT Contract. As a result, the SMGT Contract was terminated effective April 1, 2012, allowing PPL EnergyPlus to resell the electricity previously contracted to SMGT under the SMGT Contract to other customers.

PPL EnergyPlus' receivable under the SMGT Contract totaled approximately $22 million at March 31, 2012, which has been fully reserved. No assurance can be given as to the collectability of the receivable.

At this time, PPL Energy Supply cannot predict the prices and other terms on which it will be able to market to third parties the power that SMGT will not purchase from PPL EnergyPlus due to the termination of the SMGT Contract.

Results of Operations

The following discussion provides a summary of PPL Energy Supply's earnings and a description of factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL Energy Supply's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

	Three Months Ended March 31,	
	2012	2011
Net Income Attributable to PPL Energy Supply	$ 309	$ 214

The changes in the components of Net Income Attributable to PPL Energy Supply between these periods were due to the following factors, which are adjusted for certain items that management considers special. See additional detail of these special items in the tables below.

Unregulated gross energy margins	$	(87)
Other operation and maintenance		(6)
Depreciation		(5)
Other Income (Expense) - net		(9)
Interest Expense		9
Other		(1)
Income Taxes		59
Discontinued operations, after-tax - excluding certain revenues and expenses included in margins		3
Special items, after-tax		132
Total	$	95

- See "Statement of Income Analysis - Unregulated Gross Energy Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.

- Higher other operation and maintenance expense due to $6 million of higher costs at the Susquehanna plant due to a combination of higher payroll-related costs, contractor costs and timing of projects and $4 million of higher expenses at PPL EnergyPlus due primarily to payroll-related costs and $2 million higher allocated support group costs, partially offset by $9 million of trademark royalties with an affiliate in 2011 for which the agreement was terminated December 31, 2011.

- Higher depreciation expense due to the depreciation impact of higher PP&E additions.

- Lower other income (expense) primarily due to $6 million of lower NDT fund earnings.

- Lower interest expense due to $5 million of lower interest rates due primarily to the redemption of 7.00% Senior Unsecured Notes in July 2011 and $3 million of lower average short-term and long-term debt balances.

- Lower income taxes due to lower pre-tax income which reduced income taxes by $41 million, an $11 million benefit from a state tax rate adjustment recorded in 2012, and $6 million of Pennsylvania net operating loss valuation allowances recorded in 2011, driven primarily by the impact of bonus depreciation.

The following after-tax amounts, which management considers special items, also impacted the results.

	Income Statement Line Item	Three Months Ended March 31, 2012		2011	
Special items gains (losses), net of tax (expense) benefit:					
Adjusted energy-related economic activity, net, net of tax of ($102), ($12)	(a)	$	150	$	17
Impairments:					
Emission allowances, net of tax of $0, $0	Other O&M				(1)
Renewable energy credits, net of tax of $0, $1	Other O&M				(2)
Adjustments - nuclear decommissioning trust investments, net of tax of ($1), ($1)	Other Income-net		1		1
LKE acquisition-related adjustments:					
Sale of certain non-core generation facilities, net of tax of $0, ($1)	Disc. Operations				(1)
Other:					
Counterparty bankruptcy, net of tax of $5, $0 (b)	Other O&M		(6)		
Ash basin leak remediation adjustment, net of tax of ($1), $0	Other O&M		1		
Total		$	146	$	14

(a) See "Reconciliation of Economic Activity" below.
(b) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. PPL EnergyPlus recorded an allowance for unpaid amounts under the long-term power contract. In March 2012, the U.S. Bankruptcy Court for the District of Montana approved the request to terminate the contract, effective April 1, 2012.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net."

	Three Months Ended March 31, 2012	2011
Operating Revenues		
Unregulated retail electric and gas	$ 10	$ 4
Wholesale energy marketing	852	57
Operating Expenses		
Fuel	2	23
Energy Purchases	(591)	18
Energy-related economic activity (a)	273	102
Option premiums (b)		5
Adjusted energy-related economic activity	273	107
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010	21	78
Adjusted energy-related economic activity, net, pre-tax	$ 252	$ 29
Adjusted energy-related economic activity, net, after-tax	$ 150	$ 17

(a) See Note 14 to the Financial Statements for additional information.
(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statements of Income.

Outlook

Excluding special items, PPL Energy Supply projects lower earnings in 2012 compared with 2011. The decrease is primarily driven by lower energy margins as a result of lower energy and capacity prices and higher fuel costs, higher operation and maintenance expense and higher depreciation, which are expected to be partially offset by higher baseload generation.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL Energy Supply's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Unregulated Gross Energy Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Unregulated Gross Energy Margins." "Unregulated Gross Energy Margins" is a single financial performance measure of PPL Energy Supply's competitive energy non-trading and trading activities. In calculating this measure, PPL Energy Supply's energy revenues, which include operating revenues associated with certain PPL Energy Supply businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain PPL Energy Supply businesses that are classified as discontinued operations. This performance measure is relevant to PPL Energy Supply due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are recorded in "Wholesale energy marketing to affiliate" revenue. PPL Energy Supply excludes from "Unregulated Gross Energy Margins" energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL Energy Supply's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Energy Supply believes that "Unregulated Gross Energy Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage PPL Energy Supply's operations, analyze actual results compared with budget and measure certain corporate financial goals used in determining variable compensation.

Reconciliation of Non-GAAP Financial Measures

The following table reconciles "Operating Income" to "Unregulated Gross Energy Margins" as defined by PPL Energy Supply for the three months ended March 31.

	2012			2011		
	Unregulated Gross Energy Margins	**Other (a)**	**Operating Income (b)**	**Unregulated Gross Energy Margins**	**Other (a)**	**Operating Income (b)**
Operating Revenues						
Wholesale energy marketing						
Realized	$ 1,204	$ 4 (c)	$ 1,208	$ 1,022	$ 16 (c)	$ 1,038
Unrealized economic activity		852 (d)	852		57 (d)	57
Wholesale energy marketing to affiliate	21		21	6		6
Unregulated retail electric and gas	214	10	224	143	4	147
Net energy trading margins	8		8	11		11
Energy-related businesses		96	96		110	110
Total Operating Revenues	1,447	962	2,409	1,182	187	1,369
Operating Expenses						
Fuel	214	(3) (e)	211	284	(24) (e)	260
Energy purchases						
Realized	636	23 (c)	659	227	87 (c)	314
Unrealized economic activity		591 (d)	591		(18) (d)	(18)
Energy purchases from affiliate	1		1	1		1
Other operation and maintenance	4	251	255	4	241	245
Depreciation		64	64		59	59
Taxes, other than income	8	10	18	7	9	16
Energy-related businesses		92	92		108	108
Total Operating Expenses	863	1,028	1,891	523	462	985
Discontinued Operations				12	(12) (f)	
Total	$ 584	$ (66)	$ 518	$ 671	$ (287)	$ 384

(a) Represents amounts excluded from Margins.
(b) As reported on the Statements of Income.
(c) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. The three months ended March 31, 2012, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" includes a net pre-tax loss of $21 million related to the monetization of certain full-requirement sales contracts. The three months ended March 31, 2011 includes a net pre-tax gain of $5 million related to the amortization of option premiums and a net pre-tax loss of $78 million related to the monetization of certain full-requirement sales contracts.
(d) Represents energy-related economic activity, which is subject to fluctuations in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(e) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(f) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

Unregulated Gross Energy Margins are generated through PPL Energy Supply's competitive non-trading and trading activities. PPL Energy Supply's non-trading energy business is managed on a geographic basis that is aligned with its generation fleet. The following table shows PPL Energy Supply's non-GAAP financial measure, Unregulated Gross Energy Margins, for the three months ended March 31, as well as the change between periods. The factors that gave rise to the changes are described below the table.

	2012	**2011**	**Change**
Non-trading			
Eastern U.S.	$ 489	$ 578	$ (89)
Western U.S.	87	82	5
Net energy trading	8	11	(3)
Total	$ 584	$ 671	$ (87)

Unregulated Gross Energy Margins

Eastern U.S.

The changes in Eastern U.S. non-trading margins for the three months were:

Baseload energy and capacity (a)	$	(82)
Margins on the intermediate and peaking units (b)		(22)
Impact of non-core generation facilities sold in the first quarter of 2011		(12)
Higher nuclear fuel prices		(5)
Full-requirement sales contracts		(5)
Gas optimization and storage		(5)
Margins from retail electric business		7
Net coal and hydroelectric unit availability (c)		10
Nuclear generation volume (d)		25
	$	(89)

(a) Energy prices and capacity prices were lower in 2012.
(b) Capacity prices were lower in 2012.
(c) Coal unit availability was higher in 2012 compared to 2011, however, volumes were lower as a result of economic reductions.
(d) Volumes were higher due to an unplanned outage in March 2011 and an uprate in the third quarter of 2011.

Western U.S.

Non-trading margins were $13 million higher due to higher net wholesale prices, partially offset by $7 million of lower wholesale volumes.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011	
Uncollectible accounts (a)	$	11
Susquehanna nuclear plant costs		6
Trademark royalties (b)		(9)
Other		2
Total	$	10

(a) In October 2011, SMGT filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. This increase primarily reflects an $11 million increase to a reserve on unpaid amounts.
(b) In 2011, PPL Energy Supply was charged trademark royalties by an affiliate. The agreement was terminated December 31, 2011.

Depreciation

Depreciation increased by $5 million for the three months ended March 31, 2012 compared with the same period in 2011, primarily due to PP&E additions.

Other Income (Expense) - net

The decrease of $9 million in other income (expense) - net for the three months ended March 31, 2012 compared with the same period in 2011 was primarily due to a $7 million decrease in earnings on securities in NDT funds.

See Note 12 to the Financial Statements for additional information.

Interest Expense

The increase (decrease) in interest expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011	
Interest rates (a)	$	(5)
Debt balances (b)		(3)
Other		(2)
Total	$	(10)

(a) Lower average long-term interest rates due to a weighted average rate of 5.88% for the three months ended March 31, 2012 compared with a rate of 6.24% for the same period in 2011.
(b) PPL Energy Supply's average short-term debt balance was $200 million lower and its average long-term debt balance was $252 million lower for the three months ended March 31, 2012, compared with the same period in 2011. The lower short-term debt balance was primarily due to the repayment of $700 million in bank loans in 2011 partially offset by a $500 million balance of commercial paper in 2012. The lower long-term debt balance was primarily due to the redemption of $250 million in Senior Unsecured Notes in July 2011.

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Higher pre-tax book income	$ 52
State valuation allowance adjustments (a)	(6)
State deferred tax rate change (b)	(11)
Total	$ 35

(a) In February 2011 the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal tax purposes. Due to the decrease in projected taxable income related to bonus depreciation, PPL Energy Supply recorded a $6 million state deferred income tax expense during the three months ended March 31, 2011 related to valuation allowances.
(b) During the three months ended March 31, 2012, PPL recorded an $11 million adjustment related to state deferred tax liabilities.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

PPL Energy Supply had the following at:

	March 31, 2012	December 31, 2011
Cash and cash equivalents	$ 135	$ 379
Short-term debt	$ 500	$ 400

The $244 million decrease in PPL Energy Supply's cash and cash equivalents position was primarily the net result of:

- distributions to Member of $557 million; and
- $199 million of capital expenditures; partially offset by
- $254 million of cash provided by operating activities;
- a net decrease of $198 million in notes receivable from affiliates; and
- a net increase in short-term debt of $100 million.

PPL Energy Supply's cash provided by operating activities increased by $52 million for the three months ended March 31, 2012, compared with the same period in 2011, primarily due to a $58 million decrease in defined benefit plan funding.

Credit Facilities

At March 31, 2012, PPL Energy Supply's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backstop	Unused Capacity
Syndicated Credit Facility	$ 3,000	$	$ 634	$ 2,366
Letter of Credit Facility	200	n/a	144	56
Total PPL Energy Supply Credit Facilities (a)	$ 3,200	$	$ 778	$ 2,422

(a) The commitments under PPL Energy Supply's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 11% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL Energy Supply's credit facilities.

Long-term Debt

In April 2012, an indirect, wholly owned subsidiary of PPL Energy Supply completed the Ironwood Acquisition. See Note 8 to the Financial Statements for information on the transaction and the debt of PPL Ironwood, LLC assumed through consolidation as part of the acquisition.

Commercial Paper

In April 2012, PPL Energy Supply increased the capacity of its commercial paper program from $500 million to $750 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At March 31, 2012, PPL Energy Supply had $500 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheet, at a weighted-average interest rate of approximately 0.47%.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of PPL Energy Supply and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Energy Supply and its subsidiaries are based on information provided by PPL Energy Supply and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL Energy Supply or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL Energy Supply's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act, PPL Energy Supply is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL Energy Supply's ratings, but without stating what ratings have been assigned to PPL Energy Supply or its subsidiaries, or their securities. The ratings assigned by the rating agencies to PPL Energy Supply and its subsidiaries and their respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to PPL Energy Supply and its subsidiaries.

In January 2012, S&P affirmed its rating and revised its outlook to stable from positive for PPL Montana's Pass Through Certificates due 2020.

Following the announcement of the then-pending acquisition of AES Ironwood, L.L.C. in February 2012, the rating agencies took the following actions:

In March 2012, Moody's placed AES Ironwood, L.L.C.'s senior secured bonds under review for possible ratings upgrade.

In April 2012, S&P affirmed the rating of AES Ironwood, L.L.C.'s senior secured bonds.

Ratings Triggers

PPL Energy Supply has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate instruments, which contain provisions requiring PPL Energy Supply to post additional collateral, or permit the counterparty to terminate the contract, if PPL Energy Supply's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at March 31, 2012. At March 31, 2012, if PPL Energy Supply's credit rating had been below investment grade, PPL Energy Supply would have been required to prepay or post an additional $425 million of collateral to counterparties for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations and interest rate contracts.

For additional information on PPL Energy Supply's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Energy Supply's 2011 Form 10-K.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about PPL Energy Supply's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

PPL Energy Supply segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL Energy Supply's generation assets, full-requirement sales contracts and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. The fair value of economic positions at March 31, 2012 and December 31, 2011 was a net asset of $816 million and a net liability of $63 million. The change in fair value is largely attributable to the dedesignation of cash flow hedges that are now classified as economic hedges. See Note 14 to the Financial Statements for additional information.

To hedge the impact of market price volatility on PPL Energy Supply's energy-related assets, liabilities and other contractual arrangements, PPL Energy Supply both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL Energy Supply's non-trading commodity derivative contracts mature at various times through 2019.

The following table sets forth the changes in net fair value of PPL Energy Supply's non-trading commodity derivative contracts. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses) Three Months Ended March 31, 2012	2011
Fair value of contracts outstanding at the beginning of the period	$ 1,082	$ 958
Contracts realized or otherwise settled during the period	(279)	(52)
Fair value of new contracts entered into during the period (a)	(1)	(17)
Other changes in fair value	413	109
Fair value of contracts outstanding at the end of the period	$ 1,215	$ 998

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of PPL Energy Supply's non-trading commodity derivative contracts at March 31, 2012, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
Source of Fair Value	**Maturity Less Than 1 Year**	**Maturity 1-3 Years**	**Maturity 4-5 Years**	**Maturity in Excess of 5 Years**	**Total Fair Value**
Prices based on significant other observable inputs	$ 854	$ 349	$ (17)	$ 10	$ 1,196
Prices based on significant unobservable inputs	10	5	4		19
Fair value of contracts outstanding at the end of the period	$ 864	$ 354	$ (13)	$ 10	$ 1,215

PPL Energy Supply sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL Energy Supply were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties with which it has energy contracts and other factors could affect PPL Energy Supply's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL Energy Supply attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future. In connection with its bankruptcy proceedings, a significant counterparty, SMGT, had been purchasing lower volumes of electricity than prescribed in the contract and effective April 1, 2012 the contract was terminated. At this time, PPL Energy Supply cannot predict the prices or other terms on which it will be able to market to third parties the power that SMGT will not purchase from PPL EnergyPlus due to the termination of this contract. See Note 10 to the Financial Statements for additional information.

Commodity Price Risk (Trading)

PPL Energy Supply's trading commodity derivative contracts mature at various times through 2016. The following table sets forth changes in the net fair value of PPL Energy Supply's trading commodity derivative contracts. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)	
	Three Months Ended March 31,	
	2012	2011
Fair value of contracts outstanding at the beginning of the period	$ (4)	$ 4
Contracts realized or otherwise settled during the period		2
Fair value of new contracts entered into during the period (a)	6	3
Other changes in fair value		(2)
Fair value of contracts outstanding at the end of the period	$ 2	$ 7

(a) Represents the fair value of contracts at the end of the quarter of their inception.

Unrealized losses of approximately $5 million will be reversed over the next three months as the transactions are realized.

The following table segregates the net fair value of trading commodity derivative contracts at March 31, 2012, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Source of Fair Value					
Prices based on significant other observable inputs	$ (8)	$ 8	$ 2		$ 2
Fair value of contracts outstanding at the end of the period	$ (8)	$ 8	$ 2		$ 2

VaR Models

A VaR model is utilized to measure commodity price risk in domestic gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's conservative hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the period was as follows.

	Trading VaR		Non-Trading VaR	
	Three Months Ended March 31, 2012	Twelve Months Ended December 31, 2011	Three Months Ended March 31, 2012	Twelve Months Ended December 31, 2011
95% Confidence Level, Five-Day Holding Period				
Period End	$ 2	$ 1	$ 7	$ 6
Average for the Period	2	3	8	5
High	2	6	9	7
Low	1	1	7	4

The trading portfolio includes all speculative positions, regardless of the delivery period. All positions not considered speculative are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at March 31, 2012.

Interest Rate Risk

PPL Energy Supply and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL and PPL Energy Supply utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in PPL Energy Supply's debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL Energy Supply's debt portfolio due to changes in the absolute level of interest rates. PPL Energy Supply had no interest rate hedges outstanding at March 31, 2012.

At March 31, 2012, PPL Energy Supply's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL Energy Supply is also exposed to changes in the fair value of its debt portfolio. PPL Energy Supply estimated that a 10% decrease in interest rates at March 31, 2012 would increase the fair value of its debt portfolio by $49 million.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the Susquehanna nuclear plant. At March 31, 2012, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on PPL Energy Supply's Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its NDT policy statement. At March 31, 2012, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated $48 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk

See Notes 11, 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL Energy Supply's 2011 Form 10-K for additional information.

Related Party Transactions

PPL Energy Supply is not aware of any material ownership interests or operating responsibility by senior management of PPL Energy Supply in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with PPL Energy Supply. See Note 11 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for information on the more significant activities, including the April 2012 Ironwood Acquisition.

Environmental Matters

Protection of the environment is a priority for PPL Energy Supply and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to PPL Energy Supply's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the cost for their products or their demand for PPL Energy Supply's services. See "Item 1. Business - Environmental Matters" in PPL Energy Supply's 2011 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Notes 2 and 18 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: price risk management, defined benefits, asset impairment, loss accruals, AROs and income taxes. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Energy Supply's 2011 Form 10-K for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with PPL Electric's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL Electric's 2011 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL Electric and its business strategy, a summary of Net Income Available to PPL Corporation and a discussion of certain events related to PPL Electric's results of operations and financial condition.

- "Results of Operations" provides a summary of PPL Electric's earnings and a description of factors expected to impact future earnings. This section ends with explanations of significant changes in principal items on PPL Electric's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Electric's liquidity position and credit profile.

- "Financial Condition - Risk Management" provides an explanation of PPL Electric's risk management programs relating to market and credit risk.

Overview

Introduction

PPL Electric is an electricity delivery service provider in eastern and central Pennsylvania with headquarters in Allentown, Pennsylvania. PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that area as a PLR under the Customer Choice Act.

Business Strategy

PPL Electric's strategy and principal challenge is to own and operate its electricity delivery business at the most efficient cost while maintaining high quality customer service and reliability. PPL Electric anticipates that it will have significant capital expenditure requirements in the future. In order to manage financing costs and access to credit markets, a key objective for PPL Electric's business is to maintain a strong credit profile. PPL Electric continually focuses on maintaining an appropriate capital structure and liquidity position.

Timely recovery of costs to maintain and enhance the reliability of its delivery system including the replacement of aging distribution assets is required in order to maintain strong cash flows and a strong credit profile. Traditionally, such cost recovery would be pursued through periodic base rate case proceedings with the PUC. As such costs continue to increase, more frequent rate case proceedings may be required or an alternative rate-making process would need to be implemented in order to achieve more timely recovery. See "Regulatory Matters - Pennsylvania Activities - Legislation - Regulatory Procedures and Mechanisms" in Note 6 to the Financial Statements for information on Pennsylvania's new alternative rate-making mechanism.

Transmission costs are recovered through a FERC Formula Rate mechanism which is updated annually for costs incurred and assets placed in service. Accordingly, increased costs including the replacement of aging transmission assets and the PJM-approved Regional Transmission Line Expansion Plan are recovered on a timely basis.

Financial and Operational Developments

Net Income Available to PPL Corporation

	Three Months Ended March 31,		
	2012	2011	% Change
Net Income Available to PPL Corporation	$ 33	$ 52	(37)

See "Results of Operations" for a discussion and analysis of PPL Electric's earnings.

Redemption of Preference Stock

In April 2012, PPL Electric gave notice that it had elected to redeem all 2.5 million shares of its 6.25% Series Preference Stock, par value $100 per share, on June 18, 2012. The price to be paid for the redemption is the par value, without premium ($250 million in the aggregate). The Preference Stock is reflected on PPL Electric's Balance Sheets in "Preferred securities."

Regional Transmission Line Expansion Plan

PPL Electric has experienced delays in obtaining necessary National Park Service (NPS) approvals for the Susquehanna-Roseland transmission line and anticipates a delay of the line's in-service date to 2015. In March 2012, the NPS announced that the route proposed by PPL Electric and PSE&G, previously approved by the Pennsylvania and New Jersey public utility commissions, is the preferred route for the line under the NPS's National Environmental Policy Act review. The NPS has stated that it expects to issue its record of decision in October 2012. An appeal of the New Jersey Board of Public Utilities approval of the line is pending before the New Jersey Superior Court Appellate Division. PPL Electric cannot predict the ultimate outcome or timing of the NPS approval or any further legal challenges to the project. PJM has developed a strategy to manage potential reliability problems until the line is built. PPL Electric cannot predict what additional actions, if any, PJM might take in the event of a further delay to its scheduled in-service date for the new line. See Note 8 in PPL Electric's 2011 Form 10-K for additional information.

Results of Operations

The following discussion provides a summary of PPL Electric's earnings and a description of factors that management expects may impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL Electric's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

	Three Months Ended March 31,	
	2012	2011
Net Income Available to PPL Corporation	$ 33	$ 52

The changes in the components of Net Income Available to PPL Corporation between these periods were due to the following factors.

Pennsylvania gross delivery margins	$ (13)
Other operation and maintenance	(6)
Depreciation	(6)
Other	3
Income Taxes	3
Total	$ (19)

- See "Statement of Income Analysis - Pennsylvania Gross Delivery Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.

- Higher other operation and maintenance expense due to $3 million of higher payroll related costs, $3 million of higher support group costs and $2 million of higher vegetation management costs, partially offset by $5 million of lower PUC reportable storm costs.

- Higher depreciation expense due to a $5 million depreciation impact from PP&E additions, primarily related to the ongoing efforts to maintain and enhance the reliability of the delivery system, including the replacement of aging infrastructure.

- Lower income taxes primarily due to lower pre-tax income, which reduced income taxes by $9 million, partially offset by $4 million of benefits recorded in 2011 related to Pennsylvania Department of Revenue interpretive guidance on bonus depreciation.

Outlook

Excluding special items, PPL Electric projects lower earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expense, higher depreciation and lower distribution revenue, which are expected to be partially offset by higher transmission revenue and lower financing costs.

In March 2012, PPL Electric filed a request with the PUC to increase distribution rates by approximately $105 million. The PUC's review of the distribution rate increase is expected to take about nine months. The proposed distribution revenue rate increase would result in a 2.9% increase over PPL Electric's present rates and would be effective January 1, 2013. PPL Electric cannot predict the outcome of this proceeding.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL Electric's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Pennsylvania Gross Delivery Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Pennsylvania Gross Delivery Margins." "Pennsylvania Gross Delivery Margins" is a single financial performance measure of PPL Electric's Pennsylvania regulated electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Energy purchases from affiliate," "Other operation and maintenance" expense, which is primarily Act 129 costs, and "Taxes, other than income," which is primarily gross receipts tax. As a result, this measure represents the net revenues from PPL Electric's Pennsylvania regulated electric delivery operations. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Electric believes that "Pennsylvania Gross Delivery Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage PPL Electric's operations and analyze actual results to budget.

Reconciliation of Non-GAAP Financial Measures

The following table reconciles "Operating Income" to "Pennsylvania Gross Delivery Margins" as defined by PPL Electric for the three months ended March 31.

	2012			2011		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	$ 457		$ 457	$ 554		$ 554
Electric revenue from affiliate	1		1	4		4
Total Operating Revenues	458		458	558		558
Operating Expenses						
Energy purchases	153		153	251		251
Energy purchases from affiliate	21		21	6		6
Other operation and maintenance	22	$ 118	140	18	$ 112	130
Depreciation		39	39		33	33
Taxes, other than income	25	1	26	33	2	35
Total Operating Expenses	221	158	379	308	147	455
Total	$ 237	$ (158)	$ 79	$ 250	$ (147)	$ 103

(a) Represents amounts that are excluded from Margins.
(b) As reported on the Statement of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL Electric's non-GAAP financial measure, "Pennsylvania Gross Delivery Margins" for the periods ended March 31, as well as the change between periods. The factors that gave rise to the change are described below the table.

	Three Months		
	2012	2011	Change
PA Gross Delivery Margins by Component			
Distribution	$ 189	$ 208	$ (19)
Transmission	48	42	6
Total	$ 237	$ 250	$ (13)

Distribution

Margins decreased as weather had an unfavorable impact of $16 million on base distribution revenues.

Transmission

Margins increased primarily due to increased investment in plant and the recovery of additional costs through the FERC formula-based rates.

Other Operation and Maintenance

The increase/(decrease) in other operation and maintenance expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Payroll-related costs	$ 3
Vegetation management	2
Uncollectible accounts	2
Allocation of certain corporate support group costs	3
PUC-reportable storm costs, net of insurance recovery	(5)
Other	5
Total	$ 10

Depreciation

Depreciation increased by $6 million for the three months ended March 31, 2012 compared with the same period in 2011, primarily due to PP&E additions related to PPL Electric's ongoing efforts to ensure the reliability of its delivery system and replace aging infrastructure .

Taxes, Other Than Income

Taxes, other than income decreased by $9 million during the three months ended March 31, 2012 compared with the same period in 2011, primarily due to a decrease in gross receipts tax from a decline in taxable electric revenues. This tax is included in "Pennsylvania Gross Delivery Margins."

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Lower pre-tax book income	$ (9)
Federal and state tax reserve adjustments	1
Federal and state tax return adjustments (a)	2
Depreciation not normalized (a)	2
Other	1
Total	$ (3)

(a) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation. The federal provision for 100% bonus depreciation generally applies to property placed in service before January 1, 2012.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

PPL Electric had the following at:

	March 31, 2012	December 31, 2011
Cash and cash equivalents	$ 149	$ 320

The $171 million decrease in PPL Electric's cash and cash equivalents position was primarily the net result of:

- $121 million of capital expenditures; and
- the payment of $35 million of common stock dividends to PPL.

PPL Electric's cash used in operating activities improved by $37 million for the three months ended March 31, 2012, compared with the same period in 2011, primarily due to a $44 million decrease in defined benefit plan funding.

Credit Facilities

At March 31, 2012, PPL Electric's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a)	$ 200		$ 1	$ 199
Asset-backed Credit Facility (b)	150		n/a	150
Total PPL Electric Credit Facilities	$ 350		$ 1	$ 349

(a) In April 2012, PPL Electric increased the capacity of its syndicated credit facility to $300 million.

The commitments under this credit facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 6% of the total committed capacity.

(b) PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary pledges these assets to secure loans of up to an aggregate of $150 million from a commercial paper conduit sponsored by a financial institution. At March 31, 2012, based on accounts receivable and unbilled revenue pledged, the amount available for borrowing under this facility was limited to $82 million.

See Note 7 to the Financial Statements for further discussion of PPL Electric's credit facilities.

Commercial Paper

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at March 31, 2012.

Equity Securities

In April 2012, PPL Electric gave notice that it had elected to redeem all 2.5 million shares of its 6.25% Series Preference Stock, par value $100 per share, on June 18, 2012. The price to be paid for the redemption is the par value, without premium ($250 million in the aggregate). The Preference Stock is reflected on PPL Electric's Balance Sheets in "Preferred securities" at March 31, 2012 and December 31, 2011.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt and preferred securities of PPL Electric. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Electric are based on information provided by PPL Electric and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL Electric. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL Electric's credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act, PPL Electric is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL Electric's ratings, but without stating what ratings have been assigned to PPL Electric or its securities. The ratings assigned by the rating agencies to PPL Electric and its respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies did not take any actions related to PPL Electric in 2012.

For additional information on PPL Electric's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Electric's 2011 Form 10-K.

Risk Management

Market Risk and Credit Risk

PPL Electric has issued debt to finance its operations, which exposes it to interest rate risk. PPL Electric had no potential annual exposure to increased interest expense, based on a 10% increase in interest rates, at March 31, 2012. PPL Electric estimated that a 10% decrease in interest rates at March 31, 2012 would increase the fair value of its debt portfolio by $93 million.

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management" in PPL Electric's 2011 Form 10-K for additional information on market and credit risk.

Related Party Transactions

PPL Electric is not aware of any material ownership interests or operating responsibility by senior management of PPL Electric in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with PPL Electric. See Note 11 to the Financial Statements for additional information on related party transactions.

Environmental Matters

Protection of the environment is a priority for PPL Electric and a significant element of its business activities. See "Item 1. Business - Environmental Matters" in PPL Electric's 2011 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Notes 2 and 18 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: defined benefits, loss accruals, income taxes, regulatory assets and liabilities and revenue recognition - unbilled revenue. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Electric's 2011 Form 10-K for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with LKE's Condensed Consolidated Financial Statements and the accompanying Notes and with LKE's 2011 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of LKE and its business strategy, a summary of Net Income and a discussion of certain events related to LKE's results of operations and financial condition.
- "Results of Operations" provides a summary of LKE's earnings and a description of factors expected to impact future earnings. This section ends with explanations of significant changes in principal items on LKE's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LKE's liquidity position and credit profile.
- "Financial Condition - Risk Management" provides an explanation of LKE's risk management programs relating to market and credit risk.

Overview

Introduction

LKE, headquartered in Louisville, Kentucky, is a holding company with utility operations through its subsidiaries, LG&E and KU. LG&E and KU, which constitute substantially all of LKE's operations, are regulated utilities engaged in the generation, transmission, distribution and sale of electricity, in Kentucky, Virginia and Tennessee. LG&E also engages in the distribution and sale of natural gas in Kentucky.

Business Strategy

LKE's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

A key objective for LKE is to maintain a strong credit profile through managing financing costs and access to credit markets. LKE continually focuses on maintaining an appropriate capital structure and liquidity position.

Financial and Operational Developments

Net Income

	Three Months Ended March 31,		
	2012	2011	% Change
Net Income	$ 53	$ 87	(39)

See "Results of Operations" for a discussion and analysis of LKE's earnings.

Registered Debt Exchange Offer by LKE

In April 2012, LKE filed a Form S-4 Registration Statement with the SEC, as required by a registration rights agreement entered into in connection with the issuance of senior notes in September 2011 in a transaction not registered under the Securities Act of 1933. The Form S-4 relates to an offer to exchange the senior notes issued in September 2011 for similar but registered securities. See Note 7 to the Financial Statements for additional information.

Commercial Paper

In February 2012, LG&E and KU each established a commercial paper program for up to $250 million to provide an additional financing source to fund their short-term liquidity needs. Commercial paper issuances will be supported by LG&E's and KU's Syndicated Credit Facilities. LG&E and KU had no commercial paper outstanding at March 31, 2012. See Note 7 to the Financial Statements for additional information.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, LG&E and KU anticipate retiring six older coal-fired electric generating units. These units are located at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. LG&E and KU also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply. In November 2011, LG&E and KU filed an application with the FERC under the Federal Power Act requesting approval to purchase the Bluegrass CTs.

LG&E and KU anticipate that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. In May 2012, the KPSC issued an order approving the request to build the NGCC and purchase the Bluegrass CTs. Also, on May 4, 2012, the FERC issued an order conditionally authorizing the acquisition of the Bluegrass CTs, subject to implementation of satisfactory mitigation measures to address market-power concerns. FERC approval of the proposed mitigation measures is required. LG&E and KU are reviewing the order's conditions and their impact on the closing conditions under the Bluegrass CTs purchase contract, as well as other regulatory, operational and economic aspects of the transaction. See Notes 6 and 8 to the Financial Statements for additional information.

Results of Operations

The following discussion provides a summary of LKE's earnings and a description of factors that management expects may impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on LKE's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

	Three Months Ended March 31,	
	2012	2011
Net Income	$ 53	$ 87

The changes in the components of Net Income between these periods were due to the following factors, which are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

Margin	$ (28)
Other operation and maintenance	(22)
Depreciation	(4)
Taxes, other than income	(2)
Other Income (Expense) - net	(2)
Interest Expense	(2)
Income Taxes	22
Special Items, after-tax	4
Total	$ (34)

- See "Statement of Income Analysis - Margin - Changes in Non-GAAP Financial Measures" for an explanation of margin.

- Higher other operation and maintenance expense due to $11 million of higher steam maintenance costs primarily resulting from an increased scope of scheduled plant outages, a $6 million credit to establish a regulatory asset recorded in the first quarter of 2011 related to 2009 storm costs and $3 million of higher storm restoration and vegetation management costs.

- Lower income taxes primarily due to the change in pre-tax income.

The following after-tax amounts, which management considers special items, also impacted earnings:

	Income Statement Line Item	Three Months Ended March 31, 2012	2011
Special items gains (losses), net of tax (expense) benefit:			
Acquisition-related adjustments:			
Net operating loss carryforward and other tax related adjustments	Income Taxes and Other O&M	$ 4	
Total		$ 4	

Outlook

Excluding special items, LKE projects lower earnings in 2012 compared with 2011, as margin increases are not expected to offset operating expense increases, including depreciation. Actual results will be dependent on the effects of the economy and the impact of weather on retail sales among other variables. As a result of the stay out provision established in the settlement of the PPL-LKE acquisition, LKE is generally unable to implement an increase in base rates for its two regulated utilities in Kentucky before January 1, 2013.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in LKE's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of LKE's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from LKE's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage LKE's operations and analyze actual results compared to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by LKE for the three months ended March 31.

	2012			2011		
	Margin	**Other (a)**	**Operating Income (b)**	**Margin**	**Other (a)**	**Operating Income (b)**
Operating Revenues	$ 705		$ 705	$ 766		$ 766
Operating Expenses						
Fuel	213		213	215		215
Energy purchases	74		74	107		107
Other operation and maintenance	22	$ 184	206	21	$ 160	181
Depreciation	13	73	86	12	69	81
Taxes, other than income		11	11		9	9
Total Operating Expenses	322	268	590	355	238	593
Total	$ 383	$ (268)	$ 115	$ 411	$ (238)	$ 173

(a) Represents amounts excluded from Margin.
(b) As reported on the Statement of Income.

Changes in Non-GAAP Financial Measures

Margins decreased by $28 million during the three months ended March 31, 2012, compared with the same period in 2011. The negative impact mainly resulted from $23 million of lower retail electric margins as volumes were impacted by unseasonably mild weather in the first quarter of 2012. The total heating degree days decreased by 26% compared to the same period in 2011.

The $61 million decrease in revenues resulted from a negative volume variance, largely due to a decrease in retail sales volumes of $61 million and a decrease in off-system sales volumes to third-parties of $14 million. This decrease was offset by a positive fuel price variance of $14 million, due to increased recoverable fuel expenses.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Steam maintenance (a)	$ 11
Distribution maintenance (b)	8
Other	6
Total	$ 25

(a) Steam maintenance costs increased $11 million, primarily resulting from an increased scope of scheduled outages.
(b) A $6 million credit to establish a regulatory asset was recorded in the first quarter of 2011 related to 2009 storm costs. Storm restoration and vegetation management costs increased $3 million.

Depreciation

Depreciation increased by $5 million for the three months ended March 31, 2012 compared with the same period in 2011, primarily due to PP&E additions.

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Lower pre-tax book income	$ (24)
Net operating loss carryforward adjustment (a)	(6)
Other	2
Total	$ (28)

(a) In the first quarter of 2012, LKE recorded a prior period adjustment to deferred taxes related to net operating losses.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

LKE had the following at:

	March 31, 2012	December 31, 2011
Cash and cash equivalents	$ 104	$ 59

The $45 million increase in LKE's cash and cash equivalents position was primarily the net result of:

- cash provided by operating activities of $232 million, partially offset by
- capital expenditures of $174 million and
- the payment of $25 million of distributions to PPL.

LKE's cash provided by operating activities increased by $39 million for the three months ended March 31, 2012, compared with the same period in 2011, primarily due to:

- a decrease in cash outflows of $95 million due to a reduction in discretionary defined benefit plan contributions;
- a net decrease in accounts receivable and accounts payable of $25 million due to an increase in the customer receivable balance in 2012 resulting from increased revenues in 2012 following unseasonably mild weather in December 2011 and the timing of cash receipts and payments, including a decrease of $11 million due to lower revenues and corresponding natural gas purchases and a decrease of $8 million in natural gas purchases for electric generation due to a $12 million volume variance, partially offset by a $4 million decrease in price;
- an increase in cash inflows related to income tax receivable of $17 million primarily due to LKE recording a $52 million receivable for a capital loss carryover in 2011, partially offset by a payment of $40 million received in 2011; and
- a decrease in cash outflows related to accrued taxes of $17 million primarily due to the timing of property tax payments; partially offset by
- a decrease in net income adjusted for non-cash effects of $110 million (deferred income taxes and investment tax credits of $88 million, net income of $34 million and defined benefit plans - expense of $2 million, partially offset by depreciation of $5 million and other noncash items of $9 million) and
- an increase in cash outflows related to inventory of $14 million, which was primarily driven by a $7 million lesser decline in gas storage volumes in 2012 as compared with 2011 and a $4 million increase in coal inventory in 2012 as compared with a $5 million decrease in 2011 resulting from lower coal-fired generation, which was a result of the mild winter weather.

Credit Facilities

At March 31, 2012, LKE's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
LKE Credit Facility with a subsidiary of PPL Energy Supply	$ 300			$ 300
LG&E Syndicated Credit Facility	400			400
KU Credit Facilities	598		$ 198	400
Total Credit Facilities (a)	$ 1,298		$ 198	$ 1,100

(a) The commitments under LKE's domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 10% of the total committed capacity; however, the PPL affiliate provides a commitment of approximately 23% of the total facilities listed above.

See Note 7 to the Financial Statements for further discussion of LKE's credit facilities and long-term debt securities.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LKE and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LKE and its subsidiaries are based on information provided by LKE and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LKE or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in LKE's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, LKE is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to LKE's ratings, but without stating what ratings have been assigned to LKE or its subsidiaries, or their securities. The ratings assigned by the rating agencies to LKE and its subsidiaries and their respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to LKE and its subsidiaries:

In February 2012, Fitch assigned ratings to the two newly established commercial paper programs for LG&E and KU.

In March 2012, Moody's affirmed the following ratings:

- the long-term ratings of the First Mortgage Bonds for LG&E and KU;
- the issuer ratings for LG&E and KU; and
- the bank loan ratings for LG&E and KU.

Also in March 2012, Moody's and S&P each assigned short-term ratings to the two newly established commercial paper programs for LG&E and KU.

Ratings Triggers

LKE and its subsidiaries have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LKE and its subsidiaries to post additional collateral, or permitting the counterparty to terminate the contract, if LKE's or its subsidiaries' credit ratings were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at March 31, 2012. At March 31, 2012, if LKE's or its subsidiaries' credit ratings had been below investment grade, the maximum amount that LKE would have been required to post as additional collateral to counterparties was $95 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation and marketing operations, gas supply and interest rate contracts.

Risk Management

Market Risk

LKE is exposed to market risk from equity instruments, interest rate instruments and commodity instruments, as discussed below. However, regulatory cost recovery mechanisms significantly mitigate those risks. See Notes 13 and 14 to the Financial Statements for information about LKE's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk

LG&E's and KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E and KU are subject to commodity price risk for only a small portion of on-going business operations. LKE conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 14 to the Financial Statements for additional disclosures.

Interest Rate Risk

LKE and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. LKE utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under LKE's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LKE's debt portfolio due to changes in the absolute level of interest rates.

At March 31, 2012, LKE's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LKE is also exposed to changes in the fair value of its debt portfolio. LKE estimated that a 10% decrease in interest rates at March 31, 2012, would increase the fair value of its debt portfolio by $122 million.

At March 31, 2012, LKE had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates
Economic hedges			
Interest rate swaps (b)	$ 179	$ (54)	$ (4)

(a) Includes accrued interest.
(b) LKE utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LKE is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at March 31, 2012 mature through 2033.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's and LKE's 2011 Form 10-K for additional information.

Related Party Transactions

LKE is not aware of any material ownership interest or operating responsibility by senior management of LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with LKE. See Note 11 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Protection of the environment is a major priority for LKE and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to LKE's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures; or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc. and may impact the costs for their products or their demand for LKE's services. See "Item 1. Business - Environmental Matters" in LKE's 2011 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Notes 2 and 18 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: revenue recognition - unbilled revenue, price risk management, defined benefits, asset impairment, loss accruals, AROs, income taxes and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in LKE's 2011 Form 10-K for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with LG&E's Condensed Financial Statements and the accompanying Notes and with LG&E's 2011 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of LG&E and its business strategy, a summary of Net Income and a discussion of certain events related to LG&E's results of operations and financial condition.

- "Results of Operations" provides a summary of LG&E's earnings and a description of factors expected to impact future earnings. This section ends with explanations of significant changes in principal items on LG&E's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LG&E's liquidity position and credit profile.

- "Financial Condition - Risk Management" provides an explanation of LG&E's risk management programs relating to market and credit risk.

Overview

Introduction

LG&E, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

Business Strategy

LG&E's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

A key objective for LG&E is to maintain a strong credit profile through managing financing costs and access to credit markets. LG&E continually focuses on maintaining an appropriate capital structure and liquidity position.

Financial and Operational Developments

Net Income

	Three Months Ended March 31,		
	2012	2011	% Change
Net Income	$ 25	$ 39	(36)

See "Results of Operations" for a discussion and analysis of LG&E's earnings.

Commercial Paper

In February 2012, LG&E established a commercial paper program for up to $250 million to provide an additional financing source to fund its short-term liquidity needs. Commercial paper issuances will be supported by LG&E's Syndicated Credit Facilities. LG&E had no commercial paper outstanding at March 31, 2012. See Note 7 to the Financial Statements for additional information.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, LG&E anticipates retiring three older coal-fired electric generating units, located at the Cane Run plant, which have a combined summer rating of 563 MW. LG&E and KU also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply. In November 2011, LG&E and KU filed an application with the FERC under the Federal Power Act requesting approval to purchase the Bluegrass CTs.

LG&E anticipates that its share of the NGCC construction and the acquisition of the Bluegrass CTs could require up to $300 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. In May 2012, the KPSC issued an order approving the request to build the NGCC and purchase the Bluegrass CTs. Also, on May 4, 2012, the FERC issued an order conditionally authorizing the acquisition of the Bluegrass CTs, subject to implementation of satisfactory mitigation measures to address market-power concerns. FERC approval of the proposed mitigation measures is required. LG&E is reviewing the order's conditions and their impact on the closing conditions under the Bluegrass CTs purchase contract, as well as other regulatory, operational and economic aspects of the transaction. See Notes 6 and 8 to the Financial Statements for additional information.

Results of Operations

The following discussion provides a summary of LG&E's earnings and a description of factors that management expects may impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on LG&E's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

	Three Months Ended March 31,	
	2012	2011
Net Income	$ 25	$ 39

The changes in the components of Net Income between these periods were due to the following factors.

Margin	$ (12)
Other operation and maintenance	(8)
Depreciation	(2)
Taxes, other than income	(1)
Other Income (Expense) - net	2
Income Taxes	7
Total	$ (14)

- See "Statement of Income Analysis - Margin - Changes in Non-GAAP Financial Measures" for an explanation of margin.
- Higher other operation and maintenance due to $8 million of higher steam maintenance costs primarily resulting from an increased scope of scheduled plant outages.
- Lower income taxes primarily due to the change in pre-tax income.

Outlook

LG&E projects lower earnings in 2012 compared with 2011, as margin increases are not expected to offset operating expense increases, including depreciation. Actual results will be dependent on the effects of the economy and the impact of weather on retail sales among other variables. As a result of the stay out provision established in the settlement of the PPL-LKE acquisition, LG&E is generally unable to implement an increase in base rates before January 1, 2013.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in LG&E's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of LG&E's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from LG&E's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by LG&E for the three months ended March 31.

	2012			2011		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 353		$ 353	$ 398		$ 398
Operating Expenses						
Fuel	89		89	85		85
Energy purchases	73		73	110		110
Other operation and maintenance	10	$ 88	98	10	$ 80	90
Depreciation	1	37	38	1	35	36
Taxes, other than income		5	5		4	4
Total Operating Expenses	173	130	303	206	119	325
Total	$ 180	$ (130)	$ 50	$ 192	$ (119)	$ 73

(a) Represents amounts excluded from Margin.
(b) As reported on the Statement of Income.

Changes in Non-GAAP Financial Measures

Margins decreased by $12 million during the three months ended March 31, 2012, compared with the same period in 2011. The negative impact mainly resulted from $6 million of lower retail electric margins as volumes were impacted by unseasonably mild weather in the first quarter of 2012. The total heating degree days decreased by 28% compared to the same period in 2011.

The $45 million decrease in revenues resulted from a negative volume variance, largely due to a decrease in retail sales volumes of $40 million and a decrease in off-system sales volumes to third-parties of $13 million. This decrease was partially offset by a positive fuel price variance of $12 million, due to increased recoverable fuel expenses.

Other Operation and Maintenance

Other operation and maintenance increased by $8 million for the three months ended March 31, 2012 compared with the same period in 2011, due to higher steam maintenance costs of $8 million, primarily resulting from an increased scope of scheduled outages.

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Lower pre-tax book income	$ (8)
Other	1
Total	$ (7)

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

LG&E had the following at:

	March 31, 2012	December 31, 2011
Cash and cash equivalents	$ 54	$ 25

The $29 million increase in LG&E's cash and cash equivalents position was primarily the net result of:

- cash provided by operating activities of $102 million;
- capital expenditures of $60 million; and
- the payment of $15 million of common stock dividends.

LG&E's cash provided by operating activities increased by $11 million for the three months ended March 31, 2012, compared with the same period in 2011, primarily due to:

- a decrease in cash outflows of $41 million due to a reduction in discretionary defined benefit plan contributions and
- a net decrease in accounts receivable and accounts payable of $9 million due to the timing of cash receipts and payments, including a decrease of $11 million due to lower revenues and corresponding natural gas purchases and a decrease of $8 million in natural gas purchases for electric generation due to a $12 million volume variance, partially offset by a $4 million decrease in price, partially offset by
- an increase in cash outflows related to inventory of $21 million, which was primarily driven by a $7 million lesser decline in gas storage volumes in 2012 as compared with 2011 and a $14 million increase in coal inventory in 2012 as compared with a $1 million decrease in 2011 resulting from lower coal-fired generation, which was a result of the mild winter weather and
- a decrease in net income adjusted for non-cash effects of $10 million (net income of $14 million and defined benefit plans - expense of $1 million, partially offset by deferred income taxes and investment tax credits of $3 million and depreciation of $2 million).

Credit Facilities

At March 31, 2012, LG&E's committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a)	$ 400			$ 400

(a) The commitments under LG&E's Syndicated Credit Facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 6% of the total committed capacity available to LG&E.

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $500 million at an interest rate based on a market index of commercial paper issues. At March 31, 2012 and December 31, 2011, there was no balance outstanding.

See Note 7 to the Financial Statements for further discussion of LG&E's credit facilities.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LG&E. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LG&E are based on information provided by LG&E and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LG&E. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in LG&E's credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, LG&E is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to LG&E's ratings, but without stating what ratings have been assigned to LG&E's securities. The ratings assigned by the rating agencies to LG&E and its securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to LG&E:

In February 2012, Fitch assigned ratings to LG&E's newly established commercial paper program.

In March 2012, Moody's affirmed the following ratings:
- the long-term ratings of the First Mortgage Bonds for LG&E;
- the issuer ratings for LG&E; and
- the bank loan ratings for LG&E.

Also in March 2012, Moody's and S&P each assigned short-term ratings to LG&E's newly established commercial paper programs.

Ratings Triggers

LG&E has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LG&E to post additional collateral, or permitting the counterparty to terminate the contract, if LG&E's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at March 31, 2012. At March 31, 2012, if LG&E's credit ratings had been below investment grade, the maximum amount that LG&E would have been required to post as additional collateral to counterparties was $66 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation and marketing operations, gas supply and interest rate contracts.

Risk Management

Market Risk

LG&E is exposed to market risk from equity instruments, interest rate instruments and commodity instruments, as discussed below. However, regulatory cost recovery mechanisms significantly mitigate those risks. See Notes 13 and 14 to the Financial Statements for information about LG&E's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk

LG&E's rates are set by a regulatory commission and the fuel costs incurred are directly recoverable from customers. As a result, LG&E is subject to commodity price risk for only a small portion of on-going business operations. LG&E conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 14 to the Financial Statements for additional disclosures.

Interest Rate Risk

LG&E has issued debt to finance its operations, which exposes it to interest rate risk. LG&E utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under LG&E's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LG&E's debt portfolio due to changes in the absolute level of interest rates.

At March 31, 2012, LG&E's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LG&E is also exposed to changes in the fair value of its debt portfolio. LG&E estimated that a 10% decrease in interest rates at March 31, 2012, would increase the fair value of its debt portfolio by $27 million.

At March 31, 2012, LG&E had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates
Economic hedges			
Interest rate swaps (b)	$ 179	$ (54)	$ (4)

(a) Includes accrued interest.
(b) LG&E utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LG&E is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets and liabilities. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at March 31, 2012 mature through 2033.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's and LG&E's 2011 Form 10-K for additional information.

Related Party Transactions

LG&E is not aware of any material ownership interest or operating responsibility by senior management of LG&E in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with LG&E. See Note 11 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Protection of the environment is a major priority for LG&E and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to LG&E's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures; or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc. and may impact the costs for their products or their demand for LG&E's services. See "Item 1. Business - Environmental Matters" in LG&E's 2011 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Notes 2 and 18 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: revenue recognition - unbilled revenue, price risk management, defined benefits, asset impairment, loss accruals, AROs, income taxes, and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in LG&E's 2011 Form 10-K for a discussion of each critical accounting policy.

KENTUCKY UTILITIES COMPANY

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with KU's Condensed Financial Statements and the accompanying Notes and with KU's 2011 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of KU and its business strategy, a summary of Net Income and a discussion of certain events related to KU's results of operations and financial condition.
- "Results of Operations" provides a summary of KU's earnings and a description of factors expected to impact future earnings. This section ends with explanations of significant changes in principal items on KU's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of KU's liquidity position and credit profile.
- "Financial Condition - Risk Management" provides an explanation of KU's risk management programs relating to market and credit risk.

Overview

Introduction

KU, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity, in Kentucky, Virginia and Tennessee.

Business Strategy

KU's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

A key objective for KU is to maintain a strong credit profile through managing financing costs and access to credit markets. KU continually focuses on maintaining an appropriate capital structure and liquidity position.

Financial and Operational Developments

Net Income

	Three Months Ended March 31,		
	2012	2011	% Change
Net Income	$ 38	$ 58	(34)

See "Results of Operations" for a discussion and analysis of KU's earnings.

Commercial Paper

In February 2012, KU established a commercial paper program for up to $250 million to provide an additional financing source to fund its short-term liquidity needs. Commercial paper issuances will be supported by KU's Syndicated Credit Facilities. KU had no commercial paper outstanding at March 31, 2012. See Note 7 to the Financial Statements for additional information.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, KU and LG&E filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, KU anticipates retiring three older coal-fired electric generating units. These units are located at the Green River and Tyrone plants, which have a combined summer rating of 234 MW. KU and LG&E also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply. In November 2011, LG&E and KU filed an application with the FERC under the Federal Power Act requesting approval to purchase the Bluegrass CTs.

KU anticipates that its share of the NGCC construction and the acquisition of the Bluegrass CTs could require up to $500 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. In May 2012, the KPSC issued an order approving the request to build the NGCC and purchase the Bluegrass CTs. Also, on May 4, 2012, the FERC issued an order conditionally authorizing the acquisition of the Bluegrass CTs, subject to implementation of satisfactory mitigation measures to address market-power concerns. FERC approval of the proposed mitigation measures is required. KU is reviewing the order's conditions and their impact on the closing conditions under the Bluegrass CTs purchase contract, as well as other regulatory, operational and economic aspects of the transaction. See Notes 6 and 8 to the Financial Statements for additional information.

Results of Operations

The following discussion provides a summary of KU's earnings and a description of factors that management expects may impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on KU's Statements of Income, comparing the three months ended March 31, 2012 with the same period in 2011.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

	Three Months Ended March 31, 2012	2011
Net Income	$ 38	$ 58

The changes in the components of Net Income between these periods were due to the following factors.

Margin	$ (16)
Other operation and maintenance	(10)
Depreciation	(2)
Taxes, other than income	(1)
Other Income (Expense) - net	(2)
Interest Expense	1
Income Taxes	10
Total	$ (20)

- See "Statement of Income Analysis - Margin - Changes in Non-GAAP Financial Measures" for an explanation of margin.

- Higher other operation and maintenance due to a $6 million credit to establish a regulatory asset recorded in the first quarter of 2011 related to 2009 storm costs, $3 million of higher steam maintenance costs primarily resulting from an increased scope of scheduled plant outages and $2 million of higher storm restoration and vegetation management costs.

- Lower income taxes primarily due to the change in pre-tax income.

Outlook

KU projects lower earnings in 2012 compared with 2011, as margin increases are not expected to offset operating expense increases, including depreciation. Actual results will be dependent on the effects of the economy and the impact of weather on retail sales among other variables. As a result of the stay out provision established in the settlement of the PPL-LKE acquisition, KU is generally unable to implement an increase in base rates in Kentucky before January 1, 2013.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in KU's 2011 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of KU's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from KU's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by KU for the three months ended March 31.

	2012			2011		
	Margin	**Other (a)**	**Operating Income (b)**	**Margin**	**Other (a)**	**Operating Income (b)**
Operating Revenues	$ 380		$ 380	$ 406		$ 406
Operating Expenses						
Fuel	124		124	130		130
Energy purchases	29		29	35		35
Other operation and maintenance	12	$ 83	95	11	$ 73	84
Depreciation	12	36	48	11	34	45
Taxes, other than income		6	6		5	5
Total Operating Expenses	177	125	302	187	112	299
Total	$ 203	$ (125)	$ 78	$ 219	$ (112)	$ 107

(a) Represents amounts excluded from Margin.
(b) As reported on the Statement of Income.

Changes in Non-GAAP Financial Measures

Margins decreased by $16 million during the three months ended March 31, 2012, compared with the same period in 2011. The negative impact mainly resulted from $16 million of lower retail electric margins as volumes were impacted by unseasonably mild weather in the first quarter of 2012. The total heating degree days decreased by 23% compared to the same period in 2011.

The $26 million decrease in revenues resulted from a negative volume variance, largely due to a decrease in retail sales volumes of $21 million and a decrease in off-system sales volumes to third-parties of $1 million. This decrease was offset by a positive fuel price variance of $2 million, due to increased recoverable fuel expenses.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Distribution maintenance (a)	$ 8
Other	3
Total	$ 11

(a) A $6 million credit to establish a regulatory asset was recorded in the first quarter of 2011 related to 2009 storm costs. Storm restoration and vegetation management costs increased $2 million.

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months Ended March 31, 2012 vs. March 31, 2011
Lower pre-tax book income	$ (12)
Other	2
Total	$ (10)

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

KU had the following at:

	March 31, 2012	December 31, 2011
Cash and cash equivalents	$ 46	$ 31

The $15 million increase in KU's cash and cash equivalents position was primarily the net result of:

- cash provided by operating activities of $152 million, partially offset by
- capital expenditures of $113 million and
- the payment of $24 million of common stock dividends.

KU's cash provided by operating activities increased by $21 million for the three months ended March 31, 2012, compared with the same period in 2011, primarily due to:

- a decrease in cash outflows of $27 million due to a reduction in discretionary defined benefit plan contributions;
- a decrease in cash outflows related to accounts payable to affiliates of $10 million due to the timing of cash payments; and
- a decrease in cash outflows related to inventory of $7 million, which was driven primarily by decreases in volumes in 2012 and 2011, which was attributed to reduced shipments after the winter seasonal build-up, and a decrease in price per ton of coal; partially offset by
- a net increase in accounts receivable and accounts payable of $20 million due to an increase in the customer receivable balance in 2012 resulting from increased revenues in 2012 following unseasonably mild weather in December 2011 and the timing of cash receipts and payments, including a $12 million collection in 2011 on 2010 tax settlements with LKE.

Credit Facilities

At March 31, 2012, KU's committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a)	$ 400			$ 400
Letter of Credit Facility	198		$ 198	

(a) The commitments under KU's Syndicated Credit Facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 19% of the total committed capacity available to KU.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to $500 million at an interest rate based on a market index of commercial paper issues. At March 31, 2012 and December 31, 2011, there was no balance outstanding.

See Note 7 to the Financial Statements for further discussion of KU's credit facilities.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of KU. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of KU are based on information provided by KU and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of KU. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in KU's credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, KU is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to KU's ratings, but without stating what ratings have been assigned to KU's securities. The ratings assigned by the rating agencies to KU and its securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to KU:

In February 2012, Fitch assigned ratings to KU's newly established commercial paper program.

In March 2012, Moody's affirmed the following ratings:

- the long-term ratings of the First Mortgage Bonds for KU;
- the issuer ratings for KU; and
- the bank loan ratings for KU.

Also in March 2012, Moody's and S&P each assigned short-term ratings to KU's newly established commercial paper programs.

Ratings Triggers

KU has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, and commodity transportation and storage, which contain provisions requiring KU to post additional collateral, or permitting the counterparty to terminate the contract, if KU's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at March 31, 2012. At March 31, 2012, if KU's credit ratings had been below investment grade, the maximum amount that KU would have been required to post as additional collateral to counterparties was $29 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation and marketing operations.

Risk Management

Market Risk

KU is exposed to market risk from equity instruments, interest rate instruments and commodity instruments, as discussed below. However, regulatory cost recovery mechanisms significantly mitigate those risks. See Notes 13 and 14 to the Financial Statements for information about KU's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk

KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, KU is subject to commodity price risk for only a small portion of on-going business operations. KU conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve KU's or LG&E's customers. See Note 14 to the Financial Statements for additional disclosures.

Interest Rate Risk

KU has issued debt to finance its operations, which exposes it to interest rate risk. At March 31, 2012, KU's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

KU is also exposed to changes in the fair value of its debt portfolio. KU estimated that a 10% decrease in interest rates at March 31, 2012, would increase the fair value of its debt portfolio by $72 million.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's and KU's 2011 Form 10-K for additional information.

Related Party Transactions

KU is not aware of any material ownership interest or operating responsibility by senior management of KU in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with KU. See Note 11 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Protection of the environment is a major priority for KU and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures; or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc. and may impact the costs for their products or their demand for KU's services. See "Item 1. Business - Environmental Matters" in KU's 2011 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Notes 2 and 18 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: revenue recognition - unbilled revenue, price risk management, defined benefits, asset impairment, loss accruals, AROs, income taxes and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in KU's 2011 Form 10-K for a discussion of each critical accounting policy.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to "Risk Management" in each Registrant's "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company, and Kentucky Utilities Company

(a) Evaluation of disclosure controls and procedures.

The registrants' principal executive officers and principal financial officers, based on their evaluation of the registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934) have concluded that, as of March 31, 2012, the registrants' disclosure controls and procedures are effective to ensure that material information relating to the registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this quarterly report has been prepared. The aforementioned principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officers, to allow for timely decisions regarding required disclosure.

(b) Change in internal controls over financial reporting.

PPL Corporation

As reported in the 2011 Form 10-K, PPL's principal executive officer and principal financial officer concluded that a recent systems migration related to the WPD Midlands acquisition created a material change to its internal control over financial reporting. Specifically, on December 1, 2011 the use of legacy information technology systems at WPD Midlands was discontinued and the related data, processes and internal controls were migrated to the systems, processes and controls currently in place at PPL WW.

Risks related to the system migration were partially mitigated by PPL's expanded internal control over financial reporting that were implemented subsequent to the acquisition and PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, which provided management additional time for review and analysis of WPD Midlands' results and their incorporation into PPL's consolidated financial statements.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company, and Kentucky Utilities Company

The registrants' principal executive officers and principal financial officers have concluded that there were no changes in the registrants' internal control over financial reporting during the registrants' first fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrants' internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For additional information regarding various pending administrative and judicial proceedings involving regulatory, environmental and other matters, which information is incorporated by reference into this Part II, see:

- "Item 3. Legal Proceedings" in each Registrant's 2011 Form 10-K; and
- Notes 5, 6 and 10 to the Financial Statements.

Item 1A . Risk Factors

There have been no material changes in the Registrant's risk factors from those disclosed in "Item 1A. Risk Factors" of the 2011 Form 10-K.

Item 4. Mine Safety Disclosures

Not applicable.

Item 6. Exhibits

The following Exhibits indicated by an asterisk preceding the Exhibit number are filed herewith. The balance of the Exhibits have heretofore been filed with the Commission and pursuant to Rule 12(b)-32 are incorporated herein by reference. Exhibits indicated by a [_] are filed or listed pursuant to Item 601(b)(10)(iii) of Regulation S-K.

Vice President-Human Resources
and Services

CHANGE IN CONTROL SEVERANCE PROTECTION AGREEMENT

THIS AGREEMENT, effective as of _______________, ____, is made by and between PPL Corporation, a Pennsylvania corporation and _______________ (the "Executive").

WHEREAS, the Company considers it essential to the best interests of its shareowners to foster the continued employment of key management personnel;

WHEREAS, the Board of Directors of the Company (the "Board") recognizes that, as is the case with many publicly-held corporations, the possibility of a Change in Control (as defined in the last Section hereof) exists and that such possibility, and the uncertainty and questions which it may raise among management, may result in the departure or distraction of management personnel to the detriment of the Company and its shareowners;

WHEREAS, the Board has determined that appropriate steps should be taken to reinforce and encourage the continued attention and dedication of members of management, including the Executive, to their assigned duties without distraction in the face of potentially disturbing circumstances arising from the possibility of a Change in Control; and

[WHEREAS, the Executive and the Company have entered into a Severance Agreement effective as of __________________ (the “Prior Severance Agreement”), which the Executive and the Company desire to terminate, in its entirety, effective as of the date hereof, and in lieu thereof enter into this Agreement;]

NOW THEREFORE, in consideration of the premises and the mutual covenants herein contained, the Company and the Executive hereby agree as follows:

1. Defined Terms. The definitions of capitalized terms used in this Agreement are provided in the last Section hereof.

2. Term of Agreement. The Term of this Agreement shall commence on the date hereof and shall continue in effect through December 31, _____, and shall continue from year to year, commencing each January 1 thereafter, unless either the Company or the Executive gives at least 6 months advance notice, by not later than June 30 of the year, that the Term shall end at December 31 of that year and shall not continue; provided, however, that the Term shall not be terminated or amended during a Potential Change in Control Period, and provided further, that if a Change in Control shall have occurred during the Term, the Term shall expire no earlier than twenty-four (24) months beyond the month in which such Change in Control occurred. Notwithstanding the foregoing, and subject to any extensions pursuant to Section 7.3, in the event that prior to the occurrence of a Change in Control or Potential Change in Control, the Executive's employment is terminated for any reason or, upon Executive’s termination of employment at any time for any reason other than pursuant to a Qualifying Termination, this Agreement shall terminate as of the date that the Executive's employment is terminated.

3. Company's Covenants Summarized. In order to induce the Executive to remain in the employ of the Company and in consideration of the Executive's covenants set forth in Section 4 hereof, the Company agrees, under, and subject to, the conditions described herein, to pay the Executive the Severance Payments and the other payments and benefits described herein. No Severance Payments shall be payable under this Agreement unless there shall have been a Qualifying Termination. This Agreement shall not be construed as creating an express or implied contract of employment and, except as otherwise agreed to in writing between the Executive and the Company, the Executive shall not have any right to be retained in the employ of the Company.

4. The Executive's Covenants. The Executive agrees that, subject to the terms and conditions of this Agreement, in the event of a Potential Change in Control during the Term, the Executive will remain in the employ of the Company until the earliest of (i) the last day of the Potential Change in Control Period, (ii) the date of a Change in Control, (iii) the date of termination by the Executive of the Executive's employment for Good Reason or by reason of death, Disability or Retirement, or (iv) the termination by the Company of the Executive's employment for any reason.

5. Compensation Other Than Severance Payments.

5.1 Following a Change in Control and during the Term, during any period that the Executive fails to perform the Executive's full-time duties with the Company as a result of incapacity due to physical or mental illness, the Company shall pay the Executive's full salary to the Executive at the rate in effect at the commencement of any such period, together with all compensation and benefits payable to the Executive under the terms of any compensation or benefit plan, program or arrangement maintained by the Company during such period (other than any disability plan), until the Executive's employment is terminated by the Company for Disability or until Executive’s employment is otherwise terminated.

5.2 If the Executive's employment shall be terminated due to a Qualifying Termination, the Company shall pay to the Executive within thirty (30) days following the Date of Termination (to the extent not previously paid), a lump sum amount equal to the sum of (i) the Executive's full base salary through the Date of Termination at the rate in effect immediately prior to the Date of Termination, or if higher, the rate in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason, (ii) the value of any annual bonus or cash incentive plan payment that would have been paid for service in the final calendar year of employment, as if 100% of target goals were achieved, but prorated by multiplying by a fraction equal to the number of full calendar months of service completed divided by 12, and (iii) the value of any Restricted Stock Units that would have been awarded for service in the final calendar year of employment, as if

100% of target goals were achieved, but prorated by multiplying by a fraction equal to the number of full calendar months of service completed divided by 12 together with all compensation and benefits payable to the Executive through the Date of Termination under the terms of the Company's compensation or benefit plans, programs or arrangements as in effect immediately prior to the Date of Termination, or if more favorable to the Executive, as in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason.

5.3 If the Executive's employment shall be terminated due to a Qualifying Termination, the Company shall pay to the Executive the Executive's normal post-termination compensation and benefits due the Executive as such payments become due (other than Severance Payments which will be paid exclusively pursuant to Section 6 below). Such post-termination compensation and benefits shall be determined under, and paid in accordance with, the Company's retirement, insurance and other compensation or benefit plans, programs and arrangements as in effect immediately prior to the Date of Termination or, if more favorable to the Executive, as in effect immediately prior to the occurrence of the first event or circumstance constituting Good Reason including such plans' payment timing rules.

6. Severance Payments .

6.1 The Company shall pay the Executive the payments, and provide the Executive the benefits, described in Section 6.2 (the "Severance Payments") upon a Qualifying Termination.

6.2 The following shall constitute the Severance Payments under this Agreement:

(A) In lieu of any further salary payments to the Executive for periods subsequent to the Date of Termination and in lieu of any severance benefit otherwise payable to the Executive including any payments under the Company's Separation Policy (GP401) or any similar plan, policy or procedure or arrangement, if eligible, or the Executive's Prior Severance Agreement or any employment agreement or arrangement between the Executive and the Company, to the extent provided in Section 11 of this Agreement, the Company shall pay to the Executive a lump sum severance payment, in cash, equal to two times the sum of (i) the Executive's base salary as in effect immediately prior to the Date of Termination or, if higher, in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason, and (ii) the average of annual cash bonuses earned by the Executive pursuant to any annual bonus or annual incentive plan maintained by the Company in respect of the last three fiscal years ending immediately prior to the fiscal year in which occurs the Date of Termination or, if higher, immediately prior to the fiscal year in which occurs the first event or circumstance constituting Good Reason (including as an amount so paid any amount that would have been paid but for the Executive's deferral of the amount). For purposes of determining the value of the annual bonus earned by the Executive in any fiscal year, the value of any restricted stock awards or stock options earned by the Executive in any such year shall not be included in the value of the annual bonus for such year;

(B) The Company shall pay to the Executive a lump sum amount, in cash, equal to the aggregate amount of COBRA premiums otherwise payable by Executive (based upon the COBRA rate in effect on the date of such termination of employment) for the twenty-four (24) month period immediately following the Date of Termination (assuming for this purpose that COBRA continuation coverage would have been available for such twenty-four (24) month period).

(C) Notwithstanding any provision of any annual or long-term incentive plan to the contrary, the Company shall pay to the Executive a lump sum amount, in cash, equal to the sum of (i) any unpaid cash-based incentive compensation that has been allocated or awarded to the Executive for a completed fiscal year or other measuring period preceding the Date of Termination under any such plan and which, as of the Date of Termination, is contingent only upon the continued employment of the Executive to a subsequent date, and (ii) to the extent not otherwise paid or deferred at the Executive's election, pursuant to the terms of the applicable plan, a pro rata portion to the Date of Termination of the aggregate value of all contingent cash-based incentive compensation awards to the Executive for all then uncompleted periods under any such plan, calculated as to each such award by multiplying the award that the Executive would have earned on the last day of the performance award period, assuming the achievement, at the actual level of performance as of the date of Change in Control (or, if not determinable at such date, as of the end of the quarter preceding such date), of the individual and corporate performance goals established with respect to such award, by the fraction obtained by dividing the number of full months and any fractional portion of a month during such performance award period through the Date of Termination by the total number of months contained in such performance award period.

(D) If the Executive would have become entitled to benefits under the Company's post-retirement health care or life insurance plans, as in effect immediately prior to the Date of Termination or, if more favorable to the Executive, as in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason, had the Executive's employment terminated at any time during the period of twenty-four (24) months after the Date of Termination, the Company shall provide such post-retirement health care or life insurance benefits to the Executive and the Executive's dependents commencing on the date on which such coverage would have first become available.

(E) The Company shall provide the Executive with outplacement services suitable to the Executive's position until December 31 of the second calendar year following the year in which Executive's employment with the Company terminates or, if earlier, until the first acceptance by the Executive of an offer of employment, but limited to total outplacement fees of $50,000.

6.3 (A) Notwithstanding any other provisions of this Agreement, in the event that any payment or benefit received or to be received by the Executive in connection with a Change in Control or the termination of the Executive's employment (whether pursuant to the terms of this Agreement or any other plan, arrangement or agreement with the Company, any Person whose actions result in a Change in Control or any Person affiliated with the Company or such Person) (all such payments and benefits, including the Severance Payments, being hereinafter called "Total Payments") would be subject (in whole or part), to the Excise Tax, then the cash

Severance Payments shall be reduced (if necessary to zero) to the extent necessary so that no portion of the Total Payments is subject to the Excise Tax (after taking into account any reduction in the Total Payments provided by reason of section 280G of the Code in such other plan, arrangement or agreement) and all other Severance Payments shall thereafter be reduced (if necessary, to zero) so that no portion of the Total Payments is subject to the Excise Tax, if, but only if, (i) the net amount of such Total Payments, as so reduced, (and after deduction of the net amount of federal, state and local income tax on such reduced Total Payments) is greater than (ii) the excess of (a) the net amount of such Total Payments, without reduction (but after deduction of the net amount of federal, state and local income tax on such Total Payments), over (b) the amount of Excise Tax to which the Executive would be subject in respect of such Total Payments (the "Cut-Back Condition").

Such reduction shall apply first to the cash payments provided under Section 6.2(A) and thereafter shall apply on a pro-rata basis to other payments in a manner that complies with Section 409A of the Code.

(B) For purposes of determining whether and the extent to which the Total Payments will be subject to the Excise Tax and whether the Cut-Back Condition will be satisfied, (i) no portion of the Total Payments the receipt or enjoyment of which the Executive shall have waived at such time and in such manner as not to constitute a "payment" within the meaning of section 280G(b) of the Code shall be taken into account, (ii) no portion of the Total Payments shall be taken into account which, in the opinion of tax counsel selected by the accounting firm that was, immediately prior to the Change in Control, the Company's independent auditor (the "Auditor"), does not constitute a "parachute payment" within the meaning of section 280G(b)(2) of the Code, (including by reason of section 280G(b)(4)(A) of the Code) and, in calculating the Excise Tax and determining whether the Cut-Back Condition is satisfied, no portion of such Total Payments shall be taken into account which constitutes reasonable compensation for services actually rendered, within the meaning of section 280G(b)(4)(B) of the Code, in excess of the Base Amount allocable to such reasonable compensation, and (iii) the value of any non-cash benefit or any deferred payment or benefit included in the Total Payments shall be determined by the Auditor in accordance with the principles of sections 280G(d)(3) and (4) of the Code. Prior to the payment date set forth in Section 6.3 hereof, the Company shall provide the Executive with its calculation of the amounts referred to in this Section and such supporting materials as are reasonably necessary for the Executive to evaluate the Company's calculations. If the Executive objects to the Company's calculations, the Company shall pay to the Executive (as such time or times otherwise provided by this Agreement) such portion of the Severance Payments (up to 100% thereof) as the Executive determines is necessary to result in the Executive receiving the greater of clauses (i) and (ii) of Section 6.2(A) hereof.

(C) If it is established pursuant to a final determination of a court or an Internal Revenue Service proceeding that, notwithstanding the good faith of the Executive and the Company in applying the terms of this Section 6.2, the Total Payments paid to or for the Executive's benefit are in an amount that would result in any portion of such Total Payments being subject to the Excise Tax, then, if such repayment would result in satisfaction of the Cut-Back Condition, the Executive shall have an obligation to pay the Company upon demand an amount equal to the sum of (i) the excess of the Total Payments paid to or for the Executive's benefit over the Total Payments that could have been paid to or for the Executive's benefit without any portion of such Total Payments being subject to the Excise Tax; and (ii) interest on the amount set forth in clause (i) of this sentence at the rate provided in section 1274(b)(2)(B) of the Code from the date of the Executive's receipt of such excess until the date of such payment.

6.4 The payments provided in subsection 6.2(A), (B), (C) and (D) hereof and Section 6.3 hereof shall be made on the first day of the seventh month following the Date of Termination provided, however, that if the amounts of such payments cannot be finally determined on or before such day, the Company shall pay to the Executive on such day an estimate, as determined in good faith by the Executive, or, in the case of payments under Section 6.2 hereof, in accordance with Section 6.2 hereof, of the minimum amount of such payments to which the Executive is clearly entitled and shall pay the remainder of such payments (together with interest on the unpaid remainder (or on all such payments to the extent the Company fails to make such payments when due) at 120% of the rate provided in section 1274(b)(2)(B) of the Code) as soon as the amount thereof can be determined but in no event later than the thirtieth (30th) day after the last day of the seventh month following the Date of Termination. In the event that the amount of the estimated payments exceeds the amount subsequently determined to have been due, such excess shall constitute a loan by the Company to the Executive, payable on the fifth (5th) business day after demand by the Company (together with interest at 120% of the rate provided in section 1274(b)(2)(B) of the Code). At the time that payments are made under this Agreement, the Company shall provide the Executive with a written statement setting forth the manner in which such payments were calculated and the basis for such calculations including, without limitation, any opinions or other advice the Company has received from Tax Counsel, the Auditor or other advisors or consultants (and any such opinions or advice which are in writing shall be attached to the statement).

6.5 The Company also shall pay to the Executive all legal fees and expenses incurred by the Executive in disputing in good faith any issue hereunder relating to the termination of the Executive's employment hereunder with respect to which Executive substantially prevails or in seeking in good faith to obtain or enforce any benefit or right provided by this Agreement with respect to which Executive substantially prevails or in connection with any tax audit or proceeding to the extent attributable to the application of section 4999 of the Code to any payment or benefit provided hereunder. Such payments shall be made within five (5) business days after delivery of the Executive's written requests for payment accompanied with such evidence of fees and expenses incurred as the Company reasonably may require (and Executive shall submit such requests for payment no later than 60 days after such expenses are incurred).

7. Termination Procedures.

7.1 Notice of Termination. After a Change in Control (or during a Potential Change in Control Period) and during the Term, any purported termination of the Executive's employment (other than by reason of death) shall be communicated by written Notice of Termination from one party hereto to the other party hereto in accordance with Section 10 hereof (delivered at least 30 days prior to the Date of Termination in the case of a termination by the Executive). For purposes of this Agreement, a "Notice of Termination" shall mean a notice which shall indicate the specific termination provision in this Agreement relied upon and shall set forth in reasonable detail the facts and circumstances claimed to provide a basis for termination of the Executive's employment under the provision so indicated. Further, a Notice of Termination for Cause is required to include a copy of a resolution duly adopted by the affirmative vote of not less than a majority of the Board at a meeting of the Board which was called and held for the purpose of considering such termination (after reasonable notice to the Executive and an opportunity for the Executive, together with the Executive's counsel, to be heard before the Board) finding that, in the good faith opinion of the Board, the Executive was guilty of conduct set forth in clause (i) or (ii) of the definition of Cause herein, and specifying the particulars thereof in detail.

7.2 Date of Termination. "Date of Termination", with respect to any purported termination of the Executive's employment after a Change in Control and during the Term, shall mean the date of the Executive’s “separation from service” within the meaning of Section 409A of the Code. In the event of an Anticipatory Termination, the Date of Termination shall be deemed to be the date of the subsequent occurrence of the Change in Control.

8. No Mitigation. The Company agrees that, if the Executive's employment with the Company terminates during the Term, the Executive is not required to seek other employment or to attempt in any way to reduce any amounts payable to the Executive by the Company pursuant to Section 6 or Section 7.4 hereof. Further, the amount of any payment or benefit provided for in this Agreement shall not be reduced by any compensation earned by the Executive as the result of employment by another employer, by retirement benefits, by offset against any amount claimed to be owed by the Executive to the Company, or otherwise.

9. Successors; Binding Agreement.

9.1 Unless otherwise assumed by operation of law, the Company will require any successor (whether direct or indirect, by purchase, merger, consolidation or otherwise) to all or substantially all of the business and/or assets of the Company to expressly assume and agree to perform this Agreement in the same manner and to the same extent that the Company would be required to perform it if no such succession had taken place.

9.2 This Agreement shall inure to the benefit of and be enforceable by the Executive's personal or legal representatives, executors, administrators, successors, heirs, distributees, devisees and legatees. If the Executive shall die while any amount would still be payable to the Executive hereunder (other than amounts which, by their terms, terminate upon the death of the Executive) if the Executive had continued to live, all such amounts, unless otherwise provided herein, shall be paid in accordance with the terms of this Agreement to the executors, personal representatives or administrators of the Executive's estate.

10. Notices. For the purpose of this Agreement, notices and all other communications provided for in the Agreement shall be in writing and shall be deemed to have been duly given when delivered or mailed by United States registered mail, return receipt requested, postage prepaid, addressed, to the Executive at the last known address maintained in the Company's personnel records, and to the Company, to the address set forth below, or to such other address as either party may have furnished to the other in writing in accordance herewith, except that notice of change of address shall be effective only upon actual receipt:

To the Company:

PPL Corporation
Two North Ninth Street
Allentown, Pennsylvania 18101
Attention: Corporate Secretary

11. Miscellaneous. No provision of this Agreement may be modified, waived or discharged unless such waiver, modification or discharge is agreed to in writing and signed by the Executive and such officer as may be specifically designated by the Board. No waiver by either party hereto at any time of any breach by the other party hereto of, or any lack of compliance with, any condition or provision of this Agreement to be performed by such other party shall be deemed a waiver of similar or dissimilar provisions or conditions at the same or at any prior or subsequent time. This Agreement supersedes any other agreements or representations, oral or otherwise, express or implied, with respect to the subject matter hereof, which have been made by either party, including but not limited to, the Prior Severance Agreement; provided, however, that this Agreement shall supersede any agreement setting forth the terms and conditions of the Executive's employment with the Company only in the event that the Executive's employment with the Company is terminated during the Term in connection with a Qualifying Termination. The validity, interpretation, construction and performance of this Agreement shall be governed by the laws of the Commonwealth of Pennsylvania. All references to sections of the Act or the Code shall be deemed also to refer to any successor provisions to such sections. Any payments provided for hereunder shall be paid net of any applicable withholding required under federal, state or local law and any additional withholding to which the Executive has agreed. The obligations of the Company and the Executive under this Agreement that by their nature may require either partial or total performance after the expiration of the Term (including, without limitation, those under Sections 6 and 7 hereof) shall survive such expiration.

12. Validity. The invalidity or unenforceability of any provision of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, which shall remain in full force and effect.

13. Counterparts. This Agreement may be executed in several counterparts, each of which shall be deemed to be an original but all of which together will constitute one and the same instrument.

14. Settlement of Disputes; Arbitration. The Board shall make all determinations as to the Executive's right to benefits under this Agreement. Any denial by the Board of a claim for benefits under this Agreement shall be stated in writing and delivered or mailed to the Executive and such notice shall set forth the specific reasons for the denial and the specific provisions of this Agreement relied upon, and

shall be written in a manner that may be understood without legal or actuarial counsel. In addition, the Board shall afford a reasonable opportunity to the Executive for a review of the decision denying the Executive's claim and, in the event of continued disagreement, the Executive may appeal within a period of 60 days after receipt of notification of denial. Failure to perfect an appeal within the 60-day period shall make the decision conclusive. Any further dispute or controversy arising under or in connection with this Agreement shall be settled exclusively by arbitration in Philadelphia, Pennsylvania in accordance with the rules of the American Arbitration Association then in effect; provided, however, that the evidentiary standards set forth in this Agreement shall apply. Judgment may be entered on the arbitrator's award in any court having jurisdiction.

15. Section 409A of the Code .

(A) Although the Company does not guarantee to the Executive any particular tax treatment relating to the payments and benefits under this Agreement, it is intended that such payments and benefits be exempt from, or comply with, Section 409A of Code and the regulations and guidance promulgated thereunder (collectively "Code Section 409A"), and all provisions of this Agreement shall be construed in a manner consistent with the requirements for avoiding taxes or penalties under Code Section 409A. Notwithstanding any provision herein to the contrary, in no event shall the Company be liable for, or be required to indemnify the Executive for, any liability of the Executive for taxes or penalties under Code Section 409A.

(B) A termination of employment shall not be deemed to have occurred for purposes of any provision of this Agreement providing for the payment of any amounts or benefits upon or following a termination of employment unless such termination is also a "separation from service" within the meaning of Code Section 409A and, for purposes of any such provision of this Agreement, references to a "termination," "termination of employment" or like terms shall mean "separation from service."

(C) With regard to any provision herein that provides for reimbursement of costs and expenses or in-kind benefits, except as permitted by Code Section 409A, (i) the right to reimbursement or in-kind benefits shall not be subject to liquidation or exchange for another benefit; (ii) the amount of expenses eligible for reimbursement, or in-kind benefits, provided during any taxable year shall not affect the expenses eligible for reimbursement, or in-kind benefits to be provided, in any other taxable year, provided, that the foregoing clause (ii) shall not be violated with regard to expenses reimbursed under any arrangement covered by Section 105(b) of the Code solely because such expenses are subject to a limit related to the period the arrangement is in effect; and (iii) such payments shall be made on or before the last day of the Executive's taxable year following the taxable year in which the expense was incurred.

(D) Whenever a payment under this Agreement specifies a payment period with reference to a number of days (e.g., "payment shall be made within ten (10) days following the date of termination"), the actual date of payment within the specified period shall be within the sole discretion of the Company.

(E) If under this Agreement, an amount is to be paid in two or more installments, for purposes of Code Section 409A, each installment shall be treated as a separate payment.

(F) Notwithstanding anything herein to the contrary, if the Executive is, as of the date of termination, a "specified employee" for purposes of Treas. Reg. § 1.409A-1(i), then any amount of deferred compensation that is payable to the Executive hereunder that is neither a short-term deferral within the meaning of Treas. Reg. § 1.409A-1(b)(4) nor within the involuntary separation pay limit under Treas. Reg. § 1.409A-1(b)(9)(iii)(A) will not be paid before the date that is six months after the date of termination, or if earlier, the date of the Executive's death. Any payments to which the Executive would otherwise be entitled during such non-payment period will be accumulated and paid or otherwise provided to the Executive on the first day of the seventh month following such date of termination, or if earlier, within 30 days of the Executive's death to his or her surviving spouse (or to the Executive's estate if the Executive's spouse does not survive the Executive.)

16. Definitions . For purposes of this Agreement, the following terms shall have the meanings indicated below:

(A) "Act" shall mean the Securities Exchange Act of 1934, as amended, or any successor statute thereto.

(B) "Affiliate" shall mean, with respect to any Person, any other Person, directly or indirectly, controlling, controlled by, or under common control with such Person or any other Person designated by the Committee in which any Person has an interest.

(C) " Anticipatory Termination " shall mean if (A) the Executive's employment is terminated by the Company without Cause prior to a Change in Control and such termination was at the request or direction of a Person who has entered into an agreement with the Company the consummation of which would constitute a Change in Control and such Change in Control ultimately occurs or (B) if the Executive terminates his employment for Good Reason prior to a Change in Control and the circumstance or event which constitutes Good Reason occurs at the request or direction of a Person who has entered into an agreement with the Company the consummation of which would constitute a Change in Control and such Change in Control ultimately occurs (each such termination described in clauses (A) and (B) being deemed to constitute a Qualifying Termination).

(D) "Base Amount" shall have the meaning set forth in section 280G(b)(3) of the Code.

(E) "Beneficial Owner" shall have the meaning set forth in Rule 13d-3 under the Exchange Act.

(F) "Board" shall mean the Board of Directors of the Company.

(G) "Cause" for termination by the Company of the Executive's employment shall mean (i) the willful and continued failure by the Executive to substantially perform the Executive's duties with the Company (other than any such failure resulting from the Executive's incapacity due to physical or mental illness or any such actual or anticipated failure after the issuance of a Notice of Termination for Good Reason by the Executive pursuant to Section 7.1 hereof) after a written demand for substantial performance is delivered to the Executive by the Board, which demand specifically identifies the manner in which the Board believes that the Executive has not substantially performed the Executive's duties, or (ii) the willful engaging by the Executive in conduct which is demonstrably and materially injurious to the Company or its subsidiaries, monetarily or otherwise. For purposes of clauses (i) and (ii) of this definition, (a) no act, or failure to act, on the Executive's part shall be deemed "willful" unless done, or omitted to be done, by the Executive not in good faith and without reasonable belief that the Executive's act, or failure to act, was in the best interest of the Company, and (b) in the event of a dispute concerning the application of this provision, no claim by the Company that Cause exists shall be given effect unless the Company establishes to the Board by clear and convincing evidence that Cause exists.

(H) "Change in Control" means the occurrence of any one of the following events:

(i) any Person or Group is or becomes the "beneficial owner" (as defined in rules 13d-3 and 13d-5 under the Act) directly or indirectly of more than 30% of the total voting power of the voting stock of the Company (or any entity which controls the Company) within a 12 month period, including by way of merger, consolidation, tender or exchange offer, or otherwise;

(ii) a reorganization, recapitalization, merger or consolidation (a " Corporate Transaction ") involving the Company, unless securities representing 70% or more of the combined voting power of the then outstanding voting securities entitled to vote generally in the election of directors of the Company or the corporation resulting from such Corporate Transaction (or the parent of such corporation) are held subsequent to such transaction by the Person or Persons who were the "beneficial owners" of the outstanding voting securities entitled to vote generally in the election of directors of the Company immediately prior to such Corporate Transaction, in substantially the same proportions as their ownership immediately prior to such Corporate Transaction;

(iii) the sale or disposition, in one or a series of related transactions, of all or substantially all, of the assets of the Company to any Person or Group; or

(iv) during any period of 12 months, individuals who at the beginning of such period constituted the Board (together with any new directors whose election by such Board or whose nomination for election by the stockholders of the Company was approved by a vote of a majority of the directors of the Company, then still in office, who were either directors at the beginning of such period or whose election or nomination for election was previously so approved) cease for any reason to constitute a majority of the Board, then in office.

(I) "Code" shall mean the Internal Revenue Code of 1986, as amended, or any successor thereto, and the regulations and guidance promulgated thereunder.

(J) "Company" shall mean PPL Corporation and, except in determining, under Section 15(E) hereof, whether or not any Change in Control of the Company has occurred in connection with such succession, shall include its subsidiaries and any successor to its business and/or assets which assumes and agrees to perform this Agreement by operation of law, or otherwise. For purposes of this Agreement, the Executive's employment by (including termination of such employment) and compensation from any subsidiary of the Company shall be deemed employment by and compensation from the Company.

(K) "Date of Termination" shall have the meaning set forth in Section 7.2 hereof.

(L) "Disability" shall be deemed the reason for the termination by the Company of the Executive's employment, if, as a result of the Executive's incapacity due to physical or mental illness, the Executive shall have been absent from the full-time performance of the Executive's duties with the Company for a period of six (6) consecutive months, the Company shall have given the Executive a Notice of Termination for Disability, and, within thirty (30) days after such Notice of Termination is given, the Executive shall not have returned to the full-time performance of the Executive's duties.

(M) "Excise Tax" shall mean any excise tax imposed under section 4999 of the Code.

(N) "Executive" shall mean the individual named in the first paragraph of this Agreement.

(O) "Good Reason" for termination of the Executive's employment with the Company by such Executive shall mean the occurrence (without the Executive's express written consent which specifically references this Agreement) after a Change in Control or during a Potential Change in Control Period (treating all references in paragraphs (I) through (VII) below to a "Change in Control" as references to a "Potential Change in Control"), of any one of the following acts by the Company, or failures by the Company to act, unless, in the case of any act or failure to act described below, the Company gives notice to the Executive that it will correct, and within 30 days does so correct such act or failure to act:

(I) the assignment to the Executive of any duties inconsistent with the Executive's status as an executive officer or key employee of the Company or a substantial adverse alteration in the nature or status of the Executive's responsibilities from those in effect immediately prior to a Change in Control;

(II) a reduction by the Company of the Executive's annual base salary as in effect on the date of this Agreement, or as the same may be increased from time to time, except for across-the-board decreases uniformly affecting management, key employees and salaried employees of the Company or the business unit in which the Executive is then employed;

(III) the relocation of the Executive's principal work location to a location more than 30 miles from the vicinity of such work location immediately prior to a Change in Control or the Company's requiring the Executive to be based anywhere other than such principal place of employment (or permitted relocation thereof) except for required travel on the Company's business to an extent substantially consistent with the Executive's present business travel obligations;

(IV) the failure by the Company to pay to the Executive any portion of the Executive's current compensation or to pay to the Executive any portion of an installment of deferred compensation under any deferred compensation program of the Company, within seven (7) days of the date such compensation is due, except for across-the-board compensation deferrals uniformly affecting management, key employees and salaried employees of the Company or the business unit in which the Executive is then employed;

(V) the failure by the Company to continue in effect any compensation or benefit plan in which the Executive participates immediately prior to a Change in Control which is material to the Executive's total compensation, or any substitute plans adopted prior to a Change in Control, unless an equitable arrangement (embodied in an ongoing substitute or alternative plan) has been made with respect to such plan, or the failure by the Company to continue the Executive's participation therein (or in such substitute or alternative plan) on a basis not materially less favorable, both in terms of the amount or timing of payment of benefits provided and the level of the Executive's participation relative to other participants, as existed immediately prior to the Change in Control;

(VI) the failure by the Company to continue to provide the Executive with benefits substantially similar to those enjoyed by the Executive under any of the Company's pension, savings, life insurance, medical, health and accident, or disability plans in which the Executive was participating immediately prior to a Change in Control, except for across-the-board changes to any such plans uniformly affecting all participants in such plans, the taking of any other action by the Company which would directly or indirectly materially reduce any of such benefits or deprive the Executive of any material fringe benefit enjoyed by the Executive at the time of the Change in Control, or the failure by the Company to provide the Executive with the number of paid vacation days to which the Executive is entitled on the basis of years of service with the Company in accordance with the Company's normal vacation policy at the time of the Change in Control; or

(VII) the failure of the Company to comply with the provisions of Section 9.1;

in each case described in clauses (I)-(VII) which is not cured by the Company within 30 days following written notice from Executive to the Company.

The Executive's right to terminate his or her employment with the Company for Good Reason shall not be affected by the Executive's incapacity due to physical or mental illness. The Executive's continued employment shall not constitute consent to, or a waiver of rights with respect to, any act or failure to act constituting Good Reason hereunder.

(P) “Group” shall mean “group” as such term is uses for purposes of Section 13(d) or 14(d) of the Act.

(Q) "Notice of Termination" shall have the meaning stated in Section 7.1 hereof.

(R) "Pension Plan" shall mean any tax-qualified, supplemental or excess defined benefit pension plan maintained by the Company and any other agreement entered into between the Executive and the Company which is designed to provide the Executive with supplemental retirement benefits.

(S) "Person" shall have the meaning given in Section 3(a)(9) of the Act, as modified and used in Sections 13(d) and 14(d) thereof; provided, however, a Person shall not include (i) the Company or any of its Affiliates, (ii) a trustee or other fiduciary holding securities under an employee benefit plan of the Company or any of its Affiliates, (iii) an underwriter temporarily holding securities pursuant to an offering of such securities, or (iv) a corporation owned, directly or indirectly, by the shareowners of the Company in substantially the same proportions as their ownership of stock of the Company.

(T) "Potential Change in Control" shall be deemed to have occurred if the conditions or events set forth in any one of the following paragraphs shall have been satisfied or shall have occurred:

(i) the Company enters into an agreement, the consummation of which would result in the occurrence of a Change in Control;

(ii) the Company or any Person publicly announces an intention to take or to consider taking actions which if consummated would constitute a Change in Control;

(iii) any Person is or becomes the Beneficial Owner, directly or indirectly, of securities of the Company representing 5% or more of the combined voting power of the Company's then outstanding securities entitled to vote generally in the election of directors.

Notwithstanding the foregoing, a "Potential Change in Control" shall not be deemed to occur if (i) a Person acquired such beneficial ownership of 5% or more of the Company's outstanding common shares but less than 20% and such Person has reported or is required to report such ownership on Schedule 13G under the Act (or any comparable or successor report); (ii) a Person acquired such beneficial ownership of 5% or more of the Company's outstanding common shares and such Person has reported or is required to report such ownership under Schedule 13D under the Act (or any comparable or successor report), which Schedule 13D does not state any intention to or reserve the right to control or influence the management or policies of the Company or engage in any of the actions specified in Item 4 of such Schedule (other than the disposition of the common shares) and, within 10 business days of being requested by the Company to advise it regarding the same, certifies to the Company that such Person acquired common shares amounting to 5% or more of the Company's outstanding common shares inadvertently and who or which, together with all Affiliates thereof, thereafter does not acquire additional common shares while the Beneficial Owner, as such term is defined in or used by Regulation 13D-G as promulgated under the Act, of 5% or more of the common shares then outstanding; provided, however, that if the Person requested to so certify fails to do so within 10 business days, then a Potential Change in Control shall be deemed to have occurred immediately after such 10-Business-Day period; or (iii) any Person who becomes the Beneficial Owner of 5% or more of the common shares then outstanding due to the repurchase of common shares by the Company unless and until such Person, after becoming aware that such Person has become the Beneficial Owner of 5% or more of the common shares then outstanding, acquires beneficial ownership of additional common shares representing 1% or more of the common shares then outstanding.

(U) "Potential Change in Control Period" shall mean the period commencing on the occurrence of a Potential Change in Control and ending upon the occurrence of a Change in Control or, if earlier (i) with respect to a Potential Change in Control occurring pursuant to clause (I) of such definition, immediately upon the abandonment or termination of the applicable agreement, (ii) with respect to a Potential Change in Control occurring pursuant to clause (II) of such definition, immediately upon a public announcement by the applicable party that such party has abandoned its intention to take or consider taking actions which if consummated would result in a Change in Control or (iii) with respect to a Potential Change in Control occurring pursuant to clause (III) of such definition, upon the one year anniversary of the occurrence of such Potential Change in Control (or such earlier date as may be determined by the Board).

(V) “Qualifying Termination” shall mean an Anticipatory Termination or a termination of Executive’s employment following a Change in Control and during the Term either (i) by the Company without Cause or (ii) by the Executive for Good Reason (which, for the avoidance of doubt, shall not include any termination of Executive’s employment (x) by the Company for Cause, (y) by Executive without Good Reason or (z) due to Executive’s death or Disability).

(W) "Retirement" shall be deemed the reason for the termination by the Executive of the Executive's employment if such employment is terminated in accordance with the Company's retirement policy, including early retirement, generally applicable to its salaried employees.

(X) "Severance Payments" shall have the meaning set forth in Section 6.1 hereof.

(Y) "Term" shall mean the period of time described in Section 2 hereof (including any extension, continuation or termination described therein).

(Z) "Total Payments" shall mean those payments described in Section 6.3 hereof.

PPL CORPORATION

Exhibit 10(c)

CHANGE IN CONTROL SEVERANCE PROTECTION AGREEMENT

THIS AGREEMENT, effective as of March 5, 2012, is made by and between PPL Corporation, a Pennsylvania corporation and Gregory N. Dudkin (the "Executive").

WHEREAS, the Company considers it essential to the best interests of its shareowners to foster the continued employment of key management personnel;

WHEREAS, the Board of Directors of the Company (the "Board") recognizes that, as is the case with many publicly held corporations, the possibility of a Change in Control (as defined in the last Section hereof) exists and that such possibility, and the uncertainty and questions which it may raise among management, may result in the departure or distraction of management personnel to the detriment of the Company and its shareowners;

WHEREAS, the Board has determined that appropriate steps should be taken to reinforce and encourage the continued attention and dedication of members of management, including the Executive, to their assigned duties without distraction in the face of potentially disturbing circumstances arising from the possibility of a Change in Control; and

WHEREAS, the Executive and the Company have entered into a Severance Agreement effective as of June 29, 2009 (the "Prior Severance Agreement"), which the Executive and the Company desire to terminate, in its entirety, effective as of the date hereof, and in lieu thereof enter into this Agreement;

NOW THEREFORE, in consideration of the premises and the mutual covenants herein contained, the Company and the Executive hereby agree as follows:

1. Defined Terms . The definitions of capitalized terms used in this Agreement are provided in the last Section hereof.

2. Term of Agreement . The Term of this Agreement shall commence on the date hereof and shall continue in effect through December 31,2012, and shall continue from year to year, commencing each January 1 thereafter, unless either the Company or the Executive gives at least six months advance notice, by not later than June 30 of the year, that the Term shall end at December 31 of that year and shall not continue; provided , however , that the Term shall not be terminated or amended during a Potential Change in Control Period, and provided further , that if a Change in Control shall have occurred during the Term, the Term shall expire no earlier than twenty-four (24) months beyond the month in which such Change in Control occurred. Notwithstanding the foregoing, in the event that prior to the occurrence of a Change in Control or Potential Change in Control, the Executive's employment is terminated for any reason or, upon Executive’s termination of employment at any time for any reason other than pursuant to a Qualifying Termination, this Agreement shall terminate as of the date that the Executive's employment is terminated.

3. Company's Covenants Summarized . In order to induce the Executive to remain in the employ of the Company and in consideration of the Executive's covenants set forth in Section 4 hereof, the Company agrees, under, and subject to, the conditions described herein, to pay the Executive the Severance Payments and the other payments and benefits described herein. No Severance Payments shall be payable under this Agreement unless there shall have been a Qualifying Termination. This Agreement shall not be construed as creating an express or implied contract of employment and, except as otherwise agreed to in writing between the Executive and the Company, the Executive shall not have any right to be retained in the employ of the Company.

4. The Executive's Covenants . The Executive agrees that, subject to the terms and conditions of this Agreement, in the event of a Potential Change in Control during the Term, the Executive will remain in the employ of the Company until the earliest of (i) the last day of the Potential Change in Control Period, (ii) the date of a Change in Control, (iii) the date of termination by the Executive of the Executive's employment for Good Reason or by reason of death, Disability or Retirement, or (iv) the termination by the Company of the Executive's employment for any reason.

5. Compensation Other Than Severance Payments .

5.1 Following a Change in Control and during the Term, during any period that the Executive fails to perform the Executive's full-time duties with the Company as a result of incapacity due to physical or mental illness, the Company shall pay the Executive's full salary to the Executive at the rate in effect at the commencement of any such period, together with all compensation and benefits payable to the Executive under the terms of any compensation or benefit plan, program or arrangement maintained by the Company during such period (other than any disability plan), until the Executive's employment is terminated by the Company for Disability or until Executive’s employment is otherwise terminated.

5.2 If the Executive's employment shall be terminated due to a Qualifying Termination, the Company shall pay to the Executive within thirty (30) days following the Date of Termination (to the extent not previously paid), a lump sum amount equal to the sum of (i) the Executive's full base salary through the Date of Termination at the rate in effect immediately prior to the Date of Termination, or if higher, the rate in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason, (ii) the value of any annual bonus or cash incentive plan payment that would have been paid for service in the final calendar year of employment, as if 100% of target goals were achieved, but prorated by multiplying by a fraction equal to the number of full calendar months of service completed divided by 12, and (iii) the value of any Restricted Stock Units that would have been awarded for service in the final calendar year of employment, as if

100% of target goals were achieved, but prorated by multiplying by a fraction equal to the number of full calendar months of service completed divided by 12 together with all compensation and benefits payable to the Executive through the Date of Termination under the terms of the Company's compensation or benefit plans, programs or arrangements as in effect immediately prior to the Date of Termination, or if more favorable to the Executive, as in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason.

5.3 If the Executive's employment shall be terminated due to a Qualifying Termination, the Company shall pay to the Executive the Executive's normal post-termination compensation and benefits due the Executive as such payments become due (other than Severance Payments which will be paid exclusively pursuant to Section 6 below). Such post-termination compensation and benefits shall be determined under, and paid in accordance with, the Company's retirement, insurance and other compensation or benefit plans, programs and arrangements as in effect immediately prior to the Date of Termination or, if more favorable to the Executive, as in effect immediately prior to the occurrence of the first event or circumstance constituting Good Reason including such plans' payment timing rules.

6. Severance Payments .

6.1 The Company shall pay the Executive the payments, and provide the Executive the benefits, described in Section 6.2 (the "Severance Payments") upon a Qualifying Termination.

6.2 The following shall constitute the Severance Payments under this Agreement:

(A) In lieu of any further salary payments to the Executive for periods subsequent to the Date of Termination and in lieu of any severance benefit otherwise payable to the Executive including any payments under the Company's Separation Policy (GP401) or any similar plan, policy or procedure or arrangement, if eligible, or the Executive's Prior Severance Agreement or any employment agreement or arrangement between the Executive and the Company, to the extent provided in Section 11 of this Agreement, the Company shall pay to the Executive a lump sum severance payment, in cash, equal to three times the sum of (i) the Executive's base salary as in effect immediately prior to the Date of Termination or, if higher, in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason, and (ii) the average of annual cash bonuses earned by the Executive pursuant to any annual bonus or annual incentive plan maintained by the Company in respect of the last three fiscal years ending immediately prior to the fiscal year in which occurs the Date of Termination or, if higher, immediately prior to the fiscal year in which occurs the first event or circumstance constituting Good Reason (including as an amount so paid any amount that would have been paid but for the Executive's deferral of the amount). For purposes of determining the value of the annual bonus earned by the Executive in any fiscal year, the value of any restricted stock awards or stock options earned by the Executive in any such year shall not be included in the value of the annual bonus for such year;

(B) The Company shall pay to the Executive a lump sum amount, in cash, equal to the aggregate amount of COBRA premiums otherwise payable by Executive (based upon the COBRA rate in effect on the date of such termination of employment) for the twenty-four (24) month period immediately following the Date of Termination (assuming for this purpose that COBRA continuation coverage would have been available for such twenty-four (24) month period).

(C) Notwithstanding any provision of any annual or long-term incentive plan to the contrary, the Company shall pay to the Executive a lump sum amount, in cash, equal to the sum of (i) any unpaid cash-based incentive compensation that has been allocated or awarded to the Executive for a completed fiscal year or other measuring period preceding the Date of Termination under any such plan and which, as of the Date of Termination, is contingent only upon the continued employment of the Executive to a subsequent date, and (ii) to the extent not otherwise paid or deferred at the Executive's election, pursuant to the terms of the applicable plan, a pro rata portion to the Date of Termination of the aggregate value of all contingent cash-based incentive compensation awards to the Executive for all then uncompleted periods under any such plan, calculated as to each such award by multiplying the award that the Executive would have earned on the last day of the performance award period, assuming the achievement, at the actual level of performance as of the date of Change in Control (or, if not determinable at such date, as of the end of the quarter preceding such date), of the individual and corporate performance goals established with respect to such award, by the fraction obtained by dividing the number of full months and any fractional portion of a month during such performance award period through the Date of Termination by the total number of months contained in such performance award period.

(D) If the Executive would have become entitled to benefits under the Company's post-retirement health care or life insurance plans, as in effect immediately prior to the Date of Termination or, if more favorable to the Executive, as in effect immediately prior to the first occurrence of an event or circumstance constituting Good Reason, had the Executive's employment terminated at any time during the period of twenty-four (24) months after the Date of Termination, the Company shall provide such post-retirement health care or life insurance benefits to the Executive and the Executive's dependents commencing on the date on which such coverage would have first become available.

(E) The Company shall provide the Executive with outplacement services suitable to the Executive's position until December 31 of the second calendar year following the year in which Executive's employment with the Company terminates or, if earlier, until the first acceptance by the Executive of an offer of employment, but limited to total outplacement fees of $50,000.

6.3 (A) Notwithstanding any other provisions of this Agreement, in the event that any payment or benefit received or to be received by the Executive in connection with a Change in Control or the termination of the Executive's employment (whether pursuant to the terms of this Agreement or any other plan, arrangement or agreement with the Company, any Person whose actions result in a Change in Control or any Person affiliated with the Company or such Person) (all such payments and benefits, including the Severance Payments, being hereinafter called "Total Payments") would be subject (in whole or part), to the Excise Tax, then the cash Severance Payments shall be reduced (if necessary to zero) to the extent necessary so that no portion of the Total Payments is subject to the Excise Tax (after taking into account any reduction in the Total Payments provided by reason of section 280G of the Code in such other plan, arrangement or agreement) and all other Severance Payments shall thereafter be reduced (if necessary, to zero) so that no portion of the Total Payments is subject to the Excise Tax, if, but only if, (i) the net amount of such Total Payments, as so reduced, (and after deduction of the net amount of federal, state and local income tax on such reduced Total Payments) is greater than (ii) the excess of (a) the net amount of such Total Payments, without reduction (but after deduction of the net amount of federal, state and local income tax on such Total Payments), over (b) the amount of Excise Tax to which the Executive would be subject in respect of such Total Payments (the "Cut-Back Condition").

Such reduction shall apply first to the cash payments provided under Section 6.2(A) and thereafter shall apply on a pro-rata basis to other payments in a manner that complies with Section 409A of the Code.

(B) For purposes of determining whether and the extent to which the Total Payments will be subject to the Excise Tax and whether the Cut-Back Condition will be satisfied, (i) no portion of the Total Payments the receipt or enjoyment of which the Executive shall have waived at such time and in such manner as not to constitute a "payment" within the meaning of section 280G(b) of the Code shall be taken into account, (ii) no portion of the Total Payments shall be taken into account which, in the opinion of tax counsel selected by the accounting firm that was, immediately prior to the Change in Control, the Company's independent auditor (the "Auditor"), does not constitute a "parachute payment" within the meaning of section 280G(b)(2) of the Code, (including by reason of section 280G(b)(4)(A) of the Code) and, in calculating the Excise Tax and determining whether the Cut-Back Condition is satisfied, no portion of such Total Payments shall be taken into account which constitutes reasonable compensation for services actually rendered, within the meaning of section 280G(b)(4)(B) of the Code, in excess of the Base Amount allocable to such reasonable compensation, and (iii) the value of any non-cash benefit or any deferred payment or benefit included in the Total Payments shall be determined by the Auditor in accordance with the principles of sections 280G(d)(3) and (4) of the Code. Prior to the payment date set forth in Section 6.3 hereof, the Company shall provide the Executive with its calculation of the amounts referred to in this Section and such supporting materials as are reasonably necessary for the Executive to evaluate the Company's calculations. If the Executive objects to the Company's calculations, the Company shall pay to the Executive (as such time or times otherwise provided by this Agreement) such portion of the Severance Payments (up to 100% thereof) as the Executive determines is necessary to result in the Executive receiving the greater of clauses (i) and (ii) of Section 6.2(A) hereof.

(C) If it is established pursuant to a final determination of a court or an Internal Revenue Service proceeding that, notwithstanding the good faith of the Executive and the Company in applying the terms of this Section 6.2, the Total Payments paid to or for the Executive's benefit are in an amount that would result in any portion of such Total Payments being subject to the Excise Tax, then, if such repayment would result in satisfaction of the Cut-Back Condition, the Executive shall have an obligation to pay the Company upon demand an amount equal to the sum of (i) the excess of the Total Payments paid to or for the Executive's benefit over the Total Payments that could have been paid to or for the Executive's benefit without any portion of such Total Payments being subject to the Excise Tax; and (ii) interest on the amount set forth in clause (i) of this sentence at the rate provided in section 1274(b)(2)(B) of the Code from the date of the Executive's receipt of such excess until the date of such payment.

6.4 The payments provided in subsection 6.2(A), (B), (C) and (D) hereof and Section 6.3 hereof shall be made on the first day of the seventh month following the Date of Termination provided, however, that if the amounts of such payments cannot be finally determined on or before such day, the Company shall pay to the Executive on such day an estimate, as determined in good faith by the Executive, or, in the case of payments under Section 6.2 hereof, in accordance with Section 6.2 hereof, of the minimum amount of such payments to which the Executive is clearly entitled and shall pay the remainder of such payments (together with interest on the unpaid remainder (or on all such payments to the extent the Company fails to make such payments when due) at 120% of the rate provided in section 1274(b)(2)(B) of the Code) as soon as the amount thereof can be determined but in no event later than the thirtieth (30th) day after the last day of the seventh month following the Date of Termination. In the event that the amount of the estimated payments exceeds the amount subsequently determined to have been due, such excess shall constitute a loan by the Company to the Executive, payable on the fifth (5th) business day after demand by the Company (together with interest at 120% of the rate provided in section 1274(b)(2)(B) of the Code). At the time that payments are made under this Agreement, the Company shall provide the Executive with a written statement setting forth the manner in which such payments were calculated and the basis for such calculations including, without limitation, any opinions or other advice the Company has received from Tax Counsel, the Auditor or other advisors or consultants (and any such opinions or advice which are in writing shall be attached to the statement).

6.5 The Company also shall pay to the Executive all legal fees and expenses incurred by the Executive in disputing in good faith any issue hereunder relating to the termination of the Executive's employment hereunder with respect to which Executive substantially prevails or in seeking in good faith to obtain or enforce any benefit or right provided by this Agreement with respect to which Executive substantially prevails or in connection with any tax audit or proceeding to the extent attributable to the application of section 4999 of the Code to any payment or benefit provided hereunder. Such payments shall be made within five (5) business days after delivery of the Executive's written requests for payment accompanied with such evidence of fees and expenses incurred as the Company reasonably may require (and Executive shall submit such requests for payment no later than 60 days after such expenses are incurred).

7. Termination Procedures.

7.1 Notice of Termination. After a Change in Control (or during a Potential Change in Control Period) and during the Term, any purported termination of the Executive's employment (other than by reason of death) shall be communicated by written Notice of Termination from one party hereto to the other party hereto in accordance with Section 10 hereof (delivered at least 30 days prior to the Date of Termination in the case of a termination by the Executive). For purposes of this Agreement, a "Notice of Termination" shall mean a notice which shall indicate the specific termination provision in this Agreement relied upon and shall set forth in reasonable detail the facts and circumstances claimed to provide a basis for termination of the Executive's employment under the provision so indicated. Further, a Notice of Termination for Cause is required to include a copy of a resolution duly adopted by the affirmative vote of not less than a majority of the Board at a meeting of the Board which was called and held for the purpose of considering such termination (after reasonable notice to the Executive and an opportunity for the Executive, together with the Executive's counsel, to be heard before the Board) finding that, in the good faith opinion of the Board, the Executive was guilty of conduct set forth in clause (i) or (ii) of the definition of Cause herein, and specifying the particulars thereof in detail.

7.2 Date of Termination. "Date of Termination," with respect to any purported termination of the Executive's employment after a Change in Control and during the Term, shall mean the date of the Executive’s "separation from service" within the meaning of Section 409A of the Code. In the event of an Anticipatory Termination, the Date of Termination shall be deemed to be the date of the subsequent occurrence of the Change in Control.

8. No Mitigation. The Company agrees that, if the Executive's employment with the Company terminates during the Term, the Executive is not required to seek other employment or to attempt in any way to reduce any amounts payable to the Executive by the Company pursuant to Section 6 or Section 7.4 hereof. Further, the amount of any payment or benefit provided for in this Agreement shall not be reduced by any compensation earned by the Executive as the result of employment by another employer, by retirement benefits, by offset against any amount claimed to be owed by the Executive to the Company, or otherwise.

9. Successors; Binding Agreement.

9.1 Unless otherwise assumed by operation of law, the Company will require any successor (whether direct or indirect, by purchase, merger, consolidation or otherwise) to all or substantially all of the business and/or assets of the Company to expressly assume and agree to perform this Agreement in the same manner and to the same extent that the Company would be required to perform it if no such succession had taken place.

9.2 This Agreement shall inure to the benefit of and be enforceable by the Executive's personal or legal representatives, executors, administrators, successors, heirs, distributees, devisees and legatees. If the Executive shall die while any amount would still be payable to the Executive hereunder (other than amounts which, by their terms, terminate upon the death of the Executive) if the Executive had continued to live, all such amounts, unless otherwise provided herein, shall be paid in accordance with the terms of this Agreement to the executors, personal representatives or administrators of the Executive's estate.

10. Notices. For the purpose of this Agreement, notices and all other communications provided for in the Agreement shall be in writing and shall be deemed to have been duly given when delivered or mailed by United States registered mail, return receipt requested, postage prepaid, addressed, to the Executive at the last known address maintained in the Company's personnel records, and to the Company, to the address set forth below, or to such other address as either party may have furnished to the other in writing in accordance herewith, except that notice of change of address shall be effective only upon actual receipt:

To the Company:

PPL Corporation
Two North Ninth Street
Allentown, Pennsylvania 18101
Attention: Corporate Secretary

11. Miscellaneous. No provision of this Agreement may be modified, waived or discharged unless such waiver, modification or discharge is agreed to in writing and signed by the Executive and such officer as may be specifically designated by the Board. No waiver by either party hereto at any time of any breach by the other party hereto of, or any lack of compliance with, any condition or provision of this Agreement to be performed by such other party shall be deemed a waiver of similar or dissimilar provisions or conditions at the same or at any prior or subsequent time. This Agreement supersedes any other agreements or representations, oral or otherwise, express or implied, with respect to the subject matter hereof, which have been made by either party, including but not limited to, the Prior Severance Agreement; provided, however, that this Agreement shall supersede any agreement setting forth the terms and conditions of the Executive's employment with the Company only in the event that the Executive's employment with the Company is terminated during the Term in connection with a Qualifying Termination. The validity, interpretation, construction and performance of this Agreement shall be governed by the laws of the Commonwealth of Pennsylvania. All references to sections of the Act or the Code shall be deemed also to refer to any successor provisions to such sections. Any payments provided for hereunder shall be paid net of any applicable withholding required under federal, state or local law and any additional withholding to which the Executive has agreed. The obligations of the Company and the Executive under this Agreement that by their nature may require either partial or total performance after the expiration of the Term (including, without limitation, those under Sections 6 and 7 hereof) shall survive such expiration.

12. Validity. The invalidity or unenforceability of any provision of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, which shall remain in full force and effect.

13. Counterparts. This Agreement may be executed in several counterparts, each of which shall be deemed to be an original but all of which together will constitute one and the same instrument.

14. Settlement of Disputes; Arbitration. The Board shall make all determinations as to the Executive's right to benefits under this Agreement. Any denial by the Board of a claim for benefits under this Agreement shall be stated in writing and delivered or mailed to the Executive and such notice shall set forth the specific reasons for the denial and the specific provisions of this Agreement relied upon, and

shall be written in a manner that may be understood without legal or actuarial counsel. In addition, the Board shall afford a reasonable opportunity to the Executive for a review of the decision denying the Executive's claim and, in the event of continued disagreement, the Executive may appeal within a period of 60 days after receipt of notification of denial. Failure to perfect an appeal within the 60-day period shall make the decision conclusive. Any further dispute or controversy arising under or in connection with this Agreement shall be settled exclusively by arbitration in Philadelphia, Pennsylvania in accordance with the rules of the American Arbitration Association then in effect; provided, however, that the evidentiary standards set forth in this Agreement shall apply. Judgment may be entered on the arbitrator's award in any court having jurisdiction.

15. Section 409A of the Code .

(A) Although the Company does not guarantee to the Executive any particular tax treatment relating to the payments and benefits under this Agreement, it is intended that such payments and benefits be exempt from, or comply with, Section 409A of the Code and the regulations and guidance promulgated thereunder (collectively "Code Section 409A"), and all provisions of this Agreement shall be construed in a manner consistent with the requirements for avoiding taxes or penalties under Code Section 409A. Notwithstanding any provision herein to the contrary, in no event shall the Company be liable for, or be required to indemnify the Executive for, any liability of the Executive for taxes or penalties under Code Section 409A.

(B) A termination of employment shall not be deemed to have occurred for purposes of any provision of this Agreement providing for the payment of any amounts or benefits upon or following a termination of employment unless such termination is also a "separation from service" within the meaning of Code Section 409A and, for purposes of any such provision of this Agreement, references to a “termination,” “termination of employment” or like terms shall mean "separation from service."

(C) With regard to any provision herein that provides for reimbursement of costs and expenses or in-kind benefits, except as permitted by Code Section 409A, (i) the right to reimbursement or in-kind benefits shall not be subject to liquidation or exchange for another benefit; (ii) the amount of expenses eligible for reimbursement, or in-kind benefits, provided during any taxable year shall not affect the expenses eligible for reimbursement, or in-kind benefits to be provided, in any other taxable year, provided, that the foregoing clause (ii) shall not be violated with regard to expenses reimbursed under any arrangement covered by Section 105(b) of the Code solely because such expenses are subject to a limit related to the period the arrangement is in effect; and (iii) such payments shall be made on or before the last day of the Executive’s taxable year following the taxable year in which the expense was incurred.

(D) Whenever a payment under this Agreement specifies a payment period with reference to a number of days (e.g., "payment shall be made within ten (10) days following the date of termination"), the actual date of payment within the specified period shall be within the sole discretion of the Company.

(E) If under this Agreement, an amount is to be paid in two or more installments, for purposes of Code Section 409A, each installment shall be treated as a separate payment.

(F) Notwithstanding anything herein to the contrary, if the Executive is, as of the date of termination, a "specified employee" for purposes of Treas. Reg. § 1.409A-1(i), then any amount of deferred compensation that is payable to the Executive hereunder that is neither a short-term deferral within the meaning of Treas. Reg. § 1.409A-1(b)(4) nor within the involuntary separation pay limit under Treas. Reg. § 1.409A-1(b)(9)(iii)(A) will not be paid before the date that is six months after the date of termination, or if earlier, the date of the Executive’s death. Any payments to which the Executive would otherwise be entitled during such non-payment period will be accumulated and paid or otherwise provided to the Executive on the first day of the seventh month following such date of termination, or if earlier, within 30 days of the Executive’s death to his or her surviving spouse (or to the Executive’s estate if the Executive’s spouse does not survive the Executive.)

16. Definitions . For purposes of this Agreement, the following terms shall have the meanings indicated below:

(A) "Act" shall mean the Securities Exchange Act of 1934, as amended, or any successor statute thereto.

(B) "Affiliate" shall mean, with respect to any Person, any other Person, directly or indirectly, controlling, controlled by, or under common control with such Person or any other Person designated by the Committee in which any Person has an interest.

(C) "Anticipatory Termination" shall mean if (A) the Executive's employment is terminated by the Company without Cause prior to a Change in Control and such termination was at the request or direction of a Person who has entered into an agreement with the Company the consummation of which would constitute a Change in Control and such Change in Control ultimately occurs or (B) if the Executive terminates his employment for Good Reason prior to a Change in Control and the circumstance or event which constitutes Good Reason occurs at the request or direction of a Person who has entered into an agreement with the Company the consummation of which would constitute a Change in Control and such Change in Control ultimately occurs (each such termination described in clauses (A) and (B) being deemed to constitute a Qualifying Termination).

(D) "Base Amount" shall have the meaning set forth in section 280G(b)(3) of the Code.

(E) "Beneficial Owner" shall have the meaning set forth in Rule 13d-3 under the Exchange Act.

(F) "Board" shall mean the Board of Directors of the Company.

(G) "Cause" for termination by the Company of the Executive's employment shall mean (i) the willful and continued failure by the Executive to substantially perform the Executive's duties with the Company (other than any such failure resulting from the Executive's incapacity due to physical or mental illness or any such actual or anticipated failure after the issuance of a Notice of Termination for Good Reason by the Executive pursuant to Section 7.1 hereof) after a written demand for substantial performance is delivered to the Executive by the Board, which demand specifically identifies the manner in which the Board believes that the Executive has not substantially performed the Executive's duties, or (ii) the willful engaging by the Executive in conduct which is demonstrably and materially injurious to the Company or its subsidiaries, monetarily or otherwise. For purposes of clauses (i) and (ii) of this definition, (a) no act, or failure to act, on the Executive's part shall be deemed "willful" unless done, or omitted to be done, by the Executive not in good faith and without reasonable belief that the Executive's act, or failure to act, was in the best interest of the Company, and (b) in the event of a dispute concerning the application of this provision, no claim by the Company that Cause exists shall be given effect unless the Company establishes to the Board by clear and convincing evidence that Cause exists.

(H) "Change in Control" means the occurrence of any one of the following events:

(i) any Person or Group is or becomes the "beneficial owner" (as defined in rules 13d-3 and 13d-5 under the Act) directly or indirectly of more than 30% of the total voting power of the voting stock of the Company (or any entity which controls the Company) within a 12-month period, including by way of merger, consolidation, tender or exchange offer, or otherwise;

(ii) a reorganization, recapitalization, merger or consolidation (a "Corporate Transaction") involving the Company, unless securities representing 70% or more of the combined voting power of the then outstanding voting securities entitled to vote generally in the election of directors of the Company or the corporation resulting from such Corporate Transaction (or the parent of such corporation) are held subsequent to such transaction by the Person or Persons who were the "beneficial owners" of the outstanding voting securities entitled to vote generally in the election of directors of the Company immediately prior to such Corporate Transaction, in substantially the same proportions as their ownership immediately prior to such Corporate Transaction;

(iii) the sale or disposition, in one or a series of related transactions, of all or substantially all, of the assets of the Company to any Person or Group; or

(iv) during any period of 12 months, individuals who at the beginning of such period constituted the Board (together with any new directors whose election by such Board or whose nomination for election by the shareowners of the Company was approved by a vote of a majority of the directors of the Company, then still in office, who were either directors at the beginning of such period or whose election or nomination for election was previously so approved) cease for any reason to constitute a majority of the Board, then in office.

(I) "Code" shall mean the Internal Revenue Code of 1986, as amended, or any successor thereto, and the regulations and guidance promulgated thereunder.

(J) "Company" shall mean PPL Corporation and, except in determining, under Section 15(E) hereof, whether or not any Change in Control of the Company has occurred in connection with such succession, shall include its subsidiaries and any successor to its business and/or assets which assumes and agrees to perform this Agreement by operation of law, or otherwise. For purposes of this Agreement, the Executive's employment by (including termination of such employment) and compensation from any subsidiary of the Company shall be deemed employment by and compensation from the Company.

(K) "Date of Termination" shall have the meaning set forth in Section 7.2 hereof.

(L) "Disability" shall be deemed the reason for the termination by the Company of the Executive's employment, if, as a result of the Executive's incapacity due to physical or mental illness, the Executive shall have been absent from the full-time performance of the Executive's duties with the Company for a period of six (6) consecutive months, the Company shall have given the Executive a Notice of Termination for Disability, and, within thirty (30) days after such Notice of Termination is given, the Executive shall not have returned to the full-time performance of the Executive's duties.

(M) "Excise Tax" shall mean any excise tax imposed under section 4999 of the Code.

(N) "Executive" shall mean the individual named in the first paragraph of this Agreement.

(O) "Good Reason" for termination of the Executive's employment with the Company by such Executive shall mean the occurrence (without the Executive's express written consent which specifically references this Agreement) after a Change in Control or during a Potential Change in Control Period (treating all references in paragraphs (I) through (VII) below to a "Change in Control" as references to a "Potential Change in Control"), of any one of the following acts by the Company, or failures by the Company to act, unless, in the case of any act or failure to act described below, the Company gives notice to the Executive that it will correct, and within 30 days does so correct such act or failure to act:

(I) the assignment to the Executive of any duties inconsistent with the Executive's status as an executive officer or key employee of the Company or a substantial adverse alteration in the nature or status of the Executive's responsibilities from those in effect immediately prior to a Change in Control;

(II) a reduction by the Company of the Executive's annual base salary as in effect on the date of this Agreement, or as the same may be increased from time to time, except for across-the-board decreases uniformly affecting management, key employees and salaried employees of the Company or the business unit in which the Executive is then employed;

(III) the relocation of the Executive's principal work location to a location more than 30 miles from the vicinity of such work location immediately prior to a Change in Control or the Company's requiring the Executive to be based anywhere other than such principal place of employment (or permitted relocation thereof) except for required travel on the Company's business to an extent substantially consistent with the Executive's present business travel obligations;

(IV) the failure by the Company to pay to the Executive any portion of the Executive's current compensation or to pay to the Executive any portion of an installment of deferred compensation under any deferred compensation program of the Company, within seven (7) days of the date such compensation is due, except for across-the-board compensation deferrals uniformly affecting management, key employees and salaried employees of the Company or the business unit in which the Executive is then employed;

(V) the failure by the Company to continue in effect any compensation or benefit plan in which the Executive participates immediately prior to a Change in Control which is material to the Executive's total compensation, or any substitute plans adopted prior to a Change in Control, unless an equitable arrangement (embodied in an ongoing substitute or alternative plan) has been made with respect to such plan, or the failure by the Company to continue the Executive's participation therein (or in such substitute or alternative plan) on a basis not materially less favorable, both in terms of the amount or timing of payment of benefits provided and the level of the Executive's participation relative to other participants, as existed immediately prior to the Change in Control;

(VI) the failure by the Company to continue to provide the Executive with benefits substantially similar to those enjoyed by the Executive under any of the Company's pension, savings, life insurance, medical, health and accident, or disability plans in which the Executive was participating immediately prior to a Change in Control, except for across-the-board changes to any such plans uniformly affecting all participants in such plans, the taking of any other action by the Company which would directly or indirectly materially reduce any of such benefits or deprive the Executive of any material fringe benefit enjoyed by the Executive at the time of the Change in Control, or the failure by the Company to provide the Executive with the number of paid vacation days to which the Executive is entitled on the basis of years of service with the Company in accordance with the Company's normal vacation policy at the time of the Change in Control; or

(VII) the failure of the Company to comply with the provisions of Section 9.1;

in each case described in clauses (I)-(VII) which is not cured by the Company within 30 days following written notice from Executive to the Company.

The Executive's right to terminate his or her employment with the Company for Good Reason shall not be affected by the Executive's incapacity due to physical or mental illness. The Executive's continued employment shall not constitute consent to, or a waiver of rights with respect to, any act or failure to act constituting Good Reason hereunder.

(P) "Group" shall mean "group" as such term is uses for purposes of Section 13(d) or 14(d) of the Act.

(Q) "Notice of Termination" shall have the meaning stated in Section 7.1 hereof.

(R) "Pension Plan" shall mean any tax-qualified, supplemental or excess defined benefit pension plan maintained by the Company and any other agreement entered into between the Executive and the Company which is designed to provide the Executive with supplemental retirement benefits.

(S) "Person" shall have the meaning given in Section 3(a)(9) of the Act, as modified and used in Sections 13(d) and 14 (d) thereof; provided, however, a Person shall not include (i) the Company or any of its Affiliates, (ii) a trustee or other fiduciary holding securities under an employee benefit plan of the Company or any of its Affiliates, (iii) an underwriter temporarily holding securities pursuant to an offering of such securities, or (iv) a corporation owned, directly or indirectly, by the shareowners of the Company in substantially the same proportions as their ownership of stock of the Company.

(T) "Potential Change in Control" shall be deemed to have occurred if the conditions or events set forth in any one of the following paragraphs shall have been satisfied or shall have occurred:

(I) the Company enters into an agreement, the consummation of which would result in the occurrence of a Change in Control;

(II) the Company or any Person publicly announces an intention to take or to consider taking actions which if consummated would constitute a Change in Control;

(III) any Person is or becomes the Beneficial Owner, directly or indirectly, of securities of the Company representing 5% or more of the combined voting power of the Company's then outstanding securities entitled to vote generally in the election of directors.

Notwithstanding the foregoing, a "Potential Change in Control" shall not be deemed to occur if (i) a Person acquired such beneficial ownership of 5% or more of the Company's outstanding common shares but less than 20% and such Person has reported or is required to report such ownership on Schedule 13G under the Act (or any comparable or successor report); (ii) a Person acquired such beneficial ownership of 5% or more of the Company's outstanding common shares and such Person has reported or is required to report such ownership under Schedule 13D under the Act (or any comparable or successor report), which Schedule 13D does not state any intention to or reserve the right to control or influence the management or policies of the Company or engage in any of the actions specified in Item 4 of such Schedule (other than the disposition of the common shares) and, within 10 business days of being requested by the Company to advise it regarding the same, certifies to the Company that such Person acquired common shares amounting to 5% or more of the Company's outstanding common shares inadvertently and who or which, together with all Affiliates thereof, thereafter does not acquire additional common shares while the Beneficial Owner, as such term is defined in or used by Regulation 13D-G as promulgated under the Act, of 5% or more of the common shares then outstanding; provided, however, that if the Person requested to so certify fails to do so within 10 business days, then a Potential Change in Control shall be deemed to have occurred immediately after such 10-Business-Day period; or (iii) any Person who becomes the Beneficial Owner of 5% or more of the common shares then outstanding due to the repurchase of common shares by the Company unless and until such Person, after becoming aware that such Person has become the Beneficial Owner of 5% or more of the common shares then outstanding, acquires beneficial ownership of additional common shares representing 1% or more of the common shares then outstanding.

(U) "Potential Change in Control Period" shall mean the period commencing on the occurrence of a Potential Change in Control and ending upon the occurrence of a Change in Control or, if earlier (i) with respect to a Potential Change in Control occurring pursuant to clause (I) of such definition, immediately upon the abandonment or termination of the applicable agreement, (ii) with respect to a Potential Change in Control occurring pursuant to clause (II) of such definition, immediately upon a public announcement by the applicable party that such party has abandoned its intention to take or consider taking actions which if consummated would result in a Change in Control or (iii) with respect to a Potential Change in Control occurring pursuant to clause (III) of such definition, upon the one year anniversary of the occurrence of such Potential Change in Control (or such earlier date as may be determined by the Board).

(V) "Qualifying Termination" shall mean an Anticipatory Termination or a termination of Executive’s employment following a Change in Control and during the Term either (i) by the Company without Cause or (ii) by the Executive for Good Reason (which, for the avoidance of doubt, shall not include any termination of Executive’s employment (x) by the Company for Cause, (y) by Executive without Good Reason or (z) due to Executive’s death or Disability).

(W) "Retirement" shall be deemed the reason for the termination by the Executive of the Executive's employment if such employment is terminated in accordance with the Company's retirement policy, including early retirement, generally applicable to its salaried employees.

(X) "Severance Payments" shall have the meaning set forth in Section 6.1 hereof.

(Y) "Term" shall mean the period of time described in Section 2 hereof (including any extension, continuation or termination described therein).

(Z) "Total Payments" shall mean those payments described in Section 6.3 hereof.

COMMITMENT INCREASE AGREEMENT

(Commitment Increase Pursuant to Section 2.19 of Credit Agreement)

This **COMMITMENT INCREASE AGREEMENT** (this " ***Agreement*** ") dated as of April 20, 2012 (the " ***Increase Effective Date*** "), is entered into by and among **PPL ELECTRIC UTILITIES CORPORATION.** , a Pennsylvania corporation (" ***Borrower*** "), the undersigned Lenders (as defined in the Credit Agreement) who are increasing their Commitments (as defined in the Credit Agreement) (collectively, the " ***Increasing Lenders*** "), the undersigned JLA Issuing Banks, who are consenting to the increase in Fronting Sublimit, and **WELLS FARGO BANK, NATIONAL ASSOCIATION** , as Administrative Agent (in such capacity, the " ***Administrative Agent*** "), Swingline Lender and Issuing Lender. Capitalized terms used herein and not otherwise defined herein shall have the meanings attributed to them in the Credit Agreement (as hereinafter defined).

RECITALS

A. Borrower, the Increasing Lenders, the JLA Issuing Banks, certain other financial institutions, and the Administrative Agent are parties to that certain Revolving Credit Agreement dated as of December 31, 2010 (as amended, restated, or otherwise modified from time to time, the " ***Credit Agreement*** ").

B. Pursuant to Section 2.19 of the Credit Agreement, this Agreement is being executed to evidence Borrower's requested increase in the aggregate Commitments from $200,000,000 to $300,000,000, and to approve a corresponding increase to the Fronting Sublimit.

C. Each of the undersigned Increasing Lenders has agreed to increase its Commitment in accordance with Schedule I hereto, and each of the undersigned JLA Issuing Banks has agreed to a corresponding increase in the Fronting Sublimit.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. Increase in Commitments of Increasing Lenders. Effective as of the Increase Effective Date, each Increasing Lender identified on Schedule 1 agrees that its Commitment shall be in the amount set forth on Schedule 1.

2. Conditions Precedent to Effectiveness. This Agreement shall be effective as of the Increase Effective Date, provided that: (a) Administrative Agent shall have received (i) counterparts of this Agreement, executed by Borrower, each Increasing Lender and each JLA Issuing Bank, (ii) a Notice of Revolving Increase, (iii) to the extent required by any Increasing Lender, a Note; and (b) Borrower shall have paid all fees and expenses that are required to be paid as of the Increase Effective Date.

3. Changes in Commitment Ratios. On the Increase Effective Date, the Commitment Ratio of the Lenders shall be redetermined giving effect to the adjustments to the Commitments referred to in Section 1, and the participations of the Lenders in and the obligations of the Lenders in respect of any Letters of Credit outstanding on the Increase Effective Date shall be reallocated to reflect such redetermined Commitment Ratio.

4. Consent of JLA Issuing Banks. By signing this Agreement, each JLA Issuing Bank hereby agrees that the increase in Commitments effected pursuant to Section 1 above shall be included for the purpose of calculating the Fronting Sublimit for each JLA Issuing Bank.

5. Miscellaneous. (a) Headings and captions may not be construed in interpreting provisions; (b) this Agreement shall be governed by, and construed in accordance with, the law of the State of New York; and (c) this Agreement may be executed in any number of counterparts with the same effect as if all signatories had signed the same document, and all of those counterparts must be construed together to constitute the same document.

6. ENTIRE AGREEMENT. THE CREDIT AGREEMENT AND THE OTHER LOAN DOCUMENTS, TOGETHER WITH THIS AGREEMENT, REPRESENT THE FINAL AGREEMENT BETWEEN THE PARTIES AND MAY NOT BE CONTRADICTED BY EVIDENCE OF PRIOR, CONTEMPORANEOUS, OR SUBSEQUENT ORAL AGREEMENTS OF THE PARTIES. THERE ARE NO UNWRITTEN ORAL AGREEMENTS BETWEEN THE PARTIES.

IN WITNESS WHEREOF , the parties hereto have caused this Agreement to be duly executed as of the date first above written.

PPL CORPORATION AND SUBSIDIARIES

COMPUTATION OF RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS

(Millions of Dollars)

	3 Months Ended March 31, 2012	Years Ended December 31, 2011	2010	2009	2008	2007
Earnings, as defined:						
Income from Continuing Operations Before Income Taxes	**$ 804**	$ 2,201	$ 1,239	$ 538	$ 1,273	$ 1,230
Adjustments to reflect earnings from equity method investments on a cash basis		1	7	1		2
	804	2,202	1,246	539	1,273	1,232
Total fixed charges as below	**262**	1,022	698	513	568	609
Less:						
Capitalized interest	**14**	51	30	43	57	55
Preferred security distributions of subsidiaries on a pre-tax basis	**6**	23	21	24	27	23
Interest expense and fixed charges related to discontinued operations		3	12	15	16	39
Total fixed charges included in Income from Continuing Operations Before Income Taxes	**242**	945	635	431	468	492
Total earnings	**$ 1,046**	$ 3,147	$ 1,881	$ 970	$ 1,741	$ 1,724
Fixed charges, as defined:						
Interest charges (a)	**$ 246**	$ 955	$ 637	$ 446	$ 518	$ 565
Estimated interest component of operating rentals	**10**	44	39	42	22	21
Preferred securities distributions of subsidiaries on a pre-tax basis	**6**	23	21	24	27	23
Fixed charges of majority-owned share of 50% or less-owned persons			1	1	1	
Total fixed charges (b)	**$ 262**	$ 1,022	$ 698	$ 513	$ 568	$ 609
Ratio of earnings to fixed charges	**4.0**	3.1	2.7	1.9	3.1	2.8
Ratio of earnings to combined fixed charges and preferred stock dividends (c)	**4.0**	3.1	2.7	1.9	3.1	2.8

(a) Includes interest on long-term and short-term debt, as well as amortization of debt discount, expense and premium - net.

(b) Interest on unrecognized tax benefits is not included in fixed charges.

(c) PPL, the parent holding company, does not have any preferred stock outstanding; therefore, the ratio of earnings to combined fixed charges and preferred stock dividends is the same as the ratio of earnings to fixed charges.

Exhibit 12(b)

PPL ENERGY SUPPLY, LLC AND SUBSIDIARIES

COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES

(Millions of Dollars)

	3 Months Ended March 31,	Years Ended December 31,				
	2012	**2011**	**2010**	**2009**	**2008**	**2007**
Earnings, as defined:						
Income (Loss) from Continuing Operations Before Income Taxes	**$ 486**	$ 1,212	$ 881	$ (13)	$ 671	$ 785
Adjustments to reflect earnings from equity method investments on a cash basis		1	7	1		2
	486	1,213	888	(12)	671	787
Total fixed charges as below	**58**	259	426	364	390	388
Less:						
Capitalized interest	**13**	47	33	44	57	54
Interest expense and fixed charges related to discontinued operations		3	147	102	157	217
Total fixed charges included in Income (Loss) from Continuing Operations Before Income Taxes	**45**	209	246	218	176	117
Total earnings	**$ 531**	$ 1,422	$ 1,134	$ 206	$ 847	$ 904
Fixed charges, as defined:						
Interest charges (a)	**$ 50**	$ 223	$ 387	$ 321	$ 374	$ 374
Estimated interest component of operating rentals	**8**	36	38	42	15	14
Fixed charges of majority-owned share of 50% or less-owned persons			1	1	1	
Total fixed charges (b)	**$ 58**	**$ 259**	**$ 426**	**$ 364**	**$ 390**	**$ 388**
Ratio of earnings to fixed charges (c)	**9.2**	5.5	2.7	0.6	2.2	2.3

(a) Includes interest on long-term and short-term debt, as well as amortization of debt discount, expense and premium - net.

(b) Interest on unrecognized tax benefits is not included in fixed charges.

(c) In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. As a result, PPL Global's operating results were reclassified as Discontinued Operations. Upon reflecting this reclassification, earnings were less than fixed charges for 2009. See Note 9 in PPL Energy Supply's 2011 Form 10-K for additional information. The total amount of fixed charges for this period was approximately $364 million and the total amount of earnings was approximately $206 million. The amount of the deficiency, or the amount of fixed charges in excess of earnings, was approximately $158 million.

CERTIFICATION

I, WILLIAM H. SPENCE, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PPL Corporation (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

1. I have reviewed this quarterly report on Form 10-Q of PPL Energy Supply, LLC (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORM 10-Q
FOR THE QUARTER ENDED SEPTEMBER 30, 2011

Table of Contents

This combined Form 10-Q is separately filed by the following individual registrants: PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf, and no registrant makes any representation as to information relating to any other registrant, except that information under "Forward-Looking Information" relating to PPL Corporation subsidiaries is also attributed to PPL Corporation and information relating to the subsidiaries of LG&E and KU Energy LLC is also attributed to LG&E and KU Energy LLC.

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its current and former subsidiaries

Central Networks - collectively Central Networks East plc, Central Networks Limited and certain other related assets and liabilities. On April 1, 2011, PPL WEM Holdings plc (formerly WPD Investment Holdings Limited) purchased all of the outstanding ordinary share capital of these companies from E.ON AG subsidiaries. Central Networks West plc (subsequently renamed Western Power Distribution (West Midlands) plc), wholly owned by Central Networks Limited (subsequently renamed WPD Midlands Holdings Limited), and Central Networks East plc (subsequently renamed Western Power Distribution (East Midlands) plc) are British regional electricity distribution utility companies.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E and KU Services Company - LG&E and KU Services Company (formerly E.ON U.S. Services Inc.), a subsidiary of LKE that provides services for LKE and its subsidiaries.

LKE - LG&E and KU Energy LLC (formerly E.ON U.S. LLC), a subsidiary of PPL and the parent of LG&E, KU, and other subsidiaries. PPL acquired E.ON U.S. LLC in November 2010 and changed the name to LG&E and KU Energy LLC. Within the context of this document, references to LKE also relate to the consolidated entity.

PPL - PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, LKE and other subsidiaries.

PPL Capital Funding - PPL Capital Funding, Inc., a wholly owned financing subsidiary of PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL that transmits and distributes electricity in its Pennsylvania service area and provides electric supply to retail customers in this area as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Energy Supply, PPL Global (effective January 2011) and other subsidiaries.

PPL EnergyPlus - PPL EnergyPlus, LLC, a subsidiary of PPL Energy Supply that markets and trades wholesale and retail electricity and gas, and supplies energy and energy services in competitive markets.

PPL Energy Supply - PPL Energy Supply, LLC, a subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interests of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding.

PPL Gas Utilities - PPL Gas Utilities Corporation, which was a regulated utility subsidiary of PPL until its sale in October 2008, provided natural gas distribution, transmission and storage services, and the competitive sale of propane.

PPL Generation - PPL Generation, LLC, a subsidiary of PPL Energy Supply that owns and operates U.S. generating facilities through various subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that primarily owns and operates a business in the U.K., WPD, that is focused on the regulated distribution of electricity. In January 2011, PPL Energy Supply, PPL Global's former parent, distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to its parent, PPL Energy Funding.

PPL Martins Creek - PPL Martins Creek, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Montana - PPL Montana, LLC, an indirect subsidiary of PPL Generation that generates electricity for wholesale sales in Montana and the Pacific Northwest.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides services for PPL and its subsidiaries.

PPL Susquehanna - PPL Susquehanna, LLC, the nuclear generating subsidiary of PPL Generation.

PPL WEM - PPL WEM Holdings plc (formerly WPD Investment Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WEM directly wholly owns WPD (East Midlands) and indirectly wholly owns WPD (West Midlands).

PPL WW - PPL WW Holdings Limited (formerly Western Power Distribution Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WW Holdings indirectly wholly owns WPD (South Wales) and WPD (South West).

WPD - refers to PPL WW and PPL WEM and their subsidiaries.

WPD (East Midlands) - Western Power Distribution (East Midlands) plc, a British regional electricity distribution utility company. The company, formerly Central Networks East plc, was acquired and renamed in April 2011.

WPD Midlands - refers to Central Networks, which was renamed after the acquisition.

WPD (South Wales) - Western Power Distribution (South Wales) plc, a British regional electricity distribution utility company.

WPD (South West) - Western Power Distribution (South West) plc, a British regional electricity distribution utility company.

WPD (West Midlands) - Western Power Distribution (West Midlands) plc, a British regional electricity distribution utility company. The company, formerly Central Networks West plc, was acquired and renamed in April 2011.

WKE - Western Kentucky Energy Corp., a subsidiary of LKE that leased certain non-utility generating stations in western Kentucky until July 2009.

Other terms and abbreviations

£ - British pounds sterling.

2001 Mortgage Indenture - PPL Electric's Indenture, dated as of August 1, 2001, to The Bank of New York Mellon (as successor to JPMorgan Chase Bank), as trustee, as supplemented.

2010 Bridge Facility - an up to $6.5 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding, as borrower, and PPL, as guarantor, and a group of banks syndicated in June 2010, to serve as a funding backstop in the event alternative financing was not available prior to the closing of PPL's acquisition of E.ON U.S.

2010 Equity Unit(s) - a PPL equity unit, issued in June 2010, consisting of a 2010 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018.

2010 Form 10-K - Annual Report to the SEC on Form 10-K for the year ended December 31, 2010.

2010 Purchase Contract(s) - a contract that is a component of a 2010 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to July 1, 2013.

2011 Bridge Facility - the £3.6 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, and lenders party thereto, used to fund the April 1, 2011 acquisition of Central Networks, as amended by Amendment No. 1 thereto dated April 15, 2011.

2011 Equity Unit(s) - a PPL equity unit, issued in April 2011, consisting of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019.

2011 Purchase Contract(s) - a contract that is a component of a 2011 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to May 1, 2014.

2011 Registration Statement(s) - refers to the registration statements on Form S-4 filed with the SEC by each of LKE (Registration No. 333-173665) on April 21, 2011, LG&E (Registration No 333-173676) on April 22, 2011 and KU (Registration No. 333-173675) on April 22, 2011, each as amended by Amendment No. 1 filed with the SEC on May 26, 2011 and effective June 1, 2011.

Acid Rain Program - allowance trading system established by the Clean Air Act to reduce levels of sulfur dioxide. Under this program, affected power plants are allocated allowances based on their fuel consumption during specified baseline years and a specific emissions rate.

Act 129 - became effective in October 2008. The law amends the Pennsylvania Public Utility Code and creates an energy efficiency and conservation program and smart metering technology requirements, adopts new PLR electricity supply procurement rules, provides remedies for market misconduct and makes changes to the existing Alternative Energy Portfolio Standard.

AFUDC - Allowance for Funds Used During Construction, the cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

A.M. Best - A.M. Best Company, a company that reports on the financial condition of insurance companies.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Baseload generation - includes the output provided by PPL's nuclear, coal, hydroelectric and qualifying facilities.

Basis - when used in the context of derivatives and commodity trading, the commodity price differential between two locations, products or time periods.

Bcf - billion cubic feet.

CAIR - the EPA's Clean Air Interstate Rule.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

COLA - license application for a combined construction permit and operating license from the NRC for a nuclear plant.

CPCN - Certificate of Public Convenience and Necessity. A license given to a public utility by the KPSC to build and own transmission and other gas and electricity infrastructure.

CSAPR - Cross State Air Pollution Rule, the CSAPR implements Clean Air Act requirements concerning the transport of air pollution from power plants across state boundaries. The CSAPR replaces the 2005 CAIR, which the U.S. Court of Appeals for the D.C. Circuit ordered the EPA to revise in 2008. The court allowed CAIR to remain in place temporarily while the EPA worked to finalize the replacement rule.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

Depreciation not normalized - the flow-through income tax impact related to the state regulatory treatment of depreciation-related timing differences.

Dodd-Frank Act - the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DOE - Department of Energy, a U.S. government agency.

DRIP - Dividend Reinvestment and Direct Stock Purchase Plan.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of DSM programs and revenues lost by implementing those programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, effective January 1993, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which apply to coal combustion and by-products from the production of energy from coal.

EMF - electric and magnetic fields.

E.ON AG - a German corporation and the parent of E.ON UK plc, the former parent of Central Networks.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

Equity Units - refers collectively to the 2011 and 2010 Equity Units.

ESOP - Employee Stock Ownership Plan.

Euro - the basic monetary unit among participating members of the European Union.

E.W. Brown - a generating station in Kentucky with capacity of 1,631 MW. LG&E and KU are participants in a sale-leaseback transaction involving two combustion turbines at the station.

FERC - Federal Energy Regulatory Commission, the federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch - Fitch, Inc., a credit rating agency.

FTR - financial transmission rights, which are financial instruments established to manage price risk related to electricity transmission congestion. They entitle the holder to receive compensation or require the holder to remit payment for certain congestion-related transmission charges based on the level of congestion in the transmission grid.

Fundamental Change - as it relates to the terms of the 2011 and 2010 Equity Units, will be deemed to have occurred if any of the following occurs with respect to PPL, subject to certain exceptions: (i) a change of control; (ii) a consolidation with or merger into any other entity; (iii) common stock ceases to be listed or quoted; or (iv) a liquidation, dissolution or termination.

GAAP - generally accepted accounting principles in the U.S.

GBP - British pound sterling.

GHG - greenhouse gas(es).

GWh - gigawatt-hour, one million kilowatt-hours.

Health Care Reform - The Patient Protection and Affordable Care Act (HR 3590) and the Health Care and Education Reconciliation Act of 2010 (HR 4872), signed into law in March 2010.

Intermediate and peaking generation - includes the output provided by PPL's oil- and natural gas-fired units.

IRP - Integrated Resource Plan. Pursuant to Kentucky Administrative Regulation 807 5:058, Kentucky electric utilities are required to file triennially an IRP with the KPSC. The filing is to provide the utilities' load forecasts and resource plans to meet future demand with an adequate and reliable supply of electricity at the lowest possible cost for all customers while satisfying all related state and federal laws and regulations.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

LIBOR - London Interbank Offered Rate.

Long Island generation business - includes a 79.9 MW gas-fired plant in the Edgewood section of Brentwood, New York and a 79.9 MW oil-fired plant in Shoreham, New York and related tolling agreements. This business was sold in February 2010.

MACT - maximum achievable control technology.

MISO - Midwest Independent System Operator, an independent system operator and the regional transmission organization that provides open-access transmission service and monitors the high-voltage transmission system in all or parts of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin and Manitoba, Canada.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

NDT - PPL Susquehanna's nuclear plant decommissioning trust.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas-fired combined-cycle turbine.

NPDES - National Pollutant Discharge Elimination System.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules.

NRC - Nuclear Regulatory Commission, the federal agency that regulates nuclear power facilities.

OCI - other comprehensive income or loss.

Ofgem - Office of Gas and Electricity Markets, the British agency that regulates transmission, distribution and wholesale sales of electricity and related matters.

Opacity - The degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity in power plant stack gas emissions.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek Station in Ohio and the Clifty Creek Station in Indiana, with combined nameplate capacities of 2,390 MW.

PADEP - the Pennsylvania Department of Environmental Protection, a state government agency.

PJM - PJM Interconnection, L.L.C., operator of the electric transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply to retail customers within its delivery area who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

PUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

Purchase Contracts - refers collectively to the 2010 and 2011 Purchase Contracts.

PURTA - The Pennsylvania Public Utility Realty Tax Act.

RAV - regulatory asset value. This term is also commonly known as RAB or regulatory asset base.

RECs - renewable energy credits.

Regional Transmission Expansion Plan - PJM conducts a long-range Regional Transmission Expansion Planning process that identifies what changes and additions to the grid are needed to ensure future needs are met for both the reliability and the economic performance of the grid. Under PJM agreements, transmission owners are obligated to build transmission projects that are needed to maintain reliability standards and that are reviewed and approved by the PJM Board.

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

Rev. Proc(s). - Revenue Procedure(s), an official published statement by the IRS of a matter of procedural importance to both taxpayers and the IRS concerning administration of the tax laws.

RMC - Risk Management Committee.

S&P - Standard & Poor's Ratings Services, a credit rating agency.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

SCR - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber - an air pollution control device that can remove particulates and/or gases (such as sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency whose primary mission is to protect investors and maintain the integrity of the securities markets.

Securities Act of 1933 - the Securities Act of 1933, 15 U.S. Code, Sections 77a-77aa, as amended.

SIFMA Index - the Securities Industry and Financial Markets Association Municipal Swap Index.

Smart meter - an electric meter that utilizes smart metering technology.

Smart metering technology - technology that can measure, among other things, time of electricity consumption to permit offering rate incentives for usage during lower cost or demand intervals. The use of this technology also strengthens network reliability.

Superfund - federal environmental legislation that addresses remediation of contaminated sites; states also have similar statutes.

TC2 - Trimble County Unit 2, a coal-fired plant located in Kentucky with a capacity of 760 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 570 MW of the capacity.

Tolling agreement - agreement whereby the owner of an electric generating facility agrees to use that facility to convert fuel provided by a third-party into electricity for delivery back to the third-party.

TRA - Tennessee Regulatory Authority, the state agency that has jurisdiction over the regulation of rates and service of utilities in Tennessee.

VaR - value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VIE - variable interest entity.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

VWAP - as it relates to the 2011 and 2010 Equity Units issued by PPL, the per share volume-weighted-average price as displayed under the heading Bloomberg VWAP on Bloomberg page "PPL <EQUITY> AQR" (or its equivalent successor if such page is not available) in respect of the period from the scheduled open of trading on the relevant trading day until the scheduled close of trading on the relevant trading day (or if such volume-weighted-average price is unavailable, the market price of one share of PPL common stock on such trading day determined, using a volume-weighted-average method, by a nationally recognized independent investment banking firm retained for this purpose by PPL).

(THIS PAGE LEFT BLANK INTENTIONALLY.)

FORWARD-LOOKING INFORMATION

Statements contained in this Form 10-Q concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in "Item 1A. Risk Factors" in this Form 10-Q and each Registrant's 2010 Form 10-K (in the case of PPL, PPL Energy Supply and PPL Electric) or 2011 Registration Statements (in the case of LKE, LG&E and KU), and in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-Q report, the following are among the important factors that could cause actual results to differ materially from the forward-looking statements.

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the length of scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- potential expansion of alternative sources of electricity generation;
- potential laws or regulations to reduce emissions of "greenhouse" gases or the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against PPL and its subsidiaries;
- potential effects of threatened or actual terrorism, war or other hostilities, or natural disasters;
- the commitments and liabilities of PPL and its subsidiaries;
- market demand and prices for energy, capacity, transmission services, emission allowances, RECs and delivered fuel;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in the NDT funds and in defined benefit plans, and the potential cash funding requirements if fair value declines;
- interest rates and their effect on pension, retiree medical, and nuclear decommissioning liabilities, and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- the profitability and liquidity, including access to capital markets and credit facilities, of PPL and its subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- changes in securities and credit ratings;
- foreign currency exchange rates;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional NRC requirements;
- political, regulatory or economic conditions in states, regions or countries where PPL or its subsidiaries conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation, including new tax, environmental, healthcare or pension-related legislation;
- state, federal and foreign regulatory developments;
- the outcome of any rate cases by PPL Electric at the PUC or the FERC; by LG&E at the KPSC; by KU at the KPSC, VSCC, TRA or the FERC; or by WPD at Ofgem in the U.K.;
- the impact of any state, federal or foreign investigations applicable to PPL and its subsidiaries and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures; and

- business dispositions or acquisitions and our ability to successfully operate such acquired businesses and realize expected benefits from business acquisitions, including PPL's 2011 acquisition of WPD Midlands and 2010 acquisition of LKE.

Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents of PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for PPL, PPL Energy Supply, PPL Electric, LKE, LG&E or KU to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.

(a) Shares in thousands. All common shares of KU stock are owned by LKE.
(b) KU's net income approximates comprehensive income.

The accompanying Notes to Condensed Financial Statements are an integral part of the financial statements.

1. Interim Financial Statements

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Capitalized terms and abbreviations appearing in the unaudited combined notes to condensed financial statements are explained in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, do not include all of the information and footnotes required by accounting principles generally accepted in the U.S. for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation in accordance with accounting principles generally accepted in the U.S. are reflected in the condensed financial statements. All adjustments are of a normal recurring nature, except as otherwise disclosed. Each Registrant's Balance Sheet at December 31, 2010 is derived from that Registrant's 2010 audited Balance Sheet. The financial statements and notes thereto should be read in conjunction with the financial statements and notes contained in the 2010 Form 10-K (in the case of PPL and PPL Electric), in the Form 8-K dated June 24, 2011 (in the case of PPL Energy Supply), or the annual financial statements included in the 2011 Registration Statements (in the case of LKE, LG&E and KU). The results of operations for the three and nine months ended September 30, 2011 are not necessarily indicative of the results to be expected for the full year ending December 31, 2011 or other future periods, because results for interim periods can be disproportionately influenced by various factors and developments and seasonal variations.

The classification of certain prior period amounts has been changed to conform to the presentation in the September 30, 2011 financial statements.

(PPL)

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary, PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. See Note 8 for additional information. As PPL is consolidating WPD Midlands on a one-month lag, three and five months of WPD Midlands' operating results are included in PPL's results of operations for the three and nine months ended September 30, 2011 with no comparable amounts for the same periods in 2010. See Note 2 for additional information regarding PPL's consolidation policy.

In November 2010, PPL completed the acquisition of LKE. See Notes 1 and 10 in PPL's 2010 Form 10-K for additional information. LKE's operating results for the three and nine months ended September 30, 2011 are included in PPL's results of operations with no comparable amounts for the same periods in 2010.

(LKE, LG&E and KU)

LKE's, LG&E's and KU's financial statements and accompanying footnotes have been segregated to present pre-acquisition activity as the "Predecessor" and post-acquisition activity as the "Successor." Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives in the Successor financial statements to conform to PPL's accounting policies, which are discussed in the annual financial statements included in LKE's, LG&E's and KU's 2011 Registration Statements. The cost bases of certain assets and liabilities were changed as of November 1, 2010 as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor period are not comparable to the Predecessor period.

(PPL Energy Supply)

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding. The distribution was made based on the book value of the assets and liabilities of PPL Global with financial effect as of January 1, 2011. See Note 8 for additional information.

(PPL, PPL Energy Supply and LKE)

"Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income includes the activities of various businesses that were sold or distributed in 2011 and 2010. See Note 8 for additional information. The Statements of Cash Flows do not separately report the cash flows of the Discontinued Operations, except for the LKE Predecessor period, which separately discloses these cash flows within operating, investing and financing activities, consistent with LKE's pre-acquisition accounting policy.

2. Summary of Significant Accounting Policies

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The following accounting policy disclosures represent updates to Note 1 in the 2010 Form 10-K (in the case of PPL and PPL Electric), in the Form 8-K dated June 24, 2011 (in the case of PPL Energy Supply), or in the annual financial statements included in the 2011 Registration Statements (in the case of LKE, LG&E and KU) and should be read in conjunction with those disclosures.

General

Business and Consolidation *(PPL)*

As noted above, on April 1, 2011, PPL, through its indirect, wholly owned subsidiary, PPL WEM, completed the acquisition of WPD Midlands. PPL consolidates WPD, including WPD Midlands, on a one-month lag. Material intervening events, such as debt issuances that occur in the lag period, are recognized in the current period financial statements. Events that are significant but not material are disclosed. See Note 8 for additional information.

Regulation *(PPL, PPL Electric, LKE, LG&E and KU)*

The electricity distribution subsidiaries of PPL WW and PPL WEM are not subject to accounting for the effects of certain types of regulation as prescribed by GAAP, as their operations do not meet the requirements for such accounting guidance. However, PPL Electric, LG&E and KU all apply this accounting guidance.

Accounts Receivable *(PPL, PPL Energy Supply and PPL Electric)*

PPL Electric's customers may elect to procure generation supply from an alternative supplier. As a result of a PUC-approved purchase of accounts receivable program, PPL Electric has purchased certain accounts receivable from alternative suppliers at a nominal discount, which reflects a provision for uncollectible accounts. The alternative suppliers (including PPL Electric's affiliate, PPL EnergyPlus) have no continuing involvement or interest in the purchased accounts receivable. The purchased accounts receivable are initially recorded at fair value using a market approach based on the purchase price paid and are classified as Level 2 in the fair value hierarchy. PPL Electric receives a nominal fee for administering its program. During the three and nine months ended September 30, 2011, PPL Electric purchased $219 million and $671 million of accounts receivable from unaffiliated third parties and $74 million and $194 million from its affiliate, PPL EnergyPlus. During the three and nine months ended September 30, 2010, PPL Electric purchased $203 million and $428 million of accounts receivable from unaffiliated third parties and $66 million and $157 million from its affiliate, PPL EnergyPlus.

New Accounting Guidance Adopted *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

No new accounting guidance has been adopted during the three or nine months ended September 30, 2011. See Note 18 for a discussion of new accounting guidance pending adoption.

3. Segment and Related Information

(PPL and PPL Energy Supply)

See Note 2 to the Financial Statements in the 2010 Form 10-K for PPL and in the Form 8-K dated June 24, 2011 for PPL Energy Supply for a discussion of reportable segments. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent, PPL Energy Funding. Following the distribution, PPL Energy Supply operates in a single business segment, the Supply segment. PPL Energy Supply's 2010 segment information was restated to reflect PPL Global as a Discontinued Operation. See Note 8 for additional information.

(PPL)

PPL includes the results of PPL Global in the International Regulated segment. This includes the operating results and assets of WPD Midlands since the acquisition date, April 1, 2011, on a one-month lag. See Note 8 for additional information regarding the acquisition.

The Kentucky Regulated and International Regulated segments include certain acquisition-related costs and financing activities associated with the acquisitions of LKE and WPD Midlands.

Financial data for the segments for the periods ended September 30 are:

	Three Months		Nine Months	
	2011	2010	2011	2010
PPL				
Income Statement Data				
Revenues from external customers				
Kentucky Regulated	$ 736		$ 2,140	
International Regulated	493	$ 172	1,138	$ 563
Pennsylvania Regulated	454	570	1,444	1,901
Supply (a)	1,437	1,437	3,797	4,194
Total	$ 3,120	$ 2,179	$ 8,519	$ 6,658
Intersegment electric revenues				
Pennsylvania Regulated	$ 1	$ 1	$ 9	$ 5
Supply (b)	5	71	15	250
Net Income Attributable to PPL				
Kentucky Regulated	$ 78		$ 184	
International Regulated	138	$ 93	231	$ 227
Pennsylvania Regulated	28	36	116	89
Supply (a) (d)	200	153	510	320
Unallocated Costs (e)		(34)		(53)
Total	$ 444	$ 248	$ 1,041	$ 583
PPL Energy Supply				
Income Statement Data				
Revenues from external customers				
Supply (a)	$ 1,441	$ 1,508	$ 3,807	$ 4,437
Net Income				
International Regulated (c)		$ 106		$ 227
Supply (a) (d)	$ 169	159	$ 472	324
Total	$ 169	$ 265	$ 472	$ 551

	PPL		PPL Energy Supply	
	September 30, 2011	December 31, 2010	September 30, 2011	December 31, 2010
Balance Sheet Data				
Assets				
Kentucky Regulated (f)	$ 10,304	$ 10,318		
International Regulated	13,513	4,800		$ 4,800
Pennsylvania Regulated	5,385	5,189		
Supply (f)	11,754	12,530	$ 11,313	11,996
Total assets	$ 40,956	$ 32,837	$ 11,313	$ 16,796

(a) Includes unrealized gains and losses from economic activity. See Note 14 for additional information.
(b) See "PLR Contracts/Purchase of Accounts Receivable" in Note 11 for a discussion of the basis of accounting between reportable segments.
(c) Reported in Discontinued Operations. See Note 8 for additional information.
(d) In April 2011, during the PPL Susquehanna Unit 2 refueling and generation uprate outage, a planned inspection of the Unit 2 turbine revealed cracks in certain of its low pressure turbine blades. As a precaution, PPL Susquehanna also took Unit 1 out of service in mid-May to inspect that unit's turbine blades. This inspection revealed cracked blades similar to those found in Unit 2. Replacement of these blades was completed, significantly extending these outages. The after-tax earnings impact, including reduced energy sales margins and repair expense for both units was $63 million for the nine months ended September 30, 2011.
(e) Represents LKE acquisition-related costs and 2010 Bridge Facility financing costs.
(f) A portion of the goodwill related to the 2010 LKE acquisition has been attributed to PPL's Supply segment.

4. Earnings Per Share

(PPL)

Basic EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding during the period. Diluted EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of shares outstanding that are increased for additional shares that would be outstanding if potentially dilutive non-participating securities were converted to common shares as calculated using the treasury stock method. In 2011 and 2010, these securities included stock options, performance units granted under incentive compensation plans and the 2010 Purchase Contract component of the 2010 Equity Units. Additionally, in 2011, these securities included the 2011 Purchase Contract component of the 2011 Equity Units. The 2011 Purchase Contracts will be dilutive under the treasury stock method if the average VWAP of PPL's common stock for a certain period exceeds approximately $30.99. The 2010 Purchase Contracts will be dilutive under the treasury stock method if the average VWAP of PPL's common stock for a certain period exceeds $28.80. The 2011 and 2010 Purchase Contracts were excluded from the diluted EPS calculations because they did not meet this criteria during the three and nine months ended September 30, 2011 and 2010. Subject to antidilution adjustments at September 30, 2011, the maximum number of shares issuable to settle the Purchase Contracts was 103,372,695 shares, including 86,552,565 shares that could be issued under standard provisions of the Purchase Contracts and 16,820,130 shares that could be issued under make-whole provisions in the event of early settlement upon a Fundamental Change. See Note 7 for additional information on the 2011 Equity Units.

Reconciliations of the amounts of income and shares of PPL common stock (in thousands) for the periods ended September 30 used in the EPS calculation are:

	Three Months		Nine Months	
	2011	2010	2011	2010
Income (Numerator)				
Income from continuing operations after income taxes attributable to PPL	$ 444	$ 301	$ 1,039	$ 621
Less amounts allocated to participating securities	2	1	4	2
Income from continuing operations after income taxes available to PPL common shareowners	$ 442	$ 300	$ 1,035	$ 619
Income (loss) from discontinued operations (net of income taxes) available to PPL	$	$ (53)	$ 2	$ (38)
Net income attributable to PPL	$ 444	$ 248	$ 1,041	$ 583
Less amounts allocated to participating securities	2	1	4	2
Net income available to PPL common shareowners	$ 442	$ 247	$ 1,037	$ 581
Shares of Common Stock (Denominator)				
Weighted-average shares - Basic EPS	577,595	482,552	541,135	414,068
Add incremental non-participating securities:				
Stock options and performance units	459	210	345	219
Weighted-average shares - Diluted EPS	578,054	482,762	541,480	414,287
Basic EPS				
Available to PPL common shareowners:				
Income from continuing operations after income taxes	$ 0.76	$ 0.62	$ 1.91	$ 1.49
Income (loss) from discontinued operations (net of income taxes)		(0.11)	0.01	(0.09)
Net Income	$ 0.76	$ 0.51	$ 1.92	$ 1.40
Diluted EPS				
Available to PPL common shareowners:				
Income from continuing operations after income taxes	$ 0.76	$ 0.62	$ 1.91	$ 1.49
Income (loss) from discontinued operations (net of income taxes)		(0.11)		(0.09)
Net Income	$ 0.76	$ 0.51	$ 1.91	$ 1.40

For the periods ended September 30 the following options to purchase PPL common stock and performance units were excluded from the computations of diluted EPS because the effect would have been antidilutive.

	Three Months		Nine Months	
(Shares in thousands)	2011	2010	2011	2010
Stock options	4,473	5,194	5,377	4,844
Performance units	3		3	61

During the three and nine months ended September 30, 2011, PPL issued 17,311 and 410,283 shares of common stock related to the exercise of stock options, vesting of restricted stock and restricted stock units and conversion of stock units granted to directors under its stock-based compensation plans. In addition, PPL issued 561,918 and 1,741,827 shares of common stock related to its DRIP during the three and nine months ended September 30, 2011. PPL also issued 301,319 shares related to its ESOP during the nine months ended September 30, 2011 .

See Note 7 for information on the April 2011 issuance of common stock and 2011 Equity Units.

5. Income Taxes

Reconciliations of income tax expense for the periods ended September 30 are:

(PPL)

	Three Months		Nine Months	
	2011	2010	2011	2010
Reconciliation of Income Tax Expense				
Federal income tax on Income from Continuing Operations Before Income Taxes at statutory tax rate - 35%	$ 196	$ 114	$ 518	$ 277
Increase (decrease) due to:				
State income taxes, net of federal income tax benefit	8	17	47	32
State valuation allowance adjustments (a)			11	(8)
Impact of lower U.K. income tax rates	(12)	(8)	(31)	(15)

Amortization of investment tax credit	(2)		(6)	(2)
Depreciation not normalized (a)	(1)	(1)	(7)	(1)
Nondeductible acquisition-related costs (h)	1		9	
Other	(3)	(5)	(10)	(9)
Total increase (decrease)	(86)	(95)	(89)	(125)
Total income taxes from continuing operations	$ 110	$ 19	$ 429	$ 152

(a) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. Due to the reduction in projected Pennsylvania taxable income for tax years 2011 and 2012 related to the 100% bonus depreciation deduction, PPL adjusted its deferred tax valuation allowances for Pennsylvania net operating losses by $11 million in the first quarter of 2011.

Additionally, the 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

(b) During the three and nine months ended September 30, 2011, PPL recorded a $7 million and $21 million federal income tax benefit related to U.K. pension contributions.

(c) In 1997, the U.K. imposed a Windfall Profits Tax on privatized utilities, including WPD. In September 2010, the U.S. Tax Court ruled in PPL's favor in a pending dispute with the IRS, concluding that the U.K. Windfall Profits Tax is a creditable tax for U.S. tax purposes. As a result and with the finalization of other issues, PPL recorded a $42 million tax benefit which impacted federal and state income tax reserves and related deferred income taxes during the third quarter of 2010. In January 2011, the IRS appealed the U.S. Tax Court's decision to the U.S. Court of Appeals for the Third Circuit.

In July 2010, the U.S. Tax Court ruled in PPL's favor in a pending dispute with the IRS, concluding that street lighting assets of PPL Electric are depreciable for tax purposes over seven years. As a result, PPL recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes in the third quarter of 2010.

See "Tax Litigation" below for additional information.

(d) During the three and nine months ended September 30, 2010, PPL recorded $27 million and $52 million in foreign tax benefits and related adjustments to foreign tax reserves of $24 and $46 million in conjunction with losses resulting from restructuring in the U.K. These losses offset tax on a deferred gain from a prior year sale of WPD's supply business.

(e) In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation eliminates the estimated tax benefit related to the domestic manufacturing deduction in 2011.

(f) Beginning in 2013, provisions within Health Care Reform eliminated the income tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage. As a result, PPL recorded deferred income tax expense in the first quarter of 2010. See Note 9 for additional information.

(g) The U.K.'s Finance Act of 2011, enacted in July 2011, included reductions in the U.K. statutory income tax rate. The statutory income tax rate was reduced from 27% to 26% retroactive to April 1, 2011 and will be reduced from 26% to 25% effective April 1, 2012. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit in the third quarter of 2011 to comprehend both rate decreases.

The U.K.'s Finance Act of 2010, enacted in July 2010, included a reduction in the U.K. statutory income tax rate. Effective April 1, 2011, the statutory income tax rate was reduced from 28% to 27%. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit in the third quarter of 2010.

(h) During the three and nine months ended September 30, 2011, PPL recorded nondeductible acquisition-related costs (primarily the U.K. stamp duty tax) associated with its acquisition of WPD Midlands. See Note 8 for additional information on the acquisition.

PPL has evaluated the impact of the change in earnings estimates on its projected annual effective tax rate. The result of the change in estimate reduced income tax expense for the three months ended September 30, 2011 by $18 million ($0.03 per share, basic and diluted).

(PPL Energy Supply)

	Three Months		Nine Months	
	2011	2010	2011	2010
Reconciliation of Income Tax Expense

	2011	2010	2011	2010
Reconciliation of Income Tax Expense				
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 16	$ 19	$ 64	$ 53
Increase (decrease) due to:				
State income taxes, net of federal income tax benefit	2	3	9	7
Federal and state tax reserve adjustments (a)	(2)	(6)	(6)	(10)
Federal and state income tax return adjustments			(2)	
Depreciation not normalized (b)	(1)	(1)	(6)	(1)
Other	(1)		(3)	(2)
Total increase (decrease)	(2)	(4)	(8)	(6)
Total income taxes	$ 14	$ 15	$ 56	$ 47

(a) In July 2010, the U.S. Tax Court ruled in PPL Electric's favor in a pending dispute with the IRS, concluding that street lighting assets are depreciable for tax purposes over seven years. As a result, PPL Electric recorded a $7 million tax benefit which impacted federal and state income tax reserves and related deferred income taxes in the third quarter of 2010. See "Tax Litigation" below for additional information.

(b) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

Unrecognized Tax Benefits *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Changes to unrecognized tax benefits for the periods ended September 30 were as follows.

	Three Months		Nine Months	
	2011	2010	2011	2010
PPL				
Beginning of period	$ 250	$ 224	$ 251	$ 212
Additions based on tax positions of prior years	1		2	4
Reductions based on tax positions of prior years	(14)	(50)	(14)	(56)
Additions based on tax positions related to the current year	4	13	4	43
Reductions based on tax positions related to the current year	(1)	(1)	(3)	(6)
Settlements		(11)		(12)
Lapse of applicable statutes of limitation	(3)	(2)	(8)	(6)
Effects of foreign currency translation	(2)	5	3	(1)
End of period (a)	$ 235	$ 178	$ 235	$ 178
PPL Energy Supply				
Beginning of period	$ 28	$ 142	$ 183	$ 124
Additions based on tax positions of prior years				2
Reductions based on tax positions of prior years		(43)		(47)
Additions based on tax positions related to the current year		13		43
Reductions based on tax positions related to the current year				(3)
Settlements				(1)
Derecognize unrecognized tax benefits (b)			(155)	
Effects of foreign currency translation		5		(1)
End of period	$ 28	$ 117	$ 28	$ 117

	Three Months		Nine Months	
	2011	2010	2011	2010
PPL Electric				
Beginning of period	$ 56	$ 68	$ 62	$ 74
Additions based on tax positions of prior years				2
Reductions based on tax positions of prior years		(7)		(9)
Reductions based on tax positions related to the current year		(1)	(1)	(3)
Lapse of applicable statutes of limitation	(3)	(2)	(8)	(6)
End of period	$ 53	$ 58	$ 53	$ 58

(a) Unrecognized tax benefits at September 30, 2011 include $146 million of U.K. capital losses related to positions previously recorded on U.K. income tax returns. In October 2011, the U.K. tax authority accepted these capital loss positions. As a result, in the fourth quarter of 2011, PPL expects to reverse this unrecognized tax benefit and expects to record a valuation allowance for this amount against the deferred tax asset that results from an increase in capital loss carry forwards.

(b) Represents unrecognized tax benefits derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. See Note 8 for additional information on the distribution.

LKE's, LG&E's and KU's unrecognized tax benefits and changes in those unrecognized tax benefits are insignificant for the three and nine months ended September 30, 2011 and 2010.

At September 30, 2011, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase or decrease by the following amounts. For LKE, LG&E and KU, no significant changes in unrecognized tax benefits are projected over the next 12 months.

	Increase	Decrease
PPL	$ 23	$ 216
PPL Energy Supply		26
PPL Electric	26	41

These potential changes could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the creditability of foreign taxes, the timing and utilization of foreign tax credits and the related impact on alternative minimum tax and other credits, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

At September 30, the total unrecognized tax benefits and related indirect effects that, if recognized, would decrease the effective tax rate were as follows. The amounts for LKE, LG&E and KU were insignificant.

	2011	2010
PPL	$ 172	$ 116
PPL Energy Supply	12	102
PPL Electric	9	14

Other *(PPL, PPL Energy Supply and PPL Electric)*

PPL changed its method of accounting for repair expenditures for tax purposes effective for its 2008 tax year for the Pennsylvania generation, transmission and distribution operations. The same change was made for the Montana generation operations for 2009.

In August 2011, the IRS issued Rev. Procs. 2011-42 and 2011-43. Rev. Proc. 2011-42 provides guidance regarding the use and evaluation of statistical samples and sampling estimates. Rev. Proc. 2011-43 provides a safe harbor method of determining whether certain expenditures for electric transmission and distribution property can be currently deducted for tax purposes. No guidance was issued related to generation property.

If PPL adopts the safe harbor method of Rev. Proc. 2011-43, the amount of deductible versus capitalizable expenditures will likely be different from PPL's current method. While PPL has not yet completed its analysis of this guidance, it does not believe any resulting adjustment to unrecognized tax benefits or income tax liabilities will have a significant impact on net income.

Tax Litigation (*PPL and PPL Electric)*

In January 2011, the IRS appealed, to the U.S. Court of Appeals for the Third Circuit, the U.S. Tax Court's decision that the 1997 U.K. Windfall Profits Tax (WPT) is a creditable tax for U.S. Federal income tax purposes. In its decision, the Tax Court ruled on two issues: (1) the 1997 U.K. WPT imposed on all U.K. privatized utilities, including PPL's U.K. subsidiary, was creditable against the Company's U.S. income taxes; and (2) PPL Electric's street lighting assets could be depreciated for tax purposes over seven years as permitted for "property without a class life" instead of the 20-year depreciation recovery period argued by the IRS. The IRS did not appeal the street lighting decision. PPL filed its tax returns for 1997 and all intervening years on the basis that the WPT was creditable and that the appropriate tax depreciable life for its street lighting assets was seven years. Therefore, the cash benefit resulting from these items has already been realized.

6. Utility Rate Regulation

(PPL, PPL Electric, LKE, LG&E and KU)

The following tables provide information about the regulatory assets and liabilities of cost-based rate-regulated utility operations.

	PPL		PPL Electric	
	September 30, 2011	December 31, 2010	September 30, 2011	December 31, 2010

Defined benefit plans	10	10			10	10
Other	8	7	3	1	5	6
Total noncurrent regulatory liabilities	$ 1,007	$ 1,017	$ 481	$ 483	$ 526	$ 534

(a) PPL Electric's generation supply charge recovery mechanism moved from an undercollected status at December 31, 2010 to an overcollected status at September 30, 2011, reflecting the impacts of changes in customer billing cycles, the timing of rate reconciliation filings, the levels of customers choosing alternative energy suppliers and other factors. Because customer rates are designed to collect the costs of PPL Electric's energy purchases to meet its PLR requirements, there is minimal impact on earnings.

(b) The December 31, 2010 balance of accumulated cost of removal of utility plant was reclassified from "Accumulated depreciation - regulated utility plant" to noncurrent "Regulatory assets" on the Balance Sheets. These costs will continue to be included in future rate proceedings.

(c) These regulatory assets and liabilities were recorded as offsets to certain intangible assets and liabilities that were recorded at fair value upon the acquisition of LKE.

Regulatory Matters

Kentucky Activities *(PPL, LKE, LG&E and KU)*

Environmental Upgrades

In order to achieve compliance with new and pending federal EPA regulations including CSAPR, National Ambient Air Quality Standards and the MACT rule, in June 2011, LG&E and KU filed ECR plans with the KPSC requesting approval to install environmental upgrades for their coal-fired plants and for recovery of the expected $2.5 billion in associated capital costs, as well as operating expenses, as incurred. The ECR plans detail upgrades that will be made to certain of their coal-fired generating stations to continue to be compliant with EPA regulations.

LG&E requested $1.4 billion to modernize the sulfur dioxide scrubbers at the Mill Creek generating station as well as install fabric-filter baghouse systems for increased particulate and mercury control on all units at Mill Creek and for Unit 1 at Trimble County. In its KPSC application, LG&E estimated the impact on rates to LG&E's electric customers to be an increase of 2.3% in 2012, growing to an increase of 19.2% by 2016. KU requested $1.1 billion for upgrades that include fabric-filter baghouse systems for increased particulate and mercury control on units at the E.W. Brown and Ghent generating stations and the conversion of a wet storage facility to a dry landfill at the E.W. Brown generating station. In its KPSC application, KU estimated the impact on rates to KU's electric customers to be an increase of 1.5% in 2012, growing to an increase of 12.2% by 2016.

Certain parties have been granted intervenor status in the ECR proceedings. The KPSC issued a procedural schedule under which data discovery is expected to continue into the fourth quarter. A KPSC order is anticipated to be issued in December 2011. LG&E and KU cannot predict the outcome of these proceedings.

IRP

IRP regulations in Kentucky require major utilities to make triennial IRP filings with the KPSC. In April 2011, LG&E and KU filed their 2011 joint IRP with the KPSC. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information. In May 2011, the KPSC issued a procedural schedule and data discovery will continue through the fourth quarter. Pursuant to a December 2008 Order, KU filed the 2011 joint IRP with the VSCC in September 2011, with certain supplemental information as required by this Order. The IRP assumes approximately 500 MW of peak demand reductions by 2017 through existing or expanded DSM or energy efficiency programs. Implementation of the major findings of the IRP is subject to further analysis and decision-making and further regulatory approvals.

CPCN Filing

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run station site. KU will own a 78% undivided interest, and LG&E will own a 22% undivided interest, in the new NGCC. In addition, LG&E and KU also requested approval to purchase three additional natural gas combustion turbines from Bluegrass Generation Company, L.L.C. that are expected to provide up to 495 MW of peak generation supply (the Bluegrass Plant). In conjunction with these developments, at the end of 2015 LG&E and KU anticipate retiring three coal-fired generating units at LG&E's Cane Run station and also coal-fired generating units at KU's Tyrone and Green River stations. These generating stations represent 797 MW of combined summer capacity.

LG&E and KU anticipate that the NGCC construction and Bluegrass Plant acquisition could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC and Bluegrass Plant acquisition were not included in the CPCN filing with the KPSC, but are expected to be included in a future base rate case filing. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, but no hearing, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012.

DSM/Energy Efficiency

In April 2011, LG&E and KU filed a DSM application to expand existing energy efficiency programs and implement new energy efficiency programs. Discovery and evidentiary phases have been completed and a KPSC order is anticipated during the fourth quarter of 2011. Any increase in rates will not be implemented until an order is issued by the KPSC.

PPL's Acquisition of LKE

In September 2010, the KPSC approved a settlement agreement among PPL and all of the intervening parties to PPL's joint application to the KPSC for approval of its acquisition of ownership and control of LKE, LG&E and KU. In the settlement agreement, the parties agreed that LG&E and KU would commit that no base rate increases would take effect before January 1, 2013. Under the terms of the settlement, LG&E and KU retain the right to seek KPSC approval for the deferral of "extraordinary and uncontrollable costs," such as significant storm restoration costs, if incurred. Additionally, interim rate adjustments will continue to be permissible during that period for existing recovery mechanisms such as the ECR and DSM.

Storm Costs (PPL, LKE and LG&E)

In August 2011, a strong storm hit LG&E's service area causing significant damage and widespread outages for approximately 139,000 customers. LG&E filed an application with the KPSC in September 2011, requesting approval of a regulatory asset recorded to defer, for future recovery, $7 million in incremental operation and maintenance expenses related to the storm restoration. The KPSC has issued a procedural schedule for discovery relating to the application during the fourth quarter.

Virginia Activities *(PPL, LKE and KU)*

Rate Case

In April 2011, KU filed an application with the VSCC requesting an annual increase in electric base rates for its Virginia jurisdictional customers of $9 million, or 14%. The proposed increase reflected a rate of return on rate base of 8%, based on a return on equity of 11%, inclusive of expenditures to complete TC2, all new sulfur dioxide scrubbers, recovery over five years of a 2009 storm regulatory asset and various other adjustments to revenue and expenses for the test year ended December 31, 2010. In September 2011, a settlement stipulation was reached between KU and the VSCC Staff and filed with the VSCC for consideration. In October 2011, the VSCC approved the stipulation with two modifications that were accepted by KU. The VSCC issued an Order closing the proceeding in October 2011. The approved annual revenue increase is $7 million with new base rates effective November 1, 2011.

Levelized Fuel Factor

In February 2011, KU filed an application with the VSCC seeking approval of an increase in its fuel cost factor beginning with service rendered in April 2011. In March 2011, a hearing was held on KU's requested fuel factor and an Order was issued approving a revised fuel factor to be in effect beginning with service rendered on and after April 1, 2011, with recovery of the regulatory asset for prior period under-recoveries over a three-year period.

Storm Costs

In December 2009, a major snowstorm hit KU's Virginia service area causing approximately 30,000 customer outages. During the normal 2009 Virginia Annual Information Filing (AIF), KU requested that the VSCC establish a regulatory asset and defer for future recovery $6 million in incremental operation and maintenance expenses related to the storm restoration. In March 2011, the VSCC Staff issued its report on KU's 2009 AIF stating that it considered this storm damage to be extraordinary, non-recurring and material to KU. The Staff Report also recommended establishing a regulatory asset for these costs, with recovery over a five-year period upon approval in the next base rate case. In March 2011, a regulatory asset of $6 million was established for actual costs incurred. In June 2011, the VSCC issued an Order approving the recommendations contained in the Staff Report.

Pennsylvania Activities

(PPL and PPL Electric)

Act 129

Act 129 requires Pennsylvania electric utilities to meet specified goals for reduction in customer electricity usage and peak demand by specified dates. Utilities not meeting the requirements of Act 129 are exposed to significant penalties.

Under Act 129, Electric Distribution Companies (EDCs) must develop and file an energy efficiency and conservation plan (EE&C Plan) with the PUC and contract with conservation service providers to implement all or a portion of the EE&C Plan. Act 129 requires EDCs to cause reduced overall electricity consumption of 1.0% by 2011 and 3.0% by 2013, and reduced peak demand of 4.5% for the 100 hours of highest demand by 2013. To date, PPL Electric has met the 2011 requirement, subject to the PUC's verification. EDCs will be able to recover the costs (capped at 2% of the EDC's 2006 revenue) of implementing their EE&C Plans. In October 2009, the PUC approved PPL Electric's EE&C Plan. The plan includes 14 programs, all of which are voluntary for customers. The plan includes a proposed rate mechanism for recovery of all costs incurred by PPL Electric to implement the plan. In September 2010, PPL Electric filed its Program Year 1 Annual Report and Process Evaluation Report. PPL Electric also filed a petition requesting permission to modify two components of its EE&C Plan. The PUC issued its Final Order in January 2011, approving the changes proposed by PPL Electric and directing PPL Electric to re-file its plan to reflect all changes made since its initial approval. In February 2011, PPL Electric filed the changes to its plan and in May 2011, the PUC approved those changes.

Act 129 also requires installation of smart meters for new construction, upon the request of consumers at their cost, or on a depreciation schedule not exceeding 15 years. Under Act 129, EDCs will be able to recover the costs of providing smart metering technology. In August 2009, PPL Electric filed its proposed smart meter technology procurement and installation plan with the PUC. All of PPL Electric's metered customers currently have smart meters installed at their service locations, and PPL Electric's current advanced metering technology generally satisfies the requirements of Act 129 and does not need to be replaced. In June 2010, the PUC entered its order approving PPL Electric's smart meter plan with several modifications. In compliance with the Order, in the third quarter of 2010, PPL Electric submitted a revised plan with a cost estimate of $38 million to be incurred over a five-year period, beginning in 2009, and filed a rider to recover these costs beginning January 1, 2011. In December 2010, the PUC approved PPL Electric's rate rider to recover the costs of its smart meter program. In August 2011, PPL Electric filed with the PUC an annual report describing the actions it is taking under its smart meter plan in 2011 and will take in 2012. PPL Electric also submitted proposed Smart Meter Rider charges to be effective January 1, 2012.

Act 129 also requires the Default Service Provider (DSP) to provide electric generation supply service to customers pursuant to a PUC-approved competitive procurement plan through auctions, requests for proposal and bilateral contracts at the sole discretion of the DSP. Act 129 requires a mix of spot market purchases, short-term contracts and long-term contracts (4 to 20 years), with long-term contracts limited to up to 25% of the load unless otherwise approved by the PUC). The DSP will be able to recover the costs associated with a competitive procurement plan.

Under Act 129, the DSP competitive procurement plan must ensure adequate and reliable service "at least cost to customers" over time. Act 129 grants the PUC authority to extend long-term power contracts up to 20 years, if necessary, to achieve the "least cost" standard. The PUC has approved PPL Electric's procurement plan for the period January 1, 2011 through May 31, 2013, and PPL Electric has begun purchasing under that plan. In December 2010, the PUC approved PPL Electric's rate rider to recover the costs of providing default service.

PUC Investigation of Retail Market

In April 2011, the PUC opened an investigation of Pennsylvania's retail electricity market which will be conducted in two phases. Phase one will address the status of the current retail market and explore potential changes. Questions promulgated by the PUC for this phase of the investigation focus primarily on default service issues. In June 2011, interested parties filed comments and the PUC held a hearing in this phase of the investigation. In July 2011, the PUC entered an order initiating phase two of the investigation which will study how best to address issues identified by the PUC as being most relevant to improving the current retail electricity market. The PUC issued a tentative order in October 2011 addressing issues associated with the timing and various other details of EDCs' default service procurement plans. Parties will have an opportunity to comment on that tentative order. The PUC also has scheduled a hearing in this phase of the investigation in November 2011. It is likely that investigation will not be completed before the end of the year. PPL Electric cannot predict the outcome of the investigation.

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation that would authorize the PUC to approve regulatory procedures and mechanisms to provide for more timely recovery of a utility's costs. Those procedures and mechanisms include, but are not limited to, the use of a fully projected test year and an automatic adjustment clause to recover certain capital costs and related operating expenses. In October 2011, the legislation was passed by the Pennsylvania House of Representatives. It will now be considered by the Pennsylvania Senate. PPL Electric is working with other stakeholders to support passage of this legislation.

Unamortized Loss on Debt

As further discussed in Note 7, in July 2011 PPL Electric redeemed Senior Secured Bonds for $458 million, plus accrued interest. The redemption premium and the unamortized financing costs of $59 million were recorded as a regulatory asset which will be amortized over the life of the replacement debt.

Storm Recovery

PPL Electric experienced several PUC-reportable storms during the three and nine months ended September 30, 2011 resulting in total restoration costs of $34 million and $59 million, of which $23 million and $39 million were recorded in "Other operation and maintenance" on the Statement of Income. Although PPL Electric has storm insurance with a PPL affiliate, the costs associated with the unusually high number of PUC-reportable storms has exceeded policy limits. Probable insurance recoveries recorded during the three and nine months ended September 30, 2011 were $12 million and $26.5 million, of which $7 million and $16 million were included in "Other operation and maintenance" on the Statement of Income. In November 2011, PPL Electric filed with the PUC a request for permission to defer $15 to $20 million for future recovery of allowable storm-related costs. At the time PPL Electric seeks recovery of any deferred amount, its claim will be based on the actual costs, net of insurance recoveries. A regulatory asset, for the actual costs net of insurance recoveries, will be recorded at such time as an order is received from the PUC approving deferral of these costs.

In late October 2011, PPL Electric experienced significant damage to its transmission and distribution network from a severe snow storm. The costs associated with the restoration efforts are still being determined and are not included in the amounts disclosed above. PPL Electric will evaluate such costs, when quantified, and will likely file with the PUC for permission to defer certain of the costs incurred to repair the distribution network for future recovery. Costs incurred to repair the transmission network are recoverable through the FERC Formula Rate mechanism which is updated annually.

Transmission Service Charge Adjustment (PPL Electric)

During the three and nine months ended September 30, 2011, PPL Electric recorded a $7 million ($4 million after-tax) charge to "Retail electric" revenue on the Statement of Income to reduce a portion of the transmission service charge regulatory asset associated with a 2005 undercollection that was not included in any subsequent rate reconciliations filed with the PUC. PPL Electric plans to seek recovery with the PUC. However, management cannot assert at the present time that it is probable that the previously recorded regulatory asset will be recovered. The regulatory asset will be reinstated should the PUC approve recovery of these costs. The impact of this charge was not material to any previously reported financial statements and is not expected to be material to the financial statements for the full year of 2011.

Federal Matters

FERC Formula Rates (PPL and PPL Electric)

In May 2010, PPL Electric initiated the 2010 Annual Update of its formula rate. In November 2010, a group of municipal customers taking transmission service in PPL Electric's zone filed a preliminary challenge to the update, and in December 2010 they filed a formal challenge. In January 2011, PPL Electric filed a motion to dismiss a number of the challenges and submitted responses to all of the challenges. The group of municipal customers filed answers to PPL Electric's motion to dismiss and its responses to the formal challenge. In August 2011, the FERC issued an order rejecting the formal challenge and accepting PPL Electric's 2010 Annual Update; the group of municipal customers filed a request for rehearing of that order. In October 2011, the group of municipal customers filed a preliminary challenge to PPL Electric's 2011 Annual Update of its formula rate. PPL Electric will attempt to resolve the issues raised in this preliminary challenge. PPL Electric cannot predict the outcome of this proceeding which remains pending before the FERC.

International Activities *(PPL)*

U.K. Overhead Electricity Networks

In 2002, for safety reasons, the U.K. Government issued guidance that low voltage overhead electricity networks within three meters horizontal clearance of a building should either be insulated or relocated. This imposed a retroactive requirement on existing assets that were built with lower clearances. In 2008, the U.K. Government determined that the U.K. electricity network should comply with the issued guidance. WPD estimates that the cost of compliance will be approximately $124 million. The projected expenditures in the current regulatory period, April 1, 2010 through March 31, 2015, have been included in allowed revenues, and it is expected that expenditures beyond this five-year period (including WPD Midlands expenditures) will also be included in allowed revenues. The U.K. Government has determined that WPD (South Wales) and WPD Midlands should comply by 2015 and WPD (South West) by 2018.

To improve network reliability, the U.K. Government amended a regulation relating to safety and continuity of supply by adding an obligation which broadly requires, beginning January 31, 2009, network operators to implement a risk-based program to clear trees away from overhead lines. WPD estimates that the cost of compliance will be approximately $205 million over a 25-year period. The projected expenditures in the current regulatory period have been included in allowed revenues under the current price control review, and it is expected that expenditures beyond this five-year period will also be included in allowed revenues.

In addition to the above, WPD Midlands was not in compliance with earlier regulations pertaining to overhead line clearances as of the acquisition date. WPD Midlands expects to incur costs through 2015 to comply with these requirements that are not included in allowed revenues under the current price control review. In the three months ended September 30, 2011, WPD Midlands recorded a liability of $69 million associated with meeting these requirements as an opening balance sheet adjustment in accordance with accounting guidance for business combinations. See Note 8 for additional information.

New U.K. Pricing Model

The electricity distribution subsidiaries of WPD operate under distribution licenses and price controls granted and set by Ofgem for each of the distribution subsidiaries. The price control formula that governs allowed revenue is designed to provide economic incentives to minimize operating, capital and financing costs. The price control formula is normally determined every five years. Ofgem completed its review in December 2009 that became effective April 1, 2010 and will continue through March 31, 2015.

In October 2010, Ofgem announced a pricing model that will be effective for the U.K. electricity distribution sector beginning April 2015. The model, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. Key components of the model are: an extension of the price review period from five to eight years, increased emphasis on outputs and incentives, enhanced stakeholder engagement including network customers, a stronger incentive framework to encourage more efficient investment and innovation, expansion of the current Low Carbon Network Fund to stimulate innovation and continued use of a single weighted average cost of capital. At this time, management does not expect the impact of this pricing model to be significant to WPD's operating results.

7. Financing Activities

Credit Arrangements and Short-term Debt

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Credit facilities are maintained to enhance liquidity and provide credit support, and as a backstop to commercial paper programs, when necessary. The following credit facilities were in place at:

	September 30, 2011					December 31, 2010	
	Expiration Date	**Capacity**	**Borrowed (a)**	**Letters of Credit Issued**	**Unused Capacity**	**Borrowed (a)**	**Letters of Credit Issued**
PPL							
WPD Credit Facilities							
PPL WW Syndicated Credit Facility (b)	Jan. 2013	£ 150	£ 111	n/a	£ 39	£ 115	n/a

Total KU Credit Facilities		$ 598		$ 198	$ 400		$ 198

(a) Amounts borrowed are recorded as "Short-term debt" on the Balance Sheets.

(b) The borrowing outstanding at September 30, 2011 was a USD-denominated borrowing of $178 million, which equated to £111 million at the time of borrowing and bore interest at approximately 1.05%.

(c) In April 2011, following the completion of the acquisition of WPD Midlands, WPD (East Midlands) and WPD (West Midlands) each entered into a £300 million 5-year syndicated credit facility. Under the facilities, WPD (East Midlands) and WPD (West Midlands) each have the ability to make cash borrowings and to request the lenders to issue up to £80 million of letters of credit in lieu of borrowing. Each company pays customary commitment and utilization fees under its respective facility, and borrowings generally bear interest at LIBOR-based rates plus a spread, depending upon the respective company's senior unsecured long-term debt rating. Each credit facility contains financial covenants that require the respective company to maintain an interest coverage ratio of consolidated earnings before interest, income taxes, depreciation and amortization to interest expense of at least 3.0 to 1 and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facilities. An aggregate of $7 million in fees were incurred in connection with establishing these facilities.

(d) At September 30, 2011, the unused capacity of the WPD credit facilities was approximately $1.3 billion.

(e) All credit facilities at PPL Energy Supply, PPL Electric, LG&E and KU also apply to PPL on a consolidated basis for financial reporting purposes.

(f) The borrowings outstanding at September 30, 2011 bear interest at a weighted average rate of approximately 2.48%.

(g) In March 2011, PPL Energy Supply's $300 million Structured Credit Facility expired. PPL Energy Supply's obligations under this facility were supported by a $300 million letter of credit issued on PPL Energy Supply's behalf under a separate but related $300 million 5-year credit agreement, which also expired in March 2011.

(h) PPL Electric participates in an asset-backed commercial paper program through which PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary has pledged these assets to secure loans from a commercial paper conduit sponsored by a financial institution.

At September 30, 2011 and December 31, 2010, $253 million and $248 million of accounts receivable and $81 million and $134 million of unbilled revenue were pledged by the subsidiary under the credit agreement related to PPL Electric's and the subsidiary's participation in the asset-backed commercial paper program. Based on the accounts receivable and unbilled revenue pledged at September 30, 2011, the amount available for borrowing under the facility was limited to $86 million. PPL Electric's sale to its subsidiary of the accounts receivable and unbilled revenue is an absolute sale of assets, and PPL Electric does not retain an interest in these assets. However, for financial reporting purposes, the subsidiary's financial results are consolidated in PPL Electric's financial statements. PPL Electric performs certain record-keeping and cash collection functions with respect to the assets in return for a servicing fee from the subsidiary.

In July 2011, PPL Electric and the subsidiary extended the expiration date of the credit agreement to July 2012.

(i) All credit facilities at LG&E and KU also apply to LKE on a consolidated basis for financial reporting purposes.

(j) In June 2011, these facilities were amended such that the fees and the spreads to benchmark interest rates for borrowings depend upon the respective company's senior secured long-term debt rating rather than the senior unsecured long-term debt rating.

(k) In April 2011, KU entered into a letter of credit facility that has been used to issue letters of credit to support outstanding tax-exempt bonds. The facility contains a financial covenant requiring KU's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility. KU pays customary commitment and letter of credit fees under the new facility. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than its senior unsecured debt rating.

(l) In October 2011, PPL Energy Supply, PPL Electric, LG&E and KU each amended its respective syndicated credit facility. The amendments include extending the expiration dates from December 2014 to October 2016. Under these facilities, PPL Energy Supply, PPL Electric, LG&E and KU each continue to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

(PPL and PPL Energy Supply)

PPL Energy Supply maintains a $500 million Facility Agreement expiring June 2017, whereby PPL Energy Supply has the ability to request up to $500 million of committed letter of credit capacity at fees to be agreed upon at the time of each request, based on certain market conditions. At September 30, 2011, PPL Energy Supply had not requested any capacity for the issuance of letters of credit under this arrangement.

PPL Energy Supply, PPL EnergyPlus, PPL Montour and PPL Brunner Island maintain an $800 million secured energy marketing and trading facility, whereby PPL EnergyPlus will receive credit to be applied to satisfy collateral posting obligations related to its energy marketing and trading activities with counterparties participating in the facility. The credit amount is guaranteed by PPL Energy Supply, PPL Montour and PPL Brunner Island. PPL Montour and PPL Brunner Island have granted liens on their respective generating facilities to secure any amount they may owe under their guarantees. The facility expires in November 2015, but is subject to automatic one-year renewals under certain conditions. There were no secured obligations outstanding under this facility at September 30, 2011.

In October 2011, PPL Energy Supply re-activated its $500 million commercial paper program to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At November 4, 2011, PPL Energy Supply had $400 million of commercial paper outstanding at a weighted-average interest rate of approximately 0.51%, which was used to partially fund the repayment of PPL Energy Supply's 6.40% Senior Notes upon maturity discussed below.

(PPL and PPL Electric)

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at September 30, 2011.

(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

See Note 11 for discussion of intercompany borrowings.

2011 Bridge Facility *(PPL)*

In March 2011, concurrently and in connection with entering into the agreement to acquire WPD Midlands, PPL entered into a commitment letter with certain lenders pursuant to which the lenders committed to provide PPL with 364-day unsecured bridge financing of up to £3.6 billion solely to (i) fund the acquisition and (ii) pay certain fees and expenses in connection with the acquisition. The bridge financing commitment was subsequently syndicated to a group of banks, including the initial commitment lenders. Upon the syndication of the commitment, in March 2011, PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, entered into the £3.6 billion 2011 Bridge Facility. During the nine months ended September 30, 2011, PPL incurred $43 million of fees in connection with establishing the 2011 Bridge Facility, which is reflected in "Interest Expense" on the Statement of Income.

On April 1, 2011, concurrent with the closing of the WPD Midlands acquisition, PPL Capital Funding borrowed an aggregate of £1.75 billion and PPL WEM borrowed £1.85 billion under the 2011 Bridge Facility. Borrowings bore interest at approximately 2.62%, determined by one-month LIBOR rates plus a spread based on PPL Capital Funding's senior unsecured debt rating and the length of time from the date of the acquisition closing that borrowings were outstanding. See Note 8 for additional information on the acquisition.

In accordance with the terms of the 2011 Bridge Facility, PPL Capital Funding's borrowings of £1.75 billion were repaid with approximately $2.8 billion of proceeds received from PPL's issuance of common stock and 2011 Equity Units in April 2011, as discussed in "Long-term Debt and Equity Securities" below. In April 2011, PPL WEM repaid £650 million of its 2011 Bridge Facility borrowing. Such repayment was funded primarily with proceeds received from PPL WEM's issuance of senior notes, which is also discussed below. In May 2011, PPL WEM repaid the remaining £1.2 billion of borrowings then-outstanding under the 2011 Bridge Facility, primarily with the proceeds from senior notes issued by WPD (East Midlands) and WPD (West Midlands), as described below.

In anticipation of the repayment of a portion of the borrowings under the 2011 Bridge Facility with U.S. dollar proceeds received from PPL's issuance of common stock and 2011 Equity Units and PPL WEM's issuance of U.S. dollar-denominated senior notes, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. See Note 14 for further discussion.

Long-term Debt and Equity Securities

(PPL)

In connection with the closing of the acquisition of WPD Midlands, PPL assumed, through consolidation, £250 million of Senior Notes due 2040 (2040 Notes) previously issued by WPD (East Midlands), and £250 million of Senior Notes due 2025 (2025 Notes) previously issued by WPD (West Midlands), equating to an aggregate principal amount of approximately $800 million at the time of closing. The interest rates on the notes are subject to adjustment into June 2012 in the event of a rating change on the notes. The 2040 Notes currently bear interest at 5.75%, and the 2025 Notes currently bear interest at 6.00%. The maximum rate of interest allowable under the adjustment provisions is 6.50% for the 2040 Notes and 6.25% for the 2025 Notes. The notes may be put by the holders back to the respective issuer for redemption if the long-term credit ratings assigned to the notes by Moody's or S&P are withdrawn by either of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or material adverse change to, the distribution license under which WPD (West Midlands) and WPD (East Midlands) operate.

In April 2011, PPL issued 92 million shares of its common stock at a public offering price of $25.30 per share, for a total of $2.328 billion. Proceeds from the issuance were $2.258 billion, net of the $70 million underwriting discount. PPL also issued 19.55 million 2011 Equity Units at a stated amount per unit of $50.00 for a total of $978 million. Proceeds from the issuance were $948 million, net of the $30 million underwriting discount. PPL used the net proceeds to repay PPL Capital Funding's borrowings under the 2011 Bridge Facility, as discussed above, to pay certain acquisition-related fees and expenses and for general corporate purposes.

Each 2011 Equity Unit consists of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019 (2019 Notes).

Each 2011 Purchase Contract obligates the holder to purchase, and PPL to sell, for $50.00 a number of shares of PPL common stock to be determined by the average VWAP of PPL's common stock for the 20-trading day period ending on the third trading day prior to May 1, 2014, subject to antidilution adjustments and an early settlement upon a Fundamental Change as follows:

- if the average VWAP equals or exceeds approximately $30.99, then 1.6133 shares (a minimum of 31,540,015 shares);
- if the average VWAP is less than approximately $30.99 but greater than $25.30, a number of shares of common stock having a value, based on the average VWAP, equal to $50.00; and
- if the average VWAP is less than or equal to $25.30, then 1.9763 shares (a maximum of 38,636,665 shares).

If holders elect to settle the 2011 Purchase Contract prior to May 1, 2014, they will receive 1.6133 shares of PPL common stock, subject to antidilution adjustments and an early settlement upon a Fundamental Change.

A holder's ownership interest in the 2019 Notes is pledged to PPL to secure the holder's obligation under the related 2011 Purchase Contract. If a holder of a 2011 Purchase Contract chooses at any time no longer to be a holder of the 2019 Notes, such holder's obligation under the 2011 Purchase Contract must be secured by a U.S. Treasury security.

Each 2011 Purchase Contract also requires PPL to make quarterly contract adjustment payments at a rate of 4.43% per year on the $50.00 stated amount of the 2011 Equity Unit. PPL has the option to defer these contract adjustment payments until the 2011 Purchase Contract settlement date. Deferred contract adjustment payments will accrue additional contract adjustment payments at the rate of 8.75% per year until paid. Until any deferred contract adjustment payments have been paid, PPL may not declare or pay any dividends or distributions on, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its capital stock, subject to certain exceptions.

The 2019 Notes are fully and unconditionally guaranteed by PPL as to payment of principal and interest. The 2019 Notes initially bear interest at 4.32% and are not subject to redemption prior to May 2016. Beginning May 2016, PPL Capital Funding may, at its option, redeem the 2019 Notes, in whole but not in part, at any time, at par plus accrued and unpaid interest. The 2019 Notes are expected to be remarketed in 2014 into two tranches, such that neither tranche will have an aggregate principal amount of less than the lesser of $250 million and 50% of the aggregate principal amount of the 2019 Notes to be remarketed. One tranche will mature on or about the third anniversary of the settlement of the remarketing, and the other tranche will mature on or about the fifth anniversary of such settlement. Upon a successful remarketing, the interest rate on the 2019 Notes may be reset and the maturity of the tranches may be modified as necessary. In connection with a remarketing, PPL Capital Funding may elect with respect to each tranche, to extend or eliminate the early redemption date and/or calculate interest on the notes of a tranche on a fixed or floating rate basis. If the remarketing fails, holders of the 2019 Notes will have the right to put their notes to PPL Capital Funding on May 1, 2014 for an amount equal to the principal amount plus accrued interest.

Prior to May 2016, PPL Capital Funding may elect at one or more times to defer interest payments on the 2019 Notes for one or more consecutive interest periods until the earlier of the third anniversary of the interest payment due date and May 2016. Deferred interest payments will accrue additional interest at a rate equal to the interest rate then applicable to the 2019 Notes. Until any deferred interest payments have been paid, PPL may not, subject to certain exceptions, (i) declare or pay any dividends or distributions on, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its capital stock, (ii) make any payment of principal of, or interest or premium, if any, on, or repay, purchase or redeem any of its debt securities that upon its liquidation ranks equal with, or junior in interest to, the subordinated guarantee of the 2019 Notes by PPL as of the date of issuance and (iii) make any payments regarding any guarantee by PPL of securities of any of its subsidiaries (other than PPL Capital Funding) if the guarantee ranks equal with, or junior in interest to, the 2019 Notes as of the date of their issuance.

In the financial statements, the proceeds from the sale of the 2011 Equity Units were allocated to the 2019 Notes and the 2011 Purchase Contracts, including the obligation to make contract adjustment payments, based on the underlying fair value of each instrument at the time of issuance. As a result, the 2019 Notes were recorded at $978 million, which approximated fair value, as long-term debt. At the time of issuance, the present value of the contract adjustment payments of $123 million was recorded to other liabilities, representing the obligation to make contract adjustment payments, with an offsetting reduction to additional paid-in capital for the issuance of the 2011 Purchase Contracts, which approximated the fair value of each. The liability is being accreted through interest expense over the three-year term of the 2011 Purchase Contracts. The initial valuation of the contract adjustment payments is considered a non-cash transaction that is excluded from the Statement of Cash Flows in 2011. Costs to issue the 2011 Equity Units were primarily allocated on a relative cost basis, resulting in $25 million being recorded to "Additional paid-in capital" and $6 million being recorded to "Other noncurrent assets". See Note 4 for EPS considerations related to the 2011 Purchase Contracts.

Also in April 2011, PPL WEM issued $460 million of 3.90% Senior Notes due 2016 (2016 Notes) and $500 million of 5.375% Senior Notes due 2021 (2021 Notes). The 2016 Notes may be redeemed any time prior to maturity at PPL WEM's option at make-whole redemption prices. The 2021 Notes may be redeemed at PPL WEM's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. PPL WEM received proceeds of $953 million, net of discounts and underwriting fees, from the combined issuance of the notes. The net proceeds were used to repay a portion of PPL WEM's borrowing under the 2011 Bridge Facility as discussed above. In connection with the issuance of the senior notes, PPL WEM, through PPL, entered into cross currency interest rate swaps for the entire aggregate principal amount of each series of notes in order to hedge PPL WEM's risk of variability in the GBP functional currency equivalent cash flows related to its U.S. dollar interest and principal payments on the notes.

In May 2011, WPD (West Midlands) issued £800 million of 5.75% Senior Notes due 2032 (2032 Notes) and WPD (East Midlands) issued £600 million of 5.25% Senior Notes due 2023 (2023 Notes). WPD (West Midlands) and WPD (East Midlands) collectively received proceeds of £1.4 billion, which equated to $2.2 billion at the time of issuance, net of discounts and underwriting fees, from the combined debt issuances. A portion of the net proceeds were dividended to PPL WEM and used to repay the remaining balance of PPL WEM's borrowing under the 2011 Bridge Facility in May 2011 as discussed above. The balance of the net proceeds have been or will be used to pre-fund certain capital expenditures and for other general corporate purposes.

In June 2011, WPD (East Midlands) issued £100 million of Index-Linked Notes due 2043 (2043 Notes). The principal amount of the 2043 Notes is adjusted based on changes in a specified index, as detailed in the terms of the notes. WPD (East Midlands) received proceeds of £99 million, which equated to $163 million at the time of issuance, net of discounts and underwriting fees, from the issuance of the 2043 Notes. The majority of the net proceeds were used to repay short-term debt.

The 2032 Notes, the 2023 Notes, and the 2043 Notes may be put by the holders back to the respective issuer for redemption if the long-term credit ratings assigned to the notes by Moody's or S&P are withdrawn by either of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or material adverse change to, the distribution license under which WPD (West Midlands) and WPD (East Midlands) operate.

(PPL and PPL Energy Supply)

In July 2011, PPL Energy Supply redeemed at par the entire $250 million aggregate principal amount of its 7.00% Senior Notes due 2046. PPL Energy Supply recorded a loss of $7 million, which is reflected in "Interest Expense" on the Statements of Income for 2011, as a result of accelerating the amortization of deferred financing fees in connection with the redemption.

In November 2011, PPL Energy Supply repaid the entire $500 million principal amount of its 6.40% Senior Notes upon maturity.

(PPL and PPL Electric)

In July 2011, PPL Electric issued $250 million of 5.20% First Mortgage Bonds due 2041. The bonds may be redeemed at PPL Electric's option at make-whole redemption prices until the date six months prior to maturity and at par thereafter. PPL Electric received proceeds of $246 million, net of discounts and underwriting fees. The net proceeds have been or will be used for capital expenditures and other general corporate purposes.

Also in July 2011, PPL Electric redeemed the entire $400 million aggregate principal amount of its 7.125% Senior Secured Bonds due 2013 for $458 million, plus accrued interest. PPL Electric recorded a regulatory asset for the redemption premium and unamortized financing costs associated with this debt. See Note 6 for additional information.

In August 2011, PPL Electric issued $400 million of 3.00% First Mortgage Bonds due 2021. The bonds may be redeemed at PPL Electric's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. PPL Electric received proceeds of $394 million, net of discounts and underwriting fees. The net proceeds were used to repay $250 million of short-term debt and to replenish cash used to redeem the 7.125% Senior Secured Bonds due 2013 in July 2011, as discussed above.

(PPL and LKE)

In September 2011, LKE issued $250 million of 4.375% Senior Notes due 2021. The notes were issued in a private offering to qualified institutional buyers and other transactions not subject to registration requirements under the Securities Act of 1933. In connection with the issuance, LKE entered into a registration rights agreement with representatives of the initial purchasers of the notes, pursuant to which LKE agreed to file, by late April 2012, a registration statement to exchange such notes for securities containing substantially identical terms (except for certain transfer restrictions), or in certain cases to file, by late April 2012, a registration statement covering resale of the notes. LKE also agreed, under its registration rights agreement, to (i) use its commercially reasonable efforts to cause the registration statement to be declared effective under the Securities Act by late July 2012 and (ii) upon effectiveness of the registration statement, take certain actions to promptly exchange the notes or, in the case of a registration statement covering resale of the notes, keep the registration statement effective until no later than late September 2012. Pursuant to the registration rights agreement, LKE may be required to pay liquidated damages if it does not meet certain requirements under its registration rights agreement. Liquidated damages will generally accrue with respect to the principal amount of the notes at a rate of 0.25% per annum for the first 90 days from and including the date on which a default specified under the registration rights agreement occurs, and increase by an additional 0.25% per annum thereafter, provided that the liquidated damages rate shall not at any time exceed 0.50% per annum.

Liquidated damages will cease to accrue when all registration defaults under the registration rights agreement have been cured, or if earlier, upon the redemption by the issuer or maturity of the notes.

The notes may be redeemed at LKE's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. LKE received proceeds of $248 million, net of discounts and underwriting fees. The net proceeds have been used to make a return of capital to PPL.

(PPL, LKE, LG&E and KU)

In April 2011, LKE, LG&E and KU each filed 2011 Registration Statements with the SEC, as agreed in registration rights agreements entered into in connection with the issuances of senior notes (in the case of LKE) and first mortgage bonds (in the case of LG&E and KU) in November 2010 in transactions not registered under the Securities Act of 1933. See Note 7 in PPL's 2010 Form 10-K for additional information on the original debt issuances. The 2011 Registration Statements relate to offers by the respective issuers to exchange the senior notes and first mortgage bonds issued in November 2010 with similar but registered securities. The 2011 Registration Statements became effective in June 2011, and the exchanges were completed in July 2011, with substantially all of LKE's senior notes and LG&E's and KU's first mortgage bonds being exchanged.

(PPL, LKE and LG&E)

In January 2011, LG&E remarketed $163 million of variable rate tax-exempt revenue bonds, which were issued on its behalf by Louisville/Jefferson County, Kentucky, to unaffiliated investors in a term rate mode, bearing interest at 1.90% into 2012. At December 31, 2010, such bonds were held by LG&E and reflected as "Short-term investments" on the Balance Sheet. The proceeds from the remarketing were used to repay a $163 million borrowing under LG&E's syndicated credit facility.

Legal Separateness

(PPL, PPL Energy Supply, PPL Electric and LKE)

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of PPL Energy Supply, PPL Electric and LKE are each separate legal entities. These subsidiaries are not liable for the debts of PPL Energy Supply, PPL Electric and LKE. Accordingly, creditors of PPL Energy Supply, PPL Electric and LKE may not satisfy their debts from the assets of their subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL Energy Supply, PPL Electric and LKE are not liable for the debts of their subsidiaries, nor are their subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of PPL Energy Supply, PPL Electric and LKE (or their other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions and Capital Contributions

(PPL)

In August 2011, PPL declared its quarterly common stock dividend, payable October 1, 2011, at 35.0 cents per share (equivalent to $1.40 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

During the nine months ended September 30, 2011 the following distributions and capital contributions occurred:

	PPL Energy Supply		PPL Electric		LKE		LG&E		KU
Dividends/distributions paid to parent/member	$	209 (a)	$	76	$	469	$	55	$	88
Capital contributions received from parent/member		361		56						

(a) In addition to the cash distributions paid, in January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent company, PPL Energy Funding. See Note 8 for additional information.

8. Acquisitions, Development and Divestitures

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL continuously evaluates potential acquisitions, divestitures and development projects as opportunities arise or are identified. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results. See below for information on PPL's acquisitions of WPD Midlands and LKE, PPL Energy Supply's distribution of its membership interest in PPL Global to its parent, PPL Energy Funding, that was presented as discontinued operations by PPL Energy Supply and the sales of businesses that were presented as discontinued operations by PPL and PPL Energy Supply.

Acquisitions

Acquisition of WPD Midlands *(PPL)*

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. The consideration for the acquisition consisted of cash of $5.8 billion, including the repayment of $1.7 billion of affiliate indebtedness owed to subsidiaries of E.ON AG, and approximately $800 million of long-term debt assumed through consolidation. WPD Midlands' regulated distribution operations serve five million end users in the Midlands area of England. The acquisition increases the regulated portion of PPL's business and enhances rate-regulated growth opportunities as the regulated businesses make investments to improve infrastructure and customer reliability. Further, the service territories of WPD (South Wales), WPD (South West) and WPD Midlands are contiguous and cost savings, efficiencies and other benefits are expected from the combined operations.

The fair value of the consideration paid for Central Networks was as follows (in billions):

Aggregate enterprise consideration	$	6.6
Less: fair value of long-term debt outstanding assumed through consolidation		0.8
Total cash consideration paid		5.8
Less: funds made available to Central Networks to repay pre-acquisition affiliate indebtedness		1.7
Cash consideration paid for Central Networks' outstanding ordinary share capital	$	4.1

The total cash consideration paid was primarily funded by borrowings under the 2011 Bridge Facility on the date of acquisition. Subsequently, PPL repaid the borrowings under the 2011 Bridge Facility using proceeds from the permanent financing, including April 2011 issuances of common stock and 2011 Equity Units, and proceeds from the issuance of debt by PPL WEM, WPD (East Midlands) and WPD (West Midlands) in the second quarter of 2011. See Note 7 for additional information on the 2011 Bridge Facility and permanent financing.

Preliminary Purchase Price Allocation

The following table summarizes (in billions) the preliminary allocation of the purchase price to the fair value of the major classes of assets acquired and liabilities assumed.

Current assets (a)	$	0.2
PP&E		4.9
Intangible assets (b)		0.1
Other noncurrent assets		0.1
Current liabilities (c) (d)		(0.5)
PPL WEM affiliate indebtedness		(1.7)
Long-term debt (current and noncurrent) (c)		(0.8)
Other noncurrent liabilities (c) (d)		(0.6)
Net identifiable assets acquired		1.7
Goodwill		2.4
Net assets acquired	$	4.1

(a) Includes gross contractual amount of the accounts receivable acquired of $119 million, which approximates fair value.
(b) Intangible assets recorded include $88 million of easements, which have an indefinite life, and $11 million of customer contracts, which have a weighted-average amortization period of 10 years.
(c) Represents non-cash activity excluded from the Statement of Cash Flows for the nine months ended September 30, 2011.
(d) In the third quarter of 2011, the preliminary purchase price allocation, as of the acquisition date, was adjusted to record a $77 million liability primarily for costs expected to be paid in order for WPD Midlands to become compliant with regulations pertaining to overhead line clearances. See Note 6 for additional information.

The purchase price allocation is preliminary and could change materially in subsequent periods. The preliminary purchase price allocation was based on PPL's best estimates using information obtained as of the reporting date. Any changes to the purchase price allocation during the measurement period, which can extend up to one year from the date of acquisition, that result in material changes to the consolidated financial results will be adjusted retrospectively. The final purchase price allocation is expected to be completed before the end of 2011. The items pending finalization include, but are not limited to, the valuation of PP&E, intangible assets including goodwill, defined benefit plans, certain liabilities and income tax-related matters.

The preliminary purchase price allocation resulted in goodwill of $2.4 billion that was assigned to the International Regulated segment. This reflects the expected continued growth of a rate-regulated business with a defined service area operating under a constructive regulatory framework, expected cost savings, efficiencies and other benefits resulting from a contiguous service area with WPD (South West) and WPD (South Wales) and the ability to leverage WPD (South West)'s and WPD (South Wales)'s existing management team's high level of performance in capital cost efficiency, system reliability and customer service. The goodwill is not deductible for U.K. income tax purposes.

Separation Benefits - International Regulated Segment

In connection with the acquisition of WPD Midlands, PPL initiated a reorganization designed to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales). The reorganization, which is expected to be completed in 2012, is intended to transition WPD Midlands from a functional structure to a regional structure that will require a smaller combined support structure, reduce duplication and implement more efficient procedures. Approximately 740 employees of WPD Midlands will receive separation benefits from the companies as a result of the reorganization.

The separation benefits, before income taxes, associated with the reorganization are as follows:

Severance compensation	$	58
Early retirement deficiency costs (ERDC) under applicable pension plans		43
Outplacement services		1
Total separation benefits	$	102

WPD Midlands recorded $84 million of the total expected separation benefits in the three and nine months ended September 30, 2011, of which $41 million relates to severance compensation and $43 million relates to ERDC. WPD Midlands expects to record the remaining portion of severance compensation, based on the expected timing of when employees will separate from the companies, as follows: an estimated $6 million in the fourth quarter of 2011 and an estimated $11 million in 2012. The separation benefits recorded in the three and nine months ended September 30, 2011 are included in "Other operation and maintenance" on the Statement of Income. The accrued severance compensation is reflected in "Other current liabilities" and the ERDC reduced "Other noncurrent assets" on the Balance Sheet at September 30, 2011.

These amounts do not include $9 million recorded in the nine months ended September 30, 2011 for ERDC payable under applicable pension plans and severance compensation for certain employees who separated from the WPD Midlands companies, but were not part of the reorganization. These separation benefits are also included in "Other operation and maintenance" on the Statement of Income.

Pro forma Information

The actual WPD Midlands operating revenues, net income and net income excluding nonrecurring acquisition-related adjustments (which are recorded on a one-month lag) included in PPL's Statement of Income and included in the International Regulated segment, for both periods ended September 30, 2011 were as follows.

	Three Months	Nine Months
Operating revenues	$ 292	$ 499
Net Income	56	63
Net Income - excluding nonrecurring acquisition-related adjustments	118	183

The pro forma operating revenues and net income attributable to PPL for the periods ended September 30, which includes LKE as if the acquisition had occurred January 1, 2009 and WPD Midlands as if the acquisition had occurred January 1, 2010, are as follows.

	Three Months		Nine Months	
	2011	2010	2011	2010
Operating Revenues - PPL consolidated pro forma	$ 3,115	$ 3,149	$ 8,905	$ 9,500
Net Income Attributable to PPL - PPL consolidated pro forma	497	489	1,306	1,062

The pro forma financial information presented above has been derived from the historical consolidated financial statements of PPL and LKE, which was acquired on November 1, 2010, and from the historical combined financial statements of WPD Midlands. Income (loss) from discontinued operations (net of income taxes), which was not significant for the three and nine months ended September 30, 2011 and which was $(53) million and $(40) million for the three and nine months ended September 30, 2010, was excluded from the pro forma amounts above.

The pro forma adjustments include adjustments to depreciation, net periodic pension costs, interest expense, nonrecurring adjustments and the related income tax effects. Nonrecurring adjustments include the following pre-tax credits (expenses):

	Income Statement Line Item	Three Months 2011	Three Months 2010	Nine Months 2011	Nine Months 2010
WPD Midlands acquisition					
2011 Bridge Facility costs	Interest Expense			$ (43)	
Foreign currency loss on 2011 Bridge Facility	Other Income (Expense) - net			(57)	
Net hedge gains	Other Income (Expense) - net			55	
Hedge ineffectiveness	Interest Expense			(12)	
U.K. stamp duty tax	Other Income (Expense) - net			(21)	
Separation benefits	Other operation and maintenance	$ (86)		(92)	
Other acquisition-related costs	(a)	2		(45)	
LKE acquisition					
2010 Bridge Facility costs	Interest Expense		$ (45)		$ (67)
Other acquisition-related costs	Other Income (Expense) - net		(4)		(11)

(a) Primarily includes advisory, accounting and legal fees recorded in "Other Income (Expense) - net."

Acquisition of LKE *(PPL, LKE, LG&E and KU)*

See Notes 1 and 10 in PPL's 2010 Form 10-K and Note 2 in the annual financial statements included in the 2011 Registration Statements (in the case of LKE, LG&E and KU) for information on PPL's November 2010 acquisition of LKE.

Pending Bluegrass Plant Acquisition *(PPL, LKE, LG&E and KU)*

In September 2011, LG&E and KU entered into an Asset Purchase Agreement (APA) with Bluegrass Generation Company, L.L.C. for the purchase of three existing natural gas simple cycle combustion units in LaGrange, Kentucky, aggregating approximately 495 MW, plus limited associated contractual arrangements required for operation of the plant (collectively, the Bluegrass Plant), for a purchase price of $110 million. Pursuant to the APA, LG&E and KU will jointly acquire the Bluegrass Plant as tenants in common, with LG&E as owner of a 69% undivided interest, and KU as owner of a 31% undivided interest, in the purchased assets. The purchase is subject to receipt of approvals from the KPSC, the VSCC, the FERC, certain permit assignments or local approvals, and other conditions. Either party can terminate the APA should a closing of the purchase transaction fail to have occurred by June 30, 2012.

Development

(PPL, LKE, LG&E and KU)

NGCC Construction

In September 2011, LG&E and KU requested KPSC approval to build a 640 MW NGCC at the existing Cane Run site in Kentucky. Once all approvals are received, construction on an NGCC at Cane Run is expected to begin in 2012, with construction expected to be complete by 2016. This project is also subject to regulatory approval from the VSCC. The project has an expected cost of $583 million, which includes costs of building a natural gas supply pipeline. See Note 6 for additional information.

In conjunction with this request, LG&E and KU anticipate retiring three older coal-fired electric generating stations to meet new, stricter federal EPA regulations. These stations include Cane Run, Tyrone and Green River, which have a combined summer rating of 797 MW. The Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed.

TC2

In January 2011, LKE began dispatching electricity from TC2 to meet customer demand. See Note 10 in this Form 10-Q, Notes 8 and 15 in PPL's 2010 Form 10-K and Note 13 in the annual financial statements included in the 2011 Registration Statements (in the case of LKE, LG&E and KU) for additional information.

(PPL and PPL Energy Supply)

Susquehanna Uprate Project

In 2008, PPL Susquehanna received NRC approval for its request to increase the generation capacity of the Susquehanna nuclear plant. The project was completed in phases over several years. PPL Susquehanna's share of the total expected capacity increase was approximately 195 MW. The final phase of the project, a 50 MW Unit 2 uprate, was completed in the third quarter of 2011.

Bell Bend COLA

The NRC continues to review the COLA submitted by a PPL Energy Supply subsidiary for the proposed Bell Bend nuclear generating unit to be built adjacent to the Susquehanna plant. PPL has made no decision to proceed with construction of Bell Bend and expects that such decision will not be made for several years given the anticipated lengthy NRC license approval process. Additionally, PPL has announced that it does not expect to proceed with construction absent favorable economics, a joint arrangement with other interested parties and a federal loan guarantee or other acceptable financing. PPL and its subsidiaries are currently authorized by PPL's Board of Directors to spend up to $144 million on the COLA and other permitting costs (including land costs) necessary for construction. At September 30, 2011 and December 31, 2010, $124 million and $109 million of costs associated with the licensing application were capitalized and are included on the Balance Sheets in noncurrent "Other intangibles." PPL believes it is probable that these costs are ultimately recoverable following NRC approval of the COLA either through construction of the new nuclear unit, transfer of the COLA rights to a joint venture, or sale of the COLA rights to another party. The PPL Energy Supply subsidiary remains active in the DOE Federal loan guarantee application process. See Note 8 in PPL's 2010 Form 10-K and Note 5 in PPL Energy Supply's Form 8-K dated June 24, 2011 for additional information.

(PPL and PPL Electric)

Susquehanna-Roseland Transmission Line

PPL Electric has experienced delays in obtaining necessary National Park Service approvals for the Susquehanna-Roseland transmission line and anticipates a delay of the line's in-service date to 2015. In the first quarter of 2011, PJM issued an updated assessment of the new line within its 2010 Regional Transmission Expansion Plan, which confirms that the line is needed by 2012 to prevent overloads on other power lines in the region. PJM has developed a strategy to manage potential reliability problems until the line is built. In October 2011, the project was placed on the initial list of projects for the Rapid Response Team for Transmission (RRTT), an initiative of the White House to facilitate coordination among federal agencies to improve the overall quality and timeliness of electric transmission infrastructure permitting, review and consultation. The National Park Service record of decision for the project is scheduled to be issued on October 1, 2012. PPL Electric cannot predict what additional actions, if any, PJM might take in the event of a continued delay to its scheduled in-service date for the new line. See Note 8 in each Registrant's 2010 Form 10-K for additional information.

Discontinued Operations

(PPL and PPL Energy Supply)

Sale of Certain Non-core Generation Facilities

In March 2011, PPL Energy Supply subsidiaries completed the sale of their ownership interests in certain non-core generation facilities, which were included in the Supply segment, for $381 million. The transaction included the natural gas-fired facilities in Wallingford, Connecticut and University Park, Illinois and an equity interest in Safe Harbor Water Power Corporation, which owns a hydroelectric facility in Conestoga, Pennsylvania. In connection with the completion of the sale, PPL Energy Supply recorded insignificant losses in the first and second quarters of 2011.

These non-core generation facilities met the held for sale criteria in the third quarter of 2010. As a result, assets with a carrying amount of $473 million were written down to their estimated fair value (less cost to sell) of $377 million at September 30, 2010, resulting in a pre-tax impairment charge of $96 million ($58 million after tax). In addition, $5 million ($4 million after tax) of allocated goodwill was written off in the third quarter of 2010. These charges are included in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statement of Income for the three and nine months ended September 30, 2010.

Following are the components of Discontinued Operations in the Statements of Income for the periods ended September 30.

	Three Months		Nine Months	
	2011	2010	2011	2010
Operating revenues		$ 34	$ 19	$ 91
Operating expenses (a)		118	11	147
Operating income (loss)		(84)	8	(56)
Other income (expense) - net		1		2
Interest expense (b)		2	3	5
Income before income taxes		(85)	5	(59)
Income tax expense		(32)	3	(21)
Income (Loss) from Discontinued Operations		$ (53)	$ 2	$ (38)

(a) 2010 includes the impairment to the carrying value of the generation facilities being sold and the write-off of allocated goodwill.
(b) Represents allocated interest expense based upon debt attributable to the generation facilities sold.

Upon completion of the sale, assets primarily consisting of $357 million of PP&E and a $14 million equity method investment, which were classified as held for sale at December 31, 2010, were removed from the Balance Sheet.

Sale of Long Island Generation Business

In February 2010, PPL Energy Supply subsidiaries completed the sale of the Long Island generation business, which was included in the Supply segment. The definitive sales agreement included provisions that reduced the $135 million purchase price monthly, commencing September 1, 2009. After adjusting for these price-reduction provisions, proceeds from the sale approximated $124 million. There was no significant impact on earnings in the nine months ended September 30, 2010 from the operation of this business or as a result of this sale.

Distribution of Membership Interest in PPL Global to Parent *(PPL Energy Supply)*

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global, which represented the entire International Regulated segment, to PPL Energy Supply's parent, PPL Energy Funding. The distribution was made based on the book value of the assets and liabilities of PPL Global with financial effect as of January 1, 2011, and no gains or losses were recognized on the distribution. The purpose of the distribution was to better align PPL's organizational structure with the manner in which it manages these businesses, separating the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business. Following the distribution, PPL Energy Supply operates in a single business segment, and through its subsidiaries is primarily engaged in the generation and marketing of power, primarily in the northeastern and northwestern U.S.

Following are the components of Discontinued Operations in the Statement of Income for the periods ended September 30, 2010.

	Three Months	Nine Months
Operating revenues	$ 172	$ 563
Operating expenses	84	260
Operating income	88	303
Other income (expense) - net		2
Interest expense (a)	37	101
Income before income taxes	51	204
Income tax expense	(55)	(23)
Income (Loss) from Discontinued Operations	$ 106	$ 227

(a) No interest was allocated, as PPL Global is sufficiently capitalized.

In connection with the distribution, the following assets and liabilities were removed from PPL Energy Supply's Balance Sheet in the first quarter of 2011. Except for "Cash and cash equivalents," which has been reflected as a financing activity, the remaining distribution represents a non-cash transaction excluded from PPL Energy Supply's Statement of Cash Flows for the nine months ended September 30, 2011.

Cash and cash equivalents	$ 325
Accounts receivable	46
Unbilled revenues	70
Other current assets	21
PP&E, net	3,502
Goodwill	679
Other intangibles	80
Other noncurrent assets	77
Total Assets	4,800
Short-term debt	181
Accounts payable	86
Accrued interest	71
Other current liabilities	112
Long-term debt	2,313
Deferred income tax liabilities - noncurrent	399
Accrued pension obligations	320
Other deferred credits and noncurrent liabilities	30
Total Liabilities	3,512
Net assets distributed	$ 1,288

9. Defined Benefits

(PPL, PPL Energy Supply, LKE and LG&E)

Following are the net periodic defined benefit costs (credits) of the plans sponsored by the registrants for the periods ended September 30:

	Pension Benefits							
	Three Months				Nine Months			
	U.S.		U.K.		U.S.		U.K.	
	2011	2010	2011	2010	2011	2010	2011	2010
PPL

(PPL Energy Supply)

See Note 8 for information on PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, PPL Energy Funding, which included associated accrued pension obligations.

(PPL Energy Supply and PPL Electric)

In addition to the specific plans it sponsors, PPL Energy Supply and its subsidiaries are allocated costs of PPL Services- sponsored defined benefit plans, which management believes are reasonable, based on their participation in those plans. PPL Electric does not directly sponsor any defined benefit plans. PPL Electric is allocated costs of PPL Services-sponsored defined benefit plans, which management believes are reasonable, based on its participation in those plans. PPL Services allocated the following net periodic benefit costs to PPL Energy Supply and PPL Electric, including amounts applied to accounts that are further distributed between capital and expense for the periods ended September 30.

	Three Months		Nine Months	
	2011	2010	2011	2010
PPL Energy Supply	$ 8	$ 7	$ 23	$ 25
PPL Electric	6	7	18	21

(LG&E and KU)

In addition to the specific plan it sponsors, LG&E is allocated costs of LKE-sponsored defined benefit plans, which management believes are reasonable, based on its participation in those plans. KU does not directly sponsor any defined benefit plans. KU is allocated costs of LKE-sponsored defined benefit plans, which management believes are reasonable, based on its participation in those plans. LKE allocated the following net periodic benefit costs to LG&E and KU, including amounts applied to accounts that are further distributed between capital and expense for the periods ended September 30.

	Three Months		Nine Months	
	2011	2010	2011	2010
	Successor	Predecessor	Successor	Predecessor
LG&E	$ 6	$ 5	$ 17	$ 16
KU	9	8	27	25

Expected Cash Flows - U.K. Pension Plans

(PPL)

During 2011, WPD updated its expected pension contributions for 2011 to $111 million from the $15 million expected contributions disclosed in PPL's 2010 Form 10-K. The updated contributions reflect $27 million of contributions required to fund the acquired WPD Midlands' plan and $69 million of increased PPL WW contributions to prepay future contribution requirements to fund pension plan deficits. As of September 30, 2011, WPD had contributed $102 million to its plans.

In addition, during 2011 WPD Midlands expects to contribute $43 million to fund the early retirement deficiency costs provided as part of the reorganization of WPD Midlands. See Note 8 for additional information.

Health Care Reform *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

In March 2010, Health Care Reform was signed into law. Many provisions of Health Care Reform do not take effect for an extended period of time, and most will require the publication of implementing regulations and/or issuance of program guidelines.

Beginning in 2013, provisions within Health Care Reform eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage. As a result, in the first quarter of 2010, PPL and its subsidiaries recorded the following adjustments and will continue to monitor the potential impact of any changes to the existing provisions and implementation guidance related to Health Care Reform on their benefit programs.

(PPL, PPL Energy Supply, PPL Electric)

- PPL decreased deferred tax assets by $13 million, increased regulatory assets by $9 million, increased deferred tax liabilities by $4 million and recorded income tax expense of $8 million;
- PPL Energy Supply decreased deferred tax assets by $5 million and recorded income tax expense of $5 million; and
- PPL Electric decreased deferred tax assets by $5 million, increased regulatory assets by $9 million and increased deferred tax liabilities by $4 million.

(LKE, LG&E and KU)

- LKE and KU recorded insignificant amounts as a result of this enactment. LG&E was not impacted.

10. Commitments and Contingencies

Energy Purchase Commitments

(PPL, LKE, LG&E and KU)

LG&E and KU have a power purchase agreement with OVEC, extended in February 2011 to June 2040. FERC approval of the extension was received in May 2011, followed by KPSC and VSCC approvals in August 2011. Pursuant to the OVEC power purchase contract, LG&E and KU are responsible for their pro-rata share of certain obligations of OVEC under defined circumstances. These potential liabilities include unpaid OVEC indebtedness as well as shortfall amounts in certain excess decommissioning costs and other post-employment and post-retirement benefit costs other than pension. LKE's proportionate share of OVEC's outstanding debt was $113 million at September 30, 2011, consisting of LG&E's share of $78 million and KU's share of $35 million. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses as follows:

	LG&E	KU	Total
2012	$ 19	$ 9	$ 28
2013	20	9	29
2014	20	9	29
2015	21	9	30
2016	21	9	30
Thereafter	628	279	907
	$ 729	$ 324	$ 1,053

In addition, LG&E and KU had total energy purchases under the OVEC power purchase agreement for the three and nine months ended September 30, as follows:

(PPL, LKE, LG&E and KU)

	2011	
	Successor	
	Three Months	Nine Months
LG&E	$ 6	$ 18
KU	3	8
Total	$ 9	$ 26

(LKE, LG&E and KU)

	2010	
	Predecessor	
	Three Months	Nine Months
LG&E	$ 5	$ 15
KU	2	7
Total	$ 7	$ 22

(PPL and PPL Electric)

In 2009, the PUC approved PPL Electric's procurement plan for the period January 2011 through May 2013. Through October 2011, PPL Electric has conducted nine of its 14 planned competitive solicitations. The solicitations include a mix of long-term and short-term purchases ranging from five months to ten years to fulfill PPL Electric's obligation to provide for customer supply as a PLR. See Note 6 for a discussion of the default service supply procurement provisions of Act 129.

Legal Matters

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL and its subsidiaries are involved in legal proceedings, claims and litigation in the ordinary course of business.

(PPL, LKE, LG&E and KU)

TC2 Construction

In June 2006, LG&E and KU, as well as the Indiana Municipal Power Agency and Illinois Municipal Electric Agency (collectively, TC2 Owners), entered into a construction contract regarding the TC2 project. The contract is generally in the form of a turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price. During 2009 and 2010, the TC2 Owners received several contractual notices from the TC2 construction contractor asserting historical force majeure and excusable event claims for a number of adjustments to the contract price, construction schedule, commercial operations date, liquidated damages or other relevant provisions. In September 2010, the TC2 Owners and the construction contractor agreed to a settlement to resolve the force majeure and excusable event claims occurring through July 2010, under the TC2 construction contract, which settlement provided for a limited, negotiated extension of the contractual commercial operations date and/or relief from liquidated damage calculations. With limited exceptions, the TC2 Owners took care, custody and control of TC2 in January 2011. Pursuant to certain amendments to the construction agreement, the contractor will complete modifications to the combustion system prior to certain dates to allow operation of TC2 on all specified fuels categories. The provisions of the construction agreement relating to liquidated damages were also amended. In September 2011, the TC2 Owners and the construction contractor entered into a further amendment to the construction agreement settling, among other matters, certain historical change order, labor rate and prior liquidated damages amounts. The remaining issues are still under discussion with the contractor. PPL, LKE, LG&E and KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project.

TC2 Transmission

LG&E's and KU's CPCN and condemnation rights relating to a transmission line associated with the TC2 construction have been challenged by certain property owners in Hardin County, Kentucky. Certain proceedings relating to CPCN challenges and federal historic preservation permit requirements have concluded with outcomes in LG&E's and KU's favor. With respect to the remaining issues in dispute, during 2008 KU obtained various successful rulings at the Hardin County Circuit Court confirming its condemnation rights. In August 2008, several landowners appealed such rulings to the Kentucky Court of Appeals. In May 2010, the Kentucky Court of Appeals issued an Order affirming the Hardin Circuit Court's finding that KU had the right to condemn easements on the properties. In May 2010, the landowners filed a petition for reconsideration with the Kentucky Court of Appeals. In July 2010, the Kentucky Court of Appeals denied that petition. In August 2010, the landowners filed for discretionary review of that denial by the Kentucky Supreme Court. In March 2011, the Kentucky Supreme Court issued an order declining the discretionary review request, thus closing this matter.

Argentina Matters *(LKE, LG&E and KU)*

In connection with an administrative proceeding alleging a violation by a former Argentine subsidiary under that country's 2002-2003 emergency currency exchange laws, claims were brought against the subsidiary's then directors, including two individuals who are executive officers of LKE, in a specialized Argentine financial criminal court. Under applicable Argentine laws, directors of a local company may be liable for monetary penalties for a subject company's violations of the currency laws. In February 2011, the Argentine court issued an order acquitting the former subsidiary and its directors of all claims, which order has become final.

(PPL and PPL Energy Supply)

Spent Nuclear Fuel Litigation

Federal law requires the U.S. government to provide for the permanent disposal of commercial spent nuclear fuel, but there is no definitive date by which a repository will be operational. As a result, it was necessary to expand Susquehanna's on-site spent fuel storage capacity. To support this expansion, PPL Susquehanna contracted for the design and construction of a spent fuel storage facility employing dry cask fuel storage technology. The facility is modular, so that additional storage capacity can be added as needed. The facility began receiving spent nuclear fuel in 1999. PPL Susquehanna estimates that there is sufficient storage capacity in the spent nuclear fuel pools and the on-site dry cask storage facility at Susquehanna to accommodate spent fuel discharged through approximately 2017 under current operating conditions. If necessary, on-site dry cask storage capability can be expanded, assuming appropriate regulatory approvals are obtained, such that, together, the spent fuel pools and the expanded dry fuel storage facilities will accommodate all of the spent fuel expected to be discharged through the current licensed life of each unit, 2042 for Unit 1 and 2044 for Unit 2.

In 1996, the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court) ruled that the Nuclear Waste Policy Act imposed on the DOE an unconditional obligation to begin accepting spent nuclear fuel on or before January 31, 1998. In 1997, the D.C. Circuit Court ruled that the contracts between the utilities and the DOE provide a potentially adequate remedy if the DOE failed to begin accepting spent nuclear fuel by January 31, 1998. The DOE did not, in fact, begin to accept spent nuclear fuel by that date. The DOE continues to contest claims that its breach of contract resulted in recoverable damages. In January 2004, PPL Susquehanna filed suit in the U.S. Court of Federal Claims for unspecified damages suffered as a result of the DOE's breach of its contract to accept and dispose of spent nuclear fuel. In May 2011, the parties entered into a settlement agreement which resolved all claims of PPL Susquehanna through December 2013. Under the settlement agreement, PPL Susquehanna received $50 million for its share of claims to recover costs to store spent nuclear fuel at the Susquehanna station through September 30, 2009, and recognized a credit to "Fuel" expense in the second quarter of 2011. PPL Susquehanna also will be eligible to receive payment of annual claims for allowed costs, as set forth in the settlement agreement, that are incurred thereafter through the December 31, 2013 termination date of the settlement agreement. In exchange, PPL Susquehanna has waived any claims against the United States government for costs paid or injuries sustained related to storing spent nuclear fuel at the Susquehanna plant through December 31, 2013.

Montana Hydroelectric Litigation

In November 2004, PPL Montana, Avista Corporation (Avista) and PacifiCorp commenced an action for declaratory judgment in Montana First Judicial District Court seeking a determination that no lease payments or other compensation for their hydroelectric facilities' use and occupancy of certain riverbeds in Montana can be collected by the State of Montana. This lawsuit followed dismissal on jurisdictional grounds of an earlier federal lawsuit seeking such compensation in the U.S. District Court of Montana. The federal lawsuit alleged that the beds of Montana's navigable rivers became state-owned trust property upon Montana's admission to statehood, and that the use of them should, under a 1931 regulatory scheme enacted after all but one of the hydroelectric facilities in question were constructed, trigger lease payments for use of land beneath. In July 2006, the Montana state court approved a stipulation by the State of Montana that it was not seeking compensation for the period prior to PPL Montana's December 1999 acquisition of the hydroelectric facilities.

Following a number of adverse trial court rulings, in 2007 Pacificorp and Avista each entered into settlement agreements with the State of Montana providing, in pertinent part, that each company would make prospective lease payments for use of the State's navigable riverbeds (subject to certain future adjustments), resolving the State's claims for past and future compensation.

Following an October 2007 trial of this matter on damages, in June 2008, the Montana District Court awarded the State retroactive compensation of approximately $35 million for the 2000-2006 period and approximately $6 million for 2007 compensation. Those unpaid amounts continue to accrue interest at 10% per year. The Montana District Court also deferred determination of compensation for 2008 and future years to the Montana State Land Board. In October 2008, PPL Montana appealed the decision to the Montana Supreme Court, requesting a stay of judgment and a stay of the Land Board's authority to assess compensation for 2008 and future periods.

In March 2010, the Montana Supreme Court substantially affirmed the June 2008 Montana District Court decision. As a result, in the first quarter of 2010, PPL Montana recorded a pre-tax charge of $56 million ($34 million after tax or $0.08 per share, basic and diluted, for PPL), representing estimated rental compensation for the first quarter of 2010 and prior years, including interest. Rental compensation was estimated for periods subsequent to 2007, although such estimated amounts may differ from amounts ultimately determined by the Montana State Land Board. The portion of the pre-tax charge that related to prior years totaled $54 million ($32 million after tax). The pre-tax charge recorded on the Statement of Income was $49 million in "Other operation and maintenance" and $7 million in "Interest Expense." PPL Montana continues to accrue interest expense for the prior years and rent expense for the current year. PPL Montana's total loss accrual at September 30, 2011 was $84 million.

In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the Supreme Court granted PPL Montana's petition. Oral argument is scheduled for December 2011. A decision will be rendered by the Court by June 30, 2012. The stay of the judgment granted during the proceedings before the Montana Supreme Court has been extended by agreement with the State of Montana, to cover the anticipated period of the proceeding before the U.S. Supreme Court. PPL and PPL Energy Supply cannot predict the outcome of this matter, but do not expect to incur material losses beyond the estimated losses recorded.

PJM/MISO Billing Dispute *(PPL, PPL Energy Supply and PPL Electric)*

In 2009, PJM reported that it had discovered a modeling error in the market-to-market power flow calculations between PJM and MISO. The error was a result of incorrect modeling of certain generation resources that have an impact on power flows across the PJM/MISO border. Informal settlement discussions on this issue terminated in March 2010. Also in March 2010, MISO filed two complaints with the FERC concerning the modeling error and related matters with a demand for $130 million of principal plus interest. In April 2010, PJM filed answers to the complaints and filed a related complaint against MISO. In its answers and complaint, PJM denies that any compensation is due to MISO and seeks recovery in excess of $25 million from MISO for alleged violations by MISO regarding market-to-market power flow calculations. PPL participates in markets in both PJM and MISO. In June 2010, the FERC ordered the complaints to be consolidated and set for settlement discussions, followed by hearings if the discussions are unsuccessful. In January 2011, the parties to this dispute filed a settlement with the FERC under which no compensation would be paid to either PJM or MISO and providing for certain improvements in how the calculations are administered going forward. The settlement was contested by several parties and in June 2011 the FERC issued an order approving the contested settlement, which order has become final and is not subject to rehearing and appeal.

Regulatory Issues *(PPL, PPL Electric, LKE, LG&E and KU)*

See Note 6 for information on regulatory matters related to utility rate regulation.

Enactment of Financial Reform Legislation *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

In July 2010, the Dodd-Frank Act was signed into law. Of particular relevance to PPL and PPL Energy Supply, the Dodd-Frank Act includes provisions that will likely impose derivative transaction reporting requirements and require most over-the-counter derivative transactions to be executed through an exchange or to be centrally cleared. The Dodd-Frank Act, however, provides an exemption from mandatory clearing and exchange trading requirements for over-the-counter derivative transactions used to hedge or mitigate commercial risk. Although the phrase "to hedge or mitigate commercial risk" is not defined in the Dodd-Frank Act, the 2010 rules proposed by the Commodity Futures Trading Commission (CFTC) set forth an inclusive, multi-pronged definition for the phrase. Based on this proposed definition and other requirements in the proposed rule, it is anticipated that transactions utilized by PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU should qualify if they are not entered into for speculative purposes. The Dodd-Frank Act also provides that the CFTC may impose collateral and margin requirements for over-the-counter derivative transactions, including those that are used to hedge commercial risk. However, during drafting of the Dodd-Frank Act, certain members of Congress adopted report language and issued a public letter stating that it was not their intention to impose margin and collateral requirements on counterparties that utilize these transactions to hedge commercial risk. Final rules on major provisions in the Dodd-Frank Act, including imposition of collateral and margin requirements, will be established through rulemakings and the CFTC has postponed implementation until December 31, 2011. PPL and PPL Energy Supply may be required to post additional collateral if they are subject to margin requirements as ultimately adopted in the implementing regulations of the Dodd-Frank Act. PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU will continue to evaluate the provisions of the Dodd-Frank Act and monitor developments related to its implementation. At this time, PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU cannot predict the impact that the new law or its implementing regulations will have on their businesses or operations, or the markets in which they transact business, but currently do not expect to incur material costs related to this matter.

New Jersey Capacity Legislation *(PPL, PPL Energy Supply and PPL Electric)*

In January 2011, New Jersey enacted a law that intervenes in the wholesale capacity market exclusively regulated by the FERC: S. No. 2381, 214th Leg. (N.J. 2011) (the Act). To create incentives for the development of new, in-state electric generation facilities, the Act implements a "long-term capacity agreement pilot program (LCAPP)." The Act requires New Jersey utilities to pay a guaranteed fixed price for wholesale capacity, imposed by the New Jersey Board of Public Utilities (BPU), to certain new generators participating in PJM, with the ultimate costs of that guarantee to be borne by New Jersey ratepayers. PPL believes the intent and effect of the LCAPP is to encourage the construction of new generation in New Jersey even when, under the FERC-approved PJM economic model, such new generation would not be economic. The Act could depress capacity prices in PJM in the short term, impacting PPL Energy Supply's revenues, and harm the long-term ability of the PJM capacity market to incent necessary generation investment throughout PJM. In February 2011, the PJM Power Providers Group (P3), an organization in which PPL is a member, filed a complaint before the FERC seeking changes in PJM's capacity market rules designed to ensure that subsidized generation, such as may result from the implementation of the LCAPP, will not be able to set capacity prices artificially low as a result of their exercise of buyer market power. In April 2011, the FERC issued an order granting in part and denying in part P3's complaint and ordering changes in PJM's capacity rules consistent with a significant portion of P3's requested changes. PPL, PPL Energy Supply and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

In addition, in February 2011, PPL, with several other generating companies and utilities, filed a complaint in Federal Court in New Jersey challenging the Act on the grounds that it violates well-established principles under the Supremacy Clause and the Commerce Clause of the U.S. Constitution. In this action, the Plaintiffs request declaratory and injunctive relief barring implementation of the Act by the Commissioners of the BPU. PPL, PPL Energy Supply and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

California ISO and Western U.S. Markets *(PPL and PPL Energy Supply)*

Through its subsidiaries, PPL Energy Supply made $18 million of sales to the California ISO during the period October 2000 through June 2001, $17 million of which has not been paid to PPL Energy Supply subsidiaries. This entire receivable has been fully reserved by PPL Energy Supply. Also, there has been further litigation about additional claims of refunds for periods prior to October 2000. In January 2011, PPL Energy Supply and the "California Parties" (collectively, three California utility companies, the California Public Utility Commission and certain California state authorities) filed a settlement under which PPL Energy Supply would receive approximately $1 million of its $17 million claim, plus interest of $1 million. In June 2011, the FERC approved the settlement. Consequently, PPL Energy Supply released its reserve and wrote-off the related receivable. Settlement proceeds were received in July.

In June 2003, the FERC took several actions as a result of several related investigations beyond the California ISO litigation. The FERC terminated proceedings to consider whether to order refunds for spot market bilateral sales made in the Pacific Northwest, including sales made by PPL Montana, during the period December 2000 through June 2001. In August 2007, the U.S. Court of Appeals for the Ninth Circuit reversed the FERC's decision and ordered the FERC to consider additional evidence. The FERC also commenced additional investigations relating to "gaming" and bidding practices during 2000 and 2001, but neither PPL EnergyPlus nor PPL Montana believes it is a subject of these investigations.

Although PPL and its subsidiaries believe that they have not engaged in any improper trading or marketing practices affecting the western markets, PPL and PPL Energy Supply cannot predict the outcome of the above-described investigations, lawsuits and proceedings or whether any subsidiaries will be the subject of any additional governmental investigations or named in other lawsuits or refund proceedings. Consequently, PPL and PPL Energy Supply cannot estimate a range of reasonably possible losses, if any, related to these matters.

PJM RPM Litigation *(PPL, PPL Energy Supply and PPL Electric)*

In May 2008, a group of state public utility commissions, state consumer advocates, municipal entities and electric cooperatives, industrial end-use customers and a single electric distribution company (collectively, the RPM Buyers) filed a complaint before the FERC objecting to the prices for capacity under the PJM Reliability Pricing Model (RPM) that were set in the 2008-09, 2009-10 and 2010-11 RPM base residual auctions. The RPM Buyers requested that the FERC reset the rates paid to generators for capacity in those periods to a significantly lower level. Thus, the complaint requests that generators be paid less for those periods through refunds and/or prospective changes in rates. The relief requested in the complaint, if granted, could have a material effect on PPL, PPL Energy Supply and PPL Electric. PJM, PPL and numerous other parties responded to the complaint, strongly opposing the relief sought by the RPM Buyers. In September 2008, the FERC entered an order denying the complaint. In August 2009, the RPM Buyers appealed the FERC's decision to the U.S. Court of Appeals for the Fourth Circuit, and the appeal was subsequently transferred to the U.S. Court of Appeals for the District of Columbia Circuit. In February 2011, the U.S. Court of Appeals for the District of Columbia Circuit issued an order denying the appeal. No party sought review of the order denying the appeal. FERC's September 2008 denial of the complaint is therefore final.

In December 2008, PJM submitted amendments to certain provisions governing its RPM capacity market. The amendments were intended to permit the compensation available to suppliers that provide capacity, including PPL Energy Supply, to increase. PJM sought approval of the amendments in time for them to be implemented for the May 2009 capacity auction (for service in June 2012 through May 2013). Numerous parties, including PPL, protested PJM's filing. Certain of the protesting parties, other than PPL, proposed changes to the capacity market auction that would result in a reduction in compensation to capacity suppliers. The changes proposed by PJM and by other parties in response to PJM proposals could significantly affect the compensation available to suppliers of capacity participating in future RPM auctions. In March 2009, the FERC entered an order approving in part and disapproving in part the changes proposed by PJM. In August 2009, the FERC issued an order granting rehearing in part, denying rehearing in part and clarifying its March 2009 order. No request for rehearing or appeal of the August 2009 order was timely filed. In October 2010, the August 2009 Order became final and will not have a material impact on PPL, PPL Energy Supply or PPL Electric.

FERC Market-Based Rate Authority *(PPL, PPL Energy Supply, LKE, LG&E and KU)*

In December 1998, the FERC authorized PPL EnergyPlus to make wholesale sales of electric power and related products at market-based rates. In that order, the FERC directed PPL EnergyPlus to file an updated market analysis within three years after the order, and every three years thereafter. Since then, periodic market-based rate filings with the FERC have been made by PPL EnergyPlus, PPL Electric, PPL Montana and most of PPL Generation's subsidiaries. These filings consisted of a Northwest market-based rate filing for PPL Montana and a Northeast market-based rate filing for most of the other PPL subsidiaries in PJM's region. In December 2010, PPL filed its market-based rate update for the Eastern region. In January 2011, PPL filed the market-based rate update for the Western region. In June 2011, PPL filed its market-based rate update for the Southeast region, including LG&E and KU in addition to PPL EnergyPlus. In June 2011, the FERC issued an order approving LG&E's and KU's request for a determination that they no longer be deemed to have market power in the Big Rivers Electric Corporation balancing area and removing restrictions on their market-based rate authority in such region.

Currently, a seller granted market-based rate authority by the FERC may enter into power contracts during an authorized time period. If the FERC determines that the market is not workably competitive or that the seller possesses market power or is not charging "just and reasonable" rates, it may institute prospective action, but any contracts entered into pursuant to the FERC's market-based rate authority remain in effect and are generally subject to a high standard of review before the FERC can order changes. Recent court decisions by the U.S. Court of Appeals for the Ninth Circuit have raised issues that may make it more difficult for the FERC to continue its program of promoting wholesale electricity competition through market-based rate authority. These court decisions permit retroactive refunds and a lower standard of review by the FERC for changing power contracts, and could have the effect of requiring the FERC in advance to review most, if not all, power contracts. In June 2008, the U.S. Supreme Court reversed one of the decisions of the U.S. Court of Appeals for the Ninth Circuit, thereby upholding the higher standard of review for modifying contracts. At this time, PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict the impact of these court decisions on the FERC's future market-based rate authority program or on their businesses.

Energy Policy Act of 2005 - Reliability Standards *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. The FERC has indicated it intends to vigorously enforce the Reliability Standards using, among other means, civil penalty authority. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations. The first group of Reliability Standards approved by the FERC became effective in June 2007.

LG&E, KU , PPL Electric and certain subsidiaries of PPL Energy Supply monitor their compliance with the Reliability Standards and continue to self-report potential violations of certain applicable reliability requirements and submit accompanying mitigation plans. The resolution of a number of potential violations is pending. Any regional reliability entity determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC. PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any, other than the amounts currently recorded.

In the course of implementing its program to ensure compliance with the Reliability Standards by those PPL affiliates subject to the standards, certain other instances of potential non-compliance may be identified from time to time.

Environmental Matters - Domestic

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Due to the environmental issues discussed below or other environmental matters, PPL subsidiaries may be required to modify, curtail, replace or cease operating certain facilities or operations to comply with statutes, regulations and other requirements of regulatory bodies or courts.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Air

The Clean Air Act addresses, among other things, emissions causing acid deposition, installation of best available control technologies for new or substantially modified sources, attainment of national ambient air quality standards, toxic air emissions and visibility standards in the U.S. Amendments to the Clean Air Act requiring additional emission reductions have been proposed but are unlikely to be introduced or passed in this Congress. The Clean Air Act allows states to develop more stringent regulations and in some instances, as discussed below, Kentucky, Pennsylvania and Montana have done so.

To comply with air related requirements and other environmental requirements as described below, PPL's forecast for capital expenditures reflects a best estimate projection of expenditures that may be required within the next five years. Such projections are a combined $3.1 billion for LG&E and KU (which includes $100 million for LG&E and $500 million for KU associated with currently approved ECR plans during 2011 through 2013 to achieve emissions reductions and manage coal combustions residuals and $1.4 billion for LG&E and $1.1 billion for KU associated with the recently requested 2011 ECR Plans for additional expenditures to comply with new clean air rules and manage coal combustion residuals) and $400 million for PPL Energy Supply. Actual costs may be significantly lower or higher depending on the final requirements. Certain environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are subject to recovery through the ECR. See Note 6 for additional information on the ECR plan.

CSAPR (formerly Clean Air Transport Rule)

In July 2011, the EPA signed the CSAPR which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. The CSAPR replaces the EPA's previous Clean Air Interstate Rule (CAIR) which was struck down by the U.S. Court of Appeals for the District of Columbia Circuit (the Court) in July 2008. CAIR subsequently was effectively reinstated by the Court in December 2008, pending finalization of the Transport Rule. Like CAIR and the proposed Transport Rule, the CSAPR only applies to PPL's generation facilities located in Kentucky and Pennsylvania.

The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxides. The CSAPR establishes a new sulfur dioxide emission allowance cap and trade program that is completely independent of, and more stringent than, the current Acid Rain Program. The CSAPR also establishes new nitrogen oxide emission allowance cap and trade programs to replace the current programs. All trading is more restrictive than previously under CAIR. The CSAPR will be implemented in two phases. The first phase of the sulfur dioxide and nitrogen oxide emissions caps becomes effective in 2012. The second phase, lowering both of these caps, becomes effective in 2014. In October 2011, the EPA proposed technical adjustments to the CSAPR to account for updated data submitted to the agency. Several states and a number of companies have filed petitions for review with the Court challenging various provisions of the CSAPR.

With respect to PPL's competitive generation in Pennsylvania, greater reductions in sulfur dioxide emissions will be required beginning in 2012 under the CSAPR than were required under CAIR. For the initial phase of the rule beginning in 2012, PPL Energy Supply's sulfur dioxide allowance allocations are expected to be greater than the forecasted emissions based on present operations of existing sulfur dioxide scrubbers and coal supply. For the second phase beginning in 2014, the further reduction in allocations will most likely be met with increased operations of the existing sulfur dioxide scrubbers. With respect to nitrogen oxide, the CSAPR provides a slightly higher amount of allowances than under CAIR for PPL Energy Supply's Pennsylvania plants, but still less than PPL Energy Supply's current forecasted emissions. With uncertainty surrounding the trading program, other compliance options are being analyzed for the Pennsylvania fleet, such as the installation of new technology or modifications of plant operations.

With respect to LG&E and KU, greater reductions in sulfur dioxide emissions will also be required under the CSAPR beginning in 2012 than were required under CAIR. For the initial phase of the rule beginning in 2012, sulfur dioxide allowance allocations are expected to meet the forecasted emissions based on present operations of existing sulfur dioxide scrubbers and coal supply. However, by the second phase beginning in 2014, LG&E and KU will likely have to adopt additional measures with respect to the operation and dispatch of their generation fleet, including upgrades or installation of new sulfur dioxide scrubbers for certain generating units and retirement of the coal-fired generating units at the Cane Run, Green River, and Tyrone plants and replacement of those units with new generation. With respect to nitrogen oxide, the CSAPR allocates a slightly higher amount of allowances compared to those allocated under CAIR. With uncertainty surrounding the trading program, other compliance options are being analyzed for the Kentucky fleet. LG&E and KU are seeking recovery of their expected costs to comply with the CSAPR and certain other EPA requirements through the ECR plan filed with the KPSC in June 2011. See Note 6 for additional information.

National Ambient Air Quality Standards

In addition to the reductions in sulfur dioxide and nitrogen oxide emissions required under the CSAPR for the Pennsylvania and Kentucky plants, PPL's plants, including those in Montana, may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. The EPA has recently finalized a new one-hour standard for sulfur dioxide, and states are required to identify areas that meet those standards and areas that are in non-attainment. For non-attainment areas, states are required to develop plans by 2014 to achieve attainment by 2017. For areas in attainment or unclassifiable, states are required to develop maintenance plans by mid-2013 that demonstrate continued attainment. PPL, PPL Energy Supply, LKE, LG&E and KU anticipate that some of the measures required for compliance with the CSAPR such as upgraded or new sulfur dioxide scrubbers at some of their plants or, in the case of LG&E and KU, retirement of the Cane Run, Green River, and Tyrone plants, may also be necessary to achieve compliance with new sulfur dioxide standards. If additional reductions were to be required, the economic impact to each could be significant.

Mercury and other Hazardous Air Pollutants

Citing its authority under the Clean Air Act, in 2005, the EPA issued the Clean Air Mercury Rule (CAMR) affecting coal-fired power plants. Since the CAMR was overturned in a 2008 U.S. Circuit Court decision, the EPA is now proceeding to develop standards imposing MACT for mercury emissions and other hazardous air pollutants from electric generating units. Under a recently approved settlement, the EPA was required to issue final MACT standards in 2011. In order to develop these standards, the EPA has collected information from coal- and oil-fired electric utility steam generating units. In May 2011, the EPA published a proposed MACT regulation providing for stringent reductions of mercury and other hazardous air pollutants. The proposed rule also provides for a three-year compliance deadline, with the potential for a one-year extension as provided under the statute. Based on their assessment of the need to install pollution control equipment to meet this rule, LG&E and KU have filed requests with the KPSC for environmental cost recovery to facilitate moving forward with plans to install environmental controls including sorbent injection and fabric-filter baghouses to remove certain hazardous air pollutants. The cost for these controls is reflected in the costs of $1.4 billion for LG&E and $1.1 billion for KU noted under "Air" above. LG&E and KU have also announced the future retirement of coal-fired generating units at the Cane Run, Green River, and Tyrone plants and have filed requests with the KPSC for replacement of those units with natural gas-fired generating units to be constructed or purchased. The potential economic impact on PPL Energy Supply plants, including plant closures or other actions, cannot be estimated at this time, however, such impact could be significant. PPL Energy Supply, LG&E and KU are continuing to conduct in-depth reviews of the proposed rule.

Regional Haze and Visibility

The Clean Air Visibility Rule was issued by the EPA in June 2005 to address regional haze or regionally-impaired visibility caused by multiple sources over a wide area. The rule requires Best Available Retrofit Technology (BART) for certain electric generating units. Under the BART rule, PPL submitted to the PADEP its analyses of the visibility impacts of particulate matter emissions from Martins Creek Units 3 and 4, Brunner Island Units 2 and 3 and Montour Units 1 and 2. No analysis was submitted for sulfur dioxide or nitrogen oxides, because the EPA determined that meeting the requirements for the CAIR also satisfies the BART requirements for those pollutants. Although the EPA has not yet expressly stated that a similar approach will be taken under the CSAPR, the EPA has not requested any further studies. PPL's analyses have shown that, because PPL had already upgraded its particulate emissions controls at Montour Units 1 and 2 and Brunner Island

Units 2 and 3, further controls are not justified as there would be little corresponding visibility improvement. PPL has not received comments from the PADEP on these submissions.

In Montana, the EPA Region 8 is developing the regional haze plan as the Montana Department of Environmental Quality declined to develop a BART state implementation plan at this time. PPL submitted to the EPA its analyses of the visibility impacts of sulfur dioxide, nitrogen oxides and particulate matter emissions for Colstrip Units 1 and 2 and Corette. PPL's analyses concluded that further reductions are not warranted. The EPA responded to PPL's reports for Colstrip and Corette and requested further information and analysis. PPL completed further analysis and submitted addendums to its initial reports for Colstrip and Corette. In February 2009, PPL received an information request for data related to the non-BART-affected emission sources of Colstrip Units 3 and 4. PPL responded to this request in March 2009.

In November 2010, PPL Montana received a request from the EPA Region 8, under the EPA's Reasonable Further Progress goals of the Regional Haze Rules, to provide further analysis with respect to Colstrip Units 3 and 4. PPL completed a high-level analysis of various control options to reduce emissions of sulfur dioxide and particulate matter for these units, and submitted that analysis to the EPA in January 2011. The analysis shows that any incremental reductions would not be cost effective and that further analysis is not warranted. PPL also concluded that further analysis for nitrogen oxides was not justifiable as these units installed controls under a Consent Decree in which the EPA had previously agreed that, when implemented, would satisfy the requirements for installing the BART for nitrogen oxides. The EPA has indicated that it does not agree with all of PPL's conclusions and has requested additional information to which PPL is responding. Additionally, the EPA recently informally indicated to PPL Montana that substantially more reductions in both nitrogen oxide and sulfur dioxide emissions may be required at Colstrip. Discussions with the EPA are ongoing with respect to this issue.

PPL and PPL Energy Supply cannot predict whether any additional reductions in emissions will be required in Pennsylvania or Montana. If additional reductions are required, the economic impact could be significant depending on what is required.

LG&E and KU also submitted analyses of the visibility impacts of their Kentucky BART-eligible sources to the Kentucky Division for Air Quality (KDAQ). Only LG&E's Mill Creek plant was determined to have a significant regional haze impact. The KDAQ has submitted a regional haze state implementation plan (SIP) to the EPA which requires the Mill Creek plant to reduce its sulfuric acid mist emissions from Units 3 and 4. After approval of the Kentucky SIP by the EPA and revision of the Mill Creek plant's Title V air permit, LG&E intends to install sorbent injection controls at the plant to reduce sulfuric acid mist emissions. In the event that the EPA determines that compliance with the CSAPR would be insufficient to meet the BART requirements, it would be necessary for LG&E and KU to reassess their planned compliance measures.

New Source Review (NSR)

The NSR regulations require major new or modified sources of regulated pollutants to receive pre-construction and operating permits with limits that prevent the significant deterioration of air quality in areas that are in attainment of the ambient air quality standards for certain pollutants.

The EPA has resumed its NSR enforcement efforts targeting coal-fired power plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act. In April 2009, PPL received EPA information requests for its Montour and Brunner Island plants. The requests are similar to those that PPL received several years ago for its Colstrip, Corette and Martins Creek plants. PPL and the EPA have exchanged certain information regarding this matter. In January 2009, PPL and other companies that own or operate the Keystone plant in Pennsylvania received a notice of violation from the EPA alleging that certain projects were undertaken without proper NSR compliance. PPL and PPL Energy Supply cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In addition, in August 2007, LG&E and KU received information requests for their Mill Creek, Trimble County, and Ghent plants, but have received no further communications from the EPA since providing their responses. PPL, LKE, LG&E and KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In March 2009, KU received a notice of violation alleging that KU violated certain provisions of the Clean Air Act's rules governing NSR and prevention of significant deterioration by installing sulfur dioxide scrubbers and SCR controls at its Ghent generating station without assessing potential increased sulfuric acid mist emissions. KU contends that the work in question, as pollution control projects, was exempt from the requirements cited by the EPA. In December 2009, the EPA issued an information request on this matter. KU has exchanged settlement proposals and other information with the EPA regarding imposition of additional permit limits and emission controls and anticipates continued settlement negotiations. In addition, any settlement or future litigation could potentially encompass a September 2007 notice of violation alleging opacity violations at the plant. Depending on the provisions of a final settlement or the results of litigation, if any, resolution of this matter could involve significant increased operating and capital expenditures. PPL, LKE and KU are currently unable to predict the final outcome of this matter, and cannot estimate a range of reasonably possible losses, if any.

If PPL subsidiaries are found to have violated NSR regulations, PPL would, among other things, be required to meet permit limits reflecting Best Available Control Technology (BACT) for the emissions of any pollutant found to have significantly increased due to a major plant modification. The costs to meet such limits, including installation of technology at certain units, could be significant.

States and environmental groups also have initiated enforcement actions and litigation alleging violations of the NSR regulations by coal-fired plants, and PPL is unable to predict whether such actions will be brought against any of PPL's plants.

TC2 Air Permit (PPL, LKE, LG&E and KU)

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an Order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which were incorporated into a final revised permit issued by the KDAQ in January 2010. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, PPL, LKE, LG&E and KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Global Climate Change

There is concern nationally and internationally about global climate change and the possible contribution of GHG emissions including, most significantly, carbon dioxide, from the combustion of fossil fuels. This has resulted in increased demands for carbon dioxide emission reductions from investors, environmental organizations, government agencies and the international community. These demands and concerns have led to federal legislative proposals, actions at regional, state and local levels, litigation relating to GHG emissions and the EPA regulations on GHGs.

Greenhouse Gas Legislation

While climate change legislation was considered during the 111th Congress, the outcome of the 2010 elections has halted the debate on such legislation in the current 112th Congress. The timing and elements of any future legislation addressing GHG emission reductions are uncertain at this time. In the current Congress, legislation barring the EPA from regulating GHG emissions under the existing authority of the Clean Air Act has been passed by the U.S. House of Representatives. Various bills providing for barring or delaying the EPA from regulating GHG emissions have been introduced in the U.S. Senate, but the prospects for passage of such legislation remain uncertain. At the state level, the 2010 elections in Pennsylvania have also reduced the likelihood of GHG legislation in the near term, and there are currently no prospects for such legislation in Kentucky or Montana.

Greenhouse Gas Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has the authority to regulate GHG emissions from new motor vehicles under the Clean Air Act, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that will apply beginning with 2012 model year vehicles. The EPA has also clarified that this standard triggers regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act starting in 2011. This means that any new sources or major modifications to existing sources causing a net significant emissions increase requires BACT permit limits for GHGs. The EPA recently proposed guidance for conducting a BACT analysis for projects that trigger such a review. In addition, New Source Performance Standards for new and existing power plants were expected to be proposed in September 2011 and finalized in May 2012, but this has been delayed. The EPA is expected to announce a new schedule for this rulemaking by the end of 2011.

At the regional level, ten northeastern states signed a Memorandum of Understanding (MOU) agreeing to establish a GHG emission cap-and-trade program, called the Regional Greenhouse Gas Initiative (RGGI). The program commenced in January 2009 and calls for stabilizing carbon dioxide emissions, at base levels established in 2005, from electric power plants with capacity greater than 25 MW. The MOU also provides for a 10% reduction in carbon dioxide emissions from base levels by 2019.

Pennsylvania has not stated an intention to join the RGGI, but has enacted the Pennsylvania Climate Change Act of 2008 (PCCA). The PCCA established a Climate Change Advisory Committee to advise the PADEP on the development of a Climate Change Action Plan. In December 2009, the Advisory Committee finalized its Climate Change Action Report which identifies specific actions that could result in reducing GHG emissions by 30% by 2020. Some of the proposed actions, such as a mandatory 5% efficiency improvement at power plants, could be technically unachievable. To date, there have been no regulatory or legislative actions taken to implement the recommendations of the report. In addition, legislation has been introduced that would, if enacted, accelerate the solar supply requirements and restrict eligible solar projects to those located in Pennsylvania. PPL cannot predict at this time whether this legislation will be enacted.

Eleven Western states, including Montana and certain Canadian provinces, are members of the Western Climate Initiative (WCI). The WCI has established a goal of reducing carbon dioxide emissions 15% below 2005 levels by 2020 and is currently developing GHG emission allocations, offsets, and reporting recommendations.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. A final plan is expected in 2011. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting facilities, and the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of AEP v. Connecticut reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the lower court and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In Comer v. Murphy Oil, the U.S. Court of Appeals for the Fifth Circuit declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the Comer case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a pending petition to reverse the Court of Appeals' ruling. In May 2011, the plaintiffs in the Comer case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including KU and three other indirect subsidiaries of LKE, under a Mississippi statute that allows the re-filing of an action in certain circumstances. Additional litigation in federal and state courts over these issues is continuing. PPL, LKE and KU cannot predict the outcome of this litigation or estimate a range of reasonably possible losses, if any.

PPL continues to evaluate options for reducing, avoiding, off-setting or sequestering its carbon dioxide emissions. In 2010, PPL's power plants, including PPL's share of jointly owned assets, emitted approximately 37 million tons of carbon dioxide (including 6 million tons of emissions from the LKE plants after their acquisition on November 1, 2010) compared to 29 million tons in 2009 without LG&E and KU emissions. LG&E's and KU's generating fleets, including their share of jointly owned assets, emitted approximately 19 million tons and approximately 18 million tons of carbon dioxide in 2010, compared to approximately 17 million tons and approximately 16 million tons in 2009. All tons are U.S. short tons (2,000 lbs/ton).

Renewable Energy Legislation (PPL and PPL Energy Supply)

There has been interest in renewable energy legislation at both the state and federal levels. At the federal level, House and Senate bills proposed in the 111th Congress would have imposed mandatory renewable energy supply and energy efficiency requirements in the 15% to 20% range by approximately 2020. Earlier in the year, there were discussions regarding a Clean Energy Standard (CES) that addressed not only renewables but also encouraged clean energy requirements (as yet to be defined). At this time, neither the renewable energy debate nor the CES discussion is expected to gain momentum at the federal or state levels (beyond what is otherwise already required in Pennsylvania and Montana) in the near term.

PPL believes there are financial, regulatory and logistical uncertainties related to GHG reductions and the implementation of renewable energy mandates. These will need to be resolved before the impact of such requirements on PPL can be meaningfully estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation oversupply that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy. These uncertainties are not directly addressed by proposed legislation. PPL and PPL Energy Supply cannot predict at this time the effect on their future competitive position, results of operation, cash flows and financial position, of any GHG emissions, renewable energy mandate or other global climate change requirements that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs) (PPL, PPL Energy Supply, LKE, LG&E and KU)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The first approach would regulate CCRs as a hazardous waste under Subtitle C of the RCRA. This approach would have very significant impacts on any coal-fired plant, and would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The second approach would regulate CCRs as a solid waste under Subtitle D of the RCRA. This approach would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, PPL expects that several of its plants in Kentucky and Montana could be significantly impacted by the requirements of Subtitle D of the RCRA, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. PPL has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several PPL plants and PPL has implemented certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) that requests comments on selected documents that the EPA received during the comment period for the proposed regulations. Comments are due on the NODA by November 2011. In addition, the U.S. House of Representatives in October 2011 approved a bill to modify Subtitle D of the RCRA to provide for the proper management and disposal of CCRs and that would preclude the EPA from regulating CCRs under Subtitle C of the RCRA. The bill has been introduced in the Senate and the prospect for passage of this legislation is uncertain.

In June 2009, the EPA's Office of Enforcement and Compliance Assurance issued a much broader information request to Colstrip and 18 other non-affiliated plants, seeking information under the RCRA, the Clean Water Act and the Emergency Planning and Community Right-to-Know Act. PPL responded to the EPA's broader information request. Although the EPA's enforcement office issued the request, the EPA has not necessarily concluded that the plants are in violation of any EPA requirements. The EPA conducted a multi-media inspection at Colstrip in August 2009 and issued a report in December 2010 stating that the EPA did not identify any violations of the applicable compliance standards for the Colstrip facility.

PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on their facilities, but the economic impact could be significant.

Martins Creek Fly Ash Release (PPL and PPL Energy Supply)

In 2005, there was a release of approximately 100 million gallons of water containing fly ash from a disposal basin at the Martins Creek plant used in connection with the operation of the plant's two 150 MW coal-fired generating units. This resulted in ash being deposited onto adjacent roadways and fields, and into a nearby creek and the Delaware River. PPL determined that the release was caused by a failure in the disposal basin's discharge structure. PPL conducted extensive clean-up and completed studies, in conjunction with a group of natural resource trustees and the Delaware River Basin Commission, evaluating the effects of the release on the river's sediment, water quality and ecosystem.

The PADEP filed a complaint in Pennsylvania Commonwealth Court against PPL Martins Creek and PPL Generation, alleging violations of various state laws and regulations and seeking penalties and injunctive relief. PPL and the PADEP have settled this matter. The settlement also required PPL to submit a report on the completed studies of possible natural resource damages. PPL subsequently submitted the assessment report to the Pennsylvania and New Jersey regulatory agencies and has continued discussing potential natural resource damages and mitigation options with the agencies. Subsequently, in August 2011 the DEP submitted its National Resource Damage Assessment report to the court and to the intervenors. The settlement agreement for the Natural Resources Damage Claim has not yet been submitted to the court and for public comments.

Through September 30, 2011, PPL Energy Supply has spent $28 million for remediation and related costs and an insignificant remediation liability remains on the balance sheet. PPL and PPL Energy Supply cannot be certain of the outcome of the natural resource damage assessment or the associated costs, the outcome of any lawsuit that may be brought by citizens or businesses or the exact nature of any other regulatory or other legal actions that may be initiated against PPL, PPL Energy Supply or their subsidiaries as a result of the disposal basin release. However, PPL and PPL Energy Supply currently do not expect such outcomes to result in material losses above the amounts currently recorded.

Seepages and Groundwater Infiltration - Pennsylvania, Montana and Kentucky

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various PPL plants. PPL has completed or is completing assessments of seepages or groundwater infiltration at various facilities and is working with agencies to implement abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

(PPL and PPL Energy Supply)

In 2007, six plaintiffs filed a lawsuit in the Montana Sixteenth Judicial District Court against the Colstrip plant owners asserting property damage claims from seepage from wastewater ponds at Colstrip. A settlement agreement was reached in July 2010, but certain of the plaintiffs later argued that the settlement was not final. The Colstrip plant owners filed a motion to enforce the settlement and in October 2011 the court granted the motion and ordered the settlement to be completed in 60 days. It is not known if the plaintiffs will appeal the October order. The settlement is not yet final, and may not be honored by the plaintiffs, but PPL Montana's share is not expected to be significant.

Conemaugh River Discharges (PPL and PPL Energy Supply)

In April 2007, PennEnvironment and the Sierra Club brought a Clean Water Act citizen suit in the U.S. District Court for the Western District of Pennsylvania (the Western District Court) against GenOn Northeast Management Company (then known as Reliant Energy Northeast Management Company) (GenOn), as operator of Conemaugh Generating Station (CGS), seeking civil penalties and injunctive relief for alleged violations of CGS's NPDES water discharge permit. A PPL Energy Supply subsidiary holds a 16.25% undivided, tenant-in-common ownership interest in CGS.

Throughout the relevant time period, the operators of CGS have worked closely with the PADEP to ensure that the facility is operated in a manner that does not cause any adverse environmental impacts to the Conemaugh River, a waterway already significantly impacted by discharges from abandoned coal mines and other historical industrial activity with respect to which neither PPL nor CGS had any involvement. Pursuant to a Consent Order and Agreement between the PADEP and GenOn (the CGS COA), a variety of studies have been conducted, a water treatment facility for cooling tower blowdown has been designed and built, and a second treatment facility for sulfur dioxide scrubber waste water has been designed (and is awaiting final PADEP approval for construction), all in order to comply with the stringent limits set out in CGS's NPDES permit.

In March 2011, the Western District Court entered a partial summary judgment in the plaintiffs' favor, declaring that discharges from CGS violated the NPDES permit. Subsequently, the parties agreed to settle the dispute and in August 2011 the court entered a Consent Decree and Order resolving the mater. PPL Energy Supply's share of the settlement is not significant.

Other Issues (PPL, PPL Energy Supply, LKE, LG&E and KU)

In 2006, the EPA significantly decreased to 10 parts per billion (ppb) the drinking water standards related to arsenic. In Pennsylvania, Montana and Kentucky, this arsenic standard has been incorporated into the states' water quality standards and could result in more stringent limits in NPDES permits for PPL's Pennsylvania, Montana and Kentucky plants. Subsequently, the EPA developed a draft risk assessment for arsenic that increases the cancer risk exposure by more than 20 times, which would lower the current standard from 10 ppb to 0.1 ppb. If the lower standard becomes effective, costly treatment would be required to attempt to meet the standard and, at this time, there is no assurance that it could be achieved. PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict the outcome of the draft risk assessment and what impact, if any, it would have on their facilities, but the costs could be significant.

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxics Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all PCB-containing equipment. PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on their facilities, but the costs could be significant.

The EPA finalized requirements in 2004 for new or modified cooling water intake structures. These requirements affect where generating facilities are built, establish intake design standards and could lead to requirements for cooling towers at new and modified power plants. Another rule, finalized in 2004, that addressed existing structures was withdrawn following a 2007 decision by the U.S. Court of Appeals for the Second Circuit. In 2009, however, the U.S. Supreme Court ruled that the EPA has discretion to use cost-benefit analysis in determining the best technology available for minimizing adverse environmental impact to aquatic organisms. The EPA published the proposed rule in April 2011. The comment period ended in August 2011. The EPA is evaluating comments and meeting with industry groups to discuss options. The final rule is to be issued by July 2012. The industry and PPL reviewed the proposed rule and submitted comments. The proposed rule contains two requirements to reduce impact to aquatic organisms. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens regardless of the levels of mortality actually occurring or the cost of achieving the requirements. The second requirement is to determine and install best technology available to reduce mortality of aquatic organisms that are pulled through the plant's cooling water system. A form of cost-benefit analysis is allowed for this second requirement. This process involves a site-specific evaluation based on nine factors including impacts to energy delivery reliability and remaining useful life of the plant. Since the rule is written to allow for certain site-specific determinations of the best technology available, state implementation of the rule could impose requirements that could result in significant costs to PPL plants ranging from installation of fine mesh screens on cooling water intakes to construction of cooling towers. PPL, PPL Energy Supply, LKE, LG&E and KU will be unable to determine the exact impact until a final rule is issued and the required studies have been completed.

In October 2009, the EPA released its Final Detailed Study of the Steam Electric Power Generating effluent limitations guidelines and standards. Final regulations are expected to be effective in January 2014. PPL expects the revised guidelines and standards to be more stringent than the current standards especially for sulfur dioxide scrubber wastewater and ash basin discharges, which could result in more stringent discharge permit limits. In the interim, PPL is unable to predict whether the EPA and the states may impose more stringent limits on a case-by-case best professional judgment basis under existing authority as permits are renewed.

PPL has signed a Consent Order and Agreement (the Brunner COA) with the PADEP under which it agreed, under certain conditions, to take further actions to minimize the possibility of fish kills at its Brunner Island plant. Fish are attracted to warm water in the power plant discharge channel, especially during cold weather. Debris at intake pumps can result in a unit trip or reduction in load, causing a sudden change in water temperature. PPL has committed to construct a barrier to prevent debris from entering the river water intake area, pending receipt of regulatory permits, at a cost of approximately $4 million.

PPL has also investigated alternatives to exclude fish from the discharge channel and submitted three alternatives to the PADEP. According to the Brunner COA, once the cooling towers at Brunner Island became operational, PPL must implement one of these fish exclusion alternatives if a fish kill occurs in the discharge channel due to thermal impacts from the plant . Following start-up of the cooling towers in April 2010, several hundred dead fish were found in the cooling tower intake basket although there were no sudden changes in water temperature. In the third quarter of 2010, PPL discussed this matter with the PADEP and both parties agreed that this condition was not one anticipated by the Brunner COA, thereby concluding it did not trigger a need to implement a fish exclusion project. At this time, no fish exclusion project is planned.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County station. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to Trimble Circuit Court. PPL, LKE, LG&E, and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Superfund and Other Remediation

PPL Electric is a potentially responsible party at several sites listed by the EPA under the federal Superfund program, including the Columbia Gas Plant site, the Metal Bank site and the Ward Transformer site. Clean-up actions have been or are being undertaken at all of these sites, the costs of which have not been significant to PPL Electric. However, should the EPA require different or additional measures in the future, or should PPL Electric's share of costs at multi-party sites increase significantly more than currently expected, the costs could be significant.

PPL Electric, LG&E and KU are remediating or have completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which PPL Electric, LG&E and KU may be liable for remediation. These include a number of former coal gas manufacturing facilities in Pennsylvania and Kentucky previously owned or operated or currently owned by predecessors or affiliates of PPL Electric, LG&E and KU. There are additional sites, formerly owned or operated by PPL Electric, LG&E and KU predecessors or affiliates, for which PPL Electric, LG&E and

KU lack information on current site conditions and are therefore unable to predict what, if any, potential liability they may have.

In June 2011, Lepore-Moyers Partnership (LMP) filed a complaint in federal district court against PPL Electric, UGI Corporation and a neighboring property owner relating to contamination allegedly emanating from the former Mount Joy Manufactured Gas Plant (MGP) site located in Lancaster County, Pennsylvania. LMP owns property adjacent to the Mount Joy MGP site and claims that environmental testing done on its property indicates the presence of volatile organic compounds in the soil and/or groundwater. LMP claims that defendants are responsible for, among other things, the reimbursement of costs, future response costs, investigation and remediation of the contamination, and damages caused by the contamination. PPL Electric cannot estimate a range of reasonably possible losses, if any, or predict the outcome of this matter.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which PPL currently lacks information, the costs of remediation and other liabilities could be substantial. PPL and its subsidiaries also could incur other non-remediation costs at sites included in current consent orders or other contaminated sites which could be significant. PPL is unable to estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require several PPL subsidiaries to take more extensive assessment and remedial actions at former coal gas manufacturing facilities. PPL cannot estimate a range of reasonably possible losses, if any, related to these matters.

Under the Pennsylvania Clean Streams Law, subsidiaries of PPL Generation are obligated to remediate acid mine drainage at former mine sites and may be required to take additional steps to prevent potential acid mine drainage at previously capped refuse piles. One PPL Generation subsidiary is pumping mine water at two mine sites and treating water at one of these sites. Another PPL Generation subsidiary has installed a passive wetlands treatment system at a third site. At September 30, 2011, PPL Energy Supply had accrued a discounted liability of $26 million to cover the costs of pumping and treating groundwater at the two mine sites for 50 years and for operating and maintaining passive wetlands treatment at the third site. PPL Energy Supply discounted this liability based on risk-free rates at the time of the mine closures. The weighted-average rate used was 8.16%. Expected undiscounted payments are estimated at $2 million for 2011, $1 million for each of the years from 2012 through 2014, $2 million for 2015, and $137 million for work after 2015.

From time to time, PPL undertakes remedial action in response to spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from PPL's operations, and undertakes similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these general environmental matters is not expected to have a material adverse impact on PPL's operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in material additional costs for PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

Electric and Magnetic Fields

Concerns have been expressed by some members of the public regarding potential health effects of power frequency EMFs, which are emitted by all devices carrying electricity, including electric transmission and distribution lines and substation equipment. Government officials in the U.S. and the U.K. have reviewed this issue. The U.S. National Institute of Environmental Health Sciences concluded in 2002 that, for most health outcomes, there is no evidence that EMFs cause adverse effects. The agency further noted that there is some epidemiological evidence of an association with childhood leukemia, but that the evidence is difficult to interpret without supporting laboratory evidence. The U.K. National Radiological Protection Board (part of the U.K. Health Protection Agency) concluded in 2004 that, while the research on EMFs does not provide a basis to find that EMFs cause any illness, there is a basis to consider precautionary measures beyond existing exposure guidelines. The Stakeholder Group on Extremely Low Frequency EMF, set up by the U.K. Government, has issued two reports, one in April 2007 and one in June 2010, describing options for reducing public exposure to EMF. The U.K. Government responded to the first report in 2009, agreeing to some of the proposals, including a proposed voluntary code to optimally phase 132 kilovolt overhead lines to reduce public exposure to EMF where it is cost effective to do so. The U.K. Government is currently considering the second report which concentrates on EMF exposure from distribution systems. PPL and its subsidiaries believe the current efforts to determine whether EMFs cause adverse health effects should continue and are taking steps to reduce EMFs, where practical, in the design of new transmission and distribution facilities. PPL and its subsidiaries are unable to predict what effect, if any, the EMF issue might have on their operations and facilities either in the U.S. or the U.K., and the associated cost, or what, if any, liabilities they might incur related to the EMF issue.

Environmental Matters - WPD *(PPL)*

WPD's distribution businesses are subject to environmental regulatory and statutory requirements. PPL believes that WPD has taken and continues to take measures to comply with the applicable laws and governmental regulations for the protection of the environment.

The U.K. Government has requested that utilities undertake projects to alleviate the impact of flooding on the U.K. utility infrastructure, including major electricity substations. WPD has agreed with the Ofgem to spend $46 million on flood prevention, which will be recovered through rates during the five-year period commencing April 2010. WPD is currently liaising on site-specific proposals with local offices of a U.K. Government agency.

The U.K. Government recently passed legislation that imposes a duty on certain companies, including WPD, to report on climate change adaptation. The first information request was received by WPD in March 2010 and submissions for all four distribution network operators were made in June 2011. Responses to these reports from the U.K. Government are expected by the end of 2011. WPD has worked with other U.K. electricity network operators to undertake research with the internationally recognized U.K. Met Office (the national weather service) and to report using common agreed methodology.

There are no other material legal or administrative proceedings pending against or related to WPD with respect to environmental matters. See "Electric and Magnetic Fields" above for a discussion of EMFs.

Other

Nuclear Insurance *(PPL and PPL Energy Supply)*

PPL Susquehanna is a member of certain insurance programs that provide coverage for property damage to members' nuclear generating plants. Facilities at the Susquehanna plant are insured against property damage losses up to $2.75 billion under these programs. PPL Susquehanna is also a member of an insurance program that provides insurance coverage for the cost of replacement power during prolonged outages of nuclear units caused by certain specified conditions.

Under the property and replacement power insurance programs, PPL Susquehanna could be assessed retroactive premiums in the event of the insurers' adverse loss experience. At September 30, 2011, this maximum assessment was $44 million.

In the event of a nuclear incident at the Susquehanna plant, PPL Susquehanna's public liability for claims resulting from such incident would be limited to $12.6 billion under provisions of The Price-Anderson Act Amendments under the Energy Policy Act of 2005. PPL Susquehanna is protected against this liability by a combination of commercial insurance and an industry assessment program.

In the event of a nuclear incident at any of the reactors covered by The Price-Anderson Act Amendments under the Energy Policy Act of 2005, PPL Susquehanna could be assessed up to $235 million per incident, payable at $35 million per year.

At September 30, 2011, the property, replacement power and nuclear incident insurers maintained an A.M. Best financial strength rating of A ("Excellent").

Employee Relations *(PPL, LKE and KU)*

In July 2011, KU and its employees represented by the United Steelworkers of America agreed to a six-month extension of their current collective bargaining agreement, previously scheduled to expire in August 2011, which extension includes a 3% wage increase through the new expiration date. In July 2011, KU and its employees represented by IBEW Local 2100 completed annual reopener negotiations and agreed to a 3% wage increase.

Guarantees and Other Assurances

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

In the normal course of business, PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries enter.

(PPL)

PPL fully and unconditionally guarantees all of the debt securities of PPL Capital Funding.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

The table below details guarantees provided as of September 30, 2011. The total recorded liability at September 30, 2011 and December 31, 2010, was $16 million and $14 million for PPL and $11 million for both periods for LKE. Other than as noted in the descriptions for "WPD guarantee of pension and other obligations of unconsolidated entities," the probability of expected payment/performance under each of these guarantees is remote.

	Exposure at September 30, 2011 (a)	Expiration Date
PPL		
Indemnifications for sale of PPL Gas Utilities	$ 300 (b)	
Indemnifications related to the WPD Midlands acquisition	(c)	
WPD indemnifications for entities in liquidation and sales of assets	287 (d)	2013 - 2018
WPD guarantee of pension and other obligations of unconsolidated entities	66 (e)	2015
Tax indemnification related to unconsolidated WPD affiliates	8 (f)	2012
PPL Energy Supply (g)		
Letters of credit issued on behalf of affiliates	20 (h)	2011 - 2014
Retrospective premiums under nuclear insurance programs	44 (i)	
Nuclear claims assessment under The Price-Anderson Act Amendments under The Energy Policy Act of 2005	235 (j)	
Indemnifications for sales of assets	338 (k)	2012 - 2025
Indemnification to operators of jointly owned facilities	6 (l)	
Guarantee of a portion of a divested unconsolidated entity's debt	22 (m)	2018
LKE (n)		
Indemnification of lease termination and other divestitures	301 (o)	2021 - 2023
LG&E and KU (p)		
LG&E and KU guarantee of shortfall related to OVEC	(q)	2040

(a) Represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee.

(b) PPL has provided indemnification to the purchaser of PPL Gas Utilities and Penn Fuel Propane, LLC for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including certain pre-closing unknown environmental liabilities relating to former manufactured gas plant properties or off-site disposal sites, if any, outside of Pennsylvania. The indemnification provisions for most representations and warranties, including tax and environmental matters, are capped at $45 million, in the aggregate, and are triggered (i) only if the individual claim exceeds $50,000, and (ii) only if, and only to the extent that, in the aggregate, total claims exceed $4.5 million. The indemnification provisions for most representations and warranties expired on September 30, 2009 without any claims having been made. Certain representations and warranties, including those having to do with transaction authorization and title, survive indefinitely, are capped at the purchase price and are not subject to the above threshold or deductible. The indemnification provision for the tax matters representations survives for the duration of the applicable statute of limitations, and the indemnification provision for the environmental matters representations survives for a period of three years after the transaction closing. The indemnification provision for the environmental matters representations expired on September 30, 2011 without any claims having been made. The indemnification for covenants survives until the applicable covenant is performed and is not subject to any cap.

(c) WPD Midlands Holdings Limited (formerly Central Networks Limited) had agreed prior to the acquisition to indemnify certain former directors of a Turkish entity in which WPD Midlands Holdings Limited previously owned an interest for any liabilities that may arise as a result of an investigation by Turkish tax authorities, and PPL WEM has received a cross-indemnity from E.ON AG with respect to these indemnification obligations. Additionally, PPL subsidiaries agreed to provide indemnifications to subsidiaries of E.ON AG for certain liabilities relating to properties and assets owned by affiliates of E.ON AG that were or are to be transferred to WPD Midlands in connection with the acquisition. The maximum exposure and expiration of these indemnifications cannot be estimated because the maximum potential liability is not capped by and there is no expiration date in the transaction documents.

(d) In connection with the liquidation of wholly owned subsidiaries that have been deconsolidated upon turning the entities over to the liquidators, certain affiliates of PPL Global have agreed to indemnify the liquidators, directors and/or the entities themselves for any liabilities or expenses arising during the liquidation process, including liabilities and expenses of the entities placed into liquidation. In some cases, the indemnifications are limited to a maximum amount that is based on distributions made from the subsidiary to its parent either prior or subsequent to being placed into liquidation. In other cases, the maximum amount of the indemnifications is not explicitly stated in the agreements. The indemnifications generally expire two to seven years subsequent to the date of dissolution of the entities. The exposure noted only includes those cases in which the agreements provide for a specific limit on the amount of the indemnification, and the expiration date was based on an estimate of the dissolution date of the entities.

In connection with their sales of various businesses, WPD and its affiliates have provided the purchasers with indemnifications that are standard for such transactions, including indemnifications for certain pre-existing liabilities and environmental and tax matters. In addition, in connection with certain of these sales, WPD and its affiliates have agreed to continue their obligations under existing third-party guarantees, either for a set period of time following the transactions or upon the condition that the purchasers make reasonable efforts to terminate the guarantees. Finally, WPD and its affiliates remain secondarily responsible for lease payments under certain leases that they have assigned to third parties.

(e) As a result of the privatization of the utility industry in the U.K., certain electric associations' roles and responsibilities were discontinued or modified. As a result, certain obligations, primarily pension-related, associated with these organizations have been guaranteed by the participating members. Costs are allocated to the members based on predetermined percentages as outlined in specific agreements. However, if a member becomes insolvent, costs can be reallocated to and are guaranteed by the remaining members. At September 30, 2011, WPD has recorded an estimated discounted liability based on its current allocated percentage of the total expected costs for which the expected payment/performance is probable. Neither the expiration date nor the maximum amount of potential payments for certain obligations is explicitly stated in the related agreements. Therefore, they have been estimated based on the types of obligations.

(f) Two WPD unconsolidated affiliates were refinanced during 2005. Under the terms of the refinancing, WPD has indemnified the lender against certain tax and other liabilities.

(g) Other than the letters of credit, all guarantees of PPL Energy Supply, on a consolidated basis, also apply to PPL on a consolidated basis for financial reporting purposes.

(h) Standby letter of credit arrangements under PPL Energy Supply's credit facilities for the purposes of protecting various third parties against nonperformance by PPL. This is not a guarantee by PPL on a consolidated basis.

(i) PPL Susquehanna is contingently obligated to pay this amount related to potential retrospective premiums that could be assessed under its nuclear insurance programs. See "Nuclear Insurance" above for additional information.

(j) This is the maximum amount PPL Susquehanna could be assessed for each incident at any of the nuclear reactors covered by this Act. See "Nuclear Insurance" above for additional information.

(k) PPL Energy Supply's maximum exposure with respect to certain indemnifications and the expiration of the indemnifications cannot be estimated because, in the case of certain indemnification provisions, the maximum potential liability is not capped by the transaction documents and the expiration date is based on the applicable statute of limitations. The exposure and expiration dates noted are only for those cases in which the agreements provide for specific limits.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchaser of the Long Island generation business for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including liabilities relating to certain renewable energy facilities which were previously owned by one of the PPL subsidiaries sold in the transaction but which were unrelated to the Long Island generation business. The indemnification provisions are subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties. The indemnification provisions for most representations and warranties expired in the third quarter of 2011.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchasers of the Maine hydroelectric facilities for damages arising out of any breach of the representations, warranties and covenants under the respective transaction agreements and for damages arising out of certain other matters, including liabilities of the PPL Energy Supply subsidiary relating to the pre-closing ownership or operation of those hydroelectric facilities. The indemnification obligations are subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of representations and warranties. The indemnification provisions for certain representations and warranties expired in the second quarter of 2011.

Subsidiaries of PPL Energy Supply have agreed to provide indemnification to the purchasers of certain non-core generation facilities sold in March 2011 (see Note 8 for additional information) for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreements and for damages arising out of certain other matters relating to the facilities that were the subject of the transaction, including certain reduced capacity payments (if any) at one of the facilities in the event specified PJM rule changes are proposed and become effective. The indemnification provisions are subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties.

(l) In December 2007, a subsidiary of PPL Energy Supply executed revised owners agreements for two jointly owned facilities, the Keystone and Conemaugh generating stations. The agreements require that in the event of any default by an owner, the other owners fund contributions for the operation of the generating stations, based upon their ownership percentages. The maximum obligation among all owners, for each station, is currently $20 million. The non-defaulting owners, who make up the defaulting owner's obligations, are entitled to the generation entitlement of the defaulting owner, based upon their ownership percentage. The agreements do not have an expiration date.

(m) A PPL Energy Supply subsidiary owned a one-third equity interest in Safe Harbor Water Power Corporation (Safe Harbor) that was sold in March 2011. Beginning in 2008, PPL Energy Supply guaranteed one-third of any amounts payable with respect to certain senior notes issued by Safe Harbor. Under the terms of the sale agreement, PPL Energy Supply continues to guarantee the portion of Safe Harbor's debt, but received a cross-indemnity from the purchaser in the event PPL Energy Supply is required to make a payment under the guarantee. Exposure noted reflects principal only. See Note 8 for additional information on the sale of this interest.

(n) All guarantees of LKE, on a consolidated basis, also apply to PPL on a consolidated basis for financial reporting purposes.

(o) LKE provides certain indemnifications, the most significant of which relate to the termination of the WKE lease in July 2009. These guarantees cover the due and punctual payment, performance and discharge by each party of its respective present and future obligations. The most comprehensive of these guarantees is the LKE guarantee covering operational, regulatory and environmental commitments and indemnifications made by WKE under the WKE Transaction Termination Agreement. This guarantee has a term of 12 years ending July 2021, and a cumulative maximum exposure of $200 million. Certain items such as non-excluded government fines and penalties fall outside the cumulative cap. Another guarantee with a maximum exposure of $100 million covering other indemnifications expires in 2023. Certain matters are currently under discussion among the parties, including one matter currently in arbitration and a further matter for which LKE is contesting the applicability of the indemnification requirement. The matter in arbitration may be ruled upon during early 2012, which ruling may result in increases or decreases to the liability estimate LKE has currently recorded. The ultimate outcome of both matters cannot be predicted at this time. Additionally, LKE has indemnified various third parties related to historical obligations for other divested subsidiaries and affiliates. The indemnifications vary by entity and the maximum amount limits range from being capped at the sale price to no specified maximum; however, LKE is not aware of formal claims under such indemnities made by any party at this time. LKE could be required to perform on these indemnifications in the event of covered losses or liabilities being claimed by an indemnified party. No additional material loss is anticipated by reason of such indemnification.

(p) All guarantees of LG&E and KU also apply to LKE on a consolidated basis for financial reporting purposes.

(q) As described in the "Energy Purchase Commitments" section of this footnote, pursuant to a power purchase agreement with OVEC, LG&E and KU are obligated to pay a demand charge which includes, among other charges, decommissioning costs, postretirement and post employment benefits. The demand charge is expected to cover the full cost of these items over the term of the contract. However, in the event there is a shortfall in covering these costs, LG&E and KU are obligated to pay their share of the excess.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU and their subsidiaries provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, PPL and its subsidiaries have not made any significant payments with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage requires a maximum $4 million deductible per occurrence and provides maximum aggregate coverage of $200 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

PLR Contracts/Purchase of Accounts Receivable *(PPL Energy Supply and PPL Electric)*

PPL Electric holds competitive solicitations for PLR generation supply. See Note 10 for additional information on the solicitations. PPL EnergyPlus has been awarded a portion of the supply. PPL Electric's purchases from PPL EnergyPlus totaled $5 million and $15 million for the three and nine months ended September 30, 2011 and $71 million and $250 million during the same periods in 2010, and are included in the Statements of Income as "Wholesale energy marketing to affiliate" by PPL Energy Supply and as "Energy purchases from affiliate" by PPL Electric.

Under the standard Supply Master Agreement for the bid solicitation process, PPL Electric requires all suppliers to post collateral once credit exposures exceed defined credit limits. In no instance is PPL Electric required to post collateral to suppliers under these supply contracts. PPL EnergyPlus is required to post collateral with PPL Electric: (a) when the market price of electricity to be delivered by PPL EnergyPlus exceeds the contract price for the forecasted quantity of electricity to be delivered and (b) this market price exposure exceeds a contractual credit limit. Based on the current credit rating of PPL Energy Supply, as guarantor, this credit limit is $35 million at September 30, 2011.

PPL Electric's customers may elect to procure generation supply from an alternative supplier. See Note 2 for additional information regarding PPL Electric's purchases of accounts receivable from alternative suppliers, including PPL EnergyPlus.

At September 30, 2011, PPL Energy Supply had a net credit exposure of $16 million to PPL Electric from its commitment as a PLR supplier and from the sale of its accounts receivable to PPL Electric.

Wholesale Sales and Purchases *(LG&E and KU)*

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are recorded by each company as intercompany wholesale sales and purchases in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded by each company at a price equal to the seller's variable cost. Savings realized from such intercompany electricity purchasing, instead of generating from their own higher cost units or purchasing from the market, are shared equally between the two companies. The volume of energy each company has to sell to the other is dependent on its native load needs and its available generation.

Intercompany electric revenues and energy purchases for the periods ended September 30 were as follows.

	Three Months		Nine Months	
	2011 Successor	2010 Predecessor	2011 Successor	2010 Predecessor
LG&E sales and KU purchases	$ 17	$ 23	$ 61	$ 71
LG&E purchases and KU sales	7	3	25	13

Allocations of PPL Services Costs *(PPL Energy Supply, PPL Electric and LKE)*

PPL Services provides corporate functions such as financial, legal, human resources and information technology services. PPL Services charges the respective PPL subsidiaries for the cost of certain services when they can be specifically identified. The cost of services that is not directly charged to PPL subsidiaries is allocated to applicable subsidiaries based on an average of the subsidiaries' relative invested capital, operation and maintenance expenses and number of employees. PPL Services allocated the following amounts, which PPL management believes are reasonable, including amounts applied to accounts that are further distributed between capital and expense for the periods ended September 30.

	Three Months		Nine Months	
	2011	**2010**	**2011**	**2010**
PPL Energy Supply	$ 44	$ 55	$ 138	$ 170
PPL Electric	34	36	108	101
LKE	3	n/a	12	n/a

Intercompany Billings *(LG&E and KU)*

LG&E and KU Services Company provides LG&E and KU with a variety of centralized administrative, management and support services. Associated charges include payroll taxes paid by LG&E and KU Services Company on behalf of LG&E and KU, labor and burdens of LG&E and KU Services Company employees performing services for LG&E and KU, coal purchases and other vouchers paid by LG&E and KU Services Company on behalf of LG&E and KU. The cost of these services is directly charged to the company, or for general costs which cannot be directly attributed, charged based on predetermined allocation factors, including the following ratios: number of customers, total assets, revenues, number of employees and/or other statistical information. These costs are charged on an actual cost basis.

In addition, LG&E and KU provide services to each other and to LG&E and KU Services Company. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E and KU are reimbursed through LG&E and KU Services Company.

LG&E and KU Services Company allocated these amounts, which LKE management believes are reasonable, including amounts that are further distributed between capital and expense for the periods ended September 30. Intercompany billings for the periods ended September 30 were as follows.

	Three Months		Nine Months	
	2011	**2010**	**2011**	**2010**
	Successor	**Predecessor**	**Successor**	**Predecessor**
LG&E and KU Services Company billing to LG&E	$ 51	$ 42	$ 134	$ 153
LG&E and KU Services Company billing to KU	44	53	148	170
LG&E billings to KU	26	28	82	47
KU billings to LG&E				1

Intercompany Borrowings

(PPL Energy Supply)

A PPL Energy Supply subsidiary holds revolving lines of credit from certain affiliates. There were no balances outstanding at September 30, 2011 and December 31, 2010. Interest earned on the borrowings was not significant for the three months ended September 30, 2011 and for the three and nine months ended September 30, 2010. For the nine months ended September 30, 2011, interest earned on the borrowings was $6 million, substantially all of which was attributable to borrowings by PPL Energy Funding that had an average interest rate of 3.73% for the nine months ended September 30, 2011.

(LKE)

After PPL's acquisition of LKE in November 2010, LKE held a note receivable from a PPL affiliate. At September 30, 2011, $53 million was outstanding compared with $61 million at December 31, 2010. The interest rate on the outstanding borrowing at September 30, 2011, was 2.22%. During the three and nine months ended September 30, 2011, interest income on this note was not significant.

LKE maintains a $300 million revolving line of credit with a PPL Energy Supply subsidiary whereby LKE can borrow funds on a short-term basis at market-based rates. The interest rates on borrowings are equal to one-month LIBOR plus a spread. There was no balance outstanding at September 30, 2011 or December 31, 2010.

Interest expense incurred on the revolving line of credit with the PPL Energy Supply subsidiary was not significant for the three and nine months ended September 30, 2011.

Prior to PPL's acquisition of LKE in November 2010, LKE had revolving credit facilities and several short-term and long-term loans with its former E.ON AG affiliates. During the three and nine months ended September 30, 2010, LKE incurred interest expense on these debt arrangements of $39 million and $118 million which is included in the Statements of Income as "Interest Expense with Affiliate." The consolidated debt had a weighted-average interest rate of 2.06% at September 30, 2010. Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

(LG&E)

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $400 million at market-based rates (based on highly-rated commercial paper issues). At September 30, 2011, there was no balance outstanding. At December 31, 2010, $12 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%.

Interest expense incurred on the money pool agreement with LKE and/or KU was not significant for the three and nine months ended September 30, 2011 and 2010.

Prior to PPL's acquisition of LKE in November 2010, LG&E had long-term loans from its former E.ON AG affiliates. During the three and nine months ended September 30, 2010, LG&E incurred interest expense related to these debt arrangements of $6 million and $20 million. The long-term loans had a weighted-average interest rate of 5.49% at September 30, 2010. Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

(KU)

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to $400 million at market-based rates (based on highly rated commercial paper issues). At September 30, 2011, there was no balance outstanding. At December 31, 2010, $10 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%.

Interest expense incurred on the money pool agreement with LKE and/or LG&E was not significant for the three and nine months ended September 30, 2011 and 2010.

Prior to PPL's acquisition of LKE in November 2010, KU had long-term loans from its former E.ON AG affiliates. During the three and nine months ended September 30, 2010, KU incurred interest expense on these debt arrangements of $18 million and $55 million. The long-term loans had a weighted-average interest rate of 5.50% at September 30, 2010. Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

(PPL Energy Supply)

Trademark Royalties

A PPL subsidiary owns PPL trademarks and bills certain affiliates for their use. PPL Energy Supply was allocated $10 million and $30 million of this license fee for the three and nine months ended September 30, 2011 and 2010. These allocations are primarily included in "Other operation and maintenance" on the Statements of Income.

Distribution of Interest in PPL Global to Parent

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent, PPL Energy Funding. See Note 8 for additional information.

Intercompany Insurance *(PPL Electric)*

PPL Power Insurance Ltd. (PPL Power Insurance) is a subsidiary of PPL that provides insurance coverage to PPL and its subsidiaries for property damage, general/public liability and workers' compensation.

Due to damages resulting from several PUC-reportable storms that occurred during the three and nine months ended September 30, 2011, PPL Electric has exceeded its deductible for the 2011 policy year. Probable recoveries on insurance claims with PPL Power Insurance of $12 million and $26.5 million were recorded during the three and nine months ended September 30, 2011, of which $7 million and $16 million were included in "Other operation and maintenance" on the Statement of Income. The remainder was recorded in PP&E on the Balance Sheet.

12. Other Income (Expense) - net

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The breakdown of "Other Income (Expense) - net" for the periods ended September 30 was:

	Three Months		Nine Months	
	2011	2010	2011	2010
PPL				
Other Income				
Earnings on securities in NDT funds	$ 2	$ 4	$ 20	$ 15
Interest income	1	3	5	4
AFUDC	2	1	5	3
Net hedge gains associated with the 2011 Bridge Facility (a)			55	
Gain on redemption of debt (b)	22		22	
Miscellaneous - Domestic	3	1	10	5
Miscellaneous - International			1	1
Total Other Income	30	9	118	28
Other Expense				
Economic foreign currency exchange contracts	(11)	1	(11)	(1)
Charitable contributions	2		7	2
Cash flow hedges (c)		29		29
LKE other acquisition-related costs		4		11
WPD Midlands other acquisition-related costs			36	
Foreign currency loss on 2011 Bridge Facility (d)			57	
U.K. stamp duty tax			21	
Miscellaneous - Domestic	2	1	7	4
Miscellaneous - International			3	1
Total Other Expense	(7)	35	120	46

Other Expense				
Charitable contributions			2	1
Miscellaneous				2
Total Other Expense			2	3
Other Income (Expense) - net		$ 29	$	$ 17

(a) Represents a gain on foreign currency forward contracts that hedged the repayment of the 2011 Bridge Facility borrowing.
(b) In July 2011, as a result of PPL Electric's redemption of 7.125% Senior Secured Bonds due 2013, PPL recorded a gain on the accelerated amortization of the fair value adjustment to the debt recorded in connection with previously settled fair value hedges.
(c) As a result of the net proceeds from the sale of certain non-core generation facilities, coupled with the monetization of full-requirement sales contracts, debt that had been planned to be issued by PPL Energy Supply was no longer needed. As a result, hedge accounting associated with interest rate swaps entered into by PPL in anticipation of a debt issuance by PPL Energy Supply was discontinued. Associated net losses were reclassified from AOCI into earnings.
(d) Represents a foreign currency loss related to the repayment of the 2011 Bridge Facility borrowing.

"Other Income (Expense) - net" for the three and nine months ended September 30, 2011 and 2010 for PPL Electric is primarily AFUDC. KU amounts are not significant.

13. Fair Value Measurements and Credit Concentration

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). PPL and its subsidiaries use, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

(*PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

PPL and its subsidiaries recognize transfers between levels at end-of-reporting-period values.

Price Risk Management Assets/Liabilities - Energy Commodities

Energy commodity contracts are generally valued using the income approach, except for exchange-traded derivative gas, oil and emission allowance contracts, which are valued using the market approach and are classified as Level 1. When observable inputs are used to measure all or most of the value of a contract, the contract is classified as Level 2. Over-the-counter (OTC) contracts are valued using quotes obtained from an exchange, binding and non-binding broker quotes, prices posted by ISOs or published tariff rates. Furthermore, PPL and its subsidiaries obtain independent quotes from the market to validate the forward price curves. OTC contracts include forwards, swaps, options and structured deals for electricity, gas, oil and/or emission allowances and may be offset with similar positions in exchange-traded markets. To the extent possible, fair value measurements utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. For example, the fair value of a structured deal that delivers power to an illiquid delivery point may be measured by valuing the nearest liquid trading point plus the value of the basis between the two points. The basis input may be from market quotes, FTR prices or historical prices.

When unobservable inputs are significant to the fair value measurement, a contract is classified as Level 3. Additionally, Level 2 and Level 3 fair value measurements include adjustments for credit risk based on PPL's own creditworthiness (for net liabilities) and its counterparties' creditworthiness (for net assets). PPL's credit department assesses all reasonably available market information and probabilities of default used to calculate the credit adjustment. PPL assumes that observable market prices include sufficient adjustments for liquidity and modeling risks, but for Level 3 fair value measurements, PPL also assesses the need for additional adjustments for liquidity or modeling risks. The contracts classified as Level 3 represent contracts for which delivery is at a location where pricing is unobservable, the delivery dates are beyond the dates for which independent prices are available or for certain power basis positions, which PPL generally values using historical settlement prices to project forward prices.

In certain instances, energy commodity contracts are transferred between Level 2 and Level 3. The primary reasons for the transfers during 2011 and 2010 were changes in the availability of market information and changes in the significance of the unobservable portion of the contract. As the delivery period of a contract becomes closer, market information may become available. When this occurs, the model's unobservable inputs are replaced with observable market information.

Price Risk Management Assets/Liabilities - Interest Rate Swaps/Foreign Currency Exchange Contracts/Cross-Currency Swaps

To manage their interest rate risk, PPL and its subsidiaries generally use interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. To manage their foreign currency exchange risk, PPL and its subsidiaries generally use foreign currency exchange contracts such as forwards and options and cross-currency swaps that contain characteristics of both interest rate and foreign currency exchange contracts. PPL and its subsidiaries use an income approach to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates) and forward foreign currency exchange rates (e.g., GBP and Euro), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, PPL and its subsidiaries cannot practicably obtain market information to value credit risk and therefore rely on their own models. These models use projected probabilities of default based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. Certain cross-currency contracts were transferred to Level 3 due to the significance of the credit adjustment required at September 30, 2011, resulting from the longer average terms of these contracts.

NDT Funds *(PPL and PPL Energy Supply)*

PPL and PPL Energy Supply generally use the market approach to measure the fair value of equity securities held in the NDT funds.

- The fair value measurements of equity securities classified as Level 1 are based on quoted prices in active markets and are comprised of securities that are representative of the Wilshire 5000 index, which is invested in approximately 70% large-cap stocks and 30% mid/small-cap stocks.

- Investments in commingled equity funds are classified as Level 2 and represent securities that track the S&P 500 index and the Wilshire 4500 index. These fair value measurements are based on firm quotes of net asset values per share, which are not obtained from a quoted price in an active market.

Debt securities are generally measured using a market approach, including the use of matrix pricing. Common inputs include reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as benchmark yields, credit valuation adjustments, reference data from market research publications, monthly payment data, collateral performance and new issue data.

The debt securities held by the NDT funds at September 30, 2011 have a weighted-average coupon of 4.53% and a weighted-average duration of five years.

Auction Rate Securities *(PPL and PPL Energy Supply)*

PPL's and PPL Energy Supply's auction rate securities include Federal Family Education Loan Program guaranteed student loan revenue bonds, as well as various municipal bond issues. At September 30, 2011, contractual maturities for these auction rate securities were a weighted average of approximately 24 years. PPL and PPL Energy Supply do not have significant exposure to realize losses on these securities; however, auction rate securities are classified as Level 3 because failed auctions limit the amount of observable market data that is available for measuring the fair value of these securities.

The fair value of auction rate securities is estimated using an income approach with inputs for the underlying structure and credit quality of each security; the present value of future interest payments, estimated based on forward rates of the SIFMA Index, and principal payments discounted using interest rates for bonds with a credit rating and remaining term to maturity similar to the stated maturity of the auction rate securities; and the impact of auction failures or redemption at par.

Nonrecurring Fair Value Measurements

(PPL and PPL Energy Supply)

The following nonrecurring fair value measurements occurred during the reporting periods, resulting in asset impairments:

	Carrying Amount (a)	Fair Value Measurements Using Level 2	Level 3	Loss (b)
Sulfur dioxide emission allowances (c):				
September 30, 2011	$ 1			$ 1
March 31, 2011	1			1
September 30, 2010	6		$ 2	4
June 30, 2010	11		3	8
March 31, 2010	13		10	3
RECs (c):				
September 30, 2011	1			1
June 30, 2011	2	$ 1		1
March 31, 2011	3			3
Certain non-core generation facilities:				
September 30, 2010	473	381		96

(a) Represents carrying value before fair value measurement.
(b) Losses on sulfur dioxide emission allowances and RECs were recorded in the Supply segment and included in "Other operation and maintenance" on the Statements of Income. Losses on certain non-core generation facilities were recorded in the Supply segment and included in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income.
(c) Current and long-term sulfur dioxide emission allowances and RECs are included in "Other intangibles" in their respective areas on the Balance Sheets.

Sulfur Dioxide Emission Allowances

Due to declines in market prices, PPL Energy Supply assessed the recoverability of sulfur dioxide emission allowances not expected to be consumed. When available, observable market prices were used to value the sulfur dioxide emission allowances. When observable market prices were not available, fair value was modeled using prices from observable transactions and appropriate discount rates. The modeled values were significant to the overall fair value measurement, resulting in the Level 3 classification.

RECs

Due to declines in forecasted full-requirement obligations in certain markets as well as declines in market prices, PPL Energy Supply assessed the recoverability of certain RECs not expected to be used. Observable market prices (Level 2) were used to value the RECs.

Certain Non-Core Generation Facilities

Certain non-core generation facilities met the held for sale criteria at September 30, 2010. As a result, net assets held for sale were written down to their estimated fair value less cost to sell. The fair value in the table above excludes estimated costs to sell and was based on the negotiated sales price (achieved through an active auction process). See Note 8 for additional information on the completed sale.

Financial Instruments Not Recorded at Fair Value *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

The carrying amounts of contract adjustment payments related to the 2010 Purchase Contract component of the 2010 Equity Units, the 2011 Purchase Contract component of the 2011 Equity Units, and long-term debt on the Balance Sheets and their estimated fair value are set forth below. The fair value of these instruments was estimated using an income approach by discounting future cash flows at estimated current cost of funding rates. The effect of third-party credit enhancements is not included in the fair value measurement.

	September 30, 2011 Carrying Amount	Fair Value	December 31, 2010 Carrying Amount	Fair Value
PPL				
Contract adjustment payments (a)	$ 220	$ 220	$ 146	$ 148
Long-term debt	18,177	19,369	12,663	12,868
PPL Energy Supply				
Long-term debt	3,025	3,416	5,589	5,919
PPL Electric				
Long-term debt	1,718	2,044	1,472	1,578
LKE				
Long-term debt	4,075	4,332	3,825	3,607
LG&E				
Long-term debt	1,112	1,166	1,112	1,069
KU				
Long-term debt	1,841	2,011	1,841	1,728

(a) Included in "Other current liabilities" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

The carrying value of short-term debt (including notes between affiliates), when outstanding, represents or approximates fair value due to the variable interest rates associated with the financial instruments. The carrying value of held-to-maturity, short-term investments approximates fair value due to the liquid nature and short-term duration of these instruments.

Credit Concentration Associated with Financial Instruments

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL and its subsidiaries enter into contracts with many entities for the purchase and sale of energy. Many of these contracts qualify for NPNS and as such, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 14 for information on credit policies used by PPL and its subsidiaries to manage credit risk, including master netting arrangements and collateral requirements.

(PPL)

At September 30, 2011, PPL had credit exposure of $2.1 billion from energy trading partners, excluding the effects of netting arrangements and collateral. As a result of netting arrangements and collateral, PPL's credit exposure was reduced to $766 million. One of the counterparties accounted for 15% of the exposure, and the next highest counterparty accounted for 12% of the exposure. Ten counterparties accounted for $519 million, or 68%, of the net exposure. As of September 30, 2011, all of these counterparties had investment grade credit ratings from S&P or Moody's; however, subsequent to September 30, 2011, the largest counterparty, with a long-term contract, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. At September 30, 2011, accounts receivable from this counterparty, net of collateral, was not significant.

(PPL Energy Supply)

At September 30, 2011, PPL Energy Supply had credit exposure of $2.1 billion from energy trading partners, excluding exposure from related parties and the effects of netting arrangements and collateral. As a result of netting arrangements and collateral, this credit exposure was reduced to $763 million. One of these counterparties accounted for 16% of the exposure, and the next highest counterparty accounted for 12% of the exposure. Ten counterparties accounted for $519 million, or 68%, of the net exposure. As of September 30, 2011, all of these counterparties had investment grade credit ratings from S&P or Moody's; however, subsequent to September 30, 2011, the largest counterparty, with a long-term contract, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. At September 30, 2011, accounts receivable from this counterparty, net of collateral, was not significant.

(PPL Electric)

At September 30, 2011, PPL Electric had no credit exposure under energy supply contracts (including its supply contracts with PPL EnergyPlus).

(LKE, LG&E and KU)

At September 30, 2011, LKE's, LG&E's and KU's credit exposure was not significant.

14. Derivative Instruments and Hedging Activities

Risk Management Objectives

(PPL Energy Supply)

As described in Notes 1 and 8, in January 2011, PPL Energy Supply distributed its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. Therefore, effective January 2011, PPL Energy Supply is no longer subject to interest rate and foreign currency exchange risk associated with investments in U.K. affiliates.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL has a risk management policy approved by the Board of Directors to manage market risk and counterparty credit risk. The RMC, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, verification of risk and transaction limits, VaR analyses, portfolio stress tests, gross margin at risk analyses, sensitivity analyses and daily portfolio reporting, including open positions, determinations of fair value and other risk management metrics. PPL completed its acquisitions of LKE in November 2010 and WPD Midlands in April 2011. During the second quarter of 2011, the RMC formally approved the inclusion of LKE's risk programs under the risk management policy. WPD Midlands adhered to the applicable risk management programs, including interest rate and foreign currency exchange programs, from the date of acquisition.

Market risk is the potential loss PPL and its subsidiaries may incur as a result of price changes associated with a particular financial or commodity instrument. PPL and its subsidiaries utilize forward contracts, futures contracts, options, swaps and structured deals such as tolling agreements as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices, volumes of full-requirement sales contracts, basis prices, interest rates and/or foreign currency exchange rates. All derivatives are recognized on the Balance Sheets at their fair value, unless they qualify for NPNS.

PPL is exposed to market risk from foreign currency exchange risk associated with its investments in U.K. affiliates, as well as additional market risk from certain subsidiaries, as discussed below.

PPL and PPL Energy Supply are exposed to market risk from:

- commodity price, basis and volumetric risks for energy and energy-related products associated with the sale of electricity from its generating assets and other electricity marketing activities (including full-requirement sales contracts) and the purchase of fuel and fuel-related commodities for generating assets, as well as for proprietary trading activities;
- interest rate and price risk associated with debt used to finance operations, as well as debt and equity securities in NDT funds and defined benefit plans; and
- foreign currency exchange rate risk associated with purchases of equipment in currencies other than U.S. dollars.

PPL and PPL Electric are exposed to market and volumetric risks from PPL Electric's obligation as PLR. The PUC has approved a cost recovery mechanism that allows PPL Electric to pass through to customers the cost associated with fulfilling its PLR obligation. This cost recovery mechanism substantially eliminates PPL Electric's exposure to market risk. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement supply agreements for its customers. These supply agreements transfer the volumetric risk associated with the PLR obligation to the energy suppliers.

By definition, the regulatory environments for PPL's other regulated entities, LKE (through its subsidiaries LG&E and KU) and WPD, significantly mitigates market risk. LG&E's and KU's rates are set to permit the recovery of prudently incurred costs, including certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms provide for timely recovery of market price and volumetric fluctuations associated with these expenses. LG&E and KU primarily utilize forward financial transactions to manage price risk associated with expected economic generation capacity in excess of expected load requirements. WPD does not have supply risks as it is only in the distribution business.

LG&E also utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on interest expense. WPD utilizes over-the-counter cross currency swaps to limit exposure to market fluctuations on interest and principal payments from foreign currency exchange rates.

Credit risk is the potential loss PPL and its subsidiaries may incur due to a counterparty's non-performance, including defaults on payments and energy commodity deliveries.

PPL is exposed to credit risk from interest rate and foreign currency derivatives with financial institutions, as well as additional credit risk through certain of its subsidiaries, as discussed below.

PPL and PPL Energy Supply are exposed to credit risk from commodity derivatives with their energy trading partners, which include other energy companies, fuel suppliers and financial institutions.

PPL and PPL Electric are exposed to credit risk from PPL Electric's supply agreements for its PLR obligation.

LKE and LG&E are exposed to credit risk from interest rate derivatives with financial institutions.

The majority of PPL's and its subsidiaries' credit risk stems from PPL subsidiaries' commodity derivatives for multi-year contracts for energy sales and purchases. If PPL Energy Supply's counterparties fail to perform their obligations under such contracts and PPL Energy Supply could not replace the sales or purchases at the same prices as those under the defaulted contracts, PPL Energy Supply would incur financial losses. Those losses would be recognized immediately or through lower revenues or higher costs in future years, depending on the accounting treatment for the defaulted contracts. In the event a supplier of LKE (through its subsidiaries LG&E and KU) or PPL Electric defaults on its obligation, those entities would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by these entities would be recoverable from customers in future rates.

PPL and its subsidiaries have credit policies to manage their credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request the additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade or their exposures exceed an established credit limit. See Note 13 for credit concentration associated with financial instruments.

Master Netting Arrangements

PPL and its subsidiaries have elected not to offset net derivative positions in the Financial Statements. Accordingly, PPL and its subsidiaries do not offset such derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL's and PPL Energy Supply's obligation to return counterparty cash collateral under master netting arrangements was $64 million and $338 million at September 30, 2011 and December 31, 2010.

PPL Electric, LKE, LG&E and KU had no obligation to return cash collateral under master netting arrangements at September 30, 2011 and December 31, 2010.

PPL Energy Supply, PPL Electric and KU had not posted any cash collateral under master netting arrangements at September 30, 2011 and December 31, 2010.

PPL, LKE and LG&E had posted cash collateral under master netting arrangements of $30 million at September 30, 2011 and $19 million at December 31, 2010.

Commodity Price Risk (Non-trading)

(PPL and PPL Energy Supply)

Commodity price and basis risks are among PPL's and PPL Energy Supply's most significant risks due to the level of investment that PPL and PPL Energy Supply maintain in their competitive generation assets, as well as the extent of their marketing and proprietary trading activities. Several factors influence price levels and volatilities. These factors include, but are not limited to, seasonal changes in demand, weather conditions, available generating assets within regions, transportation/transmission availability and reliability within and between regions, market liquidity, and the nature and extent of current and potential federal and state regulations.

PPL and PPL Energy Supply enter into financial and physical derivative contracts, including forwards, futures, swaps and options, to hedge the price risk associated with electricity, gas, oil and other commodities. Certain contracts qualify for NPNS or are non-derivatives and are therefore not reflected in the financial statements until delivery. PPL and PPL Energy Supply segregate their remaining non-trading activities into two categories: cash flow hedge activity and economic activity. In addition, the monetization of certain full-requirements sales contracts in 2010 impacted both the cash flow hedge and economic activity, as discussed below.

Monetization of Certain Full-Requirement Sales Contracts

In early July 2010, in order to raise additional cash for the LKE acquisition, PPL Energy Supply monetized certain full-requirement sales contracts that resulted in cash proceeds of $156 million.

The decision in late June 2010 to monetize these contracts triggered certain accounting for the second quarter of 2010:

- A portion of these sales contracts had previously been accounted for as NPNS and received accrual accounting treatment. The related purchases to supply these sales contracts were accounted for as cash flow hedges, with the effective portion of the change in fair value being recorded in AOCI and the ineffective portion recorded in "Energy purchases - Unrealized economic activity."

- The rest of the sales contracts, along with their related hedges, had previously been accounted for as economic activity by PPL Energy Supply and the change in fair value of the sales contracts was recorded in "Wholesale energy marketing - Unrealized economic activity" and the change in fair value of the purchase contracts was recorded in "Energy purchases - Unrealized economic activity" on the Statement of Income.

- At June 30, 2010, PPL Energy Supply could no longer assert that it was probable that any contracts with these counterparties would result in physical delivery. Therefore, the fair value of the NPNS contracts of $66 million was recorded on the Balance Sheet in "Price risk management assets," with a corresponding gain to "Wholesale energy marketing - Unrealized economic activity." Of this amount, $16 million was related to full-requirement sales contracts that had not been monetized. The corresponding cash flow hedges were dedesignated and all amounts previously recorded in AOCI were reclassified to earnings. This resulted in a pre-tax reclassification of $(87) million of gains (losses) from AOCI into "Energy purchases - Unrealized economic activity" on the Statement of Income. An additional charge of $(23) million was also recorded at June 30, 2010 in "Wholesale energy marketing - Unrealized economic activity" to reflect the fair value of the sales contracts previously accounted for as economic activity.

- The net result of these transactions, excluding the full-requirement sales contracts that have not been monetized, was a gain (loss) of $(60) million, or $(36) million after tax, for the second quarter of 2010.

In late July 2010, PPL Energy Supply again monetized certain full-requirement sales contracts that resulted in additional cash proceeds of $93 million. The monetization in late July triggered certain accounting that impacted the third quarter of 2010.

- These sales contracts had previously been accounted for as NPNS and received accrual accounting treatment. The related purchases to supply these sales contracts were accounted for as cash flow hedges, with the effective portion of the change in fair value being recorded in AOCI and the ineffective portion recorded in "Energy purchases - Unrealized economic activity" on the Statement of Income.

- The $93 million received from the monetization of the NPNS contracts was recorded as a gain to "Wholesale energy marketing - Realized" on the Statement of Income. The corresponding cash flow hedges were dedesignated and all amounts previously recorded in AOCI were reclassified to earnings. This resulted in a pre-tax reclassification of $(61) million of gains (losses) from AOCI into "Energy purchases - Unrealized economic activity" on the Statement of Income.

- The net result of these transactions was a gain of $32 million, or $19 million after tax, for the three months ended September 30, 2010.

The proceeds of $249 million from these monetizations are reflected in the Statement of Cash Flows as a component of "Net cash provided by operating activities."

Cash Flow Hedges

Many derivative contracts have qualified for hedge accounting so that the effective portion of a derivative's gain or loss is deferred in AOCI and reclassified into earnings when the forecasted transaction occurs. The cash flow hedges that existed at September 30, 2011 range in maturity through 2016. At September 30, 2011, the accumulated net unrecognized after-tax gains (losses) that are expected to be reclassified into earnings during the next 12 months were $309 million for PPL and PPL Energy Supply. Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedge transaction is probable of not occurring. For the three and nine months ended September 30, 2011, such reclassifications were insignificant. For the three and nine months ended September 30, 2010, such reclassifications were after tax (losses) of $(36) million and $(89) million. The after-tax (losses) recorded in both periods in 2010 were primarily due to the monetization of certain full-requirement sales contracts, for which the associated hedges were no longer required, as discussed above.

For the three and nine months ended September 30, 2011, hedge ineffectiveness associated with energy derivatives was, after-tax, a gain (loss) of $(3) million and $(17) million. For the three and nine months ended September 30, 2010, hedge ineffectiveness associated with energy derivatives was, after-tax, a gain (loss) of $8 million and $(16) million.

In addition, when cash flow hedge positions fail hedge effectiveness testing, hedge accounting is not permitted in the quarter in which this occurs and, accordingly, the entire change in fair value for the periods that failed is recorded to the Statement of Income. Certain power and gas cash flow hedge positions failed effectiveness testing during 2008 and early 2009 which resulted in significant gains recorded to the Statement of Income. However, these positions were not dedesignated as hedges, as prospective regression analysis demonstrated that these hedges were expected to be highly effective over their term.

During the first quarter of 2010, after-tax gains (losses) of $(82) million were recognized in earnings as a result of the reversals. Effective April 1, 2010, clarifying accounting guidance was issued that precludes the reversal of previously recognized gains/losses resulting from hedge failures. By the end of the first quarter of 2010, all previously recorded hedge ineffectiveness gains resulting from hedge failures had reversed; therefore, the clarifying accounting guidance did not have a significant impact on the results of operation for PPL or PPL Energy Supply.

Economic Activity

Certain derivative contracts economically hedge the price and volumetric risk associated with electricity, gas, oil and other commodities but do not receive hedge accounting treatment. These derivatives hedge a portion of the economic value of PPL's and PPL Energy Supply's competitive generation assets and unregulated full-requirement and retail contracts, which are subject to changes in fair value due to market price volatility and volume expectations. Additionally, economic activity includes the ineffective portion of qualifying cash flow hedges (see "Cash Flow Hedges" above). The derivative contracts in this category that existed at September 30, 2011 range in maturity through 2017.

Examples of economic activity include certain purchase contracts used to supply full-requirement sales contracts; FTRs or basis swaps used to hedge basis risk associated with the sale of competitive generation or supplying unregulated full-requirement sales contracts; spark spreads (sale of electricity with the simultaneous purchase of fuel); retail electric and gas activities; and fuel oil swaps used to hedge price escalation clauses in coal transportation and other fuel-related contracts. PPL Energy Supply also uses options, which include the sale of call options and the purchase of put options tied to a particular generating unit. Since the physical generating capacity is owned, the price exposure is limited to the cost of the particular generating unit and does not expose PPL Energy Supply to uncovered market price risk.

Activity associated with monetizing certain full-requirement sales contracts is also included in economic activity during the second quarter of 2010. All transactions that previously had been considered cash flow hedges related to these full-requirement sales contracts, but no longer qualified as cash flow hedges, were classified as economic activity at September 30, 2010.

The net fair value of economic positions at September 30, 2011 and December 31, 2010 was a net liability of $218 million and $389 million for PPL Energy Supply. The unrealized gains (losses) for economic activity for the periods ended September 30 are as follows.

	Three Months		Nine Months	
	2011	2010	2011	2010
Operating Revenues				
Unregulated retail electric and gas	$ 4	$ 8	$ 9	$ 16
Wholesale energy marketing	216	52	229	(190)
Operating Expenses				
Fuel	(28)	16	(16)	13
Energy purchases (a)	(176)	(300)	(49)	(418)

(a) During the second quarter of 2010, PPL Energy Supply corrected an error relating to the fair value of a capacity contract (classified as economic activity) due to the use of an incorrect forward capacity curve. PPL Energy Supply's energy purchases were understated for the year ended December 31, 2009 and the first quarter of 2010 by an unrealized amount of $35 million ($20 million after tax or $0.05 per share, basic and diluted, for PPL) and $5 million ($3 million after tax or $0.01 per share, basic and diluted, for PPL). Management concluded that the impacts were not material to first quarter 2010 financial statements of PPL and PPL Energy Supply, and were not material to the financial statements for the full year 2010.

The net gains (losses) recorded in "Wholesale energy marketing" resulted primarily from certain full-requirement sales contracts for which PPL Energy Supply did not elect NPNS, from hedge ineffectiveness, including hedges that failed effectiveness testing, as discussed in "Cash Flow Hedges" above, and from the monetization of certain full-requirement sales contracts. The net gains (losses) recorded in "Energy purchases" resulted primarily from certain purchase contracts to supply the full-requirement sales contracts noted above for which PPL Energy Supply did not elect hedge treatment, from hedge ineffectiveness, including hedges that failed effectiveness testing, and from purchase contracts that no longer hedge the full-requirement sales contracts that were monetized as discussed above in "Monetization of Certain Full-Requirement Sales Contracts."

(PPL, LKE, LG&E and KU)

LG&E and KU primarily utilize forward financial transactions to manage price risk associated with expected economic generation capacity in excess of expected load requirements. Hedge accounting treatment has not been elected for these transactions; therefore, realized and unrealized gains and losses are recorded in the Statements of Income. The derivative contracts in this category that existed at September 30, 2011, range in maturity through 2012.

The net fair value of economic positions for LKE, LG&E and KU at September 30, 2011 and December 31, 2010 was not significant. Unrealized gains (losses) for economic activity for LKE, LG&E and KU for the three and nine months ended September 30, 2011 and 2010 were not significant.

Commodity Price Risk (Trading) *(PPL and PPL Energy Supply)*

PPL Energy Supply also executes energy contracts to take advantage of market opportunities. As a result, PPL Energy Supply may at times create a net open position in its portfolio that could result in significant losses if prices do not move in the manner or direction anticipated. PPL Energy Supply's trading activity is shown in "Net energy trading margins" on the Statements of Income.

Commodity Volumetric Activity

(PPL and PPL Energy Supply)

PPL Energy Supply currently employs four primary strategies to maximize the value of its wholesale energy portfolio. As further discussed below, these strategies include the sales of baseload generation, optimization of intermediate and peaking generation, marketing activities, and proprietary trading activities. The tables within this section present the volumes of PPL Energy Supply's derivative activity, excluding those that qualify for NPNS, unless otherwise noted.

Sales of Baseload Generation

PPL Energy Supply has a formal hedging program for its competitive baseload generation fleet, which includes 7,357 MW of nuclear, coal and hydroelectric generating capacity. The objective of this program is to provide a reasonable level of near-term cash flow and earnings certainty while preserving upside potential of power price increases over the medium term. PPL Energy Supply sells its expected generation output on a forward basis using both derivative and non-derivative instruments. Both are included in the following tables.

The following table presents the expected sales, in GWh, from baseload generation and tolling arrangements that are included in the baseload portfolio based on current forecasted assumptions for 2011-2013. These expected sales could be impacted by several factors, including plant availability.

2011 (a)	2012	2013
13,575	54,675	54,364

(a) Represents expected sales for the balance of the current year.

The following table presents the percentage of expected baseload generation sales shown above that has been sold forward under fixed price contracts and the related percentage of fuel that has been purchased or committed at September 30, 2011.

			Fuel Purchases (c)	
Year	Derivative Sales (a)	Total Power Sales (b)	Coal	Nuclear
2011 (d)	90%	100%	100%	100%
2012	92%	91%	96%	100%
2013 (e)	63%	72%	89%	100%

(a) Excludes non-derivative contracts and contracts that qualify for NPNS. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.
(b) Amount represents derivative and non-derivative contracts. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option. Percentages are based on fixed-price contracts only.
(c) Coal and nuclear contracts receive accrual accounting treatment, as they are not derivative contracts. Percentages are based on both fixed- and variable-priced contracts.
(d) Represents the balance of the current year.
(e) Volumes for derivative sales contracts that deliver in future periods total 3,050 GWh.

In addition to the fuel purchases above, PPL Energy Supply attempts to economically hedge the fuel price risk that is within its fuel-related and coal transportation contracts, which are tied to changes in crude oil or diesel prices. PPL Energy Supply has also entered into contracts to financially hedge the physical sale of oil. The following table presents the net volumes (in thousands of barrels) of derivative (sales)/purchase contracts used in support of these strategies at September 30, 2011.

	2011 (a)	2012	2013 (b)
Oil Swaps	(21)	651	540

(a) Represents the balance of the current year.
(b) Volumes (in thousands of barrels) for derivative contracts used in support of this strategy that deliver in future periods total 120.

Optimization of Intermediate and Peaking Generation

In addition to its competitive baseload generation activities, PPL Energy Supply attempts to optimize the overall value of its competitive intermediate and peaking fleet, which includes 3,395 MW of gas and oil-fired generation. The following table presents the net volumes of derivative (sales)/purchase contracts used in support of this strategy at September 30, 2011.

	Units	2011 (a)	2012	2013 (b)
Power Sales (c)	GWh	(1,127)	(2,006)	(1,224)
Fuel Purchases (c)	Bcf	12.0	13.5	8.2

(a) Represents the balance of the current year.
(b) Volumes for derivative contracts used in support of these strategies that deliver in future periods total (1,632) GWh and 11.0 Bcf.
(c) Included in these volumes are non-options and exercised option contracts that converted to non-option derivative contracts. Volumes associated with option contracts are not significant.

Marketing Activities

PPL Energy Supply's marketing portfolio is comprised of full-requirement sales contracts and their related supply contracts, retail gas and electricity sales contracts and other marketing activities. The full-requirement sales contracts and their related supply contracts make up a significant component of the marketing portfolio. The obligations under the full-requirement sales contracts include supplying a bundled product of energy, capacity, RECs, and other ancillary products. The full-requirement sales contracts PPL Energy Supply is awarded do not provide for specific levels of load, and actual load could vary significantly from forecasted amounts. PPL Energy Supply uses a variety of strategies to hedge its full-requirement sales contracts, including purchasing energy at a liquid trading hub or directly at the load delivery zone, purchasing capacity and RECs in the market and supplying the energy, capacity and RECs with its generation. PPL Energy Supply does not consider RECs to be derivatives; therefore, they are excluded from the table below. The following table presents the volume of (sales)/purchase contracts, excluding FTRs, basis and capacity contracts, used in support of these activities at September 30, 2011.

	Units	2011 (a)	2012	2013
Energy sales contracts (b)	GWh	(4,319)	(13,074)	(5,325)
Related energy supply contracts (b)				
Energy purchases	GWh	2,923	7,425	645
Volumetric hedges (c)	GWh	90	312	43
Generation supply	GWh	1,265	5,457	4,478
Retail gas sales contracts	Bcf	(2.6)	(9.1)	(0.5)
Retail gas purchase contracts	Bcf	2.5	9.1	0.5

(a) Represents the balance of the current year.
(b) Includes NPNS and contracts that are not derivatives, which receive accrual accounting.
(c) PPL Energy Supply uses power and gas options, swaps and futures to hedge the volumetric risk associated with full-requirement sales contracts since the demand for power varies hourly. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.

Proprietary Trading Activity

At September 30, 2011, PPL Energy Supply's proprietary trading positions, excluding FTR, basis and capacity contract activity that is included in the tables below, were not significant.

Other Energy-Related Positions

FTRs and Other Basis Positions

PPL Energy Supply buys and sells FTRs and other basis positions to mitigate the basis risk between delivery points related to the sales of its generation, the supply of its full-requirement sales contracts and retail contracts, as well as for proprietary trading purposes. The net volume of derivative FTR and basis (sales)/purchase contracts at September 30, 2011 were:

	Units	2011 (a)	2012	2013 (b)
FTRs	GWh	9,720	15,008	
Power Basis Positions	GWh	(4,022)	(10,828)	(987)
Gas Basis Positions	Bcf	7.7	12.9	(1.0)

(a) Represents the balance of the current year.
(b) Volumes that deliver in future periods are 364 GWh and (2.0) Bcf.

Capacity Positions

PPL Energy Supply buys and sells capacity related to the sales of its generation and the supply of its full-requirement sales contracts. These contracts qualify for NPNS and receive accrual accounting. PPL Energy Supply also sells and purchases capacity for proprietary trading purposes. These contracts are marked to fair value through earnings. The following table presents the net volumes of derivative capacity (sales)/purchase contracts at September 30, 2011.

	Units	2011 (a)	2012	2013 (b)
Capacity	MW-months	(2,944)	(6,422)	(1,384)

(a) Represents the balance of the current year.
(b) Volumes that deliver in future periods are (253) MW-months.

Sales of Excess Regulated Generation (PPL, LKE, LG&E and KU)

LKE and its subsidiaries manage the price risk of expected economic generation capacity in excess of expected load requirements using market-traded forward contracts. At September 30, 2011, the net volume of electricity based financial derivatives outstanding to hedge excess regulated generation was insignificant for LKE, LG&E and KU.

Interest Rate Risk

Cash Flow Hedges *(PPL and PPL Energy Supply)*

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. PPL enters into financial interest rate swap contracts to hedge these exposures. These interest rate swap contracts mature through 2022 and had a notional value of $550 million at September 30, 2011.

Through PPL, PPL WEM holds a notional position in cross-currency interest rate swaps totaling $960 million that mature through 2021 to hedge the interest payments and principal of the U.S. dollar-denominated senior notes issued by PPL WEM in April 2011. Additionally, PPL WW holds a notional position in cross-currency interest rate swaps totaling $302 million that mature through December 2028 to hedge the interest payments and principal of its U.S. dollar-denominated senior notes. In 2010, these PPL WW swaps were part of PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding effective January 2011, these swaps are no longer part of PPL Energy Supply's business.

For the three and nine months ended September 30, 2011, hedge ineffectiveness associated with interest rate derivatives was insignificant and a gain (loss) of $(13) million for PPL, of which a gain (loss) of $(5) million was attributable to certain interest rate swaps that failed hedge effectiveness testing during the second quarter of 2011. For the three and nine months ended September 30, 2010, hedge ineffectiveness associated with interest rate derivatives was insignificant for both PPL and PPL Energy Supply.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedged transaction is probable of not occurring. PPL and PPL Energy Supply had no such reclassifications for the three and nine months ended September 30, 2011. As a result of the expected net proceeds from the then anticipated sale of certain non-core generation facilities, coupled with the monetization of certain full-requirement sales contracts, debt that had been planned to be issued by PPL Energy Supply in 2010 was no longer needed. As a result, hedge accounting associated with interest rate swaps entered into by PPL in anticipation of a debt issuance by PPL Energy Supply was discontinued. Net gains (losses) of $(29) million, or $(19) million after tax, were reclassified for the three and nine months ended September 30, 2010. PPL Energy Supply had no such reclassifications for the three and nine months ended September 30, 2010.

At September 30, 2011, the accumulated net unrecognized after-tax gains (losses) on qualifying derivatives that are expected to be reclassified into earnings during the next 12 months were $(11) million for PPL. Amounts are reclassified as the hedged interest payments are made.

Fair Value Hedges *(PPL and PPL Energy Supply)*

PPL and PPL Energy Supply are exposed to changes in the fair value of their debt portfolios. To manage this risk, PPL and PPL Energy Supply may enter into financial contracts to hedge fluctuations in the fair value of existing debt issuances due to changes in benchmark interest rates. At September 30, 2011, PPL held contracts that range in maturity through 2047 and had a notional value of $99 million. PPL Energy Supply did not hold any such contracts at September 30, 2011. PPL and PPL Energy Supply did not recognize gains or losses resulting from the ineffective portion of fair value hedges or from a portion of the hedging instrument being excluded from the assessment of hedge effectiveness for the three and nine months ended September 30, 2011 and 2010.

PPL Electric redeemed $400 million of 7.125% Senior Secured Bonds due 2013. As a result of this redemption, PPL recorded a gain (loss) of $22 million, or $14 million after tax, for the three and nine months ended September 30, 2011 in "Other Income (Expense) - net" on the Statement of Income as a result of accelerated amortization of the fair value adjustments to the debt in connection with previously settled fair value hedges. PPL had no such gains or losses for the three and nine months ended September 30, 2010. PPL Energy Supply had no such gains or losses for the three and nine months ended September 30, 2011 and 2010.

Economic Activity

(PPL, LKE and LG&E)

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Beginning in the third quarter of 2010, as a result of a rate case order, realized gains and losses from the swaps are recoverable through regulated rates. Therefore, any subsequent change in fair value of these derivatives is included in regulatory assets and liabilities. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. Prior to the third quarter of 2010, LG&E reclassified amounts previously recorded in AOCI to earnings in the same period during which the forecasted transaction affected earnings. The amounts recorded to regulatory assets for the three and nine months ended September 30, 2011 were $22 million and $23 million. At September 30, 2011, LG&E held contracts with a notional amount of $179 million that range in maturity through 2033. The fair value of these contracts was a liability of $57 million and $34 million at September 30, 2011 and December 31, 2010.

(LKE and LG&E)

The amounts recorded to regulatory assets for the three and nine months ended September 30, 2010 were $59 million.

Foreign Currency Risk

(PPL)

Cash Flow Hedges

At September 30, 2011, there were no existing foreign currency cash flow hedges associated with foreign currency-denominated debt or firm commitments (including those for the purchase of equipment) denominated in foreign currencies. Amounts previously settled and recorded in AOCI are reclassified as the hedged interest payments are made and as the related equipment is depreciated. Insignificant gains are expected to be reclassified into earnings during the next 12 months.

During the three and nine months ended September 30, 2011 and 2010, no cash flow hedges were discontinued because it was probable that the original forecasted transaction would not occur by the end of the originally specified time periods.

Fair Value Hedges

PPL enters into foreign currency forward contracts to hedge the exchange rates associated with firm commitments denominated in foreign currencies; however, at September 30, 2011, there were no existing contracts of this nature and no gains or losses recorded during the three and nine months ended September 30, 2011 and 2010 related to hedge ineffectiveness, or from a portion of the hedging instrument being excluded from the assessment of hedge ineffectiveness, or from hedges of firm commitments that no longer qualified as fair value hedges.

Net Investment Hedges *(PPL and PPL Energy Supply)*

PPL enters into foreign currency contracts on behalf of a subsidiary to protect the value of a portion of its net investment in WPD. In 2010, these contracts were included in PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding, effective January 2011, these contracts are no longer included in PPL Energy Supply's business.

The contracts outstanding at September 30, 2011 had an aggregate notional amount of £65 million (approximately $106 million based on contracted rates). The settlement dates of these contracts range from January 2012 through June 2012. At September 30, 2011, the fair value of these contracts was $5 million. For the three and nine months ended September 30, 2011, PPL recognized insignificant amounts of activity in the foreign currency translation adjustment component of AOCI. For the three and nine months ended September 30, 2010, PPL and PPL Energy Supply recognized insignificant amounts of activity in the foreign currency translation adjustment component of AOCI. At September 30, 2011, PPL included $18 million of accumulated net investment hedge gains (losses), after tax, in the foreign currency translation adjustment component of AOCI. At December 31, 2010, PPL and PPL Energy Supply included $15 million of accumulated net investment hedge gains (losses), after-tax, in AOCI.

Economic Activity

(PPL)

In anticipation of the repayment of a portion of the GBP-denominated borrowings under the 2011 Bridge Facility with U.S. dollar proceeds received from PPL's issuance of common stock and 2011 Equity Units and PPL WEM's issuance of U.S. dollar-denominated senior notes, as discussed in Note 7, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. These trades were settled in April 2011. Gains and losses on these contracts are included in "Other Income (Expense) - net" on the Statement of Income. PPL recorded insignificant losses and $55 million of pre-tax, net gains (losses) for the three and nine months ended September 30, 2011.

(PPL and PPL Energy Supply)

PPL enters into foreign currency contracts on behalf of a subsidiary to economically hedge anticipated earnings denominated in GBP. In 2010, these contracts were included in PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding, effective January 2011, these contracts are no longer included in PPL Energy Supply's business. At September 30, 2011, the total exposure hedged by PPL was £393 million, the net fair value of these positions was $16 million and these contracts had termination dates ranging from October 2011 through November 2012. PPL records gains (losses) on these contracts in "Other Income (Expense) - net" on the Statements of Income. Gains (losses) were $11 million for both the three and nine months ended September 30, 2011 and insignificant for 2010. PPL Energy Supply's 2010 gains (losses), both realized and unrealized, are included in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statement of Income and were insignificant for the three and nine months ended September 30, 2010.

Accounting and Reporting

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless they qualify for NPNS. NPNS contracts for PPL and PPL Energy Supply include full-requirement sales contracts, power purchase agreements and certain retail energy and physical capacity contracts, and for PPL Electric include full-requirement purchase contracts and block purchase contracts. Changes in the derivatives' fair value are recognized currently in earnings unless specific hedge accounting criteria are met, except for the change in fair value of LG&E's interest rate swaps which is recognized as a regulatory asset. See Note 6 for amounts recorded in regulatory assets at September 30, 2011 and December 31, 2010.

See Notes 1 and 19 in PPL and PPL Electric's 2010 Form 10-K, Notes 1 and 15 in PPL Energy Supply's Form 8-K dated June 24, 2011 and Notes 1 and 5 in the annual financial statements included in LKE's, LG&E's and KU's 2011 Registration Statements for additional information on accounting policies related to derivative instruments.

(PPL)

The following table presents the fair value and location of derivative instruments recorded on the Balance Sheets.

	September 30, 2011				December 31, 2010			
	Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments (a)		Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments (a)

Total derivatives	$ 880	$ 83	$ 1,239	$ 1,230	$ 1,113	$ 54	$ 1,460	$ 1,560

(a) $261 million and $326 million of net gains associated with derivatives that were no longer designated as hedging instruments are recorded in AOCI at September 30, 2011 and December 31, 2010.
(b) Represents the location on the Balance Sheet.

The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $491 million and $695 million at September 30, 2011 and December 31, 2010. The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $921 million and $602 million at September 30, 2010 and December 31, 2009.

The following tables present the pre-tax effect of derivative instruments recognized in income, OCI or regulatory assets for the periods ended September 30, 2011.

Total derivatives	$ 819	$ 18	$ 1,222	$ 1,172	$ 1,098	$ 35	$ 1,460	$ 1,515

(a) $261 million and $326 million of net gains associated with derivatives that were no longer designated as hedging instruments are recorded in AOCI at September 30, 2011 and December 31, 2010.

(b) Represents the location on the balance sheet.

The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $539 million and $733 million at September 30, 2011 and December 31, 2010. At September 30, 2011, AOCI reflects the effect of PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, PPL Energy Funding. See Note 8 for additional information. The after-tax balances of accumulated net gains (losses) (excluding net investment hedges) in AOCI were $1.0 billion and $573 million at September 30, 2010 and December 31, 2009.

The following tables present the pre-tax effect of derivative instruments recognized in income or OCI for the periods ended September 30, 2011.

Price Risk Management Assets/Liabilities (a):								
Interest rate swaps				53				32
Total noncurrent				53				32
Total derivatives			$ 1	$ 58				$ 36

(a) Represents the location on the Balance Sheet.

There were no after-tax balances of accumulated net gains (losses) in AOCI at September 30, 2011, December 31, 2010 and September 30, 2010. The after-tax balance of accumulated net gains in AOCI was $5 million at December 31, 2009.

The following tables present the pre-tax effect of derivative instruments recognized in income or regulatory assets for the periods ended September 30, 2011, for the successor.

Derivatives Not Designated as Hedging Instruments:	Location of Gain (Loss) Recognized in Income on Derivatives	Three Months	Nine Months
Interest rate swaps	Interest expense	$ (2)	$ (6)
Commodity contracts	Operating revenues - retail and wholesale	1	(2)
	Total	$ (1)	$ (8)

Derivatives Not Designated as Hedging Instruments:	Location of Gain (Loss) Recognized as Regulatory Liabilities/Assets	Three Months	Nine Months
Interest rate swaps	Regulatory assets	$ (22)	$ (23)

The following tables present the pre-tax effect of derivative instruments recognized in income or regulatory assets for the periods ended September 30, 2010, for the predecessor.

Derivatives Not Designated as Hedging Instruments:	Location of Gain (Loss) Recognized in Income on Derivatives	Three Months	Nine Months
Interest rate swaps	Other income (expense) - net	$ 29	$ 19
Commodity contracts	Operating revenues - retail and wholesale		3
	Total	$ 29	$ 22

Derivatives Not Designated as Hedging Instruments:	Location of Gain (Loss) Recognized as Regulatory Liabilities/Assets	Three Months	Nine Months
Interest rate swaps	Regulatory assets	$ (59)	$ (59)

The gains and losses recognized in income on derivatives associated with commodity contracts for the three-month period ended September 30, 2010 were not significant.

During the nine months ended September 30, 2010, LG&E recorded a pre-tax gain to reverse previously recorded losses of $21 million and $9 million to reflect the reclassification of the ineffective swaps and the terminated swap to a regulatory asset.

The gain on hedging interest rate swaps recognized in OCI for the three and nine months ended September 30, 2010, was $21 million and $17 million. For the three and nine months ended September 30, 2010, the gain on derivatives reclassified from AOCI to regulatory assets was $23 million.

Prior to including the unrealized gains and losses on the effective and ineffective interest rate swaps in regulatory assets, amounts previously recorded in AOCI were reclassified into earnings in the same period during which the hedged forecasted transaction affected earnings. The amount amortized from OCI to income in the three and nine months ended September 30, 2010 was not significant.

(KU)

The gains and losses recognized in income on derivatives associated with commodity contracts were not significant for the three and nine months ended September 30, 2011 and 2010.

Credit Risk-Related Contingent Features *(PPL, PPL Energy Supply, LKE and LG&E)*

Certain of PPL's, PPL Energy Supply's, LKE's and LG&E's derivative contracts contain credit contingent provisions which would permit the counterparties with which PPL, PPL Energy Supply, LKE or LG&E is in a net liability position to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, PPL Energy Supply, LKE, LG&E, or certain of their subsidiaries. Most of these provisions would require PPL, PPL Energy Supply, LKE or LG&E to transfer additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these provisions also would allow the counterparty to require additional collateral upon each decrease in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent provisions require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization by PPL, PPL Energy Supply, LKE or LG&E on derivative instruments in net liability positions.

Additionally, certain of PPL's, PPL Energy Supply's, LKE's and LG&E's derivative contracts contain credit contingent provisions that require PPL, PPL Energy Supply, LKE or LG&E to provide "adequate assurance" of performance if the other party has reasonable grounds for insecurity regarding PPL's, PPL Energy Supply's, LKE's or LG&E's performance of its obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" provisions.

At September 30, 2011, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit contingent features and were in a net liability position is summarized as follows:

	PPL	PPL Energy Supply	LKE	LG&E
Aggregate fair value of derivative instruments in a net liability position with credit contingent provisions	$ 103	$ 51	$ 37	$ 37
Aggregate fair value of collateral posted on these derivative instruments	45	15	30	30
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)	191	167	9	9

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

15 . Goodwill

(PPL and PPL Energy Supply)

The changes in the carrying amounts of goodwill by segment were as follows.

	Kentucky Regulated	International Regulated	Supply	Total
PPL				
Balance at December 31, 2010 (a)	$ 662	$ 679	$ 420 (d)	$ 1,761
Goodwill recognized during the period (b)		2,366		2,366
Effect of foreign currency exchange rates		69		69
Balance at September 30, 2011 (a)	$ 662	$ 3,114	$ 420	$ 4,196

	International Regulated	Supply	Total
PPL Energy Supply			
Balance at December 31, 2010 (a)	$ 679	$ 86	$ 765
Derecognition (c)	(679)		(679)
Balance at September 30, 2011 (a)	$	$ 86	$ 86

(a) There were no accumulated impairment losses related to goodwill.
(b) Recognized as a result of the 2011 acquisition of WPD Midlands. See Note 8 for additional information.
(c) Represents the amount of goodwill derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. See Note 8 for additional information on the distribution. Subsequent to the distribution, PPL Energy Supply operates in a single business operating segment and reporting unit.
(d) Includes goodwill attributed to the Supply segment as a result of the 2010 acquisition of LKE.

16 . Asset Retirement Obligations

(PPL, LKE, LG&E and KU)

Accretion expense recorded by LG&E and KU is offset with a regulatory credit and related regulatory asset, such that there is no income statement impact.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

The changes in the carrying amounts of AROs were as follows.

	PPL	PPL Energy Supply	LKE	LG&E	KU
ARO at December 31, 2010	$ 448	$ 345	$ 103	$ 49	$ 54
Accretion expense	25	20	4	2	2
Obligations assumed in acquisition of WPD Midlands (a)	15				
Derecognition (b)		(5)			
Obligations incurred	11	11			
Changes in estimated cash flow or settlement date	3	(4)	7	4	3
Obligations settled	(13)	(13)			
ARO at September 30, 2011	$ 489	$ 354	$ 114	$ 55	$ 59

(a) Obligations required under U.K. law related to treated wood poles, gas-filled switchgear and fluid-filled cables. See Note 8 for additional information on the acquisition.
(b) Represents AROs derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. See Note 8 for additional information on the distribution.

The classification of AROs on the Balance Sheet was as follows.

	September 30, 2011				
	PPL	PPL Energy Supply	LKE	LG&E	KU
Current portion (a)	$ 10	$ 9	$ 1	$ 1	
Long-term portion (b)	479	345	113	54	$ 59
Total	$ 489	$ 354	$ 114	$ 55	$ 59

	December 31, 2010				
	PPL	PPL Energy Supply	LKE	LG&E	KU
Current portion (a)	$ 13	$ 13			
Long-term portion (b)	435	332	$ 103	$ 49	$ 54
Total	$ 448	$ 345	$ 103	$ 49	$ 54

(a) Included in "Other current liabilities."
(b) Included in "Asset retirement obligations."

(PPL and PPL Energy Supply)

The most significant ARO recorded by PPL and PPL Energy Supply relates to the decommissioning of the Susquehanna nuclear plant. The accrued nuclear decommissioning obligation was $287 million and $270 million at September 30, 2011 and December 31, 2010, and is included in "Asset retirement obligations" on the Balance Sheets.

Assets in the NDT funds are legally restricted for purposes of settling PPL's and PPL Energy Supply's ARO related to the decommissioning of the Susquehanna nuclear plant. The aggregate fair value of these assets was $594 million and $618 million at September 30, 2011 and December 31, 2010, and is included in "Nuclear plant decommissioning trust funds" on the Balance Sheets. See Notes 13 and 17 for additional information on these assets.

17. Available-for-Sale Securities

(PPL, PPL Energy Supply, LKE and LG&E)

PPL and its subsidiaries classify certain short-term investments, securities held by the NDT funds and auction rate securities as available-for-sale. Available-for-sale securities are carried on the Balance Sheets at fair value. Unrealized gains and losses on these securities are reported, net of tax, in OCI or are recognized currently in earnings when a decline in fair value is determined to be other-than-temporary. The specific identification method is used to calculate realized gains and losses.

The following table shows the amortized cost, the gross unrealized gains and losses recorded in AOCI, and the fair value of available-for-sale securities.

	September 30, 2011				December 31, 2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
PPL

Total	$ 470	$ 145	$ 2	$ 613	$ 456	$ 182		$ 638
LKE and LG&E								
Short-term investments								
- municipal debt securities					$ 163			$ 163

There were no securities with credit losses at September 30, 2011 or December 31, 2010.

The following table shows the scheduled maturity dates of debt securities held at September 30, 2011.

	Maturity Less Than 1 Year	Maturity 1-5 Years	Maturity 5-10 Years	Maturity in Excess of 10 Years	Total
PPL					
Amortized cost	$ 10	$ 70	$ 64	$ 79	$ 223
Fair value	10	73	70	86	239
PPL Energy Supply					
Amortized cost	$ 10	$ 70	$ 64	$ 74	$ 218
Fair value	10	73	70	81	234

The following table shows proceeds from and realized gains and losses on sales of available-for-sale securities for the periods ended September 30.

	Three Months		Nine Months	
	2011	2010	2011	2010
PPL				
Proceeds from sales of NDT securities (a)	$ 34	$ 15	$ 134	$ 83
Other proceeds from sales			163	
Gross realized gains (b)	3	2	26	11
Gross realized losses (b)	4	1	15	4
PPL Energy Supply				
Proceeds from sales of NDT securities (a)	$ 34	$ 15	$ 134	$ 83
Gross realized gains (b)	3	2	26	11
Gross realized losses (b)	4	1	15	4

(a) These proceeds are used to pay income taxes and fees related to managing the trust. Remaining proceeds are reinvested in the trust.
(b) Excludes the impact of other-than-temporary impairment charges recognized in the Statements of Income.

(PPL, LKE and LG&E)

At December 31, 2010, LG&E held $163 million aggregate principal amount of tax-exempt revenue bonds issued by Louisville/Jefferson County, Kentucky on behalf of LG&E that were purchased from the remarketing agent in 2008. At December 31, 2010, these investments were reflected in "Short-term investments" on the Balance Sheet. During the nine months ended September 30, 2011, LG&E received $163 million for its investments in these bonds when they were remarketed to unaffiliated investors. No realized or unrealized gains (losses) were recorded on these securities, as the difference between carrying value and fair value was not significant.

18. New Accounting Guidance Pending Adoption

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fair Value Measurements

Effective January 1, 2012, PPL and its subsidiaries will prospectively adopt accounting guidance that was issued to clarify existing fair value measurement guidance as well as enhance fair value disclosures. The additional disclosures required by this guidance include quantitative information about significant unobservable inputs used for Level 3 measurements, qualitative information about the sensitivity of recurring Level 3 measurements, information about any transfers between Level 1 and 2 of the fair value hierarchy, information about when the current use of a non-financial asset is different from the highest and best use, and the hierarchy classification for assets and liabilities whose fair value is disclosed only in the notes to the financial statements.

Any fair value measurement differences resulting from the adoption of this guidance will be recognized in income in the period of adoption. The adoption of this guidance is not expected to have a significant impact on PPL and its subsidiaries.

Presentation of Comprehensive Income

Effective January 1, 2012, PPL and its subsidiaries will retrospectively adopt accounting guidance that was issued to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items that are recorded in OCI. The amendments require that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements where the first statement includes the components of net income and the second statement includes the components of OCI.

Regardless of whether an entity chooses to present comprehensive income in a single continuous statement or in two separate but consecutive statements, the entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented.

Subsequent to the issuance of this new accounting guidance, the Financial Accounting Standards Board (FASB) announced plans to propose deferral of the requirement that companies present reclassification adjustments for each component of OCI in both net income and OCI on the face of the financial statements. During the deferral period, the FASB also plans to re-evaluate the requirement. The deferral, if finalized, would not change the requirement to present items of net income, items of other comprehensive income and total comprehensive income in either one continuous statement or two separate consecutive statements.

Upon adoption, the change in presentation is not expected to have a significant impact on PPL and its subsidiaries.

Disclosures about an Employer's Participation in a Multiemployer Plan

Effective December 31, 2011, PPL and its subsidiaries will retrospectively adopt accounting guidance that was issued to improve the transparency about an employer's participation in a multiemployer plan. The disclosures required by this guidance include the significant multiemployer plans in which an employer participates, the level of the employer's participation in these plans, the financial health of these plans and the nature of employer commitments to these plans. For plans for which users are unable to obtain additional publicly available information outside the employer's financial statements, additional disclosures are required.

The adoption of this standard is not expected to have a significant impact on PPL and its subsidiaries.

Testing Goodwill for Impairment

Effective January 1, 2012, PPL and its subsidiaries will prospectively adopt accounting guidance which will allow an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of goodwill. If, based on this assessment, the entity determines it is not more likely than not the fair value of a reporting unit is less than the carrying amount, the two-step goodwill impairment test is not necessary. However, the first step of the impairment test is required if an entity concludes it is more likely than not the fair value of a reporting unit is less than the carrying amount based on the qualitative assessment.

The adoption of this standard is not expected to have a significant impact on PPL and its subsidiaries.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with PPL's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL's 2010 Form 10-K. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides an overview of PPL's business strategy, financial and operational highlights, and key legal and regulatory matters.

- "Results of Operations" provides a summary of PPL's earnings and a review of results by reportable segment and a description of key factors by segment that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL's Statements of Income, comparing the three and nine months ended September 30, 2011 with the same periods in 2010.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.

- "Financial Condition - Risk Management" provides an explanation of PPL's risk management programs relating to market and credit risk.

- "Application of Critical Accounting Policies" provides an update to PPL's critical accounting policy related to "Business Combinations - Purchase Price Allocation." This critical accounting policy is being updated to reflect the impact of the April 2011 acquisition of WPD Midlands.

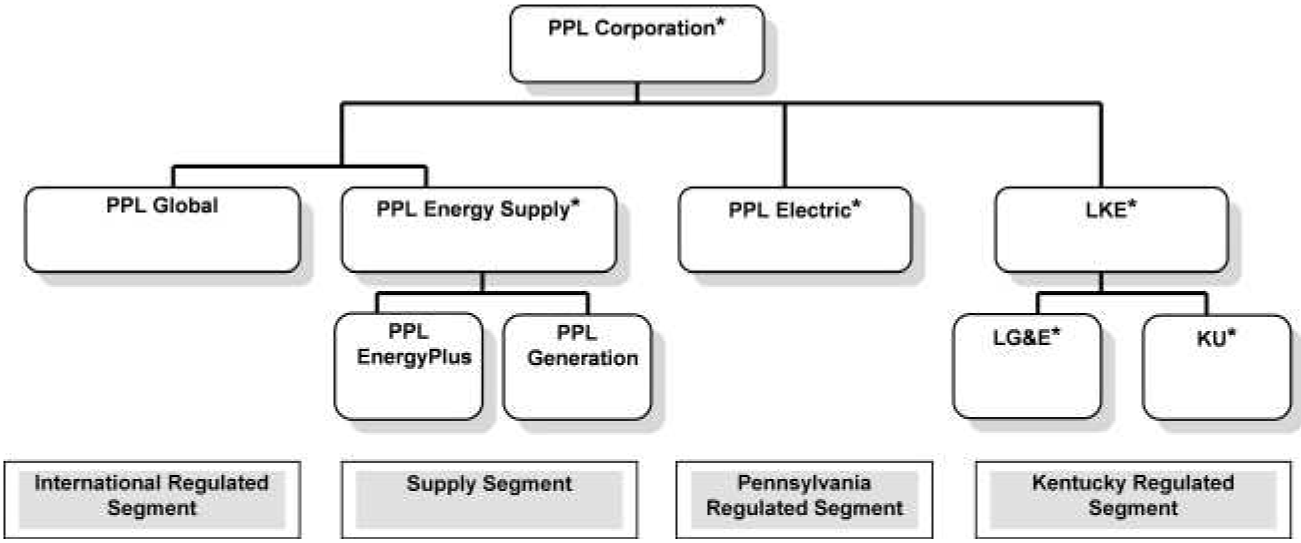
Overview

Introduction

PPL is an energy and utility holding company with headquarters in Allentown, Pennsylvania. Through subsidiaries, PPL generates electricity from power plants in the northeastern, northwestern and southeastern U.S., markets wholesale or retail energy primarily in the northeastern and northwestern portions of the U.S., delivers electricity to customers in Pennsylvania, Kentucky, Virginia, Tennessee and the U.K. and delivers natural gas to customers in Kentucky.

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding (the parent holding company of PPL Energy Supply and PPL Global with no other material operations), to better align PPL's organizational structure with the manner in which it manages its businesses and reports segment information in its consolidated financial statements. The distribution separated the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business. The following chart depicts the organizational structure subsequent to this distribution and illustrates how PPL's principal subsidiaries align with PPL's reportable segments. After distributing PPL Global to its parent, PPL Energy Supply and its subsidiaries' operations are entirely within the Supply segment.

Subsequent to the distribution of PPL Global, PPL's principal subsidiaries are shown below (* denotes an SEC registrant - LKE, LG&E and KU became SEC Registrants effective June 1, 2011):



Business Strategy

PPL's overall strategy is to achieve stable, long-term growth in its regulated electricity delivery businesses through efficient operations and strong customer and regulatory relations, and disciplined growth in energy supply margins while mitigating volatility in both cash flows and earnings. In pursuing this strategy, PPL acquired LKE in November 2010 and WPD Midlands in April 2011. These acquisitions have reduced PPL's overall business risk profile and reapportioned the mix of PPL's regulated and competitive businesses by increasing the regulated portion of its business and enhancing rate-regulated growth opportunities as the regulated businesses make investments to improve infrastructure and customer reliability.

The increase in regulated assets is expected to provide earnings stability through regulated returns and the ability to recover costs of capital investments, in contrast to the competitive energy supply business where earnings and cash flows are subject to commodity market volatility. Following the LKE and WPD Midlands acquisitions, approximately 70% of PPL's assets are in its regulated businesses. The pro forma impacts of the acquisitions of LKE and WPD Midlands on PPL's income from continuing operations (after income taxes) for the nine months ended September 30 are as follows.

	2011				2010			
	Pro forma		Actual		Pro forma		Actual	
Regulated	$ 799	61%	$ 696	58%	$ 704	66%	$ 315	47%
Competitive	507	39%	507	42%	358	34%	358	53%
	$ 1,306		$ 1,203		$ 1,062		$ 673	

Note: Pro forma and actual amounts exclude non-recurring items identified in Note 8 to the Financial Statements.

Accordingly, results for periods prior to the acquisitions of LKE and WPD Midlands are not comparable with, or indicative of, results for periods subsequent to the acquisitions.

With the purchase of WPD Midlands and the related growth of the portion of PPL's overall earnings translated from British pounds sterling, the related foreign currency risk is more substantial. The U.K. subsidiaries also have currency exposure to the U.S. dollar to the extent they have U.S. dollar denominated debt. To manage these risks, PPL generally uses contracts such as forwards, options and cross currency swaps that contain characteristics of both interest rate and foreign currency exchange contracts.

PPL's strategy for its competitive energy supply business is to optimize the value from its unregulated generation and marketing portfolio. PPL endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk.

To manage financing costs and access to credit markets, a key objective of PPL's business strategy is to maintain a strong credit profile. PPL continually focuses on maintaining an appropriate capital structure and liquidity position. In addition, PPL has adopted financial and operational risk management programs that, among other things, are designed to monitor and manage its exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Highlights

Net Income Attributable to PPL Corporation

Net Income Attributable to PPL Corporation for the three and nine months ended September 30, 2011 was $444 million and $1.0 billion compared to $248 million and $583 million for the same periods in 2010. This represents a 79% increase over 2010 for both periods. These increases reflect the following after-tax impacts by segment.

	Three Months	Nine Months
Kentucky Regulated Segment earnings	$ 78	$ 184
International Regulated Segment		
WPD Midlands earnings	102	159
WPD Midlands acquisition-related costs	(64)	(164)
Reduction in U.K. tax rate related to PPL WW	15	15
Pennsylvania Regulated Segment		
Distribution base rate increase effective January 2011	9	29
Supply Segment		
Net unrealized gains/(losses) on energy-related economic activity	(14)	119
Impairment charges in 2010 related to the sale of certain non-core generation facilities	62	60
Losses on the monetization of certain full-requirement sales contracts in 2010	27	102
Litigation settlement in 2011 related to spent nuclear fuel storage	4	33
Change in "Unregulated Gross Energy Margins" (a)	(37)	(154)
Unallocated costs - LKE acquisition-related costs in 2010	34	53
Other	(20)	22
	$ 196	$ 458

(a) The change in "Unregulated Gross Energy Margins" is primarily due to lower baseload energy and capacity prices, changes in coal and hydro generation volumes and losses from the monetization of certain contracts in 2010 that rebalanced the business and portfolio, partially offset by higher margins on full-requirement sales contracts driven by contracts monetized in 2010 and reduced shopping. See "Statement of Income Analysis - Margins" for additional information and a reconciliation of "Unregulated Gross Energy Margins" to Operating Income.

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations, as well as a discussion of each of PPL's business segments.

Acquisition of WPD Midlands

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, acquired Central Networks, which operates two regulated distribution networks that serve five million end users in the Midlands area of England, for $6.6 billion, including long-term debt assumed through the acquisition. Subsequent to the close of the acquisition, the entities acquired were renamed and are collectively referred to as WPD Midlands. The service territories of PPL WW and WPD Midlands are contiguous and cost savings, efficiencies and other benefits are expected from the combined operation of these entities.

The cash consideration of $5.8 billion was primarily funded by borrowings under the 2011 Bridge Facility. The following permanent financing was completed in the second quarter of 2011 to repay 2011 Bridge Facility borrowings, pay certain acquisition-related fees and raise additional capital for general corporate purposes.

- PPL issued 92 million shares of its common stock and received net proceeds of $2.258 billion.
- PPL issued 19.55 million 2011 Equity Units and received net proceeds of $948 million.
- PPL WEM issued $460 million of 3.90% Senior Notes due 2016 and $500 million of 5.375% Senior Notes due 2021 and received net proceeds of $953 million.
- WPD (West Midlands) issued £800 million of 5.75% Senior Notes due 2032 and WPD (East Midlands) issued £600 million of 5.25% Senior Notes due 2023. Collectively, net proceeds of £1.4 billion were received, which equated to $2.2 billion at the time of issuance.
- WPD (East Midlands) issued £100 million of Index-Linked Notes due 2043 and received net proceeds of £99 million, which equated to $163 million at the time of issuance.

Pursuant to WPD's previously described intention to combine the operations of PPL WW and WPD Midlands, approximately 740 employees of WPD Midlands will receive separation benefits from the companies as a new regional structure is implemented. In September 2011, WPD determined that the total separation benefits payable in connection with the reorganization would be $102 million, including $58 million of severance compensation, $43 million of early retirement deficiency costs (ERDC) and $1 million in outplacement services.

WPD Midlands recorded $84 million of the total separation benefits in the three and nine months ended September 30, 2011, of which $41 million relates to severance compensation and $43 million relates to ERDC. WPD Midlands expects to record the remaining portion of severance compensation, based on the expected timing of when employees will separate from the companies, as follows: an estimated $6 million in the fourth quarter of 2011 and an estimated $11 million in 2012. The separation benefits recorded in the three and nine months ended September 30, 2011 are included in "Other operation and maintenance" on the Statement of Income. The $41 million of accrued severance compensation is reflected in "Other current liabilities" and the ERDC of $43 million reduced "Other noncurrent assets" on the Balance Sheet at September 30, 2011.

These amounts do not include $9 million recorded in the nine months ended September 30, 2011 for ERDC payable under applicable pension plans and severance compensation for certain employees who separated from the WPD Midlands companies, but were not part of the reorganization. These separation benefits are included in "Other operation and maintenance" on the Statement of Income.

PPL incurred acquisition-related costs of $84 million and $215 million, pre tax, for the three and nine months ended September 30, 2011 which includes, among other items, the separation benefits discussed above, advisory, accounting and legal fees, taxes and certain financing costs, including gains on hedges and foreign currency losses on the 2011 Bridge Facility.

See Note 8 to the Financial Statements for additional information related to the acquisition and Note 7 to the Financial Statements for additional information related to the financings.

Registered Debt Exchange Offer by LKE, LG&E and KU

In April 2011, LKE, LG&E and KU each filed a Registration Statement with the SEC, related to an offer to exchange certain first mortgage bonds and senior notes issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statements became effective in June 2011, and the exchanges were completed in July 2011 with substantially all of LKE's senior notes and LG&E's and KU's first mortgage bonds being exchanged. See Note 7 to the Financial Statements and PPL's 2010 Form 10-K for additional information on the original debt issuances.

Susquehanna Turbine Blade Replacement

In April 2011, during the PPL Susquehanna Unit 2 refueling and generation uprate outage, a planned inspection of the Unit 2 turbine revealed cracks in certain of its low pressure turbine blades. Replacement of these blades was required, but was not anticipated as part of the original scope of this outage. The necessary replacement work extended the Unit 2 outage by six weeks. As a precaution, PPL Susquehanna also took Unit 1 out of service in mid-May to inspect the turbine blades in that unit. This inspection revealed cracks in blades similar to those found in Unit 2. The duration of the Unit 1 outage, in which turbine blades were replaced, was also about six weeks. The after-tax earnings impact, including reduced energy-sales margins and repair expense for both units, was $63 million. The majority of these costs were incurred during the second quarter of 2011.

Storm Recovery

PPL Electric experienced several PUC-reportable storms during the three and nine months ended September 30, 2011 resulting in total restoration costs of $34 million and $59 million, of which $23 million and $39 million were recorded in "Other operation and maintenance" on the Statement of Income. However, a PPL subsidiary has a $10 million reinsurance policy with a third party insurer. In the third quarter of 2011 a $10 million receivable was recorded with an offsetting credit to "Other operation and maintenance" on the Statement of Income. In November 2011, PPL Electric filed with the PUC a request for permission to defer $15 million to $20 million for future recovery of allowable storm-related costs. At the time PPL Electric seeks recovery of any deferred amount, its claim will be based on the actual costs, net of insurance recoveries. A regulatory asset, for the actual costs net of insurance recoveries, will be recorded at such time as an order is received from the PUC approving deferral of these costs.

In late October 2011, PPL Electric experienced significant damage to its transmission and distribution network from a severe snow storm. The costs associated with the restoration efforts are still being determined and are not included in the amounts disclosed above. PPL Electric will evaluate such costs, when quantified, and will likely file with the PUC for permission to defer certain of the costs incurred to repair the distribution network for future recovery. Costs incurred to repair the transmission network are recoverable through the FERC Formula Rate mechanism which is updated annually.

Legal and Regulatory Matters

Federal

CSAPR

In July 2011, the EPA signed the CSAPR which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. This rule applies to PPL's Pennsylvania and Kentucky plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions. In October 2011, the EPA proposed technical adjustments to the CSAPR to account for updated data submitted to the agency. Several states and a number of companies have filed petitions for review with the U.S. Court of Appeals for the District of Columbia Circuit challenging various provisions of the CSAPR. PPL's initial review of the allocations under the CSAPR indicates that greater reductions in sulfur dioxide emissions will be required beginning in 2012 under the CSAPR than were required under the CAIR.

For the initial phase of the rule beginning in 2012, sulfur dioxide allowance allocations are expected to be greater than the forecasted emissions based on present operations of existing sulfur dioxide scrubbers and coal supply. However, for the second phase beginning in 2014, PPL will likely have to modify operations and dispatch of its generation fleet in Pennsylvania and Kentucky, including upgrades or installation of new sulfur dioxide scrubbers for certain generating units or retirement of certain other units.

With respect to nitrogen oxide emissions, the CSAPR provides a slightly higher amount of allowances for PPL's Pennsylvania plants, but still less than the current forecasted emissions and a slightly higher amount of allowances for the Kentucky plants than under CAIR. With uncertainty surrounding the trading program, other compliance options are being analyzed for the Pennsylvania and Kentucky fleets, such as the installation of new technology or modifications of plant operations as well as the retirement and replacement of certain coal-fired generating units in Kentucky. LG&E and KU are seeking recovery of their expected costs to comply with the CSAPR and certain other EPA requirements through the ECR plan filed with the KPSC in June 2011.

Additionally, PPL's plants, including those in Montana, may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. PPL anticipates that some of the measures required for compliance with the CSAPR, such as upgraded or new sulfur dioxide scrubbers at some of its plants and retirement of certain units, may also be necessary to achieve compliance with the new sulfur dioxide standard. If additional reductions were to be required, the economic impact to PPL could be significant. See Notes 6 and 10 to the Financial Statements for additional information on the CSAPR and the Kentucky regulatory proceeding.

Spent Nuclear Fuel Litigation

In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna station. Under the settlement agreement, PPL Susquehanna received $50 million, pre-tax for its share of claims to partially offset its expenses incurred to store spent nuclear fuel at the Susquehanna station through September 2009, and recognized a credit to "Fuel" expense in the second quarter of 2011. PPL Susquehanna also will be eligible to receive payment of annual claims for allowed costs that are incurred thereafter through the December 2013 termination of the settlement agreement. See Note 10 to the Financial Statements for additional information.

Kentucky and Virginia

CPCN Filing

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run station site. LG&E and KU also requested approval to purchase three additional natural gas combustion turbines from Bluegrass Generation Company, L.L.C. (Bluegrass Plant) that are expected to provide up to 495 MW of peak generation supply. LG&E and KU anticipate that the NGCC construction and Bluegrass Plant acquisition could require up to $800 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC and Bluegrass Plant acquisition were not included in the CPCN filing with the KPSC, but are expected to be included in a future base rate case filing. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, but no hearing, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 6 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, LG&E and KU filed ECR plans with the KPSC requesting approval to install environmental upgrades for certain of their coal-fired plants and for recovery of the expected $2.5 billion in associated capital costs, as well as operating expenses as incurred. The ECR plans included upgrades that will be made to certain of their coal-fired generating stations to continue to be compliant with EPA regulations. See Notes 6 and 10 to the Financial Statements for additional information.

Pennsylvania

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation that would authorize the PUC to approve regulatory procedures and mechanisms to provide for more timely recovery of a utility's costs. Alternative ratemaking is important to PPL Electric as it begins a period of significant increasing capital investment related to the asset optimization program focused on the replacement of aging distribution assets. Those procedures and mechanisms include, but are not limited to, the use of a fully projected test year and an automatic adjustment clause to recover certain capital costs and related operating expenses. In October 2011, the legislation was passed by the Pennsylvania House of Representatives. It will now be considered by the Pennsylvania Senate. PPL Electric is working with other stakeholders to support passage of this legislation but cannot predict the outcome of this process.

Montana

Montana Hydroelectric Litigation

In June 2011, the U.S. Supreme Court granted PPL Montana's petition to review the March 2010 Montana Supreme Court decision, which substantially affirmed the June 2008 Montana District Court decision to award the State of Montana retroactive compensation for PPL Montana's hydroelectric facilities' use and occupancy of certain Montana riverbeds. Oral argument is scheduled for December 2011. The stay of judgment granted during the proceedings before the Montana Supreme Court has been extended by agreement with the State of Montana to cover the anticipated period of the proceeding before the U.S. Supreme Court. See Note 10 to the Financial Statements for additional information.

U.K.

Tax Rate Change

In July 2011, the U.K.'s Finance Act of 2011 was enacted. The most significant change to the law was a reduction in the U.K.'s statutory income tax rate. The statutory tax rate was changed from 27% to 26%, effective April 1, 2011 and from 26% to 25%, effective April 1, 2012. As a result of these changes, for the three and nine months ended September 30, 2011, PPL reduced its net deferred tax liabilities and recognized a $69 million deferred tax benefit to comprehend both rate decreases.

The U.K.'s Finance Act of 2010, enacted in July 2010, also included a reduction in the U.K. statutory income tax rate. Effective April 1, 2011, the statutory income tax rate was reduced from 28% to 27%. As a result, PPL reduced its net deferred tax liabilities and recognized a $19 million deferred tax benefit for the three and nine months ended September 30, 2010.

Ofgem Pricing Model

In October 2010, Ofgem announced a pricing model that will be effective for the U.K. electricity distribution sector, including WPD, beginning April 2015. The model, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. Key components of the model are: an extension of the price review period from five to eight years; increased emphasis on outputs and incentives; enhanced stakeholder engagement including network customers; a stronger incentive framework to encourage more efficient investment and innovation; expansion of the current Low Carbon Network Fund to stimulate innovation; and continued use of a single weighted average cost of capital. At this time, management does not expect the impact of this pricing model to be significant to WPD's operating results.

Results of Operations

As a result of the LKE acquisition on November 1, 2010 and the WPD Midlands acquisition on April 1, 2011, LKE's and WPD Midlands' results (since the date of acquisition) for the three and nine months ended September 30, 2011 are included in PPL's results. When discussing PPL's results of operations for 2011 compared with 2010, the results of LKE and WPD Midlands are isolated for purposes of comparability. LKE's results are included within "Segment Results - Kentucky Regulated Segment" and WPD Midlands' results are included within "Segment Results - International Regulated Segment." The results of WPD (including WPD Midlands) are recorded on a one-month lag.

The results for interim periods can be disproportionately influenced by various factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods.

Tables analyzing changes in amounts between periods within "Segment Results" and "Statement of Income Analysis" are presented on a constant U.K. foreign currency exchange rate basis, where applicable, in order to isolate the impact of the change in the exchange rate on the item being explained. Results computed on a constant U.K. foreign currency exchange rate basis are calculated by translating current year results at the prior year weighted-average foreign currency exchange rate.

Earnings

Net Income Attributable to PPL Corporation and related EPS for the periods ended September 30 was:

	Three Months		Nine Months	
	2011	2010	2011	2010
Net Income Attributable to PPL Corporation	$ 444	$ 248	$ 1,041	$ 583
EPS - basic	$ 0.76	$ 0.51	$ 1.92	$ 1.40
EPS - diluted	$ 0.76	$ 0.51	$ 1.91	$ 1.40

The changes in Net Income Attributable to PPL Corporation from period to period were, in part, attributable to the acquisitions of LKE and WPD Midlands and several items that management considers special. Details of these special items are provided within the review of each segment's earnings.

Segment Results

Net Income Attributable to PPL Corporation by segment for the periods ended September 30 was:

	Three Months		Nine Months	
	2011	2010	2011	2010
Kentucky Regulated	$ 78		$ 184	
International Regulated (a)	138	$ 93	231	$ 227
Pennsylvania Regulated	28	36	116	89
Supply	200	153	510	320
Unallocated Costs (b)		(34)		(53)
Total	$ 444	$ 248	$ 1,041	$ 583

(a) As a result of the acquisition on April 1, 2011, WPD Midlands' results since the acquisition date, recorded on a one-month lag, are included in the 2011 amounts.

(b) The three and nine months ended September 30, 2010 include $4 million and $11 million, pre-tax, ($2 million and $8 million, after-tax) of certain acquisition-related costs, including advisory, accounting and legal fees associated with the acquisition of LKE that are recorded in "Other Income (Expense) - net" on the Statements of Income. Also included are $45 million and $67 million, pre-tax, ($31 million and $44 million, after-tax) of 2010 Bridge Facility costs that are recorded in "Interest Expense" on the Statements of Income. See Notes 7 and 10 in PPL's 2010 Form 10-K for additional information on the acquisition and related financing. These costs were considered special items by management and were not included within any segment's results.

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LKE's results from the operation of regulated electricity generation, transmission and distribution assets, primarily in Kentucky, as well as in Virginia and Tennessee. This segment also includes LKE's results from the regulated distribution and sale of natural gas in Kentucky.

Kentucky Regulated segment Net Income Attributable to PPL Corporation for the periods ended September 30, 2011 was:

	Three Months	Nine Months
Operating revenues	$ 736	$ 2,140
Fuel and energy purchases	277	845
Other operation and maintenance	187	566
Depreciation	84	249
Taxes, other than income	10	28
Total operating expenses	558	1,688
Other Income (Expense) - net		(1)
Interest Expense (a)	53	161
Income Taxes	46	105
Income (Loss) from Discontinued Operations	(1)	(1)
Net Income Attributable to PPL Corporation	$ 78	$ 184

(a) The three and nine months ended September 30, 2011 include allocated interest expense of $17 million and $53 million, pre-tax, related to the 2010 Equity Units and certain interest rate swaps.

The following after-tax amounts, which management considers special items, also impacted the segment's earnings for the periods ended September 30, 2011.

	Line Item	Three Months	Nine Months
Special Items, net of tax benefit (expense):			
Adjusted energy-related economic activity, net, net of tax of ($1), $0	Utility Revenues	$ 1	$ 1
Other:			
LKE discontinued operations, net of tax of $1, $0	Disc. Operations	(1)	(1)
Total		$	$

Outlook

Excluding special items, and the impact of a full year of earnings versus two months in 2010, earnings are expected generally to be driven by the results of electricity and natural gas base rate increases that became effective August 1, 2010.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business," and "Item 1A. Risk Factors" in PPL's 2010 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings. Among these uncertainties is the ultimate regulatory recovery of storm costs recorded as regulatory assets.

International Regulated Segment

The International Regulated segment consists primarily of the electric distribution operations in the U.K. As a result of the acquisition on April 1, 2011, WPD Midlands' results since the acquisition date are included in the 2011 results, recorded on a one-month lag.

International Regulated segment Net Income Attributable to PPL Corporation for the periods ended September 30 was:

	Three Months			Nine Months		
	2011	2010	% Change	2011	2010	% Change
Utility revenues	$ 194	$ 163	19	$ 613	$ 538	14
Energy-related businesses	8	9	(11)	27	25	8
Total operating revenues	202	172	17	640	563	14
Other operation and maintenance	45	39	15	136	122	11
Depreciation	32	28	14	94	86	9
Taxes, other than income	14	12	17	40	39	3
Energy-related businesses	4	4		12	12	
Total operating expenses	95	83	14	282	259	9
Other Income (Expense) - net	10		n/a	13	2	550
Interest Expense	34	38	(11)	119	102	17
Income Taxes	(17)	(42)	(60)	16	(23)	(170)
WPD Midlands, net of tax (a)	102		n/a	159		n/a
WPD Midlands acquisition-related costs, net of tax (b)	(64)		n/a	(164)		n/a
Net Income Attributable to PPL Corporation	$ 138	$ 93	48	$ 231	$ 227	2

(a) Represents the operations of WPD Midlands since the acquisition date, recorded on a one-month lag, including revenue from external customers of $292 million and $499 million (pre-tax) for the three and nine months ended September 30, 2011. The three and nine-month periods also include allocated charges totaling $16 million and $24 million (after-tax), which include interest expense related to the 2011 Equity Units.
(b) Represents items considered special by management, including $2 million and $44 million (after-tax) of allocated charges for the three and nine months ended September 30, 2011.

The changes in the components of Net Income Attributable to PPL Corporation between the periods ended September 30, 2011 and 2010 were primarily due to the following factors. The amounts for PPL WW are presented on a constant U.K. foreign currency exchange rate basis in order to isolate the impact of the change in the exchange rate.

	Three Months	Nine Months
PPL WW		
Utility revenues	$ 21	$ 51
Other operation and maintenance	(7)	(9)
Interest expense	2	(12)
Income taxes	(8)	(16)
Foreign currency exchange rates	3	7
Other	(1)	(1)
WPD Midlands, after-tax	67	124
U.S.		
Income taxes	(14)	(20)
Other	(1)	(4)
Special items, after-tax	(17)	(116)
Total	$ 45	$ 4

PPL WW

- Utility revenues were $24 million and $45 million higher resulting from a price increase in April 2011 for the three-month period and in April 2010 and 2011 for the nine-month period. In addition, the nine-month period was higher due to a $9 million unfavorable impact on regulatory allowed revenues associated with a charge recorded in the first quarter of 2010 primarily resulting from changes in the network electricity line loss assumptions. Such charges were insignificant in the first quarter of 2011.

- Other operation and maintenance expense was higher for the three and nine-month periods primarily due to $4 million and $7 million of higher pension expense resulting primarily from an increase in amortization of actuarial losses.

- Interest expense for the nine-month period was $11 million higher due to higher debt balances arising from a March 2010 debt issuance.

- U.K. income taxes were higher in the three-month period due to $4 million of additional tax as a result of higher pre-tax income.

  U.K. income taxes were higher in the nine-month period due to $8 million of additional tax as a result of higher pre-tax income and a $7 million income tax benefit recorded in 2010 related to uncertain tax positions.

- U.S. income taxes were higher in the three-month period primarily due to a $20 million tax benefit recorded in 2010 related to a favorable U.S. Tax Court ruling on the creditability of the U.K. Windfall Profits Tax. This increase was partially offset by a $7 million U.S. tax benefit recorded in 2011 as a result of U.K. pension plan contributions.

  U.S. income taxes were higher in the nine-month period primarily due to a $20 million tax benefit recorded in 2010 related to a favorable U.S. Tax Court ruling on the creditability of the U.K. Windfall Profits Tax, $9 million of higher taxes due to tax benefits recorded in 2010 related to foreign dividends and tax refunds and $8 million of higher taxes in 2011 on foreign source income. These increases were partially offset by a $21 million tax benefit recorded in 2011 as a result of U.K. pension plan contributions.

The following after-tax amounts, which management considers special items, also impacted the segment's earnings for the periods ended September 30.

	Income Statement Line Item	Three Months 2011	Three Months 2010	Nine Months 2011	Nine Months 2010
Special Items, net of tax benefit (expense):					
Foreign currency-related economic hedges, net of tax of ($3), $0, ($4), $0 (a)	Other Income-net	$ 8	$ (1)	$ 8	$ (2)
WPD Midlands acquisition-related costs:					
2011 Bridge Facility costs, net of tax of $0, $0, $13, $0 (b)	Interest Expense			(30)	
Foreign currency loss on 2011 Bridge Facility, net of tax of $0, $0, $19, $0 (c)	Other Income-net			(38)	
Net hedge gains, net of tax of $0, $0, ($17), $0 (c)	Other Income-net			38	
Hedge ineffectiveness, net of tax of $0, $0, $3, $0 (d)	Interest Expense			(9)	
U.K. stamp duty tax, net of tax of $0, $0, $0, $0 (e)	Other Income-net			(21)	
Separation benefits, net of tax of $22, $0, $24, $0 (f)	Other O&M	(64)		(68)	
Other acquisition-related costs, net of tax of ($2), $0, $9, $0	(g)			(36)	
Other:					
Change in U.K. tax rate (h)	Income Taxes	69	19	69	19
U.S. Tax Court ruling (U.K. Windfall Profits Tax) (i)	Income Taxes		12		12
Total		$ 13	$ 30	$ (87)	$ 29

(a) Represents unrealized gains (losses) on contracts that economically hedge anticipated earnings denominated in GBP.
(b) Represents fees incurred in connection with establishing the 2011 Bridge Facility. See Note 7 to the Financial Statements for additional information.
(c) Represents the foreign currency loss on the repayment of the 2011 Bridge Facility, including a pre-tax foreign currency loss of $15 million associated with proceeds received on the U.S. dollar-denominated senior notes issued by PPL WEM in April 2011 that were used to repay a portion of PPL WEM's borrowing under the 2011 Bridge Facility. The foreign currency risk was economically hedged with forward contracts to purchase GBP, which resulted in pre-tax gains of $55 million.
(d) Represents a combination of ineffectiveness associated with closed out interest rate swaps and a charge recorded as a result of certain interest rate swaps failing hedge effectiveness testing.
(e) Tax on the transfer of ownership of property in the U.K. which is not tax deductible for income tax purposes.
(f) Primarily represents severance compensation, early retirement deficiency costs and outplacement services for employees separating from the WPD Midlands companies as a result of a reorganization to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales). Also includes severance compensation and early retirement deficiency costs associated with certain employees who separated from the WPD Midlands companies, but were not part of the reorganization.
(g) The nine months ended September 30, 2011 primarily includes $36 million, pre-tax, of advisory, accounting and legal fees which are reflected in "Other Income (Expense) - net" on the Statements of Income. Other acquisition-related costs of $9 million were recorded to "Other operation and maintenance" expense on the Statements of Income.
(h) The U.K.'s Finance Act of 2011, enacted in July 2011, reduced the U.K. statutory income tax rate from 27% to 26% retroactive to April 1, 2011 and will further reduce the rate from 26% to 25% effective April 1, 2012. As a result, PPL reduced its net deferred tax liability and recognized a deferred tax benefit in the three and nine-month periods of 2011 to comprehend both rate decreases. WPD Midlands' portion of the deferred tax benefit is $35 million.

The U.K.'s Finance Act of 2010, enacted in July 2010, reduced the U.K. statutory income tax rate from 28% to 27% effective April 1, 2011. As a result, PPL reduced its net deferred tax liability and recognized a deferred tax benefit in the three and nine-month periods of 2010.
(i) Represents the net tax benefit recorded as a result of the U.S. Tax Court ruling that the U.K. Windfall Profits Tax is creditable for U.S. tax purposes, excluding the reversal of accrued interest.

Outlook

Excluding special items and the impact of the newly acquired U.K. businesses, earnings are expected to be higher in 2011, compared with 2010, primarily due to higher electricity delivery revenue and a more favorable currency exchange rate, partially offset by higher income taxes, higher depreciation and higher financing costs.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements and "Part II. Other Information - Item 1A. Risk Factors" in this Form 10-Q and "Item 1. Business," and "Item 1A. Risk Factors" in PPL's 2010 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

<u>Pennsylvania Regulated Segment</u>

The Pennsylvania Regulated segment includes the regulated electric delivery operations of PPL Electric.

Pennsylvania Regulated segment Net Income Attributable to PPL Corporation for the periods ended September 30 was:

	Three Months			Nine Months		
	2011	2010	% Change	2011	2010	% Change
Operating revenues						
External	$ 454	$ 570	(20)	$ 1,444	$ 1,901	(24)
Intersegment	1	1		9	5	80
Total operating revenues	455	571	(20)	1,453	1,906	(24)
Energy purchases						
External	171	229	(25)	591	848	(30)
Intersegment	5	71	(93)	15	250	(94)
Other operation and maintenance	146	126	16	402	377	7
Depreciation	38	34	12	108	101	7
Taxes, other than income	26	32	(19)	83	108	(23)
Total operating expenses	386	492	(22)	1,199	1,684	(29)
Other Income (Expense) - net	3		n/a	4	4	
Interest Expense	26	24	8	74	74	
Income Taxes	14	15	(7)	56	47	19
Net Income	32	40	(20)	128	105	22
Net Income Attributable to Noncontrolling Interests	4	4		12	16	(25)
Net Income Attributable to PPL Corporation	$ 28	$ 36	(22)	$ 116	$ 89	30

The changes in the components of Net Income Attributable to PPL Corporation between the periods ended September 30, 2011 and 2010 were due to the following factors.

	Three Months	Nine Months
Pennsylvania gross delivery margins	$ 8	$ 56
Other operation and maintenance	(15)	(18)
Depreciation	(4)	(7)
Other	2	1
Income taxes	1	(9)
Noncontrolling interests		4
Total	$ (8)	$ 27

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of gross margins from the Pennsylvania regulated electric delivery operations.

- Other operation and maintenance expenses were $14 million and $17 million higher for the three and nine-month periods due to storm costs exceeding insurance policy limits in 2011.

- Income taxes were $12 million higher for the nine-month period due to higher pre-tax income. This increase was partially offset by a $5 million tax benefit related to the impact of flow-through regulated tax depreciation that is primarily related to the Pennsylvania Department of Revenue interpretive guidance regarding 100% bonus depreciation.

Outlook

Excluding special items, earnings are expected to be slightly higher in 2011, compared with 2010, as a result of higher distribution revenues from a January 1, 2011 distribution base rate increase, partially offset by higher operation and maintenance expenses.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business," and "Item 1A. Risk Factors" in PPL's 2010 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings. Among these uncertainties are the ultimate regulatory recovery of storm costs, transmission service charges and other regulatory assets.

Supply Segment

The Supply segment primarily consists of the energy marketing and trading activities, as well as the competitive generation and development operations of PPL Energy Supply. In 2011 and 2010, PPL Energy Supply subsidiaries completed the sale of several businesses, which have been classified as Discontinued Operations. See Note 8 to the Financial Statements for additional information.

Supply segment Net Income Attributable to PPL Corporation for the periods ended September 30 was:

	Three Months			Nine Months		
	2011	2010	% Change	2011	2010	% Change
Energy revenues						
External (a)	$ 1,305	$ 1,339	(3)	$ 3,437	$ 3,908	(12)
Intersegment	5	71	(93)	15	250	(94)
Energy-related businesses	132	98	35	360	286	26
Total operating revenues	1,442	1,508	(4)	3,812	4,444	(14)
Fuel and energy purchases						
External (a)	693	779	(11)	1,572	2,512	(37)
Intersegment	2	1	100	3	2	50

Depreciation	66	65	2	194	189	3
Taxes, other than income	18	12	50	49	34	44
Energy-related businesses	131	96	36	356	276	29
Total operating expenses	1,101	1,152	(4)	2,881	3,744	(23)
Other Income (Expense) - net	22	(23)	(196)	41	(14)	(393)
Other-Than-Temporary Impairments	5		n/a	6	3	100
Interest Expense	59	63	(6)	159	170	(6)
Income Taxes	99	63	57	299	154	94
Income (Loss) from Discontinued Operations	1	(53)	(102)	3	(38)	(108)
Net Income	201	154	31	511	321	59
Net Income Attributable to Noncontrolling Interests	1	1		1	1	
Net Income Attributable to PPL Corporation	$ 200	$ 153	31	$ 510	$ 320	59

(a) Includes the impact from energy-related economic activity. See "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements for additional information.

The changes in the components of Net Income Attributable to PPL Corporation between the periods ended September 30, 2011 and 2010 were due to the following factors.

	Three Months	Nine Months
Unregulated gross energy margins	$ (64)	$ (264)
Other operation and maintenance	(2)	(40)
Other income (expense) - net	20	27
Other	(4)	(9)
Income taxes	(7)	85
Discontinued operations, after-tax - excluding certain revenues and expenses included in margins	5	14
Special items, after-tax	99	377
Total	$ 47	$ 190

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of margins.

- Other operation and maintenance expense was higher for the nine-month period primarily due to $16 million of higher payroll-related costs, $9 million of which relates to PPL Susquehanna, and increased costs at PPL Susquehanna of $10 million from the dual-unit turbine blade replacement outages and $8 million from the refueling outage.

- Other income (expense)-net was higher for the three and nine-month periods primarily due to a $22 million gain on the redemption of debt in 2011. See Note 12 to the Financial Statements for additional information.

- Income taxes for the three-month period includes adjustments in federal and state income tax reserves of $13 million and a $12 million decrease in the tax benefit from the domestic manufacturing deduction resulting from the impact of revised bonus tax depreciation estimates and the $27 million impact of lower pre-tax income.

  Income taxes were $135 million lower for the nine-month period primarily due to lower pre-tax income. The decrease in income taxes was partially offset by a $24 million decrease in the tax benefit from the domestic manufacturing deduction resulting from the impact of revised bonus tax depreciation, $19 million in Pennsylvania net operating loss valuation allowance adjustments, primarily related to the impact of 100% bonus tax depreciation on future projected Pennsylvania taxable income, and a $13 million increase in income taxes due to 2010 adjustments in federal and state income tax reserves.

The following after-tax amounts, which management considers special items, also impacted the segment's earnings for the periods ended September 30.

	Income Statement Line Item	Three Months 2011	Three Months 2010	Nine Months 2011	Nine Months 2010
Special Items, net of tax benefit (expense):					
Adjusted energy-related economic activity, net, net of tax of $8, ($1), ($2), $83	(a)	$ (10)	$ 4	$ 4	$ (115)
Sales of assets:					
Sundance indemnification, net of tax of $0, $0, $0, $0	Other Income-net				1
Impairments:					
Emission allowances, net of tax of $0, $2, $1, $6 (Note 13)	Other O&M		(2)	(1)	(9)
Renewable energy credits, net of tax of $0, $0, $2, $0 (Note 13)	Other O&M			(3)	
Adjustments - nuclear decommissioning trust investments, net of tax of $2, $0, $2, $1 (b)	Other Income-net	(1)			
LKE acquisition-related costs:					
Monetization of certain full-requirement sales contracts, net of tax of $0, $20, $0, $72	(c)		(27)		(102)
Sale of certain non-core generation facilities, net of tax of $0, $39, $0, $39 (d)	Disc. Operations		(62)	(2)	(62)
Discontinued cash flow hedges and ineffectiveness, net of tax of $0, $10, $0, $10 (e)	Other Income-net		(19)		(19)
Other:					
Montana hydroelectric litigation, net of tax of $0, $0, $1, $22	(f)	(1)	(1)	(2)	(34)
Litigation settlement - spent nuclear fuel storage, net of tax of ($2), $0, ($23), $0 (g)	Fuel	4		33	
Health care reform - tax impact (h)	Income Taxes				(8)
Total		$ (8)	$ (107)	$ 29	$ (348)

(a) See "Reconciliation of Economic Activity" below.

(b) Represents other-than-temporary impairment charges on securities, including the reversal of previous other-than-temporary impairment charges when securities previously impaired were sold.

(c) See "Monetization of Certain Full-Requirement Sales Contracts" in Note 14 to the Financial Statements. For the three and nine months ended September 30, 2010, $150 and $343 million of pre-tax gains were recorded to "Wholesale energy marketing" and $197 and $517 million of pre-tax losses were recorded to "Energy purchases" on the Statements of Income.

(d) Assets associated with certain non-core generation facilities were written down to their estimated fair value (less cost to sell). These facilities were sold in March 2011.

(e) Due to expected net proceeds from the then-anticipated sale of certain non-core generation facilities, coupled with the monetization of certain full-requirement sales contracts, debt that had been planned to be issued by PPL Energy Supply was no longer needed. As a result, hedge accounting associated with the interest rate swaps entered into by PPL in anticipation of a debt issuance by PPL Energy Supply was discontinued.

(f) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. Through September 30, 2010, PPL Montana recorded a pre-tax charge of $56 million, representing estimated rental compensation for years prior to 2010, including interest. Of this total charge $47 million, pre-tax, was recorded to "Other operation and maintenance" and $9 million, pre-tax, was recorded to "Interest Expense" on the Statements of Income. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the Supreme Court granted PPL Montana's petition. Oral argument is scheduled for December 2011. PPL Montana continues to accrue interest expense on rental compensation covered by the court decision.

(g) In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna station. PPL Susquehanna recorded credits to fuel expense of $6 million and $56 million, pre-tax for the three and nine months ended September 30, 2011 to recognize recovery, under the settlement agreement, of certain costs to store spent nuclear fuel at the Susquehanna station. The amounts recorded through September 2011 cover the costs incurred from 1998 through December 2010.

(h) Represents income tax expense recorded as a result of the provisions within Health Care Reform which eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net" for the periods ended September 30.

	Three Months		Nine Months	
	2011	2010	2011	2010
Operating Revenues				
Unregulated retail electric and gas	$ 4	$ 8	$ 9	$ 16
Wholesale energy marketing	216	52	229	(190)
Operating Expenses				
Fuel	(28)	16	(16)	13
Energy Purchases	(176)	(300)	(49)	(418)
Energy-related economic activity (a)	16	(224)	173	(579)
Option premiums (b)	6	21	17	46
Adjusted energy-related economic activity	22	(203)	190	(533)
Less: Unrealized economic activity associated with the monetization of certain full-requirement sales contracts in 2010 (c)		(208)		(335)
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010	40		184	
Adjusted energy-related economic activity, net, pre-tax	$ (18)	$ 5	$ 6	$ (198)
Adjusted energy-related economic activity, net, after-tax	$ (10)	$ 4	$ 4	$ (115)

(a) See Note 14 to the Financial Statements for additional information.
(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in Wholesale energy marketing - realized and Energy purchases - realized on the Statements of Income.
(c) See "Components of Monetization of Certain Full-Requirement Sales Contracts" below.

Components of Monetization of Certain Full-Requirement Sales Contracts

The following table provides the components of the "Monetization of Certain Full-Requirements Sales Contracts" special item for the periods ended September 30, 2010.

	Three Months	Nine Months
Full-requirement sales contracts monetized (a)	$ 32	$ (28)
Economic activity related to the full-requirement sales contracts monetized	(79)	(146)
Monetization of certain full-requirement sales contracts, pre-tax (b)	$ (47)	$ (174)
Monetization of certain full-requirement sales contracts, after-tax	$ (27)	$ (102)

(a) See "Commodity Price Risk (Non-trading) - Monetization of Certain Full-Requirement Sales Contracts" in Note 14 to the Financial Statements for additional information.
(b) The three and nine-month periods include unrealized losses of $208 million and $335 million, which are reflected in "Wholesale energy marketing - Unrealized economic activity" and "Energy purchases - Unrealized economic activity" on the Statement of Income. Both periods include net realized gains of $161 million, which are reflected in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statement of Income. This economic activity will continue to be realized through May 2013.

Outlook

Excluding special items, earnings are expected to be lower in 2011, compared with 2010, as a result of lower energy margins driven by lower Eastern energy and capacity prices, higher average fuel costs and the turbine blade replacement outages at the Susquehanna nuclear plant, as well as higher income taxes and higher operation and maintenance expense.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business," and "Item 1A Risk Factors" in PPL's 2010 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measures

The following discussion includes financial information prepared in accordance with GAAP, as well as three non-GAAP financial measures: "Kentucky Gross Margins," "Pennsylvania Gross Delivery Margins" and "Unregulated Gross Energy Margins." These measures are not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL believes that these measures provide additional criteria to make investment decisions.

These performance measures are used, in conjunction with other information, internally by senior management and the Board of Directors to manage the Kentucky Regulated, Pennsylvania Regulated and Supply segment operations, analyze each respective segment's actual results compared to budget and, in certain cases, to measure certain corporate financial goals used in determining variable compensation.

PPL's three non-GAAP financial measures include:

- "Kentucky Gross Margins" is a single financial performance measure of the Kentucky Regulated segment's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expense and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. As a result, this measure represents the net revenues from the Kentucky Regulated segment's operations.

- "Pennsylvania Gross Delivery Margins" is a single financial performance measure of the Pennsylvania Regulated segment's electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance," which is primarily Act 129 costs, and in "Taxes, other than income," which is primarily gross receipts tax. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment Utility revenue (expense)" in the table below. These mechanisms allow for recovery of certain expenses; therefore, certain expenses and revenues offset with minimal impact on earnings. As a result, this measure represents the net revenues from the Pennsylvania Regulated segment's electric delivery operations.

- "Unregulated Gross Energy Margins" is a single financial performance measure of the Supply segment's competitive energy non-trading and trading activities. In calculating this measure, the Supply segment's energy revenues, which include operating revenues associated with certain Supply segment businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain Supply segment businesses that are classified as discontinued operations. This performance measure is relevant to PPL due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are reflected in "PLR intersegment Utility revenue (expense)" in the table below. PPL excludes from "Unregulated Gross Energy Margins" the Supply segment's energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to PPL's three non-GAAP financial measures for the periods ended September 30.

	2011 Three Months					2010 Three Months				
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues										
Utility	$ 734	$ 454		$ 487 (c)	$ 1,675		$ 570		$ 162 (c)	$ 732

Operating Expenses										
Fuel	666		872	(46) (g)	1,492			829	(19) (g)	810
Energy purchases										
Realized	179	591	496	201 (e)	1,467		848	1,198	86 (e)	2,132
Unrealized economic activity				49 (f)	49				418 (f)	418
Other operation and maintenance	67	77	13	1,884	2,041		70	20	1,139	1,229
Depreciation	37			660	697				376	376
Taxes, other than income		77	22	139	238		101	8	72	181
Energy-related businesses				368	368				288	288
Intercompany eliminations		(9)	3	6			(5)	2	3	
Total Operating Expenses	949	736	1,406	3,261	6,352		1,014	2,057	2,363	5,434
Discontinued operations			12	(12) (h)				68	(68) (h)	
Total	$ 1,190	$ 693	$ 1,779	$ (1,495)	$ 2,167		$ 637	$ 2,043	$ (1,456)	$ 1,224

(a) Represents amounts that are excluded from Margins.
(b) As reported on the Statement of Income.

(c) Primarily represents WPD's utility revenue.
(d) Primarily related to PLR supply sold by PPL EnergyPlus to PPL Electric.
(e) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. For the three and nine months ended September 30, 2011, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include a net pre-tax gain of $6 million and $17 million related to the amortization of option premiums and a net pre-tax loss of $40 million and $184 million related to the monetization of certain full-requirement sales contracts. The three and nine months ended September 30, 2010 include a net pre-tax gain of $21 million and $46 million related to the amortization of option premiums and a net pre-tax gain of $161 million for both periods related to the monetization of certain full-requirement sales contracts.
(f) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(g) 2011 includes credits for the spent nuclear fuel litigation settlement recorded in the three and nine months ended September 30, 2011 of $6 million and $56 million and economic activity related to fuel. 2010 includes economic activity related to fuel.
(h) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL's three non-GAAP financial measures for the periods ended September 30 as well as the change between periods. The factors that gave rise to the changes are described below the table.

	Three Months			Nine Months		
	2011	2010	Change	2011	2010	Change
Kentucky Gross Margins	$ 419		$ 419	$ 1,190		$ 1,190
PA Gross Delivery Margins by Component						
Distribution	$ 179	$ 170	$ 9	$ 560	$ 506	$ 54
Transmission	46	47	(1)	133	131	2
Total	$ 225	$ 217	$ 8	$ 693	$ 637	$ 56
Unregulated Gross Energy Margins by Region						
Non-trading						
Eastern U.S.	$ 530	$ 611	$ (81)	$ 1,502	$ 1,788	$ (286)
Western U.S.	92	88	4	263	259	4
Net energy trading	(7)	(20)	13	14	(4)	18
Total	$ 615	$ 679	$ (64)	$ 1,779	$ 2,043	$ (264)

Kentucky Gross Margins

PPL acquired LKE on November 1, 2010. Margins for the three and nine months ended September 30, 2011 are included in PPL's results with no comparable amounts for 2010.

Pennsylvania Gross Delivery Margins

Distribution

The approved distribution rate case increased rates approximately 1.6% effective January 1, 2011, which improved distribution margins by $15 million and $50 million for the three and nine months ended September 30, 2011, compared with the same periods in 2010. Weather also had a $5 million favorable impact on the nine months ended September 30, 2011, compared with the same period in 2010. Weather-related variances for PPL Electric are calculated based on a ten-year historical average.

The three and nine months ended September 30, 2011 also reflect a $7 million charge to reduce a portion of the transmission service charge regulatory asset associated with a 2005 undercollection that was not included in any subsequent rate reconciliations filed with the PUC. PPL Electric plans to seek PUC approval to recover this amount. However, management cannot assert at the present time that it is probable that the previously recorded regulatory asset will be recovered. The regulatory asset will be reinstated should the PUC approve recovery of these costs.

Unregulated Gross Energy Margins

Eastern U.S.

Changes in Eastern U.S. non-trading margins for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Lower baseload energy and capacity prices	$ (65)	$ (142)
Coal and hydro generation volume	2	(47)
2010 monetization of certain deals that rebalanced the business and portfolio	(14)	(41)
Impact of non-core generation facilities sold in the first quarter of 2011	(21)	(37)
Nuclear generation volume (a)	20	(35)
Higher coal prices	(16)	(31)
Lower intermediate/peaking capacity prices, partially offset by higher generation volumes in the first half of 2011	(18)	(18)
Full-requirement sales contracts driven by contracts monetized in 2010 and reduced shopping in 2011	23	74
Other	8	(9)
	$ (81)	$ (286)

(a) Volumes were higher for the three-month period as the result of the final uprate at Susquehanna Unit 2. Volumes were lower for the nine-month period primarily as a result of the dual-unit turbine blade replacement outages beginning in May 2011.

Net Energy Trading Margins

Net energy trading margins increased during the three and nine months ended September 30, 2011, compared with the same periods in 2010, as a result of higher margins on power and gas positions of $13 million and $18 million.

Utility Revenues

Changes in utility revenues for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Domestic:		
PPL Electric		
Decrease in energy revenue due to customers selecting alternative suppliers (a)	$ (134)	$ (522)
Price increase related to the distribution rate case effective January 1, 2011	15	50
Other	3	15
Total	(116)	(457)
LKE (b)	736	2,140
Total Domestic	620	1,683
U.K.:		
PPL WW		
Price increases (c)	24	45
Change in recovery of allowed revenues (d)	(2)	9
Foreign currency exchange rates	12	25
Other	(3)	(4)
Total PPL WW	31	75
WPD Midlands (b)	292	499
Total U.K.	323	574
Total	$ 943	$ 2,257

(a) In 2011, customers continue to select alternative suppliers to provide their energy needs. This decrease in energy revenue has a minimal impact on earnings as the cost of providing this energy is passed through to the customer with no additional mark-up. These revenues are offset with purchases in "Pennsylvania Gross Delivery Margins."

(b) There are no comparable amounts in the 2010 periods as LKE was acquired in November 2010 and WPD Midlands was acquired in April 2011.

(c) The three- and nine-month periods were impacted by price increases effective April 1, 2011. The nine-month period was also impacted by price increases effective April 1, 2010.

(d) The nine-month period was higher due to a $9 million unfavorable impact on regulatory allowed revenues associated with a charge recorded in the first quarter of 2010, primarily resulting from changes in network electricity line loss assumptions.

Other Operation and Maintenance

Changes in other operation and maintenance expense for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Domestic:		
LKE (a)	$ 187	$ 566
Montana hydroelectric litigation (b)		(47)
PUC reportable storm costs, net of insurance recoveries	8	20
Susquehanna nuclear plant costs (c)	(5)	23
Impacts from emission allowances (d)	(3)	(13)
Disposition of RECs (e)	(3)	5
Other	12	8

	Three Months	Nine Months
U.K.:		
PPL WW (f)	9	14
WPD Midlands (a) (g)	164	236
Total	$ 369	$ 812

(a) There are no comparable amounts in the 2010 periods as LKE was acquired in November 2010 and WPD Midlands was acquired in April 2011.
(b) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded a pre-tax charge of $56 million, representing estimated rental compensation for the first quarter of 2010 and prior years, including interest. The portion of the total charge recorded to other operation and maintenance totaled $49 million. PPL Montana continues to accrue rental compensation. See Note 10 to the Financial Statements for additional information.
(c) The nine-month period was $23 million higher primarily due to increased costs of $10 million from the dual-unit turbine blade replacement outages, $9 million of higher payroll-related costs and $8 million from the refueling outage.
(d) The nine-month period was $13 million lower primarily due to $2 million of impairment charges in 2011 compared with $15 million of impairment charges in 2010.
(e) The three and nine-month periods in 2011 include impairment charges of $1 million and $5 million.
(f) The three and nine-month periods were higher primarily due to higher pension costs resulting primarily from increased amortization of actuarial losses.
(g) The three and nine-month periods include $84 million of severance compensation, early retirement deficiency costs and outplacement services for employees separating from the WPD Midlands companies as a result of a reorganization to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales).

Depreciation

Changes in depreciation expense for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Additions to PP&E	$ 8	$ 17
Foreign currency exchange rates	2	4
LKE (a) (b)	84	249
WPD Midlands (b)	31	51
Total	$ 125	$ 321

(a) The three and nine-month periods include $13 million and $35 million of depreciation expense related to plant additions at TC2 and E.W. Brown.
(b) There are no comparable amounts in the 2010 periods as LKE was acquired in November 2010 and WPD Midlands was acquired in April 2011.

Taxes, Other Than Income

Changes in taxes, other than income for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Domestic property tax (a)	$ (3)	$ (8)
LKE (b)	10	28
WPD Midlands (b)	23	38
Other	4	(1)
Total	$ 34	$ 57

(a) The decrease for the three and nine month periods is primarily due to the amortization of the PURTA refund. This is included in "Pennsylvania Gross Delivery Margins."
(b) There are no comparable amounts in the 2010 periods as LKE was acquired in November 2010 and WPD Midlands was acquired in April 2011.

Other Income (Expense) - net

The $63 million increase in other income (expense) - net for the three months ended September 30, 2011 compared with the same period in 2010 was primarily attributable to:

- a $22 million gain on the accelerated amortization of the fair value adjustment to the debt recorded in connection with previously settled fair value hedges. The accelerated amortization was the result of the July 2011 redemption of PPL Electric's 7.125% Senior Secured Bonds due 2013; and
- $29 million of net losses reclassified from AOCI into earnings in 2010 resulting from the discontinuation of interest rate swaps entered into in anticipation of a debt issuance by PPL Energy Supply.

In addition to the factors described above, the $16 million increase in other income (expense) - net for the nine months ended September 30, 2011 compared with the same period in 2010 was also attributable to:

- a $10 million increase in gains from economic foreign currency exchange contracts;

- $11 million of LKE other acquisition-related costs recorded in 2010;
- $57 million of WPD Midlands other acquisition-related costs in 2011, including U.K. stamp duty tax; and
- a $57 million foreign currency loss related to the repayment of the 2011 Bridge Facility borrowing, offset by a $55 million gain on foreign currency forward contracts that hedged the repayment of such borrowings.

Interest Expense

Changes in interest expense for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
2011 Bridge Facility costs related to the acquisition of WPD Midlands		$ 43
2010 Bridge Facility costs related to the acquisition of LKE	$ (45)	(67)
2010 Equity Units (a)	(1)	29
2011 Equity Units (b)	12	22
LKE (c)	36	108
WPD Midlands (c) (d)	54	96
Other short-term and long-term debt interest expense	2	20
Interest expense on the March 2010 WPD (South Wales) and WPD (South West) debt issuances		11
Hedging activity	8	15
Amortization of debt discounts, premiums and issuance costs (e)	12	12
Capitalized interest	(4)	(13)
Montana hydroelectric litigation (f)		(6)
Other	(5)	(5)
Total	$ 69	$ 265

(a) Interest related to the June 2010 issuance to support the November 2010 LKE acquisition.
(b) Interest related to the April 2011 issuance to support the April 2011 WPD Midlands acquisition.
(c) There are no comparable amounts in the 2010 periods as LKE was acquired in November 2010 and WPD Midlands was acquired in April 2011.
(d) 2011 Bridge Facility costs of $22 million are included in "2011 Bridge Facility costs related to the acquisition of WPD Midlands" above.
(e) The three and nine-month periods include the acceleration of deferred financing fees of $7 million due to the July 2011 redemption by PPL Energy Supply of $250 million of 7.00% Senior Notes due 2046.
(f) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded $7 million of interest expense on rental compensation covered by the court decision. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the Supreme Court granted PPL Montana's petition. Oral argument is scheduled for December 2011. PPL Montana continues to accrue interest expense on the rental compensation covered by the court decision. See Note 10 to the Financial Statements for additional information.

Income Taxes

Changes in income taxes for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Higher pre-tax book income	$ 5	$ 96
State valuation allowance adjustments (a)		19
Domestic manufacturing deduction (b)	12	24
Federal and state tax reserve adjustments (c)	56	60
U.S. income tax on foreign earnings net of foreign tax credit	(2)	(11)
U.K. Finance Act adjustments (d)	(15)	(15)
Foreign losses resulting from restructuring (e)	27	52
Foreign tax reserve adjustments (e)	(24)	(46)
Health Care Reform		(8)
LKE (f)	52	125
WPD Midlands (d) (f)	(36)	(26)
Intercompany interest on WPD financing entities	5	11
Other	11	(4)
Total	$ 91	$ 277

(a) Primarily reflects the impact of Pennsylvania Department of Revenue interpretive guidance issued in February 2011 on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. Due to the reduction in projected Pennsylvania taxable income for tax years 2011 and 2012 related to the 100% bonus depreciation deduction, PPL adjusted its deferred tax valuation allowances for Pennsylvania net operating losses. As a result, during the nine months ended September 30, 2011 PPL recorded $11 million of deferred income tax expense.
(b) In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation eliminates the estimated income tax benefit related to the domestic manufacturing deduction in 2011.
(c) In 1997, the U.K. imposed a Windfall Profits Tax on privatized utilities, including WPD. In September 2010, the U.S. Tax Court ruled in PPL's favor in a pending dispute with the IRS, concluding that the U.K. Windfall Profits Tax is a creditable tax for U.S. tax purposes. As a result and with the finalization of other issues, PPL recorded a $42 million tax benefit which impacted federal and state income tax reserves and related deferred income taxes during the third quarter of 2010. In January 2011, the IRS appealed the U.S. Tax Court's decision to the U.S. Court of Appeals for the Third Circuit. See Note 5 to the Financial Statements for additional information.

In July 2010, the U.S. Tax Court ruled in PPL's favor in a pending dispute with the IRS, concluding that street lighting assets of PPL Electric are depreciable for tax purposes over seven years. As a result, PPL recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes in the third quarter of 2010.

(d) The U.K.'s Finance Act of 2011, enacted in July 2011, included reductions in the U.K. statutory income tax rate. The statutory income tax rate was reduced from 27% to 26% retroactive to April 1, 2011 and will be reduced from 26% to 25 % effective April 1, 2012. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit of $69 million in the third quarter of 2011. WPD Midlands' portion of the deferred tax benefit is $35 million.

The U.K.'s Finance Act of 2010, enacted in July 2010, included a reduction in the U.K. statutory income tax rate. Effective April 1, 2011, the statutory income tax rate was reduced from 28% to 27%. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit of $19 million in the third quarter of 2010.

(e) During the three and nine months ended September 30, 2010, PPL recorded $27 million and $52 million of foreign tax benefits and related adjustments to foreign tax reserves of $24 million and $46 million in conjunction with losses resulting from restructuring in the U.K. These losses offset tax on a deferred gain from a prior year sale of WPD's supply business. See Note 5 to the Financial Statements for additional information.

(f) There are no comparable amounts in the 2010 periods as LKE was acquired in November 2010 and WPD Midlands was acquired in April 2011.

See Note 5 to the Financial Statements for additional information on income taxes.

Discontinued Operations

Income (Loss) from Discontinued Operations (net of income taxes) increased by $53 million and $40 million for the three and nine months ended September 30, 2011, compared with the same periods in 2010. The increases were primarily due to after-tax impairment charges recorded in the third quarter of 2010 totaling $62 million related to the impairment of assets associated with certain non-core generation facilities that were written down to their estimated fair value (less cost to sell). These facilities were sold in March 2011. See "Discontinued Operations" in Note 8 to the Financial Statements for additional information.

Financial Condition

Liquidity and Capital Resources

PPL had the following at:

	September 30, 2011	December 31, 2010
Cash and cash equivalents	$ 1,511	$ 925
Short-term investments (a)	16	163
	$ 1,527	$ 1,088
Short-term debt	$ 428	$ 694

(a) Balance at December 31, 2010 represents tax-exempt revenue bonds issued by Louisville/Jefferson County, Kentucky on behalf of LG&E that were purchased from the remarketing agent in 2008. Such bonds were remarketed to unaffiliated investors in January 2011. See Note 17 to the Financial Statements for further discussion.

The $586 million increase in PPL's cash and cash equivalents position was primarily the net result of:

- proceeds of $5.2 billion from the issuance of long-term debt;
- proceeds of $2.3 billion from the issuance of common stock;
- cash provided by operating activities of $1.8 billion;
- proceeds from the sale of certain non-core generation facilities of $381 million;
- the payment of $5.8 billion for the acquisition of WPD Midlands;
- capital expenditures of $1.7 billion;
- the retirement of $708 million of long-term debt:
- the payment of $543 million of common stock dividends;
- a net decrease in short-term debt of $322 million; and
- the payment of $84 million of debt issuance and credit facility costs.

PPL's cash provided by operating activities increased by $150 million for the nine months ended September 30, 2011 compared with the same period in 2010. The increase was the net effect of:

- operating cash provided by LKE, $674 million, and WPD Midlands, $206 million;
- cash from components of working capital, $56 million (excluding LKE and Midlands); partially offset by
- reduction in cash from counter party collateral, $442 million;
- lower gross energy margins, $154 million after-tax; and
- proceeds from monetizing certain full-requirements energy contracts in 2010, $249 million.

Credit Facilities

At September 30, 2011, PPL's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
PPL Energy Supply Credit Facilities (a)	$ 3,200	$ 250	$ 208	$ 2,742
PPL Electric Credit Facilities (b)	350		13	337
LG&E Credit Facility (c)	400			400
KU Credit Facilities (c)(d)	598		198	400
Total Domestic Credit Facilities (e)	$ 4,548	$ 250	$ 419	$ 3,879
PPL WW Credit Facility	£ 150	£ 111	n/a	£ 39
WPD (South West) Credit Facility	210		n/a	210
WPD (East Midlands) Credit Facility (f)	300		£ 70	230
WPD (West Midlands) Credit Facility (f)	300		71	229
Total WPD Credit Facilities (g)	£ 960	£ 111	£ 141	£ 708

(a) In March 2011, PPL Energy Supply's $300 million Structured Credit Facility expired. PPL Energy Supply's obligations under this facility were supported by a $300 million letter of credit issued on PPL Energy Supply's behalf under a separate, but related $300 million 5-year credit agreement, which also expired in March 2011.

(b) Committed capacity includes a $150 million credit facility related to an asset-backed commercial paper program through which PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary pledges these assets to secure loans of up to an aggregate of $150 million from a commercial paper conduit sponsored by a financial institution. At September 30, 2011, based on accounts receivable and unbilled revenue pledged, the amount available for borrowing under the facility was limited to $86 million. In July 2011, PPL Electric and the subsidiary extended the expiration date of the credit agreement related to the asset-backed commercial paper program to July 2012.

(c) In June 2011, LG&E and KU each amended its respective Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon the respective company's senior secured long-term debt rating rather than the senior unsecured debt rating.

(d) In April 2011, KU entered into a new $198 million letter of credit facility that has been used to issue letters of credit to support outstanding tax exempt bonds. The facility matures in April 2014. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.

(e) Total borrowings outstanding under PPL's domestic credit facilities decreased on a net basis by $263 million since December 31, 2010.

In October 2011, PPL Energy Supply, PPL Electric, LG&E and KU each amended its respective Syndicated Credit Facility. The amendments included extending the expiration dates from December 2014 to October 2016. Under these facilities, PPL Energy Supply, PPL Electric, LG&E and KU each continue to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under PPL's domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 9% of the total committed capacity.

(f) In April 2011, following the completion of the acquisition of WPD Midlands, WPD (East Midlands) and WPD (West Midlands) each entered into a £300 million 5-year syndicated credit facility. Under the facilities, WPD (East Midlands) and WPD (West Midlands) each have the ability to make cash borrowings and to request the lenders to issue up to £80 million of letters of credit in lieu of borrowing.

(g) At September 30, 2011, the unused capacity of WPD's credit facilities was approximately $1.3 billion.

The commitments under WPD's credit facilities are provided by a diverse bank group, with no one bank providing more than 17% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL's credit facilities.

Commercial Paper

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at September 30, 2011.

In October 2011, PPL Energy Supply re-activated its $500 million commercial paper program to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At November 4, 2011, PPL Energy Supply had $400 million of commercial paper outstanding at a weighted-average interest rate of approximately 0.51%, which was used to partially fund the repayment of PPL Energy Supply's 6.40% Senior Notes upon maturity in November 2011. PPL Energy Supply expects to refinance outstanding commercial paper on a long-term basis at a future date, subject to market conditions.

2011 Bridge Facility

In March 2011, concurrently, and in connection with entering into the agreement to acquire WPD Midlands, PPL entered into a commitment letter with certain lenders pursuant to which the lenders committed to provide PPL with 364-day unsecured bridge financing of up to £3.6 billion solely to (i) fund the acquisition and (ii) pay certain fees and expenses in connection with the acquisition. The bridge financing commitment was subsequently syndicated to a group of banks, including the initial commitment lenders. Upon the syndication of the commitment, in March 2011, PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, entered into the 2011 Bridge Facility.

On April 1, 2011, concurrent with the closing of the WPD Midlands acquisition, PPL Capital Funding borrowed an aggregate of £1.75 billion and PPL WEM borrowed £1.85 billion under the 2011 Bridge Facility. The borrowings bore interest at approximately 2.62%. See Note 8 to the Financial Statements for additional information on the acquisition.

In accordance with the terms of the 2011 Bridge Facility, PPL Capital Funding's borrowings of £1.75 billion were repaid with approximately $2.8 billion of proceeds received from PPL's issuance of common stock and 2011 Equity Units in April 2011, as discussed in "Long-term Debt and Equity Securities" below. Also in April 2011, PPL WEM repaid £650 million of its 2011 Bridge Facility borrowing. Such repayment was funded primarily with proceeds received from PPL WEM's issuance of senior notes, which is also discussed below. In May 2011, PPL WEM repaid the remaining £1.2 billion of borrowings outstanding under the 2011 Bridge Facility, primarily with the proceeds from senior notes issued by WPD (East Midlands) and WPD (West Midlands), also discussed below.

In anticipation of the repayment of a portion of the GBP-denominated borrowings under the 2011 Bridge Facility with U.S. dollar-denominated proceeds received from PPL's issuance of common stock and 2011 Equity Units and PPL WEM's issuance of U.S. dollar-denominated senior notes, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. See Note 14 to the Financial Statements for further discussion.

Long-term Debt and Equity Securities

PPL's long-term debt and equity securities activity through September 30, 2011 was:

	Debt Issuances (a)	Debt Retirements	Equity Issuances
PPL Common Stock			$ 2,328
PPL Capital Funding Junior Subordinated Notes	$ 978		
PPL Energy Supply Senior Unsecured Notes (b)		$ (250)	
PPL Electric First Mortgage Bonds (c)	645	(458)	
LKE Senior Unsecured Notes	250		
PPL WEM Senior Unsecured Notes	959		
WPD (West Midlands) Senior Unsecured Notes	1,282		
WPD (East Midlands) Senior Unsecured Notes	967		
WPD (East Midlands) Index-linked Notes	164		
Total Cash Flow Impact	$ 5,245	$ (708)	$ 2,328
Assumed through consolidation - WPD Midlands acquisition:			
WPD (East Midlands) Senior Unsecured Notes (d)	$ 418		
WPD (West Midlands) Senior Unsecured Notes (d)	412		
Total Assumed	$ 830		
Non-cash Exchanges (e):			
LKE Senior Unsecured Notes	$ 875	$ (875)	
LG&E First Mortgage Bonds	535	(535)	
KU First Mortgage Bonds	1,500	(1,500)	
Total Exchanged	$ 2,910	$ (2,910)	
Net Increase	$ 5,367		$ 2,328

PPL's long-term debt and equity securities activity since September 30, 2011 was:

	Debt Issuances	Debt Retirements	Equity Issuances
PPL Energy Supply Senior Unsecured Notes (f)		$ (500)	
LG&E and KU Capital LLC Medium Term Notes (f)		(2)	
Total Cash Flow Impact		$ (502)	
Net Decrease	$ (502)		

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.

(b) Senior unsecured notes were redeemed at par prior to their 2046 maturity date.
(c) Retirement reflects amount paid to redeem $400 million aggregate principal amount of first mortgage bonds prior to their 2013 maturity date.
(d) Reflects fair value adjustments resulting from the preliminary purchase price allocation. The principal amount of each issuance is £250 million, which equated to approximately $400 million at the time of closing.
(e) In April 2011, LKE, LG&E and KU each filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statements became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.
(f) Notes were retired upon maturity.

In July 2011, PPL Electric entered into a supplemental indenture that contains prospective amendments to its 2001 Mortgage Indenture, including amendments to reduce the amount of first mortgage bonds issuable on the basis of property additions from 100% of the cost or fair value (whichever is less, as determined in accordance with the terms of the indenture) of such property additions to 66-2/3% of such cost or fair value. The amendments became effective in the third quarter of 2011.

At September 30, 2011, LKE's tax-exempt revenue bonds that are in the form of auction rate securities and total $231 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the nine months ended September 30, 2011, the weighted-average rate on LG&E's and KU's auction rate bonds in total was 0.27%.

See Note 7 to the Financial Statements for additional information about long-term debt and equity securities.

Common Stock Dividends

In August 2011, PPL declared its quarterly common stock dividend, payable October 1, 2011, at 35.0 cents per share (equivalent to $1.40 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt and preferred securities of PPL and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL and its subsidiaries are based on information provided by PPL and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

In prior periodic reports, PPL described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, PPL is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL's ratings, but without stating what ratings have been assigned to PPL or its subsidiaries, or their securities. The ratings assigned by the rating agencies to PPL and its subsidiaries and their respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of the then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

Moody's affirmed all of the ratings for PPL and all of its rated subsidiaries.

S&P revised the outlook for PPL, PPL Capital Funding, PPL Energy Supply, PPL Electric, LKE, LG&E, KU, PPL WW, WPD (South West) and WPD (South Wales), affirmed the issuer and senior unsecured ratings of PPL WW, and lowered the following ratings:

- the issuer rating of PPL;
- the senior unsecured and junior subordinated ratings of PPL Capital Funding;
- the issuer and senior unsecured ratings of PPL Energy Supply;
- the issuer, senior secured, preference stock, and commercial paper ratings of PPL Electric;

- the issuer and senior unsecured ratings of LKE;
- the issuer, senior secured ratings, and short-term ratings of LG&E;
- the issuer, senior secured ratings, and short-term ratings of KU;
- the issuer and senior unsecured ratings of WPD (South West); and
- the issuer and senior unsecured ratings of WPD (South Wales).

Fitch affirmed all of the ratings for PPL, PPL Capital Funding, PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

In April 2011, Moody's and S&P took the following actions following the completion of the acquisition of WPD Midlands.

Moody's:
- lowered the issuer and senior unsecured debt ratings of WPD (East Midlands) and WPD (West Midlands);
- affirmed the short-term issuer rating of WPD (East Midlands); and
- assigned a senior unsecured rating and an outlook to PPL WEM.

S&P:
- lowered the issuer and senior unsecured debt ratings of WPD (East Midlands) and WPD (West Midlands);
- assigned issuer ratings to PPL WEM;
- raised the issuer rating of PPL WW;
- revised the outlook for PPL and all of its rated subsidiaries;
- raised the short-term ratings of LG&E, KU, WPD (East Midlands), WPD (West Midlands), PPL WEM, PPL WW, WPD (South West), WPD (South Wales) and PPL Electric; and
- affirmed all of the long-term ratings for PPL and its rated subsidiaries.

In May 2011, S&P downgraded the long-term rating of four series of pollution control bonds issued on behalf of KU by one notch in connection with the substitution of the letters of credit enhancing these four bonds.

Also in May 2011, Fitch affirmed its rating and maintained its outlook for PPL Montana's Pass Through Certificates due 2020.

In July 2011, S&P upgraded the senior secured rating for PPL Electric's first mortgage bonds following the execution of a supplemental indenture that provided for prospective amendments to PPL Electric's 2001 Mortgage Indenture, as discussed in "Long-term Debt and Equity Securities" above.

In September 2011, Moody's affirmed the following ratings:
- the issuer ratings for PPL, LG&E, and KU;
- the senior unsecured ratings for PPL Energy Supply and PPL Capital Funding; and
- all of the ratings for LKE.

Also in September 2011, S&P assigned a short-term rating to PPL Energy Supply's commercial paper program.

In October 2011, Moody's and Fitch also assigned a short-term rating to PPL Energy Supply's commercial paper program in support of PPL Energy Supply's re-opening of the program.

In October 2011, Fitch affirmed all of the ratings for PPL WW, WPD (South West), and WPD (South Wales).

Ratings Triggers

PPL and its subsidiaries have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate and foreign currency instruments, which contain provisions requiring PPL and its subsidiaries to post additional collateral, or permitting the counterparty to terminate the contract, if PPL's or the subsidiaries' credit ratings were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at September 30, 2011. At September 30, 2011, if PPL's or its subsidiaries' credit ratings had been below investment grade, the maximum amount that PPL would have been required to post as additional collateral to counterparties was $492 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations and interest rate and foreign currency contracts.

Capital Expenditures

The table below shows PPL's capital expenditure projections at September 30, 2011.

	Projected				
	2011	2012	2013	2014	2015
Construction expenditures (a) (b)					
Generating facilities	$ 762	$ 640	$ 553	$ 360	$ 492
Transmission and distribution facilities	1,401	1,925	2,248	2,215	2,071
Environmental (c)	211	764	1,239	1,212	888
Other	124	173	133	122	138
Total Construction Expenditures	2,498	3,502	4,173	3,909	3,589
Nuclear fuel	152	159	161	158	160
Total Capital Expenditures	$ 2,650	$ 3,661	$ 4,334	$ 4,067	$ 3,749

(a) Construction expenditures include capitalized interest and AFUDC, which are expected to be approximately $320 million for the years 2011 through 2015.
(b) Includes expenditures for certain intangible assets.
(c) Includes approximately $700 million of LKE's currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. LKE expects to recover these costs over a period equivalent to the related depreciable lives of the assets through base rates established by future rate cases.

PPL's capital expenditure projections for the years 2011 through 2015 total approximately $18.5 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table has been revised from that which was presented in PPL's 2010 Form 10-K for changes in estimates for LKE's environmental projects related to new and anticipated EPA compliance standards (actual costs may be significantly lower or higher depending on the final requirements; certain environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism) and expenditures to be made by the newly acquired WPD Midlands. See Note 8 to the Financial Statements for information on PPL's April 2011 acquisition of WPD Midlands.

For additional information on PPL's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL's 2010 Form 10-K.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about PPL's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

PPL segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL's generation assets, full-requirement sales contracts and retail activities. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. The net fair value of economic positions at September 30, 2011 and December 31, 2010 was a net liability of $218 million and $391 million. See Note 14 to the Financial Statements for additional information on economic activity.

To hedge the impact of market price volatility on PPL's energy-related assets, liabilities and other contractual arrangements, PPL both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL's non-trading commodity derivative contracts mature at various times through 2017.

The following table sets forth the change in net fair value of PPL's non-trading commodity derivative contracts for the periods ended September 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months Ended		Nine Months Ended	
	2011	2010	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 894	$ 1,303	$ 956	$ 1,280
Contracts realized or otherwise settled during the period	(100)	(96)	(237)	(330)
Fair value of new contracts entered into during the period	4	3	19	10
Changes in fair value attributable to changes in valuation techniques (a)				(23)
Other changes in fair value	46	144	106	417
Fair value of contracts outstanding at the end of the period	$ 844	$ 1,354	$ 844	$ 1,354

(a) In June 2010, PPL received market bids for certain full-requirement sales contracts that were monetized in early July. See Note 14 to the Financial Statements for additional information. At September 30, 2010, these contracts were valued based on the bids received (the market approach). In prior periods, the fair value of these contracts was measured using the income approach.

The following table segregates the net fair value of PPL's non-trading commodity derivative contracts at September 30, 2011, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
Source of Fair Value	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Prices based on significant other observable inputs	$ 533	$ 272	$ 13		$ 818
Prices based on significant unobservable inputs	(8)	(13)	20	$ 27	26
Fair value of contracts outstanding at the end of the period	$ 525	$ 259	$ 33	$ 27	$ 844

PPL sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties with which it has energy contracts and other factors could affect PPL's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL's trading commodity derivative contracts mature at various times through 2015. The following table sets forth changes in the net fair value of PPL's trading commodity derivative contracts for the periods ended September 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Nine Months	
	2011	2010	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 15	$ 4	$ 4	$ (6)
Contracts realized or otherwise settled during the period	(10)	(8)	(7)	(8)
Fair value of new contracts entered into during the period	(2)	45	6	47
Other changes in fair value	4	(39)	4	(31)
Fair value of contracts outstanding at the end of the period	$ 7	$ 2	$ 7	$ 2

Unrealized gains of approximately $4 million will be reversed over the next three months as the transactions are realized.

The following table segregates the net fair value of trading commodity derivative contracts at September 30, 2011, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

Source of Fair Value	Net Asset (Liability) Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Prices based on significant other observable inputs	$ (4)	$ 11			$ 7
Fair value of contracts outstanding at the end of the period	$ (4)	$ 11			$ 7

VaR Models

A VaR model is utilized to measure commodity price risk in domestic gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's conservative hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the period was as follows.

	Trading VaR		Non-Trading VaR	
	Nine Months Ended September 30, 2011	Twelve Months Ended December 31, 2010	Nine Months Ended September 30, 2011	Twelve Months Ended December 31, 2010
95% Confidence Level, Five-Day Holding Period				
Period End	$ 3	$ 1	$ 5	$ 5
Average for the Period	2	4	5	7
High	4	9	7	12
Low	1	1	4	4

The trading portfolio includes all speculative positions, regardless of the delivery period. All positions not considered speculative are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at September 30, 2011.

Interest Rate Risk

PPL and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL's debt portfolio due to changes in the absolute level of interest rates.

At September 30, 2011, PPL's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL is also exposed to changes in the fair value of its domestic and international debt portfolios. PPL estimated that a 10% decrease in interest rates at September 30, 2011 would increase the fair value of its debt portfolio by $632 million.

At September 30, 2011, PPL had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)
Cash flow hedges			
Interest rate swaps (c)	$ 550	$ (62)	$ (12)
Cross-currency swaps (d)	1,262	49	(184)
Fair value hedges			
Interest rate swaps (e)	99	6	
Economic hedges			
Interest rate swaps (f)	179	(58)	(4)

(a) Includes accrued interest, if applicable.

(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
(c) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any changes in the fair value of such cash flow hedges are recorded in equity. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at September 30, 2011 mature through 2022.
(d) PPL WEM, through PPL, and PPL WW use cross-currency swaps to hedge the interest payments and principal of their U.S. dollar-denominated senior notes with maturity dates ranging from May 2016 to December 2028. While PPL is exposed to changes in the fair value of these instruments, any change in the fair value of these instruments is recorded in equity and reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in both interest rates and foreign currency exchange rates.
(e) PPL utilizes various risk management instruments to adjust the mix of fixed and floating interest rates in its debt portfolio. The change in fair value of these instruments, as well as the offsetting change in the value of the hedged exposure of the debt, is reflected in earnings. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at September 30, 2011 mature in 2047.
(f) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any changes in the fair value of such economic hedges are recorded in regulatory assets and liabilities. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates.

Foreign Currency Risk

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL's domestic operations may make purchases of equipment in currencies other than U.S. dollars.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including the risk associated with translating earnings and dividends for the U.K. affiliates, firm commitments, recognized assets or liabilities, other anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

At September 30, 2011, PPL had the following foreign currency hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)
Net investment hedges (b)	£ 65	$ 5	$ (10)
Economic hedges			
Earnings translation (c)	393	16	(53)

(a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
(b) To protect the value of a portion of its net investment in WPD, PPL executes forward contracts to sell GBP.
(c) To economically hedge the translation of expected income denominated in GBP to U.S. dollars, PPL enters into a combination of average rate forwards and average rate options to sell GBP. The forwards and options outstanding at September 30, 2011, have termination dates ranging from October 2011 through November 2012.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the Susquehanna nuclear plant. At September 30, 2011, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on the Balance Sheet for $594 million. The mix of securities is designed to provide returns sufficient to fund such decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are primarily exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its NDT policy statement. At September 30, 2011, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated $39 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's 2010 Form 10-K for additional information.

Foreign Currency Translation

During 2011 and 2010, the GBP fluctuated in relation to the U.S. dollar. Changes in these exchange rates resulted in a foreign currency translation gain of $154 million for the nine months ended September 30, 2011, which primarily reflected a $242 million increase to PP&E offset by an increase of $88 million to net liabilities. Changes in these exchange rates resulted in a foreign currency translation loss of $83 million for the nine months ended September 30, 2010, which primarily reflected a $223 million reduction to PP&E offset by a reduction of $140 million to net liabilities. These adjustments, net of tax, resulting from translation are recorded in AOCI.

Related Party Transactions

PPL is not aware of any material ownership interests or operating responsibility by senior management of PPL, PPL Energy Supply, PPL Electric, LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with PPL. See Note 11 to the Financial Statements for additional information on related party transactions between PPL affiliates.

Acquisitions, Development and Divestitures

PPL continuously evaluates potential acquisitions, divestitures and development projects as opportunities arise or are identified. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options.

In April 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of WPD Midlands.

In the third quarter of 2011, the Susquehanna Unit 2 uprate, representing the final phase of the project to increase the nuclear plant's generation capacity, was completed and is projected to yield an additional 50 MW.

In September 2011, LG&E and KU entered into an Asset Purchase Agreement for the purchase of three existing natural gas simple cycle combustion units in LaGrange, Kentucky, aggregating approximately 495 MW, plus limited associated contractual arrangements required for operation of the plant (collectively, the Bluegrass Plant), for a purchase price of $110 million. In conjunction with a September 2011 CPCN filing, LG&E and KU anticipate retiring three older coal-fired electric generating stations to meet new, stricter EPA regulations at the end of 2015. These plants include Cane Run, Tyrone and Green River, which have a combined summer rating of 797 MW. Also, in September, the companies requested KPSC approval to build a 640 MW natural gas-fired combined-cycle plant at the existing Cane Run site in Kentucky. The project has an expected cost of approximately $583 million, which includes costs of building a natural gas supply pipeline.

See Note 8 to the Financial Statements for additional information.

With limited exceptions, LKE took care, custody and control of TC2 in January 2011, and has dispatched the unit to meet customer demand since that date. TC2 is a new 760 MW capacity baseload, coal-fired unit that is jointly owned by LG&E and KU (combined 75% interest), and the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25% interest). See Note 10 to the Financial Statements for additional information.

See Notes 1 and 10 to the Financial Statements in PPL's 2010 Form 10-K for information on PPL's November 2010 acquisition of LKE.

Environmental Matters

Protection of the environment is a priority for PPL and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to PPL's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the costs for their products or their demand for PPL's services. See "Overview" and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in PPL's 2010 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Note 18 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: price risk management, defined benefits, asset impairment, loss accruals, AROs, income taxes, regulatory assets and liabilities and business combinations - purchase price allocation. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in PPL's 2010 Form 10-K for a discussion of each critical accounting policy.

Following is an update to the critical accounting policies disclosed in PPL's 2010 Form 10-K.

Business Combinations - Purchase Price Allocation

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary, PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands). In accordance with accounting guidance on business combinations, the identifiable assets acquired and the liabilities assumed must be measured at fair value at the acquisition date. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The excess of the purchase price over the estimated fair value of the identifiable net assets is recorded as goodwill.

The determination and allocation of fair value to the identifiable assets acquired and liabilities assumed is based on various assumptions and valuation methodologies requiring considerable management judgment, including estimates based on key assumptions of the acquisition, and historical and current market data. Significant variables in these valuations include the discount rates, the number of years on which to base cash flow projections, as well as the assumptions and estimates used to determine cash inflows and outflows.

As noted in Note 8 to the Financial Statements, the purchase price allocation is preliminary and could change materially in subsequent periods. The preliminary purchase price allocation was based on PPL's best estimates using information obtained as of the reporting date. Any changes to the purchase price allocation during the measurement period, which can extend up to one year from the date of acquisition, that result in material changes to the consolidated financial results will be adjusted retrospectively. The final purchase price allocation is expected to be completed before the end of 2011. The items pending finalization include, but are not limited to, the valuation of PP&E, intangible assets including goodwill, defined benefit plans, certain liabilities and income tax related matters.

The fair value of the majority of PP&E was determined utilizing a discounted cash flow approach and corroborated by the RAV, which is a measure of the unrecovered value of the regulated network business in the U.K. For purposes of measuring the fair value of the majority of PP&E, PPL determined that fair value should approximate the RAV at the acquisition date because WPD Midlands' operations are conducted in a regulated environment and the regulator allows for earning a rate of return on and recovery of RAV at rates determined to be fair and reasonable. As there is no current prospect for deregulation in WPD Midlands' operating area, it is expected that these operations will remain in a regulated environment for the foreseeable future; therefore, management has concluded that the use of these assets in the regulatory environment represents their highest and best use and a market participant would measure the fair value of these assets using the regulatory rate of return as the discount rate, thus resulting in fair value approximately equal to the RAV. The amounts recorded for PP&E are based on estimates and will be updated upon the finalization of the valuation work.

The preliminary purchase price allocation resulted in goodwill of $2.4 billion that was assigned to the International Regulated segment. This reflects the expected continued growth of a rate-regulated business with a defined service area operating under a constructive regulatory framework, expected cost savings, efficiencies and other benefits resulting from a contiguous service area with WPD (South West) and WPD (South Wales) and the ability to leverage WPD (South West)'s and WPD (South Wales)'s existing management team's high level of performance in capital cost efficiency, system reliability and customer service.

See Note 8 to the Financial Statements for additional information regarding the acquisition.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with PPL Energy Supply's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL Energy Supply's Form 8-K dated June 24, 2011 and 2010 Form 10-K. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides an overview of PPL Energy Supply's business strategy, financial and operational highlights and key legal and regulatory matters.

- "Results of Operations" provides a summary of PPL Energy Supply's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL Energy Supply's Statements of Income, comparing the three and nine months ended September 30, 2011 with the same periods in 2010.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Energy Supply's liquidity position and credit profile. This section also includes a discussion of rating agency decisions.

- "Financial Condition - Risk Management" provides an explanation of PPL Energy Supply's risk management programs relating to market and credit risk.

Overview

Introduction

PPL Energy Supply is an energy company with headquarters in Allentown, Pennsylvania. Through its subsidiaries, PPL Energy Supply is primarily engaged in the generation and marketing of electricity in two key markets - the northeastern and northwestern U.S.

Through December 31, 2010, PPL Energy Supply had two reportable segments - International Regulated and Supply. However, in January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its direct parent, PPL Energy Funding, to better align PPL's organizational structure with the manner in which it manages its businesses and reports segment information in its consolidated financial statements. The distribution separated the U.S. based competitive energy marketing and supply business from the U.K. based regulated electricity distribution business. As a result, effective January 1, 2011, PPL Energy Supply operates in a single business segment. The 2010 operating results of the International Regulated segment have been reclassified to "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income. See Note 8 to the Financial Statements for additional information on the January 2011 distribution.

Business Strategy

PPL Energy Supply's overall strategy is to achieve disciplined growth in energy supply margins while mitigating volatility in both cash flows and earnings. More specifically, PPL Energy Supply's strategy is to optimize the value from its unregulated generation and marketing portfolio. PPL Energy Supply endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk.

To manage financing costs and access to credit markets, a key objective of PPL Energy Supply's business is to maintain a strong credit profile. PPL Energy Supply continually focuses on maintaining an appropriate capital structure and liquidity position. In addition, PPL Energy Supply has adopted financial and operational risk management programs that, among other things, are designed to monitor and manage its exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Highlights

Net Income Attributable to PPL Energy Supply

Net Income Attributable to PPL Energy Supply for the three and nine months ended September 30, 2011 was $169 million and $472 million compared to $265 million and $551 million for the same periods in 2010. This represents a 36% and 14% decrease from 2010. These decreases reflect the following after-tax impacts.

	Three Months	Nine Months
Net unrealized gains/(losses) on energy-related economic activity	$ (14)	$ 119
Impairment charges in 2010 related to the sale of certain non-core generation facilities	62	60
Losses on the monetization of certain full-requirement sales contracts in 2010	27	102
Litigation settlement in 2011 related spent nuclear fuel storage	4	33
Change in "Unregulated Gross Energy Margins" (a)	(37)	(154)
Change in tax benefit from the domestic manufacturing deduction	(12)	(24)
Federal and state tax reserve adjustments	(12)	(13)
Results of PPL Global no longer being consolidated within PPL Energy Supply	(106)	(227)
Other	(8)	25
	$ (96)	$ (79)

(a) The change in "Unregulated Gross Energy Margins" is primarily due to lower baseload energy and capacity prices, changes in coal and hydro generation volumes and losses from the monetization of certain contracts in 2010 that rebalanced the business and portfolio, partially offset by higher margins on full-requirement sales contracts driven by contracts monetized in 2010 and reduced shopping. See "Statement of Income Analysis - Margins" for additional information and a reconciliation of "Unregulated Gross Energy Margins" to Operating Income.

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations.

Susquehanna Turbine Blade Replacement

In April 2011, during the PPL Susquehanna Unit 2 refueling and generation uprate outage, a planned inspection of the Unit 2 turbine revealed cracks in certain of its low pressure turbine blades. Replacement of these blades was required, but was not anticipated as part of the original scope of this outage. The necessary replacement work extended the Unit 2 outage by six weeks. As a precaution, PPL Susquehanna also took Unit 1 out of service in mid-May to inspect the turbine blades in that unit. This inspection revealed cracks in blades similar to those found in Unit 2. The duration of the Unit 1 outage, in which turbine blades were replaced, was also about six weeks. The after-tax earnings impact, including reduced energy-sales margins and repair expense for both units was $63 million. The majority of these costs were incurred during the second quarter of 2011.

Legal and Regulatory Matters

Federal

CSAPR

In July 2011, the EPA signed the CSAPR which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. This rule applies to PPL Energy Supply's plants in Pennsylvania. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions. In October 2011, the EPA proposed technical adjustments to the CSAPR to account for updated data submitted to the agency. Several states and a number of companies have filed petitions for review with the U.S. Court of Appeals for the District of Columbia Circuit challenging various provisions of the CSAPR. PPL Energy Supply's initial review of the allocations under the CSAPR indicates that greater reductions in sulfur dioxide emissions will be required beginning in 2012 under the CSAPR than were required under the CAIR.

For the initial phase of the rule beginning in 2012, sulfur dioxide allowance allocations are expected to be greater than the forecasted emissions based on present operations of existing sulfur dioxide scrubbers and coal supply. However, for the second phase beginning in 2014, PPL Energy Supply will likely have to modify operations and dispatch of its generation fleet in Pennsylvania. With respect to nitrogen oxide emissions, the CSAPR provides a slightly higher amount of allowances for PPL Energy Supply's Pennsylvania plants than under CAIR, but still less than their current forecasted emissions. With uncertainty surrounding the trading program, other compliance options are being analyzed for the fleet, such as the installation of new technology.

Additionally, PPL Energy Supply's plants, including those in Montana, may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. PPL Energy Supply anticipates that some of the measures required for compliance with the CSAPR, such as upgraded or new sulfur dioxide scrubbers at some of its plants and retirement of certain units, may also be necessary to achieve compliance with new sulfur dioxide standards. If additional reductions were to be required, the economic impact to PPL Energy Supply could be significant. See Note 10 to the Financial Statements for additional information on the CSAPR.

Spent Nuclear Fuel Litigation

In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna station. Under the settlement agreement, PPL Susquehanna received $50 million, pre-tax for its share of claims to partially offset its expenses incurred to store spent nuclear fuel at the Susquehanna station through September 2009 and recognized a credit to "Fuel" expense in the second quarter of 2011. PPL Susquehanna also will be eligible to receive payment of annual claims for allowed costs that are incurred thereafter through the December 2013 termination of the settlement agreement. See Note 10 to the Financial Statements for additional information.

Montana Hydroelectric Litigation

In June 2011, the U.S. Supreme Court granted PPL Montana's petition to review the March 2010 Montana Supreme Court decision, which substantially affirmed the June 2008 Montana District Court decision to award the State of Montana retroactive compensation for PPL Montana's hydroelectric facilities' use and occupancy of certain Montana riverbeds. Oral argument is scheduled for December 2011. The stay of judgment granted during the proceedings before the Montana Supreme Court has been extended by agreement with the State of Montana to cover the anticipated period of the proceeding before the U.S. Supreme Court. See Note 10 to the Financial Statements for additional information.

Results of Operations

The results for interim periods can be disproportionately influenced by various factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods.

Earnings

Net Income Attributable to PPL Energy Supply for the periods ended September 30 was:

	Three Months			Nine Months		
	2011	2010	% Change	2011	2010	% Change
Operating revenues	$ 1,441	$ 1,508	(4)	$ 3,807	$ 4,437	(14)
Fuel	358	322	11	826	810	2
Energy purchases	338	460	(27)	753	1,709	(56)
Other operation and maintenance	208	213	(2)	741	765	(3)
Depreciation	62	59	5	181	176	3
Taxes, other than income	18	12	50	50	34	47
Energy-related business	130	95	37	350	269	30
Total operating expenses	1,114	1,161	(4)	2,901	3,763	(23)
Other Income (Expense) - net	2	6	(67)	20	17	18
Other-Than-Temporary Impairments	5		n/a	6	3	100
Interest Income from Affiliates	2	1	100	6	3	100
Interest Expense	52	48	8	150	150	
Income Taxes	104	93	12	305	178	71
Income (Loss) from Discontinued Operations		53	(100)	2	189	(99)
Net Income	170	266	(36)	473	552	(14)
Net Income Attributable Noncontrolling Interests	1	1		1	1	
Net Income Attributable to PPL Energy Supply	$ 169	$ 265	(36)	$ 472	$ 551	(14)

The changes in the components of Net Income Attributable to PPL Energy Supply between the periods ended September 30, 2011 and 2010 were due to the following factors. PPL Energy Supply's results are adjusted for several items that management considers special. See additional detail of these items in the table below.

	Three Months	Nine Months
Unregulated gross energy margins	$ (64)	$ (264)
Other operation and maintenance	(5)	(40)
Other income (expense) - net	-	7
Interest Expense	(4)	(6)
Other	(11)	(13)
Income taxes	10	96
Discontinued operations - Domestic, after-tax - excluding certain revenues and expenses included in margins	4	13
Discontinued operations - International, after-tax	(106)	(227)
Special items, after-tax	80	355
Total	$ (96)	$ (79)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of margins.

- Other operation and maintenance expense was higher for the nine-month period primarily due to $16 million of higher payroll-related costs, $9 million of which relates to PPL Susquehanna, and increased costs at PPL Susquehanna of $10 million from the dual-unit turbine blade replacement outages and $8 million from the refueling outage.

- Other income (expense) - net was $5 million higher in the nine-month period due to higher 2011 earnings on securities in the NDT funds.

- Income taxes were $34 and $129 million lower for the three and nine-month periods primarily due to lower pre-tax income. The decreases in income taxes were partially offset by a $12 million and $24 million decrease in the tax benefit from the domestic manufacturing deduction resulting from the impact of bonus tax depreciation and a $12 million and $13 million increase in income taxes primarily due to 2010 adjustments in federal and state income tax reserves.

- Income (loss) from discontinued operations - International, represents the results of PPL Global which was distributed to PPL Energy Supply's parent, PPL Energy Funding in January 2011. See Note 8 to the Financial Statements for additional information.

The following after-tax amounts, which management considers special items, also impacted PPL Energy Supply's earnings for the periods ended September 30.

	Income Statement Line Item	Three Months 2011	Three Months 2010	Nine Months 2011	Nine Months 2010
Special Items, net of tax benefit (expense):					
Adjusted energy-related economic activity, net, net of tax of $8, ($1), ($2), $83	(a)	$ (10)	$ 4	$ 4	$ (115)
Sales of assets:					
Sundance indemnification, net of tax of $0, $0, $0, $0	Other Income-net				1
Impairments:					
Emission allowances, net of tax of $0, $2, $1, $6 (Note 13)	Other O&M		(2)	(1)	(9)
Renewable energy credits, net of tax of $0, $0, $2, $0 (Note 13)	Other O&M			(3)	
Adjustments - nuclear decommissioning trust investments, net of tax of $2, $0, $2, $1 (b)	Other Income-net	(1)			
LKE acquisition-related costs:					
Monetization of certain full-requirement sales contracts, net of tax of $0, $20, $0, $72	(c)		(27)		(102)
Sale of certain non-core generation facilities, net of tax of $0, $39, $0, $39 (d)	Disc. Operations		(62)	(2)	(62)
Other:					
Montana hydroelectric litigation, net of tax of $0, $0, $1, $22	(e)	(1)	(1)	(2)	(34)
Litigation settlement - spent nuclear fuel storage, net of tax of ($2), $0, ($23), $0 (f)	Fuel	4		33	
Health care reform - tax impact (g)	Income Taxes				(5)
Total		$ (8)	$ (88)	$ 29	$ (326)

(a) See "Reconciliation of Economic Activity" below.
(b) Represents other-than-temporary impairment charges on securities, including the reversal of previous other-than-temporary impairment charges when securities previously impaired were sold.
(c) See "Monetization of Certain Full-Requirement Sales Contracts" in Note 14 to the Financial Statements. For the three and nine months ended September 30, 2010, $150 and $343 million of pre-tax gains were recorded to "Wholesale energy marketing" and $197 and $517 million of pre-tax losses were recorded to "Energy purchases" on the Statements of Income.
(d) Assets associated with certain non-core generation facilities were written down to their estimated fair value (less cost to sell). These facilities were sold in March 2011.

(e) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. Through September 30, 2010, PPL Montana recorded a pre-tax charge of $56 million, representing estimated rental compensation for years prior to 2010, including interest. Of this total charge $47 million, pre-tax, was recorded to "Other operation and maintenance" and $9 million, pre-tax, was recorded to "Interest Expense" on the Statements of Income. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the Supreme Court granted PPL Montana's petition. Oral argument is scheduled for December 2011. PPL Montana continues to accrue interest expense on rental compensation covered by the court decision.

(f) In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna station. PPL Susquehanna recorded credits to fuel expense of $6 million and $56 million, pre-tax for the three and nine months ended September 30, 2011 to recognize recovery, under the settlement agreement, of certain costs to store spent nuclear fuel at the Susquehanna station. The amounts recorded through September 2011 cover the costs incurred from 1998 through December 2010.

(g) Represents income tax expense recorded as a result of the provisions within Health Care Reform which eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net" for the periods ended September 30.

	Three Months		Nine Months	
	2011	**2010**	**2011**	**2010**
Operating Revenues				
Unregulated retail electric and gas	$ 4	$ 8	$ 9	$ 16
Wholesale energy marketing	216	52	229	(190)
Operating Expenses				
Fuel	(28)	16	(16)	13
Energy Purchases	(176)	(300)	(49)	(418)
Energy-related economic activity (a)	16	(224)	173	(579)
Option premiums (b)	6	21	17	46
Adjusted energy-related economic activity	22	(203)	190	(533)
Less: Unrealized economic activity associated with the monetization of certain full-requirement sales contracts in 2010 (c)		(208)		(335)
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010	40		184	
Adjusted energy-related economic activity, net, pre-tax	$ (18)	$ 5	$ 6	$ (198)
Adjusted energy-related economic activity, net, after-tax	$ (10)	$ 4	$ 4	$ (115)

(a) See Note 14 to the Financial Statements for additional information.

(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in Wholesale energy marketing - realized and Energy purchases - realized on the Statements of Income.

(c) See "Components of Monetization of Certain Full-Requirement Sales Contracts" below.

Components of Monetization of Certain Full-Requirement Sales Contracts

The following table provides the components of the "Monetization of Certain Full-Requirements Sales Contracts" special item for the periods ended September 30, 2010.

	Three Months	**Nine Months**
Full-requirement sales contracts monetized (a)	$ 32	$ (28)
Economic activity related to the full-requirement sales contracts monetized	(79)	(146)
Monetization of certain full-requirement sales contracts, pre-tax (b)	$ (47)	$ (174)
Monetization of certain full-requirement sales contracts, after-tax	$ (27)	$ (102)

(a) See "Commodity Price Risk (Non-trading) - Monetization of Certain Full-Requirement Sales Contracts" in Note 14 to the Financial Statements for additional information.

(b) The three and nine-month periods include unrealized losses of $208 million and $335 million, which are reflected in "Wholesale energy marketing - Unrealized economic activity" and "Energy purchases - Unrealized economic activity" on the Statement of Income. Both periods include net realized gains of $161 million, which are reflected in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statement of Income. This economic activity will continue to be realized through May 2013.

Outlook

Excluding special items, earnings are expected to be lower in 2011, compared with 2010, as a result of lower energy margins driven by lower Eastern energy and capacity prices, higher average fuel costs and the turbine blade replacement outages at the Susquehanna nuclear plant, as well as higher income taxes and higher operation and maintenance expense.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business," and "Item 1A. Risk Factors" in the Form 8-K dated June 24, 2011 for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Unregulated Gross Energy Margins." "Unregulated Gross Energy Margins" is a single financial performance measure of PPL Energy Supply's competitive energy non-trading and trading activities. In calculating this measure, PPL Energy Supply's energy revenues, which include operating revenues associated with certain PPL Energy Supply businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain PPL Energy Supply businesses that are classified as discontinued operations. This performance measure is relevant to PPL Energy Supply due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are recorded in "Wholesale energy marketing to affiliate" revenue. PPL Energy Supply excludes from "Unregulated Gross Energy Margins" energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL Energy Supply's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Energy Supply believes that "Unregulated Gross Energy Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage PPL Energy Supply's operations, analyze actual results compared to budget and measure certain corporate financial goals used in determining variable compensation.

Reconciliation of Non-GAAP Financial Measures

The following table reconciles "Operating Income" to "Unregulated Gross Energy Margins" as defined by PPL Energy Supply for the periods ended September 30.

	2011 Three Months			2010 Three Months		
	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues						
Wholesale energy marketing						
Realized	$ 897	$ 10 (c)	$ 907	$ 916	$ 276 (c)	$ 1,192
Unrealized economic activity		216 (d)	216		52 (d)	52

Realized	$ 2,635	$ 42 (c)	$ 2,677	$ 3,481	$ 301 (c)	$ 3,782
Unrealized economic activity		229 (d)	229		(190) (d)	(190)
Wholesale energy marketing to affiliate	15		15	250		250
Unregulated retail electric and gas	509	9	518	305	16	321
Net energy trading margins	14		14	(4)		(4)
Energy-related businesses		354	354		278	278
Total Operating Revenues	3,173	634	3,807	4,032	405	4,437
Operating Expenses						
Fuel	872	(46) (e)	826	829	(19) (e)	810
Energy purchases						
Realized	496	205 (c)	701	1,198	91 (c)	1,289
Unrealized economic activity		49 (d)	49		418 (d)	418
Energy purchases from affiliate	3		3	2		2
Other operation and maintenance	13	728	741	20	745	765
Depreciation		181	181		176	176
Taxes, other than income	22	28	50	8	26	34
Energy-related businesses		350	350		269	269
Total Operating Expenses	1,406	1,495	2,901	2,057	1,706	3,763
Discontinued Operations	12	(12) (f)		68	(68) (f)	
Total	$ 1,779	$ (873)	$ 906	$ 2,043	$ (1,369)	$ 674

(a) Represents amounts excluded from Margins.
(b) As reported on the Statement of Income.
(c) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. For the three and nine months ended September 30, 2011, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include a net pre-tax gain of $6 million and $17 million related to the amortization of option premiums and a net pre-tax loss of $40 million and $184 million related to the monetization of certain full-requirement sales contracts. The three and nine months ended September 30, 2010 include a net pre-tax gain of $21 million and $46 million related to the amortization of option premiums and a net pre-tax gain of $161 million for both periods related to the monetization of certain full-requirement sales contracts.
(d) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(e) 2011 includes credits for the spent nuclear fuel litigation settlement recorded in the three and nine months ended September 30, 2011 of $6 million and $56 million, and economic activity related to fuel. 2010 includes economic activity related to fuel.

(f) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

Unregulated Gross Energy Margins are generated through PPL Energy Supply's competitive non-trading and trading activities. PPL Energy Supply's non-trading energy business is managed on a geographic basis that is aligned with its generation fleet. The following table shows PPL Energy Supply's non-GAAP financial measure, Unregulated Gross Energy Margins, for the periods ended September 30, as well as the change between periods. The factors that gave rise to the changes are described below the table.

	Three Months			Nine Months		
	2011	2010	Change	2011	2010	Change
Non-trading						
Eastern U.S.	$ 530	$ 611	$ (81)	$ 1,502	$ 1,788	$ (286)
Western U.S.	92	88	4	263	259	4
Net energy trading	(7)	(20)	13	14	(4)	18
Total	$ 615	$ 679	$ (64)	$ 1,779	$ 2,043	$ (264)

Unregulated Gross Energy Margins

Eastern U.S.

Changes in Eastern U.S. non-trading margins for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Lower baseload energy and capacity prices	$ (65)	$ (142)
Coal and hydro generation volume	2	(47)
2010 monetization of certain deals that rebalanced the business and portfolio	(14)	(41)
Impact of non-core generation facilities sold in the first quarter of 2011	(21)	(37)
Nuclear generation volume (a)	20	(35)
Higher coal prices	(16)	(31)
Lower intermediate/peaking capacity prices, partially offset by higher generation volumes in the first half of 2011	(18)	(18)
Full-requirement sales contracts driven by contracts monetized in 2010 and reduced shopping in 2011	23	74
Other	8	(9)
	$ (81)	$ (286)

(a) Volumes were higher for the three-month period as the result of the final uprate at Susquehanna Unit 2. Volumes were lower for the nine-month period primarily as a result of the dual-unit turbine blade replacement outages beginning in May 2011.

Net Energy Trading Margins

Net energy trading margins increased during the three and nine months ended September 30, 2011, compared with the same periods in 2010, as a result of higher margins on power and gas positions of $13 million and $18 million.

Other Operation and Maintenance

Changes in other operation and maintenance expense for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Montana hydroelectric litigation (a)		$ (47)
Susquehanna nuclear plant costs (b)	$ (5)	23
Impacts from emission allowances (c)	(3)	(13)
Gain on disposition of RECs (d)	(3)	5
Other	6	8
Total	$ (5)	$ (24)

(a) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded a pre-tax charge of $56 million, representing estimated rental compensation for the first quarter of 2010 and prior years, including interest. The portion of the total charge recorded to other operation and maintenance totaled $49 million. PPL Montana continues to accrue rental compensation. See Note 10 to the Financial Statements for additional information.

(b) The nine-month period was $23 million higher primarily due to increased costs of $10 million from the dual-unit turbine blade replacement outages, $9 million of higher payroll-related costs and $8 million from the refueling outage.

(c) The nine-month period was $13 million lower primarily due to $2 million of impairment charges in 2011 compared with $15 million of impairment charges in 2010.
(d) The three and nine-month periods include impairment charges of $1 million and $5 million.

Taxes, Other Than Income

Taxes, other than income increased by $6 million and $16 million for the three and nine months ended September 30, 2011, compared with the same periods in 2010, primarily due to higher Pennsylvania gross receipts tax expense due to an increase in electricity revenues at PPL EnergyPlus as customers continue to select alternative suppliers in 2011. This tax is included in "Unregulated Gross Energy Margins."

Other Income (Expense) - net

See Note 12 to the Financial Statements for details.

Interest Expense

Changes in interest expense for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Capitalized interest	$ (5)	$ (13)
Montana hydroelectric litigation (a)		(6)
Short-term and long-term debt interest expense	3	13
Net amortization of debt discounts, premiums and issuance costs (b)	8	8
Other	(2)	(2)
Total	$ 4	$

(a) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded $7 million of interest expense on rental compensation covered by the court decision. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the Supreme Court granted PPL Montana's petition. Oral argument is scheduled for December 2011. PPL Montana continues to accrue interest expense on the rental compensation covered by the court decision. See Note 10 to the Financial Statements for additional information.
(b) The three and nine-month periods include the acceleration of deferred financing fees of $7 million, due to the July 2011 redemption by PPL Energy Supply of $250 million of 7.00% Senior Notes due 2046.

Income Taxes

Changes in income taxes for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Higher (lower) pre-tax book income	$ (14)	$ 94
State valuation allowance adjustments		6
Federal income tax credits	(1)	(4)
Domestic manufacturing deduction (a)	12	24
Federal and state tax reserve adjustments	12	13
Health Care Reform		(5)
Other	2	(1)
Total	$ 11	$ 127

(a) In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation eliminates the estimated income tax benefit related to domestic manufacturing deduction in 2011. See Note 5 to the Financial Statements for additional information on income taxes.

Discontinued Operations

Income (Loss) from Discontinued Operations (net of income taxes) decreased by $53 million and $187 million for the three and nine months ended September 30, 2011, compared with the same periods in 2010. The decreases were primarily due to the presentation of PPL Global as Discontinued Operations as a result of the January 2011 distribution by PPL Energy Supply of its membership interest in PPL Global to its parent, PPL Energy Funding. In 2011, the results of PPL Global are no longer consolidated within PPL Energy Supply. Partially offsetting the decreases were after-tax impairment charges recorded in the third quarter of 2010 totaling $62 million related to assets associated with certain non-core generation facilities that were written down to their estimated fair value (less cost to sell). These facilities were sold in March 2011. See "Discontinued Operations" in Note 8 to the Financial Statements for additional information.

Financial Condition

Liquidity and Capital Resources

PPL Energy Supply had the following at:

	September 30, 2011	December 31, 2010
Cash and cash equivalents	$ 375	$ 661
Short-term debt	$ 250	$ 531

The $286 million decrease in PPL Energy Supply's cash and cash equivalents position was primarily the net result of:

- capital expenditures of $499 million;
- a distribution of $325 million of cash included in the net assets of PPL Global distributed to member;
- the retirement of $250 million of long-term debt;
- distributions to member of $209 million;
- a net decrease in short-term debt of $100 million (excluding short-term debt of PPL Global that existed at December 31, 2010);
- cash provided by operating activities of $440 million;
- proceeds of $381 million from the sale of certain non-core generation facilities; and
- contributions from member of $361 million.

PPL Energy Supply's cash provided by operating activities decreased by $1.2 billion for the nine months ended September 30, 2011, compared with the same period in 2010. This was primarily due to a reduction in cash from counter party collateral of $442 million, lower gross energy margins of $154 million, after-tax, proceeds from monetizing certain full-requirements energy contracts in 2010 of $249 million, and the loss of operating cash from PPL Global ($104 million for the nine months ended September 30, 2010.)

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent, PPL Energy Funding. PPL Global's impact on cash provided by operating activities for the nine months ended September 30, 2010 was not material. See Note 8 to the Financial Statements for additional information on the distribution.

Credit Facilities

At September 30, 2011, PPL Energy Supply's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a)	$ 3,000	$ 250	$ 132	$ 2,618
Letter of Credit Facility	200	n/a	76	124
Total PPL Energy Supply Credit Facilities (b)	$ 3,200	$ 250	$ 208	$ 2,742

(a) Outstanding borrowings under this facility decreased on a net basis by $100 million since December 31, 2010.

In October 2011, PPL Energy Supply amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility, PPL Energy Supply continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

(b) In March 2011, PPL Energy Supply's $300 million Structured Credit Facility expired. PPL Energy Supply's obligations under this facility were supported by a $300 million letter of credit issued on PPL Energy Supply's behalf under a separate, but related $300 million 5-year credit agreement, which also expired in March 2011.

The commitments under PPL Energy Supply's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 11% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL Energy Supply's credit facilities.

Commercial Paper

In October 2011, PPL Energy Supply re-activated its $500 million commercial paper program to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At November 4, 2011, PPL Energy Supply had $400 million of commercial paper outstanding at a weighted-average interest rate of approximately 0.51%, which was used to partially fund the repayment of PPL Energy Supply's 6.40% Senior Notes upon maturity in November 2011. PPL Energy Supply expects to refinance outstanding commercial paper on a long-term basis at a future date, subject to market conditions.

Long-term Debt Securities

In July 2011, PPL Energy Supply redeemed at par the entire $250 million aggregate principal amount of its 7.00% Senior Notes due 2046.

In November 2011, PPL Energy Supply repaid the entire $500 million principal amount of its 6.40% Senior Notes upon maturity.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of PPL Energy Supply and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Energy Supply and its subsidiaries are based on information provided by PPL Energy Supply and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL Energy Supply or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL Energy Supply's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

In prior periodic reports, PPL Energy Supply described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, PPL Energy Supply is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL Energy Supply's ratings, but without stating what ratings have been assigned to PPL Energy Supply or its subsidiaries, or their securities. The ratings assigned by the rating agencies to PPL Energy Supply and its subsidiaries and their respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed its ratings for PPL Energy Supply;
- S&P revised the outlook and lowered the issuer and senior unsecured ratings of PPL Energy Supply; and
- Fitch affirmed its ratings for PPL Energy Supply.

In April 2011, following the completion of PPL's acquisition of WPD Midlands, S&P revised the outlook and affirmed its ratings for PPL Energy Supply.

In May 2011, Fitch affirmed its rating and maintained its outlook for PPL Montana's Pass Through Certificates due 2020.

In September 2011, Moody's affirmed its senior unsecured debt rating and outlook for PPL Energy Supply.

Also in September 2011, S&P assigned a short-term rating to PPL Energy Supply's commercial paper program.

In October 2011, Moody's and Fitch also assigned a short-term rating to PPL Energy Supply's commercial paper program in support of PPL Energy Supply's re-opening of the program.

Ratings Triggers

PPL Energy Supply and its subsidiaries have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate instruments, which contain provisions requiring PPL Energy Supply and its subsidiaries to post additional collateral, or permitting the counterparty to terminate the contract, if PPL Energy Supply or its subsidiaries' credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at September 30, 2011. At September 30, 2011, if PPL Energy Supply's or its subsidiaries' credit rating had been below investment grade, the maximum amount that PPL Energy Supply would have been required to post as additional collateral to counterparties was $386 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations and interest rate contracts.

For additional information on PPL Energy Supply's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Form 8-K dated June 24, 2011.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about PPL Energy Supply's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

PPL Energy Supply segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL Energy Supply's competitive generation assets, full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. The net fair value of economic positions at September 30, 2011 and December 31, 2010 was a net liability of $218 million and $389 million. See Note 14 to the Financial Statements for additional information on economic activity.

To hedge the impact of market price volatility on PPL Energy Supply's energy-related assets, liabilities and other contractual arrangements, PPL Energy Supply both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL Energy Supply's non-trading commodity derivative contracts mature at various times through 2017.

The following table sets forth the changes in net fair value of PPL Energy Supply's non-trading commodity derivative contracts for the periods ended September 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Nine Months	
	2011	2010	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 896	$ 1,303	$ 958	$ 1,280
Contracts realized or otherwise settled during the period	(99)	(96)	(234)	(330)
Fair value of new contracts entered into during the period	4	3	19	10
Changes in fair value attributable to changes in valuation techniques (a)				(23)
Other changes in fair value	43	144	101	417
Fair value of contracts outstanding at the end of the period	$ 844	$ 1,354	$ 844	$ 1,354

(a) In June 2010, PPL Energy Supply received market bids for certain full-requirement sales contracts that were monetized in early July. See Note 14 to the Financial Statements for additional information. At June 30, 2010, these contracts were valued based on the bids received (the market approach). In prior periods, the fair value of these contracts was measured using the income approach.

The following table segregates the net fair value of PPL Energy Supply's non-trading commodity derivative contracts at September 30, 2011, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
Source of Fair Value	**Maturity Less Than 1 Year**	**Maturity 1-3 Years**	**Maturity 4-5 Years**	**Maturity in Excess of 5 Years**	**Total Fair Value**
Prices based on significant other observable inputs	$ 533	$ 272	$ 13		$ 818
Prices based on significant unobservable inputs	(8)	(13)	20	$ 27	26
Fair value of contracts outstanding at the end of the period	$ 525	$ 259	$ 33	$ 27	$ 844

PPL Energy Supply sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL Energy Supply were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties with which it has energy contracts and other factors could affect PPL Energy Supply's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL Energy Supply attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL Energy Supply's trading commodity derivative contracts mature at various times through 2015. The following table sets forth changes in the net fair value of PPL Energy Supply's trading commodity derivative contracts for the periods ended September 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		**Nine Months**	
	2011	**2010**	**2011**	**2010**
Fair value of contracts outstanding at the beginning of the period	$ 15	$ 4	$ 4	$ (6)
Contracts realized or otherwise settled during the period	(10)	(8)	(7)	(8)
Fair value of new contracts entered into during the period	(2)	45	6	47
Other changes in fair value	4	(39)	4	(31)
Fair value of contracts outstanding at the end of the period	$ 7	$ 2	$ 7	$ 2

Unrealized gains of approximately $4 million will be reversed over the next three months as the transactions are realized.

The following table segregates the net fair value of trading commodity derivative contracts at September 30, 2011, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
Source of Fair Value	**Maturity Less Than 1 Year**	**Maturity 1-3 Years**	**Maturity 4-5 Years**	**Maturity in Excess of 5 Years**	**Total Fair Value**
Prices based on significant other observable inputs	$ (4)	$ 11			$ 7
Fair value of contracts outstanding at the end of the period	$ (4)	$ 11			$ 7

VaR Models

A VaR model is utilized to measure commodity price risk in domestic gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's conservative hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the period was as follows.

	Trading VaR		Non-Trading VaR	
	Nine Months Ended September 30, 2011	Twelve Months Ended December 31, 2010	Nine Months Ended September 30, 2011	Twelve Months Ended December 31, 2010
95% Confidence Level, Five-Day Holding Period				
Period End	$ 3	$ 1	$ 5	$ 5
Average for the Period	2	4	5	7
High	4	9	7	12
Low	1	1	4	4

The trading portfolio includes all speculative positions, regardless of the delivery period. All positions not considered speculative are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at September 30, 2011.

Interest Rate Risk

PPL Energy Supply and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL and PPL Energy Supply utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in PPL Energy Supply's debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL Energy Supply's debt portfolio due to changes in the absolute level of interest rates. PPL Energy Supply had no interest rate hedges outstanding at September 30, 2011.

At September 30, 2011, PPL Energy Supply's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL Energy Supply is also exposed to changes in the fair value of its debt portfolio. PPL Energy Supply estimated that a 10% decrease in interest rates at September 30, 2011 would increase the fair value of its debt portfolio by $36 million.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the Susquehanna nuclear plant. At September 30, 2011, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on the Balance Sheet for $594 million. The mix of securities is designed to provide returns sufficient to fund such decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are primarily exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its NDT policy statement. At September 30, 2011, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated $39 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk

See Notes 11, 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL Energy Supply's Form 8-K dated June 24, 2011 for additional information.

Foreign Currency Translation

As noted previously, in January 2011, PPL Energy Supply distributed its interest in PPL Global to its parent, PPL Energy Funding. As a result, PPL Energy Supply no longer consolidates any foreign subsidiaries and has no foreign currency translation component within AOCI. In 2010, the British pound sterling weakened in relation to the U.S. dollar. Changes in these exchange rates resulted in a foreign currency translation loss of $83 million for the nine months ended September 30, 2010, which primarily reflected a $223 million reduction to PP&E offset by a reduction of $140 million to net liabilities. These adjustments, net of tax, resulting from translation are recorded in AOCI.

Related Party Transactions

PPL Energy Supply is not aware of any material ownership interests or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with PPL Energy Supply. See Note 11 to the Financial Statements for additional information on related party transactions between PPL Energy Supply and affiliates.

Acquisitions, Development and Divestitures

PPL Energy Supply continuously evaluates potential acquisitions, divestitures and development projects as opportunities arise or are identified. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options.

In the third quarter of 2011, the Susquehanna Unit 2 uprate, representing the final phase of the project to increase the nuclear plant's generation capacity, was completed and is projected to yield an additional 50 MW.

See Note 8 to the Financial Statements for additional information.

Environmental Matters

Protection of the environment is a priority for PPL Energy Supply and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to PPL Energy Supply's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc.; and may impact the costs for their products or their demand for PPL Energy Supply's services. See "Overview" and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in PPL Energy Supply's 2010 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Note 18 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: price risk management, defined benefits, asset impairment, loss accruals, AROs and income taxes. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in PPL Energy Supply's Form 8-K dated June 24, 2011 for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with PPL Electric's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL Electric's 2010 Form 10-K. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides an overview of PPL Electric's business strategy, financial and operational highlights, and key regulatory matters.

- "Results of Operations" provides a summary of PPL Electric's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL Electric's Statements of Income, comparing the three and nine months ended September 30, 2011 with the same periods in 2010.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Electric's liquidity position and credit profile. This section also includes a discussion of rating agency decisions.

- "Financial Condition - Risk Management" provides an explanation of PPL Electric's risk management programs relating to market and credit risk.

Overview

Introduction

PPL Electric is an electricity delivery service provider in eastern and central Pennsylvania with headquarters in Allentown, Pennsylvania. PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that territory as a PLR under the Customer Choice Act.

Business Strategy

PPL Electric's strategy and principal challenge is to own and operate its electricity delivery business at the most efficient cost while maintaining high quality customer service and reliability. PPL Electric anticipates that it will have significant capital expenditure requirements in the future. In order to manage financing costs and access to credit markets, a key objective for PPL Electric's business is to maintain a strong credit profile. PPL Electric continually focuses on maintaining an appropriate capital structure and liquidity position.

Timely recovery of costs applicable to the replacement of aging distribution assets is required in order to maintain strong cash flows and a strong credit profile. Traditionally, such cost recovery would be pursued through periodic base rate case proceedings with the PUC. As such costs continue to increase, more frequent rate case proceedings may be required or an alternative rate making process would need to be implemented in order to achieve more timely recovery.

Transmission costs are recovered through a FERC Formula Rate mechanism which is updated annually for costs incurred and assets placed in service. Accordingly, increased costs including the replacement of aging transmission assets and the PJM-approved Regional Transmission Line Expansion Plan are recovered on a timely basis.

Financial and Operational Highlights

Net Income Available to PPL Corporation

Net Income Available to PPL Corporation for the three and nine months ended September 30, 2011 was $28 million and $116 million compared to $36 million and $89 million for the same periods in 2010. This represents a decrease of 22% and an increase of 30% from 2010. These changes reflect the following after tax impacts.

	Three Months	Nine Months
Distribution base rate increase effective in January 2011	$ 9	$ 29
Tax benefit related to flow-through regulated state tax depreciation		5
A 2011 transmission service charge adjustment	(4)	(4)
PUC-reportable storm costs, net of insurance recovery	(8)	(10)
Other	(5)	7
	$ (8)	$ 27

Transmission Service Charge Adjustment

During the three and nine months ended September 30, 2011, PPL Electric recorded a $7 million ($4 million after-tax) charge to "Retail electric" revenue on the Statement of Income to reduce a portion of the transmission service charge regulatory asset associated with a 2005 undercollection that was not included in any subsequent rate reconciliations filed with the PUC. PPL Electric plans to seek recovery with the PUC. However, management cannot assert at the present time that it is probable that the previously recorded regulatory asset will be recovered. The regulatory asset will be reinstated should the PUC approve recovery of these costs. The impact of this charge was not material to any previously reported financial statements and is not expected to be material to the financial statements for the full year of 2011.

Storm Recovery

PPL Electric experienced several PUC-reportable storms during the three and nine months ended September 30, 2011 resulting in total restoration costs of $34 million and $59 million, of which $23 million and $39 million were recorded in "Other operation and maintenance" on the Statement of Income. Although PPL Electric has storm insurance with a PPL affiliate, the costs associated with the unusually high number of PUC-reportable storms has exceeded policy limits. Probable insurance recoveries recorded during the three and nine months ended September 30, 2011 were $12 million and $26.5 million, of which $7 million and $16 million were included in "Other operation and maintenance" on the Statement of Income. In November 2011, PPL Electric filed with the PUC a request for permission to defer $15 million to $20 million for future recovery of allowable storm-related costs. At the time PPL Electric seeks recovery of any deferred amount, its claim will be based on the actual costs, net of insurance recoveries. A regulatory asset, for the actual costs net of insurance recoveries, will be recorded at such time as an order is received from the PUC approving deferral of these costs.

In late October 2011, PPL Electric experienced significant damage to its transmission and distribution network from a severe snow storm. The costs associated with the restoration efforts are still being determined and are not included in the amounts disclosed above. PPL Electric will evaluate such costs, when quantified, and will likely file with the PUC for permission to defer certain of the costs incurred to repair the distribution network for future recovery. Costs incurred to repair the transmission network are recoverable through the FERC Formula Rate mechanism which is updated annually.

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations.

Regulatory Matters

PUC Investigation of Retail Market

In April 2011, the PUC opened an investigation of Pennsylvania's retail electricity market which will be conducted in two phases. Phase one will address the status of the current retail market and explore potential changes. Questions promulgated by the PUC for this phase of the investigation focus primarily on default service issues. In June 2011, interested parties filed comments and the PUC held a hearing in this phase of the investigation. In July 2011, the PUC entered an order initiating phase two of the investigation which will study how best to address issues identified by the PUC as being most relevant to improving the current retail electricity market. The PUC issued a tentative order in October 2011 addressing issues associated with the timing and various other details of the EDC's default service procurement plans. Parties will have an opportunity to comment on that tentative order. The PUC also has scheduled a hearing in this phase of the investigation in November 2011. It is likely that investigation will not be completed before the end of the year. PPL Electric cannot predict the outcome of the investigation.

Regional Transmission Line Expansion Plan

In 2007, PJM directed the construction of a new 150-mile, 500-kilovolt transmission line between the Susquehanna substation in Pennsylvania and the Roseland substation in New Jersey that it identified as essential to long-term reliability of the Mid-Atlantic electricity grid. PJM determined that the line is needed to prevent potential overloads that could occur as early as 2012 on several existing transmission lines in the interconnected PJM system. PJM has directed PPL Electric to construct the portion of the Susquehanna-Roseland line in Pennsylvania and has directed Public Service Electric & Gas Company to construct the portion of the line in New Jersey, in each case by June 1, 2012. PPL Electric's estimated share of the project costs is approximately $500 million.

PPL Electric has experienced delays in obtaining necessary National Park Service approvals for the Susquehanna-Roseland transmission line and anticipates a delay of the line's in-service date to 2015. In the first quarter of 2011, PJM issued an updated assessment of the new line within its 2010 Regional Transmission Expansion Plan, which confirms that the line is needed by 2012 to prevent overloads on other power lines in the region. PJM has developed a strategy to manage potential reliability problems until the line is built. In October 2011, the project was placed on the initial list of projects for the Rapid Response Team for Transmission (RRTT), an initiative of the White House to facilitate coordination among federal agencies to improve the overall quality and timeliness of electric transmission infrastructure permitting, review and consultation. The National Park Service record of decision for the project is scheduled to be issued on October 1, 2012. PPL Electric cannot predict what additional actions, if any, PJM might take in the event of a continued delay to its scheduled in-service date for the new line. See Note 8 in PPL Electric's 2010 Form 10-K for additional information.

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation that would authorize the PUC to approve regulatory procedures and mechanisms to provide for more timely recovery of a utility's costs. Alternative ratemaking is important to PPL Electric as it begins a period of significant increasing capital investment related to the asset optimization program focused on the replacement of aging distribution assets. Those procedures and mechanisms include, but are not limited to, the use of a fully projected test year and an automatic adjustment clause to recover certain capital costs and related operating expenses. In October 2011, the legislation was passed by the Pennsylvania House of Representatives. It will now be considered by the Pennsylvania Senate. PPL Electric is working with other stakeholders to support passage of this legislation but cannot predict the outcome of this process.

Results of Operations

The results for interim periods can be disproportionately influenced by various factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods.

Earnings

Net Income Available to PPL Corporation for the periods ended September 30 was:

	Three Months			Nine Months		
	2011	2010	% Change	2011	2010	% Change
Operating revenue	$ 455	$ 571	(20)	$ 1,453	$ 1,906	(24)
Energy purchases	171	229	(25)	591	848	(30)
Energy purchases from affiliate	5	71	(93)	15	250	(94)
Other operation and maintenance	146	126	16	402	377	7
Depreciation	38	34	12	108	101	7
Taxes, other than income	26	32	(19)	83	108	(23)
Total operating expenses	386	492	(22)	1,199	1,684	(29)
Other Income (Expense) - net	2		n/a	3	3	
Interest Income from Affiliate	1		n/a	1	1	
Interest Expense	26	24	8	74	74	
Income Taxes	14	15	(7)	56	47	19
Net Income	32	40	(20)	128	105	22
Distributions on Preferred Securities	4	4		12	16	(25)
Net Income Available to PPL Corporation	$ 28	$ 36	(22)	$ 116	$ 89	30

The changes in the components of Net Income Available to PPL Corporation between the periods ended September 30, 2011 and 2010 were due to the following factors. See "Statement of Income Analysis - Margins" for component details.

	Three Months	Nine Months
Pennsylvania gross delivery margins	$ 8	$ 56
Other operation and maintenance	(15)	(18)
Depreciation	(4)	(7)
Other	2	1
Income taxes	1	(9)
Distributions on Preferred Securities		4
Total	$ (8)	$ 27

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of gross margins from the Pennsylvania regulated electric delivery operations.

- Other operation and maintenance expenses were $14 million and $17 million higher for the three and nine-month periods due to storm costs exceeding insurance policy limits in 2011.

- Income taxes were $12 million higher for the nine-month period due to higher pre-tax income. This increase was partially offset by a $5 million tax benefit related to the impact of flow-through regulated tax depreciation that is primarily related to the Pennsylvania Department of Revenue interpretive guidance regarding 100% bonus depreciation.

Outlook

Excluding special items, earnings are expected to be slightly higher in 2011, compared with 2010, as a result of higher distribution revenues from a January 1, 2011 distribution base rate increase, partially offset by higher operation and maintenance expenses.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2 and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business," and "Item 1A. Risk Factors" in PPL Electric's 2010 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings. Among these uncertainties are the ultimate regulatory recovery of storm costs, transmission service charges and other regulatory assets.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Pennsylvania Gross Delivery Margins." "Pennsylvania Gross Delivery Margins" is a single financial performance measure of PPL Electric's Pennsylvania regulated electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Energy purchases from affiliate," "Other operation and maintenance" expense, which is primarily Act 129 costs, and "Taxes, other than income", which is primarily gross receipts tax. As a result, this measure represents the net revenues from PPL Electric's Pennsylvania regulated electric delivery operations. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Electric believes that "Pennsylvania Gross Delivery Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage PPL Electric's operations and analyze actual results to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Pennsylvania Gross Delivery Margins" as defined by PPL Electric for the periods ended September 30. Footnotes to the reconciliations are included at the end of the nine month reconciliation tables.

	2011 Three Months			2010 Three Months		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	$ 454		$ 454	$ 570		$ 570
Electric revenue from affiliate	1		1	1		1
Total Operating Revenues	455		455	571		571
Operating Expenses						
Energy purchases	171		171	229		229
Energy purchases from affiliate	5		5	71		71
Other operation and maintenance	30	$ 116	146	25	$ 101	126
Depreciation		38	38		34	34
Taxes, other than income	24	2	26	29	3	32
Total Operating Expenses	230	156	386	354	138	492
Total	$ 225	$ (156)	$ 69	$ 217	$ (138)	$ 79

	2011 Nine Months			2010 Nine Months		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	$ 1,444		$ 1,444	$ 1,901		$ 1,901
Electric revenue from affiliate	9		9	5		5
Total Operating Revenues	1,453		1,453	1,906		1,906
Operating Expenses						
Energy purchases	591		591	848		848
Energy purchases from affiliate	15		15	250		250
Other operation and maintenance	77	$ 325	402	70	$ 307	377
Depreciation		108	108		101	101
Taxes, other than income	77	6	83	101	7	108
Total Operating Expenses	760	439	1,199	1,269	415	1,684
Total	$ 693	$ (439)	$ 254	$ 637	$ (415)	$ 222

(a) Represents amounts that are excluded from Margins.
(b) As reported on the Statement of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL Electric's non-GAAP financial measure, "Pennsylvania Gross Delivery Margins" for the periods ended September 30, as well as the change between periods. The factors that gave rise to the change are described below the table.

	Three Months			Nine Months		
	2011	2010	Change	2011	2010	Change
PA Gross Delivery Margins by Component						
Distribution	$ 179	$ 170	$ 9	$ 560	$ 506	$ 54
Transmission	46	47	(1)	133	131	2
Total	$ 225	$ 217	$ 8	$ 693	$ 637	$ 56

Distribution

The approved distribution rate case increased rates approximately 1.6% effective January 1, 2011, which improved distribution margins by $15 million and $50 million for the three and nine months ended September 30, 2011, compared with the same periods in 2010. Weather also had a $5 million favorable impact on the nine months ended September 30, 2011, compared with the same period in 2010. Weather-related variances for PPL Electric are calculated based on a ten-year historical average.

The three and nine months ended September 30, 2011 also reflect a $7 million charge to reduce a portion of the transmission service charge regulatory asset associated with a 2005 undercollection that was not included in any subsequent rate reconciliations filed with the PUC. PPL Electric plans to seek PUC approval to recover this amount. However, management cannot assert at the present time that it is probable that the previously recorded regulatory asset will be recovered. The regulatory asset will be reinstated should the PUC approve recovery of these costs.

Other Operation and Maintenance

Changes in other operation and maintenance expense for the periods ended September 30, 2011 compared with 2010 were due to:

	Three Months	Nine Months
Payroll-related costs	$ (4)	$ (1)
Contractor-related expenses (a)		7
Vegetation management (b)	2	(6)
PUC-reportable storm costs, net of insurance recovery (c)	14	17
Uncollectible accounts	5	4
Other	3	4
Total	$ 20	$ 25

(a) Primarily related to increased utilization of contractors for system reliability and asset optimization programs.
(b) Higher expenses for the nine months ended 2010 as a result of an increased focus on vegetation management primarily due to the Wire zone - Border zone program to safeguard system reliability and to comply with recently enacted legislation.
(c) During the third quarter 2011, PPL Electric reached its maximum coverage under its storm insurance, therefore a larger amount of storm costs were not offset by storm insurance in 2011 when compared to 2010.

Depreciation

Depreciation increased by $7 million for the nine months ended September 30, 2011 compared with the same period in 2010, primarily due to additions to PP&E as part of ongoing efforts to replace aging infrastructure.

Taxes, Other Than Income

Taxes, other than income decreased by $6 million and $25 million during the three and nine months ended September 30, 2011, compared with the same periods in 2010. This decrease was primarily the result of lower Pennsylvania gross receipts tax expense due to a decrease in retail electricity revenue as customers continue to select alternative suppliers in 2011. The decrease was also impacted by the amortization of a PURTA refund of $3 million and $8 million for the three and nine months ended September 30, 2011. Pennsylvania gross receipts tax and the PURTA refund are included in "Pennsylvania Gross Delivery Margins."

Other Income (Expense) - net

See Note 12 to the Financial Statements for details.

Income Taxes

Changes in income taxes for the periods ended September 30, 2011 compared to 2010 were due to:

	Three Months	Nine Months
(Lower) higher pre-tax book income	$ (4)	$ 13
Federal and state tax reserve adjustments (a)	4	4
Federal and state tax return adjustments		(2)
Depreciation not normalized (b)		(5)
Other	(1)	(1)
Total	$ (1)	$ 9

(a) In July 2010, the U.S. Tax Court ruled in PPL Electric's favor in a pending dispute with the IRS, concluding that street lighting assets are depreciable for tax purposes over seven years. As a result, PPL Electric recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes in the third quarter of 2010.
(b) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for Federal income tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

Financial Condition

Liquidity and Capital Resources

PPL Electric had the following at:

	September 30, 2011	December 31, 2010
Cash and cash equivalents	$ 261	$ 204

The $57 million increase in PPL Electric's cash and cash equivalents position was primarily the net result of:

- proceeds of $645 million from the issuance of long-term debt;
- cash provided by operating activities of $261 million;
- the retirement of $458 million of long-term debt;
- capital expenditures of $357 million; and
- the payment of $76 million of common stock dividends to PPL.

PPL Electric's cash provided by operating activities improved by $134 million for the nine months ended September 30, 2011, compared with the same period in 2010, due to a $195 million increase from changes in working capital (including gross receipts tax payments, a federal income tax refund and collections of the generation supply charge). These sources of cash were partially offset by an increase in defined benefit plan contributions of $53 million.

Credit Facilities

At September 30, 2011, PPL Electric's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a)	$ 200		$ 13	$ 187
Asset-backed Credit Facility (b)	150		n/a	150
Total PPL Electric Credit Facilities	$ 350		$ 13	$ 337

(a) In October 2011, PPL Electric amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility, PPL Electric continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under this credit facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 6% of the total committed capacity.

(b) PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary pledges these assets to secure loans of up to an aggregate of $150 million from a commercial paper conduit sponsored by a financial institution. At September 30, 2011, based on accounts receivable and unbilled revenue pledged, the amount available for borrowing under this facility was limited to $86 million. In July 2011, PPL Electric and the subsidiary extended the expiration date of the credit agreement related to the asset-backed commercial paper program to July 2012.

See Note 7 to the Financial Statements for further discussion of PPL Electric's credit facilities.

Commercial Paper

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at September 30, 2011.

Long-term Debt Securities

In July 2011, PPL Electric entered into a supplemental indenture that contains prospective amendments to its 2001 Mortgage Indenture, including amendments to reduce the amount of first mortgage bonds issuable on the basis of property additions from 100% of the cost or fair value (whichever is less, as determined in accordance with the terms of the indenture) of such property additions to 66-2/3% of such cost or fair value. The amendments became effective in the third quarter 2011.

Subsequently in July 2011, PPL Electric issued $250 million of 5.20% First Mortgage Bonds due 2041. PPL Electric received proceeds of $246 million, net of discounts and underwriting fees. The net proceeds have been or will be used for capital expenditures and other general corporate purposes.

Also in July 2011, PPL Electric redeemed the entire $400 million aggregate principal amount of its 7.125% Senior Secured Bonds due 2013 for $458 million, plus accrued interest.

In August 2011, PPL Electric issued $400 million of 3.00% First Mortgage Bonds due 2021. PPL Electric received proceeds of $394 million, net of discounts and underwriting fees. A portion of the net proceeds have been used to repay short-term debt. The balance of the net proceeds replenished cash used to redeem the 7.125% Senior Secured Bonds due 2013 in July 2011, as discussed above.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt and preferred securities of PPL Electric. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Electric are based on information provided by PPL Electric and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL Electric. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL Electric's credit ratings could result in higher borrowing costs and reduced access to capital markets.

In prior periodic reports, PPL Electric described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, PPL Electric is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL Electric's ratings, but without stating what ratings have been assigned to PPL Electric or its securities. The ratings assigned by the rating agencies to PPL Electric and its respective securities may be found, without charge, on each of the respective rating agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of the then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed its ratings for PPL Electric;
- S&P revised the outlook and lowered the issuer, senior secured, preference stock and commercial paper ratings of PPL Electric; and
- Fitch affirmed its ratings for PPL Electric.

In April 2011, following the completion of PPL's acquisition of WPD Midlands, S&P revised the outlook for PPL Electric, raised its commercial paper rating and affirmed its issuer, senior secured and preference stock ratings.

In July 2011, S&P upgraded the senior secured rating for PPL Electric's first mortgage bonds following the execution of a supplemental indenture that provided for prospective amendments to PPL Electric's 2001 Mortgage Indenture, as discussed in "Long-term Debt Securities" above.

For additional information on PPL Electric's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Electric's 2010 Form 10-K.

Risk Management

Market Risk and Credit Risk

PPL Electric has issued debt to finance its operations, which exposes it to interest rate risk. PPL Electric had no potential annual exposure to increased interest expense, based on a 10% increase in interest rates, at September 30, 2011. PPL Electric estimated that a 10% decrease in interest rates at September 30, 2011 would increase the fair value of its debt portfolio by $88 million.

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management" in PPL Electric's 2010 Form 10-K for additional information on market and credit risk.

Related Party Transactions

PPL Electric is not aware of any material ownership interests or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with PPL Electric. See Note 11 to the Financial Statements for additional information on related party transactions between PPL Electric and affiliates.

Environmental Matters

Protection of the environment is a priority for PPL Electric and a significant element of its business activities. See "Item 1. Business - Environmental Matters" in PPL Electric's 2010 Form 10-K and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 18 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: defined benefits, loss accruals, income taxes and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in PPL Electric's 2010 Form 10-K for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with LKE's Condensed Financial Statements and the accompanying Notes and LKE's 2011 Registration Statement. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides an overview of LKE's business strategy, financial and operational highlights and key regulatory matters.

- "Results of Operations" provides a summary of LKE's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on LKE's Statements of Income, comparing the three and nine months ended September 30, 2011 with the same periods in 2010.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LKE's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.

- "Financial Condition - Risk Management" provides an explanation of LKE's risk management programs relating to market and credit risk.

Overview

Introduction

LKE, headquartered in Louisville, Kentucky, is a holding company with utility operations through its subsidiaries, LG&E and KU. LG&E and KU, which constitute substantially all of LKE's operations, are regulated utilities engaged in the generation, transmission, distribution and sale of electricity, in Kentucky, Virginia and Tennessee. LG&E also engages in the distribution and sale of natural gas in Kentucky.

Successor and Predecessor Financial Presentation

LKE's Condensed Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010, and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, which are discussed in the Financial Statements in LKE's 2011 Registration Statement. The cost basis of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of LKE have not changed as a result of the acquisition.

Business Strategy

LKE's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

Financial and Operational Highlights

Net Income

The three and nine months ended September 30, 2011, includes the effect of LG&E's and KU's base rate increases, which became effective August 1, 2010, partially offset by net cost increases, which have not yet been reflected in the rates charged by LG&E and KU. The three and nine months ended September 30, 2010, also included $29 million and $19 million of other income associated with the establishment of regulatory assets for previously recorded losses on interest rate swaps.

See "Results of Operations" below for further discussion and analysis of the results of operations.

TC2 Construction

LG&E and KU constructed a 760 MW capacity baseload, coal-fired unit, TC2, which is jointly owned by LG&E (14.25%) and KU (60.75%), together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25%). With limited exceptions, LG&E and KU took care, custody and control of TC2 in January 2011. LG&E and KU and the contractor have agreed to certain amendments to the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. A number of remaining issues regarding these matters are still under discussion with the contractors. See Note 10 to the Financial Statements for additional information.

Registered Debt Exchange Offer by LKE, LG&E and KU

In April 2011, LKE, LG&E and KU each filed a Registration Statement with the SEC, related to an offer to exchange certain first mortgage bonds and senior notes issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statements became effective in June 2011, and the exchanges were completed in July 2011, with substantially all of the senior notes and first mortgage bonds being exchanged. See Note 7 to the Financial Statements and the 2011 Registration Statements for additional information.

Legal and Regulatory Matters

Federal

CSAPR

In July 2011, the EPA signed the CSAPR which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. This rule applies to the Kentucky plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions. In October 2011, the EPA proposed technical adjustments to the CSAPR to account for updated data submitted to the agency. Several states and a number of companies have filed petitions for review with the U.S. Court of Appeals for the District of Columbia Circuit challenging various provisions of the CSAPR. LG&E's and KU's initial review of the allocations under the CSAPR indicates that greater reductions in sulfur dioxide emissions will be required beginning in 2012 under the CSAPR than were required under the CAIR.

For the initial phase of the rule beginning in 2012, sulfur dioxide allowance allocations are expected to be greater than the forecasted emissions based on present operations of existing sulfur dioxide scrubbers and coal supply. However, for the second phase beginning in 2014, LG&E and KU will likely have to modify operations and dispatch of their generating fleet, including upgrades or installation of new sulfur dioxide scrubbers for certain generating units or retirement of certain other units.

With respect to nitrogen oxide emissions, the CSAPR provides a slightly lower amount of allowances compared to those under the CAIR. With uncertainty surrounding the trading program, other compliance options are being analyzed for the Kentucky fleet, such as the installation of new technology or modifications of plant operations as well as the retirement and replacement of certain coal-fired generating units. LG&E and KU are seeking recovery of their expected costs to comply with the CSAPR and certain other EPA requirements through the ECR plan filed with the KPSC in June 2011.

Additionally, the Kentucky plants may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. LG&E and KU anticipate that some of the measures required for compliance with the CSAPR such as upgraded or new sulfur dioxide scrubbers at some of their plants and retirement of certain units may also be necessary to achieve compliance with the new sulfur dioxide standard. If additional reductions were to be required, the economic impact to LKE could be significant. See Notes 6 and 10 to the Financial Statements for additional information on the CSAPR and the regulatory proceeding.

Kentucky and Virginia

CPCN Filing

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run station site. LG&E and KU also requested approval to purchase three additional natural gas combustion turbines from Bluegrass Generation Company, L.L.C. (Bluegrass Plant) that are expected to provide up to 495 MW of peak generation supply. LG&E and KU anticipate that the NGCC construction and Bluegrass Plant acquisition could require up to

$800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC and Bluegrass Plant acquisition were not included in the CPCN filing with the KPSC but are expected to be included in a future base rate case filing. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, but no hearing, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 6 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, LG&E and KU filed ECR plans with the KPSC requesting approval to install environmental upgrades for certain of their coal-fired plants along with the recovery of their expected $1.4 billion and $1.1 billion in associated capital costs, as well as operating expenses as incurred. The ECR plans included upgrades that will be made to certain of their coal-fired generating stations to continue to be compliant with EPA regulations. See Notes 6 and 10 to the Financial Statements for additional information.

Virginia Rate Case

In April 2011, KU filed an application with the VSCC requesting an annual increase in electric base rates for its Virginia jurisdictional customers of $9 million, or 14%. The proposed increase reflected a rate of return on rate base of 8%, based on a return on equity of 11%, inclusive of expenditures to complete TC2, all new sulfur dioxide scrubbers, recovery over five years of a 2009 storm regulatory asset and various other adjustments to revenue and expenses for the test year ended December 31, 2010. In September 2011, a settlement stipulation was reached between KU and the VSCC Staff and filed with the VSCC for consideration. In October 2011, the VSCC approved the stipulation with two modifications that were accepted by KU. The VSCC issued an Order closing the proceeding in October 2011. The approved annual revenue increase is $7 million with new base rates effective November 1, 2011.

Results of Operations

As previously noted, LKE's results for the three and nine months ended September 30, 2011 are on a basis of accounting different from its results for the three and nine months ended September 30, 2010. When discussing LKE's results of operations for 2011 compared with 2010 material differences resulting from the different bases of accounting will be isolated for purposes of comparability. See "Overview - Successor and Predecessor Financial Presentation" for further information.

The results for interim periods can be disproportionately influenced by various factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods. Due to weather, revenue and earnings are generally highest during the first and third quarters and lowest during the second quarter.

Earnings

Net Income for the periods ended September 30 was:

	Three Months			Nine Months		
	2011 Successor	2010 Predecessor	% Change	2011 Successor	2010 Predecessor	% Change
Operating Revenues	$ 736	$ 719	2	$ 2,140	$ 2,035	5
Fuel	245	250	(2)	666	668	
Energy purchases	32	39	(18)	179	200	(11)
Other operation and maintenance	187	177	6	566	509	11
Depreciation	84	73	15	249	211	18
Taxes, other than income	10	5	100	28	19	47
Total Operating Expenses	558	544	3	1,688	1,607	5
Other Income (Expense) - net		31	(100)	(1)	17	(106)
Interest Expense	36	45	(20)	108	137	(21)
Income Taxes	52	59	(12)	125	112	12
Loss from Discontinued Operations (net of income taxes)	(1)			(1)	(2)	(50)
Net Income	$ 89	$ 102	(13)	$ 217	$ 194	12

The changes in the components of Net Income for the periods ended September 30, 2011 and 2010 were due to the following factors as provided in the table below.

	Three Months	Nine Months
Margin	$ 19	$ 107
Other operation and maintenance	(4)	(42)
Depreciation	(10)	(32)
Taxes, other than income	(5)	(9)
Other Income (Expense) - net	(31)	(18)
Interest Expense	9	29
Income Taxes	9	(14)
Special items		2
Total	$ (13)	$ 23

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of margins.

- Higher other operation and maintenance expense resulted from higher steam and distribution maintenance costs. Higher steam costs for the three and nine-month periods of $3 million and $22 million were due to increased scope of scheduled outages and higher variable expenses from increased generation. Higher distribution maintenance costs for the three and nine-month periods of $3 million and $14 million resulted from higher storm costs, increased amortization of wind and ice storms restoration-related costs together with a hazardous tree removal project initiated in August 2010. The nine-month period was partially offset by $6 million of 2009 winter storm restoration expenses being reclassified to a regulatory asset in 2011, as these costs are expected to be recovered in rates.

- Higher depreciation was primarily due to TC2 commencing dispatch in January 2011 resulting in increases of $8 million and $23 million for the three and nine-month periods. In addition, the E.W. Brown sulfur dioxide scrubber was placed in-service in June 2010 resulting in a $7 million increase for the nine-month period.

- Higher other expense - net was primarily due to $29 million and $19 million of other income for the three and nine months ended September 30, 2010, the result of previously recorded losses on interest rate swaps being reclassified as regulatory assets during the three-month period ended September 30, 2010.

- Lower interest expense of $4 million and $14 million for the three and nine-month periods was due to decreases in interest rates and decreases of $5 million and $19 million for the three and nine-month periods were due to lower long-term debt balances.

- Lower pre-tax income resulted in lower income tax of $7 million for the three-month period and higher pre-tax book income resulted in higher income tax of $14 million for the nine-month period.

Management considers energy marketing of expected economic generation capacity in excess of expected load requirements and a terminated lease with The Big Rivers Electric Corporation (BREC) to be special items. See Note 14 to the Financial Statements for additional information on energy marketing of expected economic generation capacity in excess of expected load requirements and LKE's 2011 Registration Statement for information about BREC. The following are the special items for the periods ended September 30:

	Income Statement Line Item	Three Months 2011 Successor	Three Months 2010 Predecessor	Nine Months 2011 Successor	Nine Months 2010 Predecessor
Special Items, net of tax benefit (expense):					
Energy-related economic activity ($1), $0, $0, $0	Operating revenues	$ 1		$ 1	
BREC terminated lease $1, $0, $1, $1	Discontinued operations	(1)		(1)	$ (2)
Total		$		$	$ (2)

Outlook

Excluding special items, in 2011 compared with 2010, LKE expects higher retail revenues and lower financing costs partially offset by higher depreciation and other operating costs. Retail revenues are expected to increase as a result of the Kentucky rate cases and recoveries associated with environmental investments. Lower financing costs are expected from lower debt balances resulting from an equity contribution provided by PPL at acquisition and the issuance in late 2010 of first mortgage bonds, which LKE used to repay higher cost debt. Depreciation and other operating costs are expected to increase resulting from increases in regulated utility plant including commencing dispatch of TC2 in January 2011 to serve customer demand.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Business," and "Risk Factors" in LKE's 2011 Registration Statement for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of LKE's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from LKE's operations. LKE believes that Margin provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management to manage LKE's operations and analyze actual results compared to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by LKE for the periods ended September 30.

	2011 Three Months - Successor			2010 Three Months - Predecessor		
	Margin	**Other (a)**	**Operating Income (b)**	**Margin**	**Other (a)**	**Operating Income (b)**
Operating Revenues	$ 734	$ 2	$ 736	$ 720	$ (1)	$ 719
Operating Expenses						
Fuel	245		245	250		250
Energy purchases	32		32	39		39
Other operation and maintenance	26	161	187	20	157	177
Depreciation	12	72	84	11	62	73
Taxes, other than income		10	10		5	5
Total Operating Expenses	315	243	558	320	224	544
Total	$ 419	$ (241)	$ 178	$ 400	$ (225)	$ 175

	2011 Nine Months - Successor			2010 Nine Months - Predecessor		
	Margin	**Other (a)**	**Operating Income (b)**	**Margin**	**Other (a)**	**Operating Income (b)**
Operating Revenues	$ 2,139	$ 1	$ 2,140	$ 2,034	$ 1	$ 2,035
Operating Expenses						
Fuel	666		666	668		668
Energy purchases	179		179	200		200
Other operation and maintenance	67	499	566	52	457	509
Depreciation	37	212	249	31	180	211
Taxes, other than income		28	28		19	19
Total Operating Expenses	949	739	1,688	951	656	1,607
Total	$ 1,190	$ (738)	$ 452	$ 1,083	$ (655)	$ 428

(a) Represents amounts that are excluded from Margin.
(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins were higher by $19 million and $107 million during the three and nine months ended September 30, 2011, compared with the same periods in 2010. The positive impact mainly resulted from a rate increase, which became effective in August 2010.

Other Operation and Maintenance

Changes in other operation and maintenance expense for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following.

	Three Months	Nine Months
Steam maintenance (a)		$ 11
PPL support charges	$ 3	12
Steam operations (b)	3	11
Distribution maintenance (c)	3	8
Fuel for generation (d)	3	10
Other	(2)	5
Total	$ 10	$ 57

(a) Primarily due to increased scope of scheduled outages including those at Ghent and Green River.
(b) Variable expenses increased due to increased generation, the result of TC2 commencing dispatch in 2011.
(c) The nine months ended September 30, 2011, resulted from higher storm costs along with increased amortization of wind and ice storms restoration-related costs and a hazardous tree removal project initiated in August 2010. This increase was partially offset by $6 million of 2009 winter storm restoration expenses being reclassified to a regulatory asset in 2011, as these costs are expected to be recovered in rates.
(d) Fuel handling costs are included in fuel for electric generation on the Statements of Income for the three and nine months ended September 30, 2010, and are in other operation and maintenance expense on the Statements of Income for the three and nine months ended September 30, 2011.

Depreciation

Changes in depreciation for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
TC2 (dispatch began in January 2011)	$ 8	$ 23
E.W. Brown sulfur dioxide scrubber (placed in-service in June 2010)		7
Other	3	8
Total	$ 11	$ 38

Other Income (Expense) - net

Changes in other income (expense) - net for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Other income included in the periods ending September 30, 2010, resulted from the establishment of regulatory assets for previously recorded losses on interest rate swaps	$ (29)	$ (19)
Other	(2)	1
Total	$ (31)	$ (18)

Interest Expense

Changes in interest expense for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Interest rates (a)	$ (4)	$ (14)
Long-term debt balances (b)	(5)	(19)
Other		4
Total	$ (9)	$ (29)

(a) Interest rates on the first mortgage bonds and senior notes were lower than the rates on the loans from Fidelia Corporation and other E.ON AG affiliates, which were replaced.
(b) LKE's long-term debt principal balance was $886 million lower as of September 30, 2011 compared to 2010, primarily due to an equity contribution from PPL of $1.6 billion at the time of acquisition.

Income Taxes

Changes in income taxes for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Higher (lower) pre-tax book income	$ (7)	$ 14
Other		(1)
Total	$ (7)	$ 13

Financial Condition

Liquidity and Capital Resources

LKE had the following at:

	September 30, 2011	December 31, 2010
Cash and cash equivalents	$ 170	$ 11
Short-term investments (a)		163
	$ 170	$ 174
Short-term debt (b)		$ 163

(a) Represents tax-exempt bonds issued by Louisville/Jefferson County, Kentucky, on behalf of LG&E that were purchased from the remarketing agent in 2008. Such bonds were remarketed to unaffiliated investors in January 2011. See Note 17 to the Financial Statements for additional information.
(b) Represents borrowings under LG&E's $400 million syndicated credit facility. See Note 7 to the Financial Statements for additional information.

The $159 million increase in LKE's cash and cash equivalents position was primarily the net result of:

- cash provided by operating activities of $674 million;
- proceeds of $250 million from the issuance of long-term debt;
- capital expenditures of $287 million; and
- the payment of $469 million of distributions to PPL.

LKE's cash provided by operating activities increased by $264 million for the nine months ended September 30, 2011, compared with the same period in 2010, primarily due to:

- an increase in net income of $23 million adjusted for non-cash effects of $145 million (depreciation of $38 million, deferred income taxes and investment tax credits of $123 million and the recording of a regulatory asset for previously recorded losses on interest rate swaps of $22 million, partially offset by defined benefit plans - expense of $17 million, unrealized (gains) losses on derivatives of $14 million and other noncash items of $7 million);
- a net decrease in working capital from accounts receivable, accounts payable and unbilled revenue of $74 million due to the timing of cash receipts and payments, an increase in base rates effective August 2010, colder weather (more heating degree days) in December 2010 as compared with December 2009, and milder weather (fewer cooling degree days) in September 2011 as compared with September 2010;
- a decrease in backstop energy and aluminum production credit payments of $45 million made in 2010 under the smelter contract; and
- a decrease in fuel of $44 million, which was driven by higher volumes purchased in 2010 in preparation for the commercial operation of TC2 originally expected in mid-2010, along with an increase in fuel consumption due to the dispatch of TC2 beginning in January 2011; partially offset by
- an increase in discretionary defined benefit plan contributions of $105 million made in order to achieve LKE's long-term funding requirements.

Credit Facilities

At September 30, 2011, LKE's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
LKE Credit Facility with a subsidiary of PPL Energy Supply	$ 300			$ 300
LG&E Credit Facility (a) (d)	400			400
KU Credit Facilities (a) (b) (d)	598		$ 198	400
Total Credit Facilities (c)	$ 1,298		$ 198	$ 1,100

(a) In June 2011, LG&E and KU each amended its respective Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon the respective company's senior secured long-term debt rating rather than the senior unsecured debt rating.
(b) In April 2011, KU entered into a new $198 million letter of credit facility that has been used to issue letters of credit to support outstanding tax exempt bonds. The facility matures in April 2014. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.
(c) Total borrowings outstanding under LKE's credit facilities decreased on a net basis by $163 million since December 31, 2010.
(d) In October 2011, LG&E and KU each amended its respective syndicated credit facilities. The amendments included extending the expiration dates from December 2014 to October 2016. Under these facilities, LG&E and KU each continue to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under LKE's Syndicated Credit Facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 9% of the total committed capacity; however, the PPL affiliate provides a commitment of approximately 23% of the total facilities listed above.

See Note 7 to the Financial Statements for further discussion of LKE's credit facilities.

Long-term Debt Securities

In January 2011, LG&E remarketed $163 million of variable rate tax-exempt revenue bonds, which were issued on its behalf by Louisville/Jefferson County, Kentucky to unaffiliated investors in a term rate mode, bearing interest at 1.90% into 2012. The proceeds from the remarketing were used to repay a $163 million borrowing under LG&E's Syndicated Credit Facility.

At September 30, 2011, LKE's tax-exempt revenue bonds that are in the form of auction rate securities and total $231 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the nine months ended September 30, 2011, the weighted-average rate on LG&E's and KU's auction rate bonds in total was 0.27%.

LKE's long-term debt securities activity through September 30, 2011 was:

	Debt	
	Issuances	Retirement
LKE Senior Notes	$ 250	
Total Cash Flow Impact	$ 250	
Non-cash Exchanges		
LKE Senior Notes (a)	$ 875	$ (875)
LG&E First Mortgage Bonds (a)	535	(535)
KU First Mortgage Bonds (a)	1,500	(1,500)
Total Exchanged	$ 2,910	$ (2,910)
Net Increase	$ 250	

(a) In April 2011, LKE, LG&E and KU each filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statements became effective in June 2011, and the exchanges were completed in July 2011, with substantially all securities being exchanged.

LKE's long-term debt securities activity since September 30, 2011 consists of the retirement of the $2 million LG&E and KU Capital LLC Medium Term Note which matured on November 1, 2011.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LKE and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LKE and its subsidiaries are based on information provided by LKE and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LKE or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in LKE's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

In LKE's 2011 Registration Statement, LKE described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, LKE is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to LKE's ratings, but without stating what ratings have been assigned to LKE or its subsidiaries, or their securities. The ratings assigned by the rating agencies to LKE and its subsidiaries and their respective securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed all of the ratings for LKE and all of its rated subsidiaries;
- S&P revised the outlook for LKE, LG&E and KU and lowered the issuer and senior unsecured ratings of LKE and the issuer, senior secured and short-term ratings of LG&E and KU; and
- Fitch affirmed all of the ratings for LKE and all of its rated subsidiaries.

In April 2011, S&P took the following actions following the completion of PPL's acquisition of WPD Midlands:

- revised the outlook for LKE and all of its rated subsidiaries;
- raised the short-term ratings of LG&E and KU; and
- affirmed all of the long-term ratings for LKE and its rated subsidiaries.

In May 2011, S&P downgraded the long-term rating of four series of pollution control bonds issued on behalf of KU by one notch in connection with the substitution of the letters of credit enhancing these four bonds.

In September 2011, Moody's affirmed the issuer ratings for LG&E and KU and all of the ratings for LKE.

Ratings Triggers

LKE and its subsidiaries have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LKE and its subsidiaries to post additional collateral, or permitting the counterparty to terminate the contract, if LKE's or its subsidiaries' credit ratings were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at September 30, 2011. At September 30, 2011, if LKE's or its subsidiaries' credit ratings had been below investment grade, the maximum amount that LKE would have been required to post as additional collateral to counterparties was $92 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation, gas supply, marketing and trading operations and interest rate contracts.

Capital Expenditures

The table below shows LKE's capital expenditure projections at September 30, 2011.

	Projected				
	2011	**2012**	**2013**	**2014**	**2015**
Construction expenditures (a)					
Generating facilities	$ 137	$ 128	$ 155	$ 158	$ 126
Transmission and distribution facilities	219	266	303	289	294
Environmental (b)	163	711	1,140	1,065	824
Other	26	52	48	42	67
Total Construction Expenditures	$ 545	$ 1,157	$ 1,646	$ 1,554	$ 1,311

(a) Construction expenditures include AFUDC, which is not expected to be significant for the years 2011 through 2015.
(b) Includes approximately $700 million of currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. LKE expects to recover these costs over a period equivalent to the related depreciable lives of the assets through base rates established by future rate cases.

LKE's capital expenditure projections for the years 2011 through 2015 total approximately $6.2 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes current estimates for LKE's environmental projects related to new and anticipated EPA compliance standards. Actual costs may be significantly lower or higher depending on the final requirements. Certain environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism.

For additional information, see "Liquidity and Capital Resources" in LKE's 2011 Registration Statement.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about LKE's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk

LG&E's and KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E and KU are subject to commodity price risk for only a small portion of on-going business operations. LKE conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve LG&E's and KU's customers, and LKE manages energy commodity risk using derivative instruments, including swaps and forward contracts.

The balances and changes in the net fair value of LKE's commodity derivative contracts for the three and nine months ended September 30, 2011 and 2010 were not significant. See Note 14 to the Financial Statements for additional information.

Interest Rate Risk

LKE and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. LKE utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under PPL's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LKE's debt portfolio due to changes in the absolute level of interest rates.

At September 30, 2011, LKE's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LKE is also exposed to changes in the fair value of its debt portfolio. LKE estimated that a 10% decrease in interest rates at September 30, 2011, would increase the fair value of its debt portfolio by $121 million.

At September 30, 2011, LKE had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates
Economic hedges			
Interest rate swaps (b)	$ 179	$ (58)	$ (4)

(a) Includes accrued interest.
(b) LKE utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LKE is exposed to changes in the fair value of these instruments, any changes in the fair value of such economic hedges are recorded in regulatory assets and liabilities. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates.

Credit Risk

LKE is exposed to potential losses as a result of nonperformance by counterparties of their contractual obligations. LKE maintains credit policies and procedures to limit counterparty credit risk including evaluating credit ratings and financial information along with having certain counterparties post margin if the credit exposure exceeds certain thresholds.
LKE is exposed to potential losses as a result of nonpayment by customers. LKE maintains an allowance for doubtful accounts primarily composed of accounts aged more than four months. Accounts are written off as management determines them uncollectible.

Certain of LKE's derivative instruments contain provisions that require it to provide immediate and on-going collateralization of derivative instruments in net liability positions based upon LKE's credit ratings from each of the major credit rating agencies. See Notes 13 and 14 to the Financial Statements for information regarding exposure and the risk management activities.

Related Party Transactions

LKE is not aware of any material ownership interest or operating responsibility by senior management of LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with LKE. See Note 11 to the Financial Statements for additional information on related party transactions between LKE and its affiliates.

Environmental Matters

Protection of the environment is a major priority for LKE and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to LKE's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures; or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc. and may impact the costs for their products or their demand for LKE's services. See "Business - Environmental Matters" in LKE's 2011 Registration Statement and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 18 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: price risk management, regulatory mechanisms, defined benefits, asset impairment, loss accruals, AROs, income taxes, regulatory assets and liabilities and business combinations - purchase price allocation. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" in LKE's 2011 Registration Statement for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with LG&E's Condensed Financial Statements and the accompanying Notes and LG&E's 2011 Registration Statement. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides an overview of LG&E's business strategy, financial and operational highlights and key regulatory matters.

- "Results of Operations" provides a summary of LG&E's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on LG&E's Statements of Income, comparing the three and nine months ended September 30, 2011 with the same periods in 2010.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LG&E's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.

- "Financial Condition - Risk Management" provides an explanation of LG&E's risk management programs relating to market and credit risk.

Overview

Introduction

LG&E, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

Successor and Predecessor Financial Presentation

LG&E's Condensed Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010, and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, which are discussed in the Financial Statements in LG&E's 2011 Registration Statement. The cost basis of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of LG&E have not changed as a result of the acquisition.

Business Strategy

LG&E's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

Financial and Operational Highlights

Net Income

The three and nine months ended September 30, 2011, includes the effect of LG&E's base rate increase, which became effective August 1, 2010, partially offset by net cost increases, which have not yet been reflected in the rates charged by LG&E. The three and nine months ended September 30, 2010, also included $29 million and $19 million of other income associated with the establishment of regulatory assets for previously recorded losses on interest rate swaps.

See "Results of Operations" below for further discussion and analysis of the results of operations.

TC2 Construction

LG&E and KU constructed a 760 MW capacity baseload, coal-fired unit, TC2, which is jointly owned by LG&E (14.25%) and KU (60.75%), together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25%). With limited exceptions, LG&E and KU took care, custody and control of TC2 in January 2011. LG&E and KU and the contractor have agreed to certain amendments to the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. A number of remaining issues regarding these matters are still under discussion with the contractors. See Note 10 to the Financial Statements for additional information.

Registered Debt Exchange Offer by LG&E

In April 2011, LG&E filed a Registration Statement with the SEC, related to an offer to exchange certain first mortgage bonds issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statement became effective in June 2011, and the exchange was completed in July 2011 with all of the first mortgage bonds being exchanged. See Note 7 to the Financial Statements and LG&E's 2011 Registration Statement for additional information.

Legal and Regulatory Matters

Federal

CSAPR

In July 2011, the EPA signed the CSAPR which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. This rule applies to the Kentucky plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions. In October 2011, the EPA proposed technical adjustments to the CSAPR to account for updated data submitted to the agency. Several states and a number of companies have filed petitions for review with the U.S. Court of Appeals for the District of Columbia Circuit challenging various provisions of the CSAPR. LG&E's initial review of the allocations under the CSAPR indicates that greater reductions in sulfur dioxide emissions will be required beginning in 2012 under the CSAPR than were required under the CAIR.

For the initial phase of the rule beginning in 2012, sulfur dioxide allowance allocations are expected to be greater than the forecasted emissions based on present operations of existing scrubbers and coal supply. However, for the second phase beginning in 2014, LG&E will likely have to modify operations and dispatch of its generating fleet, including upgrades or installation of new sulfur dioxide scrubbers for certain generating units or retirement of certain other units.

With respect to nitrogen oxide emissions, the CSAPR provides a slightly lower amount of allowances compared to those under the CAIR. With uncertainty surrounding the trading program, other compliance options are being analyzed for the Kentucky plants, such as the installation of new technology or modifications of plant operations as well as the retirement and replacement of certain coal-fired generating units. LG&E is seeking recovery of its expected costs to comply with the CSAPR and certain other EPA requirements through the ECR plan filed with the KPSC in June 2011.

Additionally, LG&E's plants may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. LG&E anticipates that some of the measures required for compliance with the CSAPR such as upgraded or new sulfur dioxide scrubbers at some of its plants and retirement of certain units may also be necessary to achieve compliance with the new sulfur dioxide standard. If additional reductions were to be required, the economic impact to LG&E could be significant. See Notes 6 and 10 to the Financial Statements for additional information on the CSAPR and the regulatory proceeding.

Kentucky

CPCN Filing

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run station site. LG&E and KU also requested approval to purchase three additional natural gas combustion turbines from Bluegrass Generation Company, L.L.C. (Bluegrass Plant) that are expected to provide up to 495 MW of peak generation supply. LG&E and KU anticipate that the NGCC construction and Bluegrass Plant acquisition could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC and Bluegrass Plant acquisition were not included in the CPCN filing with the KPSC but are expected to be included in a future base rate case filing. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, but no hearing, scheduled through early February 2012. See Note 6 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, LG&E filed an ECR plan with the KPSC requesting approval to install environmental upgrades for certain of its coal-fired plants along with the recovery of the expected $1.4 billion in associated capital costs as well as operating expenses as incurred. The ECR plan included upgrades that will be made to certain of LG&E's coal-fired generating stations to continue to be compliant with EPA regulations. See Notes 6 and 10 to the Financial Statements for additional information.

Results of Operations

As previously noted, LG&E's results for the three and nine months ended September 30, 2011 are on a basis of accounting different from its results for the three and nine months ended September 30, 2010. When discussing LG&E's results of operations for 2011 compared with 2010 material differences resulting from the different bases of accounting will be isolated for purposes of comparability. See "Overview - Successor and Predecessor Financial Presentation" for further information.

The results for interim periods can be disproportionately influenced by various factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods. Due to weather, revenue and earnings are generally highest during the first and third quarters and lowest during the second quarter.

Earnings

Net Income for the periods ended September 30 was:

	Three Months			Nine Months		
	2011 Successor	2010 Predecessor	% Change	2011 Successor	2010 Predecessor	% Change
Operating Revenues	$ 340	$ 327	4	$ 1,035	$ 972	6
Fuel	98	104	(6)	265	277	(4)
Energy purchases	31	23	35	180	146	23
Other operation and maintenance	91	85	7	272	250	9
Depreciation	37	35	6	110	104	6
Taxes, other than income	5	3	67	14	11	27
Total Operating Expenses	262	250	5	841	788	7
Other Income (Expense) - net		29	(100)		17	(100)
Interest Expense	11	11		34	34	
Income Taxes	24	35	(31)	58	60	(3)
Net Income	$ 43	$ 60	(28)	$ 102	$ 107	(5)

The changes in the components of Net Income for the periods ended September 30, 2011 and 2010 were due to the following factors as provided in the table below.

	Three Months	Nine Months
Margin	$ 7	$ 39
Other operation and maintenance	(4)	(16)
Depreciation	(2)	(10)
Taxes, other than income	(2)	(3)
Other Income (Expense) - net	(29)	(17)
Income Taxes	13	2
Total	$ (17)	$ (5)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of margins.

- Higher other operation and maintenance expense resulted from higher distribution maintenance costs of $2 million and $8 million for the three and nine-month periods due to amortization of storm restoration related costs, together with a hazardous tree removal project initiated in August 2010.

- Higher other expense - net was primarily due to $29 million and $19 million of other income for the three and nine months ended September 30, 2010, the result of previously recorded losses on interest rate swaps being reclassified as regulatory assets during the three-month period ended September 30, 2010.

- Lower pre-tax income resulted in lower income taxes of $11 million and $3 million for the three and nine-month periods.

Outlook

LG&E expects higher retail revenues and lower financing costs in 2011 compared to 2010 due to the issuance in late 2010 of first mortgage bonds that LG&E used to repay higher cost debt, offset by lower other income and higher depreciation. Retail revenues are expected to increase as a result of the Kentucky rate case. The reduction in other income (expense) - net is the result of the recognition of regulatory assets associated with the interest rate swaps in 2010 while higher depreciation is projected due to commencing dispatch of TC2 in January 2011 to serve customer demand.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Business," and "Risk Factors" in LG&E's 2011 Registration Statement for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of LG&E's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from LG&E's operations. LG&E believes that Margin provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by LG&E for the periods ended September 30.

	2011 Three Months - Successor			2010 Three Months - Predecessor		
	Margin	**Other (a)**	**Operating Income (b)**	**Margin**	**Other (a)**	**Operating Income (b)**
Operating Revenues	$ 339	$ 1	$ 340	$ 328	$ (1)	$ 327
Operating Expenses						
Fuel	98		98	104		104
Energy purchases	31		31	23		23
Other operation and maintenance	10	81	91	8	77	85
Depreciation	1	36	37	1	34	35
Taxes, other than income		5	5		3	3
Total Operating Expenses	140	122	262	136	114	250
Total	$ 199	$ (121)	$ 78	$ 192	$ (115)	$ 77

	2011 Nine Months - Successor			2010 Nine Months - Predecessor		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 1,034	$ 1	$ 1,035	$ 971	$ 1	$ 972
Operating Expenses						
Fuel	265		265	277		277
Energy purchases	180		180	146		146
Other operation and maintenance	30	242	272	24	226	250
Depreciation	2	108	110	6	98	104
Taxes, other than income		14	14		11	11
Total Operating Expenses	477	364	841	453	335	788
Total	$ 557	$ (363)	$ 194	$ 518	$ (334)	$ 184

(a) Represents amounts that are excluded from Margin.
(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins were higher by $7 million and $39 million during the three and nine months ended September 30, 2011, compared with the same periods in 2010. The positive impact mainly resulted from a rate increase, which became effective in August 2010.

Other Operation and Maintenance

Changes in other operation and maintenance expense for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following.

	Three Months	Nine Months
Distribution maintenance (a)	$ 2	$ 8
Administrative and general		5
Fuel for generation (b)	2	5
Other	2	4
Total	$ 6	$ 22

(a) The three and nine-month periods increased due to amortization of storm restoration-related costs along with a hazardous tree removal project initiated in August 2010.
(b) Fuel handling costs are included in fuel for electric generation on the Statements of Income for the three and nine months ended September 30, 2010, and are in other operation and maintenance expense on the Statements of Income for the three and nine months ended September 30, 2011.

Depreciation

Depreciation increased by $2 million and $6 million for the three and nine months ended September 30, 2011, compared with the same periods in 2010. The increase was primarily due to commencing dispatch of TC2 to serve customer demands beginning in January 2011.

Other Income (Expense) - net

Changes in other income (expense) - net for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Other income included in the periods ending September 30, 2010, resulted from the establishment of regulatory assets for previously recorded losses on interest rate swaps	$ (29)	$ (19)
Other		2
Total	$ (29)	$ (17)

Income Taxes

Changes in income taxes for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Lower pre-tax book income	$ (11)	$ (3)
Other		1
Total	$ (11)	$ (2)

Financial Condition

Liquidity and Capital Resources

LG&E had the following at:

	September 30, 2011	December 31, 2010
Cash and cash equivalents	$ 75	$ 2
Short-term investments (a)		163
	$ 75	$ 165
Short-term debt (b)		$ 163

(a) Represents tax-exempt bonds issued by Louisville/Jefferson County, Kentucky, on behalf of LG&E that were purchased from the remarketing agent in 2008. Such bonds were remarketed to unaffiliated investors in January 2011. See Note 17 to the Financial Statements for additional information.
(b) Represents borrowings under LG&E's $400 million syndicated credit facility. See Note 7 to the Financial Statements for additional information.

The $73 million increase in LG&E's cash and cash equivalents position was primarily the net result of:

- cash provided by operating activities of $274 million;
- capital expenditures of $122 million; and
- the payment of $55 million of common stock dividends.

LG&E's cash provided by operating activities increased by $112 million for the nine months ended September 30, 2011, compared with the same period in 2010, primarily due to:

- a decrease in net income of $5 million adjusted for non-cash effects of $31 million (depreciation of $6 million, defined benefit plans - expense of $7 million, deferred income taxes and investment tax credits of $8 million, the recording of a regulatory asset for previously recorded losses on interest rate swaps of $22 million and other noncash items of $2 million, partially offset by unrealized (gains) losses on derivatives of $14 million);
- a net decrease in working capital from accounts receivable, accounts payable and unbilled revenue of $38 million due to the timing of cash receipts and payments, an increase in base rates effective August 2010, colder weather (more heating degree days) in December 2010 as compared with December 2009, and milder weather (fewer cooling degree days) in September 2011 as compared with September 2010;
- a decrease in fuel of $27 million, which was driven by higher volumes purchased in 2010 in preparation for the commercial operation of TC2 originally expected in mid-2010; and
- a decrease in cash refunded to customers of $26 million due to prior period over recoveries related to the gas supply clause filings in 2009; partially offset by
- an increase in discretionary defined benefit plan contributions of $44 million made in order to achieve LG&E's long-term funding requirements.

Credit Facilities

At September 30, 2011, LG&E's committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a) (b)	$ 400			$ 400

(a) In June 2011, LG&E amended its Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon LG&E's senior secured long-term debt rating rather than the senior unsecured debt rating. Total borrowings outstanding under this facility decreased on a net basis by $163 million since December 31, 2010.
(b) In October 2011, LG&E amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility LG&E continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under LG&E's Syndicated Credit Facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 6% of the total committed capacity available to LG&E.

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $400 million at market-based rates (based on highly rated commercial paper issues). At September 30, 2011, there was no balance outstanding. At December 31, 2010, $12 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%.

See Note 7 to the Financial Statements for further discussion of LG&E's credit facilities.

Long-term Debt Securities

In January 2011, LG&E remarketed $163 million of variable rate tax-exempt revenue bonds, which were issued on its behalf by Louisville/Jefferson County, Kentucky to unaffiliated investors in a term rate mode, bearing interest at 1.90% into 2012. The proceeds from the remarketing were used to repay a $163 million borrowing under LG&E's Syndicated Credit Facility.

At September 30, 2011, LG&E's tax-exempt revenue bonds that are in the form of auction rate securities and total $135 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the nine months ended September 30, 2011, the weighted-average rate on LG&E's auction rate bonds in total was 0.26%.

Since June 30, 2011, there have been $535 million of issuances and $535 million of retirements of LG&E's First Mortgage Bonds related to the non-cash exchange of bonds. In April 2011, LG&E filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statement became effective in June 2011 and the exchanges were completed in July 2011, with all securities being exchanged.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LG&E. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LG&E are based on information provided by LG&E and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LG&E. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in LG&E's credit ratings could result in higher borrowing costs and reduced access to capital markets.

In LG&E's 2011 Registration Statement, LG&E described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, LG&E is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to LG&E's ratings, but without stating what ratings have been assigned to LG&E's securities. The ratings assigned by the rating agencies to LG&E and its securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed the ratings for LG&E;
- S&P revised the outlook for LG&E and lowered the issuer, senior secured and short-term ratings of LG&E; and
- Fitch affirmed the ratings for LG&E.

In April 2011, S&P took the following actions following the completion of PPL's acquisition of WPD Midlands:

- revised the outlook for LG&E;
- raised the short-term ratings of LG&E; and
- affirmed the long-term ratings for LG&E.

In September 2011, Moody's affirmed the issuer rating for LG&E.

Ratings Triggers

LG&E has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LG&E to post additional collateral, or permitting the counterparty to terminate the contract, if LG&E's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at September 30, 2011. At September 30, 2011, if LG&E's credit ratings had been below investment grade, the maximum amount that LG&E would have been required to post as additional collateral to counterparties was $79 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation, gas supply, marketing and trading operations and interest rate contracts.

Capital Expenditures

The table below shows LG&E's capital expenditure projections at September 30, 2011.

	Projected				
	2011	2012	2013	2014	2015
Construction expenditures					
Generating facilities	$ 71	$ 56	$ 95	$ 97	$ 47
Transmission and distribution facilities	114	147	153	146	155
Environmental (a)	24	271	586	501	396
Other	6	26	25	21	34
Total Construction Expenditures	$ 215	$ 500	$ 859	$ 765	$ 632

(a) Includes approximately $200 million of currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. LG&E expects to recover these costs over a period equivalent to the related depreciable lives of the assets through base rates established by future rate cases.

LG&E's capital expenditure projections for the years 2011 through 2015 total approximately $3 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes current estimates for LG&E's environmental projects related to new and anticipated EPA compliance standards. Actual costs may be significantly lower or higher depending on the final requirements. Certain environmental compliance costs incurred by LG&E in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism.

For additional information, see "Liquidity and Capital Resources" in LG&E's 2011 Registration Statement.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about LG&E's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk

LG&E's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E is subject to commodity price risk for only a small portion of on-going business operations. LG&E conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve its customers, and LG&E manages energy commodity risk using derivative instruments, including swaps and forward contracts.

The balances and changes in the net fair value of LG&E's commodity derivative contracts for the three and nine months ended September 30, 2011 and 2010 were not significant. See Note 14 to the Financial Statements for additional information.

Interest Rate Risk

LG&E has issued debt to finance its operations, which exposes it to interest rate risk. LG&E utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under PPL's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LG&E's debt portfolio due to changes in the absolute level of interest rates.

At September 30, 2011, LG&E's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LG&E is also exposed to changes in the fair value of its debt portfolio. LG&E estimated that a 10% decrease in interest rates at September 30, 2011, would increase the fair value of its debt portfolio by $27 million.

At September 30, 2011, LG&E had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates
Economic hedges			
Interest rate swaps (b)	$ 179	$ (58)	$ (4)

(a) Includes accrued interest.
(b) LG&E utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LG&E is exposed to changes in the fair value of these instruments, any changes in the fair value of such economic hedges are recorded in regulatory assets and liabilities. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates.

Credit Risk

LG&E is exposed to potential losses as a result of nonperformance by counterparties of their contractual obligations. LG&E maintains credit policies and procedures to limit counterparty credit risk including evaluating credit ratings and financial information along with having certain counterparties post margin if the credit exposure exceeds certain thresholds.
LG&E is exposed to potential losses as a result of nonpayment by customers. LG&E maintains an allowance for doubtful accounts primarily composed of accounts aged more than four months. Accounts are written off as management determines them uncollectible.

Certain of LG&E's derivative instruments contain provisions that require it to provide immediate and on-going collateralization of derivative instruments in net liability positions based upon LG&E's credit ratings from each of the major credit rating agencies. See Notes 13 and 14 to the Financial Statements for information regarding exposure and the risk management activities.

Related Party Transactions

LG&E is not aware of any material ownership interest or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with LG&E. See Note 11 to the Financial Statements for additional information on related party transactions between LG&E and its affiliates.

Environmental Matters

Protection of the environment is a major priority for LG&E and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to LG&E's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures; or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc. and may impact the costs for their products or their demand for LG&E's services. See "Business - Environmental Matters" in LG&E's 2011 Registration Statement and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 18 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: price risk management, regulatory mechanisms, defined benefits, asset impairment, loss accruals, AROs, income taxes, regulatory assets and liabilities and business combinations - purchase price allocation. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" in LG&E's 2011 Registration Statement for a discussion of each critical accounting policy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with KU's Condensed Financial Statements and the accompanying Notes and KU's 2011 Registration Statement. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides an overview of KU's business strategy, financial and operational highlights and key regulatory matters.

- "Results of Operations" provides a summary of KU's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on KU's Statements of Income, comparing the three and nine months ended September 30, 2011 with the same periods in 2010.

- "Financial Condition - Liquidity and Capital Resources" provides an analysis of KU's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.

- "Financial Condition - Risk Management" provides an explanation of KU's risk management programs relating to market and credit risk.

Overview

Introduction

KU, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity, in Kentucky, Virginia and Tennessee.

Successor and Predecessor Financial Presentation

KU's Condensed Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010, and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, which are discussed in the Financial Statements in KU's 2011 Registration Statement. The cost basis of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of KU have not changed as a result of the acquisition.

Business Strategy

KU's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

Financial and Operational Highlights

Net Income

The three and nine months ended September 30, 2011, includes the effect of KU's base rate increase, which became effective August 1, 2010, partially offset by net cost increases, which have not yet been reflected in the rates charged by KU.

See "Results of Operations" below for further discussion and analysis of the results of operations.

TC2 Construction

KU and LG&E constructed a 760 MW capacity baseload, coal-fired unit, TC2, which is jointly owned by KU (60.75%) and LG&E (14.25%), together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25%). With limited exceptions, KU and LG&E took care, custody and control of TC2 in January 2011. KU and LG&E and the contractor have agreed to certain amendments to the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. A number of remaining issues regarding these matters are still under discussion with the contractors. See Note 10 to the Financial Statements for additional information.

Registered Debt Exchange Offer by KU

In April 2011, KU filed a Registration Statement with the SEC, related to an offer to exchange certain first mortgage bonds issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statement became effective in June 2011, and the exchange was completed in July 2011 with substantially all of the first mortgage bonds being exchanged. See Note 7 to the Financial Statements and KU's 2011 Registration Statement for additional information.

Legal and Regulatory Matters

Federal

CSAPR

In July 2011, the EPA signed the CSAPR which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010. This rule applies to the Kentucky plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions. In October 2011, the EPA proposed technical adjustments to the CSAPR to account for updated data submitted to the agency. Several states and a number of companies have filed petitions for review with the U.S. Court of Appeals for the District of Columbia Circuit challenging various provisions of the CSAPR. KU's initial review of the allocations under the CSAPR indicates that greater reductions in sulfur dioxide emissions will be required beginning in 2012 under the CSAPR than were required under the CAIR.

For the initial phase of the rule beginning in 2012, sulfur dioxide allowance allocations are expected to greater than the forecasted emissions based on present operations of existing scrubbers and coal supply. However, for the second phase beginning in 2014, KU will likely have to modify operations and dispatch of its generating fleet, including upgrades or installation of new sulfur dioxide scrubbers for certain generating units or retirement of certain other units.

With respect to nitrogen oxide emissions, the CSAPR provides a slightly lower amount of allowances compared to those under the CAIR. With uncertainty surrounding the trading program, other compliance options are being analyzed for KU's fleet, such as the installation of new technology or modifications of plant operations as well as the retirement and replacement of certain coal-fired generating units. KU is seeking recovery of its expected costs to comply with the CSAPR and certain other EPA requirements through the ECR plan filed with the KPSC in June 2011.

Additionally, KU's plants may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. KU anticipates that some of the measures required for compliance with the CSAPR such as upgraded or new sulfur dioxide scrubbers at some of its plants and retirement of certain units may also be necessary to achieve compliance with the new sulfur dioxide standard. If additional reductions were to be required, the economic impact to KU could be significant. See Notes 6 and 10 to the Financial Statements for additional information on the CSAPR and the regulatory proceeding.

Kentucky and Virginia

CPCN Filing

In September 2011, KU and LG&E filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run station site. KU and LG&E also requested approval to purchase three additional natural gas combustion turbines from Bluegrass Generation Company, L.L.C. (Bluegrass Plant) that are expected to provide up to 495 MW of peak generation supply. KU and LG&E anticipate that the NGCC construction and Bluegrass Plant acquisition could require up to $800 million (comprised of up to $500 million for KU and up to $300 million for LG&E) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC and Bluegrass Plant acquisition were not included in the CPCN filing with the KPSC but are expected to be included in a future base rate case filing. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, but no hearing, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 6 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, KU filed an ECR plan with the KPSC requesting approval to install environmental upgrades for certain of its coal-fired plants along with the recovery of the expected $1.1 billion in associated capital costs as well as operating expenses as incurred. The ECR plan included upgrades that will be made to certain of KU's coal-fired generating stations to continue to be compliant with EPA regulations. See Notes 6 and 10 to the Financial Statements for additional information.

Virginia Rate Case

In April 2011, KU filed an application with the VSCC requesting an annual increase in electric base rates for its Virginia jurisdictional customers of $9 million, or 14%. The proposed increase reflected a rate of return on rate base of 8%, based on a return on equity of 11%, inclusive of expenditures to complete TC2, all new sulfur dioxide scrubbers, recovery over five years of a 2009 storm regulatory asset and various other adjustments to revenue and expenses for the test year ended December 31, 2010. In September 2011, a settlement stipulation was reached between KU and the VSCC Staff and filed with the VSCC for consideration. In October 2011, the VSCC approved the stipulation with two modifications that were accepted by KU. The VSCC issued an Order closing the proceeding in October 2011. The approved annual revenue increase is $7 million with new base rates effective November 1, 2011.

Results of Operations

As previously noted, KU's results for the three and nine months ended September 30, 2011 are on a basis of accounting different from its results for the three and nine months ended September 30, 2010. When discussing KU's results of operations for 2011 compared with 2010 material differences resulting from the different bases of accounting will be isolated for purposes of comparability. See "Overview - Successor and Predecessor Financial Presentation" for further information.

The results for interim periods can be disproportionately influenced by various factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods. Due to weather, revenue and earnings are generally highest during the first and third quarters and lowest during the second quarter.

Earnings

Net Income for the periods ended September 30 was:

	Three Months			Nine Months		
	2011 Successor	2010 Predecessor	% Change	2011 Successor	2010 Predecessor	% Change
Operating Revenues	$ 420	$ 416	1	$ 1,191	$ 1,146	4
Fuel	147	146	1	401	391	3
Energy purchases	25	42	(40)	85	138	(38)
Other operation and maintenance	90	83	8	274	240	14
Depreciation	47	38	24	139	106	31
Taxes, other than income	5	2	150	14	8	75
Total Operating Expenses	314	311	1	913	883	3
Other Income (Expense) - net		1	(100)	1	2	(50)
Interest Expense	18	20	(10)	53	60	(12)
Income Taxes	32	32		82	76	8
Net Income	$ 56	$ 54	4	$ 144	$ 129	12

The changes in the components of Net Income for the periods ended September 30, 2011 and 2010 were due to the following factors as provided in the table below.

	Three Months	Nine Months
Margin	$ 13	$ 68
Other operation and maintenance	(3)	(23)
Depreciation	(7)	(24)
Taxes, other than income	(3)	(6)
Other Income (Expense) - net	(1)	(1)
Interest Expense	3	7
Income Taxes		(6)
Total	$ 2	$ 15

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of margins.

- Higher other operation and maintenance resulted from higher steam expenses of $4 million and $24 million for the three and nine-month periods, resulting from scheduled maintenance outages at the Ghent and Green River plants, along with higher variable expenses from increased generation.

- TC2 commenced dispatched in January 2011, resulting in a higher depreciation of $7 million and $19 million for the three and nine-month periods. In addition, the E.W. Brown sulfur dioxide scrubber was placed in-service in June 2010 resulting in a $7 million increase for the nine-month period.

- Higher pre-tax income resulted in higher income tax of $8 million for the nine-month period.

Outlook

KU expects higher retail revenues and lower financing costs in 2011 compared to 2010 due to the issuance in late 2010 of first mortgage bonds that KU used to repay higher cost debt, partially offset by higher depreciation. Retail revenues are expected to increase as a result of the Kentucky rate case and recoveries associated with environmental investments. Depreciation is expected to increase due to commencing dispatch of TC2 in January 2011 to serve customer demand.

Earnings in 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Business," and "Risk Factors" in KU's 2011 Registration Statement for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of KU's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from KU's operations. KU believes that Margin provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by KU for the periods ended September 30.

	2011 Three Months - Successor			2010 Three Months - Predecessor		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 419	$ 1	$ 420	$ 416		$ 416
Operating Expenses						
Fuel	147		147	146		146
Energy purchases	25		25	42		42
Other operation and maintenance	14	76	90	10	$ 73	83
Depreciation	12	35	47	10	28	38
Taxes, other than income		5	5		2	2
Total Operating Expenses	198	116	314	208	103	311
Total	$ 221	$ (115)	$ 106	$ 208	$ (103)	$ 105

	2011 Nine Months - Successor			2010 Nine Months - Predecessor		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 1,191		$ 1,191	$ 1,146		$ 1,146
Operating Expenses						
Fuel	401		401	391		391
Energy purchases	85		85	138		138
Other operation and maintenance	37	$ 237	274	26	$ 214	240
Depreciation	35	104	139	26	80	106
Taxes, other than income		14	14		8	8
Total Operating Expenses	558	355	913	581	302	883
Total	$ 633	$ (355)	$ 278	$ 565	$ (302)	$ 263

(a) Represents amounts that are excluded from Margin.
(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins were higher by $13 million and $68 million during the three and nine months ended September 30, 2011, compared with the same periods in 2010. The positive impact mainly resulted from a rate increase, which became effective in August 2010.

Other Operation and Maintenance

Changes in other operation and maintenance expense for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Steam maintenance (a)	$ 1	$ 15
Steam operations (b)	3	9
Fuel for generation (c)	2	5
Administrative and general	3	6
Other	(2)	(1)
Total	$ 7	$ 34

(a) Primarily due to increased scope of scheduled outages including those at Ghent and Green River.
(b) Variable expenses increased due to increased generation, the result of TC2 commencing dispatch in 2011.
(c) Fuel handling costs are included in fuel for electric generation on the Statements of Income for the three and nine months ended September 30, 2010, and are in other operation and maintenance expense on the Statements of Income for the three and nine months ended September 30, 2011.

Depreciation

Changes in depreciation for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
TC2 (dispatch began in January 2011)	$ 7	$ 19
E.W. Brown sulfur dioxide scrubber (placed in-service in June 2010)		7
Other	2	7
Total	$ 9	$ 33

Interest Expense

Changes in interest expense for the periods ended September 30, 2011, compared with the same periods in 2010, were due to the following:

	Three Months	Nine Months
Interest rates (a)	$ (5)	$ (14)
Long-term debt balances (b)	2	5
Other	1	2
Total	$ (2)	$ (7)

(a) Interest rates on the first mortgage bonds were lower than the rates on the loans from Fidelia Corporation, which were replaced.
(b) KU's long-term debt principal balance was $169 million higher as of September 30, 2011 compared to 2010.

Income Taxes

There were no changes in income taxes for the three months ended September 30, 2011, compared with the same period in 2010. Changes in income taxes for the nine months ended September 30, 2011, compared with the same period in 2010, were due to:

	Nine Months
Higher pre-tax book income	$ 8
Other	(2)
Total	$ 6

Financial Condition

Liquidity and Capital Resources

KU had the following at:

	September 30, 2011	December 31, 2010
Cash and cash equivalents	$ 94	$ 3

The $91 million increase in KU's cash and cash equivalents position was primarily the net result of:

- cash provided by operating activities of $352 million;
- a net decrease in short-term debt of $10 million;
- capital expenditures of $161 million; and
- the payment of $88 million of common stock dividends.

KU's cash provided by operating activities increased by $52 million for the nine months ended September 30, 2011, compared with the same period in 2010, primarily due to:

- an increase in net income of $15 million adjusted for non-cash effects of $66 million (depreciation of $33 million, defined benefit plans - expense of $8 million and deferred income taxes and investment tax credits of $36 million, partially offset by other noncash items of $11 million) and
- a decrease in fuel of $17 million, which was driven by higher volumes purchased in 2010 in preparation for the commercial operation of TC2 originally expected in mid-2010, along with an increase in fuel consumption due to the dispatch of TC2 beginning in January 2011; partially offset by
- the timing of ECR collections of $28 million; and
- an increase in discretionary defined benefit plan contributions of $29 million made in order to achieve KU's long-term funding requirements.

Credit Facilities

At September 30, 2011, KU's committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a) (c)	$ 400			$ 400
Letter of Credit Facility (b)	198		$ 198	

(a) In June 2011, KU amended its Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.
(b) In April 2011, KU entered into a new $198 million letter of credit facility that has been used to issue letters of credit to support outstanding tax-exempt bonds. The facility matures in April 2014. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.
(c) In October 2011, KU amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility KU continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under KU's Syndicated Credit Facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 19% of the total committed capacity available to KU.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to $400 million at market-based rates (based on highly rated commercial paper issues). At September 30, 2011, there was no balance outstanding. At December 31, 2010, $10 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%.

See Note 7 to the Financial Statements for further discussion of KU's credit facilities.

Long-term Debt Securities

At September 30, 2011, KU's tax-exempt revenue bonds that are in the form of auction rate securities and total $96 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the nine months ended September 30, 2011, the weighted-average rate on KU's auction rate bonds in total was 0.29%.

Since June 30, 2011, there have been $1.5 billion of issuances and $1.5 billion of retirements of KU's First Mortgage Bonds related to the non-cash exchange of bonds. In April 2011, KU filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statement became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of KU. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of KU are based on information provided by KU and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of KU. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in KU's credit ratings could result in higher borrowing costs and reduced access to capital markets.

In KU's 2011 Registration Statement, KU described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, KU is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to KU's ratings, but without stating what ratings have been assigned to KU's securities. The ratings assigned by the rating agencies to KU and its securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed the ratings for KU;
- S&P revised the outlook for KU and lowered the issuer, senior secured and short-term ratings of KU; and
- Fitch affirmed the ratings for KU.

In April 2011, S&P took the following actions following the completion of PPL's acquisition of WPD Midlands:

- revised the outlook for KU;
- raised the short-term ratings of KU; and
- affirmed the long-term ratings for KU.

In May 2011, S&P downgraded the long-term rating of four series of pollution control bonds issued on behalf of KU by one notch in connection with the substitution of the letters of credit enhancing these four bonds.

In September 2011, Moody's affirmed the issuer rating for KU.

Ratings Triggers

KU has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, and commodity transportation and storage, which contain provisions requiring KU to post additional collateral, or permitting the counterparty to terminate the contract, if KU's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at September 30, 2011. At September 30, 2011, if KU's credit ratings had been below investment grade, the maximum amount that KU would have been required to post as additional collateral to counterparties was $13 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations.

Capital Expenditures

The table below shows KU's capital expenditure projections at September 30, 2011.

	Projected				
	2011	2012	2013	2014	2015
Construction expenditures (a)					
Generating facilities	$ 67	$ 72	$ 60	$ 61	$ 79
Transmission and distribution facilities	105	119	150	143	139
Environmental (b)	139	440	554	564	428
Other	19	26	23	21	33
Total Construction Expenditures	$ 330	$ 657	$ 787	$ 789	$ 679

(a) Construction expenditures include AFUDC, which is not expected to be significant for the years 2011 through 2015.
(b) Includes approximately $500 million of currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. KU expects to recover these costs over a period equivalent to the related depreciable lives of the assets through base rates established by future rate cases.

KU's capital expenditure projections for the years 2011 through 2015 total approximately $3.2 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes current estimates for KU's environmental projects related to new and anticipated EPA compliance standards. Actual costs may be significantly lower or higher depending on the final requirements. Certain environmental compliance costs incurred by KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism.

For additional information, see "Liquidity and Capital Resources" in KU's 2011 Registration Statement.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about KU's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk

KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, KU is subject to commodity price risk for only a small portion of on-going business operations. KU conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve its customers, and KU manages energy commodity risk using derivative instruments, including swaps and forward contracts.

The balances and changes in the net fair value of KU's commodity derivative contracts for the three and nine months ended September 30, 2011 and 2010 were not significant.

Interest Rate Risk

KU has issued debt to finance its operations, which exposes it to interest rate risk. At September 30, 2011, KU's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant. KU is also exposed to changes in the fair value of its debt portfolio. KU estimated that a 10% decrease in interest rates at September 30, 2011, would increase the fair value of its debt portfolio by $70 million.

KU had no interest rate hedges outstanding as of September 30, 2011.

Credit Risk

KU is exposed to potential losses as a result of nonperformance by counterparties of their contractual obligations. KU maintains credit policies and procedures to limit counterparty credit risk including evaluating credit ratings and financial information along with having certain counterparties post margin if the credit exposure exceeds certain thresholds.
KU is exposed to potential losses as a result of nonpayment by customers. KU maintains an allowance for doubtful accounts primarily composed of accounts aged more than four months. Accounts are written off as management determines them uncollectible.

Certain of KU's derivative instruments contain provisions that require it to provide immediate and on-going collateralization of derivative instruments in net liability positions based upon KU's credit ratings from each of the major credit rating agencies. See Notes 13 and 14 to the Financial Statements for information regarding exposure and the risk management activities.

Related Party Transactions

KU is not aware of any material ownership interest or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with KU. See Note 11 to the Financial Statements for additional information on related party transactions between KU and its affiliates.

Environmental Matters

Protection of the environment is a major priority for KU and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures; or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc. and may impact the costs for their products or their demand for KU's services. See "Business - Environmental Matters" in KU's 2011 Registration Statement and Note 10 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 18 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: price risk management, regulatory mechanisms, defined benefits, asset impairment, loss accruals, AROs, income taxes, regulatory assets and liabilities and business combinations - purchase price allocation. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" in KU's 2011 Registration Statement for a discussion of each critical accounting policy.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to "Risk Management" in each Registrant's "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

PPL Corporation; PPL Energy Supply, LLC; PPL Electric Utilities Corporation; LG&E and KU Energy LLC; Louisville Gas and Electric Company; and Kentucky Utilities Company

(a) Evaluation of disclosure controls and procedures.

The registrants' principal executive officers and principal financial officers, based on their evaluation of the registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) have concluded that, as of September 30, 2011, the registrants' disclosure controls and procedures are effective to ensure that material information relating to the registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this quarterly report has been prepared. The aforementioned principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officers, to allow for timely decisions regarding required disclosure.

PPL Corporation

PPL acquired Western Power Distribution (East Midlands) plc and Western Power Distribution (West Midlands) plc ("WPD Midlands") on April 1, 2011. These companies are included in PPL's 2011 financial statements as of the date of the acquisition, on a one-month lag. On a pro forma basis, WPD Midlands would have accounted for approximately 22% of PPL's net income for both the three and nine months ended September 30, 2011. WPD Midlands represented 21% and 27% of PPL's total assets and net assets at September 30, 2011. The internal controls over financial reporting of WPD Midlands were excluded from a formal evaluation of effectiveness of PPL's disclosure controls and procedures. This decision was based upon the significance of these companies to PPL, and the timing of integration efforts underway to transition WPD Midlands' processes, information technology systems and other components of internal control over financial reporting to the internal control structure of PPL. PPL has expanded its consolidation and disclosure controls and procedures to include the acquired companies, and PPL continues to assess the current internal control over financial reporting at WPD Midlands. Risks related to the increased account balances are partially mitigated by PPL's expanded controls and PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, which provides management additional time for review and analysis of WPD Midlands' results and their incorporation into PPL's consolidated financial statements.

(b) Change in internal control over financial reporting.

PPL Corporation; PPL Energy Supply, LLC; PPL Electric Utilities Corporation; LG&E and KU Energy LLC; Louisville Gas and Electric Company; and Kentucky Utilities Company

The registrants' principal executive officers and principal financial officers have concluded that there were no changes in the registrants' internal control over financial reporting during the registrants' third fiscal quarter that have materially affected, or are reasonably likely to materially affect the registrants' internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For additional information regarding various pending administrative and judicial proceedings involving regulatory, environmental and other matters, which information is incorporated by reference into this Part II, see:

- "Item 3. Legal Proceedings" in PPL's, PPL Energy Supply's and PPL Electric's 2010 Form 10-K and "Business - Legal Proceedings" in LKE's, LG&E's and KU's 2011 Registration Statements; and
- Notes 5, 6 and 10 to the Financial Statements.

Item 1A. Risk Factors

PPL Corporation

The risk factors discussed below are related to PPL's April 1, 2011 acquisition of WPD Midlands, as described in Note 8 to the Financial Statements. They should be read in conjunction with and update and supplement the risk factors disclosed in PPL's "Item 1A. Risk Factors" of the 2010 Form 10-K.

We have issued securities that contain provisions that could restrict our payment of dividends.
We and our subsidiaries currently have outstanding $2.6 billion principal amount of junior subordinated notes, and we and our subsidiaries may in the future issue additional junior subordinated notes or similar securities, that in certain circumstances, including the failure to pay current interest, would limit our ability to pay dividends on our common stock. While we currently do not anticipate that any of these circumstances will occur, no assurance can be given that these circumstances will not occur in the future.

Risks Relating to the WPD Midlands Acquisition
The WPD Midlands acquisition may not achieve its intended results, including anticipated cost savings, efficiencies and other benefits.
Although we completed the WPD Midlands acquisition with the expectation that it will result in various benefits, including a significant amount of cost savings and other financial and operational benefits, there can be no assurance regarding when or the extent to which we will be able to realize these cost-savings or other benefits. Achieving the anticipated benefits, including cost savings, is subject to a number of uncertainties, including whether the businesses acquired can be operated in the manner we intend. Events outside of our control, including but not limited to regulatory changes or developments in the U.K., could also adversely affect our ability to realize the anticipated benefits from the WPD Midlands acquisition. Thus, the integration may be unpredictable, subject to delays or changed circumstances, and we can give no assurance that the acquired businesses will perform in accordance with our expectations or that our expectations with respect to integration or cost savings as a result of the acquisition will materialize. In addition, we expect to incur additional costs and charges in connection with integrating the acquired businesses, including severance payments and other restructuring and transitional charges. Additional unanticipated costs may also arise during the integration process. The integration of the WPD (East Midlands) and WPD (West Midlands) businesses may place an additional burden on our management and internal resources, and the diversion of management's attention during the integration and restructuring process could have an adverse effect on our business, financial condition and expected operating results.

The WPD Midlands acquisition exposes us to additional risks and uncertainties with respect to the acquired businesses and their operations.
The WPD Midlands acquisition will rebalance our business mix to a greater percentage of regulated operations. While we believe this should help mitigate our exposure to downturns in the wholesale power markets, it will increase our dependence on rate-of-return regulation. Although we are already exposed to risks relating to rate-of-return regulation, the WPD Midlands acquisition will increase these risks.

The acquired businesses will generally be subject to risks similar to those that we are subject to in our existing U.K. businesses. These include:

- Under current regulation by Ofgem, our U.K. regulated businesses' allowed revenue is determined by the distribution price controls set out under the terms of their respective distribution licenses, and is typically set by Ofgem every five years. The current price control period runs from April 1, 2010 to March 31, 2015. Furthermore, our ability to earn additional revenue under Ofgem regulations is highly dependent on our ability to achieve certain operational efficiency, customer service and other incentives, and we can provide no assurance that we will be able to achieve such incentives.

- There are various changes being contemplated by Ofgem to the current electricity distribution, gas transmission and gas distribution regulatory frameworks in the U.K. and there can be no assurance as to the effects such changes will have on our U.K. regulated businesses in the future, including the acquired businesses. In particular, in October 2010, Ofgem announced a new regulatory framework that is expected to become effective in April 2015 for the electricity distribution sector in the U.K. The framework, known as RIIO (Revenues = Incentives + Innovation + Outputs), focuses on sustainability, environmental-focused output measures, promotion of low carbon energy networks and financing of new investments. The new regulatory framework is expected to have a wide-ranging effect on electricity distribution companies operating in the U.K., including changes to price controls and price review periods. Our U.K. regulated businesses' compliance with this new regulatory framework may result in significant additional capital expenditures, increases in operating and compliance costs and adjustments to our pricing models.

- Ofgem has formal powers to propose modifications to each distribution license. We are not currently aware of any planned modification to any of our U.K. regulated businesses distribution licenses that would result in a material adverse effect to the U.K. regulated businesses and PPL. There can, however, be no assurance that a restrictive modification will not be introduced in the future, which could have an adverse effect on the operations and financial condition of the U.K. regulated businesses and PPL.

- A failure to operate our U.K. networks properly could lead to compensation payments or penalties, or a failure to make capital expenditures in line with agreed investment programs could lead to deterioration of the network. While our U.K. regulated businesses' investment programs are targeted to maintain asset conditions over a five-year period and reduce customer interruptions and customer minutes lost over that period, no assurance can be provided that these regulatory requirements will be met.

- A failure by any of our U.K. regulated businesses to comply with the terms of a distribution license may lead to the issuance of an enforcement order by Ofgem that could have an adverse impact on PPL. Ofgem has powers to levy fines of up to 10 percent of revenue for any breach of a distribution license or, in certain circumstances, such as insolvency, the distribution license itself may be revoked. Unless terminated in the circumstances mentioned above, a distribution license continues indefinitely until revoked by Ofgem following no less than 25 years' written notice. Our U.K. regulated businesses have in place policies, systems and processes to help ensure compliance with their distribution licenses and relevant legislation. While none of our U.K. regulated businesses are currently subject to any formal or informal investigation by Ofgem in relation to enforcement matters and we are not aware of any area of material non-compliance, there can be no guarantee that our regulated U.K. businesses will not be subject to investigation or enforcement action in the future.

- We will be subject to increased foreign currency exchange rate risks because a greater portion of our cash flows and reported earnings will be generated by our U.K. business operations. These risks relate primarily to changes in the relative value of the British pound sterling and the U.S. dollar between the time we initially invest U.S. dollars in our U.K. businesses and the time that cash is repatriated to the U.S. from the U.K., including cash flows from our U.K. businesses that may be distributed as future dividends to our shareholders. In addition, our consolidated reported earnings on a U.S. GAAP basis may be subject to increased earnings translation risk, which is the result of the conversion of earnings as reported in our U.K. businesses on a British pound sterling basis to a U.S. dollar basis in accordance with U.S. GAAP requirements.

- Environmental costs and liabilities associated with aspects of the acquired businesses may differ from those of our existing business, including with respect to our electricity distribution, gas transmission and certain former operations, as well as with governmental and other third party proceedings.

We have incurred and will in the future incur significant transaction and acquisition-related costs in connection with financing and integrating the WPD Midlands acquisition.

We have incurred significant non-recurring costs associated with the WPD Midlands acquisition. Significant additional expenses will likely be incurred to complete the restructuring of WPD (East Midlands) and WPD (West Midlands) in order to achieve the operational efficiencies and other benefits expected to result in enhanced financial returns from those businesses.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Except as noted below for PPL Energy Supply, there have been no material changes in PPL Energy Supply's and PPL Electric's risk factors from those disclosed in "Item 1A. Risk Factors" of each Registrant's 2010 Form 10-K or in "Risk Factors" in LKE's, LG&E's and KU's 2011 Registration Statements.

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding. As a result, PPL Energy Supply is no longer subject to "Risks Related to International Regulated Segment."

Item 6. Exhibits

The following Exhibits indicated by an asterisk preceding the Exhibit number are filed herewith. The balance of the Exhibits have heretofore been filed with the Commission and pursuant to Rule 12(b)-32 are incorporated herein by reference. Exhibits indicated by a [_] are filed or listed pursuant to Item 601(b)(10)(iii) of Regulation S-K.

4(a)	- Supplemental Indenture No. 13, dated as of August 1, 2011, made and entered into by PPL Electric Utilities Corporation and The Bank of New York Mellon, as Trustee, under the Indenture dated as of August 1, 2001 (Exhibit 4(a) to PPL Corporation Form 8-K Report (File No. 1-11459) dated August 23, 2011)
4(b)	- Supplemental Indenture No. 2, dated as of September 1, 2011, made and entered into by LG&E and KU Energy LLC and The Bank of New York Mellon, as Trustee, under the Indenture dated as of November 1, 2010 (Exhibit 4(a) to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 30, 2011)
4(c)	- Registration Rights Agreement, dated September 29, 2011, between LG&E and KU Energy LLC and the Initial Purchasers (Exhibit 4(b) to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 30, 2011)
10(a)	- Amendment No. 1 to Credit Agreement, dated as of October 19, 2011, to Revolving Credit Agreement dated as of October 19, 2010 among PPL Energy Supply, LLC, the Lenders party thereto and Wells Fargo National Association, as Administrative Agent, Issuing Lender and Swingline Lender (Exhibit 10.1 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 25, 2011)
10(b)	- Amendment No. 1 to Credit Agreement, dated as of October 19, 2011, to Revolving Credit Agreement dated as of December 31, 2010 among PPL Electric Utilities Corporation, the Lenders party thereto and Wells Fargo National Association, as Administrative Agent, Issuing Lender and Swingline Lender (Exhibit 10.2 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 25, 2011)
10(c)	- Amendment No. 2 to Credit Agreement, dated as of October 19, 2011, to Revolving Credit Agreement dated as of November 1, 2010 among Louisville Gas and Electric Company, the Lenders party thereto and Wells Fargo National Association, as Administrative Agent, Issuing Lender and Swingline Lender (Exhibit 10.3 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 25, 2011)
10(d)	- Amendment No. 2 to Credit Agreement, dated as of October 19, 2011, to Revolving Credit Agreement dated as of November 1, 2010 among Kentucky Utilities Company, the Lenders party thereto and Wells Fargo National Association, as Administrative Agent, Issuing Lender and Swingline Lender (Exhibit 10.4 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 25, 2011)

CERTIFICATION

I, JAMES H. MILLER, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PPL Corporation (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EXPLANATORY NOTE

This Amendment No. 1 on Form 10-Q/A amends the Quarterly Report on Form 10-Q of PPL Corporation, PPL Energy Supply, LLC and PPL Electric Utilities Corporation for the period ended June 30, 2011, as filed by the Registrants on August 8, 2011 (Original Filing). This Amendment No. 1 is being filed solely to submit the Form 10-Q for PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company as the electronic submission of the Original Filing inadvertently excluded LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company. This Amendment No. 1 does not reflect events that have occurred subsequent to the filing of the Original Filing.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrants have duly caused this report to be signed on their behalf by the undersigned thereunto duly authorized.

FORM 10-Q
FOR THE QUARTER ENDED JUNE 30, 2011

Table of Contents

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its current and former subsidiaries

Central Networks - collectively Central Networks East plc, Central Networks Limited and certain other related assets and liabilities. On April 1, 2011, PPL WEM Holdings plc (formerly WPD Investment Holdings Limited) purchased all of the outstanding ordinary share capital of these companies from E.ON AG subsidiaries. Central Networks West plc (subsequently renamed Western Power Distribution (West Midlands) plc), wholly owned by Central Networks Limited (subsequently renamed WPD Midlands Holdings Limited), and Central Networks East plc (subsequently renamed Western Power Distribution (East Midlands) plc) are British regional electricity distribution utility companies.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E and KU Services Company - LG&E and KU Services Company (formerly E.ON U.S. Services Inc.), a subsidiary of LKE that provides services for LKE and its subsidiaries.

LKE - LG&E and KU Energy LLC (formerly E.ON U.S. LLC), a subsidiary of PPL and the parent of LG&E, KU, and other subsidiaries. PPL acquired E.ON U.S. LLC in November 2010 and changed the name to LG&E and KU Energy LLC. Within the context of this document, references to LKE also relate to the consolidated entity.

PPL - PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, LKE and other subsidiaries.

PPL Capital Funding - PPL Capital Funding, Inc., a wholly owned financing subsidiary of PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL that transmits and distributes electricity in its Pennsylvania service territory and provides electric supply to retail customers in this territory as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Energy Supply, PPL Global (effective January 2011) and other subsidiaries.

PPL EnergyPlus - PPL EnergyPlus, LLC, a subsidiary of PPL Energy Supply that markets and trades wholesale and retail electricity and gas, and supplies energy and energy services in competitive markets.

PPL Energy Supply - PPL Energy Supply, LLC, a subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interests of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding.

PPL Gas Utilities - PPL Gas Utilities Corporation, which was a regulated utility subsidiary of PPL until its sale in October 2008, provided natural gas distribution, transmission and storage services, and the competitive sale of propane.

PPL Generation - PPL Generation, LLC, a subsidiary of PPL Energy Supply that owns and operates U.S. generating facilities through various subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that primarily owns and operates a business in the U.K., WPD, that is focused on the regulated distribution of electricity. In January 2011, PPL Energy Supply, PPL Global's former parent, distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to its parent, PPL Energy Funding.

PPL Martins Creek - PPL Martins Creek, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Montana - PPL Montana, LLC, an indirect subsidiary of PPL Generation that generates electricity for wholesale sales in Montana and the Pacific Northwest.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides services for PPL and its subsidiaries.

PPL Susquehanna - PPL Susquehanna, LLC, the nuclear generating subsidiary of PPL Generation.

PPL WEM - PPL WEM Holdings plc (formerly WPD Investment Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WEM directly wholly owns WPD (East Midlands) and indirectly wholly owns WPD (West Midlands).

PPL WW - PPL WW Holdings Limited (formerly Western Power Distribution Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WW Holdings indirectly wholly owns WPD (South Wales) and WPD (South West).

WPD - refers to PPL WW and PPL WEM and their subsidiaries.

WPD Midlands - refers to Central Networks, which was renamed after the acquisition.

WPD (East Midlands) - Western Power Distribution (East Midlands) plc, a British regional electricity distribution utility company. The company, formerly Central Networks East plc, was acquired and renamed in April 2011.

WPD (South Wales) - Western Power Distribution (South Wales) plc, a British regional electricity distribution utility company.

WPD (South West) - Western Power Distribution (South West) plc, a British regional electricity distribution utility company.

WPD (West Midlands) - Western Power Distribution (West Midlands) plc, a British regional electricity distribution utility company. The company, formerly Central Networks West plc, was acquired and renamed in April 2011.

WKE - Western Kentucky Energy Corp., a subsidiary of LKE that leased certain non-utility generating stations in western Kentucky until July 2009.

Other terms and abbreviations

£ - British pounds sterling.

2001 Mortgage Indenture - PPL Electric's Indenture, dated as of August 1, 2001, to The Bank of New York Mellon (as successor to JPMorgan Chase Bank), as trustee, as supplemented.

2010 Bridge Facility - an up to $6.5 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding, as borrower, and PPL, as guarantor, and a group of banks syndicated in June 2010, to serve as a funding backstop in the event alternative financing was not available prior to the closing of PPL's acquisition of E.ON U.S.

2010 Equity Unit(s) - a PPL equity unit, issued in June 2010, consisting of a 2010 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018.

2010 Form 10-K - Annual Report to the SEC on Form 10-K for the year ended December 31, 2010.

2010 Purchase Contract(s) - a contract that is a component of a 2010 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to July 1, 2013.

2011 Bridge Facility - the £3.6 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, and lenders party thereto, used to fund the April 1, 2011 acquisition of Central Networks, as amended by Amendment No. 1 thereto dated April 15, 2011.

2011 Equity Unit(s) - a PPL equity unit, issued in April 2011, consisting of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019.

2011 Purchase Contract(s) - a contract that is a component of a 2011 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to May 1, 2014.

2011 Registration Statements - refers to the registration statements on Form S-4 filed with the SEC by each of LKE (Registration No. 333-173665) on April 21, 2011, LG&E (Registration No 333-173676) on April 22, 2011 and KU (Registration No. 333-173675) on April 22, 2011, each as amended by Amendment No. 1 filed with the SEC on May 26, 2011 and effective June 1, 2011.

Acid Rain Program - allowance trading system established by the Clean Air Act to reduce levels of sulfur dioxide. Under this program, affected power plants are allocated allowances based on their fuel consumption during specified baseline years and a specific emissions rate.

Act 129 - became effective in October 2008. The law amends the Pennsylvania Public Utility Code and creates an energy efficiency and conservation program and smart metering technology requirements, adopts new PLR electricity supply procurement rules, provides remedies for market misconduct and makes changes to the existing Alternative Energy Portfolio Standard.

AFUDC - Allowance for Funds Used During Construction, the cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction cost.

A.M. Best - A.M. Best Company, a company that reports on the financial condition of insurance companies.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Baseload generation - includes the output provided by PPL's nuclear, coal, hydroelectric and qualifying facilities.

Basis - when used in the context of derivatives and commodity trading, the commodity price differential between two locations, products or time periods.

Bcf - billion cubic feet.

CAIR - the EPA's Clean Air Interstate Rule.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

COLA - license application for a combined construction permit and operating license from the NRC for a nuclear plant.

CSAPR - Cross State Air Pollution Rule, the CSAPR implements Clean Air Act requirements concerning the transport of air pollution from power plants across state boundaries. The CSAPR replaces the 2005 Clean Air Interstate Rule (CAIR), which the U.S. Court of Appeals for the D.C. Circuit ordered the EPA to revise in 2008. The court allowed CAIR to remain in place temporarily while the EPA worked to finalize the replacement rule.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

Depreciation not normalized - the flow-through income tax impact related to the state regulatory treatment of depreciation-related timing differences.

Dodd-Frank Act - the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DOE - Department of Energy, a U.S. government agency.

DRIP - Dividend Reinvestment and Direct Stock Purchase Plan.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the Kentucky Public Service Commission may determine the reasonableness of demand-side management plans proposed by any utility under its jurisdiction. Proposed demand-side management mechanisms may seek full recovery of demand-side management programs and revenues lost by implementing those programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective demand-side management programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

E.ON AG - a German corporation and the parent of E.ON UK plc, the former parent of Central Networks.

Economic Stimulus Package - The American Recovery and Reinvestment Act of 2009, generally referred to as the federal economic stimulus package, which was signed into law in February 2009.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, effective January 1993, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which apply to coal combustion and by-products from the production of energy from coal.

EMF - electric and magnetic fields.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

Equity Units - refers collectively to the 2011 and 2010 Equity Units.

ESOP - Employee Stock Ownership Plan.

Euro - the basic monetary unit among participating members of the European Union.

E. W. Brown - a generating station in Kentucky with capacity of 1,631 MW. LG&E and KU are participants in a sale-leaseback transaction involving two combustion turbines at the station.

FERC - Federal Energy Regulatory Commission, the federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch - Fitch, Inc., a credit rating agency.

FTR - financial transmission rights, which are financial instruments established to manage price risk related to electricity transmission congestion. They entitle the holder to receive compensation or require the holder to remit payment for certain congestion-related transmission charges based on the level of congestion in the transmission grid.

Fundamental Change - as it relates to the terms of the 2011 and 2010 Equity Units, will be deemed to have occurred if any of the following occurs with respect to PPL, subject to certain exceptions: (i) a change of control; (ii) a consolidation with or merger into any other entity; (iii) common stock ceases to be listed or quoted; or (iv) a liquidation, dissolution or termination.

GAAP - generally accepted accounting principles in the U.S.

GBP - British pound sterling.

GHG - greenhouse gas(es).

GWh - gigawatt-hour, one million kilowatt-hours.

Health Care Reform - The Patient Protection and Affordable Care Act (HR 3590) and the Health Care and Education Reconciliation Act of 2010 (HR 4872), signed into law in March 2010.

Intermediate and peaking generation - includes the output provided by PPL's oil- and natural gas-fired units.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

LIBOR - London Interbank Offered Rate.

Long Island generation business - includes a 79.9 MW gas-fired plant in the Edgewood section of Brentwood, New York and a 79.9 MW oil-fired plant in Shoreham, New York and related tolling agreements. This business was sold in February 2010.

MACT - maximum achievable control technology.

MISO - Midwest Independent System Operator, an independent system operator and the regional transmission organization that provides open-access transmission service and monitors the high-voltage transmission system in all or parts of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin and Manitoba, Canada.

Montana Power - The Montana Power Company, a Montana-based company that sold its generating assets to PPL Montana in December 1999. Through a series of transactions consummated during the first quarter of 2002, Montana Power sold its electricity delivery business to NorthWestern.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

NDT - PPL Susquehanna's nuclear plant decommissioning trust.

NERC - North American Electric Reliability Corporation.

NorthWestern - NorthWestern Corporation, a Delaware corporation, and successor in interest to Montana Power's electricity delivery business, including Montana Power's rights and obligations under contracts with PPL Montana.

NPDES - National Pollutant Discharge Elimination System.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules.

NRC - Nuclear Regulatory Commission, the federal agency that regulates nuclear power facilities.

OCI - other comprehensive income or loss.

Ofgem - Office of Gas and Electricity Markets, the British agency that regulates transmission, distribution and wholesale sales of electricity and related matters.

Opacity - The degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity in power plant stack gas emissions.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek Station in Ohio and the Clifty Creek Station in Indiana, with combined nameplate capacities of 2,390 MW.

PADEP - the Pennsylvania Department of Environmental Protection, a state government agency.

PJM - PJM Interconnection, L.L.C., operator of the electric transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply to retail customers within its delivery territory who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

PUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

Purchase Contracts - refers collectively to the 2010 and 2011 Purchase Contracts.

PURTA - The Pennsylvania Public Utility Realty Tax Act.

RAV - regulatory asset value. This term is also commonly known as RAB or regulatory asset base.

RECs - renewable energy credits.

Regional Transmission Expansion Plan - PJM conducts a long-range Regional Transmission Expansion Planning process that identifies what changes and additions to the grid are needed to ensure future needs are met for both the reliability and the economic performance of the grid. Under PJM agreements, transmission owners are obligated to build transmission projects that are needed to maintain reliability standards and that are reviewed and approved by the PJM Board.

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

RMC - Risk Management Committee.

S&P - Standard & Poor's Ratings Services, a credit rating agency.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

SCR - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber - an air pollution control device that can remove particulates and/or gases (such as sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency whose primary mission is to protect investors and maintain the integrity of the securities markets.

Securities Act of 1933 - the Securities Act of 1933, 15 U.S. Code, Sections 77a-77aa, as amended.

SIFMA Index - the Securities Industry and Financial Markets Association Municipal Swap Index.

Smart meter - an electric meter that utilizes smart metering technology.

Smart metering technology - technology that can measure, among other things, time of electricity consumption to permit offering rate incentives for usage during lower cost or demand intervals. The use of this technology also strengthens network reliability.

SNCR - selective non-catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Superfund - federal environmental legislation that addresses remediation of contaminated sites; states also have similar statutes.

TC2 - Trimble County Unit 2, a coal-fired plant located in Kentucky with a capacity of 760 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 570 MW of the capacity.

Tolling agreement - agreement whereby the owner of an electric generating facility agrees to use that facility to convert fuel provided by a third-party into electricity for delivery back to the third-party.

TRA - Tennessee Regulatory Authority, the state agency that has jurisdiction over the regulation of rates and service of utilities in Tennessee.

VaR - value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VIE - variable interest entity.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

VWAP - as it relates to the 2011 and 2010 Equity Units issued by PPL, the per share volume-weighted-average price as displayed under the heading Bloomberg VWAP on Bloomberg page "PPL <EQUITY> AQR" (or its equivalent successor if such page is not available) in respect of the period from the scheduled open of trading on the relevant trading day until the scheduled close of trading on the relevant trading day (or if such volume-weighted-average price is unavailable, the market price of one share of PPL common stock on such trading day determined, using a volume-weighted-average method, by a nationally recognized independent investment banking firm retained for this purpose by PPL).

FORWARD-LOOKING INFORMATION

Statements contained in this Form 10-Q concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in "Item 1A. Risk Factors" in this Form 10-Q and each Registrant's 2010 Form 10-K (in the case of PPL, PPL Energy Supply and PPL Electric) or 2011 Registration Statements (in the case of LKE, LG&E and KU), and in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-Q report, the following are among the important factors that could cause actual results to differ materially from the forward-looking statements.

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the length of scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- potential expansion of alternative sources of electricity generation;
- potential laws or regulations to reduce emissions of "greenhouse" gases or the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against PPL and its subsidiaries;
- potential effects of threatened or actual terrorism, war or other hostilities, or natural disasters;
- the commitments and liabilities of PPL and its subsidiaries;
- market demand and prices for energy, capacity, transmission services, emission allowances, RECs and delivered fuel;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in the NDT funds and in defined benefit plans, and the potential cash funding requirements if fair value declines ;
- interest rates and their effect on pension, retiree medical, and nuclear decommissioning liabilities, and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- the profitability and liquidity, including access to capital markets and credit facilities, of PPL and its subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- changes in securities and credit ratings;
- foreign currency exchange rates;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional NRC requirements;
- political, regulatory or economic conditions in states, regions or countries where PPL or its subsidiaries conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation, including new tax, environmental, healthcare or pension-related legislation;
- state, federal and foreign regulatory developments;
- the outcome of any rate cases by PPL Electric at the PUC or the FERC; by LG&E at the KPSC or the FERC; by KU at the KPSC, VSCC, TRA or the FERC; or by WPD at Ofgem in the U.K.;
- the impact of any state, federal or foreign investigations applicable to PPL and its subsidiaries and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures; and

- business dispositions or acquisitions and our ability to successfully operate such acquired businesses and realize expected benefits from business acquisitions, including PPL's 2011 acquisition of WPD Midlands and 2010 acquisition of LKE.

Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents of PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for PPL, PPL Energy Supply, PPL Electric, LKE, LG&E or KU to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.
