Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)1
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

A statement of the reason the adjustment is required.

Response:

KU's rates must be adjusted to a level which will provide it with an opportunity to recover sufficient revenues to operate its electric business successfully, maintain its financial integrity, attract capital and compensate investors for the risks assumed with respect to its electric business. KU is under earning. Its plant dedicated to the service of customers has increased since its last rate case. Despite ongoing and significant efforts to manage costs and the implementation of operational efficiencies, its operation and maintenance costs have increased. KU's current rates do not provide sufficient revenue to pay the expenses of its operations and also provide a fair and reasonable return on its capital. The rates presently charged by KU are no longer compensatory and are unfair, unjust and unreasonable. KU now seeks an increase in rates in order to provide it an opportunity to recover sufficient revenues to operate in a safe and reliable manner, maintain its financial integrity, and properly compensate its shareholders for the risks assumed with respect to jurisdictional operations. Please refer to the testimonies of Victor A. Staffieri, Paul W. Thompson, Chris Hermann, Kent W. Blake, Valerie L. Scott, Shannon L. Charnas, John J. Spanos, Daniel K. Arbough, William E. Avera, Lonnie E. Bellar, and Robert M. Conroy.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)2
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

A statement that the utility's annual reports, including the annual report for the most recent calendar year, are on file with the Commission in accordance with 807 KAR 5:006, Section 3(1).

Response:

KU confirms that its annual reports, including the annual report for the most recent calendar year, are on file with the Commission in accordance with 807 KAR 5:006, Section 3(1).

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)3
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

If the utility is incorporated, a certified copy of the utility's articles of incorporation and all amendments thereto or out-of-state documents of similar import. If the utility's articles of incorporation and amendments have already been filed with the commission in a prior proceeding, the application may state this fact making reference to the style and case number of the prior proceeding.

Response:

A certified copy of KU's Articles of Incorporation is already on file with the Commission in Case No. 2010-00204, *In the Matter of: Joint Application of PPL Corporation, E.ON AG, E.ON U.S. Investments Corp., E.ON U.S. LLC, Louisville and Gas Electric Company and Kentucky Utilities Company for Approval of an Acquisition of Ownership and Control of Utilities*, filed on May 28, 2010, and are incorporated by reference herein pursuant to 807 KAR 5:001, Section 8(3).

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)4
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

If the utility is a limited partnership, a certified copy of the limited partnership agreement and all amendments thereto or out-of-state documents of similar import. If the utility's limited partnership agreement and amendments have already been filed with the commission in a prior proceeding, the application may state this fact making reference to the style and case number of the prior proceeding.

Response:

KU is not a limited partnership and, therefore, compliance with this filing requirement is not necessary.

Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)6
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

A certified copy of a certificate of assumed name as required by KRS 365.015 or a statement that such a certificate is not necessary.

Response:

The legal name of KU is Kentucky Utilities Company. It has never done business in Kentucky under an assumed name and has never filed a Certificate of Assumed Name as may be required by KRS 365.015. KU does business in Virginia under the name Old Dominion Power Company. Please see the attached certificate regarding the use by KU of the name Old Dominion Power Company in Virginia. KU has never done business in Tennessee under an assumed name.

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 5% late payment charge will be assessed on the current month’s charges.

TERMS AND CONDITIONS

Service will be furnished under Company’s Terms and Conditions applicable hereto.

Date of Issue: **June 29, 2012**
Date Effective: **August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204**
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Standard Rate **GS**

GENERAL SERVICE RATE

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

To general lighting and small power loads for secondary service.

Service under this schedule will be limited to customers whose 12-month-average monthly maximum loads do not exceed 50 kW. Existing customers with 12-month-average maximum monthly loads exceeding 50 kW who are receiving service under P.S.C. 13, Fourth Revision of Original Sheet No. 10 as of February 6, 2009, will continue to be served under this rate at their option. If Customer is taking service under this rate schedule and subsequently elects to take service under another rate schedule, Customer may not again take service under this rate schedule unless and until Customer meets the Availability requirements that would apply to a new customer. T

RATE

Basic Service Charge:	$20.00 per month for single-phase service	I
	$35.00 per month for three-phase service	I
Plus an Energy Charge of:	$ 0.08678 per kWh	I

ADJUSTMENT CLAUSES

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

Fuel Adjustment Clause	Sheet No. 85
Demand-Side Management Cost Recovery Mechanism	Sheet No. 86
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91

DETERMINATION OF MAXIMUM LOAD T

If Company determines based on Customer's usage history that Customer may be exceeding the maximum load permitted under Rate GS, Company may, at its discretion, equip Customer with a meter capable of measuring demand to determine Customer's continuing eligibility for Rate GS. If Customer is equipped with a demand-measuring meter, Customer's load will be measured and will be the average kW demand delivered to the customer during the 15-minute period of maximum use during the month.

MINIMUM CHARGE

The Basic Service Charge shall be the minimum charge.

DUE DATE OF BILL
Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE
If full payment is not received within three (3) calendar days from the due date of the bill, a 5% late payment charge will be assessed on the current month's charges.

TERMS AND CONDITIONS
Service will be furnished under Company's Terms and Conditions applicable hereto.

Standard Rate **AES**
ALL ELECTRIC SCHOOL

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rate is available for secondary and primary service to: T

(1) a complex of school buildings on a central campus,
(2) an individual school building, or
(3) an addition to an existing school building.

School buildings, as referred to herein, shall be defined as buildings used as classrooms, laboratories, gymnasiums, libraries, cafeterias, school related offices or for other bona fide school purposes by duly constituted school authorities of Kentucky. Served electrically by Kentucky Utilities Company, such energy requirements include, but are not limited to, lighting, heating, cooling, and water heating. School buildings not receiving every energy requirement electrically shall be separately metered from the above defined service and served under the applicable rate. Other fuels may be used as incidental to and for instructional laboratory and other miscellaneous purposes without affecting the availability of this rate.

At those locations where the school owns its distribution system and makes the service connections to the various buildings and/or load centers, Company shall be given the option of providing service by use of the existing Customer-owned distribution system, or of constructing its own facilities in accordance with the Company's Overhead Construction Standards. In any event, Company's investment in the facilities it provides may be limited to an amount not exceeding twice the estimated annual revenue from Customer's service. Should Company's investment in the facilities required to provide service to Customer exceed twice the revenue anticipated from the service to Customer and at Customer's option, Customer may make a contribution for the difference in the investment required in facilities necessary to provide service and twice the anticipated revenue, so as to receive service under this schedule. T T T

This Rate Schedule is not available to privately operated kindergartens or daycare centers and is restricted to those customers who were qualified for and being served on Rate AES as of July 1, 2011. Because this rate schedule is closed to new customers, if Customer is taking service under this rate schedule and subsequently elects to take service under another rate schedule, Customer may not again take service under this rate schedule.

RATE

Basic Service Charge:	$20.00 per meter per month for single-phase service	I
	$35.00 per meter per month for three-phase service	I
Plus an Energy Charge of:	$ 0.07060 per kWh	I

T

ADJUSTMENT CLAUSES T

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

POWER SERVICE

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
This rate schedule is available for secondary or primary service.

Service under this schedule will be limited to customers whose 12-month-average monthly minimum secondary loads exceed 50 kW and whose 12-month-average monthly maximum loads do not exceed 250 kW. Secondary or primary customers receiving service under PSC 13, Fourth Revision of Original Sheet No. 20, Large Power Service, or Fourth Revision of Original Sheet No. 30, Mine Power Service, as of February 6, 2009, with loads not meeting these criteria will continue to be served under this rate at their option. If Customer is taking service under this rate schedule and subsequently elects to take service under another rate schedule, Customer may not again take service under this rate schedule unless and until Customer meets the Availability requirements that would apply to a new customer. T T T T T T T

RATE

	Secondary	Primary	
Basic Service Charge per month:	$90.00	$125.00	I
Plus an Energy Charge per kWh of:	$ 0.03349	$ 0.03349	I
Plus a Demand Charge per kW of:			
Summer Rate:			
(Five Billing Periods of May through September)	$14.40	$ 14.75	I
Winter Rate:			
(All other months)	$12.10	$ 12.73	I

Where the monthly billing demand is the greater of:

a) the maximum measured load in the current billing period but not less than 50 kW for secondary service or 25 kW for primary service, or
b) a minimum of 50% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
c) a minimum of 60% of the contract capacity based on the maximum expected load on the system or on facilities specified by Customer.

ADJUSTMENT CLAUSES
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

POWER SERVICE

DETERMINATION OF MAXIMUM LOAD

The load will be measured and will be the average kW demand delivered to the customer during the 15-minute period of maximum use during the month.

Company reserves the right to place a kVA meter and base the billing demand on the measured kVA. The charge will be computed based on the measured kVA times 90 percent of the applicable kW charge.

In lieu of placing a kVA meter, Company may adjust the measured maximum load for billing purposes when the power factor is less than 90 percent in accordance with the following formula: (BASED ON POWER FACTOR MEASURED AT THE TIME OF MAXIMUM LOAD).

$$\text{Adjusted Maximum kW Load for Billing Purposes} = \frac{\text{Maximum kW Load Measured X 90\%}}{\text{Power Factor (in percent)}}$$

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 1% late payment charge will be assessed on the current month's charges.

TERM OF CONTRACT

Contracts under this rate shall be for an initial term of one (1) year, remaining in effect from month to month thereafter until terminated by notice of either party to the other.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto.

Date of Issue: June 29, 2012
Date Effective: August 1, 2010

DETERMINATION OF MAXIMUM LOAD

The load will be measured and will be the average kW demand delivered to the customer during the 15-minute period of maximum use during the appropriate rating period each month.

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

DETERMINATION OF MAXIMUM LOAD (continued)

Company reserves the right to place a kVA meter and base the billing demand on the measured kVA. The charge will be computed based on the measured kVA times 90 percent, at the applicable kW charge.

In lieu of placing a kVA meter, Company may adjust the measured maximum load for billing purposes when the power factor is less than 90 percent in accordance with the following formula: (BASED ON POWER FACTOR MEASURED AT THE TIME OF MAXIMUM LOAD)

$$\text{Adjusted Maximum kW Load for Billing Purposes} = \frac{\text{Maximum kW Load Measured x 90\%}}{\text{Power Factor (in percent)}}$$

RATING PERIODS

The rating periods applicable to the Maximum Load charges are established in Eastern Standard Time year round by season for weekdays and weekends, throughout Company's service area, and shall be as follows:

Summer peak months of May through September

	Base	Intermediate	Peak
Weekdays	All Hours	10 A.M. – 10 P.M.	1 P.M. – 7 P.M.
Weekends	All Hours		

All other months of October continuously through April

	Base	Intermediate	Peak
Weekdays	All Hours	6 A.M. – 10 P.M.	6 A.M. – 12 Noon
Weekends	All Hours		

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 1% late payment charge will be assessed on the current month's charges.

TERM OF CONTRACT

Service will be furnished under this schedule only under contract for a fixed term of not less than one (1) year, and for yearly periods thereafter until terminated by either party giving written notice to the other party 90 days prior to termination. Company, however, may require a longer fixed term of contract and termination notice because of conditions associated with the customer's requirements for service.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto.

Standard Rate **FLS**

Fluctuating Load Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Available for primary or transmission service to customers up to an aggregate of two hundred (200) MVA for all customers taking service under this schedule and under the Fluctuating Load Service Rate FLS schedule of Louisville Gas and Electric Company. This schedule is restricted to individual customers whose monthly demand is twenty (20) MVA or greater. A customer is defined as a fluctuating load if that customer's load either increases or decreases twenty (20) MVA or more per minute or seventy (70) MVA or more in ten (10) minutes when such increases or decreases exceed one (1) occurrence per hour during any hour of the billing month.

Subject to the above aggregate limit of two hundred (200) MVA, this schedule is mandatory for all customers whose load is defined as fluctuating and not served on another standard rate schedule as of July 1, 2004.

BASE RATE

DUE DATE OF BILL
Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE
If full payment is not received within three (3) calendar days from the due date of the bill, a 1% late payment charge will be assessed on the current month's charges. T T T

T

TERM OF CONTRACT

Unless terminated by mutual agreement, the initial term of contract for service shall be for a fixed term of five years with successive one year term renewal until canceled by either party giving at least one (1) year written notice to the other prior to the end of the initial term or the then current annual renewal period, as applicable.

PROTECTION OF SERVICE

Where Customer's use of service is intermittent, subject to violent or extraordinary fluctuations, or produces unacceptable levels of harmonic current, in each case as determined by Company in its reasonable discretion, Company reserves the right to require Customer to furnish, at Customer's own expense, suitable equipment (as approved by Company in its reasonable discretion) to meter and limit such intermittence, fluctuation, or harmonics to the extent reasonably requested by Company. Without limiting the foregoing, Company may require such equipment if, at any time, the megavars, harmonics, and other undesirable electrical characteristics produced by the Customer exceed the limits set forth in the IEEE standards for such characteristics. In addition, if the Customer's use of Company's service under this schedule causes such undesirable electrical characteristics in an amount exceeding those IEEE standards, such use shall be deemed to cause a dangerous condition which could subject any person to imminent harm or result in substantial damage to the property of Company or others, and Company shall therefore terminate service to the Customer in accordance with 807 KAR 5:006, Section 14(1)(b). Such a termination of service shall not be considered a cancellation of the service agreement or relieve Customer of any minimum billing or other T guarantees. Company shall be held harmless for any damages or economic loss resulting from such termination of service. If requested by Company, Customer shall provide all available information to Company that aids Company in enforcing its service standards. If Company at any time has a reasonable basis for believing that Customer's proposed or existing use of the service provided will not comply with the service standards for interference, fluctuations, or harmonics, Company may engage such experts and/or consultants as Company shall determine are appropriate to advise Company in ensuring that such interference, fluctuations, or harmonics are within acceptable standards. Should such experts and/or consultants determine Customer's use of service is unacceptable, Company's use of such experts and/or consultants will be at the Customer's expense.

SYSTEM CONTINGENCIES AND INDUSTRY SYSTEM PERFORMANCE CRITERIA

Company reserves the right to interrupt up to 95% of Customer's load to facilitate Company compliance with system contingencies and with industry performance criteria. Customer will permit Company to install electronic equipment and associated real-time metering to permit Company interruption of Customer's load. Such equipment will immediately notify Customer five (5) minutes before an electronically initiated interruption that will begin immediately thereafter and last no longer than ten (10) minutes nor shall the interruptions exceed twenty (20) per month. Such interruptions will not be accumulated nor credited against annual hours, if any, under the CURTAILABLE SERVICE RIDERS CSR10 AND CSR 30. Company's right to

Interrupt under this provision is restricted to responses to unplanned outage or de-rates of LG&E and KU Energy LLC System (LKE System) owned or purchased generation or when Automatic Reserve Sharing is invoked. LKE System, as used herein, shall consist of KU and LG&E. At customer's request, Company shall provide documentation of the need for interruption under this provision within sixty (60) days of the end of the applicable billing period. T

LIABILITY

In no event shall Company have any liability to the Customer or any other party affected by the electrical service to the Customer for any consequential, indirect, incidental, special, or punitive damages, and such limitation of liability shall apply regardless of claim or theory. In addition, to the extent that Company acts within its rights as set forth herein and/or any applicable law or regulation, Company shall have no liability of any kind to the Customer or any other party. In the event that the Customer's use of Company's service causes damage to Company's property or injuries to persons, the Customer shall be responsible for such damage or injury and shall indemnify, defend, and hold Company harmless from any and all suits, claims, losses, and expenses associated therewith.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto.

Standard Rate **LS** N

Lighting Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rate schedule is offered, under the conditions set out hereinafter, for lighting applications such as, but not limited to, the illumination of street, driveways, yards, lots, and other outdoor areas where secondary voltage of 120/240 is available.

Service will be provided under written contract, signed by customer prior to service commencing, when additional facilities are required.

Units marked with an asterisk (*) are not available for use in residential neighborhoods except by municipal authorities.

OVERHEAD SERVICE

Based on Customer's lighting choice, Company will furnish, own, install, and maintain the lighting unit. A basic overhead service includes lamp, fixture, photoelectric control, mast arm, and, if needed, up to 150 feet of conductor per fixture on existing wood poles (fixture only). Company will, upon request, furnish ornamental poles of Company's choosing, together with overhead wiring and all other equipment mentioned for basic overhead service.

OVERHEAD SERVICE (continued)

Should Customer request underground service, Customer shall make a non-refundable cash contribution prior to the time of installation, or, at the option of company, make a work contribution to Company for the difference in the installed cost of the system requested and the cost of the overhead lighting system.

Where the location of existing poles is not suitable or where there are no existing poles for mounting of lights, and Customer requests service under these conditions, Company may furnish the requested facilities at an additional charge to be determined under the Excess Facilities Rider.

UNDERGROUND SERVICE

Based on Customer's lighting choice, Company will furnish, own, install, and maintain poles, fixtures, and any necessary circuitry up to 200 feet. All poles and fixtures furnished by Company will be standard stocked materials. Company may decline to install equipment and provide service thereto in locations deemed by Company as unsuitable for underground installation.

School Tax	Sheet No. 91

TERM OF CONTRACT

For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require Customer to pay to Company a lump sum equal to the monthly charge times the number of months remaining on the original five (5) year term.

TERMS AND CONDITIONS

1. Service shall be furnished under Company's Terms and Conditions, except as set out herein.

2. All service and maintenance will be performed only during regular scheduled working hours of Company. Customer will be responsible for reporting outages and other operating faults. Company shall initiate service corrections within two (2) business days after such notification by Customer.

3. Customer shall be responsible for the cost of fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts. Company may decline to provide or continue service in locations where, in Company's judgment, such facilities will be subject to unusual hazards or risk of damage.

4. Company shall have the right to make other attachments and to further extend the conductors, when necessary, for the further extension of its electric service.

5. If any permit is required from any municipal or other governmental authority with respect to installation and use of any of the lighting units provided hereunder, Company will seek such permits, but the ultimate responsibility belongs with Customer

6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities that were in service less than twenty years, and requests installation of replacement lighting within 5 years of removal, Customer agrees to pay to Company its cost of labor to install the replacement facilities.

7. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.

Standard Rate **RLS** N

Restricted Lighting Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rate schedule is restricted to those lighting fixtures/poles in service as of August 1, 2012, except where a spot replacement maintains the continuity of multiple fixtures/poles comprising a neighborhood lighting system. Spot placement of restricted fixtures/poles is contingent on the restricted fixtures/poles being available from manufacturers. Spot replacement of restricted units will be made under the terms and conditions provided for under non-restricted Lighting Service Rate LS.

In the event restricted fixtures/poles fail and replacements are unavailable, Customer will be given the choice of having Company remove the failed fixture/pole or replacing the failed fixture/pole with other available fixture/pole.

OVERHEAD SERVICE

Based on Customer's lighting choice, Company has furnished, installed, and maintained the lighting unit complete with lamp, fixture, photoelectric control, mast arm, and, if needed, up to 150 feet of conductor per fixture on existing wood poles (fixture only). Company has, upon request, furnished poles, of Company's choosing, together with overhead wiring and all other equipment mentioned for overhead service.

OVERHEAD SERVICE (continued)

Where the location of existing poles was not suitable, or where there were no existing poles for mounting of lights, and Customer requested service under these conditions, Company may have furnished the requested facilities at an additional charge determined under the Excess Facilities Rider.

UNDERGROUND SERVICE

Based on Customer's lighting choice, Company has furnished, installed, and maintained the lighting unit complete with lamp, fixture, photoelectric control, mast arm, and, if needed, up to 200 feet of conductor per fixture on appropriate poles.

DUE DATE OF BILL

Payment is due within twelve (12) calendar days from the date of the bill. Billing for this service to be made a part of the bill rendered for other electric service.

DETERMINATION OF ENERGY CONSUMPTION

The kilowatt-hours will be determined as set forth on Sheet No. 67 of this Tariff.

ADJUSTMENT CLAUSES

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

Fuel Adjustment Clause	Sheet No. 85
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91

TERM OF CONTRACT

For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require Customer to pay to Company a lump sum equal to the monthly charge times the number of months remaining on the original five (5) year term.

TERMS AND CONDITIONS

1. Service shall be furnished under Company's Terms and Conditions, except as set out herein.

2. All service and maintenance will be performed only during regular scheduled working hours of Company. Customer will be responsible for reporting outages and other operating faults, and the Company shall initiate service corrections within two (2) business days after such notification by Customer.

3. Customer shall be responsible for the cost of fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts. Company may decline to provide or continue service in locations where, in Company's judgment, such facilities will be subject to unusual hazards or risk of damage.

4. Company shall have the right to make other attachments and to further extend the conductors, when necessary, for the further extension of its electric service.

5. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.

Standard Rate **LE**
Lighting Energy Service

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Available to municipalities, county governments, divisions or agencies of the state or Federal governments, civic associations, and other public or quasi-public agencies for service to public street and highway lighting systems, where the municipality or other agency owns and maintains all street lighting equipment and other facilities on its side of the point of delivery of the energy supplied hereunder.

RATE

$0.05958 per kWh I

ADJUSTMENT CLAUSES
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

Fuel Adjustment Clause	Sheet No. 85
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91

DUE DATE OF BILL
Customer's payment will be due within twelve (12) calendar days from the date of the bill.

CONDITIONS OF DELIVERY
a) Service hereunder will be metered except when, by mutual agreement of Company and customer, an unmetered installation will be more satisfactory from the standpoint of both parties. In the case of unmetered service, billing will be based on a calculated consumption taking into account the types of equipment served.

b) The location of the point of delivery of the energy supplied hereunder and the voltage at which such delivery is effected shall be mutually agreed upon by Company and the customer in consideration of the type and size of customer's street lighting system and the voltage which Company has available for delivery.

TERMS AND CONDITIONS
Service will be furnished under Company's Terms and Conditions applicable hereto.

Standard Rate **TE**
Traffic Energy Service

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Available to municipalities, county governments, divisions of the state or Federal governments or any other governmental agency for service on a 24-hour all-day every-day basis, where the governmental agency owns and maintains all equipment on its side of the point of delivery of the energy supplied hereunder. In the application of this rate each point of delivery will be considered as a separate customer.

This service is limited to traffic control devices including, signals, cameras, or other traffic lights and electronic communication devices.

RATE

Basic Service Charge:	$3.25 per delivery per month	I
Plus an Energy Charge of:	$0.07614 per kWh	I

ADJUSTMENT CLAUSES
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

Fuel Adjustment Clause	Sheet No. 85
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91

MINIMUM CHARGE
The Basic Service Charge shall be the minimum charge.

DUE DATE OF BILL
Customer's payment will be due within twelve (12) calendar days from the date of the bill.

CONDITIONS OF SERVICE
1. Service hereunder will be metered except when, by mutual agreement of Company and customer, an unmetered installation will be more satisfactory from the standpoint of both parties. In the case of unmetered service, billing will be based on a calculated consumption, taking into account the size and characteristics of the load, or on meter readings obtained from a similar installation.

2. The location of each point of delivery of energy supplied hereunder shall be mutually agreed upon by Company and the customer. Where attachment of Customer’s devices is made to Company facilities, Customer must have an attachment agreement with Company.

3. Loads not operated on an all-day every-day basis will be served under the appropriate rate.

TERMS AND CONDITIONS
Service will be furnished under Company's Terms and Conditions applicable hereto.

Date of Issue: **June 29, 2012**
Date Effective: **August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204**
Issued By: **Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky**

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Where Company is willing to permit the attachments of cables, wires and appliances to its poles where, in Company's judgment, such attachments will not interfere with its electric service requirements and other prior licensees using Company's poles. Attachments will be permitted upon execution by both parties of a Cable Television Attachment Agreement supplied by Company.

ATTACHMENT CHARGE
$10.01 per year for each attachment to pole. I

BILLING
Attachment Charges to be billed semi-annually based on the number of pole attachments being maintained on December 1 and June 1. Provided, however, that should the Agreement be terminated in accordance with the terms of the said Agreement, the Attachment Charges will be prorated to the date of such termination. Payment will be due within thirty (30) days from date of bill. Non-payment of bills shall constitute a default of the Agreement.

TERM OF AGREEMENT
The Cable Television Attachment Agreement shall become effective upon execution by both parties and shall continue in effect for not less than one (1) year, subject to provisions contained in the agreement. At any time thereafter, the Customer may terminate the agreement by giving not less than six (6) months' prior written notice. Upon termination of the agreement, Customer shall immediately remove its cables, wire, appliances and all other attachments from all poles of Company.

TERMS AND CONDITIONS OF POLE ATTACHMENTS
Pole attachments shall be permitted in accordance with this Schedule. Company's Terms and Conditions shall be applicable, to the extent they are not in conflict with or inconsistent with, the special provisions of this Schedule.

Upon written Agreement, Company is willing to permit, to the extent it may lawfully do so, the attachment of cables, wires and appliances to its poles by a cable television system operator, hereinafter "Customer," where, in its judgment, such use will not interfere with its electric service requirements and other prior licensees using Company's poles, including consideration of economy and safety, in accordance with this schedule approved by the Public Service Commission. The Terms and Conditions applicable to such service are as follows:

Standard Rate **CTAC**
Cable Television Attachment Charges

1. **ATTACHMENT APPLICATIONS AND PERMITS**
   Before making attachment to any pole or poles of Company, Customer shall make application and receive a permit therefore on a form to be supplied by Company. The information submitted by Customer with the application for a permit shall consist of drawings and associated descriptive matter which shall be adequate in all detail to enable Company to thoroughly check the proposed installation of Customer. Before the attachments are made, the permit must be approved by Company. Customer shall not build separate pole lines along existing facilities of Company and shall not place intermediate poles in spans of Company, unless authorized by Company in writing. Company shall have the right to remove unauthorized Customer attachments at Customer's expense after notice to Customer. In the event a pole attachment count does not correspond to the recorded attachment count, Customer will pay a back attachment fee for any excess attachments. The back attachment fee will be double the rate otherwise in effect over the time since last pole attachment count and shall be payable on demand.

2. **PERMITTED ATTACHMENTS**
   Customer shall be permitted to make only one bolt attachment for one messenger on tangent poles and two bolt attachments for two messengers on corner poles. A maximum of five individual coaxial cables may be supported by any single messenger if these cables are all attached to the messenger by suitable lashings or bindings, and so that the maximum overall dimension of the resulting cable bundle does not exceed two (2) inches. Any messenger attachment other than to tangent poles must be properly braced with guys and anchors provided by Customer to the satisfaction of Company. The use of existing Company anchors for this purpose must be specifically authorized in writing, subject to additional charge, and will not ordinarily be permitted. The use of crossarms or brackets shall not be permitted. In addition to messenger attachments, Customer will be permitted one Customer amplifier installation per pole and four service drops to be tapped on cable messenger strand and not on pole. Customer power supply installations shall be permitted, but only at pole locations specifically approved by Company. Any or all of the above are considered one attachment for billing purposes. Any additional attachments desired by Customer will be considered on an individual basis by Company, and as a separate attachment application.

3. **CONSTRUCTION AND MAINTENANCE REQUIREMENTS AND SPECIFICATIONS**
   Customer's cables, wires and appliances, in each and every location, shall be erected and maintained in accordance with the requirements and specifications of the National Electrical Safety Code, current edition, and Company's construction practices, or any amendments or revisions of said Code and in compliance with any rules or orders now in effect or that hereinafter may be issued by the Public Service Commission of Kentucky, or other authority having jurisdiction. In the event any of Customer's construction does not meet any of the foregoing requirements, Customer will correct same in fifteen work days after written notification. Company may make corrections and bill Customer for total costs incurred, if not corrected by Customer.

4. **MAINTENANCE OF ATTACHMENTS**
   Customer shall, at its own expense, make and maintain said attachments in safe condition and in thorough repair, and in a manner suitable to Company and so as not to conflict with the use of said poles by Company, or by other parties, firms, corporations, governmental units, etc., using said poles, pursuant to any license or permit by Company, or interfere with the working

use of facilities thereon or which may, from time to time, be placed thereon. Customer shall promptly at any time, at its own expense, upon written notice from Company, relocate, replace or renew its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Company but in no case longer than 30 day after date of written request. In cases of emergency, however, Company may arrange to relocate, replace or renew the facilities placed on said poles by Customer, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Company, or its other licensees, and Customer shall, on demand, reimburse Company for the expense thereby incurred.

5. COSTS ASSOCIATED WITH ATTACHMENTS

In the event that any pole or poles of Company to which Customer desires to make attachments are inadequate to support the additional facilities in accordance with the aforesaid specifications, Company will indicate on the application and permit form the changes necessary to provide adequate poles and the estimated cost thereof to Customer. If Customer still desires to make the attachments, Company will replace such inadequate poles with suitable poles and Customer will, on demand, reimburse Company for the total cost of pole replacement necessary to accommodate Customer attachments, less the salvage value of any pole that is removed, and the expense of transferring Company's facilities from the old to the new poles. Where Customer desired attachments can be accommodated on present poles of Company by rearranging Company's facilities thereon, Customer will compensate Company for the full expense incurred in completing such rearrangements, within ten days after receipt of Company's invoice for such expense. Customer will also, on demand, reimburse the owner or owners of other facilities attached to said poles for any expense incurred by it or them in transferring or rearranging said facilities. In the event Customer makes an unauthorized attachment which necessitates rearrangements when discovered, then Customer shall pay on demand twice the expense incurred in completing such rearrangements.

6. MAINTENANCE AND OPERATION OF COMPANY'S FACILITIES

Company reserves to itself, its successors and assigns, the right to maintain its poles and to operate its facilities thereon in such manner as will, in its own judgment, best enable it to fulfill its electric service requirements, but in accordance with the specifications herein before referred to. Company shall not be liable to Customer for any interruption to service to Customer's subscribers or for interference with the operation of the cables, wires and appliances of Customer arising in any manner out of the use of Company's poles hereunder.

7. FRANCHISES AND EASEMENTS

Customer shall submit to Company evidence, satisfactory to Company, of Customer's authority to erect and maintain Customer's facilities within public streets, highways and other thoroughfares within the above described territory which is to be served and shall secure any necessary consent by way of franchise or other satisfactory license, permit or authority, acceptable to Company from State, County or municipal authorities or from the owners of property where necessary to construct and maintain facilities at the locations of poles of Company which it desires to use. Customer must secure its own easement rights on private property. Customer must, regardless of authority received or franchises given by governmental agencies, conform to all requirements of Terms and Conditions with regard to Company's property. Company's approval of attachments shall not constitute any representation or warranty by Company to Customer regarding Customer's right to occupy or use any public or private right-of-way.

8. INSPECTION OF FACILITIES
Company reserves the right to inspect each new installation of Customer on its poles and in the vicinity of its lines or appliances and to make periodic inspections, every two (2) years or more often as plant conditions warrant of the entire plant of Customer. Such inspections, made or not, shall not operate to relieve Customer of any responsibility, obligation or liability.

9. PRECAUTIONS TO AVOID FACILITY DAMAGE
Customer shall exercise precautions to avoid damage to facilities of Company and of others supported on said poles; and shall assume all responsibility of any and all loss for such damage caused by it. Customer shall make an immediate report to Company of the occurrence of any damage and shall reimburse Company for the expense incurred in making repairs.

10. INDEMNITIES AND INSURANCE
Customer shall defend, indemnify and save harmless Company from any and all damage, loss, claim, demand, suit, liability, penalty or forfeiture of every kind and nature-including but not limited to costs and expenses of defending against the same and payment of any settlement or judgment therefore, by reason of (a) injuries or deaths to persons, (b) damages to or destructions of properties, (c) pollutions, contaminations of or other adverse effects on the environment or (d) violations of governmental laws, regulations or orders whether suffered directly by Company it-self or indirectly by reason of claims, demands or suits against it by third parties, resulting or alleged to have resulted from acts or omissions of Customer, its employees, agents, or other representatives or from their presence on the premises of Company, either solely or in concurrence with any alleged joint negligence of Company.

Customer shall provide and maintain in an Insurance Company(s) authorized to do business in the Commonwealth of Kentucky, the following:

(a) Insurance protection for Customer employees to the extent required by the Workmen's Compensation Law of Kentucky and, where same is not applicable or if necessary to provide a defense for Company, Employer's Liability Protection (covering both Company and Customer) for Customer employees for no less than $100,000.00 per employee.

(b) Public Liability and Business Liability insurance with a minimum limit of $500,000.00 for each person injured and with a minimum total limit of $1,000,000.00 for each accident and a minimum limit of $100,000.00 for property damage for each accident.

(c) Public Liability and Property Damage insurance on all automotive equipment used by Customer on job to the extent of the amounts for Public Liability and Property Damage insurance set out in the preceding Paragraph (b).

(d) In the event that work covered by the Agreement includes work to be done in places or areas where the Maritime Laws are in effect, then and in that event additional insurance protection to the limits in Paragraph (b) above for liability arising out of said Maritime Laws.

(e) In the event the work covers fixed wing aircraft, rotor lift, lighter than air aircraft or any other form of aircraft, appropriate insurance will be carried affording protection to the limits prescribed in the preceding Paragraph (b).

(f) In the event the work covers blasting, explosives or operations underground, in trenches or other excavations, appropriate insurance will be carried affording protection to the limits prescribed in the preceding Paragraph (b), together with products hazard and completed operations insurance where applicable, affording protection to the limits above prescribed. Customer's liability insurance shall be written to eliminate XCU exclusions. Said insurance is to be kept in force for not less than one year after cancellation of the Agreement.

Before starting work, Customer shall furnish to Company a certificate(s) of insurance satisfactory to Company, evidencing the existence of the insurance required by the above provisions, and this insurance may not be canceled for any cause without sixty (60) days advance written notice being first given Company; provided, that failure of Company to require Customer to furnish any such certificate(s) shall not constitute a waiver by Company of Customer's obligation to maintain insurance as provided herein.

Each policy required hereunder shall contain a contractual endorsement written as follows: "The insurance provided herein shall also be for the benefit of Kentucky Utilities Company so as to guarantee, within the policy limits, the performance by the named insured of the indemnity provisions of the Cable Television Attachment Agreement between the named insured and Kentucky Utilities Company. This insurance may not be canceled for any cause without sixty (60) days advance written notice being first given to Kentucky Utilities Company."

11. ATTACHMENT REMOVAL AND NOTICES

Customer may at any time voluntarily remove its attachments from any pole or poles of Company, but shall immediately give Company written notice of such removal on a form to be supplied by Company. No refund of any attachment charge will be due on account of such voluntary removal.

12. FORBIDDEN USE OF POLES

Prior to Customer's initial attachment, Company reserves the right due to engineering design requirements to refuse use by Customer of certain or specific poles or structures (such as normal transmission routes). Upon notice from Company to Customer that the use of any pole or poles is forbidden by municipal or other public authorities or by property owners, the permit covering the use of such pole or poles shall immediately terminate and Customer shall remove its facilities from the affected pole or poles at once. No refund of any attachment charge will be due on account of any removal resulting from such forbidden use.

13. NON-COMPLIANCE

If Customer shall fail to comply with any of the provisions of these Rules and Regulations or Terms and Conditions or default in any of its obligations under these Rules and Regulations or Terms and Conditions and shall fail within thirty (30) days after written notice from Company to correct such default or non-compliance, Company may, at its option, forthwith terminate the Agreement or the permit covering the poles as to which such default or non-compliance shall have occurred, by giving written notice to Customer of said termination. No refund of any rental will be due on account of such termination.

14. **WAIVERS**
Failure to enforce or insist upon compliance with any of these Rules and Regulations or Terms and Conditions or the Agreement shall not constitute a general waiver or relinquishment thereof, but the same shall be and remain at all times in full force and effect.

15. **USE OF COMPANY'S FACILITIES BY OTHERS**
Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by Company, by contract or otherwise, to others, not parties to the Agreement, to use any poles covered by the Agreement; and Company shall have the right to continue and to extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements.

16. **ASSIGNMENT**
Customer shall not assign, transfer or sublet the privileges hereby granted and/or provided in the Agreement without the prior consent in writing of Company.

17. **PROPERTY RIGHTS**
No use, however extended, of Company poles under the Agreement shall create or vest in Customer any ownership or property rights in said poles, but Customer shall be and remain a customer only. Nothing herein contained shall be construed to compel Company to maintain any of said poles for a period longer than demanded by its electric service requirements.

18. **FAILURE TO PROCEED**
Customer agrees to proceed as expeditiously as practical with the work of providing the television cable service to the area described in the Agreement. Within ninety (90) days from the date of the Agreement, Customer shall make progress reasonably satisfactory to Company in the installation of its facilities or shall demonstrate, to the reasonable satisfaction of Company, its ability to proceed expeditiously.

19. **TERMINATION**
Upon termination of the Agreement in accordance with any of its terms, Customer shall immediately remove its cables, wires and appliances from all poles of Company. If not removed, Company shall have the right to remove them at the cost and expense of Customer.

20. **SECURITY**
Customer shall furnish bond for the purposes hereinafter specified as follows:

(a) during the period of Customer's initial installation of its facilities and at the time of any expansion involving more than seventy-five (75) poles, a bond in the amount of $2,000 for each 100 poles (or fraction thereof) to which Customer intends to attach its facilities;
(b) following the satisfactory completion of Customer's initial installation, the amount of bond shall be reduced to $1,000 for each 100 poles (or fraction thereof);
(c) after Customer has been a customer of Company pursuant to the Agreement and is not in default thereunder for a period of three years, the bond shall be reduced to $500 for each 100 poles (or fraction thereof).

(d) such bond shall contain the provision that it shall not be terminated prior to six (6) months' after receipt by Company of written notice of the desire of the bonding or insurance company to terminate such bond. This six (6) months' termination clause may be waived by Company if an acceptable replacement bond is received before the six (6) months has ended. Upon receipt of such termination notice, Company shall request Customer to immediately remove its cables, wires and all other facilities from all poles of Company. If Customer should fail to complete the removal of all of its facilities from the poles of Company within thirty (30) days after receipt of such request from Company, then Company shall have the right to remove them at the cost and expense of Customer and without being liable for any damage to Customer's wires, cables, fixtures or appurtenances. Such bond shall guarantee the payment of any sums which may become due to Company for rentals, inspections or work performed for the benefit of Customer under the Agreement, including the removal of attachments upon termination of the Agreement by any of its provisions.

(e) Company in its sole discretion may agree in writing to accept other collateral (such as a cash deposit or an irrevocable bank letter of credit) in substitution for the bond required by, and subject to the other requirements of, this Section 20. T

21. NOTICES

Any notice, or request, required by these Rules and Regulations or Terms and Conditions or the Agreement shall be deemed properly given if mailed, postage pre-paid, to Company, in the case of Company; or in the case of the Customer, to its representative designated in the Agreement. The designation of the person to be notified, and/or his address may be changed by Company or Customer at any time, or from time to time, by similar notice.

22. ADJUSTMENTS

Nothing contained herein or in any Agreement shall be construed as affecting in any way the right of Company, and Company shall at all times have the right, to unilaterally file with the Public Service Commission a change in rental charges for attachments to poles, other charges as provided for, any rule, regulation, condition or any other change required. Such change or changes to become effective upon approval of the Commission or applicable regulations or statutes, and shall constitute an amendment to the Agreement.

23. BINDING EFFECT

Subject to the provisions of Section 16 hereof, the Agreement and these Rules and Regulations or Terms and Conditions shall extend to and bind the successors and assigns of the parties hereto. T

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Special Charges

The following charges will be applied uniformly throughout Company's service territory. Each charge, as approved by the Public Service Commission, reflects only that revenue required to cover associated expenses.

RETURNED PAYMENT CHARGE

In those instances where a customer renders payment to Company which is not honored upon deposit by Company, the customer will be charged $10.00 to cover the additional processing costs.

METER TEST CHARGE

Where the test of a meter is performed during normal working hours upon the written request of a customer, pursuant to 807 KAR 5:006, Section 18, and the results show the meter was not more than two percent fast, the customer will be charged $75.00 to cover the test and transportation costs. I

DISCONNECT/RECONNECT SERVICE CHARGE

A charge of $28.00 will be made to cover disconnection and reconnection of electric service when discontinued for non-payment of bills or for violation of Company's Terms and Conditions, such charge to be made before reconnection is effected. No charge will be made for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 15, Winter Hardship Reconnection. I

Residential and general service customers may request and be granted temporary suspension of electric service. In the event of such temporary suspension, Company will make a charge of $28.00 to cover disconnection and reconnection of electric service, such charge to be made before reconnection is effected. I

METER PULSE CHARGE

Where a customer desires and Company is willing to provide data meter pulses, a charge of $15.00 per month per installed set of pulse-generating equipment will be made to those data pulses. Time pulses will not be supplied. I

METER DATA PROCESSING CHARGE

A charge of $2.75 per report will be made to cover the cost of processing, generating, and providing recorder metered customer with profile reports. If a customer is not recorder metered and desires to have such metering installed, the customer will pay all costs associated with installing the recorder meter.

Standard Rate Rider **CSR10**
Curtailable Service Rider 10

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This rider shall be made available to customers served under applicable power schedules who contract for not less than 1,000 kilowatts individually. The aggregate service under P.S.C. No. 16, CSR10 and CSR30 for Kentucky Utilities Company is limited to 100 megawatts in addition to the contracted curtailable load under P.S.C. No. 14, CSR1 and CSR3 for Kentucky Utilities Company as of August 1, 2010. T

CONTRACT OPTION

Customer may, at Customer's option, contract with Company to curtail service upon notification by Company. Requests for curtailment shall not exceed three hundred and seventy-five (375) hours per year nor shall any single request for curtailment be for less than thirty (30) minutes or for more than fourteen (14) hours per calendar day, with no more than two (2) requests for curtailment per calendar day within these parameters. A curtailment is a continuous event with a start and stop time that may have both physical curtailments and buy-through options within the interval between the start and stop time. Company may request or cancel a curtailment at any time during any hour of the year, but shall give no less than ten (10) minutes notice when either requesting or canceling a curtailment.

Company may request at its sole discretion up to 100 hours of physical curtailment per year without a buy-through option. Company may also request at its sole discretion up to 275 hours of curtailment per year with a buy-through option, whereby Customer may, at its option, choose either to curtail service in accordance with this Rider or to continue to purchase its curtailable requirements by paying the Automatic Buy-Through Price, as set forth below, for all kilowatt hours of curtailable requirements. T

Curtailable load and compliance with a request for curtailment shall be measured in one of the following ways:

Option A -- Customer may contract for a given amount of firm demand, as measured on the demand basis of the standard rate on which Customer is billed. During a request for physical curtailment, Customer shall reduce its demand to the firm demand designated in the contract. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price, as applicable, shall apply to the difference in the actual kWh during any requested curtailment and the contracted firm demand multiplied by the time period (hours) of curtailment [Actual kWh – (firm kVA x hours curtailed)]. The measured demand in excess of the firm load during each requested physical curtailment in the billing period shall be the measure of non-compliance, as measured on the demand basis of the standard rate on which Customer is billed. T T T T

Option B -- Customer may contract for a given amount of curtailable load by which Customer shall agree to reduce its demand at any time by such Designated Curtailable Load. During a request for physical curtailment, Customer shall reduce its demand to a level equal to the maximum demand (as measured on the demand basis of the standard rate on which Customer is billed) immediately prior to the curtailment less the designated curtailable load. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price shall apply to the difference in the actual kWh during any requested curtailment and the product of Customer's maximum load immediately preceding curtailment less Customer's designated curtailable load designated in the contract multiplied by the time period (hours) of a requested curtailment {Actual kWh – [(Max kVA preceding – Designated Curtailable kVA) x hours of requested curtailment]}. Non-compliance for each requested physical curtailment shall be the measured positive value determined by subtracting (i) Customer's designated curtailable load from (ii) Customer's maximum demand immediately preceding the curtailment and then subtracting such difference from (iii) the Customer's maximum demand during such curtailment. T T T

RATE

Customer will receive the following credits for curtailable service during the month:

Transmission Voltage Service	$ 2.75 per kVA of Curtailable Billing Demand	R/T
Primary Voltage Service	$ 2.80 per kVA of Curtailable Billing Demand	R/T
Non-Compliance Charge of:	$16.00 per kVA	T

Failure of Customer to curtail when requested to do so may result in termination of service under this rider. Customer will be charged for the portion of each requested curtailment not met at the applicable standard charges. The Company and Customer may arrange to have installed, at Customer's expense, the necessary telecommunication and control equipment to allow the Company to control Customers' curtailable load. Non-compliance charges will be waived if failure to curtail is a result of failure of Company's equipment; however, non-compliance charges will not be waived if failure to curtail is a result of Customer's equipment. If arrangements are made to have telecommunication and control equipment installed, then backup arrangements must also be established in the event either Company's or Customer's equipment fails.

CURTAILABLE BILLING DEMAND

For a Customer electing Option A, Curtailable Billing Demand shall be the difference between (a) the Customer's measured maximum kilowatt demand during the billing period for any billing interval during the following time periods: (i) for the summer peak months of May through September, from 10 A.M. to 10 P.M,(EST) and (ii) for the months October continuously through April, from 6 A.M. to 10 P.M, (EST) and (b) the firm contract demand. T

For a Customer electing Option B, Curtailable Billing Demand shall be the customer Designated Curtailable Load, as described above.

AUTOMATIC BUY-THROUGH PRICE

The Automatic Buy-Through Price per kWh shall be determined daily in accordance with the following formula:

Automatic Buy-Through Price = NGP x .012000 MMBtu/kWh

Where: NGP represents the mid-point price for natural gas ($/MMBtu) posted for the day in *Platts Gas Daily* for Dominion—South Point and will be used for the electrical day from 12 midnight to midnight. Also the posted price for Monday or the day after a holiday is the posted price for Saturday, Sunday and the holiday. T

TERM OF CONTRACT

The minimum original contract period shall be one (1) year and thereafter until terminated by giving at least six (6) months previous written notice, but Company may require that contract be executed for a longer initial term when deemed reasonably necessary by the size of the load or other conditions.

TERMS AND CONDITIONS

When the Company requests curtailment, upon request by the Customer, the Company shall provide a good-faith, non-binding estimate of the duration of requested curtailment. In addition, upon request by the Company, the Customer shall provide to the Company a good-faith, non-binding short-term operational schedule for their facility. Upon request by the Customer, the Company will provide, once per month, to the Customer an explanation of the reasons for any request for curtailment.

Except as specified above, all other provisions of the power rate to which this schedule is a rider shall apply.

Kentucky Utilities Company

Standard Rate Rider **CSR30**

Curtailable Service Rider 30

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This rider shall be made available to customers served under applicable power schedules who contract for not less than 1,000 kilowatts individually. The aggregate service under P.S.C. No. 16 , CSR10 and CSR30 for Kentucky Utilities Company is limited to 100 megawatts in addition to the contracted curtailable load under P.S.C. No. 14, CSR1 and CSR3 for Kentucky Utilities Company as of August 1, 2010. T

CONTRACT OPTION

Customer may, at Customer's option, contract with Company to curtail service upon notification by Company. Requests for curtailment shall not exceed three hundred and fifty (350) hours per year nor shall any single request for curtailment be for less than thirty (30) minutes or for more than fourteen (14) hours per calendar day, with no more than two (2) requests for curtailment per calendar day within these parameters. A curtailment is a continuous event with a start and stop time that may have both physical curtailments and buy-through options within the interval between the start and stop time. Company may request or cancel a curtailment at any time during any hour of the year, but shall give no less than thirty (30) minutes notice when either requesting or canceling a curtailment.

Company may request at its sole discretion up to 100 hours of physical curtailment per year without a buy-through option. Company may also request at its sole discretion up to 250 hours of curtailment per year with a buy-through option, whereby Customer may, at its option, choose either to curtail service in accordance with this Rider or to continue to purchase its curtailable requirements by paying the Automatic Buy-Through Price, as set forth below, for all kilowatt hours of curtailable requirements. T

Curtailable load and compliance with a request for curtailment shall be measured in one of the following ways:

Option A -- Customer may contract for a given amount of firm demand, as measured on the demand basis of the standard rate on which Customer is billed. During a request for physical curtailment, Customer shall reduce its demand to the firm demand designated in the contract. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price, as applicable, shall apply to the difference in the actual kWh during any requested curtailment and the contracted firm demand multiplied by the time period (hours) of curtailment [Actual kWh – (firm kVA x hours curtailed)]. The measured demand in excess of the firm load during each requested physical curtailment in the billing period shall be the measure of non-compliance, as measured on the demand basis of the standard rate on which Customer is billed. T T T T

Option B -- Customer may contract for a given amount of curtailable load by which Customer shall agree to reduce its demand at any time by such Designated Curtailable Load. During a request for physical curtailment, Customer shall reduce its demand to a level equal to the maximum demand (as measured on the demand basis of the standard rate on which Customer is billed) immediately prior to the curtailment less the designated curtailable load. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price shall apply to the difference in the actual kWh during any requested curtailment and the product of Customer's maximum load immediately preceding curtailment less Customer's designated curtailable load designated in the contract multiplied by the time period (hours) of a requested curtailment {Actual kWh – [(Max kVA preceding – Designated Curtailable kVA) x hours of requested curtailment]}. Non-compliance for each requested physical curtailment shall be the measured positive value determined by subtracting (i) Customer's designated curtailable load from (ii) Customer's maximum demand immediately preceding the curtailment and then subtracting such difference from (iii) the Customer's maximum demand during such curtailment. T T T

RATE

Customer will receive the following credits for curtailable service during the month:

Transmission Voltage Service	\$ 2.25 per kVA of Curtailable Billing Demand	R/T
Primary Voltage Service	\$ 2.30 per kVA of Curtailable Billing Demand	R/T
Non-Compliance Charge of:	\$16.00 per kVA	T

Failure of Customer to curtail when requested to do so may result in termination of service under this rider. Customer will be charged for the portion of each requested curtailment not met at the applicable standard charges. The Company and Customer may arrange to have installed, at Customer's expense, the necessary telecommunication and control equipment to allow the Company to control Customers' curtailable load. Non-compliance charges will be waived if failure to curtail is a result of failure of Company's equipment; however, non-compliance charges will not be waived if failure to curtail is a result of Customer's equipment. If arrangements are made to have telecommunication and control equipment installed, then backup arrangements must also be established in the event either Company's or Customer's equipment fails.

CURTAILABLE BILLING DEMAND

For a Customer electing Option A, Curtailable Billing Demand shall be the difference between (a) the Customer's measured maximum kilowatt demand during the billing period for any billing interval during the following time periods: (i) for the summer peak months of May through September, from 10 A.M. to 10 P.M. (EST) and (ii) for the months October continuously through April, from 6 A.M. to 10 P.M, (EST) and (b) the firm contract demand. T

T

CURTAILABLE BILLING DEMAND (continued) T

For a Customer electing Option B, Curtailable Billing Demand shall be the customer Designated Curtailable Load, as described above. T T

AUTOMATIC BUY-THROUGH PRICE

The Automatic Buy-Through Price per kWh shall be determined daily in accordance with the following formula:

Automatic Buy-Through Price = NGP x .012000 MMBtu/kWh

Where: NGP represents the mid-point price for natural gas ($/MMBtu) posted for the day in *Platts Gas Daily* for Dominion—South Point and will be used for the electrical day from 12 midnight to midnight. Also the posted price for Monday or the day after a holiday is the posted price for Saturday, Sunday and the holiday. T

TERM OF CONTRACT

The minimum original contract period shall be one (1) year and thereafter until terminated by giving at least six (6) months previous written notice, but Company may require that contract be executed for a longer initial term when deemed reasonably necessary by the size of the load or other conditions.

TERMS AND CONDITIONS

When the Company requests curtailment, upon request by the Customer, the Company shall provide a good-faith, non-binding estimate of the duration of requested curtailment. In addition, upon request by the Company, the Customer shall provide to the Company a good-faith, non-binding short-term operational schedule for their facility. Upon request by the Customer, the Company will provide, once per month, to the Customer an explanation of the reasons for any request for curtailment.

Except as specified above, all other provisions of the power rate to which this schedule is a rider shall apply.

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Standard Rate Rider **SQF**
Small Capacity Cogeneration and Small Power Production Qualifying Facilities

APPLICABLE:
In all territory served.

AVAILABILITY OF SERVICE
This rate and the terms and conditions set out herein are available for and applicable to Company's purchases of energy only from the owner of qualifying cogeneration or small power production facilities of 100 kW or less (such owner being hereafter called "Seller") installed on Seller's property to provide all or part of its requirements of electrical energy, or from which facilities Seller may elect to sell to Company all or part of such output of electrical energy.

Company will permit Seller's generating facilities to operate in parallel with Company's system under conditions set out below under “Parallel Operation”.

Company will purchase such energy from Seller at the Rate, A or B, set out below and selected as hereafter provided, and under the terms and conditions stated herein. Company reserves the right to change the said Rates, upon proper filing with and acceptance by the jurisdictional Commission.

RATE A: TIME-DIFFERENTIATED RATE

1. For summer billing months of June, July, August and September, during the hours 9:01 A.M. thru 10:00 P.M. weekdays exclusive of holidays (on-peak hours),	$0.04538 per kWh
2. For winter billing months of December, January and February, during the hours 7:01 A.M. thru 10:00 P.M. weekdays exclusive of holidays (on-peak hours),	$0.04023 per kWh
3. During all other hours (off-peak hours)	$0.03139 per kWh

Determination of On-Peak and Off-Peak Hours: On-peak hours are defined as the hours of 9:01 A.M. through 10:00 P.M., E.D.T. (8:01 A.M. through 9:00 P.M., E.S.T.), Mondays through Fridays exclusive of holidays (under 1 above), and the hours of 7:01 A.M. through 10:00 P.M., E.D.T. (6:01 A.M. through 9:00 P.M., E.S.T.), Mondays through Fridays exclusive of holidays (under 2 above). Off-peak hours are defined as all hours other than those listed as on-peak (under 3 above). Company reserves the right to change the hours designated as on-peak from time to time as conditions indicate to be appropriate.

RATE B: NON-TIME-DIFFERENTIATED RATE

For all kWh purchased by Company,	$0.03418 per kWh

SELECTION OF RATE AND METERING

Subject to provisions hereafter in this Section relative to payment of costs of metering equipment, either Seller or Company may select Rate A, the Time-Differentiated Rate, for application to Company's said purchases of energy from Seller. If neither Seller nor Company selects Rate A, then Rate B, the Non-Time-Differentiated Rate, shall apply.

If neither Seller nor Company selects Rate A, and Rate B therefore is to apply to such purchases, Company, at Seller's cost, will install, own and operate a non-time-differentiated meter and associated equipment, at a location selected by Company, measuring energy, produced by Seller's generator, flowing into Company's system. Such meter will be tested at intervals prescribed by Commission Regulation, with Seller having a right to witness all such tests; and Seller will pay to Company its fixed cost on such meter and equipment, expense of such periodic tests of the meter and any other expenses (all such costs and expenses, together, being hereafter called "costs of non-time-differentiated metering").

If either Seller or Company selects Rate A to apply to Company's said purchases of energy from Seller, the party (Seller or Company) so selecting Rate A shall pay (a) the cost of a time-differentiated recording meter and associated equipment, at a location selected by Company, measuring energy, produced by Seller's generator, flowing into Company's system, required for the application of Rate A, in excess of (b) the costs of non-time-differentiated metering which shall continue to be paid by Seller.

In addition to metering referred to above, Company at its option and cost may install, own and operate, on Seller's generator, a recording meter to record the capacity, energy and reactive output of such generator at specified time intervals.

Company shall have access to all such meters at reasonable times during Seller's normal business hours, and shall regularly provide to Seller copies of all information provided by such meters.

PAYMENT

Any payment due from Company to Seller will be due within twelve (12) days from date of Company's reading of meter; provided, however, that, if Seller is a customer of Company, in lieu of such payment Company may offset its payment due to Seller hereunder, against Seller's next bill and payment due to Company for Company's service to Seller as customer.

PARALLEL OPERATION

Company hereby permits Seller to operate its generating facilities in parallel with Company's system, under the following conditions and any other conditions required by Company where unusual conditions not covered herein arise:

1. Prior to installation in Seller's system of any generator and associated facilities which are intended to be interconnected and operated in parallel with Company's system, or prior to the inter-connection to Company's system of any such generator and associated facilities already installed in Seller's system, Seller will provide to Company plans for such generator

and facilities. Company may, but shall have no obligation to, examine such plans and disapprove them in whole or in part, to the extent Company believes that such plans and proposed facilities will not adequately assure the safety of Company's facilities or system. Seller acknowledges and agrees that the sole purpose of any Company examination of such plans is the satisfaction of Company's interest in the safety of Company's own facilities and system, and that Company shall have no responsibility of any kind to Seller or to any other party in connection with any such examination. If Seller thereafter proposes any change from such plans submitted to Company, prior to the implementation thereof Seller will provide to Company new plans setting out such proposed change(s).

2. Seller will own, install, operate and maintain all generating facilities on its plant site, such facilities to include, but not be limited to, (a) protective equipment between the systems of Seller and Company and (b) necessary control equipment to synchronize frequency and voltage between such two systems. Seller's voltage at the point of interconnection will be the same as Company's system voltage. Suitable circuit breakers or similar equipment, as specified by Company, will be furnished by Seller at a location designated by Company to enable the separation or disconnection of the two electrical systems. Except in emergencies, the circuit breakers, or similar equipment, will be operated only by, or at the express direction of, Company personnel and will be accessible to Company at all times. In addition, a circuit breaker or similar equipment shall be furnished and installed by Seller to separate or disconnect Seller's generator.

3. Seller will be responsible for operating the generator and all facilities owned by Seller, except as hereafter specified. Seller will maintain its system in synchronization with Company's system.

4. Seller will (a) pay Company for all damage to Company's equipment, facilities or system, and (b) save and hold Company harmless from all claims, demands and liabilities of every kind and nature for injury or damage to, or death of, persons and/or property of others, including costs and expenses of defending against the same, arising in any manner in connection with Seller's generator, equipment, facilities or system or the operation thereof.

5. Seller will construct any additional facilities, in addition to generating and associated (interface) facilities, required for interconnection unless Company and Seller agree to Company's constructing such facilities, at Seller's expense, where Seller is not a customer of Company. When Seller is a customer of Company and Company is required to construct facilities different than otherwise required to permit interconnection, Seller shall pay such additional cost of facilities. Seller agrees to reimburse Company, at the time of installation, or, if agreed to by both parties, over a period of up to three (3) years, for any facilities including any hereafter required (but exclusive of metering equipment, elsewhere herein provided for) constructed by Company to permit Seller to operate interconnected with Company's system. When interconnection costs are repaid over a period of time, such payments will be made monthly and include interest on the unpaid balance at the percentage rate equal to the capital costs that Company would experience at such time by new financing, based on Company's then existing capital structure, with return on equity to be at the rate allowed in Company's immediately preceding rate case.

6. Company will have the continuing right to inspect and approve Seller's facilities, described herein, and to request and witness any tests necessary to determine that such facilities are installed and operating properly; but Company will have no obligation to inspect or approve facilities, or to request or witness tests; and Company will not in any manner be responsible for Seller's facilities or any operation thereof.

7. Seller assumes all responsibility for the electric service upon Seller's premises at and from the point of any delivery or flow of electricity from Company, and for the wires and equipment used in connection therewith; and Seller will protect and save Company harmless from all claims for injury or damage to persons or property, including but not limited to property of Seller, occurring on or about Seller's premises or at and from the point of delivery or flow of electricity from Company, occasioned by such electricity or said wires and equipment, except where said injury or damage is proved to have been caused solely by the negligence of Company.

8. Each, Seller and Company, will designate one or more Operating Representatives for the purpose of contacts and communications between the parties concerning operations of the two systems.

9. Seller will notify Company's Energy Control Center prior to each occasion of Seller's generator being brought into or (except in cases of emergencies) taken out of operation.

10. Company reserves the right to curtail a purchase from Seller when:

    (a) the purchase will result in costs to Company greater than would occur if the purchase were not made but instead Company, itself, generated an equivalent amount of energy; or

    (b) Company has a system emergency and purchases would (or could) contribute to such emergency.

    Seller will be notified of each curtailment.

TERMS AND CONDITIONS

Except as provided herein, conditions or operations will be as provided in Company's Terms and Conditions.

Standard Rate Rider **LQF**

Large Capacity Cogeneration and Small Power Production Qualifying Facilities

AVAILABILITY

In all territory served.

APPLICABILITY OF SERVICE

Applicable to any small power production or cogeneration "qualifying facility" with capacity over 100 kW as defined by the Kentucky Public Service Commission Regulation 807 KAR 5:054, and which contracts to sell energy or capacity or both to Company.

RATES FOR PURCHASES FROM QUALIFYING FACILITIES

Energy Component Payments

The hourly avoided energy cost (AEC) in $ per MWh, which is payable to a QF for delivery of energy, shall be equal to Company's actual variable fuel expenses, for Company-owned coal and natural gas-fired production facilities, divided by the associated megawatt-hours of generation, as determined for the previous month. The total amount of the avoided energy cost payment to be made to a QF in an hour is equal to [AEC x E_{QF}], where E_{QF} is the amount of megawatt-hours delivered by a QF in that hour and which are determined by suitable metering.

Capacity Component Payments

The hourly avoided capacity cost (ACC) in $ per MWh, which is payable to a QF for delivery of capacity, shall be equal to the effective purchase price for power available to Company from the inter-utility market (which includes both energy and capacity charges) less Company's actual variable fuel expense (AEC). The total amount of the avoided capacity cost payment to be made to a QF in an hour is equal to [ACC x CAP_i], where CAP_i, the capacity delivered by the QF, is determined on the basis of the system demand (D_i) and Company's need for capacity in that hour to adequately serve the load.

Determination of CAP_i

For the following determination of CAP_i, C_{KU} represents Company's installed or previously arranged capacity at the time a QF signs a contract to deliver capacity; C_{QF} represents the actual capacity provided by a QF, but no more than the contracted capacity; and C_M represents capacity purchased from the inter-utility market.

1. System demand is less than or equal to Company's capacity:
   $D_1 \leq C_{KU}$; $CAP_i = 0$

2. System demand is greater than Company's capacity but less than or equal to the total of Company's capacity and the capacity provided by a QF:

   $C_{KU} < D_i \leq [C_{KU} + C_{QF}]$; $CAP_i = C_M$

3. System demand is greater than the total of Company's capacity and the capacity provided by a QF:

   $D_i > [C_{KU} + C_{QF}]$; $CAP_i = C_{QF}$

PAYMENT

Company shall pay each bill for electric power rendered to it in accordance with the terms of the contract, within twelve (12) days of the date the bill is rendered. In lieu of such payment plan, Company will, upon written request, credit the Customer's account for such purchases.

TERM OF CONTRACT

For contracts which cover the purchase of energy only, the term shall be one (1) year, and shall be self-renewing from year-to-year thereafter, unless canceled by either party on one (1) year's written notice.

For contracts which cover the purchase of capacity and energy, the term shall be five (5) years.

TERMS AND CONDITIONS

1. Qualifying facilities shall be required to pay for any additional interconnection costs, to the extent that such costs are in excess of those that Company would have incurred if the qualifying facility's output had not been purchased.

2. A qualifying facility operating in parallel with Company must demonstrate that its equipment is designed, installed, and operated in a manner that insures safe and reliable interconnected operation. A qualifying facility should contact Company for assistance in this regard.

3. The purchasing, supplying and billing for service, and all conditions applying hereto, shall be specified in the contract executed by the parties, and are subject to the jurisdiction of the Kentucky Public Service Commission, and to Company's Terms and Conditions currently in effect, as filed with the Commission.

Standard Rate Rider **NMS**
Net Metering Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Available to any customer-generator who owns and operates a generating facility located on Customer's premises that generates electricity using solar, wind, biomass or biogas, or hydro energy in parallel with Company's electric distribution system to provide all or part of Customer's electrical requirements, and who executes Company's written Application for Interconnection and Net Metering. The generation facility shall be limited to a maximum rated capacity of 30 kilowatts. This Standard Rate Rider is intended to comply with all provisions of the Interconnection and Net Metering Guidelines approved by the Public Service Commission of Kentucky, which can be found on-line at www.psc.ky.gov as Appendix A to the January 8, 2009 Order in Administrative Case No. 2008-00169.

METERING AND BILLING

Net metering service shall be measured using a single meter or, as determined by Company, additional meters and shall be measured in accordance with standard metering practices by metering equipment capable of registering power flow in both directions for each time period defined by the applicable rate schedule. This net metering equipment shall be provided without any cost to the Customer. This provision does not relieve Customer's responsibility to pay metering costs embedded in the Company's Commission-approved base rates. Additional meters, requested by Customer, will be provided at Customer's expense.

If electricity generated by Customer and fed back to Company's system exceeds the electricity supplied to Customer from the system during a billing period, Customer shall receive a credit for the net delivery on Customer's bill for the succeeding billing periods. Any such unused excess credits will be carried forward and drawn on by Customer as needed. Unused excess credits existing at the time Customer's service is terminated end with Customer's account and are not transferrable between customers or locations.

NET METERING SERVICE INTERCONNECTION GUIDELINES

General – Customer shall operate the generating facility in parallel with Company's system under the following conditions and any other conditions required by Company where unusual circumstances arise not covered herein:

1. Customer to own, operate, and maintain all generating facilities on their premises. Such facilities shall include, but not be limited to, necessary control equipment to synchronize frequency, voltage, etc., between Customer's and Company's system as well as adequate protective equipment between the two systems. Customer's voltage at the point of interconnection will be the same as Company's system voltage.
2. Customer will be responsible for operating all generating facilities owned by Customer, except as specified hereinafter. Customer will maintain its system in synchronization with Company's system.
3. Customer will be responsible for any damage done to Company's equipment due to failure of Customer's control, safety, or other equipment.
4. Customer agrees to inform Company of any changes it wishes to make to its generating or associated facilities that differ from those initially installed and described to Company in writing and obtain prior approval from Company.
5. Company will have the right to inspect and approve Customer's facilities described herein, and to conduct any tests necessary to determine that such facilities are installed and

NET METERING SERVICE INTERCONNECTION GUIDELINES (continued)

operating properly; however, Company will have no obligation to inspect, witness tests, or in any manner be responsible for Customer's facilities or operation thereof.

6. Customer assumes all responsibility for the electric service on Customer's premises at and from the point of delivery of electricity from Company and for the wires and equipment used in connection therewith, and will protect and save Company harmless from all claims for injury or damage to persons or property occurring on Customer's premises or at and from the point of delivery of electricity from Company, occasioned by such electricity or said wires and equipment, except where said injury or damage will be shown to have been occasioned solely by the negligence or willful misconduct of Company.

Level 1 – A Level 1 installation is defined as an inverter-based generator certified as meeting the requirements of Underwriters Laboratories Standard 1741 and meeting the following conditions:

1. The aggregated net metering generation on a radial distribution circuit will not exceed 15% of the line section's most recent one hour peak load. A line section is the smallest part of the primary distribution system the generating facility could remain connected to after operation of any sectionalizing devices.
2. The aggregated net metering generation on a shared singled-phase secondary will not exceed 20 kVA or the nameplate rating of the service transformer.
3. A single-phase net metering generator interconnected on the center tap neutral of a 240 volt service shall not create an imbalance between the two sides of the 240 volt service of more than 20% of the nameplate rating of the service transformer.
4. A net metering generator interconnected to Company's three-phase, three-wire primary distribution lines, shall appear as a phase-to-phase connection to Company's primary distribution line.
5. A net metering generator interconnected to Company's three-phase, four-wire primary distribution lines, shall appear as an effectively grounded source to Company's primary distribution line.
6. A net metering generator will not be connected to an area or spot network.
7. There are no identified violations of the applicable provisions of IEEE 1547, "Standard for Interconnecting Distributed Resources with Electric Power Systems".
8. Company will not be required to construct any facilities on its own system to accommodate the net metering generator.

Customer desiring a Level 1 interconnection shall submit a "LEVEL 1 - Application for Interconnection and Net Metering." Company shall notify Customer within 20 business days as to whether the request is approved or, if denied, the reason(s) for denial. If additional information is required, the Company will notify Customer, and the time between notification and submission of the information shall not be counted towards the 20 business days. Approval is contingent upon an initial inspection and witness test at the discretion of Company.

Level 2 – A Level 2 installation is defined as generator that is not inverter-based; that uses equipment not certified as meeting the requirements of Underwriters Laboratories Standard 1741, or that does not meet one or more of the conditions required of a Level 1 net metering generator. A Level 2 Application will be approved if the generating facility meets the Company's technical interconnection requirements. Those requirements are available on line at www.lge-ku.com and upon request.

NET METERING SERVICE INTERCONNECTION GUIDELINES (continued)

Customer desiring a Level 2 interconnection shall submit a "LEVEL 2 - Application for Interconnection and Net Metering." Company shall notify Customer within 30 business days as to whether the request is approved or, if denied, the reason(s) for denial. If additional information is required, the Company will notify Customer, and the time between notification and submission of the information shall not be counted towards the 30 business days. Approval is contingent upon an initial inspection and witness test at the discretion of Company.

Customer submitting a "Level 2 - Application for Interconnection and Net Metering will provide a non-refundable inspection and processing fee of $100, and in the event that the Company determines an impact study to be necessary, shall be responsible for any reasonable costs of up to $1,000 of documented costs for the initial impact study.

Additional studies requested by Customer shall be at Customer's expense.

CONDITIONS OF INTERCONNECTION

Customer may operate his net metering generator in parallel with Company's system when complying with the following conditions:

1. Customer shall install, operate, and maintain, at Customer's sole cost and expense, any control, protective, or other equipment on Customer's system required by Company's technical interconnection requirements based on IEEE 1547, NEC, accredited testing laboratories, and the manufacturer's suggested practices for safe, efficient and reliable operation of the net metering generating facility in parallel with Company's system. Customer bears full responsibility for the installation, maintenance and safe operation of the net metering generating facility. Upon reasonable request from Company, Customer shall demonstrate compliance.
2. Customer shall represent and warrant compliance of the net metering generator with:
   a) any applicable safety and power standards established by IEEE and accredited testing laboratories;
   b) NEC, as may be revised from time-to-time;
   c) Company's rules and regulations and Terms and Conditions, as may be revised by time-to-time by the Public Service Commission of Kentucky;
   d) the rules and regulations of the Public Service Commission of Kentucky, as may be revised by time-to-time by the Public Service Commission of Kentucky:
   e) all other local, state, and federal codes and laws, as may be in effect from time-to-time.
3. Any changes or additions to Company's system required to accommodate the net metering generator shall be Customer's financial responsibility and Company shall be reimbursed for such changes or additions prior to construction.
4. Customer shall operate the net metering generator in such a manner as not to cause undue fluctuations in voltage, intermittent load characteristics or otherwise interfere with the operation of Company's electric system. Customer shall so operate the generating facility in such a manner that no adverse impacts will be produced thereby to the service quality rendered by Company to any of its other customers or to any electric system interconnected with Company's electric system.
5. Customer shall be responsible for protecting, at Customer's sole cost and expense, the net metering generating facility from any condition or disturbance on Company's electric system, including, but not limited to, voltage sags or swells, system faults, outages, loss of a single phase of supply, equipment failures, and lightning or switching surges, except that the Company shall be responsible for repair of damage caused to the net metering

CONDITIONS OF INTERCONNECTION (continued)

generator resulting solely from the negligence or willful misconduct on the part of the Company.

6. Following the initial testing and inspection of the generating facility and upon reasonable advance notice to Customer, Company shall have access at reasonable times to the generating facility to perform reasonable on-site inspections to verify that the installation, maintenance and operation of the net metering generator comply with the requirements of this rate schedule.
7. Where required by the Company, Customer shall furnish and install on Customer's side of the point of interconnection a safety disconnect switch which shall be capable of fully disconnecting Customer's net metering generator from Company's electric service under the full rated conditions of Customer’s net metering generator. The external disconnect switch (EDS) shall be located adjacent to Company's meters or the location of the EDS shall be noted by placing a sticker on the meter, and shall be of the visible break type in a metal enclosure which can be secured by a padlock. If the EDS is not located directly adjacent to the meter, Customer shall be responsible for ensuring the location of the EDS is properly and legibly identified for so long as the net metering generator is operational. The disconnect switch shall be accessible to Company personnel at all times. Company may waive the requirement for an external disconnect switch for a net metering generator at its sole discretion, and on a case by case basis.
8. Company shall have the right and authority at Company's sole discretion to isolate the generating facility or require the Customer to discontinue operation of the net metering generator if Company believes that:
   a) continued interconnection and parallel operation of the net metering generator with Company’s electric system creates or contributes (or may create or contribute) to a system emergency on either Company's or Customer's electric system;
   b) the net metering generator is not in compliance with the requirements of this rate schedule, and the non-compliance adversely affects the safety, reliability or power quality of Company’s electric system; or
   c) the net metering generator interferes with the operation of Company's electric system.

   In non-emergency situations, Company shall give Customer notice of noncompliance including a description of the specific noncompliance condition and allow Customer a reasonable time to cure the noncompliance prior to isolating the Generating Facilities. In emergency situations, where the Company is unable to immediately isolate or cause Customer to isolate only the net metering generator, Company may isolate Customer’s entire facility.
9. Customer agrees that, without the prior written permission from Company, no changes shall be made to the generating facility as initially approved. Increases in net metering generator capacity will require a new “Application for Interconnection and Net Metering” which will be evaluated on the same basis as any other new application. Repair and replacement of existing generating facility components with like components that meet UL 1741 certification requirements for Level 1 facilities and not resulting in increases in net metering generator capacity is allowed without approval.
10. Customer shall protect, indemnify and hold harmless Company and its directors, officers, employees, agents, representatives and contractors against and from all loss, claims, actions or suits, including costs and attorneys fees, for or on account of any injury or death of persons or damage to property caused by Customer or Customer’s employees, agents, representatives and contractors in tampering with, repairing, maintaining or operating

CONDITIONS OF INTERCONNECTION (continued)

Customer's net metering generator or any related equipment or any facilities owned by Company except where such injury, death or damage was caused or contributed to by the fault or negligence of Company or its employees, agents, representatives or contractors.

The liability of Company to Customer for injury to person and property shall be governed by the tariff(s) for the class of service under which Customer is taking service.

11. Customer shall maintain general liability insurance coverage (through a standard homeowner's, commercial or other policy) for generating facilities. Customer shall upon request provide Company with proof of such insurance at the time that application is made for net metering.
12. By entering into an Interconnection Agreement, or by inspection, if any, or by non-rejection, or by approval, or in any other way, Company does not give any warranty, express or implied, as to the adequacy, safety, compliance with applicable codes or requirements, or as to any other characteristics, of the generating facility equipment, controls, and protective relays and equipment.
13. Customer's generating facility is transferable to other persons or service locations only after notification to the Company has been made and verification that the installation is in compliance with this tariff. Upon written notification that an approved generating facility is being transferred to another person, customer, or location, the Company will verify that the installation is in compliance with this tariff and provide written notification to the customer(s) within 20 business days. If the installation is no longer in compliance with this tariff, the Company will notify Customer in writing and list what must be done to place the facility in compliance.
14. Customer shall retain any and all Renewable Energy Credits (RECs) generated by Customer's generating facilities.

DEFINITIONS

"Billing period" shall be the time period between the dates on which Company issues the customer's bills.

"Billing Period Credit" shall be the electricity generated by the customer that flows into the electric system and which exceeds the electricity supplied to the customer from the electric system during any billing period.

TERMS AND CONDITIONS

Except as provided herein, service will be furnished under Company's Terms and Conditions applicable hereto.

LEVEL 1

Application for Interconnection and Net Metering

*Use this application form only for a generating facility that is inverter based and certified by a nationally recognized testing laboratory to meet the requirements of **UL** 1741.*

Submit this Application to:

Kentucky Utilities Company, Attn: Customer Commitment, P. O. Box 32010, Louisville, KY 40232

If you have questions regarding this Application or its status, contact KU at:

502-627-2202 or customer.commitment@lge-ku.com

Customer Name: ______________________ Account Number: ______________________

Customer Address: ____

Customer Phone No.: ______________ Customer E-mail Address: ______________________

Project Contact Person: ____

Phone No.**:** ______________ E-mail Address (Optional): ______________________

Provide names and contact information for other contractors, installers, or engineering firms involved in the design and installation of the generating facilities:

____

Energy Source: ____Solar ____Wind ____Hydro ____Biogas ____Biomass

Inverter Manufacturer and Model #: ____

Inverter Power Rating: ______________ Inverter Voltage Rating: ______________________

Power Rating of Energy Source (i.e., solar panels, wind turbine): ______________________

Is Battery Storage Used: ____No _____Yes If Yes, Battery Power Rating: ______________________

Attach documentation showing that inverter is certified by a nationally recognized testing laboratory to meet the requirements of **UL** 1741.

Attach site drawing or sketch showing location of Utility's meter, energy source, ***(optional: Utility accessible disconnect switch)*** and inverter.

Attach single line drawing showing all electrical equipment from the Utility's metering location to the energy source including switches, fuses, breakers, panels, transformers, inverters, energy source, wire size, equipment ratings, and transformer connections.

Expected Start-up Date: ______________________

LEVEL 2

Application for Interconnection and Net Metering

*Use this application form when a generating facility is not inverter-based or is not certified by a nationally recognized testing laboratory to meet the requirements of **UL** 1741 or does not meet any of the additional conditions under Level 1.*

Submit this Application, along with an application fee of $100, to:

Kentucky Utilities Company, Attn: Customer Commitment, P. O. Box 32010, Louisville, KY 40232

If you have questions regarding this Application or its status, contact KU at:

502-627-2202 or customer.commitment@lge-ku.com

Customer Name: ______________________ Account Number: ______________

Customer Address: ______________________________________

Project Contact Person: ______________________________________

Phone No.: ______________ E-mail Address (Optional): ______________________

Provide names and contact information for other contractors, installers, or engineering firms involved in the design and installation of the generating facilities:

____

____

____

Total Generating Capacity of Generating Facility: ______________________

Type of Generator: ____Inverter-Based ____Synchronous ____Induction

Power Source: ____Solar ____Wind ____Hydro ____Biogas ____Biomass

Adequate documentation and information must be submitted with this application to be considered complete. Typically this should include the following:

1. Single-line diagram of the customer's system showing all electrical equipment from the generator to the point *of* interconnection with the Utility's distribution system, including generators, transformers, switchgear, switches, breakers, fuses, voltage transformers, current transformers, wire sizes, equipment ratings, and transformer connections.
2. Control drawings for relays and breakers.
3. Site Plans showing the physical location of major equipment.
4. Relevant ratings of equipment. Transformer information should include capacity ratings, voltage ratings, winding arrangements, and impedance.
5. If protective relays are used, settings applicable to the interconnection protection. If programmable relays are used, a description of how the relay is programmed to operate as applicable to interconnection protection.
6. A description of how the generator system will be operated including all modes of operation.
7. For inverters, the manufacturer name, model number, and AC power rating. For certified inverters, attach documentation showing that inverter is certified by *a* nationally recognized testing laboratory to meet the requirements of **UL** 1741.
8. For synchronous generators, manufacturer and model number, nameplate ratings, and impedance data (Xd, Xd, & Xd).
9. For induction generators, manufacturer and model number, nameplate ratings, and locked rotor current.

Customer Signature: ______________________ Date: ______________

Excess Facilities

APPLICABILITY

In all territory served.

AVAILABILITY OF SERVICE

This rider is available for nonstandard service facilities which are considered to be in excess of the standard facilities that would normally be provided by Company. This rider does not apply to line extensions or to other facilities which are necessary to provide basic electric service. Company reserves the right to decline to provide service hereunder for any project (a) that exceeds $100,000 or (b) where Company does not have sufficient expertise to install, operate, or maintain the facilities or (c) where the facilities do not meet Company's safety requirements, or (d) where the facilities are likely to become obsolete prior to the end of the initial contract term.

DEFINITION OF EXCESS FACILITIES

Excess facilities are lines and equipment which are installed in addition to or in substitution for the normal facilities required to render basic electric service and where such facilities are T
dedicated to a specific customer. Applications of excess facilities include, but are not limited to, T
emergency backup feeds, automatic transfer switches, redundant transformer capacity, and duplicate or check meters.

EXCESS FACILITIES CHARGE

Company shall provide normal operation and maintenance of the excess facilities. Should the facilities suffer failure, Company will provide for replacement of such facilities and the monthly charge will be adjusted to reflect the installed cost of the replacement facilities. No adjustment T
in the monthly charge for a replacement of facilities will be made during the initial five (5) year T
term of contract. T

Customer shall pay for excess facilities by: T

(a) making a monthly Excess Facilities Charge payment equal to the installed cost of the T
excess facilities times the following percentage: T

Percentage With No Contribution–in-Aid-of-Construction	1.28%	T/R

(b) making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the T
excess facilities plus a monthly Excess Facilities Charge payment equal to the installed T
cost of the excess facilities times the following percentage: T

Percentage With Contribution-in-Aid of-Construction	0.49%	T/R

PAYMENT

The Excess Facilities Charges shall be incorporated with the bill for electric service and will be subject to the same payment provisions.

TERM OF CONTRACT

The initial term of contract to the customer under this schedule shall be not less than five (5) years. The term shall continue automatically until terminated by either party upon at least one (1) month's written notice.

APPLICABLE

This rate is applicable to customers served under Company's rate schedules which include a demand charge or a special contract including a demand charge.

AVAILABILITY

Available to customers requesting the reservation of capacity on Company's facilities which are shared by other customers when Company has and is willing to reserve such capacity. Such facilities represent a redundant delivery to provide electric service to the Customer's facility in the event that an emergency or unusual occurrence renders the Customer's principal delivery unavailable for providing service. Where Customer desires to split a load between multiple meters on multiple feeds and contract for Redundant Capacity on those feeds, service is contingent on the practicality of metering to measure any transferred load to the redundant feed. T T T T

RATE:

Capacity Reservation Charge

Secondary Distribution	$1.55 per kW/kVA per month	I/T
Primary Distribution	$0.99 per kW/kVA per month	I/T

Applicable to the greater of:

(1) the highest average load in kW/kVA (as is appropriate for the demand basis of the standard rate on which Customer is billed) recorded at either the principal distribution feed metering point or at the redundant distribution feed metering point during any 15-minute interval in the monthly billing period; T T

(2) 50% of the maximum demand similarly determined for any of the eleven (11) preceding months; or

(3) the contracted capacity reservation.

TERM OF CONTRACT

The minimum contract term shall be five (5) years and shall be renewed for one-year periods until either party provides the other with ninety (90) days written notice of a desire to terminate the arrangement. Company may require that a contract be executed for a longer initial term when deemed necessary by the difficulty and/or high cost associated with providing the redundant feed or other special conditions.

Standard Rate Rider **SS**

Supplemental or Standby Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This service is available as a rider to customers whose premises or equipment are regularly supplied with electric energy from generating facilities other than those of Company and who desire to contract with Company for reserve, breakdown, supplemental or standby service.

Where a customer-generator supplies all or part of the customer-generator's own load and desires Company to provide supplemental or standby service for that load, the customer-generator must contract for such service under Company's Supplemental or Standby Service Rider, otherwise Company has no obligation to supply the non-firm service. This requirement does not apply to Net Metering Service (Rider NMS). T

RATE

	Secondary	Primary	Transmission	
Contract Demand per kW/kVA per Month	$12.91	$12.35	$11.17	T/I

CONTRACT DEMAND

Contract Demand is defined as the number of kW/kVA (as is appropriate for the demand basis T
of the standard rate on which Customer is billed) mutually agreed upon as representing T
customer's maximum service requirements and contracted for by customer; provided, however,
if such number of kW/kVA (as is appropriate for the demand basis of the standard rate on which T
Customer is billed) is exceeded by a recorded demand, such recorded demand shall become T
the new contract demand commencing with the month in which recorded and continuing for the remaining term of the contract or until superseded by a higher recorded demand.

MINIMUM CHARGE

Electric service actually used each month will be charged for in accordance with the provisions of the applicable rate schedule; provided, however, the minimum billing under that rate schedule shall in no case be less than an amount calculated at the appropriate rate above applied to the Contract Demand.

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

SPECIAL TERMS AND CONDITIONS

1) In order to protect its equipment from overload damage, Company may require customer to install at Customer's own expense an approved shunt trip type breaker and an approved automatic pole-mounted disconnect. Such circuit breakers shall be under the sole control of Company and will be set by Company to break the connection with its service in the event customer's demand materially exceeds that for which the customer contracted.

T

SPECIAL TERMS AND CONDITIONS (continued)

2) In the event customer's use of service is intermittent or subject to violent fluctuations, Company will require customer to install and maintain at Customer's own expense suitable equipment to satisfactorily limit such intermittence or fluctuations. T T T

3) Customer's generating equipment shall not be operated in parallel with Company's service until the manner of such operation has been approved by Company and is in compliance with Company's operating standards for system reliability and safety.

TERM OF CONTRACT
The minimum contract period shall be one (1) year, but Company may require that a contract be executed for a longer initial term when deemed necessary by the size of load or special conditions.

TERMS AND CONDITIONS
Service will be furnished under Company's Terms and Conditions except as provided herein.

Standard Rate Rider **IL**

Rider for Intermittent Loads

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule applies to all loads having a detrimental effect upon the electric service rendered to other customers of Company or upon Company's facilities.

Where Customer's use of service is intermittent, subject to violent or extraordinary fluctuations, or produces unacceptable levels of harmonic current, in each case as determined by Company, in its reasonable discretion, Company reserves the right to require Customer to furnish, at Customer's own expense, suitable equipment (as approved by Company in its reasonable discretion) to meter and limit such intermittence, fluctuation, or harmonics to the extent reasonably requested by Company. Without limiting the foregoing, Company may require such equipment if, at any time, the megavars, harmonics, and other desirable electrical characteristics produced by the Customer exceed the limits set forth in the IEEE standards for such characteristics. In addition, if the Customer's use of Company's service under this schedule causes such undesirable electrical characteristics in an amount exceeding those IEEE standards, such use shall be deemed to cause a dangerous condition which could subject any person to imminent harm or result in substantial damage to the property of Company or others, and Company shall therefore terminate service to the Customer in accordance with 807 KAR 5:006, Section 14(1)(b). Such a termination of service T shall not be considered a cancellation of the service agreement or relieve Customer of any minimum billing or other guarantees. Company shall be held harmless for any damages or economic loss resulting from such termination of service. If requested by Company, Customer shall provide all available information to Company that aids Company in enforcing its service standards. If Company at any time has a reasonable basis for believing that Customer's proposed or existing use of the service provided will not comply with the service standards for interference, fluctuations, or harmonics, Company may engage such experts and/or consultants as Company shall determine are appropriate to advise Company in ensuring that such interference, fluctuations, or harmonics are within acceptable standards. Should such experts and/or consultants determine Customer's use of service is unacceptable, Company's use of such experts and/or consultants will be at the Customer's expense.

RATE

1. A contribution in aid of construction or an excess facilities charge shall be required for all special or added facilities, if any, necessary to serve such loads, as provided under the Excess Facilities Rider.
2. Plus the charges provided for under the rate schedule applicable, including any Basic Service Charge if applicable, Energy Charge, Maximum Load Charge (if load charge rate is used), Fuel Clause and the Minimum Charge under such rate adjusted in accordance with (a) or (b) herein.
   (a) If rate schedule calls for a minimum based on the total kW of connected load, each kVA of such special equipment shall be counted as one kW connected load for minimum billing purposes.
   (b) If rate schedule calls for a minimum based on the 15-minute integrated load, and such loads operate only intermittently so that the kW registered on a standard 15-minute integrated demand meter is small in comparison to the instantaneous load such equipment is capable of imposing, each kVA of such special equipment shall be counted as one-third kW load for minimum billing purposes.

MINIMUM CHARGE

As determined by this Rider and the Rate Schedule to which it is attached.

Standard Rate Rider **TS**

Temporary and/or Seasonal Electric Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This rider is available at the option of Customer where Customer's business does not require permanent installation of Company's facilities and is of such nature to require: T T

1. only seasonal service or temporary service, including service provided for construction of residences or commercial buildings, and where in the judgment of Company the local and system electrical facility capacities are adequate to serve the load without impairment of service to other customers; or
2. where Customer has need for temporary use of Company facilities and Company has facilities it is willing to provide.

This service is available for not less than one (1) month (approximately thirty (30) days), but when service is used longer than one (1) month, any fraction of a month's use will be prorated for billing purposes.

CONDITIONS

Company may permit such electric loads to be served on the rate schedule normally applicable, but without requiring a yearly contract and minimum, substituting therefor the following conditions and agreements:

1. Customer shall pay Company for all costs of making temporary connections, including cost of installing necessary transformers, meters, poles, wire and any other material, and any cost of material which cannot be salvaged, and the cost of removing such facilities when load has ceased.

2. Customer shall pay regular rate of the applicable electric rate schedule.

3. Where Customer is receiving service under a standard rate and has need for temporary use of Company facilities, Customer will pay for non-salvageable materials outlined in (1) above plus a monthly charge for the salvageable equipment at the Percentage With No Contribution -in-Aid-of-Construction specified on the Excess Facilities Rider, Rate Sheet No. 60. T T T

Standard Rate Rider

Kilowatt-Hours Consumed By Lighting Units

APPLICABLE

Determination of energy set out below applies to the Company's non-metered lighting rate schedules.

DETERMINATION OF ENERGY CONSUMPTION

The applicable fuel clause charge or credit will be based on the kilowatt-hours calculated by multiplying the kilowatt load of each light times the number of hours that light is in use during the billing month. The kilowatt load of each light is shown in the section titled RATE. The number of hours a light will be in use during a given month is from dusk to dawn as shown in the following Hours Use Table.

HOURS USE TABLE

Month	Hours Light Is In Use
JAN	407
FEB	344
MAR	347
APR	301
MAY	281
JUN	257
JUL	273
AUG	299
SEP	322
OCT	368
NOV	386
DEC	415
TOTAL FOR YEAR	4,000 HRS.

Standard Rate Rider

SGE
Small Green Energy Rider

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rider is available to customers receiving service under Company's standard RS or GS rate schedules as an option to participate in Company's "Green Energy Program" whereby Company will aggregate the resources provided by the participating customers to develop green power, purchase green power, or purchase Renewable Energy Certificates.

DEFINITIONS

a) Green power is that electricity generated from renewable sources including but not limited to: solar, wind, hydroelectric, geothermal, landfill gas, biomass, biodiesel used to generate electricity, agricultural crops or waste, all animal and organic waste, all energy crops and other renewable resources deemed to be Green-e Certified.
b) A Renewable Energy Certificate ("REC") is the tradable unit which represents the commodity formed by unbundling the environmental-benefit attributes of a unit of green power from the underlying electricity. One REC is equivalent to the environmental-benefits attributes of one (1) MWh of green power.

RATE

Voluntary monthly contributions of any amount in $5.00 increments

TERMS AND CONDITIONS

a) Customers may contribute monthly as much as they like in $5.00 increments (e.g., $5.00, $10.00, $15.00, or more per month). An eligible customer may participate in Company's "Green Energy Program" by making a request to Company's Call Center or through Company's website enrollment form and may withdraw at any time through a request to Company's Call Center. Funds provided by Customer to Company are not refundable.
b) Customers may not owe any arrearage prior to entering the "Green Energy Program". Any customer failing to pay the amount the customer pledged to contribute may be removed from the "Green Energy Program." Any Customer removed from or withdrawing from the "Green Energy Program" will not be allowed to re-apply for one (1) year.
c) Customer will be billed monthly for the amount Customer has pledged to contribute to the "Green Energy Program." Such billing will be added to Customer's billing under any standard rate schedules plus applicable riders plus applicable adjustment clauses.

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rider is available to customers receiving service under Company's standard PS, TODS, TODP, RTS, or FLS rate schedules as an option to participate in Company's "Green Energy Program" whereby Company will aggregate the resources provided by the participating customers to develop green power, purchase green power, or purchase Renewable Energy Certificates. T

DEFINITIONS

a) Green power is that electricity generated from renewable sources including but not limited to: solar, wind, hydroelectric, geothermal, landfill gas, biomass, biodiesel used to generate electricity, agricultural crops or waste, all animal and organic waste, all energy crops and other renewable resources deemed to be Green-e Certified.
b) A Renewable Energy Certificate ("REC") is the tradable unit which represents the commodity formed by unbundling the environmental-benefit attributes of a unit of green power from the underlying electricity. One REC is equivalent to the environmental-benefits attributes of one (1) MWh of green power.

RATE

Voluntary monthly contributions of any amount in $13.00 increments

TERMS AND CONDITIONS

a) Customers may contribute monthly as much as they like in $13.00 increments, (e.g., $13.00, $26.00, $39.00, or more per month). An eligible customer may participate in company's "Green Energy Program" by making a request to the Company and may withdraw at any time through a request to the Company. Funds provided by Customer to Company are not refundable.
b) Customers may not owe any arrearage prior to entering the "Green Energy Program". Any customer failing to pay the amount the customer pledged to contribute may be removed from the "Green Energy Program." Any customer removed from or withdrawing from the "Green Energy Program" will not be allowed to re-apply for one (1) year.
c) Customer will be billed monthly for the amount customer has pledged to contribute to the "Green Energy Program." Such billing will be added to Customer's billing under any standard rate schedules plus applicable riders plus applicable adjustment clauses.

Standard Rate Rider **EDR**
Economic Development Rider

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Available as a rider to customers to be served or being served under Company's Standard Rate Schedules TODS, TODP, and RTS to encourage Brownfield Development or Economic Development (as defined herein). Service under EDR is conditional on approval of a special contract for such service filed with and approved by the Public Service Commission of Kentucky.

RATE

A customer taking service under EDR shall be served according to all of the rates, terms, and conditions of the normally applicable rate schedule subject to the following:

a) for the twelve consecutive monthly billings of the first contract year, the Total Demand Charge shall be reduced by 50%;
b) for the twelve consecutive monthly billings of the second contract year, the Total Demand Charge shall be reduced by 40%;
c) for the twelve consecutive monthly billings of the third contract year, the Total Demand Charge shall be reduced by 30%;
d) for the twelve consecutive monthly billings of the fourth contract year, the Total Demand Charge shall be reduced by 20%;
e) for the twelve consecutive monthly billings of the fifth contract year, the Total Demand Charge shall be reduced by 10%; and
f) all subsequent billing shall be at the full charges stated in the applicable rate schedule.

"Total Demand Charge" is the sum of all demand charges, including any credits provided under any other demand applicable rider, before the EDR discounts described above are applied.

TERMS AND CONDITIONS

Brownfield Development

a) Service under EDR for Brownfield Development is available to customers locating at sites that have been submitted to, approved by, and added to the Brownfield Inventory maintained by the Kentucky Energy and Environment Cabinet (or by any successor entity created and authorized by the Commonwealth of Kentucky).
b) EDR for Brownfield Development is available only to billing loads of 500 kVA or greater where the customer takes service from existing Company facilities.

Economic Development

c) Service under EDR for Economic Development is available to:
    1) new customers contracting for a minimum annual average of monthly billing load of 1,000 kVA; and
    2) existing customers contracting for a minimum annual average of monthly billing load of 1,000 kVA above their Existing Base Load, to be determined as follows:

TERMS AND CONDITIONS, Economic Development c) 2) (continued)

i. Company and the existing customer will determine Customer's Existing Base Load by averaging Customer's previous three years' monthly billing loads, subject to any mutually agreed upon adjustments thereto.
ii. Company and the existing customer must agree upon the Existing Base Load, which shall be an explicit term of the special contract submitted to the Commission for approval before the customer can take service under EDR. Once the Existing Base Load's value is thus established, it will not be subject to variation or eligible for service under EDR.
iii. This provision is not intended to reduce or diminish in any way EDR service already being provided to all or a portion of a customer's Existing Base Load. Such EDR service would continue under the terms of the contract already existing between the Company and the customer concerning the affected portion of the customer's Existing Base Load.

d) A customer desiring service under EDR for Economic Development must submit an application for service that includes:
   1) a description of the new load to be served;
   2) the number of new employees, if any, Customer anticipates employing associated with the new load;
   3) the capital investment Customer anticipates making associated with the EDR load;
   4) a certification that Customer has been qualified by the Commonwealth of Kentucky for benefits under the Kentucky Business Investment Program.

e) Should Company determine a refundable contribution for the capital investment in Customer-specific facilities required by Company to serve the EDR load would ordinarily be required as set out under Company's Line Extension Plan, I. Special Cases, that amount shall be determined over a fifteen (15) year period and payable at the end of the fifteen (15) year period.

General

f) Company may offer EDR to qualifying new load only when Company has generating capacity available and the new load will not accelerate Company's plans for additional generating capacity over the life of the EDR contract.
g) Customer may request an EDR effective initial billing date that is no later than twelve (12) months after the date on which Company initiates service to Customer.
h) Neither the demand charge reduction nor any unjustified capital investment in facilities will be borne by Company's other customers during the term of the EDR contract.
i) Company may offer differing terms, as appropriate, under special contract to which this rider is a part depending on the circumstances associated with providing service to a particular customer and subject to approval by the Public Service Commission of Kentucky.

TERM OF CONTRACT

Service will be furnished under the applicable standard rate schedule and this rider, filed as a special contract with the Commission for a fixed term of not less than ten (10) years and for such time thereafter under the terms stated in the standard rate schedule. A greater term of contract or termination notice may be required because of conditions associated with a Customer's requirements for service. Service will be continued under conditions provided for under the rate schedule to which this Rider is attached after the original term of contract.

Standard Rate **LEV**
Low Emission Vehicle Service

APPLICABLE
In the territory served.

AVAILABILITY OF SERVICE
LEV shall be available as option to customers otherwise served under rate schedule RS to encourage off-peak power for low emission vehicles.

1) LEV is a three year pilot program that may be restricted to a maximum of one hundred (100) customers eligible for Rate RS (or GS where the GS service is used in conjunction with an RS service to provide service to a detached garage and energy usage is no more than 300 kWh per month) in any year and shall remain in effect until modified or terminated by order of the Commission. Company will accept applications on a first-come-first-served basis. T T T
2) This service is restricted to customers who demonstrate power delivered to premises is consumed, in part, for the powering of low emission vehicles licensed for operation on public streets or highways. Such vehicles include:
   a) battery electric vehicles or plug-in hybrid electric vehicles recharged through a charging outlet at Customer's premises,
   b) natural gas vehicles refueled through an electric-powered refueling appliance at Customer's premises.
3) A customer exiting the pilot program or disconnected for non-payment may not be allowed to return to it until the Commission has issued a decision on the pilot program report.
4) Company will file a report on LEV with the Commission within six months after the first three years of implementation of the pilot program. Such report will detail findings and recommendations.

RATE

Basic Service Charge:	$13.00 per month	I
Plus an Energy Charge:		
Off Peak Hours:	$0.05078 per kWh	I
Intermediate Hours:	$0.07254 per kWh	I
Peak Hours:	$0.13788 per kWh	I

ADJUSTMENT CLAUSES
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

Fuel Adjustment Clause	Sheet No. 85
Demand Side Management Cost Recovery Mechanism	Sheet No. 86
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91
Home Energy Assistance Program	Sheet No. 92

DETERMINATION OF PRICING PERIODS

Pricing periods are established in Eastern Standard Time year round by season for weekdays and weekends. The hours of the pricing periods for the price levels are as follows:

Summer Months of May through September

	Off-Peak	Intermediate	Peak
Weekdays	10 PM - 10 AM	10 AM - 1 PM 7 PM - 10 PM	1 PM - 7 PM
Weekends	All Hours		

All Other Months of October continuously through April

	Off Peak	Intermediate	Peak
Weekdays	10 PM - 6 AM	12 Noon – 10 PM	6 AM – 12 Noon
Weekends	All Hours		

MINIMUM CHARGE

The Basic Service Charge shall be the minimum charge.

DUE DATE OF BILL

Customer’s payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 5% late payment charge will be assessed on the current month’s charges.

TERMS OF CONTRACT

For a fixed term of not less than one (1) year and for such time thereafter until terminated by either party giving thirty (30) days written notice to the other of the desire to terminate.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto. Customers served under this optional pilot program will not be eligible for Company’s Budget Payment Plan. Company shall install metering equipment capable of accommodating the Time of Use rate described herein.

Adjustment Clause **FAC**
Fuel Adjustment Clause

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
This schedule is mandatory to all electric rate schedules.

(1) The charge per kWh delivered under the rate schedules to which this fuel clause is applicable shall be increased or decreased during each month in accordance with the following formula:

$$\text{Adjustment Factor} = \frac{F(m)}{S(m)} - \frac{F(b)}{S(b)}$$

where "F" is the expense of fossil fuel and "S" is the kWh sales in the base (b) and current (m) periods as defined in 807 KAR 5:056, all as set out below.

(2) Fuel costs (F) shall be the most recent actual monthly cost of:

(a) Fossil fuel consumed in the utility's own plants, plus the cost of fuel which would have been used in plants suffering forced generation or transmission outages, but less the cost of fuel related to substitute generation; plus

(b) The actual identifiable fossil and nuclear fuel costs associated with energy purchased for reasons other than identified in paragraph (c) below, but excluding the cost of fuel related to purchases to substitute for the forced outages; plus

(c) The net energy cost of energy purchases, exclusive of capacity or demand charges (irrespective of the designation assigned to such transaction) when such energy is purchased on an economic dispatch basis. Included therein may be such costs as the charges for economy energy purchases and the charges as a result of scheduled outages, all such kinds of energy being purchased by the buyer to substitute for its own higher cost energy; and less

(d) The cost of fossil fuel recovered through inter-system sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

(e) All fuel costs shall be based on weighted average inventory costing.

(3) Forced outages are all non-scheduled losses of generation or transmission which require substitute power for a continuous period in excess of six (6) hours. Where forced outages are not as a result of faulty equipment, faulty manufacture, faulty design, faulty installations, faulty operation, or faulty maintenance, but are Acts of God, riot, insurrection or acts of the public enemy, then the utility may, upon proper showing, with the approval of the Commission, include the fuel cost of substitute energy in the adjustment. Until such approval is obtained, in making the calculations of fuel cost (F) in subsection (2)(a) and (b) above, the forced outage costs to be subtracted shall be no less than the fuel cost related to the lost generation. T

Adjustment Clause **FAC**
Fuel Adjustment Clause

(4) Sales (S) shall be all kWh sold, excluding inter-system sales. Where, for any reason, billed system sales cannot be coordinated with fuel costs for the billing period, sales may be equated to the sum of (i) generation, (ii) purchases, (iii) interchange in, less (iv) energy associated with pumped storage operations, less (v) inter-system sales referred to in subsection (2)(d) above, less (vi) total system losses. Utility used energy shall not be excluded in the determination of sales (S). T

(5) The cost of fossil fuel shall include no items other than the invoice price of fuel less any cash or other discounts. The invoice price of fuel includes the cost of the fuel itself and necessary charges for transportation of the fuel from the point of acquisition to the unloading point, as listed in Account 151 of FERC Uniform System of Accounts for Public Utilities and Licensees.

(6) Base (b) period shall be the twelve (12) months ending October 2010 and the base fuel factor is $0.02668 per kWh.

(7) Current (m) period shall be the second month preceding the month in which the Fuel Clause Adjustment Factor is billed.

(8) Pursuant to the Public Service Commission's Order in Case No. 2010-00492 dated May 31, 2011, the Fuel Adjustment Clause will become effective with bills rendered on and after the first billing cycle for July 2011, which begins June 29, 2011.

Adjustment Clause **DSM**

Demand-Side Management Cost Recovery Mechanism

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule is mandatory to Residential Rate RS, Volunteer Fire Department Service Rate VFD, General Service Rate GS, All Electric School Rate AES, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, and Low Emission Vehicle Service Rate LEV. Industrial customers who elect not to participate in a demand-side management program hereunder shall not be assessed a charge pursuant to this mechanism. For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes that create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32, and 33. All other non-residential customers will be defined as "commercial." T

RATE

The monthly amount computed under each of the rate schedules to which this Demand-Side Management Cost Recovery Mechanism is applicable shall be increased or decreased by the DSM Cost Recovery Component (DSMRC) at a rate per kilowatt hour of monthly consumption in accordance with the following formula:

DSMRC = DCR + DRLS + DSMI + DBA + DCCR

Where:

DCR = DSM COST RECOVERY

The DCR shall include all expected costs that have been approved by the Commission for each twelve-month period for demand-side management programs that have been developed through a collaborative advisory process ("approved programs"). Such program costs shall include the cost of planning, developing, implementing, monitoring, and evaluating DSM programs. Program costs will be assigned for recovery purposes to the rate classes whose customers are directly participating in the program. In addition, all costs incurred by or on behalf of the collaborative process, including but not limited to costs for consultants, employees, and administrative expenses, will be recovered through the DCR. Administrative costs that are allocable to more than one rate class will be recovered from those classes and allocated by rate class on the basis of the estimated budget from each program. The cost of approved programs shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DCR for each such rate class.

DRLS = DSM REVENUE FROM LOST SALES

Revenues from lost sales due to DSM programs implemented on and after the effective date of this tariff will be recovered as follows:

1) For each upcoming twelve-month period, the estimated reduction in customer usage (in kWh) as determined for the approved programs shall be multiplied by the non-variable revenue requirement per kWh for purposes of determining the lost revenue to be recovered hereunder from each customer class. The non-variable revenue requirement for the Residential, Volunteer Fire Department, General Service, All Electric School, and Low Emission Vehicle customer classes is defined as the weighted average price per kWh of expected billings under the energy charges contained in the

RATE (continued)

RS, VFD, GS, AES, and LEV rate schedules in the upcoming twelve-month period after deducting the variable costs included in such energy charges. The non-variable revenue requirement for each of the customer classes that are billed under demand and energy rates (rate schedules PS, TODS, and TODP) is defined as the weighted average price per kWh represented by the composite of the expected billings under the respective demand and energy charges in the upcoming twelve-month period, after deducting the variable costs included in the energy charges.

2) The lost revenues for each customer class shall then be divided by the estimated class sales (in kWh) for the upcoming twelve-month period to determine the applicable DRLS surcharge. Recovery of revenue from lost sales calculated for a twelve-month period shall be included in the DRLS for 36 months or until implementation of new rates pursuant to a general rate case, whichever comes first. Revenues from lost sales will be assigned for recovery purposes to the rate classes whose programs resulted in the lost sales.

Revenues collected hereunder are based on engineering estimates of energy savings, expected program participation, and estimated sales for the upcoming twelve-month period. At the end of each such period, any difference between the lost revenues actually collected hereunder and the lost revenues determined after any revisions of the engineering estimates and actual program participation are accounted for shall be reconciled in future billings under the DSM Balance Adjustment (DBA) component.

A program evaluation vendor will be selected to provide evaluation criteria against which energy savings will be estimated for that program. Each program will be evaluated after implementation and any revision of the original engineering estimates will be reflected in both (a) the retroactive true-up provided for under the DSM Balance Adjustment and (b) the prospective future lost revenues collected hereunder.

DSMI = DSM INCENTIVE

For all Energy Impact Programs except Direct Load Control, the DSM incentive amount shall be computed by multiplying the net resource savings expected from the approved programs that are to be installed during the upcoming twelve-month period times fifteen (15) percent, not to exceed five (5) percent of program expenditures. Net resource savings are defined as program benefits less utility program costs and participant costs where program benefits will be calculated on the basis of the present value of Company's avoided costs over the expected life of the program, and will include both capacity and energy savings. For the Energy Education Program, the DSM incentive amount shall be computed by multiplying the annual cost of the approved program times five (5) percent.

The DSM incentive amount related to programs for Residential Rate RS, Volunteer Fire Department Rate VFD, General Service Rate GS, All Electric School Rate AES, Power Rate PS, Time-of-day Secondary Service Rate TODS, Time-of-Day Primary Rate TODP, and Low Emission Vehicle Service Rate LEV shall be divided by the expected kilowatt-hour sales for T
the upcoming twelve-month period to determine the DSMI for such rate class. DSM incentive amounts will be assigned for recovery purposes to the rate classes whose programs created the incentive.

DBA = DSM BALANCE ADJUSTMENT

The DBA shall be calculated on a calendar-year basis and is used to reconcile the difference between the amount of revenues actually billed through the DCR, DRLS, DSMI, DCCR, and previous application of the DBA and the revenues that should have been billed, as follows:

1) For the DCR, the balance adjustment amount will be the difference between the amount billed in a twelve-month period from the application of the DCR unit charge and the actual cost of the approved programs during the same twelve-month period.
2) For the DRLS the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DRLS unit charge and the amount of lost revenues determined for the actual DSM measures implemented during the twelve-month period.
3) For the DSMI, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DSMI unit charge and the incentive amount determined for the actual DSM measures implemented during the twelve-month period.
4) For the DBA, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DBA and the balance adjustment amount established for the same twelve-month period.

The balance adjustment amounts determined on the basis of the above paragraphs (1)-(4) shall include interest applied to the monthly amounts, such interest to be calculated at a rate equal to the average of the “Three-Month Commercial Paper Rate” for the immediately preceding twelve-month period. The total of the balance adjustment amounts shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DBA for such rate class. DSM balance adjustment amounts will be assigned for recovery purposes to the rate classes for which over- or under-recoveries of DSM amounts were realized.

DCCR = DSM CAPITAL COST RECOVERY

The DCCR component is the means by which the Company recovers its capital investments made for DSM programs, as well as an approved rate of return on such capital investments. The Company calculates the DCCR component as follows:

$$DCCR = [(RB)\ (ROR + (ROR - DR)\ (TR / (1 - TR))] + OE$$

a) RB is the total rate base for DCCR projects.
b) ROR is the overall rate of return on DSM Rate Base (RB).
c) DR is the composite debt rate (i.e., the cost of short- and long-term debt) embedded in ROR.
d) TR is the composite federal and state income tax rate that applies to the equity return component of ROR.
e) OE is the sum of the capital-related operating expenses (i.e., depreciation and amortization expense, property taxes, and insurance expense) of the DSM projects to which DCCR applies.

The Company then allocates the DCCR component to the rate class(es) benefitting from the Company's various DSM-related capital investment(s).

CHANGES TO DSMRC

Modifications to other components of the DSMRC shall be made at least thirty days prior to the effective period for billing. Each filing shall include the following information as applicable:

1) A detailed description of each DSM program developed by the collaborative process, the total cost of each program over the twelve-month period, an analysis of expected resource savings, information concerning the specific DSM or efficiency measures to be installed, and any applicable studies that have been performed, as available.
2) A statement setting forth the detailed calculation of the DCR, DRLS, DSMI, DBA, DCCR, and DSMRC.

Each change in the DSMRC shall be placed into effect with bills rendered on and after the effective date of such change.

PROGRAMMATIC CUSTOMER CHARGES

Residential Customer Program Participation Incentives:
The following Demand Side Management programs are available to residential customers receiving service from the Company on the RS, VFD and LEV Standard Electric Rate Schedules.

Residential Load Management / Demand Conservation
The Residential Load Management / Demand Conservation Program employ switches in homes to help reduce the demand for electricity during peak times. The program communicates with the switches to cycle central air conditioning units, heat pumps, electric water heaters, and pool pumps off and on through a predetermined sequence. This program has an approved flexible incentive structure. The current program offering is defined on Sheet No 86.8.

Residential Conservation / Home Energy Performance Program
The on-site audit offers a comprehensive audit from a certified auditor and incentives for residential customers to support the implementation of energy saving measures for a fee of $25. Customers are eligible for incentives of $500 or $1,000 based on customer purchased and installed energy efficiency measures and validated through a follow-up test.

Residential Low Income Weatherization Program (WeCare)

The Residential Low Income Weatherization Program (WeCare) is an education and weatherization program designed to reduce energy consumption of LG&E's low-income customers. The program provides energy audits, energy education, blower door tests, and installs weatherization and energy conservation measures. Qualified customers could receive energy conservation measures ranging from $0 to $2,100 based upon the customer's most recent twelve month energy usage and results of an energy audit.

Smart Energy Profile

The Smart Energy Profile Program provides a portion of KU's highest consuming residential customers with a customized report of tips, tools and energy efficiency programming recommendations based on individual household energy consumption. These reports are benchmarked against similar properties in locality. The report will help the customer understand and make better informed choices as it relates to energy usage and the associated costs. Information presented in the report will include a comparison of the customer's energy usage to that of similar houses (collectively) and a comparison to the customer's own energy usage in the prior year.

Residential Incentives Program

The Residential Incentives Program encourages customers to purchase and install various ENERGY STAR® appliances, HVAC equipment, or window films that meet certain requirements, qualifying them for an incentive as noted in the table below.

Category	Item	Incentive
Appliances	Heat Pump Water Heaters (HPWH)	$300 per qualifying item purchased
	Washing Machine	$75 per qualifying item purchased
	Refrigerator	$100 per qualifying item purchased
	Freezer	$50 per qualifying item purchased
	Dishwasher	$50 per qualifying item purchased
Window Film	Window Film	Up to 50% of materials cost only; max of $200 per customer account; product must meet applicable criteria.
HVAC	Central Air Conditioner	$100 per Energy Star item purchased plus an additional $100 per SEER improvement above minimum
	Electric Air-Source Heat Pump	$100 per Energy Star item purchased plus additional $100 per SEER improvement above minimum

Residential Refrigerator Removal Program

The Residential Refrigerator Removal Program is designed to provide removal and recycling of working, inefficient secondary refrigerators and freezers from KU customer households. Customers participating in this program will be provided a one-time incentive. This program has an approved flexible incentive structure. The current program offering is defined on Sheet No 86.8.

Residential High Efficiency Lighting Program

The Residential High Efficiency Lighting program promotes an increased use of ENERGY STAR® rated CFLs within the residential sector. The Residential High Efficiency Lighting Program distributes compact fluorescent bulbs through direct-mail.

Residential New Construction Program

The Residential New Construction program is designed to reduce residential energy usage and facilitate market transformation by creating a shift in builders' new home construction to include energy-efficient construction practices. Builders who are part of the program can take advantage of technical training classes, gain additional exposure to potential customers and receive incentives to help offset costs when including more energy-efficient features during home construction. KU will reimburse the cost of plan reviews and inspection costs related to an Energy Star or HERS home certification.

Residential HVAC Diagnostics and Tune Up Program

The Residential HVAC Diagnostic and Tune-up program targets customers with HVAC system performance issues. There are no incentives paid directly to customers. Customers are charged a discounted, fixed-fee for the diagnosis and if needed, a similar fee for implementation of corrective actions. Thus, the program pays the portion of diagnostic and tune-up cost in excess of the customer charge below. The customer cost is as follows:

- Customer cost is $35 per unit for diagnostics test
- Customer cost is $50 per unit for tune-up

Customer Education and Public Information

These programs help customers make sound energy-use decisions, increase control over energy bills and empower them to actively manage their energy usage. Customer Education and Public Information is accomplished through two processes: a mass-media campaign and an elementary- and middle-school program. The mass media campaign includes public-service advertisements that encourage customers to implement steps to reduce their energy usage. The elementary and middle school program provides professional development and innovative materials to K-8 schools to teach concepts such as basic energy and energy efficiency concepts.

Dealer Referral Network

The Dealer Referral Network assists customers in identifying qualified service providers to install energy efficiency improvements recommended and/ or subsidized by the various energy efficiency programs.

Commercial Customer Program Participation Incentives:
The following Demand Side Management programs are available to commercial customers receiving service from the Company on the GS, AES, PS, TODS, and TODP Standard Electric Rate Schedules.

Commercial Load Management / Demand Conservation
The Commercial Load Management / Demand Conservation Program employ switches or interfaces to customer equipment, in small and large commercial businesses to help reduce the demand for electricity during peak times. The Program communicates with the switches or interface to cycle equipment. This program has an approved flexible incentive structure. The current program offering is defined on Sheet No 86.8.

Commercial Conservation (Energy Audits) / Commercial Incentives
The Commercial Conservation / Commercial Inventive Program is designed to provide energy efficiency opportunities for the Companies' commercial class customers through energy audits and to increase the implementation of energy efficiency measures by providing financial incentives to assist with the replacement of aging and less efficient equipment. Incentives available to all commercial customers are based upon a $100 per kW removed for calculated efficiency improvements. A prescriptive list provides customers with incentive values for various efficiency improvements projects. Additionally, a custom rebate is available based upon company engineering validation of sustainable KW removed.

- Maximum annual incentive per facility is $50,000
- Customers can receive multi-year incentives in a single year where such multi-year incentives do not exceed the aggregate of $100,000 per facility and no incentive was provided in the immediately preceding year
- Applicable for combined Prescriptive and Custom Rebates

Commercial HVAC Diagnostics and Tune Up Program
The Commercial HVAC Diagnostic and Tune-up program targets customers with HVAC system performance issues. There are no incentives paid directly to customers. Customers are charged a discounted, fixed-fee for the diagnosis and if needed, a similar fee for implementation of corrective actions. Thus, the program pays the portion of diagnostic and tune-up cost in excess of the customer charge below. The customer cost is as follows:

- Customer cost is $50 per unit for diagnostics test
- Customer cost is $100 per unit for tune-up

Customer Education and Public Information
These programs help customers make sound energy-use decisions, increase control over energy bills and empower them to actively manage their energy usage. Customer Education and Public Information is accomplished through two processes: a mass-media campaign and an elementary- and middle-school program. The mass media campaign includes public-service advertisements that encourage customers to implement steps to reduce their energy usage. The elementary and middle school program provides professional development and

innovative materials to K-8 schools to teach concepts such as basic energy and energy efficiency concepts.

Dealer Referral Network
The Dealer Referral Network assists customers in identifying qualified service providers to install energy efficiency improvements recommended and/ or subsidized by the various energy efficiency programs.

Current Program Incentive Structures

Residential Load Management / Demand Conservation
Switch Option:
- $5/month bill credit for June, July, August, & September per air conditioning unit or heat pump on single family home.
- $2/month bill credit for June, July, August, & September per electric water heater or swimming pool pump on single family home.
- If new customer registers by May 31, 2012, then a $10 gift card per air-conditioning unit, heat pump, water-heater and/or swimming pool pump switch installed.
  - Customers in a tenant landlord relationship will receive the entire $10 new customer incentive.

Multi-family Option:
- $2/month bill credit per customer for June, July, August, & September.
- $2/month incentive per air conditioning or heat pump switch to the premise owner for June, July, August, & September.
- If new customer registers by May 31, 2012, then a $10 gift card per air-conditioning unit or heat pump installed.
  - Customers in a tenant landlord relationship where the entire complex participates will split the new customer incentive with the property owner.
  - Customers in a tenant landlord relationship where only a portion of the complex participates, the tenant will receive a $5 new customer incentive.

Residential Refrigerator Removal Program
The program provides $30 per working refrigerator or freezer.

Commercial Load Management / Demand Conservation
Switch Option
- $5 per month bill credit for June, July, August, & September for air conditioning units up to 5 tons. An additional $1 per month bill credit for each additional ton of air conditioning above 5 tons based upon unit rated capacity.

Customer Equipment Interface Option
The Company will offer a Load Management / Demand Response program tailored to a commercial customer's ability to reduce load. Program participants must commit to a minimum of 50KW demand reduction per control event. The Company will continue to enroll program participants until10MW curtailable load is achieved.
- $25 per KW for verified load reduction during June, July, August, & September.
- The customer will have access to at least hourly load data for every month of the year which they remain enrolled in the program.

- Additional customer charges may be incurred for metering equipment necessary for this program at costs under other tariffs.

Adjustment Clause **DSM**

Demand-Side Management Cost Recovery Mechanism

Monthly Adjustment Factors

Residential Service Rate RS, Volunteer Fire Department Service Rate VFD, and Low Emission Vehicle Service Rate LEV	Energy Charge
DSM Cost Recovery Component (DCR)	$ 0.00133 per kWh
DSM Revenues from Lost Sales (DRLS)	$ 0.00075 per kWh
DSM Incentive (DSMI)	$ 0.00006 per kWh
DSM Capital Cost Recovery Component (DCCR)	$ 0.00049 per kWh
DSM Balance Adjustment (DBA)	$(0.00040) per kWh
Total DSMRC for Rates RS, VFD and LEV	$ 0.00223 per kWh

General Service Rate GS	Energy Charge
DSM Cost Recovery Component (DCR)	$ 0.00065 per kWh
DSM Revenues from Lost Sales (DRLS)	$ 0.00085 per kWh
DSM Incentive (DSMI)	$ 0.00003 per kWh
DSM Capital Cost Recovery Component (DCCR)	$ 0.00007 per kWh
DSM Balance Adjustment (DBA)	$(0.00006) per kWh
Total DSMRC for Rates GS	$ 0.00154 per kWh

All Electric School Rate AES	Energy Charge
DSM Cost Recovery Component (DCR)	$ 0.00018 per kWh
DSM Revenues from Lost Sales (DRLS)	$ 0.00019 per kWh
DSM Incentive (DSMI)	$ 0.00001 per kWh
DSM Capital Cost Recovery Component (DCCR)	$ 0.00000 per kWh
DSM Balance Adjustment (DBA)	$(0.00008) per kWh
Total DSMRC for Rate AES	$ 0.00030 per kWh

Commercial Customers Served Under Power Service Rate PS, Time of Day Secondary Service Rate TODS, and Time-of-Day Primary Service Rate TODP	Energy Charge
DSM Cost Recovery Component (DCR)	$ 0.00020 per kWh
DSM Revenues from Lost Sales (DRLS)	$ 0.00026 per kWh
DSM Incentive (DSMI)	$ 0.00001 per kWh
DSM Capital Cost Recovery Component (DCCR)	$ 0.00000 per kWh
DSM Balance Adjustment (DBA)	$ 0.00001 per kWh
Total DSMRC for Rates PS, TODS, and TODP	$ 0.00048 per kWh

Industrial Customers Served Under Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, and Retail Transmission Rate RTS	Energy Charge
DSM Cost Recovery Component (DCR)	$ 0.00000 per kWh
DSM Revenues from Lost Sales (DRLS)	$ 0.00000 per kWh
DSM Incentive (DSMI)	$ 0.00000 per kWh
DSM Capital Cost Recovery Component (DCCR)	$ 0.00000 per kWh
DSM Balance Adjustment (DBA)	$ 0.00000 per kWh
Total DSMRC for Rates PS, TODS, TODP, and RTS	$ 0.00000 per kWh

Adjustment Clause **ECR**
Environmental Cost Recovery Surcharge

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule is mandatory to all Standard Electric Rate Schedules listed in Section 1 of the General Index except CTAC and Special Charges, all Pilot Programs listed in Section 3 of the General Index, and the FAC and DSM Adjustment Clauses. Standard Electric Rate Schedules subject to this schedule are divided into Group 1 or Group 2 as follows:

Group 1: Rate Schedules RS; VFD; AES; LS; RLS; LE; TE; and Pilot Program LEV. T
Group 2: Rate Schedules GS; PS; TODS; TODP; RTS; and FLS.

T

RATE

The monthly billing amount under each of the schedules to which this mechanism is applicable, shall be increased or decreased by a percentage factor calculated in accordance with the following formula.

Group Environmental Surcharge Billing Factor = Group E(m) / Group R(m)

As set forth below, Group E(m) is the sum of Jurisdictional E(m) of each approved environmental compliance plan revenue requirement of environmental compliance costs for the current expense month allocated to each of Group 1 and Group 2. Group R(m) for Group 1 is the 12-month average revenue for the current expense month and for Group 2 it is the 12-month average non-fuel revenue for the current expense month.

DEFINITIONS

1) For all Plans, E(m) = [(RB/12) (ROR + (ROR – DR) (TR / (1 – TR))] + OE – EAS + BR T
   a) RB is the Total Environmental Compliance Rate Base.
   b) ROR is the Rate of Return on Environmental Compliance Rate Base, designated as the overall rate of return [cost of short-term debt, long-term debt, preferred stock, and common equity].
   c) DR is the Debt Rate [cost of short-term debt, and long-term debt].
   d) TR is the Composite Federal and State Income Tax Rate.
   e) OE is the Operating Expenses. OE includes operation and maintenance expense recovery authorized by the K.P.S.C. in all approved ECR Plan proceedings. T
   f) EAS is the total proceeds from emission allowance sales applicable to the pre-2011 Plans only. T
   g) BR is the operation and maintenance expenses, and/or revenues if applicable, associated with Beneficial Reuse applicable to the pre-2011 Plans only.
   h) Plans are the environmental surcharge compliance plans submitted to and approved by the Kentucky Public Service Commission pursuant to KRS 278.183.

Adjustment Clause **ECR**
Environmental Cost Recovery Surcharge

2) Total E(m) (sum of each approved environmental compliance plan revenue requirement) is multiplied by the Jurisdictional Allocation Factor. Jurisdictional E(m) is adjusted for any (Over)/Under collection or prior period adjustment and by the subtraction of the Revenue Collected through Base Rates for the Current Expense month to arrive at Adjusted Net Jurisdictional E(m). Adjusted Net Jurisdictional E(m) is allocated to Group 1 and Group 2 on the basis of Revenue as a Percentage of Total Revenue for the 12 months ending with the Current Month to arrive at Group 1 E(m) and Group 2 E(m).

3) The Group 1 R(m) is the average of total Group 1 monthly base revenue for the 12 months ending with the current expense month. Base revenue includes the customer, energy, and lighting charges for each rate schedule included in Group 1 to which this mechanism is applicable and automatic adjustment clause revenues for the Fuel Adjustment Clause and the Demand-Side Management Cost Recovery Mechanism as applicable for each rate schedule in Group 1.

4) The Group 2 R(m) is the average of total Group 2 monthly base non-fuel revenue for the 12 months ending with the current expense month. Base non-fuel revenue includes the customer, non-fuel energy, and demand charges for each rate schedule included in Group 2 to which this mechanism is applicable and automatic adjustment clause revenues for the Demand-Side Management Cost Recovery Mechanism as applicable for each rate schedule in Group 2. Non-fuel energy is equal to the tariff energy rate for each rate schedule included in Group 2 less the base fuel factor as defined on Sheet No. 85.1, Paragraph 6.

5) Current expense month (m) shall be the second month preceding the month in which the Environmental Surcharge is billed.

Adjustment Clause **FF**

Franchise Fee Rider

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Available as an option for collection of revenues within governmental jurisdictions which impose on Company franchise fees, permitting fees, local taxes or other charges by ordinance, franchise, or other governmental directive and not otherwise collected in the charges of Company's base rate schedules.

DEFINITIONS

Base Year - the twelve month period ending November 30.
Collection Year - the full calendar year following the Base Year.
Base Year Amount -

1) a percentage of revenues, as determined in the franchise agreement, for the Base Year; and
2) license fees, permit fees, or other costs specifically borne by Company for the purpose of maintaining the franchise as incurred in the Base Year and applicable specifically to Company by ordinance or franchise for operation and maintenance of its facilities in the franchise area, including but not limited to costs incurred by Company as a result of governmental regulation or directives requiring construction or installation of facilities beyond that normally provided by Company in accordance with applicable Rules and Regulations approved by and under the direction of the Kentucky Public Service Commission; and
3) any adjustment for over or under collection of revenues associated with the amounts in 1) or 2).

RATE

The franchise percentage will be calculated by dividing the Base Year amount by the total revenues in the Base Year for the franchise area. The franchise percentage will be monitored during the Collection Year and adjusted to recover the Base Year Amount in the Collection Year as closely as possible.

BILLING

1) The franchise charge will be applied exclusively to the base rate and all riders of bills of customers receiving service within the franchising governmental jurisdiction, before taxes.
2) The franchise charge will appear as a separate line item on the Customer's bill and show the unit of government requiring the franchise.
3) Payment of the collected franchise charges will be made to the governmental franchising body as agreed to in the franchise agreement.

TERM OF CONTRACT

As agreed to in the franchise agreement. In the event such franchise agreement should lapse but payment of franchise fees, other local taxes, or permitting fees paid by Company by ordinance, franchise, or other governmental directive should continue, collection shall continue under this tariff.

TERMS AND CONDITIONS

Service will be furnished in accordance with the provisions of the franchise agreement in so far as those provisions do not conflict with the Terms and Conditions applicable to Company approved by and under the direction of the Kentucky Public Service Commission.

Adjustment Clause **ST**
School Tax

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule is applied as a rate increase to all other schedules pursuant to KRS 160.617 for the recovery by the utility of school taxes in any county requiring a utility gross receipts license tax for schools under KRS 160.613.

RATE

The utility gross receipts license tax authorized under state law.

Adjustment Clause **HEA**
Home Energy Assistance Program

APPLICABLE
In all territory served.

AVAILABILITY
To all residential customers.

RATE
$0.16 per meter per month.

BILLING
The HEA charge shall be shown as a separate item on customer bills.

SERVICE PERIOD
The Home Energy Assistance charge will be applied to all residential electric bills rendered during the billing cycles commencing October 1, 2007 through September 30, 2015, or as otherwise directed by the Public Service Commission. Proceeds from this charge will be used to fund residential low-income demand-side management Home Energy Assistance programs which have been designed through a collaborative advisory process and then filed with, and approved by, the Commission.

TERMS AND CONDITIONS

Customer Bill of Rights

As a residential customer of a regulated public utility in Kentucky, you are guaranteed the following rights subject to Kentucky Revised Statutes and the provisions of the Kentucky Public Service Commission Administrative Regulations:

- You have the right to service, provided you (or a member of your household whose debt was accumulated at your address) are not indebted to the utility.
- You have the right to inspect and review the utility's rates and tariffed operating procedures during the utility's normal office hours.
- You have the right to be present at any routine utility inspection of your service conditions.
- You must be provided a separate, distinct disconnect notice alerting you to a possible disconnection of your service, if payment is not received.
- You have the right to dispute the reasons for any announced termination of your service.
- You have the right to negotiate a partial payment plan when your service is threatened by disconnection for non-payment.
- You have the right to participate in equal, budget payment plans for your natural gas and electric service.
- You have the right to maintain your utility service for up to thirty (30) days upon presentation of a medical certificate issued by a health official.
- You have the right to prompt (within 24 hours) restoration of your service when the cause for discontinuance has been corrected.
- If you have not been disconnected, you have the right to maintain your natural gas and electric service for up to thirty (30) days, provided you present a Certificate of Need issued by the Kentucky Cabinet for Human Resources between the months of November and the end of March.
- If you have been disconnected due to non-payment, you have the right to have your natural gas or electric service reconnected between the months of November through March provided you:
  1) Present a Certificate of Need issued by the Kentucky Cabinet for Human Resources, and
  2) Pay one third (1/3) of your outstanding bill ($200 maximum), and
  3) Accept referral to the Human Resources' Weatherization Program, and
  4) Agree to a repayment schedule that will cause your bill to become current by October 15.
- You have the right to contact the Public Service Commission regarding any dispute that you have been unable to resolve with your utility (call Toll Free 1-800-772-4636).

TERMS AND CONDITIONS

General

COMMISSION RULES AND REGULATIONS

All electric service supplied by Company shall be in accordance with the applicable rules and regulations of the Public Service Commission of Kentucky.

COMPANY TERMS AND CONDITIONS

In addition to the rules and regulations of the Commission, all electric service supplied by Company shall be in accordance with these Terms and Conditions, which shall constitute a part of all applications and contracts for service.

RATES, TERMS AND CONDITIONS ON FILE

A copy of the rate schedules, terms, and conditions under which electric service is supplied is on file with the Public Service Commission of Kentucky. A copy of such rate schedules, terms and conditions, together with the law, rules, and regulations of the Commission, is available for public inspection in each office of Company where bills may be paid.

ASSIGNMENT

No order for service, agreement or contract for service may be assigned or transferred without the written consent of Company.

RENEWAL OF CONTRACT

If, upon the expiration of any service contract for a specified term, the customer continues to use the service, the contract (unless otherwise provided therein) will be automatically renewed for successive periods of one (1) year each, subject to termination at the end of any year upon thirty (30) days prior written notice by either party.

AGENTS CANNOT MODIFY AGREEMENT WITHOUT CONSENT OF P.S.C. OF KY.

No agent has power to amend, modify, alter, or waive any of these Terms and Conditions, or to bind Company by making any promises or representations not contained herein.

SUPERSEDE PREVIOUS TERMS AND CONDITIONS

These Terms and Conditions supersede all terms and conditions under which Company has previously supplied electric service.

TERMS AND CONDITIONS

Customer Responsibilities

APPLICATION FOR SERVICE

A written application or contract, properly executed, may be required before Company is obligated to render electric service. Company shall have the right to reject for valid reasons any such application or contract.

All applications for service shall be made in the legal name of the party desiring the service.

Where an unusual expenditure for construction or equipment is necessary or where the proposed manner of using electric service is clearly outside the scope of Company's standard rate schedules, Company may establish special contracts giving effect to such unusual circumstances. Customer accepts that non-standard service may result in the delay of required maintenance or, in the case of outages, restoration of service.

TRANSFER OF APPLICATION

Applications for electric service are not transferable and new occupants of premises will be required to make application for service before commencing the use of electricity. Customers who have been receiving electric service shall notify Company when discontinuance of service is desired, and shall pay for all electric service furnished until such notice has been given and final meter readings made by Company.

CONTRACTED DEMANDS

For rate applications where billing demand minimums are determined by the Contract Demand customer shall execute written Contract prior to rendering of service. At Company’s sole discretion, in lieu of a written contract, a completed load data sheet or other written load specification, as provided by Customer, can be used to determine the maximum load on Company’s system for determining Contract Demand minimum.

OPTIONAL RATES

If two or more rate schedules are available for the same class of service, it is Customer’s responsibility to determine the options available and to designate the schedule under which customer desires to receive service.

Company will, at any time, upon request, advise any customer as to the most advantageous rate for existing or anticipated service requirements as defined by the customer, but Company does not assume responsibility for the selection of such rate or for the continuance of the lowest annual cost under the rate selected.

In those cases in which the most favorable rate is difficult to predetermine, Customer will be given the opportunity to change to another schedule, unless otherwise prevented by the rate schedule under which Customer is currently served, after trial of the schedule originally designated; however, after the first such change, Company shall not be required to make a change in schedule more often than once in twelve (12) months.

TERMS AND CONDITIONS

Customer Responsibilities

From time to time, Customer should investigate Customer's operating conditions to determine a desirable change from one available rate to another. Company, lacking knowledge of changes that may occur at any time in Customer's operating conditions, does not assume responsibility that Customer will at all times be served under the most beneficial rate.

In no event will Company make refunds covering the difference between the charges under the rate in effect and those under any other rate applicable to the same class of service.

CUSTOMER'S EQUIPMENT AND INSTALLATION

Customer shall furnish, install, and maintain at Customer's expense all electrical apparatus and wiring to connect with Company's service drop or service line. All such apparatus and wiring shall be installed and maintained in conformity with applicable statutes, laws or ordinances and with the rules and regulations of the constituted authorities having jurisdiction. Customer shall not install wiring or connect and use any motor or other electricity-using device which in the opinion of Company is detrimental to its electric system or to the service of other customers of Company. Company assumes no responsibility whatsoever for the condition of Customer's electrical wiring, apparatus, or appliances, nor for the maintenance or removal of any portion thereof.

In the event Customer builds or extends its own transmission or distribution system over property Customer owns, controls, or has rights to, and said system extends or may extend into the service territory of another utility company, Customer will notify Company of their intention in advance of the commencement of construction.

OWNER'S CONSENT TO OCCUPY

Customer shall grant easements and rights-of-way on and across Customer's property at no cost to Company.

ACCESS TO PREMISES AND EQUIPMENT

Company shall have the right of access to Customer's premises at all reasonable times for the purpose of installing, meter reading, inspecting, repairing, or removing its equipment used in connection with its supply of electric service or for the purpose of turning on and shutting off the supply of electricity when necessary and for all other proper purposes. Customer shall not construct or permit the construction of any structure or device which will restrict the access of Company to its equipment for any of the above purposes.

PROTECTION OF COMPANY'S PROPERTY

Customers will be held responsible for tampering, interfering with, breaking of seals of meters, or other equipment of Company installed on Customer's premises, and will be held liable for same according to law. Customer hereby agrees that no one except the employees of Company shall be allowed to make any internal or external adjustments of any meter or any other piece of apparatus which shall be the property of Company.

TERMS AND CONDITIONS

Customer Responsibilities

POWER FACTOR

Company installs facilities to supply power to Customer at or near unity power factor.

Company expects any customer to use apparatus which shall result in a power factor near unity. However, Company will permit the use of apparatus which shall result, during normal operation, in a power factor not lower than 90 percent either lagging or leading.

Where Customer’s power factor is less than 90 percent, Company reserves the right to require Customer to furnish, at Customer’s own expense, suitable corrective equipment to maintain a power factor of 90 percent or higher.

EXCLUSIVE SERVICE ON INSTALLATION CONNECTED

Except in cases where Customer has a contract with Company for reserve or auxiliary service, no other electric light or power service will be used by Customer on the same installation in conjunction with Company's service, either by means of a throw-over switch or any other connection.

LIABILITY

Customer assumes all responsibility for the electric service upon Customer's premises at and from the point of delivery of electricity and for the wires and equipment used in connection therewith, and will protect and save Company harmless from all claims for injury or damage to persons or property occurring on Customer's premises or at and from the point of delivery of electricity, occasioned by such electricity or said wires and equipment, except where said injury or damage will be shown to have been occasioned solely by the negligence of Company.

NOTICE TO COMPANY OF CHANGES IN CUSTOMER’S LOAD

The service connections, transformers, meters, and appurtenances supplied by Company for the rendition of electric service to its customers have a definite capacity which may not be exceeded without damage. In the event that Customer contemplates any material increase in Customer’s connected load, whether in a single increment or over an extended period, Customer shall immediately give Company written notice of this fact so as to enable it to enlarge the capacity of such equipment. In case of failure to give such notice Customer may be held liable for any damage done to meters, transformers, or other equipment of Company caused by such material increase in Customer's connected load. Should Customer make a permanent change in the operation of electrical equipment that materially reduces the maximum load required by Customer, Company may reduce Customer’s contract capacity.

T

TERMS AND CONDITIONS

Customer Responsibilities

PERMITS

Customer shall obtain or cause to be obtained all permits, easements, or certificates, except street permits, necessary to give Company or its agents access to Customer's premises and equipment and to enable its service to be connected therewith. In case Customer is not the owner of the premises or of intervening property between the premises and Company's distribution lines the customer shall obtain from the proper owner or owners the necessary consent to the installation and maintenance in said premises and in or about such intervening property of all such wiring or other customer-owned electrical equipment as may be necessary or convenient for the supply of electric service to customer. Provided, however, to the extent permits, easements, or certificates are necessary for the installation and maintenance of Company-owned facilities, Company shall obtain the aforementioned consent. T

The construction of electric facilities to provide service to a number of customers in a manner consistent with good engineering practice and the least public inconvenience sometimes requires that certain wires, guys, poles, or other appurtenances on a customer's premises be used to supply service to neighboring customers. Accordingly, each customer taking Company's electric service shall grant to Company such rights on or across his or her premises as may be necessary to furnish service to neighboring premises, such rights to be exercised by Company in a reasonable manner and with due regard for the convenience of Customer.

Company shall make or cause to be made application for any necessary street permits, and shall not be required to supply service under Customer's application until a reasonable time after such permits are granted.

TERMS AND CONDITIONS

Company Responsibilities

METERING

The electricity used will be measured by a meter or meters to be furnished and installed by Company at its expense and all bills will be calculated upon the registration of said meters. When service is supplied by Company at more than one delivery point on the same premises, each delivery point will be metered and billed separately on the rate applicable. Meters include all measuring instruments. Meters will be located outside whenever possible. Otherwise, meters will be located as near as possible to the service entrance and on the ground floor of the building, in a clean, dry, safe and easily accessible place, free from vibration, agreed to by Company.

POINT OF DELIVERY OF ELECTRICITY

The point of delivery of electrical energy supplied by Company shall be at the point, as designated by Company, where Company's facilities are connected with the facilities of Customer, irrespective of the location of the meter.

EXTENSION OF SERVICE

The main transmission lines of Company, or branches thereof, will be extended to such points as provide sufficient load to justify such extensions or in lieu of sufficient load, Company may require such definite and written guarantees from a customer, or group of customers, in addition to any minimum payments required by the Tariff as may be necessary. This requirement may also be made covering the repayment, within a reasonable time, of the cost of tapping such existing lines for light or power service or both.

COMPANY'S EQUIPMENT AND INSTALLATION

Company will furnish, install, and maintain at its expense the necessary overhead service drop or service line required to deliver electricity at the voltage contracted for, to Customer's electric facilities.

Company will furnish, install, and maintain at its expense the necessary meter or meters. (The term meter as used here and elsewhere in these rules and regulations shall be considered to include all associated instruments and devices, such as current and potential transformers installed for the purpose of measuring deliveries of electricity to the customer.) Suitable provision for Company's meter, including an adequate protective enclosure for the same if required, shall be made by Customer. Title to the meter shall remain in Company, with the right to install, operate, maintain, and remove same. Customer shall protect such property of Company from loss or damage, and no one who is not an agent of Company shall be permitted to remove, damage, or tamper with the same. Customer shall execute such reasonable form of easement agreement as may be required by Company.

Notwithstanding the provisions of 807 KAR 5:006, Section 13(4), a reasonable time shall be allowed subsequent to Customer's service application to enable Company to construct or install the facilities required for such service. In order that Company may make suitable provision for enlargement, extension or alteration of its facilities, each applicant for commercial or industrial service shall furnish Company with realistic estimates of prospective electricity requirements.

TERMS AND CONDITIONS

Company Responsibilities

COMPANY NOT LIABLE FOR INTERRUPTIONS

Company will exercise reasonable care and diligence in an endeavor to supply service continuously and without interruption but does not guarantee continuous service and shall not be liable for any loss or damage resulting from interruption, reduction, delay or failure of electric service not caused by the willful negligence of Company, or resulting from any cause or circumstance beyond the reasonable control of Company.

COMPANY NOT LIABLE FOR DAMAGE ON CUSTOMER'S PREMISES

Company is merely a supplier of electricity delivered to the point of connection of Company's and Customer's facilities, and shall not be liable for and shall be protected and held harmless for any injury or damage to persons or property of Customer or of third persons resulting from the presence, use or abuse of electricity on Customer's premises or resulting from defects in or accidents to any of Customer's wiring, equipment, apparatus, or appliances, or resulting from any cause whatsoever other than the negligence of Company

LIABILITY

In no event shall Company have any liability to Customer or any other party affected by the electrical service to Customer for any consequential, indirect, incidental, special, or punitive damages, and such limitation of liability shall apply regardless of claim or theory. In addition, to the extent that Company acts within its rights as set forth herein and/or any applicable law or regulation, Company shall have no liability of any kind to Customer or any other party. In the event that the customer's use of Company's service causes damage to Company's property or injuries to persons, Customer shall be responsible for such damage or injury and shall indemnify, defend, and hold Company harmless from any and all suits, claims, losses, and expenses associated therewith.

FIRM SERVICE

Where a customer-generator supplies all or part of the customer-generator's own load and desires Company to provide supplemental or standby service for that load, the customer-generator must contract for such service under Company's Supplemental or Standby Service Rider, otherwise Company has no obligation to supply the non-firm service. This requirement does not apply to Net Metering Service (Rider NMS). T

TERMS AND CONDITIONS

Character of Service

Electric service, under the rate schedules herein, will be 60 cycle, alternating current delivered from Company's various load centers and distribution lines at typical nominal voltages and phases, as available in a given location, as follows:

SECONDARY VOLTAGES

Residential Service -

Single phase 120/240 volts three-wire service or 120/208Y volts three-wire service where network system is available.

Non-Residential Service -

1) Single phase 120/240 volts three-wire service, or 120/208Y volts three-wire service where network system is available.
2) Three phase 240 volts three-wire service, 120/240 volts four-wire service, 480 volts three-wire service, 120-208Y volts four-wire service, or 277/480Y four-wire service.

PRIMARY VOLTAGES

According to location, 2,400/4160Y volts, 7,200/12,470Y volts, or 34,500 volts

TRANSMISSION VOLTAGES

According to location, 69,000 volts, 138,000 volts, or 345,000 volts.

The voltage available to any individual customer shall depend upon the voltage of Company's lines serving the area in which Customer's electric load is located.

RESTRICTIONS

1. Except for minor loads, with approval of company, two-wire service is restricted to those customers on service July 1, 2004.
2. To be eligible for the rate applicable to any delivery voltage other than secondary voltage, Customer must furnish and maintain complete substation structure, transformers, and other equipment necessary to take service at the primary or transmission voltage available at point of connection.
   a) In the event Company is required to provide transformation to reduce an available voltage to a lower voltage for delivery to a customer, Customer shall be served at the rate applicable to the lower voltage; provided, however, that if the same rate is applicable to both the available voltage and the delivery voltage, Customer may be required to make a non-refundable payment to reflect the additional investment required to provide service.
   b) The available voltage shall be the voltage on that distribution or transmission line which Company designates as being suitable from the standpoint of capacity and other operating characteristics for supplying the requirements of Customer.

Date of Issue: June 29, 2012
Date Effective: August 1, 2010
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

TERMS AND CONDITIONS

Residential Rate Specific Terms and Conditions

Residential electric service is available for uses customarily associated with residential occupation, including lighting, cooking, heating, cooling, refrigeration, household appliances, and other domestic purposes.

1. Residential rates are based on service to single family units and are not applicable to multi-family dwellings served through a single meter. Where two or more families occupy a residential building, Company will require, as a condition precedent to the application of the residential rate, that the wiring in the building be so arranged as to permit each family to be served through a separate meter. In those cases where such segregation of wiring would involve undue expense to Customer, Company will allow service to two or more families to be taken through one meter, but in this event the minimum bills of the applicable residential rate shall be multiplied by the number of families thus served, such number of families to be determined on the basis of the number of kitchens in the building. At Customer's option, in lieu of the foregoing, electric service rendered to a multi-family residential building through a single meter will be classified as commercial and billed on the basis of service to one customer at an appropriate non-residential rate.

2. Single family unit service shall include usage of electric energy customarily incidental to home occupations, such as the office of a physician, surgeon, dentist, musician or artist when such occupation is carried on by Customer in his residence.

3. A residential building used by a single family as a home, which is also used to accommodate roomers or boarders for compensation, will be billed at the residential rate provided it does not exceed twelve (12) rooms in size. Such a residential building of more than twelve (12) rooms used to accommodate roomers or borders for compensation will be classified as commercial and billed on the appropriate rate. In determining the room rating of rooming and boarding houses, all wired rooms shall be counted except hallways, vestibules, alcoves, closets, bathrooms, lavatories, garrets, attics, storage rooms, trunk rooms, basements, cellars, porches and private garages.

4. Service used in residential buildings occupied by fraternity or sorority organizations associated with educational institutions will be classified as residential and billed at the residential rate.

5. Where both residential and general or commercial classes of service are supplied through a single meter, such combined service shall be billed at the appropriate non-residential rate. Customer may arrange his wiring so as to separate the general service from the residential service, in which event two meters will be installed by Company and separate residential and general service rates applied to the respective classes of service.

6. If Customer's barns, pump house or other outbuildings are located at such distance from his residence as to make it impracticable to supply service thereto through his residential meter, the separate meter required to measure service to such remotely located buildings will be considered a separate service contract and billed as a separate customer on the applicable non-residential rate.

TERMS AND CONDITIONS

Residential Rate Specific Terms and Conditions

7. Single-phase power service used for domestic purposes will be permitted under Residential Rate RS when measured through the residential meter subject to the conditions set forth below:

   (a) Single-phase motors may be served at 120 volts if the locked-rotor current at rated voltage does not exceed 50 amperes. Motors with locked-rotor current ratings in excess of 50 amperes must be served at 240 volts.

   (b) Single-phase motors of new central residential cooling installations with total locked-rotor ratings of not to exceed 125 amperes (inclusive of any auxiliary motors arranged for simultaneous starting with the compressor) may be connected for across-the-line starting provided the available capacity of Company's electric distribution facilities at desired point of supply is such that, in Company's judgment, the starting of such motors will not result in excessive voltage dips and undue disturbance of lighting service and television reception of nearby electric customers. However, except with Company's express written consent, no new single-phase central residential cooling unit having a total lock-rotor rating in excess of 125 amperes inclusive of auxiliary motors arranged for simultaneous starting with the compressor) shall hereafter be connected to Company's lines, or be eligible for electric service therefrom, unless it is equipped with an approved type of current-limiting device for starting which will reduce the initial and incremental starting current inrush to a maximum of 100 amperes per step. Company shall be furnished with reasonable advance notice of any proposed central residential cooling installation.

   (c) In the case of multi-motored devices arranged for sequential starting of the motors, the above rules are considered to apply to the locked-rotor currents of the individual motors; if arranged for simultaneous starting of the motors, the rules apply to the sum of the locked-rotor currents of all motors so started.

   (d) Any motor or motors served through a separate meter will be billed as a separate customer.

TERMS AND CONDITIONS

BILLING

METER READINGS AND BILLS

Each bill for utility service shall be issued in compliance with 807 KAR 5:006, Section 6.

All bills will be based upon meter readings made in accordance with Company's meter reading schedule. Company, except if prevented by reasons beyond its control, shall read customers meters at least quarterly, except that customer-read meters shall be read at least once during the calendar year.

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty days.

When Company is unable to read Customer's meter after reasonable effort, or when Company experiences circumstances which make actual meter readings impossible or impracticable, Customer may be billed on an estimated basis and the billing will be adjusted as necessary when the meter is read.

In the event Company's meter fails to register properly by reason of damage, accident, etc., Company shall have the right to estimate Customer's consumption during the period of failure on the basis of such factors as Customer's connected load, heating degree days, and consumption during a previous corresponding period and during a test period immediately following replacement of the defective meter.

Bills are due and payable at the office of Company during business hours, or at other locations designated by Company, within twelve (12) calendar days from date of rendition thereof. If full payment is not received within three (3) calendar days after the due date of the bill, a late payment charge will be assessed on the current month’s charges. Beginning October 1, 2010, residential customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice. There will be no adverse credit impact on the customer’s payment and credit record, including credit scoring, both internally and externally, and the account will not be considered delinquent for any purpose if the Company receives the customer’s payment within fifteen days after the date on which the Company issues the customer’s bill.

Failure to receive a bill does not exempt Customer from these provisions of Company’s Terms and Conditions.

READING OF SEPARATE METERS NOT COMBINED

For billing purposes, each meter upon Customer's premises will be considered separately and readings of two (2) or more meters will not be combined except where Company's operating convenience requires the installation of two (2) or more meters upon Customer's premises instead of one (1) meter.

TERMS AND CONDITIONS

BILLING

CUSTOMER RATE ASSIGNMENT

T

If Customer takes service under a rate schedule the eligibility for which contains a minimum or maximum demand parameter (or both), Company will review Customer's demand and usage data at least once annually to determine the rate schedule under which Customer will take service until the next review and rate determination. Company will also conduct such a review and determination upon Customer's request. Company shall not be obligated to change Customer's rate determination based upon detection of a substantial deviation of Customer's demand or usage if, after consultation with Customer, Company determines in its sole discretion that such deviation is not indicative of Customer's likely long-term demand. Similarly, Company may assign Customer to a rate schedule for which Customer would not be eligible based solely on Customer's historical demand or usage, but Company may do so only as part of a review and rate determination that involves consulting with Customer about Customer's likely future demand, as well as Customer's special contract demand, if applicable.

Any such review and rate determination shall be deemed conclusively to be the correct rate determination for Customer for all purposes and for all periods until Company conducts the next such review and determination for Customer. Therefore, Company shall not be liable for any refunds to Customer based upon Customer's rate assignment, and Company shall not seek to back-bill Customer based upon Customer's rate assignment, for any periods between and including such reviews and determinations unless, and only in the event that, a particular review and rate determination are shown to have been materially erroneous at the time they were conducted, in which case Company may be liable for a refund, or may back-bill Customer, only for the period from the erroneous review and determination to the present or the next non-erroneous review and determination, whichever is shorter.

If Company determines during a review as described above that Customer is eligible to take service under more than one rate schedule and that Customer is then taking service under such a rate schedule, Company will not change Customer's rate assignment; it will remain Customer's responsibility to choose between optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1.

If Company determines during a review as described above that Customer is eligible to take service under more than one rate schedule and that Customer is not then taking service under such a rate schedule, Company will (1) provide reasonable notice to Customer of the options available and (2) assign Customer to the rate schedule Company reasonably believes will be most financially beneficial to Customer based on Customer's historical demand and usage, which assignment Company will change upon Customer's request to take service under another rate schedule for which Customer is eligible. Company shall have no refund obligation or bear any other liability or responsibility for its initial assignment of Customer to a rate for which Customer is eligible; it is at all times Customer's responsibility to choose between optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1.

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

TERMS AND CONDITIONS

BILLING

Nothing in this section is intended to curtail or diminish Customer's responsibility to choose among optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1. Likewise, except as explicitly stated in the paragraph above, nothing in this section creates an obligation or responsibility for Company to assign Customer to a particular rate schedule for which Customer is eligible if Customer is eligible for more than one rate schedule. T

CUSTOMER RATE MIGRATION

A change from one rate to another will be effective with the first full billing period following a customer's request for such change, or with a rate change mandated by changes in a customer's load. In cases where a change from one rate to another necessitates a change in metering, the change from one rate to another will be effective with the first full billing period following the meter change.

CLASSIFICATION OF CUSTOMERS

For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes which create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32 and 33. All other non-residential customers will be defined as "commercial."

MONITORING OF CUSTOMER USAGE

In order to detect unusual deviations in individual customer consumption, Company will monitor the usage of each customer at least once annually. In addition, Company may investigate usage deviations brought to its attention as a result of its ongoing meter reading or billing processor customer inquiry. Should an unusual deviation in Customer's consumption be found which cannot be attributed to a readily identified cause, Company may perform a detailed analysis of Customer's meter reading and billing records. If the cause for the usage deviation cannot be determined from analysis of Customer's meter reading and billing records, Company may contact Customer to determine whether there have been changes such as different number of household members or work staff, additional or different appliances, changes in business volume. Where the deviation is not otherwise explained, Company will test Customer's meter to determine whether it shows an average error greater than two (2) percent fast or slow. Company will notify Customer of the investigation, its findings, and any refunds or back-billing in accordance with 807 KAR 5:006, Section 10(4) and (5).

RESALE OF ELECTRIC ENERGY

Electric energy furnished under Company's standard application or contract is for the use of Customer only and Customer shall not resell such energy to any other person, firm, or corporation on the Customer's premises, or for use on any other premises. This does not preclude Customer from allocating Company's billing to Customer to any other person, firm, or corporation provided the sum of such allocations does not exceed Company's billing.

TERMS AND CONDITIONS

BILLING

MINIMUM CHARGE

Without limiting the foregoing, the Demand Charge shall be due regardless of any event or occurrence that might limit (a) Customer's ability or interest in operating Customer's facility, including, but without limitation, any acts of God, fires, floods, earthquakes, acts of government, terrorism, severe weather, riot, embargo, changes in law, or strikes or (b) Company's ability to serve customer. T

TERMS AND CONDITIONS

Deposits

GENERAL

1) Company may require a cash deposit or other guaranty from customers to secure payment of bills in accordance with 807 KAR 5:006, Section 7, except for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 15, Winter Hardship Reconnection.
2) Deposits may be required from all customers not meeting satisfactory credit and payment criteria. Satisfactory credit for customers will be determined by utilizing independent credit sources (primarily utilized with new customers having no prior history with Company), as well as historic and ongoing payment and credit history with Company.
   a) Examples of independent credit scoring resources include credit scoring services, public record financial information, financial scoring and modeling services, and information provided by independent credit/financial watch services.
   b) Satisfactory payment criteria with Company may be established by paying all bills rendered, having no disconnections for nonpayment, having no late notices, having no defaulted credit arrangements, having no returned payments, having no meter diversion or theft of service.
3) Company may offer residential or general service customers the option of paying all or a portion of their deposits in installments over a period not to exceed the first four (4) normal billing periods. Service may be refused or discontinued for failure to pay and/or maintain the requested deposit.
4) Interest on deposits will be calculated at the rate prescribed by law, from the date of deposit, and will be paid annually either by refund or credit to Customer's bills, except that no refund or credit will be made if Customer's bill is delinquent on the anniversary date of the deposit. If interest is paid or credited to Customer's bill prior to twelve (12) months from the date of deposit, the payment or credit will be on a prorated basis. Upon termination of service, the deposit, any principal amounts, and interest earned and owing will be credited to the final bill, with any remainder refunded to Customer.

RESIDENTIAL

1) Residential customers are those customers served under Residential Service, Sheet No. 5.
2) The deposit for a residential customer is in the amount of $135.00, which is calculated in accordance with 807 KAR 5:006, Section 7(1)(b).
3) Company will retain Customer’s deposit for a period not to exceed twelve (12) months, provided Customer has met satisfactory payment and credit criteria.
4) If a deposit is held longer than eighteen (18) months, the deposit will be recalculated at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than $10.00, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
5) If Customer fails to maintain a satisfactory payment or credit record, or otherwise become a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

TERMS AND CONDITIONS

Deposits

GENERAL SERVICE

1) General service customers are those customers served under General Service, Sheet No. 10.
2) The deposit for a general service customer is in the amount of $220.00, which is calculated in accordance with 807 KAR 5:006, Section 7(1)(b). The deposit for a General Service customer may be waived when the General Service delivery is to a detached building used in conjunction with a Residential Service and the General Service usage is no more than 300 kWh per month. T T T T
3) Company shall retain Customer's deposit as long as Customer remains on service.
4) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten (10%) percent, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
5) If Customer fails to maintain a satisfactory payment or credit record, or otherwise becomes a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

.

OTHER SERVICE

1) The deposit for all other customers, those not classified herein as residential or general service, shall not exceed 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly in accordance with 807 KAR 5:006, Section 7(1)(a).
2) For customers not meeting the parameters of GENERAL SERVICE ¶ 2, above, Company may retain Customer's deposit as long as Customer remains on service.
3) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten (10%) percent, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
4) If Customer fails to maintain a satisfactory payment or credit record, or otherwise become a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

Date of Issue: June 29, 2012

TERMS AND CONDITIONS

Budget Payment Plan

Company's Budget Payment Plan is available to any residential customer or general service customer. Under this plan, a customer may elect to pay, each billing period, a budgeted amount in lieu of billings for actual usage. A customer may enroll in this plan at any time.

The budgeted amount will be determined by Company and will be based on one-twelfth of Customer's usage for either an actual or estimated twelve (12) months. The budgeted amount will be subject to review and adjustment by Company at any time during Customer's budget year. If actual usage indicates Customer's account will not be current with the final payment in Customer's budget year, Customer will be required to pay their Budget Payment Plan account to $0 prior to the beginning of the customer's next budget year.

If a customer fails to pay bills as agreed under the Budget Payment Plan, Company reserves the right to remove the customer from the plan, restore the customer to regular billing, and require immediate payment of any deficiency. A customer removed from the Budget Payment Plan for non-payment may be prohibited from further participation in the plan for twelve (12) months.

Failure to receive a bill in no way exempts a customer from the provisions of these terms and conditions.

IMPORTANT INFORMATION

The power to save. It's in your hands. The amount of electricity you consumed during this billing cycle resulted in the production of approximately 1,434 pounds of CO2 (carbon). A typical residential customer uses 1,000 kilowatt hours of electricity per month, which would result in the production of 2,000 lbs. of carbon. Visit our Web site at www.lge-ku.com for Smart Saver tips designed to help you better manage and lessen the environmental impact of your engery usage.

For a copy of your rate schedule, visit www.lge-ku.com or call our Customer Service Department.

If you use mail to submit your payment, please update your records to reflect the new address (located on the front of the bill) stub) for our payment processing center. Remember, you can pay your bill on line when you sign in or register your account at my.lge-ku.com.

New enrollment only - **Please check box(es) below and on front of stub.**

☐ Budget Plan

☐ I would like to enroll in Demand Conservation

☐ Auto Pay (voided check must be provided). *Please note that any past due balance on your LG&E account will be debited from your bank account immediately upon enrollment in the Auto Pay program. To avoid unintended debits to your bank account, please make sure your LG&E account balance is current before enrolling in Auto Pay.*

Please deduct my Auto Pay Payment from my Checking Account.
I hereby authorize KU to debit my bank account for payment of my monthly bill. This authorization applies to all my current and future KU accounts, and will remain in effect until revoked by me or KU.

Signature: ____

Date: ______________________________

Processing Auto Pay requests can take up to two billing cycles. Please continue making regular payments until you receive a bill that indicates the amount due will be deducted from your bank account on the payment due date.

TERMS AND CONDITIONS

Discontinuance of Service

In accordance with and subject to the rules and regulations of the Public Service Commission of Kentucky, Company shall have the right to refuse or discontinue service to an applicant or customer under the following conditions:

A. When Company's or Commission's rules and regulations have not been complied with. However, service may be discontinued or refused only after Company has made a reasonable effort to induce Customer to comply with its rules and then only after Customer has been given at least ten (10) days written notice of such intention, mailed to his last known address.

B. When a dangerous condition is found to exist on Customer's or applicant's premises. In such case service will be discontinued without notice or refused, as the case might be. Company will notify Customer or applicant immediately of the reason for the discontinuance or refusal and the corrective action to be taken before service can be restored or initiated.

C. When Customer or applicant refuses or neglects to provide reasonable access and/or easements to and on his premises for the purposes of installation, operation, meter reading, maintenance, or removal of Company's property. Customer shall be given fifteen (15) days written notice of Company's intention to discontinue or refuse service.

D. When Applicant is indebted to Company for service furnished. Company may refuse to serve until indebtedness is paid.

E. When Customer or Applicant does not comply with state, municipal or other codes, rules and regulations applying to such service.

F. When directed to do so by governmental authority.

G. Service will not be supplied to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same or any other premises until payment of such indebtedness shall have been made. Service will not be continued to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same premises in accordance with 807 KAR 5:006, Section 14(1)(f). Unpaid balances of previously rendered Final Bills may be transferred to any account for which Customer has responsibility and may be included on initial or subsequent bills for the account to which the transfer was made. Such transferred Final Bills, if unpaid, will be a part of the past due balance of the account to which they are transferred. When there is no lapse in service, such transferred Final Bills will be subject to Company’s collections and disconnect procedures in accordance with 807 KAR 5:006, Section 14(1)(f). Final Bills transferred following a lapse in service will not be subject to disconnection unless: (1) such service was provided pursuant to a fraudulent application submitted by Customer; (2) Customer and Company have entered into a contractual agreement which allows for such a disconnection; or (3) the current account is subsequently disconnected for service supplied at that point of delivery, at which time, all unpaid and past due balances must be paid prior to reconnect. Company shall have the right to transfer Final Bills between residential and commercial with residential characteristics (e.g., service supplying common use facilities of any apartment building) revenue classifications.

TERMS AND CONDITIONS

Discontinuance of Service

Service will not be supplied or continued to any premises if at the time of application for service Applicant is merely acting as an agent of a person or former customer who is indebted to Company for service previously supplied at the same or other premises until payment of such indebtedness shall have been made. Service will not be supplied where Applicant is a partnership or corporation whose general partner or controlling stockholder is a present or former customer who is indebted to Company for service previously supplied at the same premises until payment of such indebtedness shall have been made.

H. For non-payment of bills. Company shall have the right to discontinue service for non-payment of bills after Customer has been given at least ten days written notice separate from his original bill. Cut-off may be effected not less than twenty-seven (27) days after the mailing date of original bills unless, prior to discontinuance, a residential customer presents to Company a written certificate, signed by a physician, registered nurse, or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises, in which case discontinuance may be effected not less than thirty (30) days from the original date of discontinuance. Company shall notify Customer, in writing, of state and federal programs which may be available to aid in payment of bills and the office to contact for such possible assistance.

I. For fraudulent or illegal use of service. When Company discovers evidence that by fraudulent or illegal means Customer has obtained unauthorized service or has diverted the service for unauthorized use or has obtained service without same being properly measured, the service to Customer may be discontinued without notice. Within twenty-four (24) hours after such termination, Company shall send written notification to Customer of the reasons for such discontinuance of service and of Customer's right to challenge the termination by filing a formal complaint with the Public Service Commission of Kentucky. Company's right of termination is separate from and in addition to any other legal remedies which the utility may pursue for illegal use or theft of service. Company shall not be required to restore service until Customer has complied with all rules of Company and regulations of the Commission and Company has been reimbursed for the estimated amount of the service rendered and the cost to Company incurred by reason of the fraudulent use.

When service has been discontinued for any of the above reasons, Company shall not be responsible for any damage that may result therefrom.

Discontinuance or refusal of service shall be in addition to, and not in lieu of, any other rights or remedies available to Company.

Company may defer written notice based on Customer's payment history provided Company continues to provide the required ten (10) days written notice prior to discontinuance of service.

Date of Issue: June 29, 2012
Date Effective: February 6, 2009

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

TERMS AND CONDITIONS

Line Extension Plan

A. AVAILABILITY

In all territory served by where Company does not have existing facilities to meet Customer's electric service needs.

B. DEFINITIONS

1) "Company" shall mean Kentucky Utilities Company.
2) "Customer" shall mean the applicant for service. When more than one electric service is requested by an applicant on the same extension, such request shall be considered one customer under this plan when the additional service request(s) is only for incidental or minor convenience loads or when the applicant for service is the developer of a subdivision.
3) "Line Extension" shall mean the single phase facilities required to serve Customer by the shortest route most convenient to Company from the nearest existing adequate Company facilities to Customer's delivery point, approved by Company, and excluding transformers, service drop, and meters, if required and normally provided to like customers.
4) "Permanent Service" shall mean service contracted for under the terms of the applicable rate schedule but not less than one year and where the intended use is not seasonal, intermittent, or speculative in nature.
5) "Commission" shall mean the Public Service Commission of Kentucky.

C. GENERAL

1) All extensions of service will be made through the use of overhead facilities except as provided in these rules.
2) Customer requesting service which requires an extension(s) shall furnish to Company, at no cost, properly executed easement(s) for right-of-way across Customer's property to be served.
3) Customer requesting extension of service into a subdivision, subject to the jurisdiction of a public commission, board, committee, or other agency with authority to zone or otherwise regulate land use in the area and require a plat (or Plan) of the subdivision, Customer shall furnish, at no cost, Company with the plat (or plan) showing street and lot locations with utility easement and required restrictions. Plats (or plans) supplied shall have received final approval of the regulating body and recorded in the office of the appropriate County Court Clerk when required. Should no regulating body exist for the area into which service is to be extended, Customer shall furnish Company the required easement.
4) The title to all extensions, rights-of way, permits, and easements shall be and remain with Company.
5) Where Company is required or elects to construct an additional extension or lateral to serve Customer or another customer, Company reserves the right to connect to any extension constructed under this plan and Customer shall grant to Company, at no cost, properly executed easement(s) for right-of-way across Customer's property for the additional extension or lateral.
6) Customer must agree in writing to take service when the extension is completed and have his building or other permanent facility wired and ready for connection.
7) Nothing herein shall be construed as preventing Company from making electric line extensions under more favorable terms than herein prescribed provided the potential revenue is of such amount and permanency as to warrant such terms and render economically

TERMS AND CONDITIONS

Line Extension Plan

C. GENERAL (continued)

feasible the capital expenditure involved and provided such extensions are made to other customers under similar conditions.

8) Company may require a non-refundable deposit in cases where Customer does not have a real need or in cases where the estimated revenue does not justify the investment.
9) Company shall not be obligated to extend its lines in cases where such extensions, in the good judgment of Company, would be infeasible, impractical, or contrary to good engineering or operating practice, unless otherwise ordered by Commission. T

D. NORMAL LINE EXTENSIONS

1) In accordance with 807 KAR 5:041, Section 11(1), Company will provide, at no cost, a line extension of up to 1,000 feet to Customer requesting permanent service where the installed transformer capacity does not exceed 25 kVA.
2) Where Customer requires poly-phase service or transformer capacity in excess of 25 kVA and Company provides such facilities, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost to Company in providing facilities above that required in NORMAL LINE EXTENSIONS ¶ 1 above.

E. OTHER LINE EXTENSIONS

1) In accordance with 807 KAR 5:041, Section 11(2), Company shall provide to Customer requesting permanent service a line extension in excess of 1,000 feet per customer but Company may require the total cost of the footage in excess of 1,000 feet per customer, based on the average cost per foot of the total extension, be deposited with Company by Customer.
2) Each year for ten (10) years Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension for each additional customer connected during that year directly to the original extension for which the deposit was made.
3) Each year for ten (10) years Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension less the length of the lateral or extension for each additional customer connected during that year by a lateral or extension to the original extension for which the deposit was made.
4) No refund shall be made for additional customers connected to an extension or lateral from the original extension for which the deposit was made.
5) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten (10) year refund period ends.
6) Where Customer requires poly-phase service or transformer capacity above 25 kVA per customer and Company provides such facilities, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost to Company in providing facilities above that required in OTHER LINE EXTENSIONS ¶ 1 above.

F. OVERHEAD LINE EXTENSIONS TO SUBDIVISIONS

1) In accordance with 807 KAR 5:041, Section 11(3), Customer desiring service extended for and through a subdivision may be required by Company to deposit the total cost of the extension.
2) Each year for ten (10) years Company shall refund to Customer, the cost of 1,000 feet of extension for each additional customer connected during that year directly to the original extension for which the deposit was made.
3) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten-year refund period ends.

TERMS AND CONDITIONS

Line Extension Plan

G. MOBILE HOME LINE EXTENSIONS

1) Company will make line extensions for service to mobile homes in accordance with 807 KAR 5:041, Section 12, and Commission's Order, dated August 9, 1991, in Case No. 91-213,
2) Company shall provide, at no cost, a line extension of up to 300 feet to Customer requesting permanent service for a mobile home.
3) Company shall provide to Customer requesting permanent service for a mobile home a line extension in excess of 300 feet and up to 1,000 feet but Company may require the total cost of the footage in excess of 300 feet, based on the average cost per foot of the total extension, be deposited with Company by Customer. Beyond 1,000 feet, the policies set forth in OTHER LINE EXTENSIONS shall apply.
4) Each year for four (4) years Company shall refund to Customer equal amounts of the deposit for the extension from 300 feet to 1,000 feet.
5) If service is disconnected for sixty (60) days, if the original mobile home is removed and not replaced by another mobile home or a permanent structure in sixty (60) days, the remainder of the deposit is forfeited.
6) No refund will be made except to the original customer.

H. UNDERGROUND LINE EXTENSIONS

General

1) Company will make underground line extensions for service to new residential customers and subdivisions in accordance with 807 KAR 5:041, Section 21.
2) In order that Company may make timely provision for materials, and supplies, Company may require Customer to execute a contract for an underground extension under these Terms and Conditions with Company at least six (6) months prior to the anticipated date service is needed and Company may require Customer to deposit with Company at least 10% of any amounts due under the contract at the time of execution. Customer shall deposit the balance of any amounts due under the contract with Company prior to ordering materials or commencement of actual construction by Company of facilities covered by the contract.
3) Customer shall give Company at least 120 days written notice prior to the anticipated date service is needed and Company will undertake to complete installation of its facilities at least thirty (30) days prior to that date. However, nothing herein shall be interpreted to require Company to extend service to portions of subdivisions not under active development.
4) At Company's discretion, Customer may perform a work contribution to Company's specifications, including but not limited to conduit, setting pads, or any required trenching and backfilling, and Company shall credit amounts due from Customer for underground service by Company's estimated cost for such work contribution.
5) Customer will provide, own, operate and maintain all electric facilities on his side of the point of delivery with the exception of Company's meter.
6) In consideration of Customer's underground service, Company shall credit any amounts due under the contract for each service at the rate of $50.00 or Company's average estimated installed cost for an overhead service whichever is greater.
7) Unit charges, where specified herein, are determined from Company's estimate of Company's average unit cost of such construction and the estimated cost differential between underground and overhead distribution systems in representative residential subdivisions.

TERMS AND CONDITIONS

Line Extension Plan

H. UNDERGROUND EXTENSIONS
General (continued)

8) Three phase primary required to supply either individual loads or the local distribution system may be overhead unless Customer chooses underground construction and deposits with Company a non-refundable deposit for the cost differential.

Individual Premises

Where Customer requests and Company agrees to supply underground service to an individual premise, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.

Medium Density Subdivisions

1) A medium density residential subdivision is defined as containing ten or more lots for the construction of new residential buildings each designed for less than five (5)-family occupancy.

2) Customer shall provide any required trenching and backfilling or at Company's discretion be required to deposit with Company a non-refundable amount determined by a unit charge of $8.93 per aggregate lot front-foot along all streets contiguous to the lots to be served through an underground extension.

3) The Customer may be required to advance to the Company the Company's full estimated cost of construction of an underground electric distribution extension. Where Customer is required to provide trenching and backfilling, advance will be the Company's full estimate cost of construction. Where Customer is required to deposit with the Company a non-refundable advance in place of trenching and backfilling, advance will be determined by a unit charge of $20.61 per aggregate lot front-foot along all streets contiguous to the lots to be served through an underground extension.

4) Each year for ten (10) years Company shall refund to Customer an amount determined as follows:
   a. Where customer is required to provide trenching and backfilling, a refund of $5,000 for each customer connected during that year.
   b. Where customer is required to provide a non-refundable advance, 500 times the difference in the unit charge advance amount in 3) and the non-refundable unit charge advance in 2) for each customer connected during that year

5) In no case shall the refunds provided for herein exceed the amounts deposited less any non-refundable charges applicable to the project nor shall any refund be made after a ten-year refund period ends.

TERMS AND CONDITIONS

Line Extension Plan

H. UNDERGROUND EXTENSIONS (continued)

High Density Subdivisions

1) A high density residential subdivision is defined as building complexes consisting of two or more buildings each not more than three stories above grade and each designed for five (5) or more family occupancy.
2) Customer shall provide any required trenching and backfilling or at Company's discretion be required to deposit with Company a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.
3) The Customer may be required to advance to the Company the Company's full estimated cost of construction of an underground electric distribution extension.
   i. Company shall refund to Customer any amounts due when permanent service is provided by Company to twenty (20%) percent of the family units in Customer's project.
   ii. In no case shall the refunds provided for herein exceed the amounts deposited less any non-refundable charges applicable to the project nor shall any refund be made after a ten-year refund period ends. T

Other Underground Subdivisions

In cases where a particular residential subdivision does not meet the conditions provided for above, Customer requests and Company agrees to supply underground service, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.

I. SPECIAL CASES

1) Where Customer requests service that is seasonal, intermittent, speculative in nature, at voltages of 34.5kV or greater, or where the facilities requested by Customer do not meet the Terms and Conditions outlined in previous sections of LINE EXTENSION PLAN and the anticipated revenues do not justify Company's installing facilities required to meet Customer's needs, Company may request that Customer deposit with Company a refundable amount to justify Company's investment. T
2) Each year for ten (10) years Company shall refund to Customer, an amount calculated by:
   a. Adding the sum of Customer's annual base rate monthly electric demand billing for that year to the sum of the annual base rate monthly electric billing of the monthly electric demand billing for that year of any customer(s), who connects directly to the facilities provided for in this agreement and requiring no further investment by Company
   b. times the refundable amount divided by the estimated total ten-year base rate electric demand billing required to justify the investment.
3) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten-year refund period ends.

TERMS AND CONDITIONS

Energy Curtailment and Service Restoration Procedures

PURPOSE

To provide procedures for reducing the consumption of electric energy on the Kentucky Utilities Company (Company) system in the event of a capacity shortage and to restore service following an outage. Notwithstanding any provisions of these Energy Curtailment and Service Restoration Procedures, the Company shall have the right to take whatever steps, with or without notice and without liability on Company's part, that the Company believes necessary, in whatever order consistent with good utility practices and not on an unduly discriminatory basis, to preserve system integrity and to prevent the collapse of the Company's electric system or interconnected electric network or to restore service following an outage. Such actions will be taken giving priority to maintaining service to the Company's retail and full requirements customers relative to other sales whenever feasible and as allowed by law.

ENERGY CURTAILMENT PROCEDURE

PRIORITY LEVELS

For the purpose of these procedures, the following Priority Levels have been established:

I. Essential Health and Safety Uses -- to be given special consideration in these procedures shall, insofar as the situation permits, include the following types of use

A. "Hospitals", which shall be limited to institutions providing medical care to patients.

B. "Life Support Equipment", which shall be limited to kidney machines, respirators, and similar equipment used to sustain the life of a person.

C. "Police Stations and Government Detention Institutions", which shall be limited to essential uses required for police activities and the operation of facilities used for the detention of persons.

D. "Fire Stations", which shall be limited to facilities housing mobile fire-fighting apparatus.

E. "Communication Services", which shall be limited to essential uses required for telephone, telegraph, television, radio and newspaper operations, and operation of state and local emergency services.

F. "Water and Sewage Services", which shall be limited to essential uses required for the supply of water to a community, flood pumping and sewage disposal.

G. "Transportation and Defense-related Services", which shall be limited to essential uses required for the operation, guidance control and navigation of air, rail and mass transit systems, including those uses essential to the national defense and operation of state and local emergency services. These uses shall include essential street, highway and signal-lighting services.

TERMS AND CONDITIONS

Energy Curtailment and Service Restoration Procedures

Although, when practical, these types of uses will be given special consideration when implementing the manual load-shedding provisions of this program, any customer may be affected by rotating or unplanned outages and should install emergency generation equipment if continuity of service is essential. Where the emergency is system-wide in nature, consideration will be given to the use of rotating outages as operationally practicable. In case of customers supplied from two utility sources, only one source will be given special consideration. Also, any other customers who, in their opinion, have critical equipment should install emergency generation equipment.

Company maintains lists of customers with life support equipment and other critical needs for the purpose of curtailments and service restorations. Company, lacking knowledge of changes that may occur at any time in customer's equipment, operation, and backup resources, does not assume the responsibility of identifying customers with priority needs. It shall, therefore, be the customer's responsibility to notify Company if Customer has critical needs.

II. Critical Commercial and Industrial Uses -- Except as described in Section III below, these uses shall include commercial or industrial operations requiring regimented shutdowns to prevent conditions hazardous to the general population, and to energy utilities and their support facilities critical to the production, transportation, and distribution of service to the general population. Company shall maintain a list of such customers for the purpose of curtailments and service restoration.

III. Residential Use -- The priority of residential use during certain weather conditions (for example severe winter weather) will receive precedence over critical commercial and industrial uses. The availability of Company service personnel and the circumstances associated with the outage will also be considered in the restoration of service.

IV. Non-critical commercial and industrial uses.

V. Nonessential Uses -- The following and similar types of uses of electric energy shall be considered nonessential for all customers:

A. Outdoor flood and advertising lighting, except for the minimum level to protect life and property, and a single illuminated sign identifying commercial facilities when operating after dark.

B. General interior lighting levels greater than minimum functional levels.

C. Show-window and display lighting.

D. Parking-lot lighting above minimum functional levels.

E. Energy use to lower the temperature below 78 degrees during operation of cooling equipment and above 65 degrees during operation of heating equipment.

F. Elevator and escalator use in excess of the minimum necessary for non-peak hours of use.

Date of Issue: June 29, 2012
Date Effective: August 1, 2010
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

TERMS AND CONDITIONS

Energy Curtailment and Service Restoration Procedures

G. Energy use greater than that which is the minimum required for lighting, heating, or cooling of commercial or industrial facilities for maintenance cleaning or business-related activities during non-business hours.

Non-jurisdictional customers will be treated in a manner consistent with the curtailment procedures contained in the service agreement between the parties or the applicable tariff.

CURTAILMENT PROCEDURES

In the event Company's load exceeds internal generation, transmission, or distribution capacity, or other system disturbances exist, and internal efforts have failed to alleviate the problem, including emergency energy purchases, the following steps may be taken, individually or in combination, in the order necessary as time permits:

1. Customers having their own internal generation capacity will be curtailed, and customers on curtailable contracts will be curtailed for the maximum hours and load allowable under their contract. Nothing in this procedure shall limit Company's rights under the Curtailable Service Rider tariff.
2. Power output will be maximized at Company's generating units.
3. Company use of energy at its generating stations will be reduced to a minimum.
4. Company's use of electric energy in the operation of its offices and other facilities will be reduced to a minimum.
5. The Kentucky Public Service Commission will be advised of the situation.
6. An appeal will be made to customers through the news media and/or personal contact to voluntarily curtail as much load as possible. The appeal will emphasize the defined priority levels as set forth above.
7. Customers will be advised through the use of the news media and personal contact that load interruption is imminent.
8. Implement procedures for interruption of selected distribution circuits.

SERVICE RESTORATION PROCEDURES

Where practical, priority uses will be considered in restoring service and service will be restored in the order I through IV as defined under PRIORITY LEVELS. However, because of the varieties of unpredictable circumstances which may exist or precipitate outages, it may be necessary to balance specific individual needs with infrastructure needs that affect a larger population. When practical, Company will attempt to provide estimates of repair times to aid customers in assessing the need for alternative power sources and temporary relocations.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)8
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

The utility's proposed tariff changes, identified in compliance with 807 KAR 5:011, shown either by:

(a) Providing the present and proposed tariffs in comparative form on the same sheet side by side or on facing sheets side by side; or,

(b) Providing a copy of the present tariff indicating proposed additions by italicized inserts or underscoring and striking over proposed deletions.

Response:

Please see the attached present and proposed tariffs in comparative form on the same sheet side-by-side. Please note the following:

- On each sheet of the side-by-side comparison the present tariff is on the left and the proposed tariff is on the right.

Standard Rate — AES — All Electric School

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Service under this rate is available where energy requirement for (l) a complex of school buildings on a central campus, (2) an individual school building, or (3) an addition to an existing school building is served electrically by Kentucky Utilities Company; such energy requirement to include, but not be limited to, lighting, heating, cooling and water heating. Other school buildings not so receiving every energy requirement electrically shall be separately metered from the above defined service and served under another appropriate applicable rate. At those locations where the school owns its distribution system and makes the service connections therefrom to the various buildings and/or load centers, the Company shall be given the option of providing service by use of the existing Customer owned distribution system, or of constructing its own facilities in accordance with the Company's Overhead Construction Standards. In any event, the Company's investment in construction may be limited to an amount not exceeding twice the estimated annual revenue from the service so connected. If the Customer desires, he will be allowed to make a contribution for the remaining requirement, so as to receive service under this schedule.

School buildings, as referred to herein, shall be defined as buildings used as classrooms, laboratories, gymnasiums, libraries, cafeterias, school related offices or for other bona fide school purposes by duly constituted school authorities of Kentucky. This Rate Schedule is not available to include buildings of privately operated kindergartens or day care centers and is restricted to those customers receiving service on this rate as of February 6, 2009.

Other fuels may be used as incidental to and for instructional laboratory and other miscellaneous purposes without affecting the availability of this rate.

RATE

Basic Service Charge:	$17.50 per meter per month for single-phase service $32.50 per meter per month for three-phase service
Plus an Energy Charge of:	$ 0.06670 per kWh

Standard Rate — AES — ALL ELECTRIC SCHOOL

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Service under this rate is available for secondary and primary service to: T
(1) a complex of school buildings on a central campus,
(2) an individual school building, or
(3) an addition to an existing school building.

School buildings, as referred to herein, shall be defined as buildings used as classrooms, laboratories, gymnasiums, libraries, cafeterias, school related offices or for other bona fide school purposes by duly constituted school authorities of Kentucky. Served electrically by Kentucky Utilities Company, such energy requirements include, but are not limited to, lighting, heating, cooling, and water heating. School buildings not receiving every energy requirement electrically shall be separately metered from the above defined service and served under the applicable rate. Other fuels may be used as incidental to and for instructional laboratory and other miscellaneous purposes without affecting the availability of this rate.

At those locations where the school owns its distribution system and makes the service connections to the various buildings and/or load centers, Company shall be given the option of T
providing service by use of the existing Customer-owned distribution system, or of constructing T
its own facilities in accordance with the Company's Overhead Construction Standards. In any event, Company's investment in the facilities it provides may be limited to an amount not T
exceeding twice the estimated annual revenue from Customer's service. Should Company's investment in the facilities required to provide service to Customer exceed twice the revenue anticipated from the service to Customer and at Customer's option, Customer may make a contribution for the difference in the investment required in facilities necessary to provide service and twice the anticipated revenue, so as to receive service under this schedule.

This Rate Schedule is not available to privately operated kindergartens or daycare centers and is restricted to those customers who were qualified for and being served on Rate AES as of July 1, 2011. Because this rate schedule is closed to new customers, if Customer is taking service under this rate schedule and subsequently elects to take service under another rate schedule, Customer may not again take service under this rate schedule.

Standard Rate — PS — Power Service

DETERMINATION OF MAXIMUM LOAD

The load will be measured and will be the average kW demand delivered to the customer during the 15-minute period of maximum use during the month.

Company reserves the right to place a kVA meter and base the billing demand on the measured kVA. The charge will be computed based on the measured kVA times 90 percent of the applicable kW charge.

In lieu of placing a kVA meter, Company may adjust the measured maximum load for billing purposes when the power factor is less than 90 percent in accordance with the following formula: (BASED ON POWER FACTOR MEASURED AT THE TIME OF MAXIMUM LOAD).

$$\text{Adjusted Maximum kW Load for Billing Purposes} = \frac{\text{Maximum kW Load Measured X 90\%}}{\text{Power Factor (in percent)}}$$

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 1% late payment charge will be assessed on the current month's charges.

TERM OF CONTRACT

Contracts under this rate shall be for an initial term of one (1) year, remaining in effect from month to month thereafter until terminated by notice of either party to the other.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto.

TIME-OF-DAY PRIMARY SERVICE

DETERMINATION OF MAXIMUM LOAD

The load will be measured and will be the average kVA demand delivered to the customer during the 15-minute period of maximum use during the appropriate rating period each month.

RATING PERIODS

The rating periods applicable to the Maximum Load charges are established in Eastern Standard Time year round by season for weekdays and weekends, throughout Company's service area, and shall be as follows:

Summer peak months of May through September

	Base	Intermediate	Peak
Weekdays	All Hours	10 A.M. – 10 P.M.	1 P.M. – 7 P.M.
Weekends	All Hours		

All other months of October continuously through April

	Base	Intermediate	Peak
Weekdays	All Hours	6 A.M. – 10 P.M.	6 A.M. – 12 Noon
Weekends	All Hours		

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 1% late payment charge will be assessed on the current month's charges.

TERM OF CONTRACT

Service will be furnished under this schedule only under contract for a fixed term of not less than one (1) year, and for yearly periods thereafter until terminated by either party giving written notice to the other party ninety (90) days prior to termination. Company, however, may require a longer fixed term of contract and termination notice because of conditions associated with the customer's requirements for service.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto.

In all territory served.

AVAILABILITY OF SERVICE
This schedule is available for transmission service. Service under this schedule will be limited to maximum new loads not exceeding 50,000 kVA. Existing customers may increase loads to a maximum of 75,000 kVA by up to 2,000 kVA per year or in greater increments with approval of Company's transmission operator. Customers initiating service on this rate whose load characteristics subsequently do not meet these criteria will be billed on the appropriate rate or have a rate developed based on their electrical characteristics.

RATE

Basic Service Charge per month:	$500.00
Plus an Energy Charge per kWh of:	$ 0.03414
Plus a Maximum Load Charge per kVA of:	
Peak Demand Period	$ 3.54
Intermediate Demand Period	$ 2.30
Base Demand Period	$ 0.85

Where:
the monthly billing demand for the Peak and Intermediate Demand Periods is the greater of:
a) the maximum measured load in the current billing period, or
b) a minimum of 50% of the highest billing demand in the preceding eleven (11) monthly billing periods, and
the monthly billing demand for the Base Demand Period is the greater of:
a) the maximum measured load in the current billing period but not less than 250 kVA, or
b) a minimum of 75% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
c) a minimum of 75% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

Fluctuating Load Service

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Available for primary or transmission service to customers up to an aggregate of two hundred (200) MVA for all customers taking service under this schedule and under the Fluctuating Load Service Rate FLS schedule of Louisville Gas and Electric Company. This schedule is restricted to individual customers whose monthly demand is twenty (20) MVA or greater. A customer is defined as a fluctuating load if that customer's load either increases or decreases twenty (20) MVA or more per minute or seventy (70) MVA or more in ten (10) minutes when such increases or decreases exceed one (1) occurrence per hour during any hour of the billing month.

Subject to the above aggregate limit of two hundred (200) MVA, this schedule is mandatory for all customers whose load is defined as fluctuating and not served on another standard rate schedule as of July 1, 2004.

BASE RATE

	Primary	Transmission
Basic Service Charge per month:	$500.00	$500.00
Plus an Energy Charge per kWh of:	$ 0.03419	$ 0.02947
Plus a Maximum Load Charge per kVA of:		
Peak Demand Period	$ 2.30	$ 2.30
Intermediate Demand Period	$ 1.41	$ 1.41
Base Demand Period	$ 1.57	$ 0.82

Where:
1) the monthly billing demand for the Primary Peak and Intermediate Demand Periods is the greater of:
   a) the maximum measured load in the current billing period, or
   b) a minimum of 60% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

   the monthly billing demand for the Primary Base Demand Period is the greater of:
   a) the maximum measured load in the current billing period but not less than 20,000 kVA, or
   b) a minimum of 75% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
   c) a minimum of 75% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.
2) the monthly billing demand for the Transmission Peak and Intermediate Demand Periods is the greater of:
   a) the maximum measured load in the current billing period, or
   b) a minimum of 40% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

LATE PAYMENT CHARGE

If full payment is not received within three (3) calendar days from the due date of the bill, a 1% late payment charge will be assessed on the current month's charges.

TERM OF CONTRACT

Unless terminated by mutual agreement, the initial term of contract for service shall be for a fixed term of five years with successive one year term renewal until canceled by either party giving at least one (1) year written notice to the other prior to the end of the initial term or the then current annual renewal period, as applicable.

PROTECTION OF SERVICE

Where Customer's use of service is intermittent, subject to violent or extraordinary fluctuations, or produces unacceptable levels of harmonic current, in each case as determined by Company in its reasonable discretion, Company reserves the right to require Customer to furnish, at Customer's own expense, suitable equipment (as approved by Company in its reasonable discretion) to meter and limit such intermittence, fluctuation, or harmonics to the extent reasonably requested by Company. Without limiting the foregoing, Company may require such equipment if, at any time, the megavars, harmonics, and other undesirable electrical characteristics produced by the Customer exceed the limits set forth in the IEEE standards for such characteristics. In addition, if the Customer's use of Company's service under this schedule causes such undesirable electrical characteristics in an amount exceeding those IEEE standards, such use shall be deemed to cause a dangerous condition which could subject any person to imminent harm or result in substantial damage to the property of Company or others, and Company shall therefore terminate service to the Customer in accordance with 807 KAR 5:056, Section 14(b). Such a termination of service shall not be considered a cancellation of the service agreement or relieve Customer of any minimum billing or other guarantees. Company shall be held harmless for any damages or economic loss resulting from such termination of service. If requested by Company, Customer shall provide all available information to Company that aids Company in enforcing its service standards. If Company at any time has a reasonable basis for believing that Customer's proposed or existing use of the service provided will not comply with the service standards for interference, fluctuations, or harmonics, Company may engage such experts and/or consultants as Company shall determine are appropriate to advise Company in ensuring that such interference, fluctuations, or harmonics are within acceptable standards. Should such experts and/or consultants determine Customer's use of service is unacceptable, Company's use of such experts and/or consultants will be at the Customer's expense.

SYSTEM CONTINGENCIES AND INDUSTRY SYSTEM PERFORMANCE CRITERIA

Company reserves the right to interrupt up to 95% of Customer's load to facilitate Company compliance with system contingencies and with industry performance criteria. Customer will permit Company to install electronic equipment and associated real-time metering to permit Company interruption of Customer's load. Such equipment will immediately notify Customer five (5) minutes before an electronically initiated interruption that will begin immediately thereafter and last no longer than ten (10) minutes nor shall the interruptions exceed twenty (20) per month. Such interruptions will not be accumulated nor credited against annual hours, if any, under the CURTAILABLE SERVICE RIDERS CSR10 AND CSR 30. Company's right to

TERM OF CONTRACT T

Unless terminated by mutual agreement, the initial term of contract for service shall be for a fixed term of five years with successive one year term renewal until canceled by either party giving at least one (1) year written notice to the other prior to the end of the initial term or the then current annual renewal period, as applicable.

Standard Rate — ST. LT.
Street Lighting Service

AVAILABILITY OF SERVICE

This rate schedule is available, for the various types of street lighting services shown herein, in any community in which the Company has an electric franchise. Service is subject to the provisions herein and the provisions of the Company's standard contract for street lighting service. Should the service not meet these standard provisions, then the Company reserves the right to revise the charges listed hereinafter so as to include any additional or unusual cost involved.

OVERHEAD SERVICE

1. **STANDARD OVERHEAD SYSTEM:** Street lighting equipment furnished under the Standard Overhead Rate shall consist of wood poles, brackets, appropriate fixtures for the lamps being used, 150 feet of street lighting circuit, protective equipment, controls and transformers. The Company will install, own, operate and maintain the entire street lighting system, including circuits, lighting fixtures and lamp replacements. The Customer shall pay the Standard Overhead Rate.

2. **ORNAMENTAL OVERHEAD SYSTEM:** The Company will, upon request, furnish under the Ornamental Overhead Rate, ornamental poles of the Company's choosing, together with overhead wiring and all other equipment and provisions mentioned in Section 1 above. The Customer will pay the Ornamental Overhead Rate.

3. **OTHER THAN CONVENTIONAL OVERHEAD SYSTEMS:** Should the Customer require, either initially or upon replacement, a system or equipment other than that described in Sections 1 and 2 above for lamp sizes as provided herein, (this constituting a conventional overhead system) the Customer may make a non-refundable contribution to the Company equal to the difference in the installed cost between the system or equipment so required and the cost of a conventional overhead system as hereinbefore defined. In a similar manner the Customer will pay the difference in the cost of operating and maintaining such a system or equipment and the cost of operating and maintaining a conventional Overhead System. Any installation costs which are to be borne by the Customer should be paid at the time of installation.

Lighting Service N

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rate schedule is offered, under the conditions set out hereinafter, for lighting applications such as, but not limited to, the illumination of street, driveways, yards, lots, and other outdoor areas where secondary voltage of 120/240 is available.

Service will be provided under written contract, signed by customer prior to service commencing, when additional facilities are required.

Units marked with an asterisk (*) are not available for use in residential neighborhoods except by municipal authorities.

OVERHEAD SERVICE

Based on Customer's lighting choice, Company will furnish, own, install, and maintain the lighting unit. A basic overhead service includes lamp, fixture, photoelectric control, mast arm, and, if needed, up to 150 feet of conductor per fixture on existing wood poles (fixture only). Company will, upon request, furnish ornamental poles of Company's choosing, together with overhead wiring and all other equipment mentioned for basic overhead service.

Street Lighting Service

UNDERGROUND SERVICE

FURNISHED EQUIPMENT: Street lighting equipment furnished hereunder shall consist of appropriate size decorative poles and fixtures for the lamps being used, 200 feet of underground conductor, protective equipment, controls and transformers. The Company will install, own, operate and maintain the entire street lighting system, including conductor, decorative poles, fixtures, and lamp replacements. The Customer shall pay the rate as shown plus, at the time of installation, pay to the Company the amount to cover the additional cost of underground over the equivalent overhead street lighting circuitry.

Lighting Service

OVERHEAD SERVICE (continued)

Should Customer request underground service, Customer shall make a non-refundable cash contribution prior to the time of installation, or, at the option of company, make a work contribution to Company for the difference in the installed cost of the system requested and the cost of the overhead lighting system.

Where the location of existing poles is not suitable or where there are no existing poles for mounting of lights, and Customer requests service under these conditions, Company may furnish the requested facilities at an additional charge to be determined under the Excess Facilities Rider.

UNDERGROUND SERVICE

Based on Customer's lighting choice, Company will furnish, own, install, and maintain poles, fixtures, and any necessary circuitry up to 200 feet. All poles and fixtures furnished by Company will be standard stocked materials. Company may decline to install equipment and provide service thereto in locations deemed by Company as unsuitable for underground installation.

The proposed KU Lighting Service Rate LS is contained on four pages instead of the current three pages of Street Lighting Rate ST. LT.

ADJUSTMENT CLAUSES

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

Fuel Adjustment Clause	Sheet No. 85
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91

TERM OF CONTRACT

For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require Customer to pay to Company a lump sum equal to the monthly charge times the number of months remaining on the original five (5) year term.

TERMS AND CONDITIONS

1. Service shall be furnished under Company's Terms and Conditions, except as set out herein.
2. All service and maintenance will be performed only during regular scheduled working hours of Company. Customer will be responsible for reporting outages and other operating faults. Company shall initiate service corrections within two (2) business days after such notification by Customer.
3. Customer shall be responsible for the cost of fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts. Company may decline to provide or continue service in locations where, in Company's judgment, such facilities will be subject to unusual hazards or risk of damage.
4. Company shall have the right to make other attachments and to further extend the conductors, when necessary, for the further extension of its electric service.
5. If any permit is required from any municipal or other governmental authority with respect to installation and use of any of the lighting units provided hereunder, Company will seek such permits, but the ultimate responsibility belongs with Customer
6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities that were in service less than twenty years, and requests installation of replacement lighting within 5 years of removal, Customer agrees to pay to Company its cost of labor to install the replacement facilities.
7. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.

Standard Rate — RLS
Restricted Lighting Service N

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Service under this rate schedule is restricted to those lighting fixtures/poles in service as of August 1, 2012, except where a spot replacement maintains the continuity of multiple fixtures/poles comprising a neighborhood lighting system. Spot placement of restricted fixtures/poles is contingent on the restricted fixtures/poles being available from manufacturers. Spot replacement of restricted units will be made under the terms and conditions provided for under non-restricted Lighting Service Rate LS.

In the event restricted fixtures/poles fail and replacements are unavailable, Customer will be given the choice of having Company remove the failed fixture/pole or replacing the failed fixture/pole with other available fixture/pole.

OVERHEAD SERVICE
Based on Customer's lighting choice, Company has furnished, installed, and maintained the lighting unit complete with lamp, fixture, photoelectric control, mast arm, and, if needed, up to 150 feet of conductor per fixture on existing wood poles (fixture only). Company has, upon request, furnished poles, of Company's choosing, together with overhead wiring and all other equipment mentioned for overhead service.

ADDITIONAL FACILITIES

The Company will furnish a complete standard or directional fixture with appropriate mast arm on existing poles with available secondary voltage of 120/240. All facilities required by Company will be standard stocked material. The above rates for OVERHEAD SERVICE contemplate installation on an existing wood pole and, if needed, up to 150 feet of conductor.

Where the location of existing poles is not suitable or where there are no existing poles or adequate facilities for mounting of lights, and the Customer requests service under these conditions, the Company may furnish the required facilities at an additional charge based upon the application of the monthly rate set forth in the Excess Facilities rider applied to the current cost of the facilities as periodically updated.

UNDERGROUND SERVICE

Based on lighting choice, Company will furnish and install the lighting unit complete with lamp, fixture, photoelectric control, and aluminum pole.

Where Customer's location would require the installation of additional facilities, Company may furnish, own, and maintain the requested facilities at an additional charge per month to be determined by Company. Such charges are subject to change by Company upon 30 days prior written notice.

Customer is to pay the monthly rate plus any additional charge determined above plus provide all ditching, back-filling, and repaving/seeding/sodding as necessary and provide, own, and maintain all conduit. Company may, at Customer's request, provide all ditching, back-filling, and repaving/seeding/sodding as necessary for payment, in advance, of Company's cost to provide those services. Upon termination of service, the Company shall not be required to remove underground facilities.

Standard Rate — RLS
Restricted Lighting Service N

TERM OF CONTRACT

For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require Customer to pay to Company a lump sum equal to the monthly charge times the number of months remaining on the original five (5) year term.

TERMS AND CONDITIONS

1. Service shall be furnished under Company's Terms and Conditions, except as set out herein.
2. All service and maintenance will be performed only during regular scheduled working hours of Company. Customer will be responsible for reporting outages and other operating faults, and the Company shall initiate service corrections within two (2) business days after such notification by Customer.
3. Customer shall be responsible for the cost of fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts. Company may decline to provide or continue service in locations where, in Company's judgment, such facilities will be subject to unusual hazards or risk of damage.
4. Company shall have the right to make other attachments and to further extend the conductors, when necessary, for the further extension of its electric service.
5. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204

Customer Ordered Styles

Where Customer has need for non-stocked styles of poles or fixtures, Company may agree to provide the requested styles for payment, in advance, by Customer of the cost difference between the requested styles and the stock materials. Customer accepts that Company's maintenance of non-stock materials is dependent on outside vendors and that maintenance of non-stock styles may be delayed or materials unavailable.

ADJUSTMENT CLAUSES
The bill amount computed at the charges specified above shall be increased or decreased in accordance with:

Fuel Adjustment Clause	Sheet No. 85
Environmental Cost Recovery Surcharge	Sheet No. 87
Franchise Fee Rider	Sheet No. 90
School Tax	Sheet No. 91

DUE DATE OF BILL
Payment is due within twelve (12) calendar days from the date of the bill. Billing for this service to be made a part of the bill rendered for other electric service.

DETERMINATION OF ENERGY CONSUMPTION
The kilowatt-hours will be determined as set forth on Sheet No. 67 of this Tariff.

TERM OF CONTRACT
For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require the Customer to pay to Company its cost of labor to install and remove facilities plus cost of non-salvable material, prorated on the basis of the remaining portion of the five-year period.

Signed contracts will not be required when the fixture(s) are placed on existing pole with a 120 volt source.

TERMS AND CONDITIONS
1. Service shall be furnished under Company's Terms and Conditions, except as set out herein.
2. All service and necessary maintenance on the light and facilities will be performed only during regular scheduled working hours of the Company. The customer shall be responsible for reporting outages and other operating faults, and the Company will undertake to service the lighting equipment within two (2) business days after such notification by the customer.
3. The Customer shall be responsible for fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts.
4. The Company shall own and maintain all facilities required in providing this service, except as noted above.

DETERMINATION OF ENERGY CONSUMPTION
The kilowatt-hours will be as set forth on Sheet No. 67 of this tariff.

SPECIAL TERMS AND CONDITIONS

1. Based on lighting choice, Company will furnish and install the lighting unit complete with pole, mast arm (if applicable), control device, lamp, and fixture. All lighting units, poles and conductors shall be standard, stocked material and shall remain the property of Company. Company shall have access to the same for maintenance, inspection, and all other proper purposes.
2. Customer will be responsible for ditching, back-filling, seeding, and/or repaving, as necessary, and provide, own, and maintain all conduit.
3. Charges listed under RATE are based on a normal installation whereby the Company will provide up to 200 feet of conductor per unit where Company has underground distribution facilities with secondary 120/240 voltage available. Company may provide underground lighting service in localities served through overhead facilities when, in its judgment, it is practicable to do so. Company may decline to install equipment and provide service in locations deemed by Company as unsuitable for underground installation. If additional

SPECIAL TERMS AND CONDITIONS (continued)

facilities are required, Customer shall make a non-refundable cash advance equivalent to the installed cost of such excess facilities.

4. Company shall have the right to make other attachments and to further extend the conductors when necessary for the further extension of its electric service.

5. If any permit is required from municipal or other governmental authority with respect to the installation and use of any of the lighting units served hereunder, it will be the responsibility of Customer to obtain such permit.

6. All servicing and maintenance will be performed only during regular schedule working hours of Company. Customer shall be responsible for reporting outages and other operating faults, and Company will undertake to service the lighting equipment within two (2) business days after such notification by Customer.

7. Customer will exercise proper care to protect the property of Company on Customer's premises and, in the event of loss or damage to Company's property arising from the negligence of Customer, the cost of the necessary repair or replacement shall be paid by Customer. Company may decline to provide service or continue service in locations where, in Company's judgment, such equipment will be subject to unusual hazards or risk of damage.

8. Contracts for this service shall have a minimum fixed term of five (5) years, and shall continue from month to month after such minimum fixed term until terminated by either party giving thirty days notice to the other. Company shall have the right at any time to discontinue service for non-payment of bills or other causes as set forth in its Terms and Conditions.

9. Should Customer choose to terminate service prior to completion of the initial five (5) year term, and no other customer assumes the responsibility, Customer shall reimburse Company the cost associated with providing service under this tariff for installation plus removal less salvable material prorated over the remaining portion of the initial five (5) year term. Company may require this amount in a refundable deposit from Customer.

10. If Customer requests the removal of an existing lighting unit(s), pole(s), or supporting facilities, that were in service for less than twenty (20) years, and then requests the installation of new lighting within two (2) years of removal, Customer will reimburse Company the cost associated with providing service to the original lighting for installation plus removal less salvable material prorated over the twenty (20) year term remaining at the time of removal.

11. Upon permanent discontinuance of service, lighting units and other equipment associated with providing service under this tariff, except underground facilities, will be removed.

TERMS AND CONDITIONS

Service will be furnished under Company's Terms and Conditions applicable hereto except as noted above.

Cable Television Attachment Charges

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Where Company is willing to permit the attachments of cables, wires and appliances to its poles where, in Company's judgment, such attachments will not interfere with its electric service requirements and other prior licensees using Company's poles. Attachments will be permitted upon execution by both parties of a Cable Television Attachment Agreement supplied by Company.

ATTACHMENT CHARGE
$5.40 per year for each attachment to pole.

BILLING
Attachment Charges to be billed semi-annually based on the number of pole attachments being maintained on December 1 and June 1. Provided, however, that should the Agreement be terminated in accordance with the terms of the said Agreement, the Attachment Charges will be prorated to the date of such termination. Payment will be due within thirty (30) days from date of bill. Non-payment of bills shall constitute a default of the Agreement.

TERM OF AGREEMENT
The Cable Television Attachment Agreement shall become effective upon execution by both parties and shall continue in effect for not less than one (1) year, subject to provisions contained in the agreement. At any time thereafter, the Customer may terminate the agreement by giving not less than six (6) months' prior written notice. Upon termination of the agreement, Customer shall immediately remove its cables, wire, appliances and all other attachments from all poles of Company.

TERMS AND CONDITIONS OF POLE ATTACHMENTS
Pole attachments shall be permitted in accordance with this Schedule. Company's Terms and Conditions shall be applicable, to the extent they are not in conflict with or inconsistent with, the special provisions of this Schedule.

Upon written Agreement, Company is willing to permit, to the extent it may lawfully do so, the attachment of cables, wires and appliances to its poles by a cable television system operator, hereinafter "Customer," where, in its judgment, such use will not interfere with its electric service requirements and other prior licensees using Company's poles, including consideration of economy and safety, in accordance with this schedule approved by the Public Service Commission. The Terms and Conditions applicable to such service are as follows:

Cable Television Attachment Charges

1. ATTACHMENT APPLICATIONS AND PERMITS
   Before making attachment to any pole or poles of Company, Customer shall make application and receive a permit therefore on a form to be supplied by Company. The information submitted by Customer with the application for a permit shall consist of drawings and associated descriptive matter which shall be adequate in all detail to enable Company to thoroughly check the proposed installation of Customer. Before the attachments are made, the permit must be approved by Company. Customer shall not build separate pole lines along existing facilities of Company and shall not place intermediate poles in spans of Company, unless authorized by Company in writing. Company shall have the right to remove unauthorized Customer attachments at Customer's expense after notice to Customer. In the event a pole attachment count does not correspond to the recorded attachment count, Customer will pay a back attachment fee for any excess attachments. The back attachment fee will be double the rate otherwise in effect over the time since last pole attachment count and shall be payable on demand.

2. PERMITTED ATTACHMENTS
   Customer shall be permitted to make only one bolt attachment for one messenger on tangent poles and two bolt attachments for two messengers on corner poles. A maximum of five individual coaxial cables may be supported by any single messenger if these cables are all attached to the messenger by suitable lashings or bindings, and so that the maximum overall dimension of the resulting cable bundle does not exceed two (2) inches. Any messenger attachment other than to tangent poles must be properly braced with guys and anchors provided by Customer to the satisfaction of Company. The use of existing Company anchors for this purpose must be specifically authorized in writing, subject to additional charge, and will not ordinarily be permitted. The use of crossarms or brackets shall not be permitted. In addition to messenger attachments, Customer will be permitted one Customer amplifier installation per pole and four service drops to be tapped on cable messenger strand and not on pole. Customer power supply installations shall be permitted, but only at pole locations specifically approved by Company. Any or all of the above are considered one attachment for billing purposes. Any additional attachments desired by Customer will be considered on an individual basis by Company, and as a separate attachment application.

3. CONSTRUCTION AND MAINTENANCE REQUIREMENTS AND SPECIFICATIONS
   Customer's cables, wires and appliances, in each and every location, shall be erected and maintained in accordance with the requirements and specifications of the National Electrical Safety Code, current edition, and Company's construction practices, or any amendments or revisions of said Code and in compliance with any rules or orders now in effect or that hereinafter may be issued by the Public Service Commission of Kentucky, or other authority having jurisdiction. In the event any of Customer's construction does not meet any of the foregoing requirements, Customer will correct same in fifteen work days after written notification. Company may make corrections and bill Customer for total costs incurred, if not corrected by Customer.

4. MAINTENANCE OF ATTACHMENTS
   Customer shall, at its own expense, make and maintain said attachments in safe condition and in thorough repair, and in a manner suitable to Company and so as not to conflict with the use of said poles by Company, or by other parties, firms, corporations, governmental units, etc., using said poles, pursuant to any license or permit by Company, or interfere with the working

Company may make corrections and bill Customer for total costs incurred, if not corrected by Customer.

4. MAINTENANCE OF ATTACHMENTS
   Customer shall, at its own expense, make and maintain said attachments in safe condition and in thorough repair, and in a manner suitable to Company and so as not to conflict with the use of said poles by Company, or by other parties, firms, corporations, governmental units, etc., using said poles, pursuant to any license or permit by Company, or interfere with the working

use of facilities thereon or which may, from time to time, be placed thereon. Customer shall promptly at any time, at its own expense, upon written notice from Company, relocate, replace or renew its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Company but in no case longer than 30 day after date of written request. In cases of emergency, however, Company may arrange to relocate, replace or renew the facilities placed on said poles by Customer, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Company, or its other licensees, and Customer shall, on demand, reimburse Company for the expense thereby incurred.

5. COSTS ASSOCIATED WITH ATTACHMENTS
   In the event that any pole or. poles of Company to which Customer desires to make attachments are inadequate to support the additional facilities in accordance with the aforesaid specifications, Company will indicate on the application and permit form the changes necessary to provide adequate poles and the estimated cost thereof to Customer. If Customer still desires to make the attachments, Company will replace such inadequate poles with suitable poles and Customer will, on demand, reimburse Company for the total cost of pole replacement necessary to accommodate Customer attachments, less the salvage value of any pole that is removed, and the expense of transferring Company's facilities from the old to the new poles. Where Customer desired attachments can be accommodated on pre-sent poles of Company by rearranging Company's facilities thereon, Customer will compensate Company for the full expense incurred in completing such rearrangements, within ten days after receipt of Company's invoice for such expense. Customer will also, on demand, reimburse the owner or owners of other facilities attached to said poles for any expense incurred by it or them in transferring or rearranging said facilities. In the event Customer makes an unauthorized attachment which necessitates rearrangements when discovered, then Customer shall pay on demand twice the expense incurred in completing such rearrangements.

6. MAINTENANCE AND OPERATION OF COMPANY'S FACILITIES
   Company reserves to itself, its successors and assigns, the right to maintain its poles and to operate its facilities thereon in such manner as will, in its own judgment, best enable it to fulfill its electric service requirements, but in accordance with the specifications herein before referred to. Company shall not be liable to Customer for any interruption to service to Customer's subscribers or for interference with the operation of the cables, wires and appliances of Customer arising in any manner out of the use of Company's poles hereunder.

7. FRANCHISES AND EASEMENTS
   Customer shall submit to Company evidence, satisfactory to Company, of Customer's authority to erect and maintain Customer's facilities within public streets, highways and other thoroughfares within the above described territory which is to be served and shall secure any necessary consent by way of franchise or other satisfactory license, permit or authority, acceptable to Company from State, County or municipal authorities or from the owners of property where necessary to construct and maintain facilities at the locations of poles of Company which it desires to use. Customer must secure its own easement rights on private property. Customer must, regardless of authority received or franchises given by governmental

use of facilities thereon or which may, from time to time, be placed thereon. Customer shall promptly at any time, at its own expense, upon written notice from Company, relocate, replace or renew its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by Company but in no case longer than 30 day after date of written request. In cases of emergency, however, Company may arrange to relocate, replace or renew the facilities placed on said poles by Customer, transfer them to substituted poles or perform any other work in connection with said facilities that may be required in the maintenance, replacement, removal or relocation of said poles, the facilities thereon or which may be placed thereon, or for the service needs of Company, or its other licensees, and Customer shall, on demand, reimburse Company for the expense thereby incurred.

5. COSTS ASSOCIATED WITH ATTACHMENTS
   In the event that any pole or poles of Company to which Customer desires to make attachments are inadequate to support the additional facilities in accordance with the aforesaid specifications, Company will indicate on the application and permit form the changes necessary to provide adequate poles and the estimated cost thereof to Customer. If Customer still desires to make the attachments, Company will replace such inadequate poles with suitable poles and Customer will, on demand, reimburse Company for the total cost of pole replacement necessary to accommodate Customer attachments, less the salvage value of any pole that is removed, and the expense of transferring Company's facilities from the old to the new poles. Where Customer desired attachments can be accommodated on present poles of Company by rearranging Company's facilities thereon, Customer will compensate Company for the full expense incurred in completing such rearrangements, within ten days after receipt of Company's invoice for such expense. Customer will also, on demand, reimburse the owner or owners of other facilities attached to said poles for any expense incurred by it or them in transferring or rearranging said facilities. In the event Customer makes an unauthorized attachment which necessitates rearrangements when discovered, then Customer shall pay on demand twice the expense incurred in completing such rearrangements.

6. MAINTENANCE AND OPERATION OF COMPANY'S FACILITIES
   Company reserves to itself, its successors and assigns, the right to maintain its poles and to operate its facilities thereon in such manner as will, in its own judgment, best enable it to fulfill its electric service requirements, but in accordance with the specifications herein before referred to. Company shall not be liable to Customer for any interruption to service to Customer's subscribers or for interference with the operation of the cables, wires and appliances of Customer arising in any manner out of the use of Company's poles hereunder.

7. FRANCHISES AND EASEMENTS

agencies, conform to all requirements of Terms and Conditions with regard to Company's property. Company's approval of attachments shall not constitute any representation or warranty by Company to Customer regarding Customer's right to occupy or use any public or private right-of-way.

8. INSPECTION OF FACILITIES
Company reserves the right to inspect each new installation of Customer on its poles and in the vicinity of its lines or appliances and to make periodic inspections, every two (2) years or more often as plant conditions warrant of the entire plant of Customer. Such inspections, made or not, shall not operate to relieve Customer of any responsibility, obligation or liability.

9. PRECAUTIONS TO AVOID FACILITY DAMAGE
Customer shall exercise precautions to avoid damage to facilities of Company and of others supported on said poles; and shall assume all responsibility of any and all loss for such damage caused by it. Customer shall make an immediate report to Company of the occurrence of any damage and shall reimburse Company for the expense incurred in making repairs.

10. INDEMNITIES AND INSURANCE
Customer shall defend, indemnify and save harmless Company from any and all damage, loss, claim, demand, suit, liability, penalty or forfeiture of every kind and nature-including but not limited to costs and expenses of defending against the same and payment of any settlement or judgment therefore, by reason of (a) injuries or deaths to persons, (b) damages to or destructions of properties, (c) pollutions, contaminations of or other adverse effects on the environment or (d) violations of governmental laws, regulations or orders whether suffered directly by Company it-self or indirectly by reason of claims, demands or suits against it by third parties, resulting or alleged to have resulted from acts or omissions of Customer, its employees, agents, or other representatives or from their presence on the premises of Company, either solely or in concurrence with any alleged joint negligence of Company.

Customer shall provide and maintain in an Insurance Company(s) authorized to do business in the Commonwealth of Kentucky, the following:

(a) Insurance protection for Customer employees to the extent required by the Workmen's Compensation Law of Kentucky and, where same is not applicable or if necessary to provide a defense for Company, Employer's Liability Protection (covering both Company and Customer) for Customer employees for no less than $100,000.00 per employee.

(b) Public Liability and Business Liability insurance with a minimum limit of $500,000.00 for each person injured and with a minimum total limit of $1,000,000.00 for each accident and a minimum limit of $100,000.00 for property damage for each accident.

(c) Public Liability and Property Damage insurance on all automotive equipment used by Customer on job to the extent of the amounts for Public Liability and Property Damage insurance set out in the preceding Paragraph (b).

(d) In the event that work covered by the Agreement includes work to be done in places or areas where the Maritime Laws are in effect, then and in that event additional insurance protection to the limits in Paragraph (b) above for liability arising out of said Maritime Laws.

agencies, conform to all requirements of Terms and Conditions with regard to Company's property. Company's approval of attachments shall not constitute any representation or warranty by Company to Customer regarding Customer's right to occupy or use any public or private right-of-way.

8. INSPECTION OF FACILITIES
Company reserves the right to inspect each new installation of Customer on its poles and in the vicinity of its lines or appliances and to make periodic inspections, every two (2) years or more often as plant conditions warrant of the entire plant of Customer. Such inspections, made or not, shall not operate to relieve Customer of any responsibility, obligation or liability.

9. PRECAUTIONS TO AVOID FACILITY DAMAGE
Customer shall exercise precautions to avoid damage to facilities of Company and of others supported on said poles; and shall assume all responsibility of any and all loss for such damage caused by it. Customer shall make an immediate report to Company of the occurrence of any damage and shall reimburse Company for the expense incurred in making repairs.

10. INDEMNITIES AND INSURANCE
Customer shall defend, indemnify and save harmless Company from any and all damage, loss, claim, demand, suit, liability, penalty or forfeiture of every kind and nature-including but not limited to costs and expenses of defending against the same and payment of any settlement or judgment therefore, by reason of (a) injuries or deaths to persons, (b) damages to or destructions of properties, (c) pollutions, contaminations of or other adverse effects on the environment or (d) violations of governmental laws, regulations or orders whether suffered directly by Company it-self or indirectly by reason of claims, demands or suits against it by third parties, resulting or alleged to have resulted from acts or omissions of Customer, its employees, agents, or other representatives or from their presence on the premises of Company, either solely or in concurrence with any alleged joint negligence of Company.

Customer shall provide and maintain in an Insurance Company(s) authorized to do business in the Commonwealth of Kentucky, the following:

(a) Insurance protection for Customer employees to the extent required by the Workmen's Compensation Law of Kentucky and, where same is not applicable or if necessary to provide a defense for Company, Employer's Liability Protection (covering both Company and Customer) for Customer employees for no less than $100,000.00 per employee.

(b) Public Liability and Business Liability insurance with a minimum limit of $500,000.00 for each person injured and with a minimum total limit of $1,000,000.00 for each accident and a minimum limit of $100,000.00 for property damage for each accident.

(c) Public Liability and Property Damage insurance on all automotive equipment used by Customer on job to the extent of the amounts for Public Liability and Property Damage insurance set out in the preceding Paragraph (b).

(d) In the event that work covered by the Agreement includes work to be done in places or areas where the Maritime Laws are in effect, then and in that event additional insurance protection to the limits in Paragraph (b) above for liability arising out of said Maritime Laws.

(e) In the event the work covers fixed wing aircraft, rotor lift, lighter than air aircraft or any other form of aircraft, appropriate insurance will be carried affording protection to the limits prescribed in the preceding Paragraph (b).

(f) In the event the work covers blasting, explosives or operations underground, in trenches or other excavations, appropriate insurance will be carried affording protection to the limits prescribed in the preceding Paragraph (b), together with products hazard and completed operations insurance where applicable, affording protection to the limits above prescribed. Customer's liability insurance shall be written to eliminate XCU exclusions. Said insurance is to be kept in force for not less than one year after cancellation of the Agreement.

Before starting work, Customer shall furnish to Company a certificate(s) of insurance satisfactory to Company, evidencing the existence of the insurance required by the above provisions, and this insurance may not be canceled for any cause without sixty (60) days advance written notice being first given Company; provided, that failure of Company to require Customer to furnish any such certificate(s) shall not constitute a waiver by Company of Customer's obligation to maintain insurance as provided herein.

Each policy required hereunder shall contain a contractual endorsement written as follows: "The insurance provided herein shall also be for the benefit of Kentucky Utilities Company so as to guarantee, within the policy limits, the performance by the named insured of the indemnity provisions of the Cable Television Attachment Agreement between the named insured and Kentucky Utilities Company. This insurance may not be canceled for any cause without sixty (60) days advance written notice being first given to Kentucky Utilities Company."

11. ATTACHMENT REMOVAL AND NOTICES
Customer may at any time voluntarily remove its attachments from any pole or poles of Company, but shall immediately give Company written notice of such removal on a form to be supplied by Company. No refund of any attachment charge will be due on account of such voluntary removal.

12. FORBIDDEN USE OF POLES
Prior to Customer's initial attachment, Company reserves the right due to engineering design requirements to refuse use by Customer of certain or specific poles or structures (such as normal transmission routes). Upon notice from Company to Customer that the use of any pole or poles is forbidden by municipal or other public authorities or by property owners, the permit covering the use of such pole or poles shall immediately terminate and Customer shall remove its facilities from the affected pole or poles at once. No refund of any attachment charge will be due on account of any removal resulting from such forbidden use.

13. NON-COMPLIANCE
If Customer shall fail to comply with any of the provisions of these Rules and Regulations or Terms and Conditions or default in any of its obligations under these Rules and Regulations or Terms and Conditions and shall fail within thirty (30) days after written notice from Company to correct such default or non-compliance, Company may, at its option, forthwith terminate the Agreement or the permit covering the poles as to which such default or non- compliance shall have occurred, by giving written notice to Customer of said termination. No refund of any rental will be due on account of such termination.

(e) In the event the work covers fixed wing aircraft, rotor lift, lighter than air aircraft or any other form of aircraft, appropriate insurance will be carried affording protection to the limits prescribed in the preceding Paragraph (b).

(f) In the event the work covers blasting, explosives or operations underground, in trenches or other excavations, appropriate insurance will be carried affording protection to the limits prescribed in the preceding Paragraph (b), together with products hazard and completed operations insurance where applicable, affording protection to the limits above prescribed. Customer's liability insurance shall be written to eliminate XCU exclusions. Said insurance is to be kept in force for not less than one year after cancellation of the Agreement.

Before starting work, Customer shall furnish to Company a certificate(s) of insurance satisfactory to Company, evidencing the existence of the insurance required by the above provisions, and this insurance may not be canceled for any cause without sixty (60) days advance written notice being first given Company; provided, that failure of Company to require Customer to furnish any such certificate(s) shall not constitute a waiver by Company of Customer's obligation to maintain insurance as provided herein.

Each policy required hereunder shall contain a contractual endorsement written as follows: "The insurance provided herein shall also be for the benefit of Kentucky Utilities Company so as to guarantee, within the policy limits, the performance by the named insured of the indemnity provisions of the Cable Television Attachment Agreement between the named insured and Kentucky Utilities Company. This insurance may not be canceled for any cause without sixty (60) days advance written notice being first given to Kentucky Utilities Company."

11. ATTACHMENT REMOVAL AND NOTICES
Customer may at any time voluntarily remove its attachments from any pole or poles of Company, but shall immediately give Company written notice of such removal on a form to be supplied by Company. No refund of any attachment charge will be due on account of such voluntary removal.

12. FORBIDDEN USE OF POLES
Prior to Customer's initial attachment, Company reserves the right due to engineering design requirements to refuse use by Customer of certain or specific poles or structures (such as normal transmission routes). Upon notice from Company to Customer that the use of any pole or poles is forbidden by municipal or other public authorities or by property owners, the permit covering the use of such pole or poles shall immediately terminate and Customer shall remove its facilities from the affected pole or poles at once. No refund of any attachment charge will be due on account of any removal resulting from such forbidden use.

13. NON-COMPLIANCE
If Customer shall fail to comply with any of the provisions of these Rules and Regulations or Terms and Conditions or default in any of its obligations under these Rules and Regulations or Terms and Conditions and shall fail within thirty (30) days after written notice from Company to correct such default or non-compliance, Company may, at its option, forthwith terminate the Agreement or the permit covering the poles as to which such default or non-compliance shall have occurred, by giving written notice to Customer of said termination. No refund of any rental will be due on account of such termination.

14. WAIVERS
Failure to enforce or insist upon compliance with any of these Rules and Regulations or Terms and Conditions or the Agreement shall not constitute a general waiver or relinquishment thereof, but the same shall be and remain at all times in full force and effect.

15. USE OF COMPANY'S FACILITIES BY OTHERS
Nothing herein contained shall be construed as affecting the rights or privileges previously conferred by Company, by contract or otherwise, to others, not parties to the Agreement, to use any poles covered by the Agreement; and Company shall have the right to continue and to extend such rights or privileges. The attachment privileges herein granted shall at all times be subject to such existing contracts and arrangements.

16. ASSIGNMENT
Customer shall not assign, transfer or sublet the privileges hereby granted and/or provided in the Agreement without the prior consent in writing of Company.

17. PROPERTY RIGHTS
No use, however extended, of Company poles under the Agreement shall create or vest in Customer any ownership or property rights in said poles, but Customer shall be and remain a customer only. Nothing herein contained shall be construed to compel Company to maintain any of said poles for a period longer than demanded by its electric service requirements.

18. FAILURE TO PROCEED
Customer agrees to proceed as expeditiously as practical with the work of providing the television cable service to the area described in the Agreement. Within ninety (90) days from the date of the Agreement, Customer shall make progress reasonably satisfactory to Company in the installation of its facilities or shall demonstrate, to the reasonable satisfaction of Company, its ability to proceed expeditiously.

19. TERMINATION
Upon termination of the Agreement in accordance with any of its terms, Customer shall immediately remove its cables, wires and appliances from all poles of Company. If not removed, Company shall have the right to remove them at the cost and expense of Customer.

20. SECURITY
Customer shall furnish bond for the purposes hereinafter specified as follows:

(a) during the period of Customer's initial installation of its facilities and at the time of any expansion involving more than seventy-five (75) poles, a bond in the amount of $2,000 for each 100 poles (or fraction thereof) to which Customer intends to attach its facilities;
(b) following the satisfactory completion of Customer's initial installation, the amount of bond shall be reduced to $1,000 for each 100 poles (or fraction thereof);
(c) after Customer has been a customer of Company pursuant to the Agreement and is not in default thereunder for a period of three years, the bond shall be reduced to $500 for each 100 poles (or fraction thereof).

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

(d) such bond shall contain the provision that it shall not be terminated prior to six (6) months' after receipt by Company of written notice of the desire of the bonding or insurance company to terminate such bond. This six (6) months' termination clause may be waived by Company if an acceptable replacement bond is received before the six (6) months has ended. Upon receipt of such termination notice, Company shall request Customer to immediately remove its cables, wires and all other facilities from all poles of Company. If Customer should fail to complete the removal of all of its facilities from the poles of Company within thirty (30) days after receipt of such request from Company, then Company shall have the right to remove them at the cost and expense of Customer and without being liable for any damage to Customer's wires, cables, fixtures or appurtenances. Such bond shall guarantee the payment of any sums which may become due to Company for rentals, inspections or work performed for the benefit of Customer under the Agreement, including the removal of attachments upon termination of the Agreement by any of its provisions.

e) Company in its sole discretion may agree in writing to accept other collateral (such as a cash deposit or an irrevocable bank letter of credit) in substitution for the bond required by, and subject to the other requirements of, this Section 22.

21. NOTICES

Any notice, or request, required by these Rules and Regulations or Terms and Conditions or the Agreement shall be deemed properly given if mailed, postage pre-paid, to Company, in the case of Company; or in the case of the Customer, to its representative designated in the Agreement. The designation of the person to be notified, and/or his address may be changed by Company or Customer at any time, or from time to time, by similar notice.

22. ADJUSTMENTS

Nothing contained herein or in any Agreement shall be construed as affecting in any way the right of Company, and Company shall at all times have the right, to unilaterally file with the Public Service Commission a change in rental charges for attachments to poles, other charges as provided for, any rule, regulation, condition or any other change required. Such change or changes to become effective upon approval of the Commission or applicable regulations or statutes, and shall constitute an amendment to the Agreement.

23. BINDING EFFECT

Subject to the provisions of Section 18 hereof, the Agreement and these Rules and Regulations or Terms and Conditions shall extend to and bind the successors and assigns of the parties hereto.

(d) such bond shall contain the provision that it shall not be terminated prior to six (6) months' after receipt by Company of written notice of the desire of the bonding or insurance company to terminate such bond. This six (6) months' termination clause may be waived by Company if an acceptable replacement bond is received before the six (6) months has ended. Upon receipt of such termination notice, Company shall request Customer to immediately remove its cables, wires and all other facilities from all poles of Company. If Customer should fail to complete the removal of all of its facilities from the poles of Company within thirty (30) days after receipt of such request from Company, then Company shall have the right to remove them at the cost and expense of Customer and without being liable for any damage to Customer's wires, cables, fixtures or appurtenances. Such bond shall guarantee the payment of any sums which may become due to Company for rentals, inspections or work performed for the benefit of Customer under the Agreement, including the removal of attachments upon termination of the Agreement by any of its provisions.

(e) Company in its sole discretion may agree in writing to accept other collateral (such as a cash deposit or an irrevocable bank letter of credit) in substitution for the bond required by, and subject to the other requirements of, this Section 20. T

21. NOTICES

Any notice, or request, required by these Rules and Regulations or Terms and Conditions or the Agreement shall be deemed properly given if mailed, postage pre-paid, to Company, in the case of Company; or in the case of the Customer, to its representative designated in the Agreement. The designation of the person to be notified, and/or his address may be changed by Company or Customer at any time, or from time to time, by similar notice.

22. ADJUSTMENTS

Nothing contained herein or in any Agreement shall be construed as affecting in any way the right of Company, and Company shall at all times have the right, to unilaterally file with the Public Service Commission a change in rental charges for attachments to poles, other charges as provided for, any rule, regulation, condition or any other change required. Such change or changes to become effective upon approval of the Commission or applicable regulations or statutes, and shall constitute an amendment to the Agreement.

23. BINDING EFFECT

Subject to the provisions of Section 16 hereof, the Agreement and these Rules and Regulations or Terms and Conditions shall extend to and bind the successors and assigns of the parties hereto. T

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 45

Standard Rate

Special Charges

The following charges will be applied uniformly throughout Company's service territory. Each charge, as approved by the Public Service Commission, reflects only that revenue required to cover associated expenses.

RETURNED PAYMENT CHARGE

In those instances where a customer renders payment to Company which is not honored upon deposit by Company, the customer will be charged $10.00 to cover the additional processing costs.

METER TEST CHARGE

Where the test of a meter is performed during normal working hours upon the written request of a customer, pursuant to 807 KAR 5:006, Section 18, and the results show the meter was not more than two percent fast, the customer will be charged $60.00 to cover the test and transportation costs.

DISCONNECT/RECONNECT SERVICE CHARGE

A charge of $25.00 will be made to cover disconnection and reconnection of electric service when discontinued for non-payment of bills or for violation of Company's Terms and Conditions, such charge to be made before reconnection is effected. No charge will be made for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 15, Winter Hardship Reconnection.

Residential and general service customers may request and be granted temporary suspension of electric service. In the event of such temporary suspension, Company will make a charge of $25.00 to cover disconnection and reconnection of electric service, such charge to be made before reconnection is effected.

METER PULSE CHARGE

Where a customer desires and Company is willing to provide data meter pulses, a charge of $9.00 per month per installed set of pulse-generating equipment will be made to those data pulses. Time pulses will not be supplied.

METER DATA PROCESSING CHARGE

A charge of $2.75 per report will be made to cover the cost of processing, generating, and providing recorder metered customer with profile reports. If a customer is not recorder metered and desires to have such metering installed, the customer will pay all costs associated with installing the recorder meter.

METER DATA PROCESSING CHARGE

A charge of $2.75 per report will be made to cover the cost of processing, generating, and providing recorder metered customer with profile reports. If a customer is not recorder metered and desires to have such metering installed, the customer will pay all costs associated with installing the recorder meter.

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 50

Standard Rate Rider — CSR10

Curtailable Service Rider 10

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This rider shall be made available to customers served under applicable power schedules who contract for not less than 1,000 kilowatts individually. The aggregate service under P.S.C. No. 15, CSR10 and CSR30 for Kentucky Utilities Company is limited to 100 megawatts in addition to the contracted curtailable load under P.S.C. No. 14, CSR1 and CSR3 for Kentucky Utilities Company as of August 1, 2010.

CONTRACT OPTION

Customer may, at Customer's option, contract with Company to curtail service upon notification by Company. Requests for curtailment shall not exceed three hundred and seventy-five (375) hours per year nor shall any single request for curtailment be for less than thirty (30) minutes or for more than fourteen (14) hours per calendar day, with no more than two (2) requests for curtailment per calendar day within these parameters. A curtailment is a continuous event with a start and stop time that may have both physical curtailments and buy-through options within the interval between the start and stop time. Company may request or cancel a curtailment at any time during any hour of the year, but shall give no less than ten (10) minutes notice when either requesting or canceling a curtailment.

Company may request at its sole discretion up to 100 hours of physical curtailment per year without a buy-through option during system reliability events. For the purposes of this rider, a system reliability event is any condition or occurrence: 1) that impairs KU and LG&E's ability to maintain service to contractually committed system load; 2) where KU and LG&E's ability to meet their compliance obligations with NERC reliability standards cannot otherwise be achieved; or 3) that KU and LG&E reasonably anticipate will last more than six hours and could require KU and LG&E to call upon automatic reserve sharing ("ARS") at some point during the event. Company may also request at its sole discretion up to 275 hours of curtailment per year with a buy-through option, whereby Customer may, at its option, choose either to curtail service in accordance with this Rider or to continue to purchase its curtailable requirements by paying the Automatic Buy-Through Price, as set forth below, for all kilowatt hours of curtailable requirements.

Curtailable load and compliance with a request for curtailment shall be measured in one of the following ways:

Option A – Customer may contract for a given amount of firm demand, as measured on a 15-minute demand basis. During a request for physical curtailment, Customer shall reduce its demand to the firm demand designated in the contract. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price, as applicable, shall apply to the difference in the actual kWh during any requested curtailment and the contracted firm demand multiplied by the time period (hours) of curtailment [Actual kWh – (firm kW x hours curtailed)]. The measured demand in excess of the firm load during each requested physical curtailment in the billing period shall be the measure of non-compliance, as measured on a 15-minute demand basis.

AVAILABILITY OF SERVICE

This rider shall be made available to customers served under applicable power schedules who contract for not less than 1,000 kilowatts individually. The aggregate service under P.S.C. No. 16, CSR10 and CSR30 for Kentucky Utilities Company is limited to 100 megawatts in addition to the contracted curtailable load under P.S.C. No. 14, CSR1 and CSR3 for Kentucky Utilities Company as of August 1, 2010. T

CONTRACT OPTION

Customer may, at Customer's option, contract with Company to curtail service upon notification by Company. Requests for curtailment shall not exceed three hundred and seventy-five (375) hours per year nor shall any single request for curtailment be for less than thirty (30) minutes or for more than fourteen (14) hours per calendar day, with no more than two (2) requests for curtailment per calendar day within these parameters. A curtailment is a continuous event with a start and stop time that may have both physical curtailments and buy-through options within the interval between the start and stop time. Company may request or cancel a curtailment at any time during any hour of the year, but shall give no less than ten (10) minutes notice when either requesting or canceling a curtailment.

Company may request at its sole discretion up to 100 hours of physical curtailment per year without a buy-through option. Company may also request at its sole discretion up to 275 hours of curtailment per year with a buy-through option, whereby Customer may, at its option, choose either to curtail service in accordance with this Rider or to continue to purchase its curtailable requirements by paying the Automatic Buy-Through Price, as set forth below, for all kilowatt hours of curtailable requirements. T

Curtailable load and compliance with a request for curtailment shall be measured in one of the following ways:

Option A -- Customer may contract for a given amount of firm demand, as measured on the demand basis of the standard rate on which Customer is billed. T During a request for physical curtailment, Customer shall reduce its demand to the firm demand designated in the contract. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price, as applicable, shall apply to the difference in the actual kWh during any requested curtailment and the contracted firm demand multiplied by the time period (hours) of curtailment [Actual kWh – (firm kVA x hours curtailed)]. T The measured demand in excess of the firm load during each requested physical curtailment in the billing period shall be the measure of non-compliance, as measured on the demand basis of the T standard rate on which Customer is billed. T

Date of Issue: June 29, 2012

Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Standard Rate Rider CSR10
Curtailable Service Rider 10

Option B – Customer may contract for a given amount of curtailable load by which Customer shall agree to reduce its demand at any time by such Designated Curtailable Load. During a request for physical curtailment, Customer shall reduce its demand to a level equal to the maximum 15-minute demand immediately prior to the curtailment less the designated curtailable load. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price shall apply to the difference in the actual kWh during any requested curtailment and the product of Customer's maximum load immediately preceding curtailment less Customer's designated curtailable load designated in the contract multiplied by the time period (hours) of a requested curtailment {Actual kWh – [(Max kW preceding – Designated Curtailable kW) x hours of requested curtailment]}. Non-compliance for each requested physical curtailment shall be the measured positive value determined by subtracting (i) Customer's designated curtailable load from (ii) Customer's maximum demand immediately preceding the curtailment and then subtracting such difference from (iii) the Customer's maximum demand during such curtailment.

RATE

Customer will receive the following credits for curtailable service during the month:

Transmission Voltage Service	$ 5.40 per kW of Curtailable Billing Demand
Primary Voltage Service	$ 5.50 per kW of Curtailable Billing Demand
Non-Compliance Charge of:	$16.00 per kW

Failure of Customer to curtail when requested to do so may result in termination of service under this rider. Customer will be charged for the portion of each requested curtailment not met at the applicable standard charges. The Company and Customer may arrange to have installed, at Customer's expense, the necessary telecommunication and control equipment to allow the Company to control Customers' curtailable load. Non-compliance charges will be waived if failure to curtail is a result of failure of Company's equipment; however, non-compliance charges will not be waived if failure to curtail is a result of Customer's equipment. If arrangements are made to have telecommunication and control equipment installed, then backup arrangements must also be established in the event either Company's or Customer's equipment fails.

CURTAILABLE BILLING DEMAND

For a Customer electing Option A, Curtailable Billing Demand shall be the difference between (a) the Customer's measured maximum kilowatt demand during the billing period for any 15-minute interval during the following time periods: (i) for the summer peak months of May through September, from 10 A.M. to 10 P.M,(EST) and (ii) for the months October continuously through April, from 6 A.M. to 10 P.M, (EST) and (b) the firm contract demand.

For a Customer electing Option B, Curtailable Billing Demand shall be the customer Designated Curtailable Load, as described above.

Standard Rate Rider CSR10
Curtailable Service Rider 10

Option B – Customer may contract for a given amount of curtailable load by which Customer shall agree to reduce its demand at any time by such Designated Curtailable Load. During a request for physical curtailment, Customer shall reduce its demand to a level equal to the maximum demand (as T
measured on the demand basis of the standard rate on which Customer is billed) T
immediately prior to the curtailment less the designated curtailable load. During a request for curtailment with a buy-through option, the Automatic Buy-Through Price shall apply to the difference in the actual kWh during any requested curtailment and the product of Customer's maximum load immediately preceding curtailment less Customer's designated curtailable load designated in the contract multiplied by the time period (hours) of a requested curtailment {Actual kWh – [(Max kVA preceding – Designated Curtailable kVA) x hours of requested T
curtailment]}. Non-compliance for each requested physical curtailment shall be the measured positive value determined by subtracting (i) Customer's designated curtailable load from (ii) Customer's maximum demand immediately preceding the curtailment and then subtracting such difference from (iii) the Customer's maximum demand during such curtailment.

RATE

Customer will receive the following credits for curtailable service during the month:

Transmission Voltage Service	$ 2.75 per kVA of Curtailable Billing Demand	R/T
Primary Voltage Service	$ 2.80 per kVA of Curtailable Billing Demand	R/T
Non-Compliance Charge of:	$16.00 per kVA	T

Failure of Customer to curtail when requested to do so may result in termination of service under this rider. Customer will be charged for the portion of each requested curtailment not met at the applicable standard charges. The Company and Customer may arrange to have installed, at Customer's expense, the necessary telecommunication and control equipment to allow the Company to control Customers' curtailable load. Non-compliance charges will be waived if failure to curtail is a result of failure of Company's equipment; however, non-compliance charges will not be waived if failure to curtail is a result of Customer's equipment. If arrangements are made to have telecommunication and control equipment installed, then backup arrangements must also be established in the event either Company's or Customer's equipment fails.

CURTAILABLE BILLING DEMAND

For a Customer electing Option A, Curtailable Billing Demand shall be the difference between (a) the Customer's measured maximum kilowatt demand during the billing period for any billing T
interval during the following time periods: (i) for the summer peak months of May through September, from 10 A.M. to 10 P.M,(EST) and (ii) for the months October continuously through April, from 6 A.M. to 10 P.M, (EST) and (b) the firm contract demand.

For a Customer electing Option B, Curtailable Billing Demand shall be the customer Designated Curtailable Load, as described above.

P.S.C. No. 15, Original Sheet No. 50.2

Standard Rate Rider CSR10

Curtailable Service Rider 10

AUTOMATIC BUY-THROUGH PRICE

The Automatic Buy-Through Price per kWh shall be determined daily in accordance with the following formula:

Automatic Buy-Through Price = NGP x .012000 MMBtu/kWh

Where: NGP represents the mid-point price for natural gas ($/MMBtu) posted for the day in "Gas Daily" for Dominion—South Point and will be used for the electrical day from 12 midnight to midnight. Also the posted price for Monday or the day after a holiday is the posted price for Saturday, Sunday and the holiday.

TERM OF CONTRACT

The minimum original contract period shall be one (1) year and thereafter until terminated by giving at least six (6) months previous written notice, but Company may require that contract be executed for a longer initial term when deemed reasonably necessary by the size of the load or other conditions.

TERMS AND CONDITIONS

When the Company requests curtailment, upon request by the Customer, the Company shall provide a good-faith, non-binding estimate of the duration of requested curtailment. In addition, upon request by the Company, the Customer shall provide to the Company a good-faith, non-binding short-term operational schedule for their facility. Upon request by the Customer, the Company will provide, once per month, to the Customer an explanation of the reasons for any request for curtailment.

Except as specified above, all other provisions of the power rate to which this schedule is a rider shall apply.

Except as specified above, all other provisions of the power rate to which this schedule is a rider shall apply.

Date of Issue: June 29, 2012
Date Effective: August 1, 2012, subject to Article I.1.1 of the Settlement Agreement attached to and approved in September 30, 2010 KPSC Order in Case No. 2010-00204
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 53

Standard Rate Rider	LRI
	Load Reduction Incentive Rider

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule shall be made available as a rider to any customer served on Company's standard tariffs, having stand-by generation facilities of at least 500 kW, and agreeing to operate such facilities in accordance with the terms and conditions of this tariff. Service under this schedule is offered for a total maximum contracted load of 10,000 kW.

RATE

Up to $0.30 per kWh

TERMS AND CONDITIONS

1) Company will have the option to require Customer to operate Customer's stand-by generation to replace Customer's electric usage. Such period of generation shall not exceed 8 hours in any 24-hour period nor shall the total hours of generation in any 12-month period exceed 300 hours.
2) Should Company request Customer to operate Customer's stand-by generation, Company will notify Customer by 12 noon on a day ahead basis.
3) Company's request for Customer to operate Customer's stand-by generation will include an offer of a payment per kWh for Customer to operate Customer's stand-by generation.
4) Customer is obligated to operate Customer's stand-by generation should Customer accept Company's offered price.
5) Customer's stand-by generation shall not be operated in parallel with Company's system (i.e., such generation shall be connected to circuits which are isolated from Company's system).
6) Customer will be responsible for maintaining Customer's stand-by generation, including an adequate fuel supply, to ensure meeting Customer's obligation under this schedule.
7) Company will meter the output of Customer's stand-by generation, base the payment for Customer reducing load on the metered output, and provide payment to Customer through a credit to Customer's standard service billing.
8) Customer may provide Company with the option to install equipment that will permit Company to remotely start stand-by generation and switch circuits to such generation so that they are isolated from Company's system.
9) Company has no obligation to request operation of Customer's stand-by generation nor to provide any credit to Customer without first requesting Customer to provide stand-by generation.

TERM OF CONTRACT

The minimum term of contract shall be for one (1) year and thereafter until terminated by either party giving at least six (6) months written notice. Company may require a longer initial term when deemed necessary. Failure of Customer to operate stand-by generation may result in termination of contract.

Date of Issue: August 6, 2010
Date Effective: August 1, 2006

Standard Rate Rider SQF

Small Capacity Cogeneration and Small Power Production Qualifying Facilities

APPLICABLE:
In all territory served.

AVAILABILITY OF SERVICE
This rate and the terms and conditions set out herein are available for and applicable to Company's purchases of energy only from the owner of qualifying cogeneration or small power production facilities of 100 kW or less (such owner being hereafter called "Seller") installed on Seller's property to provide all or part of its requirements of electrical energy, or from which facilities Seller may elect to sell to Company all or part of such output of electrical energy.

Company will permit Seller's generating facilities to operate in parallel with Company's system under conditions set out below under "Parallel Operation".

Company will purchase such energy from Seller at the Rate, A or B, set out below and selected as hereafter provided, and under the terms and conditions stated herein. Company reserves the right to change the said Rates, upon proper filing with and acceptance by the jurisdictional Commission.

RATE A: TIME-DIFFERENTIATED RATE

1. For summer billing months of June, July, August and September, during the hours 9:01 A.M. thru 10:00 P.M. weekdays exclusive of holidays (on-peak hours),	$0.04538 per kWh
2. For winter billing months of December, January and February, during the hours 7:01 A.M. thru 10:00 P.M. weekdays exclusive of holidays (on-peak hours),	$0.04023 per kWh
3. During all other hours (off-peak hours)	$0.03139 per kWh

Determination of On-Peak and Off-Peak Hours: On-peak hours are defined as the hours of 9:01 A.M. through 10:00 P.M., E.D.T. (8:01 A.M. through 9:00 P.M., E.S.T.), Mondays through Fridays exclusive of holidays (under 1 above), and the hours of 7:01 A.M. through 10:00 P.M., E.D.T. (6:01 A.M. through 9:00 P.M., E.S.T.), Mondays through Fridays exclusive of holidays (under 2 above). Off-peak hours are defined as all hours other than those listed as on-peak (under 3 above). Company reserves the right to change the hours designated as on-peak from time to time as conditions indicate to be appropriate.

RATE B: NON-TIME-DIFFERENTIATED RATE

For all kWh purchased by Company, $0.03418 per kWh

Date of Issue: August 6, 2010
Date Effective: June 30, 2010
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

Small Capacity Cogeneration and Small Power Production Qualifying Facilities

APPLICABLE:
In all territory served.

AVAILABILITY OF SERVICE
This rate and the terms and conditions set out herein are available for and applicable to Company's purchases of energy only from the owner of qualifying cogeneration or small power production facilities of 100 kW or less (such owner being hereafter called "Seller") installed on Seller's property to provide all or part of its requirements of electrical energy, or from which facilities Seller may elect to sell to Company all or part of such output of electrical energy.

Company will permit Seller's generating facilities to operate in parallel with Company's system under conditions set out below under "Parallel Operation".

Company will purchase such energy from Seller at the Rate, A or B, set out below and selected as hereafter provided, and under the terms and conditions stated herein. Company reserves the right to change the said Rates, upon proper filing with and acceptance by the jurisdictional Commission.

RATE A: TIME-DIFFERENTIATED RATE

1. For summer billing months of June, July, August and September, during the hours 9:01 A.M. thru 10:00 P.M. weekdays exclusive of holidays (on-peak hours),	$0.04538 per kWh
2. For winter billing months of December, January and February, during the hours 7:01 A.M. thru 10:00 P.M. weekdays exclusive of holidays (on-peak hours),	$0.04023 per kWh
3. During all other hours (off-peak hours)	$0.03139 per kWh

Determination of On-Peak and Off-Peak Hours: On-peak hours are defined as the hours of 9:01 A.M. through 10:00 P.M., E.D.T. (8:01 A.M. through 9:00 P.M., E.S.T.), Mondays through Fridays exclusive of holidays (under 1 above), and the hours of 7:01 A.M. through 10:00 P.M., E.D.T. (6:01 A.M. through 9:00 P.M., E.S.T.), Mondays through Fridays exclusive of holidays (under 2 above). Off-peak hours are defined as all hours other than those listed as on-peak (under 3 above). Company reserves the right to change the hours designated as on-peak from time to time as conditions indicate to be appropriate.

RATE B: NON-TIME-DIFFERENTIATED RATE

For all kWh purchased by Company, $0.03418 per kWh

Date of Issue: June 29, 2012

Standard Rate Rider SQF

Small Capacity Cogeneration and Small Power Production Qualifying Facilities

SELECTION OF RATE AND METERING

Subject to provisions hereafter in this Section relative to payment of costs of metering equipment, either Seller or Company may select Rate A, the Time-Differentiated Rate, for application to Company's said purchases of energy from Seller. If neither Seller nor Company selects Rate A, then Rate B, the Non-Time-Differentiated Rate, shall apply.

If neither Seller nor Company selects Rate A, and Rate B therefore is to apply to such purchases, Company, at Seller's cost, will install, own and operate a non-time-differentiated meter and associated equipment, at a location selected by Company, measuring energy, produced by Seller's generator, flowing into Company's system. Such meter will be tested at intervals prescribed by Commission Regulation, with Seller having a right to witness all such tests; and Seller will pay to Company its fixed cost on such meter and equipment, expense of such periodic tests of the meter and any other expenses (all such costs and expenses, together, being hereafter called "costs of non-time-differentiated metering").

If either Seller or Company selects Rate A to apply to Company's said purchases of energy from Seller, the party (Seller or Company) so selecting Rate A shall pay (a) the cost of a time-differentiated recording meter and associated equipment, at a location selected by Company, measuring energy, produced by Seller's generator, flowing into Company's system, required for the application of Rate A, in excess of (b) the costs of non-time-differentiated metering which shall continue to be paid by Seller.

In addition to metering referred to above, Company at its option and cost may install, own and operate, on Seller's generator, a recording meter to record the capacity, energy and reactive output of such generator at specified time intervals.

Company shall have access to all such meters at reasonable times during Seller's normal business hours, and shall regularly provide to Seller copies of all information provided by such meters.

PAYMENT

Any payment due from Company to Seller will be due within twelve (12) days from date of Company's reading of meter; provided, however, that, if Seller is a customer of Company, in lieu of such payment Company may offset its payment due to Seller hereunder, against Seller's next bill and payment due to Company for Company's service to Seller as customer.

PARALLEL OPERATION

Company hereby permits Seller to operate its generating facilities in parallel with Company's system, under the following conditions and any other conditions required by Company where unusual conditions not covered herein arise:

1. Prior to installation in Seller's system of any generator and associated facilities which are intended to be interconnected and operated in parallel with Company's system, or prior to the inter-connection to Company's system of any such generator and associated facilities already installed in Seller's system, Seller will provide to Company plans for such generator

Standard Rate Rider SQF

Small Capacity Cogeneration and Small Power Production Qualifying Facilities

SELECTION OF RATE AND METERING

Subject to provisions hereafter in this Section relative to payment of costs of metering equipment, either Seller or Company may select Rate A, the Time-Differentiated Rate, for application to Company's said purchases of energy from Seller. If neither Seller nor Company selects Rate A, then Rate B, the Non-Time-Differentiated Rate, shall apply.

If neither Seller nor Company selects Rate A, and Rate B therefore is to apply to such purchases, Company, at Seller's cost, will install, own and operate a non-time-differentiated meter and associated equipment, at a location selected by Company, measuring energy, produced by Seller's generator, flowing into Company's system. Such meter will be tested at intervals prescribed by Commission Regulation, with Seller having a right to witness all such tests; and Seller will pay to Company its fixed cost on such meter and equipment, expense of such periodic tests of the meter and any other expenses (all such costs and expenses, together, being hereafter called "costs of non-time-differentiated metering").

If either Seller or Company selects Rate A to apply to Company's said purchases of energy from Seller, the party (Seller or Company) so selecting Rate A shall pay (a) the cost of a time-differentiated recording meter and associated equipment, at a location selected by Company, measuring energy, produced by Seller's generator, flowing into Company's system, required for the application of Rate A, in excess of (b) the costs of non-time-differentiated metering which shall continue to be paid by Seller.

In addition to metering referred to above, Company at its option and cost may install, own and operate, on Seller's generator, a recording meter to record the capacity, energy and reactive output of such generator at specified time intervals.

Company shall have access to all such meters at reasonable times during Seller's normal business hours, and shall regularly provide to Seller copies of all information provided by such meters.

PAYMENT

Any payment due from Company to Seller will be due within twelve (12) days from date of Company's reading of meter; provided, however, that, if Seller is a customer of Company, in lieu of such payment Company may offset its payment due to Seller hereunder, against Seller's next bill and payment due to Company for Company's service to Seller as customer.

PARALLEL OPERATION

Company hereby permits Seller to operate its generating facilities in parallel with Company's system, under the following conditions and any other conditions required by Company where unusual conditions not covered herein arise:

1. Prior to installation in Seller's system of any generator and associated facilities which are intended to be interconnected and operated in parallel with Company's system, or prior to the inter-connection to Company's system of any such generator and associated facilities already installed in Seller's system, Seller will provide to Company plans for such generator

Date of Issue: June 29, 2012
Date Effective: December 5, 1985
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

and facilities. Company may, but shall have no obligation to, examine such plans and disapprove them in whole or in part, to the extent Company believes that such plans and proposed facilities will not adequately assure the safety of Company's facilities or system. Seller acknowledges and agrees that the sole purpose of any Company examination of such plans is the satisfaction of Company's interest in the safety of Company's own facilities and system, and that Company shall have no responsibility of any kind to Seller or to any other party in connection with any such examination. If Seller thereafter proposes any change from such plans submitted to Company, prior to the implementation thereof Seller will provide to Company new plans setting out such proposed change(s).

2. Seller will own, install, operate and maintain all generating facilities on its plant site, such facilities to include, but not be limited to, (a) protective equipment between the systems of Seller and Company and (b) necessary control equipment to synchronize frequency and voltage between such two systems. Seller's voltage at the point of interconnection will be the same as Company's system voltage. Suitable circuit breakers or similar equipment, as specified by Company, will be furnished by Seller at a location designated by Company to enable the separation or disconnection of the two electrical systems. Except in emergencies, the circuit breakers, or similar equipment, will be operated only by, or at the express direction of, Company personnel and will be accessible to Company at all times. In addition, a circuit breaker or similar equipment shall be furnished and installed by Seller to separate or disconnect Seller's generator.

3. Seller will be responsible for operating the generator and all facilities owned by Seller, except as hereafter specified. Seller will maintain its system in synchronization with Company's system.

4. Seller will (a) pay Company for all damage to Company's equipment, facilities or system, and (b) save and hold Company harmless from all claims, demands and liabilities of every kind and nature for injury or damage to, or death of, persons and/or property of others, including costs and expenses of defending against the same, arising in any manner in connection with Seller's generator, equipment, facilities or system or the operation thereof.

5. Seller will construct any additional facilities, in addition to generating and associated (interface) facilities, required for interconnection unless Company and Seller agree to Company's constructing such facilities, at Seller's expense, where Seller is not a customer of Company. When Seller is a customer of Company and Company is required to construct facilities different than otherwise required to permit interconnection, Seller shall pay such additional cost of facilities. Seller agrees to reimburse Company, at the time of installation, or, if agreed to by both parties, over a period of up to three (3) years, for any facilities including any hereafter required (but exclusive of metering equipment, elsewhere herein provided for) constructed by Company to permit Seller to operate interconnected with Company's system. When interconnection costs are repaid over a period of time, such payments will be made monthly and include interest on the unpaid balance at the percentage rate equal to the capital costs that Company would experience at such time by new financing, based on Company's then existing capital structure, with return on equity to be at the rate allowed in Company's immediately preceding rate case.

and facilities. Company may, but shall have no obligation to, examine such plans and disapprove them in whole or in part, to the extent Company believes that such plans and proposed facilities will not adequately assure the safety of Company's facilities or system. Seller acknowledges and agrees that the sole purpose of any Company examination of such plans is the satisfaction of Company's interest in the safety of Company's own facilities and system, and that Company shall have no responsibility of any kind to Seller or to any other party in connection with any such examination. If Seller thereafter proposes any change from such plans submitted to Company, prior to the implementation thereof Seller will provide to Company new plans setting out such proposed change(s).

2. Seller will own, install, operate and maintain all generating facilities on its plant site, such facilities to include, but not be limited to, (a) protective equipment between the systems of Seller and Company and (b) necessary control equipment to synchronize frequency and voltage between such two systems. Seller's voltage at the point of interconnection will be the same as Company's system voltage. Suitable circuit breakers or similar equipment, as specified by Company, will be furnished by Seller at a location designated by Company to enable the separation or disconnection of the two electrical systems. Except in emergencies, the circuit breakers, or similar equipment, will be operated only by, or at the express direction of, Company personnel and will be accessible to Company at all times. In addition, a circuit breaker or similar equipment shall be furnished and installed by Seller to separate or disconnect Seller's generator.

3. Seller will be responsible for operating the generator and all facilities owned by Seller, except as hereafter specified. Seller will maintain its system in synchronization with Company's system.

4. Seller will (a) pay Company for all damage to Company's equipment, facilities or system, and (b) save and hold Company harmless from all claims, demands and liabilities of every kind and nature for injury or damage to, or death of, persons and/or property of others, including costs and expenses of defending against the same, arising in any manner in connection with Seller's generator, equipment, facilities or system or the operation thereof.

5. Seller will construct any additional facilities, in addition to generating and associated (interface) facilities, required for interconnection unless Company and Seller agree to Company's constructing such facilities, at Seller's expense, where Seller is not a customer of Company. When Seller is a customer of Company and Company is required to construct facilities different than otherwise required to permit interconnection, Seller shall pay such additional cost of facilities. Seller agrees to reimburse Company, at the time of installation, or, if agreed to by both parties, over a period of up to three (3) years, for any facilities including any hereafter required (but exclusive of metering equipment, elsewhere herein provided for) constructed by Company to permit Seller to operate interconnected with Company's system. When interconnection costs are repaid over a period of time, such payments will be made monthly and include interest on the unpaid balance at the percentage rate equal to the capital costs that Company would experience at such time by new financing, based on Company's then existing capital structure, with return on equity to be at the rate allowed in Company's immediately preceding rate case.

6. Company will have the continuing right to inspect and approve Seller's facilities, described herein, and to request and witness any tests necessary to determine that such facilities are installed and operating properly; but Company will have no obligation to inspect or approve facilities, or to request or witness tests; and Company will not in any manner be responsible for Seller's facilities or any operation thereof.

7. Seller assumes all responsibility for the electric service upon Seller's premises at and from the point of any delivery or flow of electricity from Company, and for the wires and equipment used in connection therewith; and Seller will protect and save Company harmless from all claims for injury or damage to persons or property, including but not limited to property of Seller, occurring on or about Seller's premises or at and from the point of delivery or flow of electricity from Company, occasioned by such electricity or said wires and equipment, except where said injury or damage is proved to have been caused solely by the negligence of Company.

8. Each, Seller and Company, will designate one or more Operating Representatives for the purpose of contacts and communications between the parties concerning operations of the two systems.

9. Seller will notify Company's Energy Control Center prior to each occasion of Seller's generator being brought into or (except in cases of emergencies) taken out of operation.

10. Company reserves the right to curtail a purchase from Seller when:

    (a) the purchase will result in costs to Company greater than would occur if the purchase were not made but instead Company, itself, generated an equivalent amount of energy; or

    (b) Company has a system emergency and purchases would (or could) contribute to such emergency.

    Seller will be notified of each curtailment.

TERMS AND CONDITIONS

Except as provided herein, conditions or operations will be as provided in Company's Terms and Conditions.

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 56

Standard Rate Rider LQF

Large Capacity Cogeneration and Small Power Production Qualifying Facilities

AVAILABILITY

In all territory served.

APPLICABILITY OF SERVICE

Applicable to any small power production or cogeneration "qualifying facility" with capacity over 100 kW as defined by the Kentucky Public Service Commission Regulation 807 KAR 5:054, and which contracts to sell energy or capacity or both to Company.

RATES FOR PURCHASES FROM QUALIFYING FACILITIES

Energy Component Payments

The hourly avoided energy cost (AEC) in $ per MWh, which is payable to a QF for delivery of energy, shall be equal to Company's actual variable fuel expenses, for Company-owned coal and natural gas-fired production facilities, divided by the associated megawatt-hours of generation, as determined for the previous month. The total amount of the avoided energy cost payment to be made to a QF in an hour is equal to [AEC x E_{QF}], where E_{QF} is the amount of megawatt-hours delivered by a QF in that hour and which are determined by suitable metering.

Capacity Component Payments

The hourly avoided capacity cost (ACC) in $ per MWh, which is payable to a QF for delivery of capacity, shall be equal to the effective purchase price for power available to Company from the inter-utility market (which includes both energy and capacity charges) less Company's actual variable fuel expense (AEC). The total amount of the avoided capacity cost payment to be made to a QF in an hour is equal to [ACC x CAP_I], where CAP_I, the capacity delivered by the QF, is determined on the basis of the system demand (D_I) and Company's need for capacity in that hour to adequately serve the load.

Determination of CAP_I

For the following determination of CAP_I, C_{KU} represents Company's installed or previously arranged capacity at the time a QF signs a contract to deliver capacity; C_{QF} represents the actual capacity provided by a QF, but no more than the contracted capacity; and C_M represents capacity purchased from the inter-utility market.

1. System demand is less than or equal to Company's capacity:
   $D_I \leq C_{KU}$; $CAP_I = 0$
2. System demand is greater than Company's capacity but less than or equal to the total of Company's capacity and the capacity provided by a QF:

   $C_{KU} < D_I \leq [C_{KU} + C_{QF}]$; $CAP_I = C_M$

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

3. System demand is greater than the total of Company's capacity and the capacity provided by a QF:

   $D_I > [C_{KU} + C_{QF}]$; $CAP_I = C_{QF}$

PAYMENT

Company shall pay each bill for electric power rendered to it in accordance with the terms of the contract, within twelve (12) days of the date the bill is rendered. In lieu of such payment plan, Company will, upon written request, credit the Customer's account for such purchases.

TERM OF CONTRACT

For contracts which cover the purchase of energy only, the term shall be one (1) year, and shall be self-renewing from year-to-year thereafter, unless canceled by either party on one (1) year's written notice.

For contracts which cover the purchase of capacity and energy, the term shall be five (5) years.

TERMS AND CONDITIONS

1. Qualifying facilities shall be required to pay for any additional interconnection costs, to the extent that such costs are in excess of those that Company would have incurred if the qualifying facility's output had not been purchased.
2. A qualifying facility operating in parallel with Company must demonstrate that its equipment is designed, installed, and operated in a manner that insures safe and reliable interconnected operation. A qualifying facility should contact Company for assistance in this regard.
3. The purchasing, supplying and billing for service, and all conditions applying hereto, shall be specified in the contract executed by the parties, and are subject to the jurisdiction of the Kentucky Public Service Commission, and to Company's Terms and Conditions currently in effect, as filed with the Commission.

3. System demand is greater than the total of Company's capacity and the capacity provided by a QF:

   $D_I > [C_{KU} + C_{QF}]$; $CAP_I = C_{QF}$

PAYMENT

Company shall pay each bill for electric power rendered to it in accordance with the terms of the contract, within twelve (12) days of the date the bill is rendered. In lieu of such payment plan, Company will, upon written request, credit the Customer's account for such purchases.

TERM OF CONTRACT

For contracts which cover the purchase of energy only, the term shall be one (1) year, and shall be self-renewing from year-to-year thereafter, unless canceled by either party on one (1) year's written notice.

For contracts which cover the purchase of capacity and energy, the term shall be five (5) years.

TERMS AND CONDITIONS

1. Qualifying facilities shall be required to pay for any additional interconnection costs, to the extent that such costs are in excess of those that Company would have incurred if the qualifying facility's output had not been purchased.
2. A qualifying facility operating in parallel with Company must demonstrate that its equipment is designed, installed, and operated in a manner that insures safe and reliable interconnected operation. A qualifying facility should contact Company for assistance in this regard.
3. The purchasing, supplying and billing for service, and all conditions applying hereto, shall be specified in the contract executed by the parties, and are subject to the jurisdiction of the Kentucky Public Service Commission, and to Company's Terms and Conditions currently in effect, as filed with the Commission.

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 57

Standard Rate Rider NMS
Net Metering Service

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Available to any customer-generator who owns and operates a generating facility located on Customer's premises that generates electricity using solar, wind, biomass or biogas, or hydro energy in parallel with Company's electric distribution system to provide all or part of Customer's electrical requirements, and who executes Company's written Application for Interconnection and Net Metering. The generation facility shall be limited to a maximum rated capacity of 30 kilowatts. This Standard Rate Rider is intended to comply with all provisions of the Interconnection and Net Metering Guidelines approved by the Public Service Commission of Kentucky, which can be found on-line at www.psc.ky.gov as Appendix A to the January 8, 2009 Order in Administrative Case No. 2008-00169.

METERING AND BILLING
Net metering service shall be measured using a single meter or, as determined by Company, additional meters and shall be measured in accordance with standard metering practices by metering equipment capable of registering power flow in both directions for each time period defined by the applicable rate schedule. This net metering equipment shall be provided without any cost to the Customer. This provision does not relieve Customer's responsibility to pay metering costs embedded in the Company's Commission-approved base rates. Additional meters, requested by Customer, will be provided at Customer's expense.

If electricity generated by Customer and fed back to Company's system exceeds the electricity supplied to Customer from the system during a billing period, Customer shall receive a credit for the net delivery on Customer's bill for the succeeding billing periods. Any such unused excess credits will be carried forward and drawn on by Customer as needed. Unused excess credits existing at the time Customer's service is terminated end with Customer's account and are not transferrable between customers or locations.

NET METERING SERVICE INTERCONNECTION GUIDELINES
General – Customer shall operate the generating facility in parallel with Company's system under the following conditions and any other conditions required by Company where unusual circumstances arise not covered herein:

1. Customer to own, operate, and maintain all generating facilities on their premises. Such facilities shall include, but not be limited to, necessary control equipment to synchronize frequency, voltage, etc., between Customer's and Company's system as well as adequate protective equipment between the two systems. Customer's voltage at the point of interconnection will be the same as Company's system voltage.
2. Customer will be responsible for operating all generating facilities owned by Customer, except as specified hereinafter. Customer will maintain its system in synchronization with Company's system.
3. Customer will be responsible for any damage done to Company's equipment due to failure of Customer's control, safety, or other equipment.
4. Customer agrees to inform Company of any changes it wishes to make to its generating or associated facilities that differ from those initially installed and described to Company in writing and obtain prior approval from Company.
5. Company will have the right to inspect and approve Customer's facilities described herein, and to conduct any tests necessary to determine that such facilities are installed and

operating properly; however, Company will have no obligation to inspect, witness tests, or in any manner be responsible for Customer's facilities or operation thereof.

6. Customer assumes all responsibility for the electric service on Customer's premises at and from the point of delivery of electricity from Company and for the wires and equipment used in connection therewith, and will protect and save Company harmless from all claims for injury or damage to persons or property occurring on Customer's premises or at and from the point of delivery of electricity from Company, occasioned by such electricity or said wires and equipment, except where said injury or damage will be shown to have been occasioned solely by the negligence or willful misconduct of Company.

Level 1 – A Level 1 installation is defined as an inverter-based generator certified as meeting the requirements of Underwriters Laboratories Standard 1741 and meeting the following conditions:

1. The aggregated net metering generation on a radial distribution circuit will not exceed 15% of the line section's most recent one hour peak load. A line section is the smallest part of the primary distribution system the generating facility could remain connected to after operation of any sectionalizing devices.
2. The aggregated net metering generation on a shared singled-phase secondary will not exceed 20 kVA or the nameplate rating of the service transformer.
3. A single-phase net metering generator interconnected on the center tap neutral of a 240 volt service shall not create an imbalance between the two sides of the 240 volt service of more than 20% of the nameplate rating of the service transformer.
4. A net metering generator interconnected to Company's three-phase, three-wire primary distribution lines, shall appear as a phase-to-phase connection to Company's primary distribution line.
5. A net metering generator interconnected to Company's three-phase, four-wire primary distribution lines, shall appear as an effectively grounded source to Company's primary distribution line.
6. A net metering generator will not be connected to an area or spot network.
7. There are no identified violations of the applicable provisions of IEEE 1547, "Standard for Interconnecting Distributed Resources with Electric Power Systems".
8. Company will not be required to construct any facilities on its own system to accommodate the net metering generator.

Customer desiring a Level 1 interconnection shall submit a "LEVEL 1 - Application for Interconnection and Net Metering." Company shall notify Customer within 20 business days as to whether the request is approved or, if denied, the reason(s) for denial. If additional information is required, the Company will notify Customer, and the time between notification and submission of the information shall not be counted towards the 20 business days. Approval is contingent upon an initial inspection and witness test at the discretion of Company.

Level 2 – A Level 2 installation is defined as generator that is not inverter-based; that uses equipment not certified as meeting the requirements of Underwriters Laboratories Standard 1741, or that does not meet one or more of the conditions required of a Level 1 net metering generator. A Level 2 Application will be approved if the generating facility meets the Company's technical interconnection requirements. Those requirements are available on line at www.lge-ku.com and upon request.

NET METERING SERVICE INTERCONNECTION GUIDELINES (continued)

operating properly; however, Company will have no obligation to inspect, witness tests, or in any manner be responsible for Customer's facilities or operation thereof.

6. Customer assumes all responsibility for the electric service on Customer's premises at and from the point of delivery of electricity from Company and for the wires and equipment used in connection therewith, and will protect and save Company harmless from all claims for injury or damage to persons or property occurring on Customer's premises or at and from the point of delivery of electricity from Company, occasioned by such electricity or said wires and equipment, except where said injury or damage will be shown to have been occasioned solely by the negligence or willful misconduct of Company.

Level 1 – A Level 1 installation is defined as an inverter-based generator certified as meeting the requirements of Underwriters Laboratories Standard 1741 and meeting the following conditions:

1. The aggregated net metering generation on a radial distribution circuit will not exceed 15% of the line section's most recent one hour peak load. A line section is the smallest part of the primary distribution system the generating facility could remain connected to after operation of any sectionalizing devices.
2. The aggregated net metering generation on a shared singled-phase secondary will not exceed 20 kVA or the nameplate rating of the service transformer.
3. A single-phase net metering generator interconnected on the center tap neutral of a 240 volt service shall not create an imbalance between the two sides of the 240 volt service of more than 20% of the nameplate rating of the service transformer.
4. A net metering generator interconnected to Company's three-phase, three-wire primary distribution lines, shall appear as a phase-to-phase connection to Company's primary distribution line.
5. A net metering generator interconnected to Company's three-phase, four-wire primary distribution lines, shall appear as an effectively grounded source to Company's primary distribution line.
6. A net metering generator will not be connected to an area or spot network.
7. There are no identified violations of the applicable provisions of IEEE 1547, "Standard for Interconnecting Distributed Resources with Electric Power Systems".
8. Company will not be required to construct any facilities on its own system to accommodate the net metering generator.

Customer desiring a Level 1 interconnection shall submit a "LEVEL 1 - Application for Interconnection and Net Metering." Company shall notify Customer within 20 business days as to whether the request is approved or, if denied, the reason(s) for denial. If additional information is required, the Company will notify Customer, and the time between notification and submission of the information shall not be counted towards the 20 business days. Approval is contingent upon an initial inspection and witness test at the discretion of Company.

Level 2 – A Level 2 installation is defined as generator that is not inverter-based; that uses equipment not certified as meeting the requirements of Underwriters Laboratories Standard 1741, or that does not meet one or more of the conditions required of a Level 1 net metering generator. A Level 2 Application will be approved if the generating facility meets the Company's technical interconnection requirements. Those requirements are available on line at www.lge-ku.com and upon request.

Net Metering Service

NET METERING SERVICE INTERCONNECTION GUIDELINES (continued)

Customer desiring a Level 2 interconnection shall submit a "LEVEL 2 - Application for Interconnection and Net Metering." Company shall notify Customer within 30 business days as to whether the request is approved or, if denied, the reason(s) for denial. If additional information is required, the Company will notify Customer, and the time between notification and submission of the information shall not be counted towards the 30 business days. Approval is contingent upon an initial inspection and witness test at the discretion of Company.

Customer submitting a "Level 2 - Application for Interconnection and Net Metering" will provide a non-refundable inspection and processing fee of $100, and in the event that the Company determines an impact study to be necessary, shall be responsible for any reasonable costs of up to $1,000 of documented costs for the initial impact study.

Additional studies requested by Customer shall be at Customer's expense.

CONDITIONS OF INTERCONNECTION

Customer may operate his net metering generator in parallel with Company's system when complying with the following conditions:

1. Customer shall install, operate, and maintain, at Customer's sole cost and expense, any control, protective, or other equipment on Customer's system required by Company's technical interconnection requirements based on IEEE 1547, NEC, accredited testing laboratories, and the manufacturer's suggested practices for safe, efficient and reliable operation of the net metering generating facility in parallel with Company's system. Customer bears full responsibility for the installation, maintenance and safe operation of the net metering generating facility. Upon reasonable request from Company, Customer shall demonstrate compliance.
2. Customer shall represent and warrant compliance of the net metering generator with:
   a) any applicable safety and power standards established by IEEE and accredited testing laboratories;
   b) NEC, as may be revised from time-to-time;
   c) Company's rules and regulations and Terms and Conditions, as may be revised by time-to-time by the Public Service Commission of Kentucky;
   d) the rules and regulations of the Public Service Commission of Kentucky, as may be revised by time-to-time by the Public Service Commission of Kentucky:
   e) all other local, state, and federal codes and laws, as may be in effect from time-to-time.
3. Any changes or additions to Company's system required to accommodate the net metering generator shall be Customer's financial responsibility and Company shall be reimbursed for such changes or additions prior to construction.
4. Customer shall operate the net metering generator in such a manner as not to cause undue fluctuations in voltage, intermittent load characteristics or otherwise interfere with the operation of Company's electric system. Customer shall so operate the generating facility in such a manner that no adverse impacts will be produced thereby to the service quality rendered by Company to any of its other customers or to any electric system interconnected with Company's electric system.
5. Customer shall be responsible for protecting, at Customer's sole cost and expense, the net metering generating facility from any condition or disturbance on Company's electric system, including, but not limited to, voltage sags or swells, system faults, outages, loss of a single phase of supply, equipment failures, and lightning or switching surges, except that the Company shall be responsible for repair of damage caused to the net metering

Customer desiring a Level 2 interconnection shall submit a "LEVEL 2 - Application for Interconnection and Net Metering." Company shall notify Customer within 30 business days as to whether the request is approved or, if denied, the reason(s) for denial. If additional information is required, the Company will notify Customer, and the time between notification and submission of the information shall not be counted towards the 30 business days. Approval is contingent upon an initial inspection and witness test at the discretion of Company.

Customer submitting a "Level 2 - Application for Interconnection and Net Metering will provide a non-refundable inspection and processing fee of $100, and in the event that the Company determines an impact study to be necessary, shall be responsible for any reasonable costs of up to $1,000 of documented costs for the initial impact study.

Additional studies requested by Customer shall be at Customer's expense.

CONDITIONS OF INTERCONNECTION

Customer may operate his net metering generator in parallel with Company's system when complying with the following conditions:

1. Customer shall install, operate, and maintain, at Customer's sole cost and expense, any control, protective, or other equipment on Customer's system required by Company's technical interconnection requirements based on IEEE 1547, NEC, accredited testing laboratories, and the manufacturer's suggested practices for safe, efficient and reliable operation of the net metering generating facility in parallel with Company's system. Customer bears full responsibility for the installation, maintenance and safe operation of the net metering generating facility. Upon reasonable request from Company, Customer shall demonstrate compliance.
2. Customer shall represent and warrant compliance of the net metering generator with:
   a) any applicable safety and power standards established by IEEE and accredited testing laboratories;
   b) NEC, as may be revised from time-to-time;
   c) Company's rules and regulations and Terms and Conditions, as may be revised by time-to-time by the Public Service Commission of Kentucky;
   d) the rules and regulations of the Public Service Commission of Kentucky, as may be revised by time-to-time by the Public Service Commission of Kentucky:
   e) all other local, state, and federal codes and laws, as may be in effect from time-to-time.
3. Any changes or additions to Company's system required to accommodate the net metering generator shall be Customer's financial responsibility and Company shall be reimbursed for such changes or additions prior to construction.
4. Customer shall operate the net metering generator in such a manner as not to cause undue fluctuations in voltage, intermittent load characteristics or otherwise interfere with the operation of Company's electric system. Customer shall so operate the generating facility in such a manner that no adverse impacts will be produced thereby to the service quality rendered by Company to any of its other customers or to any electric system interconnected with Company's electric system.
5. Customer shall be responsible for protecting, at Customer's sole cost and expense, the net metering generating facility from any condition or disturbance on Company's electric system, including, but not limited to, voltage sags or swells, system faults, outages, loss of a single phase of supply, equipment failures, and lightning or switching surges, except that the Company shall be responsible for repair of damage caused to the net metering

CONDITIONS OF INTERCONNECTION (continued)

generator resulting solely from the negligence or willful misconduct on the part of the Company.

6. Following the initial testing and inspection of the generating facility and upon reasonable advance notice to Customer, Company shall have access at reasonable times to the generating facility to perform reasonable on-site inspections to verify that the installation, maintenance and operation of the net metering generator comply with the requirements of this rate schedule.
7. Where required by the Company, Customer shall furnish and install on Customer's side of the point of interconnection a safety disconnect switch which shall be capable of fully disconnecting Customer's net metering generator from Company's electric service under the full rated conditions of Customer's net metering generator. The external disconnect switch (EDS) shall be located adjacent to Company's meters or the location of the EDS shall be noted by placing a sticker on the meter, and shall be of the visible break type in a metal enclosure which can be secured by a padlock. If the EDS is not located directly adjacent to the meter, Customer shall be responsible for ensuring the location of the EDS is properly and legibly identified for so long as the net metering generator is operational. The disconnect switch shall be accessible to Company personnel at all times. Company may waive the requirement for an external disconnect switch for a net metering generator at its sole discretion, and on a case by case basis.
8. Company shall have the right and authority at Company's sole discretion to isolate the generating facility or require the Customer to discontinue operation of the net metering generator if Company believes that:
   a) continued interconnection and parallel operation of the net metering generator with Company's electric system creates or contributes (or may create or contribute) to a system emergency on either Company's or Customer's electric system;
   b) the net metering generator is not in compliance with the requirements of this rate schedule, and the non-compliance adversely affects the safety, reliability or power quality of Company's electric system; or
   c) the net metering generator interferes with the operation of Company's electric system.

   In non-emergency situations, Company shall give Customer notice of noncompliance including a description of the specific noncompliance condition and allow Customer a reasonable time to cure the noncompliance prior to isolating the Generating Facilities. In emergency situations, where the Company is unable to immediately isolate or cause Customer to isolate only the net metering generator, Company may isolate Customer's entire facility.
9. Customer agrees that, without the prior written permission from Company, no changes shall be made to the generating facility as initially approved. Increases in net metering generator capacity will require a new "Application for Interconnection and Net Metering" which will be evaluated on the same basis as any other new application. Repair and replacement of existing generating facility components with like components that meet UL 1741 certification requirements for Level 1 facilities and not resulting in increases in net metering generator capacity is allowed without approval.
10. Customer shall protect, indemnify and hold harmless Company and its directors, officers, employees, agents, representatives and contractors against and from all loss, claims, actions or suits, including costs and attorneys fees, for or on account of any injury or death of persons or damage to property caused by Customer or Customer's employees, agents, representatives and contractors in tampering with, repairing, maintaining or operating

Net Metering Service

CONDITIONS OF INTERCONNECTION (continued)

Customer's net metering generator or any related equipment or any facilities owned by Company except where such injury, death or damage was caused or contributed to by the fault or negligence of Company or its employees, agents, representatives or contractors.

The liability of Company to Customer for injury to person and property shall be governed by the tariff(s) for the class of service under which Customer is taking service.

11. Customer shall maintain general liability insurance coverage (through a standard homeowner's, commercial or other policy) for generating facilities. Customer shall upon request provide Company with proof of such insurance at the time that application is made for net metering.

12. By entering into an Interconnection Agreement, or by inspection, if any, or by non-rejection, or by approval, or in any other way, Company does not give any warranty, express or implied, as to the adequacy, safety, compliance with applicable codes or requirements, or as to any other characteristics, of the generating facility equipment, controls, and protective relays and equipment.

13. Customer's generating facility is transferable to other persons or service locations only after notification to the Company has been made and verification that the installation is in compliance with this tariff. Upon written notification that an approved generating facility is being transferred to another person, customer, or location, the Company will verify that the installation is in compliance with this tariff and provide written notification to the customer(s) within 20 business days. If the installation is no longer in compliance with this tariff, the Company will notify Customer in writing and list what must be done to place the facility in compliance.

14. Customer shall retain any and all Renewable Energy Credits (RECs) generated by Customer's generating facilities.

DEFINITIONS

"Billing period" shall be the time period between the dates on which Company issues the customer's bills.

"Billing Period Credit" shall be the electricity generated by the customer that flows into the electric system and which exceeds the electricity supplied to the customer from the electric system during any billing period.

TERMS AND CONDITIONS

Except as provided herein, service will be furnished under Company's Terms and Conditions applicable hereto.

CONDITIONS OF INTERCONNECTION (continued)

Customer's net metering generator or any related equipment or any facilities owned by Company except where such injury, death or damage was caused or contributed to by the fault or negligence of Company or its employees, agents, representatives or contractors.

The liability of Company to Customer for injury to person and property shall be governed by the tariff(s) for the class of service under which Customer is taking service.

11. Customer shall maintain general liability insurance coverage (through a standard homeowner's, commercial or other policy) for generating facilities. Customer shall upon request provide Company with proof of such insurance at the time that application is made for net metering.
12. By entering into an Interconnection Agreement, or by inspection, if any, or by non-rejection, or by approval, or in any other way, Company does not give any warranty, express or implied, as to the adequacy, safety, compliance with applicable codes or requirements, or as to any other characteristics, of the generating facility equipment, controls, and protective relays and equipment.
13. Customer's generating facility is transferable to other persons or service locations only after notification to the Company has been made and verification that the installation is in compliance with this tariff. Upon written notification that an approved generating facility is being transferred to another person, customer, or location, the Company will verify that the installation is in compliance with this tariff and provide written notification to the customer(s) within 20 business days. If the installation is no longer in compliance with this tariff, the Company will notify Customer in writing and list what must be done to place the facility in compliance.
14. Customer shall retain any and all Renewable Energy Credits (RECs) generated by Customer's generating facilities.

DEFINITIONS

"Billing period" shall be the time period between the dates on which Company issues the customer's bills.

"Billing Period Credit" shall be the electricity generated by the customer that flows into the electric system and which exceeds the electricity supplied to the customer from the electric system during any billing period.

TERMS AND CONDITIONS

Except as provided herein, service will be furnished under Company's Terms and Conditions applicable hereto.

Net Metering Service

LEVEL 1

Application for Interconnection and Net Metering
Use this application form only for a generating facility that is inverter based and certified by a nationally recognized testing laboratory to meet the requirements of UL 1741.

Submit this Application to:

Kentucky Utilities Company, Attn: Customer Commitment, P. O. Box 32010, Louisville, KY 40232

If you have questions regarding this Application or its status, contact KU at:

502-627-2202 or customer.commitment@lge-ku.com

Customer Name: ______________________ Account Number: ____________

Customer Address: ______________________________________

Customer Phone No.: ____________ Customer E-mail Address: ________________

Project Contact Person: ______________________________________

Phone No.: ______________ E-mail Address (Optional): ________________

Provide names and contact information for other contractors, installers, or engineering firms involved in the design and installation of the generating facilities:

____

Energy Source: ____Solar ____Wind ____Hydro ____Biogas ____Biomass

Inverter Manufacturer and Model #: ______________________________

Inverter Power Rating: ______________ Inverter Voltage Rating: ______________

Power Rating of Energy Source (i.e., solar panels, wind turbine): ______________

Is Battery Storage Used: ____No ____Yes If Yes, Battery Power Rating: ______________

Attach documentation showing that inverter is certified by a nationally recognized testing laboratory to meet the requirements of UL 1741.

Attach site drawing or sketch showing location of Utility's meter, energy source, ***(optional: Utility accessible disconnect switch)*** and inverter.

Attach single line drawing showing all electrical equipment from the Utility's metering location to the energy source including switches, fuses, breakers, panels, transformers, inverters, energy source, wire size, equipment ratings, and transformer connections.

Total Generating Capacity of Generating Facility: ______________________________

Type of Generator: ____Inverter-Based ____Synchronous ____Induction

Power Source: ____Solar ____Wind ____Hydro ____Biogas ____Biomass

Adequate documentation and information must be submitted with this application to be considered complete. Typically this should include the following:

1. Single-line diagram of the customer's system showing all electrical equipment from the generator to the point of interconnection with the Utility's distribution system, including generators, transformers, switchgear, switches, breakers, fuses, voltage transformers, current transformers, wire sizes, equipment ratings, and transformer connections.
2. Control drawings for relays and breakers.
3. Site Plans showing the physical location of major equipment.
4. Relevant ratings of equipment. Transformer information should include capacity ratings, voltage ratings, winding arrangements, and impedance.
5. If protective relays are used, settings applicable to the interconnection protection. If programmable relays are used, a description of how the relay is programmed to operate as applicable to interconnection protection.
6. A description of how the generator system will be operated including all modes of operation.
7. For inverters, the manufacturer name, model number, and AC power rating. For certified inverters, attach documentation showing that inverter is certified by a nationally recognized testing laboratory to meet the requirements of UL 1741.
8. For synchronous generators, manufacturer and model number, nameplate ratings, and impedance data (Xd, Xd, & Xd).
9. For induction generators, manufacturer and model number, nameplate ratings, and locked rotor current.

P.S.C. No. 15, Original Sheet No. 60

Standard Rate Rider EF
Excess Facilities

APPLICABILITY
In all territory served.

AVAILABILITY OF SERVICE
This rider is available for nonstandard service facilities which are considered to be in excess of the standard facilities that would normally be provided by Company. This rider does not apply to line extensions or to other facilities which are necessary to provide basic electric service. Company reserves the right to decline to provide service hereunder for any project (a) that exceeds $100,000 or (b) where Company does not have sufficient expertise to install, operate, or maintain the facilities or (c) where the facilities do not meet Company's safety requirements, or (d) where the facilities are likely to become obsolete prior to the end of the initial contract term.

DEFINITION OF EXCESS FACILITIES
Excess facilities are lines and equipment which are installed in addition to or in substitution for the normal facilities required to render basic electric service. Applications of excess facilities include, but are not limited to, emergency backup feeds, automatic transfer switches, redundant transformer capacity, and duplicate or check meters.

EXCESS FACILITIES CHARGE
Company shall provide normal operation and maintenance of the excess facilities. Should the facilities suffer failure, Company will provide for replacement of such facilities and the monthly charge will be adjusted to reflect the installed cost of the replacement facilities.

Customer shall pay for excess facilities by either (i) making a monthly excess facilities charge payment covering the cost of the leased facilities or (ii) making a one-time contribution-in-aid-of-construction (CIAC) payment and a monthly excess facilities charge associated with the operating expenses and expected replacement costs of the facilities.

For leased facilities, the customer shall pay a monthly Excess Facilities charge equal to the following percentage applied to the original installed cost of the facilities provided by the Company:

(i) Monthly Charge for Leased Facilities 1.54%

For facilities supported by a CIAC Payment, the customer shall pay a monthly Excess Facilities charge equal to the following percentage applied to the original installed cost of the facilities provided by the Company:

(ii) Monthly Charge for Facilities Supported by a one-time CIAC payment 0.74%

PAYMENT
The Excess Facilities Charges shall be incorporated with the bill for electric service and will be subject to the same payment provisions.

TERM OF CONTRACT
The initial term of contract to the customer under this schedule shall be not less than five (5) years. The term shall continue automatically until terminated by either party upon at least one (1) month's written notice.

Standard Rate Rider EF
Excess Facilities

APPLICABILITY
In all territory served.

AVAILABILITY OF SERVICE
This rider is available for nonstandard service facilities which are considered to be in excess of the standard facilities that would normally be provided by Company. This rider does not apply to line extensions or to other facilities which are necessary to provide basic electric service. Company reserves the right to decline to provide service hereunder for any project (a) that exceeds $100,000 or (b) where Company does not have sufficient expertise to install, operate, or maintain the facilities or (c) where the facilities do not meet Company's safety requirements, or (d) where the facilities are likely to become obsolete prior to the end of the initial contract term.

DEFINITION OF EXCESS FACILITIES
Excess facilities are lines and equipment which are installed in addition to or in substitution for the normal facilities required to render basic electric service and where such facilities are T
dedicated to a specific customer. Applications of excess facilities include, but are not limited to, T
emergency backup feeds, automatic transfer switches, redundant transformer capacity, and duplicate or check meters.

EXCESS FACILITIES CHARGE
Company shall provide normal operation and maintenance of the excess facilities. Should the facilities suffer failure, Company will provide for replacement of such facilities and the monthly charge will be adjusted to reflect the installed cost of the replacement facilities. No adjustment T
in the monthly charge for a replacement of facilities will be made during the initial five (5) year T
term of contract. T

Customer shall pay for excess facilities by: T

(a) making a monthly Excess Facilities Charge payment equal to the installed cost of the T
excess facilities times the following percentage: T

Percentage With No Contribution–in-Aid-of-Construction 1.28% T/R

(b) making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the T
excess facilities plus a monthly Excess Facilities Charge payment equal to the installed T
cost of the excess facilities times the following percentage: T

Percentage With Contribution-in-Aid of-Construction 0.49% T/R

PAYMENT
The Excess Facilities Charges shall be incorporated with the bill for electric service and will be subject to the same payment provisions.

TERM OF CONTRACT
The initial term of contract to the customer under this schedule shall be not less than five (5) years. The term shall continue automatically until terminated by either party upon at least one (1) month's written notice.

Standard Rate Rider — RC

Redundant Capacity

APPLICABLE

This rate is applicable to customers served under Company's rate schedules which include a demand charge or a special contract including a demand charge.

AVAILABILITY

Available to customers requesting the reservation of capacity on Company's facilities which are shared by other customers when Company has and is willing to reserve such capacity. Such facilities represent a redundant delivery to provide electric service to the Customer's facility in the event that an emergency or unusual occurrence renders the Customer's principal delivery unavailable for providing service.

RATE:

Capacity Reservation Charge

Secondary Distribution	$0.85 per kW per month
Primary Distribution	$0.68 per kW per month

Applicable to the greater of:

(1) the highest average load in kilowatts recorded at either the principal distribution feed metering point or at the redundant distribution feed metering point during any 15-minute interval in the monthly billing period;

(2) 50% of the maximum demand similarly determined for any of the eleven (11) preceding months; or

(3) the contracted capacity reservation.

TERM OF CONTRACT

The minimum contract term shall be five (5) years and shall be renewed for one-year periods until either party provides the other with ninety (90) days written notice of a desire to terminate the arrangement. Company may require that a contract be executed for a longer initial term when deemed necessary by the difficulty and/or high cost associated with providing the redundant feed or other special conditions.

Date of Issue: August 6, 2010

Standard Rate Rider — RC

Redundant Capacity

APPLICABLE

This rate is applicable to customers served under Company's rate schedules which include a demand charge or a special contract including a demand charge.

AVAILABILITY

Available to customers requesting the reservation of capacity on Company's facilities which are shared by other customers when Company has and is willing to reserve such capacity. Such facilities represent a redundant delivery to provide electric service to the Customer's facility in the event that an emergency or unusual occurrence renders the Customer's principal delivery unavailable for providing service. Where Customer desires to split a load between multiple meters on multiple feeds and contract for Redundant Capacity on those feeds, service is contingent on the practicality of metering to measure any transferred load to the redundant feed. T T T T

RATE:

Capacity Reservation Charge

Secondary Distribution	$1.55 per kW/kVA per month	I/T
Primary Distribution	$0.99 per kW/kVA per month	I/T

Applicable to the greater of:

(1) the highest average load in kW/kVA (as is appropriate for the demand basis of the standard rate on which Customer is billed) recorded at either the principal distribution feed metering point or at the redundant distribution feed metering point during any 15-minute interval in the monthly billing period; T T

(2) 50% of the maximum demand similarly determined for any of the eleven (11) preceding months; or

(3) the contracted capacity reservation.

TERM OF CONTRACT

The minimum contract term shall be five (5) years and shall be renewed for one-year periods until either party provides the other with ninety (90) days written notice of a desire to terminate the arrangement. Company may require that a contract be executed for a longer initial term when deemed necessary by the difficulty and/or high cost associated with providing the redundant feed or other special conditions.

P.S.C. No. 15, Original Sheet No. 62

Standard Rate Rider — SS

Supplemental or Standby Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This service is available as a rider to customers whose premises or equipment are regularly supplied with electric energy from generating facilities other than those of Company and who desire to contract with Company for reserve, breakdown, supplemental or standby service.

RATE

	Secondary	Primary	Transmission
Contract Demand per kVA per Month	$ 6.54	$ 6.17	$ 5.99

CONTRACT DEMAND

Contract Demand is defined as the number of kilowatts mutually agreed upon as representing customer's maximum service requirements and contracted for by customer; provided, however, if such number of kilowatts is exceeded by a recorded demand, such recorded demand shall become the new contract demand commencing with the month in which recorded and continuing for the remaining term of the contract or until superseded by a higher recorded demand.

MINIMUM CHARGE

Electric service actually used each month will be charged for in accordance with the provisions of the applicable rate schedule; provided, however, the minimum billing under that rate schedule shall in no case be less than an amount calculated at the appropriate rate above applied to the Contract Demand.

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

SPECIAL TERMS AND CONDITIONS

1) In order to protect its equipment from overload damage, Company may require customer to install at Customer's own expense an approved shunt trip type breaker and an approved automatic pole-mounted disconnect. Such circuit breakers shall be under the sole control of Company and will be set by Company to break the connection with its service in the event customer's demand materially exceeds that for which the customer contracted.

2) In the event customer's use of service is intermittent or subject to violent fluctuations, Company will require customer to install and maintain at Customer's own expense suitable equipment to satisfactorily limit such intermittence or fluctuations.

Supplemental or Standby Service

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This service is available as a rider to customers whose premises or equipment are regularly supplied with electric energy from generating facilities other than those of Company and who desire to contract with Company for reserve, breakdown, supplemental or standby service.

Where a customer-generator supplies all or part of the customer-generator's own load and desires Company to provide supplemental or standby service for that load, the customer-generator must contract for such service under Company's Supplemental or Standby Service Rider, otherwise Company has no obligation to supply the non-firm service. This requirement does not apply to Net Metering Service (Rider NMS). T

RATE

	Secondary	Primary	Transmission	
Contract Demand per kW/kVA per Month	$12.91	$12.35	$11.17	T/I

CONTRACT DEMAND

Contract Demand is defined as the number of kW/kVA (as is appropriate for the demand basis T
of the standard rate on which Customer is billed) mutually agreed upon as representing T
customer's maximum service requirements and contracted for by customer; provided, however,
if such number of kW/kVA (as is appropriate for the demand basis of the standard rate on which T
Customer is billed) is exceeded by a recorded demand, such recorded demand shall become T
the new contract demand commencing with the month in which recorded and continuing for the remaining term of the contract or until superseded by a higher recorded demand.

MINIMUM CHARGE

Electric service actually used each month will be charged for in accordance with the provisions of the applicable rate schedule; provided, however, the minimum billing under that rate schedule shall in no case be less than an amount calculated at the appropriate rate above applied to the Contract Demand.

DUE DATE OF BILL

Customer's payment will be due within twelve (12) calendar days from the date of the bill.

SPECIAL TERMS AND CONDITIONS

1) In order to protect its equipment from overload damage, Company may require customer to install at Customer's own expense an approved shunt trip type breaker and an approved automatic pole-mounted disconnect. Such circuit breakers shall be under the sole control of Company and will be set by Company to break the connection with its service in the event customer's demand materially exceeds that for which the customer contracted.

Standard Rate Rider IL

Rider for Intermittent Loads

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule applies to all loads having a detrimental effect upon the electric service rendered to other customers of Company or upon Company's facilities.

Where Customer's use of service is intermittent, subject to violent or extraordinary fluctuations, or produces unacceptable levels of harmonic current, in each case as determined by Company, in its reasonable discretion, Company reserves the right to require Customer to furnish, at Customer's own expense, suitable equipment (as approved by Company in its reasonable discretion) to meter and limit such intermittence, fluctuation, or harmonics to the extent reasonably requested by Company. Without limiting the foregoing, Company may require such equipment if, at any time, the megavars, harmonics,and other desirable electrical characteristics produced by the Customer exceed the limits set forth in the IEEE standards for such characteristics. In addition, if the Customer's use of Company's service under this schedule causes such undesirable electrical characteristics in an amount exceeding those IEEE standards, such use shall be deemed to cause a dangerous condition which could subject any person to imminent harm or result in substantial damage to the property of Company or others, and Company shall therefore terminate service to the Customer in accordance with 807 KAR 5:056, Section 14(b). Such a termination of service shall not be considered a cancellation of the service agreement or relieve Customer of any minimum billing or other guarantees. Company shall be held harmless for any damages or economic loss resulting from such termination of service. If requested by Company, Customer shall provide all available information to Company that aids Company in enforcing its service standards. If Company at any time has a reasonable basis for believing that Customer's proposed or existing use of the service provided will not comply with the service standards for interference, fluctuations, or harmonics, Company may engage such experts and/or consultants as Company shall determine are appropriate to advise Company in ensuring that such interference, fluctuations, or harmonics are within acceptable standards. Should such experts and/or consultants determine Customer's use of service is unacceptable, Company's use of such experts and/or consultants will be at the Customer's expense.

RATE

1. A contribution in aid of construction or an excess facilities charge shall be required for all special or added facilities, if any, necessary to serve such loads, as provided under the Excess Facilities Rider.
2. Plus the charges provided for under the rate schedule applicable, including any Basic Service Charge if applicable, Energy Charge, Maximum Load Charge (if load charge rate is used), Fuel Clause and the Minimum Charge under such rate adjusted in accordance with (a) or (b) herein.
   (a) If rate schedule calls for a minimum based on the total kW of connected load, each kVA of such special equipment shall be counted as one kW connected load for minimum billing purposes.
   (b) If rate schedule calls for a minimum based on the 15-minute integrated load, and such loads operate only intermittently so that the kW registered on a standard 15-minute integrated demand meter is small in comparison to the instantaneous load such equipment is capable of imposing, each kVA of such special equipment shall be counted as one-third kW load for minimum billing purposes.

MINIMUM CHARGE

As determined by this Rider and the Rate Schedule to which it is attached.

Temporary and/or Seasonal Electric Service

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
This rider is available at the option of Customer where Customer's business is of such nature to require:

1. only seasonal service or temporary service, including service provided for construction of residences or commercial buildings, and where in the judgment of Company the local and system electrical facility capacities are adequate to serve the load without impairment of service to other customers; or
2. where Customer has need for temporary use of Company facilities and Company has facilities it is willing to provide.

This service is available for not less than one (1) month (approximately thirty (30) days), but when service is used longer than one (1) month, any fraction of a month's use will be prorated for billing purposes.

CONDITIONS
Company may permit such electric loads to be served on the rate schedule normally applicable, but without requiring a yearly contract and minimum, substituting therefor the following conditions and agreements:

1. Customer shall pay Company for all costs of making temporary connections, including cost of installing necessary transformers, meters, poles, wire and any other material, and any cost of material which cannot be salvaged, and the cost of removing such facilities when load has ceased.

2. Customer shall pay regular rate of the applicable electric rate schedule.

3. Where Customer is receiving service under a standard rate and has need for temporary use of Company facilities, Customer will pay for non-savable materials outlined in (1) above at the Carrying Cost Charge specified on the Excess Facilities Rider, Rate Sheet No. 60.

Standard Rate Rider SGE

Small Green Energy Rider

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Service under this rider is available to customers receiving service under Company's standard RS or GS rate schedules as an option to participate in Company's "Green Energy Program" whereby Company will aggregate the resources provided by the participating customers to develop green power, purchase green power, or purchase Renewable Energy Certificates.

DEFINITIONS

a) Green power is that electricity generated from renewable sources including but not limited to: solar, wind, hydroelectric, geothermal, landfill gas, biomass, biodiesel used to generate electricity, agricultural crops or waste, all animal and organic waste, all energy crops and other renewable resources deemed to be Green-e Certified.

b) A Renewable Energy Certificate ("REC") is the tradable unit which represents the commodity formed by unbundling the environmental-benefit attributes of a unit of green power from the underlying electricity. One REC is equivalent to the environmental-benefits attributes of one (1) MWh of green power.

RATE

Voluntary monthly contributions of any amount in $5.00 increments

TERMS AND CONDITIONS

a) Customers may contribute monthly as much as they like in $5.00 increments (e.g., $5.00, $10.00, $15.00, or more per month). An eligible customer may participate in Company's "Green Energy Program" by making a request to Company's Call Center or through Company's website enrollment form and may withdraw at any time through a request to Company's Call Center. Funds provided by Customer to Company are not refundable.

b) Customers may not owe any arrearage prior to entering the "Green Energy Program". Any customer failing to pay the amount the customer pledged to contribute may be removed from the "Green Energy Program." Any Customer removed from or withdrawing from the "Green Energy Program" will not be allowed to re-apply for one (1) year.

c) Customer will be billed monthly for the amount Customer has pledged to contribute to the "Green Energy Program." Such billing will be added to Customer's billing under any standard rate schedules plus applicable riders plus applicable adjustment clauses.

Standard Rate Rider — EDR
Economic Development Rider

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
Available as a rider to customers to be served or being served under Company's Standard Rate Schedules TODS, TODP, and RTS to encourage Brownfield Development or Economic Development (as defined herein). Service under EDR is conditional on approval of a special contract for such service filed with and approved by the Public Service Commission of Kentucky.

RATE
A customer taking service under EDR shall be served according to all of the rates, terms, and conditions of the normally applicable rate schedule subject to the following:

a) for the twelve consecutive monthly billings of the first contract year, the Total Demand Charge shall be reduced by 50%;
b) for the twelve consecutive monthly billings of the second contract year, the Total Demand Charge shall be reduced by 40%;
c) for the twelve consecutive monthly billings of the third contract year, the Total Demand Charge shall be reduced by 30%;
d) for the twelve consecutive monthly billings of the fourth contract year, the Total Demand Charge shall be reduced by 20%;
e) for the twelve consecutive monthly billings of the fifth contract year, the Total Demand Charge shall be reduced by 10%; and
f) all subsequent billing shall be at the full charges stated in the applicable rate schedule.

"Total Demand Charge" is the sum of all demand charges, including any credits provided under any other demand applicable rider, before the EDR discounts described above are applied.

TERMS AND CONDITIONS
Brownfield Development
a) Service under EDR for Brownfield Development is available to customers locating at sites that have been submitted to, approved by, and added to the Brownfield Inventory maintained by the Kentucky Energy and Environment Cabinet (or by any successor entity created and authorized by the Commonwealth of Kentucky).
b) EDR for Brownfield Development is available only to billing loads of 500 kVA or greater where the customer takes service from existing Company facilities.

Economic Development
c) Service under EDR for Economic Development is available to:
   1) new customers contracting for a minimum annual average of monthly billing load of 1,000 kVA; and
   2) existing customers contracting for a minimum annual average of monthly billing load of 1,000 kVA above their Existing Base Load, to be determined as follows:

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 71.1

Standard Rate Rider **EDR**
Economic Development Rider

TERMS AND CONDITIONS, Economic Development c) 2) (continued)

i. Company and the existing customer will determine Customer's Existing Base Load by averaging Customer's previous three years' monthly billing loads, subject to any mutually agreed upon adjustments thereto.
ii. Company and the existing customer must agree upon the Existing Base Load, which shall be an explicit term of the special contract submitted to the Commission for approval before the customer can take service under EDR. Once the Existing Base Load's value is thus established, it will not be subject to variation or eligible for service under EDR.
iii. This provision is not intended to reduce or diminish in any way EDR service already being provided to all or a portion of a customer's Existing Base Load. Such EDR service would continue under the terms of the contract already existing between the Company and the customer concerning the affected portion of the customer's Existing Base Load.

d) A customer desiring service under EDR for Economic Development must submit an application for service that includes:
  1) a description of the new load to be served;
  2) the number of new employees, if any, Customer anticipates employing associated with the new load;
  3) the capital investment Customer anticipates making associated with the EDR load;
  4) a certification that Customer has been qualified by the Commonwealth of Kentucky for benefits under the Kentucky Business Investment Program.

e) Should Company determine a refundable contribution for the capital investment in Customer-specific facilities required by Company to serve the EDR load would ordinarily be required as set out under Company's Line Extension Plan, I. Special Cases, that amount shall be determined over a fifteen (15) year period and payable at the end of the fifteen (15) year period.

General

f) Company may offer EDR to qualifying new load only when Company has generating capacity available and the new load will not accelerate Company's plans for additional generating capacity over the life of the EDR contract.
g) Customer may request an EDR effective initial billing date that is no later than twelve (12) months after the date on which Company initiates service to Customer.
h) Neither the demand charge reduction nor any unjustified capital investment in facilities will be borne by Company's other customers during the term of the EDR contract.
i) Company may offer differing terms, as appropriate, under special contract to which this rider is a part depending on the circumstances associated with providing service to a particular customer and subject to approval by the Public Service Commission of Kentucky.

TERM OF CONTRACT

Service will be furnished under the applicable standard rate schedule and this rider, filed as a special contract with the Commission for a fixed term of not less than ten (10) years and for such time thereafter under the terms stated in the standard rate schedule. A greater term of contract or termination notice may be required because of conditions associated with a Customer's requirements for service. Service will be continued under conditions provided for under the rate schedule to which this Rider is attached after the original term of contract.

Standard Rate Rider	RTP
	Real-Time Pricing Rider

APPLICABLE

In all territory served by the Company.

AVAILABILITY OF SERVICE

RTP shall be offered as an optional three (3) year pilot program and is available as a rider to the Company's P.S.C. No. 13, LTOD, or IS rate schedules for customers having received service under those schedules for a minimum of one (1) year as of December 1, 2008. Service will be provided under RTP following its approval and shall remain in effect until modified or terminated by order of the Commission.

a) No customers will be accepted on RTP after the Company files with the Commission notice of its intent to file a base rate case in accordance with the terms of the Stipulation and Recommendation in P.S.C. Case No. 2009-00548. A customer exiting the pilot program or disconnected for non-pay will not be allowed to return to it until the Commission has issued a final order in that base rate case.

b) The Company will file with the Commission a detailed report of its findings and recommendations concerning the RTP pilot program in its next base rate case.

c) Service under RTP may not be taken in conjunction with any other load reduction riders such as but not limited to CSR, LRI, or NMS.

BILLING

Customers participating in the RTP Pilot will be billed monthly based on the following calculation:

$$\text{RTP Bill} = SB + PC + \sum_{t=1}^{n} \{ \text{Price}_t \times (AL_t - CBL_t) \}$$

Where:

RTP Bill	=	Customer's bill for service under this tariff in a specific month.
SB	=	Customer's bill for the current billing period based on current usage and billed under the appropriate standard rate schedule.
PC	=	Customer specific program charge.
$\sum_{t=1}^{n}$	=	Sum of all hours of the billing period from t=1 to n.
Price_t	=	Real-time day-ahead marginal generation supply cost for hour t.
AL_t	=	Customer's actual kVA load for hour t.
CBL_t	=	Customer's baseline kVA load for hour t.

HOURLY PRICING

Hourly prices (Price_t) are determined each day based on projections of the marginal generation supply cost for the next day and adjusted for losses to the customer's delivery voltage. Hourly prices will be provided on a day-ahead basis to Customer. The Company may revise these prices the day before they become effective. Prices become binding at 4:00 p.m. of the preceding day. Service under RTP will require customer enter into a confidentiality agreement with the Company to protect the day ahead hourly prices.

Issued by Authority of an Order of the KPSC in Case No. 2012-00010 dated March 20, 2012

The current KU Real-Time Pricing Rider RTP is proposed to be eliminated.

Standard Rate Rider RTP

Real-Time Pricing Rider

CUSTOMER BASELINE LOAD (CBL)

The CBL is based on one complete calendar year of hourly firm kVA load data developed from actual historical metered interval data for the Customer's specific service delivery and mutually agreed to by Customer and Company. The CBL is determined by:

1. selecting the historical calendar period that corresponds to the current billing period,
2. shifting the historical calendar period back no more than 4 days or forward until the days of the week agree for the historical calendar period and the current billing period, and
3. adjusting on a pro rata basis each hour of the historical calendar period so that the sum of the hourly kVA loads for the historical calendar period matches the sum of the hourly kVA loads for the current billing period.

PROGRAM CHARGE (PC)

A program charge of $57 per billing period shall be added to the Customer's bill to cover the additional customer specific costs associated with the program.

MINIMUM CHARGE

The minimum charge in the applicable Standard Tariff shall apply plus PC, customer specific program charge.

TERMS OF CONTRACT

For a fixed term of not less than one year and for such time thereafter until terminated by either party giving 30 days written notice to the other of the desire to terminate.

TERMS AND CONDITIONS

Except as specified above, all other provisions of the power rate to which this schedule is a rider shall apply.

Standard Rate — LEV
Low Emission Vehicle Service

APPLICABLE
In the territory served.

AVAILABILITY OF SERVICE
LEV shall be available as option to customers otherwise served under rate schedule RS to encourage off-peak power for low emission vehicles.

1) LEV is a three year pilot program that may be restricted to a maximum of one hundred (100) customers eligible for Rate RS in any year and shall remain in effect until modified or terminated by order of the Commission. Company will accept applications on a first-come-first-served basis.
2) This service is restricted to customers who demonstrate power delivered to premises is consumed, in part, for the powering of low emission vehicles licensed for operation on public streets or highways. Such vehicles include:
   a) battery electric vehicles or plug-in hybrid electric vehicles recharged through a charging outlet at Customer's premises,
   b) natural gas vehicles refueled through an electric-powered refueling appliance at Customer's premises.
3) A customer exiting the pilot program or disconnected for non-payment may not be allowed to return to it until the Commission has issued a decision on the pilot program report.
4) Company will file a report on LEV with the Commission within six months after the first three years of implementation of the pilot program. Such report will detail findings and recommendations.

Kentucky Utilities Company

P.S.C. No. 16, Original Sheet No. 79

Standard Rate — LEV
Low Emission Vehicle Service

APPLICABLE
In the territory served.

AVAILABILITY OF SERVICE
LEV shall be available as option to customers otherwise served under rate schedule RS to encourage off-peak power for low emission vehicles.

1) LEV is a three year pilot program that may be restricted to a maximum of one hundred (100) customers eligible for Rate RS (or GS where the GS service is used in conjunction with an RS service to provide service to a detached garage and energy usage is no more than 300 kWh per month) in any year and shall remain in effect until modified or terminated by order of the Commission. Company will accept applications on a first-come-first-served basis. T T T
2) This service is restricted to customers who demonstrate power delivered to premises is consumed, in part, for the powering of low emission vehicles licensed for operation on public streets or highways. Such vehicles include:
   a) battery electric vehicles or plug-in hybrid electric vehicles recharged through a charging outlet at Customer's premises,
   b) natural gas vehicles refueled through an electric-powered refueling appliance at Customer's premises.
3) A customer exiting the pilot program or disconnected for non-payment may not be allowed to return to it until the Commission has issued a decision on the pilot program report.
4) Company will file a report on LEV with the Commission within six months after the first three years of implementation of the pilot program. Such report will detail findings and recommendations.

Low Emission Vehicle Service

DETERMINATION OF PRICING PERIODS
Pricing periods are established in Eastern Standard Time year round by season for weekdays and weekends. The hours of the pricing periods for the price levels are as follows:

Summer months of May through September

	Off-Peak	Intermediate	Peak
Weekdays	10 PM - 10 AM	10 AM - 1 PM 7 PM - 10 PM	1 PM - 7 PM
Weekends	All Hours		

All other month of October continuously through April

	Off Peak	Intermediate	Peak
Weekdays	10 PM - 6 AM	12 Noon – 10 PM	6 AM – 12 Noon
Weekends	All Hours		

MINIMUM CHARGE
The Basic Service Charge shall be the minimum charge.

DUE DATE OF BILL
Customer's payment will be due within twelve (12) calendar days from the date of the bill.

LATE PAYMENT CHARGE
If full payment is not received within three (3) calendar days from the due date of the bill, a 5% late payment charge will be assessed on the current month's charges.

TERMS OF CONTRACT
For a fixed term of not less than one (1) year and for such time thereafter until terminated by either party giving thirty (30) days written notice to the other of the desire to terminate.

TERMS AND CONDITIONS
Service will be furnished under Company's Terms and Conditions applicable hereto. Customers served under this optional pilot program will not be eligible for Company's Budget Payment Plan. Company shall install metering equipment capable of accommodating the Time of Use rate described herein.

Adjustment Clause FAC

Fuel Adjustment Clause

APPLICABLE
In all territory served.

AVAILABILITY OF SERVICE
This schedule is mandatory to all electric rate schedules.

(1) The charge per kWh delivered under the rate schedules to which this fuel clause is applicable shall be increased or decreased during each month in accordance with the following formula:

$$\text{Adjustment Factor} = \frac{F(m)}{S(m)} - \frac{F(b)}{S(b)}$$

where "F" is the expense of fossil fuel and "S" is the kWh sales in the base (b) and current (m) periods as defined in 807 KAR 5:056, all as set out below.

(2) Fuel costs (F) shall be the most recent actual monthly cost of:

(a) Fossil fuel consumed in the utility's own plants, plus the cost of fuel which would have been used in plants suffering forced generation or transmission outages, but less the cost of fuel related to substitute generation; plus

(b) The actual identifiable fossil and nuclear fuel costs associated with energy purchased for reasons other than identified in paragraph (c) below, but excluding the cost of fuel related to purchases to substitute for the forced outages; plus

(c) The net energy cost of energy purchases, exclusive of capacity or demand charges (irrespective of the designation assigned to such transaction) when such energy is purchased on an economic dispatch basis. Included therein may be such costs as the charges for economy energy purchases and the charges as a result of scheduled outages, all such kinds of energy being purchased by the buyer to substitute for its own higher cost energy; and less

(d) The cost of fossil fuel recovered through inter-system sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

(e) All fuel costs shall be based on weighted average inventory costing.

(3) Forced outages are all non-schedules losses of generation or transmission which require substitute power for a continuous period in excess of six (6) hours. Where forced outages are not as a result of faulty equipment, faulty manufacture, faulty design, faulty installations, faulty operation, or faulty maintenance, but are Acts of God, riot, insurrection or acts of the public enemy, then the utility may, upon proper showing, with the approval of the Commission, include the fuel cost of substitute energy in the adjustment. Until such approval is obtained, in making the calculations of fuel cost (F) in subsection (2)(a) and (b) above, the forced outage costs to be subtracted shall be no less than the fuel cost related to the lost generation.

Adjustment Clause DSM

Demand-Side Management Cost Recovery Mechanism

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule is mandatory to Residential Rate RS, Volunteer Fire Department Service Rate VFD, General Service Rate GS, All Electric School Rate AES, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, and Low Emission Vehicle Service Rider LEV. Industrial customers who elect not to participate in a demand-side management program hereunder shall not be assessed a charge pursuant to this mechanism. For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes that create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32, and 33. All other non-residential customers will be defined as "commercial."

RATE

The monthly amount computed under each of the rate schedules to which this Demand-Side Management Cost Recovery Mechanism is applicable shall be increased or decreased by the DSM Cost Recovery Component (DSMRC) at a rate per kilowatt hour of monthly consumption in accordance with the following formula:

$$DSMRC = DCR + DRLS + DSMI + DBA + DCCR$$

Where:

DCR = DSM COST RECOVERY

The DCR shall include all expected costs that have been approved by the Commission for each twelve-month period for demand-side management programs that have been developed through a collaborative advisory process ("approved programs"). Such program costs shall include the cost of planning, developing, implementing, monitoring, and evaluating DSM programs. Program costs will be assigned for recovery purposes to the rate classes whose customers are directly participating in the program. In addition, all costs incurred by or on behalf of the collaborative process, including but not limited to costs for consultants, employees, and administrative expenses, will be recovered through the DCR. Administrative costs that are allocable to more than one rate class will be recovered from those classes and allocated by rate class on the basis of the estimated budget from each program. The cost of approved programs shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DCR for each such rate class.

DRLS = DSM REVENUE FROM LOST SALES

Revenues from lost sales due to DSM programs implemented on and after the effective date of this tariff will be recovered as follows:

1) For each upcoming twelve-month period, the estimated reduction in customer usage (in kWh) as determined for the approved programs shall be multiplied by the non-variable revenue requirement per kWh for purposes of determining the lost revenue to be recovered hereunder from each customer class. The non-variable revenue requirement for the Residential, Volunteer Fire Department, General Service, All Electric School, and Low Emission Vehicle customer classes is defined as the weighted average price per kWh of expected billings under the energy charges contained in the

This schedule is mandatory to Residential Rate RS, Volunteer Fire Department Service Rate VFD, General Service Rate GS, All Electric School Rate AES, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, and Low Emission Vehicle Service Rate LEV. Industrial customers who elect not to participate in a T
demand-side management program hereunder shall not be assessed a charge pursuant to this mechanism. For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes that create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32, and 33. All other non-residential customers will be defined as "commercial."

RATE

The monthly amount computed under each of the rate schedules to which this Demand-Side Management Cost Recovery Mechanism is applicable shall be increased or decreased by the DSM Cost Recovery Component (DSMRC) at a rate per kilowatt hour of monthly consumption in accordance with the following formula:

$$DSMRC = DCR + DRLS + DSMI + DBA + DCCR$$

Where:

DCR = DSM COST RECOVERY

The DCR shall include all expected costs that have been approved by the Commission for each twelve-month period for demand-side management programs that have been developed through a collaborative advisory process ("approved programs"). Such program costs shall include the cost of planning, developing, implementing, monitoring, and evaluating DSM programs. Program costs will be assigned for recovery purposes to the rate classes whose customers are directly participating in the program. In addition, all costs incurred by or on behalf of the collaborative process, including but not limited to costs for consultants, employees, and administrative expenses, will be recovered through the DCR. Administrative costs that are allocable to more than one rate class will be recovered from those classes and allocated by rate class on the basis of the estimated budget from each program. The cost of approved programs shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DCR for each such rate class.

DRLS = DSM REVENUE FROM LOST SALES

Revenues from lost sales due to DSM programs implemented on and after the effective date of this tariff will be recovered as follows:

1) For each upcoming twelve-month period, the estimated reduction in customer usage (in kWh) as determined for the approved programs shall be multiplied by the non-variable revenue requirement per kWh for purposes of determining the lost revenue to be recovered hereunder from each customer class. The non-variable revenue requirement for the Residential, Volunteer Fire Department, General Service, All Electric School, and Low Emission Vehicle customer classes is defined as the weighted average price per kWh of expected billings under the energy charges contained in the

Adjustment Clause DSM
Demand-Side Management Cost Recovery Mechanism

RATE (continued)

RS, VFD, GS, AES, and LEV rate schedules in the upcoming twelve-month period after deducting the variable costs included in such energy charges. The non-variable revenue requirement for each of the customer classes that are billed under demand and energy rates (rate schedules PS, TODS, and TODP) is defined as the weighted average price per kWh represented by the composite of the expected billings under the respective demand and energy charges in the upcoming twelve-month period, after deducting the variable costs included in the energy charges.

2) The lost revenues for each customer class shall then be divided by the estimated class sales (in kWh) for the upcoming twelve-month period to determine the applicable DRLS surcharge. Recovery of revenue from lost sales calculated for a twelve-month period shall be included in the DRLS for 36 months or until implementation of new rates pursuant to a general rate case, whichever comes first. Revenues from lost sales will be assigned for recovery purposes to the rate classes whose programs resulted in the lost sales.

Revenues collected hereunder are based on engineering estimates of energy savings, expected program participation, and estimated sales for the upcoming twelve-month period. At the end of each such period, any difference between the lost revenues actually collected hereunder and the lost revenues determined after any revisions of the engineering estimates and actual program participation are accounted for shall be reconciled in future billings under the DSM Balance Adjustment (DBA) component.

A program evaluation vendor will be selected to provide evaluation criteria against which energy savings will be estimated for that program. Each program will be evaluated after implementation and any revision of the original engineering estimates will be reflected in both (a) the retroactive true-up provided for under the DSM Balance Adjustment and (b) the prospective future lost revenues collected hereunder.

DSMI = DSM INCENTIVE

For all Energy Impact Programs except Direct Load Control, the DSM incentive amount shall be computed by multiplying the net resource savings expected from the approved programs that are to be installed during the upcoming twelve-month period times fifteen (15) percent, not to exceed five (5) percent of program expenditures. Net resource savings are defined as program benefits less utility program costs and participant costs where program benefits will be calculated on the basis of the present value of Company's avoided costs over the expected life of the program, and will include both capacity and energy savings. For the Energy Education Program, the DSM incentive amount shall be computed by multiplying the annual cost of the approved program times five (5) percent.

The DSM incentive amount related to programs for Residential Rate RS, Volunteer Fire Department Rate VFD, General Service Rate GS, All Electric School Rate AES, Power Rate PS, Time-of-day Secondary Service Rate TODS, Time-of-Day Primary Rate TODP, and Low Emission Vehicle Service Rider LEV shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DSMI for such rate class. DSM incentive amounts will be assigned for recovery purposes to the rate classes whose programs created the incentive.

Canceling P.S.C. No. 15, Original Sheet No. 86.2

Adjustment Clause DSM
Demand-Side Management Cost Recovery Mechanism

DBA = DSM BALANCE ADJUSTMENT

The DBA shall be calculated on a calendar-year basis and is used to reconcile the difference between the amount of revenues actually billed through the DCR, DRLS, DSMI, DCCR, and previous application of the DBA and the revenues that should have been billed, as follows:

1) For the DCR, the balance adjustment amount will be the difference between the amount billed in a twelve-month period from the application of the DCR unit charge and the actual cost of the approved programs during the same twelve-month period.
2) For the DRLS the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DRLS unit charge and the amount of lost revenues determined for the actual DSM measures implemented during the twelve-month period.
3) For the DSMI, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DSMI unit charge and the incentive amount determined for the actual DSM measures implemented during the twelve-month period.
4) For the DBA, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DBA and the balance adjustment amount established for the same twelve-month period.

The balance adjustment amounts determined on the basis of the above paragraphs (1)-(4) shall include interest applied to the monthly amounts, such interest to be calculated at a rate equal to the average of the "Three-Month Commercial Paper Rate" for the immediately preceding twelve-month period. The total of the balance adjustment amounts shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DBA for such rate class. DSM balance adjustment amounts will be assigned for recovery purposes to the rate classes for which over- or under-recoveries of DSM amounts were realized.

DCCR = DSM CAPITAL COST RECOVERY

The DCCR component is the means by which the Company recovers its capital investments made for DSM programs, as well as an approved rate of return on such capital investments. The Company calculates the DCCR component as follows:

DCCR = [(RB) (ROR + (ROR – DR) (TR / (1 – TR))] + OE

a) RB is the total rate base for DCCR projects.
b) ROR is the overall rate of return on DSM Rate Base (RB).
c) DR is the composite debt rate (i.e., the cost of short- and long-term debt) embedded in ROR.
d) TR is the composite federal and state income tax rate that applies to the equity return component of ROR.
e) OE is the sum of the capital-related operating expenses (i.e., depreciation and amortization expense, property taxes, and insurance expense) of the DSM projects to which DCCR applies.

Kentucky Utilities Company

P.S.C. No. 16, Original Sheet No. 86.2

Adjustment Clause DSM
Demand-Side Management Cost Recovery Mechanism

DBA = DSM BALANCE ADJUSTMENT

The DBA shall be calculated on a calendar-year basis and is used to reconcile the difference between the amount of revenues actually billed through the DCR, DRLS, DSMI, DCCR, and previous application of the DBA and the revenues that should have been billed, as follows:

1) For the DCR, the balance adjustment amount will be the difference between the amount billed in a twelve-month period from the application of the DCR unit charge and the actual cost of the approved programs during the same twelve-month period.
2) For the DRLS the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DRLS unit charge and the amount of lost revenues determined for the actual DSM measures implemented during the twelve-month period.
3) For the DSMI, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DSMI unit charge and the incentive amount determined for the actual DSM measures implemented during the twelve-month period.
4) For the DBA, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DBA and the balance adjustment amount established for the same twelve-month period.

The balance adjustment amounts determined on the basis of the above paragraphs (1)-(4) shall include interest applied to the monthly amounts, such interest to be calculated at a rate equal to the average of the "Three-Month Commercial Paper Rate" for the immediately preceding twelve-month period. The total of the balance adjustment amounts shall be divided by the expected kilowatt-hour sales for the upcoming twelve-month period to determine the DBA for such rate class. DSM balance adjustment amounts will be assigned for recovery purposes to the rate classes for which over- or under-recoveries of DSM amounts were realized.

DCCR = DSM CAPITAL COST RECOVERY

The DCCR component is the means by which the Company recovers its capital investments made for DSM programs, as well as an approved rate of return on such capital investments. The Company calculates the DCCR component as follows:

DCCR = [(RB) (ROR + (ROR – DR) (TR / (1 – TR))] + OE

a) RB is the total rate base for DCCR projects.
b) ROR is the overall rate of return on DSM Rate Base (RB).
c) DR is the composite debt rate (i.e., the cost of short- and long-term debt) embedded in ROR.
d) TR is the composite federal and state income tax rate that applies to the equity return component of ROR.
e) OE is the sum of the capital-related operating expenses (i.e., depreciation and amortization expense, property taxes, and insurance expense) of the DSM projects to which DCCR applies.

The Company then allocates the DCCR component to the rate class(es) benefitting from the Company's various DSM-related capital investment(s).

CHANGES TO DSMRC

Modifications to other components of the DSMRC shall be made at least thirty days prior to the effective period for billing. Each filing shall include the following information as applicable:

1) A detailed description of each DSM program developed by the collaborative process, the total cost of each program over the twelve-month period, an analysis of expected resource savings, information concerning the specific DSM or efficiency measures to be installed, and any applicable studies that have been performed, as available.
2) A statement setting forth the detailed calculation of the DCR, DRLS, DSMI, DBA, DCCR, and DSMRC.

Each change in the DSMRC shall be placed into effect with bills rendered on and after the effective date of such change.

PROGRAMMATIC CUSTOMER CHARGES

Residential Customer Program Participation Incentives:
The following Demand Side Management programs are available to residential customers receiving service from the Company on the RS, VFD and LEV Standard Electric Rate Schedules.

Residential Load Management / Demand Conservation
The Residential Load Management / Demand Conservation Program employ switches in homes to help reduce the demand for electricity during peak times. The program communicates with the switches to cycle central air conditioning units, heat pumps, electric water heaters, and pool pumps off and on through a predetermined sequence. This program has an approved flexible incentive structure. The current program offering is defined on Sheet No 86.8.

Residential Conservation / Home Energy Performance Program
The on-site audit offers a comprehensive audit from a certified auditor and incentives for residential customers to support the implementation of energy saving measures for a fee of $25. Customers are eligible for incentives of $500 or $1,000 based on customer purchased and installed energy efficiency measures and validated through a follow-up test.

Residential Low Income Weatherization Program (WeCare)
The Residential Low Income Weatherization Program (WeCare) is an education and weatherization program designed to reduce energy consumption of LG&E's low-income customers. The program provides energy audits, energy education, blower door tests, and installs weatherization and energy conservation measures. Qualified customers could receive energy conservation measures ranging from $0 to $2,100 based upon the customer's most recent twelve month energy usage and results of an energy audit.

Smart Energy Profile
The Smart Energy Profile Program provides a portion of KU's highest consuming residential customers with a customized report of tips, tools and energy efficiency programming recommendations based on individual household energy consumption. These reports are benchmarked against similar properties in locality. The report will help the customer understand and make better informed choices as it relates to energy usage and the associated costs. Information presented in the report will include a comparison of the customer's energy usage to that of similar houses (collectively) and a comparison to the customer's own energy usage in the prior year.

Residential Incentives Program
The Residential Incentives Program encourages customers to purchase and install various ENERGY STAR® appliances, HVAC equipment, or window films that meet certain requirements, qualifying them for an incentive as noted in the table below.

Category	Item	Incentive
Appliances	Heat Pump Water Heaters (HPWH)	$300 per qualifying item purchased
	Washing Machine	$75 per qualifying item purchased
	Refrigerator	$100 per qualifying item purchased
	Freezer	$50 per qualifying item purchased
	Dishwasher	$50 per qualifying item purchased
Window Film	Window Film	Up to 50% of materials cost only; max of $200 per customer account; product must meet applicable criteria.
HVAC	Central Air Conditioner	$100 per Energy Star item purchased plus an additional $100 per SEER improvement above minimum
	Electric Air-Source Heat Pump	$100 per Energy Star item purchased plus additional $100 per SEER improvement above minimum

Demand-Side Management Cost Recovery Mechanism

Residential Refrigerator Removal Program
The Residential Refrigerator Removal Program is designed to provide removal and recycling of working, inefficient secondary refrigerators and freezers from KU customer households. Customers participating in this program will be provided a one-time incentive. This program has an approved flexible incentive structure. The current program offering is defined on Sheet No 86.8.

Residential High Efficiency Lighting Program

The Residential High Efficiency Lighting program promotes an increased use of ENERGY STAR® rated CFLs within the residential sector. The Residential High Efficiency Lighting Program distributes compact fluorescent bulbs through direct-mail.

Residential New Construction Program
The Residential New Construction program is designed to reduce residential energy usage and facilitate market transformation by creating a shift in builders' new home construction to include energy-efficient construction practices. Builders who are part of the program can take advantage of technical training classes, gain additional exposure to potential customers and receive incentives to help offset costs when including more energy-efficient features during home construction. KU will reimburse the cost of plan reviews and inspection costs related to an Energy Star or HERS home certification.

Residential HVAC Diagnostics and Tune Up Program
The Residential HVAC Diagnostic and Tune-up program targets customers with HVAC system performance issues. There are no incentives paid directly to customers. Customers are charged a discounted, fixed-fee for the diagnosis and if needed, a similar fee for implementation of corrective actions. Thus, the program pays the portion of diagnostic and tune-up cost in excess of the customer charge below. The customer cost is as follows:

- Customer cost is $35 per unit for diagnostics test
- Customer cost is $50 per unit for tune-up

Customer Education and Public Information
These programs help customers make sound energy-use decisions, increase control over energy bills and empower them to actively manage their energy usage. Customer Education and Public Information is accomplished through two processes: a mass-media campaign and an elementary- and middle-school program. The mass media campaign includes public-service advertisements that encourage customers to implement steps to reduce their energy usage. The elementary and middle school program provides professional development and innovative materials to K-8 schools to teach concepts such as basic energy and energy efficiency concepts.

Dealer Referral Network
The Dealer Referral Network assists customers in identifying qualified service providers to install energy efficiency improvements recommended and/ or subsidized by the various energy efficiency programs.

Demand-Side Management Cost Recovery Mechanism

Commercial Customer Program Participation Incentives:
The following Demand Side Management programs are available to commercial customers receiving service from the Company on the GS, AES, PS, TODS, and TODP Standard Electric Rate Schedules.

Commercial Load Management / Demand Conservation
The Commercial Load Management / Demand Conservation Program employ switches or interfaces to customer equipment, in small and large commercial businesses to help reduce the demand for electricity during peak times. The Program communicates with the switches or interface to cycle equipment. This program has an approved flexible incentive structure. The current program offering is defined on Sheet No 86.8.

Commercial Conservation (Energy Audits) / Commercial Incentives
The Commercial Conservation / Commercial Inventive Program is designed to provide energy efficiency opportunities for the Companies' commercial class customers through energy audits and to increase the implementation of energy efficiency measures by providing financial incentives to assist with the replacement of aging and less efficient equipment. Incentives available to all commercial customers are based upon a $100 per kW removed for calculated efficiency improvements. A prescriptive list provides customers with incentive values for various efficiency improvements projects. Additionally, a custom rebate is available based upon company engineering validation of sustainable KW removed.

- Maximum annual incentive per facility is $50,000
- Customers can receive multi-year incentives in a single year where such multi-year incentives do not exceed the aggregate of $100,000 per facility and no incentive was provided in the immediately preceding year
- Applicable for combined Prescriptive and Custom Rebates

Commercial HVAC Diagnostics and Tune Up Program
The Commercial HVAC Diagnostic and Tune-up program targets customers with HVAC system performance issues. There are no incentives paid directly to customers. Demand-Side Management Cost Recovery Mechanism

Current Program Incentive Structures

Residential Load Management / Demand Conservation

Switch Option:

- $5/month bill credit for June, July, August, & September per air conditioning unit or heat pump on single family home.
- $2/month bill credit for June, July, August, & September per electric water heater or swimming pool pump on single family home.
- If new customer registers by May 31, 2012, then a $10 gift card per air-conditioning unit, heat pump, water-heater and/or swimming pool pump switch installed.
  - Customers in a tenant landlord relationship will receive the entire $10 new customer incentive.

Multi-family Option:

- $2/month bill credit per customer for June, July, August, & September.
- $2/month incentive per air conditioning or heat pump switch to the premise owner for June, July, August, & September.
- If new customer registers by May 31, 2012, then a $10 gift card per air-conditioning unit or heat pump installed.
  - Customers in a tenant landlord relationship where the entire complex participates will split the new customer incentive with the property owner.
  - Customers in a tenant landlord relationship where only a portion of the complex participates, the tenant will receive a $5 new customer incentive.

Residential Refrigerator Removal Program

The program provides $30 per working refrigerator or freezer.

Commercial Load Management / Demand Conservation

Switch Option

- $5 per month bill credit for June, July, August, & September for air conditioning units up to 5 tons. An additional $1 per month bill credit for each additional ton of air conditioning above 5 tons based upon unit rated capacity.

Customer Equipment Interface Option

The Company will offer a Load Management / Demand Response program tailored to a commercial customer's ability to reduce load. Program participants must commit to a minimum of 50KW demand reduction per control event. The Company will continue to enroll program participants until10MW curtailable load is achieved.

- $25 per KW for verified load reduction during June, July, August, & September.
- The customer will have access to at least hourly load data for every month of the year which they remain enrolled in the program.

P.S.C. No. 15, First Revision of Original Sheet No. 87
Canceling P.S.C. No. 15, Original Sheet No. 87

Adjustment Clause — ECR
Environmental Cost Recovery Surcharge

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

This schedule is mandatory to all Standard Electric Rate Schedules listed in Section 1 of the General Index except CTAC and Special Charges, all Pilot Programs listed in Section 3 of the General Index, and the FAC and DSM Adjustment Clauses. Standard Electric Rate Schedules subject to this schedule are divided into Group 1 or Group 2 as follows:

Group 1: Rate Schedules RS; VFD; AES; ST.LT.; P.O.LT.; DSK; LE; TE; and Pilot Program LEV.
Group 2: Rate Schedules GS; PS; TODS; TODP; RTS; and FLS.

Prior to billings for the first billing cycle in March 2012 (cycle beginning February 29, 2012), all rate schedules noted above will be included in Group 1 for purposes of determining and applying the Environmental Surcharge Billing Factor.

RATE

The monthly billing amount under each of the schedules to which this mechanism is applicable, shall be increased or decreased by a percentage factor calculated in accordance with the following formula.

Group Environmental Surcharge Billing Factor = Group E(m) / Group R(m)

As set forth below, Group E(m) is the sum of Jurisdictional E(m) of each approved environmental compliance plan revenue requirement of environmental compliance costs for the current expense month allocated to each of Group 1 and Group 2. Group R(m) for Group 1 is the 12-month average revenue for the current expense month and for Group 2 it is the 12-month average non-fuel revenue for the current expense month.

DEFINITIONS

1) For all Plans, E(m) = [(RB/12) (ROR + (ROR – DR) (TR / (1 – TR))] + OE – BAS + BR
   a) RB is the Total Environmental Compliance Rate Base.
   b) ROR is the Rate of Return on Environmental Compliance Rate Base, designated as the overall rate of return [cost of short-term debt, long-term debt, preferred stock, and common equity].
   c) DR is the Debt Rate [cost of short-term debt, and long-term debt].
   d) TR is the Composite Federal and State Income Tax Rate.
   e) OE is the Operating Expenses [Depreciation and Amortization Expense, Property Taxes, Emission Allowance Expense and O&M expense adjusted for the Average Month Expense already included in existing rates]. OE includes operation and maintenance expense recovery authorized by the K.P.S.C. in all approved ECR Plan proceedings.
   f) BAS is the total proceeds from by-product and allowance sales applicable to the pre-2011 Plans only.
   g) BR is the operation and maintenance expenses, and/or revenues if applicable, associated with Beneficial Reuse applicable to the pre-2011 Plans only.
   h) Plans are the environmental surcharge compliance plans submitted to and approved by the Kentucky Public Service Commission pursuant to KRS 278.183.

Adjustment Clause **ECR**
Environmental Cost Recovery Surcharge

2) Total E(m) (sum of each approved environmental compliance plan revenue requirement) is multiplied by the Jurisdictional Allocation Factor. Jurisdictional E(m) is adjusted for any (Over)/Under collection or prior period adjustment and by the subtraction of the Revenue Collected through Base Rates for the Current Expense month to arrive at Adjusted Net Jurisdictional E(m). Adjusted Net Jurisdictional E(m) is allocated to Group 1 and Group 2 on the basis of Revenue as a Percentage of Total Revenue for the 12 months ending with the Current Month to arrive at Group 1 E(m) and Group 2 E(m).

3) The Group 1 R(m) is the average of total Group 1 monthly base revenue for the 12 months ending with the current expense month. Base revenue includes the customer, energy, and lighting charges for each rate schedule included in Group 1 to which this mechanism is applicable and automatic adjustment clause revenues for the Fuel Adjustment Clause and the Demand-Side Management Cost Recovery Mechanism as applicable for each rate schedule in Group 1.

4) The Group 2 R(m) is the average of total Group 2 monthly base non-fuel revenue for the 12 months ending with the current expense month. Base non-fuel revenue includes the customer, non-fuel energy, and demand charges for each rate schedule included in Group 2 to which this mechanism is applicable and automatic adjustment clause revenues for the Demand-Side Management Cost Recovery Mechanism as applicable for each rate schedule in Group 2. Non-fuel energy is equal to the tariff energy rate for each rate schedule included in Group 2 less the base fuel factor as defined on Sheet No. 85.1, Paragraph 6.

5) Current expense month (m) shall be the second month preceding the month in which the Environmental Surcharge is billed.

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 90

Adjustment Clause — FF

Franchise Fee Rider

APPLICABLE

In all territory served.

AVAILABILITY OF SERVICE

Available as an option for collection of revenues within governmental jurisdictions which impose on Company franchise fees, permitting fees, local taxes or other charges by ordinance, franchise, or other governmental directive and not otherwise collected in the charges of Company's base rate schedules.

DEFINITIONS

Base Year - the twelve month period ending November 30.
Collection Year - the full calendar year following the Base Year.
Base Year Amount -

1) a percentage of revenues, as determined in the franchise agreement, for the Base Year; and
2) license fees, permit fees, or other costs specifically borne by Company for the purpose of maintaining the franchise as incurred in the Base Year and applicable specifically to Company by ordinance or franchise for operation and maintenance of its facilities in the franchise area, including but not limited to costs incurred by Company as a result of governmental regulation or directives requiring construction or installation of facilities beyond that normally provided by Company in accordance with applicable Rules and Regulations approved by and under the direction of the Kentucky Public Service Commission; and
3) any adjustment for over or under collection of revenues associated with the amounts in 1) or 2).

RATE

The franchise percentage will be calculated by dividing the Base Year amount by the total revenues in the Base Year for the franchise area. The franchise percentage will be monitored during the Collection Year and adjusted to recover the Base Year Amount in the Collection Year as closely as possible.

BILLING

1) The franchise charge will be applied exclusively to the base rate and all riders of bills of customers receiving service within the franchising governmental jurisdiction, before taxes.
2) The franchise charge will appear as a separate line item on the Customer's bill and show the unit of government requiring the franchise.
3) Payment of the collected franchise charges will be made to the governmental franchising body as agreed to in the franchise agreement.

TERM OF CONTRACT

As agreed to in the franchise agreement. In the event such franchise agreement should lapse but payment of franchise fees, other local taxes, or permitting fees paid by Company by ordinance, franchise, or other governmental directive should continue, collection shall continue under this tariff.

TERMS AND CONDITIONS

Service will be furnished in accordance with the provisions of the franchise agreement in so far as those provisions do not conflict with the Terms and Conditions applicable to Company approved by and under the direction of the Kentucky Public Service Commission.

Customer Bill of Rights

As a residential customer of a regulated public utility in Kentucky, you are guaranteed the following rights subject to Kentucky Revised Statutes and the provisions of the Kentucky Public Service Commission Administrative Regulations:

- You have the right to service, provided you (or a member of your household whose debt was accumulated at your address) are not indebted to the utility.
- You have the right to inspect and review the utility's rates and tariffed operating procedures during the utility's normal office hours.
- You have the right to be present at any routine utility inspection of your service conditions.
- You must be provided a separate, distinct disconnect notice alerting you to a possible disconnection of your service, if payment is not received.
- You have the right to dispute the reasons for any announced termination of your service.
- You have the right to negotiate a partial payment plan when your service is threatened by disconnection for non-payment.
- You have the right to participate in equal, budget payment plans for your natural gas and electric service.
- You have the right to maintain your utility service for up to thirty (30) days upon presentation of a medical certificate issued by a health official.
- You have the right to prompt (within 24 hours) restoration of your service when the cause for discontinuance has been corrected.
- If you have not been disconnected, you have the right to maintain your natural gas and electric service for up to thirty (30) days, provided you present a Certificate of Need issued by the Kentucky Cabinet for Human Resources between the months of November and the end of March.
- If you have been disconnected due to non-payment, you have the right to have your natural gas or electric service reconnected between the months of November through March provided you:
  1) Present a Certificate of Need issued by the Kentucky Cabinet for Human Resources, and
  2) Pay one third (1/3) of your outstanding bill ($200 maximum), and
  3) Accept referral to the Human Resources' Weatherization Program, and
  4) Agree to a repayment schedule that will cause your bill to become current by October 15.
- You have the right to contact the Public Service Commission regarding any dispute that you have been unable to resolve with your utility (call Toll Free 1-800-772-4636).

TERMS AND CONDITIONS

General

COMMISSION RULES AND REGULATIONS
All electric service supplied by Company shall be in accordance with the applicable rules and regulations of the Public Service Commission of Kentucky.

COMPANY TERMS AND CONDITIONS
In addition to the rules and regulations of the Commission, all electric service supplied by Company shall be in accordance with these Terms and Conditions, which shall constitute a part of all applications and contracts for service.

RATES, TERMS AND CONDITIONS ON FILE
A copy of the rate schedules, terms, and conditions under which electric service is supplied is on file with the Public Service Commission of Kentucky. A copy of such rate schedules, terms and conditions, together with the law, rules, and regulations of the Commission, is available for public inspection in each office of Company where bills may be paid.

ASSIGNMENT
No order for service, agreement or contract for service may be assigned or transferred without the written consent of Company.

RENEWAL OF CONTRACT
If, upon the expiration of any service contract for a specified term, the customer continues to use the service, the contract (unless otherwise provided therein) will be automatically renewed for successive periods of one (1) year each, subject to termination at the end of any year upon thirty (30) days prior written notice by either party.

AGENTS CANNOT MODIFY AGREEMENT WITHOUT CONSENT OF P.S.C. OF KY.
No agent has power to amend, modify, alter, or waive any of these Terms and Conditions, or to bind Company by making any promises or representations not contained herein.

SUPERSEDE PREVIOUS TERMS AND CONDITIONS
These Terms and Conditions supersede all terms and conditions under which Company has previously supplied electric service.

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

TERMS AND CONDITIONS

Customer Responsibilities

APPLICATION FOR SERVICE

A written application or contract, properly executed, may be required before Company is obligated to render electric service. Company shall have the right to reject for valid reasons any such application or contract.

All applications for service shall be made in the legal name of the party desiring the service.

Where an unusual expenditure for construction or equipment is necessary or where the proposed manner of using electric service is clearly outside the scope of Company's standard rate schedules, Company may establish special contracts giving effect to such unusual circumstances. Customer accepts that non-standard service may result in the delay of required maintenance or, in the case of outages, restoration of service.

TRANSFER OF APPLICATION

Applications for electric service are not transferable and new occupants of premises will be required to make application for service before commencing the use of electricity. Customers who have been receiving electric service shall notify Company when discontinuance of service is desired, and shall pay for all electric service furnished until such notice has been given and final meter readings made by Company.

CONTRACTED DEMANDS

For rate applications where billing demand minimums are determined by the Contract Demand customer shall execute written Contract prior to rendering of service. At Company's sole discretion, in lieu of a written contract, a completed load data sheet or other written load specification, as provided by Customer, can be used to determine the maximum load on Company's system for determining Contract Demand minimum.

OPTIONAL RATES

If two or more rate schedules are available for the same class of service, it is Customer's responsibility to determine the options available and to designate the schedule under which customer desires to receive service.

Company will, at any time, upon request, advise any customer as to the most advantageous rate for existing or anticipated service requirements as defined by the customer, but Company does not assume responsibility for the selection of such rate or for the continuance of the lowest annual cost under the rate selected.

In those cases in which the most favorable rate is difficult to predetermine, Customer will be given the opportunity to change to another schedule, unless otherwise prevented by the rate schedule under which Customer is currently served, after trial of the schedule originally designated; however, after the first such change, Company shall not be required to make a change in schedule more often than once in twelve (12) months.

TERMS AND CONDITIONS

Customer Responsibilities

At Company's sole discretion, in lieu of a written contract, a completed load data sheet or other written load specification, as provided by Customer, can be used to determine the maximum load on Company's system for determining Contract Demand minimum.

OPTIONAL RATES

If two or more rate schedules are available for the same class of service, it is Customer's responsibility to determine the options available and to designate the schedule under which customer desires to receive service.

Company will, at any time, upon request, advise any customer as to the most advantageous rate for existing or anticipated service requirements as defined by the customer, but Company does not assume responsibility for the selection of such rate or for the continuance of the lowest annual cost under the rate selected.

In those cases in which the most favorable rate is difficult to predetermine, Customer will be given the opportunity to change to another schedule, unless otherwise prevented by the rate schedule under which Customer is currently served, after trial of the schedule originally designated; however, after the first such change, Company shall not be required to make a change in schedule more often than once in twelve (12) months.

TERMS AND CONDITIONS

Customer Responsibilities

From time to time, Customer should investigate Customer's operating conditions to determine a desirable change from one available rate to another. Company, lacking knowledge of changes that may occur at any time in Customer's operating conditions, does not assume responsibility that Customer will at all times be served under the most beneficial rate.

In no event will Company make refunds covering the difference between the charges under the rate in effect and those under any other rate applicable to the same class of service.

CUSTOMER'S EQUIPMENT AND INSTALLATION

Customer shall furnish, install, and maintain at Customer's expense all electrical apparatus and wiring to connect with Company's service drop or service line. All such apparatus and wiring shall be installed and maintained in conformity with applicable statutes, laws or ordinances and with the rules and regulations of the constituted authorities having jurisdiction. Customer shall not install wiring or connect and use any motor or other electricity-using device which in the opinion of Company is detrimental to its electric system or to the service of other customers of Company. Company assumes no responsibility whatsoever for the condition of Customer's electrical wiring, apparatus, or appliances, nor for the maintenance or removal of any portion thereof.

In the event Customer builds or extends its own transmission or distribution system over property Customer owns, controls, or has rights to, and said system extends or may extend into the service territory of another utility company, Customer will notify Company of their intention in advance of the commencement of construction.

OWNER'S CONSENT TO OCCUPY

Customer shall grant easements and rights-of-way on and across Customer's property at no cost to Company.

ACCESS TO PREMISES AND EQUIPMENT

Company shall have the right of access to Customer's premises at all reasonable times for the purpose of installing, meter reading, inspecting, repairing, or removing its equipment used in connection with its supply of electric service or for the purpose of turning on and shutting off the supply of electricity when necessary and for all other proper purposes. Customer shall not construct or permit the construction of any structure or device which will restrict the access of Company to its equipment for any of the above purposes.

PROTECTION OF COMPANY'S PROPERTY

Customers will be held responsible for tampering, interfering with, breaking of seals of meters, or other equipment of Company installed on Customer's premises, and will be held liable for same according to law. Customer hereby agrees that no one except the employees of Company shall be allowed to make any internal or external adjustments of any meter or any other piece of apparatus which shall be the property of Company.

POWER FACTOR

Company installs facilities to supply power to Customer at or near unity power factor.

Company expects any customer to use apparatus which shall result in a power factor near unity. However, Company will permit the use of apparatus which shall result, during normal operation, in a power factor not lower than 90 percent either lagging or leading.

Where Customer's power factor is less than 90 percent, Company reserves the right to require Customer to furnish, at Customer's own expense, suitable corrective equipment to maintain a power factor of 90 percent or higher.

EXCLUSIVE SERVICE ON INSTALLATION CONNECTED

Except in cases where Customer has a contract with Company for reserve or auxiliary service, no other electric light or power service will be used by Customer on the same installation in conjunction with Company's service, either by means of a throw-over switch or any other connection.

LIABILITY

Customer assumes all responsibility for the electric service upon Customer's premises at and from the point of delivery of electricity and for the wires and equipment used in connection therewith, and will protect and save Company harmless from all claims for injury or damage to persons or property occurring on Customer's premises or at and from the point of delivery of electricity, occasioned by such electricity or said wires and equipment, except where said injury or damage will be shown to have been occasioned solely by the negligence of Company.

NOTICE TO COMPANY OF CHANGES IN CUSTOMER'S LOAD

The service connections, transformers, meters, and appurtenances supplied by Company for the rendition of electric service to its customers have a definite capacity which may not be exceeded without damage. In the event that Customer contemplates any material increase in Customer's connected load, whether in a single increment or over an extended period, Customer shall immediately give Company written notice of this fact so as to enable it to enlarge the capacity of such equipment. In case of failure to give such notice Customer may be held liable for any damage done to meters, transformers, or other equipment of Company caused by such material increase in Customer's connected load. Should Customer make a permanent change in the operation of electrical equipment that materially reduces the maximum load required by Customer, Company may reduce Customer's contract capacity.

PERMITS

Customer shall obtain or cause to be obtained all permits, easements, or certificates, except street permits, necessary to give Company or its agents access to Customer's premises and equipment and to enable its service to be connected therewith. In case Customer is not the owner of the premises or of intervening property between the premises and Company's distribution lines the customer shall obtain from the proper owner or owners the necessary

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 98

TERMS AND CONDITIONS

Company Responsibilities

METERING

The electricity used will be measured by a meter or meters to be furnished and installed by Company at its expense and all bills will be calculated upon the registration of said meters. When service is supplied by Company at more than one delivery point on the same premises, each delivery point will be metered and billed separately on the rate applicable. Meters include all measuring instruments. Meters will be located outside whenever possible. Otherwise, meters will be located as near as possible to the service entrance and on the ground floor of the building, in a clean, dry, safe and easily accessible place, free from vibration, agreed to by Company.

POINT OF DELIVERY OF ELECTRICITY

The point of delivery of electrical energy supplied by Company shall be at the point, as designated by Company, where Company's facilities are connected with the facilities of Customer, irrespective of the location of the meter.

EXTENSION OF SERVICE

The main transmission lines of Company, or branches thereof, will be extended to such points as provide sufficient load to justify such extensions or in lieu of sufficient load, Company may require such definite and written guarantees from a customer, or group of customers, in addition to any minimum payments required by the Tariff as may be necessary. This requirement may also be made covering the repayment, within a reasonable time, of the cost of tapping such existing lines for light or power service or both.

COMPANY'S EQUIPMENT AND INSTALLATION

Company will furnish, install, and maintain at its expense the necessary overhead service drop or service line required to deliver electricity at the voltage contracted for, to Customer's electric facilities.

Company will furnish, install, and maintain at its expense the necessary meter or meters. (The term meter as used here and elsewhere in these rules and regulations shall be considered to include all associated instruments and devices, such as current and potential transformers installed for the purpose of measuring deliveries of electricity to the customer.) Suitable provision for Company's meter, including an adequate protective enclosure for the same if required, shall be made by Customer. Title to the meter shall remain in Company, with the right to install, operate, maintain, and remove same. Customer shall protect such property of Company from loss or damage, and no one who is not an agent of Company shall be permitted to remove, damage, or tamper with the same. Customer shall execute such reasonable form of easement agreement as may be required by Company.

Notwithstanding the provisions of 807 KAR 5:006, Section 13(4), a reasonable time shall be allowed subsequent to Customer's service application to enable Company to construct or install the facilities required for such service. In order that Company may make suitable provision for enlargement, extension or alteration of its facilities, each applicant for commercial or industrial service shall furnish Company with realistic estimates of prospective electricity requirements.

TERMS AND CONDITIONS

Company Responsibilities

COMPANY NOT LIABLE FOR INTERRUPTIONS

Company will exercise reasonable care and diligence in an endeavor to supply service continuously and without interruption but does not guarantee continuous service and shall not be liable for any loss or damage resulting from interruption, reduction, delay or failure of electric service not caused by the willful negligence of Company, or resulting from any cause or circumstance beyond the reasonable control of Company.

COMPANY NOT LIABLE FOR DAMAGE ON CUSTOMER'S PREMISES

Company is merely a supplier of electricity delivered to the point of connection of Company's and Customer's facilities, and shall not be liable for and shall be protected and held harmless for any injury or damage to persons or property of Customer or of third persons resulting from the presence, use or abuse of electricity on Customer's premises or resulting from defects in or accidents to any of Customer's wiring, equipment, apparatus, or appliances, or resulting from any cause whatsoever other than the negligence of Company

LIABILITY

In no event shall Company have any liability to Customer or any other party affected by the electrical service to Customer for any consequential, indirect, incidental, special, or punitive damages, and such limitation of liability shall apply regardless of claim or theory. In addition, to the extent that Company acts within its rights as set forth herein and/or any applicable law or regulation, Company shall have no liability of any kind to Customer or any other party. In the event that the customer's use of Company's service causes damage to Company's property or injuries to persons, Customer shall be responsible for such damage or injury and shall indemnify, defend, and hold Company harmless from any and all suits, claims, losses, and expenses associated therewith.

FIRM SERVICE T

Where a customer-generator supplies all or part of the customer-generator's own load and desires Company to provide supplemental or standby service for that load, the customer-generator must contract for such service under Company's Supplemental or Standby Service Rider, otherwise Company has no obligation to supply the non-firm service. This requirement does not apply to Net Metering Service (Rider NMS).

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 99

TERMS AND CONDITIONS
Character of Service

Electric service, under the rate schedules herein, will be 60 cycle, alternating current delivered from Company's various load centers and distribution lines at typical nominal voltages and phases, as available in a given location, as follows:

SECONDARY VOLTAGES
Residential Service -
Single phase 120/240 volts three-wire service or 120/208Y volts three-wire service where network system is available.
Non-Residential Service -
1) Single phase 120/240 volts three-wire service, or 120/208Y volts three-wire service where network system is available.
2) Three phase 240 volts three-wire service, 120/240 volts four-wire service, 480 volts three-wire service, 120-208Y volts four-wire service, or 277/480Y four-wire service.

PRIMARY VOLTAGES
According to location, 2,400/4160Y volts, 7,200/12,470Y volts, or 34,500 volts

TRANSMISSION VOLTAGES
According to location, 69,000 volts, 138,000 volts, or 345,000 volts.

The voltage available to any individual customer shall depend upon the voltage of Company's lines serving the area in which Customer's electric load is located.

RESTRICTIONS
1. Except for minor loads, with approval of company, two-wire service is restricted to those customers on service July 1, 2004.
2. To be eligible for the rate applicable to any delivery voltage other than secondary voltage, Customer must furnish and maintain complete substation structure, transformers, and other equipment necessary to take service at the primary or transmission voltage available at point of connection.
   a) In the event Company is required to provide transformation to reduce an available voltage to a lower voltage for delivery to a customer, Customer shall be served at the rate applicable to the lower voltage; provided, however, that if the same rate is applicable to both the available voltage and the delivery voltage, Customer may be required to make a non-refundable payment to reflect the additional investment required to provide service.
   b) The available voltage shall be the voltage on that distribution or transmission line which Company designates as being suitable from the standpoint of capacity and other operating characteristics for supplying the requirements of Customer.

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 100

TERMS AND CONDITIONS

Residential Rate Specific Terms and Conditions

Residential electric service is available for uses customarily associated with residential occupation, including lighting, cooking, heating, cooling, refrigeration, household appliances, and other domestic purposes.

1. Residential rates are based on service to single family units and are not applicable to multi-family dwellings served through a single meter. Where two or more families occupy a residential building, Company will require, as a condition precedent to the application of the residential rate, that the wiring in the building be so arranged as to permit each family to be served through a separate meter. In those cases where such segregation of wiring would involve undue expense to Customer, Company will allow service to two or more families to be taken through one meter, but in this event the minimum bills of the applicable residential rate shall be multiplied by the number of families thus served, such number of families to be determined on the basis of the number of kitchens in the building. At Customer's option, in lieu of the foregoing, electric service rendered to a multi-family residential building through a single meter will be classified as commercial and billed on the basis of service to one customer at an appropriate non-residential rate.

2. Single family unit service shall include usage of electric energy customarily incidental to home occupations, such as the office of a physician, surgeon, dentist, musician or artist when such occupation is carried on by Customer in his residence.

3. A residential building used by a single family as a home, which is also used to accommodate roomers or boarders for compensation, will be billed at the residential rate provided it does not exceed twelve (12) rooms in size. Such a residential building of more than twelve (12) rooms used to accommodate roomers or borders for compensation will be classified as commercial and billed on the appropriate rate. In determining the room rating of rooming and boarding houses, all wired rooms shall be counted except hallways, vestibules, alcoves, closets, bathrooms, lavatories, garrets, attics, storage rooms, trunk rooms, basements, cellars, porches and private garages.

4. Service used in residential buildings occupied by fraternity or sorority organizations associated with educational institutions will be classified as residential and billed at the residential rate.

5. Where both residential and general or commercial classes of service are supplied through a single meter, such combined service shall be billed at the appropriate non-residential rate. Customer may arrange his wiring so as to separate the general service from the residential service, in which event two meters will be installed by Company and separate residential and general service rates applied to the respective classes of service.

6. If Customer's barns, pump house or other outbuildings are located at such distance from his residence as to make it impracticable to supply service thereto through his residential meter, the separate meter required to measure service to such remotely located buildings will be considered a separate service contract and billed as a separate customer on the applicable non-residential rate.

3. A residential building used by a single family as a home, which is also used to accommodate roomers or boarders for compensation, will be billed at the residential rate provided it does not exceed twelve (12) rooms in size. Such a residential building of more than twelve (12) rooms used to accommodate roomers or borders for compensation will be classified as commercial and billed on the appropriate rate. In determining the room rating of rooming and boarding houses, all wired rooms shall be counted except hallways, vestibules, alcoves, closets, bathrooms, lavatories, garrets, attics, storage rooms, trunk rooms, basements, cellars, porches and private garages.

4. Service used in residential buildings occupied by fraternity or sorority organizations associated with educational institutions will be classified as residential and billed at the residential rate.

5. Where both residential and general or commercial classes of service are supplied through a single meter, such combined service shall be billed at the appropriate non-residential rate. Customer may arrange his wiring so as to separate the general service from the residential service, in which event two meters will be installed by Company and separate residential and general service rates applied to the respective classes of service.

6. If Customer's barns, pump house or other outbuildings are located at such distance from his residence as to make it impracticable to supply service thereto through his residential meter, the separate meter required to measure service to such remotely located buildings will be considered a separate service contract and billed as a separate customer on the applicable non-residential rate.

TERMS AND CONDITIONS

Residential Rate Specific Terms and Conditions

7. Single-phase power service used for domestic purposes will be permitted under Residential Rate RS when measured through the residential meter subject to the conditions set forth below:

   (a) Single-phase motors may be served at 120 volts if the locked-rotor current at rated voltage does not exceed 50 amperes. Motors with locked-rotor current ratings in excess of 50 amperes must be served at 240 volts.

   (b) Single-phase motors of new central residential cooling installations with total locked-rotor ratings of not to exceed 125 amperes (inclusive of any auxiliary motors arranged for simultaneous starting with the compressor) may be connected for across-the-line starting provided the available capacity of Company's electric distribution facilities at desired point of supply is such that, in Company's judgment, the starting of such motors will not result in excessive voltage dips and undue disturbance of lighting service and television reception of nearby electric customers. However, except with Company's express written consent, no new single-phase central residential cooling unit having a total lock-rotor rating in excess of 125 amperes inclusive of auxiliary motors arranged for simultaneous starting with the compressor) shall hereafter be connected to Company's lines, or be eligible for electric service therefrom, unless it is equipped with an approved type of current-limiting device for starting which will reduce the initial and incremental starting current inrush to a maximum of 100 amperes per step. Company shall be furnished with reasonable advance notice of any proposed central residential cooling installation.

   (c) In the case of multi-motored devices arranged for sequential starting of the motors, the above rules are considered to apply to the locked-rotor currents of the individual motors; if arranged for simultaneous starting of the motors, the rules apply to the sum of the locked-rotor currents of all motors so started.

   (d) Any motor or motors served through a separate meter will be billed as a separate customer.

TERMS AND CONDITIONS

Billing

METER READINGS AND BILLS

Each bill for utility service shall be issued in compliance with 807 KAR 5:006, Section 6.

All bills will be based upon meter readings made in accordance with Company's meter reading schedule. Company, except if prevented by reasons beyond its control, shall read customers meters at least quarterly, except that customer-read meters shall be read at least once during the calendar year.

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty days.

When Company is unable to read Customer's meter after reasonable effort, or when Company experiences circumstances which make actual meter readings impossible or impracticable, Customer may be billed on an estimated basis and the billing will be adjusted as necessary when the meter is read.

In the event Company's meter fails to register properly by reason of damage, accident, etc., Company shall have the right to estimate Customer's consumption during the period of failure on the basis of such factors as Customer's connected load, heating degree days, and consumption during a previous corresponding period and during a test period immediately following replacement of the defective meter.

Bills are due and payable at the office of Company during business hours, or at other locations designated by Company, within twelve (12) calendar days from date of rendition thereof. If full payment is not received within three (3) calendar days after the due date of the bill, a late payment charge will be assessed on the current month's charges. Beginning October 1, 2010, residential customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice. There will be no adverse credit impact on the customer's payment and credit record, including credit scoring, both internally and externally, and the account will not be considered delinquent for any purpose if the Company receives the customer's payment within fifteen days after the date on which the Company issues the customer's bill.

Failure to receive a bill does not exempt Customer from these provisions of Company's Terms and Conditions.

READING OF SEPARATE METERS NOT COMBINED

For billing purposes, each meter upon Customer's premises will be considered separately and readings of two (2) or more meters will not be combined except where Company's operating convenience requires the installation of two (2) or more meters upon Customer's premises instead of one (1) meter.

CLASSIFICATION OF CUSTOMERS

For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes which create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32 and 33. All other non-residential customers will be defined as "commercial."

MONITORING OF CUSTOMER USAGE

In order to detect unusual deviations in individual customer consumption, Company will monitor the usage of each customer at least once annually. In addition, Company may investigate usage deviations brought to its attention as a result of its ongoing meter reading or billing processor customer inquiry. Should an unusual deviation in Customer's consumption be found which cannot be attributed to a readily identified cause, Company may perform a detailed analysis of Customer's meter reading and billing records. If the cause for the usage deviation cannot be determined from analysis of Customer's meter reading and billing records, Company may contact Customer to determine whether there have been changes such as different number of household members or work staff, additional or different appliances, changes in business volume. Where the deviation is not otherwise explained, Company will test Customer's meter to determine whether it shows an average error greater than two (2) percent fast or slow. Company will notify Customer of the investigation, its findings, and any refunds or back-billing in accordance with 807 KAR 5:006, Section 10(4) and (5).

RESALE OF ELECTRIC ENERGY

Electric energy furnished under Company's standard application or contract is for the use of Customer only and Customer shall not resell such energy to any other person, firm, or corporation on the Customer's premises, or for use on any other premises. This does not preclude Customer from allocating Company's billing to Customer to any other person, firm, or corporation provided the sum of such allocations does not exceed Company's billing.

MINIMUM CHARGE

Without limiting the foregoing, the Demand Charge shall be due regardless of any event or occurrence that might limit (a) Customer's ability or interest in operating Customer's facility, including, but without limitation, any acts of God, fires, floods, earthquakes, acts of government, terrorism, severe weather, riot, embargo, changes in law, or strikes or (b) Company's ability to serve customer.

TERMS AND CONDITIONS

BILLING

CUSTOMER RATE ASSIGNMENT T

If Customer takes service under a rate schedule the eligibility for which contains a minimum or maximum demand parameter (or both), Company will review Customer's demand and usage data at least once annually to determine the rate schedule under which Customer will take service until the next review and rate determination. Company will also conduct such a review and determination upon Customer's request. Company shall not be obligated to change Customer's rate determination based upon detection of a substantial deviation of Customer's demand or usage if, after consultation with Customer, Company determines in its sole discretion that such deviation is not indicative of Customer's likely long-term demand. Similarly, Company may assign Customer to a rate schedule for which Customer would not be eligible based solely on Customer's historical demand or usage, but Company may do so only as part of a review and rate determination that involves consulting with Customer about Customer's likely future demand, as well as Customer's special contract demand, if applicable.

Any such review and rate determination shall be deemed conclusively to be the correct rate determination for Customer for all purposes and for all periods until Company conducts the next such review and determination for Customer. Therefore, Company shall not be liable for any refunds to Customer based upon Customer's rate assignment, and Company shall not seek to back-bill Customer based upon Customer's rate assignment, for any periods between and including such reviews and determinations unless, and only in the event that, a particular review and rate determination are shown to have been materially erroneous at the time they were conducted, in which case Company may be liable for a refund, or may back-bill Customer, only for the period from the erroneous review and determination to the present or the next non-erroneous review and determination, whichever is shorter.

If Company determines during a review as described above that Customer is eligible to take service under more than one rate schedule and that Customer is then taking service under such a rate schedule, Company will not change Customer's rate assignment; it will remain Customer's responsibility to choose between optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1.

If Company determines during a review as described above that Customer is eligible to take service under more than one rate schedule and that Customer is not then taking service under such a rate schedule, Company will (1) provide reasonable notice to Customer of the options available and (2) assign Customer to the rate schedule Company reasonably believes will be most financially beneficial to Customer based on Customer's historical demand and usage, which assignment Company will change upon Customer's request to take service under another rate schedule for which Customer is eligible. Company shall have no refund obligation or bear any other liability or responsibility for its initial assignment of Customer to a rate for which Customer is eligible; it is at all times Customer's responsibility to choose between optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1.

Date of Issue: June 29, 2012

The Billing section of the current KU Terms and Conditions is contained on four pages instead of the current two pages.

TERMS AND CONDITIONS

BILLING

Nothing in this section is intended to curtail or diminish Customer's responsibility to choose among optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1. Likewise, except as explicitly stated in the paragraph above, nothing in this section creates an obligation or responsibility for Company to assign Customer to a particular rate schedule for which Customer is eligible if Customer is eligible for more than one rate schedule. T

CUSTOMER RATE MIGRATION

A change from one rate to another will be effective with the first full billing period following a customer's request for such change, or with a rate change mandated by changes in a customer's load. In cases where a change from one rate to another necessitates a change in metering, the change from one rate to another will be effective with the first full billing period following the meter change.

CLASSIFICATION OF CUSTOMERS

For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes which create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32 and 33. All other non-residential customers will be defined as "commercial."

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 102

TERMS AND CONDITIONS

Deposits

GENERAL

1) Company may require a cash deposit or other guaranty from customers to secure payment of bills in accordance with 807 KAR 5:006, Section 7, except for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 15, Winter Hardship Reconnection.
2) Deposits may be required from all customers not meeting satisfactory credit and payment criteria. Satisfactory credit for customers will be determined by utilizing independent credit sources (primarily utilized with new customers having no prior history with Company), as well as historic and ongoing payment and credit history with Company.
   a) Examples of independent credit scoring resources include credit scoring services, public record financial information, financial scoring and modeling services, and information provided by independent credit/financial watch services.
   b) Satisfactory payment criteria with Company may be established by paying all bills rendered, having no disconnections for nonpayment, having no late notices, having no defaulted credit arrangements, having no returned payments, having no meter diversion or theft of service.
3) Company may offer residential or general service customers the option of paying all or a portion of their deposits in installments over a period not to exceed the first four (4) normal billing periods. Service may be refused or discontinued for failure to pay and/or maintain the requested deposit.
4) Interest on deposits will be calculated at the rate prescribed by law, from the date of deposit, and will be paid annually either by refund or credit to Customer's bills, except that no refund or credit will be made if Customer's bill is delinquent on the anniversary date of the deposit. If interest is paid or credited to Customer's bill prior to twelve (12) months from the date of deposit, the payment or credit will be on a prorated basis. Upon termination of service, the deposit, any principal amounts, and interest earned and owing will be credited to the final bill, with any remainder refunded to Customer.

RESIDENTIAL

1) Residential customers are those customers served under Residential Service, Sheet No. 5.
2) The deposit for a residential customer is in the amount of $135.00, which is calculated in accordance with 807 KAR 5:006, Section 7(1)(b).
3) Company will retain Customer's deposit for a period not to exceed twelve (12) months, provided Customer has met satisfactory payment and credit criteria.
4) If a deposit is held longer than eighteen (18) months, the deposit will be recalculated at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than $10.00, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
5) If Customer fails to maintain a satisfactory payment or credit record, or otherwise become a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

GENERAL SERVICE

1) General service customers are those customers served under General Service, Sheet No. 10.
2) The deposit for a general service customer is in the amount of $220.00, which is calculated in accordance with 807 KAR 5:006, Section 7(1)(b).
3) Company shall retain Customer's deposit as long as Customer remains on service.
4) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten (10%) percent, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
5) If Customer fails to maintain a satisfactory payment or credit record, or otherwise becomes a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

OTHER SERVICE

1) The deposit for all other customers, those not classified herein as residential or general service, shall not exceed 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly in accordance with 807 KAR 5:006, Section 7(1)(a).
2) For customers not meeting the parameters of GENERAL SERVICE ¶ 2, above, Company may retain Customer's deposit as long as Customer remains on service.
3) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten (10%) percent, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
4) If Customer fails to maintain a satisfactory payment or credit record, or otherwise become a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

TERMS AND CONDITIONS

Deposits

GENERAL SERVICE

1) General service customers are those customers served under General Service, Sheet No. 10.
2) The deposit for a general service customer is in the amount of $220.00, which is calculated in accordance with 807 KAR 5:006, Section 7(1)(b). The deposit for a General Service customer may be waived when the General Service delivery is to a detached building used in conjunction with a Residential Service and the General Service usage is no more than 300 kWh per month. T T T T
3) Company shall retain Customer's deposit as long as Customer remains on service.
4) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten (10%) percent, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
5) If Customer fails to maintain a satisfactory payment or credit record, or otherwise becomes a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

OTHER SERVICE

1) The deposit for all other customers, those not classified herein as residential or general service, shall not exceed 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly in accordance with 807 KAR 5:006, Section 7(1)(a).
2) For customers not meeting the parameters of GENERAL SERVICE ¶ 2, above, Company may retain Customer's deposit as long as Customer remains on service.
3) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten (10%) percent, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
4) If Customer fails to maintain a satisfactory payment or credit record, or otherwise become a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

TERMS AND CONDITIONS

Budget Payment Plan

Company's Budget Payment Plan is available to any residential customer or general service customer. Under this plan, a customer may elect to pay, each billing period, a budgeted amount in lieu of billings for actual usage. A customer may enroll in this plan at any time.

The budgeted amount will be determined by Company and will be based on one-twelfth of Customer's usage for either an actual or estimated twelve (12) months. The budgeted amount will be subject to review and adjustment by Company at any time during Customer's budget year. If actual usage indicates Customer's account will not be current with the final payment in Customer's budget year, Customer will be required to pay their Budget Payment Plan account to $0 prior to the beginning of the customer's next budget year.

If a customer fails to pay bills as agreed under the Budget Payment Plan, Company reserves the right to remove the customer from the plan, restore the customer to regular billing, and require immediate payment of any deficiency. A customer removed from the Budget Payment Plan for non-payment may be prohibited from further participation in the plan for twelve (12) months.

Failure to receive a bill in no way exempts a customer from the provisions of these terms and conditions.

TERMS AND CONDITIONS

Budget Payment Plan

Company's Budget Payment Plan is available to any residential customer or general service customer. Under this plan, a customer may elect to pay, each billing period, a budgeted amount in lieu of billings for actual usage. A customer may enroll in this plan at any time.

The budgeted amount will be determined by Company and will be based on one-twelfth of Customer's usage for either an actual or estimated twelve (12) months. The budgeted amount will be subject to review and adjustment by Company at any time during Customer's budget year. If actual usage indicates Customer's account will not be current with the final payment in Customer's budget year, Customer will be required to pay their Budget Payment Plan account to $0 prior to the beginning of the customer's next budget year.

If a customer fails to pay bills as agreed under the Budget Payment Plan, Company reserves the right to remove the customer from the plan, restore the customer to regular billing, and require immediate payment of any deficiency. A customer removed from the Budget Payment Plan for non-payment may be prohibited from further participation in the plan for twelve (12) months.

Failure to receive a bill in no way exempts a customer from the provisions of these terms and conditions.

IMPORTANT INFORMATION

The power to save. It's in your hands. The amount of electricity you consumed during this billing cycle resulted in the production of approximately 2,148 pounds of CO2 (carbon). A typical residential customer uses 1,000 kilowatt hours of electricity per month, which would result in the production of 2,000 lbs. of carbon. Visit our Web site at www.lge-ku.com for Smart Saver tips designed to help you better manage and lessen the environmental impact of your engery usage.

For a copy of your rate schedule, visit www.lge-ku.com or call our Customer Service Department.

New enrollment only - Please check box(es) below and on front of stub.

☐ Budget Plan

☐ I would like to enroll in Demand Conservation

☐ Auto Pay (voided check must be provided). Please note that any past due balance on your KU account will be debited from your bank account immediately upon enrollment in the Auto Pay program. To avoid unintended debits to your bank account, please make sure your KU account balance is current before enrolling in Auto Pay.

Please deduct my Auto Pay Payment from my Checking Account.
I hereby authorize KU to debit my bank account for payment of my monthly bill. This authorization applies to all my current and future KU accounts, and will remain in effect until revoked by me or KU.

Signature: ______________________

Date: ______________________

Processing Auto Pay requests can take up to two billing cycles. Please continue making regular payments until you receive a bill that indicates the amount due will be deducted from your bank account on the payment due date.

Kentucky Utilities Company

P.S.C. No. 15, Original Sheet No. 105

TERMS AND CONDITIONS

Discontinuance of Service

In accordance with and subject to the rules and regulations of the Public Service Commission of Kentucky, Company shall have the right to refuse or discontinue service to an applicant or customer under the following conditions:

A. When Company's or Commission's rules and regulations have not been complied with. However, service may be discontinued or refused only after Company has made a reasonable effort to induce Customer to comply with its rules and then only after Customer has been given at least ten (10) days written notice of such intention, mailed to his last known address.

B. When a dangerous condition is found to exist on Customer's or applicant's premises. In such case service will be discontinued without notice or refused, as the case might be. Company will notify Customer or applicant immediately of the reason for the discontinuance or refusal and the corrective action to be taken before service can be restored or initiated.

C. When Customer or applicant refuses or neglects to provide reasonable access and/or easements to and on his premises for the purposes of installation, operation, meter reading, maintenance, or removal of Company's property. Customer shall be given fifteen (15) days written notice of Company's intention to discontinue or refuse service.

D. When Applicant is indebted to Company for service furnished. Company may refuse to serve until indebtedness is paid.

E. When Customer or Applicant does not comply with state, municipal or other codes, rules and regulations applying to such service.

F. When directed to do so by governmental authority.

G. Service will not be supplied to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same or any other premises until payment of such indebtedness shall have been made. Service will not be continued to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same premises in accordance with 807 KAR 5:006, Section 14(1)(f). Unpaid balances of previously rendered Final Bills may be transferred to any account for which Customer has responsibility and may be included on initial or subsequent bills for the account to which the transfer was made. Such transferred Final Bills, if unpaid, will be a part of the past due balance of the account to which they are transferred. When there is no lapse in service, such transferred Final Bills will be subject to Company's collections and disconnect procedures in accordance with 807 KAR 5:006, Section 14(1)(f). Final Bills transferred following a lapse in service will not be subject to disconnection unless: (1) such service was provided pursuant to a fraudulent application submitted by Customer; (2) Customer and Company have entered into a contractual agreement which allows for such a disconnection; or (3) the current account is subsequently disconnected for service supplied at that point of delivery, at which time, all unpaid and past due balances must be paid prior to reconnect. Company shall have the right to transfer Final Bills between residential and commercial with residential characteristics (e.g., service supplying common use facilities of any apartment building) revenue classifications.

Date of Issue: August 6, 2010
Date Effective: August 1, 2010

Date of Issue: June 29, 2012
Date Effective: August 1, 2010
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

TERMS AND CONDITIONS

Discontinuance of Service

Service will not be supplied or continued to any premises if at the time of application for service Applicant is merely acting as an agent of a person or former customer who is indebted to Company for service previously supplied at the same or other premises until payment of such indebtedness shall have been made. Service will not be supplied where Applicant is a partnership or corporation whose general partner or controlling stockholder is a present or former customer who is indebted to Company for service previously supplied at the same premises until payment of such indebtedness shall have been made.

H. For non-payment of bills. Company shall have the right to discontinue service for non-payment of bills after Customer has been given at least ten days written notice separate from his original bill. Cut-off may be effected not less than twenty-seven (27) days after the mailing date of original bills unless, prior to discontinuance, a residential customer presents to Company a written certificate, signed by a physician, registered nurse, or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises, in which case discontinuance may be effected not less than thirty (30) days from the original date of discontinuance. Company shall notify Customer, in writing, of state and federal programs which may be available to aid in payment of bills and the office to contact for such possible assistance.

I. For fraudulent or illegal use of service. When Company discovers evidence that by fraudulent or illegal means Customer has obtained unauthorized service or has diverted the service for unauthorized use or has obtained service without same being properly measured, the service to Customer may be discontinued without notice. Within twenty-four (24) hours after such termination, Company shall send written notification to Customer of the reasons for such discontinuance of service and of Customer's right to challenge the termination by filing a formal complaint with the Public Service Commission of Kentucky. Company's right of termination is separate from and in addition to any other legal remedies which the utility may pursue for illegal use or theft of service. Company shall not be required to restore service until Customer has complied with all rules of Company and regulations of the Commission and Company has been reimbursed for the estimated amount of the service rendered and the cost to Company incurred by reason of the fraudulent use.

When service has been discontinued for any of the above reasons, Company shall not be responsible for any damage that may result therefrom.

Discontinuance or refusal of service shall be in addition to, and not in lieu of, any other rights or remedies available to Company.

Company may defer written notice based on Customer's payment history provided Company continues to provide the required ten (10) days written notice prior to discontinuance of service.

Company may defer written notice based on Customer's payment history provided Company continues to provide the required ten (10) days written notice prior to discontinuance of service.

TERMS AND CONDITIONS

Line Extension Plan

A. AVAILABILITY
In all territory served by where Company does not have existing facilities to meet Customer's electric service needs.

B. DEFINITIONS
1) "Company" shall mean Kentucky Utilities Company.
2) "Customer" shall mean the applicant for service. When more than one electric service is requested by an applicant on the same extension, such request shall be considered one customer under this plan when the additional service request(s) is only for incidental or minor convenience loads or when the applicant for service is the developer of a subdivision.
3) "Line Extension" shall mean the single phase facilities required to serve Customer by the shortest route most convenient to Company from the nearest existing adequate Company facilities to Customer's delivery point, approved by Company, and excluding transformers, service drop, and meters, if required and normally provided to like customers.
4) "Permanent Service" shall mean service contracted for under the terms of the applicable rate schedule but not less than one year and where the intended use is not seasonal, intermittent, or speculative in nature.
5) "Commission" shall mean the Public Service Commission of Kentucky.

C. GENERAL
1) All extensions of service will be made through the use of overhead facilities except as provided in these rules.
2) Customer requesting service which requires an extension(s) shall furnish to Company, at no cost, properly executed easement(s) for right-of-way across Customer's property to be served.
3) Customer requesting extension of service into a subdivision, subject to the jurisdiction of a public commission, board, committee, or other agency with authority to zone or otherwise regulate land use in the area and require a plat (or Plan) of the subdivision, Customer shall furnish, at no cost, Company with the plat (or plan) showing street and lot locations with utility easement and required restrictions. Plats (or plans) supplied shall have received final approval of the regulating body and recorded in the office of the appropriate County Court Clerk when required. Should no regulating body exist for the area into which service is to be extended, Customer shall furnish Company the required easement.
4) The title to all extensions, rights-of way, permits, and easements shall be and remain with Company.
5) Where Company is required or elects to construct an additional extension or lateral to serve Customer or another customer, Company reserves the right to connect to any extension constructed under this plan and Customer shall grant to Company, at no cost, properly executed easement(s) for right-of-way across Customer's property for the additional extension or lateral.
6) Customer must agree in writing to take service when the extension is completed and have his building or other permanent facility wired and ready for connection.
7) Nothing herein shall be construed as preventing Company from making electric line extensions under more favorable terms than herein prescribed provided the potential revenue is of such amount and permanency as to warrant such terms and render economically

C. GENERAL (continued)
feasible the capital expenditure involved and provided such extensions are made to other customers under similar conditions.
8) Company may require a non-refundable deposit in cases where Customer does not have a real need or in cases where the estimated revenue does not justify the investment.
9) Company shall not be obligated to extend its lines in cases where such extensions, in the good judgment of Company, would be unfeasible, impractical, or contrary to good engineering or operating practice, unless otherwise ordered by Commission.

D. NORMAL LINE EXTENSIONS
1) In accordance with 807 KAR 5:041, Section 11(1), Company will provide, at no cost, a line extension of up to 1,000 feet to Customer requesting permanent service where the installed transformer capacity does not exceed 25 kVA.
2) Where Customer requires poly-phase service or transformer capacity in excess of 25 kVA and Company provides such facilities, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost to Company in providing facilities above that required in NORMAL LINE EXTENSIONS ¶ 1 above.

E. OTHER LINE EXTENSIONS
1) In accordance with 807 KAR 5:041, Section 11(2), Company shall provide to Customer requesting permanent service a line extension in excess of 1,000 feet per customer but Company may require the total cost of the footage in excess of 1,000 feet per customer, based on the average cost per foot of the total extension, be deposited with Company by Customer.
2) Each year for ten (10) years Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension for each additional customer connected during that year directly to the original extension for which the deposit was made.
3) Each year for ten (10) years Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension less the length of the lateral or extension for each additional customer connected during that year by a lateral or extension to the original extension for which the deposit was made.
4) No refund shall be made for additional customers connected to an extension or lateral from the original extension for which the deposit was made.
5) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten (10) year refund period ends.
6) Where Customer requires poly-phase service or transformer capacity above 25 kVA per customer and Company provides such facilities, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost to Company in providing facilities above that required in OTHER LINE EXTENSIONS ¶ 1 above.

F. OVERHEAD LINE EXTENSIONS TO SUBDIVISIONS
1) In accordance with 807 KAR 5:041, Section 11(3), Customer desiring service extended for and through a subdivision may be required by Company to deposit the total cost of the extension.
2) Each year for ten (10) years Company shall refund to Customer, the cost of 1,000 feet of extension for each additional customer connected during that year directly to the original extension for which the deposit was made.
3) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten-year refund period ends.

G. MOBILE HOME LINE EXTENSIONS

1) Company will make line extensions for service to mobile homes in accordance with 807 KAR 5:041, Section 12, and Commission's Order, dated August 9, 1991, in Case No. 91-213,
2) Company shall provide, at no cost, a line extension of up to 300 feet to Customer requesting permanent service for a mobile home.
3) Company shall provide to Customer requesting permanent service for a mobile home a line extension in excess of 300 feet and up to 1,000 feet but Company may require the total cost of the footage in excess of 300 feet, based on the average cost per foot of the total extension, be deposited with Company by Customer. Beyond 1,000 feet, the policies set forth in OTHER LINE EXTENSIONS shall apply.
4) Each year for four (4) years Company shall refund to Customer equal amounts of the deposit for the extension from 300 feet to 1,000 feet.
5) If service is disconnected for sixty (60) days, if the original mobile home is removed and not replaced by another mobile home or a permanent structure in sixty (60) days, the remainder of the deposit is forfeited.
6) No refund will be made except to the original customer.

H. UNDERGROUND LINE EXTENSIONS

General

1) Company will make underground line extensions for service to new residential customers and subdivisions in accordance with 807 KAR 5:041, Section 21.
2) In order that Company may make timely provision for materials, and supplies, Company may require Customer to execute a contract for an underground extension under these Terms and Conditions with Company at least six (6) months prior to the anticipated date service is needed and Company may require Customer to deposit with Company at least 10% of any amounts due under the contract at the time of execution. Customer shall deposit the balance of any amounts due under the contract with Company prior to ordering materials or commencement of actual construction by Company of facilities covered by the contract.
3) Customer shall give Company at least 120 days written notice prior to the anticipated date service is needed and Company will undertake to complete installation of its facilities at least thirty (30) days prior to that date. However, nothing herein shall be interpreted to require Company to extend service to portions of subdivisions not under active development.
4) At Company's discretion, Customer may perform a work contribution to Company's specifications, including but not limited to conduit, setting pads, or any required trenching and backfilling, and Company shall credit amounts due from Customer for underground service by Company's estimated cost for such work contribution.
5) Customer will provide, own, operate and maintain all electric facilities on his side of the point of delivery with the exception of Company's meter.
6) In consideration of Customer's underground service, Company shall credit any amounts due under the contract for each service at the rate of $50.00 or Company's average estimated installed cost for an overhead service whichever is greater.
7) Unit charges, where specified herein, are determined from Company's estimate of Company's average unit cost of such construction and the estimated cost differential between underground and overhead distribution systems in representative residential subdivisions.

H. UNDERGROUND EXTENSIONS
General (continued)

8) Three phase primary required to supply either individual loads or the local distribution system may be overhead unless Customer chooses underground construction and deposits with Company a non-refundable deposit for the cost differential.

Individual Premises

Where Customer requests and Company agrees to supply underground service to an individual premise, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.

Medium Density Subdivisions

1) A medium density residential subdivision is defined as containing ten or more lots for the construction of new residential buildings each designed for less than five (5)-family occupancy.

2) Customer shall provide any required trenching and backfilling or at Company's discretion be required to deposit with Company a non-refundable amount determined by a unit charge of $8.93 per aggregate lot front-foot along all streets contiguous to the lots to be served through an underground extension.

3) The Customer may be required to advance to the Company the Company's full estimated cost of construction of an underground electric distribution extension. Where Customer is required to provide trenching and backfilling, advance will be the Company's full estimate cost of construction. Where Customer is required to deposit with the Company a non-refundable advance in place of trenching and backfilling, advance will be determined by a unit charge of $20.61 per aggregate lot front-foot along all streets contiguous to the lots to be served through an underground extension.

4) Each year for ten (10) years Company shall refund to Customer an amount determined as follows:
   a. Where customer is required to provide trenching and backfilling, a refund of $5,000 for each customer connected during that year.
   b. Where customer is required to provide a non-refundable advance, 500 times the difference in the unit charge advance amount in 3) and the non-refundable unit charge advance in 2) for each customer connected during that year

5) In no case shall the refunds provided for herein exceed the amounts deposited less any non-refundable charges applicable to the project nor shall any refund be made after a ten-year refund period ends.

High Density Subdivisions

1) A high density residential subdivision is defined as building complexes consisting of two or more buildings each not more than three stories above grade and each designed for five (5) or more family occupancy.
2) Customer shall provide any required trenching and backfilling or at Company's discretion be required to deposit with Company a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.
3) The Customer may be required to advance to the Company the Company's full estimated cost of construction of an underground electric distribution extension.
   i. Company shall refund to Customer any amounts due when permanent service is provided by Company to twenty (20%) percent of the family units in Customer's project.
   ii. In no case shall the refunds provided for herein exceed the amounts deposited less any non refundable charges applicable to the project nor shall any refund be made after a ten-year refund period ends.

Other Underground Subdivisions

In cases where a particular residential subdivision does not meet the conditions provided for above, Customer requests and Company agrees to supply underground service, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.

I. SPECIAL CASES

1) Where Customer requests service that is seasonal, intermittent, speculative in nature, at voltages of 34.5kV or greater, or where the facilities requested by Customer do not meet the Terms and Conditions outlined in previous sections of LINE EXTENSION PLAN and the anticipated revenues do not justify Company's installing facilities required to meet customers needs, Company may request that Customer deposit with Company a refundable amount to justify Company's investment.
2) Each year for ten (10) years Company shall refund to Customer, an amount calculated by:
   a. Adding the sum of Customer's annual base rate monthly electric demand billing for that year to the sum of the annual base rate monthly electric billing of the monthly electric demand billing for that year of any customer(s), who connects directly to the facilities provided for in this agreement and requiring no further investment by Company
   b. times the refundable amount divided by the estimated total ten-year base rate electric demand billing required to justify the investment.
3) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten-year refund period ends.

Kentucky Utilities Company

TERMS AND CONDITIONS

Energy Curtailment and Service Restoration Procedures

PURPOSE

To provide procedures for reducing the consumption of electric energy on the Kentucky Utilities Company (Company) system in the event of a capacity shortage and to restore service following an outage. Notwithstanding any provisions of these Energy Curtailment and Service Restoration Procedures, the Company shall have the right to take whatever steps, with or without notice and without liability on Company's part, that the Company believes necessary, in whatever order consistent with good utility practices and not on an unduly discriminatory basis, to preserve system integrity and to prevent the collapse of the Company's electric system or interconnected electric network or to restore service following an outage. Such actions will be taken giving priority to maintaining service to the Company's retail and full requirements customers relative to other sales whenever feasible and as allowed by law.

ENERGY CURTAILMENT PROCEDURE

PRIORITY LEVELS

For the purpose of these procedures, the following Priority Levels have been established:

I. Essential Health and Safety Uses – to be given special consideration in these procedures shall, insofar as the situation permits, include the following types of use

A. "Hospitals", which shall be limited to institutions providing medical care to patients.

B. "Life Support Equipment", which shall be limited to kidney machines, respirators, and similar equipment used to sustain the life of a person.

C. "Police Stations and Government Detention Institutions", which shall be limited to essential uses required for police activities and the operation of facilities used for the detention of persons.

D. "Fire Stations", which shall be limited to facilities housing mobile fire-fighting apparatus.

E. "Communication Services", which shall be limited to essential uses required for telephone, telegraph, television, radio and newspaper operations, and operation of state and local emergency services.

F. "Water and Sewage Services", which shall be limited to essential uses required for the supply of water to a community, flood pumping and sewage disposal.

G. "Transportation and Defense-related Services", which shall be limited to essential uses required for the operation, guidance control and navigation of air, rail and mass transit systems, including those uses essential to the national defense and operation of state and local emergency services. These uses shall include essential street, highway and signal-lighting services.

G. "Transportation and Defense-related Services", which shall be limited to essential uses required for the operation, guidance control and navigation of air, rail and mass transit systems, including those uses essential to the national defense and operation of state and local emergency services. These uses shall include essential street, highway and signal-lighting services.

TERMS AND CONDITIONS

Energy Curtailment and Service Restoration Procedures

Although, when practical, these types of uses will be given special consideration when implementing the manual load-shedding provisions of this program, any customer may be affected by rotating or unplanned outages and should install emergency generation equipment if continuity of service is essential. Where the emergency is system-wide in nature, consideration will be given to the use of rotating outages as operationally practicable. In case of customers supplied from two utility sources, only one source will be given special consideration. Also, any other customers who, in their opinion, have critical equipment should install emergency generation equipment.

Company maintains lists of customers with life support equipment and other critical needs for the purpose of curtailments and service restorations. Company, lacking knowledge of changes that may occur at any time in customer's equipment, operation, and backup resources, does not assume the responsibility of identifying customers with priority needs. It shall, therefore, be the customer's responsibility to notify Company if Customer has critical needs.

II. Critical Commercial and Industrial Uses -- Except as described in Section III below, these uses shall include commercial or industrial operations requiring regimented shutdowns to prevent conditions hazardous to the general population, and to energy utilities and their support facilities critical to the production, transportation, and distribution of service to the general population. Company shall maintain a list of such customers for the purpose of curtailments and service restoration.

III. Residential Use -- The priority of residential use during certain weather conditions (for example severe winter weather) will receive precedence over critical commercial and industrial uses. The availability of Company service personnel and the circumstances associated with the outage will also be considered in the restoration of service.

IV. Non-critical commercial and industrial uses.

V. Nonessential Uses -- The following and similar types of uses of electric energy shall be considered nonessential for all customers:

A. Outdoor flood and advertising lighting, except for the minimum level to protect life and property, and a single illuminated sign identifying commercial facilities when operating after dark.

B. General interior lighting levels greater than minimum functional levels.

C. Show-window and display lighting.

D. Parking-lot lighting above minimum functional levels.

E. Energy use to lower the temperature below 78 degrees during operation of cooling equipment and above 65 degrees during operation of heating equipment.

F. Elevator and escalator use in excess of the minimum necessary for non-peak hours of use.

Company shall maintain a list of such customers for the purpose of curtailments and service restoration.

III. Residential Use -- The priority of residential use during certain weather conditions (for example severe winter weather) will receive precedence over critical commercial and industrial uses. The availability of Company service personnel and the circumstances associated with the outage will also be considered in the restoration of service.

IV. Non-critical commercial and industrial uses.

V. Nonessential Uses -- The following and similar types of uses of electric energy shall be considered nonessential for all customers:

A. Outdoor flood and advertising lighting, except for the minimum level to protect life and property, and a single illuminated sign identifying commercial facilities when operating after dark.

B. General interior lighting levels greater than minimum functional levels.

C. Show-window and display lighting.

D. Parking-lot lighting above minimum functional levels.

E. Energy use to lower the temperature below 78 degrees during operation of cooling equipment and above 65 degrees during operation of heating equipment.

F. Elevator and escalator use in excess of the minimum necessary for non-peak hours of use.

Date of Issue: June 29, 2012
Date Effective: August 1, 2010
Issued By: Lonnie E. Bellar, Vice President, State Regulation and Rates, Lexington, Kentucky

Issued by Authority of an Order of the KPSC in Case No. 2009-00548 dated July 30, 2010

TERMS AND CONDITIONS

Energy Curtailment and Service Restoration Procedures

G. Energy use greater than that which is the minimum required for lighting, heating, or cooling of commercial or industrial facilities for maintenance cleaning or business-related activities during non-business hours.

Non-jurisdictional customers will be treated in a manner consistent with the curtailment procedures contained in the service agreement between the parties or the applicable tariff.

CURTAILMENT PROCEDURES

In the event Company's load exceeds internal generation, transmission, or distribution capacity, or other system disturbances exist, and internal efforts have failed to alleviate the problem, including emergency energy purchases, the following steps may be taken, individually or in combination, in the order necessary as time permits:

1. Customers having their own internal generation capacity will be curtailed, and customers on curtailable contracts will be curtailed for the maximum hours and load allowable under their contract. Nothing in this procedure shall limit Company's rights under the Curtailable Service Rider tariff.
2. Power output will be maximized at Company's generating units.
3. Company use of energy at its generating stations will be reduced to a minimum.
4. Company's use of electric energy in the operation of its offices and other facilities will be reduced to a minimum.
5. The Kentucky Public Service Commission will be advised of the situation.
6. An appeal will be made to customers through the news media and/or personal contact to voluntarily curtail as much load as possible. The appeal will emphasize the defined priority levels as set forth above.
7. Customers will be advised through the use of the news media and personal contact that load interruption is imminent.
8. Implement procedures for interruption of selected distribution circuits.

SERVICE RESTORATION PROCEDURES

Where practical, priority uses will be considered in restoring service and service will be restored in the order I through IV as defined under PRIORITY LEVELS. However, because of the varieties of unpredictable circumstances which may exist or precipitate outages, it may be necessary to balance specific individual needs with infrastructure needs that affect a larger population. When practical, Company will attempt to provide estimates of repair times to aid customers in assessing the need for alternative power sources and temporary relocations.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(1)(a)9
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

A statement that customer notice has been given in compliance with subsections (3) and (4) of this section with a copy of the notice.

Response:

Customer notice has been given in compliance with 807 KAR 5:001 Section 10(3) and (4). See attached Certificate of Notice.

COMMONWEALTH OF KENTUCKY

BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF KENTUCKY UTILITIES COMPANY FOR AN ADJUSTMENT OF ITS ELECTRIC RATES	))))	**CASE NO. 2012-00221**

CERTIFICATE OF NOTICE

Pursuant to the Kentucky Public Service Commission's Regulation 807 KAR 5:001, Section 10(1)(a)(9), I hereby certify that I am Lonnie E. Bellar, Vice President, State Regulation and Rates, for Kentucky Utilities Company ("KU" or "Company"), a utility furnishing retail electric service within the Commonwealth of Kentucky which, on the 29th day of June, 2012, filed an application with the Kentucky Public Service Commission for the approval of an adjustment of the electric rates, terms, and conditions of KU, and that notice to the public of the filing of the application has been completed in all respects as required by 807 KAR 5:001, Section 10(3) and (4) and 807 KAR 5:011, Sections 8(2)(c) and 9(2), as follows:

On the 29th day of June, 2012, the notice to the public was delivered for exhibition and public inspection at the offices and places of business of the Company in the territory affected thereby, to-wit, at the following places:

Barlow
Campbellsville
Carrollton
Danville
Earlington
Eddyville
Elizabethtown
Georgetown
Greenville
Harlan
Lexington
London
Maysville
Middlesboro
Morehead
Morganfield
Mt. Sterling
Paris
Richmond
Shelbyville
Somerset
Versailles
Winchester

and that the same will be kept open to public inspection at said offices and places of business in conformity with the requirements of 807 KAR 5:001, Section 10(4)(f) and 807 KAR 5:011, Section 8(2).

I further certify that more than twenty (20) customers will be affected by said change by way of an increase in their rates or charges, and that on the 8th day of June, 2012, there was delivered to the Kentucky Press Association, an agency that acts on behalf of newspapers of general circulation throughout the Commonwealth of Kentucky in which customers affected reside, for publication therein once a week for three consecutive weeks beginning on June 22, 2012, a notice of the filing of KU's application, including its proposed rates, a copy of said notice being attached hereto, and a list of newspapers of general circulation throughout the Commonwealth of Kentucky in which customers affected reside, a copy of said list being attached hereto. A certificate of publication of said notice will be furnished to the Kentucky Public Service Commission upon completion of same pursuant to 807 KAR 5:001, Section 10(4)(d).

In addition, beginning on June 29, 2012, KU began including a general statement explaining the Application in this case with the bills for all Kentucky retail customers during the course of their regular monthly billing cycle.

Also beginning on June 29, 2012, KU posted on its Internet website a complete copy of KU's application in this case. Both the notice being published in newspapers and the bill inserts being sent to customers include the web address to the online posting.

Given under my hand this 29th day of June, 2012.

Lonnie E. Bellar
Vice President, State Regulation and Rates
LG&E and KU Energy LLC
220 West Main Street
Louisville, Kentucky 40202

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 29th day of June, 2012.

(SEAL)
Notary Public

My Commission Expires:
July 21, 2015

NOTICE

Notice is hereby given that Kentucky Utilities Company seeks approval by the Public Service Commission, Frankfort, Kentucky of an adjustment of electric rates and charges proposed to become effective on and after August 1, 2012, subject to the "Stay-Out" Commitment in Article I.1.1 of the Settlement Agreement approved in September 30, 2010 Public Service Commission Order in Case No. 2010-00204, under which the change in rates may be filed with the Public Service Commission during 2012, but not take effect before January 1, 2013.

KU CURRENT AND PROPOSED ELECTRIC RATES

Residential Service - Rate RS

	Current	Proposed
Basic Service Charge per Month:	$8.50	$13.00
Energy Charge per kWh:	$0.06987	$0.07235

Volunteer Fire Department Service - Rate VFD

	Current	Proposed
Basic Service Charge per Month:	$8.50	$13.00
Energy Charge per kWh:	$0.06987	$0.07235

General Service - Rate GS

	Current	Proposed
Basic Service Charge per Meter Per Month:		
Single-Phase	$17.50	$20.00
Three-Phase	$32.50	$35.00
Energy Charge per kWh:	$0.08332	$0.08678

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads. Also clarifies that a customer taking service under this rate schedule who ceases to take service hereunder must meet eligibility requirements of new customer to again take service under this rate schedule.

Determination of Maximum Load: New provision states how maximum load will be measured.

All Electric School - Rate AES

	Current	Proposed
Basic Service Charge per Meter Per Month:		
Single-Phase	$17.50	$20.00
Three-Phase	$32.50	$35.00
Energy Charge per kwh:	$0.06670	$0.07060

Availability of Service: Text change clarifies that customer taking service under this rate schedule who later ceases to take such service may not again take service under this rate schedule because it is closed.

Power Service – Rate PS

Secondary Service	Current	Proposed
Basic Service Charge (per Month)	$90.00	$90.00
Energy Charge (per kWh)	$ 0.03300	$ 0.03349
Demand Charge (per kW per month of billing demand)		
Summer Rate (May through September)	$13.90	$14.40
Winter Rate (All Other Months)	$11.65	$12.10

Primary Service	Current	Proposed
Basic Service Charge (per Month)	$90.00	$125.00
Energy Charge (per kWh)	$ 0.03300	$ 0.03349
Demand Charge (per kW per month of billing demand)		
Summer Rate (May through September)	$13.72	$ 14.75
Winter Rate (All Other Months)	$11.45	$ 12.73

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads. Also clarifies that a customer taking service under this rate schedule who ceases to take service hereunder must meet eligibility requirements of new customer to again take service under this rate schedule.

Time-of-Day Secondary Service Rate TODS

	Current	Proposed
Basic Service Charge (per Month)	$200.00	$200.00
Energy Charge (per kWh)	$ 0.03490	$ 0.03590
Maximum Load Charge (per kW per month)		
Peak Demand Period	$ 3.89	$ 4.50
Intermediate Demand Period	$ 2.43	$ 2.80
Base Demand Period	$ 3.05	$ 3.50

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads.

Time-of-Day Primary Service Rate TODP

	Current	Proposed
Basic Service Charge (per Month)	$300.00	$300.00
Energy Charge (per kWh)	$ 0.03522	$ 0.03557
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 3.67	$ 4.30
Intermediate Demand Period	$ 2.31	$ 2.70
Base Demand Period	$ 1.28	$ 1.60

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads.

Retail Transmission Service Rate RTS

	Current	Proposed

Basic Service Charge (per Month)	$500.00	$750.00
Energy Charge (per kWh)	$ 0.03414	$ 0.03408
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 3.54	$ 3.90
Intermediate Demand Period	$ 2.30	$ 2.90
Base Demand Period	$ 0.85	$ 1.30

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads.

Fluctuating Load Service – Rate FLS

Primary Service	**Current**	**Proposed**
Basic Service Charge (per Month)	$500.00	$750.00
Energy Charge (per kWh)	$ 0.03419	$ 0.03419
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 2.30	$ 2.40
Intermediate Demand Period	$ 1.41	$ 1.44
Base Demand Period	$ 1.57	$ 1.75

Transmission Service	**Current**	**Proposed**
Basic Service Charge (per Month)	$500.00	$750.00
Energy Charge (per kWh)	$ 0.02947	$ 0.03092
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 2.30	$ 2.40
Intermediate Demand Period	$ 1.41	$ 1.44
Base Demand Period	$ 0.82	$ 1.00

Current:

Where:

1) the monthly billing demand for the Primary Peak and Intermediate Demand Periods is the greater of:
   a) the maximum measured load in the current billing period, or
   b) a minimum of 60% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

   the monthly billing demand for the Primary Base Demand Period is the greater of:
   a) the maximum measured load in the current billing period but not less than 20,000 kVA, or
   b) a minimum of 75% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
   c) a minimum of 75% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.
2) the monthly billing demand for the Transmission Peak and Intermediate Demand Periods is the greater of:
   a) the maximum measured load in the current billing period, or
   b) a minimum of 40% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

   the monthly billing demand for the Transmission Base Demand Period is the greater of:
   a) the maximum measured load in the current billing period but not less than 20,000 kVA, or

b) a minimum of 40% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
c) a minimum of 40% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

Proposed:
Where:
the monthly billing demand for the Peak and Intermediate Demand Periods is the greater of:
a) the maximum measured load in the current billing period, or
b) a minimum of 50% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

the monthly billing demand for the Base Demand Period is the greater of:
a) the maximum measured load in the current billing period but not less than 20,000 kVA, or
b) a minimum of 75% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
c) a minimum of 75% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

Street Lighting Service - Rate ST. LT.
and
Private Outdoor Lighting - Rate P. O. LT.

Street Lighting Service (Rate ST.LT. – Sheet No. 35) and Private Outdoor Lighting Service (Rate P.O.LT. – Sheet No. 36) are being reorganized into two rate schedules. The first schedule will be named Lighting Services (Rate LS) and will be a consolidation of lighting fixtures currently offered. The second schedule will be named Restricted Lighting Service (Rate RLS) and will be a consolidation of lighting fixtures that are in service but no longer available for new or replacement installations. The current and proposed rates are presented below based on the lights to be included in Rate LS and Rate RLS. The lights proposed to be contained in the specific schedule are shown in **bold** type with the current light and rate sheet shown below the proposed light.

Proposed Lighting Service Rate LS

Lighting Energy Service Rate LE

	Current	Proposed
Energy Charge per kWh:	$0.05647	$0.05958

Traffic Energy Service Rate TE

	Current	Proposed
Basic Service Charge per Month:	$3.14	$3.25
Energy Charge per kWh:	$0.07182	$0.07614

Dark Sky Friendly Rate DSK

Current Rate

DSK Lantern	4,000	.050	$21.31
DSK Lantern	9,500	.100	$22.22

Proposed Rate

This rate schedule is proposed to be included in Lighting Service Rate LS.

Cable Television Attachment Charges – Rate CTAC

	Current	Proposed
Attachment Charge per year for each attachment to pole:	$5.40	$10.01

Curtailable Service Rider 10 – Rider CSR10

	Current (per kW)	Proposed (Per kVA)
Monthly Demand Credit:		
Primary	($5.50)	($2.80)
Transmission	($5.40)	($2.75)
Non-Compliance Charge:	$16.00	$16.00

Proposed Contract Option: Removes restriction that KU may only use physical curtailment during system reliability events. Also changes contract options' demand from a 15-minute demand basis to the one the customer's standard rate schedule uses.

Curtailable Service Rider 30 – Rider CSR30

	Current (per kW)	Proposed (Per kVA)
Monthly Demand Credit per kW:		
Primary	($4.40)	($2.30)
Transmission	($4.30)	($2.25)
Non-Compliance Charge per kW:	$16.00	$16.00

Proposed Contract Option: Removes restriction that KU may only use physical curtailment during system reliability events. Also changes contract options' demand from a 15-minute demand basis to the one the customer's standard rate schedule uses.

Load Reduction Incentive Rider – Rider LRI

Current Rate Up to $0.30 per kWh

Proposed Rate This rate schedule is proposed to be eliminated.

Standard Rider for Excess Facilities – Rider EF

Current Rate

Customer shall pay for excess facilities by:

Monthly Charge for Leased Facilities:	1.54%
Monthly Charge for Facilities Supported By a One-Time CIAC Payment:	0.74%

Proposed Rate

No adjustment in the monthly charge for a replacement of facilities will be made during the initial five (5) year term of contract.

Customer shall pay for excess facilities by:

(a) Making a monthly Excess Facilities charge payment equal to the installed cost of the excess facilities times the following percentage:

Percentage with No Contribution-in-Aid-of-Construction	1.28%

(b) Making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the excess facilities plus a monthly Excess Facilities Charge payment equal to the installed cost of the excess facilities times the following percentage:

Percentage with Contribution-in-Aid-of-Construction	0.49%

Standard Rider for Redundant Capacity Charge – Rider RC

	Current (per kW)	Proposed (Per kVA)
Capacity Reservation Charge per Month:		
Secondary Distribution	$0.85	$1.55
Primary Distribution	$0.68	$0.99

Standard Rider for Supplemental or Standby Service – Rider SS

	Current (per kW)	Proposed (Per kVA)
Contract Demand per month:		
Secondary	$6.54	$12.91
Primary	$6.17	$12.35
Transmission	$5.99	$11.17

Availability of Service: Text addition clarifies that KU has no obligation to supply non-firm service to a customer-generator unless the customer seeks supplemental or standby service under Rider SS. This requirement does not apply to Net Metering Service (Rider NMS).

Temporary and/or Seasonal Electric Service Rider TS

Availability of Service: Text change clarifies that service is available when it is not necessary for KU to install permanent facilities.

Conditions: Customer will pay for non-salvageable materials plus a monthly charge for the salvageable equipment at the Percentage With No Contribution in-Aid-of-Construction specified on the Excess Facilities Rider.

Real-Time Pricing Rider RTP

Current Rate: Billing under this Rider is formulaic.

Proposed Rate: This rate schedule is proposed to be eliminated.

Standard Rate for Low Emission Vehicle Service – Rate LEV

	Current	Proposed

Basic Service Charge per Month:	$8.50	$13.00
Energy Charge per kWh:		
Off-Peak Hours	$0.04904	$ 0.05078
Intermediate Hours	$0.07005	$ 0.07254
Peak Hours	$0.13315	$ 0.13788

Availability of Service: Clarifies that rate is available to customers eligible for Rate RS or GS where the GS service is used in conjunction with an RS service to provide service to a detached garage and energy usage is no more than 300 kWh per month.

Meter Test Charge

Current Rate $60.00
Proposed Rate $75.00

Disconnecting and Reconnecting Service Charge

Current Rate $25.00
Proposed Rate $28.00

Meter Pulse Charge

Current Rate:
$9.00 per month per installed set of pulse-generating equipment
Proposed Rate:
$15.00 per month per installed set of pulse-generating equipment

Customer Deposits

KU is proposing no change to the required Customer Deposit for residential electric customers served under Residential Rate RS from the current amount of $135.00 (0% increase), and the required Customer Deposit for general service customers served under General Service Rate GS from the current amount of $220.00 (0% increase). Text change states when Rate GS deposit may be waived in conjunction with taking service under Rate RS.

Kentucky Utilities Company proposes to change the text of the following electric tariffs: General Service Rate GS, All Electric School Rate AES, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, Retail Transmission Service Rate RTS, Fluctuating Load Service Rate FLS, Street Lighting Service Rate ST. LT, Private Outdoor Lighting Rate P.O.LT, Cable Television Attachment Charges Rate CTAC, Curtailable Service Rider CSR10, Curtailable Service Rider CSR30, Excess Facilities Rider EF, Redundant Capacity Rider RC, Supplemental/Standby Service Rider SS, Rider IL for Intermittent Loads, Temporary/Seasonal Service Rider TS, Large Green Energy Rider LGE, Low Emission Vehicle Service Rate LEV, Fuel Adjustment Clause FAC, Demand Side Management Cost Recovery Mechanism DSM, Environmental Cost Recovery Surcharge ECR, and the Terms and Conditions.

Changes to the Terms and Conditions include proposed clarifications on terms and conditions for determining customer rate assignments, as well as when standby or supplemental service must be purchased if customer desires non-firm service.

Although KU is not proposing to change the text of its Fuel Adjustment Clause ("FAC"), other than the correction of a minor typographical error in Paragraph (3), it is proposing to recover certain costs through the FAC to ensure that the correct amounts are collected through base rates and the FAC.

Complete copies of the proposed tariffs containing text changes and proposed rates may be obtained by contacting Lonnie E. Bellar, Kentucky Utilities Company at 220 West Main Street, Louisville, Kentucky, 502-627-4830, or visiting Kentucky Utilities Company's website at www.lge-ku.com.

The foregoing rates reflect a proposed annual increase in revenues of approximately 6.5% to Kentucky Utilities Company.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class is as follows:

Electric Rate Class	Annual $ Increase	Annual % Increase	Mthly Bill $ Increase	Mthly Bill % Increase
Residential	$37,381,886	8.03%	$ 7.41	8.03%
General Service	$ 9,061,201	4.97%	$ 9.20	4.97%
All Electric School	$ 635,467	5.81%	$ 82.81	5.81%
Power Service	$ 6,849,989	2.53%	$ 96.29	2.53%
TODS (Secondary)	$ 1,907,198	6.59%	$ 1,160.80	6.59%
TODP (Primary)	$12,380,611	6.62%	$ 6,159.51	6.62%
Retail Transmission	$ 5,128,398	6.50%	$ 11,982.24	6.50%
Fluctuating Load	$ 1,417,956	6.25%	$118,163.01	6.25%
Outdoor Lights	$ 1,267,776	5.41%	$ 0.62	5.41%
Lighting Energy	$ 124	5.42%	$ 11.27	5.42%
Traffic Energy	$ 6,388	5.40%	$ 0.79	5.40%
CTAC	$ 681,722	85.37%	N/A	N/A

The rates contained in this notice are the rates proposed by Kentucky Utilities Company; however, the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice.

Notice is further given that any corporation, association, body politic or person with a substantial interest in the matter may by written request, within thirty (30) days after publication of the notice of the proposed rate changes, request to intervene. The motion shall be submitted to the Public Service Commission, 211 Sower Boulevard, P. O. Box 615, Frankfort, Kentucky 40601, and shall set forth the grounds for the request, including the status and interest of the party. Intervention may be granted beyond the thirty (30) day period for good cause shown. Any person who has been granted intervention may obtain copies of the application and any other filing made by the utility by contacting Lonnie E. Bellar, Vice President – State Regulation and Rates, Kentucky Utilities Company, c/o LG&E and KU Energy LLC, 220 West Main Street, Louisville, Kentucky, 502-627-4830.

A copy of the application and testimony shall be available for public inspection at the office of Kentucky Utilities Company, 100 Quality Street, Lexington, Kentucky, or the Public Service Commission, 211 Sower Boulevard, Frankfort, Kentucky.

A copy of this Notice and the proposed tariff, once filed, shall also be available for public inspection on Kentucky Utilities Company's website at www.lge-ku.com.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(2)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Notice of Intent. Utilities with gross annual revenues greater than $1,000,000 shall file with the commission a written notice of intent to file a rate application at least four (4) weeks prior to filing their application. The notice of intent will state whether the rate application shall be supported by a historical test period or a fully forecasted test period. This notice shall be served upon the Attorney General, Utility Intervention and Rate Division.

Response:

See attached.

PUBLIC SERVICE
COMMISSION

June 1, 2012

RE: ***Application of Kentucky Utilities Company for an Adjustment of Its Electric Rates*** **– Case No. 2012-00______**

Dear Mr. DeRouen:

Please take notice that Kentucky Utilities Company ("KU") intends to file on or after June 29, 2012, a rate application for a general adjustment in its electric rates, including changes to its electric tariffs. The application will be supported by a historic test year ending March 31, 2012.

KU has contemporaneously filed a Request to Use Electronic Case Filing. Please assign this matter a case number and style and advise us of same so that it can be incorporated in the application and supporting testimony before filing with the Commission.

Sincerely,

Lonnie E. Bellar

cc: Dennis G. Howard II
Michael L. Kurtz

Description of Filing Requirement:

Form of notice to customers. Every utility filing an application pursuant to this section shall notify all affected customers in the manner prescribed herein. The notice shall include the following information:

(a) The amount of the change requested in both dollar amounts and percentage change for each customer classification to which the proposed rate change will apply;

(b) The present rates and the proposed rates for each customer class to which the proposed rates would apply;

(c) Electric, gas, water and sewer utilities shall include the effect upon the average bill for each customer class to which the proposed rate change will apply;

(d) Local exchange companies shall include the effect upon the average bill for each customer class for the proposed rate change in basic local service;

(e) A statement that the rates contained in this notice are the rates proposed by (name of utility); however, the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice;

(f) A statement that any corporation, association, or person with a substantial interest in the matter may, by written request, within thirty (30) days after publication or mailing of this notice of the proposed rate changes request to intervene; intervention may be granted beyond the thirty (30) day period for good cause shown;

(g) A statement that any person who has been granted intervention by the commission may obtain copies of the rate application and any other filings made by the utility by contacting the utility through a name and address and phone number stated in this notice;

(h) A statement that any person may examine the rate application and any other filings made by the utility at the main office of the utility or at the commission's office indicating the addresses and telephone numbers of both the utility and the commission; and

Description of Filing Requirement (continued):

(i) The commission may grant a utility with annual gross revenues greater than $1,000,000, upon written request, permission to use an abbreviated form of published notice of the proposed rates provided the notice includes a coupon which may be used to obtain all of the information required herein.

Response:

Please refer to the Certificate of Notice provided in Filing Requirement 807 KAR 5:001 Section 10(1)(a)9, [Tab No. 9].

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(4)(a)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Manner of notification. Sewer utilities shall give the required typewritten notice by mail to all of their customers pursuant to KRS 278.185.

Response:

Not applicable to KU's Application.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(4)(b)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Manner of notification. Applicants with twenty (20) or fewer customers affected by the proposed general rate adjustment shall mail the required typewritten notice to each customer no later than the date the application is filed with the commission.

Response:

Not applicable to KU's Application.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(4)(c)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Manner of notification. Except for sewer utilities, applicants with more than twenty (20) customers affected by the proposed general rate adjustment shall give the required notice by one (1) of the following methods:

1. *A typewritten notice mailed to all customers no later than the date the application is filed with the commission;*

2. *Publishing the notice in a trade publication or newsletter which is mailed to all customers no later than the date on which the application is filed with the commission; or*

3. *Publishing the notice once a week for three (3) consecutive weeks in a prominent manner in a newspaper of general circulation in the utility's service area, the first publication to be made within seven (7) days of the filing of the application with the commission.*

Response:

KU has complied with 807 KAR 5:001, Section 10(4)(c) by delivering to the Kentucky Press Association, an agency that acts on behalf of newspapers of general circulation throughout the Commonwealth of Kentucky in which customers affected reside, for publication in such newspapers once a week for three consecutive weeks in a prominent manner, a copy of the notice is attached to the Certificate of Notice provided in Filing Requirement 807 KAR 5:001 Section 10(1)(a)9, [Tab No. 9]; the first of said publications to be made within seven (7) days of the filing of the application, as set forth in the Certificate of Notice provided in Filing Requirement 807 KAR 5:001 Section 10(1)(a)9, [Tab No. 9].

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(4)(d)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Manner of notification. If the notice is published, an affidavit from the publisher verifying the notice was published, including the dates of the publication with an attached copy of the published notice, shall be filed with the commission no later than forty-five (45) days of the filed date of the application.

Response:

KU will comply with 807 KAR 5:011, Section 10(4)(d) by providing the affidavits within forty-five (45) days of the date on which KU filed its application.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(4)(e)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Manner of notification. If the notice is mailed, a written statement signed by the utility's chief officer in charge of Kentucky operations verifying the notice was mailed shall be filed with the commission no later than thirty (30) days of the filed date of the application.

Response:

Not applicable to KU’s Application.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(4)(f)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

Manner of notification. All utilities, in addition to the above notification, shall post a sample copy of the required notification at their place of business no later than the date on which the application is filed which shall remain posted until the commission has finally determined the utility's rates.

Response:

KU has complied with 807 KAR 5:001, Section 10(4)(f) by posting its Notice, attached to the Certificate of Notice provided in Filing Requirement 807 KAR 5:001 Section 10(1)(a)9, [Tab No. 9], at its places of business on June 29, 2012, and said Notice will remain posted until the Commission has finally determined the utility’s rates, as set forth in the Certificate of Notice provided in Filing Requirement 807 KAR 5:001 Section 10(1)(a)9, [Tab No. 9].

Kentucky Utilities Company
Case No. 2012-00221

Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

All applications supported by a historical test period shall include the following information or a statement explaining why the required information does not exist and is not applicable to the utility's application: (a) A complete description and quantified explanation for all proposed adjustments, with proper support for any proposed changes in price or activity levels, and any other factors which may affect the adjustment.

Response:

Please refer to the testimonies and exhibits of Kent W. Blake, Valerie L. Scott, Shannon L. Charnas, John J. Spanos, Daniel K. Arbough, William E. Avera, Lonnie E. Bellar, and Robert M. Conroy.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(b)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

If the utility has gross annual revenues greater than $1,000,000, the prepared testimony of each witness the utility proposes to use to support its application.

Response:

Please refer to the testimonies and exhibits of the following persons:

- Victor S. Staffieri
- Paul W. Thompson
- Chris Hermann
- Kent W. Blake
- Valerie L. Scott
- Shannon L. Charnas
- John J. Spanos
- Daniel K. Arbough
- William E. Avera
- Lonnie E. Bellar
- Robert M. Conroy

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(c)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

If the utility has gross annual revenues less than $1,000,000, the prepared testimony of each witness the utility proposes to use to support its application or a statement that the utility does not plan to submit any prepared testimony.

Response:

Not applicable to KU's Application.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(d)
Sponsoring Witness: Robert M. Conroy

Description of Filing Requirement:

A statement estimating the effect that the new rates will have upon the revenues of the utility including, at minimum, the total amount of revenues resulting from the increase or decrease and the percentage of the increase or decrease.

Response:

The proposed rates (including miscellaneous charges) will increase KU's annual electric revenues approximately $82,432,892 or 6.5%.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(e)
Sponsoring Witness: Robert M. Conroy

Description of Filing Requirement:

If the utility provides electric, gas, water, or sewer service the effect upon the average bill for each customer classification to which the proposed rate change will apply.

Response:

The average monthly bill, for each customer rate class to which the proposed rate change applies, will increase as follows:

Electric Rate Class	Annual $ Increase	Annual % Increase	Mthly Bill $ Increase	Mthly Bill % Increase
Residential	$37,381,886	8.03%	$ 7.41	8.03%
General Service	$ 9,061,201	4.97%	$ 9.20	4.97%
All Electric School	$ 635,467	5.81%	$ 82.81	5.81%
Power Service	$ 6,849,989	2.53%	$ 96.29	2.53%
TODS (Secondary)	$ 1,907,198	6.59%	$ 1,160.80	6.59%
TODP (Primary)	$12,380,611	6.62%	$ 6,159.51	6.62%
Retail Transmission	$ 5,128,398	6.50%	$ 11,982.24	6.50%
Fluctuating Load	$ 1,417,956	6.25%	$118,163.01	6.25%
Outdoor Lights	$ 1,267,776	5.41%	$ 0.62	5.41%
Lighting Energy	$ 124	5.42%	$ 11.27	5.42%
Traffic Energy	$ 6,388	5.40%	$ 0.79	5.40%
CTAC	$ 681,722	85.37%	N/A	N/A

Filing Requirement
807 KAR 5:001 Section 10(6)(f)
Sponsoring Witness: Lonnie E. Bellar

Description of Filing Requirement:

If the utility is a local exchange company, the effect upon the average bill for each customer class for the proposed rate change in basic local service.

Response:

Not applicable to KU's Application.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(g)
Sponsoring Witness: Robert M. Conroy

Description of Filing Requirement:

An analysis of customers' bills in such detail that revenues from the present and proposed rates can be readily determined for each customer class.

Response:

Please refer to the testimony and exhibits of Robert M. Conroy.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(h)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

A summary of the utility's determination of its revenue requirements based on return on net investment rate base, return on capitalization, interest coverage, debt service coverage, or operating ratio, with supporting schedules.

Response:

See attached. Supporting Schedules are filed as part of the Filing Requirement pursuant to 807 KAR Section 10(7)(a) [Tab No. 42] and Kent W. Blake Exhibit 8.

Kentucky Utilities Company

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(k)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

The independent auditor's annual opinion report, with any written communication from the independent auditor to the utility which indicates the existence of a material weakness in the utility's internal controls.

Response:

KU has not received any written communication from its auditor that there are any material weaknesses in KU's internal controls.

See attached.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Sole Stockholder of Kentucky Utilities Company

We have audited the accompanying balance sheet of Kentucky Utilities Company as of December 31, 2011, and the related statements of income, comprehensive income, cash flows, and equity for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Kentucky Utilities Company at December 31, 2011 and the results of its operations and its cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(l)
Sponsoring Witness: Valerie L. Scott

Description of Filing Requirement:

The most recent Federal Energy Regulatory Commission or Federal Communication Commission audit reports.

Response:

The most recent Federal Energy Regulatory Commission ("FERC") audit report relating to KU's electric business is attached. The FERC is currently performing a periodic audit of (a) certain FERC accounting, affiliate transactions, reporting, records retention and associated areas and (b) certain FERC transmission formula rates relating to KU and affiliated companies for the period January 1, 2010 through December 31, 2011. Such audit may be completed in late 2012 or during 2013. The Federal Communications Commission has not conducted an audit of KU, and, therefore, no such audit reports exist.

July 17, 2006

Michael S. Beer
Vice President, Federal Regulation and Policy
LG&E Energy Services, Inc.
220 West Main Street
Louisville, KY 40202

Dear Mr. Beer:

1. The Division of Audits within the Office of Enforcement (OE) has completed the audit of LG&E Energy LLC (LG&E) for the period from January 1, 2003 to December 31, 2005. The enclosed audit report explains our audit findings and recommendations.

2. On June 29, 2006, you notified us that LG&E agreed with our audit findings and recommendations. I hereby approve and direct the recommended corrective actions. A copy of your response is included as an Appendix to this audit report.

3. LG&E should file an implementation plan within 30 days of the date of this letter order and submit quarterly filings describing LG&E's progress completing each corrective action, including dates it has completed each corrective action. The filings should be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all the corrective actions are completed.

4. The Commission delegated the authority to act on this matter to the Director of OE under 18 C.F.R. § 375.314 (2006). This letter order constitutes final agency action. Your Company may file a request for rehearing with the Commission within 30 days of the date of this order under 18 C.F.R. § 385.713 (2006).

5. This letter order is without prejudice to the Commission's right to require hereafter any adjustments it may consider proper from additional information that may come to its attention.

6. I appreciate the courtesies extended to the auditors. If you have any questions, please contact Mr. Bryan K. Craig, Director, Division of Audits at (202) 502-8741.

Sincerely,

Susan Court

Susan J. Court
Director
Office of Enforcement

Enclosure

FEDERAL ENERGY REGULATORY COMMISSION

Audit Period: January 1, 2003 through December 31, 2005

Audit of Code of Conduct, Standards of Conduct, Market-Based Rate Tariff, and MISO's Open Access Transmission Tariff at LG&E Energy LLC

Audit Report

OFFICE OF ENFORCEMENT
DIVISION OF AUDITS

Docket No. PA05-9-000 **Date: July 17, 2006**

TABLE OF CONTENTS

I. EXECUTIVE SUMMARY

A. Overview

The Office of Enforcement (OE)[1] has completed an audit of the operations of LG&E Energy LLC (LG&E).[2] For purposes of the audit, the relevant parts of LG&E's corporate structure included:

- The two utilities (Louisville Gas & Electric Company and Kentucky Utilities Company), each of which operates a system control center,
- LG&E's service company (LG&E Energy Services, Inc.), and
- LG&E's Marketing and Energy Affiliates, including LG&E's wholesale merchant function (WMF) and its affiliated power marketers [3]; LG&E's principal affiliated power marketer during the audit period was LG&E Energy Marketing, Inc. (LEM).

The audit covered the period from January 1, 2003 through December 31, 2005, and focused on LG&E's compliance with:

- LG&E's Code of Conduct, which requires the physical, operational, and functional separation of LG&E's WMF and its affiliated power marketers,
- The Commission's Standards of Conduct under Order No. 2004 and 18 C.F.R. Part 358 (2005), which requires the transmission function to operate independently from LG&E's energy marketing operations,
- LG&E's market-based rate tariff, and

---

[1] On April 16, 2006, the Office of Market Oversight and Investigations changed its name to the Office of Enforcement.

[2] On December 1, 2005, LG&E Energy LLC announced it changed its name to E.ON US.

[3] *LG&E Power Mktg., Inc.*, 68 FERC ¶ 61,247 (1994); *modified on other grounds*, 69 FERC ¶ 61,153 (1994). LG&E Power Mktg.'s name was changed to LG&E Energy Marketing Inc. (LEM). *See* Notice of Name Change, Docket No. ER97-3418-000 (filed June 24, 1997).

- Midwest ISO (MISO) Open Access Transmission Tariff (OATT) §28.6 Restrictions on Use of Service; §30.1 Designation of Network Resources; §30.4 Operation of Network Resources; and §30.7 Limitation on Designation of Network Resources.

B. Summary of Compliance Findings

Our audit findings are based on materials provided by LG&E in response to data requests, interviews with LG&E staff members, site visits, and a review of publicly available documents. LG&E has been very cooperative throughout the audit.

Based on our examination of the Code of Conduct, Standards of Conduct, Market-Based Rate Tariff, and MISO's OATT at LG&E, we identified nine areas of non-compliance.

<u>Code of Conduct Compliance</u>

- *Functional, Physical, and Operational Separation of LG&E's WMF and Affiliated Power Marketer*: LG&E's WMF and its principal affiliated power marketer (LEM) were not functionally, physically, and operationally separate to the maximum extent practical, as required by LG&E's Code of Conduct. Both WMF and LEM functionally reported to the same company officer and LEM shared physical facilities with WMF traders and with mid-office and back-office functions for the WMF. WMF and LEM operationally shared a telephone recording system to capture trading and dispatch conversations.

- *Sharing of Market Information*: LG&E's WMF shared market information with its principal affiliated power marketer (LEM) through presentations at joint staff meetings, in violation of LG&E's Code of Conduct. Also, the password access controls to the shared Energy Management System (EMS) were inconsistent with LG&E's password security policy.

- *Posting of Information on Sales to Affiliates at Market-Based Rates*: LG&E was required to post on an electronic bulletin board (EBB) information on energy sales at market-based rates from its WMF to its affiliated power marketer (LEM). LG&E's Code of Conduct required the price of such sales to be no lower than the rate charged to non-affiliates, and required simultaneous postings on an EBB of WMF's offers to sell to LEM and WMF's actual sales to LEM. Our review of LG&E's archived EBB postings disclosed that LG&E's EBB was not accessible to non-affiliated market participants for a period of time, and the information that LG&E posted on the EBB was not consistent with the requirements in LG&E's Code of Conduct.

Docket No. PA05-9-000

Standards of Conduct Compliance

- *Disclosures of Transmission and Customer Information*: LG&E transmission employees improperly disclosed non-public transmission and customer information to employees of its WMF that was not contemporaneously available to the public, and failed to post in a timely manner the information disclosure on OASIS: (1) on at least three occasions, LG&E transmission employees disclosed real-time transmission system status information to LG&E Energy and Marketing affiliate employees during telephone calls concerning generation re-dispatch; (2) on at least one occasion, LG&E made transmission expansion planning information available to marketing employees; and (3) on a monthly basis through February 2005, a transmission employee sent e-mails to a marketing employee containing load data of third-party customers.

- *Standards of Conduct Training*: The scope of LG&E's Standards of Conduct training program was inconsistent with Commission regulations and with LG&E's training implementation plans. More than one year after the effective date of Order No. 2004, LG&E had failed to provide Standards of Conduct training for several hundred of the employees LG&E was required to train.

- *Controls Used to Limit Access to System Control Centers*: LG&E did not follow its posted implementation procedures to control and track access by the employees of its Marketing and Energy Affiliates to LG&E's two system control centers, including the requirement that LG&E marketing employees obtain permission from the Chief Compliance Officer (CCO) before visiting the system control centers.

- *Organizational Charts*: The organizational chart postings failed to include or accurately show: detailed organizational charts for business units engaged in the sales function; the position of LG&E's Marketing and Energy Affiliates within the corporate structure; and all of the business units that are part of LG&E's service company.

- *Shared Facilities*: LG&E did not post a list of the facilities shared by the Transmission Provider and LG&E's Marketing and Energy Affiliates as required by 18 C.F.R. § 358.4(b)(2) (2005).

Market-Based Rate Tariff Compliance

- *Electric Quarterly Report Inaccuracies*: LG&E's Electric Quarterly Report (EQR) filing for the first quarter of 2005 contained inaccurate information. LG&E inaccurately reported several sales transactions from its WMF to its affiliated power marketer (LEM) and reported invalid Data Universal Numbering System (DUNS) numbers for several other customers.

C. Summary of Recommendations

Detailed recommendations are included in Sections III, IV, and V of this Audit Report that describe the compliance findings. Following is a brief summary of those recommendations. We recommend that LG&E:

- Implement its planned actions to ensure that WMF and LEM employees are functionally, physically, and operationally separate to the maximum extent practical.

- Create and implement policies and procedures to ensure that there is no exchange of market information inconsistent with LG&E's Code of Conduct, and to conduct an independent review after implementation of a new EMS system to ensure that market information (and transmission information) is not accessible to employees who should not have access to such information.

- Develop written policies and procedures regarding the use of its EBB, and develop a plan for making the EBB more accessible to non-affiliated market participants.

- Post OASIS notices for all identified disclosures of non-public transmission information. Specific recommendations include creating controls to prevent disclosure of non-public transmission and customer information as part of transmission operations, during meetings attended by transmission and marketing employees, and through e-mail exchanges of information.

- Strengthen the implementation of its training program, specifically, to develop written policies and procedures to ensure that new employees receive training, and conduct periodic reviews to ensure that all of the employees that require training are scheduled for, receive training, and are certified.

- Review and strengthen its system control center access procedures to ensure that LG&E marketing employees do not have access that differs in any way from the access available to other transmission customers.

- Revise its posted organizational charts to show the business units engaged in sales functions, the position of all Marketing and Energy Affiliates within its corporate structure, and sufficient detail to indicate that LG&E's service company is the employment mechanism for the Marketing and Energy Affiliates and the Transmission Provider.

- Revise its shared facilities postings to identify all facilities that LG&E's Marketing and Energy Affiliates share with service employees who have access to non-public transmission or customer information.

- Strengthen its written procedures to ensure that EQR filings are in compliance with Commission regulations, and to refile inaccurate EQR data identified in this Audit Report.

D. Actions Already Taken by LG&E

LG&E has already taken a number of corrective actions in response to our compliance findings to come into compliance with the Standards of Conduct and LG&E's Code of Conduct. These actions are enumerated in detail in Sections III, IV, and V of this Audit Report that describe the compliance findings.

As part of the audit scope, audit staff examined LG&E's use of network integration transmission service (NITS) for the audit period prior to April 1, 2005, the beginning of the MISO Day 2 market. After working with audit staff to perform the review of LG&E's use of NITS, LG&E committed to enhancing its "Before the Purchase System" (BPS) by creating detailed control processes to ensure its compliance with the OATT and the proper use of NITS. LG&E's BPS is a software product that determines when a bi-lateral power purchase can be reasonably expected to serve native load and can be imported using network integration transmission service. LG&E's BPS system provides traders a systematic process for determining if a purchase should be imported using NITS before purchases are made and scheduled. The BPS helps ensure LG&E's compliance with the Commission's approved uses for NITS.

E. Implementation Plan

We recommended that LG&E submit an implementation plan to the audit staff for our approval detailing LG&E's plans to comply fully with the findings and recommendations in this Audit Report. The implementation plan should describe the actions LG&E has already taken, and will take, that are consistent with and complementary to any future structural and organizational changes that LG&E may undertake.

The implementation plan should be submitted within 30 days of issuance of a Final Audit Report in this docket. In addition, LG&E shall make quarterly filings updating the audit staff of its progress on implementing the plan. The filings shall be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all the corrective actions are completed.

II. INTRODUCTION

A. Objectives

The overall audit objectives were to determine compliance with:

- LG&E's Code of Conduct, which requires the physical, operational, and functional separation of the utilities' WMF and its affiliated power marketers.

- The Commission's Standards of Conduct under Order No. 2004 (and prior to September 22, 2004, under Order No. 889[4]), which requires a Transmission Provider's employees engaged in transmission system operations to function independently from employees of its Marketing and Energy Affiliates.[5] Standards of Conduct compliance was also evaluated against LG&E's own implementation procedures.[6]

Circuit Docket Nos. 04-1178, et al.)

[6] "Joint Written Procedures Implementing Standards of Conduct for Transmission Providers as Adopted by the Federal Energy Regulatory Commission in Order No. 2004, Effective September 22, 2004" (hereinafter referred to as LG&E's posted implementation procedures). We found this document on April 5, 2005, posted on http://lgeenergy.com/regulatory/lgeku_compliance_procedures.pdf.

- LG&E's market-based rate tariff.[7]

- The provisions of the MISO OATT.[8]

For purposes of evaluating compliance with the Standards of Conduct, this audit focuses primarily on the period from September 22, 2004, the effective date of Order No. 2004, to December 31, 2005. For purposes of evaluating compliance with Code of Conduct, market-based rate tariff and MISO's OATT requirements, this audit focuses primarily on the period from January 1, 2003 to December 31, 2005.

B. Scope and Methodology

The OE has completed an audit of the operations of LG&E. As part of the audit, OE conducted selective tests on data to determine LG&E's compliance with the Standards of Conduct, Code of Conduct, market-based rate tariff, and MISO's OATT requirements. Selective tests included those necessary to verify the accuracy of required informational postings on LG&E's OASIS, the effectiveness of written procedures and internal controls related to the Standards of Conduct, and compliance with all the provisions of the Standards of Conduct, LG&E's Code of Conduct, LG&E's market-based rate tariff, and the MISO OATT.

Additionally, we reviewed physical and electronic security over transmission operations and information. We discussed with LG&E personnel matters related to the corporate structure, Energy and Marketing Affiliates, local and wide area networks, shared functions, and the Standards of Conduct training received. We reviewed e-mail records and recorded conversations between LG&E's transmission operations and its Energy and Marketing Affiliates.

III. CODE OF CONDUCT FINDINGS AND RECOMMENDATIONS

1. Functional, Physical and Operational Separation of LG&E's WMF and Affiliated Power Marketer

LG&E's WMF and its principal affiliated power marketer (LEM) were not functionally, physically and operationally separate to the maximum extent practical, as required by LG&E's Code of Conduct. The WMF and LEM were functionally within the same LG&E business unit, and reported to the same company officer; the WMF and LEM shared physical facilities without strong controls to prevent information sharing; and the WMF and LEM shared a telephone recording system that provided LEM employees access to operational information such as WMF trading activities.

Pertinent Guidance

Section 3 of LG&E's Code of Conduct states that "(t)o the maximum extent practical, employees of the Utilities [*i.e.*, LG&E's WMF] who operate the Utilities' systems or engage in power purchasing or selling on behalf of the Utilities will be physically, operationally, and functionally separate from employees of the Marketers performing power marketing activities."[9]

Discussion

Collectively, the lack of functional, physical, and operational separation between WMF and LEM precluded LG&E from operating these entities as separate business units to the maximum extent practical as required in Section 3 of LG&E's Code of Conduct.

Functional Separation Between WMF and LEM

LG&E's WMF and its primary affiliated power marketer (LEM) were not functionally separate to the maximum extent practical since they functionally reported to the same company officer, *i.e.*, the Senior Vice President (SVP) of Energy Marketing. The employees of the two trading operations attended periodic meetings together, convened by the SVP of Energy Marketing. As described in the compliance finding "Sharing of Market Information" which follows next in this Audit Report, general market

[9] *LG&E Power Mktg., Inc.*, 68 FERC ¶ 61,247 (1994); *modified on other grounds*, 69 FERC ¶ 61,153 (1994). LG&E Power Mktg.'s name was changed to LG&E Energy Marketing Inc. (LEM). *See* Notice of Name Change, Docket No. ER97-3418-000 (filed June 24, 1997).

information, as well as specific market information about WMF and LEM trading operations was discussed at these meetings.

According to the job description of the SVP Energy Marketing, the occupant of the position was responsible for establishing the strategic direction and management of the energy marketing, fuel procurement and trading activities for the WMF and also directs the optimization of the corporation's energy-related integrated gross margin. This job description indicates that the SVP Energy Marketing is expected to coordinate WMF and LEM activities to provide a greater return for the LG&E corporate family. This lack of functional separation between WMF and LEM was inconsistent with LG&E's Code of Conduct.

Physical Separation Between WMF and LEM

LG&E lacked sufficient physical barriers to ensure that the WMF's non-public market information was not shared with LEM. WMF operations and LEM operations were both located on the seventh floor of LG&E's headquarters building. Sharing a floor is not a violation of the Code of Conduct, as long as there are sufficient controls to ensure the physical separation of employees and operations. The physical space occupied by WMF operations were secured by a card key access system. However, LEM's operations were not secured by a card key access system, and the workspace of LEM employees (with the exception of the Director of LEM) was arranged in open carrels. WMF employees passed by LEM's workspace on their way to and from a conference room shared by the two trading operations, and the employees shared common facilities such as kitchen and restrooms. WMF and LEM employees frequently held discussions on the LEM trading floor, but LG&E asserted and the employees we interviewed confirmed that the information exchanged between WMF and LEM traders was not prohibited information—it was limited to public information regarding the market and market information about LEM.

The seventh floor also contained LG&E's risk management and energy accounting functions, both of which have access to WMF information. The risk management and energy accounting offices were not protected, e.g., through card key access, against entry by LEM personnel.

Operational Separation with Respect to Recorded Phone Calls

LG&E recorded phone calls of its traders and dispatchers for both the WMF and LEM functions on two RACAL digital tape recorder machines. Each machine recorded calls made by employees of both organizations on digital tapes. Each digital tape contained approximately 60,000 to 75,000 calls or about 21-28 days worth of recorded calls containing conversations made by both WMF employees and LEM employees.

Each call was identified by date, time, and channel number which corresponded to a person or workstation. A recorded call varied in length from a few seconds to several minutes.

The two RACAL recorder machines and tapes were located on the seventh floor of LG&E's headquarters building in a locked room with access controlled by a LEM administrative employee. The LEM administrative employee provided access to specific tapes when WMF or LEM employees requested access to the tapes. The LEM administrative employee initially set up the machine to a channel, date and time, then instructed the WMF and LEM employees how to operate the machine to find other calls. The listening process involved searching and listening to the tape on a trial and error basis until the call was identified. The LEM administrative person did not remain in the room at all times while the WMF or LEM employees listened to the tapes, and these employees had the opportunity to access the entire contents of a tape containing both WMF and LEM recordings.

Recommendations

We recommend that LG&E:

1. Take all appropriate actions necessary to ensure that WMF employees and LEM employees are functionally and physically separate to the maximum extent practical, as required under LG&E's Code of Conduct.

2. Implement procedures to ensure that authorized access to the tape recordings are properly documented.

3. Implement procedures to separate tape recordings for WMF and LEM channels.

4. Implement controls to provide access to only one tape recording machine when WMF or LEM personnel are authorized to listen to tapes and implement controls to prevent unauthorized access to channels of historical tapes which contain recorded conversations of both WMF and LEM channels.

5. LG&E shall submit all procedures and controls to OE for approval within 30 days of issuance of a Final Audit Report in this docket.

Actions Already Taken by LG&E

After we discussed our concerns with the lack of physical separation between LEM and WMF, LEM physically moved from the seventh floor to the fourth floor of the LG&E building and LEM employees no longer have access to the seventh floor as of March 31, 2006.

LG&E also began maintaining a written log of all access to tapes and revamped its recording system so that now WMF and LEM employee conversations are recorded on separate tapes and machines. We verified that this change had been made during our site visit in October 2005. However, LG&E must still implement access controls to the tapes when WMF or LEM employees listen to tapes containing recorded conversations of both WMF and LEM channels. Also, LG&E must implement physical access controls to the recording machines if WMF or LEM employees are provided access to the secure room to listen to tapes.

The corrective actions do not solve the functional separation problem between WMF and LEM. LG&E will submit a plan to functionally separate WMF and LEM.

2. Sharing of Market Information

LG&E's WMF shared market information with LEM through presentations at joint staff meetings, in violation of LG&E's Code of Conduct. Also, password access controls to the shared Energy Management System (EMS) were insufficient and inconsistent with LG&E's password security policy.

Pertinent Guidance

Section 4 of LG&E's Code of Conduct states that "(n)o employee of the Utilities will share market information with any employee of the Marketers unless all such information is simultaneously made available to the public. The policy will not apply to market information known to be publicly available, or to market information disclosed to employees of the Marketers or the Utilities who are engaged in support functions, including human resources, information resources, data processing, finance, legal, accounting and other support personnel who do not participate in directing, organizing and executing the day-to-day business decisions of the wholesale merchant or generation functions of the Utilities or the Marketers, *provided* that such employees are prohibited from acting as conduits to pass market information obtained from the Utilities to the Marketers."[10] (emphasis in original.)

LG&E's password security policy requires a password for each employee accessing LG&E's Local Area Networks (LAN) and Wide Area Networks (WAN).

Discussion

Joint Staff Meetings Between WMF and LEM

LG&E's WMF shared non-public market information with LEM through presentations at joint staff meetings, in violation of LG&E's Code of Conduct. The monthly trading meetings normally took place during the last week of each calendar month. In addition to the SVP of Energy Marketing, the managers of WMF and LEM attended, as well as staff from WMF and LEM, plus staff from the Market Analysis, Trading Controls, Operations Analysis and Fuels Management sections.

During the months of August, 2004 through May, 2005, the agendas of the Trading Meetings remained unchanged. The first item on the agenda was a presentation by the Manager of the WMF on the results of Regulated Off-System Sales (OSS) for the month, and how the results compared with the amount budgeted for that item. This

---

[10] *Id.*

information included reforecast graphs for the calendar year-to-date, the results for the current month-to-date, the factors leading to the results (including such items as purchase power costs and transmission expenses), and a review of the profit-at-risk graph. Following this presentation by the WMF, LEM presented a report on its sales operations for the previous month and its forecasts and plans for the future.[11] Following LEM's presentation, the SVP of Energy Marketing dismissed the LEM employees from the meeting after which the WMF made additional reports about its operations and forecasts.

LG&E's Code of Conduct states that no employee of the WMF will share market information with any affiliated power marketer employee unless all such information is simultaneously made available to the public. Based on review of the agendas, and interviews with WMF personnel, we concluded that the WMF Off-System Sales' information presented at the beginning of the monthly meetings by the Manager of the WMF was WMF market information. This information was disclosed to LEM personnel present at the beginning of these meetings, a violation of LG&E's Code of Conduct.

Password Access to EMS Information

LG&E's WMF and LEM both use a shared EMS, partitioned into WMF generation data, LEM generation data, and LG&E transmission data. Password access controls to the shared EMS were insufficient and inconsistent with LG&E's password security policy. Prior to February 2004, LG&E permitted WMF and LEM users to access the EMS using separate group accounts and passwords, rather than using unique user accounts and passwords. The failure to require unique password access was contrary to LG&E's password security policy and increased the risk of inappropriate information access via the EMS. Specifically, group passwords are easier to disseminate and it is not possible to track the identity of individuals that use a group account to ensure that only those with appropriate clearance have accessed the EMS. Because WMF employees and LEM employees used group accounts and passwords, it was not possible to track individual access to specific account information.

[11] The information related to Western Kentucky Electric (WKE), LEM's sole remaining customer. In past years the information also related to LEM's contract with Oglethorpe Power Corporation (OPC).

Recommendations

We recommend that LG&E:

6. Create controls consistent with LG&E's Code of Conduct to ensure that there is no exchange of market information stemming from joint trading meetings for WMF and affiliated power marketing personnel.

7. Conduct an independent review by the internal audit department or an outside auditing firm when the new EMS is implemented in 2006 to ensure that there is no improper or unauthorized EMS screen access.

8. LG&E shall submit all controls to OE for approval within 30 days of issuance of a Final Audit Report in this docket. Also, LG&E shall submit the results of the independent review of the EMS to OE within 30 days after implementing its new EMS or issuance of a Final Audit Report in this docket, whichever is later.

Actions Already Taken by LG&E

After we discussed our concerns with LG&E about joint trading meetings between WMF and LEM, LG&E changed the agenda of the monthly trading meetings starting in June 2005. The agenda was altered so that the presentation about WMF's OSS is not made until later in the meeting, after LEM employees have left the meeting. In addition, beginning in December 2005, LG&E adopted certain process changes, including the requirement that the CCO or his designee attend all joint WMF and LEM meetings, and maintain a high-level agenda and/or minutes of each meeting.

LG&E implemented unique user accounts and passwords for its current GE/Harris EMS in February 2004. LG&E is currently developing, installing and testing a new EMS that should be operational in 2006.

3. Posting of Information on Sales to Affiliates at Market-Based Rates

LG&E's EBB was inaccessible to non-affiliated market participants, and the information on the EBB was not consistent with Commission requirements. The EBB would have been difficult for non-affiliate market participants to find, given that for some period of time it was located on a website of an LG&E affiliate that was not a party to affiliate sales. In addition, for some period of time it may not have been accessible over the internet. Moreover, the information and timing on offers to sell and actual sales to affiliates were not consistent with the specific requirements in LG&E's Code of Conduct.

Pertinent Guidance

On January 29, 1999, LG&E petitioned the Commission for blanket authority to authorize the Utilities, *i.e.*, LG&E's WMF, to sell energy at market-based rates to their power marketing affiliates. Acknowledging the Commission's concern about protecting captive ratepayers from subsidizing affiliate marketing operations, LG&E committed to adopt the safeguards the Commission approved in Detroit Edison Company.[12]

To implement these safeguards, LG&E amended its Code of Conduct to add the following requirements: "The Utilities will sell power to the Marketers at a rate that is no lower than the rate the Utilities charge to nonaffiliates; simultaneously with making an offer to sell power to the Marketers, the Utilities will make the same offer to nonaffiliates through a posting on their electronic bulletin board ("EBB"); and simultaneously with the striking of a power sales transaction with the Marketers, the Utilities will post the actual price paid on their EBB."[13]

Discussion

Accessibility of EBB Information to Market Participants

We sought to create a timeline for LG&E's EBB. LG&E's WMF made energy sales at market-based rates to LEM from 1999 through the Spring of 2005, but we could not confirm that the information posted on such sales was accessible to market participants. Based on the documentation provided to us by LG&E:

- From 1999 through December 2003, the sales information was posted on an EBB website for LG&E Power, one of LG&E's affiliated power marketers.

[12] 80 FERC ¶ 61,348 (1997).

[13] Docket No. ER99-1623-000, Compliance Filing of Louisville Gas and Electric Company and Kentucky Utilities Company, filed March 4, 1999, at 2.

- In December 2003, the EBB containing the sales information migrated from the LG&E Power website to the LG&E Energy website.

- In April 2005, LG&E provided us the website address for the EBB, http://apps.lgeenergy.com/fercgen/gensales.asp. When we tried to access the EBB at this address, the page would not display. We subsequently asked LG&E how to access the EBB. On May 4, 2005, the internet address on LG&E Energy's website worked. We asked LG&E when this link to the EBB was made operational; LG&E informed us that it was made operational on May 1, 2005.

LG&E stated that other than LG&E's filing made in 1999 revising its Code of Conduct to post affiliate transactions on an EBB, it could not recall any occasions where it publicized the existence of the EBB. LG&E, however, could not recall a single instance when a market participant had inquired about any posting on the EBB.

Posted Offers to Sell on the EBB

LG&E's Code of Conduct required LG&E to make a simultaneous offer on the EBB to sell to non-affiliates the same product it was offering to sell to its affiliate. We concluded that the posting of offers to sell on the EBB were not consistent with the requirements of LG&E's Code of Conduct.

We reviewed archived EBB data for the audit period. Typically, each month on the first of the month, LG&E's WMF would post on the EBB an offer to sell a block of energy on an hourly basis. This monthly posting was at an asking price of $12/MWh for virtually every month that a monthly offer was posted. LG&E stated that the asking price was set at $12/MWh in order to induce counterparties to enter negotiations to purchase from LG&E's WMF.

We reviewed LG&E's variable costs on a generator-by-generator basis. Although prices of coal and other inputs changed over the course of the period that LG&E posted offers on the EBB, we concluded that had LG&E sold energy at $12/MWh during any hour during which it posted an asking price of $12/MWh, it would have been selling energy at a price less than its incremental cost. Moreover, our review of the EBB shows that WMF never sold energy to LEM at a price of $12/MWh or less. LG&E's strategy of posting an asking price of $12/MWh did not satisfy the Code of Conduct requirements to simultaneously offer hourly energy to non-affiliated market participants at the same price that it would offer such energy to its affiliate.

Prices of Affiliate Sales

We evaluated whether the prices at which WMF sold energy to LEM were consistent with the requirements of LG&E's Code of Conduct, *i.e.*, at a rate that is no lower than the rate that WMF sold to non-affiliated buyers. LG&E had no written procedures or other controls for its WMF traders to follow to determine an appropriate market price at which the WMF would sell to LEM. LG&E's WMF traders established the market price through telephone queries and broker quotes prior to negotiating a next-hour energy sale to LEM. We listened to recorded phone calls during hours in which WMF traders sold energy to LEM. We found no evidence that WMF traders sold energy to LEM at prices less than the market price in accordance with LG&E's Code of Conduct. However, when we reviewed the recorded phone calls, we found that WMF traders did not generally employ strong controls to establish the market price.

EBB Postings in 2001

We had specific concerns whether LG&E was properly using the EBB to post offers and sales from WMF to LEM to support a long-term sales obligation LEM had with Morgan Stanley, specifically affiliate sales in 2001. Based on the data provided to us by LG&E, we found the following EBB posting errors:

- WMF sold to LEM 50 MWh of energy during each off-peak hour during the month of May 2001 without posting offers or transactions on the EBB. We estimated these energy sales in May 2001 to total nearly 20,000 MWh, and to have generated revenues of approximately $500,000.

- LG&E failed to post on the EBB offers or transactions when WMF sold energy to LEM to support LEM's sales to Morgan Stanley for an additional 10 days during calendar year 2001.

Recommendations

We recommend that LG&E:

9. Develop written procedures regarding the use of its EBB. Specifically, the written procedures should address how LG&E will ensure that the price at which it sells energy to its affiliate is no lower than the price at which it sells to non-affiliates, and how LG&E will post offers and sales on the EBB to make the information available to other market participants to demonstrate that its affiliate sales are at non-preferential prices.

10. Develop a plan to ensure that the EBB is fully accessible, and that market participants know where to find the EBB on the LG&E website.

11. LG&E shall submit all procedures and plans to OE for approval within 30 days of issuance of a Final Audit Report in this docket.

Actions Already Taken by LG&E

We had numerous discussions with LG&E about the accessibility and effectiveness of its EBB postings. As of January 2006, LG&E had a link from its corporate website to the EBB. In addition, LG&E presented us plans for making the information posted on the EBB consistent with LG&E's Code of Conduct. LG&E has agreed to finalize these plans and to develop written procedures to guide trading staff on the use of the EBB within 30 days of the issuance of a Final Audit Report in this docket.

IV. STANDARDS OF CONDUCT FINDINGS AND RECOMMENDATIONS

4. Disclosures of Transmission and Customer Information

LG&E transmission employees improperly disclosed transmission and customer information to employees of its WMF that was not contemporaneously available to the public, and failed to post the information disclosure on OASIS.

Pertinent Guidance[14]

A Transmission Provider must ensure that any employee of the Marketing or Energy Affiliate is prohibited from obtaining information about the Transmission Provider's transmission system through access to information not posted on the OASIS or Internet website or that is not otherwise also available to the general public without restriction.[15]

An employee of the Transmission Provider may not disclose to its Marketing or Energy Affiliates any information concerning the transmission system of the Transmission Provider or the transmission system of another through non-public communications conducted off the OASIS or Internet website, through access to information not posted on the OASIS or Internet website that is not contemporaneously available to the public, or through information on the OASIS or Internet website that is not at the same time publicly available.[16]

A Transmission Provider may not share any information, acquired from non-affiliated transmission customers or potential non-affiliated transmission customers, or developed in the course of responding to requests for transmission or ancillary service on the OASIS or Internet website, with employees of its Marketing or Energy Affiliates,

---

[14] Some of the incidents supporting this finding occurred under the former Order No. 889 Standards of Conduct requirements, *i.e.*, Part 37 requirements pre-September 22, 2004, Part 358 requirements thereafter. There are no significant differences in the specific requirements of Part 37 and Part 358 that bear upon the finding that LG&E improperly disclosed transmission and customer load information.

[15] 18 C.F.R. § 358.5(a)(2) (2005).

[16] 18 C.F.R. § 358.5(b)(1) (2005).

except to the limited extent information is required to be posted on the OASIS or Internet website in response to a request for transmission service or ancillary services.[17]

If an employee of the Transmission Provider discloses information in a manner contrary to the requirements of sections 358.5(b)(1) and (2), the Transmission Provider must immediately post such information on the OASIS or Internet Web site.[18]

Also, LG&E's posted implementation procedures provided that "any person with knowledge or concerns regarding activities that may have resulted, or could result, in a violation of the Standards of Conduct and/or Standards of Conduct Written Procedures is strongly encouraged, expected, and required to report them to the CCO without delay."

Discussion

Disclosures of Transmission Information by Telephone

On at least three occasions, once in May, 2004 and twice in November, 2004 LG&E transmission employees disclosed transmission line loading and operating status information to LG&E generation dispatchers during the course of generation re-dispatch events. LG&E's generation dispatch function is organizationally and functionally within its marketing business unit; therefore generation dispatch personnel are Energy and Marketing Affiliate employees.[19] In each instance, the transmission information was disclosed through non-public communication.

LG&E identified three calls involving the disclosure of non-public transmission information relating to the loading of, line operational status, or redispatch or switching relief options for the 345 kV line Smith – Hardin County; 138 kV line Paddys Run – Paddys West; and 138 kV line Cane Run 6 – Cane Run Switching. LG&E acknowledged that the disclosed transmission information was not otherwise available to market participants through OASIS or other sources at the time that it was disclosed. We

[17] 18 C.F.R. § 358.5(b)(2) (2005).

[18] 18 C.F.R. § 358.5(b)(3) (2005).

[19] The manager of generation dispatch reports to the Director of Trading who reports to the Senior Vice President for Energy Marketing. The generation dispatch desk is on the trading floor, located next to the workstation used by LG&E's real-time traders. Moreover, on occasion, LG&E's generation dispatchers talked to potential energy buyers and sellers on the phone and made trades if no one else on the trading floor was available to do so.

reviewed the disclosed information and determined that its disclosure to generation dispatch personnel was not necessary to ensure reliability and hence is not exempt under 18 C.F.R. § 358.5(b)(6) (2005). LG&E confirmed that the transmission information disclosed was not shared with traders, and there were no trades made by generation dispatchers in the hours subsequent to the disclosure of transmission information.

LG&E's generation dispatchers received Standards of Conduct training, and had available to them LG&E's Standards of Conduct implementation procedures, which required that improper disclosures of non-public transmission information be reported to the CCO. The generation dispatch employee did not disclose the incidents to anyone, including the CCO, so the disclosures were not posted on LG&E's OASIS after they occurred.

Disclosure of Transmission Information at a Meeting Attended by Transmission and Marketing Employees

During the audit period, we identified one meeting in which transmission personnel and marketing personnel were present at which LG&E transmission personnel disclosed non-public information regarding the status of two transmission projects. LG&E did not subsequently post the disclosures on its OASIS. At a Long Term Planning meeting that the SVP of Energy Marketing attended, the Director of Transmission discussed two transmission projects, providing information that was not publicly available in the Midwest ISO Transmission Expansion Plans ("MTEP"). These Projects were a 138/69kV transformer at VA City – Clinch River, which was a new interconnection tie-line between LG&E and American Electric Power Company, Inc., and a 138/69kV transformer at Paris substation, which was a reinforcement of the existing tie-line between LG&E and East Kentucky Power Cooperative. Each of the above two proposed projects would increase the transmission capacity between LG&E and the adjacent control area. LG&E did not post in a timely manner the disclosure on the OASIS after it occurred. We found no evidence that LG&E's Energy or Marketing Affiliates traded on this information.

Disclosure of Customer Load Data by E-Mail

On the first of the month, on a monthly basis through February 2005, a transmission employee e-mailed a marketing employee specific, non-public customer load information and failed to post in a timely manner the disclosures on OASIS.[20] Prior

[20] In *Allegheny Power Service Corporation et al, (Allegheny)* the Commission stated that the WMF may have access to control area load and not the specific load of third-party transmission customers within the same control area. *See Allegheny,* 84 FERC ¶ 61,131 at 61,729 (1998).

to August 1, 2003, the e-mails identified the date, time and LG&E's control area peak load, and load for the same date and time for LG&E, Hoosier Energy, Owensboro Municipal Utilities, Tennessee Valley Authority, and East Kentucky Power Cooperative. Beginning August 1, 2003 and continuing through February 1, 2005, the e-mails added the customer's monthly energy usage, peak load and load factor.[21] LG&E acknowledged that this information was not publicly available. Knowledge of specific third-party load information could have been used to the advantage of LG&E's traders, although we found no evidence that this occurred.

Recommendations

We recommend that LG&E:

12. Post OASIS notices for all of the disclosures of non-public transmission information by LG&E's transmission function employees identified in this Audit Report. These postings should include the date, time, type of information disclosed, and other pertinent information.

13. Create and implement controls to prevent prospectively the disclosure of non-public transmission information to marketing employees performing generation dispatch functions and controls to ensure that any subsequent disclosure(s) are posted on OASIS consistent with Commission regulations. Such controls need to emphasize LG&E's policy that all concerns related to the Standards of Conduct should be brought to the attention of the CCO.

14. Create and implement controls to prevent prospectively the disclosure of non-public transmission information during meetings attended by both transmission and marketing employees, and controls to ensure that any subsequent disclosure(s) are posted on OASIS consistent with Commission regulations. Such controls need to emphasize LG&E's policy that all concerns related to the Standards of Conduct should be brought to the attention of the CCO.

15. Perform a review of all transmission and customer information shared through e-mail distribution in order to ensure that such information is not inappropriately shared with LG&E's Marketing and Energy Affiliate employees.

[21] The load factor represents the ratio of the average load over a designated period of time to the peak load occurring during that period.

16. LG&E shall submit all controls and the results of its email distribution review to OE for approval within 30 days of issuance of a Final Audit Report in this docket.

Actions Already Taken by LG&E

We discussed our concerns about the disclosure of transmission and customer information. LG&E informed us that it is developing process changes for addressing our concerns on a prospective basis, and that ultimately the process changes would be converted into formal written policies within 30 days of issuance of a Final Audit Report in this docket.

5. Standards of Conduct Training

LG&E's Standards of Conduct training program was inconsistent with Commission regulations and LG&E's own training implementation plans—more than one year after the effective date of Order No. 2004 (*i.e.*, 9/22/04), LG&E had failed to provide Standards of Conduct training for several hundred of the employees LG&E was required to train.

Pertinent Guidance

Order No. 2004 codified the training requirement as follows: "Transmission Providers shall train officers and directors as well as employees with access to transmission information or information concerning gas or electric purchases, sales, or marketing functions. The Transmission Provider shall require each employee to sign a document or certify electronically signifying that s/he has participated in the training." [22] Moreover, training was to be completed by the implementation date of Order No. 2004: "Each Transmission Provider must be in full compliance with the standards of conduct by September 22, 2004."[23]

Order No. 2004 required a Transmission Provider to post its implementation procedures on its OASIS or website, specifically requiring that Transmission Providers "must explain…whether employees have been offered training on the standards of conduct, and whether employees are required to read and sign acknowledgement forms."[24] LG&E's posted implementation procedures have limited detail on its training program. LG&E directed us to an internal company training plan, which states (in part):

- All affected Company Personnel as well as employees of Energy and Marketing Affiliates (*i.e.*…except clerical, maintenance and field personnel) shall receive *Standards of Conduct* training prior to the September 22, 2004 implementation date.
- The initial *Standards of Conduct* training shall be conducted through interactive training programs developed and prepared by the Edison Electric Institute.[25]

---

[22] 18 C.F.R. § 358.4(e)(5) (2005).

[23] 18 C.F.R. § 358.4(e)(2) (2005).

[24] FERC Stats. & Regs, Regulations Preambles ¶ 31,155 at P 136.

[25] "FERC Standards of Conduct, Order Nos. 2004, 2004-A, 2004-B, Training plan, August 19, 2004, Overview."

Discussion

We reviewed LG&E's training program and compared it to the requirements in Order No. 2004, as well as LG&E's training plan. We concluded that LG&E did not provide training to all employees requiring training. As of November 2005, more than one year after the September 22, 2004 implementation date of Order No. 2004, LG&E had not provided training to all employees that fall under the definition of employees who needed to be trained, *i.e.*, "employees with access to transmission information or information concerning gas or electric purchases, sales, or marketing functions."[26]

We could not determine the exact number of employees that required, but had not received, training. Employees that required Standards of Conduct training but did not receive training included:

- A handful of employees of the service company, *e.g.*, in business units such as Audit Services and Legal;
- Approximately 100 shared service employees, in business units such as Planning & Control;
- As many as 2,000 employees at LG&E-owned transmission and generation facilities, who had no training other than notification that new Standards of Conduct were in effect.[27]

We discussed with LG&E the need to determine whether the employees in these business units have access to information concerning gas or electric purchases, sales or marketing functions that would trigger a training requirement under 18 C.F.R. § 358.4(e)(5) (2005), and when they do, to ensure that they have Standards of Conduct

[26] 18 C.F.R. § 358.4(e)(5) (2005).

[27] LG&E designated these employees as field and maintenance personnel and as such did not provide training to them. But the training requirement in Order No. 2004 does not hinge on whether employees are designated as field and maintenance personnel, but rather whether an employee has access to non-public transmission information or information concerning gas or electric purchases, sales or marketing functions. LG&E told us it did not make this determination with respect to its field and maintenance personnel. As such, we could not determine how many of these employees should have received training. LG&E did not assert that these employees did not have access to non-public transmission information or information concerning gas or electric purchases, sales or marketing functions.

training. LG&E agreed to review its training program, specifically to identify the additional employees that should have received training.

Recommendations

We recommend that LG&E:

17. Strengthen the implementation of its training program to ensure that on a going-forward basis, its training program is consistent with Commission requirements and its internal training plans.

18. Develop written procedures to ensure that new employees, and transferring employees that require training, receive training.

19. Conduct a review to ensure that all of the employees that have "access to transmission information or information concerning gas or electric purchases, sales, or marketing functions…" are scheduled for training, have received training, and are certified.

20. LG&E shall submit all changes to the implementation of its training program and procedures developed to OE for approval within 30 days of issuance of a Final Audit Report in this docket. Also, LG&E shall submit the results of its review of employee access to information within 30 days after issuance of a Final Audit Report in this docket.

Actions Already Taken by LG&E

We discussed LG&E's training program with the CCO, and other LG&E officials. On November 10, 2005, LG&E submitted a letter to us outlining an enhanced training program. We reviewed LG&E's plan and found it to be consistent with the requirements of Order No. 2004, the audit findings, and our recommended remedies.

LG&E proposed to require training for all LG&E employees who fall within the definition in 18 C.F.R. § 358.4(e)(5) (2005). LG&E proposed to use the EEI computer-based Training Program, including the certification of training completion. For employees without internet access, a paper version of the training program will be used for the training. LG&E informed us on January 11, 2006, that as of that date, it had increased the number of LG&E employees who had received training by 80%, from approximately 600 employees to approximately 1100 employees.

6. Controls Used to Limit Access to System Control Centers

LG&E did not follow its posted implementation procedures to control and track access of its marketing employees to LG&E's two system control centers, including the requirement that LG&E marketing employees obtain permission from the CCO before visiting the system control centers.

Pertinent Guidance

Order No. 2004 requires that a Transmission Provider's employees engaged in transmission system operations "must function independent from employees of its Marketing and Energy Affiliates."[28] Specifically, a Transmission Provider is prohibited from permitting the employees of its Marketing or Energy Affiliates from "having access to the system control center or similar facilities used for transmission operations or reliability functions that differs in any way from the access available to other transmission customers."[29]

LG&E's posted implementation procedures provide that LG&E marketing employees must obtain permission from the CCO before visiting the system control centers: "The Chief Compliance Officer shall maintain a written record of each such decision for inspection upon request by the Commission."[30]

LG&E's posted implementation procedures also prescribe access control to the system control centers.

> The Companies shall maintain a written log book at each Transmission System Operating Center for purposes of documenting the instances in which a transmission customer, whether an employee(s) of an Energy and/or Marketing Affiliate or a representative(s) of an unaffiliated third-party, visited these facilities. The written log book should contain the: (1) name of the transmission customer; (2) the date and time of the visit; and (3) the Transmission Function Employee(s)

---

[28] 18 C.F.R. § 358.2(a) (2005).

[29] 18 C.F.R. § 358.4(a)(3)(ii) (2005).

[30] "Joint Written Procedures Implementing Standards of Conduct for Transmission Providers as Adopted by the Federal Energy Regulatory Commission in Order No. 2004, Effective September 22, 2004" Section IV.A.2.b.

or other Company Personnel hosting the transmission customer; (4) whether the transmission customer is an affiliate; and (5) purpose for the visit.[31]

Discussion

LG&E operates two separate system control centers. One control center, called Waterside, is located in Louisville, KY, in a building approximately two blocks from the LG&E corporate headquarters. The other control center, called Dix Dam, is located in Burgin, KY, at the site of the Dix Dam generating facility.

LG&E used card key access to restrict direct access to its system control centers. However, we found a number of problems with the controls employed to track access of visitors (including LG&E marketing employees) to LG&E's system control centers.

CCO Permission to Visit the System Control Centers

LG&E's posted implementation procedures provide that LG&E marketing employees should submit a written request to the CCO prior to visiting either one of the system control centers. Based on our review of the Waterside log sheets, on at least five occasions, two LG&E employees with marketing or marketing-related responsibilities visited the Waterside facility after September 22, 2004.[32] The CCO told us that there was no record that marketing employees had sought permission to enter the control centers, and no record of CCO approval of such requests.

Controls on Visitors Entering the System Control Centers

The written log books controlling visitors to the system control centers were inconsistent with LG&E's posted implementation procedures. The logs did not collect some pertinent information that LG&E's implementation procedures required. Many of the entries on the log sheets were unintelligible to us, and some of these entries were unintelligible to LG&E personnel as well. As a result, we could not determine the full extent to which LG&E marketing employees (and non-affiliated transmission customers) had access to the system control centers and could not determine whether LG&E

[31] *Id.*

[32] One of the employees was the manager of the generation dispatch function, which staff established was part of the marketing function. The other was the manager of market policy—the position description for this individual said his department was responsible for monitoring and analyzing emerging electric markets and educating Energy Marketing staff on the implications of new market operations.

marketing employees had access in any way that differed from the access provided to non-affiliated transmission customers.

Access to Transmission Information Once Inside the System Control Centers

At both the Waterside and Dix facilities, a visitor standing at the door to the control centers had a line of sight into the control room, and was able to see transmission status information. This concern is heightened because of the relatively large number of LG&E marketing employees that visited a system control center. For example, our review of log sheets indicated that in the two year period prior to implementation of Order No. 2004, LG&E marketing employees may have made as many as 50 separate visits to the Waterside facility.

Recommendations

We recommend that LG&E:

21. Review and strengthen its system control center access procedures to ensure that its control procedures: (a) adhere to its own posted implementation procedures as it relates to CCO permission to visit control centers and maintenance of log books; (b) are followed by LG&E employees including the CCO and CCO designees; and (c) are certified in compliance with Order No. 2004 and LG&E's posted implementation procedures. LG&E shall submit all procedures to OE for approval within 30 days of issuance of a Final Audit Report in this docket.

22. Ensure that the entrances into the Waterside control room and Dix Dam control room are such that a visitor that enters the Waterside and Dix Dam facilities does not have a line of sight into the control rooms or to any workstations displaying data on transmission status.

Actions Already Taken by LG&E

LG&E informed us that on January 10, 2006, it revised its website to notify LG&E marketing employees that require access to the system control centers to seek written permission before each visit from the CCO. In addition, LG&E indicated that no later than January 13, 2006, the log books would be updated to conform to LG&E's posted implementation procedures, and temporary covers would be installed on all windows and doors that allow a line of sight into the system control centers.

7. Organizational Charts

LG&E's posted corporate and functional organizational charts (as of April 2005) failed to include or accurately show: detailed organizational charts for business units engaged in the sales function; the position of its Marketing and Energy Affiliates within the corporate structure; and sufficient detail to indicate that LG&E's service company is the employment mechanism for the Marketing and Energy Affiliates and the Transmission Provider.

Pertinent Guidance

The Order No. 2004 requirements for posting organizational charts provide that:

(3) A Transmission Provider must post comprehensive organizational charts showing:

(i) The organizational structure of the parent corporation with the relative position in the corporate structure of the Transmission Provider, Marketing and Energy Affiliates;

(ii) For the Transmission Provider, the business units, job titles and descriptions, and chain of command for all positions, including officers and directors, with the exception of clerical, maintenance, and field positions. The job titles and descriptions must include the employee's title, the employee's duties, whether the employee is involved in transmission or sales, and the name of the supervisory employees who manage non-clerical employees involved in transmission or sales.

Further, Order Nos. 2004-A and 2004-B requires:

If a corporation uses a service company as the employment mechanism for the Transmission Provider and its Marketing or Energy Affiliates, the organizational charts should clearly specify those circumstances. Similarly, if a corporation uses both functional and structural organizational charts for its management, the organizational charts must accurately reflect its operations....[33]

With respect to whether a detailed organizational chart is also required for a service company, the answer depends on the functions that the service company is

[33] FERC Stats. & Regs, Regulations Preambles ¶ 31,161 at P 163.

performing. If the service company is performing transmission functions, additional detail is required.[34]

Discussion

LG&E's posted several organizational charts on its website at http://lgeenergy.com/regulatory/soc.asp[35] which showed a high-level organizational structure, including the holding company which owns LG&E Energy LLC, and the legal entities under LG&E Energy LLC, including notably: the operating companies (Kentucky Utilities Company and Louisville Gas and Electric Company); the service company (LG&E Energy Services, Inc.); and an LG&E marketing affiliate (LG&E Energy Marketing Inc., or LEM).

Additional posted organizational charts showed some —but not all— of the business units of the service company. The organizational charts showed a Senior Vice President (SVP) for Energy Services, with the following direct reports: Director of Transmission; SVP for Energy Marketing; VP for Regulated Generation; and VP Power Operations for Western Kentucky Energy.

However, the only business unit for which detailed organizational charts, job titles, chains of command, and job descriptions were posted was the Director of Transmission. Such detailed information was not posted for the sales functions, *i.e.*, the SVP for Energy Marketing, VP for Regulated Generation, and VP Power Operations for Western Kentucky Energy. The sales functions under the SVP for Energy Marketing included the following business units: Director of Trading; Director of Market Analysis & Valuation; Director of Non-Utility Marketing; Manager of Operations Analysis and System Implementation; Director of Corporate Fuels & By-Products; and Director of Business Information.

In addition, the posted organizational charts did not show the relative position in the corporate structure of all of LG&E's Marketing and Energy affiliates and did not clearly indicate that LG&E's service company is the employment mechanism for its Marketing and Energy Affiliates and Transmission Provider. For example:

- LG&E's postings showed one of LG&E's Marketing and Energy Affiliates, *i.e.*, LG&E Energy Marketing Inc. (LEM), as a separate corporate entity, but did not clearly indicate that LEM employees are in the service company along with transmission function employees; and

[34] FERC Stats. & Regs, Regulations Preambles ¶ 31,166 at P 79.

[35] We reviewed the organization charts on April 5, 2005.

- LG&E's postings failed to show what position another Marketing and Energy Affiliate, LG&E Power Services LLC, occupied within the corporate structure.

Recommendations

We recommend that LG&E:

23. Post organizational charts and employee information showing the required information for all of the business units engaged in the sales function.

24. Revise its organizational chart postings to show the position of all Energy and Marketing Affiliates within the corporate structure.

25. Revise its organizational chart posting to clearly show that LG&E uses its service company as the employment mechanism for the Transmission Provider and its Energy and Marketing Affiliates. All postings shall be made within 7 business days of the issuance of a Final Audit Report in this docket, consistent with 18 C.F.R. § 358.4(b)(3)(iv) (2005).

Actions Already Taken by LG&E

After discussions with us, LG&E updated its posted organizational charts. We reviewed LG&E's organizational charts in January 2006, and found the revised organizational charts included more, but not all, of the information required under 18 C.F.R. § 358.4(b)(3) (2005).

8. Shared Facilities

LG&E did not post a list of the facilities shared by the Transmission Provider and LG&E's Marketing and Energy Affiliates as required by 18 C.F.R. § 358.4(b)(2) (2005).

Pertinent Guidance

The Commission's regulations state: "A Transmission Provider must post on its OASIS or Internet website, as applicable, a complete list of the facilities shared by the Transmission Provider and its Marketing and Energy Affiliates, including the types of facilities shared and their addresses."[36] This requires that when a Transmission Provider's Marketing and Energy Affiliates share facilities with any function of the Transmission Provider whose employees have access to transmission information, those shared facilities must be posted.[37]

Discussion

LG&E's Order No. 2004 information posted on its internet website in April 2005 stated: "At this time, no facilities are shared between the Transmission Provider and its Marketing and Energy Affiliates".

LG&E believed that it was required to post a list of shared facilities only if its transmission function shares facilities with its Marketing and Energy Affiliates. Since LG&E's transmission function is housed in two buildings (the Waterside control center and the Dix Dam control center) that otherwise do not house other LG&E business units, LG&E informed us that it did not believe it had any shared facilities that required posting.

---

[36] 18 C.F.R. § 358.4(b)(2) (2005).

[37] Transmission Provider is defined as follows in 18 C.F.R. § 358.3 (2005):

(a) Transmission Provider means:

(1) Any public utility that owns, operates or controls facilities used for the transmission of electric energy in interstate commerce; or

(2) Any interstate natural gas pipeline that transports gas for others pursuant to subpart A of part 157 or subparts B or G of part 284 of this chapter.

(3) A Transmission Provider does not include a natural gas storage provider authorized to charge market-based rates that is not interconnected with the jurisdictional facilities of any affiliated interstate natural gas pipeline, has no exclusive franchise area, no captive rate payers and no market power.

Virtually all of LG&E's shared service employees (many of whom have access to transmission information) occupied the same building as LG&E's two primary Marketing and Energy Affiliates, *i.e.*, LG&E's WMF, and LG&E's principal affiliated power marketer (LEM). When we pointed out to LG&E that shared service employees with access to transmission information and the Marketing and Energy affiliate employees share facilities which trigger a posting requirement, LG&E agreed to revise its posting to ensure that it is consistent with 18 C.F.R. § 358.4(b)(2) (2005).

Recommendation

We recommend that LG&E:

26. Revise its shared facilities posting to include all facilities that LG&E's Marketing and Energy Affiliates share with service employees who have access to non-public transmission information.

Actions Already Taken by LG&E

After discussions with us, LG&E revised its posting with respect to shared facilities on December 13, 2005. We reviewed the revised posting in January 2006 and found that the revised posting is not consistent with the Commission's requirements. Specifically, LG&E has not identified the facilities its Marketing and Energy Affiliates share with other LG&E functions that have access to non-public transmission information.

V. MARKET-BASED RATE TARIFF FINDING AND RECOMMENDATIONS

9. Electric Quarterly Report Inaccuracies

LG&E's Electric Quarterly Report (EQR) filing for the first quarter of 2005 contained inaccurate information for its market-based rate sales. LG&E inaccurately reported several sales transactions from its WMF to its affiliated power marketer (LEM) and reported invalid Data Universal Numbering System (DUNS) numbers for several other customers.

Pertinent Guidance

Order No. 2001 [38] provided field names for the specified information required to be filed for the EQR: transaction begin date and transaction end date fields are provided for reporting the date and hour the transaction began and ended, increment peaking name field for reporting full period (FP), Peak (P), and Off-peak (OP), and class name field for reporting non-firm (NF) and firm (FP) power sales. Order No. 2001 also required the reporting of DUNS numbers for all customers in the EQR, making the power sale and the transmission reporting requirements consistent and reducing possible confusion among similarly named, but different, providers of service.

Discussion

We reviewed a sample of LG&E's EQR filing specifically for the first quarter of 2005. We found that LG&E inaccurately reported sales transactions to LEM and reported invalid Data Universal Numbering System (DUNS) numbers for several other customers.

LG&E reported two "around the clock" sales to LEM on February 24, 2005 (transaction_unique_identifier 2005003000) and February 25, 2005 (transaction_unique_identifier 2005003080). LG&E sold 52 megawatts to LEM in each hour in Transaction 2005003000 for $47.00 during the peak period and $31.00 during the off-peak period. LG&E sold 104 megawatts to LEM in each hour in Transaction

[38] *Revised Public Utility Filing Requirements*, Order No. 2001, FERC Stats. & Regs., Regulations Preambles, ¶ 31,127 (2002), *order on reh'g,* Order No. 2001-A, 100 FERC ¶ 61,074 (2002), *order on reconsideration and clarification*, Order No. 2001-B, 100 FERC ¶ 61,342 (2002); Order No. 2001-C, 101 FERC ¶ 61,314 (2002); Order No. 2001-D, 102 FERC ¶ 61,334 (2003); Order No. 2001-E, 105 FERC ¶ 61,352 (2003); Order No. 2001-F, 106 FERC ¶ 61,060 (2004).

2005003080 for $51.50 during the peak period and $31.50 during the off-peak period. LG&E reported the off-peak period of both transactions as beginning at 12:00 AM and ending at 11:59 PM and assigned the increment peaking name as "FP" or full period rather than "OP" or off-peak. LG&E reported the peak period of these transactions as beginning at 7:00 AM and ending at 10:59 PM and assigned the increment peaking name as "FP" or full period rather than "P" or peak.

LG&E's EQR filing included 34 unique transaction identifiers where it sold energy to LEM and reported the class name of the energy sold as "NF" or non-firm. LG&E's Code of Conduct also required these sales to LEM to be posted on an EBB where LG&E reported these same sales transactions as system firm sales. When we asked LG&E to explain the discrepancy, it explained that the EQR data showing the sales as non-firm was incorrect.

LG&E reported 10 invalid DUNS numbers in its EQR for the 1st quarter 2005 for the following customers: Barbourville Water & Electric, Bardstown Municipal Light & Water, Bardwell City Utilities, Benham Electric System, City of Madisonville, City of Paris Combines Utilities, El Paso Merchant Energy L.P., El Paso Merchant Energy, LP, Owensboro Municipal Utilities, and Rainbow Energy Marketing Corp..

Recommendations

We recommend that LG&E:

27. Strengthen its written procedures to ensure all data reported in future EQR filings are in compliance with Commission regulations and reflect the correction of the errors and inconsistencies identified in this Audit Report.

28. Implement procedures to validate all customer DUNS numbers.

29. Refile all EQR reports from inception to correct the increment peaking name and the class name of power it sold to LEM.

30. LG&E shall submit all procedures to OE for approval within 30 days of issuance of a Final Audit Report in this docket.

Actions Already Taken by LG&E

LG&E advised us that it would be making corrections to its EQR filings, and that such corrections were made on January 31, 2006. We expect that the revised written procedures on EQR filings will be addressed by LG&E in its implementation plan in response to this Audit Report.

VI. IMPLEMENTATION PLAN

We recommended that LG&E submit an implementation plan to the audit staff for our approval detailing LG&E's plans to comply fully with the findings and recommendations in this Audit Report. The implementation plan should describe the actions LG&E has already taken, and will take, that are consistent with and complementary to any future structural and organizational changes that LG&E may undertake.

The implementation plan should be submitted within 30 days of issuance of a Final Audit Report in this docket. In addition, LG&E shall make quarterly filings updating the audit staff of its progress on implementing the plan. The filings shall be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all the corrective actions are completed.

RE: *Louisville Gas and Electric Company, Kentucky Utilities Company*
Docket No. PA05-9-000

Dear Mr. Craig:

This letter sets forth the response of Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") (collectively, the "Companies") to the draft audit report issued by the Federal Energy Regulatory Commission's ("FERC" or the "Commission"), Office of Enforcement, Division of Audits ("FERC Audit Staff") on June 14, 2006, in the above referenced docket ("Draft Audit Report"). As requested, this response addresses: (1) whether the Companies agree or disagree with each finding and recommendation set forth in the Draft Audit Report; and (2) the corrective actions planned, or taken, and target completion dates.

I. INTRODUCTION.

The Companies agree with the findings and recommendations set forth in the Draft Audit Report. Further, the Companies appreciate the opportunity to respond to the Draft Audit Report. Encouraging, facilitating, and maintaining on-going compliance with Commission's regulatory initiatives and requirements is of the highest priority to the Companies and consistent with the core values and behaviors of E.ON U.S. LLC and its parent, E.ON AG. The operational audit of the Companies' compliance with the Standards of Conduct, the Companies' Market-Based Rate Tariffs, Market-Based Rate Tariff Code of Conduct ("LG&E Code of Conduct"), and the Open Access Transmission Tariff of the Midwest Independent Transmission System Operator, Inc. (collectively, "Audit Items") has been beneficial for the Companies as the audit process revealed several areas in which the Companies could improve their existing processes and methods.

During the course of the audit, and as discussed here, the Companies have taken and will continue to take substantial steps to improve their compliance. The Companies are committed to implementing and maintaining a comprehensive internal FERC compliance program as suggested in the recent *Policy Statement on Enforcement.*[1] One of the core behaviors that defines the global E.ON corporate family is the "drive for excellence." In this regard, the Companies are committed to driving for excellence in the area of FERC regulatory compliance by implementing, monitoring, and periodically evaluating the effectiveness and efficiency of existing measures designed to ensure for full compliance.

In this regard and to clearly demonstrate the Companies' commitment to compliance, the Chairman, President, and Chief Executive Officer of the Companies has expanded the responsibilities of the Standards of Conduct Chief Compliance Officer ("CCO") to include the LG&E Code of Conduct and the Market-Based Rate Tariffs under which the Companies and any affiliates may be operating. The CCO has been further directed to prepare and implement a detailed, comprehensive compliance program that encompasses the full range of FERC regulatory obligations, and to develop and implement a strategy for enhanced training, monitoring, and auditing the effectiveness of the overall internal FERC compliance process. The Companies' ongoing commitment to compliance has the full support of the entire senior management team of E.ON U.S. LLC, as well as their commitment to support the development and the implementation of the broader FERC compliance program.

As noted in the *Policy Statement on Enforcement*, a thorough commitment to compliance must be ingrained in corporate culture. Such a commitment is established at the senior most levels of any organization and must flow down from management to front-office employees engaged in day-to-day operations. As noted above, E.ON U.S. LLC senior management is strongly committed to ensuring compliance with all applicable FERC regulatory obligations. The Companies believe that the establishment of a detailed and comprehensive internal FERC compliance program will demonstrate this commitment throughout the E.ON U.S. LLC corporate family and also to the Commission. Simply put, compliance with the letter and spirit of applicable FERC regulatory obligations is encouraged, expected, and required at all levels of our organization. Therefore, as the audit process concludes, E.ON U.S. LLC reiterates our commitment to strengthening and maintaining an effective and open culture of compliance. This commitment is an integral part of our corporate identity and reflects our core values and behaviors.

[1] *Enforcement of Statues, Orders, Rules and Regulations,* 113 FERC ¶ 61,068 (2005) ("*Policy Statement on Enforcement*").

II. RESPONSE TO PROPOSED FINDINGS AND RECOMMENDATIONS.

The Companies sincerely appreciate FERC Audit Staff's willingness to work with our employees and, where possible, provide guidance to help strengthen our overall compliance with the Audit Items. Prior to addressing specific comments on the proposed findings and recommendations, the Companies would like to highlight their cooperation with FERC Audit Staff as the audit progressed. We believe that the spirit in which the revised procedures for the Before-the-Purchase System were developed, as well as the guidance regarding Standards of Conduct training and for strengthening compliance with the Code of Conduct Electronic Bulletin Board ("EBB") posting requirements, are positive examples of how the operational audit process can work. The Companies look forward to working with FERC Audit Staff to finalize and implement post operational audit compliance plans in accordance with the process described in the Draft Audit Report.

As noted in Section I, above, the Companies agree with the findings and recommendations set forth in the Draft Audit Report. As discussed in Section I, above, the Companies and their parent, E.ON U.S. LLC, are committed to ensuring on-going compliance with the Audit Items, as well as other applicable FERC regulatory initiatives and requirements. The Companies were frankly unsettled by the number of non-compliance findings identified by FERC Audit Staff. We trust that our willingness to act without delay to address the identified non-compliance issues and take the necessary steps to strengthen and broaden their overall compliance program is, in fact, evidence of the priority the Companies give to compliance. These priorities will not change following the conclusion of the audit. Finally, the Companies would like to emphasize the importance of the absence of findings of intent to violate applicable rules or tariffs regarding the identified areas of non-compliance.

III. UPDATE OF CORRECTIVE ACTIONS TAKEN OR PLANNED AND TARGET COMPLETION DATES.

The Companies agree to submit an implementation plan within 30 days of the issuance of the final audit report. The implementation plan will set forth the distinct steps that the Companies have taken, and will take, to fully comply with the findings and recommendations set forth in the final audit report. In the interim, the Companies provide the following status report on the steps that they have taken during the course of the audit to comply with the findings and recommendations of FERC Audit Staff.

A. CODE OF CONDUCT FINDINGS AND RECOMMENDATIONS.

1. Functional, Physical, and Operational Separation of LG&E's Wholesale Merchant Function and Affiliated Power Marketer.

The Draft Audit Report directs the Companies to take all appropriate actions necessary to ensure that wholesale merchant function employees ("WMF") are functionally, physically, and operationally separated to the maximum extent practical, as required under the LG&E Code of Conduct, from their affiliated power marketer, LG&E Energy Marketing Inc. ("LEM"). Draft Audit Report at 8-11. As discussed below, the Companies have already implemented, or propose to implement, corrective measures designed to satisfy these requirements. While the final details of the steps taken by the Companies to achieve the appropriate degree of functional, physical and operational separation required by the LG&E Code of Conduct will be set forth in their implementation plan, the Companies provide the following update.

a. Functional Separation Concerns.

The Draft Audit Report states that the functional separation between WMF and LEM is not consistent with the LG&E Code of Conduct. Draft Audit Report at 8-9. The Draft Audit Report cites two examples of the lack of appropriate functional separation between WMF and LEM. *Id.* at 8-9. The first example concerns meetings jointly attended by WMF and LEM personnel and the Senior Vice President, Energy Marketing ("SVP Energy Marketing") at which certain market information about WMF and LEM trading operations was discussed. *Id.* The second example addresses certain aspects of the job description for the SVP Energy Marketing's indicating "that the SVP Energy Marketing is expected to coordinate WMF and LEM activities to provide a greater return for the LG&E corporate family." *Id.* at 9. The Companies agree with the findings made in the Draft Audit Report regarding the functional separation between WMF and LEM and agree to implement post-audit corrective measures to improve their compliance with the LG&E Code of Conduct functional separation requirements.

In order to ensure clear and full compliance with the functional separation requirements of the LG&E Code of Conduct, the Companies propose to implement the following corrective measures. First, the Companies propose to revise the job description of the SVP Energy Marketing. All language in the current job description indicating that SVP Energy Marketing is expected to "coordinate WMF and LEM activities to provide a greater return for the LG&E corporate family" will be deleted. As revised, the job description will require the SVP Energy Marketing to exercise his corporate oversight and management responsibilities for WMF and LEM in a manner that ensures that WMF and LEM: (1) are treated as separate and distinct businesses in accordance with the functional separation requirements of the LG&E Code of Conduct; and (2) will produce the greatest return for the E.ON U.S. corporate family on an independent and stand-alone basis. Further, the revised job description will acknowledge the SVP Energy Marketing's obligation to comply with the No Conduit Rule set forth in the LG&E Code of Conduct.

Second, as discussed in Section III.A.1.b, below, the SVP Energy Marketing has discontinued holding monthly trading meetings that are jointly attended by WMF and LEM staff. Concurrent with the physical relocation of LEM to an enclosed work space on the Fourth (4^{th}) Floor West section of the E.ON U.S. LLC Building located at 220 W. Main Street in Louisville, Kentucky ("E.ON Center"), the SVP Energy Marketing has implemented a process change and now meets with WMF and LEM separately on a monthly basis to discuss relevant business issues. Further, as noted in Section III.A.2.a, below, the Companies have implemented a process change that requires the CCO or his designee to attend any business meetings where both WMF and LEM staff are present. This process change squarely covers any meeting where the SVP Energy Marketing also may be present with both WMF and LEM staff.

Third, per prior discussions with FERC Audit Staff on or about February 6, 2006, the Companies commit to adhere to the chain of command for WMF and LEM in order to maintain separation between the SVP Energy Marketing and the execution of day-to-day WMF and LEM activities consistent with the SVP Energy Marketing's status as one of most senior executives in the E.ON U.S. LLC corporate family and the Companies' existing delegations of corporate authorities.

Together with the corrective measures designed to ensure proper physical and operational separation discussed in Sections III.A.1.b and c, below, the Companies respectfully submit that, given the relatively small size of E.ON U.S. LLC regulated and unregulated trading operations, these corrective measures will provide the functional separation required by the LG&E Code of Conduct (from both a substantive and optical perspective). The Companies will submit the specific measures for ensuring full compliance with the LG&E Code of Conduct functional separation requirements as part of their post-audit implementation plan.

b. Physical Separation Concerns.

The Draft Audit Report states that the physical separation between WMF and LEM is not consistent with the LG&E Code of Conduct. Draft Audit Report at 9. The Companies agree with the findings regarding physical separation concerns and, as discussed below, have implemented a number of corrective measures that assure that the physical separation of WMF and LEM is consistent with the LG&E Code of Conduct.

As a follow-up to the discussion regarding the physical proximity of WMF and LEM in their letter to FERC Audit Staff dated January 11, 2006 ("January 11 Letter"), the Companies hereby confirm that as of March 31, 2006, LEM has been physically relocated to an enclosed work space on the 4th Floor West section of E.ON Center. The enclosed LEM work space on the 4th Floor West section of the E.ON Center is secured by a card-key reader that only permits access to LEM personnel and a limited group of support personnel that may be shared consistent with requirements of the LG&E Code of Conduct, such as the CCO and designees, internal legal counsel, Energy Marketing Accounting, Trading Controls, and Operations Analysis/System Implementation.

Neither the 4th Floor of the E.ON Center nor the enclosed LEM workspace located thereon can be accessed by WMF personnel. Conversely, neither the 7th Floor of the E.ON Center nor the enclosed WMF workspace located thereon can be accessed by LEM personnel.

A full description of the specifics regarding the key card access restrictions to the enclosed LEM work space on the 4th Floor West section, and to the WMF work space on the 7th Floor North section, of the E.ON Center will be provided in the Companies' post-audit implementation plan. Further, written procedures governing the access to the WMF and LEM workspaces for authorized E.ON U.S. LLC employees and other permitted persons will be adopted by the Companies as part of comprehensive Code of Conduct compliance program.

c. Operational Separation Concerns with Respect to Recorded Phone Calls.

The Draft Audit Report states that the operational separation between WMF and LEM with respect to recorded phone calls on two (2) RACAL digital tape recorders is not consistent with the LG&E Code of Conduct. Draft Audit Report at 9-10. The Companies agree with these findings as set forth in the Draft Audit Report and have already undertaken measures to ensure compliance with the operational separation requirements of the LG&E Code of Conduct as it relates to recorded phone conversations. Further, as discussed below, the Companies propose to implement additional measures to ensure compliance with this aspect of the operational separation requirement.

In their January 11 Letter, the Companies proposed to implement certain internal controls to ensure appropriate operational separation under the LG&E Code of Conduct with respect to WMF and LEM trader telephone conversations using RACAL digital tape recorders. January 11 Letter at 5. The Companies continue to pursue the implementation of the corrective measures outlined in the January 11 Letter. However, the Companies hereby inform FERC Audit Staff that, on or about December 14, 2005, the RACAL digital tape recorders were replaced by two (2) NiceCall Focus III voice recording systems that contain technology that permit the "desktop review" of previously recorded conversations. One NiceCall Focus III machine is dedicated exclusively for use by LEM. The second machine is dedicated for use exclusively by WMF. The Companies believe that their investment in separate voice recording machines for LEM and WMF that contain "desktop review" technology is a substantial step towards achieving the operational separation required by the LG&E Code of Conduct with respect to recorded calls.

Distinct from the RACAL recorders, the NiceCall Focus III voice recording systems are operated on a stand-alone basis and are not interconnected in any way, physically or operationally. As noted above, these machines contain technology that allows traders to engage in desktop review of prior recorded calls. As discussed in greater detail in the Companies' post-audit implementation plan, traders for WMF and LEM are assigned specific channels on the NiceCall Focus III machine assigned to their business unit and are only permitted access to those channels.[4] In order to provide appropriate risk management and corporate oversight of trading activities, supervisory personnel within LEM and WMF are also permitted to access the recorded conversations of traders assigned to their business unit.[5] Limited access to recorded conversations is permitted by certain "shared support" personnel that are subject to the No Conduit Rule under the LG&E Code of Conduct, such as internal legal counsel, Trading Controls, Energy Accounting, Contract Administration, and the CCO and his designees.

In two distinct respects, the Companies believe that the use of the separate NiceCall Focus III machines with "desktop review" technology will help ensure on-going compliance with the operational separation requirements of the LG&E Code of Conduct. First, "desktop review" technology eliminates the need for WMF and LEM personnel to have physical access to the work space where these machines are currently stored. Second, because different NiceCall Focus III machines are used by WMF and LEM, taken together with the fact that WMF and LEM have been physically separated as described in Section III.A.1.b, above, there is no risk of personnel from one operation gaining indirect, remote access to non-public market information on the other operation's recorded lines.

As discussed in greater detail in their post audit implementation plan, the Companies propose to adopt a comprehensive set of written procedures designed to facilitate on-going compliance with LG&E Code of Conduct operational separation requirements as applied to recorded calls for both the new NiceCall Focus III machines and for historic conversations recorded on the RACAL tapes. The Companies will adopt these written procedures as part of comprehensive Code of Conduct compliance

[4] Because separate NiceCall Focus III machines are used by LEM and WMF, traders for LEM may only access assigned channels on the NiceCall Focus III machine that is dedicated for use exclusively by LEM. Similarly, WMF traders may only access assigned channels on the NiceCall Focus III that is dedicated for use exclusively by WMF.

[5] LEM supervisory personnel may only access voice recordings on the NiceCall Focus III machine dedicated for use exclusively by LEM. Similarly, WMF supervisory personnel may only access voice recordings on the NiceCall Focus III machine dedicated exclusively for use by WMF.

program. With regard to historic conversations recorded on the RACAL tapes, the Companies propose to implement internal controls consistent with those outlined in their January 11 Letter.

In that regard, the January 11 Letter proposed to implement a policy or set of procedures designed to ensure that: (1) trading personnel of one operation (whether WMF or LEM) will not have access to RACAL tapes of recorded conversations of the other; and (2) that anyone requesting access to RACAL tapes of recorded conversations must listen to such tapes in a location that does not permit access to phone conversations of the other group (*i.e.*, in their assigned work spaces). Specifically, the Companies proposed to develop a log book or another form of written record to document requests for access to historic conversations recorded on the RACAL tapes that requires the following information:

- The name of the person(s) seeking access to the RACAL tapes containing the recorded phone conversations;

- The name of their business unit (*e.g.*, WMF, LEM, legal or regulatory);

- A brief description of the recorded conversations on the RACAL tapes for which access to the tapes is sought;

- A brief description of the reasons for reviewing the recorded conversations on the RACAL tapes (*e.g.*, contract dispute, incorrect trade confirmation.

Finally, the Companies propose to include written procedures to provide for the periodic review by the CCO or his designee of the RACAL tape log book or other written record. These written procedures will be adopted as part of a comprehensive Code of Conduct compliance program

2. Sharing of Market Information.

a. Joint Staff Meetings Between WMF and LEM.

The Draft Audit Report states that the WMF shared marketing information through presentations at joint staff meetings in violation of the LG&E Code of Conduct. Draft Audit Report at 12-13. The Companies agree with these findings regarding joint staff meetings between WMF and LEM as set forth in the Draft Audit Report. As discussed below, the Companies have already undertaken significant measures to ensure compliance with the information sharing restrictions in the LG&E Code of Conduct and propose to formalize these measures in their post-audit implementation plan.

In June 2005, the Companies revised the agenda of the monthly trading meetings jointly attended by WMF and LEM personnel, as well as the SVP Energy Marketing and staff from Market Analysis, Trading Controls, Operations Analysis, and Fuels Management to address concerns raised by FERC Audit Staff regarding the sharing of WMF historical off-system sales ("OSS") summary information during these meetings. *See* Draft Audit Report at 14. From the period June 2005 through March 31, 2006, the Companies altered the agenda so that the presentation regarding WMF's OSS was not made until LEM employees were dismissed from the meeting. Since December 2005, the Companies have adopted certain process changes, including the requirement to have the CCO or his designee attend all business meetings jointly attended by WMF and LEM personnel. The CCO or his designee maintains a high-level agenda and/or minutes of such joint meetings.

Please note that beginning on or about April 1, 2006, the SVP Energy Marketing discontinued scheduling and holding monthly trading meetings that are jointly attended by WMF and LEM staff. The monthly trading meetings are now held by the SVP Energy Marketing with WMF and LEM staff separately. These separate meetings are also attended by staff from Market Analysis, Trading Controls, Operations Analysis, and Fuels Management, who are shared support staff under the LG&E Code of Conduct and subject to the No Conduit Rule. In accordance with the No Conduit Rule, non-public WMF or LEM market information discussed during meeting with one business unit (*i.e.*, WMF) is not shared in meetings with the other business unit (*i.e.*, LEM) and vice versa.

As discussed in greater detail in their post-audit implementation plan, the Companies propose to adopt the process changes as part of a comprehensive Code of Conduct compliance program. In addition, the Companies propose to memorialize as part of a comprehensive Code of Conduct compliance program that monthly trading meetings discussed in the Draft Audit Report are held separately with WMF and LEM staff.

b. Password Access to EMS Information.

The Draft Audit Report states that Companies password access controls to the shared Energy Management System ("EMS") were insufficient and inconsistent with the Companies' password security policy. Draft Audit Report at 13. Prior to February 2004, the Companies permitted WMF and LEM users to access the EMS using separate group accounts and passwords, rather than using unique user accounts and passwords. *Id.* As a consequence, the Draft Audit Report states that failure to require unique password access was contrary to the Companies' password security policy and increased the risk of inappropriate information access via the EMS. *Id.* The Companies agree with the findings regarding password access to EMS information as set forth in the Draft Audit Report and have already taken corrective measures to address these concerns.

As noted in the Draft Audit Report, in February 2004, the Companies have implemented individual user-ids and passwords for its current GE/Harris EMS. As required by GE/Harris vendor support requirements, a common user-id still exists solely and exclusively for maintenance purposes. However, the WMF and LEM EMS users do not have access to the vendor required common user-id and may only access the EMS through their own unique user-id and password.

The Companies are in the process of installing a new Open Systems International ("OSI") EMS. It is anticipated that the OSI EMS will become fully operational on or about December 31, 2006. As part of their post-audit operational plan, the Companies will provide an update on the status of the installation of the new OSI EMS and on a quarterly basis thereafter until the OSI EMS becomes fully operational. In addition, the Companies agree to conduct an independent review by their internal audit department or an outside audit firm when the OSI EMS is implemented to ensure that there is no unauthorized EMS screen access by WMF and LEM staff. Finally, a requirement mandating the periodic review of EMS access requirements will be adopted as part of the Companies' existing Standards of Conduct compliance program and the proposed comprehensive Code of Conduct compliance program.

3. Posting Information on Sales to Affiliates at Market-Based Rates.

a. Accessibility of EBB Information to Market Participants.

The Draft Audit Report raised a number of concerns regarding the accessibility of the Companies EBB to market participants. Draft Audit Report at 15-16. The Companies agree with the findings regarding the accessibility of EBB information to market participants.

As noted in the Companies' January 11 Letter, as of January 2006, a link to the EBB, entitled "LEM Transactions" was posted on the left-hand column of regulatory page of the E.ON U.S. LLC Internet site. January 11 Letter at 6 n.2. The regulatory page of the E.ON U.S. LLC Internet site can be accessed at the following web address: http://www.eon-us.com/regulatory.asp. Subsequently, to ensure the easiest possible ratepayer and market participant access to the EBB, the Companies posted an additional EBB link, entitled "LEM Transactions EBB," on the lower right-hand corner of the homepage of E.ON U.S. LLC Internet site. The homepage of the E.ON U.S. LLC Internet site can be accessed at the following web address: http://www.eon-us.com/home.asp. Accordingly, as of the date hereof, there are two (2) separate and easily accessible links on the E.ON U.S. LLC Internet site for interested parties to view the EBB.

A copy of the regulatory page and the home page of the E.ON U.S. LLC Internet site containing the existing links to the Companies' EBB on are appended hereto as Attachment A.

b. Posted Offers to Sell on the EBB.

The Draft Audit Report states that Companies' efforts to post offers to sell to LEM on the EBB were not consistent with posting requirements set forth in Paragraphs 7 and 8 of the LG&E Code of Conduct. Draft Audit Report at 16-17. The Companies agree with the findings regarding posted offers to sell on the EBB as set forth in the Draft Audit Report. As noted in their January 11 Letter, the Companies proposed to develop process changes to facilitate significantly stronger compliance with the posting requirements set forth Paragraphs 7 and 9[1] of the LG&E Code of Conduct.

A presentation generally outlining the proposed process changes was made and submitted to FERC Audit Staff on December 16, 2005. The process changes proposed in the presentation and described below are based on the Companies' understanding of existing Commission precedent addressing the need for implementing the EBB requirement when regulated utilities engage in market-based sales with unregulated affiliates. Specifically, Commission precedent is clear that when traditional public utilities engage in power sales to an affiliated power marketer, public utilities may have an incentive to favor their affiliated marketer to the detriment of captive ratepayers.[6] Such behavior can take place when a public utility and its affiliated power marketer transact in ways that result in a

[6] The paragraphs in the currently effective LG&E Code of Conduct originally accepted for filing by the Commission in Docket No. ER99-1623 were incorrectly numbered. There are a total of nine (9) paragraphs. The eighth and ninth paragraph of the LG&E Code of Conduct are incorrectly labeled paragraphs 9 and 10.

[7] *See Detroit Edison Co., et al.*, 80 FERC ¶ 61,348 at 62,198 (1997); *see also Aquila, Inc.*, 101 FERC ¶ 61,331 at P 8 (2002); *FirstEnergy Corp. et al.*, 94 FERC ¶ 61,182 at 61,630 (2001); *Alliant Services Co.*, 85 FERC ¶ 61,344 at 62,335 (1998).

diversion of benefits from the public utility (and its captive ratepayers) to the affiliated power marketer (and its shareholders).[7]

To avoid the diversion of benefits from captive ratepayers to shareholders, the Commission requires that utilities engaging in power sales to affiliated marketers must price such transactions at a rate no lower than the rate the utilities charge to non-affiliates.[8] The requirement to "simultaneously" post offers to, and executed sales with, an affiliate marketer on an EBB is intended to provide transparency to this affiliate sales process. The purpose for providing such transparency is to allow interested third-parties (*i.e.*, ratepayers and market participants), as well as the Commission itself, to independently verify whether such affiliate transactions were priced in accordance with this standard.

As a practical business and operational matter, it is extremely difficult, if at all possible, to comply with the literal language set forth in Paragraphs 7 and 9 of the LG&E Code of Conduct, *i.e.*, mandating the simultaneous posting of: (1) offers to LEM; and (2) executed affiliate power sales transactions. Due to the pace of modern trading operations, transactions are negotiated and executed within minutes. Traders in the WMF cannot in such a short period of time: (1) survey the market and develop a credible picture of the prevailing market price for a given product; (2) negotiate with several counterparties to obtain the best sales price possible; (3) execute trades; and (4) post offers to, and executed sales with, LEM at the same time they take place.

The proposed EBB posting process changes discussed with FERC Audit Staff are intended to reflect the practical realities of engaging in real-time trading activities within a small organization. More importantly, the Companies believe that the process changes discussed with FERC Audit Staff are consistent with both the intent and spirit of the Commission's existing precedent and policies designed to prevent affiliate abuse and self-dealing described above.

The Companies believe that addressing these operational realities in a practical manner must have been considered by the Commission when it established the simultaneous posting requirements codified in Paragraphs 7 and 9 of the LG&E Code of Conduct. Further, the Companies believe that these operational realties must have been intended when Paragraphs 7 and 9 were written. As proposed to FERC Audit Staff, the EBB posting process changes will provide ratepayers, market participants, and the Commission with a workable, easily accessible, and transparent mechanism for monitoring on a real-time basis whether sales by the Companies to LEM may result in an improper diversion of benefits from ratepayers due to the failure to price such transactions in a manner that complies with the LG&E Code of Conduct.

The Companies recognize the complexities of this particular issue and look forward to working with FERC Audit Staff to finalize these process changes as part of their post-audit implementation plan. The final process changes for posting offers to sell on the EBB will be adopted as part of a comprehensive Code of Conduct compliance program. As discussed in greater detail in the Companies' post-audit implementation plan, E.ON U.S. LLC senior management will supervise the formal roll-out sessions for implementing the final EBB posting process changes. Specifically, the roll out and subsequent training sessions will not only discuss the purpose and application of the EBB posting

---

[8] *Id.*

[9] *Id.*

process, they will also emphasize the importance of this process and the need to vigilantly assure compliance therewith. After the initial roll out, the Companies propose to conduct periodic internal reviews and follow-up training to ensure on-going compliance.

c. Prices of Affiliate Sales.

The Draft Audit Report states that the Companies did not have any written procedures or other controls for WMF traders to determining whether sales to LEM were consistent with the affiliate pricing provisions set forth in Paragraph 6 of the LG&E Code of Conduct. Draft Audit Report at 17. The Draft Audit Report notes that the WMF traders established the market price for next-hour energy sales to LEM through telephone queries with potential counterparties and through broker quotes. *Id.* The Draft Audit Report further states that, although no evidence that WMF traders transacted with LEM at less than market price, WMF traders did not generally employ strong controls to establish the market prices. *Id.* The Companies agree with the findings relating to the pricing of affiliate sales as set forth in the Draft Audit Report.

The process changes for posting offers to sell on the EBB discussed in Section III.A.3.b, above, were addressed in the presentation presented to FERC Audit Staff on December 16, 2005. In relevant part, the process changes outline the steps by which WMF traders must determine whether posted offers to sell to LEM hourly or daily energy are priced no lower than prevailing market prices for each product. These procedures provide for a specific period after an offer to sell to LEM is posted on the EBB during which WMF traders must exercise commercially reasonable efforts (*i.e.*, due diligence) to survey the market and determine whether non-affiliates have any interest in pursuing an opportunity equivalent to that being offered to LEM. The WMF traders may not transact with LEM until after the specified posting period has expired. If, at the expiration of such period, an offer to sell to LEM posted on the EBB is the best and highest price available (*i.e.*, no lower than the price offered or sold to non-affiliates), the Companies may execute the sale to LEM.

As discussed in greater detail in the Companies' post-audit implementation plan, these procedures will be adopted as part of a comprehensive Code of Conduct compliance program.

d. EBB Postings in 2001.

The Draft Audit Report identifies certain concerns that took place in 2001 relating to whether, for a period of time, the EBB was properly used to post offers and sales from WMF to LEM to support a long-term sales obligation that LEM had with Morgan Stanley. Draft Audit Report at 17. The Companies agree with the findings regarding the EBB postings in 2001 as set forth in the Draft Audit Report. E.ON U.S. LLC senior management is deeply committed to ensuring that the Companies use the EBB to properly post offers and sales to LEM in accordance with the LG&E Code of Conduct requirements.

E.ON U.S. LLC has and will continue to commit the time and resources necessary to internal compliance measures designed to facilitate an enhanced understanding of, and compliance with, the EBB posting requirements set forth in the LG&E Code of Conduct. As discussed with FERC Staff at length and proposed in the Companies' December 16, 2005 presentation, E.ON U.S. LLC management believes that significantly enhanced compliance with the EBB posting requirements may be achieved through:

- Implementing a revised user friendly EBB offer matrix that contains key deal parameters and clearly articulates appropriate definitions and user guidelines;

- Providing formal employee training regarding the purpose, application and importance of the EBB posting process (including potential ramifications for non-compliance -- both internally and externally);

- Implementing additional internal controls designed to ensure that, when offers to LEM are made and sales are executed, all required EBB postings are timely made and consistent with the LG&E Code of Conduct; and

- Providing periodic follow-up training and reviewing the revised EBB posting process periodically to ensure that it is operating correctly.

As will be discussed in greater detail in the Companies post-audit implementation plan, because a true culture of compliance flows down from the top of corporate organizations, the Companies propose that the process changes for the EBB posting process will be formally rolled out by current E.ON U.S. LLC management. Senior management will ensure proper oversight of employee training sessions regarding the scope, application and importance of the EBB posting process. In addition, management will ensure that appropriate resources are dedicated to conduct periodic internal reviews and follow-up training to ensure on-going compliance with the EBB posting requirements.

B. STANDARDS OF CONDUCT FINDINGS AND RECOMMENDATIONS.

As discussed in Section I above, as part of their post-audit implementation plan, the Companies propose to undertake a comprehensive review of their Standards of Conduct Written Procedures ("SCWP") posted on the E.ON U.S. LLC Internet site, and revise and update the SCWP as necessary. The comments below respond to the specific findings and recommendations set forth in the Draft Audit Report.

1. <u>Disclosure of Transmission and Customer Information</u>.

a. <u>Disclosure of Transmission Information by Telephone</u>.

The Draft Audit Report identifies three instances where transmission function employees of the Companies disclosed non-public transmission information to regulated generation dispatchers during the course of reliability-related Transmission Line Loading Relief/generation redispatch events ("Generation Redispatch Events"). Draft Audit Report at 20-21. Because the Companies regulated generation dispatchers are organizationally and functionally housed in the WMF business unit (an Energy Affiliate), the identified transmission information was disclosed through non-public communications. *Id.* at 17. The Companies agree with the factual findings regarding the disclosure of transmission information by telephone as set forth in the Draft Audit Report, subject to the following factual clarification. The identified disclosures of transmission information occurring by telephone during Generation Dispatch Events were posted on the Standards of Conduct Page of the E.ON U.S. LLC Internet site on January 13, 2006. The posting can be found at: <u>http://www.eon-us.com/regulatory/disclosure_of_information.pdf</u>.

In their January 11 Letter, the Companies proposed to develop certain process changes to ensure that any information disclosed by transmission function employees or by a third-party Transmission Provider are promptly reported to the CCO for evaluation and, where necessary, posted on the OASIS or the E.ON U.S. LLC Internet site. January 11 Letter at 8-9. In the intervening period, the process changes outlined below have been implemented by the Companies. These process changes govern the behavior of both transmission function employees and regulated generation dispatchers during Generation Redispatch Events and include the following concepts:

- During Generation Redispatch Events, transmission function employees are only to provide specific redispatch instructions.

- Absent emergency circumstances affecting system reliability, transmission function employees may not provide regulated generation dispatchers with information regarding the cause of the Generation Redispatch Event.

- Transmission function employees and regulated generation dispatchers are required to document and provide prompt notice to the CCO or his designee of any instance in which non-public transmission information is disclosed to regulated generation dispatchers, whether by transmission function employees or any other third party (including, but not limited to, a security coordinator or reliability authority, or another Transmission Provider).

- In the event of any disclosures of non-public transmission information by a third-party (including, but not limited to, a security coordinator or reliability authority, or another Transmission Provider), apart from notifying the CCO, transmission function employees and regulated generation dispatchers will comply with the No Conduit Rule.

- Regulated generation dispatchers should <u>not</u> trade on any non-public transmission information improperly disclosed to them.

As will be described in greater detail in the Companies' post-audit compliance plans, the process changes outlined above will be converted into written procedures and incorporated into the Companies' existing SCWPs and future Standards of Conduct training programs sponsored by the Companies.

b. <u>Disclosure of Transmission Information at a Meeting Attended by Transmission and Marketing Employees</u>.

The Draft Audit Report identifies one meeting in which transmission personnel and marketing personnel were present at which the Companies' transmission personnel disclosed non-pubic information regarding the status of two transmission projects. Draft Audit Report at 21. The Draft Audit Report notes that the disclosure was not posted on the OASIS in a timely manner. *Id.* As noted in the Draft Audit Report, no evidence was found that Companies' Energy or Marketing Affiliates traded on this information. *Id.* The Companies agree with the findings regarding the disclosure of transmission information at a meeting attended by transmission and marketing employees as set forth in the Draft Audit Report.

The Companies posted the non-public transmission information disclosed in the meeting identified in the Draft Audit Report on the E.ON U.S. LLC Internet site at: http://www.eon-us.com/regulatory/disclosure_of_information.pdf on March 31, 2006. Further, beginning in April 2005, the Companies adopted certain process changes in response to concerns raised by FERC Audit Staff that cross-functional business meetings between transmission function employees and employees of Energy or Marketing Affiliates ("C/F Meetings") create the potential for the sharing of non-public transmission information. Since April 2005, the CCO or his designee has attended all identified C/F Meetings. The CCO or his designee maintains a high-level agenda and/or minutes for each meeting. The C/F Meetings include not only senior level staff meetings but also meetings attended by line level Transmission Function Employees and employees of Energy Affiliates.

In addition, the Companies propose to continue to conduct periodic "function specific" training sessions, including those with E.ON U.S. LLC senior management, to ensure that employees at all levels of the E.ON U.S. LLC organization fully understand the scope and application of the Standards of Conduct restrictions on the sharing of non-public transmission information, including the requirements to post disclosures of non-public transmission information. As discussed in greater detail in their post-audit implementation plan, the Companies propose to: (1) adopt procedures detailing the need for the CCO or his designee to be present at all C/F Meetings as described above and incorporate such procedures into its SCWPs; and (2) will provide additional information about the "function specific" training sessions.

c. Disclosure of Customer Load Data by E-Mail.

The Draft Audit Report states that a transmission function employee e-mailed a marketing employee specific, non-pubic customer load information on a monthly basis through February 2005. Draft Audit Report at 21. The Draft Audit Report notes that the Companies failed to post these disclosures on the OASIS in a timely manner. *Id.* The Companies agree with the findings regarding the disclosure of customer load data by e-mail as set forth in the Draft Audit Report.

As noted in the posted disclosure, the customer information at issue involved after-the-fact, monthly historic peak transmission load information. This information is used by the Midwest ISO to invoice the Companies for their Schedule 10 charges under the Midwest ISO's Open Access Transmission Tariff (or Module B of the Day 2 TEMT). The WMF is responsible for budgeting, approving and paying the Midwest ISO invoice. The non-public customer load data disclosed via e-mail to marketing employee identified in the Draft Audit Report was posted on the E.ON U.S. LLC Internet site on March 31, 2006 at: http://www.eon-us.com/regulatory/disclosure_of_information.pdf.

Since February 2005, the Companies have implemented process changes to ensure that transmission function employees no longer provide non-public customer load information to Energy or Marketing Affiliate employees. As will be discussed in greater detail in their post-audit compliance plan, these process changes will be memorialized and incorporated into the Companies' SCWPs. In addition, the Companies agree to perform a review of all transmission and customer information shared through e-mail distribution in order to ensure that such information is not inappropriately shared with Energy or Marketing Affiliate employees. The Companies further propose to implement new written procedures that require the periodic review of such e-mail distributions to ensure ongoing compliance with the Standards of Conduct.

2. Standards of Conduct Training.

The Draft Audit Report states that the Companies' Standards of Conduct training program was inconsistent with the Commission's regulations and the Companies' SCWP and implementation plans. Draft Audit Report at 24. During the audit, FERC Audit Staff discussed the Companies' training with the CCO, his designees and other E.ON U.S. LLC officials. Subsequently, on November 10, 2005, the Companies submitted a letter outlining an enhanced Standards of Conduct training program. *Id.* FERC Audit Staff found the proposed compliance plan to be consistent with Order No. 2004 and proposed findings and recommendations. *Id.* The Companies accept the findings regarding Standards of Conduct training as set forth in the Draft Audit Report.

The 2005 edition of the Companies' Standards of Conduct training took place from November 17, 2005 through December 31, 2005. The 2005 training program required the participation of <u>all</u> employees in the E.ON U.S. LLC corporate family at the manager level and above, as well as employees with the words or phrases "supervisor," "team leader," or "group leader" in their job title.[9] In addition, the Companies trained <u>all</u> employees in the following lines of business: (1) the Companies' Transmission Function; (2) All Energy Marketing Personnel (regulated and unregulated); (3) Information Technology; (4) Accounting and Finance; (5) Corporate Communications; (6) Legal; and (7) Regulatory. These functional areas of responsibility were selected because employees in such areas have or may have access to non-public transmission information through the Companies' financial books of account, records or contracts or real-time, day-to-day operations.

As noted in the Draft Audit Report, in 2005, the Companies significantly increased the number of employees who have received the Edison Electric Institute ("EEI")-developed, electronic Standards of Conduct training program by eighty percent (80%), from approximately 610 to approximately 1,100. The Companies are committed to further strengthening their training program to ensure that on a going-forward basis it remains consistent with Commission requirements and internal training plans. As part of this process, the Companies will memorialize new process changes for ensuring that new employees and transfers receive the appropriate Standards of Conduct training. The Companies' future Standards of Conduct training plans will be discussed in greater detail in their post-audit implementation plan.

---

[10] Included within the group of employees described above are certain field personnel in the Companies' distribution function, such as managers and supervisors of substation construction crews which respond to outages that can affect the Companies integrated transmission and distribution systems. In addition, this group of employees included all managers, supervisors or above higher ranking personnel that are employed by Energy Affiliates that operate generation facilities on behalf of other investor-owned utilities

3. Controls Used to Limit Access to the System Control Centers.

a. CCO Permission to Visit the System Control Centers.

The Draft Audit Report states the Companies did not follow Section IV.A.2.b of their posted SCWP to control and track access of its marketing employees to their Waterside and Dix Dam system control centers. Draft Audit Report at 27. The Companies agree with the findings regarding CCO permission to visit the system control centers as set forth in the Draft Audit Report. Below the Companies discuss certain corrective measures that have already been undertaken to address concerns identified by FERC Audit Staff.

As noted in the Draft Audit Report, on January 10, 2005, the Companies revised the Standards of Conduct page of the E.ON U.S. LLC website to include a link titled, "Request for Access to Transmission Control Center." The link can be found at: http://www.eon-us.com/regulatory/soc_request_access.asp. The link provides instructions for the submission of written, electronic requests by employees of Energy and Marketing seeking access to the Transmission Control Centers. Consistent with Section IV.A.2.b of the Companies' SCWP, the link directs Energy or Marketing Affiliate employees to submit the following information to the CCO as part of a request for access to the to the Transmission Control Centers:

- The proposed time and date that access to the Transmission Control Centers is required; and

- A verifiable and legitimate business purpose for seeking access to such facilities.

Consistent with Section IV.A.2.b of SCWP, the link states that the CCO shall: (1) review such requests and approve or deny them; and (2) maintain electronic copies of all forms submitted and his decision to approve or deny such requests for a period of three (3) years.

Subsequently, on February 2, 2006, the Companies posted an announcement on the E.ON U.S. LLC Intranet site prominently announcing the new "Request for Access to Transmission Control Center" link on the Standards of Conduct section of Regulatory page of the E.ON U.S. LLC Internet site. The announcement of the "Request for Access to Transmission Control Center" link was made available to all E.ON U.S. LLC employees as part of the daily "News Transmission" published on the E.ON U.S. LLC Intranet site. In addition, an e-mail blast was distributed to all employees highlighting the "Request for Access to Transmission Control Center" link as a headline story in the "News Transmission" items for February 2, 2006.

As will be discussed in greater detail in their post-audit implementation plan, the Companies will further review and strengthen its system control center access procedures as directed in the Draft Audit Report. Further, the Companies commit to internally announce on a periodic basis the "Request for Access to Transmission Control Center" link on the Standards of Conduct section of Regulatory page of the E.ON U.S. LLC Internet site.

b. Controls on Visitors Entering the System Control Centers.

The Draft Audit Report states that the written log books documenting visitors' access to the Waterside and Dix Dam system control centers were inconsistent with Companies' SCWPs. Draft Audit Report at 28. Specifically, the written log books did not collect some pertinent information that was required in Section IV.A.2.b of the SCWPs. *Id.* The Companies accept the findings regarding controls on visitors entering the system control centers as set forth in the Draft Audit Report

The Companies confirm that by January 13, 2006, the log books located at the Waterside and Dix Dam system control centers were in place and updated to contain the same fields of inquiry set forth in Section IV.A.2.b of the SCWP, which include the following:

- The name of the transmission customer;
- Date and time of the visit;
- The name of the Transmission Function Employee or other Company Personnel (as that term is defined in the SCWP) hosting the transmission customer;
- Whether the transmission customer is an affiliate; and
- The purpose of the visit.

The update of the logbooks to include these fields of inquiry ensures consistency with the Companies' existing SCWP procedures and creates an audit trail that allows for independent verification regarding whether the Companies' Energy and Marketing Affiliate employees had access to system control centers in any way that differed from non-affiliate transmission customers. The Companies agree to the recommendations set forth in the Draft Audit Report and will provide greater detail regarding additional corrective measures (if any are required) in their post-audit implementation plan.

c. <u>Access to Transmission Information Once Inside the System Control Center</u>.

The Draft Audit Report raises concerns that non-transmission function employee visitors to Waterside and Dix Dam system control centers could gain access through a direct, external line of sight to certain non-public transmission information posted on monitors and boards within these facilities actual transmission system control rooms. Draft Audit Report at 29. The Companies agree with the findings regarding access to transmission information once inside the system control centers as set forth in the Draft Audit Report.

In their January 11 Letter, the Companies committed to install by January 13, 2006 certain temporary, but effective, covers on all windows on doors, or windows that serve as partitions or walls for purposes of impeding a direct view into the control rooms at Waterside and Dix Dam. The Companies hereby confirm that such temporary covers were in fact installed by January 13, 2006. Further, the Companies committed to implement a permanent solution through the use of frosted glass or another similar technique by the end of the first quarter of 2006. By this letter, the Companies hereby confirm that, prior to the end of the first quarter of 2006, permanent window frosting treatment covers were installed all windows on doors, or windows that serve as partitions or walls for purposes of impeding a direct view into the control rooms at Waterside and Dix Dam.

4. Organizational Charts.

The Draft Audit Report states that Companies have not properly posted certain organizational charts showing: (1) employee information required for all business units in the sales function; (2) the position of all Energy and Marketing Affiliates with the E.ON U.S. LLC family corporate structure; and (3) that the Companies use a service company as an employment mechanism for the Transmission Provider and for its Energy and Marketing Affiliates. Draft Audit Report at 30-32. The Companies agree with the findings regarding the posting of organizational charts as set forth in the Draft Audit Report.

On Friday, June 16, 2006, the Companies and FERC Audit Staff held a conference call for purposes of ensuring that the Companies fully satisfied the organizational chart posting requirements and concerns articulated in the Draft Audit Report. The Companies appreciate FERC Audit Staff's cooperation and help in this process. As will be discussed in greater detail in their post-audit implementation plan, the Companies will post revised organizational charts in accordance with the directives and guidance provided by FERC Audit Staff on the June 16th call.

5. Shared Facilities.

The Draft Audit Report states that the Companies did not post a list of facilities Shared by the Transmission Provider and the Companies' Energy and Marketing Affiliates. Draft Audit Report at 33. Further, the Draft Audit Report notes that virtually all of the Companies shared service Employees occupied the same building as their two primary Marketing and Energy Affiliates -- WMF and LEM. *Id.* at 34. When FERC Audit Staff pointed out that the shared services employees with access to transmission information and the Marketing and Energy Affiliate shared facilities which trigger a posting requirement, the Companies agreed to revise its posting to ensure that it is consistent with 18 C.F.R. § 358.4(b)(2) (2005). The Companies agree with the findings regarding shared facilities as set forth in the Draft Audit Report and corrected the posting.

C. MARKET-BASED RATE TARIFF FINDING AND RECOMMENDATIONS.

The Draft Audit Report states that, for the first quarter of 2005, the Companies' Electric Quarterly Reports ("EQRs") contained inaccurate information for its sales made pursuant to their joint market-based rate tariff. Draft Audit Report at 35. Specifically, the Companies inaccurately reported several sales transactions from its WMF to LEM and reported invalid Data Universal Numbering System ("DUNS") numbers for several other customers. The Companies accept the findings regarding EQRs as set forth in the Draft Audit Report.

As noted in the Draft Audit Report, on January 31, 2006, the Companies made certain corrections to its EQR filings. The Companies agree to implement the proposed recommendations set forth in the Draft Audit Letter regarding: (1) strengthening the Companies' written procedures to ensure that all data reported in future EQR filings are in compliance with Commission regulations and reflect the correction of errors and inconsistencies identified in the Draft Audit Report; (2) implementing procedures to validate all customer DUNS numbers; and (3) refiling all EQR reports from inception to correct the incremental peaking name and class name of power sold to LEM. The refiling referenced in subsection (3) above has been completed.

The proposed corrective measures designed ensure the accuracy and sufficiency of the Companies' EQR reports and ensure compliance with their joint market-based rate tariff will be submitted with the Companies' post-audit implementation plan.

IV. CONCLUSION.

On behalf of E.ON U.S. LLC, I would like to thank the FERC Audit Staff for their time, effort and commitment to ensuring that the Companies are in full compliance with the Audit Items. I would like to again affirm E.ON U.S. LLC's commitment to meeting its obligations under the Standards of Conduct, the Code of Conduct, its Market-Based Rate Tariff and all other applicable FERC imposed regulatory obligations.

Sincerely,

Michael S. Beer

LG&E/KU Standards of Conduct

Effective September 22, 2004, E.ON U.S. and other U.S. energy companies must comply with new Federal Energy Regulatory Commission ("FERC") orders requiring organizational separation between transmission and energy and marketing affiliates.

Collectively, the new orders are referred to as the Standards of Conduct and are fundamentally based on two guiding principles. First, a Transmission Provider's employees engaged in transmission system operations must function independent from the employees of its Marketing and Energy Affiliates. Secondly, a Transmission Provider must treat all transmission customers, affiliated and non-affiliated, on a non-discriminatory basis and must not operate its transmission system to preferentially benefit its marketing or energy affiliates. The Final Rule requires organizational separation of all energy and marketing affiliates, including natural gas marketing affiliates, from the electric transmission function.

The Standards of Conduct require that a Transmission Provider must post certain information on its corporate website or its OASIS. Links to all of the requisite information, whether residing here or on the LG&E/KU page of the MISO OASIS, are provided below. Please contact the Chief Compliance Officer if you have any questions.

INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

GENERAL INFORMATION

I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q)is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

(1) one million megawatt hours of total annual sales,
(2) 100 megawatt hours of annual sales for resale,
(3) 500 megawatt hours of annual power exchanges delivered, or
(4) 500 megawatt hours of annual wheeling for others (deliveries plus losses).

III. What and Where to Submit

(a) Submit FERC Forms 1 and 3-Q electronically through the forms submission software. Retain one copy of each report for your files. Any electronic submission must be created by using the forms submission software provided free by the Commission at its web site: http://www.ferc.gov/docs-filing/eforms/form-1/elec-subm-soft.asp. The software is used to submit the electronic filing to the Commission via the Internet.

(b) The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

(c) Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

(d) For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

a) Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

b) Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

e) The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under date of ___________ , we have also reviewed schedules ___________________of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases."

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(f) Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. To further that effort, new selections, "Annual Report to Stockholders," and "CPA Certification Statement" have been added to the dropdown "pick list" from which companies must choose when eFiling. Further instructions are found on the Commission's website at http://www.ferc.gov/help/how-to.asp.

(g) Federal, State and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from http://www.ferc.gov/docs-filing/eforms/form-1/form-1.pdf and http://www.ferc.gov/docs-filing/eforms.asp#3Q-gas .

IV. When to Submit:

FERC Forms 1 and 3-Q must be filed by the following schedule:

a) FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

b) FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

V. Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,144 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 150 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

III Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

V. Enter the month, day, and year for all dates. Use customary abbreviations. **The "Date of Report" included in the header of each page is to be completed only for resubmissions** (see VII. below).

VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

VII For any resubmissions, submit the electronic filing using the form submission software only. Please explain the reason for the resubmission in a footnote to the data field.

VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and" firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

(3) 'Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

(4) 'Person' means an individual or a corporation;

(5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

(7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power; ......

(11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

(a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports salt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

General Penalties

The Commission may assess up to $1 million per day per violation of its rules and regulations. *See* FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

Stockholders' Reports Check appropriate box:

[ ] Two copies will be submitted

[X] No annual report to stockholders is prepared

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Kent Blake, Chief Financial Officer
220 West Main Street
Louisville, KY 40202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Kentucky August 17, 1912
Virginia December 1, 1991

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Respondent furnishes electric services in Kentucky, Virginia, and Tennessee.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [X] Yes...Enter the date when such independent accountant was initially engaged: 02/23/2011
(2) [ ] No

INFORMATION ON FORMULA RATES
Formula Rate Variances

1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

IMPORTANT CHANGES DURING THE QUARTER/YEAR

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.
2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.
5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.
7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
8. State the estimated annual effect and nature of any important wage scale changes during the year.
9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
11. (Reserved.)
12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.
14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

PAGE 108 INTENTIONALLY LEFT BLANK
SEE PAGE 109 FOR REQUIRED INFORMATION.

1. None.

2. None.

3. During November 2010, Kentucky Utilities Company (“KU”) transferred 149 railcars owned by KU to Trinity Industries Leasing Company as part of a lease transaction under which KU is leasing 150 new aluminum railcars. The railcars had an original value of $7,296,251 and a net book value of $1,258,141. KU received a trade-in allowance for the railcars of $774,800. KU has classified this trade-in allowance as prepaid rent as it will reduce the monthly lease payments over the life of the lease by this amount. KU will recognize a loss of $483,341, which is the difference between the net book value of the existing railcars and the trade-in allowance given by the lessor. This loss was recorded in Plant Account 102 (Electric Plant Purchased or Sold). The journal entries for this transaction were filed with the FERC on April 11, 2011.

   In September 2011, KU and Louisville Gas and Electric Company ("LG&E") entered into an agreement with Bluegrass Generation Company, L.L.C. for the purchase of three existing natural gas simple cycle combustion turbine units in LaGrange, Kentucky, aggregating approximately 495 MW, plus certain associated assets for a purchase price of $110 million. KU and LG&E will jointly acquire the assets as tenants in common, with KU and LG&E having 31% and 69% respective undivided interests. The purchase is subject to receipt of approvals from the Kentucky Public Service Commission, the Virginia Commission, the FERC, and other conditions. On November 14, 2011, a FERC application was submitted in Docket No.EC12-29, including draft accounting entries.

4. None of a material nature.

5. In 2011, 1.69 miles of transmission lines went into service. As these were interconnect transmission lines, no customers were added.

6. KU received FERC authorization in FERC Docket No. ES11-48-000 for up to $500 million in short-term debt through November 30, 2013. KU's money pool balance was zero and $10 million at December 31, 2011, and December 31, 2010, respectively.

   On November 1, 2010, KU entered into a new $400 million revolving credit facility maturing December 31, 2014. In October 2011, KU amended its syndicated credit facility. The amendment includes extending the expiration date from December 2014 to October 2016. Under this facility, KU continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit. The facility is consistent with the above FERC authorization and was approved by the Kentucky Commission Order, Case No. 2010-00206, on September 30, 2010, by the Virginia Commission on October 19, 2010, in Case No. PUE-2010-00094 and Case No. PUE-2010-00130, and by the Tennessee Regulatory Authority on October 21, 2010 in Docket No. 10-00119. There was no balance outstanding under this facility at December 31, 2011, and December 31, 2010 although letters of credit totaling $198 million were issued under the facility at December 31, 2010.

   In April 2011, KU entered into a new letter of credit facility totaling approximately $198 million.

BLANK

Letters of credit totaling $198 million were outstanding under this facility at December 31, 2011. These letters of credit replaced prior letters of credit of the same amount issued under the revolving credit facility described above. The facility is consistent with the above FERC authorization and was approved by the Kentucky Commission Order, Case No. 2008-00309 on September 16, 2008, by the Virginia Commission on August 29, 2008, in Case No. PUE-2008-00077, and by the Tennessee Regulatory Authority on September 15, 2008 in Docket No. 08-00144.

7. None.

8. During the first quarter of 2011, exempt and non exempt employees received routine wage increases in accordance with annual salary reviews. During July 2011, KU hourly employees and employees represented by an USWA Local 9447 and by IBEW Local 2100 received a routine wage increase as a result of separate contract negotiations.

9. See Notes 4 and 11 of Notes to Financial Statements.

10. None.

11. N/A

12. See attached Notes to Financial Statements.

13. Edwin R. Staton was named Vice President of Transmission effective March 28, 2011. Brad Rives was named Chief Administrative Officer and Kent Blake was named Chief Financial Officer effective February 1, 2012. John R. McCall's title was changed to Executive Vice President and Gerald Reynolds was named General Counsel, Corporate Secretary and Chief Compliance Officer effective March 19, 2012.

14. KU is a participant in a cash pooling arrangement, but its proprietary capital ratio is above 30 percent.

Schedule Page: 110 Line No.: 2 Column: c

This Form 1 is filed reflecting purchase accounting consistent with final accounting entries approved on October 14, 2011, in Docket No. AC11-83-000.

Schedule Page: 110 Line No.: 2 Column: d

The majority of the note below provides a summary of all the purchase accounting included in the financial statements for Kentucky Utilities Company ("KU"). These descriptions are provided as early as possible in this document as these descriptions relate to many separate disclosures of purchase accounting adjustments and are intended to prevent repetition throughout the document.

On November 1, 2010, PPL Corporation ("PPL") completed its acquisition of LG&E and KU Energy LLC (“LKE”) and its subsidiaries. The push-down basis of accounting was used to record the fair value adjustments of assets and liabilities on LKE at the acquisition date. PPL paid a cash consideration for LKE and its subsidiaries of $2,493 million as well as a capital contribution on November 1, 2010, of $1,565 million; included within this transaction was the consideration paid for KU of $2,656 million. The allocation of the KU purchase price was based on the fair value of assets acquired and liabilities assumed.

The allocation of the purchase price to the fair value of assets acquired and liabilities assumed is as follows (in millions):

Current assets	$ 364
Investments	30
Property, plant and equipment	4,531
Other intangible assets	178
Regulatory and other non-current assets	274
Current liabilities (excluding current portion of long-term debt)	(367)
Affiliated debt	(1,331)
Debt (current and non-current)	(352)
Other non-current liabilities	(1,278)
Net identifiable assets acquired	2,049
Goodwill	607
Total purchase price	$ 2,656

Goodwill represents value paid for the rate regulated business of KU, which is located in a defined service area with a constructive regulatory environment, which provides for future investment, earnings and cash flow growth, as well as the assembled workforce. KU’s franchise values are being attributed to the going concern value of the business, and thus were recorded as goodwill rather than a separately identifiable intangible asset. None of the goodwill recognized is deductible for income tax purposes or included in regulated customer rates.

Adjustments to KU’s assets and liabilities that contributed to goodwill were as follows:

The fair value adjustment on the EEI investment was calculated using the discounted cash flow valuation method. The result was an increase in KU’s value of the investment in EEI; the fair value of EEI was calculated to be $30 million and a fair value adjustment of $18 million was recorded on KU. The fair value adjustment to EEI is amortized over the expected remaining useful life of plant and equipment at EEI, which is estimated to be over 20 years.

The pollution control bonds had a fair value adjustment of $1 million. All variable bonds were valued at par while the fixed rate bonds were valued with a yield curve based on average credit spreads for similar bonds.

As a result of the purchase accounting associated with the acquisition, the following items had a fair value adjustment but no effect on goodwill as the offset was either a regulatory asset or liability. The regulatory asset or liability has been recorded to eliminate any ratemaking impact of the fair value adjustments:

- The value of OVEC was determined to be $39 million based upon an announced transaction by another owner. KU's stock was valued at less than $1 million and the power purchase agreement has been valued at $39 million. An intangible asset was recorded with the offset to regulatory liability and will be amortized using the units of production method until March 2026, the end of the purchase agreement at the time of the acquisition.
- KU recorded an emission allowance intangible asset and regulatory liability as the result of adjusting the fair value of the emission allowances at KU. The emission allowance fair value of $9 million represents allocated and purchased SO_2 and NOx emission allowances that are unused as of the valuation date or allocated for use in future years. KU had previously recorded emission allowances as other materials and supplies. The emission allowance fair value adjustment is amortized as the emission allowances are consumed, which is expected to occur through 2040.
- KU recorded a coal contract intangible asset of $145 million and non-current liability of $22 million on the Balance Sheet. An offsetting regulatory asset was recorded for those contracts with unfavorable terms relative to market. An offsetting regulatory liability was recorded for those contracts that had favorable terms relative to market. All coal contracts held by KU, wherein it had entered into arrangements to buy amounts of coal at fixed prices from counterparties at a future date, were fair valued. The intangible assets and other liabilities, as well as the regulatory assets and liabilities, are being amortized over the same terms as the related contracts, which expire through 2016.

The fair value of intangible assets and liabilities (e.g. contracts that have favorable or unfavorable terms relative to market), including coal contracts and power purchase agreements, as well as emission allowances, have been reflected on the Balance Sheet with offsetting regulatory assets or liabilities. Prior to the acquisition, KU recovered the cost of the coal contracts, power purchases and emission allowances and this rate treatment will continue after the acquisition. As a result, management believes the regulatory assets and liabilities created to offset the fair value adjustments meet the recognition criteria established by existing accounting guidance and eliminate any ratemaking impact of the fair value adjustments. KU's customer rates will continue to reflect these items (e.g. coal, purchased power, emission allowances) at their original contracted prices.

KU also considered whether a separate fair value should be assigned to KU's rights to operate within its various electric service areas but concluded that these rights only provided the opportunity to earn a regulated return and barriers to market entry, which in management's judgment is not considered a separately identifiable intangible asset under applicable accounting guidance; rather, it is considered going-concern value, or goodwill.

Schedule Page: 110 Line No.: 21 Column: c

The balance in Investment in Subsidiary Companies (123.1) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value in Investment in Subsidiary Companies, a step-up in value compared to the net book value of the investment in EEI was recorded. The step-up in value was assumed to relate to EEI's plant and is amortized over the average life of EEI's plant assets. The following reflects the purchase accounting adjustment:

Investment in Subsidiary Companies (123.1) Without Purchase Accounting	$ 13,878,645
Purchase Accounting Adjustment	17,721,683
2011 Amortization of Purchase Accounting Adjustment	(886,084)
2010 Amortization of Purchase Accounting Adjustment	(147,681)
Total for Investment in Subsidiary Companies (123.1)	$ 30,566,563

Schedule Page: 110 Line No.: 21 Column: d

The balance in Investment in Subsidiary Companies (123.1) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value in Investment in Subsidiary Companies, a step-up in value compared to the net book value of the investment in EEI was recorded. The step-up in value was assumed to relate to EEI's plant and is amortized over the average life of EEI's plant assets. The following reflects the purchase accounting adjustment:

Investment in Subsidiary Companies (123.1) Without Purchase Accounting	$ 12,715,222
Purchase Accounting Adjustment	17,721,683
Amortization of Purchase Accounting Adjustment	(147,681)
Total for Investment in Subsidiary Companies (123.1)	$ 30,289,224

Schedule Page: 110 Line No.: 40 Column: c

The balance in Customer Accounts Receivable (142) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value of Customer Accounts Receivable, KU netted previously recorded Accumulated Provision for Uncollectible Accounts against the book value of assets as of the acquisition date. The fair value adjustment is amortized over the period accounts receivable are written off. See footnote for Page 110, Line 42, Column c. The following reflects the purchase accounting adjustment:

Customer Accounts Receivable (142) Without Purchase Accounting	$ 71,373,905
Purchase Accounting Adjustment	(2,205,992)
2011 Amortization of Purchase Accounting Adjustment	1,102,996
2010 Amortization of Purchase Accounting Adjustment	1,102,996
Total for Customer Accounts Receivable (142)	$ 71,373,905

Schedule Page: 110 Line No.: 40 Column: d

The balance in Customer Accounts Receivable (142) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value of Customer Accounts Receivable, KU netted previously recorded Accumulated Provision for Uncollectible Accounts against the book value of assets as of the acquisition date. The fair value adjustment is amortized over the period accounts receivable are written off. See footnote for Page 110, Line 42, Column d. The following reflects the purchase accounting adjustment:

Customer Accounts Receivable (142) Without Purchase Accounting	$ 88,399,098
Purchase Accounting Adjustment	(2,205,992)
Amortization of Purchase Accounting Adjustment	1,102,996
Total for Customer Accounts Receivable (142)	$ 87,296,102

Schedule Page: 110 Line No.: 41 Column: c

The balance in Other Accounts Receivable (143) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value of Other Accounts Receivable, KU netted previously recorded Accumulated Provision for Uncollectible Accounts against the book value of assets as of the acquisition date. The fair value adjustment is amortized over the period the accounts receivable are written off. See footnote for Page 110, Line 42, Column c. The following reflects the purchase accounting adjustment:

Other Accounts Receivable (143) Without Purchase Accounting	$ 13,700,580
Purchase Accounting Adjustment	(4,669,408)

2011 Amortization of Purchase Accounting Adjustment	4,643,204
2010 Amortization of Purchase Accounting Adjustment	26,204
Total for Other Accounts Receivable (143)	$ 13,700,580

Schedule Page: 110 Line No.: 41 Column: d

The balance in Other Accounts Receivable (143) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value of Other Accounts Receivable, KU netted previously recorded Accumulated Provision for Uncollectible Accounts against the book value of assets as of the acquisition date. The fair value adjustment is amortized over the period the accounts receivable are written off. See footnote for Page 110, Line 42, Column d. The following reflects the purchase accounting adjustment:

Other Accounts Receivable (143) Without Purchase Accounting	$ 33,153,878
Purchase Accounting Adjustment	(4,669,408)
Amortization of Purchase Accounting Adjustment	26,204
Total for Other Accounts Receivable (143)	$ 28,510,674

Schedule Page: 110 Line No.: 42 Column: c

The balance in Accumulated Provision For Uncollectible Accounts (144) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value of Customer Accounts Receivable and Other Accounts Receivable, KU netted previously recorded Accumulated Provision for Uncollectible Accounts against the book value of assets as of the acquisition date. Amortization of purchase accounting entries in accounts 142 and 143 is offset in this account. The following reflects the purchase accounting adjustment:

Accum. Prov. For Uncollectible Acct. (144) Without Purchase Accounting	$ 2,004,312
Purchase Accounting Adjustment	(6,875,400)
2011 Amortization of Purchase Accounting Adjustment	5,746,200
2010 Amortization of Purchase Accounting Adjustment	1,129,200
Total for Accum. Prov. For Uncollectible Acct. (144)	$ 2,004,312

Schedule Page: 110 Line No.: 42 Column: d

The balance in Accumulated Provision For Uncollectible Accounts (144) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value of Customer Accounts Receivable and Other Accounts Receivable, KU netted previously recorded Accumulated Provision for Uncollectible Accounts against the book value of assets as of the acquisition date. Amortization of purchase accounting entries in accounts 142 and 143 is offset in this account. The following reflects the purchase accounting adjustment:

Accum. Prov. For Uncollectible Acct. (144) Without Purchase Accounting	$ 11,787,658
Purchase Accounting Adjustment	(6,875,400)
Amortization of Purchase Accounting Adjustment	1,129,200
Total for Accum. Prov. For Uncollectible Acct. (144)	$ 6,041,458

Schedule Page: 110 Line No.: 44 Column: c

The decrease is due to intercompany tax settlements that were outstanding at December 31, 2010.

Schedule Page: 110 Line No.: 63 Column: c

All derivative transactions were liquidated and settled in the fourth quarter of 2011 due to MF Global's bankruptcy.

Schedule Page: 110 Line No.: 69 Column: c

The balance in Unamortized Debt Expenses (181) was adjusted due to the purchase of KU by PPL in November 2010, as these costs are considered to have no fair value in purchase accounting under US GAAP. However, since KU receives recovery of these costs in rates through the embedded cost of capital, the balance of $4,662,536 was reclassified to Other Regulatory Assets (182.3) in purchase accounting. The balance continues to amortize over the remaining term of the debt. The following reflects the purchase accounting adjustment:

Unamortized Debt Expense (181) Without Purchase Accounting	$ 21,600,912
Purchase Accounting Adjustment	(4,662,536)
2011 Amortization of Purchase Accounting Adjustment	216,672
2010 Amortization of Purchase Accounting Adjustment	36,112
Total Unamortized Debt Expenses (181)	$ 17,191,160

Schedule Page: 110 Line No.: 69 Column: d

The balance in Unamortized Debt Expenses (181) was adjusted due to the purchase of KU by PPL in November 2010, as these costs are considered to have no fair value in purchase accounting under US GAAP. However, since KU receives recovery of these costs in rates through the embedded cost of capital, the balance of $4,662,536 was reclassified to Other Regulatory Assets (182.3) in purchase accounting. The balance continues to amortize over the remaining term of the debt. The following reflects the purchase accounting adjustment:

Unamortized Debt Expense (181) Without Purchase Accounting	$ 21,213,643
Purchase Accounting Adjustment	(4,662,536)
Amortization of Purchase Accounting Adjustment	36,112
Total Unamortized Debt Expenses (181)	$ 16,587,219

First mortgage bonds were issued November 16, 2010, resulting in debt issuance expenses of $12,620,048 to be amortized over the life of the related issues, of which $119,194 was amortized through December 31, 2010. A revolving credit facility was set up on November 1, 2010, resulting in setup fees of $4,255,435 to be amortized over the term of the credit facility, of which $169,070 was amortized through December 31, 2010.

Schedule Page: 110 Line No.: 72 Column: c

The balance in Other Regulatory Assets (182.3) was adjusted to reflect regulatory offsets due to the purchase of KU by PPL in November 2010. The adjustments represent the fair value of coal supply contracts based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts, the reclassification of Unamortized Debt Expenses, and the fair value of a lease contract based upon the difference between the estimated market price of the leased property and the actual lease costs. The balances will be amortized as the underlying purchase accounting adjustments are amortized. See footnotes for Page 110, Line 69, Column c and Page 112, Line 59, Column c.

Other Regulatory Assets (182.3) Without Purchase Accounting	$ 268,828,297
Purchase Accounting Adjustment – unamortized debt expenses	4,662,536
2011 Amortization of Purchase Accounting Adjustment – unamortized debt expenses	(216,672)
2010 Amortization of Purchase Accounting Adjustment – unamortized debt expenses	(36,112)
Purchase Accounting Adjustment – coal supply contracts	22,605,479
2011 Amortization of Purchase Accounting Adjustment – coal supply contracts	(11,735,750)
2010 Amortization of Purchase Accounting Adjustment – coal supply contracts	(4,728,247)
Purchase Accounting Adjustments – rent commitments	900,950
2011 Amortization of Purchase Accounting Adjustment – rent commitments	(221,286)

Total for Other Regulatory Assets (182.3)	$ 280,059,195

Schedule Page: 110 Line No.: 72 Column: d

The balance in Other Regulatory Assets (182.3) was adjusted to reflect regulatory offsets due to the purchase of KU by PPL in November 2010. The adjustments represent the fair value of coal supply contracts based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts, the reclassification of Unamortized Debt Expenses, and the fair value of a lease contract based upon the difference between the estimated market price of the leased property and the actual lease costs. Purchase Accounting Adjustment – unamortized debt expenses	4,662,536
Amortization of Purchase Accounting Adjustment – unamortized debt expenses	(36,112)
Purchase Accounting Adjustment – coal supply contracts	22,605,479
Amortization of Purchase Accounting Adjustment – coal supply contracts	(4,728,247)
Purchase Accounting Adjustments – rent commitments	900,950
Total for Other Regulatory Assets (182.3)	$ 231,807,962

Schedule Page: 110 Line No.: 78 Column: c

The balance in Miscellaneous Deferred Debits (186) was adjusted due to the purchase of KU by PPL in November 2010. The account was adjusted for coal supply contracts, a power purchase contract, emission allowances and goodwill attributed to KU. Coal supply contracts were adjusted to reflect the fair value based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts. Using the offer of a transaction by another owner as an indication of the fair value, the fair value of the power purchase contract was calculated using a weighted average of the announced offer and the allotted megawatt multiplied by KU’s megawatt capacity. The value assigned to the purchase power contract was the difference between KU’s original investment and the $39 million for KU. Emission allowances were adjusted to current market prices of SO2 and NOx at the acquisition date.

The adjustments for coal supply contracts, emission allowances and the power purchase contract were recorded with a regulatory liability offset since the actual costs of these contracts are recoverable through rate mechanisms. The value of the coal contracts is amortized ratably by year over the life of the contracts. The value of emission allowances is amortized over the life of the allowances. The value of the power purchase agreement is amortized over the term of the contract, ending in March 2026. The value assigned to goodwill will not be amortized. See footnote for Page 112, Line 60, Column c. The following reflects the purchase accounting adjustments:

Miscellaneous Deferred Debits (186) Without Purchase Accounting	$ 41,140,563
Purchase Accounting Adjustment – purchase power contract	38,582,028
2011 Amortization of Purchase Accounting Adjustment – purchase power contract	(2,432,244)
2010 Amortization of Purchase Accounting Adjustment – purchase power contract	(464,152)
Purchase Accounting Adjustment – emission allowances	9,259,090
2011 Amortization of Purchase Accounting Adjustment – emission allowances	(5,771,743)

2010 Amortization of Purchase Accounting Adjustment – emission allowances	(983,780)
Purchase Accounting Adjustment – coal supply contracts	144,919,879
2011 Amortization of Purchase Accounting Adjustment – coal supply contracts	(39,807,234)
2010 Amortization of Purchase Accounting Adjustment – coal supply contracts	(3,338,879)
Goodwill	607,404,368
Total for Miscellaneous Deferred Debits (186)	$ 788,507,896

Schedule Page: 110 Line No.: 78 Column: d

The balance in Miscellaneous Deferred Debits (186) was adjusted due to the purchase of KU by PPL in November 2010. The account was adjusted for coal supply contracts, a power purchase contract, emission allowances and goodwill attributed to KU. Coal supply contracts were adjusted to reflect the fair value based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts. Using the offer of a transaction by another owner as an indication of the fair value, the fair value of the power purchase contract was calculated using a weighted average of the announced offer and the allotted megawatt multiplied by KU's megawatt capacity. The value assigned to the purchase power contract was the difference between KU's original investment and the $39 million for KU. Schedule Page: 112 Line No.: 7 Column: c

The balance in Other Paid-in Capital (208-211) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value, the balance was adjusted for a step-up in value compared to the net book value of the investment in EEI net of deferred taxes, the fixed rate pollution control bonds net of taxes and goodwill. The balance also includes elimination of Retained Earnings (215, 215.1, 216) at October 31, 2010. See footnotes for Page 110, Lines 21, Column c, Page 110, Line 78, Column c, Page 110, Line 82, Column c, Page 112, Line 11, Column c, Page 112, Line 21, Column c and Page 112, Line 64, Column c. The following reflects the purchase accounting adjustment:

Other Paid-in Capital (208-211) Without Purchase Accounting	$ 315,858,083
Purchase Accounting Adjustment - goodwill	607,404,368
Purchase Accounting Adjustment – EEI investment	7,569,645
Purchase Accounting Adjustment – pollution control bonds	(709,649)
Purchase Accounting Adjustment – prior retained earnings	1,418,324,387
Total for Other Paid-in Capital (208-211)	$ 2,348,446,834

Schedule Page: 112 Line No.: 7 Column: d

The balance in Other Paid-in Capital (208-211) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value, the balance was adjusted for a step-up in value compared to the net book value of the investment in EEI net of deferred taxes, the fixed rate pollution control bonds net of taxes and goodwill. The balance also includes elimination of Retained Earnings (215, 215.1, 216) at October 31, 2010. See footnotes for Page 110, Lines 21, Column d, Page 110, Line 78, Column d, Page 110, Line 82, Column d, Page 112, Line 11, Column d, Page 112, Line 21, Column d and Page 112, Line 64, Column d. Other Paid-in Capital (208-211) Without Purchase Accounting	$ 315,858,083
Purchase Accounting Adjustment - goodwill	607,404,368
Purchase Accounting Adjustment – EEI investment	7,569,645
Purchase Accounting Adjustment – pollution control bonds	(709,649)
Purchase Accounting Adjustment – prior retained earnings	1,418,324,387
Total for Other Paid-in Capital (208-211)	$ 2,348,446,834

Schedule Page: 112 Line No.: 11 Column: c

The balance in Retained Earnings (215, 215.1, 216) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment eliminated Retained Earnings at October 31, 2010 and included amortization of purchase accounting adjustments recorded as of the acquisition date. See footnotes for Page 112, Line 7, Column c; Page 114, Line 4, Column c; Page 114, Line 17, Column c; Page 114, Line 18, Column c; Page 114, Line 36, Column c and Page 114, Line 62, Column c. The following reflects the purchase accounting adjustment:

Retained Earnings (215, 215.1, 216) Without Purchase Accounting	$ 1,490,663,791
Elimination of Retained Earnings	(1,404,083,567)
2011 Amortization of Purchase Accounting Adjustment – rent commitment (net of deferred taxes of $(12,297))	(19,315)
2010 Amortization of Purchase Accounting Adjustment – rent commitment (net of deferred taxes of $12,297)	19,315
2011 Amortization of Purchase Accounting Adjustment – pollution control bonds (net of deferred taxes of $25,793)	40,513
2010 Amortization of Purchase Accounting Adjustment – pollution control bonds (net of deferred taxes of	

$4,299)	6,752
2011 Deferred Tax on Amortization of Purchase Accounting Adjustment – EEI investment (see Line 12 Column c footnote for related Purchase Accounting Adjustment)	344,678
2010 Deferred Tax on Amortization of Purchase Accounting Adjustment – EEI investment (see Line 12 Column c footnote for related Purchase Accounting Adjustment)	57,448
Eliminate Deferred Tax on Purchase Accounting Adjustment – Other Comprehensive Income	1,267,489
Total for Retained Earnings (215, 215.1, 216)	$ 88,297,104

Schedule Page: 112 Line No.: 11 Column: d

The balance in Retained Earnings (215, 215.1, 216) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment eliminated Retained Earnings at October 31, 2010 and included amortization of purchase accounting adjustments recorded as of the acquisition date. See footnotes for Page 112, Line 7, Column d. The following reflects the purchase accounting adjustment:

Retained Earnings (215, 215.1, 216) Without Purchase Accounting	$ 1,439,351,594
Elimination of Retained Earnings	(1,404,083,567)
2010 Amortization of Purchase Accounting Adjustment – rent commitment (net of deferred taxes of $12,297)	19,315
2010 Amortization of Purchase Accounting Adjustment – pollution control bonds (net of deferred taxes of $4,299)	6,752
2010 Deferred Tax on Amortization of Purchase Accounting Adjustment – EEI investment (see Line 12 Column d footnote for related Purchase Accounting Adjustment)	57,448
Total for Retained Earnings (215, 215.1, 216)	$ 35,351,542

Schedule Page: 112 Line No.: 12 Column: c

The balance in Unappropriated Undistributed Subidiary Earnings (216.1) was adjusted for Equity in Earnings for year (418.1) due to the purchase of KU by PPL in November 2010. This adjustment represents the amortization of KU’s purchase accounting adjustment related to KU’s investment in EEI:

Unappropriated Undistributed Subsidary Earnings (216.1) Without Purchase Accounting	$ 16,355,595
Purchase Accounting Adjustment	(14,240,820)
2011 Amortization of Purchase Accounting Adjustment (see Line 11 Column c footnote for related deferred tax)	(886,084)
2010 Amortization of Purchase Accounting Adjustment (see Line 11 Column c footnote for related deferred tax)	(147,681)
Total for Undistributed Subsidary Earnings (216.1)	$ 1,081,010

Schedule Page: 112 Line No.: 12 Column: d

The balance in Unappropriated Undistributed Subidiary Earnings (216.1) was adjusted for Equity in Earnings for year (418.1) due to the purchase of KU by PPL in November 2010. This adjustment represents the amortization of KU’s purchase accounting adjustment related to KU’s investment in Electric Energy, Inc:

Unappropriated Undistributed Subsidary Earnings (216.1) Without Purchase Accounting	$ 14,432,396
Purchase Accounting Adjustment	(14,240,820)
2010 Amortization of Purchase Accounting Adjustment (see Line 11 Column d footnote for related deferred tax)	(147,681)

Total for Undistributed Subsidary Earnings (216.1)	$	43,895

Schedule Page: 112 Line No.: 15 Column: c

The balance in Accumulated Other Comprehensive Income (219) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment eliminated EEI's Accumulated Other Comprehensive Income to Other Paid-In Capital (211) related to its pension and postretirement plans. See footnote for Page 110, Line 21, Column c, Page 112, Line 7, Column c and Page 112, Line 64, Column c. The following reflects the purchase accounting adjustment:

Accumulated Other Comprehensive Income (219) Without Purchase Accounting	$	(2,457,900)
Purchase Accounting Adjustment		1,990,823
Total for Accumulated Other Comprehensive Income (219)	$	(467,077)

Schedule Page: 112 Line No.: 15 Column: d

The balance in Accumulated Other Comprehensive Income (219) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment eliminated EEI's Accumulated Other Comprehensive Income to Other Paid-In Capital (211) related to its pension and postretirement plans. See footnote for Page 110, Line 21, Column d, Page 112, Line 7, Column d and Page 112, Line 64, Column d. The following reflects the purchase accounting adjustment:

Accumulated Other Comprehensive Income (219) Without Purchase Accounting	$	(1,993,677)
Purchase Accounting Adjustment		1,990,823
Total for Accumulated Other Comprehensive Income (219)	$	(2,854)

Schedule Page: 112 Line No.: 21 Column: c

The balance in Other Long-Term Debt (224) was adjusted due to the purchase of KU by PPL in November 2010. The balance was adjusted to reflect the fair value of the fixed rate pollution control bonds as of the acquisition date. The adjustment is the difference between the market value of the bonds using a market interest rate and the actual interest rate. The adjustment will be amortized over the remaining life of the bonds. The following reflects the purchase accounting adjustment:

Other Long-Term Debt (224) Without Purchase Accounting	$	-
Purchase Accounting Adjustment		1,161,455
2011 Amortization of Purchase Accounting Adjustment		(66,306)
2010 Amortization of Purchase Accounting Adjustment		(11,051)
Total for Other Long-Term Debt (224)	$	1,084,098

Schedule Page: 112 Line No.: 21 Column: d

The balance in Other Long-Term Debt (224) was adjusted due to the purchase of KU by PPL in November 2010. The balance was adjusted to reflect the fair value of the fixed rate pollution control bonds as of the acquisition date. The adjustment is the difference between the market value of the bonds using a market interest rate and the actual interest rate. The adjustment will be amortized over the remaining life of the bonds. The following reflects the purchase accounting adjustment:

Other Long-Term Debt (224) Without Purchase Accounting	$	-
Purchase Accounting Adjustment		1,161,455
Amortization of Purchase Accounting Adjustment		(11,051)
Total for Other Long-Term Debt (224)	$	1,150,404

Schedule Page: 112 Line No.: 39 Column: c

Balance represents drawdown of money pool in fourth quarter 2010 paid off during the first quarter of 2011.

Schedule Page: 112 Line No.: 50 Column: c

All derivative transactions were liquidated and settled in the fourth quarter 2011 due to MF Global's bankruptcy.

Schedule Page: 112 Line No.: 59 Column: c

The balance in Other Deferred Credits (253) was adjusted due to the purchase of KU by PPL in November 2010. The adjustments represent the fair value of certain coal supply contracts based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts and the fair value of a lease contract based upon the difference between the estimated market price of the leased property and the actual lease costs. The adjustments were recorded with a regulatory liability offset since the actual costs of these contracts are recoverable through rate mechanisms. The value of the coal contracts is amortized ratably by year over the life of the contracts. The value of the lease contract is amortized over the term of the lease. See footnote for Page 110, Line 72, Column c. The following reflects the purchase accounting adjustments:

Other Deferred Credits (253) Without Purchase Accounting	$ 6,945,601
Purchase Accounting Adjustment – coal supply contracts	22,605,479
2011 Amortization of purchase accounting adjustment – coal supply contracts	(11,735,750)
2010 Amortization of purchase accounting adjustment – coal supply contracts	(4,728,247)
Purchase Accounting Adjustment – rent commitment	900,950
2011 Amortization of purchase accounting adjustment – rent commitment	(189,673)
2010 Amortization of purchase accounting adjustment – rent commitment	(31,612)
Total for Other Deferred Credits (253)	$ 13,766,748

Schedule Page: 112 Line No.: 59 Column: d

The balance in Other Deferred Credits (253) was adjusted due to the purchase of KU by PPL in November 2010. The adjustments represent the fair value of certain coal supply contracts based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts and the fair value of a lease contract based upon the difference between the estimated market price of the leased property and the actual lease costs. The adjustments were recorded with a regulatory liability offset since the actual costs of these contracts are recoverable through rate mechanisms. The value of the coal contracts is amortized ratably by year over the life of the contracts. The value of the lease contract is amortized over the term of the lease. See footnote for Page 110, Line 72, Column c. The following reflects the purchase accounting adjustments:

Other Deferred Credits (253) Without Purchase Accounting	$ 8,491,443
Purchase Accounting Adjustment – coal supply contracts	22,605,479
Amortization of purchase accounting adjustment – coal supply contracts	(4,728,247)
Purchase Accounting Adjustment – rent commitment	900,950
Amortization of purchase accounting adjustment – rent commitment	(31,612)
Total for Other Deferred Credits (253)	$ 27,238,013

Schedule Page: 112 Line No.: 60 Column: c

The balance in Other Regulatory Liabilities (254) was adjusted to reflect regulatory offsets due to the purchase of KU by PPL in November 2010. The account was adjusted for coal supply contracts, emissions allowances and a power purchase contract. Coal contracts were adjusted to reflect the fair value based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts. Emissions allowances were adjusted to reflect the fair value based upon the difference between the estimated market prices and the actual cost of the allowances. Using the offer of a transaction by another owner as an indication of the fair value, the fair value of the power purchase contract was calculated using a weighted average of the announced offer and the allotted megawatt multiplied by KU's megawatt capacity. The value assigned to the purchase power contract was the difference between KU's original investment and the $39 million for KU.

The balances will be amortized as the underlying purchase accounting adjustments are amortized. See footnote for Page 110, Line 78, Column c. The following reflects the purchase accounting adjustments:

Other Regulatory Liabilities (254) Without Purchase Accounting	$ 108,313,656
Purchase Accounting Adjustment - coal supply contracts	144,919,879
2011 Amortization of Purchase Accounting Adjustment - coal supply contracts	(39,807,234)
2010 Amortization of Purchase Accounting Adjustment – coal supply contracts	(3,338,879)
Purchase Accounting Adjustment - Allowances	9,259,090
2011 Amortization of Purchase Accounting Adjustment - emission allowances	(5,771,743)
2010 Amortization of Purchase Accounting Adjustment - emission allowances	(983,780)
Purchase Accounting Adjustment - power purchase contract	38,582,028
2011 Amortization of Purchase Accounting Adjustment - power purchase contract	(2,432,244)
2010 Amortization of Purchase Accounting Adjustment - power purchase contract	(464,152)
Total for Other Regulatory Liabilities (254)	$ 248,276,621

Schedule Page: 112 Line No.: 60 Column: d

The balance in Other Regulatory Liabilities (254) was adjusted to reflect regulatory offsets due to the purchase of KU by PPL in November 2010. The account was adjusted for coal supply contracts, emissions allowances, and a power purchase contract. Coal contracts were adjusted to reflect the fair value based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts. Emissions allowances were adjusted to reflect the fair value based upon the difference between the estimated market prices and the actual cost of the allowances. Using the offer of a transaction by another owner as an indication of the fair value, the fair value of the power purchase contract was calculated using a weighted average of the announced offer and the allotted megawatt multiplied by KU's megawatt capacity. The value assigned to the purchase power contract was the difference between KU's original investment and the $39 million for KU.

The balances will be amortized as the underlying purchase accounting adjustments are amortized. See footnote for Page 110, Line 78, Column d. The following reflects the purchase accounting adjustments:

Other Regulatory Liabilities (254) Without Purchase Accounting	$ 55,112,630
Purchase Accounting Adjustment - coal supply contracts	144,919,879
Amortization of Purchase Accounting Adjustment - coal supply contracts	(3,338,879)

Purchase Accounting Adjustment - Allowances	9,259,090
Amortization of Purchase Accounting Adjustment - emission allowances	(983,780)
Purchase Accounting Adjustment - power purchase contract	38,582,028
Amortization of Purchase Accounting Adjustment - power purchase contract	(464,152)
Total for Other Regulatory Liabilities (254)	$ 243,086,816

Schedule Page: 112 Line No.: 64 Column: c

The balance in Accumulated Deferred Income Taxes – Other (283) was adjusted due to the purchase of KU by PPL in November 1, 2010. The purchase accounting adjustments were to reflect the deferred income tax impact of purchase accounting adjustments related to emission allowances, certain coal supply contracts and a power purchase contract, and regulatory assets for certain coal contracts and a lease contract as of the acquisition date. The deferred income taxes are amortized as the underlying purchase accounting adjustments are amortized. See footnotes for Page 110, Line 21, Column c; Page 110, Line 72, Column c; and, Page 110, Line 78, Column c. The following reflects the purchase accounting adjustments:

Accumulated Deferred Income Taxes (283) Without Purchase Accounting	$ 63,837,724
Purchase Accounting Adjustment – power purchase contract	15,008,409
2011 Amortization of purchase accounting adjustment – power purchase contract	(946,143)
2010 Amortization of purchase accounting adjustment – power purchase contract	(180,555)
Purchase Accounting Adjustment – emission allowances	3,601,785
2011 Amortization of purchase accounting adjustment – emission allowances	(2,245,208)
2010 Amortization of purchase accounting adjustment – emission allowances	(382,690)
Purchase Accounting Adjustment – coal supply contracts	56,373,833
2011 Amortization of purchase accounting adjustment – coal supply contracts	(15,485,014)
2010 Amortization of purchase accounting adjustment – coal supply contracts	(1,298,823)
Purchase Accounting Adjustment – regulatory asset for coal supply contracts	8,793,531
2011 Amortization of purchase accounting adjustment – regulatory asset for coal supply contracts	(4,565,207)
2010 Amortization of purchase accounting adjustment – regulatory asset for coal supply contracts	(1,839,288)
Purchase Accounting Adjustment – regulatory asset for lease contract	350,470
2011 Amortization of purchase accounting adjustment – lease contract	(86,080)
Purchase Accounting Adjustment – EEI investment	8,161,214
2011 Amortization of purchase accounting adjustment – EEI investment	(344,678)
2010 Amortization of purchase accounting adjustment – EEI investment	(57,448)
Eliminate Deferred Tax on Purchase Accounting Adjustment – Other Comprehensive Income	(1,267,489)
Total for Accumulated Deferred Income Taxes (283)	$ 127,428,343

Schedule Page: 112 Line No.: 64 Column: d

The balance in Accumulated Deferred Income Taxes – Other (283) was adjusted due to the purchase of KU by PPL in November 1, 2010. The purchase

BLANK

accounting adjustments were to reflect the deferred income tax impact of purchase accounting adjustments related to emission allowances, certain coal supply contracts and a power purchase contract, and regulatory assets for certain coal contracts and a lease contract as of the acquisition date. The deferred income taxes are amortized as the underlying purchase accounting adjustments are amortized. See footnotes for Page 110, Line 21, Column d; Page 110, Line 72, Column d; and, Page 110, Line 78, Column d. The following reflects the purchase accounting adjustments:

Accumulated Deferred Income Taxes (283) Without Purchase Accounting	$ 49,762,543
Purchase Accounting Adjustment – power purchase contract	15,008,409
Amortization of purchase accounting adjustment – power purchase contract	(180,555)
Purchase Accounting Adjustment – emission allowances	3,601,785
Amortization of purchase accounting adjustment – emission allowances	(382,690)
Purchase Accounting Adjustment – coal supply contracts	56,373,833
Amortization of purchase accounting adjustment – coal supply contracts	(1,298,823)
Purchase Accounting Adjustment – regulatory asset for coal supply contracts	8,793,531
Amortization of purchase accounting adjustment – regulatory asset for coal supply contracts	(1,839,288)
Purchase Accounting Adjustment – regulatory asset for lease contract	350,470
Purchase Accounting Adjustment – EEI investment	8,161,214
Amortization of purchase accounting adjustment – EEI investment	(57,448)
Total for Accumulated Deferred Income Taxes (283)	$ 138,292,981

Name of Respondent Kentucky Utilities Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2011/Q4

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

5. Do not report fourth quarter data in columns (e) and (f)
6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility columnin a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

STATEMENT OF INCOME FOR THE YEAR (Continued)

9. Use page 122 for important notes regarding the statement of income for any account thereof.
10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purches, and a summary of the adjustments made to balance sheet, income, and expense accounts.
12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.
13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly version.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, year to date, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436 - 439 inclusive). Show the contra primary account affected in column (b)
4. State the purpose and amount of each reservation or appropriation of retained earnings.
5. List first account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

STATEMENT OF CASH FLOWS

(1) Codes to be used:(a) Net Proceeds or Payments;(b)Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
(2) Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
(3) Operating Activities - Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
(4) Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

STATEMENT OF CASH FLOWS

(1) Codes to be used:(a) Net Proceeds or Payments;(b)Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
(2) Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
(3) Operating Activities - Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
(4) Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

NOTES TO FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.
9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

PAGE 122 INTENTIONALLY LEFT BLANK
SEE PAGE 123 FOR REQUIRED INFORMATION.

GLOSSARY OF TERMS AND ABBREVIATIONS

KU **-** Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E **-** Louisville Gas and Electric Company, a public utility affiliate of KU and subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LKE **-** LG&E and KU Energy LLC (formerly E.ON U.S. LLC), a subsidiary of PPL and the parent of KU, LG&E and other subsidiaries. PPL acquired E.ON U.S. LLC in November 2010 and changed the name to LG&E and KU Energy LLC. Within the context of this document, references to LKE also relate to the consolidated entity.

LKS **-** LG&E and KU Services Company, a subsidiary of LKE that provides services for LKE and its subsidiaries. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

PPL **-** PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, LKE and other subsidiaries.

PPL Energy Supply **-** PPL Energy Supply, LLC, an affiliate of KU, subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries.

Other terms and abbreviations

2011 Registration Statement **-** refers to the registration statement on Form S-4 filed with the SEC by KU (Registration No. 333-173675) on April 22, 2011, as amended by Amendment No. 1 filed with the SEC on May 26, 2011 and effective June 1, 2011.

Acid Rain Program **-** allowance trading system established by the Clean Air Act to reduce levels of sulfur dioxide. Under this program, affected power plants are allocated allowances based on their fuel consumption during specified baseline years and a specific emissions rate.

AFUDC **-** Allowance for Funds Used During Construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

AOCI **-** accumulated other comprehensive income or loss.

ARO **-** asset retirement obligation.

Bluegrass CTs **-** Three natural gas combustion turbines owned by Bluegrass Generation. KU and LG&E entered into an Asset Purchase Agreement with Bluegrass Generation for the purchase of these combustion turbines, subject to certain conditions including receipt of applicable regulatory approvals and clearances.

Bluegrass Generation **-** Bluegrass Generation Company, L.L.C., an exempt wholesale electricity generator in LaGrange, Kentucky.

CAIR **-** the EPA's Clean Air Interstate Rule.

Clean Air Act **-** federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

CPCN **-** Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of any plant, equipment, property or facility for furnishing of utility service to the public.

CSAPR **-** Cross-State Air Pollution Rule, the CSAPR implements Clean Air Act requirements concerning the transport of air pollution from power plants across state boundaries. The CSAPR replaces the 2005 CAIR, which the U.S. Court of Appeals for the D.C. Circuit ordered the EPA to revise in 2008. The court has granted a stay allowing CAIR to remain in place pending a ruling on the legal challenges to the CSAPR.

Dodd-Frank Act **-** the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DOE **-** Department of Energy, a U.S. government agency.

DSM **-** Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of DSM programs and revenues lost by implementing those programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

ECR **-** Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, effective January 1993, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which apply to coal combustion and by-products from the production of energy from coal.

EEI **-** Electric Energy, Inc., which owns and operates a coal-fired plant and a natural gas facility in southern Illinois.

EMF **-** electric and magnetic fields.

E.ON AG **-** a German corporation and the indirect parent of E.ON US Investments Corp., the former parent of LKE.

EPA **-** Environmental Protection Agency, a U.S. government agency.

FERC **-** Federal Energy Regulatory Commission, the federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

GAAP **-** Generally Accepted Accounting Principles in the U.S.

GHG - greenhouse gas(es).

Health Care Reform - The Patient Protection and Affordable Care Act (HR 3590) and the Health Care and Education Reconciliation Act of 2010 (HR 4872), signed into law in March 2010.

IRP **-** Integrated Resource Plan. Pursuant to Kentucky Administrative Regulation 807 5:058, Kentucky electric utilities are required to file triennially an IRP with the KPSC. The filing is to provide the utilities' load forecasts and resource plans to meet future demand with an adequate and reliable supply of electricity at the lowest possible cost for all customers while satisfying all related state and federal laws and regulations.

***IRS* -** Internal Revenue Service, a U.S. government agency.

***ISO* -** Independent System Operator.

***KPSC* -** Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

***KU 2010 Mortgage Indenture* -** KU's Indenture dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

***kWh* -** kilowatt-hour, basic unit of electrical energy.

***LIBOR* -** London Interbank Offered Rate.

***MATS* -** Mercury and Air Toxics Standards.

***MW* -** megawatt, one thousand kilowatts.

***MWh* -** megawatt-hour, one thousand kilowatt-hours.

***NERC* -** North American Electric Reliability Corporation.

***NGCC* -** Natural gas-fired combined-cycle turbine.

***NPDES* -** National Pollutant Discharge Elimination System.

***NPNS* -** the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception receive accrual accounting treatment.

***OCI* -** other comprehensive income or loss.

***Opacity* -** The degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity in power plant stack gas emissions.

***OVEC* -** Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek Plant in Ohio and the Clifty Creek Plant in Indiana, with combined nameplate capacities of 2,390 MW.

***PP&E* -** property, plant and equipment.

***Predecessor* -** refers to the KU pre-acquisition activity covering the time period prior to November 1, 2010.

***S&P* -** Standard & Poor's Ratings Services, a credit rating agency.

***SCR* -** selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber **-** an air pollution control device that can remove particulates and/or gases (such as sulfur dioxide) from exhaust gases.

SEC **-** the U.S. Securities and Exchange Commission, a U.S. government agency whose primary mission is to protect investors and maintain the integrity of the securities markets.

Securities Act of 1933 **-** the Securities Act of 1933, 15 U.S. Code, Sections 77a-77aa, as amended.

Successor **-** refers to the KU post-acquisition activity covering the time period after October 31, 2010.

Superfund **-** federal environmental legislation that addresses remediation of contaminated sites; states also have similar statutes.

TC2 **-** Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 549 MW of the capacity.

TRA **-** Tennessee Regulatory Authority, the state agency that has jurisdiction over the regulation of rates and service of utilities in Tennessee.

VaR **-** value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VIE **-** variable interest entity.

VSCC **-** Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

As permitted by the FERC for the Year Ended December 31, 2011 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2011, which was filed with the SEC on February 28, 2012. Accordingly, these Notes do not reflect updated information since this filing date.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

General

Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions unless otherwise noted.

Presentation

The accompanying financial statements are prepared on the regulatory basis of accounting in accordance with the requirements of the FERC, which is a comprehensive basis of accounting other than GAAP. The significant differences between GAAP and FERC reporting are as follows:

(a) Certain cost of removal obligations are recorded in accumulated depreciation for FERC reporting and recorded in regulatory liabilities for GAAP reporting;
(b) Long-term and short-term bonds are recorded in total in the long-term debt section for FERC reporting and are presented separately in current liabilities for the short-term portion and in long-term debt for the long-term portion for GAAP reporting;
(c) Deferred taxes are shown gross for FERC reporting in the Balance Sheet (a deferred asset and a deferred liability are recorded), for GAAP reporting the deferred taxes are netted together and recorded as a net asset or net liability; and
(d) Utility Plant is stated at cost for FERC reporting and at net fair value for assets recorded at November 1, 2010 for GAAP reporting.

Business and Consolidation

KU is engaged in the regulated generation, transmission, distribution and sale of electricity. KU serves its customers in Virginia under the Old Dominion Power name.

The financial statements and accompanying footnotes of KU have been segregated to present pre-acquisition activity as the "Predecessor" and post-acquisition activity as the "Successor." Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives in the Successor financial statements to conform to PPL's accounting policies. The cost basis of certain assets and liabilities were changed as of November 1, 2010 as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor period are not comparable to the Predecessor period. "Earnings reinvested" on the Balance Sheet of KU was reset to $0 as of November 1, 2010 and only reflects earnings and dividend activity since that date. See Note 5 for information about an application filed with the FERC regarding future dividend payments related to this push-down accounting impact.

The financial statements of KU include the company's own accounts as well as the accounts of any entities in which the company has a controlling financial interest. Entities for which a controlling financial interest is not demonstrated through voting interests are evaluated based on accounting guidance for VIEs. KU consolidates a VIE when it is determined to have a controlling interest in the VIE, and thus is the primary beneficiary of the entity. KU has no controlling interest in a VIE. Investments in entities in which a company has the ability to exercise significant influence but does not have a controlling financial interest are accounted for under the equity method. All other investments are carried at cost or fair value. All significant intercompany transactions have been eliminated. Any noncontrolling interests are reflected in the financial statements.

The financial statements of KU include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 10 for additional information.

Regulation

KU is a cost-based rate-regulated utility for which rates are set by regulators to enable KU to recover the costs of providing electric service and to provide a reasonable return to shareholders. Rates are generally established based on a historical test period adjusted to exclude unusual or nonrecurring items. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 4 for additional details regarding regulatory matters.

Accounting Records

The system of accounts is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." KU continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless recovery is assured.

Changes in Classification

The classification of certain amounts in the 2010 financial statements have been changed to conform to the current presentation. The changes in classification did not affect KU's net income or equity.

Comprehensive Income

Comprehensive income, which includes net income and OCI, consists of changes in equity from transactions not related to shareowners. Comprehensive income is shown on the Statements of Comprehensive Income.

KU had no AOCI balances at December 31, 2010 and 2011 (Successor periods). KU had $2 million of after-tax losses related to equity investees' AOCI during the ten months ended October 31, 2010 (a Predecessor period) which were eliminated with the effect of the PPL acquisition.

Price Risk Management

Energy and energy-related contracts are used to hedge the variability of expected cash flows associated with the generating units and marketing activities. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

All contracts that have been classified as derivative contracts are reflected on the balance sheet at their fair value. These contracts are recorded as "Price risk management assets" and "Price risk management liabilities" on the Balance Sheets. Derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent Liabilities."

Energy and energy-related trades are assigned a strategy and accounting classification. Processes exist that allow for subsequent review and validation of the trade information. These strategies are discussed in more detail in Note 15. The accounting department provides the traders and the risk management department with guidelines on appropriate accounting classifications for various trade types and strategies. Some examples of these guidelines include, but are not limited to:

- Physical coal, limestone, lime, electric transmission, gas transportation and renewable energy credit contracts are not derivatives due to the lack of net settlement provisions.

- Only contracts where physical delivery is deemed probable throughout the entire term of the contract can qualify for the NPNS exception.
- Derivative transactions that do not qualify for NPNS or hedge accounting treatment are marked to fair value through earnings.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the underlying nature of the hedged items.

KU has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

See Notes 14 and 15 for additional information on derivatives.

Revenue Recognition

Operating revenues are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all being read at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Unbilled wholesale energy revenues are recorded at month-end to reflect estimated amounts until actual dollars and MWhs are confirmed and invoiced. At that time, unbilled revenue is reversed and actual revenue is recorded.

Accounts Receivable

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition. See Note 7 for information related to the acquisition of LKE by PPL.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs, the age of the receivable, counterparty creditworthiness and economic conditions. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables, and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when it is known they will be received.

The changes in the allowance for doubtful accounts were:

	Balance at Beginning of Period	Additions: Charged to Income	Additions: Charged to Other Accounts (a)	Deductions (b)	Balance at End of Period
2011 - Successor	$ 6	$ 6	$ -	$ 10	$ 2
2010 - Successor	-	1	6	1	6
2010 - Predecessor	3	6	-	6	3

(a) Primarily related to capital projects, thus the provision was recorded as an adjustment to construction work in progress.
(b) Includes amounts associated with KU activity since the November 1, 2010 acquisition date. See Note 7 for additional information related to the acquisition of LKE.

Cash

Cash Equivalents

All highly liquid debt instruments purchased with original maturities of three months or less are considered to be cash equivalents.

Restricted Cash and Cash Equivalents

Bank deposits and other cash equivalents that are restricted by agreement or that have been clearly designated for a specific purpose are classified as restricted cash and cash equivalents. The change in restricted cash and cash equivalents is reported as an investing activity on the Statements of Cash Flows. On the Balance Sheets, the current portion of restricted cash and cash equivalents is included in "Other current assets" for KU while the noncurrent portion is included in "Other noncurrent assets." At December 31 the balances of restricted cash and cash equivalents were insignificant.

Fair Value Measurements

KU values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities including investments in defined benefit plans, and cash and cash equivalents. KU uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

KU classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1** - quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- **Level 2** - inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.
- **Level 3** - unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, KU's assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Short-term investments" ("Other current assets" if not material) on the Balance Sheets.

Equity Method Investment

KU's investment in EEI is included in "Investments" on the Balance Sheets. KU owns 20% of the common stock of EEI. Through a power marketer affiliated with its majority owner, EEI sells its output to third parties. KU's investment in EEI is accounted for under the equity method of accounting and amounted to $30 million at December 31, 2011 and 2010. As part of PPL's acquisition of LKE and its subsidiaries, the purchase accounting adjustment to reflect the EEI investment at fair value was calculated using the discounted cash flow valuation method. The fair value of the investment in EEI was calculated to be $30 million. The fair value adjustment to the investment is being amortized over the expected remaining useful life of the plant and equipment at EEI, which is estimated to be over 20 years. KU's direct exposure to loss as a result of its involvement with EEI is generally limited to the value of its investment.

Cost Method Investment

KU has an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Investments" on the KU Balance Sheet. KU and 11 other electric utilities are equity owners of OVEC, located in Piketon, Ohio. OVEC owns and operates two coal-fired plants, Kyger Creek Plant in Ohio and Clifty Creek Plant in Indiana, with combined nameplate generating capacities of 2,390 MW. OVEC's power is currently supplied to KU and 12 other companies affiliated with the various owners. KU owns 2.5% of OVEC's common stock. Pursuant to a power purchase agreement, KU is contractually entitled to its ownership percentage of OVEC's output, which is 60 MW.

KU's investment in OVEC is not significant. The direct exposure to loss as a result of KU's involvement with OVEC is generally limited to the value of its investment; however, KU may be conditionally responsible for a pro-rata share of certain OVEC obligations. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with the offset to a regulatory liability which are both being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition. See Notes 11 and 16 for additional discussion on the power purchase agreement.

Long-Lived and Intangible Assets

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor replacements are charged to expense as incurred. KU records costs associated with planned major maintenance projects in the period in which the costs are incurred. KU accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. See Note 4 for additional information.

AFUDC is capitalized as part of the construction costs for cost-based rate-regulated projects for which a return on such costs is recovered after the project is placed in service. The debt component of AFUDC is credited to "Interest Expense" and the equity component is credited to "Other Income (Expense) - net" on the Statements of Income. KU has not recorded significant AFUDC as a return has been provided during the construction period for most projects.

Included in PP&E on the Balance Sheets are capitalized costs of software projects that were developed or obtained for internal use. These capitalized costs are amortized ratably over the expected lives of the projects when they become operational, generally not to exceed five years. Following are capitalized software costs and the accumulated amortization.

December 31, 2011		December 31, 2010	
Gross Carrying Amount	**Accumulated Amortization**	**Gross Carrying Amount**	**Accumulated Amortization**
$ 49	$ 8	$ 40	$ 1

Amortization expense of capitalized software costs was as follows:

Successor		Predecessor
Year Ended December 31, 2011	**Two Months Ended December 31, 2010**	**Ten Months Ended October 31, 2010**
$ 7	$ 1	$ 6

The amortization of capitalized software is included in "Depreciation" on the Statements of Income.

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. The weighted-average rates of depreciation were 4.17% and 4.10% at December 31, 2011 and 2010.

As a result of the acquisition of LKE, the original cost for PP&E is its fair value on November 1, 2010, which approximated net book value. This fair value adjustment resulted in lowering the original cost basis of KU's PP&E, thus impacting the calculation of the weighted-average depreciation rate.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, KU considers the expected use of the asset; the expected useful life of other assets to which the useful life of the intangible asset may relate; legal, regulatory, or contractual provisions that may limit the useful life; the company's historical experience as evidence of its ability to support renewal or extension; the effects of obsolescence, demand, competition, and other economic factors; and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

KU accounts for emission allowances as intangible assets. KU is allocated emission allowances by state based on its generation facilities' historical emissions experience, and has purchased emission allowances generally when it is expected that additional allowances will be needed. The carrying value of allocated emission allowances is initially recorded at zero value and purchased allowances are initially recorded based on their purchase price. KU emission allowances acquired in the LKE acquisition were recorded at fair value on the date of acquisition. See Note 7 for additional information on the acquisition. When consumed or sold, emission allowances are removed from the Balance Sheet at their weighted-average carrying value. Since the economic benefits of emission allowances are not diminished until they are consumed, emission allowances are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Fuel" on the Statements of Income. Gains and losses on the sale of emission allowances are included in "Other operation and maintenance" on the Statements of Income.

Asset Impairment

KU reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable. For example, certain emission allowances are expected to be sold rather than consumed. These emission allowances are tested for impairment when events or changes in circumstances, such as a decline in market prices, indicate that their carrying value may not be recoverable.

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

Goodwill is reviewed for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment after a portion of goodwill has been allocated to a business to be disposed of. If the carrying amount of KU, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

Asset Retirement Obligations

KU records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased to reflect changes in the obligation due to the passage of time through the recognition of accretion expense classified within "Other operation and maintenance" on the Statements of Income. The accretion and depreciation related to KU's AROs are offset with a regulatory credit on the income statement, such that there is no earnings impact. The regulatory asset created by the regulatory credit is relieved when the ARO is settled.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is amortized over the remaining life of the associated long-lived asset. See Note 17 for additional information on AROs.

Compensation and Benefits

Defined Benefits

KU does not directly sponsor any defined benefit plans. KU participates in a qualified funded defined benefit pension and a funded other postretirement benefit plan. These plans are applicable to the majority of the employees of KU and are sponsored by LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of the plans to KU based on its participation. KU records an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LKE uses an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan’s projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan’s projected benefit obligation or the market-related value of plan assets and less than 30% of the plan’s projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 9 for a discussion of defined benefits.

Other

Debt Issuance Costs

Debt issuance costs are deferred and amortized over the appropriate term for the related debt using the interest method or another method, generally straight-line, if the results obtained are not materially different than those that would result from the interest method.

Income Taxes

KU is included in PPL's consolidated U.S. federal income tax return. Prior to PPL's acquisition of LKE, KU was included in E.ON US Investments Corp.'s consolidated U.S. federal income tax return.

Significant management judgment is required in developing KU's provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. KU uses a two-step process to evaluate tax positions. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements of KU in the future.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

KU records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. KU considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If KU determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if KU determines that it is not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

KU defers investment tax credits when the credits are utilized and amortizes the deferred amounts over the average lives of the related assets.

KU recognizes interest and penalties in "Income Taxes" on the Statements of Income.

See Note 3 for additional discussion regarding income taxes.

The income tax provision for KU is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if KU filed a separate return. Tax benefits are not shared between companies. A tax benefit inures only to the entity that gave rise to said benefit. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. KU's intercompany tax receivable was $5 million at December 31, 2011 and the intercompany tax payable was $15 million at December 31, 2010.

The provision for KU's deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheet in noncurrent "Regulatory assets" or "Regulatory liabilities."

Taxes, Other Than Income

KU presents sales taxes in "Accounts Payable" and value-added taxes in "Taxes" on its Balance Sheet. These taxes are not reflected on the Statements of Income. See Note 3 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Leases

KU evaluates whether arrangements entered into contain leases for accounting purposes. See Note 8 for a discussion of arrangements under which KU is a lessee for accounting purposes.

Fuel, Materials and Supplies

Fuel and materials and supplies are valued at the lower of cost or market using the average cost method. Fuel costs for electric generation are charged to expense as used. See Note 4 for further discussion of the fuel adjustment clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31.

	2011	2010
Fuel	$ 97	$ 95
Materials and supplies	44	41
Total	$ 141	$ 136

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 11 for further discussion of recorded and unrecorded guarantees.

New Accounting Guidance Adopted

Presentation of Comprehensive Income

Effective December 31, 2011, KU retrospectively adopted accounting guidance that was issued to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items that are recorded in OCI. This guidance requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements where the first statement includes the components of net income and the second statement includes the components of OCI.

Regardless of whether an entity chooses to present comprehensive income in a single continuous statement or in two separate but consecutive statements, the guidance also would have required an entity to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. However, subsequent to the issuance of this new accounting guidance, this requirement that companies present reclassification adjustments for each component of OCI in both net income and OCI on the face of the financial statements was deferred for further evaluation. The deferral did not change the requirement to present items of net income, items of other comprehensive income and total comprehensive income in either one continuous statement or two separate consecutive statements.

KU has elected to present two separate consecutive statements of comprehensive income. The adoption of this standard resulted in a change in presentation and additional footnote disclosure that did not have a significant impact on KU.

2. Preferred Securities

Preferred Stock

KU is authorized to issue up to 5,300,000 shares of preferred stock without par value. KU had no preferred stock issued or outstanding in 2011 or 2010.

Preference Stock

KU is authorized to issue up to 2,000,000 shares of preference stock without par value. KU had no preference stock issued or outstanding in 2011 or 2010.

3. Income and Other Taxes

The provision for KU's deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the KPSC, VSCC, TRA and the FERC. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory liabilities" on the Balance Sheets.

Significant components of KU's deferred income tax assets and liabilities were as follows:

	2011	2010
Deferred Tax Assets		
Regulatory liabilities and other	$ 58	$ 92
Deferred investment tax credit (a)	39	1
Income taxes due to customers	7	5
Accrued pension costs	9	9
Liabilities and other	6	6
Total deferred tax assets	119	113
Deferred Tax Liabilities		
Plant - net	500	350
Regulatory assets and other	98	133
Total deferred tax liabilities	598	483
Net deferred tax liability	$ 479	$ 370

(a) Changes in balance primarily relate to investment tax credits for TC2, which began dispatching electricity in January 2011. See discussion on TC2 below.

KU expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010
Taxes, other than income			
Property and other	$ 19	$ 1	$ 9

In June 2006, KU and LG&E filed a joint application with the DOE requesting certification to be eligible for $125 million in investment tax credits ($101 million to KU and $24 million to LG&E) applicable to the construction of TC2. All necessary DOE and IRS approvals were subsequently received. In September 2007, KU and LG&E received an Order from the KPSC approving the accounting of the investment tax credits, which includes full depreciation basis adjustment for the amount of the credits. The income tax impacts from recording the depreciation basis adjustment and from amortizing these credits over the life of the related property began in January 2011, when LKE began dispatching electricity from TC2 to meet customer demand. In 2011, $2 million of net tax benefits were recognized for KU and LG&E.

Unrecognized Tax Benefits

KU's unrecognized tax benefits and changes in those unrecognized tax benefits are insignificant at December 31, 2011 and 2010. For KU, no significant changes in unrecognized tax benefits are projected over the next 12 months. At December 31, the total unrecognized tax benefits and related indirect effects that, if recognized, would decrease the effective tax rate were insignificant for KU.

At December 31, 2011 and 2010, the receivable (payable) balances were recorded for interest related to tax positions. The amounts for KU were insignificant. The interest expense (benefit) was recognized in income taxes. The amount for KU was insignificant.

Tax Jurisdictions

The income tax provisions for KU are calculated in accordance with an intercompany tax sharing policy which provides that taxable income be calculated as if each subsidiary filed a separate consolidated return. KU indirectly or directly files tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2011, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

U.S. (federal) (a)	10/31/2010 and prior
Kentucky (state)	2006 and prior

(a) For KU, 2008 and 2009, as well as the ten month period ending October 31, 2010, remain open under the standard three year statute of limitations; however, the IRS has completed its audit of these periods under the Compliance Assurance Process, effectively closing them to audit adjustments. No issues remain outstanding.

4. Utility Rate Regulation

As discussed in Note 1 and summarized below, KU reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the balance sheet date. As such, the primary items classified as current are related to rate mechanisms that periodically adjust to account for over- or under-collections.

KU is subject to the jurisdiction of the KPSC, FERC, VSCC and TRA.

KU’s Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and notes payable) including certain adjustments to exclude non-regulated investments and environmental compliance costs recovered separately through the ECR mechanism. As such, regulatory assets generally earn a return.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheets with an offsetting regulatory asset or liability. KU recovers in customer rates the cost of coal contracts, power purchases and emission allowances. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at the acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate making impact of the fair value adjustments. KU's customer rates will continue to reflect the original contracted prices for these contracts.

KU's Virginia base rates are calculated based on a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities, except the levelized fuel factor, are excluded from the return on rate base utilized in the calculation of Virginia base rates; therefore, no return is earned on the related assets.

KU's rates to municipal customers for wholesale requirements are calculated based on annual updates to a rate formula that utilizes a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities are excluded from the return on rate base utilized in the development of municipal rates; therefore, no return is earned on the related assets.

The following tables provide information about the regulatory assets and liabilities of cost-based rate-regulated utility operations.

	2011	2010
Current Regulatory Assets:		
Coal contracts (a)	$ -	$ 4
Virginia fuel factor	-	5
Total current regulatory assets	$ -	$ 9
Noncurrent Regulatory Assets:		
Defined benefit plans	$ 114	$ 117
Storm costs	57	57
Unamortized loss on debt	12	12
Coal contracts (a)	6	14
AROs	7	2
Other	21	19
Total noncurrent regulatory assets	$ 217	$ 221
Current Regulatory Liabilities:		
Coal contracts (a)	$ -	$ 15
ECR	7	12
Other	3	13
Total current regulatory liabilities	$ 10	$ 40
Noncurrent Regulatory Liabilities:		
Coal contracts (a)	$ 102	$ 126
Power purchase agreement - OVEC (a)	36	38
Net deferred tax assets	8	6
Defined benefit plans	9	10
Other	5	6
Total noncurrent regulatory liabilities	$ 160	$ 186

(a) These regulatory assets and liabilities were recorded as offsets to certain intangible assets and liabilities that were recorded at fair value upon the acquisition of LKE.

Regulatory Assets and Liabilities

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

Defined Benefit Plans

Recoverable costs of defined benefit plans represent the portion of unrecognized transition obligation, prior service cost and net actuarial losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices. These regulatory assets and liabilities are adjusted at least annually or whenever the funded status of defined benefit plans is re-measured. Of the regulatory asset and liability balances recorded, $10 million are expected to be amortized into net periodic defined benefit costs in 2012. All costs will be amortized over the average service lives of plan participants.

Storm Costs

KU has the ability to request from the KPSC and VSCC the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer and amortize such costs for regulatory accounting and reporting purposes. Once such authority is granted, KU can request recovery of those expenses in a base rate case.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2036 for KU.

ECR

Kentucky law permits KU to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Federal Clean Air Act and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from coal-fired electric generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is recovered within 12 months. KU is authorized to receive a 10.63% return on equity for the 2005, 2006 and 2009 compliance plans and a 10.10% return on projects associated with the 2011 compliance plan.

Coal Contracts

As a result of purchase accounting associated with PPL's acquisition of LKE, KU's coal contracts were recorded at fair value on the Balance Sheets with offsets to regulatory assets for those contracts with unfavorable terms relative to current market prices and offsets to regulatory liabilities for those contracts with favorable terms relative to current market prices. These regulatory assets and liabilities are being amortized over the same terms as the related contracts, which expire at various times through 2016.

Fuel Adjustments

KU's retail rates contain a fuel adjustment clause, whereby variances in the cost of fuel for electric generation, including transportation costs, from the costs embedded in base rates are adjusted in KU's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel clause and, to the extent appropriate, reestablish the fuel charge included in base rates.

KU also employs a levelized fuel factor mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The Virginia levelized fuel factor allows fuel recovery based on projected fuel costs for the coming year plus an adjustment for any under- or over-recovery of fuel expenses from the prior year. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are recovered within 12 months.

AROs

As noted in Note 1, the accretion and depreciation related to KU's AROs are offset with a regulatory credit on the income statement, such that there is no earnings impact. When an asset with an ARO is retired, the related ARO regulatory asset created by the regulatory credit is offset against the associated regulatory liability, PP&E and ARO liability.

DSM

DSM consists of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. KU's rates contain a DSM rate mechanism that provides for concurrent recovery of DSM costs and also provides an incentive for implementing DSM programs. The provision also allows KU to recover revenues from lost sales associated with the DSM programs up to the earlier of three years or implementation of new base rates which reflect that load reduction. In addition, with the KPSC Order issued in November 2011, the DSM mechanism now includes a provision to earn a return of and on capital investment for DSM programs. The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanism.

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, KU's fair value of the OVEC power purchase agreement was recorded on the balance sheet with an offset to a regulatory liability. The regulatory liability is being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition, and has no impact on rate making.

Regulatory Liability Associated with Net Deferred Tax Assets

KU's regulatory liabilities associated with net deferred tax assets represent the future revenue impact from the reversal of deferred income taxes required primarily for unamortized investment tax credits. These regulatory liabilities are recognized when the offsetting deferred tax assets are recognized. For general-purpose financial reporting, these regulatory liabilities and the deferred tax assets are not offset; rather, each is displayed separately.

Regulatory Matters

Kentucky Activities

Environmental Upgrades

In order to achieve compliance with new and pending federal EPA regulations including the CSAPR, National Ambient Air Quality Standards and MATS, in June 2011, KU filed an ECR plan with the KPSC requesting approval to install environmental upgrades for certain of its coal-fired plants and for recovery of the associated capital costs, as well as operating expenses incurred. The ECR plan detailed upgrades that will be made to certain of its coal-fired generating plants to continue to be compliant with EPA regulations. KU requested $1.1 billion to upgrade fabric-filter baghouse systems for increased particulate and mercury control on all units at the E.W. Brown and Ghent generating plants and to convert a wet storage facility to a dry landfill at the E.W. Brown generating plant.

In November 2011, KU and LG&E filed a joint unanimous settlement agreement, stipulation and recommendation with the KPSC. In December 2011, KU and LG&E received KPSC approval in their proceedings relating to the ECR plans. The KPSC Order approved the terms of the November 2011 settlement agreement entered into between KU and LG&E and the parties to the ECR proceedings. The KPSC Order authorized the installation of environmental upgrades at certain plants during 2012-2016 representing approximate capital costs of $900 million at KU and $1.4 billion at LG&E. In connection with the approved projects, the KPSC Order allowed recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and granted CPCNs for their construction. The KPSC Order also confirmed an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans and provided for an authorized return on equity of 10.10% for the approved projects in the 2011 ECR proceedings. The KPSC Order noted KU's consent to defer the requested approval for certain environmental upgrades at its E.W. Brown generating plant, which represented approximately $200 million in capital costs. KU retained the right to operate and dispatch the E.W. Brown generating plant in accordance with applicable environmental standards and the right to request approval of the deferred projects and related costs in future regulatory proceedings. See Note 11 for additional information.

IRP

IRP regulations in Kentucky require major utilities to make triennial IRP filings with the KPSC. In April 2011, KU and LG&E filed their 2011 joint IRP with the KPSC. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information. In May 2011, the KPSC issued a procedural schedule and data discovery concluded during the fourth quarter. The IRP assumes approximately 500 MW of peak demand reductions by 2017 through existing or expanded DSM or energy efficiency programs. Implementation of the major findings of the IRP is subject to further analysis and decision-making and further regulatory approvals. KU and LG&E are awaiting the KPSC Staff report, which will close this proceeding.

CPCN Filing

In September 2011, KU and LG&E filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. KU will own a 78% undivided interest, and LG&E will own a 22% undivided interest in the new NGCC. In addition, KU and LG&E also requested approval to purchase the Bluegrass CTs which are expected to provide up to 495 MW of peak generation supply. KU will own a 31% undivided interest, and LG&E will own a 69% undivided interest in the purchased assets. In conjunction with these developments, at the end of 2015, KU anticipates retiring one coal-fired generating unit at its Tyrone plant and two at its Green River plant. These generating units represent 234 MW of combined summer capacity.

KU anticipates that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $500 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012.

PPL's Acquisition of LKE

In September 2010, the KPSC approved a settlement agreement among PPL and all of the intervening parties to PPL's joint application to the KPSC for approval of its acquisition of ownership and control of LKE, LG&E and KU. In the settlement agreement, the parties agreed that KU and LG&E would commit that no base rate increases would take effect before January 1, 2013. Under the terms of the settlement, KU and LG&E retain the right to seek KPSC approval for the deferral of "extraordinary and uncontrollable costs," such as significant storm restoration costs, if incurred. Additionally, interim rate adjustments will continue to be permissible during that period for existing recovery mechanisms such as the ECR and DSM.

In connection with the approval of PPL's acquisition of LKE, KU and LG&E agreed to implement the Acquisition Savings Sharing Deferral (ASSD) methodology whereby KU’s and LG&E's adjusted jurisdictional revenues, expenses, and net operating income are calculated each year. If KU’s or LG&E's actual earned rate of return on common equity is in excess of 10.75%, fifty percent of the excess amount will be deferred as a regulatory liability and ultimately returned to customers. The first ASSD filing will be made by April 1, 2012 based on the 2011 calendar year. Based upon 2011 earnings and their current estimates of the outcome of an ASSD filing in 2012, KU and LG&E have not recognized any impact of the ASSD in the financial statements as of December 31, 2011. The ASSD methodology for each of KU’s and LG&E's utility operations will terminate on the earlier of the end of 2015 or the first day of the calendar year during which new base rates go into effect.

Independent Transmission Operators

KU operates under a FERC-approved open access transmission tariff. KU contracts with the Tennessee Valley Authority, to act as its transmission reliability coordinator, and Southwest Power Pool, Inc. (SPP), to function as its independent transmission operator, pursuant to FERC requirements. The contract with SPP expires on August 31, 2012. KU has received FERC approval to transfer from SPP to TranServ International, Inc. as its independent transmission operator beginning September 1, 2012. Approval from the KPSC is required, and an application requesting approval was filed in January 2012.

Storm Costs

In September 2009, the KPSC approved the deferral of $57 million of costs associated with a severe ice storm that occurred in January 2009 and a wind storm that occurred in February 2009. Additionally, in December 2008, the KPSC approved the deferral of $2 million of costs associated with high winds from the remnants of Hurricane Ike in September 2008. KU received approval in its 2010 base rate case to recover these regulatory assets over a ten-year amortization period ending July 2020.

DSM/Energy Efficiency

In April 2011, KU filed a DSM application to expand existing energy efficiency programs and implement new energy efficiency programs. Discovery and evidentiary phases concluded in September 2011. In November 2011, the KPSC approved the application as filed. The new rates were effective December 30, 2011.

<u>Virginia Activities</u>

IRP

Pursuant to a December 2008 Order, KU filed the 2011 joint IRP with the VSCC in September 2011, with certain supplemental information as required by this Order. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information and assumes approximately 500 MW of peak demand reductions by 2017 through existing or expanded DSM or energy efficiency programs. Implementation of the major findings of the IRP is subject to further analysis and decision-making and further regulatory approvals.

Virginia Fuel Factor

In February 2011, KU filed an application with the VSCC seeking approval of an increase in its fuel cost factor beginning with service rendered in April 2011. In March 2011, a hearing was held on KU's requested fuel factor, and an Order was issued approving a revised fuel factor to be in effect beginning with service rendered on and after April 1, 2011, with recovery of the regulatory asset for prior period under-recoveries over a three-year amortization period.

Storm Costs

In December 2009, a major snowstorm hit KU's Virginia service area causing approximately 30,000 customer outages. During the normal 2009 Virginia Annual Information Filing (AIF), KU requested that the VSCC establish a regulatory asset and defer for future recovery $6 million in incremental operation and maintenance expenses related to the storm restoration. In March 2011, the VSCC Staff issued its report on KU's 2009 AIF stating that it considered this storm damage to be extraordinary, non-recurring and material to KU. The Staff report also recommended establishing a regulatory asset for these costs, with recovery over a five-year period upon approval in the next base rate case. In March 2011, a regulatory asset of $6 million was established for actual costs incurred. In June 2011, the VSCC issued an Order approving the recommendations contained in the Staff report, and KU began recovering these costs over a five-year amortization period ending October 2016.

5. Financing Activities

Credit Arrangements and Short-term Debt

Credit facilities are maintained to enhance liquidity and provide credit support, and as a backstop to commercial paper programs, when necessary. The following credit facilities were in place at:

	December 31, 2011				
	Expiration Date	Capacity	Borrowed (a)	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (b) (c)	Oct. 2016	$ 400	$ -	$ -	$ 400
Letter of Credit Facility (c) (d)	Apr. 2014	198	n/a	198	-
Total KU Credit Facilities		$ 598	$ -	$ 198	$ 400

	December 31, 2010	
	Borrowed (a)	Letters of Credit Issued
Syndicated Credit Facility (b) (c)	$ -	$ 198
Letter of Credit Facility (c) (d)	n/a	n/a
Total KU Credit Facilities	$ -	$ 198

(a) Amounts borrowed are recorded as "Short-term debt" on the Balance Sheets.

(b) In October 2011, KU amended its credit facility. The amendments include extending the expiration dates from December 2014 to October 2016. Under this credit facility, KU continues to have the ability to make cash borrowings and request the lenders to issue letters of credit.

(c) In June 2011, the Syndicated Credit Facility was amended such that the fees and the spreads to benchmark interest rates for borrowings depended upon the company's senior secured long-term debt rating rather than the senior unsecured long-term debt rating. The facilities each contain a financial covenant requiring KU's debt to total capitalization not to exceed 70%, as calculated in accordance with the facilities, and other customary covenants. Additionally, subject to certain conditions, KU may request that the Syndicated Credit Facility's capacity be increased by up to $100 million.

(d) In April 2011, KU entered into a letter of credit facility that has been used to issue letters of credit to support outstanding tax-exempt bonds. The facility contains a financial covenant requiring KU's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility. KU pays customary commitment and letter of credit fees under the new facility. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than its senior unsecured long-term debt rating.

In February 2012, KU established a commercial paper program for up to $250 million to provide an additional financing source to fund its short-term liquidity needs. Commercial paper issuances will be supported by KU's Syndicated Credit Facility.

See Note 12 for discussion of intercompany borrowings.

Long-term Debt

	2011 (a)	2010
First Mortgage Bonds (b)	$ 1,500	$ 1,500
Pollution Control Bonds (Collateral Series), due 2023-2037 (c)	351	351
Fair value adjustments from purchase accounting (d)	1	1
Unamortized discount	(10)	(11)
Total Long-term Debt	$ 1,842	$ 1,841

(a) Aggregate maturities of long-term debt are zero for each of 2012 through 2015, $250; 2016, $0; and $1,601 thereafter.

None of the debt securities outstanding have sinking fund requirements.

(b) At December 31, 2011 and December 31, 2010, interest rates range from 1.625% to 5.125%, and maturities range from 2015 to 2040.

KU's first mortgage bonds are secured by the lien of the KU 2010 Mortgage Indenture, which creates a lien, subject to certain exceptions and exclusions, on substantially all of KU's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity. The aggregate carrying value of the property subject to the lien was $4.1 billion and $4.0 billion at December 31, 2011 and December 31, 2010.

The KU first mortgage bonds were issued in 2010 in private offerings to qualified institutional buyers and other transactions not subject to registration requirements under the Securities Act of 1933. In April 2011, KU filed its 2011 Registration Statement with the SEC related to offers to exchange the first mortgage bonds with similar but registered securities. The 2011 Registration Statement became effective in June 2011 and the exchange was completed in July 2011, with substantially all securities being exchanged.

(c) In October 2010, KU issued a series of first mortgage bonds to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amount, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the KU 2010 Mortgage Indenture and are secured as noted in (b) above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of KU. The related revenue bond documents allow KU to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2011, the aggregate tax-exempt revenue bonds issued on behalf of KU that were in a term rate mode totaled $27 million. The weighted average rate on these bonds was 5.83%. At December 31, 2010, the amounts that were in a term rate mode totaled $27 million. The weighted average rate on these bonds was 5.83%.

At December 31, 2011, the aggregate tax-exempt revenue bonds issued on behalf of KU that were in a variable rate mode totaled $324 million. The weighted average rate on these bonds was 0.15%. At December 31, 2010, the amounts that were in a variable rate mode totaled $324 million. The weighted average rate on these bonds was 0.38%.

Several series of the tax-exempt revenue bonds are insured by monoline bond insurers whose ratings were reduced due to exposures relating to insurance of sub-prime mortgages. Of the bonds outstanding, $96 million are in the form of insured auction rate securities, wherein interest rates are reset every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. During 2008, interest rates increased, and KU experienced failed auctions when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture. As noted above, the instruments governing these auction rate bonds permit KU to convert the bonds to other interest rate modes.

Certain variable rate tax-exempt revenue bonds totaling $228 million at December 31, 2011, are subject to tender for purchase by KU at the option of the holder and to mandatory tender for purchase by KU upon the occurrence of certain events.

(d) Reflects adjustments made to record KU's long-term debt at fair value at the time of acquisition of LKE in 2010.

Distributions, Capital Contributions and Related Restrictions

KU is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. KU believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. Also, under Virginia law, KU is prohibited from making loans to affiliates without the prior approval of the VSCC.

There are no comparable statutes under Kentucky law applicable to KU. However, Orders from the KPSC require KU to obtain prior regulatory consent or approval before loaning funds to PPL. At December 31, 2011, the net restricted assets of KU were approximately $2.7 billion.

During the year ended December 31, 2011, KU paid dividends of $124 million to its parent, LKE. No capital contributions were received from LKE during this period.

In February 2012, KU filed an application with the FERC seeking authorization to pay dividends in the future based on retained earnings balances, which would be calculated ignoring the impact of the accounting for the acquisition by PPL. If approved, as of December 31, 2011, this would increase the balance available for dividends from KU by $1.4 billion. KU does not anticipate changing its dividend practices.

6. Acquisitions, Development and Divestitures

KU continuously evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results.

Acquisition

Pending Bluegrass CTs Acquisition

In September 2011, KU and LG&E entered into an Asset Purchase Agreement with Bluegrass Generation for the purchase of the Bluegrass CTs, aggregating approximately 495 MW, plus limited associated contractual arrangements required for operation of the units, for a purchase price of $110 million. Pursuant to the Asset Purchase Agreement, KU and LG&E will jointly acquire the Bluegrass CTs as tenants in common, with KU as owner of a 31% undivided interest, and LG&E as owner of a 69% undivided interest, in the purchased assets. The purchase is subject to receipt of approvals from the KPSC, the FERC, certain permit assignments or local approvals, and other conditions. Either party can terminate the Asset Purchase Agreement should the purchase transaction fail to occur by June 30, 2012.

Development

NGCC Construction

In September 2011, KU and LG&E requested KPSC approval to build a 640 MW NGCC at the existing Cane Run plant site in Kentucky. This project is also subject to certain regulatory approvals. Once all approvals are received, construction is expected to begin in 2012 and be complete by 2016. The project, which includes building a natural gas supply pipeline, has an expected cost of approximately $580 million. See Note 4 for additional information.

In conjunction with this request and to meet new, stricter federal EPA regulations, KU and LG&E anticipate retiring six older coal-fired electric generating units at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. The Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed.

TC2

In January 2011, KU began dispatching electricity from TC2 to meet customer demand. See Note 11 for additional information regarding the construction of TC2.

7. Acquisition of LKE

In November 2010, KU issued debt totaling $1.5 billion. The majority of these proceeds was applied to repay borrowings from a PPL Energy Supply subsidiary. Such borrowings were incurred to permit LKE to repay certain indebtedness owed to affiliates of E.ON AG upon the closing of the acquisition. See Note 5 for additional information.

On November 1, 2010, PPL completed its acquisition of LKE and its subsidiaries. The push-down basis of accounting was used to record the fair value adjustments of assets and liabilities on LKE at the acquisition date. PPL paid cash consideration for the equity interests in LKE and its subsidiaries of $2,493 million and provided a capital contribution on November 1, 2010, of $1,565 million; included within this was the consideration paid of $2,656 million for KU. The allocation of the purchase price was based on the fair value of assets acquired and liabilities assumed.

The push-down accounting for the fair value of assets acquired and liabilities assumed was as follows.

Current assets	$ 341
Investments	30
PP&E	4,531
Other intangibles (current and noncurrent)	201
Regulatory and other noncurrent assets	274
Current liabilities, excluding current portion of long-term debt	(367)
PPL affiliate indebtedness	(1,331)
Long-term debt (current and noncurrent)	(352)
Other noncurrent liabilities	(1,278)
Net identifiable assets acquired	2,049
Goodwill	607
Net assets acquired and beginning equity balance on November 1, 2010	$ 2,656

Goodwill represents value paid for the rate regulated businesses of KU, which is located in a defined service area with a constructive regulatory environment, which provides for future investment, earnings and cash flow growth, as well as the talented and experienced workforce. KU's franchise value is being attributed to the going concern value of the business, and thus was recorded as goodwill rather than a separately identifiable intangible asset. None of the goodwill recognized is deductible for income tax purposes or included in customer rates.

Adjustments to KU's assets and liabilities that contributed to goodwill are as follows:

The fair value adjustment on the EEI investment was calculated using the discounted cash flow valuation method. The result was an increase in KU's value of the investment in EEI; the fair value of EEI was calculated to be $30 million and a fair value adjustment of $18 million was recorded on KU. The fair value adjustment to EEI is amortized over the expected remaining useful life of plant and equipment at EEI, which is estimated to be over 20 years.

The pollution control bonds, excluding the reacquired bonds, had a fair value adjustment of $1 million for KU. All variable bonds were valued at par while the fixed rate bonds were valued with a yield curve based on average credit spreads for similar bonds.

As a result of the purchase accounting associated with the acquisition, the following items had a fair value adjustment but no effect on goodwill as the offset was either a regulatory asset or liability. The regulatory asset or liability has been recorded to eliminate any ratemaking impact of the fair value adjustments:

- The value of OVEC was determined to be $126 million based upon an announced transaction by another owner. KU's investment in OVEC was not significant and the power purchase agreement was valued at $39 million for KU. An intangible asset was recorded with the offset to regulatory liability and is amortized using the units of production method until March 2026, the expiration date of the agreement at the date of the acquisition.

- KU recorded an emission allowance intangible asset and a regulatory liability as the result of adjusting the fair value of the emission allowances at KU. The emission allowance intangible of $9 million at KU represents allocated and purchased sulfur dioxide and nitrogen oxide emission allowances that were unused as of the valuation date or allocated for use in future years. KU previously recorded emission allowances as other materials and supplies. To conform to PPL's accounting policy all emission allowances are now recorded as intangible assets. The emission allowance intangible asset is amortized as the emission allowances are consumed, which is expected to occur through 2040.

- Coal contract intangible assets were recorded at KU for $145 million as well as a non-current liability of $22 million on the Balance Sheets. An offsetting regulatory asset was recorded for those contracts with unfavorable terms relative to market. An offsetting regulatory liability was recorded for those contracts that had favorable terms relative to market. All coal contracts held by KU, wherein it had entered into arrangements to buy amounts of coal at fixed prices from counterparties at a future date, were fair valued. The intangible assets and other liabilities, as well as the regulatory assets and liabilities, are being amortized over the same terms as the related contracts, which expire through 2016.

- Adjustments on November 1, 2010 were made to record LKE pension assets at fair value, remeasure its pension and postretirement benefit obligations at current discount rates and eliminate accumulated other comprehensive income (loss). An increase of $1 million in the liability balances of KU was recorded, due to the lowering of the discount rate; this was credited to the respective pension and postretirement liability balances with offsetting adjustments made to the related regulatory assets and liabilities.

The fair value of intangible assets and liabilities (e.g. contracts that have favorable or unfavorable terms relative to market), including coal contracts and power purchase agreements, as well as emission allowances, have been reflected on the Balance Sheets with offsetting regulatory assets or liabilities. Prior to the acquisition, KU recovered the cost of the coal contracts, power purchases and emission allowances and this rate treatment will continue after the acquisition. As a result, management believes the regulatory assets and liabilities created to offset the fair value adjustments meet the recognition criteria established by existing accounting guidance and eliminate any ratemaking impact of the fair value adjustments. KU's customer rates will continue to reflect these items (e.g. coal, purchased power, emission allowances) at their original contracted prices.

KU also considered whether a separate fair value should be assigned to KU's rights to operate within its various electric distribution service areas but concluded that these rights only provided the opportunity to earn a regulated return and barriers to market entry, which in management's judgment is not considered a separately identifiable intangible asset under applicable accounting guidance; rather, it is considered going-concern value, or goodwill.

8. Leases

E.W. Brown Combustion Turbines

KU and LG&E are participants in a sale-leaseback transaction involving two combustion turbines at the E.W. Brown generating plant. In December 1999, after selling their interests in the combustion turbines, KU and LG&E entered into an 18-year lease of the turbines. KU and LG&E provided funds to fully defease the lease and have the right to exercise an early purchase option contained in the lease after 15.5 years, which will occur in 2015. The financial statement treatment of this transaction is the same as if KU and LG&E had retained their ownership interest. Since the lease was defeased, there are no remaining minimum lease payments and all related PP&E is reflected on the Balance Sheets. See Note 10 for the balances included on the Balance Sheets related to this transaction. Depreciation expense was insignificant for all periods presented.

Upon a default under the lease, KU and LG&E are obligated to pay to the lessor their share of certain amounts. Primary events of default include loss or destruction of the combustion turbines, failure to insure or maintain the combustion turbines and unwinding of the transaction due to governmental actions. No events of default currently exist with respect to the lease. Upon any termination of the lease, whether by default or expiration of its term, title to the combustion turbines reverts to KU and LG&E. The maximum aggregate amount at December 31, 2011 that could be required to be paid by KU is $4 million and by LG&E is $2 million. LKE has guaranteed the payment of these potential default payments of KU and LG&E.

Other Leases

KU has entered into various agreements for the lease of office space, vehicles, land and other equipment.

Rent - Operating Leases

Rent expense for operating leases was as follows:

Successor		Predecessor
Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010
$ 10	$ 2	$ 8

Total future minimum rental payments for all operating leases are estimated to be:

2012	$ 9
2013	7
2014	6
2015	5
2016	2
Thereafter	4
Total	$ 33

9. Retirement and Postemployment Benefits

Defined Benefits

Although KU does not directly sponsor any defined benefit plans, it is allocated a portion of the funded status and costs of plans sponsored by LKE based on its participation in those plans, which management believes are reasonable. The defined benefit pension plans of LKE and its subsidiaries were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans. The actuarially determined obligations of current active employees and retired employees of KU are used as a basis to allocate total plan activity, including active and retiree costs and obligations. KU's allocated share of the funded status of the pension plans resulted in a liability of $83 million and $113 million at December 31, 2011 and 2010. KU's allocated share of other postretirement benefits was a liability of $62 million at December 31, 2011 and 2010.

The following table provides net periodic benefit costs charged to operating expense for January 1, 2011 through December 31, 2011, and November 1, 2010 through December 31, 2010, for the Successor, and January 1, 2010 through October 31, 2010, for the Predecessor.

Pension Benefits (a)

Successor		Predecessor
2011	**2010**	**2010**
$ 10	$ 2	$ 8

Other Postretirement Benefits (a)

Successor		Predecessor
2011	**2010**	**2010**
$ 4	$ 1	$ 3

(a) KU was allocated these costs of defined benefit plans sponsored by LKE, based on its participation in those plans, which management believes are reasonable.

Contributions

KU made contributions to the defined benefit pension plan in which is participates of $43 million and $13 million in 2011 and 2010. In 2012, KU made a contribution of $15 million to the pension plan.

KU is not required to make contributions to the other postretirement benefit plan that it participates in but has historically funded this plan in amounts equal to the postretirement benefit costs. KU funded this plan $7 million and $8 million in 2011 and 2010. Continuation of this past practice would cause KU to contribute $13 million to the other postretirement benefit plan in 2012.

Savings Plans

Substantially all of KU's employees are eligible to participate in deferred savings plans (401(k)s). Employer contributions to the plans were as follows.

Successor		Predecessor
Year Ended December 31, 2011	**Two Months Ended December 31, 2010**	**Ten Months Ended October 31, 2010**
$ 6	$ 1	$ 4

Health Care Reform

In March 2010, Health Care Reform was signed into law. Many provisions of Health Care Reform do not take effect for an extended period of time, and most will require the publication of implementing regulations and/or issuance of program guidelines. As a result of this enactment, KU was not impacted but will continue to monitor the potential impact of any changes to the existing provisions and implementation guidance related to Health Care Reform on its benefit programs.

10. Jointly Owned Facilities

At December 31, 2011 and 2010, the Balance Sheets reflect the owned interests in the facilities listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
December 31, 2011				
Generating Plants				
Trimble County Units 7-10	63.00%	$ 109	$ 6	$ 5
E.W. Brown Units 6-7	62.00%	64	5	-
Trimble County Units 5-6	71.00%	66	2	4
Paddy's Run Unit 13 & E.W. Brown Unit 5	47.00%	39	2	4
Trimble County Unit 2	60.75%	758	35	17
December 31, 2010				
Generating Plants				
Trimble County Units 7-10	63.00%	$ 107	$ 1	$ 2
E.W. Brown Units 6-7	62.00%	64	2	-
Trimble County Units 5-6	71.00%	64	1	3
Paddy's Run Unit 13 & E.W. Brown Unit 5	47.00%	39	-	4
Trimble County Unit 2	60.75%	62	1	703

Each subsidiary owning these interests provides its own funding for its share of the facility. Each receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

11. Commitments and Contingencies

Energy Purchase Commitments

KU has a power purchase agreement with OVEC, extended in February 2011 to June 2040. FERC approval of the extension was received in May 2011, followed by KPSC and VSCC approvals in August 2011. Pursuant to the OVEC power purchase contract, KU is responsible for their pro-rata share of certain obligations of OVEC under defined circumstances. These potential liabilities include unpaid OVEC indebtedness as well as shortfall amounts in certain excess decommissioning costs and other post-employment and post-retirement benefit costs other than pension. KU’s proportionate share of OVEC's outstanding debt was $36 million at December 31, 2011. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses as follows:

2012	$ 9
2013	9
2014	9
2015	10
2016	10
Thereafter	264
	$ 311

In addition, KU had total energy purchases under the OVEC power purchase agreement for the periods ended as follows:

Successor		Predecessor
Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010
$ 10	$ 2	$ 7

KU enters into purchase contracts to supply the coal and natural gas requirements for generation facilities and LG&E's gas supply operations. The coal contracts extend through 2016 and the natural gas contracts extend through 2013. KU also enters into contracts for other coal related consumables, coal transportation and fleeting services, which expire at different time periods through 2018. KU also has transportation contracts for natural gas that extend through 2018.

Legal Matters

KU is involved in legal proceedings, claims and litigation in the ordinary course of business. KU cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

TC2 Construction

In June 2006, KU and LG&E, as well as the Indiana Municipal Power Agency and Illinois Municipal Electric Agency (collectively, TC2 Owners), entered into a construction contract regarding the TC2 project. The contract is generally in the form of a turnkey agreement for the design, engineering, procurement, construction, commissioning, testing and delivery of the project, according to designated specifications, terms and conditions. The contract price and its components are subject to a number of potential adjustments which may serve to increase or decrease the ultimate construction price. During 2009 and 2010, the TC2 Owners received several contractual notices from the TC2 construction contractor asserting historical force majeure and excusable event claims for a number of adjustments to the contract price, construction schedule, commercial operations date, liquidated damages or other relevant provisions. In September 2010, the TC2 Owners and the construction contractor agreed to a settlement to resolve the force majeure and excusable event claims occurring through July 2010, under the TC2 construction contract, which settlement provided for a limited, negotiated extension of the contractual commercial operations date and/or relief from liquidated damage calculations. With limited exceptions, the TC2 Owners took care, custody and control of TC2 in January 2011. Pursuant to certain amendments to the construction agreement, the contractor will complete modifications to the combustion system prior to certain dates to allow operation of TC2 on all specified fuels categories. The provisions of the construction agreement relating to liquidated damages were also amended. In September 2011, the TC2 Owners and the construction contractor entered into a further amendment to the construction agreement settling, among other matters, certain historical change order, labor rate and prior liquidated damages amounts. The remaining issues are still under discussion with the contractor. KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project.

Regulatory Issues

See Note 4 for information on regulatory matters related to utility rate regulation.

Enactment of Financial Reform Legislation

In July 2010, the Dodd-Frank Act was signed into law. The Dodd-Frank Act includes provisions that impose derivative transaction reporting requirements and require most over-the-counter derivative transactions to be executed through an exchange and to be centrally cleared. The Dodd-Frank Act also provides that the U.S. Commodity Futures Trading Commission (CFTC) may impose collateral and margin requirements for over-the-counter derivative transactions, as well as capital requirements for certain entity classifications. Final rules on major provisions in the Dodd-Frank Act are being established through rulemakings, and the CFTC generally has postponed implementation until the later of July 16, 2012 or when required key final rules are issued (e.g. definitional rules for "swap" and "swap dealer"). In order to comply with implementing regulations of the Dodd-Frank Act, KU likely will be faced with significant new recordkeeping and reporting requirements. Also, KU could face significantly higher operating costs or may be required to post additional collateral if it is subject to margin requirements as ultimately adopted in the implementing regulations of the Dodd-Frank Act. KU will continue to evaluate the provisions of the Dodd-Frank Act. At this time, KU cannot predict the impact that the law or its implementing regulations will have on its businesses or operations, or the markets in which it transacts business, but could incur material costs related to compliance with the Dodd-Frank Act.

FERC Market-Based Rate Authority

In November 1998, the FERC authorized KU to make wholesale sales of electric power and related products at market-based rates. In those orders, the FERC directed KU to file an updated market analysis within three years after the order, and every three years thereafter. Since then, periodic market-based rate filings with the FERC have been made by KU. Also, in June 2011, PPL filed its market-based rate update for the Southeast region, including KU. In June 2011, the FERC issued an Order approving KU's request for a determination that it no longer be deemed to have market power in the Big Rivers Electric Corporation balancing area and removing restrictions on their market-based rate authority in such region.

Currently, a seller granted FERC market-based rate authority may enter into power contracts during an authorized time period. If the FERC determines that the market is not workably competitive or that the seller possesses market power or is not charging "just and reasonable" rates, it may institute prospective action, but any contracts entered into pursuant to the FERC's market-based rate authority remain in effect and are generally subject to a high standard of review before the FERC can order changes. Recent court decisions by the U.S. Court of Appeals for the Ninth Circuit have raised issues that may make it more difficult for the FERC to continue its program of promoting wholesale electricity competition through market-based rate authority. These court decisions permit retroactive refunds and a lower standard of review by the FERC for changing power contracts, and could have the effect of requiring the FERC in advance to review most, if not all, power contracts. In June 2008, the U.S. Supreme Court reversed one of the decisions of the U.S. Court of Appeals for the Ninth Circuit, thereby upholding the higher standard of review for modifying contracts. At this time, KU cannot predict the impact of these court decisions on the FERC's future market-based rate authority program or on their businesses.

Energy Policy Act of 2005 - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. The FERC has indicated it intends to vigorously enforce the Reliability Standards using, among other means, civil penalty authority. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations. The first group of Reliability Standards approved by the FERC became effective in June 2007.

KU monitors its compliance with the Reliability Standards and continue to self-report potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a number of potential violations is pending. Any regional reliability entity determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC. KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any, other than the amounts currently recorded.

In the course of implementing its program to ensure compliance with the Reliability Standards by KU, certain other instances of potential non-compliance may be identified from time to time.

Environmental Matters

Due to the environmental issues discussed below or other environmental matters, KU may be required to modify, curtail, replace or cease operating certain facilities or operations to comply with statutes, regulations and other requirements of regulatory bodies or courts.

<u>Air</u>

The Clean Air Act addresses, among other things, emissions causing acid deposition, installation of best available control technologies for new or substantially modified sources, attainment of national ambient air quality standards, toxic air emissions and visibility standards in the U.S. Amendments to the Clean Air Act requiring additional emission reductions have been proposed but are unlikely to be introduced or passed in this Congress. The Clean Air Act allows states to develop more stringent regulations and in some instances, as discussed below, Kentucky has done so.

To comply with air-related requirements and other environmental requirements as described below, KU's forecast for capital expenditures reflects a best estimate projection of expenditures that may be required within the next five years. Such projections are a combined $1.5 billion for KU (which includes $400 million associated with currently approved ECR plans through 2013 to achieve emissions reductions and manage coal combustion residuals, $900 million associated with the recently approved 2011 ECR Plans for additional expenditures to comply with new clean air rules and manage coal combustion residuals and an additional $200 million for other environmental expenditures). Actual costs (including capital, allowance purchases and operational modifications) may be significantly lower or higher depending on the final requirements and market conditions. Certain environmental compliance costs incurred by KU in serving KPSC jurisdictional customers are subject to recovery through the ECR. See Note 4 for additional information on the ECR plan.

CSAPR (formerly Clean Air Transport Rule)

In July 2011, the EPA signed the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010, and made revisions to the rule on February 7, 2012. The CSAPR replaces the EPA's previous CAIR which was struck down by the U.S. Court of Appeals for the District of Columbia Circuit (the Court) in July 2008. CAIR subsequently was effectively reinstated by the Court in December 2008, pending finalization of the Transport Rule. Like CAIR and the proposed Transport Rule, the CSAPR only applies to KU's coal generation facilities located in Kentucky.

The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxides. The CSAPR established new sulfur dioxide emission allowance cap and trade programs that are completely independent of, and more stringent than, the current Acid Rain Program. The CSAPR also established new nitrogen oxides emission allowance cap and trade programs to replace the current programs. All trading is more restrictive than previously under CAIR. The CSAPR provides for two-phased programs of sulfur dioxide and nitrogen oxide emissions reductions, with initial reductions in 2012 and more stringent reductions in 2014.

In December 2011, the Court stayed implementation of the CSAPR and left CAIR in effect pending a final resolution on the merits of the validity of the rule. Oral argument on the various challenges to the CSAPR is scheduled for April 2012, and a final decision on the validity of the rule could be released as early as May 2012.

With respect to the KU coal-fired generating plants, the stay of the CSAPR will initially only impact the unit dispatch order. With the return of the CAIR and KU's significant number of sulfur dioxide allowances, those units will be dispatched with lower operating cost, but slightly higher sulfur dioxide and nitrogen oxide emissions. However, a key component of the Court's final decision, even if the CSAPR is upheld, will be whether the ruling delays the implementation of the CSAPR by one year for both Phases I and II, or instead still requires the significant sulfur dioxide and nitrogen oxide reductions associated with Phase II to begin in 2014. KU's CSAPR compliance strategy is based on over-compliance during Phase I to generate allowances sufficient to cover the expected shortage during the first two years of Phase II (2014 and 2015) when additional pollution control equipment will be installed. Should Phase I of the CSAPR be shortened to one year, it will be more difficult and costly to provide enough excess allowances in one year to meet the shortage projected for 2014 and 2015.

National Ambient Air Quality Standards

In addition to the reductions in sulfur dioxide and nitrogen oxide emissions required under the CSAPR for Kentucky plants, KU’s coal plants, may face further reductions in sulfur dioxide and nitrogen oxide emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates. The EPA has recently finalized a new one-hour standard for sulfur dioxide, and states are required to identify areas that meet those standards and areas that are in non-attainment. For non-attainment areas, states are required to develop plans by 2014 to achieve attainment by 2017. For areas in attainment or that are unclassifiable, states are required to develop maintenance plans by mid-2013 that demonstrate continued attainment. KU anticipates that some of the measures required for compliance with the CSAPR such as upgraded or new sulfur dioxide scrubbers at some of its plants or retirement of the Green River and Tyrone plants, will also be necessary to achieve compliance with the new one-hour sulfur dioxide standard. If additional reductions were to be required, the economic impact could be significant.

Mercury and Other Hazardous Air Pollutants

In May 2011, the EPA published a proposed regulation providing for stringent reductions of mercury and other hazardous air pollutants. On February 16, 2012, the EPA published the final rule, known as the Mercury and Air Toxics Standards (MATS), with an effective date of April 16, 2012. The rule provides for a three-year compliance deadline with the potential for a one-year extension as provided under the statute. Based on its assessment of the need to install pollution control equipment to meet the provisions of the proposed rule, KU filed requests with the KPSC for environmental cost recovery to facilitate moving forward with plans to install environmental controls including sorbent injection and fabric-filter baghouses to remove certain hazardous air pollutants. Recovery of the cost of certain controls was granted by KPSC order issued in December 2011. The cost for these controls is reflected in the combined costs of $1.5 billion noted under "Air" above. KU has also announced the anticipated retirement of coal-fired generating units at the Green River and Tyrone plants and has filed requests with the KPSC for replacement of those units with natural gas-fired generating units to be constructed or purchased. With the publication of the final MATS rule, KU is currently assessing whether changes in the final rule warrant revision of its approved compliance plans. KU is continuing to conduct in-depth reviews of the MATS.

Regional Haze and Visibility

KU submitted analyses of the visibility impacts of its Best Available Retrofit Technology (BART) eligible sources to the Kentucky Division for Air Quality. In the event that the EPA determines that compliance with the CSAPR would be insufficient to meet the BART requirements, it would be necessary for KU to reassess its planned compliance measures.

New Source Review (NSR)

The NSR regulations require major new or modified sources of regulated pollutants to receive pre-construction and operating permits with limits that prevent the significant deterioration of air quality in areas that are in attainment of the ambient air quality standards for certain pollutants.

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act.

In August 2007, KU received information requests for its Ghent plant, but has received no further communications from the EPA since providing their responses. KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In March 2009, KU received a notice alleging that KU violated certain provisions of the Clean Air Act's rules governing NSR and prevention of significant deterioration by installing sulfur dioxide scrubbers and SCR controls at its Ghent generating plant without assessing potential increased sulfuric acid mist emissions. KU contends that the work in question, as pollution control projects, was exempt from the requirements cited by the EPA. In December 2009, the EPA issued an information request on this matter. KU has exchanged settlement proposals and other information with the EPA regarding imposition of additional permit limits and emission controls and anticipates continued settlement negotiations. In addition, any settlement or future litigation could potentially encompass a September 2007 notice of violation alleging opacity violations at the plant. Depending on the provisions of a final settlement or the results of litigation, if any, resolution of this matter could involve significant increased operating and capital expenditures. KU cannot predict the final outcome of this matter, but currently do not expect such outcome to result in material losses above the respective amounts accrued by KU.

If KU is found to have violated NSR regulations, KU would, among other things, be required to meet permit limits reflecting Best Available Control Technology (BACT) for the emissions of any pollutant found to have significantly increased due to a major plant modification. The costs to meet such limits, including installation of technology at certain units, could be significant.

States and environmental groups also have initiated enforcement actions and litigation alleging violations of the NSR regulations by coal-fired plants, and KU is unable to predict whether such actions will be brought against any of its plants.

TC2 Air Permit

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an Order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which were incorporated into a final revised permit issued by the KDAQ in January 2010. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

Global Climate Change

There is concern nationally and internationally about global climate change and the possible contribution of GHG emissions including, most significantly, carbon dioxide, from the combustion of fossil fuels. This has resulted in increased demands for carbon dioxide emission reductions from investors, environmental organizations, government agencies and the international community. These demands and concerns have led to federal legislative proposals, actions at regional, state and local levels, litigation relating to GHG emissions and the EPA regulations on GHGs.

Greenhouse Gas Legislation

While climate change legislation was considered during the 111th Congress, the outcome of the 2010 elections has halted the debate on such legislation in the current 112th Congress. The timing and elements of any future legislation addressing GHG emission reductions are uncertain at this time. In the current Congress, legislation barring the EPA from regulating GHG emissions under the existing authority of the Clean Air Act has been passed by the U.S. House of Representatives. Various bills providing for barring or delaying the EPA from regulating GHG emissions have been introduced in the U.S. Senate, but the prospects for passage of such legislation remain uncertain. At the state level there are currently no prospects for such legislation in Kentucky.

Greenhouse Gas Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has the authority to regulate GHG emissions from new motor vehicles under the Clean Air Act, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that apply to 2012 model year vehicles. The EPA has also clarified that this standard triggers regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act starting in 2011. This means that any new sources or major modifications to existing sources causing a net significant emissions increase requires the BACT permit limits for GHGs. The EPA recently proposed guidance for conducting a BACT analysis for projects that trigger such a review. In addition, New Source Performance Standards for new and existing power plants were expected to be proposed in September 2011 and finalized in May 2012, but this has been delayed. The EPA is expected to announce a new schedule for this rulemaking in the future.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. To date the state has yet to issue a final plan. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting facilities, and the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of AEP v. Connecticut reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the lower court and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In Comer v. Murphy Oil, the U.S. Court of Appeals for the Fifth Circuit declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the Comer case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Court of Appeals' ruling. In May 2011, the plaintiffs in the Comer case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including KU and three other indirect subsidiaries of LKE, under a Mississippi statute that allows the re-filing of an action in certain circumstances. Additional litigation in federal and state courts over these issues is continuing. KU cannot predict the outcome of this litigation or estimate a range of reasonably possible losses, if any.

In 2011, KU and its jointly owned power plants emitted approximately 17 million tons of carbon dioxide compared with 18 million tons in 2010. All tons are U.S. short tons (2,000 lbs/ton).

<u>Water/Waste</u>

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The first approach would regulate CCRs as a hazardous waste under Subtitle C of the RCRA. This approach would have very significant impacts on any coal-fired plant, and would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The second approach would regulate CCRs as a solid waste under Subtitle D of the RCRA. This approach would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, KU expects that several of its plants in Kentucky could be significantly impacted by the requirements of Subtitle D of the RCRA, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. KU has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several plants and KU has implemented certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) that requests comments on selected documents that the EPA received during the comment period for the proposed regulations. Comments were submitted on the NODA in November 2011. In addition, the U.S. House of Representatives in October 2011 approved a bill to modify Subtitle D of the RCRA to provide for the proper management and disposal of CCRs and that would preclude the EPA from regulating CCRs under Subtitle C of the RCRA. The bill has been introduced in the Senate and the prospect for passage of this legislation is uncertain. In January 2012, a coalition of environmental groups filed a 60-day notice of intent to sue the EPA for failure to perform nondiscretionary duties under RCRA, which could require a hard deadline for EPA to issue strict CCR regulations. In February 2012, a CCR recycling company also issued a 60-day notice of intent to sue the EPA over its timeliness in issuing CCR regulations, but that company requests that the EPA take a Subtitle D approach that would allow for continued recycling of CCRs.

KU cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on its facilities, but the economic impact could be significant.

Seepages and Groundwater Infiltration

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various plants. KU has completed or is completing assessments of seepages or groundwater infiltration at various facilities and is working with agencies to implement abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

Other Issues

In 2006, the EPA significantly decreased to 10 parts per billion (ppb) the drinking water standards related to arsenic. In Kentucky, this arsenic standard has been incorporated into the states' water quality standards and could result in more stringent limits in NPDES permits for KU’s plants. Subsequently, the EPA developed a draft risk assessment for arsenic that increases the cancer risk exposure by more than 20 times, which would lower the current standard from 10 ppb to 0.1 ppb. If the lower standard becomes effective, costly treatment would be required to attempt to meet the standard and, at this time, there is no assurance that it could be achieved. KU cannot predict the outcome of the draft risk assessment and what impact, if any, it would have on their facilities, but the costs could be significant.

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxics Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all PCB-containing equipment. KU cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on its facilities, but the costs could be significant.

The EPA finalized requirements in 2004 for new or modified cooling water intake structures. These requirements affect where generating facilities are built, establish intake design standards and could lead to requirements for cooling towers at new and modified power plants. Another rule, finalized in 2004, that addressed existing structures was withdrawn following a 2007 decision by the U.S. Court of Appeals for the Second Circuit. In 2009, however, the U.S. Supreme Court ruled that the EPA has discretion to use cost-benefit analysis in determining the best technology available for minimizing adverse environmental impact to aquatic organisms. The EPA published the proposed rule in April 2011. The industry and KU reviewed the proposed rule and submitted comments. The EPA is evaluating comments and meeting with industry groups to discuss options. The final rule is to be issued by July 2012. The proposed rule contains two requirements to reduce impact to aquatic organisms. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens regardless of the levels of mortality actually occurring or the cost of achieving the requirements. The second requirement is to determine and install best technology available to reduce mortality of aquatic organisms that are pulled through the plant's cooling water system. A form of cost-benefit analysis is allowed for this second requirement. This process involves a site-specific evaluation based on nine factors including impacts to energy delivery reliability and remaining useful life of the plant. KU will be unable to determine the exact impact until a final rule is issued, the required studies have been completed, and each state in which they operate has decided how to implement the rule.

In October 2009, the EPA released its Final Detailed Study of the Steam Electric Power Generating effluent limitations guidelines and standards. Final regulations are expected to be effective in January 2014. KU expects the revised guidelines and standards to be more stringent than the current standards especially for sulfur dioxide scrubber wastewater and ash basin discharges, which could result in more stringent discharge permit limits. In the interim, KU is unable to predict whether the EPA and the states may impose more stringent limits on a case-by-case best professional judgment basis under existing authority as permits are renewed.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to state court. KU is unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the United States" (WOUS) subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time.

Superfund and Other Remediation

KU is remediating or has completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which KU may be liable for remediation. These include a number of former coal gas manufacturing facilities in Kentucky previously owned or operated or currently owned by predecessors or affiliates of KU. There are additional sites, formerly owned or operated by KU predecessors or affiliates, for which KU lacks information on current site conditions and is therefore unable to predict what, if any, potential liability it may have.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which KU currently lacks information, the costs of remediation and other liabilities could be substantial. KU also could incur other non-remediation costs at sites included in current consent orders or other contaminated sites which could be significant. KU is unable to estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require KU to take more extensive assessment and remedial actions at former coal gas manufacturing facilities. KU cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, KU undertakes remedial action in response to spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from KU's operations, and undertakes similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these general environmental matters is not expected to have a material adverse impact on KU's operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in material additional costs for KU.

Electric and Magnetic Fields

Concerns have been expressed by some members of the public regarding potential health effects of power frequency EMFs, which are emitted by all devices carrying electricity, including electric transmission and distribution lines and substation equipment. Government officials in the U.S. have reviewed this issue. The U.S. National Institute of Environmental Health Sciences concluded in 2002 that, for most health outcomes, there is no evidence that EMFs cause adverse effects. The agency further noted that there is some epidemiological evidence of an association with childhood leukemia, but that the evidence is difficult to interpret without supporting laboratory evidence. KU believes research on EMF and health issues should continue and is taking steps to reduce EMFs, where practical, in the design of new transmission and distribution facilities. KU is unable to predict what effect, if any, the EMF issue might have on its operations and facilities, and the associated cost, or what, if any, liabilities it might incur related to the EMF issue.

Other

In the normal course of business, KU enters into agreements that provide financial performance assurance to third parties on behalf of certain affiliates. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to an affiliate on a stand-alone basis or to facilitate the commercial activities in which these affiliates enter.

As described in the "Energy Purchase Commitments" section of this footnote, pursuant to a power purchase agreement with OVEC, KU is obligated to pay a demand charge which includes, among other charges, decommissioning costs, postretirement and post employment benefits. The demand charge is expected to cover KU's share of the cost of these items over the term of the contract. However, in the event there is a shortfall in covering these costs, KU is obligated to pay its share of the excess. The maximum exposure of this obligation cannot be determined at this time.

KU provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

12. Related Party Transactions

KU and subsidiaries of LKE and PPL engage in related party transactions. Transactions between KU and LKE subsidiaries are eliminated upon consolidation of LKE. Transactions between KU and PPL subsidiaries are eliminated upon consolidation of PPL. These transactions are generally performed at cost and are in accordance with FERC regulations under the Federal Power Act and the applicable KPSC and VSCC regulations.

Wholesale Sales and Purchases

KU and LG&E jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost. Savings realized from such intercompany transactions are shared equally between the two companies. The volume of energy each company has to sell to the other is dependent on its native load needs and its available generation.

Intercompany Billings by LKS

LKS provides KU with a variety of centralized administrative, management and support services. The cost of these services is directly charged to the company or, for general costs that cannot be directly attributed, charged based on predetermined allocation factors, including the following measures: number of customers, total assets, revenues, number of employees and/or other statistical information. LKS charged the amounts in the table below, which LKE management believes are reasonable, including amounts that are further distributed between capital and expense.

Successor		Predecessor
Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010
$ 204	$ 34	$ 222

In addition, KU and LG&E provide services to each other and to LKS. Billings between KU and LG&E relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and KU are reimbursed through LKS.

Intercompany Borrowings

In November 2010, a PPL Energy Supply subsidiary held term notes with KU. These notes were subsequently repaid and therefore no balances were outstanding at December 31, 2010. Interest on these notes was due monthly at interest rates between 4.24% and 7.04%. Interest on these notes is included in "Interest Expense with Affiliates." When balances were outstanding, interest on these notes was $2 million for 2010.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to $500 million at an interest rate based on a market index of commercial paper issues. At December 31, 2011, there was no balance outstanding. At December 31, 2010, $10 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%. Interest expense incurred on the money pool agreement with LKE and/or LG&E was not significant for 2011 or 2010.

Prior to PPL's acquisition of LKE in November 2010, KU had long-term loans from its former E.ON AG affiliates. During 2010, KU incurred interest expense on these debt arrangements of $62 million, which is included in the Statements of Income as "Interest Expense with Affiliate." Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

Other

See Note 1 for discussions regarding the intercompany tax sharing agreement and Note 5 for a discussion regarding capital transactions by KU. See Note 9 for discussions regarding intercompany allocations associated with defined benefits.

13. Other Income (Expense) - net

The breakdown of "Other Income (Expense) – net" was:

	Successor		Predecessor
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010
Other Income			
Equity in earnings of unconsolidated affiliate	$ 1	$ -	$ 3
Life insurance	-	-	2
Miscellaneous	-	-	1
Total Other Income	1	-	6
Other Expense			
Charitable contributions	1	-	1
Joint-use-asset depreciation	-	-	3
Miscellaneous	1	-	1
Total Other Expense	2	-	5
Other Income (Expense) - net	$ (1)	$ -	$ 1

14. Fair Value Measurements and Credit Concentration

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). KU uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	December 31, 2011			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 31	$ 31	$ -	$ -

	December 31, 2010			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 3	$ 3	$ -	$ -
Restricted cash and cash equivalents (a)	1	1	-	-
Total assets	$ 4	$ 4	$ -	$ -

(a) Current portion is included in "Other current assets" on the Balance Sheets. Such amounts were insignificant at December 31, 2011 and December 31, 2010. The long-term portion is included in "Other noncurrent assets" on the Balance Sheets.

At December 31, 2011 and 2010, KU's price risk management assets and liabilities arising from energy commodities and interest rate swaps accounted for at fair value on a recurring basis were not significant.

Price Risk Management Assets/Liabilities - Energy Commodities

Energy commodity contracts are generally valued using the income approach, except for exchange-traded derivative gas, oil and emission allowance contracts, which are valued using the market approach and are classified as Level 1. When observable inputs are used to measure all or most of the value of a contract, the contract is classified as Level 2. Over-the-counter (OTC) contracts are valued using quotes obtained from an exchange, binding and non-binding broker quotes, prices posted by ISOs or published tariff rates. Furthermore, KU obtains independent quotes from the market to validate the forward price curves. OTC contracts include forwards, swaps, options and structured deals for electricity, gas, oil and/or emission allowances and may be offset with similar positions in exchange-traded markets. To the extent possible, fair value measurements utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. For example, the fair value of a structured deal that delivers power to an illiquid delivery point may be measured by valuing the nearest liquid trading point plus the value of the basis between the two points. Basis, in the context of derivatives and commodity trading, is the commodity price differential between two locations, products or time periods. The basis input may be from market quotes, FTR prices or historical prices.

Financial Instruments Not Recorded at Fair Value

The carrying values and estimated fair values of KU's non-trading financial instruments follow:

	December 31, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt	$ 1,842	$ 2,000	$ 1,841	$ 1,728

The carrying value of short-term debt (including notes between affiliates), when outstanding, represents or approximates fair value due to the variable interest rates associated with the financial instruments.

Credit Concentration Associated with Financial Instruments

KU enters into contracts with many entities for the purchase and sale of energy. Many of these contracts qualify for NPNS and as such, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 15 for information on credit policies used by KU to manage credit risk, including master netting arrangements and collateral requirements.

At December 31, 2011, KU's credit exposure was not significant.

15. Derivative Instruments and Hedging Activities

Risk Management Objectives

KU has a risk management policy approved by LKE's Risk Management Oversight Committee (RMOC) to manage market risk and counterparty credit risk. The RMOC, comprised of certain members of senior management and chaired by the Chief Financial Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, verification of risk and transaction limits, VaR analyses, portfolio stress tests, gross margin at risk analyses, sensitivity analyses and daily portfolio reporting, including open positions, determinations of fair value and other risk management metrics. During the second quarter of 2011, PPL's Risk Management Committee formally approved the inclusion of the risk programs for KU's parent, LKE, (acquired in November 2010) under the risk management policy.

Market Risk

Market risk is the potential loss KU may incur as a result of price changes associated with a particular financial or commodity instrument. KU utilizes forward contracts and swaps as part of risk management strategies, to minimize unanticipated fluctuations in earnings caused by changes in commodity prices. All derivatives are recognized on the Balance Sheets at their fair value, unless they qualify for NPNS.

By definition, the regulatory environment for KU significantly mitigates market risk. KU's rates are set to permit the recovery of prudently incurred costs, including certain mechanisms for fuel and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses. KU primarily utilized forward financial transactions to manage price risk associated with expected economic generation capacity in excess of expected load requirements.

Credit Risk

Credit risk is the potential loss KU may incur due to a counterparty's non-performance, including defaults on payments and energy commodity deliveries.

KU’s credit risk stems from its commodity derivatives for contracts for energy sales and purchases. In the event a supplier of KU defaults on its obligation, KU would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by KU would be recoverable from customers in future rates.

KU has credit policies to manage its credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. KU may request the additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade or their exposures exceed an established credit limit. See Note 14 for credit concentration associated with financial instruments.

Master Netting Arrangements

KU has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

KU had no obligation to return cash collateral under master netting arrangements at December 31, 2011 and December 31, 2010.

KU had not posted any cash collateral under master netting arrangements at December 31, 2011 and December 31, 2010.

Commodity Price Risk (Non-trading)

KU primarily utilized forward financial transactions to manage price risk associated with expected economic generation capacity in excess of expected load requirements. Hedge accounting treatment was not elected for these transactions; therefore, realized and unrealized gains and losses are recorded in the Statements of Income.

The net fair value of economic positions for KU at December 31, 2010 was not significant. There is no economic position at December 31, 2011. Unrealized gains (losses) for economic activity for KU in 2011and 2010 were not significant.

Accounting and Reporting

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless they qualify for NPNS. Changes in the derivatives' fair value are recognized currently in earnings unless specific hedge accounting criteria are met.

See Note 1 for additional information on accounting policies related to derivative instruments.

There were no derivatives designated as hedging instruments as of December 31, 2011 and December 31, 2010. There were no after-tax balances of accumulated net gains (losses) in AOCI at December 31, 2011 and 2010. The gains and losses recognized in income on derivatives associated with commodity contracts were not significant for the periods ended December 31, 2011 and 2010.

16. Goodwill and Other Intangible Assets

Goodwill

As a result of the November 1, 2010 acquisition by PPL, KU recognized $607 million of goodwill. The allocation of goodwill was based on KU’s net asset values. See Note 7 for additional information.

Other Intangibles

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Contracts (a)	$ 145	$ 43	$ 145	$ 3
Land and transmission rights (b)	8	-	8	-
Emission allowances (c)	3	-	9	-
OVEC power purchase agreement (d)	39	3	39	1
Total subject to amortization	$ 195	$ 46	$ 201	$ 4

(a) Gross carrying amount represents the fair value of contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 4 for additional information.

(b) Gross carrying amount represents the fair value of land and transmission rights recognized as an intangible asset as a result of adopting PPL's accounting policies in the Successor period. Amortization expense is recovered through base rates and is expected to be insignificant for future periods.

(c) Represents the fair value of emission allowances recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. Consumption related to these emission allowances was $6 million and $1 million for 2011 and 2010.

(d) Gross carrying amount represents the fair value of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. See Note 4 for additional information.

Current intangible assets and long-term intangible assets are presented as "Other intangibles" in their respective areas on the Balance Sheets.

Amortization expense for the Successor, excluding consumption of emission allowances, was as follows:

	2011	2010
Intangible assets with regulatory offset	$ 42	$ 4

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2012	2013	2014	2015	2016
Intangibles with regulatory offset	$ 24	$ 27	$ 23	$ 27	$ 13

17. Asset Retirement Obligations

KU’s AROs are primarily related to the final retirement of assets associated with generating units. KU's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. As described in Notes 1 and 4, the accretion and depreciation expense recorded by KU is offset with a regulatory credit on the income statement, such that there is no earnings impact.

The changes in the carrying amounts of AROs were:

ARO at December 31, 2009, Predecessor	$	34
Accretion expense		2
Changes in estimated cash flow or settlement date		24
Obligations settled		-
ARO at October 31, 2010, Predecessor		60
Purchase accounting		(6)
ARO at December 31, 2010, Successor		54
Accretion expense		3
Obligations incurred		1
Changes in estimated cash flow or settlement date		3
Obligations settled		-
ARO at December 31, 2011, Successor	$	61

KU classified its AROs as long-term on the Balance Sheets at December 31, 2011 and 2010.

18. New Accounting Guidance Pending Adoption

Fair Value Measurements

Effective January 1, 2012, KU will prospectively adopt accounting guidance that was issued to clarify existing fair value measurement guidance as well as enhance fair value disclosures. The additional disclosures required by this guidance include quantitative information about significant unobservable inputs used for Level 3 measurements, qualitative information about the sensitivity of recurring Level 3 measurements, information about any transfers between Level 1 and 2 of the fair value hierarchy, information about when the current use of a non-financial asset is different from the highest and best use, and the hierarchy classification for assets and liabilities whose fair value is disclosed only in the notes to the financial statements.

Any fair value measurement differences resulting from the adoption of this guidance will be recognized in income in the period of adoption. The adoption of this guidance is not expected to have a significant impact on KU.

Testing Goodwill for Impairment

Effective January 1, 2012, KU will prospectively adopt accounting guidance which will allow an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of goodwill. If, based on this assessment, the entity determines it is not more likely than not the fair value of a reporting unit is less than the carrying amount, the two-step goodwill impairment test is not necessary. However, the first step of the impairment test is required if an entity concludes it is more likely than not the fair value of a reporting unit is less than the carrying amount based on the qualitative assessment.

The adoption of this standard is not expected to have a significant impact on KU.

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, KU will retrospectively adopt accounting guidance issued to enhance disclosures about financial instruments and derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

Upon adoption, the enhanced disclosure requirements are not expected to have a significant impact on KU.

19. Notes to Statement of Cash Flows

Supplemental disclosures of cash flow information

	December 31, 2011	December 31, 2010
Cash paid during the period for:		
Income Taxes	$ 16	$ 62
Interest on borrowed money	59	3
Interest to affiliated companies on borrowed money	-	76
Other cash paid for interest	1	5

STATEMENTS OF ACCUMULATED COMPREHENSIVE INCOME, COMPREHENSIVE INCOME, AND HEDGING ACTIVITIES

1. Report in columns (b),(c),(d) and (e) the amounts of accumulated other comprehensive income items, on a net-of-tax basis, where appropriate.
2. Report in columns (f) and (g) the amounts of other categories of other cash flow hedges.
3. For each category of hedges that have been accounted for as "fair value hedges", report the accounts affected and the related amounts in a footnote.
4. Report data on a year-to-date basis.

Line No.	Item (a)	Unrealized Gains and Losses on Available-for-Sale Securities (b)	Minimum Pension Liability adjustment (net amount) (c)	Foreign Currency Hedges (d)	Other Adjustments (e)

BLANK

Schedule Page: 122(a)(b) Line No.: 5 Column: e

The balance in Accumulated Other Comprehensive Income (219) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment eliminated EEI's Accumulated Other Comprehensive Income to Other Paid-In Capital (211) related to its pension and postretirement plans. The following reflects the purchase accounting adjustment:

Accumulated Other Comprehensive Income (219) Without Purchase Accounting	$	(1,993,677)
Purchase Accounting Adjustment		1,990,823
Total for Accumulated Other Comprehensive Income (219)	$	(2,854)

Schedule Page: 122(a)(b) Line No.: 10 Column: e

The balance in Accumulated Other Comprehensive Income (219) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment eliminated EEI's Accumulated Other Comprehensive Income to Other Paid-In Capital (211) related to its pension and postretirement plans. The following reflects the purchase accounting adjustment:

Accumulated Other Comprehensive Income (219) Without Purchase Accounting	$	(2,457,900)
Purchase Accounting Adjustment		1,990,823
Total for Accumulated Other Comprehensive Income (219)	$	(467,077)

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106)

1. Report below the original cost of electric plant in service according to the prescribed accounts.
2. In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.
3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
4. For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) adjustments.
5. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
6. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d)

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106) (Continued)

distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.

7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.

8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.

9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 11, column (c), and that reported for electric plant in service, pages 204-207, column 9d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

BLANK

Schedule Page: 224 Line No.: 1 Column: a

See Note 1 of Notes to Financial Statements under Cost Method Investment for a full description of the Ohio Valley Electric Company investment.

Schedule Page: 224 Line No.: 12 Column: a

See Note 1 of Notes to Financial Statement under Equity Method Investment for a full description of the Electric Energy, Inc.(EEI) investment.

Schedule Page: 224 Line No.: 19 Column: d

The balance in Investment in Subsidiary Companies (123.1) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value in Investment in Subsidiary Companies, a step-up in value compared to the net book value of the investment in EEI was recorded. The step-up in value was assumed to relate to EEI's plant and is amortized over the average life of EEI's plant assets. The following reflects the purchase accounting adjustment:

Investment in Subsidiary Companies (123.1) Without Purchase Accounting	$	12,715,222
Purchase Accounting Adjustment		17,721,683
2010 Amortization of Purchase Accounting Adjustment		(147,681)
Purchase Accounting Subtotal		17,574,002
Total for Investment in Subsidiary Companies (123.1)	$	30,289,224

Schedule Page: 224 Line No.: 19 Column: g

Schedule Page: 229 Line No.: 25 Column: d

During the fourth quarter of 2011, the EPA removed vintages 2012-2014 NOx Ozone Season and NOx Annual allowances as part of the discontinuance of the CAIR Ozone NOx Program. The EPA terms these transactions as "Program Termination."

On December 30, 2011, the D.C. Circuit Court issued an order staying the Cross-State Air Pollution Rule (CSAPR) pending the court's resolution of the petitions for review of the rule. It further ordered the EPA to continue administering CAIR and, in January 2012, the EPA re-issued vintage 2012 NOx Ozone Season and NOx Annual allowances, with the transaction name of “Return of CAIR Allowances.”

Schedule Page: 229 Line No.: 25 Column: f

The regulatory asset represents the future revenue impact from the reversal of deferred income tax liability required for a tax depreciation basis adjustment and allowance for funds used during construction.

Schedule Page: 232 Line No.: 6 Column: f

The balance in Coal Contracts (Nov-10 to Dec-15) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment represents the fair value measurement of coal supply contracts based upon the difference between estimated market prices of the coal to be purchased and the actual prices in the contracts. The balance will be amortized as the underlying purchase accounting adjustments are amortized. The following reflects the purchase accounting adjustment:

Coal Contracts (Nov-10 to Dec-15) Without Purchase Accounting	$ -
Purchase Accounting Adjustment	22,605,479
2011 Amortization of Purchase Accounting Adjustment	(11,735,750)
2010 Amortization of Purchase Accounting Adjustment	(4,728,247)
Total for Coal Contracts (Nov-10 to Dec-15)	$ 6,141,482

Schedule Page: 232 Line No.: 9 Column: c

In December 2009, there was a major snow storm in KU’s Virginia service area causing approximately 30,000 customer outages. During the 2009 Virginia Annual Information Filing (“AIF”), KU requested the Virginia Commission establish a regulatory asset and defer for future recovery $6,041,882 in incremental operation and maintenance expenses related to the storm restoration. In March 2011, the Virginia Commission issued a Staff Report on KU's 2009 AIF, Case No. PUE-2010-00031, stating that the Staff considers the storm damage to be extraordinary, non-recurring and material to KU. The Staff Report also recommended establishing a regulatory asset for these costs, with recovery over a five year period upon approval in the next base rate case. In March 2011, a $6,041,882 regulatory asset was established for actual costs incurred. In April 2011, KU filed an application with the Virginia Commission requesting an annual increase in electric base rates for the Virginia jurisdictional customers including recovery of the storm costs over five years. The Virginia Commission approved the storm regulatory asset costs within KU's request for increase in annual base rates with amortization beginning in November 2011.

Schedule Page: 232 Line No.: 10 Column: f

The balance represents the reclassification from Unamortized Debt Expense (various) due to the purchase of KU by PPL in November 2010, as these costs are considered to have no fair value in purchase accounting under US GAAP. However, KU receives recovery of these costs in rates through the embedded cost of capital. The following reflects the purchase accounting adjustment:

Unamortized Debt Expense (various) Without Purchase Accounting	$ -
Purchase Accounting Adjustment	4,662,536
2011 Amortization of Purchase Accounting Adjustment	(216,672)
2010 Amortization of Purchase Accounting Adjustment	(36,112)
Total for Unamortized Debt Expense (various)	$ 4,409,752

Schedule Page: 232 Line No.: 17 Column: f

The balance in Corporate Headquarters Lease (Nov-10 to Jul-15) was adjusted due to the purchase of KU by PPL in November 2010. The adjustment represents the fair value measurement of a lease contract based upon the difference between the estimated market price of the leased property and the actual lease costs. The following reflects the purchase accounting adjustment:

Corporate Headquarters Lease (Nov-10 to Jul-15) Without

CAPITAL STOCKS (Account 201 and 204) (Continued)

3. Give particulars (details) concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.
4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or non-cumulative.
5. State in a footnote if any capital stock which has been nominally issued is nominally outstanding at end of year.
Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purposes of pledge.

OTHER PAID-IN CAPITAL (Accounts 208-211, inc.)

Report below the balance at the end of the year and the information specified below for the respective other paid-in capital accounts. Provide a subheading for each account and show a total for the account, as well as total of all accounts for reconciliation with balance sheet, Page 112. Add more columns for any account if deemed necessary. Explain changes made in any account during the year and give the accounting entries effecting such change.

(a) Donations Received from Stockholders (Account 208)-State amount and give brief explanation of the origin and purpose of each donation.

(b) Reduction in Par or Stated value of Capital Stock (Account 209): State amount and give brief explanation of the capital change which gave rise to amounts reported under this caption including identification with the class and series of stock to which related.

(c) Gain on Resale or Cancellation of Reacquired Capital Stock (Account 210): Report balance at beginning of year, credits, debits, and balance at end of year with a designation of the nature of each credit and debit identified by the class and series of stock to which related.

(d) Miscellaneous Paid-in Capital (Account 211)-Classify amounts included in this account according to captions which, together with brief explanations, disclose the general nature of the transactions which gave rise to the reported amounts.

Schedule Page: 253 Line No.: 3 Column: b

The balance in Other Paid-in Capital (208-211) was adjusted due to the purchase of KU by PPL in November 2010. To reflect the fair value, the balance was adjusted for a step-up in value compared to the net book value of the investment in EEI net of deferred taxes, the fixed rate pollution control bonds net of taxes and goodwill. The balance also includes elimination of Retained Earnings (215, 215.1, 216) at October 31, 2010. See footnotes for Page 110, Lines 21, Column c, Page 110, Line 78, Column c, Page 110, Line 82, Column c, Page 112, Line 11, Column c, Page 112, Line 21, Column c and Page 112, Line 64, Column c. The following reflects the purchase accounting adjustment:

Other Paid-in Capital (208-211) Without Purchase Accounting	$ 315,858,083
Purchase Accounting Adjustment - goodwill	607,404,368
Purchase Accounting Adjustment – pollution control bonds	(709,649)
Purchase Accounting Adjustment – EEI investment	7,569,645
Purchase Accounting Adjustment – prior retained earnings	1,418,324,387
Total for Other Paid-in Capital (208-211)	$ 2,348,446,834

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224) (Continued)

10. Identify separate undisposed amounts applicable to issues which were redeemed in prior years.
11. Explain any debits and credits other than debited to Account 428, Amortization and Expense, or credited to Account 429, Premium on Debt - Credit.
12. In a footnote, give explanatory (details) for Accounts 223 and 224 of net changes during the year. With respect to long-term advances, show for each company: (a) principal advanced during year, (b) interest added to principal amount, and (c) principle repaid during year. Give Commission authorization numbers and dates.
13. If the respondent has pledged any of its long-term debt securities give particulars (details) in a footnote including name of pledgee and purpose of the pledge.
14. If the respondent has any long-term debt securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
15. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (i). Explain in a footnote any difference between the total of column (i) and the total of Account 427, interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
16. Give particulars (details) concerning any long-term debt authorized by a regulatory commission but not yet issued.

BLANK

Schedule Page: 256 Line No.: 1 Column: a

(1) Per instruction 9 concerning the treatment of unamortized debt expense, premium or discount – debt premium and expenses are being amortized over the lives of the related issues.

(2) Pollution control series bonds are obligations of Kentucky Utilities Company (KU), issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates KU to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds.

(3) In November 2010, KU requested and was granted, authorization to issue first mortgage bonds totaling $1.5 billion by the Kentucky Public Service Commission in its September 30, 2010, Order in Case No. 2010-00206, The Commonwealth of Virginia State Corporation Commission in its October 19, 2010, Order in Case No. PUE-2010-00061, and the Tennessee Regulatory Authority in its October 21, 2010, Order in Docket No. 10-00119. The Company used the proceeds to repay the loans from a PPL subsidiary and for general corporate purposes. The first mortgage bonds were issued at a discount.

In April 2011, KU filed 2011 Registration Statements with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statements became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.

As of December 31, 2011, all of the Company’s long-term debt is collateralized by a first mortgage lien on substantially all of the assets of the Company in Kentucky.

(4) On November 1, 2010, PPL completed its acquisition of E.ON U.S., the Company's parent. Upon completion of the acquisition, E.ON U.S. was renamed LG&E and KU Energy LLC (LKE). PPL used push-down accounting for the acquisition, and as a result, the Company adjusted its assets and liabilities to reflect their fair values on the acquisition date.

The following pollution control bonds with coupon rates listed below were fair valued as a result of the PPL acquisition:

Bond Issue	(221) Principal	(224) Fair Value Adjustment	Total Purchase Accounting
Carroll County 2007 Series A, due 2/1/2026, 5.750%	$17,875,000	$804,375	$18,679,375
Trimble County 2007 Series A, due 3/1/2037, 6.000%	$ 8,927,000	$357,080	$ 9,284,080

The purchase accounting adjustments were recorded to Other Long-Term Debt (224) and are being amortized over the lives of the related issues to Interest on Long-Term Debt (427).

Schedule Page: 256 Line No.: 1 Column: i

Interest on Bonds and Revolving Credit: (221/222/224/231):

Total Account (221)	$61,240,550

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR

1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are know, show the amounts in a footnote and designate whether estimated or actual amounts.
2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.) Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b)amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

5. If any tax (exclude Federal and State income taxes)- covers more then one year, show the required information separately for each tax year, identifying the year in column (a).
6. Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a foot- note. Designate debit adjustments by parentheses.
7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
8. Report in columns (i) through (l) how the taxes were distributed. Report in column (I) only the amounts charged to Accounts 408.1 and 409.1 pertaining to electric operations. Report in column (l) the amounts charged to Accounts 408.1 and 109.1 pertaining to other utility departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (l) the taxes charged to utility plant or other balance sheet accounts.
9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

2010 Amortization of purchase accounting adjustment – coal supply contracts	(1,298,823)
Purchase Accounting Adjustment – regulatory asset for coal supply contracts	8,793,531
2011 Amortization of purchase accounting adjustment – regulatory asset for coal supply contracts	(4,565,207)

2010 Amortization of purchase accounting adjustment – regulatory asset for coal supply contracts	(1,839,288)
Purchase Accounting Adjustment – rent commitment	350,470
2011 Amortization of purchase accounting adjustment - rent commitment	(86,080)
Total	$60,051,709

Schedule Page: 276 Line No.: 18 Column: b

The balance in Accumulated Deferred Income Taxes- Other (283) was adjusted due to the purchase of KU by PPL Corporation in November 2010. The following reflects the balance at December 31, 2010:

Beginning Balance:	
EEI Investment	$5,614,203
FIN 48 Interest	(33,438)
OCI EEI Investment	(1,269,297)
Total Without Purchase Accounting	4,311,468
Purchase Accounting Adjustments:	
Purchase Accounting Adjustment – EEI investment	1,267,480
Total	$5,578,948

Schedule Page: 276 Line No.: 18 Column: e

The balance was adjusted due to the amortization of purchase accounting adjustments that arose from the purchase of KU by PPL in November 2010. The following reflects the activity during the year charged to 410.2

Debit Change Account 410.2:	
EEI Investment	$ 996,437
FIN 48 Interest	34,576
Total Without Purchase Accounting	1,031,013
Purchase Accounting Adjustment:	
Amortization - EEI investment	87,033
Total	$1,118,046

Schedule Page: 276 Line No.: 18 Column: f

The balance was adjusted due to the amortization of purchase accounting adjustments that arose from the purchase of KU by PPL in November 2010. The following reflects the activity during the year charged to 411.2:

Credit Change Account 411.2:	
EEI Investment	$ 248,314
FIN 48 Interest	1,138
Total Without Purchase Accounting	249,452
Purchase Accounting Adjustment:	
Amortization - EEI investment	1,699,199
Total	$1,948,651

Schedule Page: 276 Line No.: 18 Column: h

Debit Adjustments:	
OCI EEI Investment	$ 346,253
Total Without Purchase Accounting	346,253

Purchase Accounting Adjustments:	
Reclass - EEI investment	432,706

Total Debit Adjustments	$ 778,959

Schedule Page: 276 Line No.: 18 Column: j

Credit Adjustments:	
OCI EEI Investment	$ 50,702

Total Without Purchase Accounting	50,702
Purchase Accounting Adjustments:	
Reclass - EEI investment	7,268,991

Total Credit Adjustments	$7,319,693

Schedule Page: 276 Line No.: 18 Column: k

The balance in Accumulated Deferred Income Taxes- Other (283) was adjusted due to the purchase of KU by PPL Corporation in November 2010. The following reflects the balance at December 31, 2011:

Ending Balance:	
EEI Investment	$ 6,362,326
FIN 48 Interest	-
OCI EEI Investment	(1,564,848)

Total Without Purchase Accounting	4,797,478
Purchase Accounting Adjustments:	
Purchase Accounting Adjustment – EEI investment	8,161,214
2011 Amortization of purchase accounting adjustment – EEI investment	(344,678)
2010 Amortization of purchase accounting adjustment – EEI investment	(57,448)
Eliminate Deferred Tax on Purchase Accounting Adjustment - Other Comprehensive Income	(1,267,489)

Total	$11,289,077

Schedule Page: 278 Line No.: 1 Column: f

The balance in Coal Contracts (Nov-10 to Dec-16) relates to the regulatory offset for the fair value measurement of KU's coal contracts recognized due to the purchase of KU by PPL in November 2010. The balance will be amortized as the underlying purchase accounting adjustments are amortized. The following reflects the purchase accounting adjustment:

Coal Contracts (Nov-10 to Dec-16) Without Purchase Accounting	$ -
Purchase Accounting Adjustment	144,919,879
2011 Amortization of Purchase Accounting Adjustment	(39,807,234)
2010 Amortization of Purchase Accounting Adjustment	(3,338,879)
Total for Coal Contracts (Nov-10 to Dec-16)	$ 101,773,766

Schedule Page: 278 Line No.: 2 Column: f

The regulatory liabilities represent the future revenue impact from the reversal of deferred income taxes required for amortization investment tax credits and deferred taxes provided at rates in excess of currently enacted rates.

Schedule Page: 278 Line No.: 3 Column: f

The balance in OVEC Power Purchase Contract (Nov-10 to Mar-26) relates to the regulatory offset for the fair value measurement of the power purchase contract between KU and Ohio Valley Electric Corporation recognized due to the purchase of KU by PPL in November 2010. The balance will be amortized as the underlying purchase accounting adjustments are amortized. The following reflects the purchase accounting adjustment:

OVEC Power Purchase Contract (Nov-10 to Mar-26) Without Purchase Accounting	$ -
Purchase Accounting Adjustment	38,582,028
2011 Amortization of Purchase Accounting Adjustment	(2,432,244)
2010 Amortization of Purchase Accounting Adjustment	(464,152)
Total for OVEC Power Purchase Contract (Nov-10 to Mar-26)	$ 35,685,632

Schedule Page: 278 Line No.: 7 Column: f

The balance in Emission Allowances (Nov-10 to Dec-40) relates to the regulatory offset for the fair value measurement of KU's emission allowances recognized due to the purchase of KU by PPL in November 2010. The balance will be amortized as the underlying purchase accounting adjustments are amortized. The following reflects the purchase accounting adjustment:

Emission Allowances (Nov-10 to Dec-40) Without Purchase Accounting	$ -
Purchase Accounting Adjustment	9,259,090
2011 Amortization of Purchase Accounting Adjustment	(5,771,743)
2010 Amortization of Purchase Accounting Adjustment	(983,780)
Total for Emission Allowances (Nov-10 to Dec-40)	$ 2,503,567

ELECTRIC OPERATING REVENUES (Account 400)

1. The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
2. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The -average number of customers means the average of twelve figures at the close of each month.
4. If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
5. Disclose amounts of $250,000 or greater in a footnote for accounts 451, 456, and 457.2.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

Name of Respondent Kentucky Utilities Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2011/Q4

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
LF - for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

	Subtotal RQ			0	0	0
	Subtotal non-RQ			0	0	0
	Total			**0**	**0**	**0**

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

Kentucky Utilities Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2011/Q4

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
LF - for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

Schedule Page: 320 Line No.: 141 Column: b

The credit is due to meter tampering charges billed to customers to offset the cost of meter maintenance. The cost is recorded in several accounts.

Schedule Page: 320 Line No.: 141 Column: c

The credit is due to meter tampering charges billed to customers to offset the cost of meter maintenance. The cost is recorded in several accounts.

Schedule Page: 320 Line No.: 154 Column: b

The credit balance is due to establishing a regulatory asset for the 2009 mountain winter storm in Eastern Kentucky and Virginia.

Schedule Page: 320 Line No.: 154 Column: c

The credit balance is due to reversing an expense over-accrual of the 2009 mountain winter storm in Eastern Kentucky and Virginia.

Schedule Page: 320 Line No.: 193 Column: b

The balance in Rents (931) was adjusted due to the purchase of KU by PPL in November 2010. The balance was adjusted to include amortization of the purchase accounting adjustment related to the rent commitment for the Corporate Headquarters building. The rent commitment amortization inadvertently charged to Rents in 2010 was reclassified to Other Regulatory Liabilities (254) in January 2011. The following reflects the purchase accounting adjustment:

Rents (931) Without Purchase Accounting	$ 2,263,156
Purchase Accounting Adjustment - rent commitment	31,612
Total for Rents (931)	$ 2,294,768

Schedule Page: 320 Line No.: 193 Column: c

The balance in Rents (931) was adjusted due to the purchase of KU by PPL in November 2010. The balance was adjusted to include amortization of the purchase accounting adjustment related to the rent commitment for the Corporate Headquarters building. The rent commitment amortization inadvertently charged to Rents in 2010 was reclassified to Other Regulatory Liabilities (254) in January 2011. The following reflects the purchase accounting adjustment:

Rents (931) Without Purchase Accounting	$ 2,230,827
Purchase Accounting Adjustment - rent commitment	(31,612)
Total for Rents (931)	$ 2,199,215

PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

Schedule Page: 326.2 Line No.: 3 Column: c

(1) FERC-approved tariff and/or rate schedule as on file with the Commission.

Schedule Page: 326.2 Line No.: 4 Column: b

Market Based Purchase

Schedule Page: 326.2 Line No.: 4 Column: c

(1) FERC-approved tariff and/or rate schedule as on file with the Commission.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Kentucky Utilities Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2011/Q4

TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1)
(Including transactions referred to as 'wheeling')

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)
4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

Schedule Page: 328.1 Line No.: 3 Column: n

This footnote is not to reference this cell, but the total on line 35 column (n).

The total amount does not agree to page 300, line 22, column (b) due to intracompany transmission revenues that must be eliminated in consolidation:

Page 330, line 35, column (n)	$ 15,244,806
Elimination of intracompany transmission revenues	(885,722)
Page 300, line 22, column (b)	$ 14,359,084

TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)
(Including transactions referred to as "wheeling")

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to- Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter "TOTAL" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Account 403, 404, 405)
(Except amortization of aquisition adjustments)

1. Report in section A for the year the amounts for : (b) Depreciation Expense (Account 403; (c) Depreciation Expense for Asset Retirement Costs (Account 403.1; (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
2. Report in Section 8 the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.
Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.
In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.
For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification Listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

REGULATORY COMMISSION EXPENSES

1. Report particulars (details) of regulatory commission expenses incurred during the current year (or incurred in previous years, if being amortized) relating to format cases before a regulatory body, or cases in which such a body was a party.
2. Report in columns (b) and (c), only the current year's expenses that are not deferred and the current year's amortization of amounts deferred in previous years.

FOOTNOTE DATA

Schedule Page: 350 Line No.: 6 Column: c

Negative amount represents a correction from the prior year.

Schedule Page: 350 Line No.: 6 Column: h

Negative amount represents a correction from the prior year.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Kentucky Utilities Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2011/Q4

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D & D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects.(Identify recipient regardless of affiliation.) For any R, D & D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).
2. Indicate in column (a) the applicable classification, as shown below:

Classifications:

A. Electric R, D & D Performed Internally:
 (1) Generation
  a. hydroelectric
   i. Recreation fish and wildlife
   ii Other hydroelectric
  b. Fossil-fuel steam
  c. Internal combustion or gas turbine
  d. Nuclear
  e. Unconventional generation
  f. Siting and heat rejection
 (2) Transmission
  a. Overhead
  b. Underground
 (3) Distribution
 (4) Regional Transmission and Market Operation
 (5) Environment (other than equipment)
 (6) Other (Classify and include items in excess of $50,000.)
 (7) Total Cost Incurred

B. Electric, R, D & D Performed Externally:
 (1) Research Support to the electrical Research Council or the Electric Power Research Institute

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES (Continued)

(2) Research Support to Edison Electric Institute
(3) Research Support to Nuclear Power Groups
(4) Research Support to Others (Classify)
(5) Total Cost Incurred

3. Include in column (c) all R, D & D items performed internally and in column (d) those items performed outside the company costing $50,000 or more, briefly describing the specific area of R, D & D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under $50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D & D activity.
4. Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column (e)
5. Show in column (g) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
6. If costs have not been segregated for R, D &D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by "Est."
7. Report separately research and related testing facilities operated by the respondent.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

COMMON UTILITY PLANT AND EXPENSES

1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

Name of Respondent Kentucky Utilities Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2011/Q4

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

Schedule Page: 397 Line No.: 2 Column: b

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the purchase amount recorded in accordance with FERC Order No. 668-A would have been $257,345.

Schedule Page: 397 Line No.: 2 Column: c

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the purchase amount recorded in accordance with FERC Order No. 668-A would have been $2,182,006.

Schedule Page: 397 Line No.: 2 Column: d

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the purchase amount recorded in accordance with FERC Order No. 668-A would have been $3,609,962.

Schedule Page: 397 Line No.: 2 Column: e

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the purchase amount recorded in accordance with FERC Order No. 668-A would have been $3,622,746.

Schedule Page: 397 Line No.: 3 Column: b

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the sale amount recorded in accordance with FERC Order No. 668-A would have been $388,383. These amounts do not include $184 in sales sourced by test energy from the commissioning of a new power plant that were assigned to Account 107 rather than to Account 447 during the first quarter. There is no difference in the Day Ahead and Real Time markets for the sales which were assigned to Account 107.

Schedule Page: 397 Line No.: 3 Column: c

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the sale amount recorded in accordance with FERC Order No. 668-A would have been $1,552,317. These amounts do not include $184 in sales sourced by test energy from the commissioning of a new power plant that were assigned to Account 107 rather than to Account 447 during the first quarter. There is no difference in the Day Ahead and Real Time markets for the sales which were assigned to Account 107.

Schedule Page: 397 Line No.: 3 Column: d

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's

Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the sale amount recorded in accordance with FERC Order No. 668-A would have been $2,111,592. These amounts do not include $184 in sales sourced by test energy from the commissioning of a new power plant that were assigned to Account 107 rather than to Account 447 during the first quarter. There is no difference in the Day Ahead and Real Time markets for the sales which were assigned to Account 107.

Schedule Page: 397 Line No.: 3 Column: e

The amount reflects transactions recorded in accordance with Kentucky Utilities Company's Power Supply System Agreement with Louisville Gas and Electric Company, as approved by the Kentucky Public Service Commission in October 1997, in which purchases and sales are calculated based on joint dispatch of the Companies' units. Such calculations do not distinguish between purchases and sales made in the Day Ahead and Real Time markets. Absent such a Power Supply System Agreement, the sale amount recorded in accordance with FERC Order No. 668-A would have been $3,182,878. These amounts do not include $184 in sales sourced by test energy from the commissioning of a new power plant that were assigned to Account 107 rather than to Account 447 during the first quarter. There is no difference in the Day Ahead and Real Time markets for the sales which were assigned to Account 107.

PURCHASES AND SALES OF ANCILLARY SERVICES

Report the amounts for each type of ancillary service shown in column (a) for the year as specified in Order No. 888 and defined in the respondents Open Access Transmission Tariff.

In columns for usage, report usage-related billing determinant and the unit of measure.

(1) On line 1 columns (b), (c), (d), (e), (f) and (g) report the amount of ancillary services purchased and sold during the year.

(2) On line 2 columns (b) (c), (d), (e), (f), and (g) report the amount of reactive supply and voltage control services purchased and sold during the year.

(3) On line 3 columns (b) (c), (d), (e), (f), and (g) report the amount of regulation and frequency response services purchased and sold during the year.

(4) On line 4 columns (b), (c), (d), (e), (f), and (g) report the amount of energy imbalance services purchased and sold during the year.

(5) On lines 5 and 6, columns (b), (c), (d), (e), (f), and (g) report the amount of operating reserve spinning and supplement services purchased and sold during the period.

(6) On line 7 columns (b), (c), (d), (e), (f), and (g) report the total amount of all other types ancillary services purchased or sold during the year. Include in a footnote and specify the amount for each type of other ancillary service provided.

		Amount Purchased for the Year			Amount Sold for the Year		
		Usage - Related Billing Determinant			Usage - Related Billing Determinant

MONTHLY TRANSMISSION SYSTEM PEAK LOAD

(1) Report the monthly peak load on the respondent's transmission system. If the respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
(2) Report on Column (b) by month the transmission system's peak load.
(3) Report on Columns (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).
(4) Report on Columns (e) through (j) by month the system' monthly maximum megawatt load by statistical classifications. See General Instruction for the definition of each statistical classification.

MONTHLY PEAKS AND OUTPUT

1. Report the monthly peak load and energy output. If the respondent has two or more power which are not physically integrated, furnish the required information for each non- integrated system.
2. Report in column (b) by month the system's output in Megawatt hours for each month.
3. Report in column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.
4. Report in column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.
5. Report in column (e) and (f) the specified information for each monthly peak load reported in column (d).

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)*(Continued)*

9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)*(Continued)*

9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants) *(Continued)*

1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)*(Continued)*

9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

HYDROELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Large plants are hydro plants of 10,000 Kw or more of installed capacity (name plate ratings)
2. If any plant is leased, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. If licensed project, give project number.
3. If net peak demand for 60 minutes is not available, give that which is available specifying period.
4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Report data by individual lines for all voltages if so required by a State commission.
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

TRANSMISSION LINE STATISTICS (Continued)

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Kentucky Utilities Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2011/Q4

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

Line No.	Name and Location of Substation (a)	Character of Substation (b)	VOLTAGE (In MVa) Primary (c)	Secondary (d)	Tertiary (e)

SUBSTATIONS (Continued)

5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

SUBSTATIONS (Continued)

5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES

1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies.
2. The reporting threshold for reporting purposes is $250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general".
3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.

Accounts charged include: 184, 186, 426, 500-502, 506, 510, 512, 513, 541, 544, 546, 548-554, 560-563, 566, 570, 571, 573, 580-583, 586, 588, 592-594, 598, 901, 903, 905, 907, 921, 925, 930 and 935

Schedule Page: 429 Line No.: 24 Column: c
Accounts charged include: 158, 184, 232, 426, 500-502, 506, 510, 549, 566, 570, 580, 588, 593, 598, 903, 905, 921 and 930

Schedule Page: 429 Line No.: 25 Column: c
Accounts charged include: 142, 154, 163, 501, 502, 506, 511-514, 542, 544, 546-549,

552-554, 562, 570, 571, 580, 582, 588, 593, 594, 598 and 921

Schedule Page: 429 Line No.: 26 Column: c

Accounts charged include: 163, 184, 500-502, 506, 511-513, 542, 548, 552-554, 560, 562, 570, 571, 586, 593, 921 and 923

Schedule Page: 429 Line No.: 28 Column: c

Accounts charged include: 107

Schedule Page: 429 Line No.: 29 Column: c

Accounts charged include: 146, 184, 228, 232, 234 and 236

Schedule Page: 429 Line No.: 30 Column: c

Accounts charged include: 143, 232, 234 and 419

Schedule Page: 429 Line No.: 42 Column: a

Costs between Louisville Gas and Electric Company and Kentucky Utilities Company are charged directly and are not allocated.

LG&E and KU Services Company (Servco) will allocate the costs of service among the affiliated companies using one of several methods that most accurately distributes the costs. The method of cost allocation varies based on the department rendering the service. Any of the methods may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes in the business, but are generally determined annually. The assignment methods used by Servco are as follows:

Contract Ratio – Based on the sum of the physical amount (i.e. tons of coal, cubic feet of natural gas) of the contract for both coal and natural gas for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Departmental Charge Ratio – A specific Servco department ratio based upon various factors. The departmental charge ratio typically applies to indirectly attributable costs such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of service being performed and are documented and monitored by the Budget Coordinators for each department. The numerator and denominator vary by department. The ratio is based upon various factors such as labor hours, labor dollars, departmental or entity headcount, capital expenditures, operations & maintenance costs, retail energy sales, charitable contributions, generating plant sites, average allocation of direct reports, net book value of utility plant, total line of business assets, electric capital expenditures, substation assets and transformer assets. These ratios are calculated on an annual basis. Any changes in these ratios will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in any of these ratios from that used in the prior year.

Electric Peak Load Ratio – Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Energy Marketing Ratio – Based on the absolute value of megawatt hours purchased and sold for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Generation Ratio – Based on the annual forecast of megawatt hours, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Non-Fuel Material and Services Expenditures – Based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable entities. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Customers Ratio – Based on the number of retail electric and/or gas customers. This ratio will be determined based on the actual number of customers at the end of the previous calendar year. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial). The numerator is the total number of each Company's retail customers. The denominator is the total number of retail customers for both KU and LG&E. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Employees Ratio – Based on the number of employees benefiting from the performance of a service. This ratio will be determined based on actual counts of applicable employees at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate Servco employee costs to the proper legal entity. The numerator for the first step of this ratio is the total number of employees for each specific company, and the denominator is the total number of employees for all companies in which an allocator is assigned (i.e. KU, LG&E and Servco). For the second step, the ratio of Servco to total employees will then be allocated to the other companies (KU, LG&E and LKC) based on each company's ratio of labor dollars to total labor dollars. (LKC has no employees, but non-utility related labor is charged to it.) This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Meters Ratio – Based on the number or types of meters being utilized by all levels of customer classes within the system for the immediately preceding twelve consecutive calendar months. The numerator is equal to the number of meters for each utility and the denominator is equal to the total meters for KU and LG&E. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Transactions Ratio – Based on the sum of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. For example, services pertaining to Materials Logistics would define the transaction as the number of items ordered, picked and disbursed out of the warehouse. Services pertaining to Accounts Payable would define the transaction as the number of invoices processed. The Controller's organization is responsible for maintaining and monitoring specific product/service methodology documentation for actual transactions related to Servco billings. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Project Ratio – Based on the total costs for any departmental or affiliate project for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Retail Revenue Ratio – Based on utility revenues, excluding energy marketing revenues, for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue Ratio – Based on the sum of the revenue for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue, Total Assets and Number of Employees Ratio – Based on an average of the revenue, total assets and number of employees ratios. This ratio is independently calculated for KU and LG&E. The numerator is the sum of Revenue Ratio, Total Assets Ratio and Number of Employees Ratio for the specific company. The denominator is three – the number of ratios being averaged. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Assets Ratio – Based on the total assets at year end for the preceding year. In the event of joint ownership of a specific asset, asset ownership percentages are utilized to assign costs. The numerator is the total assets for each specific company at the end of the preceding year. The denominator is the sum of total assets for each company in which an allocator is assigned (KU, LG&E and LKC). This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Utility Plant Assets Ratio – Based on the total utility plant assets at year end for the preceding year, the numerator of which is for an operating company or affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. In the event of joint ownership of a specific asset, ownership percentages are utilized to assign costs. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Transportation Resource Management System Chargeback Ratio – Based on the costs associated with providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by the various company entities. This ratio is calculated monthly based on the actual transportation charges from the previous month. The numerator is the department labor charged to a specific company. The denominator is the total labor costs for the specific department. The ratio is then multiplied by the total transportation costs to determine the amount charged to each company.

Utility Ownership Percentages – Based on the contractual ownership percentages of jointly-owned generating units. This ratio is updated as a result of a new jointly-owned generating unit, and is based on the total forecasted energy needs. The numerator is the specific company's forecasted incremental capacity and/or energy needs. The denominator is the total incremental capacity and/or energy needs of all companies.

Kentucky Utilities Company
Case No. 2012-00221
Historical Test Period Filing Requirements

Filing Requirement
807 KAR 5:001 Section 10(6)(n)
Sponsoring Witness: Shannon L. Charnas

Description of Filing Requirement:

A summary of the utility's latest depreciation study with schedules by major plant accounts, except that telecommunications utilities that have adopted the commission's average depreciation rates shall provide a schedule that identifies the current and test period depreciation rates used by major plant accounts. If the required information has been filed in another commission case a reference to that case's number and style will be sufficient.

Response:

A copy of KU's latest depreciation study is already on file with the Commission in KU's consolidated depreciation case, Case No. 2007-00565, *In the Matter of: Application of Kentucky Utilities Company to File Depreciation Study*, and rate case, Case No. 2008-00251, *In the Matter of: Application of Kentucky Utilities Company for an Adjustment of Base Rates*, and is incorporated by reference herein. As part of this current rate case application, KU is filing a new depreciation study, as referenced in the testimony and exhibits of John J. Spanos.

Supplement, dated May 2, 2011 to Reoffering Circular dated December 11, 2008, as supplemented as of December 16, 2008, October 29, 2010 and December 1, 2010 (the "Reoffering Circular")

$54,000,000 **County of Carroll, Kentucky** **Environmental Facilities Revenue Refunding Bonds, 2006 Series B** **(Kentucky Utilities Company Project)**	**$77,947,405** **County of Carroll, Kentucky** **Environmental Facilities Revenue Bonds,** **2008 Series A** **(Kentucky Utilities Company Project)**

Effective as of May 2, 2011, through April 22, 2014 (the Letter of Credit (as defined below) expiration date, subject to extension or earlier termination), payment of the principal of and interest on each series of the above-referenced bonds (individually, the "2006 Series B Bonds" and the "2008 Series A Bonds" and, collectively, the "Bonds") when due will be paid with funds drawn under an irrevocable transferable direct pay letter of credit (the "Letter of Credit") issued by

SUMITOMO MITSUI BANKING CORPORATION, NEW YORK BRANCH

The Letter of Credit will permit the Trustee to draw with respect to each series of Bonds up to an amount sufficient to pay (i) the principal of such series of Bonds (or that portion of the purchase price corresponding to principal) plus (ii) interest thereon (or that portion of the purchase price corresponding to interest) up to a maximum rate of 15% per annum for at least 45 days.

Each series of Bonds will continue to bear interest at a Weekly Rate, determined by the Remarketing Agent, BofA Merrill Lynch, in accordance with the Indenture, payable on the first Business Day of each calendar month, commencing on June 1, 2011. The interest rate period, interest rate and Interest Rate Mode for each series of Bonds will be subject to change under certain conditions, as described in the Reoffering Circular. The Bonds of each series are subject to optional redemption, extraordinary optional redemption, in whole or in part, and mandatory redemption following a determination of taxability prior to maturity, as described in the Reoffering Circular. The Bonds of each series are subject to mandatory purchase on any date on which the Bonds are converted to a different Interest Rate Mode and upon the expiration of the Letter of Credit or any Alternate Credit Facility.

This supplement contains a description of the Letter of Credit and Sumitomo Mitsui Banking Corporation, New York Branch, the issuer of the Letter of Credit. For purposes of the Reoffering Circular, the Letter of Credit is a "Credit Facility" and Sumitomo Mitsui Banking Corporation, New York Branch is a "Credit Facility Issuer." Except as otherwise specified herein, information in the Reoffering Circular referred to above has not been amended or modified and the information contained herein is qualified by reference to, and should be read in conjunction with, the Reoffering Circular, including information incorporated therein by reference. Terms not otherwise defined herein shall have the meanings ascribed to them in such Reoffering Circular.

The eighth paragraph under the section of the Reoffering Circular captioned "Introductory Statement" is hereby amended to read in its entirety as follows:

Effective May 2, 2011, the Company will cause to be delivered separate irrevocable transferable direct pay letters of credit (the "Letters of Credit") with respect to each of the 2006 Series B Bonds and the 2008 Series A Bonds, issued by Sumitomo Mitsui Banking Corporation, New York Branch (the "Bank"), to provide for the timely payment of principal of and accrued interest (calculated for at least 45 days at the maximum rate of 15% per annum) on, and purchase price of, the Bonds. The Company will be required to reimburse the Bank for all amounts drawn by the Trustee under the Letters of Credit pursuant to the terms of separate Reimbursement Agreements, to be dated as of May 2, 2011 (collectively, the "Reimbursement Agreement"), with respect to each of the 2006 Series B Bonds and the 2008 Series A Bonds, between the Company and the Bank. Each Letter of Credit will expire on April 22, 2014 unless extended or earlier terminated.

***　　*　　*　　***

The section of the Reoffering Circular captioned "The Letter of Credit" is hereby amended to read in its entirety as follows:

THE LETTER OF CREDIT

The following summarizes certain provisions of the Letter of Credit and the Reimbursement Agreement, to which reference is made for the detailed provisions thereof. Unless otherwise defined in this Reoffering Circular, capitalized terms in the following summary are used as defined in the Letter of Credit and the Reimbursement Agreement. The Company is permitted under the Indenture to deliver an Alternate Credit Facility to replace the Letter of Credit. Any such Alternate Credit Facility must meet certain requirements described in the Indenture.

The Letter of Credit

The Letter of Credit will be an irrevocable transferable direct pay letter of credit issued by the Bank in order to provide additional security for the payment of principal of, purchase price of, interest on and premium, if applicable, on any date when payments under the Bonds are due, including principal and interest payments and payments upon tender, redemption, acceleration or maturity of the Bonds. The Letter of Credit will provide for direct payments to or upon the order of the Trustee as set forth in the Letter of Credit in amounts sufficient to pay such amounts in accordance with the terms thereof.

The Letter of Credit will be issued in an amount equal to the aggregate principal amount of the outstanding Bonds, plus an amount that represents interest accrued thereon at an assumed maximum rate of 15% per annum for 45 days (the "Credit Amount"). The Trustee, upon compliance with the terms of the Letter of Credit, is authorized to draw up to (a) an amount sufficient (i) to pay principal of the Bonds, when due, whether at maturity or upon redemption or acceleration, and (ii) to pay the portion of the purchase price of the Bonds delivered for purchase pursuant to a demand for purchase by the owner thereof or a mandatory tender for purchase and not remarketed (a "Liquidity Drawing") equal to the principal amount of the Bonds, plus (b) an amount not to exceed 45 days of accrued interest on the Bonds at an assumed rate of 15% per annum (i) to pay interest on the Bonds, when due, and (ii) to pay the portion of the interest accrued on the Bonds as of any Liquidity Drawing.

The amount available under the Letter of Credit will be automatically reduced by the amount of any drawing thereunder, subject to reinstatement as described below. With respect to a drawing by the Trustee solely to pay interest on the Bonds on an Interest Payment Date, the amount available under the Letter of Credit will be automatically reinstated in the amount of such drawing effective on the earlier of (i) receipt by the Bank from the Company of reimbursement of any drawing solely to pay interest in full or (ii) at the opening of business on the eleventh calendar day after the date the Bank honors such drawing, unless the Trustee has received written notice from the Bank by the tenth calendar day after the date the Bank honors such drawing that the Bank is not so reinstating the available amount due to the Company's failure to reimburse the Bank for such drawing in full, or that an event of default has occurred and is continuing under the $198,309,583.05 Letter of Credit Agreement dated as of April 29, 2011 among the Company, the lenders from time to time thereto, and Banco Bilbao Vizcaya Argentaria, S.A., New York Branch, as Administrative Agent (the "Credit Agreement") and, in either case, directing an acceleration of the Bonds pursuant to the Indenture. With respect to a Liquidity Drawing under the Letter of Credit, the amount available under the Letter of Credit will be automatically reduced by the principal amount of the Bonds purchased with the proceeds of such drawing plus the amount of accrued interest on such Bonds. In the event of the remarketing of the Bonds purchased with the proceeds of a Liquidity Drawing, the amount available under the Letter of Credit will be automatically reinstated upon receipt by the Bank or the Trustee on the Bank's behalf of an amount equal to such principal amount plus accrued interest.

The Letter of Credit will terminate on the earliest to occur of:

(i) the Bank's close of business on April 22, 2014 (such date, as extended from time to time in accordance with the Letter of Credit is defined as the "Stated Expiration Date");

(ii) the Bank's close of business on the date which is five Business Days following the date of receipt by the Bank of a certificate from the Trustee certifying that (a) no Bonds remain Outstanding within the meaning of the Indenture, (b) all drawings required to be made under the Indenture and available under the Letter of Credit have been made and honored, (c) an Alternate Credit Facility has been delivered to the Trustee in accordance with the Indenture to replace the Letter of Credit or (d) all of the outstanding Bonds were converted to Bonds bearing interest at a rate other than the Daily Rate or the Weekly Rate;

(iii) the Bank's close of business on the date of receipt by the Bank of a certificate from the Trustee confirming that the Trustee is required to terminate the Letter of Credit in accordance with the terms of the Indenture;

(iv) the date on which the Bank receives and honors an acceleration drawing certificate; or

(v) the Bank's close of business on the date which is 30 days after receipt by the Trustee of written notice from the Bank of an Event of Default under the Credit Agreement and instructing the Trustee to draw under the Letter of Credit.

Pursuant to the Credit Agreement, the Company is obligated to reimburse the Bank for all amounts drawn under the Letter of Credit, and to pay interest on all such amounts. The Company has also agreed to pay the Bank and the Administrative Agent fees for issuing and maintaining the Letter of Credit.

The Reimbursement Agreement

The Reimbursement Agreement, through incorporation of the terms of the Credit Agreement, imposes various covenants and agreements, including various financial and operating covenants, on the Company. Such covenants include, but are not limited to, covenants relating to (i) inspection of the books and financial records of the Company; (ii) mergers or consolidations; (iii) disposition of assets and (iv) capitalization ratios. Any such covenants may be amended, waived or modified at any time by the Bank and without the consent of the Trustee or the holders of the Bonds. Under certain circumstances, the failure of the Company to comply with such covenants may result in a mandatory tender or acceleration of the Bonds.

An Event of Default under the Credit Agreement will constitute an Event of Default under the Reimbursement Agreement. The following events will constitute an Event of Default under the Credit Agreement:

(i) the Company shall fail to pay when due any principal on any Reimbursement Obligations; or

(ii) the Company shall fail to pay when due any interest on the Reimbursement Obligations, any fee or any other amount payable under the Credit Agreement or under any other Loan Document for five (5) days following the date such payment becomes due thereunder; or

(iii) the Company shall fail to observe or perform certain covenants or agreements contained in the Credit Agreement, including those related to mergers, disposition of assets and capitalization ratios; or

(iv) the Company shall fail to give notice of a Default or Event of Default under the Credit Agreement within a specified number of days following knowledge of such occurrence; or

(v) the Company shall fail to observe or perform any covenant or agreement contained in the Credit Agreement or any other Loan Document (other than those covered above) for thirty (30) days after written notice thereof has been given to the defaulting party by the administrative agent, or at the request of the required lenders; or

(vi) any representation, warranty or certification made by the Company in the Credit Agreement or any other Loan Document or in any certificate, financial statement or other document delivered pursuant hereto or thereto shall prove to have been incorrect in any material respect when made or deemed made; or

(vii) the Company shall (i) fail to pay any principal or interest, regardless of amount, due in respect of any Material Debt beyond any period of grace provided with respect thereto, or (ii) fail to observe or perform any other term, covenant, condition or agreement contained in any agreement or instrument evidencing or governing any such Material Debt beyond any period of grace provided with respect thereto if the effect of any failure referred to in this clause (ii) is to cause, or to permit the holder or holders of such Material Debt or a trustee on its or their behalf to cause, such Material Debt to become due prior to its stated maturity; or

(viii) the Company shall commence a voluntary case or other proceeding seeking liquidation, reorganization or other relief with respect to itself or its debts under any bankruptcy, insolvency or other similar law now or hereafter in effect or seeking the appointment of a trustee, receiver, liquidator, custodian or other similar official of it or any substantial part of its property, or shall consent to any such relief or to the appointment of or taking possession by any such official in an involuntary case or other proceeding commenced against it, or shall make a general assignment for the benefit of creditors, or shall fail generally to pay, or shall admit in writing its inability to pay, its debts as they become due, or shall take any corporate action to authorize any of the foregoing; or

(ix) an involuntary case or other proceeding shall be commenced against the Company seeking liquidation, reorganization or other relief with respect to it or its debts under any bankruptcy, insolvency or other similar law now or hereafter in effect or seeking the appointment of a trustee, receiver, liquidator, custodian or other similar official of it or any substantial part of its property, and such involuntary case or other proceeding shall remain undismissed and unstayed for a period of 60 days; or an order for relief shall be entered against the Company under the Bankruptcy Code; or

(x) any member of the ERISA Group shall fail to pay when due an amount or amounts aggregating in excess of $50,000,000 which it shall have become liable to pay under Title IV of ERISA; or notice of intent to terminate a Material Plan shall be filed under Title IV of ERISA by any member of the ERISA Group, any plan administrator or any combination of the foregoing; or the PBGC shall institute proceedings under Title IV of ERISA to terminate, to impose liability (other than for premiums under Section 4007 of ERISA) in respect of, or to cause a trustee to be appointed to administer any Material Plan; or a condition shall exist by reason of which the PBGC would be entitled to obtain a decree adjudicating that any Material Plan must be terminated; or there shall occur a complete or partial withdrawal from, or default, within the meaning of Section 4219(c)(5) of ERISA, with respect to, one or more Multiemployer Plans which could reasonably be expected to cause one or more members of the ERISA Group to incur a current payment obligation in excess of $50,000,000; or

(xi) the Company shall fail within sixty (60) days to pay, bond or otherwise discharge any judgment or order for the payment of money in excess of $20,000,000, entered against the Company that is not stayed on appeal or otherwise being appropriately contested in good faith; or

(xii) a Change of Control shall have occurred;

For purposes of the foregoing:

"Change of Control" means (i) the acquisition by any person, or two or more persons acting in concert, of beneficial ownership (within the meaning of Rule 13d-3 of the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended) of 25% or more of the outstanding shares of voting stock of PPL Corporation or its successors or (ii) the failure at any time of PPL Corporation or its successors to own 80% or more of the outstanding shares of the voting stock in the Company.

"Material Debt" means debt (other than debt under the Loan Documents) of the Company in a principal or face amount exceeding $50,000,000

Appendix C of the Reoffering Circular is hereby amended to read in its entirety as follows:

The Company, the Issuer and the Remarketing Agent make no representation whatsoever as to the accuracy, adequacy or completeness of such information.

Sumitomo Mitsui Banking Corporation

Sumitomo Mitsui Banking Corporation (*Kabushiki Kaisha Mitsui Sumitomo Ginko*) ("SMBC") is a joint stock corporation with limited liability (*Kabushiki Kaisha*) under the laws of Japan. The registered head office of SMBC is located at 1-2, Yurakucho 1-chome, Chiyoda-ku, Tokyo, Japan.

SMBC was established in April 2001 through the merger of two leading banks, The Sakura Bank, Limited and The Sumitomo Bank, Limited. In December 2002, Sumitomo Mitsui Financial Group, Inc. ("SMFG") was established through a stock transfer as a holding company under which SMBC became a wholly owned subsidiary. SMFG reported ¥ 123,159,513 million in consolidated total assets as of March 31, 2010.

SMBC is one of the world's leading commercial banks and provides an extensive range of banking services to its customers in Japan and overseas. In Japan, SMBC accepts deposits, makes loans and extends guarantees to corporations, individuals, governments and governmental entities. It also offers financing solutions such as syndicated lending, structured finance and project finance. SMBC also underwrites and deals in bonds issued by or under the guarantee of the Japanese government and local government authorities, and acts in various administrative and advisory capacities for certain types of corporate and government bonds. Internationally, SMBC operates through a network of branches, representative offices, subsidiaries and affiliates to provide many financing products including syndicated lending and project finance.

The New York Branch of SMBC is licensed by the State of New York Banking Department to conduct branch banking business at 277 Park Avenue, New York, New York, and is subject to examination by the State of New York Banking Department and the Federal Reserve Bank of New York.

Financial and Other Information

Audited consolidated financial statements for SMFG and its consolidated subsidiaries for the fiscal years ended March 31, 2010, as well as certain unaudited financial information for SMFG and SMBC for the fiscal period ended through December 31, 2010, as well as other corporate data, financial information and analyses are available in English on the website of the Parent at www.smfg.co.jp/english.

The information herein has been obtained from SMBC, which is solely responsible for its content. The delivery of the Reoffering Circular shall not create any implication that there has been no change in the affairs of SMBC since the date hereof, or that the information contained or referred herein is correct as of any time subsequent to its date.

Appendix A of the Reoffering Circular is hereby amended to read in its entirety as follows:

Appendix A

Kentucky Utilities Company –

Financial Statements and Additional Information

This Appendix A includes a description of the Business of Kentucky Utilities Company ("KU"), certain risk factors associated with KU, Selected Financial Information, Management's Discussion and Analysis, and the Consolidated Financial Statements as of December 31, 2010 and 2009 and for the Years Ended December 31, 2010, 2009, and 2008 (Audited).

The information contained in this Appendix A relates to and has been obtained from KU and from other sources as shown herein. The delivery of this Supplement shall not create any implication that there has been no change in the affairs of KU since the date hereof, or that the information contained or incorporated by reference in this Appendix A is correct at any time subsequent to its date. In this Appendix A, "KU", "the Company", "we", "us" or "our" refer to Kentucky Utilities Company.

Summary

Kentucky Utilities Company

Kentucky Utilities Company, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU provides electric service to approximately 514,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in 5 counties in southwestern Virginia and to less than 10 customers in Tennessee. Our service area covers approximately 6,600 noncontiguous square miles. Approximately 98% of the electricity generated by us is produced by our coal-fired electric generating stations. The remainder is generated by natural gas and oil fueled combustion turbines and a hydroelectric power plant. In Virginia, we operate under the name Old Dominion Power Company. We also sell wholesale electric energy to 12 municipalities.

KU is a wholly-owned subsidiary of LG&E and KU Energy LLC. On November 1, 2010, PPL Corporation purchased all of the interests of LG&E and KU Energy LLC and, indirectly, all of the stock of the Company from E.ON AG, making KU an indirect wholly-owned subsidiary of PPL Corporation. KU's affiliate, Louisville Gas and Electric Company ("LG&E"), is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and natural gas in Kentucky.

Table of Contents

Forward-Looking Information

KU uses forward-looking statements in this annual report. Statements that are not historical facts are forward-looking statements, and are based on beliefs and assumptions of management, and on information currently available to management. Forward-looking statements include statements preceded by, followed by or using such words as “believe,” “expect,” “anticipate,” “plan,” “estimate” or similar expressions. Such statements speak only as of the date they are made, and the Company undertakes no obligation to update publicly any of them in light of new information or future events. Actual results may materially differ from those implied by forward-looking statements due to known and unknown risks and uncertainties. Factors that could cause actual results to differ materially from those indicated in any forward-looking statement include, but are not limited to:

- fuel supply availability;
- weather conditions affecting generation production, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- transmission and distribution system conditions and operating costs;
- collective labor bargaining negotiations;
- the outcome of litigation against the Company;
- potential effects of threatened or actual terrorism or war or other hostilities;
- commitments and liabilities;
- market demand and prices for energy, capacity, transmission services, emission allowances and delivered fuel;
- competition in retail and wholesale power markets;
- liquidity of wholesale power markets;
- defaults by counterparties under the Company’s energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates, and decisions regarding capital structure;
- the fair value of debt and equity securities and the impact on defined benefit costs and resultant cash funding requirements for defined benefit plans;
- interest rates and their effect on pension and retiree medical liabilities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- profitability and liquidity, including access to capital markets and credit facilities;
- new accounting requirements or new interpretations or applications of existing requirements;
- securities and credit ratings;
- current and future environmental conditions and requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- political, regulatory or economic conditions in states, regions or countries where the Company conducts business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state or federal legislation, including new tax, environmental, health care or pension-related legislation;
- state or federal regulatory developments;
- the impact of any state or federal investigations applicable to the Company and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;

- performance of new ventures; and
- asset acquisitions and dispositions.

In light of these risks and uncertainties, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than the Company has described. For additional details regarding these and other risks and uncertainties, see Risk Factors.

Business

General

KU, incorporated in Kentucky in 1912 and in Virginia in 1991, is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU provides electric service to approximately 514,000 customers in 77 counties in central, southeastern and western Kentucky, to approximately 30,000 customers in five counties in southwestern Virginia and less than ten customers in Tennessee. KU's service area covers approximately 6,600 noncontiguous square miles. Approximately 98% of the electricity generated by KU is produced by its coal-fired electric generating stations. The remainder is generated by natural gas and oil fueled CTs and a hydroelectric power plant. In Virginia, KU operates under the name Old Dominion Power Company. KU also sells wholesale electric energy to 12 municipalities.

On November 1, 2010, KU became an indirect wholly owned subsidiary of PPL, when PPL acquired all of the outstanding limited liability company interests in the Company's direct parent, LKE, from E.ON US Investments Corp. LKE, a Kentucky limited liability company, also owns the affiliate, LG&E, a regulated utility engaged in the generation, transmission, distribution and sale of electric energy and distribution and sale of natural gas in Kentucky. Following the acquisition, the Company's business has not changed. KU and LG&E are continuing as subsidiaries of LKE, which is now an intermediary holding company in the PPL group of companies.

Headquartered in Allentown, Pennsylvania, PPL is an energy and utility holding company that was incorporated in 1994. Through its subsidiaries, PPL owns or controls about 19,000 megawatts of generating capacity in the U.S., sells energy in key U.S. markets and delivers electricity and natural gas to about 5.3 million customers in the U.S. and the U.K.

Predecessor and Successor

KU's historical financial results are presented using "Predecessor" or "Successor" to designate the periods before or after PPL's acquisition of LKE. Predecessor covers the time period prior to November 1, 2010. Successor covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL accounting policies and the cost basis of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor period are not comparable to the Predecessor period.

Despite the separate presentation, the core operations of the Company have not changed. See Note 1, Summary of Significant Accounting Policies, for the major differences in Predecessor and Successor accounting policies. See Note 2, Acquisition by PPL, for information regarding the acquisition and the purchase accounting adjustments.

Operations

Dollars are in millions unless otherwise noted.

The sources of operating revenues and volumes of sales for the following periods in 2010, 2009 and 2008 were as follows:

	Successor		Predecessor					
	November 1, 2010 through December 31, 2010		January 1, 2010 through October 31, 2010		Year Ended December 31, 2009		Year Ended December 31, 2008	
	Revenues	Volumes (Gwh)	Revenues	Volumes (Gwh)	Revenues	Volumes (Gwh)	Revenues	Volumes (Gwh)
Residential	$ 106	1,394	$ 440	5,788	$ 480	6,594	$ 462	6,803
Industrial and commercial	117	1,876	588	9,152	637	10,171	636	10,709
Municipals	15	326	88	1,676	91	1,848	92	1,971
Other retail	20	273	114	1,453	118	1,647	108	1,707
Wholesale	5	68	18	376	29	660	107	2,894
	$ 263	3,937	$ 1,248	18,445	$ 1,355	20,920	$ 1,405	24,084

KU's peak load in 2010 was 4,517 Mw on December 15, 2010, when the temperature dropped to a low of 3 degrees Fahrenheit in Lexington. KU's all time peak load was 4,640 Mw and occurred on January 16, 2009, when the temperature dropped to a low of -2 degrees Fahrenheit in Lexington.

The Company's power generating system includes coal-fired steam generating stations, with natural gas and oil fueled CTs which supplement the system during peak or emergency periods. As of December 31, 2010, KU's system capacity was:

Fuel/Plant	Total Summer Mw Capacity (a)	% Ownership	Ownership or Lease Interest in Mw	Location
Coal (steam)				
Ghent	1,918	100.00	1,918	Carroll County, KY
E.W. Brown	684	100.00	684	Mercer County, KY
Green River	163	100.00	163	Muhlenberg County, KY
Tyrone	71	100.00	71	Woodford County, KY
OVEC - Clifty Creek (b)	1,304	2.50	33	Jefferson County, IN
OVEC - Kyger Creek (b)	1,086	2.50	27	Gallia County, OH
Total steam	5,226		2,896	
Natural gas/oil (combustion turbines)				
E.W. Brown Units 8-11	480	100.00	480	Mercer County, KY
Trimble County Units 7-10 (c)	640	63.00	403	Trimble County, KY
Trimble County Units 5-6 (c)	320	71.00	227	Trimble County, KY
E.W. Brown Units 6-7 (c)	338	62.00	214	Mercer County, KY
Paddy's Run (c)	158	47.00	74	Jefferson County, KY
E.W. Brown Unit 5	129	47.00	63	Mercer County, KY
Haefling	36	100.00	36	Fayette County, KY
Total combustion turbines	2,101		1,497	

Fuel/Plant	Total Summer Mw Capacity (a)	% Ownership	Ownership or Lease Interest in Mw	Location
Hydro				
Dix Dam Hydroelectric Station	24	100.00	24	Mercer County, KY
Total hydro	24		24	
Total system capacity	7,351		4,417	

(a) The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units and may be revised periodically to reflect changed circumstances.
(b) KU is contractually entitled to 2.50% of OVEC's output based on a power purchase agreement which is comprised of annual minimum debt service payments, as well as contractually-required reimbursement of plant operating, maintenance and other expenses. OVEC's capacity is shown at unit nameplate ratings.
(c) Units are jointly owned with LG&E. See Note 14, Jointly Owned Electric Utility Plant, for further information.

With limited exceptions the Company took care, custody and control of TC2 on January 22, 2011, and has dispatched the unit to meet customer demand since that date. KU and the contractor agreed to a further amendment of the construction agreement whereby the contractor will complete certain actions relating to identifying and completing any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. Unit 2 is coal-fired and has a capacity of 760 Mw, of which KU's share is 462 Mw.

On December 31, 2010, KU's transmission system included 132 substations (54 of which are shared with the distribution system) with transformer capacity of approximately 13,136 MVA and approximately 4,076 miles of lines. The distribution system included 480 substations (54 of which are shared with the transmission system) with transformer capacity of approximately 7,044 MVA, and approximately 14,123 miles of overhead lines and 2,221 miles of underground conduit.

KU had a power supply contract with OMU that was terminated by OMU in May 2010. KU owns 20% of EEI's common stock and 2.5% of OVEC's common stock. KU has power purchase rights for its portion of OVEC's output. Additional information regarding this relationship is provided in Note 1, Summary of Significant Accounting Policies and Note 13, Commitments and Contingencies.

KU contracts with the TVA to act as KU's transmission reliability coordinator and SPP to function as KU's independent transmission operator, pursuant to FERC requirements. The TVA and SPP contracts provide services through August 31, 2011 and August 31, 2012, respectively. See Note 3, Rates and Regulatory Matters, for further information.

KU and LG&E jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has

excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are recorded as intercompany wholesale sales and purchases and are recorded by each company at a price equal to the seller's fuel cost. Savings realized from purchasing electricity intercompany instead of generating from their own higher costs units or purchasing from the market are shared equally between the Utilities. The volume of energy each company has to sell to the other is dependent on its native load needs and its available generation.

Substantially all of KU's real and tangible property located in Kentucky is subject to a mortgage lien, securing its first mortgage bonds. See Note 11, Long-Term Debt, for further information.

Rates and Regulations

PPL, KU's ultimate parent, is a holding company under PUHCA 2005. PPL, its utility subsidiaries, including KU, and certain of its non-utility subsidiaries are subject to extensive regulation by the FERC with respect to numerous matters, including: electric utility facilities and operations, wholesale sales of power and related transactions, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties, payments of dividends out of capital and surplus, financial matters and inter-system sales of non-power goods and services. KU believes that it has adequate authority (including financing authority) under existing FERC Orders and regulations to conduct its business and will seek additional authorization when necessary.

The Company is subject to the jurisdiction of the FERC, Kentucky Commission, Virginia Commission and the Tennessee Regulatory Authority in virtually all matters related to electric utility regulation, and as such, its accounting is subject to the regulated operations guidance of the FASB ASC. Given its competitive position in the marketplace and the status of regulation in Kentucky, Virginia and Tennessee there are no plans or intentions to discontinue the application of the regulated operations guidance of the FASB ASC.

On April 28, 2010, E.ON U.S. announced that a Purchase and Sale Agreement (the "Agreement") had been entered into among E.ON US Investments Corp., PPL and E.ON.

The transaction was subject to customary closing conditions, including the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Act, receipt of required regulatory approvals (including the FERC and state regulators in Kentucky, Virginia and Tennessee) and the absence of injunctions or restraints imposed by governmental entities.

Change of control and financing-related applications were filed on May 28, 2010, with the Kentucky Commission and on June 15, 2010, with the Virginia Commission and the Tennessee Regulatory Authority. An application with the FERC was filed on June 28, 2010. During the second quarter of 2010, a number of parties were granted intervenor status in the Kentucky Commission proceedings and data request filings and responses occurred. Early termination of the Hart-Scott-Rodino waiting period was received on August 2, 2010.

A hearing in the Kentucky Commission proceedings was held on September 8, 2010, at which time a unanimous settlement agreement was presented. In the settlement, KU committed that no base rate increases would take effect before January 1, 2013. The KU rate increases that took effect on August 1,

2010, were not impacted by the settlement. Under the terms of the settlement, KU retains the right to seek approval for the deferral of “extraordinary and uncontrollable costs.” Interim rate adjustments will continue to be permissible during that period for existing fuel, environmental and demand-side management cost trackers. The agreement also substitutes an acquisition savings shared deferral mechanism for the requirement that the Company file a synergies plan with the Kentucky Commission. This mechanism, which will be in place until the earlier of five years or the first day of the year in which a base rate increase becomes effective, permits KU to earn up to a 10.75% return on equity. Any earnings above a 10.75% return on equity will be shared with customers on a 50%/50% basis. On September 30, 2010, the Kentucky Commission issued an Order approving the transfer of ownership of KU via the acquisition of E.ON U.S. by PPL, incorporating the terms of the submitted settlement. On October 19, 2010 and October 21, 2010, respectively, Orders approving the acquisition of E.ON U.S. by PPL were received from the Virginia Commission and the Tennessee Regulatory Authority. The Commissions’ Orders contained a number of other commitments with regard to operations, workforce, community involvement and other matters.

In mid-September 2010, KU and other applicants in the FERC change of control proceeding reached an agreement with the protesters, whereby such protests have been withdrawn. The agreement, which was filed for consideration with the FERC, includes various conditional commitments, such as a continuation of certain existing undertakings with protesters in prior cases, an agreement not to terminate certain KU municipal customer contracts prior to January 2017, an exclusion of any transaction-related costs from wholesale energy and tariff customer rates to the extent that KU agreed not to seek the same transaction-related cost from retail customers and agreements to coordinate with protesters in certain open or ongoing matters. A FERC Order approving the transaction was received on October 26, 2010, and the transaction was completed on November 1, 2010.

In January 2010, KU filed an application with the Kentucky Commission requesting an increase in electric base rates of approximately 12%, or $135 million annually. In June 2010, KU and all of the intervenors, except the AG, agreed to a stipulation providing for an increase in electric base rates of $98 million annually and filed a request with the Kentucky Commission to approve such settlement. An Order in the proceeding was issued in July 2010, approving all the provisions in the stipulation, including a return on equity range of 9.75-10.75%. The new rates became effective on August 1, 2010.

In June 2009, KU filed an application with the Virginia Commission requesting an increase in electric base rates for its Virginia jurisdictional customers in an amount of $12 million annually or approximately 21%. The proposed increase reflected a proposed rate of return on rate base of 8.586% based on a return on equity of 12%. As permitted, pursuant to a Virginia Commission Order, KU elected to implement the proposed rates effective November 1, 2009, on an interim basis. During December 2009, KU and the Virginia Commission Staff agreed to a Stipulation and Recommendation authorizing a base rate revenue increase of $11 million annually and a return on rate base of 7.846% based on a 10.5% return on common equity. In March 2010, the Virginia Commission issued an Order approving the stipulation, with the increased rates to be put into effect as of April 1, 2010. As part of the stipulation, KU refunded approximately $1 million in interim rate amounts in excess of the ultimate approved rates.

In January 2009, a significant ice storm passed through KU’s service area causing approximately 199,000 customer outages, followed closely by a severe wind storm in February 2009 causing approximately 44,000 customer outages. The Company filed an application with the Kentucky Commission in April 2009, requesting approval to establish a regulatory asset and defer for future

recovery approximately $62 million in incremental operation and maintenance expenses related to the storm restoration. In September 2009, the Kentucky Commission issued an Order allowing the Company to establish a regulatory asset of up to $62 million based on its actual costs for storm damages and service restoration due to the January and February 2009 storms. In September 2009, the Company established a regulatory asset of $57 million for actual costs incurred. KU received approval in its 2010 base rate case to recover this asset over a ten year period with recovery beginning August 1, 2010.

In September 2008, high winds from the remnants of Hurricane Ike passed through the service area causing significant outages and system damage. In October 2008, KU filed an application with the Kentucky Commission requesting approval to establish a regulatory asset and defer for future recovery approximately $3 million of expenses related to the storm restoration. In December 2008, the Kentucky Commission issued an Order allowing the Company to establish a regulatory asset of up to $3 million based on its actual costs for storm damages and service restoration due to Hurricane Ike. In December 2008, the Company established a regulatory asset of $2 million for actual costs incurred. The Company received approval in its 2010 base rate case to recover this asset over a ten year period beginning August 1, 2010.

In September 2008, KU filed an application with the FERC for increases in electric base rates applicable to wholesale power sales contracts or interchange agreements involving, collectively, twelve Kentucky municipalities. The application requested a shift from an all-in stated unit charge rates to an unbundled formula rate, including an annual adjustment mechanism. In May 2009, the FERC issued an Order approving a settlement among the parties in the case, incorporating increases of approximately 3% from prior rates and a return on equity of 11%. In May 2010, KU submitted to the FERC the proposed current annual adjustments to the formula rates, which incorporated certain proposed increases. Updated rates, including certain further adjustments from a review process involving wholesale requirements customers, became effective as of July 1, 2010.

By mutual agreement, the parties' settlement of the 2008 application left outstanding the issue of whether KU must allocate to the municipal customers a portion of renewable resources it may be required to procure on behalf of its retail ratepayers. An Order was issued by the FERC in July 2010, indicating that KU is not required to allocate a portion of any renewable resources to the twelve municipalities, thus resolving the remaining issue.

In July 2008, KU filed an application with the Kentucky Commission requesting an increase in electric base rates. In January 2009, KU, the AG, the KIUC and all other parties to the rate case filed a settlement agreement with the Kentucky Commission, under which KU's electric base rates decreased by $9 million annually. An Order approving the settlement agreement was received in February 2009. The new rates were implemented effective February 6, 2009.

For a further discussion of regulatory matters, see Note 3, Rates and Regulatory Matters.

<u>Coal Supply</u>

Coal-fired generating units provided approximately 98% of KU's net kWh generation for 2010. The remaining net generation was provided by natural gas and oil fueled CTs and a hydroelectric plant. Coal is expected to be the predominant fuel used by KU in the foreseeable future, with natural gas and oil

being used for peaking capacity and flame stabilization in coal-fired boilers or in emergencies. The Company has no nuclear generating units and has no plans to build any in the foreseeable future.

Fuel inventory is maintained at levels estimated to be necessary to avoid operational disruptions at the coal-fired generating units. Reliability of coal deliveries can be affected periodically by a number of factors including fluctuations in demand, coal mine production issues and other supplier or transporter operating difficulties.

KU has entered into coal supply agreements with various suppliers for coal deliveries for 2011 and beyond and normally augments its coal supply agreements with spot market purchases. The Company has a coal inventory policy which it believes provides adequate protection under most contingencies.

KU expects to continue purchasing most of its coal, which has sulfur content in the 0.7% - 3.5% range, from western and eastern Kentucky, West Virginia, southern Indiana, southern Illinois, Ohio and Wyoming for the foreseeable future. This supply, in combination with the installation of FGDs (SO_2 removal systems), KU expects its use of higher sulfur coal to increase, the combination of which is expected to enable KU to continue to provide electric service in compliance with existing environmental laws and regulations. Coal is delivered to KU's generating stations by a mix of transportation modes, including barge, truck and rail.

Seasonality

Demand for and market prices for electricity are affected by weather. As a result, KU's overall operating results in the future may fluctuate substantially on a seasonal basis, especially when more severe weather conditions such as heat waves or winter storms make such fluctuations more pronounced. The pattern of this fluctuation may change depending on the type and location of the facilities KU owns and the terms of its contracts to purchase or sell electricity.

Environmental Matters

General

Protection of the environment is a major priority for KU and a significant element of its business activities. KU's properties and operations are subject to extensive environmental-related oversight by federal, state and local regulatory agencies, including via air quality, water quality, waste management and similar laws and regulations. Therefore, KU must conduct its operations in accordance with numerous permit and other requirements issued under or contained in such laws or regulations.

Climate Change

Recent developments continue to indicate an increased possibility of significant climate change or GHG legislation or regulation, at the international, federal, regional and state levels. During December 2009, as part of the United Nation's Copenhagen Accord, the United States agreed to a non-binding goal to reduce GHG emissions to 17% below 2005 levels by 2020. Additionally, during 2009, the U.S. House of Representatives passed comprehensive GHG legislation, which included a number of measures to limit GHG emissions and achieve GHG emission reduction targets below 2005 levels of 3% by 2012, 17% by 2020 and 83% by 2050. Similar legislation has been considered in the U.S. Senate, but the prospects for

passage remain uncertain. In late 2009, the EPA issued a final endangerment finding relating to mobile sources of GHGs and a GHG reporting requirement beginning in 2010. In 2010, the EPA issued a final rule requiring implementation of best available control technology for GHG emissions from new or modified power plants, effective January 2011. In December 2010, the EPA announced that it intends to propose New Source Performance Standards addressing GHG emissions from new and existing power plants, with a proposed rule expected in July 2011. Finally, a number of U.S. states, although not currently including Kentucky, have adopted GHG-reduction legislation or regulation of various sorts. The developing GHG initiatives include a number of differing structures and formats, including direct limitations on GHG sources, issuance of allowances for GHG emissions, cap-and-trade programs for such allowances, renewable or alternative generation portfolio standards and mechanisms relating to demand reduction, energy efficiency, smart-grid, transmission expansion, carbon-sequestration or other GHG-reducing efforts. While the final terms and impacts of such initiatives cannot be estimated, KU, as a primarily coal-fired utility, could be highly affected by such proceedings.

Among other emissions, GHGs include carbon-dioxide, which is produced via the combustion of fossil fuels such as coal and natural gas. KU's generating fleet is approximately 66% coal-fired, 34% oil/natural gas-fired and less than 1% hydroelectric based on capacity. During 2010, KU produced approximately 98% of its electricity from coal, 2% from natural gas combustion and less than 1% from hydroelectric generation, based on Mwh. During 2010, KU's emissions of GHGs were approximately 16.4 million metric tons of carbon-dioxide equivalents from KU's owned or controlled generation sources. While its generation activities account for the bulk of its GHG emissions, other GHG sources at KU include operation of motor vehicles and powered equipment, leakage or evaporation associated with natural gas pipelines, refrigerating equipment and similar activities.

Ultimately, environmental matters or potential environmental matters can represent an important element of current or future potential capital requirements, future unit retirement or replacement decisions, supply and demand for electricity, operating and maintenance expenses or compliance risks for the Company. Based on prior regulatory precedent, KU currently anticipates that many of such direct costs may be recoverable through rates or other regulatory mechanisms, particularly with respect to coal-related generation, but the availability, timing or completeness of such rate recovery cannot be assured. Ultimately, climate change and other environmental matters will likely increase the level of capital expenditures and operating and maintenance costs incurred by the Company during the next several years. With respect to NAAQS, CATR, CAMR replacement and coal combustion byproducts developments, based on a preliminary analysis of proposed regulations, the Company may be required to consider actions such as upgrading existing emissions controls, installing additional emissions controls, upgrading byproducts disposal and storage and possible early replacement of coal-fired units. In order to comply with the coal combustion residual rules and the above referenced air rules, capital expenditures for KU are preliminarily estimated to be in the $1.5 to $1.7 billion range over the next ten years, although final costs may substantially vary. This estimate does not include compliance with GHG rules or contemplated water-related environmental changes. See Risk Factors, Management's Discussion and Analysis and Note 13, Commitments and Contingencies, for further information.

State Executive or Legislative Matters

In November 2008, the Commonwealth of Kentucky issued an action plan to create efficient, sustainable energy solutions and strategies and move toward state energy independence. The plan outlines the following seven strategies to work toward these goals:

- Improve the energy efficiency of Kentucky's homes, buildings, industries and transportation fleet
- Increase Kentucky's use of renewable energy
- Sustainably grow Kentucky's production of biofuels
- Develop a coal-to-liquids industry in Kentucky to replace petroleum-based liquids
- Implement a major and comprehensive effort to increase natural gas supplies, including coal-to-natural gas in Kentucky
- Initiate aggressive carbon capture/sequestration projects for coal-generated electricity in Kentucky
- Examine the use of nuclear power for electricity generation in Kentucky

In December 2009, the Governor of Kentucky's Executive Task Force on Biomass and Biofuels issued a final report to establish potential strategic actions to develop biomass and biofuels industries in Kentucky. The plan noted the potential importance of biomass as a renewable energy source available to Kentucky and discussed various goals or mechanisms, such as the use of approximately 25 million tons of biomass for generation fuel annually, allotment of electricity and natural gas taxes and state tax credits to support biomass development.

In January 2010, a state-established Kentucky Climate Action Plan Council (the "Council") commenced formal activities. The Council, which includes governmental, industry, consumer and other representatives, seeks to identify possible Kentucky responses to potential climate change and federal legislation, including increasing statewide energy efficiency, energy independence and economic growth. The Council has established various technical work groups, including in the areas of energy supply and energy efficiency/conservation, to provide input, data and recommendations.

During the current session of the Kentucky General Assembly, as during prior legislative sessions, legislators have introduced or are expected to introduce various bills with respect to environmental or utility matters, including potential requirements relating to renewable energy portfolios, energy conservation measures, coal mining or coal byproduct operations and other matters. The current session is scheduled to end in March 2011 and until such time the prospects and final terms of any such legislation cannot be determined. Legislative and regulatory actions as a result of these proposals and their impact on KU, which may be significant, cannot currently be predicted.

Franchises and Licenses

KU provides electric delivery service in its various service areas pursuant to certain franchises, licenses, statutory service areas, easements and other rights or permissions granted by state legislatures, cities or municipalities or other entities.

Competition

There are currently no other electric utilities operating within the electric service areas of KU. Neither the Kentucky General Assembly nor the Kentucky Commission has adopted or approved a plan or timetable for retail electric industry competition in Kentucky. The nature or timing of any legislative or regulatory actions regarding industry restructuring and their impact on KU, which may be significant, cannot currently be predicted. Virginia, formerly a competitive jurisdiction, has enacted legislation which implements a hybrid model of cost-based regulation. See Note 3, Rates and Regulatory Matters, for further information.

Employees and Labor Relations

KU had 974 employees at December 31, 2010, consisting of 973 full-time employees and 1 part-time employee. Of the total employees, 145, or 15%, were operating, maintenance and construction employees represented by the IBEW Local 2100 and the United Steelworkers of America ("USWA") Local 9447-01. In August 2009, the Company and its employees represented by the IBEW Local 2100 entered into a three-year collective bargaining agreement that provides for negotiated increases or changes to wages, benefits or other provisions and annual wage re-openers. In August 2008, the Company and its employees represented by the USWA Local 9447-01 entered into a three-year collective bargaining agreement that provides for negotiated increases or changes to wages, benefits or other provisions and annual wage re-openers.

Officers of the Company

Officers are elected annually by the Board of Directors. There are no family relationships among any of the executive officers, nor is there any arrangement or understanding between any executive officer and any other person pursuant to which the officer was selected.

Except as may be set forth in Legal Proceedings, there have been no events under any bankruptcy act, no criminal proceedings and no judgments or injunctions material to the evaluation of the ability and integrity of any executive officer during the past five years.

Listed below are the executive officers at December 31, 2010.

Name	Age	Positions Held During the Past Five Years	Dates
Victor A. Staffieri	55	Chairman of the Board, President and Chief Executive Officer	May 2001 – present
John R. McCall	67	Executive Vice President, General Counsel, Corporate Secretary and Chief Compliance Officer	July 1994 – present
Chris Hermann	63	Senior Vice President – Energy Delivery	February 2003 – present
Paula H. Pottinger	53	Senior Vice President – Human Resources	January 2006 – present
S. Bradford Rives	52	Chief Financial Officer	September 2003 – present
Paul W. Thompson	53	Senior Vice President – Energy Services	June 2000 – present

Officers generally serve in the same capacities at the Company, LKE and LG&E.

Risk Factors

Any of the events or circumstances described as risks below could result in a significant or material adverse effect on the business, results of operations, cash flows or financial condition. The risks and uncertainties described below may not be the only risks and uncertainties that KU faces. Additional risks and uncertainties not currently known or that KU currently deems immaterial may also result in a significant or material adverse effect on the business, results of operations, cash flow or financial condition.

KU's business is subject to significant and complex governmental regulation.

Various federal and state entities, including but not limited to the FERC, Kentucky Commission, Virginia Commission and the Tennessee Regulatory Authority, regulate many aspects of utility operations of KU, including the following:

- the rates that KU may charge and the terms and conditions of the Company's service and operations;
- financial and capital structure matters;
- siting and construction of facilities;
- mandatory reliability and safety standards and other standards of conduct;
- accounting, depreciation and cost allocation methodologies;
- tax matters;
- affiliate restrictions;
- acquisition and disposal of utility assets and securities; and
- various other matters.

Such regulations or changes thereto may subject KU to higher operating costs or increased capital expenditures and failure to comply could result in sanctions or possible penalties. In any rate-setting proceedings, federal or state agencies, intervenors and other permitted parties may challenge rate requests and ultimately reduce, alter or limit the rates the Company seeks.

The profitability of KU is highly dependent on its ability to recover the costs of providing energy and utility services to its customers and earn an adequate return on its capital investments. KU currently provides services to retail customers at rates approved by one or more federal or state regulatory commissions, including those commissions referred to above. While these rates are generally regulated based on an analysis of their costs incurred in a base year, the rates KU is allowed to charge may or may not match its costs at any given time. While rate regulation is premised on providing a reasonable opportunity to earn a reasonable rate of return on invested capital, there can be no assurance that the applicable regulatory commissions will consider all of the costs to have been prudently incurred or that the regulatory process in which rates are determined will always result in rates that will produce full recovery of KU's costs or an adequate return on KU's capital investments. If the Company's costs are not adequately recovered through rates, it could have an adverse affect on the business, results of operations, cash flows or financial condition.

As part of the PPL acquisition commitments, KU has agreed, subject to certain limited exceptions such as fuel and environmental cost recoveries, that no base rate increase would take effect for Kentucky retail customers before January 1, 2013.

Transmission and interstate market activities of KU, as well as other aspects of the business, are subject to significant FERC regulation.

KU is subject to extensive regulation by the FERC covering matters including rates charged to transmission users, market-based or cost-based rates applicable to wholesale customers; interstate power market structure; construction and operation of transmission facilities; mandatory reliability standards; standards of conduct and affiliate restrictions and other matters. Existing FERC regulation, changes thereto or issuances of new rules or situations of non-compliance, including but not limited to the areas of market-based tariff authority, RSG resettlements in the MISO market, mandatory reliability standards and natural gas transportation regulation can affect the earnings, operations or other activities of KU.

Changes in transmission and wholesale power market structures could increase costs or reduce revenues.

Wholesale sales fluctuate with regional demand, fuel prices and contracted capacity. Changes to transmission and wholesale power market structures and prices may occur in the future, are not estimable and may result in unforeseen effects on energy purchases and sales, transmission and related costs or revenues. These can include commercial or regulatory changes affecting power pools, exchanges or markets in which KU participates.

KU undertakes significant capital projects and these activities are subject to unforeseen costs, delays or failures, as well as risk of inadequate recovery of resulting costs.

KU's business is capital intensive and requires significant investments in energy generation and distribution and other infrastructure projects, such as projects for environmental compliance. The completion of these projects without delays or cost overruns is subject to risks in many areas, including the following:

- approval, licensing and permitting;
- land acquisition and the availability of suitable land;
- skilled labor or equipment shortages;
- construction problems or delays, including disputes with third party intervenors; increases in commodity prices or labor rates;
- contractor performance;
- environmental considerations and regulations;
- weather and geological issues; and
- political, labor and regulatory developments.

Failure to complete capital projects on schedule or on budget, or at all, could adversely affect the Company's financial performance, operations and future growth.

The costs of compliance with, and liabilities under, environmental laws are significant and are subject to continual changes.

Extensive federal, state and local environmental laws and regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and

the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, KU's costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the costs of their products or their demand for KU's services.

KU is subject to operational and financial risks regarding certain on-going developments concerning environmental regulation.

A number of regulatory initiatives have been implemented or are under development which could have the effect of significantly increasing the environmental regulation or operational or compliance costs related to a number of emissions or operating activities which are associated with the combustion of coal as occurs at the Company's generating stations. Such developments could include potential new or revised federal or state legislation or regulation regarding emissions of NOx, SO_2, mercury and other particulates generally and regarding storage of coal combustion byproducts. Additional regulatory initiatives may occur in other areas involving the Company's operations, including revision of limitations on water discharge or intake activities or increased standards relating to polychlorinated biphenyl usage. Compliance with any new laws or regulations in these matters could result in significant changes to KU's operations, significant capital expenditures by the Company or significant increases in the cost of conducting business.

Operating results are affected by weather conditions, including storms and seasonal temperature variations, as well as by significant man-made or accidental disturbances, including terrorism or natural disasters.

These weather or other factors can significantly affect the finances or operations of KU by changing demand levels; causing outages; damaging infrastructure or requiring significant repair costs; affecting capital markets and general economic conditions or impacting future growth.

KU is subject to operational and financial risks regarding potential developments concerning global climate change.

Various regulatory and industry initiatives have been implemented or are under development to regulate or otherwise reduce emissions of GHGs, which are emitted from the combustion of fossil fuels such as coal and natural gas, as occurs at the Company's generating stations. Such developments could include potential federal or state legislation or industry initiatives allocating or limiting GHG emissions; establishing costs or charges on GHG emissions or on fuels relating to such emissions; requiring GHG capture and sequestration; establishing renewable portfolio standards or generation fleet-diversification requirements to address GHG emissions; promoting energy efficiency and conservation; changes in transmission grid construction, operation or pricing to accommodate GHG-related initiatives; or other measures. The generation fleet of KU is predominantly coal-fired and may be highly impacted by developments in this area. Compliance with any new laws or regulations regarding the reduction of GHG emissions could result in significant changes to KU's operations, significant capital expenditures by the Company and a significant increase in the cost of conducting business. KU may face strong

competition for, or difficulty in obtaining, required GHG-compliance related goods and services, including construction services, emissions allowances and financing, insurance and other inputs relating thereto. Increases in KU's costs or prices of producing or selling electric power due to GHG-related developments could materially reduce or otherwise affect the demand, revenue or margin levels applicable to its power, thus adversely affecting its financial condition or results of operations.

KU is subject to physical, market and economic risks relating to potential effects of climate change.

Climate change may produce changes in weather or other environmental conditions, including temperature or precipitation changes, such as warming or drought. These changes may affect farm and agriculturally-dependent businesses and activities, which are an important part of Kentucky's economy, and thus may impact consumer demand for electric power. Temperature increases could result in increased overall electricity volumes or peaks and precipitation changes could result in altered availability of water for plant cooling operations. These or other meteorological changes could lead to increased operating costs, capital expenses or power purchase costs by KU. Conversely, climate change could have a number of potential impacts tending to reduce demand. Changes may entail more frequent or more intense storm activity, which, if severe, could temporarily disrupt regional economic conditions and adversely affect electricity demand levels. As discussed in other risk factors, storm outages and damage often directly decrease revenues or increase expenses, due to reduced usage and higher restoration charges, respectively. GHG regulation could increase the cost of electric power, particularly power generated by fossil fuels, and such increases could have a depressive effect on the regional economy. Reduced economic and consumer activity in the service area of KU, both in general and specific to certain industries and consumers accustomed to previously low-cost power, could reduce demand for KU's electricity. Also, demand for services could be similarly lowered should consumers' preferences or market factors move toward favoring energy efficiency, low-carbon power sources or reduced electric usage generally.

The business of KU is subject to risks associated with local, national and worldwide economic conditions.

The consequences of prolonged recessionary conditions may include a lower level of economic activity and uncertainty or volatility regarding energy prices and the capital and commodity markets. A lower level of economic activity might result in a decline in energy consumption, unfavorable changes in energy and commodity prices and slower customer growth, which may adversely affect KU's future revenues and growth. Instability in the financial markets, as a result of recession or otherwise, also may affect the cost of capital and the ability to raise capital. A deterioration of economic conditions may lead to decreased production by KU's industrial customers and, therefore, lower consumption of electricity. Decreased economic activity may also lead to fewer commercial and industrial customers and increased unemployment, which may in turn impact residential customers' ability to pay. Further, worldwide economic activity has an impact on the demand for basic commodities needed for utility infrastructure. Changes in global demand may impact the ability to acquire sufficient supplies and the cost of those commodities may be higher than expected.

KU's business is concentrated in the Midwest United States, specifically Kentucky and Virginia.

Although the business of KU is concentrated in Kentucky and Virginia, it also operates in Tennessee. Local and regional economic conditions, such as population growth, industrial growth, expansion and economic development or employment levels, as well as the operational or financial performance of major industries or customers, can affect the demand for energy and KU's results of operations. Significant industries and activities in the service area of KU include aluminum and steel smelting and fabrication; chemical processing; coal, mineral and ceramic related activities; educational institutions; health care facilities; paper and pulp processing; metal fabrication; and water and sewer utilities. Any significant downturn in these industries or activities or in local and regional economic conditions in KU's service area may adversely affect the demand for electricity in the service area.

KU is subject to operational risks relating to KU's generating plants, transmission facilities, distribution equipment, information technology systems and other assets and activities.

Operation of power plants, transmission and distribution facilities, information technology systems and other assets and activities subjects KU to many risks, including the breakdown or failure of equipment; accidents; security breaches, viruses or outages affecting information technology systems; labor disputes; obsolescence; delivery/transportation problems and disruptions of fuel supply and performance below expected levels. Occurrences of these events may impact the ability of KU to conduct its business efficiently or lead to increased costs, expenses or losses.

Although KU maintains customary insurance coverage for certain of these risks common to utilities, it does not have insurance covering the transmission and distribution systems, other than substations, because it has found the cost of such insurance to be prohibitive. If KU is unable to recover the costs incurred in restoring transmission and distribution properties following damage resulting from ice storms, tornados or other natural disasters or to recover the costs of other liabilities arising from the risks of its business, through a change in rates or otherwise, or if such recovery is not received on a timely basis, it may not be able to restore losses or damages to its properties without an adverse effect on its financial condition, results of operations or its reputation.

KU is subject to liability risks relating to its generation, transmission, distribution and retail businesses.

The conduct of the physical and commercial operations of KU subjects it to many risks, including risks of potential physical injury, property damage or other financial affects, caused to or caused by employees, customers, contractors, vendors, contractual or financial counterparties and other third parties.

KU could be negatively affected by rising interest rates, downgrades to bond credit ratings or other negative developments in its ability to access capital markets.

In the ordinary course of business, KU is reliant upon adequate long-term and short-term financing means to fund significant capital expenditures, debt interest or maturities and operating needs. As a capital-intensive business, the Company is sensitive to developments in interest rate levels; credit rating considerations; insurance, security or collateral requirements; market liquidity and credit availability and

refinancing steps necessary or advisable to respond to credit market changes. Changes in these conditions could result in increased costs and decreased liquidity available to the Company.

KU is subject to commodity price risk, credit risk, counterparty risk and other risks associated with the energy business.

General market or pricing developments or failures by counterparties to perform their obligations relating to energy, fuels, other commodities, goods, services or payments could result in potential increased costs to the Company.

KU is subject to risks associated with defined benefit retirement plans, health care plans, wages and other employee-related matters.

KU sponsors pension and postretirement benefit plans for its employees. Risks with respect to these plans include adverse developments in legislation or regulation, future costs or funding levels, returns on investments, market fluctuations, interest rates and actuarial matters. Changes in health care rules, market practices or cost structures can affect current or future funding requirements or liabilities. Without sustained growth in respective investments over time to increase the value of plan assets, KU could be required to fund plans with significant amounts of cash. KU is also subject to risks related to changing wage levels, whether related to collective bargaining agreements or employment market conditions, ability to attract and retain key personnel and changing costs of providing health care benefits.

KU is subject to risks associated with federal and state tax regulations.

Changes in taxation as well as the inherent difficulty in quantifying potential tax effects of business decisions could negatively impact results of operations. KU is required to make judgments in order to estimate its obligations to taxing authorities. These tax obligations include income, property, sales and use and employment-related taxes. KU also estimates its ability to utilize tax benefits and tax credits. Due to the revenue needs of the states and jurisdictions in which KU operates, various tax and fee increases may be proposed or considered. KU cannot predict whether legislation or regulation will be introduced or the effect on the Company of any such changes. If enacted, any changes could increase tax expense and could have a negative impact on its results of operations and cash flows.

Legal Proceedings

Rates and Regulatory Matters

For a discussion of current rates and regulatory matters, including recent electric base rate increase proceedings, rate commitments in change-of-control proceedings, TC2 proceedings, FERC, Kentucky Commission and Virginia Commission proceedings and other rates or regulatory matters affecting KU, see Note 3, Rates and Regulatory Matters, and Note 13, Commitments and Contingencies.

Environmental

For a discussion of environmental matters, including potential coal combustion byproduct or ash pond regulation; additional reductions in SO_2, NOx and other regulated emissions; NOVs and other emissions proceedings; environmental permit challenges; and other environmental items affecting KU, see Risk Factors, Note 3, Rates and Regulatory Matters, and Note 13, Commitments and Contingencies.

Climate Change

For a discussion of matters relating to potential climate change, GHG emission or global warming developments, including increased legislative and regulatory activity which could limit or increase costs applicable to fossil fuel generation sources, legal proceedings claiming damages relating to global warming, GHG reporting requirements and other matters, see Business, Risk Factors, Management's Discussion and Analysis and Note 13, Commitments and Contingencies.

Litigation

In connection with an administrative proceeding alleging a violation by a former Argentine affiliate under that country's 2002-2003 emergency currency exchange laws, claims are pending against the affiliate's then directors, including two individuals who are executive officers of the Company, in a specialized Argentine financial criminal court. Under applicable Argentine laws, directors of a local company may be liable for monetary penalties for a subject company's violations of the currency laws. The affiliate and the relevant executive officers believe their actions were in compliance with the relevant laws and have presented defenses in the administrative and criminal proceedings. LKE has standard indemnification arrangements with its executive officers. The former affiliate is now owned by a third party, which has agreed to indemnify LKE and the relevant executive officers.

For a discussion of litigation matters, see Note 13, Commitments and Contingencies.

Other

In the normal course of business, other lawsuits, claims, environmental actions and other governmental proceedings arise against KU. To the extent that damages are assessed in any of these lawsuits, the Company believes that its insurance coverage is adequate. Management, after consultation with legal counsel, does not anticipate that liabilities arising out of currently pending or threatened lawsuits and claims will have a material adverse effect on KU's financial position or results of operations.

Selected Financial Data

Dollars are in millions unless otherwise noted.

	Successor	Predecessor				
	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31,			
			2009	2008	2007	2006
Operating revenues	$ 263	$ 1,248	$ 1,355	$ 1,405	$ 1,272	$ 1,210
Operating income	$ 65	$ 285	$ 269	$ 260	$ 267	$ 235
Net income	$ 35	$ 140	$ 133	$ 158	$ 167	$ 152
Total assets	$ 6,059	$ 5,145	$ 4,956	$ 4,518	$ 3,796	$ 3,148
Long-term debt obligations (including amounts due within one year)	$ 1,841	$ 1,682	$ 1,682	$ 1,532	$ 1,264	$ 843

Management's Discussion and Analysis and Notes to Financial Statements should be read in conjunction with the above information.

Management’s Discussion and Analysis

Management’s Discussion and Analysis should be read in conjunction with the Financial Statements and Notes for the years ended December 31, 2010, 2009 and 2008. Dollars are in millions unless otherwise noted.

The purpose of “Management’s Discussion and Analysis” is to provide information about KU’s performance in implementing its’ strategies and managing risks and challenges. Specifically:

- “Overview” provides background regarding KU’s business and identifies significant matters with which management is primarily concerned in evaluation of KU’s financial condition and operating results.
- “Results of Operations” provides a description of KU’s operating results in 2010, 2009 and 2008, including a review of earnings and a brief outlook for 2011.
- “Financial Condition” provides an analysis of KU’s liquidity position and credit profile, including its sources of cash (including bank credit facilities and sources of operating cash flow) and uses of cash (including contractual obligations and capital expenditure requirements) and the key risks and uncertainties that impact KU’s past and future liquidity position and financial condition. This subsection also includes a discussion of KU’s current credit ratings.
- “Application of Critical Accounting Policies and Estimates” provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of KU and that require its management to make significant estimates, assumptions and other judgments.

Overview

KU is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. See the Business section for a description of the business. The rates KU charges its customers requires approval of the appropriate regulatory government agency. See Note 3, Rates and Regulatory Matters, for information regarding rate cases, regulatory assets and liabilities and other regulatory matters.

KU and its affiliate, LG&E, are wholly owned subsidiaries of LKE, a Kentucky limited liability company. PPL acquired LKE on November 1, 2010. Headquartered in Allentown, Pennsylvania, PPL is an energy and utility holding company that was incorporated in 1994. Through its subsidiaries, PPL owns or controls about 19,000 megawatts of generating capacity in the U.S., sells energy in key U.S. markets and delivers electricity and natural gas to about 5.3 million customers in the U.S. and the U.K. Following the acquisition, both KU and LG&E continue operating as subsidiaries of LKE, which is now an intermediary holding company in the PPL group of companies. See Note 2, Acquisition by PPL, for further information regarding the acquisition.

In operating its business, the Company faces several risks including credit risks, liquidity risks, interest rate risks and commodity and price risks. For instance, the Company has credit risks from counterparties, customers and effects of its’ own credit ratings. KU attempts to manage these risks through the adoption of financial and operational risk management programs that, among other things, are designed to monitor and reduce its’ exposure to these risks. Identified within “Management’s

Discussion and Analysis" of "Financial Condition" and "Results of Operations" are risks KU's management currently consider material; these risks are not the only risks faced by KU. Additional risks not presently known or currently deemed immaterial may also impair KU's business operations. See Risk Factors and Financial Condition - Risk Management for further discussion.

Predecessor and Successor Financial Presentation

KU's financial statements and related financial and operating data include the periods before or after PPL's acquisition of LKE on November 1, 2010, and are labeled as Predecessor or Successor. KU applied push-down accounting to account for the acquisition. For accounting purposes only, push-down accounting is considered to create a new entity due to new cost basis assigned to assets, liabilities and equity as of the acquisition date. Consequently, KU's results of operations and cash flows for the Predecessor and Successor periods in 2010 are shown separately, rather than combined, in its audited financial statements.

In the "Management's Discussion and Analysis" of "Results of Operations" and "Financial Condition", the Company has included disclosure of the combined Predecessor and Successor results of operations and cash flows. Such presentation is considered to be a non-GAAP disclosure. KU has included such disclosure because the Company believes it facilitates the comparison of 2010 operating and financial performance to 2009 and 2008, and because the core operations of the Company have not changed as a result of the acquisition.

Competition

See the Business section for information concerning competition.

Environmental Matters

General

Protection of the environment is a major priority for KU and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the costs of their products or their demand for KU's services.

Climate Change

Recent developments continue to indicate an increased possibility of significant climate change or GHG legislation or regulation, at the international, federal, regional and state levels. During December 2009, as part of the United Nation's Copenhagen Accord, the United States agreed to a non-binding goal to reduce GHG emissions to 17% below 2005 levels by 2020. Additionally, during 2009, the U.S. House of

Representatives passed comprehensive GHG legislation, which included a number of measures to limit GHG emissions and achieve GHG emission reduction targets below 2005 levels of 3% by 2012, 17% by 2020 and 83% by 2050. Similar legislation has been considered in the U.S. Senate, but the prospects for passage remain uncertain. In late 2009, the EPA issued a final endangerment finding relating to mobile sources of GHGs and a GHG reporting requirement beginning in 2010. In 2010, the EPA issued a final rule requiring implementation of best available control technology for GHG emissions from new or modified power plants, effective January 2011. In December 2010, the EPA announced that it intends to propose New Source Performance Standards addressing GHG emissions from new and existing power plants, with a proposed rule expected in July 2011. Finally, a number of U.S. states, although not currently including Kentucky, have adopted GHG-reduction legislation or regulation of various sorts. The developing GHG initiatives include a number of differing structures and formats, including direct limitations on GHG sources, issuance of allowances for GHG emissions, cap-and-trade programs for such allowances, renewable or alternative generation portfolio standards and mechanisms relating to demand reduction, energy efficiency, smart-grid, transmission expansion, carbon-sequestration or other GHG-reducing efforts. While the final terms and impacts of such initiatives cannot be estimated, KU, primarily a coal-fired utility, could be highly affected by such proceedings.

Other Environmental Regulatory Initiatives

The EPA has proposed or announced that it intends to propose a number of additional environmental regulations that could substantially impact utilities with coal-fired generating assets. These regulatory initiatives include revisions to the ambient air quality standards for SO_2, NO_2, ozone and particulate matter 2.5 microns in size or less, rules aimed at mitigating the interstate transport of SO_2 and NOx, a program governing emissions of hazardous air pollutants from utility generating units, a program for the management of coal combustion residuals, revised effluent guidelines for utility generating facilities and standards for cooling water intake structures. Such requirements could potentially mandate upgrade of existing emission controls, installation of additional emission controls such as FGDs, SCRs, fabric filter bag houses, activated carbon injection, wet electrostatic precipitators, closure of ash ponds and retrofit of landfills, installation of cooling towers, deployment of new water treatment technologies and retirement of facilities that cannot be retrofitted on a cost effective basis.

The cost to KU and the effect on KU's business of complying with potential GHG restrictions and other environmental regulatory initiatives will depend upon provisions of any final rules and how the rules are implemented by the EPA. Some of the design elements which may have the greatest effect on KU include (a) the required levels and timing of emissions caps, discharge limits or similar standards, (b) the sources covered by such requirements, (c) transition and mitigation provisions, such as phase-in periods, free allowances or price caps, (d) the availability and pricing of relevant mitigation or control technologies, goods or services and (e) economic, market and customer reaction to electricity price and demand changes due to environmental concerns.

Ultimately, environmental matters or potential environmental matters can represent an important element of current or future potential capital requirements, future unit retirement or replacement decisions, supply and demand for electricity, operating and maintenance expenses or compliance risks for the Company. Based on prior regulatory precedent, KU currently anticipates that many of such direct costs may be recoverable through rates or other regulatory mechanisms, particularly with respect to coal-related generation, but the availability, timing or completeness of such rate recovery cannot be assured. Ultimately, climate change and other environmental matters will likely increase the level of

capital expenditures and operating and maintenance costs incurred by the Company during the next several years. With respect to NAAQS, CATR, CAMR replacement and coal combustion byproducts developments, based on a preliminary analysis of proposed regulations, the Company may be required to consider actions such as upgrading existing emissions controls, installing additional emissions controls, upgrading byproducts disposal and storage and possible early replacement of coal-fired units. In order to comply with the coal combustion residual rules and the above referenced air rules, capital expenditures for KU are preliminarily estimated to be in the $1.5 to $1.7 billion range over the next ten years, although final costs may substantially vary. This estimate does not include compliance with GHG rules or contemplated water-related environmental changes. See Risk Factors and Note 13, Commitments and Contingencies, for further information.

Results of Operations

The utility business is affected by seasonal temperatures. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year. Revenue and earnings are generally highest during the first and third quarters, and lowest in the second quarter, due to weather.

Net Income

The following table summarizes the significant components of net income for 2010, 2009 and 2008 and the changes therein:

	Combined	Successor	Predecessor		
	Year Ended December 31, 2010	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Total operating revenues	$ 1,511	$ 263	$ 1,248	$1,355	$ 1,405
Total operating expenses	1,161	198	963	1,086	1,145
Operating income	350	65	285	269	260
Equity in earnings of unconsolidated venture	3	-	3	1	30
Interest expense	14	8	6	6	14
Interest expense to affiliated companies	64	2	62	69	58
Other income (expense) – net	(2)	-	(2)	5	8
Income before income taxes	273	55	218	200	226
Income tax expense	98	20	78	67	68
Net income	$ 175	$ 35	$ 140	$ 133	$ 158

The change in KU's net income was as follows:

	Increase (Decrease)	
	2010 vs. 2009	2009 vs. 2008
Total operating revenues	$ 156	$ (50)
Total operating expenses	75	(59)
Operating income	81	9
Equity in earnings of unconsolidated venture	2	(29)
Interest expense	8	(8)
Interest expense to affiliated companies	(5)	11
Other income (expense) – net	(7)	(3)
Income (loss) before income taxes	73	(26)
Income taxes	31	(1)
Net income	$ 42	$ (25)

Operating Revenues

The $156 million increase from 2009 to 2010 and $50 million decrease from 2008 to 2009 in operating revenues were primarily due to:

	Increase (Decrease)	
	2010 vs. 2009	2009 vs. 2008
Retail sales volumes (a)	$ 73	$ (43)
Base rate price variance (b)	39	(5)
Demand revenue (c)	16	(1)
Sales to municipal customers (d)	12	(1)
Increased recoverable capital spending billed through the ECR	8	50
Other operating revenue primarily due to late payment charges	6	6
FAC price variance (e)	5	(2)
Merger surcredit termination in February 2009	2	13
Transmission sales	1	-
Increased recoverable program spending billed through the DSM	1	9
Wholesale sales (f)	(7)	(77)
VDT surcredit termination in August 2008	-	1
	$ 156	$ (50)

(a) Retail sales volumes increased during 2010 compared to 2009 as a result of increased consumption primarily due to increased heating degree days during the first and fourth quarters of 2010 and increased cooling degree days during the second and third quarters of 2010. Additionally, improved economic conditions in 2010 and significant storm outages in 2009 contributed to the increased volumes.

The decrease in retail sales volumes during 2009 compared to 2008 was attributable to reduced consumption by retail customers, as a result of milder weather and weakened economic conditions, in addition to significant storm outages during 2009.

(b) The increase in revenues due to the base rate price variance during 2010 compared to 2009 resulted from higher base rates effective August 1, 2010. See Note 3, Rates and Regulatory Matters, for further discussion of the 2010 Kentucky rate case.

The decrease in revenues due to the base rate price variance during 2009 compared to 2008 resulted from a reduction in base energy rates effective February 6, 2009. See Note 3, Rates and Regulatory Matters, for further discussion of the 2008 Kentucky rate case.

(c) Demand revenues increased during 2010 compared to 2009 as a result of higher demand rates effective August 1, 2010 and higher customer peak demand. See Note 3, Rates and Regulatory Matters, for further discussion of the 2010 Kentucky rate case.

(d) The increase in sales to municipal customers during 2010 compared to 2009 was primarily due to increased volumes as a result of increased cooling and heating degree days, improved economic conditions and a decline in storm outages.

(e) FAC revenues increased during 2010 compared to 2009 as a result of increased recoverable fuel costs billed to customers through the FAC due to higher fuel prices.

The decrease in the FAC revenue during 2009 compared to 2008 resulted from lower fuel costs billed to customers through the FAC ($2 million) due to a refund of power purchased costs from OMU ($6 million) partially offset by increased recoverable fuel costs ($4 million) billed to retail customers through the FAC.

(f) The decrease in wholesale sales during 2010 compared to 2009 was primarily due to increased consumption by industrial customers, as a result of improved economic conditions, increased consumption by residential customers, as a result of increased cooling and heating degree days and an increase in LG&E's coal-fired generation outages in the first six months of 2010. See Note 15, Related Party Transactions, for further discussion of the mutual agreement for wholesale sales and purchases between KU and LG&E.

The decrease in wholesale sales during 2009 compared to 2008 was primarily due to lower sales volumes to LG&E and third-parties due to lower economic capacity, caused by low spot market pricing and higher scheduled coal-fired generation outages. See Note 15, Related Party Transactions, for further discussion of the mutual agreement for wholesale sales and purchases between KU and LG&E.

Operating Expenses

Fuel for electric generation comprises a large component of total operating expenses. Increases or decreases in the cost of fuel are reflected in retail rates through the FAC, subject to the approval of the FERC, Kentucky Commission, Virginia Commission and the Tennessee Regulatory Authority. Operating expenses and the changes therein for 2010, 2009 and 2008 follow:

	Combined	Successor	Predecessor		
	Year Ended December 31, 2010	November 1, 2010 through December 31, 2010	January 1, 2010 through October 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Fuel for electric generation	$ 495	$ 78	$ 417	$ 434	$ 513
Power purchased	175	28	147	199	221
Other operation and maintenance expenses	346	66	280	320	275
Depreciation and amortization	145	26	119	133	136
	$ 1,161	$ 198	$ 963	$ 1,086	$ 1,145

The changes in operating expenses were as follows:

	Increase (Decrease) 2010 vs. 2009	Increase (Decrease) 2009 vs. 2008
Fuel for electric generation	$ 61	$ (79)
Power purchased	(24)	(22)
Other operation and maintenance expenses	26	45
Depreciation and amortization	12	(3)
	$ 75	$ (59)

Fuel for Electric Generation

The $61 million increase from 2009 to 2010 and $79 million decrease from 2008 to 2009 were primarily due to:

	Increase (Decrease) 2010 vs. 2009	Increase (Decrease) 2009 vs. 2008
Fuel usage volumes (a)	$ 77	$ (97)
Commodity costs for coal	(15)	18
Other	(1)	-
	$ 61	$ (79)

(a) Fuel usage volumes increased in 2010 compared 2009 due to increased native load sales. Fuel usage volumes decreased in 2009 compared to 2008 due to decreased native load and wholesale sales.

Power Purchased Expense

The $24 million decrease from 2009 to 2010 and $22 million decrease from 2008 to 2009 were primarily due to:

	Increase (Decrease)	
	2010 vs. 2009	2009 vs. 2008
Power purchased from OMU	$ (40)	$ 12
Purchases from LG&E due to volume (a)	(5)	(2)
Demand payments for third party purchases	(2)	1
Prices for purchases used to serve retail customers	7	(14)
Third party purchased volumes for native load (b)	7	(6)
OMU settlement received in 2009	6	(6)
Purchases from LG&E due to prices	3	(7)
	$ (24)	$ (22)

(a) Purchased volumes from LG&E decreased in 2010 compared to 2009 primarily due to increased consumption by residential customers at LG&E as the result of increased cooling and heating degree days, increased coal-fired generation outages in the first six months of 2010 and higher energy usage by industrial customers as a result of improved economic conditions.

Purchased volumes from LG&E decreased in 2009 compared to 2008 due to LG&E's increased scheduled outages at coal-fired generation units during the fourth quarter of 2009. See Note 15, Related Party Transactions, for further discussion of the mutual agreement for wholesale sales and purchases between the Utilities.

(b) Third party purchase volumes with counterparties other than OMU increased in 2010 compared to 2009 primarily due to the termination of the OMU agreement. Third party purchase volumes with counterparties other than OMU decreased in 2009 compared to 2008 primarily due to availability of power for native load customers from the OMU agreement. See Note 13, Commitments and Contingencies, for further discussion of the OMU settlement.

Other Operation and Maintenance Expenses

The $26 million increase from 2009 to 2010 was primarily due to $22 million of increased other operation expenses and $4 million of increased maintenance expenses. The $45 million increase from 2008 to 2009 was primarily due to $30 million of increased other operation expenses and $15 million of increased maintenance expenses.

Other Operation Expenses:
