**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 1**

**Responding Witness: Robert M. Conroy**

Q-1. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 10, General Service Rate ("GS"). Explain the proposed clarification of 12-month-average monthly maximum loads not to exceed 50 kW in the Availability of Service section. The explanation should include, but not be limited to, how many customers would not qualify for the GS Schedule were it not for the grandfathering of those served before February 6, 2009, and the impact on LG&E's qualification of new customers requesting service.

A-1. The text change in the AVAILABILITY OF SERVICE section of proposed P.S.C. Electric No. 9, Original Sheet No. 10, limits the load that can be served on the GS (General Service) rate to a 12-month-average maximum load of 50 kW. The current Rate GS limitation is stated as an average maximum load of 50 kW. The intent of the change was to add clarity by eliminating any question as to how the average maximum load was determined. It was not intended that the language would result in any customers being moved from GS to any other rate.

New customers would not be impacted by the change since new load would be estimated at either being above 50 kW or below 50 kW. There would be no history on which to base calculations.

Existing customers being served under P.S.C. Electric No. 6, Fourth Revision of Original Sheet No. 10 as of February 6, 2009, who had average maximum loads above 50 kW were "grandfathered" and may remain on GS at their option regardless of what the maximum average load is currently or how it is calculated. The Company believes there are approximately 1,280 grandfathered customers on GS, although it is not possible to know this number exactly because not all customers on GS have demand meters.

Existing customers being served under P.S.C. Electric No. 6, Fourth Revision of Original Sheet No. 10 as of February 6, 2009, who had average maximum loads below 50 kW remain on GS until a point in time where their maximum average load exceeds 50 kW.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 2**

**Responding Witness: Robert M. Conroy**

Q-2. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 15, Power Service Rate ("PS"). Explain the proposed clarification of 12-month-average monthly minimum secondary loads exceeding 50 kW and 12-month-average monthly maximum loads not to exceed 250 kW in the Availability of Service section. The explanation should include, but not be limited to, how many customers would not qualify for the PS Rate Schedule were it not for the grandfathering of those served before February 6, 2009, and the impact on LG&E's qualification of new customers requesting service.

A-2. The text change in the AVAILABILITY OF SERVICE section of proposed P.S.C. Electric No. 9, Original Sheet No. 15, limits the load that can be served on the PS (Power Service) rate to secondary customers whose 12-month-average monthly minimum secondary loads do not exceed 50 kW and whose secondary service or primary service 12-month-average maximum loads do not exceed 250 kW. The current PS limitations are stated as minimum average secondary loads of 50 kW and maximum average loads not exceeding 250 kW. The intent of the change was to add clarity by eliminating any question as to how the average maximum load was determined. It was not intended that the language would result in any customers being moved from PS to any other rate.

New customers would not be impacted by the change since the load would be estimated at either being within the 50 kW and 250 kW parameters or not. There would be no history on which to base calculations.

Existing customers being served under P.S.C. Electric No.6, Fourth Revision of Original Sheet No. 15, or Fourth Revision of Original Sheet No. 25, as of February 6, 2009, who had average loads outside the 50/250 kW parameters were "grandfathered" and may remain on PS at their option regardless of what the average load is currently. There are approximately 1,300 grandfathered customers on PS.

Existing customers being served under P.S.C. Electric No.6, Fourth Revision of Original Sheet No. 15 or Fourth Revision of Original Sheet No. 25, as of February 6, 2009, who had average loads that did not conform to the parameters existing at that time remain on PS until a point in time where their load exceeds the current parameters.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 3**

**Responding Witness: Robert M. Conroy**

Q-3. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 20, Time-of-Day Secondary Service ("TODS").

- a. Explain the proposed clarification of 12-month-average monthly minimum average loads exceeding 250 kW and 12-month-average monthly maximum average loads not to exceed 5,000 kW in the Availability of Service section, as well as the deletion of "Customers initiating service on this rate whose load characteristics subsequently do not meet these criteria will be billed on the appropriate rate."
- b. Confirm that the proposed TODS tariff contains no other changes to the existing Industrial and Commercial Time-of-Day Secondary Service tariffs other than to the rates.

A-3. a. The text change in the AVAILABILITY OF SERVICE section of proposed P.S.C. No. 16, Original Sheet No. 20, limits the load that can be served on the TODS (Time-of-Day Secondary Service) rate to customers whose 12-month-average monthly minimum average loads exceed 250 kW and whose 12-month-average monthly maximum loads do not exceed 5,000 kW. The current TODS limitations are stated as minimum average loads of 250 kW and maximum average loads not exceeding 50,000 kW. The intent of the change was to add clarity by eliminating any question as to how the average maximum load was determined. It was not intended that the language would result in any customers being moved from TODS to any other rate.

The Company deleted "Customers initiating service on this rate whose load characteristics subsequently do not meet these criteria will be billed on the appropriate rate" because it is self-evident.

- b. The proposed changes to TODS are limited to the rates and text changes within the AVAILABILITY OF SERVICE section.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 4**

**Responding Witness: Robert M. Conroy**

Q-4. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 22, Time-of-Day Primary Service ("TODP").

- a. Explain the proposed clarification of 12-month-average monthly minimum average loads exceeding 250 kVA and 12-month-average monthly maximum average loads not to exceed 50,000 kVA in the Availability of Service section, as well as the deletion of "Customers initiating service on this rate whose load characteristics subsequently do not meet these criteria will be billed on the appropriate rate."
- b. For an average example customer to be served under the proposed TODP Service tariff, provide the effect of the proposed monthly billing demand tariff changes in the Rate section on the customer's bill in sufficient detail to show the effect of each tariff change pertaining to kVA as opposed to kW billing and to the Peak, Intermediate, and Base Demand Periods.
- c. Confirm that the proposed TODP tariff contains no other changes to the existing Industrial and Commercial Time-of-Day Primary Service tariffs other than to the rates.

A-4. a. The text change in the AVAILABILITY OF SERVICE section of proposed P.S.C. Electric No. 9, Original Sheet No. 22, limits the load that can be served on the TODP (Time-of-Day Primary Service) rate to customers whose 12-month-average monthly minimum average loads exceed 250 kW and whose 12-month-average monthly maximum loads do not exceed 5,000 kW. The current TODP limitations are stated as minimum average loads of 250 kW and maximum average loads not exceeding 50,000 kW. The intent of the change was to add clarity by eliminating any question as to how the average maximum load was determined. It was not intended that the language would result in any customers being moved from TODP to any other rate.

b. See attached.

- c. The proposed changes to TODS are limited to the rates and text changes within the AVAILABILITY OF SERVICE section.

**Average Example Customer Bill Impact**  
**Effect of Proposed Change to kVA Billing and Three Tier Demand Structure**

Assumed 100% Average Power Factor

From Billing Determinants file:

	Customer-month	Energy, kWh	Peak Demand, kW	Basic Demand, kW

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 5**

**Responding Witness: Robert M. Conroy**

Q-5. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 25, Retail Transmission Service. Explain the proposed clarification of 12-month-average monthly maximum new loads not to exceed 50,000 kVA in the Availability of Service section, as well as the deletion of "Customers initiating service on this rate whose load characteristics subsequently do not meet these criteria will be billed on the appropriate rate."

A-5. The text change in the AVAILABILITY OF SERVICE section of proposed P.S.C. No. 9, Original Sheet No. 25, limits the load that can be served on the RTS (Retail Transmission Service) rate to customers whose 12-month-average monthly maximum new loads do not exceed 50,000 kVA. The current RTS limitations are stated as maximum new loads not exceeding 50,000 kVA. The intent of the change was to add clarity by eliminating any question as to how the average maximum load was determined. It was not intended that the language would result in any customers being moved from TODP to any other rate.

The Company deleted "Customers initiating service on this rate whose load characteristics subsequently do not meet these criteria will be billed on the appropriate rate" because it is self-evident.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 6**

**Responding Witness: Robert M. Conroy**

Q-6. Refer to proposed P.S.C. No. 9, Original Sheet Nos. 35 through 36.3, the Lighting Service ("LS") and Restricted Lighting Service ("RLS") tariffs. Provide and explain all differences in the terms and conditions between the proposed LS and RLS tariffs and the current LS, RLS, and Dark Sky Friendly tariffs.

A-6. As stated in Mr. Conroy's testimony, LG&E proposes to further harmonize the lighting offerings and best practices between the two companies. Such changes will simplify the tariffs by standardizing lighting options utilizing a common nomenclature across both LG&E and KU. The terms and conditions have been combined and re-ordered for clarity and consistency.

Although LG&E's lighting options are already tariffed under the LS and the RLS tariffs, LG&E has consolidated various lights offered under different names with the same or similar rate and has eliminated other lights which are not in service to simplify the number of lighting offerings. The redundancy of lighting units and language was eliminated.

**LS Availability of Service**

**Sheet No. 35**

Simplified language to match KU language. Units marked with an asterisk are not available for residential neighborhoods.

**LS Overhead Service - Sheet No. 35 moving language from current Sheet Nos. 35 and 35.2**

Denotes that these fixtures are to be served via overhead electric service and defines what is included with basic service. Additional facilities will still apply to the Excess Facilities Rider; however, the Additional Facilities section under Sheet No. 35.2 has been deleted since it was redundant.

**LS Overhead Rate - Sheet No. 35 combining fixtures from current Sheet Nos. 35.2 and 35.3**

LG&E now lists the bill code for every lighting option throughout the LS and RLS tariffs. These rates are a combination of all overhead served Cobra

Head, Directional and Open Bottom fixtures. Metal halide fixtures traditionally were a stand-alone lighting option. LG&E moved these offerings based on the type of service. Directional fixtures are now listed under LS Overhead Service as a fixture only offering. Overhead service does not include additional facilities; therefore LG&E's LS tariff lists the directional fixture only. Any additional facilities would be determined under the Excess Facilities Rider. Wood poles installed prior to July 2004 are billed based on RLS Sheet No. 36.

**LS Underground Service - Sheet No. 35.1 combining language from current Sheet Nos. 35, 35.1 and 35.3**

Denotes that the following fixtures will be served via underground facilities owned by LG&E. Customer is still responsible for the cost difference in an underground versus an overhead lighting system as well as responsible for any additional facilities. Said language matches the LG&E (New Sheet No. 35.2) language.

Metal Halide was moved with units grouped based on the type of service; Contemporary fixtures are now listed under LS Underground Service. Underground service includes additional facilities and decorative or historic poles.

Dark Sky Friendly was moved from the stand-alone tariffs to the existing underground lighting offerings. Since these underground fixtures are installed and are operated no differently than the other underground fixtures it only made sense to simply combine with Sheet No. 35.1. The terms and conditions are the same for all underground service fixtures.

The language referring to Custom Ordered Styles was deleted. Customers choosing to install their own lighting will be billed base on LG&E's LE tariff.

**LS Term of Contract - Sheet No. 35.2 from current Sheet No. 35.4**

No change.

**LS Terms and Conditions - Sheet Nos. 35.2 and 35.3 move from 35.4**

1. Service shall be furnished under Company's Terms and Conditions, except as set out herein.
  - Changes were made to match language in the KU tariff.
2. All service and maintenance will be performed only during regular scheduled working hours of Company. Customer will be responsible for reporting outages and other operating faults. Company shall initiate service corrections within two (2) business days after such notification by Customer.
  - Changed "servicing" to "service", "shall" to "will", and "will undertake to service the lighting equipment..." to "shall initiate

service corrections...” Changes were made to clarify the Company’s responsibilities.

3. Customer shall be responsible for the cost of fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts. Company may decline to provide or continue service in locations where, in Company’s judgment, such facilities will be subject to unusual hazards or risk of damage.
  - Changes were made to match language in the KU tariff ; cost to repair / replace still customer’s responsibility when due to negligence. These changes were made to clarify current practices and harmonize with the KU tariff.
4. Company shall have the right to make other attachments and to further extend the conductors, when necessary, for the further extension of its electric service.
  - Changes were made to match language in the KU tariff and to clarify the Company’s right.
5. If any permit is required from any municipal or other governmental authority with respect to installation and use of any of the lighting units provided hereunder, Company will seek such permits, but the ultimate responsibility belongs with Customer.
  - No change was made to this section.
6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities that were in service less than twenty years, and requests installation of replacement lighting within 5 years of removal, Customer agrees to pay to Company its cost of labor to install the replacement facilities. Changes were made to match language in the KU tariff .
7. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.
  - New language was added.

### **RLS Availability of Service**

#### **Sheet No. 36**

Restricted Lighting Service is an existing LG&E lighting tariff. This set of tariffs includes migrating those fixtures that are no longer available to new customers. Reasons range from outdated technology - to no customers billed on the rate - to an option no longer available. The RLS tariff allows LG&E to “freeze” and still offer said lighting to existing installations.

**RLS Overhead Service**

Denotes that these fixtures are to be served via overhead electric service. Some options include a pole which is one reason why those fixtures were moved to the RLS rate.

**RLS Underground Service**

Denotes that these fixtures are to be served via underground electric service.

**RLS Term of Contract – Sheet No. 36.3**

No Change. The majority of RLS customer lighting has been in place well over five years therefore the term of contract will normally be inconsequential.

**RLS Terms and Conditions - Sheet No. 36.2 move from Sheet Nos. 36.1, 36.2, 36.4 and 36.5**

Matches KU language and the LS Terms and Conditions.

1. Service shall be furnished under Company’s Terms and Conditions, except as set out herein.
  - Changes were made to match language in the KU tariff.
2. All service and maintenance will be performed only during regular scheduled working hours of Company. Customer will be responsible for reporting outages and other operating faults. Company shall initiate service corrections within two (2) business days after such notification by Customer.
  - Changed “servicing” to “service”, “shall” to “will”, and “will undertake to service the lighting equipment...” to “shall initiate service corrections...” Changes were made to clarify the Company’s responsibilities.
3. Customer shall be responsible for the cost of fixture replacement or repairs where such replacement or repairs are caused from willful damage, vandalism, or causes other than normal burnouts. Company may decline to provide or continue service in locations where, in Company’s judgment, such facilities will be subject to unusual hazards or risk of damage.
  - Changes were made to match language in the KU tariff; cost to repair / replace still customer’s responsibility when due to negligence.
4. Company shall have the right to make other attachments and to further extend the conductors, when necessary, for the further extension of its electric service.
  - Changes were made to match language in the KU tariff and to clarify the Company’s right.

5. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.
  - New language was added.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 7**

**Responding Witness: Robert M. Conroy**

- Q-7. Refer to P.S.C. Electric No. 8, existing Second Revision of Original Sheet No. 35, Lighting Service. Confirm that the 16,000 lumens High Pressure Sodium 4 Sided Colonial fixture in the Underground Service section of the LS tariff is not currently in use by any customer and will no longer be available.
- A-7. The 16,000 lumens High Pressure Sodium 4 Sided Colonial fixture is currently being used. The light is proposed for inclusion in Rate RLS. See Conroy Exhibit R5, Page 20 of 24, Coach Acorn, 16000 Lumens, Fixture Only, 4 Sided Colonial 16000L, Existing Tariff Sheet 35, Existing Bill Code 414.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 8**

**Responding Witness: Robert M. Conroy**

- Q-8. Refer to P.S.C. Electric No. 8, existing Second Revision of Original Sheet No. 36, Restricted Lighting Service. Confirm that the 400 Watt – Top Mounted Underground Service Mercury Vapor fixture in the Outdoor Lighting section of the RLS tariff is not currently in use by any customer and will no longer be available.
- A-8. The 400 Watt – Top Mounted Underground Service Mercury Vapor fixture in the Outdoor Lighting section of the RLS tariff is not currently in use by any customer and will no longer be available.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 9**

**Responding Witness: Robert M. Conroy**

- Q-9. Refer to proposed P.S.C. No. 9, Original Sheet Nos. 40 through 40.6, Cable Television Attachment Charges. Identify the companies that have cable attachments on LG&E's poles.
- A-9. Time Warner Cable (formerly Insight Communications Company)  
4701 Commerce Crossings Drive, Louisville, KY 40299

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 10**

**Responding Witness: Robert M. Conroy**

- Q-10. Refer to proposed P.S.C. Electric No. 9, Original Sheet Nos. 50 through 50.2. For average example customers served under Curtailable Service Rider ("CSR") 10, explain the reason for changing from a kW basis to a kVA basis for billing purposes, and provide the effect of all proposed tariff changes on the customer's credits in sufficient detail to show the individual effect of each rate/tariff change for each customer if the proposed changes had been in effect during the test year. Include the effect on the customer under both Options A and B.
- A-10. The reason for changing to a kVA basis is to maintain consistency between the tariff demand basis and the CSR demand basis. If the customer's demand is measured and billed on a kVA basis, the CSR should also be applied on a kVA basis. The CSR riders are only available to customers who contract for a minimum of 1,000 kVA; therefore, CSR riders apply only to standard rate schedules that are metered on and billed on kVA (should proposed changes to ITODP be accepted). See attached for the impact of the change in the proposed CSR credits for the customers impacted. There is no impact under Option A or B because the customer taking the buy-through is currently billed on a kVA basis and the proposed changes in the tariff conform to current billing procedures.

Customer #1	Month	CSR Demand	Existing Rate 4.30		Proposed Rate 2.25	
			CSR-Existing Credit	CSR-Proposed Credit		
	2011/04	20,144.00 \$	(86,619.20) \$	(45,324.00)		
	2011/05	20,528.00 \$	(88,270.40) \$	(46,188.00)		
	2011/06	20,336.00 \$	(87,444.80) \$	(45,756.00)		
	2011/07	20,912.00 \$	(89,921.60) \$	(47,052.00)		
	2011/08	20,720.00 \$	(89,096.00) \$	(46,620.00)		
	2011/09	20,336.00 \$	(87,444.80) \$	(45,756.00)		
	2011/10	20,336.00 \$	(87,444.80) \$	(45,756.00)		
	2011/11	21,296.00 \$	(91,572.80) \$	(47,916.00)		
	2011/12	20,720.00 \$	(89,096.00) \$	(46,620.00)		
	2012/01	18,032.00 \$	(77,537.60) \$	(40,572.00)		
	2012/02	3,632.00 \$	(15,617.60) \$	(8,172.00)		
	2012/03	20,528.00 \$	(88,270.40) \$	(46,188.00)		

Customer is currently billed on kVA basis and CSR demand is calculated on kVA basis.

Customer #2	Month	CSR Demand	Existing Rate 5.50		Proposed Rate 2.80	
			CSR-Existing Credit	CSR-Proposed Credit		
	2011/04	36,436.00 \$	(200,398.00) \$	(102,020.80)		
	2011/05	0.00 \$	- \$	-		
	2011/06	0.00 \$	- \$	-		
	2011/07	0.00 \$	- \$	-		
	2011/08	0.00 \$	- \$	-		
	2011/09	0.00 \$	- \$	-		
	2011/10	0.00 \$	- \$	-		
	2011/11	0.00 \$	- \$	-		
	2011/12	0.00 \$	- \$	-		
	2012/01	0.00 \$	- \$	-		
	2012/02	0.00 \$	- \$	-		
	2012/03	0.00 \$	- \$	-		

Customer remained on CSR10 but did not receive a credit after April 2004. This customer was billed on kW and will be billed on kVA basis upon approval of the proposed rates. This analysis assumes the existing CSR demand is in kW or kVA as appropriate.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 11**

**Responding Witness: Robert M. Conroy**

- Q-11. Refer to proposed P.S.C. Electric No. 9, Original Sheet Nos. 51 through 51.2. For average example customers served under CSR 30, explain the reason for changing from a kW basis to a kVA basis for billing purposes, and provide the effect of all proposed tariff changes on the customer's credits in sufficient detail to show the individual effect of each rate/tariff change for each customer if the proposed changes had been in effect during the test year. Include the effect on customers under both Options A and B.
- A-11. See response to Question No. 10.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 12**

**Responding Witness: Robert M. Conroy**

- Q-12. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 61, Redundant Capacity Rider. Provide the impact on the average Primary and Secondary Distribution customers' bills of the change in subsection (1) under the Rate section.
- A-12. LG&E does not have any Primary Distribution customers taking service under the Redundant Capacity Rider. LG&E's Secondary Distribution customer taking service under the Redundant Capacity Rider will not be impacted by the change in subsection (1) under the Rate section because Secondary Distribution will continue to be billed on a kW basis, and the Redundant Capacity Rider will therefore also continue to be billed on a kW basis.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 13**

**Responding Witness: Robert M. Conroy**

- Q-13. Refer to proposed P.S.C. Electric No. 9, Original Sheet No. 62, Supplemental or Standby Service. Provide the impact on the average customer's bill of the change in contract demand billing under the Rate and Contract Demand sections.
- A-13. The changes to the Rate and Contract section of the Supplemental or Standby Service will have no effect on an average customer's bill. There are no customers on the rate. The changes recognize the shift in metering and billing from kW to kVA and strengthen the requirement currently in the tariff for customer-generators to pay for facilities reserved for them rather than allowing other customers to absorb the responsibility.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 14**

**Responding Witness: Robert M. Conroy**

- Q-14. Refer to proposed P.S.C Electric No. 9, Original Sheet No. 66, Temporary and/or Seasonal Electric Service. Provide the effect the text changes in the Conditions section, paragraph 3, will have on current customers.
- A-14. The text changes to Temporary and/or Seasonal Electric Service will have no effect on current customers. This rate is not intended for permanent service and the changes were made for clarity.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 15**

**Responding Witness: Robert M. Conroy**

- Q-15. Refer to proposed P.S.C Electric No. 9, Original Sheet No. 86.10, Demand-Side Management ("DSM") Cost Recovery Mechanism Monthly Adjustment Factors. State whether the DSM revenues from Lost Sales factors would change as a result of a change in base rates, and if so, explain why no change is being proposed.
- A-15. Yes, the DSM factor will change as a result of this proceeding; however, no change to the DSM mechanism is being proposed in this proceeding. Upon conclusion of Case No. 2012-00222, the Company will submit revised P.S.C Electric No. 9, Original Sheet No. 86.10 to reflect changes in the DSM Revenues from Lost Sales Monthly Adjustment Factors resulting from the reduced Lost Sales period.

**Question No. 16**

**Responding Witness: Robert M. Conroy**

Q-16. Refer to proposed P.S.C Electric No. 9, Original Sheet No. 87, Environmental Cost Recovery Surcharge. Explain the reason for the text changes in the Definitions section, subsection e.

A-16. The reason for the text changes is to simplify the language of the tariff.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 17**

**Responding Witness: Cheryl E. Bruner / Robert M. Conroy**

- Q-17. Refer to proposed P.S.C Electric No. 9, Original Sheet No. 101.1 and 101.2, the addition of the new Customer Rate Assignment and Customer Rate Migration sections.
- a. State whether this proposed section would allow LG&E to involuntarily switch to other rate classes Schedule GS and PS customers who were customers as of February 6, 2009, but who no longer meet the Availability of Service requirements of their current class.
  - b. State to what extent LG&E has experienced an increase in customers being served under a rate schedule for which they are ineligible, customers choosing to migrate to other classes, or customers that are being migrated from one rate schedule to another.
- A-17. a. No. Customers who were on Rate GS or Rate PS as of February 6, 2009, continue to be eligible for these rates assuming the customer has not changed rate schedules. If the Company determines that a customer is eligible to take service under more than one rate schedule and that the customer is then taking service under such a rate schedule, the Company will not change the customer's rate assignment. It will remain the customer's responsibility to choose between optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1.
- b. During the last two rate cases, LG&E modified tariff language to help customers in determining the more appropriate rate schedule. As a customer's energy consumption may change from month to month, so may their eligibility for a specific rate schedule. For customers whose consumption patterns make them eligible for more than one rate it remains their responsibility to choose between any optional rates, as stated in the Optional Rates section of Customer Responsibilities at Original Sheet Nos. 97 and 97.1. As discussed in the testimony of Mr. Conroy, there have been a number of customers switching rate schedules (see the adjustment for Reference

Schedule 1.11) during the test year and there continues to be various customers switching rate schedules. As part of our efforts to enhance the Customer Experience, the Company has recently developed a tool called Rate Comparison which assists customers in determining the more appropriate rate for their operation. The Rate Comparison tool is available on the LG&E website under the customer's "My Account" link.

**Case No. 2012-00222**

**Question No. 18**

**Responding Witness: Robert M. Conroy**

- Q-18. Explain why LG&E is not proposing a rate adjustment to its Small Capacity Cogeneration and Small Power Production Qualifying Facilities tariff.
- A-18. Pursuant to the Commission's Order in Case No. 8566(D) dated June 28, 1984, Louisville Gas and Electric Company files revised rates for purchases from Small Capacity Cogeneration and Small Power Production Qualifying Facilities every two years based on the avoided cost analysis. The most recent revision was made on May 30, 2012 and approved by the Commission with rates to become effective June 30, 2012. See the attachment for a copy of the public version of the filing made on May 30, 2012.

**RE: *Revised Louisville Gas and Electric Company  
Purchase Rates for Small Capacity Cogeneration  
and Small Power Production Qualifying Facilities***

Dear Mr. DeRouen:

Pursuant to the Commission's Order in Case No. 8566(D) dated June 28, 1984, Louisville Gas and Electric Company files herewith an original and four copies of the following sheet of its Electric Tariff PSC No. 8:

Sixth Revision of Original Sheet No. 1  
First Revision of Original Sheet No. 55

This filing is being made to revise the rates for both Time-Differentiated Rates and Non-Time-Differentiated rates. As supporting documentation for these revisions and to comply with 807 KAR 5:054, Section 5 (2)(a), (b), and (c), the attached information is also being filed:

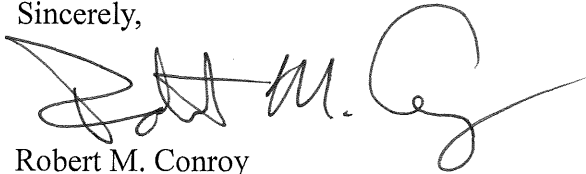

- (1) Attachment 1 showing the estimated avoided energy cost on a cents per kilowatt-hour basis during daily, seasonal peak and off-peak periods, by year for 2012 through 2017 in 100 megawatt increments;
- (2) Attachment 2 showing a 10-year plan for capacity additions, and anticipated capacity and energy costs at the completion of planned capacity additions.

Jeff DeRouen, Executive Director  
Kentucky Public Service Commission  
May 30, 2012

The Company is also including with this filing a Petition for Confidentiality regarding projected costs of fuel cost and capacity costs.

The Company requests an effective date of June 30, 2012 for the revised rate schedules. Please let me know if you have any questions regarding this filing.

Sincerely,

A handwritten signature in black ink, appearing to read "R. M. Conroy", with a large, stylized flourish at the end.

Robert M. Conroy

**Standard Rate Rider**

**SQF**

**Small Capacity Cogeneration and Small Power Production Qualifying Facilities**

**APPLICABLE:**

In all territory served.

**AVAILABILITY OF SERVICE**

This rate and the terms and conditions set out herein are available for and applicable to Company's purchases of energy only from the owner of qualifying cogeneration or small power production facilities of 100 KW or less (such owner being hereafter called "Seller") installed on Seller's property to provide all or part of its requirements of electrical energy, or from which facilities Seller may elect to sell to Company all or part of such output of electrical energy.

Company will permit Seller's generating facilities to operate in parallel with Company's system under conditions set out below under Parallel Operation.

Company will purchase such energy from Seller at the Rate, A or B, set out below and selected as hereafter provided, and under the terms and conditions stated herein. Company reserves the right to change the said Rates, upon proper filing with and acceptance by the jurisdictional Commission.

**RATE A: TIME-DIFFERENTIATED RATE**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 19**

**Responding Witness: Robert M. Conroy**

- Q-19. Refer to proposed P.S.C Electric No. 9, Original Sheet Nos. 104.1 and 104.3 and proposed P.S.C Gas No. 9, Original Sheet Nos. 104 and 104.1.
- a. Explain why the explanation of the Environmental Surcharge is deleted from the Billing Information section of the electric and combination electric and gas Bill Formats.
  - b. Explain where on the combination electric and gas and gas Bill Formats the Gas Line Tracker will be included.
- A-19. a. There is no calculation needed in the BILLING INFORMATION section of the proposed P.S.C Electric No. 9, Original Sheet Nos. 104.1 and 104.3, Bill Format, and proposed P.S.C Gas No. 9, Original Sheet Nos. 104 and 104.1, Bill Format, since for residential service the method is straight forward.
- b. See attached.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 20**

**Responding Witness: Chris Hermann**

- Q-20. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 5, Residential Gas Service. Explain the addition of the paragraph in the Availability of Service section regarding the installation of standby electric generation equipment, including how LG&E plans to inform customers of this requirement on an ongoing basis.
- A-20. The intent of adding the language to Rate RGS is to enhance the communication to customers of the existing requirement found in the Company's Gas Tariffs under the "Customer Responsibilities" section of "Terms and Conditions" requiring customers to provide notice to the company of changes in customer's load. The Company, on an annual basis, plans to inform RGS customers of the requirement by inserting a message on the customer's bill. No impact is expected on existing customers.

See also the response to Question No. 24.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 21**

**Responding Witness: J. Clay Murphy**

Q-21. Refer to proposed P.S.C. Gas No. 9, Original Sheet Nos. 10 and 15, Firm Commercial Gas Service ("CGS") and Firm Industrial Gas Service ("IGS"). Explain the addition of the language in the Availability of Service sections regarding the installation of standby electric generation equipment. The explanation should include but not be limited to the impact on any existing CGS and IGS customers of this proposed change, and how LG&E plans to inform customers of this requirement on an ongoing basis.

A-21. The intent of adding the language to Rate CGS and Rate IGS is to enhance the communication to customers of the existing requirement found in the Company's Gas Tariffs under the "Customer Responsibilities" section of "Terms and Conditions" requiring customers to provide notice to the company of changes in customer's load. The company, on an annual basis, plans to inform CGS and IGS customers of the requirement by inserting a message on the customer's bill. No impact is expected on existing customers.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 22**

**Responding Witness: J. Clay Murphy**

- Q-22. Refer to proposed P.S.C. Gas No. 9, Original Sheet Nos. 30 through 30.7, Firm Transportation Service ("FT") and to pages 26 through 27 of the Testimony of J. Clay Murphy ("Murphy Testimony").
- a. Explain the addition of the language in the Availability of Service section which requires the customer to have used at least 50 Mcf each day during each month of the 24 months prior to the March 31 request date, as well as the language defining the contract year and provisions for termination. The explanation should include whether this is a change from LG&E's existing practice and the impact on current customers.
  - b. Explain the addition of the language in the Availability of Service section stating that FT service will not be available to customers with a Maximum Daily Quantity in excess of 20,000 Mcf/day or to customers generating electricity for use other than as standby electric service. The explanation should include the impact of this language addition on any existing customer.
  - c. Explain the addition of the language in the Character of Service section requiring that the Pipeline Transporter be Texas Gas Transmission, LLC ("Texas Gas"), which the Murphy Testimony describes as being consistent with the historic delivery practices of FT customers. The explanation should include whether and how many existing FT customers are currently receiving service via a Pipeline Transporter other than Texas Gas, and if so the identity of the Pipeline Transporter(s) and the impact on these customers.
  - d. Explain why LG&E is proposing to decrease the imbalance tolerance in the Character of Service section from 10 to five percent; specifically, whether individual customers are routinely causing significant imbalance problems on LG&E's system, or if the problem extends to the entire FT class.
  - e. Quantify the impact on existing FT customer bills of the decrease in the imbalance tolerance from 10 to five percent in the Character of Service and

Utilization Charge for Daily Imbalance sections, using test year FT customer imbalances as an example.

- f. Explain why LG&E is proposing a 161 percent increase to the FT administrative charge, from \$230 to \$600, representing 100 percent of the increase to this customer class. The explanation should include specific customer-related costs not currently included in the \$230 FT administrative charge, and any relation to expanding the availability of transportation service pursuant to the TS Gas Transportation Service/Standby (“TS”) and then to the proposed TS-2 Gas Transportation Service/Firm Balancing Service (“TS-2”) tariffs.
- g. Explain why LG&E added the Gas Cost True-Up Charge to the FT tariff. Specifically, describe the historical magnitude of customers switching from sales to FT service and the effect on the Gas Supply Clause (“GSC”), whether LG&E expects this effect to be greater in the future, and if so why it expects an increase in switching.
- h. Explain whether LG&E is expecting to bill the Gas Cost True-Up Charge to FT customers who have already switched, subject to the rates set out on the bottom of proposed Original Sheet No. 30.1.
- i. Explain the proposed addition of the Minimum Daily Threshold Requirement and Charge. The explanation should include the number of customers that could be switched to a different service based on their test year daily usage, and the impact on existing FT customer bills if the Minimum Daily Threshold Charge had been assessed during the test year.
- j. Explain why FT customers are ineligible to be billed for any charges collected through the Gas Line Tracker.
- k. Explain the proposed additions to the Variations in MMBTU Content section and the impact of the change on existing FT customers.
- l. Explain the impact of the proposed language additions and changes in the Operational Flow Orders section, using test year FT service as an example to show how Operational Flow Orders function under the current and proposed tariff.
- m. Explain the proposed language additions and changes in subsections 2 and 3 of the Special Terms and Conditions sections, including the impact on existing FT customers.

A-22.

- a. LG&E has proposed additional language to the availability section of Rate FT. The additional language regarding gas consumption over the 24 months prior to the March 31 service request date brings clarity to the application process and conforms to LG&E's past practice in determining whether or not customers may be eligible for service under Rate FT. Customers not currently served under Rate FT do not have daily telemetry, so the most important tool available to LG&E in determining eligibility is to review the customer's monthly gas consumption history, and estimate daily consumption by dividing the monthly consumption by the number of days in the billing cycle.

The proposed applicable Contract Year and termination provisions bring certainty to the Rate FT contracting process, and therefore certainty to LG&E's contracting process for gas supplies and interstate pipeline capacity. Service under Rate FT is not a month-to-month service. LG&E does not contract for gas supplies or storage to serve Rate FT customers and may be unable to accommodate customers moving from transportation-only service under Rate FT to sales service and back again. Allowing monthly changes in LG&E's obligation to serve these customers could create serious operational problems compounded by potential intra-class subsidies. Customers generally do not return to sales service following a transfer to Rate FT so this change is not expected to impact current customers. However, as LG&E was in the process of revising Rate FT, it seemed an opportune time to bring certainty to this aspect of the contracting process.

- b. The addition of the proposed language limiting LG&E's obligation to serve customers with an MDQ over 20,000 Mcf/day is designed to alleviate potential operational and other risks associated with serving very large customers served under Rate FT.

LG&E does not currently serve any customer under Rate FT with an MDQ greater than 20,000 Mcf/day, nor does LG&E serve any existing customer generating electricity for use other than as standby electric service under this standard rate schedule. LG&E is adding this language as a precautionary measure. No impact on existing customers is expected.

- c. LG&E is connected with two interstate pipelines: Texas Gas Transmission, LLC and Tennessee Gas Pipeline Company, LLC. LG&E's interconnection with the facilities of Tennessee Gas Pipeline Company, LLC is physically remote from LG&E's main load centers in Louisville and Jefferson County, Kentucky. Conversely, the facilities of Texas Gas Transmission, LLC pass directly through Louisville and Jefferson County, Kentucky facilitating the movement of gas through the entirety of LG&E's system. Limiting

transportation customer deliveries to Texas Gas Transmission, LLC will support system reliability. No gas transportation customer has ever made deliveries of gas to LG&E via Tennessee Gas Pipeline Company, LLC so there is no expected impact on existing customers.

- d. LG&E is proposing to reduce the imbalance threshold under Rate FT from 10% to 5% for two main reasons. The first relates to the historic balancing performance of customers served under Rate FT, and the second relates to the need to accommodate an expansion of transportation service to customers under Rider TS-2. (See also LG&E’s response to Question No. 28 (c).)

Historically, customers served under Rate FT have often exceeded the daily balancing tolerance levels set forth in either Rate FT or Rider PS-FT, as applicable.

For example, during the test year customers served pursuant to Rate FT were over-delivered on a net basis (that is as a class) on 205 days, as follows:

<u>Range</u>	<u>No. of Days</u>	<u>Percentage</u>
From 0% to 2%	28	14%
Over 2% to 5%	53	26%
Over 5% to 10%	58	28%
Over 10% to 20%	50	24%
Over 20%	<u>16</u>	<u>8%</u>
Total	205	100%

Therefore, on days with over-deliveries, customers were outside of the 10% tolerance about 32% of the time. Most Rate FT customers are served through a pool under Rider PS-FT which is currently subject to a 5% imbalance tolerance. (See the response to Question No. 28(b).) Customers were over-delivered by more than 5% on about 60% of the days that they were over-delivered.

During the test year customers served pursuant to Rate FT were under-delivered on a net basis (that is as a class) on 161 days, as follows:

<u>Range</u>	<u>No. of Days</u>	<u>Percentage</u>
From 0% to 2%	32	20%
Over 2% to 5%	39	24%
Over 5% to 10%	38	24%
Over 10% to 20%	40	25%
Over 20%	<u>12</u>	<u>7%</u>
Total	161	100%

Therefore, on days with under-deliveries, customers were outside of the 10% imbalance tolerance about 32% of the time. Most Rate FT customers are served through a pool under Rider PS-FT which is currently subject to a 5% imbalance tolerance. (See the response to Question No. 28(b).) Customers were under-delivered by more than 5% on about 56% of the days that they were under-delivered.

While significant imbalances are common, LG&E has identified no particular customer or group of customers as routinely being the cause of these imbalances. LG&E has proposed to lower the daily tolerance triggering the application of the "Utilization Charge for Daily Imbalance" ("UCDI") in order to incent customers to modify their behavior and bring their gas supply nomination in line with their actual usage. LG&E believes that this change in the daily tolerance level is preferable to issuing an "Operational Flow Order" as provided for in Rate FT to manage customer nomination behavior.

To the extent that customers can be incented to modify their behavior and bring their daily gas supply nominations in line with actual gas consumption, system reliability can be improved while preventing increased costs to sales customers.

The UCDI has two components. One component is the Daily Demand Charge which was \$0.1722/Mcf as of May 1, 2012. The Daily Demand Charge represents costs associated with holding pipeline capacity and firm gas supplies for sales customers that are used to balance the over- and under-deliveries of customers served under Rate FT. The Daily Demand Charge is determined quarterly as a part of LG&E's Gas Supply Clause. Any amounts recovered as a result of the daily imbalances of customers served under Rate FT are credited to LG&E's gas costs and thereby offset gas costs incurred for sales customers.

The other component of the UCDI is the Daily Storage Charge which is \$0.1833/Mcf. This charge may be changed in the course of a general rate proceeding, but it is not proposed to change in the context of Case No. 2012-00222. The Daily Storage Charge recovers costs associated with holding on-system storage capacity for sales customers that is used to balance the over- and under-deliveries of customers served under Rate FT.

- e. LG&E has proposed that customers served under Rate FT would be subject to a reduction in the daily imbalance tolerance from 10% to 5%. The estimated impact on such customers during the 12 months ended March 31, 2012, is about \$6,971 in total UCDI charges, of which about \$3,447 are estimated to be the Daily Demand Charge and about \$3,524 are estimated to be the Daily Storage Charges.

The effect of the proposed change in the daily tolerance from 5% to 2% that has been proposed for pool managers served under Rider PS-FT is discussed in response to Question No. 28(c).

It is important to note that all of the charges assessed pursuant to the “UCDI” can be avoided by the customer to the extent that the customer improves the accuracy of its daily gas supply nominations as compared to its actual use. Therefore, it is not possible to determine the prospective impact that reducing the imbalance tolerance level will have on customer behavior, but the proposal is designed to incent customers to improve their nomination accuracy. If customers are unable to accurately nominate their required gas supplies on a daily basis, it is possible that they may have elected service under the wrong rate schedule. Additionally, and as discussed in response to Question No. 22(m), improved gas supply nominations by customers served under Rate FT can improve system reliability and offset gas costs incurred for sales customers.

- f. The Administrative Charge proposed in this filing reflects a full allocation of the costs associated with the administration of LG&E’s gas transportation programs. The detailed calculation of those charges is set forth in Conroy Exhibit R8. The costs for administering these programs include the costs related to rendering monthly customer bills, answering customer and pool manager inquiries, contract administration, processing daily nominations from customers or pool managers, facilitating daily confirmations of gas flows with the interstate pipeline, verifying end-use gas flow records from the interstate pipeline, preparing end-use gas transportation reports, gas control and measurement, and generally providing the day-to-day service this group of customers and their pool managers require.

These costs are only partially reflected in the current Administrative Charge. The administrative costs for customers are generally the same whether the customer is served under Rate FT, Rider TS, or Rider TS-2. No change in the Administrative Charge for either Rate FT or Rider TS was made in the previous filing in Case No. 2009-00549. In the filing in Case No. 2008-00252, the Administrative Charge for customers served under Rider TS was increased to \$153 from \$90 at which level it was originally set in 1988 (Case No. 10064); also in Case No. 2008-00252, the Administrative Charge for customers served under Rate FT was increased to \$230 from \$90 at which level it was originally set in 1995 (Case No. 95-037). See also LG&E’s response to Question No. 126.

All administrative costs have been allocated to the Administrative Charge because these costs do not vary by the volume of gas consumed by the customer. In other words these costs are the same for all customers. Absent a

full allocation of administrative costs to the Administrative Charge, subsidies can occur.

Given the potential for the expansion of gas transportation service, LG&E considered it important to fully reflect all of the costs being incurred on behalf of these customers in the respective Administrative Charges for Rate FT, Rider TS, and Rider TS-2. LG&E considers it important for customers to know and bear the fully allocated costs associated with the services they may be eligible to receive in order to make an informed decision about the value of that service to their individual circumstance.

- g. In the process of reviewing and updating its transportation tariffs, LG&E identified a potential source of cross subsidies as between Rate FT and LG&E's sales rates. This cross-subsidy can occur when a sales customer transfers to Rate FT and any over- or under-collected gas costs that would have been borne by that customer are left for the remaining sales customers to absorb. This is particularly troublesome in the event that there are under-recoveries that the transferring sales customer avoids by moving to Rate FT. Conversely, a sales customer transferring to Rate FT will be unable to receive its share of any prior over-collections. The historic magnitude of any cross subsidies is nearly impossible to determine. By including this mechanism LG&E hopes to prevent any further cross subsidies. This mechanism is similar to the mechanism approved for Duke Kentucky under its Rider GCAT and conforms to the "Gas Cost True-Up Charge" proposed under Rider TS-2. LG&E does not expect a change in the magnitude of customers switching from sales service to Rate FT, and that was not a deciding factor in LG&E's proposal of the "Gas Cost True-Up Charge."
- h. Customers transferring to Rate FT prior to the Commission's approval of the proposed "Gas Cost True-Up Charge" would not be assessed the stated charges. Customers transferring to Rate FT beginning November 1, 2013, the first date after the anticipated effective date of Case No. 2012-00222, would be assessed the "Gas Cost True-Up Charge." Therefore, no existing customer would be affected by the implementation of this provision. The applicable charges and associated time frames would be updated in the tariff at the time those rates are known, that is, with each quarterly Gas Supply Clause filing.
- i. The proposed "Minimum Daily Threshold Requirement and Charge" assesses customers an amount equal to the Rate FT Distribution Charge on the difference between the customer's actual daily volume and the 50 Mcf/day threshold as specified in the "Availability of Service" section of Rate FT. Rate FT is a rate designed for high load factor customers using more than 50 Mcf/day. The "Minimum Daily Threshold Requirement and Charge" assesses those customers not meeting the stated criteria. For example, if on a given day, a customer served under Rate FT used 10 Mcf instead of 50 Mcf or more

as stipulated in Rate FT, then the customer would be assessed \$17.20 for that day  $[(50 \text{ Mcf} - 10 \text{ Mcf}) \times \$0.43/\text{Mcf}]$  based on the current Distribution Charge of \$0.43/Mcf. LG&E estimates that based on test year data, Rate FT customers not meeting the daily threshold would have been assessed about \$53,419.

Each customer currently served under Rate FT was determined to qualify for service under that rate schedule at the time service was initiated. Some customers have changed their usage patterns since electing service under Rate FT and may no longer qualify for this large volume, high load factor transportation service.

Inasmuch as the charge is not a remedy, the tariff also provides a stated criteria which can be applied to all customers to determine which customers should be removed from Rate FT and returned to firm sales service under either Rate CGS or Rate IGS as applicable. Given that customers that do not meet the criteria (large volume, high load factor, non-space-heating customers using at least 50 Mcf/day) cannot elect the rate, customers who consistently do not meet the same criteria do not belong on this rate. LG&E estimates that about 8 customers may be subject to this tariff provision.

- j. Because customers served under Rate FT are generally served from high pressure mains, and because the “Gas Line Tracker” is intended to cover the replacement of non-high pressure gas distribution mains and related infrastructure, the “Gas Line Tracker” is not applicable to customers served under Rate FT.
- k. The proposed additions to the “Variations in MMBTU Content” section are intended to clarify and memorialize the process historically used by LG&E to account for such variations. No impact is expected on existing customers.
- l. The proposed modifications to the “Operational Flow Orders” section are intended to clarify and memorialize the process historically used by LG&E to issue an Operational Flow Order. The only impact on existing customers is that LG&E is proposing to have the ability to issue an Operational Flow Order to an individual customer taking service under Rate FT without issuing an Operational Flow Order to all Rate FT customers.
- m. Section 2 of the “Special Terms and Conditions” addresses matters concerning how customers must nominate their gas supplies. Certain of the revisions have been included to memorialize existing practice and to bring clarity to the nomination process, including the volume conversion process from Mcf to MMBtu. Other language, such as that related to providing nominated quantities for the upcoming month ten days prior to the beginning of the month, can be found in the current tariff. This provision continues to be

important because it enables LG&E to plan its purchasing activities for the upcoming month in a timely manner.

In terms of the scheduling and nomination of daily gas flows, the most significant change in Section 2 is the movement of the nomination deadline from 10:00 AM Eastern Clock Time to 8:00 AM Eastern Clock Time. This change and the related changes associate with daily nominated volumes are intended to assist LG&E in its daily purchasing and system planning process. Additionally, some customers (or their pool managers) are often lax in providing LG&E with timely information about changes in their gas flows and nominations. Today's gas markets have advanced since current nomination procedures were first established. Most daily gas purchasing activity is confined to the hours between 8:00 AM and 10:00 AM. LG&E is requesting a nomination deadline of 8:00 AM for Rate FT customers in order to allow for a reasonable amount of time for LG&E to complete its system planning activities, including the purchase or dispatch of any gas for the following gas day. Receiving a nomination from a customer (or its pool manager) towards the end of the trading window, or even after daily trading activity has ceased, can result in suboptimal purchasing decisions because LG&E did not have information available to it until after its purchasing and dispatch decisions were made for the following day. All existing Rate FT customers would be affected by this change in the daily nomination deadline. The requirements regarding intraday nomination and nominations during weekends or holidays simply memorialize current practice, and are not expected to impact existing customers served under Rate FT.

All Rate FT customers are currently subject to a Maximum Daily Quantity ("MDQ") which is set forth in their transportation service agreement with LG&E. Section 3 of the "Special Terms and Conditions" has been revised to provide a formal process for reviewing and updating, if necessary, the MDQ of all customers served under Rate FT to ensure MDQs are set at levels reflective of current customer consumption.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 23**

**Responding Witness: Robert M. Conroy**

- Q-23. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 30.1, Rate Section and the Testimony of Robert M. Conroy ("Conroy Testimony"), Conroy Exhibit R11, page 5 of 7. Explain why 100 percent of the increase to the FT customer class was allocated to the Administrative Charge.
- A-23. See the response to Question No. 22(f).

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 24**

**Responding Witness: J. Clay Murphy**

- Q-24. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 35 through 35.2, Distributed Generation Gas Service ("DGGS").
- a. Explain the proposed addition to the Availability of Service section which denies service to customers at multiple delivery points for the purpose of avoiding the 2,000 cubic feet per hour threshold. The explanation should include any instances of problems with existing DGGS customers during the test year which gave rise to this proposed addition.
  - b. Explain the increase in the minimum Maximum Daily Quantity, which LG&E defines as the Monthly Billing Demand, from 10 to 480 Ccf, including the impact on existing DGGS customers.
- A-24.
- a. LG&E has proposed to clarify the tariff to ensure that customers do not avoid the threshold of 2,000 cubic feet per hour for service under Rate DGGS by establishing multiple delivery points for two or more smaller generator installations that in total meet the 2,000 cubic feet per hour threshold. If a customer were able to establish multiple delivery points for the same facility, that customer could avoid service under Rate DGGS and avoid the associated cost responsibility. No specific problems with existing customers gave rise to this proposed clarification. LG&E has identified the potential for this problem to occur and proposes to clarify the intended application of Rate DGGS to prevent customer misunderstandings in the future.
  - b. Given the minimum threshold of 2,000 cubic feet per hour (20 Ccf/hour), the minimum possible Monthly Billing Demand is 480 Ccf (24 hours/day x 20 Ccf/hour). A minimum Monthly Billing Demand of 10 Ccf is not possible. No impact on existing customers is expected.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 25**

**Responding Witness: Robert M. Conroy / J. Clay Murphy**

- Q-25. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 45, Special Charges, the proposed Additional Trip Charge. Clarify how many trips LG&E will make to the meter site without charge.
- A-25. LG&E will make a trip to the meter site for the initial telemetry installation without charge. Following the initial installation of the telemetry, LG&E will charge for each trip to the meter site that is caused by a problem with the customer's facilities that renders LG&E unable to access the telemetry data. Examples of such problems include the customer's data communication link being out of service, or the customer's power to the equipment being turned off. If the trip to the meter site is the result of a problem with company's facilities, no trip charge will be assessed.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 26**

**Responding Witness: J. Clay Murphy**

- Q-26. Refer to proposed P.S.C. Gas No. 9, Original Sheet Nos. 50 through 51.4, the TS and proposed TS-2 tariffs and the Murphy Testimony.
- a. Explain why the TS-2 replacement to the existing TS tariff will not be available until October 31, 2013, and why waiting until the beginning of the heating season is preferable to implementing upon Commission approval.
  - b. Explain whether LG&E is currently serving any customers pursuant to the TS Rider. If so, provide the number of customers participating and for how long. If not, explain whether LG&E believes the TS tariff is unattractive to eligible CGS customers and why.
  - c. Explain why LG&E is proposing a 287 percent increase to the TS administrative charge, from \$153 to \$592, with an additional \$8 increase to \$600 following the proposed transition from the TS to the TS-2 tariff on October 31, 2013. The explanation should include specific customer-related costs not currently included in the \$153 TS administrative charge which are expected to be incurred prior to and following the proposed implementation of TS-2.
  - d. Explain whether threshold levels lower than 25,000 Mcf annually were considered by LG&E for TS and TS-2, and if so why lower levels were rejected.
  - e. Explain whether LG&E has received requests for transportation service at any time in the last five years from non-residential customers whose usage would make them ineligible for existing TS service. If yes, provide details concerning when, how many, and the usage level of each inquiring customer.
  - f. Explain how many customers LG&E anticipates serving pursuant to the proposed revised TS and TS-2 tariffs that were not previously eligible for TS service.

- g. Explain the addition of the Character of Service section. The explanation should include but not be limited to the requirement that the Pipeline Transporter be Texas Gas; the requirement that TS-2 customers must designate a pool manager; and the impact of the proposed Action Alerts on existing TS customers transitioning to proposed TS-2 and why such Action Alerts are required based on LG&E's past experience with TS customers.
- h. Explain why LG&E added the Gas Cost True-Up Charge to the TS-2 tariff. Specifically, describe the historical magnitude of customers switching from sales to TS service and the effect on the GSC, and whether LG&E expects this effect to be greater in the future due to the expanded availability of transportation service.
- i. Clarify the impact, if any, of the proposed TS-2 Gas Cost True-Up Charge on existing TS customers, and on the bills of TS-2 customers who will only be able to elect such service after October 1, 2013.
- j. Explain the proposed addition of the Minimum Daily Threshold Requirement and Charge. The explanation should include the number of customers that could be switched to a different service based on their test year daily usage, and the impact on existing TS customer bills if the Minimum Daily Threshold Charge had been assessed during the test year.
- k. Explain the proposed addition of the Monthly Telemetry Charge for TS-2 customers, and whether any existing TS customers are equipped with telemetry.
- l. Explain why existing TS and future TS-2 customers are ineligible to be billed for any charges collected through the Gas Line Tracker.
- m. Explain the additional requirement of Remote Metering for TS-2 customers, including whether existing TS customers are equipped with Remote Metering, and why such equipment is necessary for these customers.

A-26.

- a. LG&E has proposed that Rider TS-2 will become available effective November 1, 2013. Beginning this service offering at the start of the heating season rather than upon Commission approval is preferable for the following reasons:
  - Rider TS-2 provides a deadline of March 31 for customers to notify LG&E that they are electing service under Rider TS-2; this notice period allows LG&E to procure and install the required telemetry and for the customer to make any necessary piping and other modifications

to facilitate that installation. Lead times to acquire and install telemetry can often be lengthy.

- Rider TS-2 provides for a “Minimum Annual Threshold and Charge.” Commencing the effectiveness of Rider TS-2 at the beginning of a defined Contract Year (November 1 through October 31) provides the required time period for assessing that charge and creates administrative efficiency by placing all customers on the same schedule.
- Rider TS-2 provides for a “Gas Cost True-Up Charge.” Commencing the effectiveness of Rider TS-2 at the beginning of a defined Contract Year provides a mechanism for assessing that charge at the beginning of a Gas Supply Clause (“GSC”) quarter, and each GSC quarter thereafter (November 1, February 1, May 1, and August 1). See also LG&E’s response to Question No. 26(h).
- Providing a notice period of March 31 and an effective date of November 1 for service under Rider TS-2 (as with Rate FT) allows LG&E to make any necessary adjustments in its gas supply portfolio.
- Delaying the implementation of Rider TS-2 to November 1, 2013 also allows a reasonable amount of time for entities electing to be pool managers to establish themselves as pool managers under Rider PS-TS-2 and ensure that appropriate contractual provisions are in place.
- The November 1, 2013, implementation date also provides an effective period for customers currently served under Rider TS to evaluate if they want to elect service under Rider TS-2 or transfer to some other rate schedule.

Therefore, the November 1, 2013, effective date provides a period for an orderly transition from Rider TS to the new Rider TS-2.

- b. As of August 1, 2012, LG&E is serving three customers under Rider TS. These customers began taking service pursuant to Rider TS under contracts effective May 1, 2012, April 1, 2009, and August 1, 1997.

In order for a Rate CGS, Rate IGS, or Rate AAGS customer to achieve savings by transporting under Rider TS, that customer would have to achieve savings on the gas commodity portion of its natural gas costs. If a customer could not achieve gas commodity savings or some other perceived benefit, then the customer may have no incentive to elect transportation service under Rider TS.

Experience with Rider TS indicates that many customers that could meet the current Rider TS annual threshold of 50,000 Mcf/year were also higher load factor customers that could meet the minimum daily threshold of 50 Mcf/day required for service under Rate FT. Such a customer may choose the character of service offered under Rate FT over the character of service

offered under Rider TS in order to take advantage of the lower distribution charge associated with Rate FT. A customer in this position could pay more for the gas commodity portion of its natural gas costs and still achieve savings on its total natural gas costs.

Proposed Rider TS-2 includes an annual threshold of 25,000 Mcf/year. LG&E cannot predict whether customers that meet this lower annual threshold will elect service under Rider TS-2. Similar to customers that qualify for service under Rider TS, customers served under Rider TS-2 will have to determine if they can save on their gas commodity costs or achieve other benefits by purchasing gas from a third-party supplier.

- c. See the response to Question No. 22 (f) and Question No. 126.
- d. See the response to Question No. 85.
- e. LG&E's Gas Supply Department handles inquiries about gas transportation services. Customers do not typically apply for a specific gas transportation service, and instead make an inquiry about gas transportation service eligibility in general. Since January 1, 2008, LG&E has received inquiries regarding 39 customers whose usage levels were below the applicable thresholds for Rider TS. Most of the calls were from marketers calling with regard to a specific customer. In order to place the number of requests in perspective, LG&E serves about 25,000 commercial and industrial customers.

CUSTOMER	APPROXIMATE DATE OF INQUIRY	ESTIMATED ANNUAL USE IN MCF

39	Dec-10	22,000

In addition, during 2010, LG&E received an inquiry from a customer that had previously elected transportation service at a qualifying facility in order to determine if its facilities at other locations also qualified. At the time of the

inquiry, that customer had not transported under Rider TS for several years, but instead elected sales service from LG&E. The customer later terminated its service under Rider TS as well as its inquiry.

- f. LG&E has made no proposed changes to the eligibility threshold for service under Rider TS. Instead, LG&E has proposed to implement a new tariff under Rider TS-2 with a lower annual eligibility threshold. LG&E does not have an estimate as to how many of the eligible customers may elect service under Rider TS-2. See the response to Question No. 89 and Question No. 90.
- g. The “Character of Service” section proposed for Rider TS-2 includes three provisions not included in Rider TS. LG&E is proposing language specifying that: (i) unless otherwise permitted by LG&E, the Pipeline Transporter shall be Texas Gas Transmission, LLC, (ii) customers served under Rider TS-2 must designate a pool manager under Rider PS-TS-2; and (iii) Action Alerts may be issued to pool managers operating under Rider PS-TS-2 serving customers under Rider TS-2.

As explained in LG&E’s response to Question No. 22(c), the system of Texas Gas Transmission, LLC passes directly through Louisville and Jefferson County, Kentucky facilitating the movement of gas through the entirety of LG&E’s system, while LG&E’s interconnection with the facilities of Tennessee Gas Pipeline Company, LLC is physically remote from LG&E’s main load centers in Louisville and Jefferson County, Kentucky. Limiting transportation customer deliveries to LG&E via Texas Gas Transmission, LLC will support system reliability. No gas transportation customer has ever made deliveries of gas to LG&E via Tennessee Gas Pipeline Company, LLC so there is no expected impact on existing customers.

Based on LG&E’s experience with customers served under Rate FT and their very high pool participation rates, LG&E recognized the administrative and operational efficiencies that would be achieved if customers served under Rider TS-2 were also similarly served through a pool operated under Rider PS-TS-2. (See the response to Question No. 28(b).)

It is also important to note a significant difference between pooling service offered by LG&E under Rider PS-FT and the proposed service under Rider PS-TS-2. Rate FT contains all of the balancing provisions applicable to those customers, including, for example, the application of the “Utilization Charge for Daily Imbalances,” the “Cash-Out Mechanism,” and the “Operational Flow Orders.” Rider PS-FT incorporates these sections by reference and only modifies the section related to the application of the “Utilization Charge for Daily Imbalances.” Rider PS-TS-2 contains all of the balancing provisions applicable to service under Rider TS-2, including, for example, the Cash-Out Mechanism, and Action Alerts.

As explained in LG&E's response to Question No. 91, Actions Alerts issued pursuant to Rider PS-TS will not eliminate imbalances, daily or otherwise. Similarly, Operational Flow Orders issued under Rate FT do not eliminate imbalances, daily or otherwise. Action Alerts provide LG&E with a tool to specify, based on the customer's Maximum Daily Quantity ("MDQ"), an amount of gas to be delivered by the customer to LG&E. An Action Alert provides LG&E with certainty as to the amount that the customer will deliver on a day when an Action Alert is in effect. To the extent that LG&E can ensure that deliveries to customers and receipts from the pipeline on behalf of customers are in line, LG&E can ensure that system reliability can be maintained and that costs are associated with responsible customers. Customers complying with the Action Alert will not be subject to the Action Alert Charge.

Without Action Alerts, pool managers under Rider PS-TS-2 could choose to deliver significantly more, significantly less, or no gas on behalf of their customers. Broadening transportation service eligibility and allowing customers with space-heating load profiles to transport requires that LG&E be afforded effective tools to manage those loads. See also LG&E's response to Question No. 87.

- h. In the process of reviewing and updating its transportation tariffs, LG&E identified a potential source of cross subsidies as between Rider TS and LG&E's sales rates. This cross-subsidy can occur when a sales customer elects service under Rider TS and any over- or under-collected gas costs that would have been borne by that customer are left for the remaining sales customers to absorb. This is particularly troublesome in the event that there are under-recoveries that the transferring sales customer avoids by moving to Rider TS. Conversely, a sales customer electing service under Rider TS will be unable to receive its share of any prior over-collections. The historic magnitude of any cross subsidies is nearly impossible to determine. By including this mechanism LG&E hopes to prevent any further cross-subsidies. This mechanism is similar to the mechanism approved for Duke Kentucky under its Rider GCAT and conforms to the "Gas Cost True-Up Charge" proposed under Rate FT. Given the proposed lower eligibility threshold for service under Rider TS-2, the inclusion of the "Gas Cost True-Up Charge" is of increased importance.
- i. The "Gas Cost True-Up Charge" is not applicable to customers served under Rider TS or to customers served under Rider TS electing service under Rider TS-2 on or before March 31, 2013, which service will be effective on November 1, 2013.

- j. LG&E has proposed that customers under Rider TS-2 be subject to a “Minimum Annual Threshold Requirement and Charge”. The proposed “Minimum Annual Threshold Requirement and Charge” assesses customers an amount equal to the otherwise applicable Distribution Charge on the difference between the customer’s actual annual volume and the 25,000 Mcf annual threshold as specified in the “Availability of Service” section of Rider TS-2. Rider TS-2 is designed for customers using more than 25,000 Mcf/year. The “Minimum Annual Threshold Requirement and Charge” assesses those customers not meeting the stated criteria. For example, if during a Contract Year, a customer served under Rider TS-2 used 24,000 Mcf instead of 25,000 Mcf or more as stipulated in Rider TS-2, then the customer would be assessed \$2,114.20 for that year  $[(25,000 \text{ Mcf} - 24,000 \text{ Mcf}) \times \$2.1142/\text{Mcf}]$  based on the proposed Peak Period Distribution Charge of \$2.1142/Mcf. This example assumes that the customer takes service under Rider TS-2 pursuant to the otherwise applicable Rate CGS. Other Peak Period Distribution Charges apply under Rate AAGS or Rate IGS.

Each customer currently served under Rider TS was determined to qualify for service under that rate schedule at the time service was initiated. Some customers may change their usage patterns after electing service under Rider TS-2.

Inasmuch as the charge is not a remedy, the tariff also provides a stated criteria which can be applied to all customers to determine which customers should be removed from Rider TS-2 and returned to service under the otherwise applicable sales service. LG&E does not expect that any customers now served under Rider TS that elect service under Rider TS-2 will be subject to this tariff provision.

- k. Customers under Rider TS are not required to have installed telemetry. The monthly telemetry charge under Rider TS-2 will compensate LG&E for the costs associated with owning and operating telemetry required to meter customers under Rider TS-2.
- l. Rider TS and Rider TS-2 are both riders to Rates AAGS, CGS, and IGS. Each of those tariffs contains references to the “Gas Line Tracker” under the respective “Adjustment Clauses” section. Therefore, it is not necessary to include a duplicative reference to the “Gas Line Tracker” in either Rider TS or Rider TS-2.
- m. In order to provide customers served under Rider TS-2 (and their pool managers served under Rider PS-TS-2) with a tool to manage and help prevent daily and monthly imbalances, LG&E is proposing that these customers be provided with telemetry to allow them to assess and manage any over- or under-deliveries. See also the response to Question No. 87.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 27**

**Responding Witness: J. Clay Murphy**

- Q-27. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 59 through 60.2, Pooling Service – Rider-TS-2 (“PS-TS-2”) and Pooling Service – Rider TS (“PS-TS”).
- a. Explain whether a TS-2 customer appointing itself as its own Pool Manager will be required to pay the \$75 per month administrative charge. If so, explain why.
  - b. Explain the inclusion of the Adjustment Clauses section in the PS-TS-2 tariff, which is not included in the existing PS-TS tariff, and how these charges will be applied.
  - c. Explain the impact on existing TS customers transitioning to proposed TS-2 of the requirement to participate in PS-TS-2, including all billing and service-related impacts.
  - d. Explain whether customers served pursuant to the TS tariff will be required to participate in the PS-TS pool prior to October 31, 2013.
  - e. Explain why subsection 2 under the existing TS Special Terms and Conditions is not sufficient for scheduling TS customer volumes, as opposed to the inclusion of the Nominations and Nominated Volume section in proposed PS-TS-2.
- A-27.
- a. The customer as a pool manager would be required to pay the monthly \$75 Administrative Charge in the event that the Rider TS-2 customer chose to appoint itself as a pool manager under Rider PS-TS-2. This charge is designed to offset the costs associated with administering the activities and functions of the pool.
  - b. The referenced “Adjustment Clauses” section should not have been included in Rider PS-TS-2, and should be removed from that tariff. The Company will

provide an illustrative tariff sheet to reflect this correction in the next monthly update.

- c. Existing customers served under Rider TS are not required to elect service under Rider TS-2. Any customer who does elect service under Rider TS-2 must become a member of a pool under Rider PS-TS-2. It is the responsibility of the pool manager, not the customer as pool member, to comply with all of the service features under Rider PS-TS-2. Additionally, there are no billing impacts on the customer as a result of the customer's participation in a pool. Any charges under Rider PS-TS-2 (including the Administrative Charge and other charges) are the responsibility of the pool manager. Please refer to Sections 5 and 6 of the "Special Terms and Conditions" of Rider PS-TS-2.

Unlike Rate FT, none of the balancing features associated with Rider TS-2 are incorporated in the rate schedule. Instead all of the balancing features which are generally managed by the pool manager are incorporated in Rider PS-TS-2. These features include items such as "Character of Service," "Action Alerts," resolution of monthly imbalances through the "Cash-Out Provision for Monthly Imbalances," and "Nominations and Nominated Volumes." If these provisions were not incorporated into a separate mandatory pooling service, then the same provisions would have to be incorporated into Rider TS-2 itself. As an example of required pool membership, please refer to Duke Energy Kentucky, Inc.'s Rate Schedule FRAS which is applicable to Rate FT-L.

- d. Customers served pursuant to Rider TS are not and will not be required to participate in a Rider PS-TS pool prior to October 31, 2013.
- e. Section 2 of existing Rider TS "Special Terms and Conditions" is not adequate for Rider PS-TS-2 pool managers scheduling volumes for Rider TS-2 customers. The new language in Rider PS-TS-2 addresses two major concerns not addressed by Rider TS. The first relates to the process of making timely daily nominations and the second relates to the inclusion of a lost and unaccounted for percentage for deliveries to customers under Rider TS-2.

In terms of the scheduling and nomination of daily gas flows, the most significant change in Section 2 is the movement of the nomination deadline from 10:00 AM Eastern Clock Time to 8:00 AM Eastern Clock Time. This change and the related changes associated with daily nominated volumes are intended to assist LG&E in its daily purchasing and system planning process. Additionally, some customers (or their pool managers) are often lax in providing LG&E with timely information about changes in their gas flows and nominations. Today's gas markets have advanced since current nomination procedures were first established. Most daily gas purchasing activity is

confined to the hours between 8:00 AM and 10:00 AM. LG&E is requesting a nomination deadline of 8:00 AM for Rider PS-TS-2 pool managers in order to allow for a reasonable amount of time for LG&E to complete its system planning activities, including the purchase or dispatch of any gas. Receiving a nomination from a customer (or its pool manager) towards the end of the trading window, or even after daily trading activity has ceased, can result in suboptimal purchasing decisions because LG&E did not have information available to it until after its purchasing and dispatch decisions were made for the following day. All existing Rider TS customers electing service under Rider TS-2 (or their pool managers) would be affected by this change in the daily nomination deadline. The requirements regarding intraday nomination and nominations during weekends or holidays simply memorialize current practice; they are not expected to impact existing customers served under Rider TS that elect service under Rider TS-2.

With only a limited number of customers served under Rider TS, the inclusion of a provision for lost and unaccounted for gas did not seem necessary. However, with the proposed expansion of service eligibility under Rider TS-2, the inclusion of such a factor was determined to be important to ensure that transportation customers served under Rider TS-2 assume the appropriate level of cost responsibility. Absent a provision for lost and unaccounted for gas collected through Rider PS-TS-2, these costs would be assessed to sales customers through the Gas Supply Clause.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 28**

**Responding Witness: J. Clay Murphy**

- Q-28. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 61 through 61.2, Pooling Service – Rate FT (“PS-FT”).
- a. Explain whether FT customers are or will be required to participate in the PS-FT pool.
  - b. If FT customers are not required to participate in the PS-FT pool, provide the number of customers that are participating.
  - c. Explain the impact on existing PS-FT customers of proposed changes and additions to the Character of Service and Special Terms and Conditions sections, including any potential increases to customer bills.
- A-28.
- a. Customers served under Rate FT are not, and will not be, required to participate in a Rider PS-FT pool.
  - b. As of August 1, 2012, there are 73 customers served under Rate FT of which 70 are participating in five pools operating under Rider PS-FT.
  - c. LG&E has proposed to modify the “Character of Service” section in two main respects: to provide the ability to issue and apply Operational Flows Orders to individual customers and pool managers, and to reduce the balancing tolerance for pool managers from 5% to 2%.

While significant imbalances are common, LG&E has identified no particular pool manager as routinely being the cause of these imbalances. LG&E believes that the ability to direct an Operational Flow Order to an individual pool manager taking service under Rider PS-FT causing imbalances may be a more useful tool than issuing an Operational Flow Order to all pool managers. LG&E has proposed to include similar language in its Rate FT tariff with respect to the ability to issue Operational Flow Orders to individual customers

under Rate FT on Original Sheet No. 30.5. See also LG&E's response to Question No. 22(d).

LG&E has also proposed a reduction in the daily imbalance tolerance under Rider PS-FT from 5% to 2% consistent with its proposal to reduce the daily imbalance tolerance applicable to Rate FT from 10% to 5%. As explained in LG&E's response to Question No. 22(d), this change is prompted by both the historic balancing performance of customers served pursuant to Rate FT and the need to accommodate an expansion of transportation service to customers under Rider TS-2.

In order to address these concerns, LG&E has proposed a 2% daily balancing threshold for pool managers under Rider PS-FT. The 2% threshold is similar to the allowable variations permitted by interstate pipelines such as Texas Gas Transmission, LLC. In the case of Texas Gas Transmission, LLC, the pipeline permits customers a 2% threshold before applying the applicable overrun rate. Additionally, in recognition of the fact that a pool is composed of several member customers, the 2% threshold recognizes the diversity in the member customer loads (some may be potentially over-delivering while others may be potentially under-delivering). Because customers outside of a pool are not able to take advantage of this kind of load diversity, LG&E proposed a 5% tolerance for service under Rate FT. The difference in the 5% for stand-alone customers, and 2% for customers in pools, also recognizes LG&E's historic allowance of larger imbalance tolerances for non-pooling customers.

The "Utilization Charge for Daily Imbalances" ("UCDI") has two components. One component is the Daily Demand Charge which was \$0.1722/Mcf as of May 1, 2012. The Daily Demand Charge represents costs associated with holding pipeline capacity and firm gas supplies for sales customers that are used to balance the over- and under-deliveries of customers served under Rate FT. The Daily Demand Charge is determined quarterly as a part of LG&E's Gas Supply Clause. Any amounts recovered as a result of the daily imbalances of customers served under Rate FT are credited to LG&E's gas costs through the Gas Supply Clause and thereby offset gas costs incurred for sales customers.

The other component of the UCDI is the Daily Storage Charge which is \$0.1833/Mcf. This charge may be changed in the course of a general rate proceeding, but it is not proposed to change in the context of Case No. 2012-00222. The Daily Storage Charge recovers costs associated with holding on-system storage capacity for sales customers that is used to balance the over- and under-deliveries of customers served under Rate FT.

LG&E has proposed that pool managers served under Rider PS-FT would be subject to a reduction in the daily imbalance tolerance from 5% to 2%. The estimated impact on such pool managers during the 12 months ended March 31, 2012, is about \$81,214 in total UCIDI charges, of which about \$40,031 are estimated to be the Daily Demand Charges and about \$41,183 are estimated to be the Daily Storage Charges.

The effect of the proposed change in the daily tolerance from 10% to 5% that has been proposed for customers served under Rate FT is discussed in response to Question No. 22(e).

LG&E has proposed several clarifications to the “Special Terms and Conditions” section in order to clarify these sections and streamline the application of the existing tariff. These changes are not anticipated to have any impact on existing customers served under either Rate FT or pool managers served under Rider PS-FT.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 29**

**Responding Witness: Lonnie E. Bellar**

Q-29. Refer to P.S.C Gas No. 9, Original Sheet No. 84, Proposed Gas Line Tracker ("GLT"). Clarify the dates of LG&E's proposed GLT filing schedule, the beginning and ending of the proposed program year, and effective date.

A-29. The GLT submission schedule was designed to be similar to LG&E's Demand Side Management filing. LG&E prefers to have the new factor effective with the first billing cycle on or after January 1 with the Company making the filing two months prior. For example, assuming a January 1 effective date, the following time schedule would apply:

November 1, 2013      LG&E submits GLT filing with cost projections for 2014.

January 1, 2014      GLT factor effective for billing.

April 1, 2014      LG&E submits filing showing the true-up to actual costs for 2013. New factor is calculated combining the projected factor with the new true-up factor.

June 1, 2014      New GLT factor effective for billing.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**  
**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 30**

**Responding Witness: Robert M. Conroy / J. Clay Murphy**

- Q-30. Refer to proposed P.S.C Gas No. 9, Original Sheet Nos. 85.1 and 85.2, GSC and the Murphy Testimony at pages 6 and 7.
- a. Provide the level of uncollectible gas cost portion of bad debt for the last five calendar years.
  - b. With respect to the proposal to establish the ability to reduce its GSC rate upon 20 days' notice, LG&E's GSC currently contains a provision for out-of-time filings when warranted. Explain why this provision for interim increases, as well as decreases, with the addition of language permitting 20 days' notice, would not address the timely pass-through of imminent gas cost changes and mitigate the perceived need to reflect carrying charges.
  - c. Explain whether LG&E is aware that no other Kentucky LDC reflects carrying charges in its GSC rates.
- A-30. a. The gas cost portion of bad debt must be estimated because LG&E's records do not provide this level of detail. The ratio of GSC Billed Revenue to Total Gas Billed Revenue was used to estimate the portion of uncollectibles attributable to the gas cost.

GSC Billed Revenue / Total Gas Billed Revenue = GSC % of Revenue

$$\text{\$142,523,229} / \text{\$267,886,050} = 53.20\%$$

Total Gas Uncollectibles x GSC Percent of Revenue = GSC Portion of Bad Debt

$$\text{\$786,110} \times 53.20\% = \text{\$418,211}$$

Year	Gas		
	Uncollectible Accounts	Est. GSC% of Bad Debt	GSC Portion of Bad Debt
2011	\$ 995,317	53.20%	\$ 529,509
2010	1,411,315	53.20%	750,820
2009	961,326	53.20%	511,425
2008	1,075,019	53.20%	571,910
2007	579,080	53.20%	308,071

- b. LG&E does not support the change to the Gas Supply Clause (“GSC”) outlined in Question No. 30(b), that is, allowing interim reductions and increases in the GSC rate upon 20 days’ notice. LG&E is concerned that such a modification to the GSC would result in a *de facto* monthly GSC rate that could expose customers to potential upward volatility in the gas cost recovery rate. LG&E believes that a quarterly mechanism allowing for reductions on 20 days’ notice would provide customers with rate stability and at the same time the ability to participate in wholesale price reductions on a timely basis.
- c. LG&E is aware that no other Kentucky LDC reflects carrying charges in its GSC rates. Similarly, no other LDC has proposed to implement this reduction-only feature in its Gas Supply Clause as a part of its gas cost recovery mechanism. With the ability to reduce the GSC rate upon 20 days’ notice, LG&E would be more likely to incur under-collections that, over the long run, might not be off-set with over-collections. The potential increase in under-collections without offsetting over-collections supports the need to incorporate a provision to apply carrying charges to the over- and under-collections in the GSC.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 31**

**Responding Witness: Chris Hermann / J. Clay Murphy**

- Q-31. Refer to proposed P.S.C Gas No. 9, Original Sheet Nos. 97.2 and 97.3, Terms and Conditions - Customer Responsibilities and 98.1, Terms and Conditions – Company Responsibilities and the Testimony of Chris Hermann (“Hermann Testimony”), pages 16-17.
- a. Explain the specific circumstances giving rise to the proposed additions to the Exclusive Service on Installation Connected (Customer Responsibilities) and of the Obligation to Serve (Company Responsibilities) sections.
  - b. Confirm that, pursuant to the proposed Company-Owned Service Lines section, LG&E will not be responsible for operating and maintaining residential and commercial service lines until and unless it has at least repaired, or otherwise has replaced or installed them.
- A-31. a. On Original Sheet Nos. 97.2 and 98.1, LG&E has proposed to add the following identical language:

Company shall not be obligated to provide natural gas or natural gas service under any standard natural gas rate schedule on a standby, back-up, supplemental or other basis to any Customer that is physically connected to the facilities of any other provider of natural gas service, such other providers to include, but not be limited to, another natural gas local distribution company, public, private, or municipal; a producer, gatherer, or transmitter of natural gas; an interstate or intrastate natural gas pipeline; or any other entity (including the Customer itself acting in any one or more of these roles) that provides natural gas or natural gas service to residential, commercial, industrial, public authority, or any other type of customers which might otherwise receive natural gas from Company.

LG&E is requesting the addition of this language as a result of a recent experience with one of its customers. A large customer formerly served under a special contract currently produces natural gas on its property and is also connecting to the facilities of an interstate natural gas pipeline. LG&E is concerned that it will be required to provide natural gas or natural gas transportation service to the customer under a standard rate schedule. This service will amount to a “standby” service in the event that the customer is unable either to produce adequate natural gas or to obtain adequate gas through the interstate pipeline. That prospect, particularly given the size of the customer, becomes untenable when considering that the only charge that LG&E may assess the customer for holding the facilities available to serve the customer is the customer charge under Rate CGS.

LG&E is seeking relief from the obligation to serve customers in this situation because service is uneconomic, impractical and will be subsidized by all other customers. Eliminating the requirement to serve this customer, and similarly situated customers, under standard rate schedules (which typically have only a monthly customer charge as a minimum bill) and instead negotiate a special contract (or remove the facilities) provides a resolution to this problem.

The specific circumstances giving rise to the proposed additions are also discussed in the response to Question No. 98.

- b. LG&E proposes to assume ownership of:
- Customer-owned gas service risers as they are replaced; and
  - Customer-owned service lines when a new service is installed or existing services are replaced.

No accounting entry will be recorded with regard to customer-owned risers or customer-owned service lines until a replacement occurs.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 32**

**Responding Witness: Robert M. Conroy**

- Q-32. Refer to proposed P.S.C Gas No. 9, Original Sheet No. 101.1, Billing. Explain the specific circumstances giving rise to the proposed addition of the Customer Rate Migration section.
- A-32. The section was added to clarify the Company's policy.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 33**

**Responding Witness: J. Clay Murphy**

- Q-33. Refer to proposed P.S.C. Gas No. 9, Original Sheet No. 108.2, Emergency Curtailment.
- a. Explain whether the addition of subsection (2) regarding Action Alerts changes the curtailment status of existing TS customers.
  - b. Explain why the addition of subsection (6) is necessary given the permissive nature with regards to compliance of FT and Special Contract customers with the request.
- A-33. a. The addition of subsection 2 to the "Emergency Curtailment" actions does not change the curtailment status of customers served under either Rider TS or Rider TS-2. The otherwise applicable sales rate (CGS, IGS, or AAGS) continues to apply for the purpose of curtailment. The addition of this item simply indicates that after issuing Operational Flow Orders and before discontinuing service to customers under Rate AAGS, customers served under Rider TS-2 would be required to comply with the applicable Action Alert.
- b. The addition of this language provides LG&E with a formalized mechanism to work with transportation customers to potentially prevent curtailment of sales customers by negotiating a purchase transaction.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 34**

**Responding Witness: Lonnie E. Bellar**

Q-34. Refer to page 10, lines 8-10, of the Testimony of Victor A. Staffieri ("Staffieri Testimony"). Provide a general description of the Environmental Protection Agency's ("EPA") Partner of the Year program and a list of the 43 other organizations named 2011 Partner of the Year.

A-34. As explained by the EPA in their "Profiles in Leadership" publication, the Partner of the Year program "honors partners for strategically and comprehensively managing their energy use and promoting ENERGY STAR products and practices in their own operations, and/or providing efficient products and services to consumers and within their communities." The EPA awards Partner of the Year designations in six categories. The Company received its Partner of the Year designation for Energy Efficiency Program Delivery, which "recognizes utilities, state agencies, regional efficiency nonprofit organizations, and associations that sponsor sustained energy efficiency and environmental programs. These winning organizations have demonstrated excellence in implementing comprehensive, high performing energy efficiency programs." The "Profiles in Leadership" publication may be accessed at: [http://www.energystar.gov/ia/business/industry/2011\\_profiles\\_in\\_leadership.pdf](http://www.energystar.gov/ia/business/industry/2011_profiles_in_leadership.pdf).

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 35**

**Responding Witness: Paul W. Thompson**

Q-35. Refer to the Testimony of Paul W. Thompson ("Thompson Testimony"), page 4, at lines 14 and 15, concerning the impact of natural gas productions from shale formations on the price of natural gas. Provide support for the statement that wholesale natural gas prices would probably remain at low levels in the long term, and explain whether LG&E has conducted any long term forecasting analysis of natural gas prices. If so, provide a copy of the analysis.

A-35. LG&E/KU do not forecast natural gas prices, but rely on a combination of NYMEX forward market prices for the short-term and natural gas price forecasts prepared by the Energy Information Administration ("EIA") in the long-term. For long-term planning, the Company is using the EIA's Reference Case gas price forecast presented in its Annual Energy Outlook 2012 ("AEO 2012").<sup>1</sup> The chart below shows the annual average Henry Hub natural gas prices in nominal dollars per MMBtu from the EIA's AEO 2012 Reference Case as well as the following cases and scenarios:

- **AEO 2010 reference case**
- **AEO 2011 reference case**
- **AEO 2012 Low Estimated Ultimate Recovery ("EUR")** - assumes that the EUR per tight oil or shale gas well is 50 percent lower than in the Reference case, increasing the per-unit cost of developing the resource and, ultimately, the price of natural gas used at power plants.
- **AEO 2012 High EUR** - assumes that the EUR per tight oil or shale gas well is 50 percent higher than in the Reference case, decreasing the per-unit cost of developing the resource and the price of natural gas for power plants.
- **AEO 2012 High Technically Recoverable Resources** – assumes that the well spacing for all tight oil and shale gas plays is 8 wells per square mile, and the

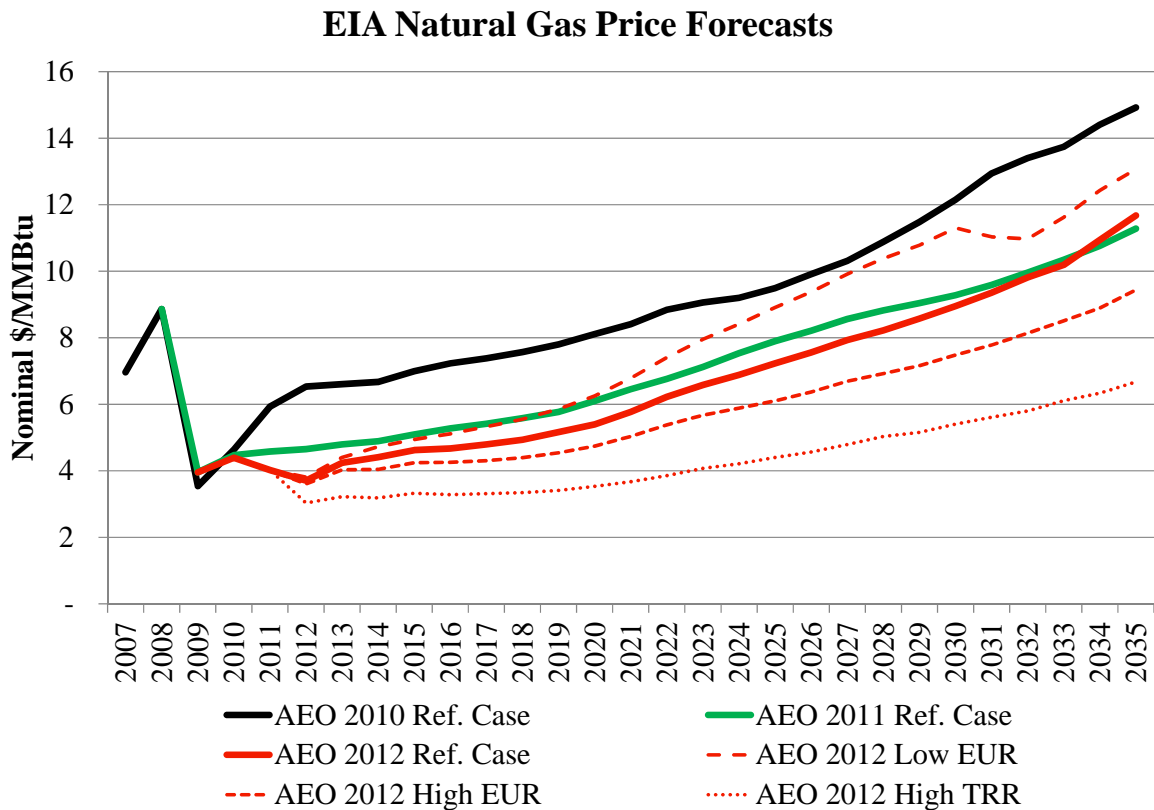

---

<sup>1</sup> June 2012, see the AEO 2012 document at: [http://www.eia.gov/forecasts/aeo/pdf/0383\(2012\).pdf](http://www.eia.gov/forecasts/aeo/pdf/0383(2012).pdf) (pp. 91-93) and the corresponding data tables at: <http://www.eia.gov/oiaf/aeo/tablebrowser/#release=AEO2012&subject=8-AEO2012&table=13-AEO2012&region=0-0&cases=ref2012-d020112c>.

EUR for tight oil and shale gas wells is 50 percent higher than in the Reference case.

This chart demonstrates that the EIA’s long-term natural gas price forecasts have declined significantly since 2010 and shows that the EIA’s current Reference Case forecast stays below 2008 price levels through 2029. Further, with the EIA’s 2012 assumptions for higher gas recovery rates, gas prices are forecasted to stay below 2008 levels through at least 2033. And even in EIA’s scenario with lower gas recovery rates, gas prices are forecasted to stay below 2008 levels through 2024.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 36**

**Responding Witness: Paul W. Thompson**

- Q-36. Refer to page 8, lines 1 through 8, of the Thompson Testimony.
- a. Provide a breakdown, by Uniform System of Accounts (“USoA”) account number, of the \$21 million LG&E has invested since its most recent general rate case to maintain and enhance the performance of its existing generation.
  - b. Provide a breakdown, by USoA account number, of the over \$145 million LG&E has invested since its most recent general rate case in generation infrastructure and reliability projects associated with its generation fleet.
- A-36. a. A breakdown of capital expenditures since the most recent general rate case by USoA is not readily available. Please see the attached schedule for a breakdown by project.
- b. A breakdown of capital expenditures since the most recent general rate case by USoA is not readily available. Please see the attached schedule for a breakdown by project.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 37**

**Responding Witness: Paul W. Thompson**

Q-37. Refer to the Thompson Testimony, page 9, at lines 5 through 13. Provide a detailed explanation as to why Trimble County Unit 2 ("TC2") did not perform as efficiently as projected during its first year of operation. Include in this explanation support for the statement that LG&E remains "confident that TC2 will operate effectively and efficiently going forward."

A-37. Though TC2 did not meet its first year projections for availability and reliability, that is not uncommon for new units in their first few years of operation. Mill Creek 3, which went into service in June, 1978, had an Equivalent Forced Outage Rate (EFOR) of 20.0% in 1980. Ghent 3, which went into service in May, 1981, had an EFOR of 13.6% in 1982. Mill Creek 4, which went into service in July, 1982, had an EFOR of 15.6% in 1983. Trimble County 1, which went into service in December, 1990, had a relatively good EFOR in its first full year of operation at 7.2% in 1991. Given this history with the Company's more recent very large units, the TC2 EFOR performance of 10.3% in 2011 is in line with company experience. Moreover, TC2 has more environmental controls than any of our other coal-fired units. These additional environmental controls add a substantive level of complexity to commissioning and ongoing operations.

TC2 is operating under a contractual warranty through January 22, 2013. In order to confirm our satisfaction with performance under the contract warranty, the unit was taken off line for a planned outage in the Spring, 2012. Items addressed during the Spring, 2012 outage included:

- Modification of all burners to incorporate change in design targeted to reduce flow restriction and enhance air flow
- Primary and secondary air flow metering and calibration improvements
- Installation of additional layer of catalyst to improve NOx removal
- Design modification within Wet and Dry Precipitators
- Inspection of Generator retaining rings
- Inspection of many other critical components

Given the inspection results and issues addressed during that outage, the Company remains very confident that TC2 will operate at design levels going forward.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 38**

**Responding Witness: Paul W. Thompson**

- Q-38. Refer to page 9, lines 16 through 19, of the Thompson Testimony.
- a. Provide a breakdown, by USoA account number, of LG&E's share of the \$11 million in increased expenses resulting from the operation and maintenance of TC2.
  - b. Provide LG&E's share of the additional capital investment in TC2 between the end of the test year in its most recent general rate case and the March 31, 2012 ending date of the test year proposed in this case.
- A-38. a. See attached.
- b. The additional non-ECR investment in TC2 by LG&E was \$8,556k.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 40**

**Responding Witness: Paul W. Thompson**

- Q-40. Refer to page 11, lines 12 through 17, of the Thompson Testimony.
- a. Of the \$15 million increase in maintenance expense incurred in the test year compared to the levels reflected in their most recent general rate cases, provide the amount attributed to LG&E and the amount attributed to its sister company, Kentucky Utilities Company ("KU").
  - b. Provide the level of maintenance expense reported by LG&E due to planned maintenance outages for each of the calendar years from 2006 through 2010.
  - c. The sentence beginning on line 14 and ending on line 17 indicates that it is expected that the level of maintenance expense incurred in the test year will be incurred again in 2014 and thereafter. Provide the level of maintenance expense expected to be incurred in 2013.
- A-40.
- a. The LG&E increase was \$8,590k, and the KU increase was \$5,991k.
  - b. See attached.
  - c. See attached. Please note that the scope of the planned maintenance cycle (e.g. adding more environmental control equipment and aging of all equipment) and the cost of that cycle have increased over past years'. The test year results are indicative of a recurring level of such costs going forward.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 41**

**Responding Witness: Paul W. Thompson**

Q-41. Refer to the Thompson Testimony, page 12, at line 7. Provide the steam capacity factors for LG&E for the five-year period from 2006 through 2010.

A-41. The LG&E steam capacity factors are as follows:

2006	77.5%
2007	78.5%
2008	79.0%
2009	74.6%
2010	77.0%

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 42**

**Responding Witness: Paul W. Thompson**

- Q-42. Refer to pages 12 and 13 of the Thompson Testimony.
- a. Provide the test year cost incurred by LG&E for the remote monitoring of existing coal-fired generating units by Black & Veatch.
  - b. Provide the annual cost LG&E will incur prospectively under the five year monitoring arrangement with Black & Veatch.
- A-42. a. The test year amount for LG&E is \$343k.
- b. The annual cost to be incurred by LG&E is \$295k.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**

**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 43**

**Responding Witness: Paul W. Thompson**

Q-43. Refer to the Thompson Testimony, page 13, at line 6 through 9. Identify the heat rate issues and equipment reliability concerns detected upon the implementation of Black & Veatch's Remote Performance Monitoring service on Ghent Unit 1 and Mill Creek Unit 4. Explain how these problems were addressed.

A-43. The heat rate and reliability issues brought up by the Black & Veatch Remote Performance Monitoring (B&V RPM) program in Pilot year (2010) at Ghent 1 and Mill Creek 4 were as follows:

Ghent Unit 1

1. Main Steam supply stop valves to boiler feed pump turbines have been identified as leaking through; evidence from valve chest temperature indicated higher temperature steam was leaking into the BFPT inlet, causing a heat rate penalty due to HP steam loss. Waiting outage to overhaul valve.
2. Reheat Spray Flow indication identified as faulty. Adjusted calcs in the DCS to compensate and provide accurate monitoring of unit.
3. Identified right side hot reheat steam temperature measuring ~60F below left side indicating a lack of heat transfer. Increased soot blowing in targeted areas resulted in decreased fouling and restoring boiler efficiency.
4. Detected 20 degF escalation in boiler exit gas temperatures. Performed targeted soot blowing to improve performance
5. Elevated F1 Heater drain cooler approach temperature was found indicating a low heater level. Low level will cause irreparable heater steam damage and efficiency losses. I/E maintenance adjusted and calibrated level controls for proper level and indication.
6. Air Heater 1-1 guide bearing temperature reading abnormal. Found and repaired a bad thermocouple restoring equipment thermal protection monitoring.

7. BFPT speed indication (1 of 4) found to be faulty; 3 of 4 values needed for a 'good' signal, so it was not a known issue, but if a second signal had failed, it would have caused a reliability problem with the pump/turbine
8. Condenser performance – identified high backpressure caused by tube fouling and flow path pluggage. Cooling water flows were down (pluggage) and the heat transfer was off design (fouling). Identified before an outage for maintenance planning purposes (this outage happened to coincide with tube replacement in the condenser, but prior to a normal outage this would be used for planning cleaning activities).
9. LP Heater Drain Flow was noted to have decreased along the entire string. The drain valves on the lower heaters opened up in order to pass more flow, resulting in thermal performance issues. The issue was identified as the top condensate heater emergency drain valve being stuck open and bypassing a portion of the flow to the condenser.
10. High pressure turbine efficiency loss – this is an issue that the station is aware of due to copper and other deposits on the turbine. However, the use of the RPM information gave the plant a more periodic feedback of the efficiency degradation so they had a better idea of how fast the performance dropped off.

Mill Creek Unit 4

1. Condenser 4A air in leakage was quantified providing the plant with the needed information to plan and schedule repairs.
2. Plugged cooling tower pump motor bearing cooling line resulted in elevated bearing temperature not yet in alarm. Maintenance found the cooling supply line to the bearing partially plugged. The bearing could have lost cooling entirely resulting in a failed motor bearing and unit load limit.
3. 4C PA fan motor stator temperature increased but not yet in alarm. Maintenance found and removed a piece of plastic lodged inside the motor air intake blocking air flow. Motor life is exponentially proportional to operating temperature.
4. Heater 6 level dropped below normal due to a leaking bypass. Low level allows steam to enter the drain cooler eventually causing irreparable heater damage and efficiency losses. The bypass was repaired returning levels to normal.
5. Air heater pluggage and ID/FD fan issues – prior to spring outage, RPM diagnosed air heater differential pressures running high. Through their analysis, they were able to diagnose a fan bias that was causing flows to run higher through one air heater and set of preheating coils versus the other side. Also were able to differentiate between air heater impacts and preheating coil impacts in the differential pressure numbers.
6. Able to diagnose a recirculation valve leak on the condensate system. Unit was running with all 3 hotwell pumps in service, and recirculation was causing higher duty on the pumps. Able to diagnose a leaking valve and save the cost of the extra power due to the increased pump duty.

7. 4B pulverizer had a plugged flow sensing line. Normal monitoring did not notice the increase in the flow due to an improvement in the PA fan. RPM noted the change in fan and pulverizer amps and was able to diagnose the flow issue to the pulverizer.
8. 4A air heater cold end temperatures dropped below the normal set point, which is a concern due to acid dew point temperature at that end. The station changed the flow in the preheating coils and the temperatures went too high. RPM was able to help diagnose a faulty diverter valve in the system that was affecting the ability to control the steam temperatures to the proper range.
9. Unit 4 Steam Seal header safety pressure showed increased levels. The bypass valve around the steam seal header control valve was leaking through, causing an efficiency loss in the cycle due to excess steam usage.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information

Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 45**

**Responding Witness: Paul W. Thompson**

- Q-45. Refer to page 17, lines 12 through 15, of the Thompson Testimony. Provide a breakdown, by USoA account number, of the \$32 million invested by LG&E in transmission facilities since the test year of its most recent general rate case.
- A-45. A breakdown of capital expenditures since the most recent general rate case by USoA is not readily available. Please see the attached schedule for a breakdown by project.

**LG&E Transmission Investments Since Last General Rate Case**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 46**

**Responding Witness: Paul W. Thompson**

Q-46. Refer to page 20, lines 5 through 7, of the Thompson Testimony. Provide the amount of increased costs incurred by LG&E during the test year associated with complying with the CIP reliability standards.

A-46. The increased costs incurred by LG&E were \$806k.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 47**

**Responding Witness: Paul W. Thompson**

Q-47. Refer to page 20, lines 15 through 19, of the Thompson Testimony. Provide, by USoA account number, a breakdown of LG&E's share of the test year cost incurred due to having added 27 employees in "Energy Services" since the end of the test year in LG&E's most recent general rate case to assist with North American Electric Reliability Corporation and CIP compliance efforts

A-47. The breakdown by FERC account is as follows:

Generation		
	506100	\$ 53,569
	510100	\$201,522
Transmission		
	560100	\$5,511
	560900	\$126,754
	561100	\$11,022
	561190	\$176,353
	561590	\$60,621
	561900	\$38,577
	566900	\$5,511
	581900	\$115,732
	935488	\$11,022
Total		\$806,194

# LOUISVILLE GAS AND ELECTRIC COMPANY

## Response to Commission Staff's Second Request For Information Dated July 31, 2012

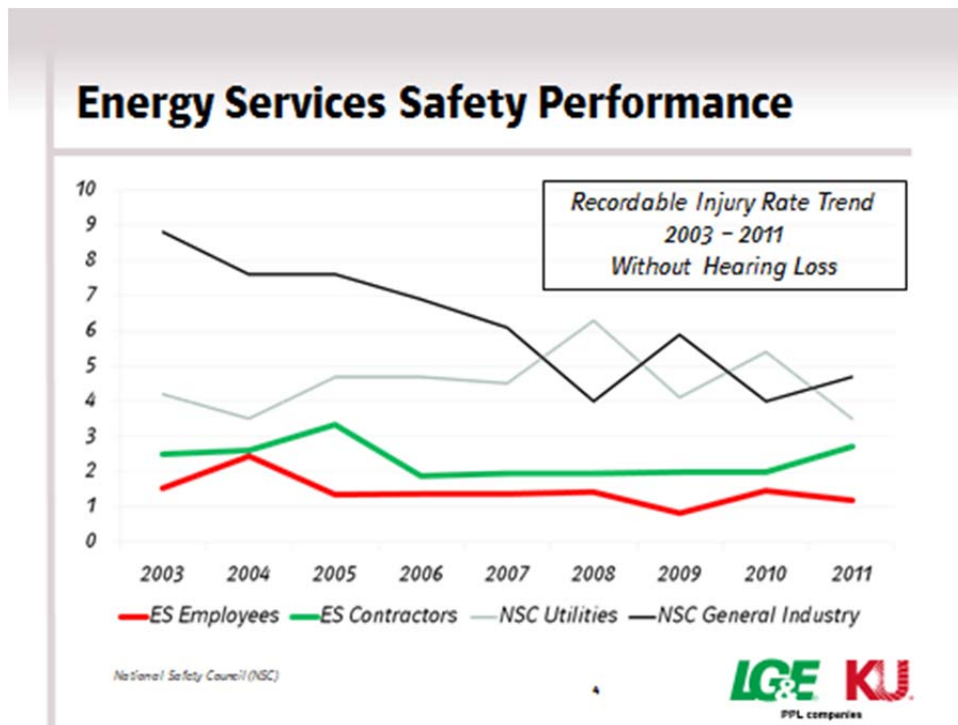

Case No. 2012-00222

### Question No. 48

Responding Witness: Paul W. Thompson

Q-48. Refer to the Thompson Testimony, page 21, at lines 17 through 18. Explain why the recordable injury rates for independent contractors increased by 50 percent from 2010 to 2011.

A-48. While the rate for contractors did go up between 2010 and 2011, the chart below shows that the contractor rate is generally flat to declining since 2005. The rate remains below utility and industry averages. The increase in 2011 was partially due to a series of hand related injuries. The Company has partnered with Kleinert & Kutz Hand Care Center and has had a hand surgeon come to the business partner quarterly safety meeting and to some of the plant employee quarterly safety meetings and give a presentation on hand injury and prevention. Additional analysis is also being done on the types of gloves being used to see if different types can be better used in certain work situations.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 49**

**Responding Witness: Paul W. Thompson**

- Q-49. Refer to the Thompson Testimony, page 22, at lines 19 through 20. Explain the results of the testing conducted on the Hancock County well, and whether there will be additional testing.
- A-49. The testing involved the injection of brine and a small amount of CO<sub>2</sub> into the Knox dolomite target zones. This allowed the project geologists to determine the volume and rate of CO<sub>2</sub> that could be stored in the formation and that those rates would support larger scale testing. This work was somewhat unique since most testing in the United States has involved sandstone formations such as the Mt. Simon and the DOE funded additional CO<sub>2</sub> injections into the Knox in 2010. The well has now been plugged and no further testing is planned.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 50**

**Responding Witness: Chris Hermann**

Q-50. Refer to page 5, lines 17 through 19, of the Hermann Testimony. Provide LG&E's share of the cost of constructing or upgrading 60 miles of lines to the National Electrical Safety Code heavy loading standard since 2009.

A-50. LG&E's share of this cost is \$14.498 million.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 51**

**Responding Witness: Paul Gregory "Greg" Thomas**

- Q-51. Refer to the Hermann Testimony, page 7, at lines 4 through 7. Provide a copy of the quarterly tree trimming surveys and the results of each.
- A-51. See attached files for tree trimming survey questions and a summary of the results for LG&E and KU.

**LG&E and KU Services Company  
Tree Trimming Customer Satisfaction Survey  
Phone Study #11244**

May I speak with **[CONTACT NAME]**?

Hello, this is **[INSERT INTERVIEWER NAME]** calling from Bellomy Research on behalf of **[LG&E, Kentucky Utilities/ODP]**. Recently trees were trimmed along primary power distribution lines in your area. We are conducting a survey to gather customer feedback about tree trimming services and would like to include your opinions.

(IF NECESSARY: We are not selling anything, we would just like your opinions on tree trimming services.)

(IF ASKED: The survey should take less than 5 minutes to complete.)

S1 Are you the adult in the household who is most familiar with the tree trimming service along power lines that was recently completed in your area?

1. Yes **[SKIP TO S2]**
2. No/someone else in household
3. Not aware tree trimming service was performed **[TERMINATE]**

**[IF S1 = 2]**

S1a Can you connect me with the correct person?

1. Yes **[REPEAT INTRODUCTION]**
2. Not available **[SCHEDULE CALL BACK]**
3. No **[TERMINATE]**

**[LOOP TWICE]**

S2 Do you or anyone in your household currently work for PPL, LG&E, Kentucky Utilities, or ODP?

1. Yes **[TERMINATE]**
2. No
98. Don't know **[TERMINATE]**

S3 Have you completed a survey for **[LG&E/Kentucky Utilities]** related to utility service in the past three months?

1. Yes **[TERMINATE]**
2. No
98. Don't know **[TERMINATE]**

**[IF S3=1 THEN SAY "We apologize for contacting you so soon after completing another survey. Thank you for your time and have a nice day."]**

**Q1** These next questions pertain to the tree trimming service recently completed in your area by a contractor on behalf of **[LG&E, Kentucky Utilities/ODP]**. On a scale of 1 to 10 where 10 means “completely satisfied” and 1 means “not satisfied at all”, how satisfied were you overall with the tree trimming service?

Complete ly satisfied										Not satisfied at all	(DNR) Don't know
10	9	8	7	6	5	4	3	2	1	98	

**[IF Q1 <= 5 THEN ASK]**

**Q1a** What specific aspect of the service were you dissatisfied with?

---

**Q2** What type of interaction did you have with the tree trimming workers? (Read list)

1. Spoke directly with the workers
2. Saw the crew working but did not speak with them
3. Did not interact with the workers

**Q3** Now, I am going to read a number of statements about the contractor who performed the tree trimming service. On the same 10-point scale (REPEAT IF NEEDED: Where 10 is “completely satisfied” and 1 is “not satisfied at all”), how satisfied were you with the contractor on the following attributes....

Comple tely satisfied										Not satisfied at all	(DNR) Don't know
10	9	8	7	6	5	4	3	2	1	98	

**[RANDOMIZE]**

- a. Courtesy of the workers
- b. Professionalism of the workers
- c. Clean up of site upon completion
- d. Performed the work in a safe manner such as wearing safety equipment, traffic control, signage, etc.
- e. **[IF Q2=1]** Responsiveness to your questions or concerns
- f. Treated your property with care

Q4 Do you recall receiving advance notification of the tree trimming service?  
 1. Yes  
 2. No **[SKIP TO Q9]**

Q5 How were you notified in advance about the tree trimming service? (Select all that apply)  
 1. Phone  
 2. Mail  
 3. Workers came to your door  
 4. Other (please specify) \_\_\_\_\_

Q6a **[IF Q5=1,2]** How long before the tree trimming service occurred did you receive notification by phone and/or mail?  
 1. Less than two weeks  
 2. Two to four weeks  
 3. More than four weeks  
 98. (do not read) Don't know

Q6b **[IF Q5=3]** When did workers come to your door to let you know about the tree trimming?  
 1. Before the scheduled tree trimming  
 2. Day of the scheduled tree trimming  
 3. After the scheduled tree trimming  
 98. (do not read) Don't know

Q7 **[IF Q5=2]** Thinking about the materials that were mailed to you, how satisfied were you with the effectiveness of the educational materials in explaining the tree trimming process? Please use the 10-point scale where 10 means "completely satisfied" and 1 means "not satisfied at all".

Complete ly satisfied										Not satisfied at all	(DNR) Don't know
10	9	8	7	6	5	4	3	2	1	98	

Q8 **[IF Q5=2]** Which, if any, of the following do you recall being explained in the advance information? (read list, allow multiple responses)

**[RANDOMIZE 1-3]**

1. Why **[LG&E, Kentucky Utilities/ODP]** trims trees
2. Why certain trimming methods are used
3. Description of correct versus incorrect trimming methods
98. (do not read) Don't know **[EXCLUSIVE, ANCHOR]**

Q9 Have you visited the **[LG&E, Kentucky Utilities/ODP]** website in the past 3 months to learn more about tree trimming?

1. Yes
2. No
98. (do not read) Don't know

Q10 How did the tree trimming outcome rate relative to your expectations? (Read list)

1. Better than you expected
2. Same as you expected
3. Worse than you expected
98. (do not read) Don't know

Q11 Do you believe the tree trimming will make electric service more reliable in your area?

1. Yes
2. No
98. (do not read) Don't know

Q12 Has your opinion of **[LG&E, Kentucky Utilities/ODP]** changed as a result of the recent tree work in your neighborhood? Would you say your opinion has...

1. Improved
2. Worsened
3. Not changed

**[IF Q10 = 3 OR Q12 = 2 THEN ASK]**

Q13 What about the tree trimming process could have been handled better?

---

**[STANDARD CLOSING]**

Those are all of the questions that I have for you today. Your response will assist **[LG&E/Kentucky Utilities]** in its efforts to continue to improve tree trimming services. Thank you for your participation and have a nice day.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 52**

**Responding Witness: Chris Hermann**

- Q-52. Refer to page 7, lines 10 through 12, of the Hermann Testimony. Provide a breakdown, by USoA account number, of LG&E's share of the \$210.3 million that it and KU have invested in distribution reliability and infrastructure since their most recent general rate cases.
- A-52. A breakdown of capital expenditures since the most recent general rate case by USoA Electric Plant Account is not readily available. Please see the attached schedule for a breakdown by project.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 53**

**Responding Witness: Paul Gregory "Greg" Thomas**

Q-53. Refer to the Hermann Testimony, page 11, at lines 11 through 12. Provide a copy of the Incident Command System manual.

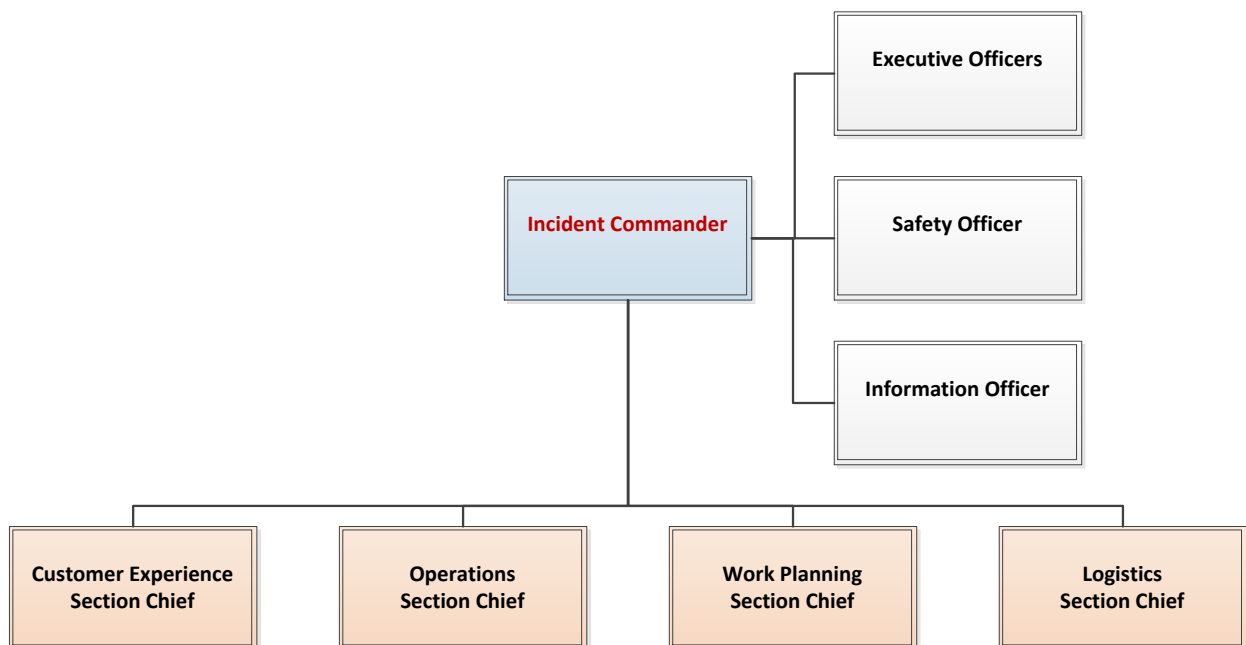

A-53. Please see attached.

---

## Energy Delivery Storm Incident Command System

### 1) Incident Command System

Energy Delivery has adopted an Incident Command System (ICS) structure for responses to emergencies and outage events. The structure is one component of the National Incident Management System (NIMS), and accommodates all types and sizes of emergencies. This structure and associated processes also provide assurance the Company responds to events on the electric and gas systems in a timely, effective, and consistent manner. Finally, the ICS provides for standard communications during emergencies, to key stakeholders, both internal and external to the Company.

The established chain of command throughout LG&E's ICS is used to communicate direction and maintain management control. Although direction must flow through the chain of command, members of the organization may directly communicate and work with each other to ask for or share information. ICS team members work within the ICS position descriptions and follow the designated reporting relationships, regardless of their non-emergency positions or everyday reporting responsibilities.

#### a) Incident Commander

## Energy Delivery Storm Incident Command System

The Incident Commander is responsible for overall management of an incident, for ensuring compliance with applicable internal policies and government regulations, and for determining strategy and tactical objectives. The Incident Commander is ultimately responsible for public and personnel safety, resource management, and internal and external information releases.

The Incident Commander shall be designated by the highest ranking qualified management representative that is available at the time of an incident. The Incident Commander shall be responsible for appointing or identifying the following positions in response to an incident on the LG&E or KU electric systems:

- i) Executive Officers
- ii) Safety Officer
- iii) Information Officer
- iv) Customer Experience Section Chief
- v) Operations Section Chief
- vi) Work Planning Section Chief
- vii) Logistics Section Chief

In addition to designating the above positions, the Incident Commander shall also be responsible for:

- i) Establishing a Command Post if one has not been set up.
- ii) Ensuring public safety and the safety of all resources supporting system restoration or emergency response efforts.
- iii) Maintaining communications with senior management regarding status, activities, and issues.
- iv) Ensuring safety performance, system status, resource levels, regulatory issues, and all external communications are logged.
- v) Coordinating response activities with incident response emergency response and government officials and agencies.
- vi) Coordinating work activities between work groups representing various phases of operations.

The Incident Commander is responsible for establishing and monitoring the incident organization. The organization should be large enough to manage the incident at hand, yet, resource use must be efficient and cost effective. Anticipated expansion or contraction of incidents shall require changes to the organization.

---

## Energy Delivery Storm Incident Command System

### b) Executive Officers

The Executive Officer group will be responsible for assisting the Incident Commander by communicating with senior management, community leaders, and public officials.

### c) Information Officer

At the onset of response to an incident on the electric system, the Incident Commander shall work with Corporate Communications to designate an incident Information Officer (IO). The IO shall be responsible for control and release of information pertaining to an incident response. All information to be released must be approved by the Incident Commander and appropriate Executive Officer prior to release. The primary focus of the IO shall be to alert, warn, and instruct the public and customers during emergencies involving Company facilities.

### d) Safety Officers

At the onset of response to an incident on the electric system, the Incident Commander shall designate a Safety Officer (SO). The SO has responsibility for assessing hazards and unsafe conditions associated with the incident, and developing, implementing, and monitoring an incident safety plan which assures:

- i) Public and personnel safety.
- ii) All personnel responding to the incident are properly trained and qualified to perform restoration activities.
- iii) All personnel responding to the incident are aware of identified safety hazards and unsafe conditions.
- iv) All off system resources receive safety passport training.
- v) Adequate safety professional representation is in the field.
- vi) Safety performance is monitored and reported on throughout the restoration effort.

### e) Incident Command Sections

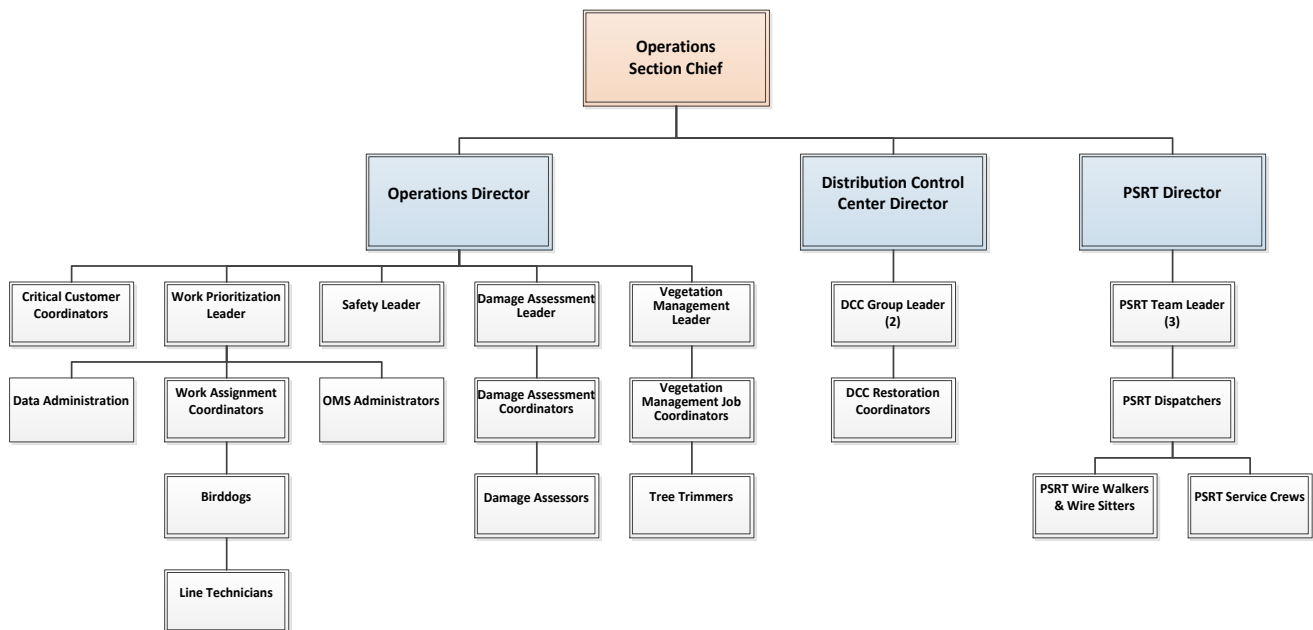

Four key components of the Incident Command System are the Customer Experience, Operations, Logistics, and Work Planning Sections. All of these sections are essential to timely and effective restoration of customer service, repair of infrastructure damage, and provision of estimated restoration durations.

---

## Energy Delivery Storm Incident Command System

### i) Operations Section

The Operations Section of the Incident Command structure has overall responsibility for effectively managing available resources, developing and implementing plans for responding to system outages and damages, and protecting the public from damaged energy sources.

#### (1) Operations Section Chief

The Operations Chief has responsibility for overseeing and coordinating restoration responses; assuring effective and efficient utilization of available resources; identifying resource needs and restoration projections based on those needs; and overseeing the following:

(a) **Operations Director (OD)** - or their designee, shall be responsible for:

- (i) Personnel – identifying, coordinating, and managing resource requirements, including
  1. Line Technicians
  2. Vegetation Management Personnel
  3. Damage Assessors

## Energy Delivery Storm Incident Command System

4. Bird Dogs
- (ii) Restoration and Repair Planning – developing tactical responses to emergencies, including public safety, restoration prioritization, critical customer identification, work assignment, and resource allocation
- (iii) Restoration Durations – predicting restoration durations for areas of responsibility, assessing system damages against resources, and developing communications methodology which assure times are accurately and effectively communicated to internal and external customers.
- (iv) Vegetation Management Resource Leader (VMRL) or their designee, shall be responsible for:
  1. Resources – the VMRL shall be responsible for working with the Operations Directors to equitably and effectively allocate and utilize vegetation management resources during restoration responses.
  2. Tactical Planning – the VMRL shall also be responsible for working with the Operations Director to develop plans for removing vegetation which inhibits restoration, including trimming circuits before resources are available, supplementing large crews with dedicated resources, and conducting post repair cleanup on damaged circuits.
- (v) Assessment Leader (AL) – or their designee, shall be responsible for:
  1. Resources – the AL shall be responsible for identifying damage assessment resource needs, and working with the Operations Director and PSRT Leader to acquire/assign needed resources.
  2. Damage Assessment – the AL or their designee shall be responsible for reviewing system outages and working with Work Planning and the Work Prioritization Leader to identify circuits or parts of the system that need further damage assessment based on outages and resource availability.
    - a. Damage Assessors – are responsible for conducting field assessments of assigned circuits/events, identifying and documenting system damage, and working with Damage Assessment Coordinators to predict resource (personnel, equipment, and materials) needs and estimated restoration durations.
    - b. Damage Assessment Coordinators – are responsible for assuring adequate assessment resources are available, assigning assessment work based on established priorities, accumulating damage assessment data, evaluating and reporting system impacts, and working with Work Planning and the Resource Managers to predict resource needs and restoration durations.

---

## Energy Delivery Storm Incident Command System

3. Post Restoration Assessment - the Assessment Leader or their designee shall be responsible for reviewing system outages and working with the Work Planning Leader to identify circuits or parts of the system that need damage assessment based on outages and resource availability. The Assessment Leader shall work with the PSRT Leader, and Operations Director to identify available resources for performing assessments.
- (vi) Work Prioritization Leader (WPL) - or their designee, shall be responsible for:
1. Critical Customer Coordination – responsible for staying abreast of critical customers impacted by system outages, and utilizing this information to prioritize restoration and repair. This includes utilizing available information systems and reports, working with the Critical Customer Coordinator, and communicating with the Distribution Control Center Lead and Resource Operations Director or their designees, to identify and prioritize critical customer issues.
  2. Customer Counts – identifying and prioritizing restoration and crew assignments based upon circuit customer counts.
- (vii) Work Assignment Leader - or their designee, shall be responsible for:
1. First Responders and System Switching – working with the Distribution Control Center to identify resource needs, including single-man and multiple-man truck first responders, and third shift resources to dedicate to emergencies, first response, and switching.
  2. Work Packet Assignment - assigning resources to outage events based on priorities established by the Work Planning Leader.
  3. Public Works – assigning resources to assist local governments with clearing streets and tree removal.
- (viii) Safety Lead – or their designee, shall be responsible for:
1. Passporting – ensure that all internal and external personnel responding to emergencies or outage events are properly passported and administrated.
  2. Safety Oversight – work closely with the Operations Section Chief to resolve all safety issues associated with orientation and qualification of responding resources. Additionally, assist the Operations Section Chief with investigating all safety incidents.
  3. Safety Communications – work with the Operations Section Chief to assure timely reporting of safety messages, operations practices, policy changes, or safety incidents which occur throughout the duration of restoration efforts.
- (ix) Administration

---

## Energy Delivery Storm Incident Command System

1. Resource Management Administrator
    - a. Work Assignment Administration – track circuit assignments to birddogs and line technicians resources;
    - b. Hot Line – answer phones dedicated to the provision of resources to field personnel, including safety, tree trimming personnel, materials, traffic control, locates, and security.
  2. OMS Administrator
    - a. Estimated Restoration Durations – utilize the Storm Management Tool to update OMS with estimated restoration times.
    - b. Crew Assignments – record crew and birddog assignments in OMS (by circuit).
- (b) **PSRT Director** – or their designee, shall be responsible for:
- (i) Overseeing the PSRT functions consisting of the following
    1. Training – ensure that all wire walkers, wire sitters, and service crews are trained once per year. Additionally conduct bi-weekly refresher training for PSRT dispatch teams (Lexington and Louisville) scheduled for on-call.
    2. Activation – activate dispatch and field teams and ensure appropriate tracking of these resources is in place
    3. Execution – monitor execution of wire down coverage, determine if additional resources are needed, and ensure shift rotations are established
    4. Deactivation – support the DCC on clean-up, re-hooks with service crews, and deactivate field and back-office personnel as volume decreases.
  - (ii) LGE and KU PSRT Leaders – or their designee, shall be responsible for:
    1. Process and Software Changes – review processes and make enhancements to ensure more efficient operations. Work with DCC on software changes that impact dispatcher interaction.
    2. Training – conduct training sessions for all PSRT participants and ensure documentation and job aids are current. Track training history in a central repository.
    3. Activation – establish callout procedures and schedules for dispatcher teams. Identify supervisors and managers that are required to assist in identifying field personnel for walking and sitting.
    4. Execution – ensure proper dispatcher resources are available for storm event along with the proper number of field personnel. Utilize a resource team to track all resources and establish appropriate shifts for multi-day events.

## Energy Delivery Storm Incident Command System

5. Deactivation – ensure a deactivation plan is in place and agreed to by the DCC. Ensure adequate resources are available to assist the DCC with clean-up work and re-hooks.

(c) **Distribution Control Center Director** – or their designee, shall be responsible for:

(i) Managing and overseeing operations and control of the Electric Distribution System:

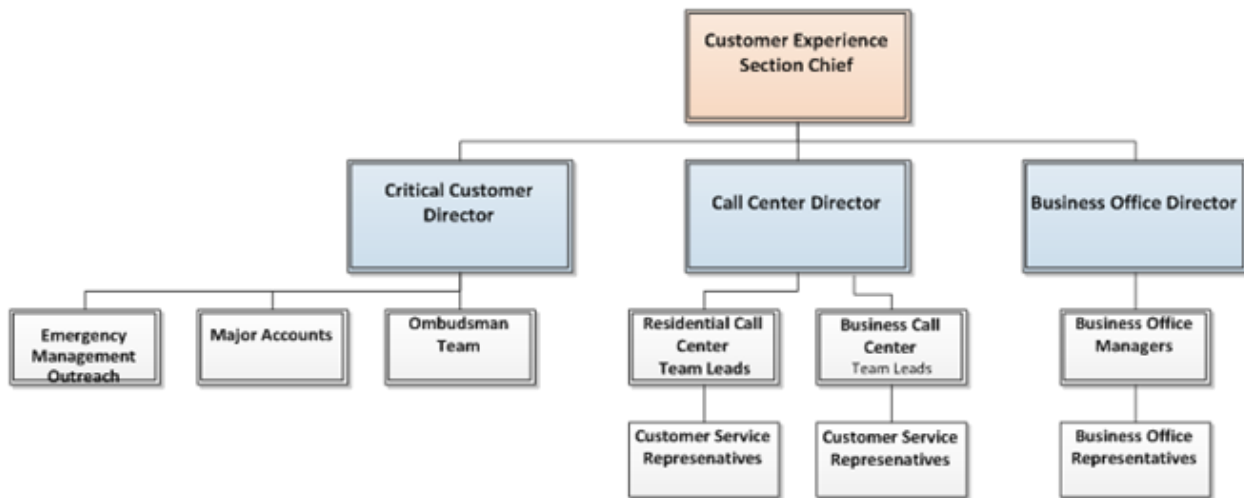

1. Staff – establish schedules to ensure maximum coverage by Restoration Coordinators in all areas for all shift periods.
2. Dispatch – timely dispatching of events from the OMS system.
3. Restoration – safe, efficient restoration of outages through proper prioritization, the identification of damages to distribution facilities and the necessary control to direct restoration before repairs can be made.
4. Switching/Carding – the safe, efficient control of the distribution system to facilitate the safest, quickest restoration.
5. Reports – reporting OMS Data both internally as required but also externally (ex. – KPSC).
6. Collaboration – facilitating the safe, efficient restoration of power in conjunction with the timely collection and reporting of data to support all personnel under the Operations Section Chief.
7. Communication – assimilating necessary information shared between areas (Operation Centers, Transmission, Simpsonville Control Center, Retail, etc) to facilitate the efficient operation of the OMS system which provides operational data back to groups working under the Operations Section Chief.

### ii) **Customer Experience Section**

Although the customer experience is the responsibility of all employees, the Customer Experience Section's main priority is the interaction with affected customers, emergency operation centers, critical customers, local authorities and governmental entities. They will be responsible for taking customer outage and emergency information and entering pertinent data into the appropriate information management systems and funneling other critical information to the appropriate groups within the ICS structure.

---

## Energy Delivery Storm Incident Command System

### (1) Customer Section Chief

The Customer Section Chief has responsibility for coordinating interactions with various customer groups via the Call Center, Ombudsman, Local Offices, or Emergency Operation Centers. This position will ensure consistent messages are being related to customers as well as the Information Officer. The Customer Section Chief will also ensure the various communication channels are working properly and allowing affected customers to identify outages and obtain update information. The Section Chief will also provide critical statistical information to the Incident Commander on an as-needed basis.

(a) **Call Center Director** – or their designee, shall be responsible for activating the various call center locations for handling outage calls from customers as well as maintaining normal communications for non-affected customers. The Call Center Director will establish appropriate shifts and will ensure all Customer Service Representatives (CSRs) are consistent in their communications messages to the customers. The position will also ensure emergency calls are properly elevated within the information systems as well verbally when required. The Call Center Director will also track performance metrics during the restoration event and provide various statistics to the Customer Section Chief to be utilized by the Incident Commander.

---

## Energy Delivery Storm Incident Command System

- (b) **Critical Customer Director** – or their designee, shall have oversight for serving as a customer communications channel for:
- (i) **Emergency Management Outreach (EMO)** – ensuring emergency operations centers are staffed as requested from regional emergency management directors;
    - 1. The EMO Lead’s sole responsibility is to ensure LGE-KU has representation at various EOCs throughout the service territory. This means establishing relationships with EOC points of contact prior to weather events and then staffing these centers when activated. The EMO Lead shall also work with all company personnel to ensure consistent and timely information is being relayed to these centers.
  - (ii) **Major Accounts** – communicating with major customers throughout restoration efforts to ensure timely and accurate information is available to assist customers with making critical decisions;
  - (iii) **Ombudsman Team** - serve as customer communication channel for key accounts, schools, local politicians, etc. whom need specific information and assistance during restoration activities.

The Critical Customer Coordinator shall be responsible for ensuring the group is adequately staffed and will establish the necessary processes to obtain and communicate critical information throughout the ICS and to internal and external customers.

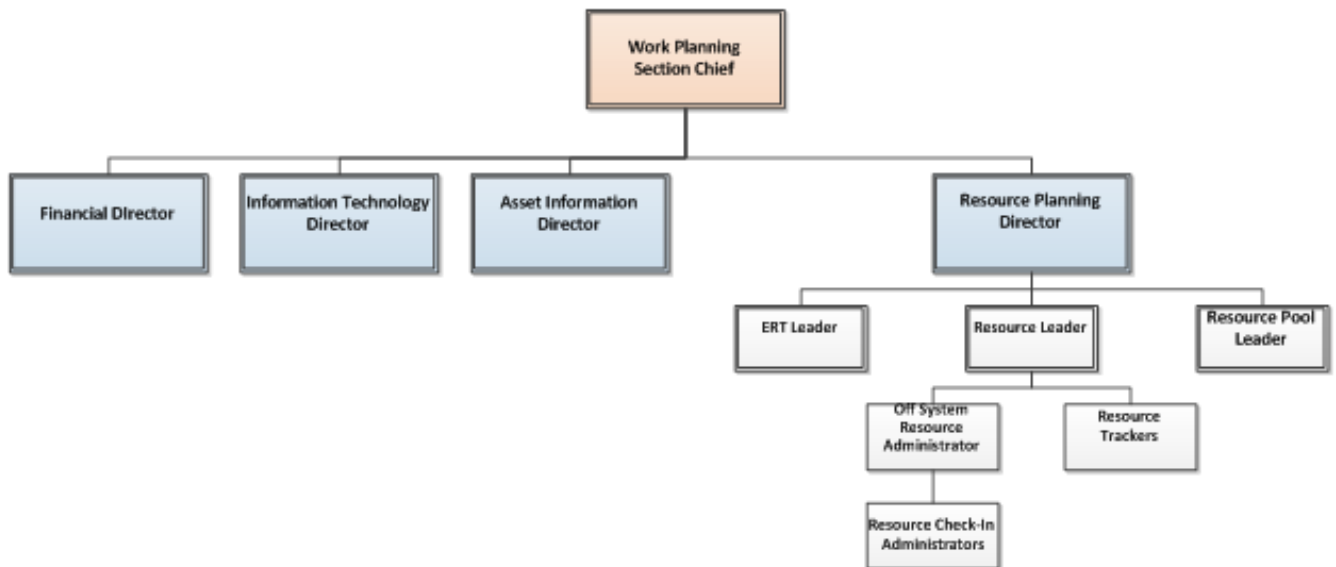

- (c) **Business Office Director** – or their designee, shall be responsible for working with areas affected by outages or emergencies and making local business offices available for customers to provide outage information and obtain updates on their restoration status. Local offices play a critical role in supporting the community especially when communication services have been impacted by the weather event.

### i) Work Planning Section

The Work Planning Section shall be responsible for managing all information relevant to an incident, and assisting the Incident Commander, Operations Section, and Logistic Sections with tracking, documenting, and reporting resources, estimated restoration times, finances, and facility data.

---

## Energy Delivery Storm Incident Command System

### (1) Work Planning Section Chief

The Work Planning Section Chief shall have central responsibility for assuring resources meet outage and system damage needs, are accurately accounted for, and are equitably and strategically distributed. This individual shall also be responsible for tracking and reporting on resources and costs, working with Asset Information and Information Technology. The Planning Chief shall also work closely with the Operations Section Chiefs and Incident Commander to help identify resource needs, and predict restoration durations.

The following positions shall be considered crucial to the Work Planning Section:

- (a) **Resource Planning Director** – or their designee, shall have overall responsibility for:
  - (i) Working with Incident Commanders, Senior Management, and Operations Sections Chiefs to identify resource needs across Energy Delivery based on system damage and predicted restoration durations, and for working with management personnel, mutual assistance groups, and business partners to secure, mobilize, demobilize, and track needed resources.

## Energy Delivery Storm Incident Command System

- (ii) Continuously monitoring Estimated Restoration Times (ERT) to assure adequate and equitable distribution of available resources across service areas as customer outage counts change.
- (iii) Continuously monitoring critical and priority customers to assure ERT are set and adhered to.
- (iv) Establishing a single point of contact for 'off system' resources, when delegated by the Incident Commander.
- (v) Assuring the Logistic Chief Incident Command Structure is provided sufficient data to trigger logistics processes necessary to support restoration resources.
- (vi) Development and maintenance of standard spreadsheets and associated administrative processes, which provide for timely and accurate accounting and reporting of internal and external resources responding to a restoration effort.
- (vii) Assuring the reporting needs of the Work Planning Chief and Financial Director are satisfied, and for working with the Information Technology Director to assure that needed information management systems meet resource planning needs.
- (viii) Developing the Daily Alignment Report (DAR) which highlights overall objectives for the day.
- (ix) ERT Leader - or their designee, shall have overall responsibility for:
  1. Resources - working with the Operations Directors, Operations Resource Rooms, and the Distribution Control Center Directors to establish area specific resource needs and availability, including line technicians, service crews, bird dogs, bull dogs, damage assessors, and post completion inspectors. Also, working with the Resource Transition Leader and Resource Tracking Leader to evaluate and execute alternatives for acquiring resources needed to restore service and repair system damage.
  2. Throughout the restoration effort, responsible for assessing system wide outage counts, damage assessment information, and crew availability data to develop flexible resource allocation plans.
  3. Coordinates with the Operation Directors and Operations Resource Rooms to monitor and modify ERTs at the local area and circuit levels.
  4. Continuously works with the Planning Director, Operations Chiefs, and Operations Directors to assure that proposed and executed resource allocation plans meet operational needs. This includes development of mobilization plans and release schedules for off system resources.
- (x) Resource Leader - or their designee, shall have overall responsibility for:

## Energy Delivery Storm Incident Command System

1. Communications - establishing and maintaining a central point of contact for all off system resources responding to assist, once delegated by an Incident Commander or Operations Section Chief.
  2. Terms and Condition - exchanging critical information with identified available 'off system' resources, including contract, safety, operations, and regulatory requirements and keeping the Resource Planning Director apprised of any conflicts that may eliminate an identified resource from assisting.
  3. Crew Rosters - securing crew and equipment rosters and coordinating data entry into the centralized transition spreadsheet..
  4. Resource Clearing House - serving as a clearinghouse for all offers of assistance by contractors and utilities not engaged by the Company; and, working with the Planning Director and ERT Leader to determine if offered resources are needed and should be secured.
  5. Logistics - communicating reporting locations, directions, contact numbers, hotel and food arrangements, and provision of department of transportation exemptions where applicable for off-system crews. Also, interfaces with Logistics ICS organization to ensure accommodations are in place for lodging, meals, transportation, security, and staging.
  6. Release Schedules - works with the Resource Planning Leader to stay apprised of mobilization and release schedules which may impact off system resources, and assures off system management teams are notified on a timely basis.
- (xi) Resource Tracking Leader - or their designee, shall have overall responsibility for:
1. Resource Data Administration - responsible for maintaining data in the centralized spreadsheets on resident employees and local contract partners that would be utilized in response to customer outages and system damage.
  2. Coordinates with the Operations Resource Rooms to validate existing resources allocated to their work locations.
  3. As assigned by the Planning Director, responsible for working with the Resource Transition Leader and Operations Directors during restoration efforts to administrate and maintain data on internal and external resources assisting with service restoration and system repair.
  4. Executive Report – responsible for compiling the executive report summarizing current outages, resources on hand by classification and other information.

## Energy Delivery Storm Incident Command System

5. Resource Reports – responsible for identifying organizational resource reporting needs and working with Information Technology to develop reports, training tools, and job aids necessary to provide end users timely and easy access during restoration efforts.
  6. Performance Metrics - accountable for development, monitoring, and reporting key performance indicators associated with resource availability and distribution.
- (xii) Resource Pool Leader – or their designee, shall have overall responsibility for:
1. Serving as a repository for resource allocations;
  2. Tracking available and unassigned personnel and business partner resources during restoration efforts;
  3. Working with the Resource Leader to identify resource needs throughout the ICS;
  4. Updating resource rosters to reflect assignments to roles in the ICS.

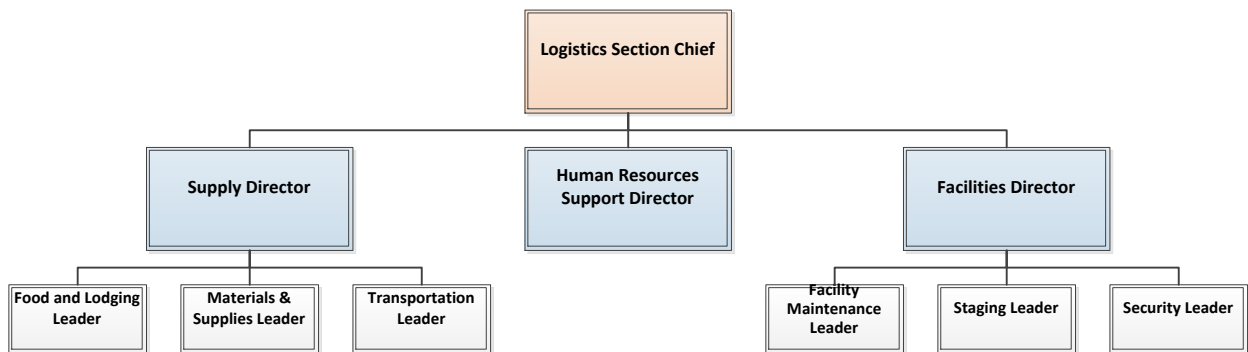

### ii) Logistics Section

The Logistics Planning Section Chief shall have central responsibility for assuring all incident support needs are provided by the Logistics Section. The Logistics Section is responsible for the following:

- Facilities
- Transportation
- Communications
- Security
- Equipment Maintenance and Fueling
- Meals
- Ordering and Distribution Resources and Supplies
- Human Resources and Needs

---

## Energy Delivery Storm Incident Command System

The following positions shall be considered crucial to the Logistics Section:

### (1) Logistics Section Chief

The Logistics Planning Section Chief shall have central responsibility for assuring all incident support needs are provided by the Logistics Section.

The following positions shall be considered crucial to the Logistics Section:

#### (a) Supply Director – or their designee,

(i) shall have overall responsibility for:

1. Working with Incident Commanders, Senior Management, and Operations Sections Chiefs to procure and provide identified material, transportation, equipment, meals, and general supply needs across Energy Delivery.
2. Assuring the Logistic Chief Incident Command Structure is provided sufficient data to trigger logistics processes necessary to support restoration resources.
3. Assuring the reporting needs of the Work Planning Chief and Financial Director are satisfied, and for working with the Information Technology Director to assure that needed information management systems meet resource planning needs.
4. Procurement activities include establishment of commercial terms, billing rates and current insurance forms for external resources being mobilized to the LG&E and KU service territories; securing of adequate Lodging for all affected responding resources in the geographical area of the restoration event; securing of Meals (Restaurants and/or in conjunction with an established Staging Area);

## Energy Delivery Storm Incident Command System

laundry (dependent upon the activation of a (long term) crew staging area); and stationary and mobile fueling.

- (ii) Food and Lodging Leader - or their designee, shall have overall responsibility for coordinating with local restaurants or staging sites to secure adequate meals for labor resources allocated to the restoration effort.
1. The Food and Lodging Leader is responsible for contacting and establishing specific local restaurants, preferably in the area where either work is being performed or where crews are being lodged, in the initial stages of a restoration effort, capable of serving meals to potential external and company crews responding to a restoration event. The duration of this function will be determined by the time needed to support restoration personnel requiring the use of staging areas or as requested by local Operations Management. Food coordinator will ensure the proper use of purchasing cards for payment.
  2. In addition to coordination of food this position is responsible for identifying and securing the appropriate number of hotel rooms, in the appropriate areas of the restoration area, consistent with the number of external crew personnel that are responding to the event. This position will also track the number of rooms available and occupied as well as an expense recap of lodging costs throughout the restoration event and report this information daily to the Data Collection position.
- (iii) Materials/Supplies Leader - or their designee, shall have overall responsibility for:
1. Working with area storerooms and Operations Directors to maintain necessary materials and supplies inventory levels, and keeping material providers advised of projected needs based on reported system damages.
  2. Material management activities include storeroom operations and material logistics. Logistics can be a huge challenge during large-scale events and require coordination of job site delivery and/or the operation of mobile storerooms at established personnel staging areas.
  3. Management of material return processes post restoration.
  4. In the event of a single location restoration effort, the Material Lead function will be performed by a designated person. This lead will be assigned by the Supply Logistics Section Chief and typically be either a

---

## Energy Delivery Storm Incident Command System

local Material Specialist, or Material Supervisor responsible for the impacted storeroom/warehouse.

5. In a multi-site restoration effort,
  - a. A Material Lead will be assigned to each impacted area and oversee the operations of the associated storerooms/warehouses in that impacted area
  - b. Material Leads will be responsible for the material support functions (denoted above) in the assigned area
  - c. A Material Supply Coordinator function will be established to work with the individual Material Leads and all affected suppliers to ensure that an adequate and optimized flow of materials to all affected sites is established and maintained throughout the restoration event.

(iv) Transportation Leader – or their designee, shall have overall responsibility for ensuring adequate transportation and equipment resources are available to respond to restoration efforts, including:

1. Light duty vehicles
2. Heavy duty vehicles
3. Power operated equipment
4. Trailers

The TL shall also be responsible for working with fueling stations and mobile fueling providers, as needed, to ensure adequate fuel is available for vehicles and power operated equipment during emergencies.

**(b) Facilities Director** – or their designee, shall be responsible for ensuring Company facilities are adequately staffed, secured, and maintained during emergency restoration efforts. Additionally, the Facility Director shall be responsible for working with the Incident Commander, Work Planning Section Chief, and Operations Section Chief to identify staging needs, and direct the setting up, monitoring, controlling, and securing of staging areas, as needed.

- (i) Staging Leader - or their designee, shall have overall responsibility for working with the Work Planning Section to identify staging needs, including parking, check-in, pass-porting areas, materials processing, housing, meals, restrooms, and showers. The Staging Leader shall also be responsible for working with the Security Leader to identify security needs for established staging areas.

### **Energy Delivery Storm Incident Command System**

- (ii) Security Leader - or their designee, shall have overall responsibility for overseeing, coordinating, scheduling, and monitoring the security of Company facilities and staging areas during responses to emergencies. The Security Leader shall also be responsible for coordinating job site security where requested from the Operations Section. Finally, the Security Leader shall have oversight over the Continuity Leader.
- (iii) Continuity Leader – or their designee, shall have responsibility for ensuring established business continuity plans are executed for impacted areas throughout responses to emergencies.

**(c) Human Resources Director** – or their designee, shall function as the support mechanism for employees and families of employees who are working on restoration activities, but also have crisis issues at home due to the weather event or emergency. The Human Resources Director will work with various outside entities to provide support to employees' families when in need of basic functions such as food, shelter, and home repairs.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 54**

**Responding Witness: Chris Hermann**

- Q-54. Refer to the Hermann Testimony, page 12, at lines 11 through 17. Provide a copy of the supplier contract with Brownstown Electric Service Corporation, Brown Wood Preserving, and Howard Industries.
- A-54. See attached. Certain information requested is confidential and proprietary, and is being provided under seal pursuant to a petition for confidential treatment.

The attachment is being  
provided in a separate  
file.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 55**

**Responding Witness: Cheryl E. Bruner**

- Q-55. Refer to page 20, lines 19 through 20, of the Hermann Testimony.
- a. Explain whether the 51 residential service center customer service agents referenced therein are all new hires not employed elsewhere by LG&E or KU prior to the addition of the new call center in Morganfield, Kentucky.
  - b. Provide LG&E's share of the annual cost of these 51 employees.
- A-55.
- a. All fifty-one agents were new to working in the residential service center. Forty-six of the new agents were not previously employed by LG&E or KU prior to the addition of the call center in Morganfield. Four of the new agents were working as temporary contractors in the Western Kentucky business offices and one employee transferred to the residential service center from the business office. The positions these five individuals left were all backfilled.
  - b. LG&E's portion of the overall costs from the increased headcount is \$1.518 million of the \$3.336 million total. The \$3.5 million reported is reduced by hiring 14 part time customer service representatives in the latter portion of 2012 to better manage peak call volume.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 56**

**Responding Witness: Cheryl E. Bruner**

Q-56. Refer to the Hermann Testimony, page 21, at Lines 7 through 9, concerning LG&E's and KU's increase of their residential and business service center customer service agents from June 2011 through February 20, 2012 of 25 percent and 59 percent, respectively. Provide the actual numerical increases in residential and business service center customer service agents for the time period mentioned.

A-56. See table below for the number of residential service center customer service agents and business service center customer service agents at the beginning of June 2011 and at February 20, 2012.

Residential Service Center	Customer Service Agents	Customer Service Agent Contractors	Total Customer Service Agents	% Increase from June 2011
Jun-11	98	32	130	N/A
Dec-11	123	27	150	15%
Feb-12*	141	22	163	25%

Business Service Center	Customer Service Agents	Customer Service Agent Contractors	Total Customer Service Agents	% Increase from June 2011
Jun-11	11	6	17	N/A
Dec-11	15	7	22	29%
Feb-12*	25	2	27	59%

\* As of February 20, 2012

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information**  
**Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 57**

**Responding Witness: Cheryl E. Bruner**

- Q-57. Refer to the Hermann Testimony, page 21, at Lines 11 through 21. Concerning the call centers "recent" operational performance, explain what time period this covers.
- a. For the residential calls, provide a breakdown of the wait time for the 20 percent of the residential calls that were not answered within 30 seconds.
  - b. For the business calls, provide a breakdown of the wait time for the 20 percent of the business calls that were not answered within 30 seconds.
  - c. Concerning the 25 percent of the residential calls that were not resolved during the first phone call, provide a breakdown of the number of calls needed to finally resolve all customer issues.
  - d. Concerning the 30 percent of the business calls that were not resolved during the first phone call, provide a breakdown of the number of calls needed to finally resolve all customer issues
- A-57. The time period covered in Hermann Testimony page 21 pertaining to the call centers recent operational performance is January through May 2012.

- a. Refer to the Residential Service Center (RSC) Distributed Service Level Chart below.

RSC Distributed Service Levels					
Seconds	Jan-12	Feb-12	Mar-12	Apr-12	May-12
0 - 30	81.0%	76.5%	83.8%	81.0%	92.4%
30 - 60	4.0%	3.1%	4.2%	2.6%	1.6%
60 -120	4.6%	3.8%	4.0%	2.8%	1.6%
120 - 240	3.8%	4.9%	2.5%	4.0%	1.4%
240 - 300	0.8%	1.8%	0.7%	1.7%	0.4%
300 - 360	0.5%	1.4%	0.4%	1.1%	0.1%
360 - 420	0.4%	1.0%	0.3%	0.8%	0.1%
> 420	1.3%	2.3%	0.8%	2.2%	0.3%
Abandon	3.7%	5.2%	3.2%	4.0%	2.1%

- b. Refer to the Business Service Center (BSC) Distributed Service Level Chart below.

BSC Distributed Service Levels					
Seconds	Jan-12	Feb-12	Mar-12	Apr-12	May-12
0 - 30	79.4%	79.2%	85.8%	89.4%	92.1%
30 - 60	4.7%	5.1%	3.5%	2.4%	2.6%
60 -120	5.7%	5.7%	3.6%	2.3%	2.0%
120 - 240	4.1%	4.1%	2.8%	2.1%	1.2%
240 - 300	0.9%	0.9%	0.6%	0.5%	0.2%
300 - 360	0.7%	0.5%	0.4%	0.2%	0.2%
360 - 420	0.4%	0.4%	0.3%	0.3%	0.1%
> 420	1.1%	0.9%	0.7%	0.8%	0.2%
Abandon	3.1%	3.3%	2.5%	2.0%	1.5%

- c. First call resolution is measured through a transactional survey where a random sample of customers is asked whether their issue/question was resolved and how many times the customer called about the same issue. For the period in question, the average number of calls needed to resolve the concerns of customers who indicated that more than one call was needed was 2.5.
- d. First call resolution is measured through a transactional survey where a random sample of customers is asked whether their issue/question was resolved and how many times the customer called about the same issue. For the period in question, the average number of calls needed to resolve the concerns of customers who indicated that more than one call was needed was 2.5.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 58**

**Responding Witness: Sidney L. "Butch" Cockerill**

- Q-58. Refer to page 25 of the Hermann Testimony. Provide a detailed description of the review performed by the Billing Integrity group which resulted in the creation of the Tariffs and Rates Analyst group and the Business Continuity and Data Integrity group with 10 new employees at an annual cost of \$800,000.
- A-58. Billing Integrity conducted a detailed review of the billing organization with the primary goal of continuing the recent advancements made in improving the customer experience resulting from accuracy of customer's bills and the processes associated with resolving customer billing issues. Additionally, the review evaluated the current organizational structure and made recommendations regarding how the department could improve its overall performance by tracking, monitoring, and understanding the more granular data that is now available since the implementation of CCS. From this review three main themes were identified that had a direct result in the establishment of these groups.
1. The majority of the departmental work is routine; however, extensive "on the job" training is needed before a person becomes proficient with the billing processes and gains an understanding of the billing components and tariffs governing the customer's bill.
  2. The department desired to establish several key operating metrics specific to these routine processes to ensure efficiency, proficiency and accuracy.
  3. Some of the large commercial and industrial customer rate structures can be complex and require highly trained personnel that can focus on implementation and training of associates.

The Billing Continuity and Data Integrity group was established to develop performance metrics to manage departmental and individual performance, identify employee training needs, develop root cause analysis, and resolve process impediments. The Tariffs and Rates Analyst group was established to research complex billing adjustments, assess the implications of current and proposed rate structures on the customer's bill and ensure employees receive the training needed to understand existing and proposed rates.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 59**

**Responding Witness: Chris Hermann**

- Q-59. Refer to page 31, lines 8 through 9, of the Hermann Testimony.
- a. Provide a breakdown, by job function, of the 100 additional employees hired by "Energy Delivery" since the test year in LG&E's and KU's most recent general rate cases.
  - b. Provide LG&E's share of the annual cost of these 100 employees.

- A-59. a. The breakdown of the 100 net positions since the most recent general rate cases is as follows:

<u>Job Function</u>	<u>Number of Positions</u>
Call Center	59
Business Office	9
Marketing	1
Billing	4
Electric & Gas Operations	15
Gas Control & Storage	4
Energy Efficiency	5
Staffing	1
Security	1
Intern	1
Total	100

- b. The LG&E share of the annual wage and burden costs of these 100 positions is approximately \$4.0 million.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 60**

**Responding Witness: Chris Hermann**

Q-60. Refer to the Hermann Testimony beginning on page 15 regarding customer-owned service risers. Explain what customer classes own the gas service risers with the problem compression fittings.

A-60. Customer classes that own gas service risers not incorporating an anti-pullout design include:

1. Residential Gas Service
2. Volunteer Fire Department Service
3. Firm Commercial Gas Service
4. Firm Industrial Gas Service
5. As-Available Gas Service
6. Firm Transportation Service

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 61**

**Responding Witness: Kent W. Blake**

Q-61. Refer to page 10, lines 9 through 13, of the Testimony of Kent W. Blake ("Blake Testimony"). Explain why LG&E made a change in auditors.

A-61. Following the acquisition of LG&E and KU Energy LLC (LKE) and its subsidiaries, including LG&E, PPL's audit committee approved the engagement of PricewaterhouseCoopers LLP (PwC) as independent accountant for LKE through completion of its procedures regarding the financial statements of the Companies as of December 31, 2010 and for the period from November 1, 2010 through December 31, 2010. PwC was the independent accountant of the Companies prior to the acquisition of LKE. PPL's independent accountant, Ernst & Young LLP (E&Y), has expressed reliance on PwC's audit opinion relating to the financial statements of LG&E as of December 31, 2010 and for the period from November 1, 2010 through December 31, 2010 in E&Y's audit opinion on the financial statements of PPL as of and for the year ended December 31, 2010. This E&Y audit opinion was included in the Form 10-K of PPL for the year ended December 31, 2010, which Form 10-K was filed on February 25, 2011.

On February 23, 2011, PPL's audit committee appointed E&Y as the independent accountant for the Companies for 2011. As a result, PwC was dismissed by PPL as independent accountant for LG&E on February 23, 2011 subject to completion of its procedures on the financial statements of LG&E as of December 31, 2010 and for the period from November 1, 2010 through December 31, 2010. PwC's dismissal was completed on February 25, 2011, the date of filing of PPL's Annual Report on Form 10-K for the year ended December 31, 2010, as described in the preceding paragraph.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**Response to Commission Staff's Second Request For Information  
Dated July 31, 2012**

**Case No. 2012-00222**

**Question No. 62**

**Responding Witness: Valerie L. Scott**

- Q-62. Refer to line 1 on page 1 of 3 of Blake Exhibit 1. Provide a detailed description of any expenses directly charged, or allocated to, LG&E during the test year by LG&E and KU Energy LLC, PPL Corporation or any other affiliate within the PPL system.
- A-62. See attached. All charges are directly or indirectly charged in compliance with the CAM, located at the filed schedule required by 807 KAR 5:001 Section 10(6)(t) in the original filing.
