REQUEST:

Referencing pages 13-15 of Mr. Schneider's testimony regarding the CAM, and the CAM provided at Exhibit JLS-1, address the following:

a. Compare the CAM from the prior rate case to the current rate case, and identify and describe all changes in assumptions, methods, allocation process, changes in allocation factors, changes in the number and type of entities receiving allocated costs, and identify new types of costs that are being allocated.

b. Regarding the previous question, compare and quantify the impact of all changes on Atmos operations from the prior rate to the current rate case by cost element or account number and provide the impact on the related revenue requirements of this rate case.

RESPONSE:

a) There have been no changes in the methodology of cost allocation as described in the CAM since the prior rate case. Please see the Company's response to OAG DR No. 1-082 for allocation factors for the past five fiscal years. The Company sold its utility operations in the states of Illinois, Iowa and Missouri on August 1, 2012 and its utility operations in the state of Georgia on March 31, 2013, so these entities are no longer receiving allocated costs.

b) Please see the Company's response to OAG DR No. 1-082, which shows the Company's allocation factors for the past five fiscal years and how they have changed.

Respondent: Jason Schneider

REQUEST:

Address the following regarding operating expenses, depreciation, income taxes, and rate base component costs allocated/assigned or charged to Atmos from the Division General Office, SSU, and other affiliates/parent company. This includes (but is not limited to) the Kentucky/Mid-States General Office, Shared Services Unit, each of the other five Atmos gas operating divisions, the operations in all eight states, the Texas intrastate pipeline, Atmos Energy Holdings (Delaware), Blueflame Insurance Services (Bermuda), and all other affiliates/parent company. Address the following for each of the periods FYE September 30, 2010, FYE September 30, 2011, FYE September 30, 2012, the base period (provide actual and forecasted amounts), and the fully forecasted test period.

a. For each of the previously cited affiliates/parent company (and all others), provide the amount of expenses and capital costs (by account number and account description) that are allocated, assigned, or charged to Atmos for each of the previously identified periods.

b. For all charges to Atmos by previously identified affiliates/parent company for each of the previously identified periods, identify the related services and products provided to Atmos and explain why the amount of these charges to Atmos have changed over these periods, and provide related supporting documents and calculations.

c. For all charges to Atmos by previously identified affiliates/parent company for each of the previously identified periods, explain if these charges are reflected at the lower of cost or fair market value and provide supporting documentation for Atmos" conclusions. Explain why these charges should not be reflected at the lower of cost or fair market value.

d. For all charges to Atmos by previously identified affiliates/parent company for each of the previously identified periods, provide all calculations and supporting documentation prepared by Atmos (and its affiliates/parent company) which compares the cost of these services from affiliates/parent company to the fair market value cost of these services from non-affiliate/third party vendors. Provide all related studies and supporting documentation and calculations.

e. For all charges to Atmos by previously identified affiliates/parent company for each of the previously identified periods, explain if Atmos has sought a competitive bid or issued a request for proposal for these same or similar services from non-affiliate/third party vendors, and explain why or why not. Provide copies of all competitive bids and RFPs, and explain why the non-affiliate/third party vendor was not selected or used by Atmos.

f. For all charges to Atmos by previously identified affiliates/parent company for each of the previously identified periods, provide all supporting documentation and calculations which explains and shows why these charges are reasonable, prudent, and fair.

RESPONSE:

a) Please see Attachment 1.

b) The services provided to our Kentucky operations include our corporate Shared Services (Accounting, Legal, Human Resources, etc.), the Kentucky/Mid-States Division General Office (Div 091) which includes the Division Management team and other services specific to the companies within the Kentucky/Mid-States Division and Blueflame Property Insurance, which provides property insurance services to all of the utility companies of Atmos Energy Corporation including our Kentucky operations. The difference to the amounts allocated to Kentucky from the parent company/division office from year to year will be the result of the expenses incurred by the parent company/division office for that year as well as changes to the amounts used to calculate the composite allocation factors for that year.

c) A study has not been performed regarding whether or not the services provided by our Shared Services Division to our business units is at the lower of cost or fair market value. The majority of our Shared Services costs (approximately 65% for Fiscal 2012) are for employee labor and benefits. The Company's base pay philosophy is to target base pay at the 50th percentile of the market. The base pay program provides pay ranges that are competitive with the job market. Regarding Blueflame Insurance Services, our broker provides us with benchmarking of what other utilities are paying for the same or similar services. By using Blueflame for our property insurance needs, the Company does not have to pay commissions and benefits due to the minimal overhead costs as compared to traditional third party insurance companies and the fact that Blueflame Insurance Services does not look to make a profit. Blueflame also offers some coverages that third party insurance companies will not provide us.

d) Please see the response to subpart (c).

e) Please see the response to subpart (c).

f) Please see the allocation methodologies discussed in the Cost Allocation Manual attached as Exhibit JLS-1 to Mr. Jason Schneider's Direct Testimony.

REQUEST:

Address the following regarding expenses, depreciation, income taxes, and rate base component costs allocated/assigned or charged to Atmos from the Division General Office, SSU, and other affiliates/parent company. This includes (but is not limited to) the Kentucky/Mid-States General Office, Shared Services Unit, each of the other five Atmos gas operating divisions, the operations in all eight states, the Texas intrastate pipeline, Atmos Energy Holdings (Delaware), Blueflame Insurance Services (Bermuda), and all other affiliates/parent company. Address the following for each of the periods FYE September 30, 2010, FYE September 30, 2011, FYE September 30, 2012, the base period (provide actual and forecasted amounts), and the fully forecasted test period.

a. Provide the amount of all charges to Atmos by previously identified affiliates/parent company that is included in the fully forecasted test period and compare this to the most recent actual twelve month amounts for each affiliate/parent company, and explain the reasons for variances and the amounts included in the fully forecasted test period (and provide related supporting documentation and calculations).

RESPONSE:

Please see Attachment 1 to the Company's response to AOG DR No. 1-154, which includes the Company's most recent 12 month period ending July 31, 2013. Please see Attachment 1 for a comparison of the Base Period to Test Period for allocated charges and explanations of variances.

ATTACHMENT:

ATTACHMENT 1 - Atmos Energy Corporation, OAG_1-155_Att1 - Comparison to Test Year.xlsx, 1 Page.

Respondents: Jason Schneider, Josh Densman, and Greg Waller

Atmos Energy Corporation
Comparison to Test Year

Account	Account Description	Base Period (actuals)	Test Year (forecasted)	variance	% chg	footnote
	Direct O&M	14,593,405	13,685,601	-907,804	-6%	1, 2

4030	Depreciation Expense transferred-from SSU div 2	722,186	0	-722,186		
4030	Depreciation Expense transferred-from SSU div 12	745,612	0	-745,612		
4060	Amortization of gas plant acquisition adjustments	65,098	0	-65,098		
	Total Amortization and Depreciation	14,479,767	16,518,181	2,038,413		

Footnotes:

1	affiliate Blueflame Insurance (included in Direct O&M above)	154,652	74,698	-79,954	

2 Overall direct O&M expenses are expected to decrease predominately due to a decreased budget for outside services.

3 Subsequent to the sale of our Georgia operating division, allocations from KY-Midstates Division Office to Kentucky increased from approximately 41.35% to 50.00%.

4 Subsequent to the sale of our Georgia operating division, allocations from SSU division 2 to Kentucky increased from approximately 5.33% to 5.55%.

5 Subsequent to the sale of our Georgia operating division, allocations from SSU division 12 to Kentucky increased from approximately 5.61% to 5.72%.

6 From July 2013 to Nov 2014, planned capital expenditures are for approximately $55.8 million, an increase that drives depreciation expense upward as well.

REQUEST:

Explain if Atmos has compared its General and Administrative (G&A) costs or overhead costs (or using General and Administrative costs as a surrogate for overhead costs) to the similar or same costs of other similarly sized or situated utilities, and explain if Atmos' G&A costs or overheads are less than or greater than those of these other utilities. Provide all supporting studies, documentation and calculations. Otherwise, provide all related supporting documentation which Atmos relies upon if it believes its G&A or overheads costs are equal to or less than those of similar utilities.

RESPONSE:

No studies of General and Administrative costs as compared to similar utilities has been performed.

Respondent: Jason Schneider

REQUEST:

Referencing page 10 (line 17) of Mr. Napier's testimony, he states that the forecasted test period capital projection is $44.22 million (from December 1, 2013 to November 30, 2014). Also, refer to Atmos" response to Staff RFI Set No. 1, Question 1-20 (Staff_1-20_Att1 " Plant Data) which shows a different amount of forecasted test period capital plant additions of $42.3 million, along with base period projected plant additions of $44.6 million.

a. Explain or confirm that the forecasted capital costs of $44.22 million is for projected capital costs from December 1, 2013 to November 30, 2014, or explain if this is for a different period. Explain if this represents the "actual" or "monthly" average amounts. Provide supporting documents (or cite to documents, including Schedule B) showing the $44.22 million projected capital plant by primary and detailed account.

b. Atmos" response to Staff RFI Set No. 1, Question 1-20 (Staff_1-20_Att1 " Plant Data) shows an amount that appears to be the forecasted period capital costs, except page 4 of this response shows total forecasted period gross capital plant of $42.3 million (and forecasted retirements of $6.3 million) instead of the forecasted period gross capital plant of $44.22 million identified at Mr. Napier"s testimony. Explain if the response to Staff Question 1-20 is correct and explain the reasons for the difference between $42.3 million and $44.22 million and provide supporting documents and calculations showing a proper reconciliation (or cite to existing documents).

c. Confirm that the $44.22 million is "gross" forecasted capital plant which is before any reduction for forecasted retirement amounts, and provide the related forecasted retirement amounts and related supporting documents which reconciles to the $6.3 million of forecasted retirements provided in response to Staff Question 1-20.

d. Atmos" response to Staff RFI Set No. 1, Question 1-20 (Staff_1-20_Att1 " Plant Data) at page 2 of 4 appears to shown an amount of gross forecasted capital plant of $44.6 million related to the "base period" (from August 1, 2012 to July 31, 2013), along with $8.9 million of related retirements. Explain and reconcile these base period gross capital plant additions and related retirements to Atmos" workpapers and provide related supporting documentation and calculations.

e. Confirm that the total "forecasted plant additions" included in rate base is about $86.9 million ($44.6 for base period plus $42.3 million for forecasted period) per Atmos" response to Staff Question 1-20, or provide the correct amount along with all reconciliations and related supporting documents and calculations.

RESPONSE:

a) The $44.22 million projected capital costs for the test period of December 1, 2013 through November 30, 2014 as referenced in the Direct Testimony of Mr. Earnest Napier correctly represents total allocated additions, including allocations from divisions 2, 12 and 91. The amount of $42.32 million responding to "Staff_1-20_Att1 - Plant Data" represents the direct Kentucky division 9 total only. These amounts represent a total of twelve individually forecasted months; it does not represent monthly averages. Support for capital additions is provided in the attached version of workpaper "KY Plant Data" that was also provided in the Company's response to Staff DR No. 1-59. Please note that this copy of workpaper KY Plant Data replaces the previous copy submitted for Staff DR No. 1-59 because the prior version has been found to be a corrupted file. Support for allocation factors can be found in Schedules B-2 B and B-2 F for the Base and Test periods, respectively.

b) Please see the response to subpart (a).

c) $44.22 million is the fully allocated gross forecasted additions to capital plant for the test year. Related retirement amounts are supported by workpaper "KY Plant Data" that was provided in the Company's response to Staff DR No. 1-59. The $6.3 million of forecasted retirements during the test period relates solely to division 9, consistent with the $42.32 million of additions for the same period for division 9 in the Company's response to Staff DR No. 1-20. Gross additions and retirements by division for the test year are as follows:

Division	Total Additions	Allocated Additions	Total Retirements	Allocated Retirements
Div 2	19,729,990	1,095,089	(1,207,649)	(67,029)
Div 12	4,603,343	263,212	(184,709)	(10,561)
Div 91	1,112,226	556,151	(1,207,770)	(603,926)
Div 9	42,316,581	42,316,581	(6,297,064)	(6,297,064)
Total	67,762,139	44,231,032	(8,897,193)	(6,978,580)

d) Please refer to workpaper "KY Plant Data" that was provided in the Company's response to Staff DR No. 1-59. The Base Year and Test Year balances tie directly to Schedules B-2 B and Schedules B-2 F. Schedules B-2 B and Schedules B-2 F tie directly to the Plant in Service component of Schedule B-1 Rate Base Summary. Gross additions and retirements by division for the base year are as follows:

Division	Total Additions	Allocated Additions	Total Retirements	Allocated Retirements
Div 2	11,083,451	591,249	(2,799,204)	(149,324)
Div 12	78,201,627	4,386,429	(97,255,523)	(5,455,187)
Div 91	633,753	262,075	(2,125,693)	(879,035)
Div 9	44,627,891	44,627,891	(8,863,895)	(8,863,895)
Total	134,546,722	49,867,645	(111,044,315)	(15,347,442)

e) Total additions to rate base, including both actual and forecasted, for the base period is $44.6 million and the forecasted additions for the test period is $42.32 million for division 9 only (direct Kentucky). Both of these amounts confirm amounts stated in the question. However, there is also an interim period of four months between the base period and the test year that will have forecasted additions of $13.4 million for division 9. Please refer to workpaper "KY Plant Data" that was provided in response to Staff DR No. 1-59 for support.

Respondents: Greg Waller and Earnest Napier

REQUEST:

Referencing page 10 (line 17) of Mr. Napier's testimony, he states that the forecasted test period capital projection is $44.22 million, consisting of the three components of: 1) direct spending for Kentucky; 2) allocated from Division's General Office; and 3) allocated from SSU. Also, refer to Atmos" response to Staff RFI Set No. 1, Question 1-20 (Staff_1-20_Att1 - Plant Data) which shows a different amount of forecasted test period capital plant additions of $42.3 million, along with base period projected plant additions of $44.6 million.

a. Provide the proper amount of the forecasted period plant additions and base period plant additions (along with related retirement amounts) by account number and account description, and show these plant additions and retirement amounts allocated between "Plant in Service", "CWIP" and other categories in rate base (and provide appropriate cites to Schedule B).

b. Provide the proper amount of the forecasted period plant additions and base period plant additions (along with related retirement amounts) by account number and account description, and show these plant additions and retirement amounts by primary account and identify amounts between: 1) direct spending for KY; 2) allocated from Division General Office; and 3) allocated from SSU.

c. Shows amounts in the prior question for forecasted period plant additions and base period plant additions (along with related retirement amounts), by account number and account description as prioritized between the capital expenditure categories identified page 6 of Mr. Napier's testimony related to: 1) Public Safety; 2) System Capacity and Reliability; 3) Customer Growth; 4) Facilities Maintenance; 5) Public Works; and 6) Support of Long Term Technological Programs.

d. Shows amounts in the prior question for forecasted period plant additions and base period plant additions (along with related retirement amounts), by account number and account description as allocated between "growth" and "nongrowth" capital expenditures as addressed at page 7 of Mr. Napier's testimony.

e. Regarding the previous question, show projected revenues (by account number) for each category of "growth" related capital expenditures for both the base period and forecasted test period, and explain why these revenue amounts have not been included in the base period or forecasted period revenue requirements, and provide all related supporting documentation and calculations for determining the revenue amounts including calculations based on historical results.

f. If Atmos did not include revenues for "growth" related capital expenditures in the "base" period or "forecasted" test period, then explain why it is reasonable to include "growth" related capital expenditures in the revenue requirement without including or matching this with the related revenues.

RESPONSE:

a) Please see the Company's response to OAG DR No. 1-157 regarding the proper amounts of allocated plant additions for the test and base periods. For a listing of CWIP, additions, and retirements by account and account description, please refer to the workpaper "KY Plant Data" that was provided in the Company's response to Staff DR No. 1-059. The Base Year and Test Year balances tie directly to Schedules B-2 B and Schedules B-2 F. Schedules B-2 B and Schedules B-2 F tie directly to the Plant in Service and Construction Work in Progress components of Schedule B-1 Rate Base Summary.

b) Please refer to workpaper "KY Plant Data" for additions and retirements by primary account. Schedules B-2 B and Schedules B-2 F can be referenced for base and test year balances by period end and by 13 month averages, and by plant account. Schedules B-2 B and Schedules B-2 F also reflect the direct spending for Kentucky as well as amounts allocated from Shared Services and the Division General Office.

c) Please reference the workpaper "KY Plant Data" that was provided in the Company's response to Staff DR No. 1-59. While there is not a direct correlation between the prioritization referenced in Mr. Earnest Napier's Direct Testimony and the Company's budget categories, in general, projects relating to public safety and system reliability are budgeted in System Integrity, projects relating to system capacity and reliability are budgeted in System Improvement, projects relating to customer growth are budgeted in Growth, projects relating to facilities are budgeted in Structures, projects relating to public works are budgeted in Public Improvements, and projects relating to support of long term technological programs are budgeted in Information Technology.

d) Please see the response to subpart (c). "Growth" is budgeted in the Growth budget category. All other budget categories are "non-growth".

e) The level of growth capital in the forecast is consistent with recent years' experiences. As noted in the Direct Testimony of Mr. Mark Martin, the revenue forecast is also based upon recent "net" customer count changes for residential, commercial and public authority class customers. Known changes (including additions) were included in the revenue forecast for industrial sales and

transportation customers. Thus, additional customers and volumes expected to materialize from growth capital projects have been included in the revenue forecast.

f) Please see the response to subpart (e).

Respondents: Earnest Napier and Mark Martin

REQUEST:

Referencing page 6 (lines 20-23) and page 7 (lines 1-2) of Mr. Napier's testimony, he states that any expenditure above targeted levels must be justified. Also, he states that individual projects and the construction program as a whole are assessed on the basis of their return on investment, return on equity, cost of capital, cash flow, new business forecasts, and various capital overheads such as labor, benefits, and inflation.

a. Regarding the amount of forecasted plant additions included in the "base" period and the "forecasted" test period, provide the return on investment (ROI), return on equity, cost of capital, cash flow, and new business forecasts, ranking each project from the highest ROI to the lowest ROI. If possible, identify these projects between "growth" and "nongrowth" plant additions and by primary account number. Also, if possible, identify these projects between the categories of: 1) Public Safety; 2) System Capacity and Reliability; 3) Customer Growth; 4) Facilities Maintenance; 5) Public Works; and 6) Support of Long Term Technological Programs.

b. Provide the same information for the previous question for all forecasted amounts included in CWIP for the "base" period and the "forecasted" test period.

c. Explain if the forecasted plant additions for the "base" period and the "forecasted" test period represents amounts above the "targeted" level and must be justified, and identify the specific "targeted" level.

d. Explain if the return on investment (ROI), return on equity, cost of capital, cash flow, and new business forecasts for forecasted amount included in the "base" period and the "forecasted" test period is impacted by the amount of rate relief and related rate increases that will be granted in this rate case and explain how the ROI, ROE, cost of capital, cash flow and new business forecasts for these capital projects are impacts by varying levels of rate relief.

RESPONSE:

a) The testimony referred to in the question is in relation to financial criteria referenced in approving a project during the capital budgeting process. The capital budgeting process does not produce the requested ranking as part of the process. The reference in Mr. Earnest Napier's Direct Testimony to the construction program as a whole takes into account the numerous jurisdictions in which Atmos Energy serves. References to expected return on investment and equity, cost of capital and cash flow pertain to the fact that Atmos Energy strives to invest more heavily in jurisdictions where the Company has achieved

implementation of regulatory mechanisms that permit a more rapid recovery of investment in rates such as the PRP program in Kentucky.

b) Please see the response to subpart (a).

c) Please see the response to subpart (a). As the testimony is a reference to the capital budgeting process, by necessity the resulting individual projects fit within the overall capital budget target level.

d) The requested analysis was not performed; however, the Company does agree that the outcome of this case will have an impact on the overall financial performance of Atmos Energy's Kentucky operation. Please see the response to subpart (a).

Respondent: Earnest Napier and Greg Waller

REQUEST:

Referencing page 10 (line 17) of Mr. Napier's testimony, he states that the forecasted test period capital projection is $44.22 million. Also, Atmos' response to Staff RFI Set No. 1, Question 1-20 (Staff_1-20_Att1 " Plant Data) shows a different amount of forecasted test period capital plant additions of $42.3 million, along with base period projected plant additions of $44.6 million, for total forecasted plant additions of $86.9 million for these two periods. In addition, forecasted CWIP amounts would add another $8 million to capital expenditures for each year, bringing forecasted amounts to greater than $50 million per year for the base period and forecasted period. Finally, Atmos' response to Staff RFI Set No. 1, Question 1-13, EBN-2, Schedule 13b, shows the actual highest capital expenditure from 2003 to 2012 was $37.8 million in 2012 and the highest two-year capital expenditure was 2011 and 2012 with $60.1 million.

a. Because Atmos' forecasts for the "base" period and the "forecasted" test period show capital expenditures for each period exceeding $50 million, (including plant in service and CWIP), and the highest annual capital expenditure in the past 10 years is $37.8 million in 2012 and the recent 5-year average is $24 million per year, explain how Atmos intends to fund and pay for projected capital expenditures exceeding $100 million over the two successive periods ending November 30, 2014. Provide all cash flow analysis, supporting documentation, and calculations to show that Atmos can afford to fund the projected capital additions included in this rate case.

b. Explain if Atmos will use existing loans from ouside entities, loans or credit arrangements from affiliates, or will seek new loans from outside entities or affiliates to pay for the increased capital expenditures. Provide the amount of all anticipated new loans or infusion of equity that Atmos will use to pay for increased capital expenditures and explain if these amounts have been forecasted in the base period or forecasted test period and provide a reconciliation of these amounts to be used for increased capital expenditures.

c. Explain if the amount of rate relief granted in this rate case ($13.4 million total possible) will impact Atmos' ability to fund and pay for the projected "base" period and "forecasted" test period capital plant additions included in this rate case. If the answer is "yes", provide the amount of forecasted "base" period and "forecasted" test period capital plant additions that Atmos would construct or spend depending upon different levels of rate relief that is granted.

d. Explain if Atmos will spend or construct the amount of forecasted plant additions included in the forecasted "base" period and "forecasted" test period capital even if it does not receive any rate relief in this rate case.

e. Explain which operating expenses can be cut or reduced in order to assist in financing the anticipated significant increase in capital expenditures.

RESPONSE:

a) The Company does not accept the premise stated in the question that spending will be greater than $50 million per year; however, the Company does acknowledge that additional funds will be spent on the pipeline replacement program, as further described in the Direct Testimony of Mr. Earnest Napier. Please see the Company's response to OAG DR No. 1-157 for a reconciliation of the correct amounts shown in Mr. Earnest Napier's Direct Testimony as compared to Attachment 1 to the Company's response to Staff DR No. 1-20 (Plant Data). Please see the Company's response to Staff DR No. 2-35 for information regarding the Company's upcoming financing plans. Please see cash flow statements submitted in response to FR_16(12)(h)(3) for the impact of the Company's proposed capital spending.

b) Please see the Company's response to Staff DR No. 2-35.

c) Yes. However, the requested analysis has not been performed. Please see the Company's response to OAG DR No. 1-159 subpart (d).

d) As indicated in the Company's response to OAG DR No. 1-159 subpart (d), the Company does agree that the outcome of this case will have an impact on the overall financial performance of Atmos Energy's Kentucky operation; however, the impact on the specific capital spending would depend on what the overall final result of the case would be in this proceeding. Since the final result is not known, the Company cannot respond; however, Atmos Energy will always make required capital expenditure necessary to protect public safety and system reliability in accordance with federal, state and local regulations and laws.

e) As indicated in the response to subpart (a), the Company does not accept the premise that capital expenditures are increasing by the magnitude indicated in the question. The Company's operating expense budgets correctly forecast the level of expenses needed to operate the system safely and effectively, therefore cutting or reducing operating expenses to assist in financing capital expenditures does not make logical sense.

Respondent: Greg Waller

REQUEST:

Explain why Atmos has significantly increased the amount it plans to spend on plant additions in this rate case compared to its actual construction history, and provide related supporting documentation.

RESPONSE:

The single largest contributor to the recent increase in the rate of capital investment planned by the Company is the Pipe Replacement Program (PRP), which was established in Case No. 2009-00354 and has made it financially viable for the Company to accelerate the rate at which it replaces bare steel pipe and related distribution facilities. In addition, please reference the Direct Testimony of Mr. Greg Waller on page 6 lines 1-5 and Mr. Earnest Napier for a description of the capital projects in which the Company plans to invest over and above historical run rates.

Respondent: Mark Martin

REQUEST:

If Atmos receives the entire $13.4 million of rate relief in this rate case, but only actually spends 75% to 85% (or less) of its forecasted "base" period and "forecasted" test period plant additions, then explain how customers will be harmed in terms of the rates they pay compared to the anticipated improved service quality and upgraded plant construction that was anticipated by this rate case. Explain what controls are in place to ensure that Atmos spends the amounts included in this rate case, and explain what will happen with funds (how will these funds be used) that are not expended on capital construction as anticipated in this rate case and the related increased earned ROR that this would cause.

RESPONSE:

The Company fully expects to invest in infrastructure consistent with the levels of forecasted investment projected in this proceeding. If for some unforeseen reason the Company's level of investment fell short of these levels, the Company's rates would, other things equal, produce a return on rate base in excess of the approved return. However, unforeseen changes in revenues, operating expenses, cost of capital and other components of cost of service could also differ from the projections in this case and cause the hypothetical investment shortfall to be offset. Therefore, the Company builds its spending and revenue budgets and forecasts using the best information available at the time they are prepared and relies on the numerous internal controls discussed throughout the Direct Testimonies of Mr. Jason Schneider, Mr. Josh Densman and Mr. Earnest Napier to ensure adherence to budgets. The Company notes that, since the inception of its PRP from the final order in Case No. 2009-00354, all PRP investment (or roughly half of the Company's annual capital expenditures in Kentucky) as well as the PRP rider recoveries are subject to the true-up mechanism in that tariff.

The Company raises capital and performs its treasury function at the corporate level for the benefit of the entire Atmos Energy Corporation. Thus, in the event that capital expenditures in Kentucky fall significantly short of budget, the unspent capital would simply result in incrementally smaller capital needs for the Company as a whole.

Respondent: Greg Waller

REQUEST:

Referencing page 10 (line 17) of Mr. Napier's testimony and the related forecasted plant expenditures included in the "base" period and the "forecasted" test period, address the following:

a. Explain why some portion of these forecasted plant expenditures will not decrease maintenance and other operating expenses and also decrease the amount of line loss for gas (and thus possibly reduce gas costs) and explain why Atmos did not include related adjustments in this rate case for these amounts.

b. Provide an estimate of the decrease in maintenance and other operating expenses, along with an estimate in the decrease in costs related to a reduction in line loss, and provide related supporting documents and calculations.

RESPONSE:

a) Please see the Company's most recent PRP filing, Case No. 2013-00304 Exhibit H, for a summary of the O&M savings expected from replacing bare steel pipe and related facilities under the Company's PRP program. Customers receive the benefit of those expected savings though lower PRP surcharge rates. To the extent that replacing aging infrastructure reduces the level of lost and unaccounted for gas, the resulting lower gas costs benefit customers through the GCA mechanism and do not affect the revenue requirement in a general rate case. Thus the Company did not attempt to estimate such savings.

b) Please see the response to subpart (a).

Respondent: Greg Waller

REQUEST:

Provide the amount of forecasted plant additions and related retirements for the "base" period and the "forecasted" test period and address the following.

a. Provide all supporting documentation and calculations to show how "retirements" were determined for the forecasted "base" period and "forecasted" test period, including related historical additions and retirements information that Atmos relied upon.

b. Provide actual plant additions and related retirements by subaccount (in the same level of detail as shown at the response to Staff RFI Set No. 1, Question 1-20, Attachment 1) for FY2011, FY2012 and actual period October 2012 to June 2013. Explain why it is not reasonable to use this actual historical information to calculate forecasted retirement amounts for the "base" and "forecasted" test periods.

RESPONSE:

a) Please see Attachment 1 for the Excel version of workpaper "KY Plant Data.xlsx" that was previously provided in the Company's response to Staff DR No. 1-59 in PDF format.

b) Please see Attachment 2 for plant additions and retirements by account for FY2011, FY2012, and FY2013 (October - June). It is not reasonable to use historical data of plant additions and retirements as the basis for forecasting future retirements because the amounts of future retirements are not related to those of the past.

ATTACHMENTS:

ATTACHMENT 1 - Atmos Energy Corporation, OAG_1-164_Att1 - KY Plant Data.xlsx, 67 Pages.

ATTACHMENT 2 - Atmos Energy Corporation, OAG_1-164_Att2 - Additions and Retirements.xlsx, 3 Pages.

Respondent: Greg Waller

REQUEST:

Provide the amount of forecasted plant additions and related retirements for the "base" period and the "forecasted" test period and address the following.

a. For the periods FY2011, FY2012 and actual period October 2012 to June 2013 provide the actual amount of plant additions and retirements in the "Steel Mains acct. 37601" and the "Plastic Mains acct. 37602" that were "new (not replacing existing mains)" and the amount that were "replacement (replacing existing mains)." And show the number of miles of mains added and retired for both new and replacement.

b. For the forecasted plant additions and retirements included in the "base" period and "forecasted" test period, provide the projected amount of plant additions and retirements in the "Steel Mains acct. 37601" and the "Plastic Mains acct. 37602" that were "new (not replacing existing mains)" and the amount that were "replacement (replacing existing mains)." And show the projected number of miles of mains added and retired for both new and replacement.

c. Explain why Atmos is accelerating the placement new or existing mains in the forecasted amounts in the "base" period and the "forecasted" test period compared to actual recent history.

d. Explain if Atmos is accelerating the placement of new and existing mains in the forecasted amounts in the "base" period and the "forecasted" test period in order to catch up with proper or prudent placement of these mains that should have actually taken place in prior years. Provide all documentation to support or oppose this assertion.

RESPONSE:

a) Please see Attachment 1. All new mains are under the budget category of "Growth," with replacement mains representing other budget categories. The Company is unable to show the number of miles of mains added and retired for both new and replacement, but has provided the number of miles added and retired overall in Attachment 2.

b) The Company does not have the information available for future periods. Please see Attachment 1 for the extent to which the Company is able to break out between "new" and "replacement". Please see Attachment 2 for information regarding the extent to which Atmos Energy is able to break out the number of miles of mains added and retired.

c) In FY2011 (4 months) our PRP filing was $3.4 million.
In FY2012 our PRP filing was $17.9 million.
In FY2013 our PRP filing was $17.3 million.

The Company's initial PRP, which was approved as submitted in Case No. 2009-00354, included 250 miles of aging infrastructure in need of replacement. Subsequent to that case, the Company has determined that an additional 93 miles of main and associated facilities needs to be included in the plan. The Company intends to replace all 343 miles in the original time frame of fifteen years. This change in mileage will dictate an increase in annual spend levels for the duration of the plan.

As stated on Page 17 of Mr. Earnest Napier's Direct Testimony in Case No. 2009-00354, Atmos Energy has been replacing and retiring bare steel pipe in its system since the 1970s.

d) The timeframe (15 years) for the replacement of all aging infrastructure still remains as submitted and approved in Case No. 2009-00354. Please see the response to subpart (c).

ATTACHMENT:

ATTACHMENT 1 - Atmos Energy Corporation, OAG_1-165_Att1 - Asset Activity.xlsx, 1 Page.

ATTACHMENT 2 - Atmos Energy Corporation, OAG_1-165_Att2 - Miles of Main.xls, 29 Pages.

Respondent: Earnest Napier

CASE NO. 2013-00148
ATTACHMENT 2
TO OAG DR NO. 1-165

Atmos Energy Corp., Kentucky
Miles of Mains - From DOT Annual Reports
For Calendar Year 2011 and 2012

	Steel	Plastic	Total
CY11	2,491	1,225	3,716
CY12	2,490	1,264	3,754
Increase(Decrease)	(1)	39	38

REQUEST:

Mr. Napier's testimony at page 10 identifies the amount of the "forecasted" plant additions included in plant in service for the "forecasted" test period, but not the "base" period. Mr. Waller's testimony at page 6 addresses construction work in progress without identifying specific amounts for the base period or forecasted test period.

a. Provide the "forecasted" amount of CWIP included in the "base" period and the "forecasted" test period and provide the supporting documentation and calculations for these amounts, including a list of all projects included in CWIP (show amounts by the plant account number and description where amounts would be recorded when moved to plant in service).

b. For forecasted amounts included in CWIP for the base period and forecasted test period, identify the month and year when these related project amounts would be included in plant in service and provide related supporting documentation and calculations.

c. Explain how Atmos determined whether to include "forecasted" amounts in plant in service or CWIP for this rate case and provide all criteria, analysis, supporting documentation and calculations. Explain the advantages and disadvantages of including "projected" amounts in plant in service or CWIP.

d. Explain if the inclusion of projected amounts in CWIP and the time period when they will be moved to plant in service in this rate case is consistent or inconsistent with the FERC definition of the duration and time/period for including amounts, and provide supporting explanations and documentation.

RESPONSE:

a) Please refer to workpaper "KY Plant Data" provided in the Company's response to Staff DR No. 1-59 for the amounts of forecasted CWIP included in the base and test years. For a list of projects included in CWIP, please refer to workpaper "KY Open CWIP by month" provided in the Company's response to Staff DR No. 1-59 and the Excel version included here as Attachment 1. It is not possible to know in advance of closing a specific CWIP project to Plant in Service, how much and to what plant account will eventually be used.

b) It is not possible to know the specific month and year when forecasted amounts of CWIP will be closed out to plant in service. Please see the testimony of Mr. Waller, page 6 line 13 to page 7 line 3 for a description of how CWIP was forecasted and included in rate base.

c) All CWIP less AFUDC (Allowance for Funds Used During Construction) for divisions 2, 12, 9, and 91 was included. Please see also the response to part b of this request.

d) The Company is unaware of any inconsistency with FERC's definitions regarding the duration and time/period for including cost of construction work in progress.

REQUEST:

Regarding the forecasted plant additions (for plant in service) and forecasted CWIP included in the "base period" and the "forecasted" test period, for each of the "plant in service" and "CWIP" forecasted amounts, show how much of these forecasted amounts were actually constructed and placed in service by July 31, 2013, and show the amounts by account number that reconcile from "forecasted" amounts to "actual amounts in plant in service."

RESPONSE:

Please see Attachment 1.

ATTACHMENT:

ATTACHMENT 1 - Atmos Energy Corporation, OAG_1-167_Att1 - Base Period Plant Adds vs Forecast.xlsx, 1 Page.

Respondent: Earnest Napier and Greg Waller

REQUEST:

For the FYE2012, "base" period, and the "forecasted" test period, show the plant in service, related accumulated depreciation, and net book value for: 1) each plant account that is fully depreciated; or 2) each plant account that is at least 80% depreciated (accumulated depreciation is 80% or more of the gross plant amount). In all cases, explain why depreciation expense should continue, or not continue, to be recorded and accrued on these accounts and provide related supporting documentation. In all cases, explain if the plant is obsolete or if plant additions have not been made to the respective account for similar technology in at least the two most recent years.

RESPONSE:

Please see Attachment 1 for plant accounts that are fully depreciated or more than 80% depreciated at the end of periods of FY 2012, the Base Period, and the Test Period. Explanations are also provided on Attachment 1.

Footnote explanations

1 Please note on Schedule B-3.1 that the Company is not including any depreciation expense in the revenue requirement for this account.
2 Plant continues to be added to this account and it is not fully depreciated, so it remains eligible for continued depreciation.
3 This account is not fully depreciated so it remains eligible for continued depreciation.
4 This account is fully depreciated and no further depreciation expense is appropriate.
5 Plant was added during the base period and therefore remains eligible for continued depreciation.
6 Plant will be added during the test period and therefore remains eligible for continued depreciation.
7 Plant continues to be added to this account so it remains eligible for continued depreciation.

REQUEST:

Provide a current list of the names and number of members of the Board of Directors of Atmos, including the names and positions of all Officers and outside members. Explain if there is a separate or common Board of Directors for Atmos Kentucky operations, the Mid-Tex Division, and each of the six gas utility operating divisions or explain if there is a common Board of Directors for Atmos Energy Corporation that governs all of these divisions.

RESPONSE:

Please see Attachment 1 from the Company's 2012 Summary Annual Report. Please note that Robert W. Best, Executive Chairman of the Board, retired on April 1, 2013. The Board of Directors of Atmos Energy Corporation governs all of the Company's operating divisions. There is no separate Board of Directors for any of the Company's operating divisions.

REQUEST:

With regard to Exhibits MAM-2 and MAM-6, please provide all workpapers, analyses, and detailed explanation of how the "Forward-looking Adjustments To Test Year" presented in Columns (f) and (g) are determined in executable electronic format. Include in this response a detailed explanation of why there are only adjustments to the two usage rate block determinants under Firm Sales (G-1) and not other forward-looking adjustments to the other customer service rate determinants. Please provide in hardcopy as well as in executable electronic Excel format.

RESPONSE:

On Exhibits MAM-2 and MAM-6, the adjustments presented in Columns (f) and (g), as labeled, relate exclusively to customer count growth and usage adjustments due to "conservation and efficiency". The actual numeric adjustments are limited to "conservation and efficiency", which is fully explained in the Company's response to OAG DR No. 1-104.

Respondent: Mark Martin

REQUEST:

With regard to Exhibit MAM-4 (Weather Adjustments), please provide all workpapers, input data, and analyses that support the evaluations shown in Pages 2 through 4 and summarized in Page 1 in executable electronic format. Please also include in this response an explanation and provide all calculations showing how the determinations of each of the usage block level adjustments for Firm Commercial and Firm Public Authority shown in Page 1 were determined from the total adjustments shown in Pages 3 and 4. Please provide in hardcopy as well as in executable electronic Excel format.

RESPONSE:

Please see the Company's response to Staff DR No. 2-28 and the Excel file named "KY Revenue & Billing Unit Forecast.xlsx." On the tabs "Res2010", "Com2010", and "PA2010", the weather adjustment is computed for the 12 month period ending December 2013. Weather data from NOAA is found on source files attached to the Company's response to OAG DR No. 1-172.

The first factor solved in the weather adjustment (using Exhibit MAM-4, page 2 as an example) is the "constant", which is the monthly base load per customer. This factor (1.079 MCF) is the average MCF per customer for the months of July and August. The constant, multiplied by the number of customers each month (column h) yields the monthly class base load MCF. Subtracting the base load from the total yields the total monthly heating load MCF. This heating load divided by customers, produces the heating load per customer each month. Summing the customer heating load per customer for the year and dividing by the actual HDDs for the year computes the "X" coefficient.

The normalized volume each month is as follows:

Customers times (Constant plus the product of X coefficient times normal lagged HDDs). This amount is shown on column (h). The weather adjustment by month represents the normalized volume in column (h) minus actual volume in column (i).

For commercial and public authority customers, normalized volumes are assumed to be in the same proportion as the per books split between billing blocks (shown on Exhibit MAM-1). Spreadsheet calculations of the allocation to blocks is shown in Excel columns X through AJ.

Respondent: Mark Martin

REQUEST:

Please provide the Company's calculations under its Weather Normalization Adjustment (WNA) using heating degree days (HDD) data for the period 1981-2010 referenced at Page 25 (Line 21) through Page 26 (Line 2) of witness Martin's testimony in executable electronic Excel format. In this response provide all inputs, analyses and models sufficient to separate the Company's adjustment.

RESPONSE:

The computation of HDD data for the period 1981-2010 is provided in executable electronic format in Attachment 1. The computation of HDD data for the reference period, the 12 months ending December 2012, is provided in executable electronic format in Attachment 2. For explanation of the weather adjustment reflected in Exhibit MAM-4, please see the Company's response to OAG DR No. 1-171.

REQUEST:

Please provide all source documents, workpapers and analyses that support each of the figures making up the allocation factors for each of the components shown in Exhibit GKW-1, Page 1, and for the allocation factors presented in Exhibit GKW-1, Page 2 in executable electronic format as appropriate. Please provide this response in hard copy as well as in executable electronic Excel format.

RESPONSE:

Please see Attachment 1 through Attachment 4.

ATTACHMENTS:

ATTACHMENT 1 - Atmos Energy Corporation, OAG_1-173_Att1 - Alloc Factor Support Plant.xlsx, 21 Pages.

ATTACHMENT 2 - Atmos Energy Corporation, OAG_1-173_Att2 - Alloc Factor Support Customers.xlsx, 7 Pages.

ATTACHMENT 3 - Atmos Energy Corporation, OAG_1-173_Att3 - Alloc Factor Support O&M.xlsx, 28 Pages.

ATTACHMENT 4 - Atmos Energy Corporation, OAG_1-173_Att4 - Alloc Factor Support Mid-States.xlsx, 4 Pages.

REQUEST:

With regard to the Wireless Meter Reading (WMR) project discussed by witness Napier at Pages 13 and 14 of his testimony, please provide the estimated annual capital expenditures, expense outlays and other costs of this project, and the estimated corresponding annual savings in O&M expenses, and etc. that the Company expects to realize by implementing the WMR project. Please provide this response in hard copy as well as in executable electronic Excel format.

RESPONSE:

Please see the Company's responses to Staff DR No. 2-59 subpart (e) and OAG DR No. 1-054.

Respondent: Earnest Napier

REQUEST:

Please provide all studies, reports, and analyses used by the Company to determine that Wireless Meter Reading technology is cost effective and/or in the ratepayers best interest.

RESPONSE:

Please see the Company's responses to Staff DR No. 2-59 subpart (e) and OAG DR No. 1-052.

Respondent: Earnest Napier

REQUEST:

With regard to the Hopkinsville System Improvement project discussed by witness Napier at Page 14 of his testimony, please provide the following:

a. the annual capital expenditures;

b. the estimated annual expenses incurred to implement the project;

c. the estimated annual additional revenues from current customers, and from potential future customers;

d. a detailed explanation of how this project would impact the Company's proposed MLR and SDR, if either or both riders are approved by the Commission in this case;

e. distribution delivery revenues from all customers served within the "Commercial Industrial Park and Hopkinsville Industrial Park" during each of the last three years;

f. amount of Customer Advance and CIAC (separately) historically collected for each industrial park listed in (e) above.

g. Anticipated or expected Customer Advance and CIAC associated with the proposed expansion project;

h. Detailed cost estimate of project, including maps, cost by type, size, and length of plant; and,

i. Actual capital expenditures for the projects to date and percent completion.

RESPONSE:

a) Capital expenditures are expected to be $1.65 million, all during the forecasted test period. Please see Mr. Earnest Napier's Direct Testimony, page 14, lines 17 and 18.

b) Annual expenses incurred to place the pipeline in service are expected to be zero.

c) Estimated additional revenues from existing customers are expected to be approximately $425,000. Estimated additional revenues from known potential customers are expected to be between approximately $0 and $580,000.

d) The Company does not expect this project to have any impact on the proposed MLR and SDR.

e) Please see the Company's response to OAG DR No. 1-179.

f) None.

g) None.

h) Please see Attachment 1 and Attachment 2. The construction cost estimate in Attachment 1 is Confidential.

i) To date there have been no charges to this project.

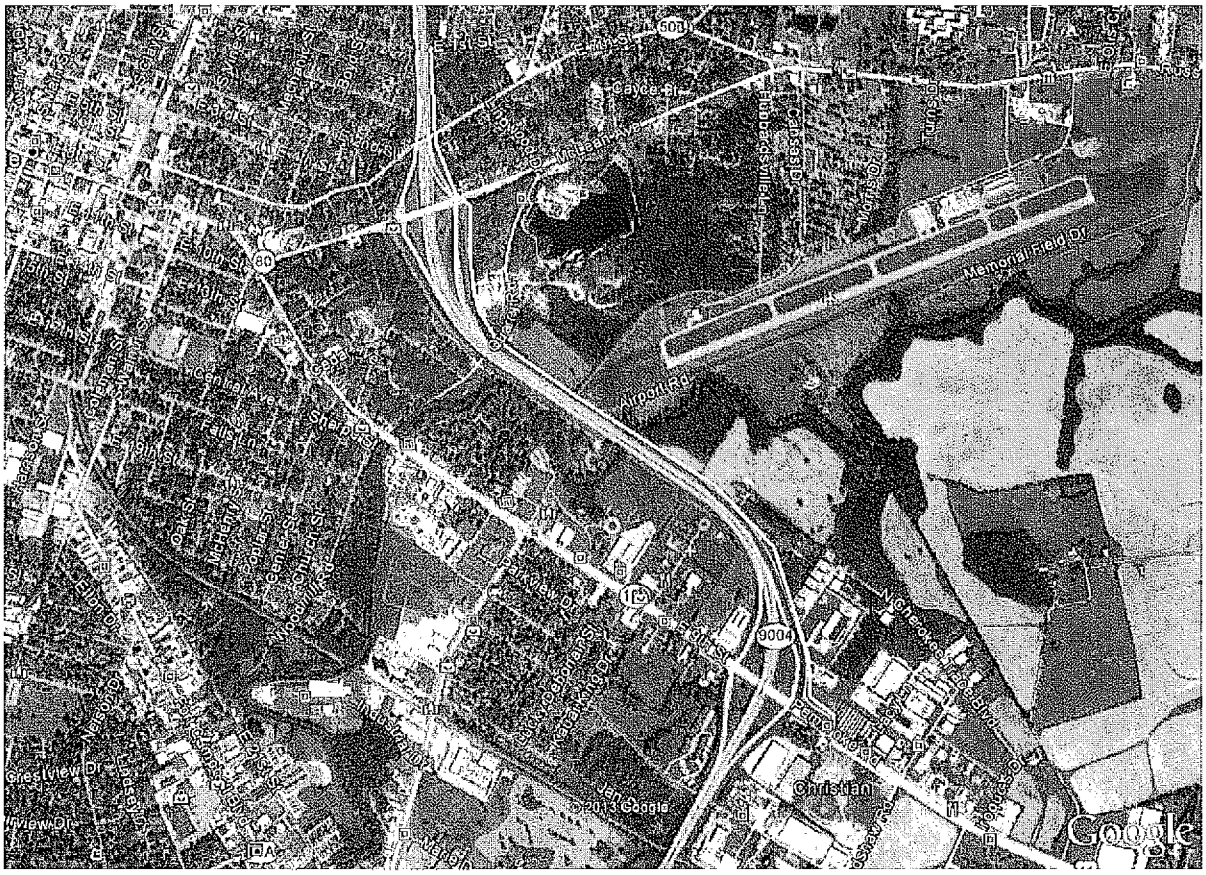
ATTACHMENTS:

ATTACHMENT 1 - Atmos Energy Corporation, OAG_1-176_Att1 - Hopkinsville Reinforcement - Fall 2012 Estimate Update (CONFIDENTIAL).pdf, 1 Page.

ATTACHMENT 2 - Atmos Energy Corporation, OAG_1-176_Att2 - Proposed Route.pdf, 1 Page.

Respondent: Earnest Napier and Mark Martin

Proposed 8" Steel Route from TB#1 to the intersection of HWY 41 and Bradshaw.



REQUEST:

With regard to the Company's proposed System Development Rider (SDR), please explain why customers taking transportation service from Atmos will be exempt from this rider.

RESPONSE:

The SDR is intended to encourage development, infrastructure investment and job growth with the Company's service areas. As such, the Company believes that our G-1 and G-2 customers have the most to gain by the SDR and should pay for projects that qualify for SDR treatment.

Respondent: Mark Martin

REQUEST:

With respect to the Hopkinsville System Improvement project, will future costs (beyond the future test year) be subject to the Company's System Development Rider as proposed?

RESPONSE:

The Company anticipates the Hopkinsville System Improvement project being completed by September 30, 2014. As such, the project would not be subject to the Company's System Development Rider as proposed.

Respondent: Mark Martin

REQUEST:

With regard to the Commercial Industrial Park and Hopkinsville Industrial Park referenced by Mr. Napier at 14 of his direct testimony, please provide the actual number of customers, annual throughput, and annual delivery revenue by rate schedule for each of the last three years. Please provide this response in hard copy as well as in executable electronic Excel format.

RESPONSE:

Please see Attachment 1. The customer information contained in Attachment 1 is Confidential.

ATTACHMENT:
