RE: Proposed adjustment of the wholesale water rates of the Louisville Water Company

To Whom It May Concern:

The West Shelby Water District respectfully requests that the Public Service Commission allow us to make an adjustment in our rates in accordance with 807 KAR 5:068 Purchased Water Adjustments for Water Districts.

Our supplier, The Louisville Water Company, has informed the District that an increase will take effect July 1, 2013. The District purchased 284,548,300 gallons of water from March 1, 2012 to February 28, 2013 at a total cost of \$555,227.02. The District sold 260,248,300 gallons of water to its customers. With the wholesale increase the new cost is expected to be \$573,928.04. The difference between the current cost and proposed cost will be \$18,701.02. The incremental cost in terms of water sold is \$0.0719 cents per 1,000 gallons. We propose to raise each gallonage block that amount.

The following documents are enclosed:
