

- Q1: Refer to paragraph 1 of the application and the response to question 13 of the Direct Testimony of Virginia Carol Wright (“Wright Testimony”) where it states, in relevant part, that the proposed increase is spread over a three-year period utilizing gradualism.
- a. Confirm that, according to Jackson’s proposal, the rate increases will occur over a period of two years, as opposed to three years as stated in the application and Wright Testimony.
 - b. Explain why, given its financial condition and the fact that it received notification on February 22, 2013, from Rural Utilities Service (“RUS”) that it failed to meet its Times Interest Earned Ratio (“TIER”) requirements for calendar year 2012, Jackson has not opted for a TIER of 2.0, which is typical for distribution cooperative rate cases.

A1:

- a. We applied for the rate increase in 2013, but it must be reviewed and investigated for a time period of 6 months by the KY PSC. Therefore, the first increase will actually be applied to customer’s bills in March 2014, if approved. The second increase will be applied to the customer charge in September 2014 (two increases in one year). And finally, the third increase will be applied in September 2015. Therefore, the total increase will occur in 2 calendar years instead of 3.
- b. Jackson Energy failed to meet only one of the RUS (Rural Utilities Service) financial requirements: OTIER (Operating Times Interest Earned Ratio). The increase in the customer charge will correct the OTIER default. Jackson Energy opted for less than a

Jackson Energy Cooperative Item No. 1
Case No. 2013-00219 Page 2 of 2
Response to Commission Staff Second Data Request Witness: Carol Wright

2.0 TIER to lessen the burden on our members. A larger rate increase would negatively impact our members due to the high unemployment and poverty rates in our service area. A smaller increase will sufficiently correct our financial condition and allow Jackson Energy time to initiate cost control measures and work on economic development.

**Jackson Energy Cooperative
Case No. 2013-00219**

Item No. 2

Page 1 of 1

Response to Commission Staff Second Data Request Witness: Jim Adkins

Q2: Refer to paragraph 4 and Exhibit S of the application. Paragraph 4 states the application is supported by a 12-month historical period ending December 31, 2012. And that it includes adjustments for known and measurable changes; however, there are no adjustments in the application. Provide a revised Exhibit S with all adjustments necessary to determine Jackson's normalized revenue requirement based on adjustments similar to those Jackson proposed in its last rate case, Case No. 2007-0033.¹

A2: The primary adjustments that are applicable follow:

Payroll Item 2a

Payroll Taxes: Item 2b

Depreciation: Item 2c

Interest: Item 2d

Retirement and Security Plans: Item 2e

11 **Payroll Adjustment**
12

13 To reflect the increase granted by the Board of Directors, the step increases granted and
14 promotions during the year. To give recognition to employees terminated and employees
15 hired during the test year. Overtime pay is calculated at 1-1/2 times regular pay rate for
16 hours worked in excess of 8 hours per day.
17

18 Employees are granted wage rate increases on November 1 of each year. Generally all
19 employees are granted wage increases based on the union contract. Outside, non-
20 management employees, participate in the union.
21

22 Wage and salary increases are as follows:
23

		<u>Increase</u>	
		<u>Union</u>	<u>Non-Union</u>
23	2011	2.00%	2.00%
24	2010	2.00%	2.00%
25	2009	\$0.50	\$0.50 per hour
26	2008	\$0.50	\$0.50 per hour
27	2007	4.00%	4.00%

28 The amount of increase was calculated based on the actual test year wages.
29

30 Projected wages	\$9,223,221
31 Actual wages for test year	<u>8,955,494</u>
32 Increase in normalized wages	<u><u>\$267,727</u></u>

Payroll Taxes

The employer's portion of FICA and medicare rates remain the same for 2011 as they were for 2010. The FICA rate is 6.2% and medicare is 1.45%. The wage limit increases from \$106,800 in 2011 to \$106,800 in 2010 for FICA; all wages are subject to medicare.

Federal unemployment rates are 0.80% for the first \$7,000 of wages and state unemployment rate is 1.10% for the first \$8,000 of wages.

8 **Depreciation Expense**
9

10 Depreciation is computed on a composite basis. The ending plant balance is multiplied by
11 rates that are within RUS approved guidelines. Depreciation rates and procedures follow
12 RUS Bulletin 183-1. Jackson Energy is using the same rates as the Commission approved
13 in its last general rate application.

14 Depreciation on transportation equipment is charged to a clearing account. Transportation
15 costs are then cleared to various accounts based on time used for each vehicle from the
16 daily time sheets of employees driving the vehicles.
17

18 Items fully-depreciated have been removed and identified on the far right column.

4 Jackson Energy Cooperative
5 Case No. 2013-00219

6 December 31, 2012
7

8 **Adjustment for Interest on Long Term Debt**
9

10
11 The adjustment for interest on long-term debt results in a decrease of \$26,832.
12

13 It is estimated that the rate increase requested will be sufficient to repay
14 approximately one-half of the short term note payable. Therefore, one-half
15 of the interest on short term notes will be removed from the Application in
16 the amount of \$52,220.

17
18 This adjustment has been calculated by multiplying the test year end debt amounts
19 by the interest rates in effect at the end of the test year for each loan.

4 Jackson Energy Cooperative
5 Case No. 2013-00219

6
7 **National Rural Electric Cooperative Association (NRECA)**
8 **Retirement and Security (R&S) Plans**

9
10 Jackson Energy Cooperative provides pension benefits for substantially all employees
11 through participation in the NRECA R&S plan. It is the policy of Jackson Energy to
12 fund pension costs accrued. R&S contributions are calculated on base salary at a rate
13 determined by NRECA. The rate was 25.56% for 2013 and 31.51% for 2012.

14
15 Cooperatives participating in the R&S plan were allowed to make an Accelerated
16 Funding Payment ("prepayment") and receive an immediate reduction in their current
17 contribution requirement equal to approximately 25% of their 2013 billing rate.
18 Although the new (reduced) billing rate can change over time, the relative value of
19 the reduction will continue to benefit prepaying cooperatives in future years,
20 potentially for as many as 10-15 years or longer. During May, 2013 Jackson Energy
21 made an accelerated payment to NRECA in the amount of \$6,683,300. The amount
22 will be recorded as a deferred debit and amortized over 16 years through the benefits
23 matrix.

24 Accelerated payment	6,683,300
25 Number of years	16
26 Annual amortization	417,706

27
28 **Normalized on base wages:**

29 R&S contributions	2,107,298
30 Accelerated payment amortization	<u>417,706</u>

2,525,004

31
32 **Test year on base wages:**

33 R&S contributions	<u>2,352,908</u>
35 Proposed adjustment	<u><u>172,095</u></u>

36
37 **The adjustment is allocated as follows:**

		<u>Percent</u>	<u>Amount</u>
39 107-108	Capitalized	25.18%	43,342
40 163 - 416	Clearing and others	13.60%	23,401
41 580	Operations	14.28%	24,581
42 590	Mainteneance	12.61%	21,697
43 901	Consumer accounts	14.85%	25,553
44 908	Customer service	3.40%	5,846
45 920	Administrative and general	16.08%	27,675
46		<u>100.00%</u>	<u>172,095</u>

**Jackson Energy Cooperative
Case No. 2013-00219**

Response to Commission Staff Second Data Request Witness: Jim Adkins

Item No. 3

Page 1 of 2

- Q3: Refer to page 2 of the Wright Testimony which states, "Our kWh sales are at an all-time low reaching 2003 levels and continue to diminish." Also refer to page 3, Exhibit JRA-1 of the Prepared Testimony of James R. Adkins ("Adkins Testimony").
- a. Explain whether Ms. Wright's statement is based solely on Jackson's 2012 results, or is intended to reflect the financial forecast filed as Exhibit JRA-1, which shows that:
- (1) Residential kWh sales increased approximately 9.15 percent from last year to 2013; (2) Commercial 1,000 KWWA or Less kWh sales increased approximately 12.53 percent from last year to 2012; and (3) Commercial Over 1,000 KWA kWh sales increased approximately 11.51 percent from last year to 2013.
- b. Provide a side-by-side comparison, similar to that contained in Exhibit JRA-1 page 2 of 4, Jackson's 2012 and 2013 income statements, including a breakdown of kWh sales and revenue by class. The 2013 income statement should use actual amounts for all months for which information is available and forecasted amounts for all other months. Consider this request as ongoing and provide updates as actual monthly kWh sales and income statements are available for 2013.
- c. Provide a side-by-side comparison, similar to that contained in Exhibit JRA-1, page 2 of 4, of Jackson's forecasted income statements for 2014, 2015, and 2015 using the kWh sales determined under Item 3.b above and the assumptions identified in Exhibit JRA-1 on page 4 of 4.

Jackson Energy Cooperative Item No. 3
Case No. 2013-00219 Page 2 of 2
Response to Commission Staff Second Data Request Witness: Jim Adkins

- d. Refer to the financial forecast in Exhibit JRA-1. Provide Jackson's projected TIER, without an adjustment to the customer charge amounts for 2014 to 2016, based on forecasted kWh sales.

A3:

- a. Ms. Wright's statement is based on the 2012 results as well as the current results that Jackson Energy is experiencing in 2013 and it is very uncertain as to when this situation may change. Exhibit JRA-1 provides forecasted information while Ms. Wright testimony is based on Jackson Energy's recent sales information.
- b. Please see Exhibit 3b which follows.
- c. Please see Exhibit 3c which follows.
- d. Please see Exhibit 3d which follows.

	2012	2013 **

2016	1.6

Jackson Energy Cooperative Item No. 4
Case No. 2013-00219 Page 1 of 2
Response to Commission Staff Second Data Request Witness: Carol Wright

Q4: Refer to exhibit H-A, page 2 of 3, where it states, in relevant part, that Jackson has initiated cost-control measures in response to the RUS notification that is taile to meet its operating TIER (“OTEIR”) for calendar year 2012 and is projecting an OTEIR of 1.1 for the year ending December 31, 2013.

- a. Identify and explain the cost-control measures Jackson has implemented in response to the RUS notification letter.
- b. Explain how Jackson prioritized the cost-control measures it has implemented in response to the RUS notification letter.

A4:

- a. The following cost control measures have been implemented by Jackson Energy:
 - a hiring freeze that has been in place since Feb. 2013
 - elimination of management company vehicles-CEO included
 - general expense budget cutbacks that has totaled over \$800,000 in savings to date in the 2013 budget
 - elimination of a general wage/salary increase for employees in 2013
 - review of employee benefits that has resulted in a new lower benefit package for new employees hired after November 1, 2013
 - review of employee benefits that has resulted in the removal of the COLA (Cost of Living Adjustment) in the DB (defined benefit) plan for existing employees with the cost savings of \$184,000 realized in 2014

Jackson Energy Cooperative Item No. 4
Case No. 2013-00219 Page 2 of 2
Response to Commission Staff Second Data Request Witness: Carol Wright

- investigation and option to re-finance RUS debt with another lending institution that will lower our interest expense with the cost savings to be realized in 2014 (pending Board of Directors approval and then KY PSC approval)
 - reduction of work plan expenditures in the next CWP (construction work plan) beginning in 2014 due to low member growth that will lower our interest expense
- b. The cost control measures were implemented in the order listed in #4a. The areas identified at the top of the list in #4a made an immediate impact in 2013 and as the list continues the cost savings are realized in 2014 and beyond. The list was prioritized by the items that would positively impact 2013 financials first.

Jackson Energy Cooperative Item No. 5
Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q5: Refer to Exhibit H-2 of the application, the Prepared Testimony of Mary E. Purvis.

- a. Ms. Purvis states on page 2 that during the test year, Jackson's net margins and adjusted net margins were a loss of \$3,866,334 and \$2,998,339, respectively. Provide the derivation of the adjusted net margins.
- b. Ms. Purvis states on page 5 that the zero-intercept method was used to determine the customer and demand-related components for Account 365, Overhead Conductors, and Account 368, Transformers, but that the minimum-size method was used for Account 364, Poles. Explain the reasons for the use of different methods for the accounts.

A5:

- a. The adjusted net margins should be (\$492,005) as seen in Exhibit S of the application.
- b. The zero-intercept method is preferred; however, for Account 364, Poles, the resulting y-intercept value is negative when implementing the zero-intercept method. Such a value would result in a negative consumer investment; therefore the minimum size method was utilized.

Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request

Item No. 6

Page 1 of 2

Witness: Jim Adkins

Q6: Refer to Exhibit H-3 of the application, the Adkins Testimony.

- a. Refer to page 5, where Mr. Adkins discusses rate classes 45, 47, and 48. Mr. Adkins states that “[i]t is assumed that the type of customers served by these rate schedules would be located next to or a short distance away from the substation and is the primary reason for the need for the substation serving them.” Identify the customers served under these rates schedules and the type of substation (from the list of substations that appears on this page) used to serve each of the identified customers.

- b. Refer to the top of page 6 where Mr. Adkins states that “Jackson Energy determined in advance the rate segment it wished to increase for each rate class and the amount.” Provide the rate classes identified by Jackson to receive an increase, the amount of the increase, and the reason(s) for wanting to increase rates for those particular classes.

A6:

- a. Provided below is the requesting listing of customers for the specified rate classes along with the type of substation from which each customer is served.

<u>Rate Class</u>	<u>Customer</u>	<u>Substation</u>	<u>Size</u>
46	Walmart Distribution Center	Laurel Industrial Park	15,000kKW & Larger
46	Laurel Grocery	West London	15,000kKW & Larger
47	Federal Prison	Greenbriar	7,500-14,999 kW
47	ABC Automotive	Laurel Industrial Park	15,000kKW & Larger
47	St. Joseph Hospital London	West London	15,000kKW & Larger

Jackson Energy Cooperative Item No. 6
Case No. 2013-00219 Page 2 of 2
Response to Commission Staff Second Data Request Witness: Jim Adkins

- b. Jackson Energy in its initial discussions with Mr. Adkins stated that it wanted to increase its residential class customer charge by 2.00 per year and the customer charge for all other rate classes by a percentage amount comparable to the residential class customer charge increase. All of above parameters were subject to the results of the cost of service study results.

Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request Witness: Jim Adkins

Item No. 7

Page 1 of 2

Q7: Refer to the response to question 12 in Exhibit H-3, page 6, where it states, in relevant part, that the basis of the increase in the proposed lighting rates is somewhat subjective and provides the rationale for the lighting increase. Explain what Jackson means about the rates' being subjective. Provide a narrative explanation for the rationale behind the proposed rate.

A7: The proposed rate design is based more on judgment rather than subjectivity. As stated before, Jackson Energy's management established the following criteria.

- All increase in rates would be placed on the customer charge component of each rate class;
- The customer charge would be increased by \$2.00 for the residential class and a similar percentage amount for the remaining rate classes; and
- Items one and two of the above criteria may be modified as justified by the results of the COSS especially the results for customer charge just and amount of increase for each rate class.

Provided below is a table that contains the proposed customer charge increase for year 3 and the current charge along with the increase amount and percentage increase for each year.

Jackson Energy Cooperative

**Jackson Energy Cooperative
Case No. 2013-00219**

Response to Commission Staff Second Data Request Witness: Jim Adkins

Item No. 8

Page 1 of 2

A8: Refer to Exhibit JRA-1.

- a. Refer to page 4; line 2, where it states that 2014 kWh and future kWh are from the 2010 Load Forecast, with some minor adjustments. Identify and describe these minor adjustments.
- b. Refer to page 2 of the exhibit. Explain how Jackson determined the estimated expense increases for 2014 through 2022.

A8:

- a. The minor change in the year 2013 was in the Residential kWh sales. The 2010 load forecast had 715,974,000 kWh whereas the financial forecast used 725,000,000 kWh. The only other adjustment was in the year 2022. The kWh used for 2022 was the same as the kWh used for 2012.
- b. The expenses for the years 2014 through 2022 as shown on JRA-1 of the application, page 2 of 4, are as follows:
 - Power Costs were projected using data from the 2010 load forecast multiplied by an average kWh rate used in the 2013 budget.
 - Long term debt interest expenses were calculated based on amortization calculations for current and future loans. The interest rates on current loans were the current actual rates and the rates for future loans was 5%.
 - All other expenses were increased as follows:

**Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request**

Item No. 8
Page 2 of 2
Witness: Jim Adkins

2014 - 1% increase over the 2013 budget

2015 - 1% increase over the 2014 amounts

2016 - 2022 - each year increased 2% over the prior year.

Case No. 2013-00219
Response to Commission Staff Second Data Request**

Item No. 10

Page 1 of 1

Witness: Jim Adkins

Q10: Refer to Exhibit R of the application, page 4 of 36. This page contains no amounts but only error references. Provide a corrected page 4.

A10: Page 4 of 36 of Exhibit R contains no amounts but only error references because there were no test year adjustments to the categories listed. This page should not have been filed.

Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request

Item No. 11

Page 1 of 2

Witness: Jim Adkins

Q11: Refer to Exhibit R of the application, page 8 or 36.

- a. Account 935, Maintenance of General Plant, is shown as having been allocated using Footnote 4, which are the General Plant percentages from the Rate Base schedule. Explain whether Footnote 4 and Footnote 7 result in the same allocation percentages.
- b. Account 404, Depreciation Distribution Plant, is shown as having been allocated using Footnote 6. Confirm that the allocation method used is actually based on the Distribution Plant percentages found on page 10 of 36.
- c. Account 404, Depreciation General Plant, and account 407, Amortization of Property Losses, are shown as having been allocated using Footnote 6. Confirm that the allocation method used is actually based on the General Plant percentages found on page 10 and explain why that is an appropriate allocation method for Account 407.

A11:

- a. Yes, they do result in the same allocation percentages.
- b. The rate base allocations for Account 404, Depreciation Distribution Plant, referenced by Footnote 6 were linked to the Distribution Plant percentages in error. It should be linked to Net Plant Percent. The Revised Cost of Service Study can be found in Item 9 of this filing.
- c. The rate base allocations for Account 404, Depreciation General Plant, and Account 407, Amortization of Property Losses, referenced by Footnote 6 were linked to the

General Plant percentages in error. It should be linked to Net Plant Percent. The Revised Cost of Service Study can be found in Item 9 of this filing.

Jackson Energy Cooperative Item No. 12
Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q12: Refer to Exhibit R of the application, page 7 of 36.

- a. Refer to the calculation for Footnote 3. Confirm that the Services line item should contain an amount of \$773,699 (the sum of \$772,917 and \$782 from 5 of 36) in the actual column, which would change the percentage allocations. If this cannot be confirmed, explain.
- b. Refer to the calculation for Footnote 6. The amounts in the Total column for Poles, Tower and Fixtures and for Overhead Conductors do not reconcile with the amounts shown for these items on page 10 of 36. Explain the discrepancy and state where in the Cost of Service Study the allocation percentages shown in this footnote are used.

A12:

- a. The Services line item should contain the amount of \$773,699 as seen in the Actual column. The revised percentage allocations can be found in the Revised Cost of Service Study in Item 9 of this filing.
- b. For Footnote 6, the total column for Poles, tower and Fixtures and for Overhead Conductors there was an error in the cell reference. The amounts now reconcile and can be found in the Revised Cost of Service Study in Item 9 of this filing.

Jackson Energy Cooperative Item No. 13
Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

- Q13: Refer to Exhibit R of the application, page 18 of 36, the table at the bottom of the page. Confirm that percent amounts in the Percent columns for Account 364 and the amounts that should apply to Account 365 and vice versa.
- A13: For the table at the bottom of page 18 of 36 in Exhibit R of the application, the percent amount in the consumer-related and the demand-related columns were transposed. The correct percent references are the Revised Cost of Service Study found in Item 9 of this filing.

Jackson Energy Cooperative Item No. 14
Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q14: Refer to exhibit R of the application, page 22 of 36. Provide the basis for the allocation of the Purchased Power Demand total of \$13,020,019 to the customer rate classes.

A14: The basis of the allocation is based on the residential contributions to peak demand based on load research from East Kentucky Power Cooperative. Specifically, the percent allocation is from page 25 or 36 of Exhibit R of the application, the Residential monthly contributions to EKPC coincident Peak Demand.

Jackson Energy Cooperative Item No. 15
Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q15: Refer to Exhibit R of the application, page 33 of 36, the Services table. Explain how the \$0.92 unit cost for the Outdoor Lighting category was calculated.

Q15: The \$0.92 unit cost for the Outdoor Lighting category was calculated by finding the average unit price using the minimum size service of 6/0 AL. The reference to 4/0 AL is an error.

Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q16: Refer to Exhibit R of the application, page 34 or 36. Explain how the amounts in the Billing Factor and Multiplier columns were calculated.

A16: The billing factor is based on the number of billing factors on the rate class bill. For example the residential class has four factors: customer, energy, fuel, and environmental. Hence the billing factor is four. For demand, the facet is more difficult so a billing factor of two is given for demand. So the billing factor for Rate class 45, Large Power 50-500, is eight: customer, energy, fuel, environmental, contract demand (times 2), and excess demand (times 2). The multiplier columns are calculated based on a judgmental complexity factor based on the 1972 version of the NARUC Manuel.

Distribution Plant Depreciation Study

As of December 31, 2011

INTRODUCTION

This depreciation study was performed for Jackson Energy Cooperative Corporation (“Jackson Energy”) in McKee, Kentucky. The purpose of the study was as follows:

1. To recommend appropriate depreciation rates based on estimates of average life mortality characteristics and net salvage that will fully recover the cost of the property, adjusted for net salvage over its estimated life.
2. To determine the adequacy of the book reserve for depreciation at a point in time by comparing it with a theoretical reserve based on the same average lives, mortality characteristics, and net salvage as used to determine the recommended depreciation rates.
3. To determine if necessary some method to adjust the book reserve for past over or under accruals as indicated by comparison with the theoretical reserve requirement.
4. To review in detail the history, status, procedures and policies of Jackson Energy's depreciation functions, records, and operating techniques.

Jackson Energy has had two (2) depreciation studies performed, which have been approximatley ten and five years ago. Since there are many factors affecting estimates of depreciation rates and accrued depreciation, and these factors are constantly changing, a depreciation study only represents the best judgment at the time the study is performed. Actual results may vary from the forecasts and variations may be material. A review of depreciation should be made at least every five (5) years so that Jackson Energy's depreciation practices reflect those changes.

Jackson Energy Cooperative

DEPRECIATION

Book depreciation is merely the recognition in financial statements that physical assets are being consumed in the process of providing a service or product. Generally accepted accounting principles require the recording of depreciation provisions to be systematic and rational. In order to be systematic and rational, depreciation should to the extent possible, match either the consumption of the facilities or the revenues generated by the facilities. Accounting theory requires the matching of expenses with either consumption or revenues to ensure that financial statements reflect the results of operations and changes in financial position as accurately as possible. The matching principle is often referred to as the cause and effect principle, thus, both the cause and the effect are required to be recognized for financial statement purposes.

Because price regulation and not the market place controls revenues, for utility accounting purposes consumption is important and is usually assumed to occur at a constant rate. The key to the validity of the utility book depreciation accounting lies in accurately measuring property consumption through determining its mortality characteristics. The term "mortality characteristics" encompasses average service life and dispersion (variation) of retirements around average service life, as well as salvage and cost of removal (net salvage).

DEPRECIATION DEFINITIONS

The Uniform System of Accounts prescribed for electric borrowers of the Rural Utilities Service ("RUS") states that depreciation "as applicable to depreciable electric plant, means the loss in service value not restored by current maintenance, incurred in connection with the consumption for prospective retirement of electric plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are

Jackson Energy Cooperative

wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities”.

Service value as defined “means the difference between original cost and net salvage of electric plant”.

Net Salvage value is the salvage value of property retired less cost of removal. Salvage value means the amount received for the property retired, and cost of removal means the cost of demolishing, dismantling, tearing down, or otherwise removing electric plant, including the cost of transportation and handling incidental thereto. Thus, salvage is what will actually be received and cost of removal is what will actually be incurred, both measured at the price level at the time of receipt, or incurrence that is required to be recognized by the company through capital recovery.

Jackson Energy Cooperative

SCOPE

The study included construction and retirement activity for distribution plant from 1939 through 2011. Jackson Energy has maintained its plant and depreciation records in accordance with the Uniform System of Accounts as issued by RUS. As such, Jackson Energy's plant records are maintained on a mass property, average historical cost basis in its continuing property records ("CPR's"). Jackson Energy maintained CPR's on the construction unit cost basis until the mid 1980's, at which time they were converted to the record unit basis for CPR's. This conversion process caused moneys to shift from different plant accounts, i.e., from Account 364 to Account 365, etc. As a result, plant additions and retirements were recalculated for the years prior to the conversion to give effect as if Jackson Energy had used record unit CPR's from its inception.

The study was performed utilizing a computer program which incorporated the "Iowa Type Survivor Curves". These curves are frequently used by utilities for analyzing depreciation of property recorded on a mass basis. The curves analyze the life of mass property accounted for on the vintage basis. Vintage accounting is a system where plant is accounted for by year of installation and its life is tagged as such through retirement. Since vintage accounting is not required by the uniform system of accounts, this type of record was not maintained for the mass items. The study therefore used the technique of creating simulated plant records on a vintage basis.

The computer program used utilizes the Simulated Plant Record ("SPR") method of analyzing data. Studies have shown that mass property kept on a vintage record basis generally fits one of 31 Iowa Type Survivor Curves. Through additional studies it has been shown that if plant is retired but it was not recorded on a vintage basis, it would still follow the pattern of one of these curves. The SPR method of analyzing the

Jackson Energy Cooperative

data tests the additions, retirements, and plant balances for each year to fit the data to the best curve for analysis.

The result of simulating the plant balances and the depreciation reserve, and allocating the net salvage is to be able to develop the average plant lives and calculate the plant balances, reserve balances, and annual depreciation accruals for distribution assets in service.

The most likely retirement patterns and average service lives were developed based on the SPR analysis. This information was than analyzed for appropriateness and a curve and service life was selected for each account.

The study of depreciation also utilizes the estimates of net salvage for the primary plant accounts. Net salvage is the result of combining salvage received for plant removed from service and the cost of removal. These records were not maintained on a primary account basis since it was not required by the uniform system of accounts. As part of this study, both the cost of removal and salvage were allocated to the primary plant accounts on a percentage basis. The percentages were based on a review of salvage and cost of removal accounts at Jackson Energy for a five (5) year period.

When utilizing the whole life method of accounting for depreciation, it is necessary to determine the adequacy of the depreciation reserve for each account. Jackson Energy does not maintain separate accumulated depreciation reserve accounts for each of its distribution plant accounts. The calculation of the net salvage is performed on an average of the original cost of units of property retired on a monthly basis. This method does not give consideration for the net salvage ratio being different than the ratio of original cost each month. Therefore, it is necessary to develop a calculated depreciation reserve for each individual account. This was done by utilizing the average service life developed above, along with the net salvage ratio (as noted above) and applying the rate to the historical additions and the simulated retirements to date to obtain the calculated depreciation reserve.

Jackson Energy Cooperative

The depreciation expense and the depreciation reserve were calculated on a composite basis for each account historically used by Jackson Energy. For comparative purposes the depreciation expense was calculated for each year based on the proposed rates in this study, and the composite rate was calculated and compared to the current composite rate.

Starting in 2007 and through 2010, Jackson Energy changed out its existing meters with automated metering information (“AMI”) devices. There was not enough activity, nor any retirements of AMI’s, in Account 370, Meters to generate acceptable simulated plant study results. Therefore, it was estimated that Account 370, Meters would use a useful life of 15 years. This is consistent with other electric cooperatives in Kentucky that have recently installed AMI devices. The equipment installed at the substations recorded in Account 362 relate to AMI and will be depreciated over the same live as AMI devices.

The following is a summary of the proposed composite depreciation rates and the RUS recommended maximum and minimum rates.

<u>Account Number</u>	<u>Description</u>	<u>Proposed Rate</u>	<u>Current Rate</u>	<u>RUS</u>	
				<u>Low</u>	<u>High</u>
362	Station Equipment	6.67%	6.67%	3.00%	4.00%
364	Poles, Towers & Fixtures	3.79%	4.21%	3.00%	4.00%
365	Overhead Conductors & Devices	4.43%	3.61%	2.30%	2.80%
366	Underground Conduit	2.00%	2.00%	2.40%	2.90%
	Underground Conductors &				
367	Devices	5.82%	3.52%	2.40%	2.90%
368	Line Transformers	3.85%	2.56%	2.60%	3.10%
369	Services	4.96%	4.78%	3.10%	3.60%
370	Meters	6.67%	6.67%	2.90%	3.40%
	Installations on Customers'				
371	Premises	8.30%	5.02%	3.90%	4.40%
373	Street Lighting & Signal Systems	4.90%	5.21%	3.90%	4.40%

Jackson Energy Cooperative

1. The “Proposed” rates are the rates determined from this depreciation study.
2. The “Current Rates” are those currently in effect. The rate is used for all distribution plant accounts
3. The “RUS Low and High” range are those included in RUS Bulletin 183-1, Depreciation Rates and Procedures. The ranges were developed by RUS in the 1960’s as a result of the study of rural electric borrowers. As per the bulletin, rates can be selected from within the range of rates without prior RUS approval. The bulletin further provides for rates higher or lower than those in the range when supported by a depreciation study. However, the Kentucky Public Service Commission does not allow for changing rates without the support of a depreciation study.

The study findings are based upon many factors and assumptions which were discussed with Jackson Energy’s personnel during my visit. Any changes in the assumptions could significantly impact the results of the study findings. In the future, as plant is added and retired, and methods and technology change, appropriate revisions to the study findings may be necessary. Jackson Energy should consider the effects of such changes on an ongoing basis.

Jackson Energy also considered the Whole Life Method of calculating the annual depreciation, with the Net Salvage Ratio as ordered by the Kentucky Public Service Commission in Case No. 2000-373, Adjustment of Rates of Jackson Energy Cooperative. This method of recognizing net salvage ratio is in essence the average of the last five (5) years salvage and removal costs that have been recognized in the accumulated depreciation account.

Based on the lives of the assets and the current reserve ratio to total distribution plant, Jackson Energy has decided to use these rates as a result of this study.

**Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request**

Item No. 21

Page 1 of 1

Witness: Jim Adkins

Q21: Refer to Exhibit Z of Jackson's application. On page 6, it is acknowledged that a computer program was utilized in the depreciation study which incorporated Iowa Type Survivor Curves.

- a. Identify the program used in the depreciation study.
- b. Explain whether the program is used on an industry-wide basis.
- c. Discuss in detail the programs acceptance of individual, Jackson specific inputs.

A21:

- a. The program used is the Computer Assisted Depreciation and Life Analysis System (“CADLAS”) which provides best fits for each asset class.
- b. The CADLAS program is used by most governmental agencies, including RUS, to determine lives of assets and depreciation rates.
- c. Input information, additions, retirements, and adjustments, for each account was analyzed prior to entering into the CADLAS program to ensure there were no unusual or extraordinary circumstances that would skew the results. An example is where Jackson Energy converted from construction unit CPR's to record unit CPR's and amounts changed from one plant account to another. This change required restatement of prior years' additions and retirements. After this, information was entered into the program and the results were analyzed using the Curve Overlap for each curve, comparing the Squared Error, Index of Variation, Conformation Index, and Retirement Experience. The next step was to select the appropriate curve type and estimated life for each account.

Jackson Energy Cooperative Item No. 22
Case No. 2013-00219 Page 1 of 3
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q22: Refer to Exhibit Z of Jackson's application. On page 8 it is stated than AMI ("Advanced Metering Infrastructure") meters would have a useful life of 15 years, in accordance with other electric cooperative in Kentucky that have recently installed AMI devices.

- a. Provide a list of the other Kentucky cooperatives that have installed AMI devices and used a 15-year useful life for AMI meters.
- b. Discuss the items other than AMI equipment recorded in Account 362, Station Equipment, and the applicability of a 15-year useful life used for the items int eh account.
- c. Describe in detail the conditions which account for the changes in average service life for:
 - (1) Account 367 Underground Conductors and Devices;
 - (2) Account 368 Line Transformers;
 - (3) Account 369 Services;
 - (4) Account 371 Installations on Customer Premises.

A22:

- a. This list may not be all-inclusive as there may be others that Jackson Energy is not aware of.

Big Sandy RECC

Blue Grass Energy

Clark Energy

Cumberland Valley Electric

- b. In addition to equipment for AMI located either in or at the substation that allows for the communication of meter readings is similar equipment used for communication related to SCADA. This equipment is similar in use, although not interchangeable, therefore the lives are similar.
- c. Changes are as follows:
 - 1) Account 367. The cumulative balance through 1995 was \$40,328. There has been significantly more activity in the years since.
 - 2) Account 368. Since the year of 2000, Jackson Energy has been removing and replacing older transformers that contain PCBs.
 - 3) Jackson Energy has made more of an effort to remove idle services. This has been a verbal recommendation of the RUS Field Representative during his inspection of the system.

- Q23: In Case No. 2000-00373¹, Jackson was ordered to use a Net Salvage Ratio method for calculating the distribution plant annual depreciation. In the final Order in that case, the Commission acknowledged a 1997 Jackson distribution plant write-off, noting that the Net Salvage Ratio method was a departure from the Commission's normal approach. The Commission found that under mitigating circumstances in Case No 2000-373, the Net Salvage Ratio was reasonable. Explain whether there are analogous mitigating circumstances in the current filing which support utilizing the Net Salvage Ratio method.
- A23: Refer to the schedules listed as "Adjust Rates with Net Salvage" and "Calculation of Net Salvage Percent". These calculations and allocations are similar to other electric cooperatives and are consistent with other depreciation studies performed. The reason for a 5 year period is twofold; first, this Commission required Fleming Mason to use a five year period in their application; second, a period less than five years could result in one year that has unusual circumstances which would skew the results, and any time period greater could result in an old trend that may likely not be occurring currently. This is the same approach proposed by the Office of the Attorney General and adopted by the Commission in the Fleming Mason case.

Response to Commission Staff Second Data Request Witness: Jim Adkins

Q24: Explain in detail whether Jackson performed an analysis to include net salvage as a component of its depreciation rates or to continue to use the “average net salvage allowance” approach proposed by the Office of the Attorney General and adopted by the Commission in Case No. 2000-373.

A24: Jackson Energy performed this same analysis. See the tab titled “Account: COR-SVG” in the study supplied as part of this response.

Jackson Energy Cooperative Item No. 25
Case No. 2013-00219 Page 1 of 1

Q25: Clarify what is proposed concerning the final sentence of Exhibit Z to the application at the bottom of page 9 which in part states that "Jackson Energy has decided to use these rates as a result of this study."

A25: The entire last sentence should not have been included in the study.

Q26: Explain whether Jackson will be required to seek RUS authorization for the proposed depreciation rates.

- a. If so, has approval already been requested?
- b. Describe any communication between Jackson and RUS concerning the proposed depreciation rates and provide any documentation to or from RUS concerning the proposed depreciation rates.

A26:

- a. Jackson Energy has not sought RUS authorization for the proposed depreciation rates because it is operating under the rates of a previous PSC Order dated June 5, 2008, Case Number 2007-00333.
- b. Since Jackson Energy is not seeking to change its depreciation rates, there is no communication between Jackson and RUS on the proposed rates. It is Jackson's understanding that RUS only requires approval of rates that fall outside the ranges given in RUS Bulletin 183-1. Bulletin 183-1 also states that "borrowers under commission jurisdiction should inform REA of depreciation rates prescribed by the Commission". Jackson Energy did inform RUS of its latest depreciation rates given in Case Number 2007-00333 by a letter dated June 13, 2008.

Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request

Item No. 27

Page 1 of 2

Witness: Jim Adkins

Q27: Refer to the response to Item 8.b. of Staff's First Request.

- a. Account 555.02, Purchased Power – Wellhead Energy, increased from \$98,950 in the year preceding the test year to \$146,742 on the test year.
 - (1) Provide the MWh or kWh purchased form wellhead energy for 2011 and 2012.
 - (2) Explain how the wellhead energy purchased fits into Amendment No. 3 to the Wholesales Power Contract between East Kentucky Power cooperative, Inc. and Jackson.
- b. Account 904.00, Uncollectible Accounts, decreased from \$282,629 in the year preceding the test year to (\$104,072) in the test year. Provide a detailed explanation for why this expense decreased by this magnitude.
- c. Account 920.50, Personnel, increased from \$72,500 in the year preceding the test year to \$156,610 in the test year. Provide a detailed explanation for why this expense increased by this magnitude.

A27:

- a(1). The kWh purchased from Wellhead is as follows:

2011	1,586,960
------	-----------

2012	2,297,760
------	-----------

- a (2). Amendment #3 of the Wholesale Power Contract provides Jackson Energy the ability to purchase of power from an alternative source other than EKPC (East Kentucky Power Cooperative) within certain limitations established in

Jackson Energy Cooperative Item No. 27
Case No. 2013-00219 Page 2 of 2
Response to Commission Staff Second Data Request Witness: Jim Adkins

Amendment #3. The wellhead energy purchased falls under this agreement's limitations.

- b. Account 904.00, Uncollectible Accounts decreased significantly because dollars were applied to uncollectible balances when Jackson Energy did a general retirement of capital credits in May, 2012. If a customer's account showed an uncollectible balance, the capital credits were applied before any balance was refunded to the customer. During this general retirement process, \$184,774.82 was applied to uncollectible accounts.
- c. Account 920.50, Personnel, increased in the test year because the Cooperative hired a Human Resources Director to fill the previously vacated position.

Jackson Energy Cooperative
Case No. 2013-00219
Response to Commission Staff Second Data Request

Item No. 28

Page 1 of 1

Witness: Jim Adkins

Q28: Refer to page 2 of the response to Item 18 Staff's First Request. Also, refer to page 1 of Exhibit J and page 1 of Exhibit S. In the response to Staff's First Request, Item 18, the total revenue collected by rate class is \$96,639,274 and the Exhibit J current year revenue is \$89,026,692, or a difference of \$7,612,582.

- a. Explain the \$7,612,582 difference.
- b. If the difference should be the net of the (\$1,164,623) fuel adjustment and the \$8,830,751 environmental surcharge, explain the remaining difference of (\$53,546).

A28:

OTHER ADJUSTMENTS TO REVENUE	
Base Rate Adjustments	(94,461.37)
Adjustment for Rounding	12.19
Prepaid Progam Fees	103,285.54
Renewable Resource Energy	4,936.25
Non-metered Charge	2,966.76
Primary Meter Discount	(60,644.07)
Power Factor Penalty	40,554.47
Load Factor Penalty	5,554.24
Other Adjustments	(55,750.05)
Total	(53,546.04)

Jackson Energy Cooperative Item No. 29
Case No. 2013-00219 Page 1 of 1
Response to Commission Staff Second Data Request Witness: Jim Adkins

Q29: Identify the manner in which Jackson provided notice to its members of its proposed rate increase.

- a. Identify the newspapers or trade publication and the dates of publication in each newspaper or publication in which Jackson published notice of application in the matter.
- b. Provide an affidavit from the publisher verifying the notice was published including the dates of the publication. Also provide a copy of the notice that was published in each newspaper or trade publication.

A29: Please refer to the following electronic files filed September 27, 2013:
