GAS COST ADJUSTMENT CLAUSE

The Company shall file a Quarterly Report with the Commission which shall contain an updated Gas Cost Recovery Rate (GCR) and shall be filed at least thirty (30) days prior to the beginning of each calendar quarter. The GCR shall become effective for billing with the final meter readings of the first billing cycle of each calendar quarter.

The gas cost recovery rates are composed of:

- 1. The average gas cost component (AGC) on a dollar per Mcf basis, which represents the average cost of gas supplies based on a measurement of gas remaining plus new supplies at the time of filling of main tank.
- 2. The actual adjustment (AA), on a dollar per Mcf basis; compensates for differences between the previous quarter's average gas cost and the actual cost of gas during that quarter.
- 3. The balance adjustment (BA), on a dollar per Mcf basis, which compensates for any under or over collections which have occurred as a result of prior adjustments.

BILLING:

The gas cost recovery rate to be applied to bills of customers shall equal the sum of the following components:

GCR = AGC + AA + BA
