RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Bridwell,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

Leak detection and leak repair efforts have continued while weather has permitted this month. Fluctuating temperatures between deep freeze and thaws are starting produce multiple leaks throughout the system. Crews are at this time able to keep up with the demand but, as this time of year had previously proven, leaks will most likely increase at a high rate than normal.

The Shopes Creek Phase II Water Loss Project is in the permitting process with the Kentucky Division of Water with an estimated February bid date. This project will replace approximately a combined 16,000 feet of 12", 8", 6" and 3" main and 150 +/- service lines.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim Webb", is written over the typed name.

Tim Webb
District Manager
