RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Bridwell,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

Phase I Zone Metering Project update. All meters have been installed by the contractor and all radios and communication software has been installed. Meter flow information is now being received for all meters. With this information CWD has made great strides in its water loss detection and repair efforts.

To put the before and after numbers in perspective, water loss in gallons for the 3 months prior to completion of the Zone Metering Project averaged 13,000,000 gallons. For the month of December, we have successfully lowered that number to 8,800,00 gallons. This by far represents the largest single month reduction in water loss CWD has ever had. These numbers help show us that this project can be a great success story for CWD and the PSC to provide a better service for our customers.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Webb", is written over a white background.

Tim Webb
