RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Bridwell,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

CWD has continued its leak detection and repair efforts as much as possible over the last month although, severe weather has hampered these efforts greatly. During the second and third week of February, our service area experienced a tremendous amount of ice followed by snow. The first storm caused power outages to over 75% of our facilities after the second storm event we were at a 100% power outage. During this time not only was leak and flow monitor equipment down but telemetry systems were also down, making leak detection efforts come to a complete stand still. It was not until February 22nd that we were back to full operation.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Webb", written in a cursive style.
