RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Bridwell,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

CWD has continued its leak detection and repair efforts using all tools and technologies at our disposal. However, water loss has shown it's first increase since March. This increase can be directly attributed to the excessively dry, hot conditions that have been seen in the area. Past experience has shown more leaks during these times do to ground movement.

CWD is still in the design and now grant money search process of the Phase II Water Loss and Prevention with Bell Engineering. We have been awarded thus far \$460,000 from the area add district to help fund this project. We will continue to seek all grant options before determining other funding options. This project will consist of replacing water mains and service lines in the Shopes Creek, Rockdale and, Midland Trail areas.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim Webb", is placed above the printed name and title.

Tim Webb
District Manager
