RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Pinson,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

Leak detection has continued with the use of all means available for detection. Two substantial leaks were located and repaired. Smaller leaks on service lines are beginning to rise with the drying of the ground due to the hotter drier weather.

Phase I Zone Metering Project is currently still under design. The plans are mostly complete with the bid specifications currently being written as well. Cannonsburg Water has sent in it's Letter of Intent for Funding to KIA and has received the invitation to submit for funding back from KIA. The loan application is now being completed.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Webb", is written over a light blue horizontal line.

Tim Webb
General Manager
