RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Bridwell,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

Continued leak detection efforts have helped reduce water loss for the month of September. This effort has now lowered water loss in gallons lower than it has ever been for the district. During the current month of October, we have been slowed in leak discovery due to the loss of operation of both of our main leak detection devices. Both devices have had replacements ordered. The replacement for the leak noise listening device arrived this week and the portable flow monitor replacement is scheduled to arrive on November 2<sup>nd</sup>.

CWD is still in the design and now grant money search process of the Phase II Water Loss and Prevention with Bell Engineering. We have been awarded thus far \$460,000 from the area ADD district to help fund this project. We will continue to seek all grant options before determining other funding options. This project will consist of replacing water mains and service lines in the Shopes Creek, Rockdale and, Midland Trail areas as well as replace a pump station.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim Webb", is written over a light blue horizontal line.

Tim Webb  
District Manager
