RE: Case No. 2014-00267 – Surcharge Activity Report

Mr. Chandler,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

Phase I Zone Metering Project has moved along very well. As of the date of this letter only 2 meters are left to install. These meters are on back order and are expected to be delivered mid-October. Of the meters that are installed, radio equipment has been installed and programmed on 20 of the meters.

With the installation and readings of the programmed meters, CWD has identified several areas for leak detection investigations. In one area in particular crews were able to locate and repair a 43 GPM leak in a stream resulting in 1.1 million gallon leak reduction for the month of October.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Webb", is written over the typed name.

Tim Webb
