RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Bridwell,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

Leak detection and leak repair efforts unfortunately have been hampered during the last half of October into November due to COVID related staffing issues with field employees. All employees are now healthy and back to work.

CWD is still in the design and now grant money search process of the Phase II Water Loss and Prevention with Bell Engineering. Grant monies from the ADD district have increased to \$500,000 from \$460,000 with cash on hand from previous surcharge fund of \$500,000. We will continue to seek all grant options before determining other funding options. This project will consist of replacing water mains and service lines in the Shopes Creek, Rockdale and, Midland Trail areas as well as replace a pump station.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim Webb".

Tim Webb
District Manager
