RE: Case No. 2014-00267 – Surcharge Activity Report

Mr. Chandler,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to gain control of its water loss.

Phase I Zone Metering Project update. All meters have been installed by the contractor and all radios and communication software has been installed. Meter flow information is now being received for all meters.

With the installation and readings of the programmed meters, CWD has now started leak discovery efforts in areas showing higher water loss. The process of discovery will be done in areas with the highest loss first and progress to lower loss areas. Several smaller leaks have been located and repaired thus far however, due to multiple worker being off for Covid quarantine we are running with a bare minimum number of staff for the next 2-3 weeks which in turn is slowing our efforts at this time.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Webb", is written above the printed name.

Tim Webb
General Manager
