KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 109

Responding Witness: Paul W. Thompson / Kent W. Blake

Q-109. Please list and describe all cost savings programs implemented from the time of the Company's last rate case through the present.

A-109. As explained in Mr. Blake's testimony, under the Company's long-standing business philosophy, KU uses the same criteria as that of the Commission in evaluating its practices and operations and seeks the most effective, least-cost option that will ensure the delivery of safe and reliable service. This well-established philosophy is employed in a rigorous capital project approval process that is detailed in Exhibit KWB-2, Capital and Investment Review Policy, and the similar review and approval process used for contracts and other disbursements. In addition, KU's long-standing policy requires that all procurement contracts be competitively bid, subject to limited exceptions. Finally, KU's planning and budgeting process, for the reasons discussed in Mr. Blake's testimony, improves efficiency and productivity.

KU has implemented numerous programs to achieve efficiency and productivity. These programs are described in detail in the testimony of Paul W. Thompson. While the implementation of some programs may result in cost savings, tracking cost savings is impractical if not impossible given the many operational factors and variables that exist and the dynamic of operating a vertically-integrated utility system.

Below is a listing of programs KU has implemented to achieve efficiency and productivity since new rates went into effect on January 1, 2013, following the last rate case:

1. Remote performance monitoring for each coal fired facility except Green River. This initiative assists with detecting anomalies that could indicate faults or emerging issues with plant equipment and systems. The program collects data from distributed control systems and sends it to Black and Veatch. Black and Veatch monitors and analyzes the data using models that track normal operating ranges of data points. During analysis, Black and Veatch looks for points that are operating outside of these normal ranges. If abnormal parameters are observed, Black and Veatch alerts the

Companies with key information to help diagnose the issue and return the parameter to normal operational values. The Companies have improved efficiency by avoiding costly failures and maintaining equipment properly. In cases where damage or failure is unavoidable, Black and Veatch's analysis helps identify the cause of the failure and steps to prevent reoccurrence.

2. Reorganization of safety and technical training. The Companies reorganized their safety and technical training program to centralize these functions across all lines of business. A centralized safety department paves the way for enhanced communication and best practice sharing Company wide, which should help reduce or prevent incidents and lead to efficiencies in processes by establishing common expectations.

3. Faulted circuit indicators. Faulted circuit indicators ("FCIs") are devices installed on lines and cables to provide a visible indication of the detection of fault current and are used to help identify and isolate faulted line and cable sections. The program speeds up the identification and isolation of faulted cable segments, which is a time consuming process, and speeds up the restoration of service to unfaulted sections. Without FCIs, multi-segment, underground residential installations must be isolated and tested one by one. FCIs allow faulted cable sections to be identified by visual inspection and minimal testing, thus saving time.

4. Replace aging substation infrastructure. The Companies have initiated a collection of programs that covers the annual replacement of critical- and maintenance-intensive substation equipment. Efficiency and productivity are gained by replacement under planned conditions rather than an unplanned, emergency condition. Planned work provides efficient use of resources, shorter and more efficient response time, and synergies with other work occurring in the same time window.

5. New asset and resource management ("ARM") software. The Companies licensed new software to help manage work and resources after the software previously used by the Companies was no longer supported. The new ARM software ensures efficiency, consistency, and accuracy with high-volume work management, including resource integration and tracking, documentation, and reporting.

6. Mobile workforce management. The Companies have recently implemented new software called Mobile Workforce Management ("MWM"). MWM supports the Companies' restoration processes and enhances the efficiency and timeliness of critical outage information exchange between customers, field personnel, and the distribution control center. The MWM application enables mobile assignment of repair, operations, and maintenance tasks to truck laptop computers. Employees

complete work tasks electronically, thus allowing for efficient and timely processing by back-office personnel.

7. Master facility plan. The Companies completed a master facility plan in 2014. While completing the plan, the Companies assessed each facility's status and functional space capabilities. The information learned will assist with investment decisions in long-term operational planning.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 110

Responding Witness: Paul W. Thompson / Kent W. Blake

Q-110. Please describe each program and provide the anticipated savings as well as the actual savings realized to date.

A-110. See the response to Question No. 109.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 111

Responding Witness: Paul W. Thompson / Kent W. Blake

Q-111. Include calculations of savings amounts and explain any assumptions used in such calculations.

A-111. No such calculations exist. See the response to Question No. 109.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 112

Responding Witness: Paul W. Thompson / Kent W. Blake

Q-112. For each cost-saving program listed, provide the cost-benefit analyses. Show the impact of each cost saving program on the fully forecasted test period. If there are none, explain why.

A-112. See the response to Question No. 109. No such cost-benefit analyses exist. As a matter of our long-standing business philosophy, KU uses the same criteria as that of the Commission in evaluating our practices and operations. KU seeks the most effective, least-cost option that will ensure the delivery of safe and reliable service. The assumption contained in the request for information (i.e., net-benefits) is not applicable in this case. To the extent cost savings result from any program, the impact of such cost savings is embedded in the test period.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 113

Responding Witness: Christopher M. Garrett

Q-113. Provide the amount of customer service deposits by month for each year 2010 through 2014, and the projected deposits for the fully forecasted test period.

A-113. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 114

Responding Witness: John J. Spanos

Q-114. Please identify all abnormal, atypical, and/or unusual historical plant activity of the Company's investment which occurred and was removed from the historical analysis of the Company's investment/data for depreciation purposes.

A-114. There was not any data considered abnormal, atypical and/or unusual for depreciation purposes for Cane Run Unit 7 Generating Station. Additionally, there were no historical data for Accounts 341 through 346 in the life analyses of the 2011 Depreciation Study considered abnormal, atypical and/or unusual.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 115

Responding Witness: John J. Spanos

Q-115. Please state, by account, the values of additions, retirements, gross salvage, cost of removal, etc., that were modified from the Company's continuing property records for inclusion and presentation in its most recent depreciation study and work papers. Each adjustment should be categorized by year, account, and dollar amount, (e.g., 2008 gross salvage value for account XXX was adjusted to reflect a reimbursement rather than gross salvage). Further, provide the reason for each modification.

A-115. There were no entries that were modified from the Company's continuing property records for inclusion in its most recent depreciation study. However, there were a few entries that have been coded as non-recurring and not part of the life or net salvage analyses.

The attached document sets forth entries which were adjusted. The entries include Account, transaction type, transaction year, retirement amount, cost of removal and description of entry. Additionally, there are three retirements classified as final retirements which were not included in the interim life analyses.

<u>Pineville Unit 3</u>	
a. Date of retirement	December 2002
b. Amount of retirement	$9,934,337
c. Accounts	311 - 316
d. Reason for retirement	Catastrophic Failure
<u>Green River Units 1 & 2</u>	
a. Date of retirement	March 2004
b. Amount of retirement	$17,235,843
c. Accounts	311 - 316
d. Reason for retirement	End of economic useful life
<u>Tyrone Units 1 & 2</u>	
a. Date of retirement	March 2007
b. Amount of retirement	$5,380,367
c. Accounts	311 - 316
d. Reason for retirement	End of economic useful life

Kentucky Utilities

Sales and Reimbursements Excluded from Depreciation Study Analysis for the Period 2002-2011

Account	Transaction Type	Transaction Year	Retirement	Cost of Removal	Description
31500	Reimbursed Retirement	2007	$ (343,771.79)	$ (287,143.10)	Insurance proceeds and associated retirement for Brown Unit 3 switchgear destroyed by fire
34300	Reimbursed Retirement	2004	$ -	$ (1,751,508.79)	Insurance proceeds related to failure of Brown CT 7 turbine blades, vanes and associated equipment
34300	Reimbursed Retirement	2003	$ (1,776,053.64)	$ -	Retirement reimbursed by insurance proceeds related to failure of Brown CT 7 turbine blades, vanes and associated equipment
39010	Sale	2001	$ (3,052,270.00)	$ (2,640,441.00)	Sale of leased assets that occurred at LG&E & KU merger

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 116

Responding Witness: John J. Spanos

Q-116. In any instance where the Company relied on typical ranges from other utilities, if any, provide the corresponding data associated with the typical industry data identifying the utility, the specific value associated with that utility and when each utility's regulator approved such a value.

A-116. The attached document sets forth typical life spans of other utility's combined cycle facilities which were considered in determining the life span of Cane Run Unit 7. All of these life spans were determined within the last ten years.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 117

Responding Witness: John J. Spanos

Q-117. Please provide a copy of all industry comparative data reviewed and relied upon by the Company during the process of determining appropriate depreciation mortality characteristics for the Company's investment.

A-117. The attached document sets forth industry comparative data reviewed and considered when determining the interim survivor curve (mortality characteristics) for the Cane Run Unit 7 facility.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 118

Responding Witness: Christopher M. Garrett

Q-118. Provide all internal and external audit reports, management letters, consultants' reports etc. from 2010-2014, inclusive, which address in any way, the Company's property accounting and/or depreciation practices.

A-118. For the 2011 Depreciation Study see Tab 49 of the Filing Requirements. For the 2011 Life Assessment Study see the response to AG 1-47 in Case No. 2012-00221. See attached for the Cane Run 7 Generating Station depreciation rate calculations and the steam account reserve study reclassification by component.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 119

Responding Witness: Christopher M. Garrett

Q-119. Please provide a copy of the Company's current capitalization policy. If the policy has changed at all since 2010, please provide a copy of all prior policies in effect during any portion of that period. Please identify and explain all changes since the most recent depreciation study which might affect existing depreciation rates, as well as the proposed depreciation rates for Cane Run 7.

A-119. See attached. The changes to the capitalization policy had no effect on the existing depreciation rates or the proposed depreciation rates for Cane Run 7.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authorizing the expenditure of funds;
3. controlling and reporting of capital expenditures;
4. developing review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is performing and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following two sets of criteria should be used to determine whether or not capitalization is appropriate:

The improvement must meet both of the following criteria:

1. Be a minimum of $2,000.
2. Meet the definition of a capitalizable cost under the FERC Uniform System of Accounts.

In addition, the improvement must do at least one of the following criteria:

1. Extend the original useful life of the asset.
2. Increase the throughput or capacity of the asset.
3. Increase operating efficiency.

Questions relating to the categorization of an expenditure as capital or O&M expense should be directed to Property Accounting. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See Property Accounting's Home Page.

Scope

This policy applies to LG&E and KU Energy LLC ("LKE" or "the Company") and its subsidiaries.

General Requirements

1. All capital spending that is expected to occur during the current year must be budgeted in the approved Business Plan (BP).
2. There will be no carry-over of spending capital authority from one year to the next.
3. An Authorization for Investment Proposal (AIP) must be completed in PowerPlant for all capital spending projects.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

4. Projects with a total cost of $2,000 or less will be expensed.
5. An Investment Proposal (IP) and Capital Evaluation Model (CEM) must be completed for all capital spending projects greater than $500,000 unless otherwise approved by Financial Planning and Analysis (FP&A).
6. The Information Technology Department must approve all capital projects involving anything related to information technology.
7. All investment projects greater than $1,000,000 require the approval of the Investment Committee (IC).
8. The IC is required to approve any overrun of $500,000 or greater on previously approved proposals. If the previous proposal was below the IC threshold and the revised amount is over the respective IC threshold, the proposal needs to be approved by the IC regardless of the increase amount.

Capital Planning

The BP is used to inform senior management of future capital-spending projections. These plans are prepared annually on a line of business (LOB) basis and include the forecast of capital projections during the most current annual planning period. The first year of the BP, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the BP, each LOB will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's BP for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the Authority Limit Matrix approval requirements and all other reviews as stated on the AIP in PowerPlant. Projects are not considered approved until appropriate approvals are obtained.

The AIP is used to request the appropriate approvals for spending on capital projects. A completed AIP is subject to the following conditions:

- An AIP must be submitted and approved in PowerPlant prior to committing to or incurring any capital expenditure.
- Approvals must be obtained up to the levels designated in the Authority Limit Matrix for the dollar amount of any project (which may include multiple projects). The combined dollar amount on multiple projects grouped together using the Budget Item field in PowerPlant is the determinant for approval levels.
- Any AIP over $500,000 must include an IP and CEM and must be submitted to FP&A for approval.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

- A completed AIP must be submitted and approved prior to the disposal of any capital asset. In addition, an IP must be submitted for disposal projects of $500,000 or more.
- A revised AIP must be submitted for significant project overruns (see below).

Investment Proposal: The IP is used to explain in detail the nature and justification of the capital project. Capital projects over $500,000 on a burdened basis require the submittal of an IP and CEM along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The IP template is published on the FP&A intranet website and must include the following sections at a minimum:

- Header – Include the project name, total expenditures, project number, LOB, who prepared the project and who will present the project (if applicable).
- Executive Summary (½-page length recommended) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Include financial benefits, funding information and qualitative reasons why this proposal should be pursued.
- Background – Explain the history of the project that has led to the need for the project.
- Project Description – Include project scope, timeline and project cost.
- Economic Analysis and Risks – Include bid summary, assumptions, financial summary, environmental impact, risks and other alternatives considered (including their net present value revenue requirements [NPVRR] per the CEM, if applicable).
- Conclusion and recommendation.
- It is recommended that the IP not exceed 5 pages.

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget must either be offset by a like reduction in one or more budgeted projects, approved by the Resource Allocation Committee (RAC) if subject to the RAC Tenets or have prior written approval by the LKE Chief Financial Officer (CFO) and Chief Executive Officer (CEO). FP&A and/or Forecast and Budgeting-Corporate (F&B) must approve AIPs for unbudgeted projects (see *FP&A and F&B Approvals* below). Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, approved by the RAC if subject to the its Tenets or the additional funding requires prior written approval by the LKE CFO and CEO. These projects are considered "unbudgeted" in PowerPlant since the full funding is not coming from the original budget for that project. FP&A and/or F&B must approve AIPs for under-funded projects (see *FP&A and F&B Approvals* below).

LG&E and KU Board and PPL approvals: Any budget item over $30 million requires the approval of the LG&E and KU Energy Board and the PPL CEO. Budget items over $100

Capital and Investment Review

million additionally require the approval of the PPL Finance Committee. Cost overruns greater than 20% on budget items approved by the PPL Finance Committee must be re-approved by the Committee before spending occurs. If an overrun on a budget item results in a total cost of $100 million or more, the proposal must be approved by the PPL Finance Committee before spending occurs.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or $100,000 over, whichever is less, subject to a minimum of $25,000) to complete the project, **a revised AIP must be completed and the revised forecasted project cost must be included in the capital forecast to be reviewed and approved by the RAC and IC. Additionally, when completing the revised AIP, the following conditions apply (see Capital Appendix):**

- If the project overrun is expected to be $500,000 or greater and the project had been approved by the IC, the revised project, including a revised IP and CEM, must be presented and re-approved by the IC.
- If project overrun is $100,000 or more, but less than $500,000, provide a clear description of the overrun in the revised AIP to FP&A. If the total project is greater than $500,000, whether it was below or above this threshold previous to the overrun, an IP and CEM are required . If the project is $500,000 or below, no IP or CEM are required.
- If the previous project proposal was below the IC threshold and revised amount is over the IC threshold, the proposal needs to be approved by the IC regardless of the increased amount. A revised IP and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects, or the overspending requires prior written approval by the LKE CFO and CEO. Project overruns of greater than $500,000 are subject to the RAC Tenets.
- Revised AIPs must be approved for the total revised dollar amount using the approval limits in the Authority Limit Matrix.

FP&A and F&B Approvals: Unbudgeted projects or those projects requiring an IP and CEM (i.e., over $500,000) must include FP&A and F&B review and approval. Unbudgeted projects less than $100,000 require F&B Manager approval and those $100,000 and over require FP&A Director approval.

Budgeted projects less than $500,000 are approved as normally required by the Authority Limit Matrix and do not require the approval of FP&A and F&B.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed $500,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described

elsewhere in this policy. Each Generation miscellaneous project must be budgeted, but an AIP need not be prepared for it and it will not be activated in PowerPlant. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project number for funding as funds are being moved from one project to another. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. The new project will still need to be marked as "unbudgeted" in PowerPlant and will have to be approved by FP&A and/or F&B.

Other Miscellaneous Projects: Several lines of business use miscellaneous projects which are budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. (Examples include various facilities improvements and miscellaneous substation projects.) These projects are opened and closed on an annual basis. The projects are authorized and approved for the entire budgeted amount when they are opened. Pertinent information regarding the assets and locations of the capital expenditures should be and sent to Property Accounting when the projects are completed.

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement greater than $25,000 being finalized and evidence of such review must be attached to the AIP. This does not apply to customer refund agreements.
- If a fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under $1 million, the net spending amount may be used to determine whether an IP and CEM are required.
- Third Party jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under $1 million neither the IP nor the CEM are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Preliminary Survey and Investigation: Projects that are originally set up for preliminary survey and investigation are treated as indirect projects and are auto approved and opened in PowerPlant. Once the preliminary survey and investigation work is complete, the determination must be made if the project will move forward as capital or be abandoned and expensed. If the project moves forward as capital, a new project must be created in PowerPlant and must follow the approval levels based on the Authority Limit Matrix. It is the responsibility of the budget coordinator to notify Property Accounting and make the appropriate accounting transactions to move preliminary survey and investigation charges to capital or to expense as appropriate.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency which is defined as one of the following: 1) the expenditure is needed to address an immediate safety risk; 2) the equipment has failed; or 3) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the necessary paperwork and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an early activated AIP are as follows:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP approval process. FP&A and F&B must also be copied on this email. Should the AIP be for an unbudgeted project, approval from FP&A and F&B will be required for the early activation.

- In the event the project has been previously approved by the IC, the above email from the highest LOB authority would not be required. Instead, verification from FP&A that the project had indeed been approved by the IC would be sufficient approval.

- The approval request email must include the following information:
    - Project number
    - Project description
    - Total project amount
    - Name of the individual whose highest level of authority is required, and any associated delegation of authority (DOA)

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

- Description of the need for the early activation
- For an unbudgeted project, the budgeted project number that will cover the unbudgeted spending.

- Additionally, for either scenario 1 or 2 above, an automated AIP must be submitted for $10,000 and approved by the project manager and budget coordinator for the project in order for the project to be moved to "open" status in PowerPlant.

- Property Accounting will maintain a log of early activated projects, and copies of the email approvals will be filed with the AIP.

- A revised AIP (for the full project amount) for all projects that are early activated must be received by Property Accounting, or FP&A if necessary, with all required approvals, as soon as possible, but no later than 30 business days after the early activation. Repeated failure to comply with this timing may require email approval by the appropriate LOB VP for early activation of all future AIPs.

Project In-Service and/or Completion

Upon project in-service and/or completion, the project manager or budget coordinator most familiar with the project is required to do the following:

1. Verify completion date (if the date is not correct, it needs to be updated in PowerPlant). Entering a completion date changes the project status to "completed".
2. Verify actual in-service date (if the date is not correct, it needs to updated in PowerPlant). Entering an in-service date without a completion date changes the project status to "in-service". Verify actual installed costs and actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
3. Verify units of property installed and units of property retired (report to Property Accounting if different from AIP).

Post Completion Audits

Budget coordinators are required to perform a post-completion audit (PCA) of projects as discussed in the guidelines below. The review must be provided to FP&A and the IC.

- Projects greater than $5,000,000 (excluding blankets) must have a PCA performed within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of FP&A, a random audit of anything less than $5,000,000 can be requested for auditing purposes.
- A PCA template is available on the FP&A website. Also, samples of PCAs are available on the website under "Examples". Transmission PCAs are not included on the website due to the Standards of Conduct.
- In case of impairment, a PCA is always required.

Capital and Investment Review

Leases

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate LOB, Financial Accounting and Analysis and the Tax department to determine if the lease is structured as a capital or operating lease. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the LKE Lease Policy for more details.

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is prepared (i.e., Gas and Electric Distribution New Business by area). The blanket projects hold a "bucket" of budget dollars which is used to fund specific tasks under $500,000 as they are identified throughout the year. For Gas and Electric Distribution and Metering, blanket projects are not closed each year, but they are re-budgeted each year and are unitized on an "as-spent" basis. For Transmission, blanket projects are opened and closed on an annual basis.

Authorization: Each December, a list of all budgeted blanket projects for the next year must be submitted to the IC for approval, along with the forecast for the current year's blanket capital spending. At the discretion of the IC, some blanket projects (e.g., Gas Leak Mitigation or Pole Inspection and Treatment) may require an IP and CEM and will not be included in the routine blanket listing. These projects will be presented to the IC in December as separate projects. An AIP or PCA is not required for the routine blanket capital projects.

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a $500,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy. Should a task on a blanket project exceed $500,000, then appropriate corrective action (i.e., AIP, CEM, etc.) and charge corrections via VOLTS and CODs to correct the charges to the correct project should be completed as soon as possible.

Criteria for Creating a New Blanket Project: New blanket capital projects require the approval of both Property Accounting and FP&A. To open new blanket projects, a partial AIP in the amount of $10,000 must go through the approval process in PowerPlant. New blanket capital projects created after the budget process is complete are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

Monthly Spending Report: The budget coordinator for each LOB incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects (including those approved under a stand-alone IP) comparing the total year-to-date spending against the approved budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to FP&A and Property Accounting for review by the eleventh business day of the following month.

Penalties for Noncompliance
Failure to comply with this policy may result in disciplinary action, up to and including discharge.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authorizing the expenditure of funds;
3. controlling and reporting of capital expenditures;
4. developing review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is performing and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following two sets of criteria should be used to determine whether or not capitalization is appropriate:

The improvement must meet both of the following criteria:

1. Be a minimum of $2,000.
2. Meet the definition of a capitalizable cost under the FERC Uniform System of Accounts.

In addition, the improvement must do at least one of the following criteria:

1. Extend the original useful life of the asset.
2. Increase the throughput or capacity of the asset.
3. Increase operating efficiency.

Questions relating to the categorization of an expenditure as capital or O&M expense should be directed to Property Accounting. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See Property Accounting's Home Page.

Scope

This policy applies to LG&E and KU Energy LLC ("LKE" or "the Company") and its subsidiaries.

General Requirements

1. All capital spending that is expected to occur during the current year must be budgeted in the approved Business Plan (BP).
2. There will be no carry-over of spending capital authority from one year to the next.
3. An Authorization for Investment Proposal (AIP) must be completed in PowerPlant for all capital spending projects.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

4. Projects with a total cost of $2,000 or less will be expensed.
5. An Investment Proposal (IP) and Capital Evaluation Model (CEM) must be completed for all capital spending projects greater than $500,000 unless otherwise approved by Financial Planning and Analysis (FP&A).
6. The Information Technology Department must approve all capital projects involving anything related to information technology.
7. All investment projects greater than $1,000,000 require the approval of the Investment Committee (IC).
8. The IC is required to approve any overrun of $500,000 or greater on previously approved proposals. If the previous proposal was below the IC threshold and the revised amount is over the respective IC threshold, the proposal needs to be approved by the IC regardless of the increase amount.

Capital Planning

The BP is used to inform senior management of future capital-spending projections. These plans are prepared annually on a line of business (LOB) basis and include the forecast of capital projections during the most current annual planning period. The first year of the BP, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the BP, each LOB will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's BP for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the Authority Limit Matrix approval requirements and all other reviews as stated on the AIP in PowerPlant. Projects are not considered approved until appropriate approvals are obtained.

The AIP is used to request the appropriate approvals for spending on capital projects. A completed AIP is subject to the following conditions:

- An AIP must be submitted and approved in PowerPlant prior to committing to or incurring any capital expenditure.
- Approvals must be obtained up to the levels designated in the Authority Limit Matrix for the dollar amount of any project (which may include multiple projects). The combined dollar amount on multiple projects grouped together using the Budget Item field in PowerPlant is the determinant for approval levels.
- Any AIP over $500,000 must include an IP and CEM and must be submitted to FP&A for approval.

Capital and Investment Review

- A completed AIP must be submitted and approved prior to the disposal of any capital asset. In addition, an IP must be submitted for disposal projects of $500,000 or more.
- A revised AIP must be submitted for significant project overruns (see below).

Investment Proposal: The IP is used to explain in detail the nature and justification of the capital project. Capital projects over $500,000 on a burdened basis require the submittal of an IP and CEM along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The IP template is published on the FP&A intranet website and must include the following sections at a minimum:

- Header – Include the project name, total expenditures, project number, LOB, who prepared the project and who will present the project (if applicable).
- Executive Summary (½-page length recommended) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Include financial benefits, funding information and qualitative reasons why this proposal should be pursued.
- Background – Explain the history of the project that has led to the need for the project.
- Project Description – Include project scope, timeline and project cost.
- Economic Analysis and Risks – Include bid summary, assumptions, financial summary, environmental impact, risks and other alternatives considered (including their net present value revenue requirements [NPVRR] per the CEM, if applicable).
- Conclusion and recommendation.
- It is recommended that the IP not exceed 5 pages.

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget must either be offset by a like reduction in one or more budgeted projects, approved by the Resource Allocation Committee (RAC) if subject to the RAC Tenets or have prior written approval by the LKE Chief Financial Officer (CFO) and Chief Executive Officer (CEO). FP&A must approve AIPs for unbudgeted projects (see *FP&A Approvals* below). Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, approved by the RAC if subject to the its Tenets or the additional funding requires prior written approval by the LKE CFO and CEO. These projects are considered "unbudgeted" in PowerPlant since the full funding is not coming from the original budget for that project. FP&A must approve AIPs for under-funded projects (see *FP&A Approvals* below).

LG&E and KU Board and PPL approvals: Any budget item over $30 million requires the approval of the LG&E and KU Energy Board and the PPL CEO. Budget items over $100 million additionally require the approval of the PPL Finance Committee. Cost overruns greater than 20% on budget items approved by the PPL Finance Committee must be re-approved by the

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Committee before spending occurs. If an overrun on a budget item results in a total cost of $100 million or more, the proposal must be approved by the PPL Finance Committee before spending occurs.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or $100,000 over, whichever is less, subject to a minimum of $25,000) to complete the project, **a revised AIP must be completed before the overrun occurs and the following conditions apply (see Capital Appendix):**

- If the project overrun is expected to be $500,000 or greater and the project had been approved by the IC, the revised project, including a revised IP and CEM, must be presented and re-approved by the IC.
- If project overrun is $100,000 or more, but less than $500,000, provide a clear description of the overrun in the revised AIP to FP&A. If the total project is greater than $500,000, whether it was below or above this threshold previous to the overrun, an IP and CEM are required (new or revised). If the project is $500,000 or below, no IP or CEM are required.
- If the previous project proposal was below the IC threshold and revised amount is over the IC threshold, the proposal needs to be approved by the IC regardless of the increase amount. A revised IP and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects, or the overspending requires prior written approval by the LKE CFO and CEO. Project overruns of greater than $500,000 are subject to the RAC Tenets.
- Revised AIPs must be approved for the total revised dollar amount using the approval limits in the Authority Limit Matrix.

FP&A Approvals: Unbudgeted projects or those projects requiring an IP and CEM (i.e., over $500,000) must include FP&A review and approval. Unbudgeted projects less than $100,000 require FP&A manager approval, and those $100,000 and over require FP&A director approval.

Budgeted projects less than $500,000 are approved as normally required by the Authority Limit Matrix and do not require the approval of FP&A.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed $500,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. Each Generation miscellaneous project must be budgeted, but an AIP need not be prepared for it and it will not be activated in PowerPlant. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project

number for funding as funds are being moved from one project to another. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. The new project will still need to be marked as "unbudgeted" in PowerPlant and will have to be approved by FP&A.

Other Miscellaneous Projects: Several lines of business use miscellaneous projects which are budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. (Examples include various facilities improvements and miscellaneous substation projects.) These projects are opened and closed on an annual basis. The projects are authorized and approved for the entire budgeted amount when they are opened. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year. For each task opened, a paper miscellaneous project AIP form must be prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on Property Accounting's Home Page.

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement greater than $25,000 being finalized and evidence of such review must be attached to the AIP. This does not apply to customer refund agreements.
- If a fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under $1 million, the net spending amount may be used to determine whether an IP and CEM are required.
- Third Party jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under $1 million neither the IP nor the CEM are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

Preliminary Engineering: Projects that are originally set up for preliminary engineering are treated as indirect projects and are auto approved and opened in PowerPlant. Once the

preliminary engineering work is complete, the determination must be made if the project will move forward as capital or be abandoned and expensed. If the project moves forward as capital, a new project must be created in PowerPlant and must follow the approval levels based on the Authority Limit Matrix. It is the responsibility of the budget coordinator to notify Property Accounting and make the appropriate accounting transactions to move preliminary engineering charges to capital or to expense as appropriate.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency which is defined as one of the following: 1) the expenditure is needed to address an immediate safety risk; 2) the equipment has failed; or 3) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the necessary paperwork and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an early activated AIP are as follows:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP approval process. FP&A must also be copied on this email. Should the AIP be for an unbudgeted project, approval from FP&A will be required for the early activation.

- In the event the project has been previously approved by the IC, the above email from the highest LOB authority would not be required. Instead, verification from FP&A that the project had indeed been approved by the IC would be sufficient approval.

- The approval request email must include the following information:
    - Project number
    - Project description
    - Total project amount
    - Name of the individual whose highest level of authority is required, and any associated delegation of authority (DOA)
    - Description of the need for the early activation

Capital and Investment Review

- For an unbudgeted project, the budgeted project number that will cover the unbudgeted spending.

- Additionally, for either scenario 1 or 2 above, an automated AIP must be submitted for $10,000 and approved by the project manager and budget coordinator for the project in order for the project to be moved to "open" status in PowerPlant.

- Property Accounting will maintain a log of early activated projects, and copies of the email approvals will be filed with the AIP.

- A revised AIP (for the full project amount) for all projects that are early activated must be received by Property Accounting, or FP&A if necessary, with all required approvals, as soon as possible, but no later than 30 business days after the early activation. Repeated failure to comply with this timing may require email approval by the appropriate LOB VP for early activation of all future AIPs.

Project In-Service and/or Completion

Upon project in-service and/or completion, the project manager or budget coordinator most familiar with the project is required to do the following:

1. Verify completion date (if the date is not correct, it needs to be updated in PowerPlant). Entering a completion date changes the project status to "completed".
2. Verify actual in-service date (if the date is not correct, it needs to updated in PowerPlant). Entering an in-service date without a completion date changes the project status to "in-service". Verify actual installed costs and actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
3. Verify units of property installed and units of property retired (report to Property Accounting if different from AIP).

Post Completion Audits

Budget coordinators are required to perform a post-completion audit (PCA) of projects as discussed in the guidelines below. The review must be provided to FP&A and the IC.

- Projects greater than $5,000,000 (excluding blankets) must have a PCA performed within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of FP&A a random audit of anything less than $5,000,000 can be requested for auditing purposes.
- A PCA template is available on the FP&A website. Also, samples of PCAs are available on the website under "Examples". Transmission PCAs are not included on the website due to the Standards of Conduct.
- In case of impairment, a PCA is always required.

Capital and Investment Review

Leases

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate LOB, Financial Accounting and Analysis and the Tax department to determine if the lease is structured as a capital or operating lease. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the LKE Lease Policy for more details.

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is prepared (i.e., Gas and Electric Distribution New Business by area). The blanket projects hold a "bucket" of budget dollars which is used to fund specific tasks under $500,000 as they are identified throughout the year. For Gas and Electric Distribution and Metering, blanket projects are not closed each year, but they are re-budgeted each year and are unitized on an "as-spent" basis. For Transmission, blanket projects are opened and closed on an annual basis. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year.

Authorization: Each December, a list of all budgeted blanket projects for the next year must be submitted to the IC for approval, along with the forecast for the current year's blanket capital spending. At the discretion of the IC, some blanket projects (e.g., Gas Leak Mitigation or Pole Inspection and Treatment) may require an IP and PCA and will not be included in the routine blanket listing. These projects will be presented to the IC in December as separate projects. An AIP or PCA is not required for the routine blanket capital projects.

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a $500,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy. Should a task on a blanket project exceed $500,000, then appropriate corrective action (i.e., AIP, CEM, etc.) and charge corrections via VOLTS and CODs to correct the charges to the correct project should be completed as soon as possible. Miscellaneous type blankets, such as small tools and transmission projects, should have a paper miscellaneous AIP prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on Property Accounting's Home Page.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Criteria for Creating a New Blanket Project: New blanket capital projects require the approval of both Property Accounting and FP&A. To open new blanket projects, a partial AIP in the amount of $10,000 must go through the approval process in PowerPlant. New blanket capital projects created after the budget process is complete are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

Monthly Spending Report: The budget coordinator for each LOB incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects (including those approved under a stand-alone IP) comparing the total year-to-date spending against the approved budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to FP&A for review by the eleventh business day of the following month. FP&A, after reviewing, will send the report to Property Accounting.

Penalties for Noncompliance
Failure to comply with this policy may result in disciplinary action, up to and including discharge.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authorizing the expenditure of funds;
3. controlling and reporting of capital expenditures;
4. developing review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is performing and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following criteria should be used to determine whether or not capitalization is appropriate:

1. Does the improvement extend the original useful life of the asset?
2. Does the improvement increase the throughput or capacity of the asset?
3. Does the improvement increase operating efficiency?
4. Does the improvement meet the definition of a capitalizable cost under the FERC Uniform System of Accounts?

If the answer is yes to any of the above questions, capitalization is appropriate for the project. Questions relating to the categorization of an expenditure as capital or O&M expense should be directed to Property Accounting. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See Property Accounting's Home Page.

Scope

This policy applies to LG&E and KU Energy LLC ("LKE" or "the Company") and its subsidiaries.

General Requirements

1. All capital spending that is expected to occur during the current year must be budgeted in the approved Medium Term Plan (MTP).
2. There will be no carry-over of spending capital authority from one year to the next.

LG&E AND KU ENERGY LLC Policy

,Date: 02/01/2011

Capital and Investment Review

3. An Authorization for Investment Proposal (AIP) must be completed in PowerPlant for all capital spending projects.
4. Projects with a total cost of $2,000 or less will be expensed.
5. An Investment Proposal (IP) and Capital Evaluation Model (CEM) must be completed for all capital spending projects greater than $300,000 unless otherwise approved by Financial Planning and Controlling (FP&C).
6. The Information Technology Department must approve all capital projects involving anything related to information technology.
7. All investment projects greater than $1,000,000, with the exception of development proposals, require the approval of the Investment Committee (IC). For development proposals and real property, the threshold is $500,000.
8. The IC is required to approve any overrun of $300,000 or greater on previously approved proposals. If the previous proposal was below the IC threshold and the revised amount is over the respective IC threshold, the proposal needs to be approved by the IC regardless of the increase amount.

Capital Planning

The MTP is used to inform senior management of future capital-spending projections. These plans are prepared annually on a line of business (LOB) basis and include the forecast of capital projections during the most current annual planning period. The first year of the MTP, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the MTP, each LOB will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's MTP for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the Authority Limit Matrix approval requirements and all other reviews as stated on the AIP in PowerPlant. Projects are not considered approved until appropriate approvals are obtained.

The AIP is used to request the appropriate approvals for spending on capital projects. A completed AIP is subject to the following conditions:

- An AIP must be submitted and approved in PowerPlant prior to committing to or incurring any capital expenditure.
- Approvals must be obtained up to the levels designated in the Authority Limit Matrix for the dollar amount of any project (which may include multiple projects). The combined dollar

amount on multiple projects grouped together using the Budget Item field in PowerPlant is the determinant for approval levels.

- Any AIP over $300,000, except for development proposals, must include an IP and CEM and must be submitted to FP&C for approval. Development proposals must have other adequate supporting documentation attached and, should they become viable projects, must have an AIP submitted, accompanied by the IP and CEM if over the $300,000 threshold.
- A completed AIP must be submitted and approved prior to the disposal of any capital asset. In addition, an IP must be submitted for disposal projects of $300,000 or more.
- A revised AIP must be submitted for significant project overruns (see below).

Investment Proposal: The IP is used to explain in detail the nature and justification of the capital project. Capital projects over $300,000 on a fully loaded basis require the submittal of an IP and CEM along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The IP template is published on the FP&C intranet website and must include the following sections at a minimum:

- Header – Include the project name, total expenditures, project number, LOB and who will present the project.
- Executive Summary (max ½ page) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Include financial benefits as well as qualitative reasons why this proposal should be pursued.
- Background – Explain why the project is needed.
- Project Description – Include project scope, timeline and project cost.
- Economic Analysis and Risks – Include bid summary, assumptions, financial summary, sensitivities (for proposals to IC only), environmental impact, risks and other alternatives considered.
- Conclusion and recommendation
- It is recommended that the IP not exceed 5 pages.

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget must either be offset by a like reduction in one or more budgeted projects, approved by the Resource Allocation Committee (RAC) if subject to the RAC Tenets or must have prior written approval by the LKE Chief Financial Officer (CFO) and Chief Executive Officer (CEO). FP&C must approve AIPs for unbudgeted projects (see *FP&C Approvals* below). Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, approved by the RAC if subject to the its Tenets or the additional funding requires prior written approval by the LKE CFO and CEO. These projects are considered "unbudgeted" in PowerPlant since the full funding is not coming from the original budget for that project. The FP&C Department must approve AIPs for under-funded projects (see *FP&C Approvals* below).

LG&E and KU Board and PPL approvals: Any budget item over $30 million requires the approval of the LG&E and KU Energy Board and the PPL CEO. Budget items over $100 million additionally require the approval of the PPL Finance Committee. Cost overruns greater than 20% on budget items approved by the PPL Finance Committee must be re-approved by the Committee before spending occurs. If an overrun on a budget item results in a total cost of $100 million or more, the proposal must be approved by the PPL Finance Committee before spending occurs.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or $100,000 over, whichever is less, subject to a minimum of $25,000) to complete the project, **a revised AIP must be completed before the overrun occurs and the following conditions apply (see Capital Appendix):**

- If the project overrun is expected to be $300,000 or greater and the project had been approved by the IC, the revised project, including a revised IP and CEM, must be presented and re-approved by the IC.
- If project overrun is $100,000 or more, but less than $300,000, provide updated financials and an explanation for the overrun to FP&C. If the total project is greater than $300,000, whether it was below or above this threshold previous to the overrun, an IP and CEM are required (new or revised). If the project is $300,000 or below, no IP or CEM are required.
- If the previous project proposal was below the IC threshold and revised amount is over the IC threshold, the proposal needs to be approved by the IC regardless of the increase amount. A revised IP and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects; or the overspending requires prior written approval by the LKE CFO and CEO. Project overruns of greater than $300,000 are subject to the RAC Tenets.
- Revised AIPs must be approved for the total revised dollar amount using the approval limits in the Authority Limit Matrix.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

FP&C Approvals: Unbudgeted projects or those projects requiring an IP and CEM (i.e., over $300,000) must be forwarded to FP&C for review and approval. Unbudgeted projects less than $100,000 require FP&C manager approval, and those $100,000 and over require FP&C director approval.

Budgeted projects less than $300,000 are approved as normally required by the Authority Limit Matrix and do not require the prior approval of FP&C.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed $300,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. Each Generation miscellaneous project must be budgeted, but an AIP need not be prepared for it and it will not be activated in PowerPlant. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project number for funding. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. However, as funds are being moved from one project to another, the new project will still need to be marked as "unbudgeted" in PowerPlant and will have to be approved by FP&C.

Other Miscellaneous Projects: Several lines of business use miscellaneous projects which are budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. (Examples include various facilities improvements and miscellaneous substation projects.) These projects are opened and closed on an annual basis. The projects are authorized and approved for the entire budgeted amount when they are opened. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year. For each task opened, a paper miscellaneous project AIP form must be prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on Property Accounting's Home Page.

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement greater than $25,000 being finalized

and evidence of such review must be attached to the AIP. This does not apply to customer refund agreements.

- If a fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under $1 million, the net spending amount may be used to determine whether an IP and CEM are required.
- Third Party jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under $1 million neither the IP nor the CEM are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

Preliminary Engineering: Projects that are originally set up for preliminary engineering are treated as indirect projects and are auto approved and opened in PowerPlant. Once the preliminary engineering work is complete, the determination must be made if the project will move forward as capital or be abandoned and expensed. If the project moves forward as capital, a new project must be created in PowerPlant and must follow the approval levels based on the Authority Matrix. It is the responsibility of the budget coordinator to notify Property Accounting and make the appropriate accounting transactions to move preliminary engineering charges to capital or to expense as appropriate.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency which is defined as one of the following: 1) the expenditure is needed to address an immediate safety risk; 2) the equipment has failed; or 3) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system.

   OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the

necessary paperwork, and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an early activated AIP:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP approval process. FP&C must also be copied on this email. Should the AIP be for an unbudgeted project, approval from FP&C will be required for the early activation.

- In the event the project has been previously approved by the IC, the above email from the highest LOB authority would not be required. Instead, verification from FP&C that the project had indeed been approved by the IC would be sufficient approval.

- The approval request email must include the following info:
    - Project number
    - Project description
    - Total project amount
    - Name of the individual whose highest level of authority is required, and any associated delegation of authority (DOA)
    - Description of the need for the early activation
    - For an unbudgeted project, the budgeted project number that will cover the unbudgeted spending.

- Additionally, for either scenario 1 or 2 above, an automated AIP must be submitted for $10,000 and approved by the project manager and budget coordinator for the project in order for the project to be moved to “open” status in PowerPlant.

- The Property Accounting Department will maintain a log of early activated projects, and copies of the email approvals will be filed with the AIP.

- A revised AIP (for the full project amount) for all projects that are early activated must be received by the Property Accounting Department, or FP&C if necessary, with all required approvals, within 10 business days of the early activation. Repeated failure to comply

with this timing will require email approval by the appropriate LOB VP for early activation of all future AIPs.

Project In-Service and/or Completion

Upon project in-service and/or completion, the project manager or budget coordinator most familiar with the project is required to do the following:

1. Verify completion date (if the date is not correct, it needs to be updated in PowerPlant). Entering a completion date changes the project status to "completed".
2. Verify actual in-service date (if the date is not correct, it needs to updated in PowerPlant). Entering an in-service date without a completion date changes the project status to "in-service". Verify actual installed costs and actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
3. Verify units of property installed and units of property retired (report to Property Accounting if different from AIP).

Post Completion Audits

Budget coordinators are required to perform a post-completion audit (PCA) of projects as discussed in the guidelines below. The review must be provided to FP&C and the IC.

- Projects greater than $5,000,000 (excluding blankets) must have a PCA performed within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of FP&C a random audit of anything less than $5,000,000 can be requested for auditing purposes.
- A PCA template is available on the FP&C website. Also, samples of PCAs are available on the website under "Examples". Transmission PCAs are not included on the website due to the Standards of Conduct.
- In case of impairment, a PCA is always required.

Leases

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate LOB, Financial Accounting and Reporting and the Tax department to determine if the lease is structured as a capital or operating lease. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the LKE Lease Policy for more details.

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is

Capital and Investment Review

prepared (i.e., Gas and Electric Distribution New Business by area.) The blanket projects hold a "bucket" of budget dollars which is used to fund specific tasks under $300,000 as they are identified throughout the year. For Distribution and Metering, blanket projects are not closed each year but they are re-budgeted each year and are unitized on an "as-spent" basis. For Transmission, blanket projects are opened and closed on an annual basis. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year.

Authorization: Each December, a list of all budgeted blanket projects for the next year must be submitted to the IC for approval, along with the forecast for the current year's blanket capital spending. At the discretion of the IC, some blanket projects (e.g., Gas Leak Mitigation or Pole Inspection and Treatment) may require an IP and PCA and will not be included in the routine blanket listing. These projects will be presented to the IC in December as separate projects. An AIP or PCA is not required for the routine blanket capital projects.

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a $300,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy. Should a task on a blanket project exceed $300,000, then appropriate corrective action, i.e. AIP, CEM etc., and charge corrections via VOLTS and CODs to correct the charges to the correct project should be completed as soon as possible. Miscellaneous type blankets, such as small tools and transmission projects, should have a paper miscellaneous AIP prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on Property Accounting's Home Page.

Criteria for Creating a New Blanket Project: New blanket capital projects require the approval of both Property Accounting and FP&C. To open new blanket projects, a partial AIP in the amount of $10,000 must go through the approval process in PowerPlant. New blanket capital projects created after the budget process is complete are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Monthly Spending Report: The budget coordinator for each LOB incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects (including those approved under a stand-alone IP) comparing the total year-to-date spending against the approved budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to FP&C for review by the eleventh business day of the following month. FP&C, after reviewing, will send the report to Property Accounting.

Penalties for Noncompliance
Failure to comply with this policy may result in disciplinary action, up to and including discharge.

Reference: Authority Limit Matrix; CEM; Lease Policy; Resource Allocation Committee Tenets; and Investment Proposal forms.

E.ON U.S. LLC Policy

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authority for the expenditure of funds;
3. control and reporting of capital expenditures;
4. development of review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is operating and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following criteria should be used to determine whether or not capitalization is appropriate:

1. Does the improvement extend the original useful life of the asset?
2. Does the improvement increase the throughput or capacity of the asset?
3. Has operating efficiency been improved?
4. Does the expenditure meet the definition of a capitalizable cost under the FERC Uniform System of Accounts?

If you answer yes to any of the above questions, capitalization is appropriate for your project. Questions relating to the categorization of an expense as capital or O&M should be referred to Property Accounting for utility matters or the appropriate fixed-asset accounting group for non-utility operations. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See Property Accounting's Home Page.

Scope

This policy applies to E.ON U.S. LLC and its subsidiaries' (E.ON U.S. or the Company).

General Requirements

1. All capital spending that is expected to occur during the year must be budgeted in the approved MTP budget .
2. There will be no carry-over of spending capital authority from one year to the next.
3. An Authorization for Investment Proposal (AIP) form must be completed for **all** capital spending projects.
4. Projects with a total cost of $2,000 or less will be expensed.
5. An Investment Proposal must be completed for all capital spending projects greater than $300,000.

E.ON U.S. LLC Policy

Capital and Investment Review

6. The Information Technology Department must approve **all** capital projects involving anything related to information technology.
7. All investment projects greater than $1,000,000 with the exception of development proposals, require the approval of the Investment Committee (IC). For Development Proposals and Real Property the threshold is $500,000.

8. The Investment Committee is required to approve any overrun of $300,000 or greater on previously approved proposals. However, the Investment Committee has requested to be informed about all overruns which are $100k or greater bi-annually. Therefore, all overruns on previously approved proposals which are $100k or greater must be reported to Financial Planning and Controlling. If the previous proposal was below the Investment Committee threshold and the revised amount is over the respective Investment Committee threshold, the proposal needs to be approved by the Investment Committee regardless of the increase amount.

Capital Planning

The multi-year Capital Investment Plan will be used to inform senior management of future capital-spending projections. These plans are prepared annually on an operating business unit (OBU) basis and include the forecast of capital projections during the annual planning period. The first year of the capital investment plan, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the Three-year Capital Investment Plans, each OBU will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's Three-year Capital Investment Plan for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the Authority Limit Matrices signature requirements and all other signature reviews as stated on the face of the AIP. Projects are not considered approved until appropriate signatures are obtained as stated on the AIP form.

The AIP form is used to request the appropriate approvals for spending on capital projects. A completed AIP is required under the following conditions:

- An AIP form must be submitted and approved prior to committing to or incurring any capital expenditure. Approvals must be obtained in the sequence shown in the approval section of the AIP form.
- Approvals must be obtained up to the levels designated in the Authority Limit Matrices for the dollar amount of any project (which may include multiple AIPs).

E.ON U.S. LLC Policy

Capital and Investment Review

- Any AIP over $300,000, except for development proposals, must include an Investment Proposal and Capital Evaluation Model (CEM) and must be submitted to the Financial Planning & Controlling Department for approval. Development proposals must have other adequate supporting documentation attached and, should they become viable projects, must have a revised AIP submitted, accompanied by the Investment Proposal and Capital Evaluation Model if over the $300,000 threshold.
- A completed AIP form must be submitted and approved prior to the disposal of any capital asset. In addition, an Investment Proposal must be submitted for disposal projects of $300,000 or more.
- A revised AIP must be submitted for significant project overruns (See below).
- Instructions provided with the AIP form must be followed.

Investment Proposal: The Investment Proposal is used to explain in detail the nature and justification of the capital project. Capital projects over $300,000 on a fully loaded basis require the submittal of an Investment Proposal and Capital Evaluation Model along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The Investment Proposal which is published on the Financial Planning & Controlling intranet should include the following sections:

- A header that includes the project name, total expenditures, project number, Line of Business and who will present the project.
- Executive Summary (max ½ page) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Should also include financial benefits as well as qualitative reasons why this proposal should be pursued.
- Background – why project is needed.
- Project Description – including project scope, timeline and project cost.
- Economic Analysis and Risks – this should include bid summary, assumptions, financial summary, sensitivities, environmental impact, risks and other alternatives considered.
- Capitalized interest must be included as part of capital spending on discrete projects in excess of €50 million based on the current exchange rate at the time of the preparation of the Investment Proposal which can be obtained at the xe.com website. Please consult Property Accounting for the current interest rate to use in the Capital Evaluation Model based on the most recent embedded cost of debt calculation. Also, if in doubt about whether the project qualifies for capitalized interest, please consult Property Accounting for assistance. When a project qualifies for capitalized interest, two Capital Evaluation Models must be run and attached to the Investment Proposal: one without capitalized interest for regulatory purposes and one with capitalized interest under International Financial Reporting Standards (IFRS). Approved spending levels and analysis of the economics of the project are to be based solely on the IFRS view, inclusive of capitalized interest.
- Conclusion and recommendation
- The Investment Proposal should not exceed 5 pages.

E.ON U.S. LLC Policy

Capital and Investment Review

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget, must either be offset by a like reduction in one or more budgeted projects, or the overspending requires prior written approval by the E.ON U.S. LLC Chief Financial Officer (CFO) and Chief Executive Officer (CEO). The Financial Planning & Controlling Department must approve AIPs for unbudgeted projects (see *Approvals* below). In addition, unbudgeted project spending greater than $300,000 is subject to the Resource Allocation Committee (RAC) Tenets. Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, or the additional funding requires prior written approval by the E.ON U.S. LLC CFO and CEO. The Financial Planning & Controlling Department must approve AIPs for underfunded projects (see *Approvals* below). In addition, underfunded project spending greater than $300,000 is subject to the Resource Allocation Committee (RAC) Tenets.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient(project is expected to be 10% or $100,000 over; whichever is less, subject to a minimum of $25,000) to complete the project, **a revised AIP must be completed before the overrun occurs and the following conditions apply (see Appendix A):**

- Project overrun is expected to be $300,000 or greater and project had previously been above Investment Committee threshold the revised project amount needs to be approved by the Investment Committee. A new Investment Proposal and CEM are required as well.
- If project overrun is $100,000 or more, but less than $300,000 provide an explanation on the updated financials and explanation for the overrun. Updated Investment Proposal is not required.
- Previous project proposal was below Investment Committee threshold and revised amount is over Investment Committee threshold the proposal needs to be approved by the Investment Committee regardless of the increase amount. Revised Investment Proposal and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects; or the overspending requires prior written approval by the E.ON U.S. LLC Chief Financial Officer (CFO) and the Chief Executive Officer (CEO). Project overruns of greater than $300,000 are subject to the RAC Tenets.

The Investment Committee reviews project overruns of $100k or greater two times a year. For this purpose the Lines of Business are required to provide a list of all project overruns of $100k or greater to Financial Planning & Controlling. This applies only for the projects which exceed the Investment Committee threshold.

E.ON U.S. LLC Policy

Capital and Investment Review

At no time should overspending occur prior to the approval of the new AIP (subject to the emergency provision of the Delegated Powers of Authority). The additional funding requested must either be offset by a like reduction in one or more budgeted projects, or the additional funding requires prior written approval by the E.ON U.S. LLC CFO and CEO.

Revised AIPs must be approved for the total revised dollar amount using the approval limits in the Authority Limit Matrices. All revised AIPs must be submitted to the Financial Planning & ControllingDepartment with a copy of the original AIP attached. Revised AIPs which meet the spending level threshold for Investment Committee approval will be provided to the Investment Committee for review.

Financial Planning & Controlling Approvals: Unbudgeted projects or those projects requiring an Investment Proposal (i.e. over $300,000) must be forwarded to the Financial Planning & Controlling department for review and approval.

Budgeted projects less than $300,000 are approved as normally required by the Authority Limit Matrix and do not require the prior approval of the Financial Planning & Controlling Department.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed $300,000 which is budgeted to serve as a placeholders for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from Blanket Projects described elsewhere in this policy. Each Generation Miscellaneous Project must be budgeted, but an AIP must not be prepared for it and therefore it will not be activated in Oracle. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project number. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. The budget coordinator is responsible for tracking the accumulated spending of the individual projects to ensure that the budget is not exceeded. Property Accounting will also monitor the accumulated spending to ensure that the budget has not been exceeded.

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement being finalized and evidence of such review must be attached to the AIP.

Capital and Investment Review

- If fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under $1 million the net spending amount may be used to determine whether an Investment Proposal and Capital Evaluation Model are required.
- Jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under $1 million neither the Investment Proposal nor the Capital Evaluation Model are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency: 1) the equipment has failed; 2) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system; 3) or the expenditure is needed to address an immediate safety risk.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the necessary paperwork, and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an Early Activated AIP:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP signature process. Financial Planning & Controlling must also be copied on this email. Should the AIP be for an unbudgeted project, approval from Financial Planning & Controlling will be required for the Early Activation.

Capital and Investment Review

- In the event the project has been previously approved by the Investment Committee, the above email from the highest LOB authority would not be required. Instead, verification from Financial Planning & Controlling that the project had indeed been approved by the Investment Committee would be sufficient approval.

- The approval request email must include the following info: 1) Project Number; 2) Project Description; 3) Total Project amount; 4) Name of the individual whose highest level of signature authority is required, and any associated DOA's; 5) Description of the need for the early activation; 6) If the request is for an unbudgeted project, the email must contain the budgeted project number that will cover the unbudgeted spending.

- All normally required signatures must still be acquired on the AIP prior to sending the AIP to Property Accounting.

- The Property Accounting Department will maintain a log of Early Activated projects, and copies of the email approvals will be filed with the AIP.

- All AIPs that are early activated must be received by the Property Accounting Department, or Financial Planning & Controlling if necessary, with all required approvals, within 10 business days of the early activation. Repeated failure to comply with this timing will require email approval by the appropriate LOB VP for Early Activation of all future AIPs.

Project Completion

Upon project completion the project manager or budget coordinator closest to the project is required to:

1. Verify completion date (report to Property Accounting if different from AIP).
2. Update ORACLE project status to "completed".
3. Verify actual in-service date (report to Property Accounting if different from AIP).
4. Verify actual installed costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
5. Verify actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
6. Verify units of property installed (report to Property Accounting if different from AIP).
7. Verify units of property retired (report to Property Accounting if different from AIP).

Budget coordinators are required to perform a post-completion audit of projects as discussed in the guidelines below. The review must be provided to the Financial Planning & Controlling Department and the Investment Committee.

E.ON U.S. LLC Policy

Capital and Investment Review

For Internal Review

- E.ON U.S. requires that projects greater than $5.0M (excluding blankets) complete a Post Completion Audit within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of Financial Planning & Controlling a random audit of anything less than $5.0M can be requested for auditing purposes.
- A PCA Template is available on the Financial Planning & Controlling website. Also, samples of Post Completion Audits are on Financial Planning & Controlling's website under "Examples". Transmission PCAs are not included on the website due to the Standards of Conduct.

For E.ON A.G.

The review must follow the requirement specified in the E.ON Planning and Controlling Manual (section C.8.4) which is available on Financial Planning & Controlling's website.

A Post Completion Audit should be submitted if one of the following criteria is valid:

- The project was approved by the E.ON Supervisory Board or the E.ON Finance and Investment Committee, or
- A project of at least $50M Euros shows significant earnings deviations to the business plan originally presented. A significant deviation means that the Adjusted EBIT deviates more than 10% from the original plan in a three year period, or
- Before the completion of the construction of an asset over $50M Euros, key assumptions of the valuation change leading to an overall change in value of 10%, or
- A PCA was agreed bilaterally between E.ON A.G. and the Market Unit at the time of the approval of the project.

In case of impairment, a PCA is always required. Otherwise, for projects which fulfill the criteria described above a PCA is generally performed three years after the realization of the project, e.g.

- Three years after the acquisition of a company, power plant, gas storage, etc.
- Three years after the start of the construction period of a power plant until three years after the completion of a power plant.
- Three years after the start of the exploration phase of a gas/oil field until three years after the start of the production phase of the gas/oil field.

Leases

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate OBU, Financial Accounting and Reporting to determine if the lease is structured as a capital or operating lease, and by the Tax department. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the E.ON U.S. LLC Lease Policy for more details.

Capital and Investment Review

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is prepared (i.e. Gas and Electric Distribution New Business by area.) The blanket projects hold a "bucket" of budget dollars which is used to fund specific tasks (subprojects) under $300,000 as they are identified throughout the year. Blanket projects are not closed each year but they are rebudgeted each year and are unitized on an "as-spent" basis.

Authorization: At the beginning of each calendar year, a list of all budgeted blanket projects must be submitted to the Investment Committee for approval, along with a summary of the previous year's blanket capital spending. (A post-completion audit will not be required for blanket capital projects.)

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a $300,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy.

Criteria for Creating a New Unbudgeted Blanket Project: New blanket capital projects created after the budget process is complete do not require an approved AIP, but the request to open the project must be submitted to both Property Accounting and Financial Planning & Controlling. New blanket capital projects are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

Monthly Spending Report: The budget coordinator for each line of business incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects and comparing the total year-to-date spending against budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to Financial Planning & Controlling for review by the eleventh business day of the following month.

Penalties for Noncompliance

Failure to comply with this policy may result in disciplinary action, up to and including discharge.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 120

Responding Witness: Christopher M. Garrett

Q-120. Please provide complete copies of all correspondence with the following parties from 2008-2012, inclusive, regarding FASB Statement No. 143, FIN 47 and FERC Order 631 in RM02-7-000:

a. External auditors and other public accounting firms,

b. Consultants,

c. External counsel,

d. Federal and State regulatory agencies, and

e. Internal Revenue Service.

A-120. a. See attached. Also, see the response to AG 1-202 in Case No. 2012-00221.

b. See the response to AG 1-202 in Case No. 2012-00221.

c. Without wavier of the objection made on January 21, 2015, see the attached and see the response to AG 1-202 in Case No. 2012-00221.

d. See attached. Also, see the response to AG 1-202 in Case No. 2012-00221.

e. See the response to AG 1-202 in Case No. 2012-00221.

Brett,

Actually, we are currently having 2 a year with each line of business. We have already had both of them and we have notes from the meeting if you would like them.

Thanks,
Angela

Subject: Year-end ARO review meeting

Angela,

It is correct to say that there is an annual meeting held to help identify ARO's, correct? I believe this was put in place last year to get various groups together to make sure all ARO's are identified. Can you let me know if this has happened yet for 2012 and if it has happened, would I be able to obtain minutes or anything else produced for the meeting?

Thanks,
Brett

Electric Distribution and General Facilities Meeting regarding AROs – April 2, 2012

Attendees: Steve Woodworth, Karan Kapp, Lisa Allen, Steve Reeves, Janna Singleton, Lynda Clark, Sara Wiseman, Angela Crescente and Beth McFarland, Jude Beyerle, Bob Ehrler, Paul Puckett and John Fendig via teleconference.

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~~

The following AROs were established prior to this meeting:

- disposal of asbestos found in distribution substations and general office facilities in places such as insulation, floor tiles and shingles.
- disposal of PCB oil found in bushings and line transformers.

~~~~~~

The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Regulators: Disposal of oil found in regulators is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. After a certain date, manufacturers stopped manufacturing regulators with PCB contaminated oil. Due to a company-wide effort to flush and retro fill regulators containing PCB, there should no longer be regulators in service that contain PCB oil.

Breakers: Disposal of oil found in breakers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, Company personnel estimate that there are few breakers remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. Recent breaker purchases by the Company contain SF6 gas. SF6 gas is not considered to be an ARO as greenhouse gas regulations rules only require reporting of SF6, they do not include requirements on control. SF6 will be sold or recycled upon retirement. Due to this fact, no ARO has been recorded for oil or SF6.

Freon (HVAC): There are certain regulations for disposal of Freon. However, when a unit is being replaced, the new unit cost covers the removal and disposal of the old unit which is completed by the contractor. There are no additional or separate charges for the cost of removal of the unit and the Freon inside the unit. Therefore, no ARO is being established.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Poles: Poles may be coated with creosote. However, there is no additional cost for disposal of creosote covered poles. Therefore, no ARO is being established.

Mercury in fixtures and light bulbs: Mercury is considered to be an ARO, however, light bulbs are considered to be O&M expenses. Therefore, there is no asset to establish an ARO. There is no additional cost for disposal of mercury in fixtures. Therefore, no ARO is being established.

Generation Meeting regarding AROs – April 26, 2012 (Monthly Maintenance Managers' meeting held at E.W. Brown)

Attendees: David Cosby, Bob Ehrler, John Fendig, Jason Wilkerson, Mike Winkler, Bruce Rose, Shannon Charnas via teleconference. Sara Wiseman, Angela Crescente, Danny Faulkner (Green River), Joe Didelot (Mill Creek), Tim Smith (Trimble County), Jeff Fraley (Brown plant manager), Mike Drake (Ghent), Brian Sumner (Brown), Steve Legler (Cane Run) and Jim Henry. *To be updated*

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

The following AROs were established prior to this meeting:

- disposal of asbestos found in generation equipment and facilities in places such as insulation, floor tiles and shingles.
- remediation of ash ponds/other ponds, landfills, coal storage, oil storage, chemical storage, nuclear sources, generation wells, gypsum stack at Ghent, and floodwall penetration at Cane Run.

The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Dix Dam: Retirement of dam structure-There are no environmental obligations to remove the dam. Dix Dam is not regulated by the FERC since the dam is on a Company owned lake. No specific environmental regulations regarding removal of the dam have been identified. It is possible that specific legally required actions may be required at the time of final retirement; however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

Ohio Falls: Retirement of dam structure-There are no environmental obligations to remove the dam. Ohio Falls is regulated by the FERC and has a permit to operate issued by the U.S. Army Corps of Engineers. The permits and FERC licenses do not list or enumerate specific or detailed remediation

steps upon abandonment. If Ohio Falls were to be retired it is likely that the Corps of Engineers and FERC would require certain abandonment activities to occur, however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

Coal Docks/Barge Unloading Facilities/ Tyrone Service Water Structure: The Legal Dept has made inquiries of various Company personnel in order to obtain historical information or documents to try to determine if any legal retirement obligations exist. They were unable to locate definitive data (ground leases, permits, etc.) or applicable rules (USCG, ACOE, etc.) positively indicating any legal obligations exist upon non-use. Due to this fact, no ARO has been recorded.GSU/Auxiliary Transformers: Disposal of oil found in GSUs is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, the Company has had a program for 30 years or so to eliminate all PCB oil in transformers. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

Oil Filled Instruments: Disposal of oil found in oil filled instruments is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, Company personnel estimate that there are few instruments remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

Oil Piping: No legal requirements to dig up or remove oil piping.

SCR Catalyst Layers: No SCR catalysts have been disposed of yet. Currently, there has been no final determination as to the final disposal method and costs for when the catalyst is retired off the financial records.

Bridges/Tunnels: A review of a sample of permits for these structures including Mill Creek Railroad, Ghent Pipe Tunnel, and GH Pipe and Slurry Bridge was made by the Legal Department. The permits did not list specific actions which must be completed at the time of removal. There is no requirement in the contract for the leases. These structures will continue to be reviewed to capture any changes. Therefore, no ARO has been recorded.

Easements/Leased Land: A review of easements by the Legal Department did not reveal any legal requirements to remove property upon retirement. The Legal Department will continue to review easement forms as they are revised to ensure this finding does not change. Therefore, no ARO is recorded.

Precipitator Plates: May become a low level radioactive source due to system usage. However, the amount and cost is not reasonable to estimate. The Company's past experiences has resulted in no cost for landfill disposal.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Gas Pipeline: Pipeline would require cut, capped and purged and is included in gas main ARO.

CFC/Freon/Halon: There are certain regulations for disposal, however due to the small dollar amounts involved, no ARO was established.

The following items are not considered to be AROs (for the reasons documented):

Bromine/Chlorine: These chemicals are not considered to be hazardous materials and therefore are not AROs.

Chimneys: There is no obligation to tear down. Federal Aviation regulations state that the chimney must have navigational lights mounted on them if over a certain height. However, this does not constitute an ARO. Chimney capping is also not an ARO and is a best practice in order to prevent deterioration.

Sewage Treatment: There is no legal or environmental for disposal of sewage facilities.

GR Limestone Silo: Limestone is not considered a hazardous material and therefore there are no requirements for an ARO to be established.

Electric Distribution and General Facilities Meeting regarding AROs – October 9, 2012

Decision made at October 9, 2012 meeting: No changes are required

Attendees: Karan Kapp, Lisa Allen, Steve Reeves, Lynda Clark, Sara Wiseman, Angela Crescente, Jamie Archer, Mike Winkler, Michael Haycox, Diana Wacker, Karen Daly, Travis Thompson at the BOC and Beth McFarland, Jude Beyerle, Tony Durbin via teleconference. John Fendig, Paul Puckett, Bob Ehrler, Jerry Grant were unable to attend.

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

The following AROs were established prior to this meeting:

- disposal of asbestos found in distribution substations and general office facilities in places such as insulation, floor tiles and shingles.
- disposal of PCB oil found in bushings and line transformers.

The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Regulators: Disposal of oil found in regulators is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. After a certain date, manufacturers stopped manufacturing regulators with PCB contaminated oil. Due to a company-wide effort to flush and retro fill regulators containing PCB, there should no longer be regulators in service that contain PCB oil.

Breakers: Disposal of oil found in breakers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, Company personnel estimate that there are few breakers remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. Recent breaker purchases by the Company contain

SF6 gas. SF6 gas is not considered to be an ARO as greenhouse gas regulations rules only require reporting of SF6, they do not include requirements on control. SF6 will be sold or recycled upon retirement. Due to this fact, no ARO has been recorded for oil or SF6.

Freon (HVAC): There are certain regulations for disposal of Freon. However, when a unit is being replaced, the new unit cost covers the removal and disposal of the old unit which is completed by the contractor. There are no additional or separate charges for the cost of removal of the unit and the Freon inside the unit. Therefore, no ARO is being established.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Poles: Poles may be coated with creosote. However, there is no additional cost for disposal of creosote covered poles. Therefore, no ARO is being established.

Mercury in fixtures and light bulbs: Mercury is considered to be an ARO, however, light bulbs are considered to be O&M expenses. Therefore, there is no asset to establish an ARO. There is no additional cost for disposal of mercury in fixtures. Therefore, no ARO is being established.

Gas Meeting regarding AROs – April 27, 2012

Attendees: Lisa Allen, Janice Porter, Sharon Wright, Steve Beatty, Kevin Murphy, Joshua Nash, Paul Stratman, Cindy Martin, Bill Harper, Eddie Harshfield, Pete Clyde, Tom Rieth, Mark Satkamp, John Skaggs, Russ Cloyd, Zach Thomas, Mike Winkler, Bob Ehrler, Shannon Charnas, Sara Wiseman, Angela Crescente, Pat Leenerts. *To be updated*

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital assets and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~~

The following AROs were established prior to this meeting:

- the permanent cutting, capping and purging activities of gas transmission mains and gas distribution mains and service abandonments including grouting of smaller than 4" mains and services, and disposal of asbestos coating on mains removed from the ground and;
- disposal of asbestos found in insulation, floor tiles and shingles; and
- permanent plugging of wells.

Cut, cap and purge activities are required regardless of whether the main is removed or abandoned in place. For purposes of quantifying the asbestos coating component of the ARO liability, it was determined that retirement activities typically do not include digging up the main, but rather the mains are abandoned in place. Occasionally, gas mains coated with asbestos material are dug up and result in human exposure, which does constitute an ARO liability. An estimate for this limited asbestos remediation is included in the current gas main ARO liabilities.

~~~~~~

The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

<u>Mercury from old metering stations related to spill cleanup</u> – No way to reasonably estimate how much there would be in land/soil owned by the Company and there is no legal obligation to test now or in the event the land is sold.

<u>Mercury in old equipment</u> – No way to reasonably estimate and there is not much old equipment left that would have this issue. Any work related to this would generally be O&M related as well.

<u>Potheads</u> – These are used in the conversion of above ground to underground conductors and have a grease-like substance that would require remediation. However, there are very few of these believed to remain in our system and the cost would be very minimal.

<u>Vessels</u> – Vessels are found at the compressor stations. Vessels may contain sludge which has to be disposed of in a certain legally required manner. However, any disposal costs associated with the sludge in vessels would be done under O&M.

<u>Acid</u> – Acid has to be disposed of in a certain legally required manner. However, most of the time, acid is reused within the Company and any disposal and any disposal costs associated with acid is done under O&M.

~~~~~~

The following items are not considered to be AROs (for the reasons documented):

<u>Sewage facilities</u> – There is no legal obligation. The Company does remove sewage facilities in a certain way to satisfy our best practice approach, but not for a legal obligation.
~~~~~~

Transmission Meeting regarding AROs – April 10, 2012

Attendees: Mike Winkler, Ed Clark, Sara Wiseman, Angela Crescente and Robby Trimble, Jon Miller, and John Fendig via teleconference.

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~~

The following AROs were established prior to this meeting:

- disposal of asbestos found in transmission substations in places such as insulation, floor tiles and shingles.
- disposal of PCB oil found in bushings.

~~~~~~

The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

<u>Culverts/Drainage/Berms/Substation Roadways:</u> There are no environmental (only possible contractual) obligations associated with the actual physical disposal of culverts, drainage, berms and roadways. The Legal Dept has made inquiries of various Company personnel in order to obtain historical information or documents to try to determine if any legal retirement obligations exist. They were unable to locate definitive data or applicable rules positively indicating any legal obligations exist upon non-use. Due to this fact, no ARO has been recorded.

<u>Transformers:</u> Disposal of oil found in transformers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, the Company has had a program for 30 years or so to eliminate all PCB oil in transformers. Therefore, the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. This includes pad mount, overhead and station transformers.

<u>Capacitors:</u> Disposal of oil found in capacitors is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB

contaminated oil. However, there are no capacitors remaining that contain PCB oil. Therefore, no ARO has been recorded.

Breakers: Disposal of oil found in breakers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, Company personnel estimate that there are few breakers remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. Recent breaker purchases by the Company contain SF6 gas. SF6 gas is not considered to be an ARO as greenhouse gas regulations rules only require reporting of SF6, they do not include requirements on control. SF6 will be sold or recycled upon retirement. Due to this fact, no ARO has been recorded for oil or SF6.

Batteries: Batteries do need to be disposed of in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement. Therefore, no ARO has been recorded.

Freon (HVAC): There are certain regulations for disposal of Freon. Only have 4 control houses with air conditioning. Future plans would be to add air conditioning one per year. Due to the small dollar amounts involved, no ARO was established.

Easement, Leases: A review of a sample of main easement/lease forms by the Legal Department did not reveal any legal requirements to remove property upon retirement. The Legal Department will continue to review easement forms as they are revised to ensure this finding does not change. Therefore, no ARO is recorded.

Underground Electric Lines: There is a minimal amount of oil found in underground electric lines, however, it is not PCB contaminated. The oil is pumped out of the lines upon removal or abandonment. Non PCB oil can generally be recycled at no cost to the Company or even sold. Therefore, since there is no cost to the Company an ARO is not required.

Poles: Poles may be coated with creosote. However, there is no additional cost for disposal of creosote covered poles. Therefore, no ARO has been recorded.

The following items are not considered to be AROs (for the reasons documented):

Sewage Facilities: There is no legal obligation. We do remove sewage facilities in a certain way to satisfy our best practice approach, but not for a legal obligation.

Generation Meeting regarding AROs – October 18, 2012 (Monthly Maintenance Managers' meeting held at Green River)

Decision made at October 18, 2012 meeting: No changes are required

Attendees: David Cosby, Bob Ehrler, John Fendig, Jason Wilkerson, Mike Winkler, Bruce Rose, Shannon Charnas via teleconference. Sara Wiseman, Angela Crescente, Danny Faulkner (Green River), Joe Didelot (Mill Creek), Tim Smith (Trimble County), Jeff Fraley (Brown plant manager), Mike Drake (Ghent), Brian Sumner (Brown), Steve Legler (Cane Run) and Jim Henry. *To be updated*

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

The following AROs were established prior to this meeting:

- disposal of asbestos found in generation equipment and facilities in places such as insulation, floor tiles and shingles.
- remediation of ash ponds/other ponds, landfills, coal storage, oil storage, chemical storage, nuclear sources, generation wells, gypsum stack at Ghent, and floodwall penetration at Cane Run.

The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Dix Dam: Retirement of dam structure-There are no environmental obligations to remove the dam. Dix Dam is not regulated by the FERC since the dam is on a Company owned lake. No specific environmental regulations regarding removal of the dam have been identified. It is possible that specific legally required actions may be required at the time of final retirement; however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

Ohio Falls: Retirement of dam structure-There are no environmental obligations to remove the dam. Ohio Falls is regulated by the FERC and has a permit to operate issued by the U.S. Army Corps of

Engineers. The permits and FERC licenses do not list or enumerate specific or detailed remediation steps upon abandonment. If Ohio Falls were to be retired it is likely that the Corps of Engineers and FERC would require certain abandonment activities to occur, however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

Coal Docks/Barge Unloading Facilities/ Tyrone Service Water Structure: The Legal Dept has made inquiries of various Company personnel in order to obtain historical information or documents to try to determine if any legal retirement obligations exist. They were unable to locate definitive data (ground leases, permits, etc.) or applicable rules (USCG, ACOE, etc.) positively indicating any legal obligations exist upon non-use. Due to this fact, no ARO has been recorded.**GSU/Auxiliary Transformers:** Disposal of oil found in GSUs is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, the Company has had a program for 30 years or so to eliminate all PCB oil in transformers. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

Oil Filled Instruments: Disposal of oil found in oil filled instruments is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, Company personnel estimate that there are few instruments remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

Oil Piping: No legal requirements to dig up or remove oil piping.

SCR Catalyst Layers: No SCR catalysts have been disposed of yet. Currently, there has been no final determination as to the final disposal method and costs for when the catalyst is retired off the financial records.

Bridges/Tunnels: A review of a sample of permits for these structures including Mill Creek Railroad, Ghent Pipe Tunnel, and GH Pipe and Slurry Bridge was made by the Legal Department. The permits did not list specific actions which must be completed at the time of removal. There is no requirement in the contract for the leases. These structures will continue to be reviewed to capture any changes. Therefore, no ARO has been recorded.

Easements/Leased Land: A review of easements by the Legal Department did not reveal any legal requirements to remove property upon retirement. The Legal Department will continue to review easement forms as they are revised to ensure this finding does not change. Therefore, no ARO is recorded.

Precipitator Plates: May become a low level radioactive source due to system usage. However, the amount and cost is not reasonable to estimate. The Company's past experiences has resulted in no cost for landfill disposal.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Gas Pipeline: Pipeline would require cut, capped and purged and is included in gas main ARO.

CFC/Freon/Halon: There are certain regulations for disposal, however due to the small dollar amounts involved, no ARO was established.

The following items are not considered to be AROs (for the reasons documented):

Bromine/Chlorine: These chemicals are not considered to be hazardous materials and therefore are not AROs.

Chimneys: There is no obligation to tear down. Federal Aviation regulations state that the chimney must have navigational lights mounted on them if over a certain height. However, this does not constitute an ARO. Chimney capping is also not an ARO and is a best practice in order to prevent deterioration.

Sewage Treatment: There is no legal or environmental for disposal of sewage facilities.

GR Limestone Silo: Limestone is not considered a hazardous material and therefore there are no requirements for an ARO to be established.

Drew,

The reason for the revision was the change in final settlement date from 2015 to 2019 with expected settlement activity in between. I have attached support for this activity. Please let me know if you have any questions.

Thanks,
Angela

Subject: Paddy's Run ASB - ARO Question

Angela,

I had a question regarding the Paddy's Run - ASB ARO. I noticed that last year there was a revision for 443k for this ARO, I was curious if you could tell me what this revision was for and provide any support that you have available, specifically the discount rate used to calculate the accretion for this revision.

Additionally, I wanted to follow up with you about Brett Wemor's request for support regarding the 750k loss in the "Purc-GasMain&ServAbandon-Dist" ARO. Do you know when we can expect to receive this support?

If you have any questions about these requests please let me know.

Thank you,

Drew

Subject: RE: Canal and Paddy's

Angela,

Based on our conversation, here is an estimate of asbestos removal costs based on current budget assumptions in the MTP/LTP. Please review and we can discuss.

Steve

	Demolition Asbestos Removal ($M)					
	2015	2016	2017	2018	2019	Total
Canal			0.945	0.315	0.315	1.575
Paddy's Run	0.15	1.00	1.6	0.93	0.925	4.60
Total:	0.15	1	2.545	1.24	1.24	6.175
MTP/LTP Total Demolition Costs in MTP (2015-2019)	0.30	1.30	7.50	10.00	7.00	26.10

Cc: Wiseman, Sara; Hudson, Rusty
Subject: RE: Canal and Paddy's

Steve,

Per our conversation, you are still in agreement with the estimates provided last year. The activities budgeted in 2012 would not be expected to have any asbestos removal dollars in them since it is engineering and stack removal. Based on the information we currently have available, it would be best to use 60% of the expected asbestos removal dollars for Canal in 2017 and approximately 20% in 2018 and 2019 since the contractors have explained that they intend to remove most of the asbestos upfront. For Paddy's, it would be best to use 60% in 2015 and 10% in 2016, 2017, 2018, 2019. Please confirm or feel free to correct any misunderstandings I have.

Thanks,
Angela

Subject: Canal and Paddy's

Steve,

Do you still agree with the expected ARO removal dollar estimate for both Canal and Paddy's that we got from you last year? We have Canal listed at about $1,575,000 in total for asbestos removal and Paddy's is listed in total at about $4,600,000 for asbestos removal. I understand we are expecting some demolition charges in 2012, which would mean I will need to set up some expected retirement activity in the ARO estimates. In order to book this estimate for December, I need to know as soon as possible.

Thanks for your help,
Angela

Janna,

Please forgive me if I have misplaced your email. Would you mind resending me the rates as requested below?

Thanks,
Angela

B|12

Janna,

Would you please provide me the yield curve for a BBB+ rated entity as of December 1, 2011?

Thanks,
Angela

Angela,

For these projects, can you please send me a screen shot from Oracle that shows these projects set up as an ARO in the system?

Thank you,

Drew

Sara,

I am sorry, but in my previous e-mail I wanted to mention that it would be helpful if we could receive this information by the end of the week or early next week. Also, my last request in the attachment says "January-June 2010" when it should read "January-June 2012". I have attached it again to this e-mail.

Thank you,

Drew

PRIVILEGED – DO NOT RELEASE
Preparers: Carol Foxworthy, Senior Rate & Regulatory Analyst
Sara Wiseman, Manager, Property Accounting

FERC Audit of PPL Corporation, including
its service companies and associated companies
For the period January 1, 2010 – December 31, 2011

Data request: 9034

LG&E and KU reports asset retirement costs in the following accounts:
Account 317, Asset Retirement Costs for Steam Production
Account 337, Asset Retirement Costs for Hydraulic Production
Account 347, Asset Retirement Costs for Other Production
Account 359.1, Asset Retirement Costs for Transmission Plant
Account 374, Asset Retirement Costs for Distribution Plant
Account 399.1. Asset Retirement Costs for General Plant

Provide a narrative that describes the accounting for these asset retirement costs, including journal entries that show the debit and credit side of this accounting. Where are the assets and associated liabilities reflected in the transmission formula rate?

Response:

Asset retirement costs are established upon the initial recognition of the asset retirement obligation (ARO) liability as required by FASB Accounting Standards Codification ("ASC") Topics 410 and 980-410 (formerly Statement of Financial Accounting Standards No. 143 ("SFAS 143"), *Accounting for AROs*, and the subsequent FASB Interpretation No. 47 ("FIN 47"). The following entry is made to establish an asset retirement cost:

Dr. Account 101 - Plant in Service – ARO Asset Retirement Cost
Cr. Account 230 – Asset Retirement Obligations

Depreciation on ARO assets is calculated on a straight line basis (consistent with all utility depreciation calculations) over a life dictated by the settlement date of the ARO liability. The following journal entry reflecting depreciation expense for the ARO asset is:

Dr. Account 403 - Depreciation Expense
Cr. Account 108 - Accumulated Provision for Depreciation

As depreciation expense allocates the cost of installing an asset over its useful life, accretion expense allocates the increase in the cost of removing an asset over its useful life. Each period the ARO liability is increased through the recognition of accretion expense. The journal entry reflecting accretion is as follows:

Dr. Account 411 - Accretion Expense
Cr. Account 230 - Asset Retirement Obligations

ARO accounting for utilities is intended to be earnings neutral; therefore, regulatory credits (on the income statement) and regulatory assets (on the balance sheet) are charged for the total depreciation and accretion expense amounts. The journal entry to record the offset is:

Dr. Account 182 - Other Regulatory Assets
Cr. Account 407 - Regulatory Credits

At the time of ARO settlement the appropriate ARO amounts in accounts 101, 108, 182 and 230 are reversed.

The net result of ARO accounting on the balance sheet is zero as ARO liabilities (account 230), net ARO assets (accounts 101 and 108) and regulatory assets (account 182) when netted together equal zero. There is no provision in the Attachment O Formula for presenting ARO assets and liabilities.

Subject: Follow-up discussion

Jesse,

Good morning. As we discussed last week, I would like to have a conference call to discuss some follow-up questions we have related to the asset retirement cost issue. Below are the follow-up questions we have regarding LGE/KU's asset retirement costs recorded in Accounts 317, 326, 337, 347, 359.1, 374, 399.1.

Explain the ARO obligation in detail.

Is accretion expense (that is recorded in Account 411.10) recovered via the transmission cost of service formula rate?

Are you recovering any ARO cost through the removal component of your current depreciation rates?

Is there any adjustment made to Account 108 for the asset retirement obligation or related costs?

Is there any portion of the asset retirement costs recorded in Account 403?

In response 9034, there is a statement that says, "There is no provision in the Attachment O Formula for presenting ARO assets and liabilities." If that's the case, explain how asset retirement costs are included in Accounts 317, 326, 337, 347, 359.1, 374, 399.1 and recovered in Plant in Service.

I am available this week Thursday - Friday from 9:00 a.m. to 3:00 p.m. Next week, I am available Monday - Wednesday 9:00 a.m. to 3:00 p.m. Please let me know if you have any questions.

Thanks,
Nick

Cc: Rizzo, Sandy (sandy.rizzo@bgllp.com); Dillon, Jesse A [PPL]; Calder, Maureen A [PPL]
Subject: Call from Nick Coughlin
Importance: High

Jesse received a call from Nick with an additional issue he wants to discuss on the call on Monday, and another issue that can be discussed on Monday if appropriate personnel are available, but if not may be discussed at a later date:

1. Nick wants someone on the call on Monday that understands and can speak to an LGE ARO item. Specifically, 2011 FERC Form 1, p. 234 Account 190 Beg. Balance of 18,155,786 – AR.
2. May be discussed Monday, but does not have to be on Monday: Nick is going to send Jesse a reconciliation spreadsheet reconciling Form 1 Account Balance vs. GL Account 190 Balance. He is able to reconcile for KU but can't hit numbers for LGE.

John and Valerie Scott – it's my understanding that Betty has gathered the names of the appropriate people for the call. Can you confirm that the individuals include the appropriate people to address these point(s) and if not have them included in the call?

Thanks
Valerie

Unfortunately, tomorrow will not work. I would like Gerald Williams, project manager of the audit, to participate in the call, and he is out of the office tomorrow.

Is there any availability Monday from 11:00 a.m. to 3:00 p.m. or Wednesday from 9:00 a.m. to 3:00 p.m.?

Thank you,
Nick

Subject: Follow-up discussion

Jesse,

Good morning. As we discussed last week, I would like to have a conference call to discuss some follow-up questions we have related to the asset retirement cost issue. Below are the follow-up questions we have regarding LGE/KU's asset retirement costs recorded in Accounts 317, 326, 337, 347, 359.1, 374, 399.1.

Explain the ARO obligation in detail.

Is accretion expense (that is recorded in Account 411.10) recovered via the transmission cost of service formula rate?

Are you recovering any ARO cost through the removal component of your current depreciation rates?

Is there any adjustment made to Account 108 for the asset retirement obligation or related costs?

Is there any portion of the asset retirement costs recorded in Account 403?

In response 9034, there is a statement that says, "There is no provision in the Attachment O Formula for presenting ARO assets and liabilities." If that's the case, explain how asset retirement costs are included in Accounts 317, 326, 337, 347, 359.1, 374, 399.1 and recovered in Plant in Service.

I am available this week Thursday - Friday from 9:00 a.m. to 3:00 p.m. Next week, I am available Monday - Wednesday 9:00 a.m. to 3:00 p.m. Please let me know if you have any questions.

Thanks,
Nick

Subject: Reconciliation of Account 190 (for Louisville Gas & Electric)

Jesse,

Good afternoon. As we discussed this afternoon, I identified a discrepancy in LG&E's Account 190 formula rate balance when comparing the FERC Form No. 1 data and the general ledger data in response 9010. See spreadsheet attached that shows my comparison and discrepancy.

Thanks,
Nick

Louisville Gas & Electric

Based on the 2011 FERC Form No. 1:

Ending Balance (Electric Only)	$88,049,878
Less: Purchase Accounting Adjustments	($67,074,595)
Total LG&E formula rate balance for Account 190	$20,975,283

Based on General Ledger data in response 9010:

15 items recorded in Account 190	$23,826,072
Less: 12 highlighted items backed out of Account 190	($2,368,684)
Total LG&E formula rate balance for Account 190	$21,457,388

Discrepancy	$482,105

Kentucky Utilities

Based on the 2011 FERC Form No. 1:

Ending Balance (Electric Only)	$143,821,606
Less: Purchase Accounting Adjustments	($57,520,733)
Total LG&E formula rate balance for Account 190	$86,300,873

Based on General Ledger data in response 9010:

15 items recorded in Account 190	$86,746,693
Less: 4 highlighted items backed out of Account 190	($445,822)
Total LG&E formula rate balance for Account 190	$86,300,871

Discrepancy	($2)

Subject: FW: ARO deferred tax discussion

Need a call set up. Talked with Nick today.

From: Nicholas Coughlin [mailto:Nicholas.Coughlin@ferc.gov]
Sent: Tuesday, December 18, 2012 10:31 AM
To: Dillon, Jesse A
Subject: ARO deferred tax discussion

Jesse,

Good morning. Below are my follow-up discussion topics for ARO-related deferred tax amounts. Please let me know if you have any questions. We can have a conference call to discuss these topics after January 1 or you can provide a written response to each of these 3 items – whatever works best for you all.

- Discuss each ARO-related deferred tax item recorded in Account 190 and reported in the FERC Form No. 1:

  On page 234 of its 2011 FERC Form No. 1, LG&E reported an ARO-related deferred tax item on line 6
  On page 234 of its 2010 FERC Form No. 1, KU reported an ARO-related deferred tax item on line 6
  On page 234 of its 2010 FERC Form No. 1, LG&E reported an ARO-related deferred tax item on line 6

- Discuss the accounting treatment, including journal entries, for these ARO-related deferred tax items **before** the PPL acquisition and **after** the PPL acquisition.

- Discuss the formula rate treatment for these ARO-related deferred tax items.

Thank you,
Nick

Nick,
Sorry I missed the call yesterday. Attached are two reports you requested. The first two pages are the Power Tax report that has the electric 190 balances for Purchased Accounting and the third page is the gas 190 Purchase Accounting report. The last column is the balances at 12/31/2011. If you have any questions please let me know. Valerie had also mentioned you need some ARO data, I will try to get that to you tomorrow.
Thanks
Scott

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 121

Responding Witness: Christopher M. Garrett

Q-121. Regarding FASB Statement No. 143, FIN 47, and FERC Order No. 631 in Docket No. RM02-7-000, on a plant account-by-plant account basis, please identify any and all "legal obligations" associated with the retirement of the assets contained in the account that result from the acquisition, construction, development and (or) the normal operation of the assets in the account. For the purposes of this question, please use the definition of a "legal obligation" provided in FASB Statement No. 143: "an obligation that a party is required to settle as a result of an existing or enacted law, statute, ordinance, or written or oral contract under the doctrine of promissory estoppel."

A-121. See attached.

Kentucky Utilities
Asset Retirement Obligations by Plant Account

ARO	Plant Account and Description	Legal Obligation
Ash Ponds, Landfills	131100 - Structures and Improvements	Coal combustion by-product storage facilities must be properly closed and monitored.
Coal Storage	131100 - Structures and Improvements	Must remove all material storage piles to eliminate the potential for contaminated storm water runoff from the site.
Gypsum Stack	131200 - Boiler Plant Equipment	Must remove all material storage piles to eliminate the potential for contaminated storm water runoff from the site.
Generation Wells	131100 - Structures and Improvements	Wells must be properly covered and closed.
Nuclear Sources	131200 - Boiler Plant Equipment	The handling and disposal of radioactive waste.
Chemical Storage	131200 - Boiler Plant Equipment	Hazardous wastes must be removed from site and disposed of properly.
Asbestos - Generation	131200 - Boiler Plant Equipment	Removal and disposal of asbestos in the proper manner.
Asbestos - General Plant	139010 - Structures and Improvements	Removal and disposal of asbestos in the proper manner.
Asbestos - Distribution	136100 - Structures and Improvements	Removal and disposal of asbestos in the proper manner.
Asbestos - Transmission	135210 - Structures & Improvements-Non System Control	Removal and disposal of asbestos in the proper manner.
PCB - Line Transformers	136800 - Line Transformers	Removal and disposal of PCB in the proper manner.
PCB - Distribution	136200 - Station Equipment	Removal and disposal of PCB in the proper manner.
PCB - Transmission	135310 - Station Equipment - Non System Control	Removal and disposal of PCB in the proper manner.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 122

Responding Witness: Christopher M. Garrett

Q-122. For any asset retirement obligations identified above, please provide the "fair value" of the obligation. For the purposes of the question, fair value means "the amount at which that liability could be settled in a current [not future] transaction between willing parties, that is, other than in a forced or liquidation transaction." Please provide all assumptions and calculations underlying these amounts.

A-122. See attached for the current asset retirement obligation (ARO) liabilities. The calculation of the ARO liability is performed in the Fixed Asset system. Each month, the Fixed Asset system multiplies the current month's beginning ARO liability balance by the applicable discount rate and then divides that amount by 12 to arrive at the monthly accretion amount. This monthly amount is added to the current month's beginning liability balance to compute the current ending balance.

Kentucky Utilities
Asset Retirement Obligation Liabilities
December 31, 2014

ARO	LIABILITY
Ash Ponds, Landfills	$ 181,774,188
Coal Storage	794,316
Gypsum Stack	12,405,684
Generation Wells	680,936
Nuclear Sources	240,385
Chemical Storage	2,199,553
Asbestos - Generation	11,333,707
Asbestos - General Plant	191,050
Asbestos - Distribution	142,939
Asbestos - Transmission	69,670
PCB - Line Transformers	534,385
PCB - Distribution	173,107
PCB - Transmission	426,943
Total Liability	**$ 210,966,864**

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 123

Responding Witness: Christopher M. Garrett

Q-123. Please provide the "credit adjusted risk free rate" used for any and all ARO Application of Kentucky Utilities Company For an Adjustment of its Electric Rates Case No. 2014-00371 Attorney General's Initial Requests for Information calculations under FASB Statement No. 143, FIN 47, and FERC Order No. 631 calculations to date.

A-123. See attached.

The "credit adjusted risk free rate" is based on KU's credit rating. The discount rate used for each ARO is equal to the yield for a bond with KU's credit rating and a maturity date in the same year as the year the ARO is expected to be settled. The yields are based on indications provided by a major investment bank. FERC Order No. 631 does not have separate calculations.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 124

Responding Witness: Christopher M. Garrett

Q-124. For all accounts for which the Company has collected non-legal AROs, but instead recorded a regulatory liability (regulatory liability for cost of removal), please provide the fair value of the related asset retirement cost as of December 31, 2010; December 31, 2011, December 31, 2012, and December 31, 2014. For the purposes of this question, assume that the Company has legal AROs for these accounts, and use the life and dispersion assumptions reflected in current depreciation rates.

A-124. KU is not required under any accounting or regulatory standard to perform these hypothetical calculations. Therefore, these hypothetical calculations require original work and have not been prepared.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 125

Responding Witness: John J. Spanos

Q-125. Provide the calculation of the annual amount of future gross salvage, cost of removal and net salvage incorporated into the Company's existing depreciation rates. If any of the amounts are reduced by the total amount of non-legal AROs included in year-end accumulated depreciation, show that calculation.

A-125. The attached document sets forth the calculation of the future annual gross salvage and cost of removal incorporated into the Company's proposed depreciation rates. There are no existing depreciation rates for Cane Run Unit 7 as the facility is not in service to date. None of the proposed amounts are reduced by an amount of non-legal ARO.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 126

Responding Witness: Christopher M. Garrett

Q-126. Are the amounts of cost of removal and gross salvage incorporated into the existing and proposed depreciation rates the same as they would have been in the absence of SFAS No. 143 and FIN 47? Please explain.

A-126. The amounts of cost of removal and gross salvage incorporated into the existing and proposed depreciation rates are the same as they would have been in the absence of SFAS No. 143 and FIN 47.

All of the cost of removal and gross salvage recorded on the books and developed into the depreciation rates are costs associated with normal business in the utility industry.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 127

Responding Witness: Edwin R. "Ed" Staton

Q-127. Please provide any information, when known, that would have a material effect on net operating income, rate base, or cost of capital that have occurred after the filing of the application, but were not incorporated in the filed testimony and exhibits.

A-127. The Company will provide the requested information as applicable and otherwise will file the actual results for the estimated months of the base period within 45 days after the last day of the base period as required by KRS 278.192(2)(b). Please see the response to the First Request for Information of The Kroger Company No. 1-2 and Paragraph No. 11 in the Application.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 128

Responding Witness: Edwin R. "Ed" Staton

Q-128. Please describe the status of any outstanding recommendations contained in the Company's management audits. Identify any savings or costs related to management audit recommendations, the impact of which is not already reflected in the fully forecasted test period of this case.

A-128. On January 14, 2015, the Commission issued a letter to KU and LG&E which stated that all recommendations have been completed.

The Companies have invested approximately $7.4 million in one-time cost, with the majority being spent on the construction of a new call center in Morganfield, KY. In addition, the Companies reported that an annual recurring expense of $5.6 million will be required to support the recommendations in the audit. All costs are reflected in the forecasted test period.

The Companies approached this process as an opportunity to validate a number of initiatives and enhance our customers' experiences. Customer focus is a core value and is reflected in the Companies' business processes, systems, organizational structures, decision-making, and most of all, in the behaviors of our employees. The Companies have long histories of providing award-winning customer service and genuine concern for customers, while working hard to keep rates among the lowest in the country. The Companies continue to invest in technology and processes designed to improve service to our customers that provide options to address customers' wants and needs. The Companies believe with their continued commitment to customers and the completion of these recommendations that it has achieved the purpose of this audit, which was to ensure the ratepayers are receiving efficient and effective provision of service consistent with industry best practices. The Companies take pride in being an industry leader and believe the obligation to serve goes far beyond regulatory accountability.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 133

Responding Witness: Christopher M. Garrett

Q-133. Please explain in detail any major changes in accounting treatment for O&M expenses, retirements, replacements and removal costs instituted by the Company since 2010.

A-133. There have been no major changes in the accounting treatment for O&M expense, retirements, replacements and removal costs instituted by the Company since 2010. In response to this question, the Company provides the following:

In accordance with FERC Accounting guidelines (18 CFR, Balance Sheet Accounts, 108 Accumulated Provision for Depreciation of Electric Utility Plant), the net cost of removal depreciation accruals on the underlying parent assets (assets with asset retirement obligations (ARO)) are credited to Account 108 rather than account 254 – Regulatory Liabilities. Prior to August 2013, the monthly accruals were directly credited to Account 254 in lieu of Account 108. Per the 18 CFR, FERC approval was required to remove any amounts from (or not record required amounts to) Account 108. No such approval has been requested for parent ARO assets. Therefore, account 254 is no longer being used. This change had no impact for Kentucky rate making purposes.

Prior to August 2013, the monthly depreciation of ARO assets and ARO liability accretion accruals were credited to Account 407.4 – Regulatory Liabilities. In accordance with FERC Accounting guidelines (18 CFR, Balance Sheet Accounts, 182.3 Other Regulatory Assets), the Company now credits Accounts 403.1 and 411.10 since specific identification of the particular source of the regulatory asset can be made. Account 407.4 should be credited only when specific identification of the particular source of a regulatory asset cannot be made. This change had no impact for Kentucky rate making purposes.

In 2010, LKE changed its method of calculating the amount of unrecognized gains or losses recognized in the annual pension expense/income determined under ASC 715. Under its former method, the net unrecognized gains or losses in excess of 10% of the greater of the plan's projected benefit obligation or market-related value of plan assets were amortized on a straight-line basis over

the estimated average future service period of plan participants or average remaining life expectancy for plans with no or few active participants.

Under the current method, a second corridor is utilized for the net unrecognized gains or losses in excess of 30% of the plan's projected benefit obligation. The net unrecognized gains or losses outside the second corridor are now amortized on a straight-line method over a period equal to one-half of the average future service period of the plan participants. The current method provides more current recognition of gains and losses, thereby lessening the accumulation of unrecognized gains and losses.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 134

Responding Witness: Valerie L. Scott

Q-134. List each change in accounting principles made by the Company during 2010, 2011, 2012, 2013, and 2014, and for each such change, state the revenue and/or expense or capital impact in this filing.

A-134. Following are the changes in accounting principles made by the Company during 2010, 2011, 2012, 2013 and 2014:

Fair Value Measurements

In January 2010, the FASB issued guidance related to fair value measurement disclosures requiring separate disclosure of amounts of significant transfers in and out of level 1 and level 2 fair value measurements and separate information about purchases, sales, issuances and settlements within level 3 measurements. This guidance is effective for the interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about the roll-forward of activity in level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years.

This guidance has no impact on the Company's results of operations, financial position, liquidity or disclosures. This guidance did not have an impact on the Company's revenues and/or expense or capital.

Presentation of Comprehensive Income

Effective December 31, 2011, the Company retrospectively adopted accounting guidance that was issued to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items that are recorded in OCI. This guidance requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements where the first statement includes the components of net income and the second statement includes the components of OCI.

Regardless of whether an entity chooses to present comprehensive income in a single continuous statement or in two separate but consecutive statements, the guidance also would have required an entity to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. However, subsequent to the issuance of this new accounting guidance, this requirement that companies present reclassification adjustments for each component of OCI in both net income and OCI on the face of the financial statements was deferred for further evaluation. The deferral did not change the requirement to present items of net income, items of other comprehensive income and total comprehensive income in either one continuous statement or two separate consecutive statements.

The adoption of this standard did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Fair Value Measurements

Effective January 1, 2012, the Company prospectively adopted accounting guidance that was issued to clarify existing fair value measurement guidance and to enhance fair value disclosures. The additional disclosures required by this guidance include quantitative information about significant unobservable inputs used for Level 3 measurements, qualitative information about the sensitivity of recurring Level 3 measurements, information about any transfers between Levels 1 and 2 of the fair value hierarchy, information about when the current use of a non-financial asset is different from the highest and best use, and the fair value hierarchy classification for assets and liabilities whose fair value is disclosed only in the notes to the financial statements.

The adoption of this standard resulted in additional disclosures but did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Testing Goodwill for Impairment

Effective January 1, 2012, the Company prospectively adopted accounting guidance which allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of goodwill. If, based on this assessment, the entity determines it is not more likely than

not that the fair value of a reporting unit is less than the carrying amount, the two-step goodwill impairment test is not necessary. However, the first step of the impairment test is required if an entity concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the qualitative assessment.

The adoption of this standard did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, the Company retrospectively adopted accounting guidance issued to enhance disclosures about derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

The adoption of this guidance resulted in enhanced disclosures but did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Testing Indefinite-Lived Intangible Assets for Impairment

Effective January 1, 2013, the Company prospectively adopted accounting guidance that allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of an indefinite-lived intangible asset. If, based on this assessment, the entity determines that it is more likely than not that the fair value of the indefinite-lived intangible asset exceeds the carrying amount, a quantitative impairment test does not need to be performed. If the entity concludes otherwise, a quantitative impairment test must be performed by determining the fair value of the asset and comparing it with the carrying value. The entity would record an impairment charge, if necessary.

The adoption of this guidance did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income (AOCI)

Effective January 1, 2013, the Company prospectively adopted accounting guidance issued to improve the reporting of reclassifications out of AOCI.

The Company is required to provide information about the effects on net income of significant amounts reclassified out of AOCI by their respective statement of income line item, if the item is required to be reclassified to net income in its entirety. For items not reclassified to net income in their entirety, the Company is required to reference other disclosures that provide greater detail about these reclassifications.

The adoption of this guidance required enhanced disclosures but did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Accounting for Obligations Resulting from Joint and Several Liability Arrangements

Effective January 1, 2014, the Company retrospectively adopted accounting guidance for the recognition, measurement and disclosure of certain obligations resulting from joint and several liability arrangements when the amount of the obligation is fixed at the reporting date. If the obligation is determined to be in the scope of this guidance, it will be measured as the sum of the amount the reporting entity agreed to pay on the basis of its arrangements among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. This guidance also requires additional disclosures for these obligations.

The adoption of this guidance did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Presentation of Unrecognized Tax Benefits When Net Operating Loss Carryforwards, Similar Tax Losses, or Tax Credit Carryforwards Exist

Effective January 1, 2014, the Company prospectively adopted accounting guidance that requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets.

The adoption of this guidance did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 135

Responding Witness: Valerie L. Scott

Q-135. Provide a copy of the Company's two most recent management letters and recommendations received from the Company's independent auditors.

A-135. The Company has not received management letters or letters of recommendation from the Company's independent auditors for at least the last twelve years.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 136

Responding Witness: Robert M. Conroy

Q-136. What is the ratemaking treatment for customer deposits proposed by the Company?

a. Where is such proposal found in the filing?

b. Provide the monthly level of customer deposits for the period December 2010 thru December 2014.

c. Provide the monthly interest expense paid by the Company on customer deposits for the same period.

A-136. See the response to part a.

a. For ratemaking purposes in this proceeding, the Companies followed the Commission's Order in Case No. 98-474 (KU) and Case No. 98-426 (LG&E) in which interest expenses on deposits are not included as a component of revenue requirement and customer deposits are not deducted from rate base or included as a component of capitalization.

b. See attached.

c. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 137

Responding Witness: Christopher M. Garrett

Q-137. Please provide for each year from 2005 through 2014 the gross and net additions to deferred taxes. Please breakdown such additions within each year by sub-account, providing the number and name for each account and sub-account. Provide also the same information projected data for the fully forecasted test period.

a. For each item by year please reconcile the gross to net additions and explain how that reconciliation was derived.

A-137. See attached for the net additions to Accumulated Deferred Income Taxes for 2005 through 2014 along with the fully forecasted test period. Note that certain subaccounts have changed through the years.

a. The Company's reconciliations of these accounts are maintained based on net amounts, rather than being detailed by gross additions, deductions, etc.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 138

Responding Witness: Christopher M. Garrett

Q-138. For each distinct tax-timing difference for which the Company has provided deferred taxes, please identify the amount of excess deferred income taxes (i.e. deferred taxes accrued by the Company at federal tax rates higher than the current corporate tax rate, the excess is the difference over the current rate) existing on the Company's books at December 31, 2014 which can be flowed back to ratepayers on an accelerated basis (i.e. such amortization is not prohibited by the normalization requirements of the Internal Revenue Code). Show how these amounts are calculated.

A-138. See attached.

Kentucky Utilities Company

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 139

Responding Witness: Christopher M. Garrett

Q-139. Will the amount of investment tax credits utilized be increased if the Company is granted its requested rate increase in these proceedings? If not, why not? If so, provide calculations showing the Company's best estimate as to how much ITC will be utilized.

A-139. No, the amount of investment tax credits will not change as a result of these proceedings. The Company currently has no unutilized ITC and no new ITC is included in these proceedings.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 140

Responding Witness: Daniel K. Arbough

Q-140. List expense amounts for workers compensation insurance and claims for each year 2012, 2013 and 2014. Indicate in which expense accounts these items are recorded.

A-140. See response to Question No. 103 for a summary of workers compensation insurance expense for each year 2012, 2013 and 2014.

See attached for workers compensation claims incurred during 2012, 2013 and 2014.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 141

Responding Witness: Paula H. Pottinger, Ph.D.

Q-141. Please state whether any amounts have been booked during calendar year 2014, or will be booked during the fully forecasted test period, by the Company for the liability created pursuant to any employment severance compensation agreements.

A-141. Expenses related to severance compensation agreements in the amount of $160,371.45 were booked during the calendar year 2014. $1,700,000 of severance expenses were included in the fully forecasted test period.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 142

Responding Witness: Kent W. Blake

Q-142. List any antitrust expense included in the fully forecasted test period.

A-142. No antitrust expense is included in the fully forecasted test period.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 143

Responding Witness: David S. Sinclair

Q-143. Does the Company's proposed rate increase include any claim for attrition or suppression of sales? If so, please reference where this is presented.

A-143. The Companies' forecast methodology does not include attrition or suppression of sales.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 144

Responding Witness: David S. Sinclair

Q-144. Provide a complete copy of any and all attrition studies or analyses prepared by or for the Company during the period 2010 through 2014.

A-144. See response to Question No. 143.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 145

Responding Witness: Paul W. Thompson

Q-145. List and describe all maintenance programs and expenses which have been deferred into the fully forecasted test period from prior years 2012, 2013 and 2014, and for each item, explain the Company's reason for such deferral.

A-145. There are no maintenance programs and associated expenses that have been deferred from 2012, 2013, or 2014 to the fully forecasted test period.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 146

Responding Witness: David S. Sinclair

Q-146. Regarding the direct testimony of Mr. Sinclair at page 3, please provide any and all work papers and/or econometric models used to develop number of customers by service type and/or service classification. Work papers should be provided in Excel format with all cells unlocked.

A-146. See response to PSC 2-25.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 147

Responding Witness: David S. Sinclair

Q-147. Regarding the direct testimony of Mr. Sinclair at page 3, please provide the econometric models used to develop the residential and commercial customer use per customer with all input data in Excel format. Also, please provide a description of each input variable and what purpose it serves in predicting use per customer.

A-147. See response to PSC 2-25.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 148

Responding Witness: David S. Sinclair

Q-148. Please provide the weather normalized sales by month and by service classification for 2009-2014.

A-148. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 149

Responding Witness: Christopher M. Garrett

Q-149. Please provide the actual sales by month and by service classification for 2009-2014.

A-149. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 150

Responding Witness: Kent W. Blake

Q-150. Please provide for each year 2009 through 2014 and the base and test years, the amount of distribution base pay, overtime, incentive compensation and the amount of other pay broken down in the most detailed format available including the amount charged to capital, charged to expense and charged to other. If any of the other is ultimately expensed, provide the amount ultimately expensed in each year.

A-150. See attached. Actual payroll costs relating to calendar year 2009 are also provided, however the associated budgeted amounts are not included as the detailed labor components were not available until the Company implemented its current budgeting software, PowerPlant, in 2010.

Additionally, certain amounts included in the "Other Balance Sheet" column shown within this attachment relate to charges that will ultimately be expensed. However, due to the system process in which these charges are expensed, the labor portion of the amount is not readily determinable once the process is completed. The charges include, but are not limited to: stores expense undistributed, other regulatory assets, preliminary survey charges and transportation costs.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 151

Responding Witness: Russel A. Hudson

Q-151. For each year, 2009 through 2014 and the base and test years, provide a comparison of the amount of payroll that is budgeted versus actually charged to capital and O&M expense.

A-151. See the response to Question No. 150.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 152

Responding Witness: Paula H. Pottinger, Ph.D.

Q-152. For each employee group, provide the annual aggregate percentage increase in compensation granted and provide a breakdown of the aggregate percentage increase by type of increase (i.e. merit, promotion, step, etc.) for the years 2009 through 2014 and the base & test periods.

A-152. See attached. The table attached reflects increases by type for the years 2009 through 2014. The percentage increase categories for the base and test periods are expected to be consistent with prior years. Certain of the requested information is confidential and proprietary and is being provided under seal pursuant to a petition for confidential protection.

(1) The percentage increase by type for the base and test periods are expected to be consistent with prior years.

(2) KU USW negotiations resulted in annual increases of [redacted] effective 7/26/2015 and 7/24/2016. The remaining [redacted] offset other negotiated items.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 153

Responding Witness: Russel A. Hudson

Q-153. Provide for each year 2009 through 2014 and the base and test years, the distribution overtime by account. For any account that increased from one year to the next by more than 10% please provide an explanation of the activities that caused the increase.

A-153. See attached. For the variances of 10% or more, a dollar level of $25,000 is used as the threshold for variance explanations due to materiality.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 154

Responding Witness: Paula H. Pottinger, Ph.D.

Q-154. For the respective base and test years, provide the number of positions included in the request that are not currently filled, a listing of the positions and the associated payroll expense for those vacant positions.

A-154. There are currently 92 net positions to be filled during the base year. There are no net incremental headcount additions during the test year due to the retirement of the Cane Run and Green River steam plants. See attached for listing of positions and associated payroll expense.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 156

Responding Witness: D. Ralph Bowling

Q-156. Regarding the direct testimony of Paul Thompson, for the test period, please provide the number of employees that will be employed at the Cane Run 7 generating station for its day to day operations.

A-156. During the test period, 43 employees will be employed at the Cane Run 7 generating station for its day to day operations.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 157

Responding Witness: D. Ralph Bowling

Q-157. Regarding the direct testimony of Paul Thompson, please explain what the Company anticipates will happen to the work force at the Cane Run generating stations that are scheduled to be retired.

A-157. Of the employees assigned to Cane Run, we expect 43 to remain with Cane Run 7, 25 to accept a severance benefit and retire, and 40 will be placed elsewhere in the generation fleet.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 161

Responding Witness: John J. Spanos

Q-161. Regarding the direct testimony of John Spanos at page 5, please explain what historical data you reviewed with respect to KU and LG&E's other production plant. Did you mean historical retirement data as provided in the Company's 2001 Depreciation Study that is on file with the Commission?

A-161. As stated on page 5 and 6 of Mr. Spanos' testimony, the historical data reviewed with respect to KU and LG&E's other production plant was the same data as provided in the 2011 Depreciation Study (not 2001 Depreciation Study). This data is on file with the Commission.

Subject: RE: Cane Run 7

Eric,

1) 691 MW gross is the winter max.
2) The planned date is May 1, 2015
3) Development of the WBS is ongoing, I hope to complete it around end of Nov 2014.
4) It will be dispatched per load demand.
5) The facility is designed for 300 starts per year.

Noel

From: Riggs, Eric

Subject: Cane Run 7
Importance: High

Noel, Mike,

The following information has been requested by our Depreciation Consultant in order to determine depreciation rates to be used for Cane Run 7. If these questions cannot be answered by you, if you would

forward it to whomever is the right person and copy me, I would greatly appreciate it. We would like to get a response by COB Monday if at all possible. As usual, please note that the responses provided will be subject to data requests for how the answers were determined.

Item 3 would seem to be the most difficult one, but I would hope that we could use the estimate provided as of June 2014 and allocate the estimated total cost over these numbers. If that seems reasonable, then we would just need to know the estimated total cost of the projects for the two companies for the Cane Run 7 projects.

Thanks,
Eric Riggs

Questions from John Spanos regarding Cane Run Unit 7:

1) MW
2) Actual date going into service
3) Cost breakdown by account(estimated if available)
4) Whether the facility will be base load, load demand driven or peaker
5) Anticipated starts per year

There may be additional items needed but this is the primary information needed.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 163

Responding Witness: John J. Spanos

Q-163. Regarding the direct testimony of John Spanos at page 8, please provide the objective information that Mr. Spanos used to form the basis for the probable retirement year for Cane Run Unit 7.

A-163. The key objective information used to form the basis for the probable retirement year for Cane Run Unit 7 was the estimates of other similar facilities across the United States. This information has been provided in response to Questions No. 116 and 162.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 164

Responding Witness: John J. Spanos

Q-164. Regarding the direct testimony of John Spanos at page 8, please provide the outlook from Company management that was provided to Mr. Spanos that he then used to form the basis for the probable retirement year for Cane Run Unit 7. Also, please provide any material that the Company management gave to Mr. Spanos in this regard.

A-164. The outlook provided by Company management was provided to Mr. Spanos during a phone conversation at the beginning of his analyses. The material described the type of facility being constructed and the anticipated life expectancy of 40 years.

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 166

Responding Witness: John J. Spanos

Q-166. Regarding the direct testimony of John Spanos at page 9, please explain what historical net salvage data you reviewed with respect to KU and LG&E's. Did you mean historical retirement data as provided in the Company's 2001 Depreciation Study that is on file with the Commission?

A-166. As stated on page 9 of Mr. Spanos' testimony, the historical net salvage data reviewed in this analysis was the same data as provided in the 2011 Depreciation Study. This data assisted in understanding company practices for recording net salvage for other assets in the Other Production Accounts. Yes, this is the same data as provided in the company's 2011 Depreciation Study (not 2001 Depreciation Study) which is on file with the Commission.

Dated January 8, 2015

Question No. 167

Responding Witness: John J. Spanos

Q-167. Regarding the direct testimony of John Spanos at page 9, please provide any and all material for other electric companies that Mr. Spanos used in his consideration of net salvage for Cane Run Unit 7.

A-167. The attachment to Question No. 117 sets forth net salvage percents of other utilities which have facilities in Other Production accounts which were utilized for determining a net salvage percent for Cane Run Unit 7.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 168

Responding Witness: Kent W. Blake

Q-168. Please provide the revenue requirement impact of a 50-basis-point change in return on equity. Explain how the response was calculated.

A-168. + (-) $15,062,122

The response was calculated by inputting a 50-basis-point change in the return on equity cost rate (Column K) on Schedule J-1.1/J-1.2, Page 1 of 3. The resulting 13-Month Average Weighted Cost (Column L) is input on Schedule A, Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 169

Responding Witness: Kent W. Blake

Q-169. Please provide the revenue requirement impact of a 100-basis-point change in return on equity. Explain how the response was calculated.

A-169. + (-) $30,124,243

The response was calculated by inputting a 100-basis-point change in the return on equity cost rate (Column K) on Schedule J-1.1/J-1.2, Page 1of 3. The resulting 13-Month Average Weighted Cost (Column L) is input on Schedule A, Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 170

Responding Witness: Kent W. Blake

Q-170. Please provide the revenue requirement impact of a 200-basis-point change in return on equity. Explain how the response was calculated.

A-170. + (-) $60,248,486

The response was calculated by inputting a 100-basis-point change in the return on equity cost rate (Column K) on Schedule J-1.1/J-1.2, Page 1of 3. The resulting 13-Month Average Weighted Cost (Column L) is input on Schedule A, Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 171

Responding Witness: Valerie L. Scott / Counsel

Q-171. Board of Directors Meeting Minutes. Please provide copies of the Board of Directors Meeting Minutes for the years 2009 through 2012 and 2013 year-to-date.

A-171. The Company objected to this request on January 19, 2015. Without waiver of that objection, The Company provided the 2009 minutes in Case No. 2009-00548 in its response to the AG 1-15, dated March 15, 2010, which the Company hereby incorporates by reference. The Company provided the minutes for 2010, 2011, and 2012 through June 28, 2012, in Case No. 2012-00221 in its response to the AG 1-65, dated July 31, 2012, which the Company hereby incorporates by reference. See attached for the minutes for the remainder of 2012, 2013, and 2014. No Board of Director meetings have been held to-date in 2015.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

July 19, 2012

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

FLEET PULSE JET FABRIC FILTER EQUIPMENT PURCHASE AGREEMENTS

WHEREAS, the Company, together with its affiliate, Louisville Gas and Electric Company ("LG&E") (collectively, the "Companies"), has conducted negotiations with Clyde Bergemann Inc. or affiliates ("CB") regarding four proposed lump-sum agreements with CB to engineer, procure and furnish certain air compliance equipment for the Companies' facilities located at E.W. Brown Station 2, Ghent Station, Mill Creek Station and Trimble County Station Unit 1 (the "EPA Contracts"); and

WHEREAS, the EPA Contracts have an anticipated term of three to four years and an aggregate total value of approximately $179,350,000, each subject to certain modification, adjustment or other variable mechanisms; and

WHEREAS, the Board of Directors has considered matters relating to the EPA Contracts and deems it advisable and in the best interest of the Company to proceed with such transaction.

NOW, THEREFORE, BE IT RESOLVED, that the Board of Directors does hereby authorize and approve the EPA Contracts; and

FURTHER RESOLVED, that the Chief Executive Officer, President, Chief Financial Officer, Chief Administrative Officer, General Counsel, Chief Compliance Officer and Corporate Secretary, Chief Information Officer, any Vice President, the Treasurer, or the Controller of the Company (each an "Authorized Officer"), be, and each of them hereby is, authorized and directed to negotiate, execute and deliver, from time to time, for and on behalf of the Company the EPA Contracts, and, in connection therewith, (i) such equipment purchase, demolition and other related contracts, or amendments thereto; (ii) relevant federal, state or other governmental notices, filings or applications; and (iii) any other agreement, document or instrument, that may be necessary or appropriate, including but not limited to credit, security, pledge, guaranty, insurance or other financial support arrangements, with such officer's execution and delivery to conclusively evidence such officer's approval thereof and the approval of the Board of Directors; and

FURTHER RESOLVED, that the Authorized Officers of the Company are, and each of them hereby is, authorized and directed, to take such other actions as they shall, in their discretion, deem necessary, appropriate or advisable to consummate the EPA Contracts, including such additional terms, conditions precedent or other changes as may be deemed necessary, appropriate or advisable in the discretion of such officers, with the taking of such actions and the execution of such agreements or documents conclusively to evidence the authorization thereof by the Board of Directors; and

FURTHER RESOLVED, that all actions heretofore or hereafter taken by any officer of the Company in connection with the EPA Contracts contemplated by these resolutions be, and they hereby are, approved, ratified and confirmed in all respects.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

Paul A. Farr

Chris Hermann

S. Bradford Rives

William H. Spence

Victor A. Staffieri

Paul W. Thompson

FURTHER RESOLVED, that the Authorized Officers of the Company are, and each of them hereby is, authorized and directed, to take such other actions as they shall, in their discretion, deem necessary, appropriate or advisable to consummate the EPA Contracts, including such additional terms, conditions precedent or other changes as may be deemed necessary, appropriate or advisable in the discretion of such officers, with the taking of such actions and the execution of such agreements or documents conclusively to evidence the authorization thereof by the Board of Directors; and

FURTHER RESOLVED, that all actions heretofore or hereafter taken by any officer of the Company in connection with the EPA Contracts contemplated by these resolutions be, and they hereby are, approved, ratified and confirmed in all respects.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

July 19, 2012

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

CANE RUN UNIT 7 ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT

WHEREAS, the Company, together with its affiliate, Louisville Gas and Electric Company ("LG&E") (collectively LG&E and KU are herein called the "Companies"), has conducted negotiations and entered into with Bluegrass Power Constructors, a joint venture between PCL Industrial Construction Co. and Overland Contracting, Inc., or affiliated entities ("Bluegrass"), an agreement for engineering, procurement and construction services relating to the completion of a new approximately 640 MW natural gas combined cycle generating plant at the Companies' facilities located at the Cane Run site in Louisville, Kentucky (the "Cane Run Unit 7 Contract"); and

WHEREAS, the Cane Run Unit 7 Contract has an anticipated term of three to four years and an aggregate total value of approximately $455,000,000, each subject to certain modification, adjustment or other variable mechanisms; and

WHEREAS, the Board of Directors has considered matters relating to the Cane Run Unit 7 Contract and deems it advisable and in the best interest of the Company to proceed with such transaction and to ratify the actions of the Company in entering into the Cane Run Unit 7 Contract.

NOW, THEREFORE, BE IT RESOLVED, that the Board of Directors does hereby authorize, approve and ratify the Cane Run Unit 7 Contract; and

FURTHER RESOLVED, that the Chief Executive Officer, President, Chief Financial Officer, Chief Administrative Officer, General Counsel, Chief Compliance Officer and Corporate Secretary, Chief Information Officer, and Vice President, the Treasurer or the Controller of the Company (each an "Authorized Officer") be, and each of them hereby is, authorized and directed to negotiate, execute and deliver, from time to time, for and on behalf of the Company the Cane Run Unit 7 Contract and, in connection therewith, (i) such equipment purchase, demolition and other related contracts, or amendments thereto; (ii) relevant federal, state or other governmental notices, filings or applications; and (iii) any other agreement, document or instrument, that may be necessary or appropriate, including but not limited to credit, security, pledge, guaranty, insurance or other financial support arrangements, with such officer's execution

and delivery to conclusively evidence such officer's approval thereof and the approval of the Board of Directors; and

FURTHER RESOLVED, that the Authorized Officers of the Company are, and each of them hereby is, authorized and directed, to take such other actions as they shall, in their discretion, deem necessary, appropriate or advisable to consummate the Cane Run Unit 7 Contract, including such additional terms, conditions precedent or other changes as may be deemed necessary, appropriate or advisable in the discretion of such officers, with the taking of such actions and the execution of such agreements or documents conclusively to evidence the authorization thereof by the Board of Directors; and

FURTHER RESOLVED, that all actions heretofore or hereafter taken by any officer of the Company in connection with the Cane Run Unit 7 Contract contemplated by these resolutions be, and they hereby are, approved, ratified and confirmed in all respects.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

Paul A. Farr

Chris Hermann

ACTION OF THE BOARD OF DIRECTORS
OF
KENTUCKY UTILITIES COMPANY
TAKEN BY WRITTEN CONSENT
IN LIEU OF AN ANNUAL MEETING

August 3, 2012

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of an annual meeting and consents to the actions contemplated thereby:

ELECTION OF OFFICERS

RESOLVED, that each of the following persons be appointed to the office of the Company set out below opposite his or her name, to hold such office until the next annual meeting of the Board of Directors except as otherwise provided in the By-laws and to have all those duties and powers permitted by law, or by the Articles of Incorporation or by the By-laws, or as otherwise appropriate.

Victor A. Staffieri	Chairman of the Board, Chief Executive Officer and President
Daniel K. Arbough	Treasurer
Michael S. Beer	Vice President – Federal Regulation and Policy
Lonnie E. Bellar	Vice President – State Regulation and Rates
Kent W. Blake	Chief Financial Officer
D. Ralph Bowling	Vice President – Power Production
Laura M. Douglas	Vice President – Corporate Responsibility and Community Affairs
Chris Hermann	Senior Vice President – Energy Delivery
John P. Malloy	Vice President – Energy Delivery – Retail Business
Dorothy E. O'Brien	Vice President and Deputy General Counsel, Legal and Environmental Affairs
Paula H. Pottinger	Senior Vice President – Human Resources
Gerald A. Reynolds	General Counsel, Chief Compliance Officer and Corporate Secretary
S. Bradford Rives	Chief Administrative Officer
Valerie L. Scott	Controller
George R. Siemens	Vice President – External Affairs
David S. Sinclair	Vice President – Energy Marketing
Eric Slavinsky	Chief Information Officer
Edwin R. Staton	Vice President – Transmission
Paul Gregory Thomas	Vice President – Energy Delivery – Distribution Operations
Paul W. Thompson	Senior Vice President – Energy Services
John N. Voyles, Jr.	Vice President – Transmission and Generation Services
Mary C. Whelan	Vice President – Communications

DESIGNATION OF EXECUTIVE OFFICERS

WHEREAS, Item 401(b) of Regulation S-K of the Securities Exchange Act of 1934 provides that the Company may identify its officers and those of its subsidiaries, and such other persons performing policy-making functions for the Company who are thus considered Executive Officers.

NOW, THEREFORE, BE IT RESOLVED, that the Company hereby designates the following persons as Executive Officers for 2012:

Victor A. Staffieri	Chairman of the Board, Chief Executive Officer and President
Kent W. Blake	Chief Financial Officer
Chris Hermann	Senior Vice President – Energy Delivery
Gerald A. Reynolds	General Counsel, Chief Compliance Officer and Corporate Secretary
S. Bradford Rives	Chief Administrative Officer
Paul W. Thompson	Senior Vice President – Energy Services

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

November 2, 2012

Pursuant to the provisions of Section 271B.8-210 the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company" or "KU"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

AMENDMENT OF REVOLVING CREDIT FACILITIES; EXPANSION OF COMMERCIAL PAPER PROGRAM

WHEREAS, the Company is borrower under a $400 million Revolving Credit Agreement, dated as of November 1, 2010, among the Company, the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, as amended (the "Existing Credit Agreement"), subject to the ability to expand the facility by up to $100 million at the Company's request and subject to the consent of the lenders, and the Existing Credit Agreement is currently scheduled to expire in October 2016; and

WHEREAS, the Board, by action on June 5, 2012, authorized the Company to increase the amount of borrowings available under its revolving credit facilities to a total aggregate amount of up to $500 million, including through modification of the Existing Credit Agreement or by entering into additional revolving credit facilities having similar terms and having a maximum principal amount not to exceed $100 million (the "Additional Revolving Credit Facilities"); and

WHEREAS, the Company desires to amend and restate the Existing Credit Agreement to extend the expiration date to a date approximately five (5) years from the date of any such amendment, and retain the ability to expand it to permit borrowings or other extensions of credit having a combined aggregate principal amount of up to $500 million (the "Amended Credit Agreement"); and

WHEREAS, the Board has determined that it is in the Company's best interests to authorize the Amended Credit Agreement and to retain the ability and authorization to increase the amount available under its revolving credit facilities by entering into Additional Revolving Credit Facilities, provided however, that the combined aggregate permitted borrowings or extensions of credit under the Amended Credit Agreement and the Additional Revolving Credit Facilities shall not exceed $500 million; and

WHEREAS, the Board, by action on December 22, 2011, authorized the Company to establish a commercial paper program providing for the issuance from time to time of up to $250 million aggregate principal amount of commercial paper notes (the "Commercial Paper Program"); and

WHEREAS, the Company desires to amend the Commercial Paper Program to increase the amount of permitted issuances of such notes under such program to up to $350 million in aggregate principal amount, and;

WHEREAS, the Board has determined that it is advisable and in the Company's best interest to authorize an increase in the size of the Commercial Paper Program.

NOW, THEREFORE, BE IT RESOLVED, by the Board as follows:

Credit Agreements or Amendments

(a) That the Chief Executive Officer, President, Chief Financial Officer, the Chief Administrative Officer, the General Counsel, Chief Compliance Officer and Corporate Secretary, any Vice President, the Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") be, and each of them hereby is, authorized and empowered to negotiate, execute and enter into, on behalf of the Company, such forms of amended, modified, replacement or new promissory notes or credit agreements, relating to the Amended Credit Agreement or Additional Revolving Credit Facilities, providing for borrowings or other extensions of credit of up to $500 million in aggregate principal amount, with existing or new banks and financial institutions, that such Authorized Officer deems necessary or desirable to document and effect the Amended Credit Agreement, together with such other agreements, instruments, notices, certificates and documents, on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive agreement to conclusively evidence such officer's approval and the approval of this Board of Directors.

(b) That the Authorized Officers be, and each of them hereby is, authorized by and on behalf of the Company to: (i) request advances (including issuance of letters of credit) under the Amended Credit Agreement or Additional Revolving Credit Facilities; (ii) delegate to any other officers or employees of the Company, either acting individually or jointly, authority to request advances (including issuances of letters of credit) under the Amended Credit Agreement or Additional Revolving Credit Facilities; and (iii) execute and deliver any other agreements and documents and take any and all other action as contemplated by the Amended Credit Agreement or Additional Revolving Credit Facilities or as such officer may deem necessary or desirable in connection with the making of advances (including issuances of letters of credit) on account of the Company pursuant to the Amended Credit Agreement or Additional Revolving Credit Facilities.

(c) That the Authorized Officers be, and each of them hereby is, authorized and directed to cause the preparation of, to approve, or consent to, and execute and deliver the necessary documents, instruments, agreements or certificates necessary to enter into the Amended Credit Agreement or Additional Revolving Credit Facilities.

Commercial Paper Program

(d) That the Authorized Officers are each hereby authorized to arrange, on behalf of the Company, for the expansion of the Company's Commercial Paper Program, whereby unsecured promissory notes, in aggregate principal amount of up to $350 million, shall be issued by the Company from time to time, having such terms and conditions as are approved by an Authorized Officer, including, but not limited to, the selection of one or more issuing and paying agents and one or more dealers for such notes; provided, that the

outstanding promissory notes so issued do not exceed at any one time the aggregate amount of credit then available under the Company's credit agreements with banks and other lenders, and provided that the term or terms of such notes shall not exceed 270 days and the rate or rates of interest on such notes are related to market-based rates; and

(e) That the Authorized Officers of this Company are, and each of them is, hereby further authorized to prepare, negotiate, execute and/or deliver on behalf of the Company in connection with such Commercial Paper Program, (i) promissory notes or other obligations of the Company arising in connection therewith; (ii) agreements with dealers, depositaries, issuing agents and paying agents; (iii) offering memoranda, (iv) appointments or designations, from time to time, of individuals authorized to give or receive instructions, or take actions, on behalf of the Company, with such financial institutions, with such appointments or designations to be in writing, signed by two officers of the Company, one of whom must be the Chief Financial Officer or Treasurer and (v) all other confirmations, documents, instruments and certificates, in each case, as may be necessary or in their judgment desirable, from time to time, in connection with the issuance by the Company of its commercial paper notes; all such promissory notes, offering memoranda, agreements, amendments, confirmations, documents, instruments and certificates to include such terms (including such rate or rates of interest as such officer shall approve based on market conditions at the time of issuance) and to be in such form or forms as the officer executing the same on behalf of the Company may approve, his execution thereof to be conclusive evidence of such approval; and

General

(f) That the Authorized Officers of the Company be, and each of them hereby is, authorized in the name and on behalf of the Company and under its corporate seal or otherwise, to take or cause to be taken all such further actions and to execute and deliver or cause to be executed and delivered all such further documents, instruments, agreements and certificates (including without limitation, instruments authorizing or consenting to any amendment, modification or waiver to any of the agreements referred to in these resolutions) as such persons may deem necessary, advisable or appropriate in connection with the transactions contemplated thereby and hereby, and to incur all such fees and expenses as shall be necessary, advisable or appropriate in their judgment in order to carry into effect the purpose and intent of any and all of the foregoing resolutions.

(g) That the Authorized Officers of the Company be, and each of them hereby is, authorized and empowered to execute and file, or cause to be filed, on behalf of the Company, such applications, petitions or notices (including amendments or supplements thereto) with the Public Service Commission of the Commonwealth of Kentucky, the State Corporation Commission of the Commonwealth of Virginia or the Tennessee Regulatory Authority, and any other federal, state, or local commission, court, agency or body having jurisdiction as may be required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company may deem to be necessary or desirable in connection with the transactions contemplated hereby, as may be required by law or as may be deemed to be proper or appropriate in their judgment or in the judgment of counsel for the Company in connection with the foregoing.

(h) That any and all actions heretofore taken by the Authorized Officers within the terms of the foregoing resolutions, including any actions taken in connection with applications to the Public Service Commission of the Commonwealth of Kentucky, the State Corporation Commission of the Commonwealth of Virginia or the Tennessee Regulatory Authority, or any other federal, state, or local commission, court, agency or body having jurisdiction as

required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company deemed to be necessary or desirable in connection with the transactions contemplated hereby, be and the same are hereby in all respects approved, ratified and confirmed.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS
OF
KENTUCKY UTILITIES COMPANY
TAKEN BY WRITTEN CONSENT
IN LIEU OF A SPECIAL MEETING

December 3, 2012

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

GHENT ENVIRONMENTAL AIR COMPLIANCE
ENGINEERING, PROCUREMENT AND CONSTRUCTION CONTRACT

WHEREAS, the Company has conducted negotiations and desires to enter into an engineering, procurement and construction contract ("EPC Contract") with Kellogg Brown & Root LLC for the installation of fabric filter baghouses and related equipment on the four generating units at the Company's Ghent, Kentucky Station; and

WHEREAS, the EPC Contract has an anticipated term of approximately four years and an aggregate total value of approximately $501,400,000, subject to certain modification, adjustment or other variable mechanisms; and

WHEREAS, the Board of Directors has considered matters relating to the EPC Contract and deems it advisable and in the best interest of the Company to proceed with such transaction.

NOW, THEREFORE, BE IT RESOLVED, that the Board of Directors does hereby authorize and approve the EPC Contract; and

FURTHER RESOLVED, that the Chief Executive Officer, President, Chief Financial Officer, Chief Administrative Officer, General Counsel, Chief Compliance Officer and Corporate Secretary, Chief Information Officer, any Vice President, the Treasurer or the Controller of the Company (each an "Authorized Officer") be, and each of them hereby is, authorized and directed to negotiate, execute and deliver, from time to time, for and on behalf of the Company the EPC Contract and, in connection therewith, (i) such equipment or supplies purchase demolition, or other related contracts, or amendments thereto; (ii) relevant federal, state or other governmental notices, filings or applications; and (iii) any other agreement, document or instrument, that may be necessary or appropriate, with such officer's execution and delivery to conclusively evidence such officer's approval thereof and the approval of the Board of Directors; and

FURTHER RESOLVED, that the Authorized Officers of the Company are, and each of them hereby is, authorized and directed, to take such other actions as they shall, in their discretion, deem necessary, appropriate or advisable to consummate the EPC Contract, including such additional terms, conditions precedent or other changes as may be deemed necessary, appropriate or advisable in the discretion of such officers, with the taking of such actions and the execution of such agreements or documents conclusively to evidence the authorization thereof by the Board of Directors; and

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

Paul A. Farr

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

December 20, 2012

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

CANE RUN UNIT 7 LONG-TERM PROGRAM CONTRACT

WHEREAS, the Company, together with its affiliate, Louisville Gas and Electric Company ("LG&E") (collectively LG&E and the Company are hereinafter referred to as the "Companies"), has conducted negotiations and desires to enter into a Long-Term Program Contract with Siemens Energy, Inc., or affiliates, (the "LTPC") for certain future parts, equipment, inspection, maintenance and warranty services relating to the natural gas-fired combined cycle combustion turbines to be located at the Cane Run station in Louisville, Kentucky; and

WHEREAS, the anticipated term of the LTPC would vary based upon actual start cycles, operating hours and maintenance events of the turbines, subject to various termination rights by the Companies for convenience, cause or changed circumstances; and

WHEREAS, the LTPC may have a term of up to approximately 32 years and contract expenditures of up to approximately $176.4 million and is estimated to provide important efficiencies and savings to the Companies; and

WHEREAS, the Board of Directors has considered matters relating to the LTPC and deems it advisable and in the best interest of the Company to proceed with such transaction.

NOW THEREFORE, BE IT RESOLVED, that the Board of Directors does hereby authorize and approve the LTPC; and

FURTHER RESOLVED, that the Chief Executive Officer, President, Chief Financial Officer, Chief Administrative Officer, General Counsel, Chief Compliance Officer and Corporate Secretary, Chief Information Officer, and Vice President, the Treasurer or the Controller of the Company (each an "Authorized Officer") be, and each of them hereby is, authorized and directed to negotiate, execute and deliver, from time to time, for and on behalf of the Company the LTPC and, in connection therewith, (i) such equipment, supplies or, purchase contracts, or other related contracts, or amendments thereto; (ii) relevant federal, state or other governmental notices, filings or applications; and (iii) any other agreement, document or instrument, that may be necessary or appropriate, including but not limited to insurance, with such officer's execution and delivery to

conclusively evidence such officer's approval thereof and the approval of the Board of Directors; and

FURTHER RESOLVED, that the Authorized Officers of the Company are, and each of them hereby is, authorized and directed, to take such other actions as they shall, in their discretion, deem necessary, appropriate or advisable to consummate the LTPC, including such additional terms, conditions precedent or other changes as may be deemed necessary, appropriate or advisable in the discretion of such officers, with the taking of such actions and the execution of such agreements or documents conclusively to evidence the authorization thereof by the Board of Directors; and

FURTHER RESOLVED, that all actions heretofore or hereafter taken by any officer of the Company in connection with the LTPC contemplated by these resolutions be, and they hereby are, approved, ratified and confirmed in all respects.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

February 14, 2013

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

APPROVAL OF 2013 BUSINESS PLAN

WHEREAS, the Board believes it desirable and in the best interests of the Company to adopt the 2013 Business Plan Earnings Summary for LG&E and KU Energy LLC and its subsidiaries dated as of January 15, 2013 (the "Business Plan"), as provided to the Board and attached hereto as Exhibit A.

NOW, THEREFORE, BE IT RESOLVED, that the Company hereby adopts and approves, where applicable to it, the Business Plan; and

FURTHER RESOLVED, that all actions heretofore or hereafter taken by any appropriate officer of the Company consistent with these resolutions be, and they hereby are, approved, ratified and confirmed in all respects.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS
OF
KENTUCKY UTILITIES COMPANY
TAKEN BY WRITTEN CONSENT
IN LIEU OF A SPECIAL MEETING

April 29, 2013

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

EXTENSION OF CREDIT FACILITIES IN SUPPORT OF CERTAIN EXISTING POLLUTION CONTROL BONDS

WHEREAS, various counties and other municipal entities in the Commonwealth of Kentucky (the "Issuers") have previously issued certain tax-exempt bonds for the benefit of the Company; and

WHEREAS, the proceeds of the bonds were borrowed by the Company pursuant to loan agreements with the Issuers and applied by the Company to the financing or refinancing of the acquisition and construction of certain pollution control facilities of the Company; and

WHEREAS, payment with respect to four series of such bonds (the "Bonds") is supported by four direct-pay irrevocable letters of credit totaling approximately $198 million (each, an "Existing Credit Facility," and collectively, the "Existing Credit Facilities") issued by Sumitomo Mitsui Banking Corporation, New York Branch ("Sumitomo"), as credit facility issuer, on May 2, 2011, under a $198,309,583.05 Letter of Credit Agreement, dated as of April 29, 2011, and as amended and restated as of August 16, 2012, (the "Credit Agreement") among the Company, the lenders from time to time party thereto and Banco Bilbao Vizcaya Argentaria, S.A., New York Branch ("BBVA"), as administrative agent; and

WHEREAS, the Board has determined that it is in the Company's best interests to extend the stated expiration of each of the Existing Credit Facilities for such Bonds and to extend the Termination Date of the Credit Agreement for up to four years from the existing Credit Agreement termination date or to arrange for replacement credit facilities with such later expiration, to replace BBVA as administrative agent under the Credit Agreement with Sumitomo under such Credit Agreement or under new replacement credit facilities in support of the Bonds, and to authorize the

proper officers of the Company to amend, renew or extend the Existing Credit Facilities or new credit facilities from time to time; and

WHEREAS, the Company currently has regulatory authority to extend the Existing Credit Facilities and the Credit Agreement or to arrange for replacement credit facilities with such later expiration and it would be in the Company's best interests to do so.

NOW, THEREFORE, BE IT RESOLVED, by the Board as follows:

(a) That the Chief Executive Officer, President, Chief Administrative Officer, Chief Financial Officer, any Vice President, the General Counsel, Chief Compliance Officer and Corporate Secretary, the Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") be, and each of them hereby is, authorized by and on behalf of the Company, to negotiate, execute and enter into, on behalf of the Company, one or more amendments to the Credit Agreement and/or other letter of credit or borrowing and/or reimbursement arrangements (the "New Bank Agreements"), with an aggregate principal amount of credit and/or letter of credit capacity available under such New Bank Agreements not to exceed $200 million, and with a term of up to four years beyond the termination date of the existing Credit Agreement on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive agreement to conclusively evidence such officer's approval and the approval of this Board of Directors.

(b) That the Authorized Officers be, and each of them hereby is, authorized on behalf of the Company to negotiate, execute and enter into, on behalf of the Company, any appointment letters, agency agreements, fee letters or similar letters providing for the appointment of Sumitomo, or such other bank as such Authorized Officer shall deem appropriate, as administrative agent under the New Bank Agreements on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive instrument or agreement to conclusively evidence such officer's approval and the approval of this Board of Directors.

(c) That the Authorized Officers be, and each of them hereby is, authorized on behalf of the Company to negotiate, execute and enter into, on behalf of the Company, any amendments to the New Bank Agreements (including renewals or extensions of said New Bank Agreements in accordance with their terms, or re-establishment of such arrangements, upon the same basic or more favorable terms of such New Bank Arrangements), and to execute and deliver any such amendments thereto.

(d) That the Authorized Officers be, and each of them hereby is, authorized by and on behalf of the Company, (i) to request extensions or other amendments to the Existing Credit Facilities or issuances of letters of credit in support of the Bonds (or other tax-exempt bonds issued on behalf of the Company) and other advances under the New Bank Agreements, (ii) to delegate to any other officers or employees of the Company, either acting individually or jointly, authority to request extensions or other amendments to the Existing Credit Facilities or issuances of letters of credit in support of such Bonds under the New Bank Agreements, and (iii) to execute and deliver any other agreements and documents and to take any and all other action as contemplated by the New Bank Agreements or as such Authorized Officer may deem necessary or desirable in connection with requesting extensions or other amendments to the Existing Credit Facilities or the making of advances (including issuances of letters of credit in support of the Bonds of each series) on account of the Company pursuant to the New Bank Agreements.

(e) That the Authorized Officers be, and each of them hereby is, authorized and directed to cause the preparation of, to approve, or consent to, and execute and deliver the necessary documents, instruments or certificates necessary to enter into the New Bank Agreements.

(f) That the proper officers of the Company be, and each of them hereby is, authorized in the name and on behalf of the Company and under its corporate seal or otherwise, to take or cause to be taken all such further actions and to execute and deliver or cause to be executed and delivered all such further documents, agreements and certificates (including without limitation, instruments authorizing or consenting to any amendment, modification or waiver to any of the agreements referred to in these resolutions, and any disclosure documents relating to the delivery of any New Bank Agreements) as such persons may deem necessary, advisable or appropriate in connection with the transactions contemplated thereby and hereby, and to incur all such fees and expenses as shall be necessary, advisable or appropriate in their judgment in order to carry into effect the purpose and intent of any and all of the foregoing resolutions.

(g) That any and all actions heretofore taken by the Authorized Officers within the terms of the foregoing resolutions, including any actions taken in connection with existing or new applications to the Public Service Commission of the Commonwealth of Kentucky, the Virginia State Corporation Commission, and the Tennessee Regulatory Authority or any other federal, state, or local commission, court, agency or body having jurisdiction as required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company deemed to be necessary or

desirable in connection with the transactions contemplated hereby, be and the same are hereby in all respects approved, ratified and confirmed.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

IN LIEU OF A SPECIAL MEETING

AUGUST 23, 2013

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consent to the actions contemplated thereby:

DECLARATION OF COMMON STOCK DIVIDEND

RESOLVED, that a dividend on the Common Stock of this Company is hereby declared for the quarter ending September 30, 2013, for payment to LG&E and KU Energy LLC on September 27, 2013, from funds legally available for payment of dividends, in an amount equal to $28,000,000 and the effect of such dividend shall be measured as of June 30, 2013.

FURTHER RESOLVED, that the Treasurer of the Company be and is hereby authorized to pay this dividend by check or otherwise and to take all necessary steps therefore.

This unanimous written consent of Directors may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS
OF
KENTUCKY UTILITIES COMPANY
TAKEN BY WRITTEN CONSENT
IN LIEU OF A SPECIAL MEETING

September 3, 2013

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopt the following resolutions by unanimous written consent in lieu of a special meeting and consent to the actions contemplated thereby:

SHORT-TERM DEBT AUTHORIZATION

WHEREAS, the Federal Power Act requires utilities to apply for authorization from the Federal Energy Regulatory Commission ("FERC") and state statutes or regulations may require utilities to apply for authorization from state agencies, respectively, to issue securities or assume certain obligations or liabilities, including the issuance of short-term debt or debt involving affiliates, as applicable; and

WHEREAS, the Board of Directors deems it to be in the best interests of the Company that it take actions necessary to obtain the required FERC and state authorizations and to authorize the issuance during the period ending November 30, 2015, of such debt with maturities not more than one year from the date of the borrowing or renewal up to a limit of $500 million at any time.

NOW, THEREFORE, BE IT RESOLVED, that, during the period commencing November 30, 2013 and continuing through November 30, 2015, this Company be and hereby is authorized to issue and reissue from time to time, in either domestic or foreign markets and to have outstanding at any one time up to $500 million of promissory notes and other evidences of secured and unsecured indebtedness, in each case maturing on demand or otherwise in one year or less from the date of issuance (collectively, the "Debt Securities"); and

FURTHER RESOLVED, that the proper officers of this Company are hereby authorized to prepare, execute and file, on behalf of this Company, an appropriate application with the FERC under Section 204 of the Federal Power Act and appropriate applications with any state regulatory authorities for approval to issue and reissue up to $500 million of Debt Securities to carry out the purpose of the foregoing resolution; and

FURTHER RESOLVED, that the Chief Executive Officer, President, Chief Financial Officer, the Chief Administrative Officer, the Chief Operating Officer, the General Counsel, Chief Compliance Officer and Corporate Secretary, any Vice

President, the Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") are hereby authorized and empowered to execute and deliver, for and in the name of the Company, promissory notes, other evidences of indebtedness or instruments of renewal to evidence the borrowings made pursuant to the provisions of the foregoing resolutions; and

FURTHER RESOLVED, that the Authorized Officers of this Company are each hereby authorized to negotiate, prepare, distribute and execute on behalf of this Company such other documents, instruments, certificates and agreements as may be necessary or, in their judgment, desirable, to carry out the purposes of the foregoing resolutions in such form as the officer executing the same approves, such judgment to be conclusively evidenced by such execution, and to take any and all such further action as may be necessary, or in their judgment, desirable, to carry out the purposes of the foregoing resolutions; and

FURTHER RESOLVED, that any and all actions heretofore taken by any officer or officers or director or directors of this Company within the terms of the foregoing resolutions are hereby approved, ratified and confirmed in all respects.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

September 3, 2013

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

EXTENSION OF REVOLVING CREDIT FACILITIES

WHEREAS, the Company is the borrower under a $400 million Amended and Restated Revolving Credit Agreement, dated as of November 6, 2012, among the Company, the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, (the "Existing Credit Agreement"), subject to the ability to expand the facility by up to $100 million at the Company's request and subject to the consent of the lenders, and the Existing Credit Agreement is currently scheduled to expire in November 2017; and

WHEREAS, the Company desires to provide for extension of the Existing Credit Agreement by amendment or modification thereof, or by entering into one or more additional revolving credit facilities to replace the Existing Credit Agreement, with a termination date on or before December 31, 2018, and retain the ability to expand it or enter into additional facilities to permit borrowings or other extensions of credit having a combined aggregate principal amount of up to $500 million; and

WHEREAS, the Board of Directors has determined that it is in the Company's best interest to authorize such an amendment or modification to, or replacement or supplementation of, the Existing Credit Agreement, so as to extend the term of its credit facility.

NOW, THEREFORE, BE IT RESOLVED, by the Board as follows:

Credit Agreements or Amendments

(a) That the Chief Executive Officer, President, Chief Financial Officer, the Chief Administrative Officer, the Chief Operating Officer, the General Counsel, Chief Compliance Officer and Corporate Secretary, any Vice President, the Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") be, and each of them hereby is, authorized and empowered to negotiate, execute and enter into, on behalf of the Company, such forms of amendments or modifications to, or such replacement, additional or supplemental credit agreements, to the Existing

Credit Agreement, (the Existing Credit Agreement, as so amended, modified, replaced, added and/or supplemented, collectively, a "Credit Agreement"), together with new or amended promissory notes thereunder, providing for borrowings or other extensions of credit of up to $500 million in aggregate principal amount, with existing or new banks and financial institutions, that such Authorized Officer deems necessary or desirable to document and effect the Credit Agreement, together with such other agreements, instruments, notices, certificates and documents, on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive agreement to conclusively evidence such officer's approval and the approval of this Board.

(b) That the Authorized Officers be, and each of them hereby is, authorized by and on behalf of the Company to: (i) request advances (including issuance of letters of credit) under the Credit Agreement; (ii) delegate to any other officers or employees of the Company, either acting individually or jointly, authority to request advances (including issuances of letters of credit) under the Credit Agreement; and (iii) execute and deliver any other agreements and documents and take any and all other action as contemplated by the Credit Agreement or as such officer may deem necessary or desirable in connection with the making of advances (including issuances of letters of credit) on account of the Company pursuant to the Credit Agreement.

(c) That the Authorized Officers be, and each of them hereby is, authorized and directed to cause the preparation of, to approve, or consent to, and execute and deliver the necessary documents, instruments, agreements or certificates necessary to enter into the Credit Agreement.

General

(d) That the Authorized Officers of the Company be, and each of them hereby is, authorized in the name and on behalf of the Company and under its corporate seal or otherwise, to take or cause to be taken all such further actions and to execute and deliver or cause to be executed and delivered all such further documents, instruments, agreements and certificates (including without limitation, instruments authorizing or consenting to any amendment, modification or waiver to any of the agreements referred to in these resolutions) as such persons may deem necessary, advisable or appropriate in connection with the transactions contemplated thereby and hereby, and to incur all such fees and expenses as shall be necessary, advisable or appropriate in their judgment in order to carry into effect the purpose and intent of any and all of the foregoing resolutions.

(e) That the Authorized Officers of the Company be, and each of them hereby is, authorized and empowered to execute and file, or cause to be filed, on behalf of the Company, such applications, petitions or notices (including amendments or supplements thereto) with the Public Service Commission of the Commonwealth of Kentucky, the State Corporation Commission of the Commonwealth of Virginia or the Tennessee Regulatory Authority, and any other federal, state, or local commission, court, agency or body having

jurisdiction as may be required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company may deem to be necessary or desirable in connection with the transactions contemplated hereby, as may be required by law or as may be deemed to be proper or appropriate in their judgment or in the judgment of counsel for the Company in connection with the foregoing.

(f) That any and all actions heretofore taken by the Authorized Officers within the terms of the foregoing resolutions, including any actions taken in connection with applications to the Public Service Commission of the Commonwealth of Kentucky, the State Corporation Commission of the Commonwealth of Virginia or the Tennessee Regulatory Authority, or any other federal, state, or local commission, court, agency or body having jurisdiction as required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company deemed to be necessary or desirable in connection with the transactions contemplated hereby, be and the same are hereby in all respects approved, ratified and confirmed.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

December 20, 2013

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

WHEREAS, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") amended the Commodity Exchange Act (the "CEA") to give the Commodity Futures Trading Commission ("CFTC") the authority to require that certain types of swaps be centrally cleared and executed only on a CFTC-regulated trading facility (the "central clearing mandate"); and

WHEREAS, the Dodd-Frank Act also amended the CEA to include a provision allowing certain non-financial entities to elect an "end-user exception" to the central clearing mandate, under certain conditions; and

WHEREAS, in order to take advantage of the end-user exception to the central clearing mandate for swaps, an appropriate committee of the Board of Directors of PPL Corporation, the ultimate parent of the Company, must review and approve the decisions by the Company, as well as the Company's wholly owned subsidiaries, to elect the end-user exception; and

WHEREAS, the PPL Corporation Board of Directors designated its Finance Committee (the "PPL Finance Committee") as the appropriate committee to review and approve the use of the end-user exception to the central clearing mandate; and

WHEREAS, because the Company is an issuer of securities that are registered under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78l) or is required to file reports pursuant to section 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78o), in order to take advantage of the end-user exception to such central clearing mandate for swaps, the Company's Board of Directors must review and approve the decisions by the Company and/or each of its affected subsidiaries to elect the end-user exception.

NOW, THEREFORE, BE IT RESOLVED, that the Board of Directors approves the election of the end-user exception by the Company and any of its wholly owned subsidiaries, each in accordance with the requirements of applicable law and regulations, and in accordance with

the risk management policies and procedures of the Company and each of its affected subsidiaries; and

FURTHER RESOLVED, that the Board of Directors shall review the election of the end-user exception to the central clearing mandate for swaps by it and each of its affected subsidiaries no less frequently than as required by the applicable law and regulations; and

FURTHER RESOLVED, that the proper officers of the Company be, and each of them hereby is, authorized and directed to report this Board of Directors action to the CFTC in accordance with applicable regulations and, if requested, provide a copy of these resolutions to the CFTC.

This unanimous written consent of Directors may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

March 13, 2014

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

ISSUANCE OF FIRST MORTGAGE BONDS

WHEREAS, the Board of Directors of the Company (the "Board") has determined that it is desirable and in the best interests of the Company to issue up to $500,000,000 aggregate principal amount of long-term debt in the form of first mortgage bonds for general corporate purposes, including construction and other capital expenditures, operational funding requirements, and repayment, refunding or refinancing of short- or long-term debt at maturity or otherwise.

NOW, THEREFORE, BE IT RESOLVED, by the Board as follows:

The Offering

(a) That the Board authorizes and approves the issuance and sale by the Company from time to time, in one or more series, and in any combination, of up to $500,000,000 aggregate principal amount of long-term debt in the form of first mortgage bonds (any of such bonds, the "Debt Securities") in one or more underwritten public offerings, negotiated sales, or private placement transactions (such offerings, sales and transactions collectively referred to herein as the "Offering"), the net proceeds of such Debt Securities to be used for general corporate purposes, including construction and other capital expenditures, operational funding requirements, and repayment, refunding or refinancing of short- or long-term debt at maturity or otherwise.

(b) That the Company be, and it hereby is, authorized to issue and offer for sale the Debt Securities through or to one or more underwriters, selling or placement agents, or other purchasers pursuant to an underwriting, purchase or similar agreement, on and subject to such terms and conditions as may be approved by the Authorized Officers (as defined below), provided that the interest rate on such Debt Securities shall not exceed 6.5% per annum.

Debt Securities or First Mortgage Bonds

(c) That the Chief Executive Officer, President, Chief Financial Officer, Chief Administrative Officer, Chief Operating Officer, General Counsel, Chief Compliance Officer and Corporate Secretary, any Vice President, the

Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") are, and each of them hereby is, authorized by and on behalf of the Company, to negotiate, enter into, execute and deliver one or more supplemental indentures, company orders and/or officer's certificates (the "Supplemental Indentures") pursuant to the Company's Indenture dated October 1, 2010 to The Bank of New York Mellon, as trustee (such Indenture, as heretofore supplemented and as to be further supplemented and amended by any such instrument the "Indenture") relating to the creation and issuance of, and establishing the designation, form, characteristics and terms of the Debt Securities, in such form or forms and having such terms as the Authorized Officers executing the same shall approve, and to perform all of the agreements and obligations of the Company under the Supplemental Indentures and Indenture and to consummate the transactions contemplated thereby; and that each Authorized Officer be, and hereby is, authorized to execute and deliver such other agreements, certificates and documents and to take such other actions in connection with the execution and delivery of any Supplemental Indenture or other instrument pursuant to the Indenture as such Authorized Officers deem necessary, advisable or appropriate; with such changes therein, additions thereto or omissions therefrom, as any Authorized Officer executing, acknowledging or delivering the same shall approve, such Authorized Officer's execution, acknowledgement and/or delivery thereof to be conclusive evidence of such approval.

(d) That the Authorized Officers are, and each of them hereby is, authorized, empowered and directed, in the name and on behalf of the Company, to execute, acknowledge and deliver new securities representing the Debt Securities in substantially such form and containing such terms and conditions as such Authorized Officer shall approve, with such changes therein, additions thereto or omissions therefrom as such Authorized Officer executing, acknowledging or delivering the same shall approve, such Authorized Officer's execution, acknowledgement and delivery thereof to be conclusive evidence of such approval.

(e) That the Authorized Officers are, and each of them hereby is, authorized, empowered and directed to fix and approve the terms and conditions on which the Debt Securities are to be issued and authenticated and the final terms of the Supplemental Indentures or any other instrument pursuant to the Indenture, including, without limitation, the rights of the holders thereof, the interest rate or rates, the maturity date or dates, the sinking fund, redemption or repurchase provisions and prices, the purchase price or prices and discounts thereto, the offering date and terms and all other matters relating thereto, and to take all such other actions as any Authorized Officer deems necessary, advisable or appropriate to consummate the transactions contemplated by the Supplemental Indentures.

(f) That a facsimile of the corporate seal of the Company may be imprinted on the Supplemental Indentures and/or Debt Securities, which facsimile is hereby acknowledged to be the corporate seal of the Company for the purposes of sealing the Debt Securities.

(g) That the Authorized Officers are, and each of them hereby is, authorized to execute and deliver on behalf of the Company, whether before or after issuance of the Debt Securities (i) one or more interest rate lock or swap agreements or similar agreements with one or more underwriters, banks or other financial institutions or other counter-parties, including affiliated entities, providing for the hedging of the interest rates or overall borrowing costs on such securities, and (ii) any other agreement, document or instrument that may be necessary or appropriate in connection with any such transaction.

Paying Agent and Security Registrar

(h) That The Bank of New York Mellon is hereby appointed to act as the initial paying agent and security registrar for the Debt Securities described herein in accordance with the provisions of the Indenture; provided that any Authorized Officer may take all actions necessary or desirable, on behalf of the Company, to provide for any additional or different paying agent or security registrar for any Debt Securities, if such Authorized Officer deems such provision to be desirable, such officer's determination to be conclusively evidenced by his execution of documentation effecting such appointment or change.

Offering Documents

(i) That, in connection with the issuance and sale of the Debt Securities, the Authorized Officers are, and each of them hereby is, authorized, empowered and directed, in the name and on behalf of the Company to: (i) prepare, or cause to be prepared, one or more prospectuses, offering memoranda or other appropriate disclosure documents (including all exhibits, annexes and other documents relating thereto) in connection with such issuance and sale of the Debt Securities, including any supplement(s) or amendment(s) thereto (the "Offering Memorandum"); (ii) execute, as such Authorized Officers or Authorized Officer deem(s) necessary, advisable or appropriate, any and all, agreements, documents and instruments in connection with such issuance and sale; and (iii) take all such other actions as such Authorized Officers or Authorized Officer deem(s) necessary, advisable or appropriate in order to effect the issuance and sale of the Debt Securities, such Authorized Officer's authority and determination to execute such documents and instruments and to take such actions being conclusively evidenced by such execution or action, as the case may be.

Authorization of Underwriting, Purchase or Similar Agreements

(j) That the Authorized Officers are, and each of them hereby is, authorized and directed, for and on behalf of the Company, to fix and approve the terms of an underwriting, purchase or similar agreement relating to the issuance and sale of the Debt Securities to one or more underwriters, selling or placement agents or other purchasers thereof (the "Purchase Agreement") to be entered into by and among the Company and such underwriters, agents or purchasers as may agree to become parties thereto, and the Authorized Officers be, and each of them hereby is, authorized to execute and deliver the same, in such form or with such changes therein, additions thereto or omissions therefrom as such Authorized Officers may approve, such execution and delivery by any such

Authorized Officer to be conclusive evidence of such authorization and approval.

(k) That the Authorized Officers are, and each of them hereby is, authorized to execute and file such instruments, make all such payments, and do such other acts and things as, in the opinion of any Authorized Officer, may be necessary or desirable in order to comply with the rules and regulations promulgated under the Securities Act of 1933, as amended; and to qualify the Company or any Debt Securities under the securities or "Blue Sky" laws of such states of the United States and other jurisdictions as may be necessary or desirable, and to take further necessary action for said purposes.

Regulatory Approval

(l) That the Authorized Officers of the Company are, and each of them hereby is, authorized and empowered to execute and file, or cause to be filed, on behalf of the Company, such applications, petitions or notices (including amendments or supplements thereto) with the Public Service Commission of the Commonwealth of Kentucky and any other federal, state, or local commission, court, agency or body having jurisdiction as may be required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company may deem to be necessary or desirable in connection with the transactions contemplated hereby, as may be required by law or as may be deemed to be proper or appropriate in their judgment or in the judgment of counsel for the Company in connection with the foregoing.

General

(m) That the Authorized Officers of the Company are, and each of them is, hereby authorized and empowered, in the name and behalf of the Company, to execute and deliver such agreements and other documents relating to electronic deposit and delivery, cash management, information services and such other matters as they shall deem necessary or desirable to otherwise facilitate the offering, issuance, sale and delivery of the Debt Securities and receive and apply the proceeds therefrom.

(n) That the officers of the Company are, and each of them hereby is, authorized in the name and on behalf of the Company and under its corporate seal or otherwise, to take or cause to be taken all such further actions and to execute and deliver or cause to be executed and delivered all such further instruments, agreements, certificates and other documents in connection with the Offering as such persons may deem necessary, advisable or appropriate in connection with the transactions contemplated thereby and hereby, and to incur all such fees and expenses as shall be necessary, advisable or appropriate in their judgment in order to carry into effect the purpose and intent of any and all of the foregoing resolutions.

(o) That any acts of the officers of this Company, which acts would have been authorized by the foregoing resolutions except that such acts were taken prior to the adoption of such resolutions, are hereby severally ratified, confirmed, approved and adopted as acts in the name of and on behalf of this Company.

(p) That the Authorized Officers are, and each of them hereby is, authorized and directed to take any and all further action to see that the intent of the above resolutions is carried forth.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

July 25, 2014

Pursuant to the provisions of Section 271B.8-210 the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company" or "KU"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

AMENDMENT OF REVOLVING CREDIT FACILITIES

WHEREAS, the Company is borrower under a $400 million Revolving Credit Agreement, dated as of November 6, 2012, among the Company, the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, as amended (the "Existing Credit Agreement"), subject to the ability to expand the facility by up to $100 million at the Company's request and subject to the consent of the lenders, and the Existing Credit Agreement is currently scheduled to expire in November 2017; and

WHEREAS, the Company desires to amend and restate the Existing Credit Agreement to extend the expiration date to a date approximately five (5) years from the date of any such amendment (the "Amended Credit Agreement"); and

WHEREAS, the Board has determined that it is in the Company's best interests to amend and restate the Existing Credit Agreement so as to affect the Amended Credit Agreement.

NOW, THEREFORE, BE IT RESOLVED, by the Board as follows:

(a) That the Chief Executive Officer, the President, the Chief Financial Officer, the Chief Operating Officer, the Chief Administrative Officer, the General Counsel, Chief Compliance Officer and Corporate Secretary, any Vice President, the Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") be, and each of them hereby is, authorized and empowered to negotiate, execute and enter into, on behalf of the Company, such forms of amended, modified, replacement or new promissory notes or credit agreements, relating to the Amended Credit Agreement, and enter into borrowings or other extensions of credit of up to $500 million in aggregate principal amount (including the optional expansion of the facility) and expiring on or before a date approximately five (5) years from the date of the Amended Credit Agreement, with existing or new banks and financial

institutions, that such Authorized Officer deems necessary or desirable to document and effect the Amended Credit Agreement, together with such other agreements, instruments, notices, certificates and documents, on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive agreement to conclusively evidence such officer's approval and the approval of this Board of Directors.

(b) That the Authorized Officers be, and each of them hereby is, authorized by and on behalf of the Company to: (i) request advances (including issuance of letters of credit) under the Amended Credit Agreement; (ii) delegate to any other officers or employees of the Company, either acting individually or jointly, authority to request advances (including issuances of letters of credit) under the Amended Credit Agreement; and (iii) execute and deliver any other agreements and documents and take any and all other action as contemplated by the Amended Credit Agreement or as such officer may deem necessary or desirable in connection with the making of advances (including issuances of letters of credit) on account of the Company pursuant to the Amended Credit Agreement.

(c) That the Authorized Officers be, and each of them hereby is, authorized and directed to cause the preparation of, to approve, or consent to, and execute and deliver the necessary documents, instruments, agreements or certificates necessary to enter into the Amended Credit Agreement.

(d) That the Authorized Officers of the Company be, and each of them hereby is, authorized in the name and on behalf of the Company and under its corporate seal or otherwise, to take or cause to be taken all such further actions and to execute and deliver or cause to be executed and delivered all such further documents, instruments, agreements and certificates (including without limitation, instruments authorizing or consenting to any amendment, modification or waiver to any of the agreements referred to in these resolutions) as such persons may deem necessary, advisable or appropriate in connection with the transactions contemplated thereby and hereby, and to incur all such fees and expenses as shall be necessary, advisable or appropriate in their judgment in order to carry into effect the purpose and intent of any and all of the foregoing resolutions.

(e) That the Authorized Officers of the Company be, and each of them hereby is, authorized and empowered to execute and file, or cause to be filed, on behalf of the Company, such applications, petitions or notices (including amendments or supplements thereto) with the Public Service Commission of the Commonwealth of Kentucky, the State Corporation Commission of the Commonwealth of Virginia or the Tennessee Regulatory Authority, and any other federal, state, or local commission, court, agency or body having jurisdiction as may be required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company may deem to

be necessary or desirable in connection with the transactions contemplated hereby, as may be required by law or as may be deemed to be proper or appropriate in their judgment or in the judgment of counsel for the Company in connection with the foregoing.

(f) That any and all actions heretofore taken by the Authorized Officers within the terms of the foregoing resolutions, including any actions taken in connection with applications to the Public Service Commission of the Commonwealth of Kentucky, the State Corporation Commission of the Commonwealth of Virginia or the Tennessee Regulatory Authority, or any other federal, state, or local commission, court, agency or body having jurisdiction as required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company deemed to be necessary or desirable in connection with the transactions contemplated hereby, be and the same are hereby in all respects approved, ratified and confirmed.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

August 22, 2014

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

EXTENSION OF CREDIT FACILITIES IN SUPPORT OF CERTAIN EXISTING POLLUTION CONTROL BONDS

WHEREAS, certain counties and other municipal entities in the Commonwealth of Kentucky (the "Issuers") have previously issued certain tax-exempt bonds for the benefit of the Company; and

WHEREAS, the proceeds of the bonds were borrowed by the Company pursuant to loan agreements with the Issuers and applied by the Company to the financing or refinancing of the acquisition and construction of certain pollution control facilities of the Company; and

WHEREAS, payment with respect to four series of such bonds (the "Bonds") is supported by four direct-pay irrevocable letters of credit totaling approximately $198 million (each, an "Existing Credit Facility", and collectively, the "Existing Credit Facilities") issued by Sumitomo Mitsui Banking Corporation, New York Branch ("Sumitomo"), as credit facility issuer, on May 2, 2011, under a $198,309,583.05 Letter of Credit Agreement, dated as of April 29, 2011, and as amended and restated as of August 16, 2012 and May 1, 2013, (the "Credit Agreement") among the Company, the lenders from time to time party thereto and Sumitomo, as administrative agent; and

WHEREAS, the Board has determined that it is in the Company's best interests to arrange for replacement credit facilities with The Bank of Tokyo-Mitsubishi UFJ, Ltd. and/or MUFG Union Bank, N.A. (individually or collectively, "MUFG"), or other appropriate banking or financial counterparties, under such Existing Credit Facilities or Credit Agreement, as extended, amended or restated, or under new replacement or substitute credit facilities and agreements in support of the Bonds, and to replace Sumitomo as administrative agent with MUFG, all for terms to expire no later than December 31, 2017; and

WHEREAS, the Company currently has regulatory authority to extend the Existing Credit Facilities and the Credit Agreement or to arrange for replacement

or substitute credit facilities with such later expiration date and it would be in the Company's best interests to do so.

NOW, THEREFORE, BE IT RESOLVED, by the Board as follows:

(a) That the Chief Executive Officer, President, Chief Operating Officer, Chief Administrative Officer, Chief Financial Officer, any Vice President, the General Counsel, Chief Compliance Officer and Corporate Secretary, the Treasurer, and the Controller of the Company (each, an "Authorized Officer" and, collectively, the "Authorized Officers") be, and each of them hereby is, authorized by and on behalf of the Company, to negotiate, execute and enter into, on behalf of the Company, one or more amendments or restatements to the Existing Credit Facilities or Credit Agreement and/or other letter of credit or borrowing and/or reimbursement arrangements, or enter into replacement or substitute such credit facilities, credit agreements, letters of credit or borrowing and/or reimbursement arrangements (all, collectively, the "New Bank Agreements"), with a collective, aggregate principal amount of credit and/or letter of credit capacity available under such New Bank Agreements not to exceed $198,309,583.05, and with a term or terms of up to December 31, 2017, on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive agreement to conclusively evidence such officer's approval and the approval of this Board of Directors.

(b) That the Authorized Officers be, and each of them hereby is, authorized on behalf of the Company to negotiate, execute and enter into, on behalf of the Company, any appointment letters, agency agreements, fee letters or similar letters providing for the appointment of MUFG, or such other bank as such Authorized Officer shall deem appropriate, as administrative agent under the New Bank Agreements on such terms and conditions as the officer executing such documents deems appropriate, with such officer's execution of a definitive instrument or agreement to conclusively evidence such officer's approval and the approval of this Board of Directors.

(c) That the Authorized Officers be, and each of them hereby is, authorized on behalf of the Company to negotiate, execute and enter into, on behalf of the Company, any amendments to the New Bank Agreements (including renewals or extensions of said New Bank Agreements in accordance with their terms, or re-establishment of such arrangements, upon substantially the same basic or more favorable terms of such New Bank Arrangements), and to execute and deliver any such amendments thereto.

(d) That the Authorized Officers be, and each of them hereby is, authorized by and on behalf of the Company, (i) to request extensions or other amendments to the Existing Credit Facilities or issuances of letters of credit in support of the Bonds (or other tax-exempt bonds issued on behalf of the Company) and other advances under the New Bank Agreements, (ii) to delegate to any other officers or employees of the Company, either acting individually or jointly, authority to request extensions or other amendments to the Existing Credit Facilities or issuances of letters of credit in support of such Bonds under the New Bank Agreements, and (iii) to execute and deliver any other agreements and documents and to take any and all other action as contemplated by the New

Bank Agreements or as such Authorized Officer may deem necessary or desirable in connection with requesting extensions or other amendments to the Existing Credit Facilities or the making of advances (including issuances of letters of credit in support of the Bonds of each series) on account of the Company pursuant to the New Bank Agreements.

(e) That the Authorized Officers be, and each of them hereby is, authorized and directed to cause the preparation of, to approve, or consent to, and execute and deliver the necessary documents, instruments or certificates necessary to enter into the New Bank Agreements.

(f) That the proper officers of the Company be, and each of them hereby is, authorized in the name and on behalf of the Company and under its corporate seal or otherwise, to take or cause to be taken all such further actions and to execute and deliver or cause to be executed and delivered all such further documents, agreements and certificates (including without limitation, instruments authorizing or consenting to any amendment, modification or waiver to any of the agreements referred to in these resolutions, and any disclosure documents relating to the delivery of any New Bank Agreements) as such persons may deem necessary, advisable or appropriate in connection with the transactions contemplated thereby and hereby, and to incur all such fees and expenses as shall be necessary, advisable or appropriate in their judgment in order to carry into effect the purpose and intent of any and all of the foregoing resolutions.

(g) That any and all actions heretofore taken by the Authorized Officers within the terms of the foregoing resolutions, including any actions taken in connection with existing or new applications to the Public Service Commission of the Commonwealth of Kentucky, the Virginia State Corporation Commission, and the Tennessee Regulatory Authority or any other federal, state, or local commission, court, agency or body having jurisdiction as required to obtain any approvals, consents, orders or rulings as such officers or counsel for the Company deemed to be necessary or desirable in connection with the transactions contemplated hereby, be and the same are hereby in all respects approved, ratified and confirmed.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

ACTION OF THE BOARD OF DIRECTORS OF KENTUCKY UTILITIES COMPANY TAKEN BY WRITTEN CONSENT IN LIEU OF A SPECIAL MEETING

AUGUST 22, 2014

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consent to the actions contemplated thereby:

DECLARATION OF COMMON STOCK DIVIDEND

RESOLVED, that a dividend on the Common Stock of this Company is hereby declared for the quarter ending September 30, 2014, for payment to LG&E and KU Energy LLC on September 29, 2014, from funds legally available for payment of dividends, in an amount equal to $26,000,000 and the effect of such dividend shall be measured as of June 30, 2014.

FURTHER RESOLVED, that the Treasurer of the Company be and is hereby authorized to pay this dividend by check or otherwise and to take all necessary steps therefore.

This unanimous written consent of Directors may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

ACTION OF THE BOARD OF DIRECTORS
OF
KENTUCKY UTILITIES COMPANY
TAKEN BY WRITTEN CONSENT
IN LIEU OF A SPECIAL MEETING

November 3, 2014

Pursuant to the provisions of Section 271B.8-210 of the Kentucky Business Corporation Act, and Section 13.1-685 of the Virginia Stock Corporation Act, the Board of Directors of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"), hereby adopts the following resolutions by unanimous written consent in lieu of a special meeting and consents to the actions contemplated thereby:

APPROVAL OF 2015 BUSINESS PLAN

WHEREAS, the Board believes it desirable and in the best interests of the Company to adopt the 2015 Business Plan for Kentucky Utilities Company and its subsidiaries dated as of October 31, 2014 (the "Business Plan"), as provided to the Board and attached hereto as Exhibit A.

NOW, THEREFORE, BE IT RESOLVED, that the Company hereby adopts and approves the Business Plan; and

FURTHER RESOLVED, that the appropriate officers of the Company are hereby authorized and directed to take or cause to be taken all such further actions as in their judgment shall be necessary or advisable in order to carry out fully the intent and purposes of the foregoing resolution.

This unanimous written consent may be executed in two or more counterparts, all of which taken together shall be deemed one and the same instrument.

WITNESS the signatures of the undersigned, who are all of the directors of Kentucky Utilities Company as of the date first written above.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 174

Responding Witness: Paula H. Pottinger, Ph.D.

Q-174. Regarding the direct testimony of Blake, Health Care Costs:

a. Please identify any and all measures the Company has undertaken within the past three years, including the test year, to minimize its employee benefit health care costs.

b. State the annualized cost savings associated with each measure, and show how the Company estimated such amount.

c. Has the Company increased the co-payment provisions borne by employees? If not, why not?

d. Describe any and all incentives the Company has built into its employee health care benefit package to encourage cost economies.

A-174. a. See response to Question No. 96.

b. See response to Question No. 97.

c. See response to Question No. 98.

d. See response to Question No. 99.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 175

Responding Witness: Russel A. Hudson

Q-175. Please provide the first year non-fuel operations and maintenance expenses for Cane Run Unit 7.

A-175. Total first year (May 2015 through April 2016) non- fuel operations and maintenance expenses to operate Cane Run Unit 7 is $17,238,119. Based on the joint ownership agreement, 78% of the total cost or $13,445,733 is allocated to KU.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 176

Responding Witness: Russel A. Hudson

Q-176. Please provide the test year non-fuel operations and maintenance expenses for the existing Cane Run Units 4, 5 and 6.

A-176. The forecasted test year includes $1,447,591 related to continuing environmental costs, security and site maintenance related to the Cane Run units 4, 5 and 6. None of these costs are allocated to KU.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 177

Responding Witness: Russel A. Hudson

Q-177. Please provide the gross plant in service and depreciation reserves by month for the test period for the Cane Run Units 4, 5 and 6.

A-177. KU does not own or operate Cane Run units 4, 5, and 6. It is assumed that this question was based on the same information requested in the LG&E proceeding. For this information related to these units, please refer to LG&E AG 1-178 in Case No. 2014-00372.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 178

Responding Witness: Christopher M. Garrett

Q-178. Regarding the direct testimony of Blake and Conroy, Schedule B, in the same format and detail (i.e, monthly) as shown on Tab FCPIS B, please provide a schedules showing the actual "Electric Utility Activity'' for calendar years 2009-2014. Please update this response during the course of the proceeding as data becomes available.

A-178. See attached. The information is not readily available for years 2009-2013; therefore, the Company is providing its annual plant reports in response to this request.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 179

Responding Witness: Daniel K. Arbough

Q-179. Please provide copies of all presentations made to rating agencies and/or investment firms by PPL, and/or Kentucky Utilities between January 1, 2013 and the present.

A-179. The Company objected to this request on January 19, 2015 because it seeks the production of documents that are irrelevant to the issues in this case and relate to non-utility or non-jurisdictional utility activities. These activities are not relevant to the analysis of the test period in this case. Without waiver of this objection, see attached. The rating agencies presentations are confidential and proprietary, and are being provided under seal pursuant to a petition for confidential treatment.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 183

Responding Witness: Daniel K. Arbough

Q-183. Please provide the breakdown in the expected return on pension plan assets for Kentucky Utilities. Specifically, please provide the expected return on different assets classes (bonds, US stocks, international stocks, etc) used in determining the expected return on plan assets. Please provide all associated source documents and work papers.

A-183. LG&E and KU Energy's ("LKE") pension assets are invested in a master pension trust sponsored by PPL Services Corporation, which holds and invests the assets of all of PPL Corporation's domestic pension plans. The investment management strategy of the master trust is built around a framework of management based on the objectives of Growth, Immunization and Liquidity. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities and derivative positions that will typically have long durations and is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

LKE and PPL generally sets the expected long-term rate of return (EROA) assumption for their domestic pension plans in consultation with their independent actuary using a building blocks approach that first looks at the potential for return based on the characteristics of the investments. The building blocks approach looks at three categories of investments: (1) equities and investments that have equity like risks and returns (including high-yield and emerging markets debt, hedge funds, private equity, real estate and commodities), (2) corporate fixed income and (3) Treasury securities and cash. Each of the above categories is evaluated for potential return based on expectations of inflation, risk-free rates of return, term premiums, credit spreads, and equity risk premiums. The initial return for each major category is then weighted by LKE's target asset allocation percentage for each major category, resulting in a weighted-average return for the total portfolio, which in this case is 6.04% for 2015. Additional considerations that could impact all of the major asset categories, including the overall portfolio effect and additional returns expected from active

EXPECTED RETURN ON ASSETS FOR 2015

	Equity / Alternatives	FI - Corporate	FI - Treasury	Notes
Inflation	2.25%	2.25%	2.25%	Expected 10-year inflation. Reviewed Bloomberg historical averages and 3-year forecasts.
Real Risk Free Return	-1.50%	-1.50%	-1.50%	1-yr T-Note/Treasury less current inflation y-o-y
Term Premium	1.95%	1.95%	2.15%	10 yr Treasury less 1 Year Treasury. Did not reflect different tenor for fixed income portfolio in this line, as it's captured through the portfolio effect.
Credit Spread	N/A	1.00%	N/A	Approximately 10-year A-rated spread. Difference for duration and credit quality captured in Portfolio Effect.
Equity Risk Premium	6.00%	N/A	N/A	
Total	8.70%	3.70%	2.90%	
Asset Allocation	50%	30%	20%	
Gross Result	4.35%	1.11%	0.58%	
Total		6.04%		
Portfolio Effect		0.50%		
Active Management		0.30%		
Non-Investment Expense		-0.25%		
Expected Return from Swaps Portfolio		0.30%		
Net Result		6.89%		
Anticipated EROA Assumption		**7.00%**		

Attachment to Response to KU AG-1 Question No. 183
Page 1 of 1
Arbough

portfolio management offset by non-investment expenses, are then factored in to arrive at the final EROA assumption, which is 7.00% for 2015.

In the building blocks approach, the return was estimated at 8.70% for equities and investments that have equity like risks and returns, 3.70% for corporate fixed income and 2.90% for Treasury securities and cash. See attachment for associated work paper.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 184

Responding Witness: Daniel K. Arbough

Q-184. Please provide the Company's authorized and earned return on common equity for Kentucky Utilities over the past five years. Please provide copies of all associated work papers and source documents. Please provide copies of the source documents, work papers, and data in electronic (Microsoft Excel) formats, with all data and formulas intact.

A-184. See attached for supporting documents. The calculation of the earned return is being provided in Excel format.

January 27, 2014

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 185

Responding Witness: Valerie L. Scott

Q-185. Please provide copies of the financial statements (balance sheet, income statement, statement of cash flows, and the notes to the financial statements) for PPL and Kentucky Utilities for the past two years. Please provide copies of the financial statements in electronic (Microsoft Excel) formats, with all data and formulas intact.

A-185. See Filing Requirement 807 KAR 5:001 Section 16(7)(p) for the integrated 2012 and 2013 Forms 10-K. These documents contain both PPL Corporation's and Kentucky Utilities Company's notes to the financial statements beginning on page 266 of the 2012 Form 10-K and page 171 of the 2013 Form 10-K. The 2013 Form 10-K contains both PPL Corporation's (beginning on page 134) and KU's (beginning on page 166) financial statements for the past two years. The Companies do not maintain these statements in Excel.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 186

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-186. Please provide a copy of the Avera/McKenzie testimony in Microsoft Word.

A-186. The Commission's electronic filing procedures do not permit the electronic filing of Word documents. Therefore, the requested testimony is being provided in Microsoft Word to the AG under separate cover.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 187

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-187. Please provide copies of all source documents, articles, cited documents listed in footnotes, regulatory decisions, work papers, and other sources used in the development and preparation of the Avera/McKenzie testimony.

A-187. Copies of the workpapers supporting the testimony of Dr. Avera and Mr. McKenzie are attached. Please note that regulatory and court orders and opinions are publicly available and can be obtained from the respective agencies based on the citations provided.

Attachment in Separate File

The attachment is being provided in a separate file.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 188

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-188. Please provide Microsoft Excel copies of all source documents, work papers, and data used to develop the tables and figures in the Avera/McKenzie testimony. For the Microsoft Excel copies of the data, please keep all formulas intact.

A-188. See the response to PSC 2-35.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 189

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-189. Please reference the Avera/McKenzie testimony, pages 8-9, and please provide a breakdown by assets, revenues, and net income for the subsidiaries of PPL Corporation for year-end 2013 and 2014.

A-189. Dr. Avera and Mr. McKenzie did not perform the requested analysis in the course of preparing their testimony; nor was it necessary to support their conclusions in this case. To the extent that such information is publicly available, it can be obtained from financial records filed with the Securities and Exchange Commission, which can be accessed at:

http://www.sec.gov/edgar/searchedgar/companysearch.html.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 190

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-190. Please reference the Avera/McKenzie testimony, pages 17-23, please provide copies of all empirical studies performed that compare the business, financial, and investment risk of the jurisdictional electric utility operations of Kentucky Electric to:

a. PPL Corporation; and

b. the proxy group companies.

A-190.

a. The Avera/McKenzie testimony at pages 17-23 discusses the development of the comparable-risk proxy group that served as the basis for applying quantitative models to estimate the cost of equity. As discussed there, this evaluation focused on published risk indicators that provide an objective assessment of investors' risk perceptions. Dr. Avera and Mr. McKenzie did not conduct any independent empirical studies to compare the risks of KU with PPL Corporation; nor was such an analysis necessary or relevant to their analyses and conclusions in this case.

b. The Avera/McKenzie testimony at pages 17-23 discusses the development of the comparable-risk proxy group that served as the basis for applying quantitative models to estimate the cost of equity, including a review and comparison of four key risk indicators that provide an objective assessment of investors' risk perceptions for KU and the proxy group companies. Dr. Avera and Mr. McKenzie did not conduct any independent empirical studies to compare the risks of KU with the proxy group companies; nor was such an analysis necessary or relevant to their analyses and conclusions in this case.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 191

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-191. Please reference the Avera/McKenzie testimony, page 18, please:

a. indicate the universe of companies with electric and gas operations as indicated by Value Line Investment Survey;
b. the companies eliminated from the group from each of the four screens; and

c. the reasons each of the companies were eliminated.

A-191.

a. See the tab labelled "Utility Proxy Group" in the Excel file provided in response to Question No. 188.

b. See the response to subpart (a).

c. See the response to subpart (a).

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 192

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-192. Please reference the Avera/McKenzie testimony, pages 57-58, please:

a. list the screens applied to the Value Line database in establishing the Non-Utility Proxy Group;

b. indicate the justification for each of the screens applied to the companies in the Value Line Investment Survey in establishing the Non-Utility Proxy Group;

c. the companies eliminated from the group from each of the five screens; and (4) the reasons that each of the companies were eliminated.

A-192.

a. Please refer to the Avera/McKenzie testimony at page 57, lines 20-24.

b. As indicated in the Avera/McKenzie testimony, consistent with the principles underlying the Hope and Bluefield standards, the purpose of the Non-Utility Group was to apply the opportunity cost standard by developing estimates of investors' required return for a low-risk group of firms in the competitive sector of the economy. Accordingly, the screening criteria identified in the Avera/McKenzie testimony at page 57, lines 20-24 were applied in order to restrict the Non-Utility Group to firms with exceedingly conservative risk profiles. As noted on page 58 of the Avera/McKenzie testimony, a review of objective risk indicators suggests that this select group of non-regulated firms have less risk than LG&E, KU, or the proxy group of electric utilities.

c. Because the screening criteria were applied interactively using Value Line's proprietary software, Dr. Avera and Mr. McKenzie do not have a list of each of the approximately 1,700 firms covered by Value Line and the basis upon which each firm did not meet the required criteria specified in their testimony at page 57, lines 20-24.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 193

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-193. Please reference the Avera/McKenzie testimony, pages 48-53:

a. please detail all equity flotation costs incurred by KU in the past three years;

b. for each of the flotation cost estimates, please provide the breakdown of the flotation costs into underwriting spread, company issuance costs, market pressure, and other expenses. Please show all calculations, and provide the associate source documents and work papers.

A-193.

a. Because KU does not have publicly traded common stock, it does not incur flotation costs directly.

b. As discussed in the Avera/McKenzie testimony, the flotation cost percentages cited at page 52 were based on the results of independent studies. To the extent the requested information is available, it can be obtained from the source documents, copies of which are attached. As reflected in these documents, the 3.6% flotation cost percentage based on a study of data from Morgan Stanley includes only underwriting spread.

REGULATORY FINANCE:

UTILITIES' COST OF CAPITAL

Roger A. Morin, PhD

Lisa Todd Hillman

1994
PUBLIC UTILITIES REPORTS, INC.
Arlington, Virginia

common equity to obtain the final cost of equity financing.[1] This incremental return is referred to as the "flotation cost allowance," and is the sum total of direct flotation expenses, market pressure, and market break.

To demonstrate the need for adjusting the market-determined return on equity for flotation costs, consider the following simple example. Shareholders invest $100 of capital on which they expect to earn a return of 10%, or $10, but the company nets $95 because of issuance costs. It is obvious that the company will have to earn more than 10% on its net book investment (rate base) of $95 to provide investors with a $10 return on the money actually invested. To provide the same earnings of $10 on a reduced capital base of $95 clearly requires a return higher than the shareholder expected return of 10%, namely $10/$95 = 10.53%. This is because only the net proceeds from an equity issue are used to add to the rate base on which the investor earns.

6.2 Magnitude of Flotation Costs

The flotation cost allowance requires an estimated adjustment to the return on equity of approximately 5% to 10%, depending on the size and risk of the issue. A more precise figure can be obtained by surveying empirical studies on utility security offerings.

According to empirical studies by Borum and Malley (1986) and Logue and Jarrow (1978), underwriting costs and expenses average 4% - 5.5% of gross proceeds for utility stock offerings in the U.S. Eckbo and Masulis (1987) found an average flotation cost of 4.175% for utility common stock offerings, and found that flotation costs increased progressively for smaller size issues.

As far as the market pressure effect is concerned, empirical studies clearly show that the market pressure effect is real, tangible, and measurable. Appendix 6-A describes one method of measuring the market pressure effect. Logue and Jarrow (1978) found that the absolute magnitude of the relative price decline due to market pressure was less than 1.5%. Bowyer and Yawitz (1980) examined 278 public utility stock issues and found an average market pressure of 0.72%. In a classic and monumental study published in the *Journal of Financial Economics,* which reviewed the aggregate empirical evidence on market pressure from several studies, Smith (1986) found a market pressure effect of 3.14% for industrial stock

[1] An alternate way of stating this requirement is that the utility's stock must be maintained at some minimum market-to-book ratio in such a way that the proceeds from new stock issues will not decline below book value per share.

issues and 0.75% for utility common stock issues. Other studies of market pressure are reported in Logue (1973), Pettway (1984), and Reilly and Hatfield (1969). In Pettway's study, the market pressure effect for a sample of 368 public utility equity sales was in the range of 2% to 3%. Eckbo and Masulis (1987) found that the relative price decline due to market pressure in the days surrounding the announcement amounted to slightly more than 1.5%.

The Eckbo and Masulis study also confirmed that the percentage flotation cost allowance is higher for small issues than for large issues in view of the high fixed cost component of total costs involved in the process of security underwriting. Although total costs of issuing securities vary according to size of the issue and the degree of risk, there are certain expenses that are fixed, regardless of issue size. These include legal fees and prospectus preparation. With respect to the balance, or underwriting costs, there is greater risk assumed with smaller issues.

In summary, based on empirical studies of U.S. utility security offerings, total flotation costs including market pressure conservatively amount to 5% of gross proceeds for U.S. security offerings. This is consistent with the fact that several utilities raise a substantial portion of their external equity every year through an automatic dividend reinvestment plan and offer a 5% discount, suggesting that the savings from abstaining from a public issue of common stock are at least 5%. The flotation cost allowance of 5% is likely to be conservative, since no explicit allowance for market break is incorporated. If negative events should occur during the time period from announcement of a public issue to actual pricing, the price could fall below book value unless a sufficient margin is maintained. Moreover, the 1% allowance for market pressure is probably conservative for large stock issues.

6.3 Application of the Flotation Cost Adjustment

This section formally demonstrates: (1) how and why it is necessary to apply a flotation cost allowance to the dividend yield component of the DCF model in order to obtain the fair return on equity capital; (2) why the flotation adjustment is permanently required to avoid confiscation even if no further stock issues are contemplated; and (3) why flotation costs are only recovered if the rate of return is applied to total equity, including retained earnings, in all future years.

An analogy with bond issues, as discussed in Brigham, Aberwald, and Gapenski (1985), is useful here in order to understand the treatment of issue costs in the case of common stock issues. In the case of bonds,

The latter expression is identical to that obtained from the standard DCF model adjusted for underpricing in Equation 6-4.

The more practical version of the extended DCF model cast in terms of G, the growth rate in total book equity, also collapses to an identical expression:

$$r = G + (M/B)\,(K-G) \qquad (6\text{-}8)$$

To avoid dilution, $v = 0$, which in turn implies $G = g = br$. Equation 6-8 reduces to Equation 6-7 under the condition that $M/B = 1/(1-f)$:

$$r = g + (1/(1-f))\,(K-g)$$

$$= g + (1/(1-f))\,D_1/P$$

$$= D_1/P\,(1-f) + g$$

6.4 Flotation Cost Controversies

Several important controversies have surfaced regarding the underpricing allowance. The first is the contention that an underpricing allowance is inappropriate if the utility is a subsidiary whose equity capital is obtained from its parent. This objection is unfounded since the parent-subsidiary relationship does not eliminate the costs of a new issue, but merely transfers them to the parent. It would be unfair and discriminatory to subject parent shareholders to dilution while individual shareholders are absolved from such dilution. Fair treatment must consider that if the utility subsidiary had gone to the capital marketplace directly, flotation costs would have been incurred.

A second controversy is whether a flotation cost allowance should be allowed because a company can always obtain equity from sources other than a public issue of common stock, such as a rights issue for example. There are several sources of equity capital available to a firm, including: public common stock issues, conversions of convertible preferred stock, dividend reinvestment plans, employees' savings plans, warrants, and stock dividend programs. Each carries its own set of administrative costs and flotation cost components, including discounts, commissions, corporate expenses, offering spread, and market pressure.

Equity capital raised through a public issue is typically more expensive than alternate sources of equity. Rights issues, when available, are less expensive, but direct costs would still be incurred. Of course, a rights issue assumes that a willing underwriter and a willing market could be found

for such offerings in the first place, an unlikely event in public capital markets for small unproven companies. Internal sources of equity, including dividend reinvestment and/or employee stock option plans, are also typically less expensive, unless a discount on the purchase price is inherent in the plan, in which case they are often equivalent to a public issue. Direct costs are also incurred in an employee stock savings plan and/or a shareholder dividend reinvestment plan.

The flotation cost allowance is still warranted, however, because it is a composite factor that reflects the historical mix of all these sources of equity. The flotation cost allowance factor is a build-up of historical flotation cost adjustments associated and traceable to each component of equity source, and more specifically, is a weighted average cost factor designed to capture the average cost of various equity vintages and types of equity capital raised by the company. It is impractical and prohibitive to start from the inception of a company and source all present equity. A practical solution is to rely on the results of the empirical studies discussed earlier that quantify the average flotation cost factor of a large sample of utility stock offerings.

Richter (1982) demonstrated that the flotation cost allowance applicable to all the company's book equity is a weighted average of the current allowances required for each past financing, and suggested some practical means of circumventing the problem of vintaging each equity source. Richter essentially suggested sourcing book equity by broad categories of equity, such as dividend reinvestment plan equity, stock option equity, and public issue equity, and calculating a weighted average underpricing factor.

A third controversy centers around the argument that the omission of flotation cost is justified on the grounds that, in an efficient market, the stock price already reflects any accretion or dilution resulting from new issuances of securities and that a flotation cost adjustment results in a double counting effect. The simple fact of the matter is that whatever stock price is set by the market, the company issuing stock will always net an amount less than the stock price due to the presence of intermediation and flotation costs. As a result, the company must earn slightly more on its reduced rate base in order to produce a return equal to that required by shareholders.

It has also been argued that a flotation cost allowance is inequitable since it results in a windfall gain to shareholders. This argument is erroneous. As stated previously, the company's common equity account is credited by an amount less than the market value of the issue, so that the company must earn slightly more on its reduced rate base in order to produce a return equal to that required by shareholders.

The suggestion that the flotation cost allowance is unwarranted because investors factor this shortcoming in the stock price implies that it is appropriate to use a deficient model because such a deficiency is reflected in stock prices. In other words, it is appropriate to use a deficient model because investors are aware of this. Such circular reasoning could be used to justify any regulatory policy. For example, under this reasoning, it would be appropriate to authorize a return on equity of 1% because investors reflect this fact in the stock price. This is clearly illogical and erroneous. Any regulatory policy, as irrational as it may be, can be justified using this argument.

Another controversy is whether the underpricing allowance should still be applied when the utility is not contemplating an imminent common stock issue. Some argue that flotation costs are real and should be recognized in calculating the fair return on equity, but only at the time when the expenses are incurred. In other words, the flotation cost allowance should not continue indefinitely, but should be made in the year in which the sale of securities occurs, with no need for continuing compensation in future years. This argument implies that the company has already been compensated for these costs and/or the initial contributed capital was obtained freely, devoid of any flotation costs, which is an unlikely assumption, and certainly not applicable to most utilities. If the flotation costs of past stock issues have been fully recovered, the argument has merit. If that assumption is not met, the argument is without merit. The flotation cost adjustment cannot be strictly forward-looking unless all past flotation costs associated with past issues have been recovered.

A related controversy is whether or not the retained earnings component of equity requires a flotation cost adjustment. There is no flotation cost allowance made to retained earnings because it is implicitly embedded and recognized in the flotation cost adjustment formula. The conventional flotation cost adjustment formula deals with the fact that flotation costs are incurred only when new stock is sold, and not when earnings are retained. This is done by applying the flotation adjustment only to the dividend yield of the DCF formula and not to the growth component. The larger the fraction of earnings retained, the higher the growth rate, the lower the dividend yield component, and the smaller the flotation cost adjustment. In other words, larger retained earnings result in lower flotation costs adjustments as the costs are postponed into the future.

Some have argued that underwriters' discounts are not out-of-pocket expenses and thus should not be included in rates. On the basis of this argument, one might be foolish enough to believe that depreciation of utility plant should not be included in rates on the same grounds that depreciation is not an out-of-pocket expense. Obviously, the argument is without merit.

Lastly, some suggest that the flotation cost allowance should be based on a company's own actual flotation cost experience rather than on empirical studies that pertain to a large sample of stock offerings. To base a flotation cost allowance on a one-company sample, although company specific, would not provide a sufficiently reliable statistical and economic basis to infer a utility's appropriate flotation cost allowance. While it is conceptually correct to rely on the particular company circumstances in quantifying the flotation cost allowance, it is not a practical alternative. As discussed earlier, the flotation cost allowance is a weighted average cost factor designed to capture the average cost of various equity vintages and types of equity capital raised by the company.

As an additional practical matter, the market pressure effect is difficult to measure accurately for a specific issue. This is because one must disentangle the downward effect on stock price resulting from the increased supply of stock from the effect of general movement in the stock market. One must also measure the actual stock price following a common stock issue in relation to a hypothetical benchmark price without the issue over some arbitrary time period. This can be performed more reliably and more rigorously using a sample of utility stock offerings.

Alternative Flotation Cost Adjustment Formulas

Arzac and Marcus (1981) developed an alternative approach to accounting for flotation costs in regulatory hearings. To avoid dilution of the initial shareholders' equity, the allowed rate of return should equal:

$$R = \frac{K}{1 - \frac{fh}{1-f}} \qquad (6\text{-}9)$$

where h = *external equity financing rate*, as a percentage of earnings, and the other symbols are as before.

Patterson (1983A and 1983B) formally compared the properties of the Arzac and Marcus adjustment with those of the conventional adjustment, and showed that the former is equivalent to expensing issue costs in each period when a stock issue occurs. In other words, if Equation 6-9 is consistently applied, the utility is reimbursed for its flotation costs in each year as they are incurred. Patterson also showed that the present value of flotation cost adjustments received by the utility is the same for both the

Notes
1. Source: Exhibit GJE-11.1, Equidesk
2. Excludes Block Trades
3. Includes all utility marketed offerings between $100MM - $500MM. Offering amount includes proceeds raised through exercise of greenshoe (where applicable)
4. U.S. offerings only

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 194

Responding Witness: Dr. William E. Avera / Adrien M. McKenzie

Q-194. Please provide copies of the source documents, work papers, and underlying data used in the development of Exhibits No. 2 through 11. Please provide the data and work papers in electronic formats (Microsoft Excel), with all data and formulas intact. Please also include electronic copies (Microsoft Excel) of the Exhibit, leaving all data and formulas intact.

A-194. See the responses to Question No. 187 and Question No. 188.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 195

Responding Witness: Kent W. Blake

Q-195. Please provide a copy of Mr. Blake's testimony in Microsoft Word.

A-195. The Commission's electronic filing procedures do not permit the electronic filing of Word documents. Therefore, the requested testimony is being provided in Microsoft Word to the AG under separate cover.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 196

Responding Witness: Kent W. Blake

Q-196. Please provide an electronic copy of all sections and pages of Schedule J in Microsoft Excel, with all data and formulas intact.

A-196. See the response to PSC 1-59 Attachment_to_KU_PSC_1-59-KU_Schedule_J spreadsheet.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 197

Responding Witness: Daniel K. Arbough

Q-197. With reference to Schedules J-1.1 and J-1.2, please provide:

a. copies of all data, source documents, work papers, and other sources used in the development of the Company's proposed capital structure; copies of all data, source documents, work papers, and other sources used in the adjustments made to the balance sheet amounts of debt and equity in the development of the Company's proposed capital structure; and

b. the data and work papers in (J-1.1) and (J-1.2), in electronic (Microsoft Excel) formats, with all data and formulas intact.

A-197.

a. Please see Section 10 of the Attachment to Filing Requirement 807 KAR 5:001 Section 16(7)(c) –Item A for description of the development of the capital structure.

Also please see pgs. 17-20 of the Testimony of Kent W. Blake (Chief Financial Officer Kentucky Utilities Company) filed on November 26, 2014 for additional details surrounding the determination of the target capital structure of the Company.

b. Please see the Attachment 7 to response to PSC 1-59 provide in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 198

Responding Witness: Daniel K. Arbough

Q-198. With reference to Schedules J-1.1, J-1.2, and J-2, please:

a. provide copies all data, work a papers and calculations used in the development of the cost and amounts of short-term debt; and

b. detail all assumptions and show calculations for projected amounts and costs of short-term debt; and

c. provide the data and work papers in (a) and (b) in electronic (Microsoft Excel) formats, with all data and formulas intact.

A-198.

a. Please see Section 10 of the Attachment to Filing Requirement 807 KAR 5:001 Section 16(7)(c) –Item A for description of the development of the amounts of short-term debt. For details surrounding cost of short-term debt, please refer to the response to part b.

b. See attachment being provided in Excel format.

c. Please see Attachment 7 to the response to PSC 1-59 provided in Excel format.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 199

Responding Witness: Daniel K. Arbough

Q-199. With reference to Schedules J-1.1, J-1.2, and J-3, please:

a. provide copies all data, work a papers and calculations used in the development of the cost and amounts of long-term debt; and

b. detail all assumptions and show calculations for projected amounts and costs of long-term debt; and

c. provide the data and work papers in (a) and (b) in electronic (Microsoft Excel) formats, with all data and formulas intact.

A-199.

a. Please see Section 10 of the Attachment to Filing Requirement 807 KAR 5:001 Section 16(7)(c) –Item A for description of the development of the amounts of long-term debt. For details surrounding cost of long-term debt, please refer to the response to part b.

b. Please see attachment to response to Question No. 198.b provided in excel format.

c. Please see Attachment 7 to the response to PSC 1-59 provided in excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 200

Responding Witness: Dr. Martin J. Blake

Q-200. Please provide a fully executable computerized copy of the KU class cost of service study in Microsoft Excel format. In this response provide all linked files.

A-200. See "Att-PSC2-60-File02" under Description of Document in the files uploaded in response to PSC 2-60. This file includes the cost of service exhibits MJB-3, MJB-8, and MJB-9, Kentucky Jurisdictional Separation Study, Electric Cost of Service Study – Functional Assignment, Classification and Time Differentiation, and Electric Cost of Service Study – Allocation to Customer Classes, respectively.

Additionally, the following uploaded files contain supporting workpapers for the above mentioned exhibits:

Att-PSC2-60-File11 – KU Loss Study
Att-PSC2-60-File12 – Meter cost allocation
Att-PSC2-60-File13 – Services cost allocation
Att-PSC2-60-File14 – Late payment revenue
Att-PSC2-60-File15 – OSS energy revenue reallocation
Att-PSC2-60-File16 – Energy and demand allocation inputs
Att-PSC2-60-File17 – OSS supporting data

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 201

Responding Witness: Dr. Martin J. Blake

Q-201. Please explain and provide all workpapers and spreadsheets showing the determination of the separation of Production and Transmission costs among Intermediate, and Peak implicit in the determination in KU Dr. Martin Blake, Direct Testimony, Page 8 and Exhibit MJB-4. In this response, explain the relevance or relationship of the Non-Time-Differentiated Cost (34.99%), Summer Peak Period Cost (30.91%) and Winter Peak Period Costs (34.10%). Please provide this response in Microsoft readable electronic format (preferably Microsoft Excel), including all workpapers, source documents, calculations etc. that support the amounts, assumptions, and calculations presented therein.

A-201. The modified BIP methodology takes into account the cost differences inherent in providing electric service to customers at different times during the calendar year due to changes in demand for electricity. The BIP separation is used to allocate the costs associated with production and transmission facilities in place to serve customers during the base, intermediate and peak periods. The base period reflects the level of load that occurs all hours of the year and thus includes the portion of the costs that do no vary with time (occurs 8,760 hours during the year). The peak period is based on the summer peak and includes the portion of those costs that are associated with serving the peak load during the summer peak. The intermediate period is based on the winter peak and includes the portion of those costs associated with serving the peak load during the winter peak. This methodology has been accepted by the Commission for allocating the costs associated with production and transmission facilities in prior LG&E and KU rate cases, and LG&E and KU are not proposing to change the methodology for allocating these costs in this proceeding.

See "Att-PSC2-60-File03" under Description of Document in the files uploaded in response to PSC 2-60. This file is the Excel version of Exhibit MJB-4. Additional data used to develop this exhibit is found in "Att-PSC2-60-File10," which is forecast system peak data.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 202

Responding Witness: Dr. Martin J. Blake

Q-202. Please provide all workpapers, source documents, and electronic spreadsheets showing the development of each external allocator "functional vector" utilized in Dr. Blake's KU class cost of service study and referred to at Page 13 of his Direct Testimony. In this response, provide the source for all data and the bases for any weightings. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-202. See the response to Question No. 200.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 203

Responding Witness: Christopher M. Garrett

Q-203. For each KU and LG&E generating unit that was in service as of December 31, 2014 (or most recent period available), owned individually, jointly, or partially, please provide the following:

a. names of owners (and ownership percentages);

b. type and fuels;

c. total nameplate (rated) capacity (MW);

d. total and individual company gross investment (end of period);

e. total and individual company depreciation reserve (end of period);

f. total and individual company annual depreciation expense;

g. gross KWH produced during the last 12-month period; and,

h. net (less station use) KWH produced during the last 12-month period.

A-203. a-h. See attached.

(1) Gross, net generation, investment, & depreciation reserve reported for Dix Dam, and Ohio Falls represents total plant.
Generation is not reported on a per unit basis and fixed asset costs are not accumulated on a per unit basis.

(2) Investment, & depreciation reserve reported for Haefling represents total plant. Fixed asset costs are not accumulated on a per unit basis

(3) Investment and Depreciation Reserve is shown for active units only. This does not include structural components still in place, land, and ARO costs associated with retired units.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 204

Responding Witness: Russel A. Hudson

Q-204. For each KU and LG&E generating unit included in this rate application that was not actually in service as of December 31, 2014, i.e., included in CWIP, please provide the following:

a. names of owners (and ownership percentages);

b. type and fuels;

c. total nameplate (rated) capacity (MW);

d. total and individual company gross investment (end of period);

e. total expected gross investment when ultimately placed in service; and,

f. design or expected rate of each fuel type.

A-204.

Cane Run 7 Natural Gas Combined Cycle

a. Kentucky Utilities Company (78% ownership) and Louisville Gas and Electric Company (22% ownership).
b. Natural Gas fired combined cycle.
c. The nameplate ratings are Summer 89 degrees F/66% relative humidity: 680,967 kW gross; 662,667 kW net; and Winter 14 degrees F/65% relative humidity: 691,215 kW gross; 673,005 kW net.
d. The KU amount at December 31, 2014 is $ 401,735,800. The LG&E amount at December 31, 2014 is $112,601,573. The total amount is $514,337,373.
e. The total estimated gross investment when the unit is place in service is $562 million ($439 million KU and $123 million LG&E).
f. The summer net heat rate is 6,841 btu/kwh.

E.W. Brown Solar Facility

a. Kentucky Utilities Company (61% ownership) and Louisville Gas and Electric Company (39% ownership).
b. Solar.
c. The net rated capacity is 10 MW for the entire unit.
d. The KU amount at December 31, 2014 is $116,314. The LG&E amount at December 31, 2014 is $74,387. The total amount is $190,701.
e. The total estimated gross investment when the unit is place in service is $35 million ($21 million KU and $14 million LG&E).
f. There is no heat rate on a photovoltaic system.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 205

Responding Witness: David S. Sinclair

Q-205. Please provide the current combined KU and LG&E generating order of dispatch by unit and basis for this order of dispatch.

A-205. The dispatch order will vary depending on the price of natural gas and coal and other variables. The dispatch order based on coal and natural gas prices as of January 2015 is provided in the table below.

Dispatch Order (Lowest Cost to Highest Cost)	**Unit**
1	Hydro (Ohio Falls and Dix Dam)
2	Trimble County 2
3	Green River 4
4	Mill Creek 1
5	Mill Creek 2
6	Ghent 2
7	Trimble County 1
8	Mill Creek 3
9	Ghent 1
10	Mill Creek 4
11	Ghent 4
12	OVEC
13	Ghent 3
14	Green River 3
15	Cane Run 5

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 206

Responding Witness: David S. Sinclair

Q-206. Please provide the fully forecasted test year combined KU and LG&E generating order· of dispatch by unit and basis for this order of dispatch. Include within your response Cane Run 7.

A-206. The dispatch order in the forecast period will vary depending on the price of natural gas and coal and other variables. The average dispatch order for the test year based on forecasted coal and natural gas prices is provided in the table below.

Dispatch Order (Lowest Cost to Highest Cost)	**Unit**
1	Hydro (Ohio Falls and Dix Dam)
2	Trimble County 2
3	Ghent 3
4	Ghent 4
5	Mill Creek 3
6	Ghent 1
7	Mill Creek 2
8	Mill Creek 1
9	Green River 4
10	Ghent 2
11	Cane Run 7
12	Mill Creek 4
13	Trimble County 1
14	OVEC
15	Green River 3
16	Brown 2
17	Brown 3
18	Brown 1
19	Trimble County 5
20	Trimble County 6

Dispatch Order (Lowest Cost to Highest Cost)	**Unit**
21	Trimble County 7
22	Paddy's Run 13

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 207

Responding Witness: David S. Sinclair

Q-207. Please provide total native system, total KU, total LG&E, and KU class contributions to each monthly system (KU + LG&E) coincident peak demand during each of the last three years. Provide class contributions at generation voltage level. In this response please provide the date and hour of each provided observation.

A-207. See attached.

TC5	U1	12	5079	2/11/14 6:16	2/11/14 8:35	2.32	Other Gas Turbine Combustor Problems	Unit tripped due to flameout.
TC5	U1	16	5130	2/17/14 10:43	2/17/14 11:57	1.23	Gas Turbine - Starting System (including Motor)	Forced outage to change out resistivity probe on the cooling system for the LCI.
TC5	U1	43	5049	3/28/14 5:45	3/28/14 6:14	0.48	Other Gas Turbine Fuel System Problems	Forced outage due to over temperature of the fuel gas heater.
TC5	U1	49	5246	4/2/14 22:30	4/3/14 2:13	3.72	Gas Turbine Control System - Hardware Problems.	Lightning Strike.
TC5	U1	131	3649	8/30/14 18:20	8/30/14 18:35	0.25	Other Ac Instrument Power Problems	480 VAC breaker in PEECC #5 tripped killing power to LCI Compartment.
TC5	U1	136	5190	9/2/14 12:18	9/2/14 13:20	1.03	Other Gas Turbine Auxiliary System Problems	Unit cranked to partial speed and starting sequence stopped.
TC5	U1	172	5043	11/15/14 15:03	11/15/14 16:09	1.10	Gas Turbine - Fuel Filters	Relief valve on TC9/10 fuel gas heater lifted,
TC5	U1	176	5049	11/18/14 6:11	11/18/14 6:42	0.52	Other Gas Turbine Fuel System Problems	Lean blow out due to low ambient temperatures, moved NOx slider to 1.2
TC5	U1	191	5108	12/6/14 19:06	12/6/14 21:28	2.37	Gas Turbine - High Engine Exhaust Temperature	Exhaust thermocouple #1 failed high before reaching mode 6,
TC5	U2	52	5049	4/4/14 9:17	4/4/14 14:32	5.25	Other Gas Turbine Fuel System Problems	Replace Transmitter.
TC6	SF	13	5016	1/22/14 4:20	1/22/14 5:55	1.58	High Pressure Compressor - Bleed Valves	Startup failure due to frozen compressor bleed valve.

Unit Name	Event Type	Event No	Cause Code	Event Start	Event End	Evt. Hrs	Event Cause Code Description	Event Description
TC6	SF	14	5016	1/22/14 5:55	1/22/14 6:45	0.83	High Pressure Compressor - Bleed Valves	Startup failure due to frozen compressor bleed valve.
TC6	SF	17	5041	1/23/14 16:56	1/23/14 17:21	0.42	Gas Turbine - Fuel Piping And Valves	Startup failure due to issue with fuel gas valve.
TC6	SF	22	5041	1/24/14 10:30	1/24/14 11:08	0.63	Gas Turbine - Fuel Piping And Valves	Startup failure due to issue with fuel gas valve.
TC6	SF	46	5041	3/18/14 5:26	3/18/14 5:50	0.40	Gas Turbine - Fuel Piping And Valves	Startup failure due to gas valves not controlling properly.
TC6	SF	93	5041	5/26/14 15:02	5/26/14 18:18	3.27	Gas Turbine - Fuel Piping And Valves	Unit failed to start on a fuel gas start-up inhibit.
TC6	SF	98	5079	5/31/14 16:18	5/31/14 16:42	0.40	Other Gas Turbine Combustor Problems	Start up failure due to failure to ignite.
TC6	SF	100	5079	6/1/14 15:21	6/1/14 21:47	6.43	Other Gas Turbine Combustor Problems	Start up failure due to failure to ignite. Spark rod not operating properly.
TC6	SF	119	5130	7/10/14 11:13	7/10/14 11:14	0.02	Gas Turbine - (LCI start permissive issues)	Failure to reset LCI 5&6 did not give "ready to start" permissive.
TC6	SF	124	3872	7/21/14 11:38	7/21/14 11:51	0.22	Fuel Gas Compressor Valves	Machine unexplicably lost flame on start-up, more investigation needed
TC6	SF	136	5190	8/25/14 12:49	8/25/14 13:20	0.52	Other Gas Turbine Auxiliary System Problems	it was found that three fan motors rotated to the lag motor,
TC6	SF	147	5130	9/4/14 12:09	9/4/14 12:41	0.53	Gas Turbine - Starting System (including Motor)	This was a problem with the common LCI between TC5 and TC6.
TC6	SF	149	5130	9/5/14 8:10	9/5/14 8:40	0.50	Gas Turbine - Starting System (including Motor)	This is related to TC5 event #144, the LCI failed to start TC5 and TC6 cannot start
TC6	SF	152	5130	9/6/14 10:40	9/6/14 13:45	3.08	Gas Turbine - Starting System (including Motor)	Unit failed to start due to common LCI, this time a faulty relay was found and repla
TC6	SF	163	5130	10/2/14 15:41	10/2/14 19:40	3.98	Gas Turbine - Starting System (including Motor)	Initial indication was the static starter fault,
TC6	SF	169	3629	10/27/14 10:04	10/27/14 11:42	1.63	Other Switchyard or High Voltage System Problem	Testing on generator breaker caused protection relay lockouts on TC6's generator
TC6	U1	4	5079	1/6/14 2:17	1/6/14 3:50	1.55	Other Gas Turbine Combustor Problems	Unit tripped due to a lean blowout.
TC6	U1	6	5041	1/6/14 13:52	1/6/14 14:46	0.90	Gas Turbine - Fuel Piping And Valves	Unit tripped due to a fuel gas valve (worker valve) not controlling properly.
TC6	U1	8	5016	1/7/14 1:25	1/7/14 5:49	4.40	High Pressure Compressor - Bleed Valves	Forced outage due to compressor bleed valve frozen closed.
TC6	U1	10	5048	1/21/14 16:35	1/21/14 17:24	0.82	Gas Fuel System with controls and instruments	Forced outage due to combustion instrumentation issues.
TC6	U1	11	5048	1/21/14 17:32	1/21/14 20:01	2.48	Gas Fuel System with controls and instruments	Forced outage due to combustion instrumentation issues.
TC6	U1	12	5079	1/22/14 0:08	1/22/14 4:20	4.20	Other Gas Turbine Combustor Problems	Forced outage due to flameout.
TC6	U1	15	5079	1/23/14 11:39	1/23/14 12:04	0.42	Other Gas Turbine Combustor Problems	Forced outage due to combustion issue.
TC6	U1	18	5079	1/23/14 17:30	1/23/14 18:00	0.50	Other Gas Turbine Combustor Problems	Forced outage due to combustion issue.
TC6	U1	19	5079	1/23/14 18:18	1/23/14 18:49	0.52	Other Gas Turbine Combustor Problems	Forced outage due to combustion issue.
TC6	U1	20	5250	1/24/14 4:29	1/24/14 10:13	5.73	Other Controls And Instrument Problems	Forced outage due to erratic thermocouple signals from T Processor.
TC6	U1	25	5048	1/27/14 11:27	1/27/14 14:05	2.63	Gas Fuel System with controls and instruments	Unit tripped due to frozen sensing line to 96GN transmitter.
TC6	U1	33	5079	2/11/14 6:16	2/11/14 6:58	0.70	Other Gas Turbine Combustor Problems	Unit tripped due to flameout.
TC6	U1	34	5079	2/11/14 8:29	2/11/14 9:45	1.27	Other Gas Turbine Combustor Problems	Unit tripped due to flameout.
TC6	U1	53	5049	3/28/14 5:45	3/28/14 6:14	0.48	Other Gas Turbine Fuel System Problems	Forced outage due to over temperature of fuel gas heater.
TC6	U1	121	5130	7/11/14 15:23	7/11/14 15:37	0.23	Gas Turbine - (LCI start permissive issues)	TC5 started at 13:04 hours, the LCI was not reset.
TC6	U1	128	5246	7/24/14 9:00	7/24/14 10:08	1.13	Gas Turbine Control System - Hardware Problems.	The EX2000 was not communicating with the MK-IV, rebooting the 120 VAC pov
TC6	U1	142	3649	8/30/14 18:20	8/30/14 18:35	0.25	Other Ac Instrument Power Problems	480 VAC breaker in PEECC #5 tripped killing power to LCI Compartment. TC5 &
TC6	U1	144	5130	9/2/14 12:18	9/2/14 13:20	1.03	Gas Turbine - Starting System (including Motor)	TC6 is forced out because the common LCI with TC5 did not operate properly,
TC6	U1	159	4619	10/2/14 7:45	10/2/14 9:28	1.72	Other Hydrogen System Problems	This was called a forced outage because one of the hydrogen purity cells
TC6	U1	161	3972	10/2/14 14:11	10/2/14 14:48	0.62	Distributive Control System Hardware Problem	Main fuel gas shut-off valve failed to open after coming back from maintnenance
TC6	U1	179	5108	11/14/14 6:48	11/14/14 7:25	0.62	Gas Turbine - High Engine Exhaust Temperature	TC6 tripped on all exhaust thermocouples going high, root cause has not been foun
TC6	U1	181	5049	11/15/14 15:03	11/15/14 16:09	1.10	Other Gas Turbine Fuel System Problems	Relief valve on TC9/10 fuel gas heater lifted,
TC6	U2	57	3972	4/2/14 22:30	4/3/14 2:13	3.72	Distributive Control System Hardware Problem	Lightning strike, Control card issue.
TC6	U2	66	3872	4/17/14 0:05	4/17/14 2:15	2.17	Fuel Gas Compressor Valves	Servo valve issue.
TC7	SF	18	5041	3/2/14 21:40	3/2/14 21:51	0.18	Gas Turbine - Fuel Piping And Valves	Startup failure due to high hazardous gas alarm.
TC7	SF	129	4609	10/2/14 13:57	10/2/14 14:01	0.07	Other Exciter Problems	Communications fault on exciter controller caused failure to start.
TC7	U1	2	5048	1/3/14 5:14	1/3/14 6:52	1.63	Gas Fuel System with controls and instruments	Forced outage due to Hazardous Gas alarm.
TC7	U1	4	5041	1/5/14 14:07	1/5/14 15:36	1.48	Gas Turbine - Fuel Piping And Valves	Forced outage due to fuel gas valve (SRV).
TC7	U1	8	5160	2/5/14 16:03	2/5/14 16:08	0.08	Gas Turbine - Cooling And Seal Air System	Unit rolled back to FSNL due to issue with pressure switch on Exhaust Frame Blov
TC7	U1	9	5160	2/5/14 16:09	2/5/14 16:17	0.13	Gas Turbine - Cooling And Seal Air System	Unit rolled back to FSNL due to issue with pressure switch on Exhaust Frame Blov
TC7	U1	97	5130	8/2/14 3:33	8/2/14 3:50	0.28	Gas Turbine - Starting System (including Motor)	Static Start switch 89SS failed to engage.
TC7	U1	99	5130	8/2/14 5:02	8/2/14 8:41	3.65	Gas Turbine - Starting System (including Motor)	Initial signal was that the LCI was not working,
TC7	U1	101	5048	8/2/14 19:00	8/2/14 19:59	0.98	Gas Fuel System with controls and instruments	Two of the three P2 pressure transmitters were reading negative.
TC7	U1	122	5130	9/25/14 13:55	9/25/14 19:22	5.45	Gas Turbine - Starting System (including Motor)	Cam limit switch hold down bolts were loose, caused false indication on 89SS trav
TC7	U1	124	3661	9/25/14 19:53	9/25/14 21:21	1.47	4000-7000-volt Circuit Breakers	Lose wires found in the control circuits of the LCI 4KV breaker. Wires were tight
TC7	U1	127	3661	10/1/14 12:45	10/1/14 13:15	0.50	4000-7000-volt Circuit Breakers	Improper switching instructions lead to a black out of units 7 & 8
TC7	U1	132	4603	10/3/14 1:29	10/3/14 5:48	4.32	Solid State Exciter Element	Communication fault prevented EX2000 to start, faults cleared by reseting EX200(
TC7	U1	142	5048	10/27/14 13:08	10/27/14 13:25	0.28	Gas Fuel System with controls and instruments	The interstage pressure transmitters (P2) drifted beyond acceptable point in MKVI
TC7	U1	144	4619	10/29/14 12:51	10/29/14 22:11	9.33	Other Hydrogen System Problems	TC7 was running, hydrogen purity went low due to purge CO2 valve vibrating oper
TC7	U1	146	3669	11/12/14 13:09	11/12/14 14:10	1.02	Other 4000-7000-volt Problems	4KV lost power due to contact being "bumped" by personnel working on terminati
TC7	U1	148	4619	11/12/14 20:23	11/13/14 6:37	10.23	Other Hydrogen System Problems	The loss of power from event #146 caused the hydrogen panel to start a purge

Unit Name	Event Type	Event No	Cause Code	Event Start	Event End	Evt. Hrs	Event Cause Code Description	Event Description
TC7	U1	151	5049	11/15/14 15:03	11/15/14 16:09	1.10	Other Gas Turbine Fuel System Problems	Relief valve on TC9/10 fuel gas heater lifted,
TC7	U1	170	5130	12/11/14 17:55	12/11/14 19:07	1.20	Gas Turbine - Starting System (including Motor)	Static Start 89SS switch failed to engage on TC8. Adjustments made to limit switc
TC7	U2	33	5255	4/4/14 15:28	4/4/14 16:20	0.87	Gas Turbine - Computer	Replace control card.
TC7	U2	43	5285	4/28/14 19:26	4/29/14 3:25	7.98	Gas Turbine Vibration	Bently Nevada panel bad control card. Prevented "Ready to Start Mode".
TC7	U2	62	5299	6/10/14 18:20	6/10/14 21:23	3.05	Other Gas Turbine Problems	CT7 made unavailable due to unit hydrogen auto purge. Dump valve did not open
TC7	U2	64	5250	6/14/14 4:45	6/14/14 5:44	0.98	Other Controls And Instrument Problems	Hazgas detector read high, detector was reset and unit returned to reserve.
TC7	U2	79	5041	7/3/14 21:27	7/3/14 21:47	0.33	Gas Turbine - Fuel Issues (Gas above set point)	Fuel gas P2 transmitters drifted beyond set point and caused unit to be "not ready
TC8	SF	5	5130	1/5/14 19:28	1/6/14 15:58	20.50	Gas Turbine - Starting System (including Motor)	Startup failure due to issue with 89SS.
TC8	SF	129	5041	7/22/14 13:10	7/22/14 13:45	0.58	Gas Turbine - Fuel Piping And Valves	The main fuel gas shut-off valve closed on a high fuel gas pressure spike the day
TC8	SF	164	5130	9/25/14 13:55	9/25/14 19:22	5.45	Gas Turbine - Starting System (including Motor)	Cam switch hold down bolts were loose, this caused false indication on 89SS trave
TC8	SF	210	5041	11/14/14 7:00	11/14/14 10:47	3.78	Gas Turbine - Fuel Piping And Valves	Condensation made its way inside the terminal block for the micro switches
TC8	U1	2	5130	1/3/14 5:21	1/4/14 0:26	19.08	Gas Turbine - Starting System (including Motor)	Forced outage due to issue with 89SS.
TC8	U1	9	3869	1/10/14 14:00	1/14/14 13:28	95.47	Other Fire Protection System Problems	Forced outage due to issue with Fire Protection System.
TC8	U1	15	5041	1/30/14 6:34	1/30/14 7:49	1.25	Gas Turbine - Fuel Piping And Valves	Forced outage to reset lifted safety valve that occurred due to fuel gas pressure
TC8	U1	103	5049	6/10/14 18:00	6/10/14 20:27	2.45	Other Gas Turbine Fuel System Problems	CT8 tripped as the unit was being shutdown due to excessive inlet gas pressure.
TC8	U1	138	5130	8/2/14 3:33	8/2/14 3:50	0.28	Gas Turbine - Starting System (including Motor)	Static Start switch failed to engage.
TC8	U1	140	5130	8/2/14 5:02	8/2/14 8:41	3.65	Gas Turbine - Starting System (including Motor)	Initial signal was that the LCI was not working
TC8	U1	162	5240	9/20/14 11:28	9/20/14 19:47	8.32	Gas Turbine - Fire Detection And Extinguishing Sy	The fire protection CO2 skid was found empty. Refrigeration unit checked
TC8	U1	166	3661	9/25/14 19:53	9/25/14 21:21	1.47	4000-7000-volt Circuit Breakers	Lose wire found on control circuit of the LCI 4KV breaker. Wire tightened
TC8	U1	168	3661	10/1/14 12:45	10/1/14 13:15	0.50	4000-7000-volt Circuit Breakers	Improper switching instructions on the 4KV outage on TC5 and 6, caused a black c
TC8	U1	170	5041	10/1/14 14:58	10/1/14 15:25	0.45	Gas Turbine - Fuel Piping And Valves	This was not a bad solenoid, it was a high differential across the fuel gas main
TC8	U1	173	5240	10/2/14 12:48	10/2/14 13:30	0.70	Gas Turbine - Fire Detection And Extinguishing Sy	Fire protection testing caused the unit to lose turning gear.
TC8	U1	184	5108	10/7/14 18:44	10/7/14 19:00	0.27	Gas Turbine - High Engine Exhaust Temperature	The gas valve closing is a result of the high exhaust spread trip
TC8	U1	208	3669	11/12/14 13:09	11/12/14 13:58	0.82	Other 4000-7000-volt Problems	The loss of power on TC7 event 146 caused the loss of power to the shared LCI,
TC8	U1	212	5049	11/15/14 15:03	11/15/14 16:09	1.10	Other Gas Turbine Fuel System Problems	Relief valve on TC9/10 fuel gas heater lifted,
TC8	U1	232	5130	12/11/14 17:55	12/11/14 19:07	1.20	Gas Turbine - Starting System (including Motor)	Static start 89SS switch failed to engage. Adjustments made to limit switches
TC8	U1	237	3611	12/13/14 14:10	12/13/14 21:42	7.53	Switchyard Circuit Breakers	Generator line breaker failed to operate due to springs not charging.
TC8	U1	240	3611	12/14/14 11:36	12/14/14 12:53	1.28	Switchyard Circuit Breakers	Generator mail line breaker failed to operate due to springs not charging properly
TC8	U1	242	5240	12/15/14 11:01	12/15/14 16:12	5.18	Fire detection and extinguishing system B	Fire protection upgrade, difference in wiring between units 5 & 6 and 7 through 10
TC8	U2	111	3869	6/23/14 9:10	6/24/14 12:15	27.08	Other Fire Protection System Problems	Fire protection CO2 tank lost all CO2 due to refrigeration unit malfunction.
TC9	SF	3	5130	1/3/14 0:00	1/3/14 20:51	20.85	Gas Turbine - Starting System (including Motor)	Startup failure due to issue with 89SS.
TC9	SF	20	5130	2/26/14 2:38	2/26/14 3:45	1.12	Gas Turbine - Starting System (including Motor)	Startup failure due to 89SS on TC10 failing to open.
TC9	SF	30	5130	3/16/14 18:25	3/16/14 20:27	2.03	Gas Turbine - Starting System (including Motor)	Startup failure due to 89SS not disengaging on TC10.
TC9	SF	33	3631	3/18/14 5:09	3/18/14 6:54	1.75	400-700-volt Circuit Breakers	Startup failure due to TC9 MCC #2 feed breaker opening cutting power to inservic
TC9	SF	47	5130	4/3/14 17:50	4/3/14 18:45	0.92	Gas Turbine - Starting System (including Motor)	Start up failure due to 89SS not engaging.
TC9	SF	50	5130	4/6/14 6:20	4/6/14 6:45	0.42	Gas Turbine - Starting System (including Motor)	Failure to start due to 89SS not engaging.
TC9	SF	53	5130	4/9/14 5:08	4/9/14 6:21	1.22	Gas Turbine - Starting System (including Motor)	89SS failed to engage.
TC9	SF	59	5130	4/11/14 17:01	4/12/14 4:01	11.00	Gas Turbine - Starting System (including Motor)	LCI breaker problem.
TC9	SF	61	5130	4/21/14 9:29	4/21/14 9:46	0.28	Gas Turbine - Starting System (including Motor)	89SS VFD setting too low to work.
TC9	SF	73	5130	4/28/14 6:12	4/28/14 12:59	6.78	Gas Turbine - Starting System (including Motor)	89SS switch failed to engage. Adjustments made to linkage.
TC9	SF	75	5130	4/29/14 6:12	4/29/14 6:34	0.37	Gas Turbine - Starting System (including Motor)	89SS motor VFD overload indication. Overload reset.
TC9	SF	79	5130	5/2/14 5:25	5/2/14 14:18	8.88	Gas Turbine - Starting System (including Motor)	89SS on TC9 Failed to engage. Adjusted linkage and installed through bolt.
TC9	SF	86	5130	5/7/14 10:27	5/7/14 10:32	0.08	Gas Turbine - Starting System (including Motor)	89SS in TC10 did not open and did not allow TC9 89SS to close.
TC9	SF	93	3631	5/14/14 11:25	5/14/14 20:24	8.98	400-700-volt Circuit Breakers	Feed to 480V MCC1 tripped. Unit not able to continue starting sequence.
TC9	SF	101	5041	5/22/14 14:28	5/22/14 14:43	0.25	Gas Turbine - Fuel Piping And Valves	Unit failed to start due to fuel gas line not being packed to proper pressure.
TC9	SF	129	4609	7/7/14 10:22	7/7/14 10:59	0.62	Exciter Reboot Problems	Network switch in the EX2000 cab needed to be rebooted due to power loss
TC9	SF	171	3631	9/21/14 13:25	9/21/14 19:50	6.42	400-700-volt Circuit Breakers	The Motor Operated Disconnects (MOD) did not close when signal was given.
TC9	SF	183	5130	10/6/14 5:09	10/6/14 8:17	3.13	Gas Turbine - Starting System (including Motor)	LCI had low water level. Added demin water and unit made available.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 209

Responding Witness: David S. Sinclair

Q-209. Please identify and explain any events or circumstance occurring during the most recent 12-months that materially (significantly) altered the normal (typical) economic dispatch of LG&E's and KU's electric production resources (if any).

A-209. No such events occurred.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 210

Responding Witness: David S. Sinclair

Q-210. For each KU and LG&E generating unit, please provide the most recent average annual fuel cost per KWH.

A-210. See table below for KU and LG&E Units.

Unit	**2014 Preliminary Fuel Expense[1] *(cents / KWh)***
Brown 1	4.01
Brown 2	3.41
Brown 3	3.66
Brown 5	8.34
Brown 6	6.26
Brown 7	5.65
Brown 8	8.45
Brown 9	10.49
Brown 10	10.17
Brown 11	9.33
Bluegrass	-.--
Cane Run 4	2.70

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 212

Responding Witness: Robert M. Conroy

Q-212. Please specifically explain and define how KU distinguishes between primary and secondary voltage; e.g., voltage level.

A-212. The voltage levels for primary and secondary delivery are defined on Sheet No. 99, Character of Service, of the proposed P.S.C. No. 17, which is provided in Tab 4 of the Filing Requirements.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 213

Responding Witness: David S. Sinclair

Q-213. Please provide a copy of the most recent KU class load study (basis for estimating class peak demands) including all supporting tables, schedules, and data. Please provide in hard copy as well as in Microsoft readable electronic format (preferably Microsoft Excel).

A-213. See attached.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 214

Responding Witness: Dr. Martin J. Blake

Q-214. Please provide all workpapers, analyses, calculations, etc. supporting all KU nonjurisdictional and jurisdictional class demands (loads) utilized in the jurisdictional and class cost of service studies. In this response, please explain and· indicate how class demands were specifically determined or estimated. Include all definitions of demand utilized; e.g., CP, NCP and sum of individual customers. Please provide in hard copy as well as in Microsoft readable electronic format (preferably Microsoft Excel).

A-214. The CP, NCP, and sum of individual customer demands were calculated using the load research data provided in response to PSC 2-60 and described in response to Question No. 200. The CP demand allocators are the class contributions to the summer and winter hourly peaks respectively, the NCP allocator is the highest hourly class maximum demand recorded during the test year, and the sum of individual customer demands is the maximum hourly demand for each individual customer in each rate class summed together.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 215

Responding Witness: Dr. Martin J. Blake

Q-215. Please explain how Curtailable Service Riders CSRl0 and CSR30 customers' demands and energy usage are reflected in the KU class cost of service study.

A-215. Curtailable customers' actual energy usages were included in the development of the energy allocation factors. The customers' CP demands were forecast to reflect levels that do not include any curtailments.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 216

Responding Witness: Robert M. Conroy

Q-216. With regard to KU' s current Curtailment Service Rider CSR10, please provide in Microsoft readable electronic format (preferably Microsoft Excel) the following amounts by rate schedule, separated between Primary and Transmission, for each month during the most recent 12-month period:

a. total firm contract demand;

b. total contract curtailment load;

c. total billing demand;

d. total demand credits;

e. total non-compliance charges by month; and,

f. listing of date, time, duration, and estimated MW curtailment.

A-216. a-e. See attachment 1 being provided in Excel format.

f. See attachment 2 being provided in Excel format.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 217

Responding Witness: David S. Sinclair / Robert M. Conroy

Q-217. With regard to KU' s proposed Curtailable Service Riders ("CSRs") referenced at Pages 29 and 30 of Mr. Conroy's Direct Testimony, please provide all workpapers, spreadsheets, source documents, assumptions, etc. utilized to develop the CSR provisions (curtailable hours, buy-through rates, etc.) being proposed in this case. Please provide in Microsoft readable electronic format as applicable (preferably Microsoft Excel).

A-217. See the response to Sierra Club 1-23.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 218

Responding Witness: Dr. Martin J. Blake

Q-218. With regards to the Specific Assignment of Curtailable Service Rider credits and avoided costs shown in KU Dr. Blake's Exhibit MJB-9, Pages 23 and 24:

a. please explain what the <$11,877,948> of "Curtailable Service Rider Avoided Cost" represents and provide all workpapers showing the determination of this amount;

b. please explain and provide all workpapers, spreadsheets, source documents, and analyses showing how the "specific assignments" were made to individual classes; and,

c. please explain the basis and provide all workpapers and spreadsheets showing how the Allocation of Curtailable Service Rider Credits of $11,877,948 were made; e.g., the development of Allocation Vector "INTCRE."

d. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-218.

a. The <$11,877,948> of "Curtailable Service Rider Avoided Cost" represents the interruptible credits provided to CSR customers during the test year. See page 2 of Schedule M-2-3.

b. The amount is assigned to the rate class under which the CSR customer is served. See page 1 of Schedule M-2-3.

c. The "INTCRE" allocation factor represents the sum of the fixed production plant that is allocated to the winter (intermediate) and summer (peak) periods, as these are the only periods during which the Curtailable Service Rider may have value to KU. The calculation is shown in the cost of service study provided in response to PSC 2-60; see "Att-PSC2-60-File02 as described in response to Question No. 200.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 219

Responding Witness: Dr. Martin J. Blake

Q-219. With respect to Dr. Blake's KU zero-intercept analysis (summarized in Exhibits MJB-5, MJB-6 and MJB-7), please provide:

a. all data utilized in developing each data set, along with the data utilized as inputs for regression modeling;

b. statistical output including all diagnostic statistics;

c. specific definition of dependent and independent variable(s) utilized corresponding to the data provided in each Exhibit;

d. specific regression model (including coefficient);

e. definition of */1* size" for each account;

f. definition of */1* cost" for each account;

g. definition of */1* quantity" for each account; and,

h. source documents supporting Dr. Blake's regression data.

i. Please provide in in Microsoft readable electronic format (preferably Microsoft Excel).

A-219.

a. See "Att-PSC2-60-File10" under Description of Document in the files uploaded in response to PSC 2-60. This file is the Continuing Property Records for the referenced zero intercept analyses.

b. See the statistical output is contained in the Excel versions of the referenced exhibits. See specifically "Att-PSC2-60-File04" under Description of Document in the files uploaded in response to PSC 2-60.

c. For overhead conductor, the dependent variable is the average cost per foot of conductor and the independent variable is the size of the conductor in MCM. For underground conductor, the dependent variable is the average cost per foot of conductor and the independent variable is the size of the conductor in MCM. For line transformers, the dependent variable is the average cost per transformer and the independent variable is the size of the transformer category in kVA. The analysis uses weighted linear regression with the feet of each type of conductor or number of each type of transformer as the weights. The formulation of the weighted linear regression equation, the definition of the variables and an explanation of weighted linear regression are provided on pages 9 through 12 of Dr. Blake's Direct Testimony.

d. See the response to part c.

e. See the response to part c.

f. See the response to part c.

g. See the response to part c.

h. See the response to parts a and b.

i. See the response to parts a and b.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 220

Responding Witness: Dr. Martin J. Blake

Q-220. Please provide KU Dr. Blake's Exhibits MJB-5, MJB-6 and MJB-7 in executable electronic spreadsheets. In this response include all analyses, calculations, work papers, and supporting documents conducted to develop each zero-intercept analysis.

A-220. See the response to Question No. 219, part b.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 221

Responding Witness: Dr. Martin J. Blake

Q-221. Please provide the following separated between primary and secondary (as available) by vintage year, size, and type for KU Account 365 (Overhead Conductors) in the greatest level of detail available:

a. installed footage;

b. gross investment;

c. materials investment;

d. capitalized labor; and,

e. Handy-Whitman Cost Index or equivalent.

f. If all data is not available for all years, please provide the level of detail · that is available. Please provide in in Microsoft readable electronic format (preferably Microsoft Excel).

A-221. See the response to Question No. 219, part a. Gross investment includes both materials investment and capitalized labor.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 222

Responding Witness: Dr. Martin J. Blake

Q-222. Please provide the following separated between primary and secondary (as available) by vintage year, size, and type for KU Account 367 (Underground Conductors) in the greatest level of detail available:

a. installed footage;

b. gross investment;

c. materials investment;

d. capitalized labor; and,

e. Handy-Whitman Cost Index or equivalent.

f. If all data is not available for all years, please provide the level of detail that is available. Please provide in in Microsoft readable electronic format (preferably Microsoft Excel).

A-222. See the response to Question No. 219, part a. Gross investment includes both materials investment and capitalized labor.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 223

Responding Witness: Dr. Martin J. Blake

Q-223. Please provide the following separated between primary and secondary as available by vintage year, size and type for KU Account 368 (Line Transformers) in the greatest level of detail available:

a. installed units;

b. gross investment;

c. materials investment;

d. capitalized labor; and,

e. Handy-Whitman Cost Index or equivalent.

f. If all data is not available for all years, please provide the level of detail that is available. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-223. See the response to Question No. 219, part a. Gross investment includes both materials investment and capitalized labor.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 224

Responding Witness: Dr. Martin J. Blake

Q-224. Please provide each of the following KU Exhibits included in Dr. Blake's Direct Testimony in executable Excel format (include all linked files):

a. Exhibit MJB-10;

b. Exhibit MJB-11;

c. Exhibit MJB-12; and,

d. Exhibit MJB-13.

e. Please include in this response all the workpapers, spreadsheets, source documents, etc. that support the amounts, assumptions and calculations presented in each of these Exhibits.

A-224. a. See "Att-PSC2-60-File02" under Description of Document in the files uploaded in response to PSC 2-60.This file is the electric cost of service study; specifically in this spreadsheet, see the tab "Res Unit Costs."

b. See the following under Description of Document in the files uploaded in response to PSC 2-60:

Att-PSC2-60-File05 – contains pages 2-4 of Exhibit MJB-11
Att-PSC2-60-File06 – contains page 1 of Exhibit MJB-11
Att-PSC2-60-File18 – supporting workpapers for Exhibit MJB-11
Att-PSC2-60-File19 – supporting workpapers for Exhibit MJB-11
Att-PSC2-60-File20 – supporting workpapers for Exhibit MJB-11

c. See "Att-PSC2-60-File07" under Description of Document in the files uploaded in response to PSC 2-60, which is the Excel version of Exhibit MJB-12.

d. See "Att-PSC2-60-File10" under Description of Document in the files uploaded in response to PSC 2-60, which is the Excel version of Exhibit MJB-13.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 225

Responding Witness: Russel A. Hudson

Q-225. Please provide KU fully forecasted test year General plant in the greatest detail available by FERC account and sub-account. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-225. See attachment to Filing Requirement Tab 54 - Schedule B-2.3 pages 5-6.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 226

Responding Witness: Russel A. Hudson

Q-226. Please provide KU fully forecasted test year CWIP in the greatest detail available. Please provide in hard copy as well as in Microsoft readable electronic format (preferably Microsoft Excel).

A-226. See the response to PSC 1-17 and PSC 1-18.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 227

Responding Witness: Russel A. Hudson

Q-227. Please provide KU fully forecasted test year depreciation reserve and depreciation expense in the greatest detail available by FERC account and sub-account. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-227. See attachment being provided in Excel format.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 228

Responding Witness: John P. Malloy

Q-228. Please provide actual and estimated KU meter reads by customer class during the most recent 12-months available.

A-228. See table below for a listing of KU actual and estimated meter reads by revenue class for the 12 months ending December 31, 2014.

Revenue Class	Actual Reads	Estimated Reads
Industrial	37,250	642
Large Commercial	74,835	714
Mine Power	1,389	71
Municipal	3,643	130
Public Authorities	105,039	1,949
Residential	5,480,087	49,759
Small Commercial	937,509	18,342
Street Lighting	7,618	56
Total	6,647,370	71,663

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 229

Responding Witness: David S. Sinclair

Q-229. With regard to KU Purchased Power (Account 555) included in its electric class cost of service study, please provide:

a. all workpapers and analyses showing the determination of total capacity costs within the Account total; and,

b. all workpapers and analyses showing the determination of total energy costs within the Account total.

c. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-229. a. See attachment being provided in Excel format. Certain information is confidential and proprietary and is being provided pursuant to a petition for confidential protection. Purchased Power Demand within Account 555 for KU includes capacity costs for the OVEC power purchase agreement. In the attached Excel workbook, the "DemandSummary" worksheet lists the annual OVEC capacity payments upon which the forecasted monthly OVEC capacity payments are based.

b. In addition to Purchased Power Demand, Account 555 includes External Purchased Power, Internal Purchased Power, Purchase Power – OSS, and Purchase Power – OSS I/C. The forecast for each of these items was developed using the Companies' production cost model. Attachment 1 being provided in Excel format contains the workpapers for External Purchased Power, Internal Purchased Power, and Purchase Power – OSS I/C. The table below provides guidance on how to filter for the data rows that make up each item.

Item	Company	Group	Item	Unit
External Purchased Power	KU	Purchases	MarketP, OVEC-K Max, OVEC-K Min	$000s
Internal	KU	Intercompany Purchase,	LGE	$000s

Purchased Power		Intercompany Savings		
Purchase Power – OSS I/C	LGE	ReplacementTo	KU	$000s

Attachment 2 being provided in Excel format contains the workpapers for Purchase Power – OSS. The forecasted values for Purchase Power – OSS are located in the "BudgetSummary" worksheet in row number 58.

c. See attachments to parts a and b.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 230

Responding Witness: David S. Sinclair / Dr. Martin J. Blake

Q-230. With regard to KU Off-System Sales of $24,736,304 (Blake Exhibit MJB-9, Page 23), please provide in Microsoft readable Excel format:

a. a detailed explanation along with all workpapers and analyses showing the pricing methodology (basis) and amount (units and dollars) for sales to affiliates;

b. if not provided in (a) above, please provide the detailed determination of test year Off-System Sales (units and dollars) by month and by affiliate; and,

c. method used to allocated total Company amount to individual classes.

A-230.

a. Account 447 includes Intercompany OSS Sales, Intercompany Native Load Sales, External OSS Sales, and Sale to the City of Paris. The forecast for the first three items was developed using the Companies' production cost model. The workpapers (in Microsoft Excel format) for Intercompany OSS Sales and Intercompany Native Load Sales were provided as the first attachment to Question No. 229(b). The table below provides guidance on how to filter for the data rows that make up each item.

Item	**Company**	**Group**	**Item**	**Unit**
Intercompany OSS Sales	KU	ReplacementTo	LGE	$000s
Intercompany Native Load Sales	LGE	Intercompany Purchase, Intercompany Savings	KU	$000s

The workpapers (in Microsoft Excel format) for External OSS Sales were provided as the second attachment to Question No. 229(b). The forecasted values for External OSS Sales are located in this attachment in the "BudgetSummary" worksheet in row number 63.

The workpapers for Sale to the City of Paris are attached in Excel format. Forecasted sales to the City of Paris are located in this attachment in row number 15.

The total of these four items for the Forecast Period is $28,178,489. The portion allocated to KU's Kentucky jurisdiction is $24,736,304. See part c. for this allocation methodology.

b. See the response to part a.

c. Purchases to support off system sales are recorded in the energy costs included in Account 555 under the Functional Assignment tab in the Cost of Service Study. Since the margins on these energy sales are used as a credit towards the cost of fixed generation and transmission facilities being paid for by native load customers, an adjustment must be made to ensure that the margins from these sales are spread to the various customer classes in a way that ensures that the revenues and margins from making off system sales is consistent with the costs associated with making the off system sales. To accomplish this, the expenses associated with off system sales included in the Company's forecast are allocated based on production and transmission rate base instead of energy to ensure there is alignment between the revenue and expenses. This ensures that the revenues and expenses of making off system sales are allocated to the various customer classes on the same basis, namely each class' share of fixed generation and transmission facilities.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 231

Responding Witness: Robert M. Conroy

Q-231. For each the last three rate cases (before this rate case), please provide the following by rate class:

a. current base rate revenues excluding all Riders and fuel (before increase);

b. current Rider revenue excluding fuel;

c. current fuel revenue;

d. Company proposed (as-filed) increase;

e. authorized increase; and,

f. KWH sales included in Filing.

A-231. Case references for KU's three most recent base rate cases are 2008-00251, 2009-00458, and 2012-00221.

Case No. 2008-00251

a. See Attachment 1, page 1.

b. See Attachment 1, page 1.

c. See Attachment 1, page 1.

d. See Attachment 1, page 3.

e. See Attachment 1, page 4.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 232

Responding Witness: Dr. Martin J. Blake

Q-232. Please provide all workpapers, analyses, spreadsheets, source documents, etc. that show how each of the electric class cost of service study allocation factors was determined that are identified in Dr. Blake's Direct Testimony at Pages 14 through 16. Please provide in Microsoft readable electronic format (preferably Microsoft Excel).

A-232. See the response to Question No. 200.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 233

Responding Witness: Paul Gregory "Greg" Thomas

Q-233. Please provide the following KU system actual or estimated number of circuit miles as follows:

a. separated between primary and secondary voltage; ·

b. separated between 3-phase and single (dual) phase; and,

c. separated by size of conductor.

A-233.

a. KU has a total of approximately 15,276 primary circuit miles and 4,365 secondary circuit miles. Lengths of services are not included and are not readily available.

b. KU has approximately 5,114 primary three phase circuit miles and 10,162 primary single (dual) phase circuit miles. KU does not maintain records of secondary circuit miles by phasing. KU has 4,365 total circuit miles of secondary. Lengths of services are not included and are not readily available.

c. See the table below for the estimated total primary and secondary distribution circuit miles by size. The data in this attachment is based on records retrieved from the Company's mapping database and represents the best estimate available to respond to AG 233 (c).

Wire Size	Circuit Mileage

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 234

Responding Witness: Robert M. Conroy

Q-234. With respect to the discussion of the Optional Residential Time-of-Day Rates at Dr. Blake's Direct Testimony, Pages 23 through 27, please provide a detailed explanation of why KU is proposing these rates at this time.

A-234. See the testimony of Mr. Conroy, pages 20 through 27, for the requested explanation.

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 235

Responding Witness: Dr. Martin J. Blake

Q-235. With respect to Exhibit MJB-11, please provide all supporting data and analyses for the billing determinants, rates, revenues, rate periods, etc. determined and presented therein.

A-235. See the response to Question No. 224.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 236

Responding Witness: Robert M. Conroy

Q-236. For each of the last three calendar years, please provide actual billing determinants by rate schedule (customers, billed demand, KWH, rKVA, etc.).

A-236. See attachment being provided in Excel format.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.
