KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 1

Responding Witness: Edwin R. "Ed" Staton

Q-1. Please provide all spreadsheets provided in the company application and responses to initial PSC requests for information in excel format with all cells unlocked and functional.

A-1. The Company did not provide any spreadsheets in the filing of the application on November 26, 2014. All spreadsheets provided in response to the initial PSC requests for information were filed on December 12, 2014.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 2

Responding Witness: Christopher M. Garrett

Q-2. Please provide the following information with regard to uncollectible expenses:

a. Actual uncollectible expenses and residential, commercial and public authority revenues for FY 2014, FY 2013, FY 2012, FY 2011, and FY 2010, as well as the ratios of uncollectible expenses to the total of residential, commercial and public authority revenues. Please show calculation of ratios.

b. Basis for the assumed uncollectible ratio.

A-2.

a. See attached.

b. The assumed uncollectible ratio in the Business Plan (bad debt as a percent of revenue) is based on relatively recent history and any known or anticipated trends in the local economies and any other macro-economic factors that could affect bad debt expense.

Kentucky Utilities Company
Case No. 2014-00371
Uncollectible Expenses and Ratios of Uncollectible Expenses to Revenues for
Residential, Commercial, and Public Authority Customers - Kentucky Only
For the Calendar Years 2010 through 2014

Revenue Class	2010	2011	2012	2013	2014
Uncollectible Expenses:					
Residential	$ 5,831,197	$ 4,716,971	$ 2,687,526	$ 2,836,501	$ 6,513,911
Commercial	558,043	502,576	377,435	260,746	593,662
Public Authority	146	43	328	841	1,966
Total	**$ 6,389,386**	**$ 5,219,590**	**$ 3,065,289**	**$ 3,098,088**	**$ 7,109,539**
Revenues:					
Residential	$ 507,149,614	$ 493,167,717	$ 488,370,526	$ 556,660,602	$ 591,242,710
Commercial	325,111,883	330,846,846	330,359,286	348,475,448	363,226,184
Public Authority	102,854,892	109,191,697	110,294,240	113,424,720	120,529,265
Total	**$ 935,116,389**	**$ 933,206,260**	**$ 929,024,052**	**$ 1,018,560,770**	**$ 1,074,998,159**
Ratio of Uncollectible Expenses to Revenues:					
Residential	1.15%	0.96%	0.55%	0.51%	1.10%
Commercial	0.17%	0.15%	0.11%	0.07%	0.16%
Public Authority	0.00%	0.00%	0.00%	0.00%	0.00%
Total	**0.68%**	**0.56%**	**0.33%**	**0.30%**	**0.66%**

The accrual for bad debt is not recorded by revenue class; therefore, for the purposes of this response, the accrual has been allocated to each revenue class based on the actual write-offs.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 6

Responding Witness: Christopher M. Garrett

Q-6. Provide estimated rate case expenses filed in both the application and in response to applicable data requests filed in Case No. 2012-00221.

A-6. See attached.

LINE NO				
1	CASE NO 2012-00221 ESTIMATED EXPENSES			
2	VENDOR	RATE	TOTAL UNITS	TOTAL ESTIMATED
3	LEGAL	$ 238.00	1,681	$ 400,000.00

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 7

Responding Witness: Kent W. Blake

Q-7. Please explain why has the company chosen to use a forecasted test period?

a. Does the Company agree that by choosing a forecasted test period it has requested recovery for costs in its rate application that are more speculative in nature, as history has yet to prove the costs are "known and measureable?" Please explain.

b. Does the Company agree that the use of the forecasted test year greatly benefits the company by reducing regulatory lag, decreasing risk, and allowing recovery of speculative expenses? Please explain.

A-7. The Company's decision to use a forecasted test period is explained in Mr. Staffieri's Direct Testimony at pages 10-11.

a. No. The Company does not agree that use of a forecasted test period is a request for recovery of costs that are more speculative in nature than the "known and measurable" methodology used in historic test year cases. By law, the Company is permitted to choose which type of test period to use in a general rate case. Under the PSC's regulations, the choice to use a future test period comes with an obligation to file much more detailed information about the Company's historical performance, budgeting, forecasting, and financial planning than in historic test period cases. The disclosure of that information in support of its Application provides the information necessary to evaluate the forecasted test period. Additionally, many other utilities subject to the PSC's jurisdiction have based rate applications on forecasted test periods multiple times since being permitted to do so over twenty years ago. Those cases have led to the development of significant PSC (and intervenor) experience in examining forecasted test period information to ensure fair, just and reasonable rates are approved by the Commission.

b. No. The forecasted test period is not a new, but a well-established regulatory process. The availability of this method does not change the Company's risk profile. Use of a forecasted test period merely places the Company on equal footing with other utilities within and outside Kentucky which, by law, are

permitted to use a forecasted test period. At the same time, use of a forecasted test period allows the Company a fair opportunity to earn its authorized rate of return. A forecasted test period allows for the establishment of rates that more accurately reflect the Company's cost of providing utility service. Also see the response to part (a) above, Mr. Staffieri's Direct Testimony at pages 10-11, and Messrs. Avera's and McKenzie's Direct Testimony at pages 7-8.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 8

Responding Witness: Robert M. Conroy

Q-8. Please reference Application at page 4, paragraph 7, wherein the company states the average monthly consumption of a KU residential customer is 1,200 kWh. Provide the following information:

a. Any and all underlying information and worksheets, data and cells intact, on which KU relies to calculate that the "average monthly consumption of a KU residential electric customer" is 1,200 kWh; and

b. The mean and median monthly consumption of KU residential electric customers; and

c. The average, mean and median monthly consumption of KU residential electric customers by county.

A-8.

a. See "Att-PSC2-60-File09" under Description of Document in the files uploaded in response to PSC 2-60. This file is the Excel version of Schedules M-1.1 through M-2.3; the average monthly consumption of a KU residential electric customer is calculated using the number of customers and energy consumption as shown on Schedule M-2.3, page 3.

b. KU does not have individual customer data for the forecast period. The requested information is not available.

c. KU does not have individual customer data for the forecast period. The requested information is not available.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 9

Responding Witness: Robert M. Conroy

Q-9. Please identify what incentives residential customers will have to conserve energy if the Companies requested rate design, which drastically increases the monthly customer charge is approved?

A-9. KU's proposed residential energy charge per kWh, $0.08057, is higher than its current residential energy charge per kWh, $0.07744. Therefore, KU's proposed residential energy charge per kWh will give KU's residential energy consumers a greater financial incentive to reduce their energy consumption than they have today.

But more importantly, KU's proposed rate design for residential service (Rate RS) provides more accurate incentives for energy conservation by more closely aligning the per-kWh energy charge with the actual cost to produce an incremental kWh. The proposed per-kWh energy charge will still not completely accurately reflect incremental energy cost—there will still be a portion of customer-specific fixed costs and demand-related fixed costs embedded in the energy charge—but the proposed charge will nonetheless more accurately reflect underlying incremental energy costs than does the current energy charge. This has the advantage of giving customers more accurate pricing signals upon which to base energy-efficiency investments, and will have the advantage of reducing customers' bill volatility, an issue of particular importance during times of extreme weather, such as the recent severe cold that has affected KU's and LG&E's service territories.

Finally, the Commission has stated, "[T]he Commission is very much interested in cost-of-service-based rates and demand-side management programs that incentivize both the utility and customers to practice energy efficiency in a cost-effective manner."[1] The Commission has also stated that cost-based ratemaking

[1] *In the Matter of: General Adjustment of Electric Rates of East Kentucky Power Cooperative, Inc.*, Case No. 2008-00409, Order at 6 (Mar. 31, 2009).

is "the foundation of the Commission's rate-making philosophy."[2] KU's proposed residential electric rates operating in tandem with KU's robust and recently Commission-approved portfolio of DSM-EE programs are precisely in line with the Commission's stated desire: The proposed cost-based rate designs will provide accurate incentives to customers to make cost-effective energy-efficiency choices, choices that include a broad array of DSM-EE measures that KU provides.

[2] *In the Matter of: Big Rivers Electric Corporation's Notice of Changes in Its Rates for Electricity Sold to Member Cooperatives*, Case No. 9163, Order at 26-27 (May 6, 1985) ("The appeal of this rate structure is that rates are still based on cost, which is the foundation of the Commission's rate-making philosophy.").

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 10

Responding Witness: Robert M. Conroy

Q-10. Do the Companies acknowledge that many, if not most of its residential members would prefer to retain the ability to control the amount of the bill they owe, and that many are likely to view the company's proposal to place a large majority of the proposed increase on the monthly customer charge as an attempt to eliminate their ability to control the amount of their bill? Cite all studies the company has conducted of its own ratepayer base to support the Companies' decision to seek the proposed rate design in the instant case.

a. Provide copies of any and all studies the company has performed, or were performed on its behalf, indicating that increasing the monthly residential customer charge by a significant amount will lead to greater customer conservation.

A-10. The Company has not conducted, and is not aware of, any study or survey of its residential customers concerning their preferences about the allocation of cost recovery between basic service charges and variable energy charges. Therefore, the Company cannot on any empirical basis opine upon how customers might view the Company's residential rate design.

But as discussed at length in the Company's responses to Question No. 1-9 above and to Sierra Club 1-17, the Company's proposed rate design reflects the Company's cost to serve customers and the application of cost-causation principles. Also, the Company's proposed residential rate design has the policy benefits of providing customers more accurate pricing signals and helping to reduce customers' bill volatility.

a. The Company has not performed or caused to be performed any such studies. Please see also the Company's response to Question No. 1-9 concerning customers' energy-conservation incentives under the Company's proposed residential electric rates.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 11

Responding Witness: Robert M. Conroy

Q-11. Provide copies of all studies that the Companies have conducted addressing the impact that the proposed rate design will have on the elderly, low income, fixed income and home bound segments of its ratepayer base. Please provide detailed information for each specified group.

A-11. The Company has not conducted any such studies. See Tab 66 of the Filing Requirements for analysis related to the impact the proposed rate design will have on various consumption levels for each of the Company's rate schedules.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 12

Responding Witness: Paul W. Thompson

Q-12. Please reference Paul W. Thompson's testimony page 4, lines 4-6. Please further explain all "increasing regulatory constraints, unpredictable severe weather events, and difficult economic conditions" that have led to increased operating complexity and expense.

A-12. The electric utility industry is subject to many external forces, including regulation, nature, and the economy. The industry has seen a wide array of new regulatory requirements be placed on it over the last decade from a variety of sources. For example, KU must comply with requirements issued by governmental agencies and industry groups ranging from the North American Electric Reliability Corporation ("NERC") and the Federal Energy Regulatory Commission to those implemented by state and local boards and agencies. As to specific regulatory constraints, NERC is constantly updating its requirements for things such as Critical Infrastructure Protection. While such updates are certainly worthwhile and important, as recent cyber-attacks demonstrate, they come at a cost. The United States Environmental Protection Agency has also increased regulation over the last several years with items such as the Cross-State Air Pollution Rule, the Mercury and Air Toxics Standards, the National Ambient Air Quality Standards, the Coal Combustion Residual Rule and the forthcoming new effluent limitation guidelines.

Weather can also have tremendous and unpredictable impacts on utilities, often straining and sometimes damaging or destroying parts of utilities' infrastructure. The most significant weather event since KU's last rate case occurred during the winter of early 2014 when a polar vortex struck the region, resulting in extremely cold temperatures over a prolonged. On January 7, 2014, KU set an all-time peak demand and provided a record daily amount of electricity to its customers. The polar vortex followed other recent severe weather events that struck our service territory, including the remnants of Hurricane Ike in 2008 and the winter storm of 2009, which did significant damage to the Companies' transmission and distribution systems. KU continually monitors weather conditions in an effort to be prepared for any and all events. KU also strives to be proactive in anticipating potential issues that may arise during severe weather events. For example, the Hazard Tree Program, implemented consistent with

the Commission's report following the 2008 and 2009 severe storms, includes the removal of dead, dying, and diseased trees outside of KU's right of way to decrease the likelihood of tree damage to electrical infrastructure during severe weather events. The Companies have seen improvement in reliability statistics since beginning the program. Nonetheless, the program requires capital from both a monetary and human relations perspective to identify needs and carry out the program.

Finally, the economy plays an integral role in all industries, including the electric utility industry. The country and state are still rebounding from the economic downturn that began in late 2008. The difficult economic times since have resulted in a reduction in energy usage from that forecasted. At the same time, costs within the utility industry have risen with inflation and new regulatory requirements.

Taken together, the electric utility industry is now more regulated than ever, is constantly faced with unpredictable weather events, and must remain ready and able to provide safe and reliable service to customers. These demands require KU to continue making investments in equipment and personnel to keep the lights on in an era of unprecedented operating complexity.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 13

Responding Witness: Robert M. Conroy

Q-13. Please reference the Companies' applications generally and explain why the proposed energy charge per kWh for KU customers will increase whereas the energy charge per kWh for LG&E customers will decrease?

A-13. The Company assumes the reference to "customers" means residential customers for the purpose of this request.

For KU, the proposed revenue increase for the residential class, which includes customers on the Volunteer Fire Department rate, is $56,838,067.[3] The additional revenue that will be collected by increasing KU's residential basic service charge from $10.75 to $18.00 is $37,440,189.[4] Because the increase in revenues from the basic service charge will be $19,397,878 less than the total increase in revenue required from KU's residential customers, KU's residential per-kWh energy charge must increase so that the total residential revenue increase is $56,838,067.

For LG&E, the proposed revenue increase for the residential class, which includes customers on the Volunteer Fire Department rate, is $11,908,857.[5] The additional revenue that will be collected by increasing LG&E's residential basic service charge from $10.75 to $18.00 is $31,450,398.[6] Because the increase in revenues from the basic service charge will exceed the total increase in revenue required from LG&E's residential customers by $19,541,541, LG&E's residential per-kWh energy charge must decrease so that the total residential revenue increase is $11,908,857.

---

[3] KU Application Tab 65, Schedule M-2.1.

[4] KU Application Tab 65, Schedule M-2.3 page 3. The basic service charge under KU's proposed rates results in revenue of $92,954,952; the current basic service charge applied to the same number of customer-months results in revenue of $55,514,763. The difference between the two is $37,440,189.

[5] LG&E Application Tab 65, Schedule M-2.1-E.

[6] LG&E Application Tab 65, Schedule M-2.3-E page 3. The basic service charge under LG&E's proposed rates results in revenue of $78,083,748; the current basic service charge applied to the same number of customer-months results in revenue of $46,633,350. The difference between the two is $31,450,398.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 14

Responding Witness: Paul W. Thompson / David S. Sinclair

Q-14. Please reference Paul W. Thompson's testimony on page 5, lines 12-14 where it is stated that, "NERC working with the utility industry, identified possible improvements to the power industry's cold-weather operations and changes to the natural gas industry's scheduling process." Have there been any changes to the natural gas industry's scheduling process as of yet? Please explain in detail.

a. Please explain the other "identified possible improvements to the power industry's cold-weather operations" that the Companies are willing to adopt.

A-14. No. The Federal Energy Regulatory Commission ("FERC") proposed natural gas industry scheduling process changes in a Notice of Proposed Rulemaking issued March 20, 2014 under FERC docket RM14-2. The North American Energy Standards Board submitted changes to the FERC regarding their Business Practice Standards in late 2014. FERC has yet to take action related to the proposed natural gas scheduling practice modifications.

a. The Companies are using NERC's "Reliability Guideline: Generating Unit Winter Weather Readiness-Current Industry Practices" as a template to enhance the current cold-weather operations program. The guideline contains processes that address Safety, Management Roles and Expectations, Processes and Procedures, Evaluation of Potential Problem Areas, Testing, Training and Communication. The Company is working to formalize and standardize these processes across the fleet.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 15

Responding Witness: Daniel K. Arbough

Q-15. Please reference Paul W. Thompson's testimony on page 9, lines 15-18, where it is stated that the increased costs are due to many factors, one of which is "additional pension expense due to updated actuarial standards the IRS is anticipated to adopt." Please explain why the Companies have allotted for increased pension expense in the application based on updated actuarial standards if the IRS has not yet adopted it.

a. Please elaborate, explain in full, and identify the precise "updated actuarial standards the IRS is anticipated to adopt" in detail.

b. At what time is it expected that the IRS will adopt the updated actuarial standards?

c. Why did the Company not wait to include the updated actuarial standards when the IRS actually does adopt them?

d. At what time is it expected that the IRS will adopt the updated actuarial standards?

e. Why did the Company not wait to include the updated actuarial standards when the IRS actually does adopt them?

A-15.

a. On October 27, 2014, the Society of Actuaries (SOA) Retirement Plans Experience Committee (RPEC) released a report on recent mortality experience of participants in single-employer pension plans, including a new set of mortality tables (RP-2014). The data underlying RP-2014 are based on a study of mortality experience in the period 2004 through 2008, while the RP-2000 tables are based on data from 1990 through 1994.

b. The exact date the IRS will adopt updated actuarial standards is not certain, but it is not expected until 2016 or 2017.

c. When measuring a plan's defined benefit obligation and recording the net periodic benefit cost, Accounting Standards Codification (ASC) 715-30-35-42 states that "each significant assumption used shall reflect the best estimate solely with respect to that individual assumption." The mortality tables used should be appropriate for the employee base covered by the plan. In 2014, KU's actuary, Towers Watson, performed an Experience and Demographic Assumptions Review of the Company's plan. Towers Watson reviewed the actual mortality experience for retirees and surviving spouses in the qualified pension plan. Based on the results of this study, KU determined that the RP-2014 mortality table was the best estimate of actual experience available.

   On December 8, 2014, T. Kirk Crews, a Professional Accounting Fellow with the Office of the Chief Accountant of the U.S. Securities and Exchange Commission (SEC), spoke before the 2014 American Institute of Certified Public Accountants' National Conference on Current SEC and Public Company Accounting Oversight Board (PCAOB) Developments. In this speech, he stated that "given plan sponsors have historically utilized the SOA's mortality data and that data has been updated, the [SEC] staff does not believe it would be appropriate for a registrant to disregard the SOA's new mortality data in determining their best estimate of mortality".

   The IRS is only required by statute to update the required mortality assumption once every 10 years. The fact that the IRS is not adopting the RP-2014 tables immediately did not affect KU's determination of its best estimate for the mortality assumption.

d. See the response to part b.

e. See the response to part c.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 17

Responding Witness: Paul W. Thompson

Q-17. Please reference Paul W. Thompson's testimony on page 9, lines 3-10, where the Companies explain that it is anticipated additional capital investments of $486 million will be made during the forecasted test period. Please provide a detailed list of all capital investments that the Companies anticipate they will make during the forecasted test period.

A-17. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 18

Responding Witness: Paula H. Pottinger, Ph.D.

Q-18. Please reference Paul W. Thompson's testimony on page 9, lines 14-18, where it is stated that a rate increase is needed because of "many factors, such as the cost to maintain a competitive and skilled workforce, more equipment and operating complexity requiring more employees…" Please advise if the Companies have ever conducted a study to compare its salary, benefits, and raises per employee to the standard salary, benefits, and raises by the workforce in the counties which is services. If so, please provide copies of all such studies.

A-18. The Company participates in compensation and employee benefits surveys and references national and regional data for the utility and general industries. See the response to PSC 1-34.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 19

Responding Witness: D. Ralph Bowling

Q-19. Please reference Paul W. Thompson's testimony on page 23, lines 15-17.

a. Please further elaborate the specific 50 positions (or 5%) are anticipated to be added to the Generation operations through the end of the forecasted test period, and the need for each.

b. Please state if this figure is a net of positions eliminated at the generating plants that have been or will be retired?

A-19.

a. The net 50 positions and the need for each are listed in the table below.

Title	# of positions	Business Need
Chemical Engineer	3	Capital Projects
Civil Engineer	1	Capital Projects
Electrical Engineer	3	Capital Projects
Mechanical Engineer	1	Capital Projects
Mgr Major Capital Projects	1	Capital Projects
Project Coordinator	9	Capital Projects
Boiler Welding QA/QC Specialist	1	Core Skill Building/Knowledge Retention and Transfer
Buyer	2	Core Skill Building/Knowledge Retention and Transfer

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 20

Responding Witness: Paul W. Thompson

Q-20. Please reference Paul W. Thompson's testimony on page 24, lines 1-3, where it is stated that, "[t]he Companies have identified several key positions that they believe should be filled by Company employees to ensure core skills and knowledge are retained."

a. Please provide a detailed list of all positions that will be filled by Company employees as opposed to contractors.

b. Please provide a detailed explanation of what constitutes "core skill and knowledge."

A-20. See the response to PSC 2-17.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 21

Responding Witness: Thomas A. ("Tom") Jessee

Q-21. Please reference Paul W. Thompson's testimony on page 31, lines 7-9, and further elaborate the specific 19 positions that are anticipated to be added to the Transmission operations through the end of the forecasted test period, and the need for each.

A-21. Below are the specific positions and the need for each:

Title	# of Positions	Business Need
Cascade Analyst	1	Core Skill Building/Knowledge Retention and Transfer
Drafting Technician	3	Core Skill Building/Knowledge Retention and Transfer
Electrical Engineer	1	Core Skill Building/Knowledge Retention and Transfer
Group Leader Substation Asset Mgmt	1	Core Skill Building/Knowledge Retention and Transfer

Protection/Relay Technician	3	Core Skill Building/Knowledge Retention and Transfer
Protection Engineer	2	Regulatory Compliance
Substation Inspector	2	Core Skill Building/Knowledge Retention and Transfer
System Control Engineer	1	Core Skill Building/Knowledge Retention and Transfer
System Control Engineer	1	Regulatory Compliance
System Administrator	-4	Corporate Reorganization
Safety Coordinator	-1	Corporate Reorganization

Contract Coordinator	-1	Position not backfilled
Cascade Administrator	1	Core Skill Building/Knowledge Retention and Transfer

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 22

Responding Witness: Paul Gregory "Greg" Thomas

Q-22. Please reference Paul W. Thompson's testimony on page 42, lines 4-10.

a. Please further elaborate and be specific as to what 53 positions are anticipated to be added to Electric Distribution operations, and the need for each.

b. Please explain why many of the new Electric Distribution positions will involve a corresponding contractor offset.

c. Please provide a comparison between salary, benefits, etc. of an in-house employee in the electric distribution sector versus a contractor doing the same, or similar job.

A-22.

a. The 53 positions and the need for each are listed in the table below.

Title	**# of positions**	**Business Need**
Computer Graphics Technician	2	Core Skill Building/Knowledge Retention and Transfer
Distribution operations Assistant	1	Core Skill Building/Knowledge Retention and Transfer
Electrical Apprentice	6	Core Skill Building/Knowledge Retention and Transfer
Electrical Engineer	1	Core Skill Building/Knowledge Retention and Transfer
Electrical Engineer (Danville)	1	Core Skill Building/Knowledge Retention and Transfer
Electrical Engineer (Maysville)	1	Core Skill Building/Knowledge Retention and Transfer
Electrical Engineer (SC&M)	1	Core Skill Building/Knowledge Retention and Transfer
Electrical Engineer (System Planning)	1	Core Skill Building/Knowledge Retention and Transfer
Engineer (Reliability)	1	Core Skill Building/Knowledge Retention and Transfer
Engineer Design Tech	1	Core Skill Building/Knowledge Retention and Transfer
Engineer Design Tech (Danville)	1	Core Skill Building/Knowledge Retention and Transfer
Facility Records Technician	3	Core Skill Building/Knowledge Retention and Transfer

Field Coordinator	3	Core Skill Building/Knowledge Retention and Transfer
Line Technician (Greenville)	1	Core Skill Building/Knowledge Retention and Transfer
Line Technician (Louisville)	19	Core Skill Building/Knowledge Retention and Transfer
Line Technician (Pineville)	1	Core Skill Building/Knowledge Retention and Transfer
Line Technician (Richmond)	1	Core Skill Building/Knowledge Retention and Transfer
Mechanic Helper	1	Core Skill Building/Knowledge Retention and Transfer
Network Technician	6	Core Skill Building/Knowledge Retention and Transfer
Project Coordinator	1	Core Skill Building/Knowledge Retention and Transfer
Records Coordinator	2	Core Skill Building/Knowledge Retention and Transfer
Restoration Coordinator	2	Core Skill Building/Knowledge Retention and Transfer
SC&M Coordinator Analyst	1	Core Skill Building/Knowledge Retention and Transfer
Utility Arborist	1	Core Skill Building/Knowledge Retention and Transfer
Sr. Distribution operations assistant	-1	Core Skill Building/Knowledge Retention and Transfer
Substation Tech	-1	Core Skill Building/Knowledge Retention and Transfer
Sys Admin	-3	Core Skill Building/Knowledge Retention and Transfer
Team Leader (SC&M)	-1	Core Skill Building/Knowledge Retention and Transfer

b. Electric Distribution has made the decision to return some contractor positions to Company employees to address the aging workforce of both contract partners and regular employees. Demographic evaluations showed that the contractor workforce was facing the same demographic shift of Company employees and many contractors and employees would be retiring at the same time causing loss of technical knowledge that takes many years to replace. In returning those core skill sets in house in advance of the retirements, the Company is able to ensure proper preparation for retirements and a workforce skilled to perform core functions of the business.

c. Based on an average salary of $62,000 for new employees that will replace contractors, the estimated salary and benefits per employee is $90,000 compared to an average contractor cost of $107,000, resulting in a net decrease of $17,000 per employee.

Dated January 8, 2015

Question No. 25

Responding Witness: Edwin R. "Ed" Staton

Q-25. Please provide all press releases and documents made available to media and the public regarding potential rate impacts of Cane Run 7.

A-25. See the attachment of the press releases and documents made available to media and the public regarding potential rate impacts of Cane Run 7.

LG&E's investments resulting in cleaner, more reliable energy

Infrastructure improvements primary reason behind request to adjust base rates

November 4, 2014

(LOUISVILLE, Ky.) — Thanks in part to Kentucky's first natural gas combined-cycle generating unit, increased hydroelectric generation capacity, circuit hardening and a hazardous tree removal program, Louisville Gas and Electric Company customers can expect to see continued reductions in emissions, improvements in reliability and a more balanced generation portfolio.

And these improvements at the utility are coming at a price well below the national average. Across the U.S., the residential average cost per kilowatt-hour is 12.43 cents compared to LG&E's average residential cost per kWh of 9.75 cents. While the company anticipates submitting a request Nov. 26 with the Kentucky Public Service Commission to increase revenues by 2.7 percent through an adjustment to base rates, LG&E's prices will remain well below the national averages.

"We continue to work diligently to maintain high-quality and efficient service at some of the lowest rates in the nation. We use prudent financial measures to achieve savings that benefit our customers, and don't go before the Kentucky Public Service Commission with requests to recover our costs unless it's absolutely necessary," said Victor A. Staffieri, chairman, CEO and president of LG&E and KU Energy. "We've been able to continue to hold our expenses down. The investments we are making are primarily to help us meet stricter U.S. Environmental Protection Agency and Federal Energy Regulatory Commission regulations and to ensure we maintain reliable, high-quality service."

Combined, LG&E and KU's continued careful financial approach has paid off. Based on information filed by utilities annually with the Federal Energy Regulatory Commission, LG&E and KU's costs are well below industry averages in all five cost segments — generation, transmission, administrative and general, retail and distribution.

Job creation, economic development efforts recognized nationally

LG&E and KU's low rates have been a significant factor in the commonwealth's ability to attract and expand businesses with good paying jobs. In fact, the utilities were recently ranked in the top 10 in the country by an international economic development magazine, Site Selection, for their job creation efforts. LG&E and KU's Economic Development team was honored for helping Kentucky create more than 80 percent of the state's 12,500 new jobs in 2013. In fact, since 2000, LG&E and KU have helped create nearly 110,000 new jobs in Kentucky.

Growing companies in LG&E's and KU's service territories include Ford, Toyota, Martinrea, Nestle Prepared Foods, Asahi Forge, North American Stainless, Carbide, Total Quality Logistics, CertainTeed, Johnson Controls and a number of major distilleries. In addition, LG&E and KU together have created approximately 3,200 construction jobs as part of their ongoing $6 billion investment in environmental upgrade projects.

System investments improve reliability

Ensuring all customers — residential, commercial and industrial — continue to have reliable service is a priority for the company. While storms and their severity impact reliability, overall electric reliability across the service territory has improved since 2009. Outages are occurring less often and, when they do occur, customers are without power less time. This improvement is due, in large part, to circuit hardening and a proactive hazardous tree removal program.

Likewise, on the high-voltage transmission system, the company is in the midst of several major initiatives that will continue to enhance the safety and reliability of its system as well as the entire region. Those include projects such as a five-phase, line clearance project that spans 70 miles and a new substation and additional lines near Louisville.

From a generation standpoint, the company added Trimble County 2 in 2011, is nearing completion of Kentucky's first natural gas combined-cycle generation unit at Cane Run, is increasing clean generation capacity by about 27 percent at the Ohio Falls hydroelectric plant on the Ohio River and has a request before the KPSC for a 10-megawatt solar facility.

LG&E also is making improvements in its natural gas system to continue to enhance the safety, reliability and capacity of the system. New compressor units have been added at the Magnolia Compressor Station and Center Gas Storage Field to give LG&E the ability to move additional natural gas to its customers. Enhancements for continued system reliability are taking place throughout the natural gas transmission system and at the city gates where LG&E receives natural gas from its natural gas transmission company partners.

Overall, LG&E is requesting an increase of $30 million in revenue, 2.7 percent, for its electric business, and an increase of $14 million in revenue, 4.2 percent, for its natural gas business. For a residential customer using an average of 984 kWh per month the increase is expected to be $2.74 per month if approved. This is an increase of 9 cents per day. For a residential natural gas customer using an average 57 Ccf per month the increase is expected to be $2.60 per month or 9 cents per day.

If approved by the KPSC, the rate adjustments will take effect in July 2015.

Louisville Gas and Electric Company, part of the PPL Corporation (NYSE: PPL) family of companies, is a regulated utility that serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. It has consistently ranked among the best companies for customer service in the United States. More information is available at www.lge-ku.com and www.pplweb.com.

###

KU requests rate adjustment for new generation;
Forced coal unit retirements lead to Kentucky's first natural gas combined-cycle generating unit

November 4, 2014

(LOUISVILLE, Ky.) — Kentucky Utilities Company anticipates submitting a request for a base rate adjustment Nov. 26 with the Kentucky Public Service Commission, in large part, to recover costs associated with Kentucky's first natural gas combined-cycle generating unit as well as other infrastructure projects to continue to improve reliability.

Due to environmental mandates issued by the U.S. Environmental Protection Agency, KU, and its sister company Louisville Gas and Electric Company, announced in 2011 the retirement of 13 percent, 800 megawatts, of their older coal-fired generation. While the company still depends on coal for much of its current generation, the stricter environmental regulations made building new coal-fired generation uneconomical to pursue. After years of studying extensive supply options, KU and LG&E received approval to build a 640-megawatt natural gas combined-cycle unit, which was the least expensive solution. The new unit, which is being constructed at an existing facility, will provide energy with less emissions and help cover the loss of generation from the coal units' retirement.

KU serves approximately 543,000 customers in 77 Kentucky counties and five counties in Virginia. To meet their energy needs, KU will own 78 percent of the new $563 million unit that is scheduled to be commercially operational in May.

"We continue to work diligently to maintain high-quality and efficient service at some of the lowest rates in the nation. We use prudent financial measures to achieve savings that benefit our customers, and don't go before the Kentucky Public Service Commission with requests to recover our costs unless it's absolutely necessary," said Victor A. Staffieri, chairman, CEO and president of LG&E and KU Energy. "Our customers have trusted us for more than 100 years to keep their lights on and they expect us to be there when they need us. The investments we're seeking to recover in this rate case represent our commitment to prudently plan for Kentucky's energy future while continuing to keep rates among the lowest in the nation."

In addition to building Cane Run, KU also is making investments in its transmission and distribution systems to maintain its high reliability into the future. While storms and their severity impact reliability, overall electric reliability across the service territory has improved since 2009. Outages are occurring less often and, when they do occur, customers are without power for less time. This is, in large part, due to circuit hardening and a proactive hazardous tree removal program. KU also is using technological enhancements to improve response times when crews are working in the field and restoring customers' power. Today, most KU field employees receive work orders directly from an outage management system through specialized laptops installed in their trucks.

KU continues to have some of the lowest energy costs in the nation. Currently, the national residential average cost per kilowatt hour is 12.43 cents while KU's cost per kWh is 8.99 cents. If approved, that average cost per kWh would be 10.50 cents. Kentucky Utilities is requesting a $153 million revenue increase, 9.6 percent. For a residential customer using an average of 1,200 kWh, the increase is expected to be approximately $11 per month if approved. This increase is 37 cents per day.

Combined, KU and LG&E continue to work diligently to maintain high-quality and efficient service and to hold costs down. The companies' careful financial approach has paid off. Based on information filed by

utilities annually with the Federal Energy Regulatory Commission, LG&E and KU's costs are well below industry averages in all five cost segments — generation, transmission, administrative and general, retail and distribution.

KU and LG&E's low rates have been a significant factor in the commonwealth's ability to attract and expand businesses with high-quality jobs. In fact, the utilities were recently ranked in the top 10 in the country by an international economic development magazine, Site Selection, for their job creation efforts. LG&E and KU's Economic Development team was honored for helping Kentucky create more than 80 percent of the 12,500 new jobs created in the state in 2013. In fact, since 2000, KU and LG&E have helped create nearly 110,000 new jobs in Kentucky.

Growing companies in KU's and LG&E's service territories include Toyota, Martinrea, Nestle Prepared Foods, Asahi Forge, Total Quality Logistics, Ford, North American Stainless, Carbide, CertainTeed, Johnson Controls and a number of major distilleries. In addition, KU and LG&E have created approximately 3,200 construction jobs as part of its ongoing $6 billion investment environmental upgrade projects.

"We understand the financial impact these increases have on our customers," added Staffieri. "We've worked hard to minimize the consequences of federal environmental mandates. We continue to demonstrate fiscal restraint to ensure our customers continue to receive some of the lowest cost, most reliable energy in the country."

If approved by the KPSC, the rate adjustments will take effect in July 2015.

Kentucky Utilities, part of the PPL Corporation (NYSE: PPL) family of companies, is a regulated utility that serves 543,000 customers in 77 Kentucky counties and five counties in Virginia. It has consistently ranked among the best companies for customer service in the United States. More information is available at www.lge-ku.com and www.pplweb.com.

LG&E, KU Receive Air Permit for New Natural Gas Combined Cycle Unit
Approval from Louisville Metro Air Pollution Control District another step toward construction

9.04.2012

LOUISVILLE, Ky. — Louisville Gas and Electric Company and Kentucky Utilities Company are one step closer to breaking ground for construction on a new 640-megawatt natural gas combined cycle unit with the recent approval of an air construction permit from the Louisville Metro Air Pollution Control District.

The companies announced plans for the new natural gas unit in September 2011. LG&E and KU already have received a certificate of public convenience and need from the Kentucky Public Service Commission, and awarded Bluegrass Power Constructors (a joint venture between PLC Industrial

Construction and Black & Veatch) a contract to design and build the new $583 million unit on existing property at Cane Run.

"We're entering the largest construction phase in our company's history that includes major environmental projects at most of our facilities," said Paul W. Thompson, senior vice president of Energy Services for LG&E and KU. "With these large engineering and construction projects, we're meeting our environmental responsibilities and our commitment to provide customers safe and reliable energy at the least-cost."

Approximately 250 jobs at peak of plant construction

LG&E and KU anticipate receiving a U.S. Army Corps of Engineers water permit in the near future, which will allow construction on the new plant to begin later this year. A new eight-mile natural gas transmission line – built mostly on existing rights-of-way – will also be constructed to deliver fuel to the new unit. The new unit is expected to be in-service by the end of 2015.

At the peak of the construction phase for the new unit, approximately 250 jobs are expected to be created. For all of the major construction projects taking place at LG&E and KU that are necessary for continued compliance with more stringent environmental regulations, as many as 2,000 construction jobs may be needed.

New unit scheduled to be in place by end of 2015

The new unit is intended to replace part of the generating capacity that will be lost through the retirement of coal-fired units at Cane Run, Green River and Tyrone Stations, caused by more stringent Environmental Protection Agency regulations. The coal-fired units – representing more than 13 percent of the utilities' coal-fired fleet – are scheduled to be retired by the end of 2015.

Until the new unit is online and associated transmission projects are completed, the existing coal-fired generation is critical to meeting customers' current energy demands.

Additional emissions reductions expected

The new unit will reduce air emissions even further. Sulfur dioxide and nitrogen oxide will be reduced by more than 98 percent and 80 percent, respectively; particulate matter will be reduced by more than 60 percent.

Anticipated Rate Impact

Based on the changes in energy use from the companies' customers, the majority of the replacement energy from the new unit is for Kentucky Utilities. As such, rates for KU customers are expected to increase by up to four percent. LG&E customers are not expected to see an additional increase as a

result of the new unit. However, a separate rate proceeding is required before any rate impact can take place.

Visit www.lge-ku.com/regulatory for more information on the company's plans for continued environmental compliance.

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com.

###

KPSC Approves New Natural Gas Generation at LG&E and KU
Project Expected to Begin This Year; 250 Construction Jobs Anticipated At Peak

5.3.2012

LOUISVILLE, Ky. — The Kentucky Public Service Commission today approved plans for Louisville Gas and Electric Company and Kentucky Utilities Company to build and buy new natural gas generation to meet the energy needs of their customers.

As a result of stricter federal Environmental Protection Agency regulations, several of the utilities' older, coal-fired units – representing more than 13 percent of the utilities' coal fleet – must be retired by 2016.

Today's ruling is a key milestone in the process. Subject to receipt of other permits, LG&E and KU plan to build the 640-megawatt, natural gas combined-cycle (NGCC), generating unit at the existing Cane Run site in southwestern Louisville.

The ruling also moves the utilities a step closer to the purchase of three additional simple-cycle natural

gas combustion turbines from Bluegrass Generation Company located in LaGrange. The purchase of the Bluegrass units, which will provide up to 495 megawatts of peak generation supply, is still subject to Federal Energy Regulatory Commission approval.

"With this regulatory approval, we can begin focusing on this significant investment in our system. We worked diligently to develop a least-cost solution to meet the federal regulatory mandates and we're pleased that the KPSC has approved the plan," said Lonnie Bellar, vice president of State Regulation and Rates for LG&E and KU.

The NGCC is expected to cost approximately $583 million and the Bluegrass plant is expected to cost approximately $110 million. Recovery of the additional costs is not part of today's ruling, but will be included in future rate proceedings.

Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed. Construction of the NGCC is expected to begin this year and be completed in 2015. At the peak of the construction phase, approximately 250 jobs are expected to be created.

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com.

Certain statements contained in this news release, including statements with respect to future earnings, cash flow and business conditions, are "forward-looking statements" within the meaning of the federal securities laws. Although PPL Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: market demand and prices for energy, capacity and fuel; competition; accounting requirements; operating performance and costs of plants and other facilities; political, regulatory or economic developments and conditions; disposition proceeds; and regulatory approvals. Any such forward-looking statements should be considered in light of such factors and in conjunction with PPL Corporation's, Louisville Gas and Electric Company's and Kentucky Utilities Company's Form 10-K's and other reports on file with the Securities and Exchange Commission.

###

EPA Changes Force LG&E, KU to Retire Three Coal-fired Power Plants, Company to Build Natural Gas-Fired Generation at Cane Run, Purchase Peaking Units

9.15.2011

LOUISVILLE, Ky. — Louisville Gas and Electric Company and Kentucky Utilities Company announced today that they will be forced to retire three older coal-fired electric generating stations to meet new, stricter federal Environmental Protection Agency's regulations.

In a certificate of public convenience and necessity filing with the Kentucky Public Service Commission today, the companies requested approval to build a 640-megawatt, natural gas combined cycle generating unit (NGCC) at the existing Cane Run site in southwestern Louisville. In addition, the companies requested approval to purchase from Bluegrass Generation Company three additional simple-cycle natural gas combustion turbines located in LaGrange that will provide up to 495 megawatts of peak generation supply. Today's filings, and the planned retirements of Cane Run, Tyrone and Green River, are the results of the ongoing EPA regulation analysis and last December's Request for Proposal submittals.

As outlined in the companies' 2011 Integrated Resource Plan, the NGCC is the least-cost method of generation. Consistent with previous disclosures, these two actions for replacement generation are expected to cost up to $800 million, of which approximately $110 million is for the Bluegrass plant. Recovery of the additional costs is not part of today's filing, but will be included in a future base rate case filing. While preliminary evaluations had estimated increases of 5 percent for LG&E and 2 percent for KU, based on the respective ownership allocations, it is now expected that LG&E customers will not experience an increase in rates due to this construction, while KU customers will see about a 4 percent increase.

"While we have had a long history of being an environmental leader in the industry, the ever more stringent environmental regulations have forced us to take a hard look at how we generate electricity, how we will comply with the new federal EPA requirements, and how to best limit the potential cost increase on our customers and the community," said Paul W. Thompson, senior vice president of Energy Services for LG&E and KU. "The bottom-line is that achieving environmental compliance under the EPA's present fragmented framework will have a significant impact on our company, our customers and our Commonwealth."

While fewer employees will ultimately be needed to run the NGCC plant, the company is still determining the full extent of the workforce impact. Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed. As we have done in the past, the companies will look for opportunities to utilize as many existing employees as possible.

Currently, about 97 percent of the electricity in the companies' generation fleet is produced by coal. After the construction of the NGCC and plant retirements, LG&E and KU will remain 90 percent coal-fired. The EPA's new regulations will require many of the companies' existing coal-fired plants to

implement additional technologies, controls and processes no later than 2016 in order to maintain compliance.

The financial impact of these rules will be especially significant in Kentucky, since more than 95 percent of Kentucky's electricity is being generated by coal. The companies estimate that complying with the new federal requirements under the clean air regulations — through upgrades and new construction — could cost approximately $4 billion in capital expenditures by 2019, with over $3 billion of that amount incurred by the end of 2016.

"Given the enormous cost and strict compliance timetable required to retrofit some of our aging generation units with additional technology, we've had to explore a lower-cost option that results in retiring older coal-fired generating units and replacing them with natural gas units," added Thompson.

The companies filed an application with the Louisville Metro Air Pollution Control District for an air permit on June 13 and hope to have approval by spring of 2012. They are requesting that the KPSC rule on the CPCN by April. Once all approvals are received, construction on a NGCC at Cane Run will begin in 2012 and is expected to be complete by 2016, replacing coal generation at that facility with natural gas. The three peaking units are expected to be available for use during next summer's cooling season. This transaction is also subject to various other regulatory approvals, including the Federal Energy Regulatory Commission and the Virginia State Corporation Commission.

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 26

Responding Witness: John N. Voyles, Jr. / David S. Sinclair

Q-26. Please reference supplemental testimony of Don Mosier in Case No. 2014-00252, and in reference to the conversation PJM has been entering with Kentucky PJM members discussing the option of seeking an extension of the deadline for compliance with MATS Kentucky Department of Air Quality. The purpose of the extension is to ensure resource adequacy and promote reliability within PJM.

a. Does KU have any obligations to utilities in surrounding territories, or RTOs and ISOs, to insure reliability within its own service territory? If so, please describe and elaborate.

b. Please describe what, if any, steps KU has taken to pursue off system sales during the 2015/2016 delivery year, in light of the fact the company will be retiring some generating units.

c. Is it more cost effective for KU to remain a non-member of any RTO? If not, please estimate and provide lost revenue associated with KU's lack of member status in an RTO?

A-26.

a. The Companies have an Interconnection Agreement with TVA. Please see attached for this agreement.

b. KU has not taken steps to pursue off-system sales in the twelve months ending June 2016. All off-system sales are made on a non-firm basis. Off-system sales made on a firm basis would require decommitting network resources that serve native load.

c. The Companies' most recent internal analysis regarding joining an RTO was completed in 2012. See attached.

The attachment is being provided in a separate file.

Attachment in Separate File

The attachment is being provided in a separate file.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 27

Responding Witness: Kent W. Blake / Christopher M. Garrett

Q-27. At the end of 2014, the United States Congress passed a "tax extender" bill. Public Law No. 113-295 extended certain expiring tax provisions through the end of 2014, retroactively beginning January 1, 2014.

a. Please explain the impact of Public Law No. 113-295 on KUs revenue, depreciation schedules, and other phases of the KU application.

b. Will this law allow the company to decrease depreciation expense?

A-27.

a. See attachment being provided in Excel Format for the detailed analysis of the estimated impacts of the Tax Increase Prevention Act of 2014. An Appendix has been included in the attachment to provide an overview of the various tabs in the workbook.

The Tax Increase Prevention Act of 2014 provided for the extension of 50% bonus tax depreciation in 2014 for qualified property while also providing for 50% bonus tax depreciation in 2015 for long-production-period property. As KU's rate case had been prepared and filed prior to the passing of this law, the effects of this extension were not considered in the filing.

The Company has calculated the revenue requirement impact of this extension assuming KU were to take bonus depreciation in 2014 and 2015. This calculation is included in the attached file as "TAB 2 –Elect Bonus".

This calculation shows that the revenue requirement would actually increase were KU to take the bonus tax depreciation deduction in both years. This result is driven by the negative impact of losing the ability to take the Internal Revenue Code §199 manufacturing deduction, which more than offsets the positive impact of the lower rate base and capitalization resulting from the increase in the accumulated deferred income tax liability.

KU would be unable to take the Internal Revenue Code §199 tax deduction given its taxable loss in both 2014 and 2015. The loss of the §199

manufacturing deduction results in an increase in KU's tax provision thereby increasing its Net Operating Income Deficiency and Gross-Revenue Conversion Factor. While KU would be able to utilize the majority of the 2014 tax loss as a result of its ability to carryback the loss to 2013, the additional loss in 2015 would have to be carried forward (See Tab: "Taxable Income"). As a result, KU would need to record a deferred tax asset for the 2015 NOL carryforward resulting in an offsetting increase in rate base and capitalization.

The Company then ran a separate calculation assuming that KU elected bonus depreciation in 2014 but declined to do so in 2015 (opt-out). This calculation is shown in "TAB3 – Opt out in 2015". This scenario proves beneficial to customers by lowering the revenue requirement for the following reasons:

- The benefits from the lower rate base and capitalization resulting from the 2014 bonus tax depreciation continue to be realized
- The benefit of the §199 manufacturing deduction in 2015 is preserved, and
- The need to record a deferred tax asset for the 2015 Net Operating Loss is eliminated.

The two calculations above were prepared for the forecast test period without considering incremental revenue awarded in this rate case. In order to determine whether incremental revenue would impact this decision to take bonus depreciation in 2014 but opt out in 2015, the Company re-ran the two calculations assuming the revenue increase requested in the Company's filing is granted as filed. These calculations are included in the attached file as "TAB4 – Elect Bonus with Rev" and "TAB5 – Opt Out 2015 with Rev". These additional scenarios demonstrate that even with the projected rate increases, KU would still incur a taxable loss in 2014 and 2015 when taking the bonus tax depreciation deduction. As such, the analysis continues to support the prior conclusion that the lowest revenue requirement for customers would be achieved if KU elected to take the bonus depreciation deduction in 2014 but elected to opt out in 2015. Also, "TAB1- Summary" shows that customers receive a $3 million detriment of increased revenue requirement if KU elects to take the bonus depreciation deduction in both 2014 and 2015 as compared to a $4 million benefit of reduced revenue requirement if KU elects to take the bonus depreciation deduction in 2014 but elects to opt out in 2015.

b. The law will not allow the Company to decrease its book depreciation expense which is the means by which the Company recovers its capital investments. The law applies to bonus tax depreciation which is a timing difference between book income and taxable income. It allows for an

increase to the amount of tax depreciation deductible on the income tax return with no effect on book depreciation. The impact on the Company's revenue requirement is that its deferred tax liability is increased which lowers rate base and capitalization in the near term and thus lowers the current revenue requirement in this proceeding. See the response above for a discussion of the overall impact on the revenue requirement.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 28

Responding Witness: Edward R. "Ed" Staton

Q-28. If the Commission grants a base rate increase in part based on the Companies intent to hire additional employees, and those employees are not hired or are not employed the entirety of the time for which their salary is recovered, do the Companies commit to refunding rate payers via bill credits at the termination of the forecasted test year? If not, how do the Companies anticipate refunding the rate payers for such inaccuracies in the forecasted test year?

A-28. No, in the hypothetical, the Company would not make any such "refund." At the conclusion of this case, the Company will charge the rates approved by the Commission and it will not deviate from those approved rates in the way of "refunds" for any expenses that are less than projected or "charges" for any expenses that are more than projected. The Company will be obligated to charge its customers in accordance with the tariffed rates approved by the Commission as mandated by the filed rate doctrine and KRS 278.160(2). This practice is consistent with a historic test year case in which a "known and measurable" projection varies from an actual result. To do otherwise would constitute impermissible retroactive ratemaking, and, in the limited hypothetical posed in the question, it would constitute impermissible single-issue ratemaking.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 29

Responding Witness: Robert M. Conroy

Q-29. Please reference Robert Conroy's testimony at page 34, and other than what the Company is allowed, does the Company have any justification for the proposed increase in deposits?

A-29. The purpose of retaining a deposit is to ensure that there is adequate security to protect all other customers from incurring higher costs in the event that a customer defaults on payment. As shown in Exhibit RMC-6 to Mr. Conroy's testimony, the current deposit amount of $135 is only 54% of the 2/12th amount necessary to ensure an adequate security amount in the event of default in payment. After the polar vortex in early 2014, the Company saw a significant increase in bad debt. With the monthly bills being much higher than the average, the current level of deposit amount was not adequate to cover the bad debt expense. In order to gradually move the deposit level towards the appropriate level of 2/12th to ensure an adequate level of security in the event of default in payment, the Company chose the proposed levels of deposit as indicated in Exhibit RMC-6.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 30

Responding Witness: David S. Sinclair

Q-30. Please reference David Sinclair's testimony at page 6, and explain why the average weather of the last 20 years continues to be a reliable indicator of future weather, when many predictions state that weather will continue to become less predictable?

A-30. The Company believes that historical weather continues to be the best set of data available to forecast future weather. The Company is not aware of studies showing future weather to be less "predictable," but is aware that some forecasters predict that future weather will be more "volatile."

The table below shows the average and standard deviation (Stdev) of temperature, cooling degree days (CDD) and heating degree days (HDD) for the most recent 10, 20, and 30 years in Lexington (Bluegrass Field). The temperature and standard deviations are not materially different between the three periods. Furthermore, the volatility is actually higher in the 20-year period than in the shorter 10-year period. The Company produces energy forecasts based on mean (expected) weather. Volatility in weather is considered for planning purposes, including analyses of reserve margins, resource needs, and maintenance schedules.

	Temp (°F)	Stdev Temp (°F)	Avg CDD	Stdev CDD	Avg HDD	Stdev HDD
10-year Average	56	1.0	1,314	197	4,527	312
20-year Average	56	1.2	1,217	218	4,576	330
30-year Average	56	1.2	1,206	203	4,581	329

*30-year period: 1984-2014, 20-year period: 1994-2014, 10-year period: 2004-2014

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 31

Responding Witness: David S. Sinclair

Q-31. According to an article[7] in the Scranton Times-Tribune, PPL Electric Utilities, an affiliate of KU and LG&E, plans to construct a multi-billion dollar transmission line stretching from western Pennsylvania into several states, the stated purpose of which is to bring lower-cost power into heavily-populated east coast cities. Have KU and LG&E explored opportunities for additional off-system sales to any affiliates of the PPL corporate group? Please explain.

A-31. No, the Companies have not explored off-system sales opportunities with PPL affiliates and would not anticipate any advantage from doing so compared to selling to other market entities. The Companies only sell off-system on a non-firm basis as the economic opportunity arises for the existing system to generate excess energy beyond the Companies' native load. The Companies do not speculate on future off-system sales by investing in generation or transmission assets for making off-system sales.

Under FERC regulations, any potential sales to PPL affiliates must be made at the higher of market price or cost. Because any prospective buyer, including PPL affiliates, would only be incentivized to buy power at market price, there would be no potential advantage for the Companies to sell power to PPL affiliates versus other market participants.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 32

Responding Witness: David S. Sinclair

Q-32. Please reference Paul Thompson's testimony at pages 24-27, wherein Mr. Thompson discusses, *inter alia*, that the dispatch of the Companies' coal-fired generation is now going almost exclusively to native load customers. Does Mr. Thompson believe that as more coal-fired generation is retired around our region, that off-system sales prices will increase?

a. Why, or why not?

b. If off-system sales prices rebound, will the companies be able to modify dispatch patterns so that more lower-cost coal-fired generation is available for off-system sales at competitive prices the market would find more attractive than it would generation from non-coal-fired sources?

A-32. The future retirement of coal units will cause future hourly spot electricity prices to be higher than they otherwise would have been had the coal units not retired. The market prices in the Companies' 2015 Business Plan are based on forward prices as of June 23, 2014. By definition, these market prices reflect all available information including expectations for future coal unit retirements.

a. See above.

b. The Companies will continue to dispatch their generation portfolio to minimize costs to their native load customers. As opportunities exist, the Companies will sell excess generation in the off-system market when market prices exceed the cost of production. This process ensures that the lowest cost generation is used to serve our native load customers.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 33

Responding Witness: John N. Voyles, Jr. / Valerie L. Scott

Q-33. Please reference Paul Thompson's testimony at page 26, and explain why LG&E and KU terminated the purchase power agreement with Electric Energy, Inc. Explain the accounting treatments LG&E and KU make for their 20% ownership interest in Electric Energy, Inc.

A-33. In 2005, the Electric Energy, Inc. (EEI) Board (Ameren Energy was the 80% majority owner of EEI at the time) voted to authorize EEI to sell its power at a market-based price beginning in 2006. The cost-based power purchase agreements with the EEI sponsors expired by their terms on December 31, 2005. KU was and is a minority shareholder in EEI. Although KU as counterparty to the cost-based purchase power agreement urged EEI to renew the cost-based agreements, the EEI board decided in favor of moving to market-based rates.

KU owns 20% of the common stock of EEI, which is accounted for as an equity method investment. In accordance with the accounting guidance for equity method investments, the recoverability of the investment is periodically assessed. If an identified event or change in circumstances requires an impairment evaluation, the fair value of the investment is assessed. The difference between the carrying amount of the investment and its estimated fair value, if lower, is recognized as an impairment loss when the loss in value is deemed other-than-temporary. KU impaired the entire value of the investment at December 31, 2012. The impairment was charged to FERC Account No. 426.5, Other Deductions. This account is excluded from net operating income.

KU continues to record its proportionate share of EEI's adjustments to FERC Acct. No. 219, Accumulated Other Comprehensive Income, as a result of unrealized gains and losses associated with EEI's pension and other post-retirement benefits. While the adjustment, totaling $516,349 in 2014, would typically be credited to the investment account, KU records the amount directly to FERC Acct. No. 421, Other Income, since the investment is fully impaired. This account is also excluded from net operating income.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 34

Responding Witness: John N. Voyles, Jr.

Q-34. As indicated in Case Nos. 2011-00099 and 2011-00100[8], both KU and LG&E are part-owners of Ohio Valley Electric Corporation ("OVEC"), and both companies purchase a portion of the power generated at OVEC's two generating plants. The Final Order ("Order") in those cases, at page 3 indicates OVEC did not anticipate Coal Combustion Residuals ("CCRs") to be regulated as a hazardous waste. On December 19, 2014 EPA announced its intentions to regulate CCRs as a non-hazardous waste.

a. Does OVEC anticipate additional costs to meet compliance with the CCR regulation?

b. If OVEC does in fact incur such additional costs, will LG&E and KU have to pay a portion of those costs, and if so, will those costs be passed on to LG&E and KU ratepayers? Please discuss in detail.

c. On p. 2 of the Order, the Commission noted that, "OVEC has recommended extending the [Inter-Company Power Agreement] to take advantage of reduced financing costs and to amortize its debt over a longer time period. The resulting savings would be passed on to the OVEC owners through a reduction in energy costs of approximately $1 per MWh from the extension's effective date through the currently scheduled 2026 termination date." Can the companies confirm that as a result of OVEC's refinancing, they have realized these savings? If so, were any of those savings passed onto LG&E and KU ratepayers? If not, why not?

d. At page 3 of the Order, the Commission noted that the OVEC generating stations will, by 2013, have been outfitted with SCRs and FGDs. Do the companies know whether the OVEC units comply with all of the latest EPA regulations, and pending draft regulations? If the plants are not, or will not be in compliance, please discuss what additional work would have to be

[8] *Verified Application of Louisville Gas and Electric Company for an Order Pursuant to KRS 278.300 and for Approval of Long-Term Purchase Contract*, and *Verified Application of Kentucky Utilities Co. for an Order Pursuant to KRS 278.300 and for Approval of Long-Term Purchase Contract*, respectively; Final Order dated Aug. 11, 2011.

done on the stations in order to achieve full compliance, and whether LG&E and KU would pass along any such costs for which the two companies would become responsible to their retail ratepayers.

e. OVEC's majority owner, American Electric Power Co., Inc. ("AEP") has stated in multiple publicly published reports[9] that it intends to seek regulatory approval from the Public Utilities Commission of Ohio to pass along additional costs of operating its Ohio-based coal plants, including OVEC's Kyger Creek Plant at Cheshire, Ohio, to Ohio ratepayers in the form of a Power Purchase Agreement Rider. Are there any circumstances in which AEP could pass along any such additional costs of operating the OVEC plants to OVEC's other owners, including LG&E and KU? If so, please explain.

A-34.

a. The final CCR rule has not been officially published in the federal register and OVEC continues to review the prepublication version of the regulations. Based on their current review, OVEC expects that the capital previously included in their long range plans will be adequate to meet the anticipated compliance obligations under the CCR rule.

b. Yes. The terms of the Inter-Company Power Agreement (ICPA) require that the OVEC Available Power costs be comprised of a Demand Charge (all OVEC capital and expense costs other than fuel or fuel related) and the Energy Charge (OVEC fuel and fuel related costs). The OVEC Demand Charge costs are allocated to the Sponsoring Companies based upon their "power participation ratio" in the ICPA. OVEC capital investment costs, which are part of the OVEC Demand Charge, would normally be financed and recovered from the Sponsoring Companies over the useful life of the capital project, limited by the scheduled termination date of the ICPA on June 30, 2040. Accordingly, KU would pay its participation ratio of 2.5% of such capital costs that would be passed on to KU ratepayers.

c. Yes, by the end of the extended term of the ICPA, OVEC will realize the expected savings. Accordingly, the savings would be reflected in the cost of OVEC power that would be passed onto KU ratepayers.

d. OVEC expects to optimize performance of its SCRs and JBR scrubbers (FGDs) with no additional capital investment needed to meet OVEC's compliance obligations under the MATS rule or the CSAPR rule. Additionally, OVEC believes that additional projects will be required for cooling water intake structure improvements for 316(b) compliance at both plants; for dry ash conversion at the Kyger Creek plant (which includes fly

[9] See, e.g., http://www.powermag.com/aep-seeks-guarantees-to-ensure-economic-viability-of-ohio-fleet/

ash impoundment closure and new waste treatment pond construction); and, for bioreactors at both plants in the event OVEC is required to meet selenium limits proposed under the draft steam electric Effluent Limitation Guidelines. No dry ash conversion is forecasted for the Clifty Creek plant because their system was converted to a dry ash system in the 1990's. Accordingly, based on the ICPA, KU would pay its participation ratio of 2.5% of such future capital costs that would be passed on to KU ratepayers.

e. No, the other Sponsoring Companies do not have the ability to allocate additional costs back to the OVEC Available Power Costs. Accordingly, KU would only pay its participation ratio of 2.5% of such OVEC Available Power costs that would be passed on to KU ratepayers.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 35

Responding Witness: David S. Sinclair

Q-35. Reference the "Annual Generation & Off-System Sales Forecast Process," Application Tab 16, Item F, pages 7, 11 of 13, § 3.1.2.2 "Natural Gas Prices," in which it is stated that the Company's natural gas price forecast was based upon monthly Henry Hub forward market prices from NYMEX as of June 23, 2014. With the growth of shale gas, some industry analysts are indicating that it no longer makes sense to price gas at only one hub.[10] Did the Company's forecast include prices at the Dominion South Hub, located within the Marcellus Shale, the source of 20% of the nation's gas supply?

a. If so, please provide copies of all relevant documents.

b. If not, why not?

A-35. No.

a. Not applicable.

b. The Companies' natural gas price forecast uses Henry Hub forward prices with an appropriate delivery basis to forecast the expected price at their generation facilities because Henry Hub currently offers the most visibility of forward natural gas prices. If the Companies used a different pricing hub, the delivery basis would change to arrive at a similar delivered price. The Companies will continue to monitor developments in this area and may adjust the forecast process if warranted. Operationally, the Companies will continue to buy gas delivered on the available pipelines at the lowest price, regardless of the origin of the actual gas.

[10] http://www.reuters.com/article/2014/09/25/us-natgas-henryhub-marcellus-analysis-dUSKCN0HK17E20140925

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 36

Responding Witness: Paul W. Thompson

Q-36. Reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 4 of 71, wherein it is stated that the modeled EFOR for Trimble County Unit 2 ("TC2") has increased from 5.6% to 6%, whereas no other generating unit is expected to have an increased EFOR. Please explain the reasons for this increase.

A-36. The EFOR target for TC2 in the 2015 Business Plan was increased based upon recent performance and recognizes the design complexities of the supercritical boiler versus the remainder of the fleet being sub-critical boilers with long historical experience.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 37

Responding Witness: Paul W. Thompson

Q-37. Please reference Paul Thompson's testimony, page 21, wherein he discusses TC2's performance.

a. Provide all written reports, analysis and evaluations regarding the failure of the TC2 original burner design.

b. Why did the burners on TC2 have to undergo the "interim change?"

c. Were the burners flawed either through a design or manufacturing defect?

d. Were the burners covered under any warranty, and if so, did the manufacturer or installers agree to pay for all or any portion of the costs involved with the ultimate replacement of the burners? If not, why not?

e. Did or does KU and LG&E have any type or sort of insurance policy or other risk-shifting mechanism protecting against lost sales revenues or margins due to defective equipment at TC2? If so, please describe and state whether such policy / mechanism is applicable to outages at TC2 due to replacement of burners.

f. Describe the problems with TC2's turbine oil system. Have they been remedied?

g. Was the turbine oil system covered under any warranty, and if so, did the manufacturer or installers agree to pay for all or any portion of the costs involved with the ultimate replacement of the burners? If not, why not?

A-37. Please note that Mr. Thompson's testimony states at page 22 concerning the issues addressed in this request and the measures the Companies took to resolve them:

> TC2 has performed well since these outages. In October of 2014, the new burners and combustion system successfully completed testing on a variety of coals as specified in the

> original design criteria. The combustion system performance issues now appear to have been resolved, and the new burners are operating under a new warranty period. We continue to believe TC2 will provide good value to our customers in the future.

The Companies therefore have assumed in their financial forecasting and budgeting in this proceeding that the unit will be available to supply the Companies' customers with low-cost energy without interruption (excepting regularly scheduled maintenance outages and assumed forced outage rates), and the Companies' fuel costs, other consumables costs, capital costs, and operation and maintenance costs reflect this assumption. Also, the Companies' capital and rate base in this proceeding do not contain amounts related to the repairs and adjustments necessary to address the TC2 issues Mr. Thompson addressed in the cited portion of his testimony; the capital costs of those repairs and adjustments were covered under warranty.

Please see also the Company's response to KIUC 1-30.

a. There was essentially no incremental capital cost associated with the resolution of the combustion system design deficiencies as the resolution was fully covered under the warranty provisions of the EPC agreement with Bechtel. The voluminous amount of coal test reports, engineering study reports, field investigation reports, design and construction drawings, laboratory R&D reports, trip reports and all other technical documentation and manuals to resolve the deficiencies in the combustion system designed and supplied by Doosan are not included. These reports include proprietary information on Doosan's design, research and development of the completely new burner design, their fabrication techniques and suppliers (and costs), and their capabilities in their R&D facility in Renfrow, Scotland. They can be made available for review if requested.

b. The burner manufacturer, Doosan, sought to modify the design of the original burners instead of supplying a complete new burner system that they did not yet have designed and tested. The EPC contract with Bechtel allowed them the opportunity to repair failed equipment or to modify a piece of failed equipment rather than forcing the design of a new piece of equipment not in the manufacturers supply base.

c. The design of the burners was the source of the performance issues.

d. The new burners and associated changes to the Unit, as well as the modifications to the original burners were all covered under the warranty provisions of the EPC agreement with Bechtel.

e. No

f. The turbine oil system was flushed and cleaned through the startup and commissioning activities of the Unit; however, after operating the unit for some time weld debris apparently dislodged from within the turbine oil piping system. Yes, the issues have been corrected. Internal investigation found other areas of weld debris that could become dislodged. Bechtel completed the rework of the turbine oil piping system under the warranty provisions of the EPC agreement.

g. As stated above in f, the rework was fully covered under the warranty provisions of the EPC agreement with Bechtel.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 38

Responding Witness: Paul W. Thompson / John J. Spanos

Q-38. Please reference Paul Thompson's testimony at page 27, wherein he states that demolition of the Paddy's Run units is included within the Generation Capital Investment Summary. Reference also page 22 of the same testimony, wherein Mr. Thompson references demolition of the Canal Generating station.

a. Are not the costs of retirement and demolition of utility plant included within depreciation costs which have already been recovered from ratepayers? If so, are the companies proposing additional spending to accomplish the demolition? Please explain.

b. Do the companies plan to retire the Cane Run coal-fired units' plant and equipment "in place," or to demolish them?

c. Does KU plan to retire the Pineville and Tyrone generating stations' plant and equipment "in place," or to demolish them?

A-38. a. The demolition costs for Paddy's Run and Canal Generating stations, which are LG&E assets, have not been recovered from ratepayers through depreciation. The terminal net salvage component (demolition) was not included in depreciation rates until the 2012 rate case was settled. Therefore, because the Companies have not yet recovered these costs, the Companies are requesting recovery in this case.

b. The Cane Run coal-fired units are not KU assets. For LG&E, current plans are to retire Cane Run coal-fired units' plant and equipment in place. There will be some retirement costs incurred but they are for the purpose of keeping the plant dry and protect it from entering a deteriorating state. Also, there are plans to demolish some of the external tanks, structures and out buildings. A decision for the full dismantling of the Cane Run Coal unit structures and building has not been determined as of this time.

c. The Pineville and Tyrone plants are already retired. The 2015 Business Plan assumes that they will be demolished starting at a time outside of the five-year business plan.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 39

Responding Witness: Paul W. Thompson

Q-39. Please reference Paul Thompson's testimony at page 29, line 13, wherein he references the $21,804 per mile total expenditure for the companies' transmission system. Does this figure include any and all costs the companies incurred in complying with the FERC audit, attached at application Tab 39, pp. 1-71?

A-39. This figure does not include any costs incurred in complying with the FERC audit, attached in Application Tab 39, pp. 1-71. These costs were determined using the 2009-2013 FERC Form 1 Capital and Operating expense benchmarking data.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 40

Responding Witness: Paul W. Thompson

Q-40. Please reference Paul Thompson's testimony at page 47, for each of the 42 new positions (in gas distribution operations) which LG&E intends to create, describe the reason for creating the position. For example, if a position is being created for regulatory compliance purposes, state the changed circumstance or regulatory requirement which required creating the new position at the present time, whereas it was not required until now.

a. For each position which is driven by " . . . the need to retain core skills and knowledge . . . ," as stated on p. 48, lines 2-3, state whether that position is to be filled with a worker who is slated to replace another worker who plans to retire, and site the name of the position of each such employee expected to retire.

b. Provide specific citations to the "increased regulatory requirements" which Mr. Thompson states on p. 48, lines 5-6 justify the additional headcount.

A-40. KU does not have Gas Distribution Operations. Please refer to Case 2014-00372, PSC Question No. 39 for LG&E.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 41

Responding Witness: Lonnie E. Bellar

Q-41. Please reference Paul Thompson's testimony at page 49, lines 9-17, as a result of LG&E's ". . . gas storage upgrades . . . and drilling gas storage wells" (lines 15-16), has the company's gas storage capacity increased over the past several years? If so, by how much?

a. If the Company's gas storage has increased, does it anticipate that it will be able to purchase more gas during the off-heating season? If not, why not?

A-41. KU does not have gas operations. KU assumes the request is intended for LG&E. See the response to LGE AG 1-40 in Case No. 2014-00372.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 42

Responding Witness: Robert M. Conroy

Q-42. Please confirm that both LG&E and KU plan to file new Environmental Cost Recovery cases in October, 2015.

a. If so, please provide estimates of the total sums which both Companies will seek permission to recover in their respective filings.

A-42. As part of the business planning process in September 2014, LG&E and KU assumed the next Environmental Cost Recovery Plans would be filed in October 2015 for business planning purposes only. However, the Companies have not finalized those plans and continue to evaluate the needs of the business as well as the timing of any future filings.

a. The Companies have not determined the specific projects that may be included in the next ECR plan filing.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 43

Responding Witness: Robert M. Conroy

Q-43. For each year of the fully-forecasted test period, provide estimates for the following regarding the average level of consumption for residential class ratepayers;

a. Base rate increase year-over-year, both in dollars and percentage;

b. Environmental surcharge increase year-over-year, both in dollars and percentage;

c. Fuel adjustment charge increase year-over-year, both in dollars and percentage.

A-43. See attached.

a. Base rate increase

Base Period energy sales		6,161,482,054	Forecast Period energy sales		6,197,488,349
Base Period customers		5,117,243	Forecast Period customers		5,164,249
Base Period revenue	$	531,961,556	Forecast Period revenue after increase	$	592,288,595
Average cost per kWh	$	0.08634	Average cost per kWh	$	0.09557
Average consumption		1,204	Average consumption		1,200
Average base energy cost	$	103.95	Average base energy cost	$	114.68
			Percent change		10.326%

b. ECR increase

Base period ECR revenue	$	17,395,592	Forecast period ECR revenue	$	33,907,729
Average cost per kWh	$	0.00282	Average cost per kWh	$	0.00547
Average consumption		1,204	Average consumption		1,200
Average ECR cost	$	3.40	Average ECR cost	$	6.57
			Percent change		93.145%

c. FAC increase

Base period FAC revenue	$	12,715,268	Forecast period FAC revenue	$	15,609,887
Average cost per kWh	$	0.00206	Average cost per kWh	$	0.00252
Average consumption		1,204	Average consumption		1,200
Average FAC cost	$	2.48	Average FAC cost	$	3.02
			Percent change		21.646%

Notes: Base period includes LEV; forecast period includes RTOD-E
Base period energy sales,customers, and revenue per Schedule M-1.3, page 2 of 18
Base period ECR and FAC revenues per Schedule M-1.3, page 1 of 18
Forecast period energy sales,customers, and revenue per Schedule M-2.3, pages 3 and 4 of 21
Forecast period ECR and FAC revenues per Schedule M-2.3, page 1 of 21

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 44

Responding Witness: Paul W. Thompson / D. Ralph Bowling

Q-44. Please reference Paul Thompson's testimony, page 64, wherein he states KU made an adjustment to FERC Account 506 (Miscellaneous Steam Power Expenses) because of the "increased volume of commodities" TC2 is expected to use during the forecasted test period.

a. Explain why additional ammonia, activated carbon and hydrated lime will be necessary at TC2, and provide price estimates.

b. Explain why the consumption rate of hydrated lime at TC2 is increasing from 3,000 lbs./hour during the base period to 8,000 lbs./hour, presumably in the forecasted test period, which is an increase of 166.67%.

c. Will costs for increased commodities consumption at TC2 be recovered in the environmental surcharge or in base rates?

d. When did increased usage for these commodities begin?

e. Is the increased usage in any manner related to or associated with the need to replace TC2's burners? If so, are any of those costs covered by any warranties?

f. Explain why the original operating specifications did not foresee this need for additional commodities.

A-44.

a. The base year (March 2014 – February 2015) includes eight months of 2014 actual consumption, which included a period when TC2 was off-line for a greater than the forecasted period of time. Therefore, the actual consumption is lower than the forecast for the test year, which assumes TC2 will be running as it was planned. The increased volume of commodities is driven by this assumption and not the issue associated with TC's burners.

	Price estimates		
	2014	2015	2016
Ammonia	$653/ton	$572/ton	$603/ton
Activated Carbon	$0.71/lb	$0.67/lb	$0.70/lb
Hydrated Lime	$142.50/ton	$171/ton	$178/ton

b. The amount of hydrated lime required for TC2 has increased due to an increase in SO_3 levels since the commissioning of TC2. Therefore, an upgraded hydrated lime system is currently being commissioned that will have an increased capability of lime feed rate from 3,000 lb/hr (limit with current system) up to 8,000 lb/hr if needed for compliance. A taller third layer of catalyst was installed in the SCR in 2012, which increased the amount of SO_3 formed. The increase in SO_3 is reduced by injecting hydrated lime for the following reasons: 1) to eliminate ammonia bisulfate (ABS) formation, which plugs the air heater and lowers unit availability; 2) to eliminate H_2SO_4 in the duct, which corrodes equipment; and 3) to reduce the SO_3 entering the wet electrostatic precipitator (WESP) to its original design criteria so it can perform as designed.

c. The cost will be recovered through base rates.

d. As stated in (a) above, the increased commodity usage was forecasted to increase based on a full year of TC2 operation versus the eight month period which occurred during the base year.

e. No. See the answer to parts a. and d. above. None of the increased commodity costs are covered by the warranty.

f. The unit is operating per the original specifications. See answers to parts a. and d. above.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 45

Responding Witness: David S. Sinclair

Q-45. Reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 28 of 71 wherein it is stated that Trimble coal generation is forecasted to decrease in 2015 primarily due to higher variable O&M costs.

a. Does this statement refer to both Trimble Unit 1 and Unit 2, or just one unit?

b. What kind of variable O & M cost is believed to be responsible for the decrease in coal generation?

A-45.

a. This statement refers to both Trimble County coal units.

b. The decrease in coal generation at the Trimble County Station is primarily the result of higher variable O&M costs associated with consumables for controlling SO_3 emissions.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 46

Responding Witness: David S. Sinclair

Q-46. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 15 of 71 wherein the assumptions are given for market volume limits.

a. Why are off-peak sales assumed to be limited to far less sales during peak periods?

b. Are there any limits to purchases during off-peak or weekend purchases?

c. Why are there any purchase or sales limits?

d. Please describe what is meant by peak, off-peak and weekend periods?

e. Why is the limit on peak periods the same as weekend periods?

A-46.

a. To better reflect market depth and real-time market constraints (such as transmission availability) in the production cost model, the Companies evaluated historical hourly transactions over the past 3 years and derived limits to off-system sales and purchase volumes based on this analysis. For each trading period (peak, off-peak, and weekend), the off-system sales and purchase volume limit is the 95^{th} percentile of the historical distribution. Based on this analysis, the off-peak sales limit is lower than the peak and weekend sales limit.

b. Yes. The 200 MW/hr purchase limit applies to all trading periods (peak, off-peak, and weekend).

c. See response to part a.

d. For purposes of the Companies' production cost model, the peak trading period is defined as Monday through Friday, from 7:00 am to 11:00 pm EST; the off-peak trading period is defined as Sunday through Saturday,

from 11:00 pm to 7:00 am EST; and the weekend trading period is defined as Saturday through Sunday, from 7:00 am to 11:00 pm EST.

e. The limit for peak periods is the same as weekend periods because the historical analysis described in the response to part a. yielded similar results.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 47

Responding Witness: David S. Sinclair

Q-47. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 17 of 71 wherein the assumptions are given for Cane Run 7 LTSA costs.

a. Is this correctly stated?

b. Don't LTSA costs change based on CT hours or starts?

c. Shouldn't LTSA costs be different depending on whether CT maintenance is hour or start driven?

A-47.

a. Yes. These costs reflect the combined cost of both combustion turbines that are part of Cane Run Unit 7. Each quarter, the cost of the Cane Run Unit 7 LTSA is determined based on the number of operating hours and starts for each CT. The quarterly LTSA cost is the greater of (a) the product of the hourly cost and number of operating hours, or (b) the product of the start cost and number of starts.

b. See response to part a.

c. See response to part a

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 48

Responding Witness: David S. Sinclair

Q-48. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 29 of 71 wherein the assumptions are given for increased Ghent generation. Why does increased SCR operation result in increased Ghent generation?

A-48. Compared to the 2014 Business Plan, the assumed minimum generating level at which the Ghent SCRs can operate is higher in the 2015 Business Plan. This increase resulted from modifications that were made in 2014 to the economizer on Ghent SCR-equipped units to control the emissions of sulfuric acid mist. 'Increased SCR operation' refers to the increase in these minimum generation levels. The overall increase in Ghent generation is partly the result of these increased minimum generation levels.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 49

Responding Witness: David S. Sinclair

Q-49. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 31 of 71 wherein the assumption is given for changes in Cane Run 7 generation from the 2014 plan.

a. Why are outage weeks added for Cane Run 7 in the 2015 plan?

b. Why would the Green River 3-4 extension affect Cane Run 7 generation in 2017 through 2019?

A-49.

a. The Cane Run Unit 7 outage assumptions in the 2014 Business Plan were based on the data available at the time, and have since been refined based on new information. The outage assumptions in the 2015 Business Plan more accurately reflect the maintenance intervals specified in the Cane Run 7 long-term service agreement.

b. The Green River Units 3 and 4 extension does not affect Cane Run Unit 7 generation in 2017 through 2019. It is referenced in the slide header because it contributes to the drop in generation in 2015 and 2016.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 50

Responding Witness: David S. Sinclair

Q-50. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 40 of 71. Please explain why landfill costs are rising under FGD. Were landfill costs not included in the 2014 plan?

A-50. Landfill costs were not included as a variable O&M expense in the 2014 Business Plan. The cost increases on page 40 of item G are primarily the result of including landfill costs as a component of variable FGD O&M in the 2015 Business Plan.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 51

Responding Witness: David S. Sinclair

Q-51. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 42 of 71. Please explain the decrease in Mill Creek and Ghent SO3 O&M costs.

A-51. At both facilities, the installation of new equipment yielded higher efficiencies in SO_3 removal, which resulted in a reduced need for consumables used in controlling SO_3 emissions.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 52

Responding Witness: David S. Sinclair

Q-52. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page 43 of 71. Please explain the cost decreases for mercury control O&M costs.

A-52. Most of the costs associated with mercury controls are based on reagent cost projections for baghouse equipment that has not yet gone into service, or that has been in service for a limited time. The plan-over-plan decreases in these costs are driven by decreases in the assumed cost of reagents for controlling mercury emissions as well as decreases in the assumed volume of reagents that will be required.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 53

Responding Witness: David S. Sinclair

Q-53. Please reference the "2015 Business Plan Generation & OSS Forecast," Application tab 16, item G, page. 59 of 71, explain the significant increase in O & M for Ghent 2 in both 2015 and 2016, and on p. 60 of 71, explain the significant increase in O & M for Ghent 4 in 2016 and Ghent Units 2 and 3 in 2017.

A-53. On the referenced pages, note that yellow signifies outage weeks added to the 2014 Business Plan, and that red signifies outage weeks removed from the 2014 Business Plan.

The 5-week increase to 2015 maintenance for Ghent Unit 2 is needed to support installation of a baghouse. The resultant 9-week outage will overlap with routine maintenance to minimize total downtime. In 2016, the change to Ghent Unit 2 is simply a shift of maintenance from the spring to the fall. Also in 2016, the Ghent Unit 4 outage was shifted earlier in the spring, and increased from a 3-week outage to a 4-week outage. In 2017, the changes to Ghent Units 2 and 3 are simply a shift of maintenance from the spring to the fall.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 54

Responding Witness: David S. Sinclair / Counsel

Q-54. Please reference application Tab 16, item I, page 47of 272, wherein KU and LG&E state their concerns that industrial customers may seek limited wheeling. Please explain the Companies' concerns, and the potential impact to ratepayers if wheeling is allowed.

a. If the company is concerned that stranded costs may occur if wheeling is allowed, how would the company address this?

A-54. The request for information refers to KU and LG&E's ("the Companies") 2015 Business Plan presentation. References to "limited wheeling" appear on pages 67- 68. This presentation identifies the authorization of limited retail wheeling as an event that would alter the assumptions underlying the Companies' Business Plan and possibly require revisions to that plan.

Under existing Kentucky law, absent the consent of its retail electric supplier or its retail electric supplier's failure to render adequate service, no customer has the legal right to select the source for the generation of its power. *See* KRS 278.016-.018. The right to select the source of the power is vested with the retail electric supplier. *See, e.g., Application of Kenergy Corp. and Big Rivers Electric Corporation For Approval of Contracts and a Declaratory Order*, Case No. 2013-00221 (Ky. PSC Aug. 14, 2013). The Companies have invested in and own distribution, transmission and generation facilities to furnish electric service to their native load customers and to satisfy their duty to "furnish adequate, efficient and reasonable service" under KRS 278.030(2). On occasion they have also purchased wholesale power or entered into purchase power contracts to augment these facilities to fulfill their duty to serve electric consuming facilities within their service territory. These actions are consistent with the Companies' responsibilities as retail electric suppliers. *Id.* at 16-17 (stating that a retail electric supplier has responsibility for securing power for its customers).

Notwithstanding the existing state of Kentucky law, prudent and reasonable planning requires the Companies to recognize the existence of efforts to promote retail wheeling in Kentucky. In 1998 the Kentucky General Assembly

established a special task force to examine the impact of restructuring Kentucky's electric industry. H.R. 95, 1998 Reg. Sess. (Ky. 1998). While this task force concluded that no compelling reason existed to restructure the electric utility industry at that time, it recommended that the General Assembly continue to study the issue. Legislative Research Commission, Research Report No. 299, *Restructuring Kentucky's Electric Utility Industry: An Assessment of and Recommendation for Future Action in Kentucky* (Sep. 2000) at 33. In the last two years, legislation promoting retail wheeling has been introduced in the Kentucky General Assembly. *See, e.g.*, House Bill 211, 2013 Reg. Sess. (Ky. 2013). Moreover, 15 states in the United States currently permit some form of retail wheeling. *See* Energy Information Administration, Electric Restructuring By State, available at http://www.eia.gov/electricity/policies/restructuring/restructure_elect.html (last visited Jan. 12, 2015).

The Companies have not performed any extensive study to examine in detail the potential effects upon their operations or rates if retail wheeling is permitted. As the actual effects of retail wheeling are heavily dependent upon the regulatory and statutory scheme enacted to replace the present legal and regulatory scheme, any estimate of the potential effects of retail wheeling would be very imprecise at this time. While the Companies' rates remain very competitive with other electric utilities in the region and the nation, the possibility exists that some users may seek to purchase power from other electric power suppliers. Should a reduction in retail sales occur, it is likely to adversely affect retail rates. A reduction in retail sales represents a reduction in revenues. This reduction in revenues may require an increase in the rates of all customer classes to produce additional revenues sufficient to offset lost sales.

a. The Companies take the position that, if a retail customer is permitted to purchase power from other energy providers, remaining native load customers should be required to pay the prudently incurred costs of investments. To the extent permitted by law, stranded costs should be allocated to and borne by those whose actions caused the stranded investment. Whether such allocation may be made and the means for such allocation would be dependent upon the statutory scheme that General Assembly mandates and the manner of its implementation by the KPSC. If retail wheeling is permitted, the Companies would aggressively advocate that costs be allocated based upon cost-causation principles, but they lack sufficient information at this time to provide potential mechanisms that would advance that goal.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 55

Responding Witness: Robert M. Conroy

Q-55. Please reference application Tab 16, item I, pages 47-48 of 272, wherein KU and LG&E state their concerns regarding potential "increased efforts to maintain or increase subsidies for solar customers." Have KU and LG&E considered any policy that might or could limit the maximum number of customers who net meter power from customer-owned solar or other forms of distributed generation? Please explain.

A-55. No. KRS 278.465 *et seq.* and the Commission's orders in Administrative Case No. 2008-00169 prescribe in detail how utilities must offer net metering service to customers.[11] Neither the statutes nor the Commission's orders prescribe or permit a limit on the number of customers who may take net metering service, and the Company does not believe such a limit is necessary or desirable.

[11] *In the Matter of: Development of Guidelines for Interconnection and Net Metering for Certain Generators with Capacity up to Thirty Kilowatts*, Administrative Case No. 2008-00169, Order (Aug. 17, 2009); Administrative Case No. 2008-00169, Order (Jan. 8, 2009).

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 56

Responding Witness: John N. Voyles, Jr.

Q-56. Please reference application Tab 16, item I, pages 47-48of 272, wherein KU and LG&E cite a "potential for need of addition of SCRs on coal-fired units" at Ghent 2 and Mill Creek 1 and 2. Under what circumstances would or could this potential become a need? Please discuss in detail.

A-56. A proposal by EPA was published in the Federal Register on December 17, 2014 to revise the current Ozone NAAQS of 75 ppb, established in 2008, to a value within the range of 65 – 70 ppb and they requested additional comments for lowering the standard down to 60 ppb. Current ambient monitoring data in Kentucky indicates the majority of the Commonwealth would be classified as non-attainment with an ozone standard below 70 ppb. The non-attainment classification could potentially lead the companies to make further reductions of NO_x emissions. However, any additional NO_x emission reductions would depend on the level of the final NAAQS standard and future levels of emissions from all stationary combustion sources. In the electric utility sector, that evaluation would include consideration of the effects of emission reductions from new and upgraded emission controls and shutdown of some coal-fired generation to meet the new MATS rule. Important as well will be consideration of emissions of volatile organic compounds from mobile sources in the transportation sector that would also greatly affect attainment status. Modeling has not been performed by the Company to assess attainment status with the proposed revised ozone standard.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 57

Responding Witness: John N. Voyles, Jr.

Q-57. Please reference application Tab 16, item I, pages 47-48 of 272, wherein KU and LG&E cite "additional permitting activities associated with new gas-fired generation" as a concern. Under what circumstances would or could this potential become a need?

A-57. The specifications and type of equipment for procurement and installation associated with the construction of new gas-fired generation must meet regulatory criteria addressed in the permit application to be approved by the permitting authority. A permit application had been submitted by the Company for a natural gas combined cycle unit at the Green River station and was under review by the Kentucky Division for Air Quality. The project was subsequently withdrawn by the Companies.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 58

Responding Witness: John N. Voyles, Jr.

Q-58. Please reference the video transcript of Case No. 2014-00002, hearing held Nov. 24, 2014, testimony of John Voyles, at 13:26:04 through 13:30:23. Confirm that Mr. Voyles states that the construction of a combined cycle NGCC at Green River would be to meet a reliability concern, not a load-serving concern.

a. Given that: (i) TVA has announced that two of its Shawnee units will remain operating[12] and that TVA plans to build a 1-GW NGCC in Muhlenberg County[13]; and (ii) Big Rivers' Wilson plant remains operating and apparently will through at least 2016 if not later,[14] do any of these facts lessen the reliability concerns Mr. Voyles was discussing in his testimony in Case No. 2014-00002? Were any of these scenarios modeled into any of LG&E-KU's modeling? If not, why not?

b. According to published reports, Owensboro Municipal Utilities has announced plans to consider construction of a natural gas turbine generator to replace at least one of its two coal-fired units. Have, or will, LG&E and KU consider partnering with any other utility to share in the costs and ultimately, the generation, of a gas-fired plant if and when the companies believe they need to obtain or construct additional generation?

A-58. In the video transcript of Case No. 2014-00002, hearing held Nov. 24, 2014, testimony of John Voyles, at 13:26:04 through 13:30:23, Mr. Voyles states the extension to operate Green River units 3 and 4 until April, 2016 is needed to address a reliability concern. Mr. Voyles did not state that the construction of a combined cycle NGCC at Green River is needed to meet a reliability concern.

a. The facts stated in the question do not lessen the reliability concerns discussed by Mr. Voyles. The analysis assumed that TVA's Shawnee units

[12] http://www.timesfreepress.com/news/business/aroundregion/story/2014/nov/26/cleaning-up-rather-than-closing-downtva-study/275489/

[13] http://www.bgdailynews.com/news/tva-forges-ahead-with-plan-for-billion-gas-plant-in/article_dc93615c-fcdf-5e72-8ede-de24c838eb1e.html

[14] http://wkms.org/post/db-wilson-power-plant-remain-open

and Big Rivers' Wilson plant remain operational. The new NGCC to be built by TVA in Muhlenberg County was not included in the scenarios modeled because the new NGCC is replacing two existing coal fired units, so the net impact to the transmission grid is minimal.

b. LG&E and KU jointly plan their generating system. The Companies have previously partnered with IMEA and IMPA in the construction of Trimble County 1 and Trimble County 2, and would consider similar arrangements with others in the future if it would be in the best interest of the Companies' customers.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 59

Responding Witness: David S. Sinclair

Q-59. Please reference Application Tab 16, item I, page 113 of 272, wherein KU and LG&E identify a "3rd Combined Cycle (2025)" plant.

a. Under what circumstances would or could such a plant be required, and where would it be built?

b. What generation output would such a plant have?

A-59.

a. No costs have been included in the 2015 Business Plan for the line item that includes a 2025 unit. The 2014 IRP identified a potential 2025 unit in a scenario with a high cost for carbon emissions, but no siting studies have been conducted.

b. The 2015 Business Plan does not include a new unit in 2025. The summer net capacity of the unit in the previously mentioned IRP scenario is 737 MW.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 60

Responding Witness: Paul W. Thompson / John N. Voyles, Jr.

Q-60. Please reference Application Tab 16, item I, page 126 of 272, the "Power Generation 2015 Business Plan," wherein KU and LG&E discuss the resolution of Trimble County Unit 2 existing issues and warranty claims.

a. List and describe all existing issues and the status of their resolution.

b. List and describe all warranty claims and the status of these claims.

A-60. See also the Company's responses to Question No. 37 above and to KIUC 1-30.

The Trimble County Unit 2 project was a complex project consisting of a series of electric generation and pollution control systems and the interaction of these systems. The systems were constructed over a nine-year period beginning with the signing of the Design Development Agreement on December 22, 2005 with Bechtel through providing them the Certificate of Commercial Operation on December 22, 2014. The execution of the project had typical Owner initiated punch list and warranty claims, associated with a new coal-fired unit of this scale. At the time of developing the 2015 Business Plan, over 95 percent of these claims had been remedied by Bechtel as part of a normal execution of a large capital project, with the Combustion System deficiency being the primary outstanding claim to be remedied. The reference cited above from the 2015 Business Plan was regarding the Combustion System deficiencies with the burners and associated combustion air controls, outstanding commercial claims on other Owner performed warranty work allowed by the EPC Agreement, as well as other obligations on Bechtel to reach Commercial Operation. Within this basis for the reference cited above, responses to the subpart questions follow.

a. As of January 1, 2015 only two past claims remain open with Bechtel, as well as a few commercial issues required within the EPC Agreement (primarily Bechtel reaching Final Completion). The first remaining warranty claim is in regards to meeting the specified access for maintenance around the top of the coal mills. The Owners have agreed on the proposed resolution and are waiting on Doosan (the boiler OEM) to fabricate and

install the new platforms. The other remaining issue is a claim for a replacement set of turbine coupling bolts for the Owners to use on the first turbine overhaul currently scheduled for spring 2018. This claim is under review with Hitachi and the Owners have provided Bechtel their support for this claim. Neither claim affects the operation of the Unit. Commercially, the Owners are working with Bechtel on stepping down the required securities and insurance coverages to levels stated in the EPC Agreement now that Bechtel has reached Commercial Operation. Bechtel is working to complete all documentation to reach contractual Final Completion, the last commercial achievement within the EPC Agreement other than the warranty period termination.

b. Regarding warranty and commercial claims that existed at the time of developing the 2015 Business Plan, the Commercial Operation declaration from Bechtel (attached) summarizes the remaining work scope of the 2014 fall outage where the Combustion System work scope was completed, along with several other warranty scopes and open project activity and commercial obligations required of Bechtel. All of this work scope was successfully completed in the 2014 fall outage, and subsequently Bechtel performed and passed all performance and coal combustion testing, along with other project activities required by the EPC Agreement. On December 22, 2014, the Owners granted Bechtel the Certificate of Combustion System Completion, Successful Combustion System Demonstration Test and Commercial Operation. These certificates are attached for reference. The Owners released the Letter of Credit securities of $30 million on January 9, 2015. The Owners have reached agreement with Bechtel on reimbursement of Owner completed warranty work allowed by the EPC Agreement with Bechtel paying Owners $5.8 million, which also included Owners taking ownership of all Bechtel commissioning spare parts that originally cost $1.07 million. The Owners continue to work with Bechtel on the administrative closing of the EPC Agreement as they are expected to reach Final Completion during the first quarter of 2015.

December 3, 2014

Mr. Scott Straight
Director, Project Engineering
LG&E KU Services Company
820 W. Broadway
Louisville, KY 40202

Re: Trimble County Unit 2
Bechtel Job No. 25191
Notice of Commercial Operation
Letter Number: 25191-000-T4C-GAM-00020
File Number: T4C-GAM

Dear Scott:

Bechtel hereby gives notice that it has achieved Commercial Operation as of December 2, 2014 in accordance with the EPC Agreement as amended by Amendment 6.

The requirements for achieving Commercial Operation are given in Attachment 1. Where applicable, we have included in Attachment 1 the references to documentation evidencing completion of the requirement.

In accordance with Section 6.7 of the EPC Agreement, please confirm within 5 business days of this notice that you agree that Commercial Operation has been achieved, pending receipt of the final laboratory results, at which time the Certificate of Commercial Operation will be issued. Please also note that the Substantial Completion Performance Security will be due to be released and returned to Bechtel within 5 business days after the certificate is issued.

Very truly yours,

Clyde M. Watkins
Project Manager

cc: J. Joyce
J. Brightman

Attachment 1

ATTACHMENT 1
Requirements for Commercial Operation

	Criteria (Reference Amendment 6, definitions)		Status
1	(i)	Interim Operation has been achieved.	Complete
2	(ii)	The Work, including Combustion System Completion and Turnover Acknowledgment of the Ammonia Forwarding System is complete (other than (a) Work expressly allowed or required to be completed after Commercial Operation by the terms of the Agreement, including Warranty Work and (b) Non-Critical Punch List Items as established as of the interim Operation Date) (it being agreed that no items will be added to the Punch List after the Interim Operation Date except the following: (1) Punch list items in respect of Work performed after the Interim Operation Date related to Combustion System Completion and completion of the Ammonia Forwarding System and (2) Punch List Items that result from the performance of Work on the Facility to achieve Combustion System Completion, Turnover Acknowledgment of the Ammonia Forwarding System and the completion of Non-Critical Punch List Items), provided that completion of outstanding Non-Critical Punch List Items shall not operate as a restraint to the achievement of Commercial Operation.	Complete – Combustion System Completion work is complete as documented in Bechtel Letter 25191-000-T4C-GAM-00019. Punchlist – Complete as confirmed by station personnel as of Nov. 11, 2014.
3	(iii)	Contractor has completed making appropriate system adjustment identified during the startup, commissioning and testing processes.	Complete
4	(iv)	All Performance Guarantees required to be achieved for the purpose of Commercial Operation as shown in Exhibit U have been achieved except to the extent Contractor is entitled to pay and shall have paid liquidated damages in lieu thereof, in accordance with Section 7.2	Complete (pending final laboratory analysis) – Thermal Performance Test (performed as Surrogate Test) completed as of Oct. 24, 2014, Preliminary Test Report submitted to Owners via Bechtel Letter 25191-000-T4C-GAM-00019. All other Performance Guarantees demonstrated and documented via Performance Guarantee Test Final Report, document number 25191-002-30R-M16G-00003 (December

	Criteria (Reference Amendment 6, definitions)		Status
			23, 2010). The results demonstrate the requirements for both Commercial Operation and Final Completion have been achieved.
5	(v)	All obligations of Contractor expressly required to have been performed as of the Commercial Operation Date shall have been properly discharged.	Complete
6	(vi)	Contractor's performance of the Work related to Combustion System Completion and the Ammonia Forwarding System has not caused the Facility, including the Common Facilities, to become incapable of being operated in the normal course of business in accordance with the operating procedures set forth in the Station Manuals.	Complete
7	(vii)	Owners have received from Contractor all Permits (other than Owner's Permits) necessary to allow transfer of care, custody and control of the Facility to Owners, all of which shall be valid and in full force and effect.	Complete – Reference Amendment 6 Witnesseth (recitals).
8	(viii)	Final versions of the Station Manuals, approved by Owners, have been delivered reflecting changes to the Facility, including updates with respect to Combustion System Completion.	Complete – Electronic version, updated to include Combustion System components delivered to Owners as of Oct. 20, 2014 Final as-built documentation to be provided prior to final completion.
9	(ix)	All drawings (to the extent previously delivered to Owners) that should be updated in accordance with Prudent Utility Practices to reflect changes to the Facility, including the Combustion System, have been so updated (in red-line form) and delivered to Owners.	Complete as of Dec. 2, 2014
10	(x)	All Special Tools have been delivered to Owners.	Complete – WCAH handling system installed and blanking

	Criteria (Reference Amendment 6, definitions)	Status
		plates with LGE. No other special tools required.
11	(xi) Owners have executed the Certificate of Commercial Operation.	

CERTIFICATE OF SUCCESSFUL COMBUSTION SYSTEM DEMONSTRATION

This constitutes the Certificate of Successful Combustion System Demonstration as contemplated by the Engineering, Procurement and Construction Agreement, entered into as of the 9th day of June 2006, as amended (the "Agreement"), by and between Louisville Gas and Electric Company, a Kentucky corporation ("LG&E"), Kentucky Utilities Company, a Kentucky corporation ("KU"), Indiana Municipal Power Agency, a body corporate and politic and a political subdivision of the State of Indiana ("IMPA") and Illinois Municipal Electric Agency, a body politic and corporate, municipal corporation and unit of local government of the State of Illinois ("IMEA" and together with LG&E, KU, and IMPA, the "Owners"), each to the extent of its individual, undivided interest as a tenant-in-common under and in accordance with that certain Participation Agreement ("Participation Agreement") dated as of February 9, 2004 and Bechtel Power Corporation, a Nevada corporation ("Contractor").

For purposes of Section 6.15.2 of the Agreement, the date on which Successful Combustion System Demonstration has been achieved is October 24, 2014 at 18:00.00 Eastern Standard Time.

Executed on this 22nd day of December 2014 by the Companies on behalf of the Owners.

Title: Director PE

CERTIFICATE OF COMMERCIAL OPERATION

This constitutes the Certificate of Commercial Operation as contemplated by the Engineering, Procurement and Construction Agreement, entered into as of the 9th day of June 2006, as amended (the "Agreement"), by and between Louisville Gas and Electric Company, a Kentucky corporation ("LG&E"), Kentucky Utilities Company, a Kentucky corporation ("KU"), Indiana Municipal Power Agency, a body corporate and politic and a political subdivision of the State of Indiana ("IMPA") and Illinois Municipal Electric Agency, a body politic and corporate, municipal corporation and unit of local government of the State of Illinois ("IMEA" and together with LG&E, KU, and IMPA, the "Owners"), each to the extent of its individual, undivided interest as a tenant-in-common under and in accordance with that certain Participation Agreement ("Participation Agreement") dated as of February 9, 2004 and Bechtel Power Corporation, a Nevada corporation ("Contractor").

For purposes of Section 6.7 of the Agreement, the date on which Commercial Operation has been achieved is December 2, 2014.

Executed on this 22nd day of December 2014 by the Companies on behalf of the Owners.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 61

Responding Witness: Paul W. Thompson

Q-61. Please reference Application Tab 16, item I, page 130 of 272, the "Power Generation 2015 Business Plan."

a. KU and LG&E identify as a major assumption that the "Mantanzas" transmission capital project will be completed. Please describe this project, and whether it is included in the capex budget for the instant case.

b. On the same page, the following sentence appears: "However, the impact from Big Rivers shutting down the Wilson and Coleman Units has created other issues that need to be addressed from a transmission perspective." Please identify the "other issues" to which this statement refers, and explain in detail how Big Rivers' shuttering of the Coleman plant affects KU's transmission system and plans.

c. Explain also whether the Wilson's plant continuing operation affects or modifies the company's transmission plans in any manner, and if so, how.

A-61.

a. The Matanzas Project is a new substation just south of Centertown, Kentucky. The Matanzas substation ties KU's transmission system to the Big Rivers' transmission system and strengthens the interconnected grid in the area. The substation includes two 161/138kV transformers. The project is in-service with a project cost of $13,332,914. Additionally, Big Rivers is interconnecting with the TVA transmission system by way of the Matanzas substation. TVA is expected to complete this interconnection by December 31, 2015.

b. See response to SC 1-26(b).

c. See response to SC 1-26(b).

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 62

Responding Witness: David S. Sinclair / Russel A. Hudson

Q-62. Please reference Application Tab 16, item I, page. 174 of 272 and 175 of 272, the "Energy Supply and Analysis 2015 Business Plan," Describe each of the sales items (such as EKPC 25 Intermittent, etc.).

A-62. Listed below are definitions of the sales items found on page 174 and 175 of 272, the "Energy Supply and Analysis 2015 Business Plan."

1. **Industrial Coal Sales** – The cost of unloading, handling, and transporting coal associated with a coal sales contract with Kosmos Cement.

2. **EKPC NITS** – EKPC transmission service purchased by the Companies to serve LG&E/KU load connected and served by the EKPC transmission system. Kentucky Utilities has 17 substations connected to the East Kentucky Power Cooperative (EKPC) transmission network. EKPC Network Integration Transmission Service (NITS) and LG&E/KU transmission service is required to serve these loads from LG&E/KU generation.

3. **EKPC 25 Intermittent** – Cost for the 25 MW's of point to point transmission reserved on the LG&E/KU system in case Kentucky Utility substations connected to the LG&E/KU transmission system are temporarily transferred to the EKPC transmission system during forced outages or the planned maintenance of the LG&E/KU transmission system.

4. **OSS RTO** – The non-LMP (Locational Marginal Pricing) costs associated with energy transactions made with regional transmission organizations (RTOs) for off-system sales.

5. **OSS Intercompany XM** – LG&E/KU transmission costs that are incurred for off-system sales that move through the LG&E/KU transmission system.

6. **OSS 3rd Party XM** – Non- LG&E/KU transmission costs incurred for off-system sales.

7. **NL RTO** – The non-LMP (Locational Marginal Pricing) costs associated with energy purchase transactions made with regional transmission organizations (RTOs) that support native load.

8. **NL Intercompany XM** – LG&E/KU transmission cost incurred for purchasing energy to support native load.

9. **NL 3rd Party XM** – Non-LG&E/KU transmission costs for energy purchases to support native load.

10. **Expectation calc. vs. 2014 BP** – The Expectation amounts in Application Tab 16, item I, page. 174 of 272 and 175 of 272, the "Energy Supply and Analysis 2015 Business Plan" are based on the prior Business Plan (2014 BP), which ended with budget year 2018. The 2019 Expectation amount was calculated using the 2018 total for items 1-9 above, from the 2014 BP and increased at an inflationary 2.5%. The "Expectation calc. vs. 2014 BP" is the difference between this inflationary calculated figure for 2019 and the total of the individually budgeted amounts for items 1-9.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 63

Responding Witness: John N. Voyles, Jr.

Q-63. Please reference Application tab 16, item I, page 205 of 272. Does the issuance of the EPA's Draft CCR Rule in any way change the company's plans set forth on this page regarding the closure of existing ash ponds? If so, how? Please discuss in detail.

a. Does the company intend to close all existing ponds?

b. Does the company intend to construct any new lined ponds?

c. What is meant by "CCR materials are used for closing ponds on all active coal facilities?"

A-63.

a. The final CCR rule does not require the immediate closure of all existing ponds. KU will follow the data collection protocol to determine if any ponds require remedial action, up to and including closing ponds.

b. The Company has not made any decision to construct any new lined ponds.

c. The Company has made the assumption that CCRs could be beneficially reused in the closure plans for ash ponds rather than using other fill materials from off site.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 64

Responding Witness: John N. Voyles, Jr.

Q-64. Does the company plan to remove ash from existing ponds?

a. If so, where will that ash be stored?

b. If in additional landfills, provide cost estimates for construction of new landfills at each of the generating stations.

A-64. The Companies have no plans to remove ash from existing ponds at this time.

a. Not applicable.

b. Not applicable.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 65

Responding Witness: John N. Voyles, Jr.

Q-65. Please provide details regarding the "Trimble County Landfill and Transport Plan" described on page 206 of 272.

A-65. The Trimble County Coal Combustion Residual (CCR) project includes the engineering, permitting, procurement, contracting, construction and commissioning of new CCR Treatment and Transport (CCRT) facilities, as well as a new CCR landfill and associated infrastructure for the storage and management of CCR generated at the Trimble County Station. The CCRT facilities will collect, condition, dewater, store, and transport CCR materials (fly ash, bottom ash, pyrites, and gypsum) to the new landfill for storage. An overland pipe conveyor will be used for primary transport of the CCR materials to the landfill. The new landfill will be located on existing LG&E property in Ravine B which is located northeast of the generating units on the east side of State Road 1838. A haul road and bridge over State Road 1838 will be constructed to provide access to the landfill area, avoiding use of State Road 1838 by plant traffic.

The CCRT facilities will include a new Unit 1 and Unit 2 fly ash system consisting of pneumatic conveyance equipment, fly ash silos, and conditioning equipment used for transport, temporary storage, and conditioning of economizer ash, air heater ash, and fly ash collected in existing electrostatic precipitators (ESP) and pulse-jet fabric filters (PJFF). A new Unit 1 bottom ash system will be constructed for dewatering and temporary storage of Unit 1 bottom ash. This scope includes a new reclaim system for Unit 1 bottom ash, Unit 2 bottom ash and pyrites, and Unit 1 pyrites. A new Unit 1 and Unit 2 gypsum dewatering facility will be constructed for dewatering and temporary storage of each unit's dewatered gypsum. This scope includes covered horizontal vacuum filters for gypsum dewatering and a portal reclaimer to recover stored gypsum. A series of new belt conveyors and an overland pipe conveyor will be constructed to transport the conditioned/dewatered CCR materials approximately 1 ½ miles to the landfill.

The landfill will be designed and constructed to store CCR produced by Trimble County over a minimum approximate 37 year period. The landfill will be developed in several construction phases with each fully integrated as an extension of the adjacent landfill phase or cell. Each phase will have an estimated lifespan (placement of CCR) of between 6 to 12 years. The landfill will be constructed with an engineered composite liner system consisting of a prepared subgrade, a synthetic liner, leachate collection system layer (including piping), and a protective clay soil cover. This system of engineered layers will be constructed in order to contain the CCR and collect leachate that may accumulate, while protecting groundwater. Additional infrastructure for the landfill facility will include paved haul roads, access roads, a drainage system to separate CCR contact water from non-contact surface water, a sediment basin and erosion control features for storm water management, a lined leachate pond, and groundwater wells for monitoring groundwater quality. The landfill will be compliant with the EPA's final CCR rules.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 66

Responding Witness: John N. Voyles, Jr.

Q-66. Describe what the companies intend to do with the ash which is currently being stored above-ground at the Cane Run plant.

A-66. Cane Run is an LG&E facility. See the response by LG&E to AG Question No. 65 in Case No. 2014-00372.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 67

Responding Witness: John N. Voyles, Jr.

Q-67. Please reference Application tab 16, item I, page 200 of 272. Regarding the Ghent consent decree, please provide a monetary quantification of the costs the company has had to expend to comply with the decree, as well a summary of the measures the company has employed to attain compliance.

A-67. The Company installed dry sorbent injection systems with trona milling equipment to improve the ability to more efficiently inject dry sorbents (hydrated lime or trona) into the flue gas path which reduces the level of sulfuric acid mist (SAM) emissions. In addition, the Company installed additional boiler economizer tubing and sootblowers on the Ghent Units 3 and 4 boilers to minimize the SO_2 to SO_3 conversion in the SCR at high exit gas temperatures which also reduces SAM emissions. SAM indicative monitoring equipment was installed to meet compliance assurance monitoring requirements of the consent decree. The total equipment costs for these projects were $37,624,080.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 68

Responding Witness: John N. Voyles, Jr.

Q-68. Please reference Application tab 16, item I, page 240 of 272. Please discuss the "Effluent Water Projects" discussed on this page, and state the particular regulation(s) with which the projects are designed to bring compliance.

a. Discuss the nature of the projects at each generating plant.

b. Confirm that under 2015 Business Plan, estimated costs of the ELG projects are projected to total $974 million.

A-68. The EPA proposed regulations on April 19, 2013 to revise the effluent limitations guidelines and standards for the Steam Electric Power Generating Point Source Category in 40 CFR 423 under authority of the Clean Water Act. EPA currently plans to finalize the rule by the end of September 2015.

a. In the proposed regulations, the EPA indicated a preference for more prescriptive physical-chemical precipitation and biological treatment processes to control a variety of constituents present in the effluent water streams. Each plant has differing volumes and levels of constituents that will impact the design of the control processes for each plan project. These processes require using tanks, pumps, mixing equipment, chemical fee systems, settling tanks and potentially bioreactors sized to manage a variety of effluent water flows at each power plant site. Since the EPA has not yet issued the final rule, the exact requirements and project timing is not yet known.

b. In the 2015 Business Plan, the pre-conceptual estimated costs of the ELG projects are projected to total $977 million, which includes $3 million of preliminary engineering studies prior to 2015.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 69

Responding Witness: D. Ralph Bowling

Q-69. Please reference Paul Thompson's testimony at page 20, wherein he describes the purchase of diesel generators for the Trimble and Brown combustion turbines. Please explain in detail why diesel generators are needed to maintain power to the existing auxiliary systems.

A-69. Combustion turbines rely on auxiliary systems such as heating, turning gear, lubrication, and generator cooling to maintain availability to start and run. Power for those systems is normally supplied from the on-site, local distribution power supply with batteries for emergency backup. Battery systems are designed to facilitate a normal shutdown of the unit and will only supply power to those auxiliary systems for up to approximately 20 minutes. Once batteries are exhausted, several key systems such as generator cooling and lubrication will shut down. Without the ability to power those systems, the combustion turbines may remain unavailable for a period of time after distribution power is restored. In the event of the loss of the on-site distribution power, the diesel generators maintain power to auxiliary systems and battery chargers ensuring the combustion turbines remain available to start upon the restoration of normal power.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 70

Responding Witness: D. Ralph Bowling

Q-70. Reference the Thompson testimony at page 21, wherein he describes a malfunction of the TC2 main turbine steam valves. Please provide the following:

a. All written reports, analysis and evaluations regarding the main turbine steam valve malfunction.

b. A description of system improvements that will be implemented at the next TC2 scheduled outage, the expected costs and what the improvements are anticipated to accomplish.

A-70.

a. Since Trimble 2 was initially started in 2010, the electro hydraulic control (EHC) system had been found to have issues with particle and water contamination in the fluid as well as varnishing issues. During the period prior to 2014, Station personnel worked with various "experts" in order to improve EHC fluid quality and have a stable, clean, and reliable system. These experts included the Hitachi, the TC2 turbine OEM, MD&A, the US authorized service provider for Hitachi (MD&A purchased by Hitachi during the 2010 through 2013 time frame), the station's EHC fluid supplier (ICl-IP), Barry Sibul Company (specialized in steam turbine high pressure EHC fluid systems), Hydralube (another company with specialized expertise in EHC cleaning and flushing plus hydraulic expertise), Hy-Pro Filtration, a supplier of nitrogen blanketing and varnish removal systems for EHC fluid, and Rexroth, the manufacturer of the TC2 EHC system and all of the TC2 turbine valve actuators.

The water and varnishing issues were significant enough for the Station to:

- Install valve specific hydraulic oil filters that can be replaced with the unit in service.
- Install nitrogen blanketing system for the EHC fluid reservoir. The function of this system is to prevent the ingress of moisture from ambient air into the EHC fluid.

Attachment in Separate File

The attachment is being provided in a separate file.

- Flush the hydraulic system to remove varnish and the impact of particulate and water contamination in 2011 and 2012.

The unit continued to have various issues with the system and during the 2014 planned maintenance outage several of the electro hydraulic control components associated with the EHC system (servo valves, master trip solenoid valves, EHC fluid filters, etc.) were replaced during the outage.

After the outage was completed and the unit was restarted, the EHC system again developed a water problem in the hydraulic fluid. While working with Hy-Pro Filtration to mitigate the water issue, it was determined to remove the Unit from service to allow for the replacement of various components that appeared to be faulty. It was while removing the system from service that the hydraulic trip manifold did not function properly, resulting in the turbine steam valves not closing when commanded to do so. The valves were closed as the result of intervention by Station I/E personnel and supervision. The issues with the hydraulic system trip block, the heating system, and the cooling systems were determined as a result of this event. Over the period prior to 2014, the events were addressed individually with no formal reports.

The reports, analyses, and evaluations that were conducted after the main turbine steam valve malfunction are included in Attachment to Response to Question No. 70.

b. **TC2 Turbine Trip Manifold Improvement:**

The main steam turbine Electro Hydraulic Control (EHC) trip manifold provides turbine protection by allowing the turbine steam admission valves to shut during a faulty condition. During the TC2 2015 spring outage, the current EHC trip manifold will be replaced with a new turbine EHC trip manifold system with the standard industry design, which is fully testable. The installed cost of the new system is expected to be approximately $250,000 (net). The current system supplied by the steam turbine OEM employs a control scheme which requires ‘one of two’ hydraulically operated valves to actuate in order to trip the turbine steam valves. The system supplied does not allow actual testing of the hydraulically operated trip valves with the unit on line due to the ‘one of two’ tripping scheme, and the OEM supplied valves are not equipped with position indication. The new EHC trip manifold will have three hydraulically operated valves with position indication. The other turbines in the LG&E/KU fleet are equipped with this arrangement. The use of three valves allows a ‘two of three’ tripping scheme to be employed, meaning two valves must actuate to trip the turbine steam valves. The ‘two of three’ scheme allows the hydraulically operated trip valves to be tested one at a time with the unit on line. The

valve positon indication allows verification while the unit is online that the valves are operating properly and will ensure turbine protection.

TC2 Turbine EHC Heating and Cooling System Improvement:
During the TC2 2015 spring outage, the current EHC heating and cooling system will be upgraded from the original system supplied by the OEM. The installed cost of the new system is expected to be approximately $185,000 (net). The original EHC heating and cooling system is of poor design because the heating mechanism causes localized heating and produces varnish, which contaminates the system and has caused operational issues with turbine valve actuators and the trip manifold. Another issue is that the pumps are on a common shaft with the system pumps, so that heating/cooling is only provided when the system is online. The new system will be a kidney loop design that is consistent with modern steam turbine EHC systems and comparable with the others in the LG&E/KU fleet. The loop will provide better ability to monitor the condition of the EHC fluid and will have redundant streams so that maintenance can be performed on the system while online. Most importantly, the new system will eliminate the heating mechanism that is producing varnish, which has affected the turbine valve and trip manifold system.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 71

Responding Witness: John N. Voyles, Jr.

Q-71. Please reference Paul Thompson's testimony at page 22 regarding the possible one-year extension for operation of the Green River Generating Station Units through April 2017, please provide any analysis, evaluation or study that indicates such and extension is necessary for reliability.

A-71. See response to SC 1-26(b).

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 72

Responding Witness: John N. Voyles, Jr.

Q-72. Please reference Paul Thompson's testimony at page 33, please provide the latest annual transmission expansion plan.

A-72. The attached file named "2014 TEP Confidential.pdf" is the most recent ITO approved Transmission Expansion Plan (TEP). The requested information is confidential and proprietary information and is being provided under seal pursuant to a petition for confidential protection.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 73

Responding Witness: John N. Voyles, Jr.

Q-73. Please reference Paul Thompson's testimony at page 33 regarding the transmission project tying into the Duke Indiana transmission system please provide the following:

a. A list of benefits to KU ratepayers including any increase in transfer capability.

b. Any studies, evaluations or analysis performed to justify the project.

A-73.

a. The project tying the LG&E transmission system to Duke Indiana strengthens the interconnected grid and addresses a potential reliability issue that could affect our customers in Louisville and the surrounding area. The project mitigates transmission line and transformer overloads that would result from an outage of two transmission lines which share common towers. Without this project, such a transmission outage would result in significant loss of load and generation in the Louisville area. The potential loss of load exceeds the criteria set forth in the LG&E/KU Transmission System Planning Guidelines requiring a project. While the new interconnection is expected to increase transfer capability, the increased capability was not calculated during the study process.

b. See attached. The requested information is confidential and proprietary information and is being provided under seal pursuant to a petition for confidential protection.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 74

Responding Witness: John J. Spanos

Q-74. Please provide all tabulations included in Mr. Spanos' study and all data necessary to recreate in their entirety, and all analyses and calculations performed for the preparation of the depreciation study. Please provide this and all electronic data in Excel, with all formulae intact. Please provide any record layouts necessary to interpret the data. Identify and explain any and all unique spreadsheet formulae or assumptions required to recreate in their entirety all of Mr. Spanos' calculations given his inputs.

A-74. See attachment being provided in Excel format.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

Attachment in Excel

The attachment(s) provided in separate file(s) in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 75

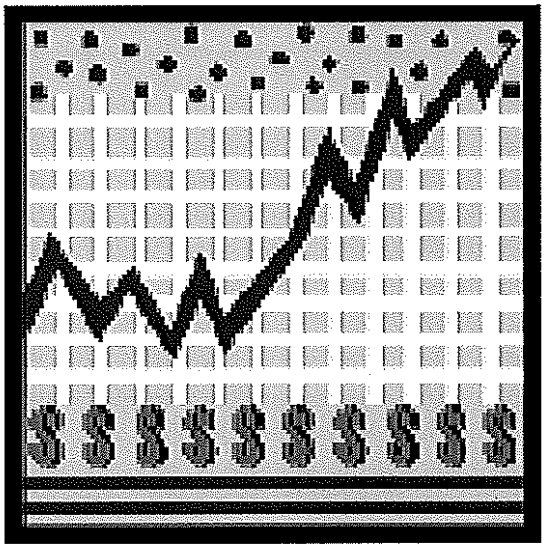
Responding Witness: Paula H. Pottinger, Ph.D.

Q-75. Incentive Programs. Please provide complete copies of any incentive compensation plan, bonus programs or other incentive award programs in effect at the Company for each year 2010 through 2014.

A-75. See attached for the incentive programs which are included in the cost to provide service in this case.

TEAM INCENTIVE AWARD (TIA) PLAN

- ☑ Financial Performance
- ☑ Customer Satisfaction
- ☑ Individual and Team Contributions



TIA

Eligible employees participate in the LG&E and KU Team Incentive Award ("TIA"). The TIA seeks to focus employee efforts on business goals and rewards employees for achieving those goals. The TIA provides an opportunity for eligible employees to share in the added value they create through superior performance.

TIA AND BUSINESS STRATEGY

The company realizes the wealth that exists in the abilities of its people. The challenge is to become the best in our competitive market through each individual using his or her talents combined with other team members to make it happen. The TIA Plan plays a key role in assisting the company in focusing employees on business goals as well as providing employees with a program that can increase their individual compensation.

The TIA was developed to motivate and direct employees toward the achievement of strategic goals. It also assists with attracting and retaining skilled personnel by providing competitive financial rewards that are commensurate with their talents, cooperation and contribution.

There are several basic TIA concepts:

- There is a focus on the cooperative spirit of all employees working together as a team.
- Risk-taking, embodied in initiative, fresh perspectives and innovative solutions, is encouraged and rewarded.
- The plan is designed to motivate and improve the individual performance of all employees.
- Incentive award levels will vary depending on the employee's base salary, position and performance. The TIA represents "pay at risk." The relationship of the target awards to salary reflects that employees who have increasing responsibility for company performance, as reflected in higher salaries, generally have higher amounts of individual compensation tied to that performance.

With these concepts in mind, the TIA was designed:

- To promote the achievement of the company's objectives.
- To attract, motivate and retain employees.

TIA PLAN

Key elements of the TIA are as follows:

1. Participants include all active full-time and regular, part-time salaried employees, IBEW 2100 employees and KU hourly and bargaining unit employees.

2. All TIA participants have Target Awards based on the following:

Target Award Participation	
Non-Exempt & Hourly	6% of annual earnings
Exempt Individual Contributors	9% of base salary
Managers	14% of base salary
Senior Managers	25% of base salary

3. Performance objectives are established annually to support the Company's business strategies. The size of the awards will depend upon the degree to which these objectives are achieved.

4. Exempt employees with salary changes during the year will have their awards calculated in accordance with the amount of time they work under each respective base salary.

5. Total annual earnings, including overtime, are used in calculating the earned awards for all regular non-exempt and hourly full- and part-time employees. Prior TIA awards are excluded from total annual earnings to calculate earned awards.

6. Earned TIA Awards will be paid in cash within 90 days of the completion of the calendar-based annual performance period.

7. Compensation from the TIA is included in calculating benefits under the Company's Retirement (except for the KU Retirement Plan) and 401(k) Savings Plan.

8. This plan in no way creates a contract of employment for any duration. The company has full and final discretion with respect to the interpretation and application of this plan. The Company reserves the right to modify or terminate this plan in its sole discretion. This plan document supersedes any prior plan document relating to the TIA.

ELIGIBILITY

All active, regular full- and part-time salaried employees, IBEW 2100 employees and KU hourly and bargaining unit employees, who have at least one month continuous service and are on the payroll on December 31 of the performance year, are eligible for a TIA. Employees who become disabled, die or retire during the performance year will be eligible for a prorated award. Disability, for purpose of this plan, means that the employee is eligible for the receipt of benefits under the Long Term Disability Plan. Retire means that the employee is eligible to retire under the terms of the pension plan. Employees who join the company during the performance year, who have at least one month continuous service, and are on the payroll on December 31 will also be eligible for a prorated award. Employees incurring unpaid work days during the performance year may experience a proportionate reduction in their TIA.

FINANCIAL PERFORMANCE OBJECTIVES

The financial performance objective is determined annually by the parent company. This performance measure is also used for the executive annual incentive to provide direct alignment and common performance objectives with the TIA.

INDIVIDUAL PERFORMANCE OBJECTIVES

The individual performance objective links individual performance to the TIA award. The individual performance objective can be combined with performance objectives for small teams as well as with key objectives from the Performance Excellence Process. Individual performance objectives should align with, and support, strategic business goals to drive performance.

TIA COMMUNICATION

TIA performance results for financial and operational performance measures are communicated periodically through the Company's internal communications to provide information concerning performance to date. Final TIA performance results are approved following the completion of the performance period and are communicated through the Company's internal communications.

CONCLUSION

The Team Incentive Award Plan is designed to strengthen the connection between pay and performance. It will direct a portion of total pay to awards based on financial, operational and individual achievements. The TIA focuses eligible salaried and hourly employee's attention on the company's business goals.

TIA FORMULA

The TIA calculation formula is shown below, along with an example of a potential award. In this example, note the participant's salary is $40,000 and the target award is 9%.

TIA CALCULATION

Step 1: Target Award % x Annual Base Pay Earnings = Target Award

Step 2: Target Award x Financial Performance Objective Weight x Financial Performance % Earned = Financial Performance Earned Award

Step 3: Target Award x Customer Satisfaction Objective Weight x Customer Satisfaction Performance % Earned = Customer Satisfaction Earned Award

Step 4: Target Award x Individual Performance Objective Weight x Individual Effectiveness % Earned = Individual Performance Earned Award

Step 5: Financial Performance Earned Award + Customer Satisfaction Earned Award + Individual Performance Earned Award = Total Earned TIA

TIA CALCULATION EXAMPLE

Annual Base Pay Earnings = $40,000
Target Award Percent = 9%
Financial Performance % Earned = 105%
Customer Satisfaction % Earned = 100%
Individual Performance % Earned = 110%

Step 1: 9% x $40,000 = $3,600

Step 2: $3,600 x 55% x 105% = $2,079

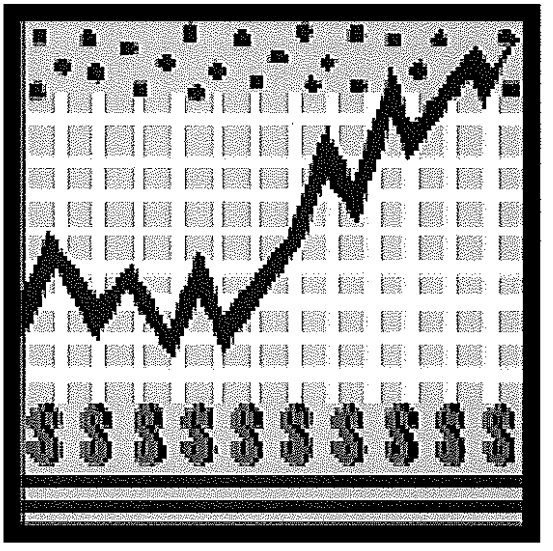
Step 3: $3,600 x 15% x 100% = $540

Step 4: $3,600 x 30% x 110% = $1,188

Step 5: $2,079 + $540 + 1,188 = $3,807

TEAM INCENTIVE AWARD (TIA) PLAN

- ☑ Financial Performance
- ☑ Customer Satisfaction
- ☑ Individual Contributions To The Team



TIA

Eligible employees participate in the LG&E and KU Team Incentive Award ("TIA"). The TIA seeks to focus employee efforts on business goals and rewards employees for achieving those goals. The TIA provides an opportunity for eligible employees to share in the added value they create through superior performance.

TIA AND BUSINESS STRATEGY

The company realizes the wealth that exists in the abilities of its people. The challenge is to become the best in our competitive market through each individual using his or her talents combined with other team members to make it happen. The TIA Plan plays a key role in assisting the company in focusing employees on business goals as well as providing employees with a program that can increase their individual compensation.

The TIA was developed to motivate and direct employees toward the achievement of strategic goals. It also assists with attracting and retaining skilled personnel by providing competitive financial rewards that are commensurate with their talents, cooperation and contribution.

There are several basic TIA concepts:

- There is a focus on the cooperative spirit of all employees working together as a team to ensure a bright future.
- Risk-taking, embodied in initiative, fresh perspectives and innovative solutions, is encouraged and rewarded.
- The plan is designed to motivate and improve the individual performance of all employees.
- Incentive award levels will vary depending on the employee's base salary, position and performance. The TIA represents "pay at risk." The relationship of the target awards to salary reflects that employees who have increasing responsibility for company performance, as reflected in higher salaries, generally have higher amounts of individual compensation tied to that performance.

With these concepts in mind, the TIA was designed:

- To promote the achievement of the company's objectives.
- To attract, motivate and retain employees.

TIA PLAN

Key elements of the TIA are as follows:

1. Participants include all active full-time and regular, part-time salaried employees, IBEW 2100 employees and KU hourly and bargaining unit employees.

2. All TIA participants have Target Awards based on the following:

Target Award Participation	
Non-Exempt & Hourly	6% of annual earnings
Exempt	
Individual Contributors	9% of base salary
Managers	14% of base salary
Senior Managers	25% of base salary

3. Performance objectives are established annually to support the Company's business strategies. The size of the awards will depend upon the degree to which these objectives are achieved.

4. Exempt employees with salary changes during the year will have their awards calculated in accordance with the amount of time they work under each respective base salary.

5. Total annual earnings, including overtime, are used in calculating the earned awards for all regular non-exempt and hourly full- and part-time employees. Prior TIA awards are excluded from total annual earnings to calculate earned awards.

6. Earned TIA Awards will be paid in cash within 90 days of the completion of the calendar-based annual performance period.

7. Compensation from the TIA is included in calculating benefits under the Company's Retirement (except for the KU Retirement Plan) and 401(k) Savings Plan.

8. This plan in no way creates a contract of employment for any duration. The company has full and final discretion with respect to the interpretation and application of this plan. The Company reserves the right to modify or terminate this plan in its sole discretion. This plan document supersedes any prior plan document relating to the TIA.

ELIGIBILITY

All active, regular full- and part-time salaried employees, IBEW 2100 employees and KU hourly and bargaining unit employees, who have at least one month continuous service and are on the payroll on December 31 of the performance year, are eligible for a TIA. Employees who become disabled, die or retire during the performance year will be eligible for a prorated award. Disability, for purpose of tbis plan, means that the employee is eligible for the receipt of benefits under the Long Term Disability Plan. Retire means that the employee is eligible to retire under the terms of the pension plan. Employees who join the company during the performance year, who have at least one month continuous service, and are on the payroll on December 31 will also be eligible for a prorated award. Employees incurring unpaid work days during the performance year may experience a proportionate reduction in their TIA.

FINANCIAL PERFORMANCE OBJECTIVES

The financial performance objective is determined annually by the LG&E and KU Finance department. This performance measure is also used for the officer annual incentives as part of the LG&E and KU Short Term Incentive Plan to provide direct alignment and common performance objectives with the TIA. In 2000, we began combining the averages for LG&E and KU Customer Satisfaction into one financial performance objective.

INDIVIDUAL PERFORMANCE OBJECTIVES

The individual performance objective links an individual employee's performance and contributions to the Company and their work group to the TIA award. The individual performance objective can be combined with performance objectives for small teams as well as with key objectives from the Performance Excellence Process. Individual performance objectives should align with, and support, strategic business goals to drive business success.

TIA COMMUNICATION

TIA performance results for financial and operational performance measures are communicated periodically through the Company's internal communications to provide information concerning performance to date. Final TIA performance results are approved following the completion of the performance period and are communicated through the Company's internal communications.

CONCLUSION

The Team Incentive Award Plan is designed to strengthen the connection between pay and performance. It will direct a portion of total pay to awards based on financial, operational and individual achievements. TIA focuses eligible salaried and hourly employee's attention on the company's business goals. It shares the added value created by success and provides everyone a powerful incentive to do his or her very best.

TIA FORMULA

The TIA calculation formula is shown below, along with an example of a potential award. In this example, note the participant's salary is $40,000 and the target award is 9%.

TIA CALCULATION

Step 1: Target Award % x Annual Base Pay Earnings = Target Award

Step 2: Target Award x Financial Performance Objective Weight x Financial Performance % Earned = Financial Performance Earned Award

Step 3: Target Award x Customer Satisfaction Objective Weight x Customer Satisfaction Performance % Earned = Customer Satisfaction Earned Award

Step 4: Target Award x Individual Performance Objective Weight x Individual Effectiveness % Earned = Individual Performance Earned Award

Step 5: Financial Performance Earned Award + Customer Satisfaction Earned Award + Individual Performance Earned Award = Total Earned TIA

TIA CALCULATION EXAMPLE

Annual Base Pay Earnings = $40,000
Target Award Percent = 9%
Financial Performance % Earned = 105%
Customer Satisfaction % Earned = 100%
Individual Performance % Earned = 110%

Step 1: 9% x $40,000 = $3,600

Step 2: $3,600 x 45% x 105% = $1,701

Step 3: $3,600 x 15% x 100% = $540

Step 4: $3,600 x 40% x 110% = $1,584

Step 5: $1,701 + $540 + 1,584 = $3,825

2012 Employee Bulletin

LG&E and KU Team Incentive Award measures, weightings announced for 2012

Program to include new PPL "Earnings per Share" minimum performance requirement

LG&E and KU's Team Incentive Award has been a core feature of the company's employee rewards philosophy since the 1990s. While the specific measures and weightings have varied over the years to reflect strategic emphasis, the TIA rewards financial, customer, and individual or team accomplishments. The financial measures have varied — based on the strategy of LG&E and KU's parent company — and have included internal operating profit, Earnings Before Interest and Taxes ("EBIT"), adjusted EBIT and, most recently, net income. The primary financial measure continues to be LKE net income in 2012.

What is "EPS"?

"Earnings per Share" or "EPS" is a carefully scrutinized metric that is often used to gauge a company's profitability per share of stock and is a key driver of share prices. EPS is calculated by dividing net income by the total number of shares outstanding.

For example, if a company's net income is $5 million, and there are 10 million shares outstanding, the EPS would be $0.50:

$5 million/10 million shares = **$0.50**

In terms of the standard performance measures and weightings for LG&E and KU employees, the following table outlines TIA components for 2012.

2012 TIA Measures and Weightings
• 55% – LKE Net Income
• 15% – Customer Satisfaction
• 30% – Individual/Team Objectives

Managers will be notified via email when PeopleSoft is available to review and approve individual TIA targets, measures and weightings. Managers can then print individual letters for salaried employees. Union and hourly employees will be informed of TIA targets, measures and weightings during a team briefing or in a bulletin board posting.

Also in 2012, LG&E and KU are aligning more closely with PPL's incentive structure by implementing a minimum PPL EPS —"Earnings per Share" — requirement.

The minimum EPS reflects PPL's commitment to align compensation with shareholder interests. PPL has achieved the minimum EPS requirement every year since its inception.

According to Chief Financial Officer, **Kent Blake**, achieving the minimum EPS reflects an important part of PPL's mission, which includes providing shareholders with best-in-sector returns. "Shareholders carefully consider EPS as a way to gauge a company's profitability. EPS is a key driver of share price," he said.

To support our commitment to shareholders, the minimum EPS performance requirement must be achieved before *any* part of the TIA can be paid. If the EPS is not achieved, no TIA payments will be made regardless of LKE financial, customer satisfaction, team or individual performance. While past performance is no indication of future performance, the minimum EPS performance requirement has been achieved every year since it was instituted.

If you have specific questions about TIA measures please contact your Human Resources representative.

Frequently Asked Questions

Are LG&E and KU's standard TIA measures and weightings changing in 2012?
No. The standard TIA measures and weightings are the same as 2011: 55 percent for LG&E and KU net income; 15 percent for customer satisfaction; and 30 percent for individual or team effectiveness.

What is Net Income?
Net Income is LKE's primary financial measure. Net Income is the company's income after all expenses and taxes have been deducted.

How is Customer Satisfaction measured?
Our market research vendor, Bellomy Research, calls randomly selected LG&E and KU customers as well as customers from each peer group company and asks them to take a survey about their satisfaction with their respective utility company. The scores are compiled quarterly, and those results are used to rank the utility companies.

If LKE's overall satisfaction score is above the peer competitive range, we earn 6 points; if within the peer competitive range, we earn 3 points. Two bonus points can be earned if LKE is first in the absolute ranking; one point is earned if we are second in the absolute ranking.

What are Individual Objectives and Team Effectiveness Measures?
Individual objectives and team effectiveness measures are established each year to ensure we are collectively working to achieve strategic business goals. Individual goals vary by individual and by department and support respective department and line of business objectives. Team effectiveness measures are specific to each line of business and reflect key performance indicators.

What is EPS?
EPS is a carefully scrutinized metric that is often used to gauge a company's profitability per share of stock and is a key driver of share prices. EPS is calculated by dividing net income by the total number of shares outstanding.

Who is affected by the EPS minimum performance requirement?
All employees — including executives, senior managers, managers, salaried, hourly and union employees — are affected by the EPS requirement. PPL must achieve the minimum performance requirement in order for *any incentive* program to be funded.

Why are we making this change now?
The Earnings per Share (EPS) minimum performance requirement was in place at PPL prior to the LG&E and KU acquisition. Adoption of this feature of PPL's incentive plan at LKE, as a PPL company, aligns our program with PPL shareholder interests.

What happens if PPL EPS falls below the level required for payments?
No incentives will be paid to any employee in the PPL family of companies. Specifically, for the TIA at LG&E and KU, this means that no payment will be made for LG&E and KU financial, customer satisfaction, team or individual measures, regardless of performance.

What is the specific minimum EPS performance requirement?
PPL, as a publically traded company, must remain vigilant in minimizing the risk of selective disclosure of financial information. As such, internal disclosure of financial targets and goals would create the potential for disclosure outside the company. Best practice is to not provide the specific EPS requirement.

How can LG&E and KU employees impact PPL EPS?
LG&E and KU employees impact PPL's EPS by focusing on their respective budgets which influence LG&E and KU's net income results. The LG&E and KU business segment represents 15 percent of PPL's 2012 EPS total.

Has the minimum requirement for PPL EPS been achieved in the past?
Yes. While past performance is no indication of future performance, the EPS minimum performance requirement has been achieved every year since it was instituted. PPL has paid incentives to employees since the 1990s.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 76

Responding Witness: Paula H. Pottinger, Ph.D.

Q-76. Incentive Compensation. Provide for 2010, 2011, 2012, 2013 and 2014 the various goals on which incentive payments were to be determined and the actual achievement attained (i.e. the response should show actual metrics and not a simple reference that the goal was at target, not at target, at maximum, etc.) Also, provide the incentive compensation goals for the test year.

A-76. Financial measures and weightings vary by employee group. Customer satisfaction is based on overall satisfaction compared to peers. Individual goals vary by employee. Goal attainments for these measures are provided in the first attachment. Team goals vary by line of business and are provided, along with goal attainments, in the second attachment. The incentive compensation goals for the test year have not yet been determined.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 77

Responding Witness: Christopher M. Garrett

Q-77. Incentive Compensation. For each plan, for each of the years 2010-2014, provide the total Company amount of incentive compensation capitalized and the amount expensed. Also, provide the amount of incentive compensation capitalized and the amount expensed.

A-77. See the response to Question No. 150.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 78

Responding Witness: Edwin R. "Ed" Staton

Q-78. Incentive Compensation. Please provide any studies the Company has in its possession that reflect a comparison of the Company's incentive compensation to that allowed in rates in other jurisdictions.

A-78. The Company does not have any such studies in its possession because the Team Incentive Award, which is the only short-term incentive compensation program included in rates, is not based upon the ratemaking treatment of this issue in other jurisdictions. Instead, the program provides variable compensation that, at targeted levels of performance, is competitive with compensation available to individuals representing comparable positions in the energy services and general industries based upon market benchmark targets established based on data received from third party compensation surveys. The resulting payouts have generally been consistent with those paid out in the market.

Because of its operations in Virginia, the Company can confirm that the Virginia State Corporation Commission has consistently permitted the Company to recover Team Incentive Award expense.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 79

Responding Witness: Paula H. Pottinger, Ph.D.

Q-79. Incentive Compensation. Provide, for each plan, for each year 2010 through 2014, the number of employees eligible under the plan for incentive compensation payment and the number of eligible employees that did not receive incentive compensation payment.

A-79. The number of KU and allocated LG&E and KU Services Company ("LKS") employees eligible for an incentive in 2010, 2011, 2012 and 2013 is provided below. The number of KU and allocated LKS employees eligible for 2014 incentive has not been finalized. All eligible employees received an incentive compensation payment in 2010 - 2013. In order for employees to be eligible for a payment, they must be hired prior to December 1 and be active as of December 31 of the incentive year.

	KU	LKS Allocated To KU
2010	987	586
2011	948	684
2012	962	721
2013	956	784

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 80

Responding Witness: Valerie L. Scott / Counsel

Q-80. Internal Audits. Provide a list of internal audits completed, scheduled, or in progress at the Company for the years 2010-2014. For each, list the subject of the audit, date of audit, date of report, and title of report. Provide a copy of each of the completed studies for review on-site.

A-80. Objection. The response to this question may require the Company to reveal the contents of communications with counsel and the work product of counsel, which information is protected from disclosure by the attorney-client privilege and the work product doctrine. To the extent responsive documents, the content of which are protected from disclosure by the attorney-client privilege and the work product doctrine, objections are made to the production of such documents. Without waiver of these objections, the Company will produce a list of responsive non-privileged information in accordance with the Commission's procedural schedule that has been identified within the time permitted for this response and can be reviewed upon request. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 83

Responding Witness: Paula H. Pottinger

Q-83. Early Retirement Plan. Did the Company offer an early retirement plan during the period 2010-2014? If so:

a. Provide details including written descriptions provided to potentially eligible employees.

b. Provide the details of impacts on annual expenses.

c. Include a copy of any cost-benefit analyses associated with such early retirement programs.

d. Describe any early retirement or employee severance plans being considered for the fully forecasted test period and indicate whether or not the program is reflected in the filing. If so, identify where.

A-83. The Company did not offer an early retirement plan during the period 2010-2014.

a. Not applicable.

b. Not applicable.

c. Not applicable

d. Although, not an early retirement plan, the forecasted test period assumes a severance package will be offered to 15 employees who will retire as part of the expected retirement of the Green River plant in April 2016. This program is reflected in the filing and is included in FERC Account 500.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 84

Responding Witness: Christopher M. Garrett

Q-84. Plant Held for Future Use ("PHFU"). Provide for each year 2012 through 2014, a summary of all PHFU showing a description of the property, the date acquired, the date included in PHFU, the proposed site use and a date for any proposed plant to be constructed and put in service.

a. Provide the same information as to any PHFU during the fully-forecasted test period.

A-84. Account 105-Plant Held for Future Use was zero at December 31, 2012. See attached for 2013-2014.

a. See attached.

Kentucky Utilities Company
Plant Held for Future Use
December 31, 2013

Description of Property	Location	Date Purchased	Date Originally Included in This Account		Cost	Estimated Date to be Placed in Service	Brief Description of Intended Use	Current Status of Project

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 85

Responding Witness: Christopher M. Garrett

Q-85. Property Taxes. For each taxing district, for any given year, please indicate whether taxes are based on actual plant in service or whether it is based on an assessed value.

a. If the Company is taxed based on an assessed value, please indicate when the assessment is made relative to when the tax bill is issued (i.e. if tax bills are sent June 1, on what date is the assessment based on).

b. For each taxing district, please provide the tax rate per thousand dollars and provide a calculation of how much tax the Company will have to pay, the date that the tax bill would be sent and the date the payment would be due during the fully forecasted test period.

c. Provide on a monthly basis the company's property taxes paid for the period 2010 through 2014.

A-85. Property tax is not based on actual plant in service, it is based on assessed value.

a. The assessment is based on values as of January 1 of the tax year. Tax bills are generally received and paid during the fourth quarter of the tax year.

b. See attached for calculation of tax to pay. It is expected that the tax bills would be sent in third or fourth quarter 2015 and paid in the fourth quarter of 2015 and first quarter of 2016 for the fully forecasted year.

c. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 86

Responding Witness: Christopher M. Garrett

Q-86. Rental Income. Please provide annual rental income for each year 2010 through 2014, and projected rental income during the fully forecasted test period, and the budgeted rental income for the test year.

A-86. See attached. The base period rental income is provided for the budgeted rental income for the test year.

Kentucky Utilities Company

Rental Income	Forecasted Test Period 12 months ending 6/30/2016	Base Period 12 months ending 2/28/2015	2014	2013	2012	2011	2010
Total Rental Income	$ (3,491,578)	$ (3,169,546)	$ (2,959,527)	$ (3,146,923)	$ (1,747,354)	$ (1,263,119)	$ (368,603)

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 87

Responding Witness: Russel A. Hudson

Q-87. Research and Development. Identify the amount of research and development expense projected to occur during the fully forecasted test period and identify the account to be charged for each project. Provide a description of the project and any and all associated cost/benefit analysis. Also, identify whether the project is recurring in nature.

a. How does the Company determine which R&D studies will be most cost beneficial?

b. Provide a copy of any and all cost/benefit analyses for each research and development project for which the Company is projected to incur cost in the fully forecasted test period.

c. Provide the amount of R&D expense recorded for each year 2010 through 2014 year-to-date and the test year and identify the accounts charged.

A-87. The vast majority of the research and development expenses fund programs coordinated through the Company's membership in the Electric Power Research Institute (EPRI). The Program descriptions for the 2015 portion of the test period are attached. Specific projects conducted in each program will be finalized by EPRI in February 2015. Programs and projects for 2016 have not yet been selected. All recurring programs and projects are reviewed annually for continued funding.

a. The R&D department coordinates an annual process involving internal subject matter experts and management from a variety of Company departments to review and prioritize research programs or projects that should be considered in the annual budget process. The criteria used in the process focuses on assessing potential value for the Company considering important industry issues emerging in the future or those that can support more near term needs, rather than a specific cost/benefit analysis. Research projects are very different from traditional projects where cost/benefit analyses might be clear. The focus of the prioritization process is on criteria such as leverage (a ratio of research budget to company investment),

reduction in operation and maintenance costs, reduced capital costs, environmental science, regulatory compliance, improved safety, increased customer satisfaction, and others. The Company also supports a few non-EPRI research projects which are evaluated in the same manner as other research projects but separately from the EPRI prioritization. These projects, such as the carbon capture research project with the University of Kentucky, are usually more strategic in nature, intending to reduce or mitigate a long-term risk.

b. A traditional cost/benefit is not conducted for all research programs and projects; rather a determination of value is performed for prioritization of the research portfolio. There is a long list of possible research areas to investigate and a prioritization is needed in order to allocate the available resources efficiently and effectively.

c.

		FERC Accounts Charged
Year 2011	$ 2,521,915	500, 510, 561, 566, 908, 923, 930
Year 2012	$ 2,541,887	500, 506, 510, 556, 930
Year 2013	$ 2,628,075	107, 500, 510, 930
Year 2014	$ 2,998,897	107, 566, 930
Test Year	$ 2,986,634	930

EPRI Programs (Alphabetically)

Program Title: Air and Multimedia Toxics Health and Risk Assessment

Program Description:

The Electric Power Research Institute's (EPRI's) Air and Multimedia Toxics Health and Risk Assessment (Air Toxics) program provides a comprehensive, stakeholder-oriented approach to technical and policy-related issues. The program is regarded by industry and public agencies as a critical and highly respected source of scientific information on air and multimedia toxics. The research examines all aspects of trace substances, including HAPs, across multiple environmental media (air, land, and water). The program conducts basic health science research to address cutting-edge questions on health effects and public health risk assessment of numerous potentially toxic substances, including mercury, arsenic, lead, acid gases, selenium, nickel, chromium, cadmium, and dioxins and other organics.

Research Value:

The program focuses on fundamental studies and specific applications of the environmental dynamics and health effects at low doses of utility-related air and multimedia toxics in the context of toxics from all sources. In addition, the program carries out integrative studies of toxics from all global sources via air and other pathways through environmental cycling to human exposure and human health risk assessment. The program's objectives allow it to provide forward-looking insight into informing the scientific process as well as public agencies examining the technical basis for regulation. At the same time, Air Toxics issues are a critical component of an integrated approach to environmental planning for power companies.

Program Title: Assessment of Air Quality Impacts on Human Health

Program Description:

EPRI’s Air Quality Health program delivers information on the health impacts of air pollution to help members, regulators, the public and other stakeholders develop scientifically sound policies and standards for achieving acceptable air quality to protect public health. The program’s health effects information, developed from epidemiology, toxicology, and exposure assessment studies, addresses key scientific uncertainties related to health effects of PM, ozone, and other air pollutants. The focus of current research is on determining which components of air pollution—in particular, which components of fine particles—are most closely associated with negative health impacts.

Research Value:

EPRI’s Air Quality Health program has the potential to catalyze a paradigm shift in how air pollution, specifically PM, is regulated. The current mass-based approach regulates total PM concentration; however, PM is composed of hundreds of individual components, and there is a growing scientific consensus that not all of these components are equally toxic. This research addresses key scientific uncertainties to determine which components of air pollution are associated with negative health impacts (and which are not) and generates information to support health risk estimates of air pollution

components. The value of the research is in its ability to identify the true causative agents, and the sources of those agents, affecting human health and the environment. EPRI's research provides an enhanced understanding of the health effects of PM components and helps in testing the robustness of those results across different geographical regions. With this program

- air pollution health research considers the full spectrum of pollutants necessary to ensure that public health is adequately protected; further, EPRI is the only research and development (R&D) organization that understands unique electricity sector issues and how they fit into the larger picture of emissions from other sources; and
- peer-reviewed publications on the health effects of specific PM sources and components provide input into regulatory standard-setting processes and inform the broader stakeholder community.

Program Title: Boiler and Turbine Steam and Cycle Chemistry

Program Description:

EPRI's Boiler and Turbine Steam and Cycle Chemistry Program offers guidelines, technology, and training materials to help plant operators manage water-steam chemistry, reduce unplanned outages and operations and maintenance (O&M) costs, and improve unit economics, as well as address chemistry requirements of flexible operation and proper equipment storage.

Research Value:

The industry needs to balance the risks and costs of the largest, most costly equipment, and focus on using proven technologies to create solutions. By using the results of the R&D in this program, members can:

- Improve overall unit availability—losses due to improper chemistry have a 1% or more effect on unit availability
- Reduce steam turbine efficiency losses—chemical and metallic oxide deposits reduce turbine efficiencies by up to 2%
- Reduce chemistry-related boiler tube failures
- Reduce incidence of FAC damage and failures—FAC is both a personnel safety and component availability concern
- Reduce chemistry-related O&M costs
- Improve methods of major equipment preservation and storage
- Reduce incidence of chemistry-related corrosion damage associated with low load and cyclic operation
- Improve world-class or excellent cycle chemistry

Program Title: Boiler Life and Availability Improvement Program

Program Description:

EPRI's Boiler Life and Availability Improvement Program uses international collaboration to develop technology and guidance on safe management of boiler component life to ensure high reliability and reduce operation and maintenance (O&M) costs. Efforts focus on advanced inspection techniques for early and accurate identification of component damage; analytical tools to predict remaining life and risk of in-service failure; and decision-support tools to help balance risk and benefit under a variety of operating scenarios.

Research in this program supports EPRI's Long-Term Operations: Aging Management of Fossil Assets Under Conditions of Flexible Operation R&D roadmap. The goal of the R&D detailed in this roadmap is to produce technologies that can enable continued operation of an aging fleet of fossil fuel plants while adapting to more flexible operations. The difficulty of this challenge is increasing as more small subcritical plants are retired and larger supercritical plants face increasing load-following responsibilities. The program supports this roadmap by performing research to understand flexible operation damage mechanisms from a component and materials standpoint. New designs and life-assessment technologies are being developed to address the needs of the current fleet as well as newer, high-efficiency plants utilizing state-of-the-art materials.

Research Value:

Power generators need to balance the risks and costs of the largest, most costly equipment in the power plant, and focus on using proven technologies to create solutions. By using the results of the R&D in this program, plant owners and operators can:

- Reduce the costs of lost availability due to boiler tube failures from greater than $10,000/MW/yr to less than $1,000/MW/yr when program results are applied comprehensively;
- Increase the safety of high-energy and high-temperature piping systems; and
- Increase safety through control of flow-accelerated corrosion (FAC) in fossil plants.

Program Title: CO_2 Capture, Utilization and Storage

Program Description:

EPRI's CO_2 Capture, Utilization and Storage program provides information about the expected cost, availability, performance, and technical challenges of a range of flue gas CO_2 capture processes. The program seeks and encourages the development of breakthrough post-combustion CO_2 capture technologies with substantially lower energy and cost penalties. In addition, the program identifies purity requirements for the CO_2 stream discharged by the capture process to ensure compatibility with the compression, transport, and injection processes, and conducts the R&D needed to demonstrate the permanence, safety, and environmental acceptability of long-term CO_2 storage from any power plant source. Also, the program looks at the options for CO_2 utilization including EOR and non-EOR options.

Research Value:

Substantial barriers must be overcome, and technical and societal uncertainties must be resolved, before carbon capture and storage (CCS) can be widely deployed, but the time required for developing such processes can take up to 15 years. Proposed pulverized coal (PC) plants already have been denied permits in the absence of firm plans to capture and store their CO_2 emissions. This program meets the industry's most urgent near-term needs—information for:

- Credible asset planning through early understanding of the options, development timelines, costs, technical uncertainties, and regulatory, environmental, and related issues;
- Increased confidence that acceptable capture technologies, storage, and utilization options will be available when needed; and
- Use in public dialogue on the practical extent and timing of CO_2 reduction from U.S. power plants, based on neutral, third-party data and assessments from EPRI.

Longer-term, the technology development aspects of this program will enable the power sector to continue to provide affordable electricity using fossil-fuel-fired generating assets in a low-carbon world.

Program Title: Coal Combustion Products – Environmental Issues

Program Description:

The CCP Environmental Issues program provides scientific data, engineering knowledge, restoration methods, and other tools for cost-effective soil and groundwater protection associated with fossil fuel–fired power plants and CCP storage, disposal, and use.

Research Value:

Research in this program is designed to minimize environmental impacts from CCP management and to provide corrective measures where impacts have occurred. Annual costs for environmental management of CCPs are expected to increase sharply over the next five to ten years as a result of new regulations for disposal. The U.S. electric power industry currently produces an estimated 135 million tons of CCPs annually. CCP management strategies will need to evolve because of changes in the characteristics of the CCPs, new regulations, and lower thresholds for key constituents.

Program Title: Combined Cycle HRSG and Balance of Plant

Program Description:

EPRI's Combined Cycle HRSG and BOP program provides a complete set of technical tools to improve the performance and reliability of combined-cycle HRSGs and BOP equipment. The program includes a background of HRSG design and development, particularly over the last 10 years, in which HRSG designs have become remarkably complex, operating at significantly higher pressures and temperatures. It provides a comprehensive understanding of available designs and tools for preparing procurement

specifications for both new and used HRSG and BOP components based on past research and new technologies.

Research Value:

Projects include unit-specific and pressure-circuit-specific chemical treatment methods and limits; optimal approaches to preventing HRSG tube failure; and methods for life assessment, nondestructive evaluation (NDE) options, welding, and other repair methods. Using the R&D from this program, members can:

- Achieve tube failure rates consistent with their risk tolerance and financial models
- Increase reliability through better understanding of thermal transients
- Increase understanding and control of flow-accelerated corrosion (FAC) through an initial predictive code and other technologies
- Optimize HRSG operational and shutdown chemistry through better understanding of the chemistry cycle
- Identify and correct cycling and thermal transient problems through chemistry cycle guidelines and methods
- Optimize HRSG inspection and repair by using new hardware, NDE guidelines, and techniques for improving access
- Establish inspection routines and life assessments of major components

.

Program Title: Combined Cycle Turbomachinery

Program Description:

EPRI's) Combined Cycle Turbomachinery program provides resources to address all aspects of the life management and the operational and maintenance (O&M) improvements of conventional and advanced GTs. It also addresses all aspects of CC plant-wide integration, including specific issues relating to the steam turbine (ST) and generator for CC applications.

Research Value:

Members of this program can use the research and development (R&D) to respond to the issues, challenges, and opportunities in integrating and operating CC assets in a rapidly expanding and changing power generation environment; implement specific and detailed engineering analyses in the areas of CC turbomachinery life assessment, risk management, and improved operation and maintenance of current assets; and gain a thorough understanding of the technologies incorporated in the latest gas turbine and steam turbine offerings for improved decision-making in CC project development.

Program Title: Combustion Performance and Emissions Control

Program Description:

The three general issues addressed in EPRI's Combustion Performance and Emissions Control program include (1) combustion and fuels impacts on boiler tube life; (2) impacts of combustion modifications and fuel quality on emissions; and (3) plant heat rate. All of these issues require an understanding of fuel quality considerations, accurate measurement and control of coal and air flow to individual burners, and improved performance of mills, burners, and other critical combustion- and performance-related hardware. This program provides the knowledge and resources needed to develop, demonstrate, and apply cost-effective combustion-based solutions to resolve these and other combustion- and fuels-related issues.

Research Value:

The Combustion Performance and Emissions Control program focuses on a holistic approach to combustion and fuel quality impacts, including emissions, performance, and reliability.

- Potential to achieve substantial cost savings through improved boiler performance, regain lost capacity, and benefit from increased flexibility in fuel sourcing.
- Avoiding a single forced outage due to fireside corrosion, circumferential cracking, or slagging and fouling can save more than $1 million per unit.
- Enhancing NO_X reductions with cost-effective combustion modifications, even on units equipped with selective catalytic reduction (SCR) systems, may yield significant revenues in an anticipated NOx credit market.

Program Title: Continuous Emissions Monitoring

Program Description:

Coal-fired power plants are in increased need of robust, accurate, and certifiable continuous emissions monitors (CEMs) for mercury, particulate matter (PM), acid gases, and potentially selenium. Experience with continuous mercury monitors (CMMs) remains limited, and their operation and maintenance (O&M) are labor-intensive. PM monitors are not yet used routinely, and their calibration currently is cumbersome, while hydrochloric acid (HCl) is not measured continuously. Of particular interest to a number of power companies are instruments that continuously measure solid (filterable) and aerosol (condensable) PM, acid gases (e.g., HCl, hydrofluoric acid [HF], and hydrogen cyanide [HCN]), and ammonia in post-flue gas desulfurization (FGD) stack conditions. Enabling technology needs for these species include:

- Operation and maintenance practices for mercury CEMs that enable operators to approach the O&M now achieved with criteria pollutant CEMS through harvesting the lessons learned by early CMMs users;
- Sampling techniques that lend themselves to the very low pollutant concentrations that may be required by Mercury and Air Toxics Standards (MATS) limits, especially for mercury;
- Acceptable ways to calibrate PM monitors at plants with wet stacks without having to disrupt the operation of the wet SO_2 control;

- Droplet monitors to measure condensables; and
- Direct measurement of mass emissions to overcome the uncertainty of indirect measurements as PM characteristics change.

Research Value:

EPRI's Continuous Emissions Monitoring program helps members evaluate and implement monitoring options to achieve measurement needs using robust, accurate, and easy-to-operate instruments. Benefits include:

- Save months of plant instrument technician and environmental engineer time needed to make newly procured monitoring technologies work;
- Prepare for anticipated mercury measurement requirements below today's proven quantization levels, as well as PM measurements (filterable and condensable) as surrogates for non-mercury metal hazardous air pollutants (HAPs);
- Obtain credible, non-ash-property-dependent particulate mass emission measurements made in the stack to benefit from particulate capture by the SO_2 control;
- Ensure that the American Society of Testing and Materials (ASTM) receives the data needed to adopt a digital opacity method for power plant stacks as an objective alternative to human observations;
- Optimize NOx and sulfur trioxide (SO_3) control operations, or flue gas conditioning for electrostatic precipitator (ESP) performance, via *in situ* continuous measurement systems for ammonia (NH_3), SO_3, and sulfuric acid; and
- Potentially save hundreds of thousands of dollars per stack if advanced "sensors-on-a-chip" are developed and accepted for power plant applications.

Program Title: Cyber Security and Privacy

Program Description:

EPRI's Cyber Security and Privacy program addresses the emerging threats to an interconnected electric sector 1hrough cross-sector collaborative research on cyber security technology, standards, and business processes. The program also undertakes collaborative research with industry to assess technologies and controls on data privacy for the electric grid.

Research Value:

The rapid pace of change in the electric sector creates a challenging environment for asset owners and operators to monitor the activities of industry groups, develop an understanding of the security impacts of new technologies, and maintain the right internal resources for assessing technologies. The Cyber Security and Privacy program intends to address this challenge by providing security tools, architectures, guidelines, and testing results to its members.

Participation in EPRI's Cyber Security and Privacy program may provide

- better understanding of industry and government collaborative efforts, and where members should "plug in" to current activities;
- guidance on developing cyber security strategies and selection requirements;
- techniques for assessing and monitoring risk;
- practical approaches to mitigating legacy system risk;
- early identification of security gaps through lab assessments of security technology; and
- technology to support managing cyber incidents and increasing the cyber security resiliency of the grid.

Program Title: Effluent Guidelines and Water Quality Management

Program Description:

EPRI's Effluent Guidelines and Water Quality Management program delivers scientific data to characterize power plant wastewaters and conducts data analysis to inform potential revisions to effluent guidelines for the electric power industry. The program also develops sound guidelines for effective management of low-volume, non-ash wastewater streams as well as ash pond chemistry and discharges; provides cost-effective and reliable options for wastewater treatment to remove chemicals such as trace metals; and develops practical tools for biofouling control using nontoxic alternatives to oxidizing biocides such as chlorine.

Research Value:

Program research helps facility owners develop effective effluent guideline compliance strategies. As water discharge permit limits for trace metals and nutrients tighten, power companies require accurate analytical methods, reliable data, and independent performance and cost data for plant wastewater management. In addition, as power plants install air pollution control technologies to meet the new hazardous air pollutant standards, these technologies—such as bromide addition or trona injection—may also impact wastewater and its treatability. Key motivations for this research include the following:

The best scientific data available are needed for developing effluent guideline standards.

- Evaluation of the cross-media impact of air pollution control technologies on wastewater discharges is needed.
- Inaccurate analytical methods may lead to false permit violations, increased capital and operating/maintenance costs for wastewater treatment, and higher likelihood of permit violations.
- Additional water treatment may be required for plants to achieve ash pond permit limits.
- Limited options exist for nonoxidizing alternatives to chlorine.

Program Title: Electric Transportation

Program Description:

The first mass-produced PEVs charged at relatively low rates (up to 3.5 kW), traveled between 35 and 75 miles (56 to 120 km) per charge, and had little public infrastructure to support them. Within two years, a battery electric vehicle had been introduced with 265 miles of range alongside a plug-in hybrid electric vehicle (PHEV) with 10 miles of electric range. Charging rates in new vehicle models increased dramatically from 3.5 kW to 6.6–19.2 kW. Electric vehicles from sedans to delivery trucks began to see increased usage in fleets, and thousands of public and workplace charging stations were installed. A "fast" charging network began to emerge, using dc electricity at levels of 50 to 90 kW to charge electric vehicles in as little as 20 minutes. In addition, automotive manufacturers developed the first production charging systems that enable electric vehicles to provide power to the grid.

Nearly all major automakers are reaching out to the utility industry to help develop and standardize infrastructure for recharging PEVs. Utility customers, including local governments, are looking to utilities to provide guidance on the design, location, and installation of charging infrastructure. Utilities need to understand the system impacts and customer requirements associated with plug-in vehicles while conducting the necessary preparations to support the rollout and adoption of PEVs by their residential, commercial, and industrial customers. Electricity is the only potential energy source for transportation that addresses the simultaneous need for fuel diversity, energy security, reductions in greenhouse gas emissions, and improvements in air quality that is widely available and produced domestically. Electric utilities must understand the paradigm shift that will occur with an inevitable transition of transportation energy from petroleum to electricity, as well as their new role as a fuel provider for vehicles. In addition, vehicle fleets can offset high fuel costs and meet environmental requirements by incorporating PHEVs or battery electric vehicles (BEVs) into their operations. Adoption of non-road electric vehicles at customer sites can reduce fuel costs and increase customer satisfaction.

Research Value:

The Electric Transportation program conducts research and development on vehicle and infrastructure technologies that enable the use of electricity as a transportation fuel. The program has played a leading role in the development of PEV technologies that are at the forefront of automotive industry development efforts. The Electric Power Research Institute (EPRI) also serves as a focal point of collaboration between the automotive and utility industries for the development of infrastructure standards, vehicle demonstration programs, and advanced infrastructure technologies. EPRI’s non-road electric transportation efforts have demonstrated the cost-effective use of battery electric vehicles in numerous commercial and industrial applications, and serve as the technical foundation for successful, customer-focused utility non-road electric transportation market expansion programs.

Program Title: Energy Storage

Program Description:

Energy storage is attracting increasing interest from utilities and regulators as a flexible grid asset, able to address issues caused by the increasing penetration of variable renewable resources, as well as increase system reliability. Storage may also provide temporary solutions for regional and local capacity shortages, and may provide relief to localized transmission and distribution congestion.

Advances in storage technology, as well as investment in production capacity, have begun to reduce the price of energy storage technologies, bringing them to the verge of cost-effectiveness in some applications. Nevertheless, the cost-benefit relationship for storage is still marginal in most instances, and cost-effective use of storage requires the user to take full advantage of potential benefit streams. The various applications that contribute to the value of storage have different requirements, however, and the ways in which these requirements are coincident or competitive are yet to be understood.

Many of the solutions provided by energy storage may also be possible through the use of distributed generation technologies fueled by natural gas. Technologies such as fuel cells, microturbines and small reciprocating generators are still relatively expensive in terms of installed capital cost, but low fuel costs and opportunities offered by the application of combined-heat-and-power (CHP) architectures may make them increasingly cost-effective options in the future.

While storage and distributed generation options are rapidly maturing and are beginning to become practical in grid applications, there are still significant challenges to overcome:

- Understanding the performance characteristics, cost, and expected service lifetime, as well as the relative maturity, of various storage and distributed generation technologies in grid applications
- Identifying the additional hardware, software, and user interfaces required to implement storage on the grid
- Defining the technical requirements for various applications of energy storage
- Understanding the possible impact on transmission and distribution system planning, as well as construction and operations
- Assessing the various uses of storage, including the performance requirements, cost break-even points, and valuation
- Understanding the effects of policy and regulation on the adoption and cost-effectiveness of storage applications
- Understanding the environmental impact of storage application
- Research projects that address these challenges can help move storage technologies forward and enhance the value of storage to society.

Research Value:

The program’s research focuses on facilitating the availability of grid-ready energy storage options for utility applications, as well as informing utilities, regulators, government agencies, and the general public on technical and economic issues, opportunities, and challenges related to the use of utility-scale energy storage and distributed generation.

The EPRI collaborative research environment enables engagement with utilities, technology developers, and other stakeholders to test and evaluate new technologies and products, define functional requirements for energy storage systems, develop tools and methodologies to analyze the effects of storage on the power delivery network and optimize their use, and create approaches that assess the business cases for storage in various applications and regions.

Through this program, utilities, government bodies, storage developers and vendors, electricity end users, and other stakeholders will be better informed about the opportunities and challenges facing electric energy storage and distributed generation technologies and products deployed on the grid.

Program Title: Fish Protection at Steam Electric Power Plants

Program Description:

EPRI's fish protection program assesses the effects of thermal power plant cooling system operation on fish and other aquatic life. Results support the development of effective intake and discharge protection approaches for workable operating permits at individual facilities. By improving the technical basis for regulatory, permitting, and operating decisions, this program serves the public interest in effective resource management while meeting industrywide imperatives to control costs, ensure or even exceed environmental compliance, and manage business risks.

Research Value:

EPRI performs extensive research on fish protection technologies for cooling water intake structures. The research has demonstrated the site-specific nature of aquatic impacts, the efficacy of various technologies for different fish and shellfish species, improvements to technologies to enhance survival rates, and technology costs and value of the benefits achieved. This program helps environmental compliance managers and power plant operators effectively manage water resources and protect aquatic communities in accordance with fish protection regulations. Program information may reduce compliance costs, enhance permitting processes, and identify cost-effective management strategies. The research supports the development of viable intake and discharge protection approaches for cost-effective operating permits at individual facilities. It also provides access to new and enhanced fish protection technologies, information on fish protection–related issues, and information on cost, economic, environmental, and electric system impacts of impingement and entrainment reduction standards. The public will benefit from minimized impacts to aquatic environments and cost-effective compliance strategies that will have minimal impact on electricity rates.

EPRI recently completed a study of the estimated costs, benefits, impacts, and environmental consequences of a potential national requirement to retrofit cooling towers on all once-through facilities. The estimated costs exceed $100 billion on a net present value basis. The results have been used to inform the rulemaking process for the §316(b) water intake regulations to ensure that the final regulations consider all aspects of the issue and technology options. The results from these studies are directly transferable to international applications as well.

Program Title: Fossil Materials and Repair

Program Description:

EPRI's Fossil Materials and Repair program provides the integrated materials selection guidance, repair and welding technologies, and corrosion mitigation methods to improve equipment performance, reliability, and safety.

Research in this program supports EPRI's Long-Term Operations: Aging Management of Fossil Assets Under Conditions of Flexible Operation R&D roadmap. The goal of the R&D detailed in this roadmap is to produce technologies that can enable continued operation of an aging fleet of fossil fuel plants while adapting to more flexible operations. The difficulty of this challenge is increasing as more small subcritical plants are retired and larger supercritical plants face increasing load-following responsibilities.

Research in this program also supports EPRI's Near-Zero Emissions roadmaps with a particular connection to the Increased Energy Conversion Efficiency R&D roadmap, through development of high-pressure, high-temperature alloys that can be used in producing advanced ultrasupercritical materials. These materials enable development of new fossil-fueled power plants with much higher combustion efficiencies, resulting in fewer emissions.

Research Value:

Safety and availability loss due to failures are two key issues driving R&D on major fossil power plant components, especially in older plants. Improved efficiency and reliability are two reasons for the selection of new materials for retrofit and new-build projects. EPRI's Materials and Chemistry programs provide data on critical material degradation mechanisms, conduct materials and chemistry-related R&D for advanced generation technologies, and quantify the benefits of improvements. These programs help utilities balance the risks and costs of the largest, most costly equipment, and focus on using new technologies to create solutions. Members of the Fossil Materials and Repair program can use the R&D to:

- Increase availability through better understanding of plant materials;
- Minimize, with the goal to eliminate, repeat failures and equipment damage, and reduce outage frequency and duration by using improved knowledge of damage mechanisms and tools for life-assessment methods;
- Reduce failures from high- and low-temperature corrosion;
- Obtain in-depth knowledge of advanced ferritic and austenitic alloys and processes used to fabricate and join these alloys;
- Use new and advanced repair technologies; and
- Maximize component life through improved materials selection guidance and procurement specifications.

Program Title: Generation Maintenance Applications Center (GenMAC)

Program Description:

EPRI's Generation Maintenance Applications Center (GenMAC) program (Program 104) provides practical information for improving plant maintenance-related operations and maintenance (O&M) processes, reliability, and cost through collaboration with participating organizations.

Research Value:

EPRI's Generation Operations and Maintenance programs develop advanced processes and related technologies that support improved plant reliability and reduced maintenance costs. The programs address the key tactical challenges facing plant owners in predictive maintenance, work management, conduct of operations, instrumentation, workforce, condition monitoring, and risk. These programs are highly collaborative in nature, providing forums for EPRI members to jointly resolve issues, improve processes, and identify research gaps. Members of the GenMAC program can use the R&D to:

- Improve reliability through guidelines that present the most current technology-based preventive and condition-based maintenance solutions.
- Find faster solutions to day-to-day maintenance issues, following proven techniques and access to hotline support.
- Develop strategies to resolve urgent problems, using guidelines developed according to member priorities.
- Improve staff knowledge and competence through training that addresses industrywide needs.
- Develop better maintenance practices and reduce human error through the use of clear, easy-to-read guidelines, complete with precautions and tips for error avoidance.
- Make improved maintenance guidance available for the next generation of electrical production equipment, added environmental systems, and balance-of-plant (BOP) components in newly designed power generating units.

Program Title: Integrated Environmental Controls

Program Description:

EPRI's Integrated Environmental Controls (IEC) program develops technologies and provides independent engineering evaluations and performance and cost assessments of systems that holistically control HAPs (such as mercury), particulates, and SO_2, working in an integrated fashion with programs that address the impacts of these systems on effluent discharge, compliance monitoring, and coal combustion product (such as fly ash and gypsum) use.

The ultimate goal of EPRI's Near-Zero Emissions: Hazardous Air Pollutants Compliance R&D roadmap is to produce technologies, such as advanced sorbents, that are capable of achieving "near-zero" levels of HAPS, such as mercury and selenium. The program supports this roadmap by providing real-world data on the performance of existing sorbents and SCR/FGD HAPS co-benefits. As advanced sorbents and

other technologies are developed through the roadmap effort, the program will assess these technologies under full-scale conditions.

The ultimate goal of EPRI's Maintaining NZE Throughout Flexible Operations R&D roadmap is to enable emissions compliance throughout the load range (including low load), during load transients, and considering changes in fuel quality and blend ratios. This program supports this roadmap by assessing the performance of environmental control technologies during these conditions. As NZE technologies are developed through the roadmap effort, the intent of the program is to assess these technologies under full-scale conditions.

Research Value:

The program's R&D efforts focus on the development and demonstration of more cost-effective, robust controls for all power plant configurations/fuels that must meet stringent limits for mercury (Hg), non-Hg trace metals, acid gases, and particulates (primarily through the deployment of ESPs and baghouses) in order to support enacted regulations such as Mercury and Air Toxics Standards (MATS), as well as future regulations. Attention will be paid to minimizing the overall costs and risks, including those for the controls; their impacts on criteria air pollutants, liquid discharges, coal combustion products; and system reliability. Program members can benefit through:

- Independent, long-term data to support and weigh the risks of compliance options
- Quantifiable assessments of the impact of cycling and malfunctions on HAPs control effectiveness, as input into compliance strategy analyses
- Solutions for pollutants for which controls are in the process of being developed, such as mercury at plants burning high-sulfur coals, as well as selenium (to minimize wastewater issues)
- Strategies to reduce SO_3
- Lower-cost emerging technologies such as on-site activated carbon production, fixed-structure adsorbents, screens to capture additional particulates downstream of ESPs, etc.
- Flue gas desulfurization (FGD) operational practices, additives, or limestone properties that enhance capture of soluble HAPs
- Comprehensive reviews of emerging multi-pollutant technologies, including capital and operating costs
- Optimized ESP performance to avoid costs of replacement in many applications
- Savings in avoided replacement power costs due to opacity-driven derates
- For baghouses, extended bag life and lower pressure drop through better fabrics
- Continued ash sales and reduced reagent costs through improved operational modifications
- Improved effectiveness of activated carbon mercury control through alternatives to SO_3 flue gas conditioning for high particulate matter (PM) capture in ESPs
- Improved performance of all particulate and SO2 controls through better O&M practices

Program Title: Maintenance Management & Technology

Program Description:

EPRI's Maintenance Management & Technology program helps plant owners and operators address common industry challenges related to maintenance program structure and functionality. EPRI works with top-performing organizations to collaboratively research and develop maintenance processes and technologies that help improve the safety, reliability, and performance of plant staff and equipment. Research projects include efforts to identify causes of potential equipment failures, effectively monitor and assess the condition of equipment, and proactively plan for equipment maintenance. A significant part of these research efforts involves the management and communication of data and information necessary for monitoring and maintaining power plant assets.

Research Value:

EPRI's Maintenance Management & Technology program helps its members transition to, and sustain, the most efficient and effective practices associated with plant maintenance. The key attributes of an optimized program are adoption of information management needed to support a condition-based approach to maintenance, and replacement of costly corrective maintenance with proactive preventive maintenance. The focus of this program is on providing an integrated solution that addresses the needs for processes, technologies, and skilled people, which enables condition-based maintenance. Using the results of this program, members can:

- Achieve operation and maintenance excellence through an integrated approach that includes process improvements, related technologies, and knowledge management;
- Address current issues associated with the need for flexible plant operations, asset retirement, and new reliability standards;
- Better standardize O&M programs, processes, and procedures; and
- Increase plant availability and reliability through improved maintenance management and staff performance.

Program Title: Operations Management & Technology

Program Description:

EPRI's Operations Management & Technology program provides a forum for the development and evaluation of new and improved fossil plant operations technologies, work policies, and practices that raise the standards of operational performance.

Research Value:

EPRI's Operations Management & Technology program develops advanced processes and related technologies that support improved plant reliability and reduced costs. The program addresses the key tactical challenges facing fossil plant owners relating to management, conduct of operations, workforce performance, equipment monitoring, and risk. This program is highly collaborative in nature, providing

forums for EPRI members to jointly resolve issues, improve processes, and identify research gaps. Members of the program receive:

- Guidelines that provide tools for excellence in plant operations
- Forum for industry information exchange
- Improved plant operations through support from EPRI technical staff
- Opportunities for enhanced plant operations through understanding of new technology applications

Program Title: Post-Combustion NOx Control

Program Description:

EPRI's Post-Combustion NO_X Control program focuses on minimizing total costs and maximizing reliability and performance of SCR and other post-combustion NO_X control systems deployed to meet anticipated NO_X and mercury emissions limits.

The ultimate goal of EPRI's Near-Zero Emissions: Cost-Effective and Reliable NOx Levels R&D roadmap is to produce advanced NOx control technologies, such as advanced NOx /ammonia mixing and catalysts formulations, that are capable of achieving "near-zero" NOx levels. The program supports this roadmap by providing real-world data on the performance of existing SCR systems. This is done through both the P73 base- and supplemental-funded efforts. As advanced mixing methods and catalyst formulations and other technologies are developed through the roadmap effort, the program assesses these technologies under full-scale conditions.

Research Value:

The industry needs documentation of best practices and resolution of critical operability issues to minimize costs and maximize SCR system performance. In addition, in anticipation of more stringent NOx limits, methods of lowering SCR outlet NOx levels from both existing and new SCR systems—such as improved reagent/NOx mixing upstream of the catalyst, advanced instrumentation and control, or improved catalyst formulations—need to be developed and demonstrated. Issues associated with lower-quality fuels (which may contain high levels of arsenic or phosphorous or contain high percentages of sulfur) need to be resolved. Finally, in anticipation of impending mercury and other hazardous air pollutants (HAPS) regulations such as the EPA Mercury and Air Toxics Standard (MATS), SCR duties will be expanded to include co-benefits achieved from maximizing mercury oxidation while concurrently minimizing SO3 formation.

Program Title: Power Plant Multimedia Toxics Characterization

Program Description:

EPRI's Power Plant Multimedia Toxics Characterization program provides methods and tools for measuring and managing potentially toxic emissions and discharges from power plants, and prepares power companies to meet evolving regulations. The program helps industry, the scientific community, and the public evaluate discrete multimedia environmental impacts, as well as the interplay between the receiving media that might result from changes in fuel composition or fuel blend, use of natural gas, implementation of new or enhanced control technologies, or changes in plant operating practices.

Research Value:

This program focuses on clarifying the chemistry and partitioning of pollutants in power plant process streams. EPRI began its power plant toxics characterization research well before the 1990 Clean Air Act Amendments that established HAPs controls. This longevity positions the program as a visionary effort that anticipates issues, helps inform evolving regulations, and develops practical solutions. Characterization of power plant emissions and discharges requires accurate and sensitive analytical methods; where these do not exist, this program supports method development studies. The research enhances understanding of pollutant chemistry and provides methods and tools to accurately characterize the chemicals; this work facilitates development of more-effective control strategies for emissions management. This research also assists with permitting and reporting processes by providing credible emissions data. The program also addresses environmental impacts from use of natural gas as well as alternative fuels such as biomass. The Power Plant Multimedia Toxics Database is the most comprehensive database available on HAPs emissions. It is an online database containing primary information on the concentration and fate of substances in power plant process and discharge streams. While this database has significant value in providing historical information on power plant emissions for regulatory purposes in the United States, there are also direct applications of the data for electric power companies managing pollutants in process streams in the international setting. The program also assists with Toxics Release Inventory (TRI) reporting and record-keeping requirements and helps minimize the cost of overall environmental compliance and management.

Program Title: Renewable Energy Economics and Technology Status

Program Description:

EPRI’s Renewable Energy Economics and Technology Status program provides a portfolio of collaborative opportunities that

- Assesses the status, performance, and cost of renewable generating technologies; and
- Conducts targeted research and development to address critical issues relative to the economics of renewable generation resources.

Participation in this program includes results of economic and technology assessments performed for all renewable resource areas, including wind, solar, biomass, geothermal, and waterpower.

Research Value:

Renewable energy resources and their application in generating electricity most often are considered collectively when addressing key drivers in renewable energy deployment, including renewable portfolio standards, energy security, greenhouse gas emission reductions, and other issues. However, wind, solar photovoltaic, solar thermal, biomass, geothermal, and waterpower energy options are largely unrelated technologically; each has its own developmental status, readiness timeline, and economic and technology challenges. EPRI's Renewable Energy Technology Status program assesses the cost-effectiveness of existing renewables technologies and reports on new renewables technologies and applications that could ultimately lead to better performance and cost-competitive renewable generation. This program also provides independent cost and performance information for renewable technologies, helping participants to

- capitalize on market opportunities for renewable compliance and power purchases for improved decision making,
- identify the appropriate role of diverse renewable resources in expanding new and sustainable generation capacity, and
- apply results from research efforts to help guide investments in renewable energy and support long-term generation planning efforts.

Through collaboration with key industry stakeholders, EPRI members guide development and demonstration of technologies that will optimize operating efficiency, reduce overall costs, and facilitate deployment of large-scale renewable generation.

Program Title: Solar

Program Description:

EPRI’s Solar Program offers a comprehensive collection of projects that span all types of solar power generation technologies. For example, EPRI is undertaking research to assist electricity providers in understanding key factors that may influence the ability of PV plants to deliver high-value power and be effectively integrated within the larger electricity infrastructure as penetration levels increase. EPRI’s research program also supports the development of innovative CSP technologies and configurations that can provide firm, dispatchable power at lower cost. The research portfolio addresses industry and societal needs through:

- Cost, performance, and status assessments of solar generating technologies
- O&M guidelines for improved asset management
- Field testing of promising technologies to reduce performance uncertainty and assess reliability
- Grid integration analyses and consideration of plant design, siting, and implementation factors that influence system output and variability
- Feasibility studies and applications analyses to evaluate emerging technology options and assess environmental impacts
- Collaboration with the broader solar industry through workshops, tours, and other events

Research Value:

To facilitate increased deployment of solar technologies, EPRI's plan pursues an improved understanding of technology development, system design, system reliability, and system economics. The key research themes that will significantly improve the information base required for sound decision making include:

- Tracking solar technology and balance of system component development
- Conducting feasibility studies and developing preliminary designs for advanced solar technologies
- Identifying PV project design insights that maximize production and minimize system output variability
- Developing enterprise-wide O&M strategies for distributed and central station plants
- Field testing technologies to characterize performance and reliability
- Monitoring lessons learned from industry demonstration projects

Program Title: Steam Turbines-Generators and Auxiliary Systems

Program Description:

EPRI's Steam Turbines-Generators and Auxiliary Systems program supports continuous improvement in the safety and availability of steam turbines, generators, and auxiliary systems. It supports all aspects of turbine-generator component life-cycle management, including evaluation and procurement of system upgrades. This support is accomplished through applied research in component life management, preventive maintenance, condition assessment, and controls.

The program also fosters collaboration among all industry stakeholders to support proactive strategies and best-practice sharing to solve industry reliability issues. The ongoing research and technology transfer activities fully support the needs of member organizations seeking to improve knowledge and effectiveness of new turbine-generator system engineers.

Research in this program supports EPRI's Long-Term Operations: Aging Management of Fossil Assets Under Conditions of Flexible Operation R&D roadmap. The goal of the R&D detailed in this roadmap is to produce technologies that can enable continued operation of an aging fleet of fossil fuel plants while adapting to more flexible operations. The difficulty of this challenge is increasing as more small subcritical plants are retired and larger supercritical plants face increasing load-following responsibilities. The program supports this roadmap by performing research to understand flexible operation damage mechanisms from a component and materials standpoint. New designs and life-assessment technologies are being developed to address the needs of the current fleet as well as newer, high-efficiency plants utilizing state-of-the-art materials.

Research Value:

Using an integrated approach that incorporates work from related EPRI programs, this program focuses on reducing operations and maintenance (O&M) costs, managing risk, maximizing plant performance, providing technical support for plant staff, and producing information to support upgrade studies and asset management strategies. Research results inform run/repair/replace decisions regarding

run/repair/replace and provide detailed guidance for planning and performing critical overhaul and maintenance activities.

By participating in this program, plant operators obtain information that they can use to:

- Reduce maintenance costs
- Maintain high asset availability
- Take proactive measures to lower operating and regulatory risks
- Implement cost-effective thermal performance improvements
- Extend component life
- Increase staff technical expertise and awareness of industry issues

Involvement in the program will help:

- Educate participants about turbine-generator (T-G) issues and solutions
- Provide opportunities to share information with industry experts, engineers, major T-G original equipment manufacturers (OEMs), and vendor/service providers worldwide

Program Title: Substations

Program Description:

This program helps substation owners enhance safety, reliability, equipment life, and performance, as well as prioritize their asset investments and allocations of limited resources. It offers a portfolio of tools and technologies such as risk-based asset and fleet management decision support analytics and transformer monitoring. The program also provides knowledge sources such as failure databases and aging models to improve equipment life management and training materials for substation personnel.

Research Value:

This research and development (R&D) program has been grouped into two broad classes: equipment reliability and industry issues. Collectively, the goal is to develop tools, techniques, and methodologies that help improve substation equipment specification, procurement, inspection, assessment, maintenance, and risk-based asset management at a utility. The information provided through the collection of projects in this program will provide members with information that can help with the following:

- Develop risk-based fleet management programs
- Extend equipment life with maintenance guidelines
- Reduce maintenance costs via condition-based maintenance
- Improve sulfur hexafluoride (SF6) management
- Increase awareness of high-impact low-frequency (HILF) events and be better prepared for these events
- Implement predictive maintenance practices for reduced outages

- Reduce failures of critical assets
- Reduce switching errors, increase worker safety, and prevent outages

Program Title: T&D and ROW Environmental Issues

Program Description:

EPRI's T&D and ROW Environmental Issues program delivers information, tools, and methods for preventing, characterizing, and remediating soil and water contamination at transmission and distribution (T&D) facilities, as well as for designing and retrofitting T&D facilities. Data and products from the program support development of scientifically sound regulations and cleanup standards for chemicals associated with T&D and ROW facilities and operations, as well as providing engineering, science, and business tools to aid in their management. The program also provides balanced, cost-effective solutions for addressing the economic and environmental challenges of siting, developing, managing, and upgrading T&D ROWs. Innovative tools, practical guidance, and state-of-the-art information help companies control ROW costs and improve service reliability while protecting natural resources and addressing public, regulatory, and other stakeholder concerns.

Research Value:

Program research has documented savings of $10 million per year industrywide for used oil management, $1.5 billion per year for management of creosote and pentachlorophenol utility poles as nonhazardous waste, and $500,000 at a single site by demonstration of the true risk of a mineral oil spill. The program also helped save one company $1 million in spill prevention, control, and countermeasure (SPCC) regulatory compliance costs. Program research also expedites transmission line siting and ensures system reliability by addressing ecological issues associated with vegetation management standards, reducing ROW maintenance costs, and enhancing ecological value through Integrated Vegetation Management (IVM). The program also improves a utility's ability to assess and prevent bird strike impacts, enhances ecosystems along T&D ROWs, and provides materials to help companies communicate with regulators and address public concerns. This program provides

- scientific information and data to help power companies make cost-effective decisions on T&D ROW equipment life-cycle management choices and remedial approaches, based upon environmental risk factors;
- characterization information on substances related to environmental and human health risk, and strategies to reduce financial risk and operations and management costs;
- constructive engagement on federal oversight of transmission vegetation management, and information for regulatory development; and
- opportunities for proactive environmental management to decrease potential for outages and fines, and shorter time frames for siting new transmission lines.

Non-EPRI Research Projects

Program Title: Carbon Management Research Group (CMRG) at the University of Kentucky Center for Applied Energy Research (UK-CAER)

Program Description and Benefit:

This multi-year project investigates carbon management through a consortium (the CMRG) composed of LG&E and KU, Electric Power Research Institute (EPRI-Palo Alto, CA), Kentucky Power (AEP), Duke Energy, the University of Kentucky, and the Kentucky Cabinet for Energy & Environment. This research investigates post-combustion CO_2 capture process for the existing coal-fired fleet and involves the development and heat optimization of an amine-based $C0_2$ Scrubber Process, including the evaluation and development of an integrated CO_2 Capture/Fertilizer Byproduct Process. In-situ Oxy-fuel Combustion $C0_2$ purification process for the future power plant will be investigated using Pressurized Chemical Looping Combustion Combined Cycle (PCLC-CC) approach. The end result of this work will provide Process Simulation and Optimization of $C0_2$ Capture Technologies for Existing Power Plants.

UK-CAER was awarded $14,500,000 from the Department of Energy using cost share funding from the CMRG for a slipstream pilot plant at the E. W. Brown Generating Station. This is about 10 times larger than the "bench-scale" project currently undertaken and moves the process closer to scale-up and proof of concept.

Insight into the application of CO_2 Capture Process will provide planning and verification of potential technologies to remove carbon from flue gas streams. This information will provide a basis for decision making and economic feasibility evaluations. The energy requirements and affect to plant efficiency are evaluated.

Program Title: Carbon Capture Pilot Plant Project (C2P3) and the Texas Carbon Management Research Group (TxCMP)

Program Description and Benefit:

TxCMP includes 17 Ph.D. students, 2 M.S. student, 4 faculty, and 2 professionals working on CO_2 rate and solubility measurements, amine degradation, systems modeling, pilot plant testing, sequestration modeling, and systems analysis. The effort is currently funded from 33 sponsors within the TxCMP and other affiliated activities, including 10 process suppliers (Alstom Power, Babcock & Wilcox, Doosan-Babcock, GTC Technology, IFP, Shell /Cansolv, Mitsubishi Heavy Industries, URS, Powerspan, HTCPureEnergy), 8 power companies (NRG Energy, Southern Company, SaskPower, RWEnpower, E.ON, EPRI, Arch Coal, LG&E and KU), 6 oil companies (Aramco, Chevron, Phillips 66, ExxonMobil, Total, Statoil), 8 others (AspenTech, Codexis, GE, Huntsman Chemical, CSIRO, DOE, DNV, TNO) and one equipment donor (Emerson).

C2P3 is testing at 0.1 to 0.5 MW the innovative solvent and process concepts developed by the TxCMP at the University of Texas. The existing pilot plant in the Separations Research Program (SRP) at the Pickle Research Campus will demonstrate energy and mass transfer performance with air/CO_2 in

campaigns that last for 3 to 6 weeks. Two or more additional pilot plants will be used to provide real coal-fired flue gas at 0.1 and 0.5 MW to test solvent robustness for 3 to 6 months. Australia is funding a 0.1 MW pilot plant at Tarong that will be managed by CSIRO. The U.S. DOE is funding a 0.5 MW pilot plant at the National Carbon Test Center managed by Southern Company at Wilsonville, Alabama. Both of these programs have agreed to consider concentrated piperazine in their testing.

TxCMP has established that concentrated piperazine is a superior solvent with twice the capacity and CO_2 absorption rate of 30 wt % monoethanolamine and excellent thermal and oxidative stability. Concentrated (8 m) piperazine with high temperature/pressure regeneration has proven to be an effective alternative in three pilot campaigns at SRP.

The DOE is providing $3 million as comprehensive funding for these pilot plant activities. URS is the lead contractor on this DOE effort. Trimeric and the University are subcontractors. This proposal includes 20% cost-sharing from the C2P3. Long term operation at Tarong will be supported by the Australian government and at Wilsonville by DOE.

Program Title: National electric Energy Testing Research and Application Center (NEETRAC) at Georgia Institute of Technology

Program Description and Benefit:

NEETRAC is a self-supporting, membership based center within the School of Electrical and Computer Engineering at Georgia Tech. The goal is to help the electric utility industry solve the everyday problems associated with the complex task of transmitting and distributing electric energy reliably and efficiently. NEETRAC staff and facilities combine with the significant technological resources of Georgia Tech to provide a wide array of analytical, engineering, research and testing services – on both collaborative and proprietary projects. NEETRAC has high voltage, medium voltage, environmental and mechanical testing facilities for evaluating a wide variety of transmission and distribution system components.

NEETRAC's engineers and technicians have many years of experience conducting goal-oriented research and testing projects for the electric power industry. They work with electric utilities and their suppliers to solve problems related to the transmission, distribution and utilization of electric energy. They are actively involved in industry committees (ASTM, IEEE, ANSI, AEIC and others) that write many of the standards and specifications used to evaluate electric utility products.

Outside of their day-to-day services NEETRAC conducts research on different technology to improve the safety and reliability of T&D as well reduce costs. Some recent projects include:

- Stick-on sensor technology
- Next generation PMU evaluation
- On-line condition assessment of aging CCVTs and carrier traps
- Thermochromatic pain monitoring
- Smart power grid test-bed for cyber security evaluation
- Transmission line traveling wave characteristics for optimizing arrester placement

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

Response to Attorney General's Initial Requests for Information
Dated January 8, 2015

Question No. 88

Responding Witness: Daniel K. Arbough / Christopher M. Garrett

Q-88. Reserve Accounts. Provide the monthly balances in each reserve account (e.g., injuries and damages reserve account) for each year 2010 through 2014 and the fully forecasted test period. This listing should include the monthly debits and credits to the reserve accounts.

A-88. See attached for each year 2010 through 2014 for the actual monthly reserve account balances. The balance at August 2014, the last actual period in the base test year, represents the reserve balance for the fully forecasted test year as no change in the reserve balance is included in the budget. The balance in reserve account 232 (Injuries and Damages reserve) for the fully forecasted test year is $705,342. The balance in reserve account 228.2 (Workers' Compensation reserve) for the fully forecasted test year is $2,184,308.

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its current and former subsidiaries

Central Networks - collectively Central Networks East plc, Central Networks Limited and certain other related assets and liabilities. On April 1, 2011, PPL WEM Holdings plc (formerly WPD Investment Holdings Limited) purchased all of the outstanding ordinary share capital of these companies from E.ON AG subsidiaries. Central Networks West plc (subsequently renamed Western Power Distribution (West Midlands) plc), wholly owned by Central Networks Limited (subsequently renamed WPD Midlands Holdings Limited), and Central Networks East plc (subsequently renamed Western Power Distribution (East Midlands) plc) are British regional electricity distribution utility companies.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

LKE - LG&E and KU Energy LLC (formerly E.ON U.S. LLC), a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries. PPL acquired E.ON U.S. LLC in November 2010 and changed the name to LG&E and KU Energy LLC. Within the context of this document, references to LKE also relate to the consolidated entity.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides services for LKE and its subsidiaries. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

PPL - PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, LKE and other subsidiaries.

PPL Capital Funding - PPL Capital Funding, Inc., a wholly owned financing subsidiary of PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL that transmits and distributes electricity in its Pennsylvania service area and provides electric supply to retail customers in this area as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Energy Supply, PPL Global (effective January 2011) and other subsidiaries.

PPL EnergyPlus - PPL EnergyPlus, LLC, a subsidiary of PPL Energy Supply that markets and trades wholesale and retail electricity and gas, and supplies energy and energy services in competitive markets.

PPL Energy Supply - PPL Energy Supply, LLC, a subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interests of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding.

PPL Gas Utilities - PPL Gas Utilities Corporation, which was a regulated utility subsidiary of PPL until its sale in October 2008, provided natural gas distribution, transmission and storage services, and the competitive sale of propane.

PPL Generation - PPL Generation, LLC, a subsidiary of PPL Energy Supply that owns and operates U.S. generating facilities through various subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that primarily owns and operates a business in the U.K., WPD, that is focused on the regulated distribution of electricity. In January 2011, PPL Energy Supply, PPL Global's former parent, distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to its parent, PPL Energy Funding.

PPL Holtwood - PPL Holtwood, LLC, a subsidiary of PPL Generation that owns hydroelectric generating operations in Pennsylvania.

PPL Investment Corp. - PPL Investment Corporation, a subsidiary of PPL Energy Supply.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL Martins Creek - PPL Martins Creek, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Montana - PPL Montana, LLC, an indirect subsidiary of PPL Generation that generates electricity for wholesale sales in Montana and the Pacific Northwest.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides services for PPL and its subsidiaries.

PPL Susquehanna - PPL Susquehanna, LLC, the nuclear generating subsidiary of PPL Generation.

PPL WEM - PPL WEM Holdings plc (formerly WPD Investment Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WEM indirectly wholly owns both WPD (East Midlands) and WPD (West Midlands).

PPL WW - PPL WW Holdings Limited (formerly Western Power Distribution Holdings Limited), an indirect, wholly owned U.K. subsidiary of PPL Global. PPL WW Holdings indirectly wholly owns WPD (South Wales) and WPD (South West).

WPD - refers to PPL WW and PPL WEM and their subsidiaries.

WPD (East Midlands) - Western Power Distribution (East Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks East plc) was acquired and renamed in April 2011.

WPD Midlands - refers to Central Networks, which was renamed after the acquisition.

WPD (South Wales) - Western Power Distribution (South Wales) plc, a British regional electricity distribution utility company.

WPD (South West) - Western Power Distribution (South West) plc, a British regional electricity distribution utility company.

WPD (West Midlands) - Western Power Distribution (West Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks West plc) was acquired and renamed in April 2011.

WKE - Western Kentucky Energy Corp., a subsidiary of LKE that leased certain non-utility generating plants in western Kentucky until July 2009. The subsidiary was acquired by PPL through the acquisition of LKE in November 2010.

Other terms and abbreviations

£ - British pound sterling.

1945 First Mortgage Bond Indenture - PPL Electric's Mortgage and Deed of Trust, dated as of October 1, 1945, to Deutsche Bank Trust Company Americas, as trustee, as supplemented.

2001 Mortgage Indenture - PPL Electric's Indenture, dated as of August 1, 2001, to The Bank of New York Mellon (as successor to JPMorgan Chase Bank), as trustee, as supplemented.

2010 Bridge Facility - an up to $6.5 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding, as borrower, and PPL, as guarantor, and a group of banks syndicated in June 2010, to serve as a funding backstop in the event alternative financing was not available prior to the closing of PPL's acquisition of E.ON U.S. LLC.

2010 Equity Unit(s) - a PPL equity unit, issued in June 2010, consisting of a 2010 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018.

2010 Purchase Contract(s) - a contract that is a component of a 2010 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to July 1, 2013.

2011 Bridge Facility - the £3.6 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, and lenders party thereto, used to fund the April 1, 2011 acquisition of Central Networks, as amended by Amendment No. 1 thereto dated April 15, 2011.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

2011 Equity Unit(s) - a PPL equity unit, issued in April 2011, consisting of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019.

2011 Purchase Contract(s) - a contract that is a component of a 2011 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to May 1, 2014.

2011 Registration Statement(s) - refers to the registration statements on Form S-4 filed with the SEC by each of LKE (Registration No. 333-173665) on April 21, 2011, LG&E (Registration No 333-173676) on April 22, 2011 and KU (Registration No. 333-173675) on April 22, 2011, each as amended by Amendment No. 1 filed with the SEC on May 26, 2011 and effective June 1, 2011.

401(h) account - A sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

Acid Rain Program - allowance trading system established by the Clean Air Act to reduce levels of sulfur dioxide. Under this program, affected power plants are allocated allowances based on their fuel consumption during specified baseline years and a specific emissions rate.

Act 129 - became effective in October 2008. The law amends the Pennsylvania Public Utility Code and creates an energy efficiency and conservation program and smart metering technology requirements, adopts new PLR electricity supply procurement rules, provides remedies for market misconduct and makes changes to the existing Alternative Energy Portfolio Standard.

AFUDC - Allowance for Funds Used During Construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

A.M. Best - A.M. Best Company, a company that reports on the financial condition of insurance companies.

AMT - alternative minimum tax.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Baseload generation - includes the output provided by PPL's nuclear, coal, hydroelectric and qualifying facilities.

Basis - when used in the context of derivatives and commodity trading, the commodity price differential between two locations, products or time periods.

Bcf - billion cubic feet.

Black Lung Trust - a trust account maintained under federal and state Black Lung legislation for the payment of claims related to disability or death due to pneumoconiosis.

Bluegrass CTs - Three natural gas combustion turbines owned by Bluegrass Generation. LG&E and KU entered into an Asset Purchase Agreement with Bluegrass Generation for the purchase of these combustion turbines, subject to certain conditions including receipt of applicable regulatory approvals and clearances.

Bluegrass Generation - Bluegrass Generation Company, L.L.C., an exempt wholesale electricity generator in LaGrange, Kentucky.

BREC - Big Rivers Electric Corporation, a power-generating rural electric cooperative in western Kentucky.

CAIR - the EPA's Clean Air Interstate Rule.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

COLA - license application for a combined construction permit and operating license from the NRC for a nuclear plant.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of any plant, equipment, property or facility for furnishing of utility service to the public.

CSAPR - Cross-State Air Pollution Rule, the CSAPR implements Clean Air Act requirements concerning the transport of air pollution from power plants across state boundaries. The CSAPR replaces the 2005 CAIR, which the U.S. Court of Appeals for the D.C. Circuit ordered the EPA to revise in 2008. The court has granted a stay allowing CAIR to remain in place pending a ruling on the legal challenges to the CSAPR.

CTC - competitive transition charge on customer bills to recover allowable transition costs under the Customer Choice Act.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

DDCP - Directors Deferred Compensation Plan.

Depreciation not normalized - the flow-through income tax impact related to the state regulatory treatment of depreciation-related timing differences.

Dodd-Frank Act - the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DOE - Department of Energy, a U.S. government agency.

DPCR4 - Distribution Price Control Review 4, the U.K. 5-year rate review period applicable to WPD that commenced April 1, 2005.

DPCR5 - Distribution Price Control Review 5, the U.K. 5-year rate review period applicable to WPD that commenced April 1, 2010.

DRIP - Dividend Reinvestment and Direct Stock Purchase Plan.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of DSM programs and revenues lost by implementing those programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

DUoS - Distribution Use of System. This forms the majority of WPD's revenues and is the charge to electricity suppliers who are WPD's customers and use WPD's network to transmit electricity.

EBPB - Employee Benefit Plan Board. The administrator of PPL's U.S. qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

Economic Stimulus Package - The American Recovery and Reinvestment Act of 2009, generally referred to as the federal economic stimulus package, which was signed into law in February 2009.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, effective January 1993, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which apply to coal combustion and by-products from the production of energy from coal.

EEI - Electric Energy, Inc., which owns and operates a coal-fired plant and a natural gas facility in southern Illinois.

EMF - electric and magnetic fields.

E.ON AG - a German corporation and the parent of E.ON UK plc, the former parent of Central Networks, and the indirect parent of E.ON US Investments Corp., the former parent of LKE.

EPA - Environmental Protection Agency, a U.S. government agency.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

EPS - earnings per share.

Equity Units - refers collectively to the 2011 and 2010 Equity Units.

ESOP - Employee Stock Ownership Plan.

Euro - the basic monetary unit among participating members of the European Union.

EWG - exempt wholesale generator.

FERC - Federal Energy Regulatory Commission, the federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch - Fitch, Inc., a credit rating agency.

FTR - financial transmission rights, which are financial instruments established to manage price risk related to electricity transmission congestion. They entitle the holder to receive compensation or require the holder to remit payment for certain congestion-related transmission charges based on the level of congestion in the transmission grid.

Fundamental Change - as it relates to the terms of the 2011 and 2010 Equity Units, will be deemed to have occurred if any of the following occurs with respect to PPL, subject to certain exceptions: (i) a change of control; (ii) a consolidation with or merger into any other entity; (iii) common stock ceases to be listed or quoted; or (iv) a liquidation, dissolution or termination.

GAAP - Generally Accepted Accounting Principles in the U.S.

GBP - British pound sterling.

GHG - greenhouse gas(es).

GWh - gigawatt-hour, one million kilowatt-hours.

Health Care Reform - The Patient Protection and Affordable Care Act (HR 3590) and the Health Care and Education Reconciliation Act of 2010 (HR 4872), signed into law in March 2010.

IBEW - International Brotherhood of Electrical Workers.

ICP - Incentive Compensation Plan.

ICPKE - Incentive Compensation Plan for Key Employees.

Intermediate and peaking generation - includes the output provided by PPL's oil- and natural gas-fired units.

Ironwood - a natural gas-fired power plant in Lebanon, Pennsylvania with a summer rating of 657 MW.

IRP - Integrated Resource Plan. Pursuant to Kentucky Administrative Regulation 807 5:058, Kentucky electric utilities are required to file triennially an IRP with the KPSC. The filing is to provide the utilities' load forecasts and resource plans to meet future demand with an adequate and reliable supply of electricity at the lowest possible cost for all customers while satisfying all related state and federal laws and regulations.

IRS - Internal Revenue Service, a U.S. government agency.

IRC Sec. 481 - the Internal Revenue Code Section that identifies the tax year in which accounting method change differences are recognized in federal taxable income.

ISO - Independent System Operator.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

KU 2010 Mortgage Indenture - KU's Indenture dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

kVA - kilovolt-ampere.

kWh - kilowatt-hour, basic unit of electrical energy.

LCIDA - Lehigh County Industrial Development Authority.

LG&E 2010 Mortgage Indenture - LG&E's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

LIBOR - London Interbank Offered Rate.

Long Island generation business - includes a 79.9 MW gas-fired plant in the Edgewood section of Brentwood, New York and a 79.9 MW oil-fired plant in Shoreham, New York and related tolling agreements. This business was sold in February 2010.

MACT - maximum achievable control technology.

MATS - Mercury and Air Toxics Standards.

MISO - Midwest Independent System Operator, an independent system operator and the regional transmission organization that provides open-access transmission service and monitors the high voltage transmission system in all or parts of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin and Manitoba, Canada.

MMBtu - One million British Thermal Units.

Montana Power - The Montana Power Company, a Montana-based company that sold its generating assets to PPL Montana in December 1999. Through a series of transactions consummated during the first quarter of 2002, Montana Power sold its electricity delivery business to NorthWestern.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

MWh - megawatt-hour, one thousand kilowatt-hours.

NDT - PPL Susquehanna's nuclear plant decommissioning trust.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas-fired combined-cycle turbine.

NorthWestern - NorthWestern Corporation, a Delaware corporation, and successor in interest to Montana Power's electricity delivery business, including Montana Power's rights and obligations under contracts with PPL Montana.

NPDES - National Pollutant Discharge Elimination System.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception receive accrual accounting treatment.

NRC - Nuclear Regulatory Commission, the federal agency that regulates nuclear power facilities.

NUGs - non-utility generators, generating plants not owned by public utilities, whose electrical output must be purchased by utilities under the PURPA if the plant meets certain criteria.

OCI - other comprehensive income or loss.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Ofgem - Office of Gas and Electricity Markets, the British agency that regulates transmission, distribution and wholesale sales of electricity and related matters.

Opacity - The degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity in power plant stack gas emissions.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek Plant in Ohio and the Clifty Creek Plant in Indiana, with combined nameplate capacities of 2,390 MW.

PADEP - the Pennsylvania Department of Environmental Protection, a state government agency.

PEDFA - Pennsylvania Economic Development Financing Authority.

PJM - PJM Interconnection, L.L.C., operator of the electric transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply to retail customers within its delivery area who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

Predecessor - refers to the LKE, LG&E and KU pre-acquisition activity covering the time period prior to November 1, 2010.

PUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

PUC Final Order - final order issued by the PUC on August 27, 1998, approving the settlement of PPL Electric's restructuring proceeding.

PUHCA - Public Utility Holding Company Act of 1935, repealed effective February 2006 by the Energy Policy Act of 2005 and replaced with the Public Utility Holding Company Act of 2005.

Purchase Contracts - refers collectively to the 2010 and 2011 Purchase Contracts.

PURPA - Public Utility Regulatory Policies Act of 1978, legislation passed by the U.S. Congress to encourage energy conservation, efficient use of resources and equitable rates.

PURTA - The Pennsylvania Public Utility Realty Tax Act.

RAV - regulatory asset value. This term is also commonly known as RAB or regulatory asset base.

RECs - renewable energy credits.

Regional Transmission Expansion Plan - PJM conducts a long-range Regional Transmission Expansion Planning process that identifies what changes and additions to the grid are needed to ensure future needs are met for both the reliability and the economic performance of the grid. Under PJM agreements, transmission owners are obligated to build transmission projects that are needed to maintain reliability standards and that are reviewed and approved by the PJM Board.

Registrants - PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU, collectively.

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

Rev. Proc(s). - Revenue Procedure(s), an official published statement by the IRS of a matter of procedural importance to both taxpayers and the IRS concerning administration of the tax laws.

RMC - Risk Management Committee.

RTO - Regional Transmission Organization.

S&P - Standard & Poor's Ratings Services, a credit rating agency.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

SCR - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber - an air pollution control device that can remove particulates and/or gases (such as sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency whose primary mission is to protect investors and maintain the integrity of the securities markets.

Securities Act of 1933 - the Securities Act of 1933, 15 U.S. Code, Sections 77a-77aa, as amended.

SIFMA Index - the Securities Industry and Financial Markets Association Municipal Swap Index.

Smart meter - an electric meter that utilizes smart metering technology.

Smart metering technology - technology that can measure, among other things, time of electricity consumption to permit offering rate incentives for usage during lower cost or demand intervals. The use of this technology also strengthens network reliability.

SMGT - Southern Montana Electric Generation & Transmission Cooperative, Inc., a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019.

Successor - refers to the LKE, LG&E and KU post-acquisition activity covering the time period after October 31, 2010.

Superfund - federal environmental legislation that addresses remediation of contaminated sites; states also have similar statutes.

TC2 - Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 549 MW of the capacity.

Tolling agreement - agreement whereby the owner of an electric generating facility agrees to use that facility to convert fuel provided by a third party into electricity for delivery back to the third party.

Total shareowner return - increase in market value of a share of the Company's common stock plus the value of all dividends paid on a share of the common stock during the applicable performance period, divided by the price of the common stock as of the beginning of the performance period.

TRA - Tennessee Regulatory Authority, the state agency that has jurisdiction over the regulation of rates and service of utilities in Tennessee.

VaR - value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VEBA - Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

VIE - variable interest entity.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

FORWARD-LOOKING INFORMATION

Statements contained in this Form 10-K concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although the Registrants believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in "Item 1A. Risk Factors" and in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-K report, the following are among the important factors that could cause actual results to differ materially from the forward-looking statements.

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the length of scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- potential expansion of alternative sources of electricity generation;
- potential laws or regulations to reduce emissions of "greenhouse" gases or the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against the Registrants and their subsidiaries;
- potential effects of threatened or actual terrorism, war or other hostilities, or natural disasters;
- the commitments and liabilities of the Registrants and their subsidiaries;
- market demand and prices for energy, capacity, transmission services, emission allowances, RECs and delivered fuel;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in the NDT funds and in defined benefit plans, and the potential cash funding requirements if fair value declines;
- interest rates and their effect on pension, retiree medical and nuclear decommissioning liabilities, and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- the profitability and liquidity, including access to capital markets and credit facilities, of the Registrants and their subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- changes in securities and credit ratings;
- foreign currency exchange rates;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional NRC requirements;
- political, regulatory or economic conditions in states, regions or countries where the Registrants or their subsidiaries conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation, including new tax, environmental, healthcare or pension-related legislation;
- state, federal and foreign regulatory developments;
- the outcome of any rate cases by PPL Electric at the PUC or the FERC, by LG&E at the KPSC; by KU at the KPSC, VSCC, TRA or the FERC, or by WPD at Ofgem in the U.K.;
- the impact of any state, federal or foreign investigations applicable to the Registrants and their subsidiaries and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures; and

- business dispositions or acquisitions and our ability to successfully operate such acquired businesses and realize expected benefits from business acquisitions, including PPL's 2011 acquisition of WPD Midlands and 2010 acquisition of LKE.

Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents of the Registrants on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for the Registrants to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and the Registrants undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.

PART I

ITEM 1. BUSINESS

BACKGROUND

PPL Corporation, headquartered in Allentown, Pennsylvania, is an energy and utility holding company that was incorporated in 1994. Through its subsidiaries, PPL generates electricity from power plants in the northeastern, northwestern and southeastern U.S.; markets wholesale or retail energy primarily in the northeastern and northwestern portions of the U.S.; delivers electricity to customers in Pennsylvania, Kentucky, Virginia, Tennessee and the U.K. and natural gas to customers in Kentucky.

In 2011 and 2010, PPL completed two acquisitions:

- On April 1, 2011, PPL, through its indirect, wholly owned subsidiary, PPL WEM, completed its acquisition of all the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. The consideration for the acquisition consisted of cash of $5.8 billion, including the repayment of $1.7 billion of affiliate indebtedness owed to subsidiaries of E.ON AG and $800 million of long-term debt assumed through consolidation. WPD Midlands operates two regulated distribution networks that serve five million end-users in the Midlands area of England.

- On November 1, 2010, PPL acquired all of the limited liability company interests of E.ON U.S. LLC from a wholly owned subsidiary of E.ON AG. Upon completion of the acquisition, E.ON U.S. LLC was renamed LG&E and KU Energy LLC (LKE). LKE is engaged in regulated utility operations through its subsidiaries, LG&E and KU. The consideration for the acquisition consisted of cash of $6.8 billion, including the repayment of $4.3 billion of affiliate indebtedness owed to subsidiaries of E.ON AG, and $800 million of debt assumed through consolidation.

- See Note 10 to the Financial Statements for additional information on both acquisitions.

The acquisitions of WPD Midlands and LKE: (1) substantially reapportion the mix of PPL's regulated and competitive businesses by increasing the regulated portion of its business; (2) strengthen PPL's credit profile; and (3) enhance rate-regulated growth opportunities as the regulated businesses make investments to meet environmental compliance requirements and improve infrastructure and customer reliability. The investment in regulated assets also provides earnings stability through regulated returns and the ability to recover prudently incurred capital investments, in contrast to the competitive supply business where earnings and cash flows are subject to market conditions. At December 31, 2011, PPL had:

- $12.7 billion in operating revenues (including eight months from WPD Midlands, which are recorded on a one-month lag)

- 10.5 million end-users of its utility services (including 5 million end-users served by the WPD Midlands companies)

- Approximately 19,000 MW of generation

- Approximately 18,000 full-time employees

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding (the parent holding company of PPL Energy Supply and PPL Global with no other material operations), to better align PPL's organizational structure with the manner in which it manages its businesses and reports segment information in its consolidated financial statements. The distribution separated the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business. See Note 9 to the Financial Statements for additional information.

At December 31, 2011 PPL's principal subsidiaries are shown below (* denotes an SEC registrant; LKE, LG&E and KU became SEC registrants effective June 1, 2011):

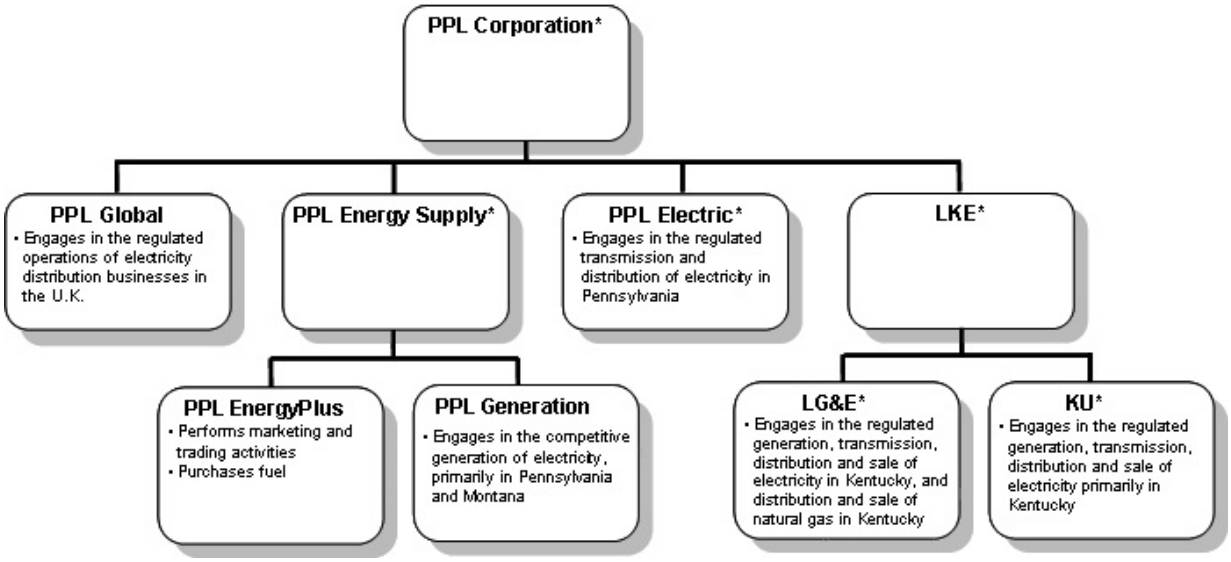
Past financial performance is no guarantee of future results.



In addition to PPL Corporation, the other SEC registrants included in this filing are:

PPL Energy Supply, LLC, headquartered in Allentown, Pennsylvania, is an indirect wholly owned subsidiary of PPL formed in 2000 and is an energy company engaged through its subsidiaries in the generation and marketing of electricity, primarily in the northeastern and northwestern power markets of the U.S. PPL Energy Supply's major operating subsidiaries are PPL EnergyPlus and PPL Generation. As noted above, in January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding. For 2010 and 2009, the operating results of PPL Global, which represents the International Regulated segment, are classified as Discontinued Operations. At December 31, 2011, PPL Energy Supply owned or controlled 10,508 MW of electric power generation capacity and is implementing capital projects at certain of its existing generation facilities in Pennsylvania and Montana to provide 191 MW of additional generating capacity by the end of 2013.

PPL Electric Utilities Corporation, headquartered in Allentown, Pennsylvania, is a direct subsidiary of PPL incorporated in 1920 and a regulated public utility. PPL Electric delivers electricity in its Pennsylvania service territory and provides electricity supply to retail customers in that territory as a PLR under the Customer Choice Act.

LG&E and KU Energy LLC, headquartered in Louisville, Kentucky, is a holding company with regulated utility operations through its subsidiaries, LG&E and KU, and is a wholly owned subsidiary of PPL. LKE, formed in 2003, is the successor to a Kentucky entity incorporated in 1989.

Louisville Gas and Electric Company, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. LG&E was incorporated in Kentucky in 1913. At December 31, 2011, LG&E owned 3,352 MW of electric power generation capacity and, subject to certain regulatory approvals, is implementing capital projects at certain of its existing generation facilities to provide 483 MW of additional generating capacity by 2016. LG&E also anticipates retiring 563 MW of generating capacity by the end of 2015 to meet certain environmental regulations. LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail native load.

Kentucky Utilities Company, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky, Virginia and Tennessee. KU was incorporated in Kentucky in 1912 and Virginia in 1991. KU serves its Virginia customers under the Old Dominion Power name while its Kentucky and Tennessee customers are served under the KU name. At December 31, 2011, KU owned 4,833 MW of electric power generation capacity and, subject to certain regulatory approvals, is implementing capital projects at certain of its existing generation facilities to provide 652 MW of additional generating capacity by 2016. KU also anticipates retiring 234 MW of generating capacity by the end of 2015 to meet certain environmental regulations. KU and LG&E jointly dispatch their generation units with the lowest cost generation used to serve their retail native load.

PPL's utility subsidiaries, and to a lesser extent, certain of its competitive supply subsidiaries, are subject to extensive regulation by the FERC including: wholesale sales of power and related transactions, electric transmission service, accounting practices, issuances and sales of securities, acquisitions and sales of utility properties and payments of dividends. PPL and LKE are subject to certain FERC regulations as holding companies under PUHCA and the Federal Power Act,

Past financial performance is no guarantee of future results.

including with respect to accounting and record-keeping, inter-system sales of non-power goods and services and acquisitions of securities in, or mergers with, certain types of electric utility companies.

Successor and Predecessor Financial Presentation *(LKE, LG&E and KU)*

LKE's, LG&E's and KU's Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010 and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, and the cost bases of certain assets and liabilities were changed as of November 1, 2010 as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of LKE, LG&E and KU have not changed as a result of the acquisition.

Segment Information

(PPL)

Following the November 1, 2010 acquisition of LKE, PPL is organized into four reportable segments: Kentucky Regulated, International Regulated, Pennsylvania Regulated and Supply. There were no changes to reportable segments in 2011.

(PPL Energy Supply)

In 2011, PPL Energy Supply operated in a single reportable segment. Prior to 2011, PPL Energy Supply's segments consisted of Supply and International Regulated. In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding, to better align PPL's organizational structure with the manner in which it manages its businesses and reports segment information in its consolidated financial statements. For 2010 and 2009, the operating results of PPL Global, which represent the International Regulated segment, are classified as discontinued operations.

(PPL Electric, LKE, LG&E and KU)

PPL Electric, LKE, LG&E and KU each operate in a single reportable segment.

(PPL and PPL Energy Supply)

See Note 2 to the Financial Statements for financial information about the segments and geographic financial data.

- ***Kentucky Regulated Segment (PPL)***

  Consists of the operations of LKE, which owns and operates regulated public utilities engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas, representing primarily the activities of LG&E and KU. The Kentucky Regulated segment also includes interest expense related to the 2010 Equity Units that were issued to partially finance the acquisition of LKE.

(PPL, LKE, LG&E and KU)

LKE became a wholly owned subsidiary of PPL on November 1, 2010. LG&E and KU are engaged in the regulated generation, transmission, distribution and sale of electricity in Kentucky and, in KU's case, Virginia and Tennessee. LG&E also engages in the distribution and sale of natural gas in Kentucky. LG&E provides electric service to approximately 394,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in 9 counties. LG&E provides natural gas service to approximately 319,000 customers in its electric service area and 7 additional counties in Kentucky. KU provides electric service to approximately 512,000 customers in 77 counties in central, southeastern and western Kentucky; approximately 29,000 customers in 5 counties in southwestern Virginia; and fewer than 10 customers in Tennessee, covering approximately 4,800 non-contiguous square miles. KU also sells wholesale electricity to 12 municipalities in Kentucky under load following contracts. In Virginia, KU operates under the name Old Dominion Power Company.

Acquisition by PPL

In September 2010, the KPSC approved a settlement agreement among PPL and all of the intervening parties to PPL's joint application to the KPSC for approval of its acquisition of ownership and control of LKE. In the settlement agreement, the parties agreed that LG&E and KU would commit that no base rate increases would take effect before January 1, 2013. The rate increases for LG&E and KU that took effect on August 1, 2010 (as described below) are not impacted by the settlement. Under the terms of the settlement, LG&E and KU retain the right to seek approval for the deferral of "extraordinary and uncontrollable costs." Interim rate adjustments will continue to be permissible during that period through existing fuel, environmental and demand side management recovery mechanisms. The agreement also substitutes an acquisition savings shared deferral mechanism for the previous commitment that LG&E and KU file a synergies plan with the KPSC post-closing. This mechanism, which will be in place until the earlier of five years or the first day of the year in which a base rate increase becomes effective, permits LG&E and KU to each earn up to a 10.75% return on equity. Any earnings above a 10.75% return on equity will be shared with customers on a 50%/50% basis. The KPSC Order and the settlement agreement contained a number of other commitments by LG&E and KU with regard to operations, workforce, community involvement and other matters.

In October 2010, both the VSCC and the TRA approved the transfer of control of LKE to PPL. Certain of these Orders contained additional commitments with regard to operations, workforce, community involvement and other matters.

Also in October 2010, the FERC approved the application for the transfer of control of the utilities. The approval includes various conditional commitments, such as a continuation of certain existing undertakings with intervenors in prior cases, an agreement not to terminate certain KU municipal customer contracts prior to January 2017, an exclusion of any transaction-related costs from wholesale energy and tariff customer rates to the extent that LG&E and KU have agreed not to seek recovery of the same transaction-related cost from retail customers and agreements to coordinate with intervenors in certain open or ongoing matters.

See Note 6 to the Financial Statements for additional information on regulatory matters related to the acquisition.

Franchises and Licenses

LG&E and KU provide electric delivery service, and LG&E provides natural gas distribution service, in their various service territories pursuant to certain franchises, licenses, statutory service areas, easements and other rights or permissions granted by state legislatures, cities or municipalities or other entities.

Competition

There are currently no other electric public utilities operating within the electric service areas of LKE. Neither the Kentucky General Assembly nor the KPSC has adopted or approved a plan or timetable for retail electric industry competition in Kentucky. The nature or timing of any legislative or regulatory actions regarding industry restructuring and their impact on LKE, which may be significant, cannot currently be predicted. Virginia, formerly a deregulated jurisdiction, has enacted legislation which implemented a hybrid model of cost-based regulation. KU's operations in Virginia have been and remain regulated.

Alternative energy sources such as electricity, oil, propane and other fuels provide indirect competition for natural gas revenues of LKE. Marketers may also compete to sell natural gas to certain large end-users. LG&E's natural gas tariffs include gas price pass-through mechanisms relating to its sale of natural gas as a commodity; therefore, customer natural gas purchases from alternative suppliers do not generally impact profitability. However, some large industrial and commercial customers may physically bypass LG&E's facilities and seek delivery service directly from interstate pipelines or other natural gas distribution systems.

In April 2010, the KPSC commenced a proceeding to investigate the regulatory, financial and operational aspects of natural gas retail competition programs and the potential benefits to Kentucky consumers. A number of entities, including LG&E, were parties to the proceeding. In December 2010, the KPSC issued an Order in the proceeding declining to endorse natural gas competition at the retail level, noting the existence of a number of transition or oversight costs and an uncertain level of economic benefits in such programs. With respect to existing natural gas transportation programs available to large commercial or industrial users, the Order indicates that the KPSC will review utilities' current tariff structures, user thresholds and other terms and conditions of such programs, as part of such utilities' next regular natural gas rate cases.

Operating Revenues

LG&E serves approximately 394,000 electricity customers, and its electric transmission and distribution system territory covers more than 700 square miles in 9 counties. KU serves approximately 541,000 electricity customers, and its transmission and distribution system territory covers more than 4,800 non-contiguous square miles in 82 counties. LG&E purchases, transports, distributes or stores natural gas for approximately 319,000 customers in Kentucky. LG&E's natural gas service area covers more than 3,600 square miles in 16 counties. In 2011, 27% of LG&E's annual natural gas throughput was purchased by large commercial and industrial customers directly from alternate suppliers for delivery through LG&E's distribution system.

(PPL)

Details of operating revenues for the Kentucky Regulated segment by customer class for the year ended December 31, 2011 and the two months ended December 31, 2010 are shown below.

	2011		2010	
	Revenue	% of Revenue	Revenue	% of Revenue
Industrial and commercial	$ 1,252	45	$ 209	42
Residential	1,087	39	219	44
Retail - other	269	9	42	9
Wholesale - municipal	104	4	15	3
Wholesale - other	81	3	8	2
Total	$ 2,793	100	$ 493	100

(LKE, LG&E and KU)

Details of operating revenues by customer class are shown below.

Past financial performance is no guarantee of future results.

(PPL, LKE, LG&E and KU)

Power Supply

At December 31, 2011, LKE owned, controlled or had an ownership interest in generating capacity (summer rating) of 8,185 MW, of which 3,352 MW related to LG&E and 4,833 MW related to KU, in Kentucky, Indiana, and Ohio. See "Item 2. Properties - Kentucky Regulated Segment" for a complete list of LKE's generating facilities.

The system capacity of LKE's owned or controlled generation is based upon a number of factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changes in circumstances.

During 2011, LKE's power plants generated the following amounts of electricity.

	Thousands of MWhs					
	LKE		LG&E		KU	
Fuel Source	Southeastern	Midwestern	Southeastern	Midwestern	Southeastern	Midwestern
Coal (a)	33,897	1,132	15,291	783	18,606	349
Oil / Gas	497		175		322	
Hydro	290		208		82	
Total	34,684	1,132	15,674	783	19,010	349
Overall total (b)		35,816		16,457		19,359

(a) The Midwestern generation represents power generated by and purchased from OVEC.
(b) This generation represents a 1% increase for LKE, a 7% decrease for LG&E and an 8% increase for KU from 2010 output.

A significant portion of LG&E's and KU's generated electricity was used to supply its retail and municipal customer base.

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU.

See "Item 2. Properties - Kentucky Regulated Segment" for additional information regarding LG&E's and KU's plans for capital projects, subject to certain regulatory approvals, that are expected to provide 483 MW and 652 MW of additional electric generating capacity by 2016. LG&E and KU also anticipate retiring 563 MW and 234 MW of generating capacity by the end of 2015 to meet certain environmental regulations.

Fuel Supply

Coal is expected to be the predominant fuel used by LG&E and KU for baseload generation for the foreseeable future, with natural gas and oil being used for intermediate and peaking capacity and flame stabilization in coal-fired boilers.

Fuel inventory is maintained at levels estimated to be necessary to avoid operational disruptions at coal-fired generating units. Reliability of coal deliveries can be affected from time to time by a number of factors including fluctuations in demand, coal mine production issues and other supplier or transporter operating difficulties.

LG&E and KU have entered into coal supply agreements with various suppliers for coal deliveries through 2016 and normally augment their coal supply agreements with spot market purchases.

For their existing units, LG&E and KU expect for the foreseeable future to purchase most of their coal from western Kentucky, southern Indiana, southern Illinois and Ohio. The use of high sulfur coal will increase in 2012 due to the installation of scrubbers at KU's E.W. Brown plant. In 2012 and beyond, LG&E and KU may purchase certain quantities of ultra-low sulfur content coal from Wyoming for blending at TC2. Coal is delivered to the generating plants by barge, truck and rail.

(PPL, LKE and LG&E)

Natural Gas Supply

Five underground natural gas storage fields, with a current working natural gas capacity of approximately 15 Bcf, are used in providing natural gas service to LG&E's firm sales customers. By using natural gas storage facilities, LG&E avoids the costs typically associated with more expensive pipeline transportation capacity to serve peak winter heating loads. Natural gas is stored during the summer season for withdrawal during the following winter heating season. Without this storage capacity, LG&E would be required to purchase additional natural gas and pipeline transportation services during winter months when customer demand increases and the prices for natural gas supply and transportation services are typically at their highest. Several suppliers under contracts of varying duration provide competitively priced natural gas. At December 31, 2011, LG&E had an 11 Bcf inventory balance of natural gas stored underground with a carrying value of $53 million.

LG&E has a portfolio of supply arrangements of varying terms with a number of suppliers designed to meet its firm sales obligations. These natural gas supply arrangements include pricing provisions that are market-responsive. In tandem with pipeline transportation services, these natural gas supplies provide the reliability and flexibility necessary to serve LG&E's natural gas customers.

LG&E purchases natural gas supply transportation services from two pipelines. LG&E has contracts with one pipeline that are subject to termination by LG&E between 2013 and 2018. Total winter capacity under these contracts is 195,000 MMBtu/day and summer capacity is 88,000 MMBtu/day. LG&E has a contract with the other pipeline that expires in October 2012. Total winter and summer capacity under this contract is 51,000 MMBtu/day during both seasons. That contract has been renegotiated through 2014 for a total capacity of 20,000 MMBtu/day during both the winter and summer seasons beginning in November 2012.

(PPL, LKE, LG&E and KU)

Rates and Regulation

LG&E is subject to the jurisdiction of the KPSC and the FERC, and KU is subject to the jurisdiction of the KPSC, the FERC, the VSCC and the TRA. LG&E and KU operate under a FERC-approved open access transmission tariff. LG&E and KU contract with the Tennessee Valley Authority, to act as their transmission reliability coordinator, and Southwest Power Pool, Inc. (SPP), to function as their independent transmission operator, pursuant to FERC requirements. The contract with SPP expires on August 31, 2012. LG&E and KU have received FERC approval to transfer from SPP to TranServ International, Inc. as their independent transmission operator beginning September 1, 2012. Approval from the KPSC is also required, and an application requesting approval was filed in January 2012.

LG&E's and KU's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and notes payable) including certain adjustments to exclude non-regulated investments and environmental compliance costs recovered separately through the ECR mechanism. As such, regulatory assets generally earn a return.

KU's Virginia base rates are calculated based on a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities, except the levelized fuel factor, are excluded from the return on rate base utilized in the calculation of Virginia base rates; therefore, no return is earned on the related assets.

KU's rates to municipal customers for wholesale requirements are calculated based on annual updates to a rate formula that utilizes a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities are excluded from the return on rate base utilized in the development of municipal rates; therefore, no return is earned on the related assets.

See Note 6 to the Financial Statements for additional information on cost recovery mechanisms.

Kentucky Rate Case

In January 2010, LG&E and KU filed applications with the KPSC requesting increases in electric base rates of approximately 12%, or $95 million for LG&E and $135 million for KU annually. In addition, LG&E requested an increase in its natural gas base rates of approximately 8%, or $23 million annually. In June 2010, LG&E and KU and all of the intervenors, except the Attorney General, agreed to a stipulation providing for increases in LG&E's electric base rates of $74 million annually, LG&E's natural gas base rates of $17 million annually and KU's electric base rates of $98 million annually. All parties, except the Attorney General, jointly filed a request with the KPSC to approve such stipulation. An Order in the proceeding

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

was issued in July 2010, approving all of the provisions in the stipulation. The KPSC Order determined a return on equity range of 9.75% to 10.75% to be reasonable and noted that the stipulation was within such range. The new rates became effective on August 1, 2010.

(PPL, LKE and KU)

Virginia Rate Case

In April 2011, KU filed an application with the VSCC requesting an increase in electric base rates for its Virginia jurisdictional customers of $9 million annually, or 14%. In September 2011, a settlement stipulation was reached between KU and the VSCC Staff and filed with the VSCC for consideration. In October 2011, the VSCC approved the stipulation with two modifications that were accepted by KU. The VSCC issued an Order closing the proceeding in October 2011. The approved revenue increase was $7 million annually, based on a return on equity of 10.3%, with new base rates effective November 1, 2011.

FERC Wholesale Rate Case

In September 2008, KU filed an application with the FERC for increases in electric base rates applicable to wholesale power sales contracts or interchange agreements involving, collectively, 12 Kentucky municipalities. The application requested a shift from an all-in stated unit charge rate to an unbundled formula rate. This application was approved by the FERC, and annual adjustments are made to the rates charged to the Kentucky municipalities with applications being submitted each May and revised rates taking effect on July 1. In May 2011, KU submitted to the FERC the annual adjustments to the formula rate which incorporated certain proposed decreases. These rates became effective as of July 1, 2011, with no issues raised by the wholesale requirements customers or the FERC.

- ***International Regulated Segment*** *(PPL)*

  Includes WPD, a regulated electricity distribution company in the U.K.

WPD, through indirect wholly owned subsidiaries, operates four of the 15 distribution networks providing electricity service in the U.K. With the April 2011 acquisition of WPD Midlands, the total number of end-users served has more than doubled totaling 7.8 million across 21,585 square miles in Wales, southwest and central England. See Note 10 to the Financial Statements for additional information on the acquisition.

Details of revenue by category for the years ended December 31 are shown below.

	2011		2010		2009	
	Revenue	% of Revenue	Revenue	% of Revenue	Revenue	% of Revenue
Utility revenues (a)	$ 1,618	98	$ 727	96	$ 684	96
Energy-related businesses	35	2	34	4	32	4
Total	$ 1,653	100	$ 761	100	$ 716	100

(a) The amounts for 2011 are not comparable to 2010 or 2009 as WPD Midlands was acquired in April 2011. 2011 includes eight months of activity as WPD Midlands' results are recorded on a one-month lag.

WPD's energy-related businesses revenues include ancillary activities that support the distribution business, including telecommunications and real estate. WPD's telecommunication revenues are from the rental of fiber optic cables primarily attached to WPD's overhead electricity distribution network. WPD also provides meter services to businesses across the U.K.

Franchise and Licenses

WPD is authorized by Ofgem to provide electric distribution services within its concession areas and service territories, subject to certain conditions and obligations. For instance, WPD is subject to Ofgem regulation of the prices it can charge and the quality of service it must provide, and WPD can be fined or have its licenses revoked if it does not meet the mandated standard of service.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Competition

Although WPD operates in non-exclusive concession areas in the U.K., it currently faces little competition with respect to end-users connected to its network. WPD's four distribution businesses, WPD (South West), WPD (South Wales), WPD (West Midlands) and WPD (East Midlands), are thus regulated monopolies which operate under regulatory price controls.

Revenue and Regulation

The operations of WPD (South West), WPD (South Wales), WPD (East Midlands) and WPD (West Midlands) are regulated by Ofgem under the direction of the Gas and Electricity Markets Authority. The Electricity Act 1989 provides the fundamental legal framework of electricity companies and established licenses that required each of the Distribution Network Operators (DNOs) to develop, maintain and operate efficient distribution networks. Ofgem has established a price control mechanism that restricts the amount of revenue that can be earned by regulated business and provides for an increase or reduction in revenues based on incentives or penalties for exceeding or underperforming against pre-established targets.

This regulatory structure is an incentive-based regulatory structure in comparison to the U.S. utility businesses which operate under a cost-based regulatory framework. Under the UK regulatory structure, electricity distribution revenues are currently set every five years, but extending to eight years in the next price control period beginning in April 2015. The revenue that DNOs can earn in each of the five years is the sum of: i) the regulator's view of efficient operating costs, ii) a return on the capital from the RAV plus an annual adjustment for the inflation determined by Retail Price Index (RPI) for the prior calendar year, iii) a return of capital from the RAV (i.e. depreciation), and iv) certain pass-through costs over which the DNO has no control. Additionally, incentives are provided for a range of activities including exceeding certain reliability and customer service targets.

WPD is currently operating under DPCR5 which was completed in December 2009 and is effective for the period from April 1, 2010 through March 31, 2015. Ofgem allowed WPD (South West) and WPD (South Wales) an average increase in total revenues, before inflationary adjustments, of 6.9% in each of the five years and WPD Midlands an average increase in total revenues, before inflationary adjustments, of 4.5% in each of the five years. The revenue increase includes reimbursement for higher operating and capital costs to be incurred driven by additional requirements. In DPCR5, Ofgem decoupled WPD's allowed revenue from volume delivered over the five-year price control period. However, in any fiscal period WPD's revenue could be negatively affected if its tariffs and the volume delivered do not fully recover the allowed revenue for a given period. Any under recovery would be recovered in the next regulatory year, but would not be recorded as a receivable in the current period. Any over recovery would be reflected in the current period as a liability and would not be included in revenue.

In addition to providing a base revenue allowance, Ofgem has established incentive mechanisms to provide significant opportunities to enhance overall returns by improving network efficiency, reliability and customer service. Some of the more significant incentive mechanisms under DPCR5 include:

- Interruptions Incentive Scheme (IIS) - This incentive has two major components: 1) Customer interruptions and 2) Customer minutes lost and is designed to incentivize the DNOs to invest and operate their networks to manage and reduce both the frequency and duration of power outages experienced by customers. The target for each DNO is based on an average of the data from the prior price control period.

  Beginning April 1, 2012, an additional customer satisfaction incentive mechanism will be implemented that will include a customer satisfaction survey, a complaints metric and a measure of stakeholder engagement. This incentive will replace the customer response telephone performance incentive that was effective April 1, 2010.

- Line Loss Incentive - This incentive existed in the prior price control review and is designed to incentivize DNOs to invest in lower loss equipment, to change the way they operate their systems to reduce losses, and to detect theft and unregistered meters. The targets for each of WPD's four DNOs are set based on their performance during DPCR4. In DPCR5, Ofgem introduced a two year lag in reporting losses to allow for all settlement data to be received. WPD has a $170 million liability recorded at December 31, 2011, calculated in accordance with an accepted methodology, related to the close-out of line losses for the prior price control period, DPCR4. Ofgem is currently consulting on the methodology used to calculate the final line loss incentive/penalty for DPCR4. In October 2011, Ofgem issued a consultation paper citing two potential changes to the methodology, both of which would result in a reduction of the liability; however, it is uncertain at this time whether any changes will be made. Ofgem is expected to make a decision before the end of 2012.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- Information Quality Incentive (IQI) - The IQI is designed to incentivize the DNOs to provide good quality information when they submit their business plans to Ofgem during the price control process and to execute the plan they submitted. The IQI eliminates the distinction between capital expenditure and operating expense and instead looks at total expenditure. Total expenditure is allocated 85% to "slow pot" which is added to RAV and recovered over 20 years through the regulatory depreciation of the RAV and 15% to "fast pot" which is recovered during the current price control review period. The IQI then provides for incentives or penalties at the end of DPCR5 based on the ratio of actual expenditures to the expenditures submitted to Ofgem that were the basis for the revenues allowed during the five-year price control review period.

At the beginning of DPCR5, WPD was awarded $301 million in incentive revenue of which $222 million will be included in revenue throughout the current price control period with the balance recovered over subsequent price control periods. Additional incentive revenue primarily from the IIS of $30 million related to performance for the regulatory year ended March 31, 2011 and will be included in revenues for the 2012-2013 regulatory year.

In October 2010, Ofgem announced a new pricing model that will be effective for the U.K. electricity distribution sector, including WPD, beginning April 2015. The model, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. Key components of the model are: an extension of the price review period to eight years, increased emphasis on outputs and incentives, enhanced stakeholder engagement including network customers, a stronger incentive framework to encourage more efficient investment and innovation, expansion of the current Low Carbon Network Fund to stimulate innovation and continued use of a single weighted average cost of capital. Ofgem has also indicated that the depreciation of the RAV for RAV additions after April 1, 2015 will change from 20 years to 45 years. At this time, management does not expect the effect of RIIO to be significant to WPD's financial results. See "Item 1A. Risk Factors - Risks Related to International Regulated Segment."

Customers

The majority of WPD's revenue is known as DUoS and is derived from charging energy suppliers for the delivery of electricity to end-users and thus its customers are the suppliers to those end-users. Ofgem requires that all licensed electricity distributors and suppliers become parties to the Distribution Connection and Use of System Agreement. This agreement sets out how creditworthiness will be determined and, as a result, whether the supplier needs to provide collateral.

- ***Pennsylvania Regulated Segment*** *(PPL)*

Includes the regulated electric delivery operations of PPL Electric.

(PPL and PPL Electric)

PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act. PPL Electric delivers electricity to approximately 1.4 million customers in a 10,000-square mile territory in 29 counties of eastern and central Pennsylvania. PPL Electric also provides electricity supply in this territory as a PLR.

Details of electric revenues by customer class for the years ended December 31, are shown below.

	2011		2010		2009	
	Revenue	% of Revenue	Revenue	% of Revenue	Revenue	% of Revenue
Residential	$ 1,266	67	$ 1,469	60	$ 1,473	45
Industrial	62	3	123	5	519	16
Commercial	431	23	588	24	1,173	35
Other (a) (b)	133	7	275	11	127	4
Total	$ 1,892	100	$ 2,455	100	$ 3,292	100

(a) Includes regulatory over- or under-recovery reconciliation mechanisms, pole attachment revenues, street lighting and net transmission revenues.
(b) Included in these amounts for 2011, 2010 and 2009 are $11 million, $7 million and $74 million of retail and wholesale electric to affiliate revenue which is eliminated in consolidation for PPL.

Franchise, Licenses and Other Regulations

PPL Electric is authorized to provide electric public utility service throughout its service area as a result of grants by the Commonwealth of Pennsylvania in corporate charters to PPL Electric and companies to which it has succeeded and as a

result of certification by the PUC. PPL Electric is granted the right to enter the streets and highways by the Commonwealth subject to certain conditions. In general, such conditions have been met by ordinance, resolution, permit, acquiescence or other action by an appropriate local political subdivision or agency of the Commonwealth.

Competition

Pursuant to authorizations from the Commonwealth of Pennsylvania and the PUC, PPL Electric operates a regulated transmission and distribution monopoly in its service area. Accordingly, PPL Electric does not face competition in its electricity transmission and distribution businesses.

Rates and Regulation

Transmission and Distribution

PPL Electric's transmission facilities are within PJM, which operates the electric transmission network and electric energy market in the Mid-Atlantic and Midwest regions of the U.S.

PJM serves as a FERC-approved RTO to promote greater participation and competition in the region it serves. In addition to operating the electric transmission network, PJM also administers regional markets for energy, capacity and ancillary services. A primary objective of any RTO is to separate the operation of, and access to, the transmission grid from market participants that buy or sell electricity in the same markets. Electric utilities continue to own the transmission assets and to receive their share of transmission revenues, but the RTO directs the control and operation of the transmission facilities. PPL Electric is entitled to fully recover from customers the charges that it pays to PJM for transmission-related services.

PPL Electric's transmission revenues are billed in accordance with a FERC tariff that allows recovery of transmission costs incurred, a return on transmission-related plant and an automatic annual update.

PPL Electric's distribution base rates are calculated based on a return on rate base (net utility plant plus a cash working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions). In November 2004, Pennsylvania enacted the Alternative Energy Portfolio Standard Act (the AEPS), which requires electricity distribution companies and electricity generation suppliers, to obtain a portion of the electricity sold to retail customers in Pennsylvania from alternative energy sources. Under the default service procurement plans approved by the PUC, PPL Electric purchases all of the alternative energy generation supply it needs to comply with the AEPS.

Act 129 became effective in October 2008. The law creates an energy efficiency and conservation program, a demand side management program, smart metering technology requirements, new PLR generation supply procurement rules, remedies for market misconduct, and changes to the existing AEPS.

See "Regulatory Matters - Pennsylvania Activities" in Note 6 to the Financial Statements for additional information regarding Act 129, other legislative and regulatory impacts and PPL Electric's actions to provide default electricity supply for periods after 2009.

PLR

The Customer Choice Act requires electric distribution companies, including PPL Electric, to act as a PLR of electricity supply and provides that electricity supply costs will be recovered by such companies pursuant to regulations established by the PUC. As part of the PUC Final Order, PPL Electric agreed to supply this electricity at predetermined capped rates through 2009. To mitigate the risk that PPL Electric would not be able to obtain adequate energy supply at the "capped" rates, PPL Electric entered into full-requirement energy supply contracts with PPL EnergyPlus sufficient for PPL Electric to meet its PLR obligation through the end of 2009. Under these contracts, PPL EnergyPlus supplied PPL Electric's entire PLR load at predetermined prices equal to the capped generation rates that PPL Electric was authorized to charge its customers. Prior to the expiration of the rate caps, PPL Electric's customers had limited incentive to purchase generation supply from other providers because the contracts between PPL Electric and PPL EnergyPlus provided a below-market price for these customers. As a result, a limited amount of "shopping" occurred. Since the expiration of the rate caps, shopping has increased and at December 31, 2011, the following percentages of PPL Electric's customer load were shopping: 43% of residential, 82% of small commercial and industrial and 99% of large commercial and industrial customers. The PUC continues to be interested in the competitive market for electricity. See "Regulatory Matters - Pennsylvania Activities" in Note 6 to the Financial Statements for additional information.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL Electric's PLR obligation after 2009 is governed by the PUC pursuant to the Public Utility Code as amended by Act 129, PLR regulations and a policy statement regarding interpretation and implementation of those regulations. Effective January 1, 2010, PPL Electric's cost of electric generation is based on a competitive solicitation process. The PUC has approved PPL Electric's default service plan for the period January 2011 through May 2013, which includes 14 solicitations for supply beginning January 1, 2011 with a portion extending beyond May 2013. Pursuant to this plan, PPL Electric contracts for all of the electricity supply for residential, small commercial and small industrial customers, large commercial and large industrial customers who elect to take that service from PPL Electric. These solicitations include a mix of spot market purchases and long-term and short-term purchases ranging from five months to ten years to fulfill PPL Electric's obligation to provide customer supply as a PLR. To date, PPL Electric has conducted ten of its 14 planned competitive solicitations. See "Energy Purchase Commitments" in Note 15 to the Financial Statements for additional information regarding PPL Electric's solicitations for 2011 and its actions to provide default electricity supply for periods after 2011.

In addition, alternative suppliers have offered to provide generation supply in PPL Electric's service territory. Whether its customers purchase supply from these alternative suppliers or from PPL Electric as a PLR, the purchase of such supply has no impact on the financial results of PPL Electric. The cost to purchase PLR supply is passed directly by PPL Electric to its customers without markup.

2010 Rate Case

In March 2010, PPL Electric filed a request with the PUC to increase distribution rates by approximately $115 million or approximately 2.4% over PPL Electric's projected 2010 revenues, to be effective January 1, 2011. In December 2010, the PUC approved a settlement filed by the parties that provides for a rate increase of $77.5 million, or 1.6%, over PPL Electric's projected 2010 revenues. The approved rates became effective for service rendered on and after January 1, 2011. In January 2011, the PP&L Industrial Customers Alliance (PPLICA) filed a Petition for Reconsideration of the PUC's order regarding PPLICA's proposal for a special rate schedule for certain large commercial and industrial customers. The PUC granted reconsideration and assigned the case to an Administrative Law Judge. Hearings were held in September 2011. In January 2012, the Administrative Law Judge issued a recommended decision that the PUC deny PPLICA's proposal. PPLICA filed exceptions to the recommended decision. PPL Electric will file reply exceptions.

FERC Formula Rates

In March 2012, PPL Electric plans to file a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives which transferred regulatory jurisdiction of certain transmission assets from the PUC to the FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is included in "Other Noncurrent Assets - Regulatory assets" on the Balance Sheet. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

See Note 6 to the Financial Statements for additional information on rate mechanisms.

(PPL and PPL Energy Supply)

- ***Supply Segment***

  Owns and operates competitive domestic power plants to generate electricity; markets and trades this electricity, purchased power, and other energy-related products to competitive wholesale and retail markets; and acquires and develops competitive domestic generation projects. Consists primarily of the activities of PPL Generation and PPL EnergyPlus.

PPL Energy Supply has generation assets that are located in the northeastern and northwestern U.S. markets. The northeastern generating capacity is located primarily in Pennsylvania within PJM and northwestern generating capacity is located in Montana. PPL Energy Supply enters into energy and energy-related contracts to hedge the variability of expected cash flows associated with their generating units and marketing activities, as well as for trading purposes. PPL EnergyPlus sells the electricity produced by PPL Energy Supply's generation plants based on prevailing market rates.

Details of revenue by category for the years ended December 31, are shown below.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2011		2010		2009	
	Revenue	% of Revenue	Revenue	% of Revenue	Revenue	% of Revenue
Energy						
Wholesale (a)	$ 5,240	82	$ 4,347	85	$ 4,761	90
Retail	727	11	415	8	152	3
Trading	(2)		2		17	
Total energy	5,965	93	4,764	93	4,930	93
Energy-related businesses (b)	464	7	364	7	379	7
Total	$ 6,429	100	$ 5,128	100	$ 5,309	100

(a) Included in these amounts for 2011, 2010, and 2009 are $26 million, $320 million and $1.8 billion of wholesale electric sales to an affiliate which are eliminated in consolidation for PPL.

(b) Energy-related businesses revenues include activities that primarily support the generation, marketing and trading businesses. These activities include developing renewable energy projects and providing energy-related products and services to commercial and industrial customers through its mechanical contracting and services subsidiaries. In addition to these amounts, for 2011, 2010, and 2009, PPL has $8 million, $11 million and $12 million of revenue which is not applicable to PPL Energy Supply.

Power Supply

PPL Energy Supply owned or controlled generating capacity (summer rating) of 10,508 MW at December 31, 2011. The system capacity of PPL Energy Supply's owned or controlled generation is based upon a number of factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changes in circumstances. Generating capacity controlled by PPL Generation and other PPL Energy Supply subsidiaries includes power obtained through PPL EnergyPlus' tolling or power purchase agreements (including Ironwood and other facilities that consist of NUGs, wind farms and landfill gas facilities). See "Item 2. Properties - Supply Segment" for a complete listing of PPL Energy Supply's generating capacity.

During 2011, PPL Energy Supply's power plants, excluding renewable facilities that are discussed separately below, generated the following amounts of electricity.

	Thousands of MWhs		
Fuel Source	Northeastern	Northwestern	Total
Nuclear	15,627		15,627
Oil / Gas (a)	9,033		9,033
Coal	21,612	3,842	25,454
Hydro (a)	682	3,697	4,379
Total (b)	46,954	7,539	54,493

(a) Northeastern includes generation from certain non-core generation facilities that were sold in March 2011. See Note 9 to the Financial Statements for additional information.

(b) This generation represents a 4% decrease from 2010 output, largely attributable to PPL Susquehanna's dual-unit turbine blade replacement outages and economic reductions in coal unit output in the western U.S. in 2011.

PPL Energy Supply's generation subsidiaries are EWGs that sell electricity into wholesale markets. EWGs are subject to regulation by the FERC, which has authorized these EWGs to sell the electricity generated at market-based prices. This electricity is sold to PPL EnergyPlus under FERC-jurisdictional power purchase agreements. PPL Susquehanna is subject to the jurisdiction of the NRC in connection with the operation of the Susquehanna nuclear units. Certain of PPL Energy Supply's other subsidiaries are subject to the jurisdiction of the NRC in connection with the operation of their fossil plants with respect to certain level and density monitoring devices. Certain operations of PPL Generation's subsidiaries are also subject to OSHA and comparable state statutes.

See Note 9 to the Financial Statements for information on the 2011 sale of certain non-core generation facilities consisting of natural gas-fired facilities in Wallingford, Connecticut and University Park, Illinois and an equity interest in Safe Harbor Water Power Corporation, which owns a hydroelectric facility in Conestoga, Pennsylvania, the 2010 sale of the Long Island Generation business, consisting of plants in New York and the 2010 and 2009 sales of hydroelectric facilities located in Maine.

Substantially all of PPL Energy Supply's total expected generation in 2012 is anticipated to be used to meet its committed contractual sales. PPL Energy Supply has also entered into commitments of varying quantities and terms for the years 2013 and beyond. PPL EnergyPlus purchases the capacity, energy and RECs from two wind farms in Pennsylvania with a combined installed capacity of 50 MW. These contracts extend through 2027.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL Energy Supply subsidiaries own or control renewable energy projects located in Pennsylvania, New Jersey, Vermont, Connecticut and New Hampshire with a generating capacity (summer rating) of 65 MW. PPL EnergyPlus sells the energy, capacity and RECs produced by these plants into the wholesale market as well as to commercial, industrial and institutional customers. During 2011, the projects owned and operated by these PPL Energy Supply subsidiaries generated 166,000 MWhs.

See "Item 2. Properties - Supply Segment" for additional information regarding PPL Generation's plans for capital projects in Pennsylvania, Montana, and New Jersey that are expected to provide 191 MW of additional electric generating capacity by 2013.

Fuel Supply

PPL EnergyPlus acts as agent for PPL Generation to procure and optimize its various fuels.

Coal

Pennsylvania

PPL EnergyPlus actively manages PPL's coal requirements by purchasing coal principally from mines located in central and northern Appalachia.

During 2011, PPL Generation purchased 7.1 million tons of coal required for its wholly owned Pennsylvania plants under short-term and long-term contracts. Contracts currently in place are expected to provide 7.9 million tons of coal in 2012. The amount of coal in inventory varies from time to time depending on market conditions and plant operations.

PPL Generation, by and through its agent PPL EnergyPlus, has agreements in place that will provide more than 31 million tons of PPL Generation's projected annual coal needs for the Pennsylvania power plants from 2012 through 2018.

A PPL Generation subsidiary owns a 12.34% interest in the Keystone plant and a 16.25% interest in the Conemaugh plant. PPL Generation owns a 12.34% interest in Keystone Fuels, LLC and a 16.25% interest in Conemaugh Fuels, LLC. The Keystone plant contracts with Keystone Fuels, LLC for its coal requirements, which provided 4.4 million tons of coal to the Keystone plant in 2011. The Conemaugh plant requirements are purchased under contract from Conemaugh Fuels, LLC, which provided 4.5 million tons of coal to the Conemaugh plant in 2011.

All PPL Generation Pennsylvania coal plants have scrubbers installed. Limestone is necessary to operate the scrubbers. Acting as agent for PPL Brunner Island, LLC and PPL Montour, LLC, PPL EnergyPlus has entered into long-term contracts with limestone suppliers that will provide for those plants' limestone requirements through 2014. During 2011, 529,000 tons of limestone were delivered to Brunner Island and Montour under long-term contracts. Annual limestone requirements approximate 600,000 tons.

Montana

PPL Montana has a 50% leasehold interest in Colstrip Units 1 and 2, and a 30% leasehold interest in Colstrip Unit 3. NorthWestern owns a 30% leasehold interest in Colstrip Unit 4. PPL Montana and NorthWestern have a sharing agreement to govern each party's responsibilities regarding the operation of Colstrip Units 3 and 4, and each party is responsible for 15% of the respective operating and construction costs, regardless of whether a particular cost is specified to Colstrip Unit 3 or 4. However, each party is responsible for its own fuel-related costs. PPL Montana, along with the other owners, is party to contracts to purchase 100% of its coal requirements with defined coal quality characteristics and specifications. PPL Montana, along with the other owners, has a long-term purchase and supply agreement with the current supplier for Units 1 and 2, which provides these units 100% of their coal requirements through December 2014, and at least 85% of such requirements from January 2015 through December 2019. The coal supply contract for Unit 3's requirements is in effect through December 2019.

These units were built with scrubbers and PPL Montana has entered into a long-term contract to purchase the lime requirements for these units. The contract extends through December 2030.

Coal supply contracts are in place to purchase low-sulfur coal with defined quality characteristics and specifications for PPL Montana's Corette plant. The contracts covered 100% of the plant's coal requirements in 2011, and similar contracts are in place to supply 100% of the expected coal requirements through 2012.

Past financial performance is no guarantee of future results.

Oil and Natural Gas

Pennsylvania

PPL Generation's Martins Creek Units 3 and 4 burn both oil and natural gas. During 2011, 100% of the physical gas requirements for the Martins Creek units were purchased on the spot market while oil requirements were supplied from inventory. At December 31, 2011, there were no long-term agreements for oil or natural gas for these units.

Short-term and long-term gas transportation contracts are in place for approximately 38% of the maximum daily requirements of the Lower Mt. Bethel facility. During 2011, 100% of the physical gas requirements for Lower Mt. Bethel were purchased on the spot market.

In 2008, PPL EnergyPlus acquired the rights to an existing long-term tolling agreement associated with the capacity and energy of the Ironwood facility. PPL EnergyPlus has long-term transportation contracts to serve approximately 25% of Ironwood's maximum daily requirements, which began in the fourth quarter of 2010. Ironwood will be served through a combination of transportation capacity release transactions and delivered supply to the plant. PPL EnergyPlus currently has no long-term physical supply agreements to purchase natural gas for Ironwood. During 2011, 100% of the physical gas requirements for Ironwood were purchased on the spot market.

Nuclear

The nuclear fuel cycle consists of several material and service components: the mining and milling of uranium ore to produce uranium concentrates; the conversion of these concentrates into uranium hexafluoride, a gas component; the enrichment of the hexafluoride gas; the fabrication of fuel assemblies for insertion and use in the reactor core; and the temporary storage and final disposal of spent nuclear fuel.

PPL Susquehanna has a portfolio of supply contracts, with varying expiration dates, for nuclear fuel materials and services. These contracts are expected to provide sufficient fuel to permit Unit 1 to operate into the first quarter of 2016 and Unit 2 to operate into the first quarter of 2017. PPL Susquehanna anticipates entering into additional contracts to ensure continued operation of the nuclear units.

Federal law requires the U.S. government to provide for the permanent disposal of commercial spent nuclear fuel, but there is no definitive date by which a repository will be operational. As a result, it was necessary to expand Susquehanna's on-site spent fuel storage capacity. To support this expansion, PPL Susquehanna contracted for the design and construction of a spent fuel storage facility employing dry cask fuel storage technology. The facility is modular, so that additional storage capacity can be added as needed. The facility began receiving spent nuclear fuel in 1999. PPL Susquehanna estimates that there is sufficient storage capacity in the spent nuclear fuel pools and the on-site spent fuel storage facility at Susquehanna to accommodate spent fuel discharged through approximately 2017 under current operating conditions. If necessary, the on-site spent fuel storage facility can be expanded, assuming appropriate regulatory approvals are obtained, such that, together, the spent fuel pools and the expanded dry fuel storage facility will accommodate all of the spent fuel expected to be discharged through the current licensed life of the plant.

In 1996, the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court) ruled that the Nuclear Waste Policy Act imposed on the DOE an unconditional obligation to begin accepting spent nuclear fuel on or before January 31, 1998. In 1997, the D.C. Circuit Court ruled that the contracts between the utilities and the DOE provide a potentially adequate remedy if the DOE failed to begin accepting spent nuclear fuel by January 31, 1998. The DOE did not, in fact, begin to accept spent nuclear fuel by that date. The DOE continues to contest claims that its breach of contract resulted in recoverable damages. In January 2004, PPL Susquehanna filed suit in the U.S. Court of Federal Claims for unspecified damages suffered as a result of the DOE's breach of its contract to accept and dispose of spent nuclear fuel. In May 2011, the parties entered into a settlement agreement which resolved all claims of PPL Susquehanna through December 2013. Under the settlement agreement, PPL Susquehanna received $50 million for its share of claims to recover costs to store spent nuclear fuel at the Susquehanna plant through September 30, 2009, and recognized a credit to "Fuel" expense in the Statement of Income in the second quarter of 2011. PPL Susquehanna also will be eligible to receive payment of annual claims for allowed costs, as set forth in the settlement agreement, that are incurred thereafter through the December 31, 2013 termination date of the settlement agreement. In exchange, PPL Susquehanna has waived any claims against the United States government for costs paid or injuries sustained related to storing spent nuclear fuel at the Susquehanna plant through December 31, 2013.

Energy Marketing

PPL EnergyPlus sells the capacity and electricity produced by PPL Generation subsidiaries, along with purchased power, FTRs, natural gas, oil, uranium, emission allowances and RECs in competitive wholesale and competitive retail markets.

Purchases and sales at the wholesale level are made at competitive prices under FERC market-based prices. PPL EnergyPlus is licensed to provide retail electric supply to customers in Delaware, Maryland, Montana, New Jersey and Pennsylvania and provides retail natural gas supply to customers in Pennsylvania, New Jersey, Delaware and Maryland. Within the constraints of its hedging policy, PPL EnergyPlus actively manages its portfolios of energy and energy-related products to optimize their value and to limit exposure to price fluctuations. See "Commodity Volumetric Activity" in Note 19 to the Financial Statements for the strategies PPL Energy Supply employs to optimize the value of its wholesale and retail energy portfolio.

Competition

Since the early 1990s, there has been increased competition in U.S. energy markets because of federal and state competitive market initiatives. While some states, such as Pennsylvania and Montana, have created a competitive market for electricity generation, other states continue to consider different types of regulatory initiatives concerning competition in the power and gas industry. Some states that were considering creating competitive markets have slowed their plans or postponed further consideration. In addition, states that have created competitive markets have, from time to time, considered new market rules and re-regulation measures that could result in more limited opportunities for competitive energy suppliers. The activity around re-regulation, however, has slowed due to the current environment of declining power prices. As such, the markets in which PPL Energy Supply participates are highly competitive.

PPL Energy Supply faces competition in wholesale markets for available energy, capacity and ancillary services. Competition is impacted by electricity and fuel prices, congestion along the power grid, new market entrants, construction by others of generating assets, technological advances in power generation, the actions of environmental and other regulatory authorities and other factors. PPL Energy Supply primarily competes with other electricity suppliers based on its ability to aggregate generation supply at competitive prices from different sources and to efficiently utilize transportation from third-party pipelines and transmission from electric utilities and ISOs. Competitors in wholesale power markets include regulated utilities, industrial companies, NUGs, competitive subsidiaries of regulated utilities and other energy marketers. See "Item 1A. Risk Factors - Risks Related to Supply Segment" and PPL's and PPL Energy Supply's "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview" for more information concerning the risks faced with respect to competitive energy markets.

Franchise and Licenses

See "Energy Marketing" above for a discussion of PPL EnergyPlus' licenses in various states. PPL EnergyPlus also has an export license from the DOE to sell capacity and/or energy to electric utilities in Canada.

PPL Susquehanna operates Units 1 and 2 pursuant to NRC operating licenses that expire in 2042 for Unit 1 and in 2044 for Unit 2.

In 2008, a PPL Energy Supply subsidiary, PPL Bell Bend, LLC, submitted a COLA to the NRC for a new nuclear generating unit (Bell Bend) to be built adjacent to the Susquehanna plant. Also in 2008, the COLA was accepted for review by the NRC. PPL Bell Bend, LLC does not expect the NRC review of the Bell Bend project to be completed prior to 2014. See Note 8 to Financial Statements for additional information.

PPL Holtwood operates the Holtwood hydroelectric generating plant pursuant to a FERC-granted license that expires in 2030. In October 2009, the FERC approved the request to expand the Holtwood plant. See Note 8 to the Financial Statements for additional information. PPL Holtwood operates the Wallenpaupack hydroelectric generating plant pursuant to a FERC-granted license that expires in 2044.

In 2010, PPL Holtwood owned one-third of the capital stock of Safe Harbor Water Power Corporation (Safe Harbor), which held a project license that would extend operation of its hydroelectric generating plant until 2030. In March 2011, PPL Energy Supply subsidiaries completed the sale of their ownership interests in Safe Harbor and two other non-core generating facilities. See Note 9 to the Financial Statements for additional information.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The 11 hydroelectric facilities and one storage reservoir in Montana are licensed by the FERC. The Thompson Falls and Kerr licenses expire in 2025 and 2035, the licenses for the nine Missouri-Madison facilities expire in 2040, and the license for the Mystic facility expires in 2050.

In connection with the relicensing of these generating facilities, applicable law permits the FERC to relicense the original licensee or license a new licensee or allow the U.S. government to take over the facility. If the original licensee is not relicensed, it is compensated for its net investment in the facility, not to exceed the fair value of the property taken, plus reasonable damages to other property affected by the lack of relicensing. See Note 15 to the Financial Statements for additional information on the Kerr Dam license.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

SEASONALITY

The demand for and market prices of electricity and natural gas are affected by weather. As a result, the Registrants' operating results in the future may fluctuate substantially on a seasonal basis, especially when more severe weather conditions such as heat waves or winter storms make such fluctuations more pronounced. The pattern of this fluctuation may change depending on the type and location of the facilities owned and the terms of contracts to purchase or sell electricity.

FINANCIAL CONDITION

See the Registrant's "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for this information.

CAPITAL EXPENDITURE REQUIREMENTS

See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in the Registrants' "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for information concerning projected capital expenditure requirements for 2012 through 2016. See Note 15 to the Financial Statements for additional information concerning the potential impact on capital expenditures from environmental matters.

ENVIRONMENTAL MATTERS

The Registrants are subject to certain existing and developing federal, regional, state and local laws and regulations with respect to air and water quality, land use and other environmental matters. The EPA is in the process of proposing and finalizing an unprecedented number of environmental regulations that will directly affect the electric industry. These initiatives cover air, water and waste. See PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's "Financial Condition - Liquidity and Capital Resources" in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Forecasted Uses of Cash - Capital Expenditures" for information concerning environmental capital expenditures during 2011 and projected environmental capital expenditures for the years 2012-2016. Also, see "Environmental Matters" in Note 15 to the Financial Statements for additional information. To comply with primarily air-related environmental requirements, PPL's forecast for capital expenditures reflects a best estimate projection of expenditures that may be required within the next five years. Such projections are $1.6 billion for LG&E, $1.5 billion for KU and $130 million for PPL Energy Supply. Actual costs (including capital, allowance purchases and operational modifications) may be significantly lower or higher depending on the final requirements and market conditions. Environmental compliance costs incurred by LG&E and KU are subject to recovery through a rate recovery mechanism. See Note 6 to the Financial Statements for additional information.

The Registrants are unable to predict the ultimate effect of evolving environmental laws and regulations upon their existing and proposed facilities and operations and competitive positions. In complying with statutes, regulations and actions by regulatory bodies involving environmental matters, including, among other things, air and water quality, GHG emissions, hazardous and solid waste management and disposal, and regulation of toxic substances, PPL's and LKE's subsidiaries may be required to modify, replace or cease operating certain of their facilities. PPL's and LKE's subsidiaries may also incur significant capital expenditures and operating expenses in amounts which are not now determinable, but could be significant.

EMPLOYEE RELATIONS

At December 31, 2011, PPL and its subsidiaries had the following full-time employees.

KU	940
LG&E	966
LKS	1,285
Total LKE	3,191
PPL Global (primarily WPD)	6,264
PPL Services and other	1,287
Total PPL	17,722

(a) Includes labor union employees of mechanical contracting subsidiaries, whose numbers tend to fluctuate due to the nature of this business.

Approximately 5,600 employees, or 49%, of PPL's domestic workforce are members of labor unions, with four International Brotherhood of Electrical Workers (IBEW) labor unions representing approximately 4,300 employees. The bargaining agreement with the largest IBEW labor union, which expires in May 2014, covers approximately 1,500 PPL Electric, 1,600 PPL Energy Supply and 400 other employees. Approximately 700 employees of LG&E and 70 employees of KU are represented by an IBEW labor union. Both LG&E and KU have three-year labor agreements with the IBEW, which expire in November 2014 and August 2012. KU's agreement includes annual wage reopeners. Approximately 80 employees of KU are represented by a United Steelworkers of America (USWA) labor union. KU and the USWA have agreed in principle on a labor agreement effective through August 2014, which was ratified by the members in February 2012. PPL Montana's largest bargaining unit, an IBEW labor union, represents approximately 270 employees at the Colstrip plant. The four-year labor agreement expires in April 2012. PPL Montana's second largest bargaining unit, also an IBEW labor union, represents approximately 80 employees at hydroelectric facilities and the Corette plant. In 2011, this four-year labor agreement was extended one year and expires in April 2013.

Approximately 4,100 or 65%, of PPL's U.K. workforce are members of labor unions. WPD recognizes four unions, the largest of which represents 26% of its union workforce. WPD's Electricity Business Agreement, which covers approximately 4,000 union employees, may be amended by agreement between WPD and the unions and is terminable with 12 months notice by either side.

See "Separation Benefits - International Regulated Segment" in Note 10 to the Financial Statements for information on a 2011 reorganization designed to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales). See "Separation Benefits" in Note 13 to the Financial Statements for information on a 2009 cost reduction initiative, which resulted in the elimination of approximately 200 domestic management and staff positions at PPL.

AVAILABLE INFORMATION

PPL's Internet website is www.pplweb.com. On the Investor Center page of that website, PPL provides access to all SEC filings of the Registrants (including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(d) or 15(d)) free of charge, as soon as reasonably practicable after filing with the SEC. Additionally, the Registrants' filings are available at the SEC's website (www.sec.gov) and at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549, or by calling 1-800-SEC-0330.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

ITEM 1A. RISK FACTORS

The Registrants face various risks associated with their businesses. Our businesses, financial condition, cash flows or results of operations could be materially adversely affected by any of these risks. In addition, this report also contains forward-looking and other statements about our businesses that are subject to numerous risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 15 to the Financial Statements for more information concerning the risks described below and for other risks, uncertainties and factors that could impact our businesses and financial results.

As used in this Item 1A., the terms "we," "our" and "us" generally refer to PPL and its consolidated subsidiaries taken as a whole, or to PPL Energy Supply and its consolidated subsidiaries taken as a whole within the Supply segment discussions, or PPL Electric and its consolidated subsidiaries taken as a whole within the Pennsylvania Regulated segment discussion, or LKE and its consolidated subsidiaries taken as a whole within the Kentucky Regulated segment discussion.

Risks Related to All Segments

(*PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU*)

We plan to selectively pursue growth of generation, transmission and distribution capacity, which involves a number of uncertainties and may not achieve the desired financial results.

We plan to pursue expansion of our generation, transmission and distribution capacity over the next several years through power uprates at certain of our existing power plants, the potential construction of new power plants, the potential acquisition of existing plants, the potential construction or acquisition of transmission and distribution projects and capital investments to upgrade transmission and distribution infrastructure. We will rigorously scrutinize opportunities to expand our generating capability and may determine not to proceed with any expansion. These types of projects involve numerous risks. Any planned power uprates could result in cost overruns, reduced plant efficiency and higher operating and other costs. With respect to the construction of new plants, the acquisition of existing plants, or the construction or acquisition of transmission and distribution projects, we may be required to expend significant sums for preliminary engineering, permitting, resource exploration, legal and other expenses before it can be established whether a project is feasible, economically attractive or capable of being financed. Expansion in our regulated businesses is dependent on future load or service requirements and subject to applicable regulatory processes. The success of both a new or acquired project would likely be contingent, among other things, upon the negotiation of satisfactory operating contracts, obtaining acceptable financing and maintaining acceptable credit ratings, as well as receipt of required and appropriate governmental approvals. If we were unable to complete construction or expansion of a project, we may not be able to recover our investment in the project. Furthermore, we might be unable to operate any new or acquired plants as efficiently as projected, which could result in higher than projected operating and other costs and reduced earnings.

Adverse conditions in the economic and financial markets in which we operate could adversely affect our financial condition and results of operations.

Adverse conditions in the financial markets during 2008 and the associated contraction of liquidity in the wholesale energy markets contributed significantly to declines in wholesale energy prices, significantly impacting our earnings during the second half of 2008 and the first half of 2009. The breadth and depth of these negative economic conditions had a wide-ranging impact on the U.S. and international business environment, including our businesses. As a result of the economic downturn, demand for energy commodities has declined significantly. This reduced demand will continue to impact the key domestic wholesale energy markets we serve (such as PJM) and our Pennsylvania and Kentucky utility businesses. The combination of lower demand for power and natural gas and other fuels has put downward price pressure on wholesale energy markets in general, further impacting our energy marketing results. In general, current economic and commodity market conditions will continue to challenge predictability regarding our unhedged future energy margins, liquidity and overall financial condition.

Our businesses are heavily dependent on credit and capital, among other things, for capital expenditures and providing collateral to support hedging in our energy marketing business. Global bank credit capacity declined and the cost of renewing or establishing new credit facilities increased significantly in 2008, primarily as a result of general credit concerns nationwide, thereby introducing uncertainties as to our businesses' ability to enter into long-term energy commitments or reliably estimate the longer-term cost and availability of credit. Although bank credit conditions have improved since mid-2009, and we currently expect to have adequate access to needed credit and capital based on current conditions, deterioration in the financial markets could adversely affect our financial condition and liquidity. Additionally, regulations to be adopted to implement the Dodd-Frank Act may impose requirements on our businesses and the businesses of others with whom we

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

contract such as banks or other counterparties, or simply result in increased costs to conduct our business or access sources of capital and liquidity upon which the conduct of our businesses is dependent.

Our operating revenues could fluctuate on a seasonal basis, especially as a result of extreme weather conditions.

Our businesses are subject to seasonal demand cycles. For example, in some markets demand for, and market prices of, electricity peak during hot summer months, while in other markets such peaks occur in cold winter months. As a result, our overall operating results in the future may fluctuate substantially on a seasonal basis if weather conditions such as heat waves, extreme cold, unseasonably mild weather or severe storms occur. The patterns of these fluctuations may change depending on the type and location of our facilities and the terms of our contracts to sell electricity.

Operating expenses could be affected by weather conditions, including storms, as well as by significant man-made or accidental disturbances, including terrorism or natural disasters.

Weather and these other factors can significantly affect our profitability or operations by causing outages, damaging infrastructure and requiring significant repair costs. Storm outages and damage often directly decrease revenues or increase expenses, due to reduced usage and higher restoration charges. In addition, weather and other disturbances may affect capital markets and general economic conditions and impact future growth.

Our businesses are subject to physical, market and economic risks relating to potential effects of climate change.

Climate change may produce changes in weather or other environmental conditions, including temperature or precipitation levels, and thus may impact consumer demand for electric power. Temperature increases could result in increased overall electricity consumption or peaks and precipitation changes could result in altered availability of water for hydro generation or plant cooling operations. These or other meteorological changes could lead to increased operating costs, capital expenses or power purchase costs. Greenhouse gas regulation could increase the cost of electric power, particularly power generated by fossil-fuels, and such increases could have a depressive effect on regional economies. Reduced economic and consumer activity in our service areas -- both generally and specific to certain industries and consumers accustomed to previously lower cost power -- could reduce demand for the power we generate, market and deliver. Also, demand for our energy-related services could be similarly lowered should consumers' preferences or market factors move toward favoring energy efficiency, low-carbon power sources or reduced electric usage generally.

We cannot predict the outcome of the legal proceedings and investigations currently being conducted with respect to our current and past business activities. An adverse determination could have a material adverse effect on our financial condition, results of operations or cash flows.

We are involved in legal proceedings, claims and litigation and subject to ongoing state and federal investigations arising out of our business operations, the most significant of which are summarized in "Legal Matters," "Regulatory Issues" and "Environmental Matters - Domestic" in Note 15 to the Financial Statements. We cannot predict the ultimate outcome of these matters, nor can we reasonably estimate the costs or liabilities that could potentially result from a negative outcome in each case.

We could be negatively affected by rising interest rates, downgrades to our bond credit ratings or other negative developments in our ability to access capital markets.

In the ordinary course of business, we are reliant upon adequate long-term and short-term financing means to fund our significant capital expenditures, debt interest or maturities and operating needs. As a capital-intensive business, we are sensitive to developments in interest rate levels; credit rating considerations; insurance, security or collateral requirements; market liquidity and credit availability and refinancing opportunities necessary or advisable to respond to credit market changes. Changes in these conditions could result in increased costs and decreased liquidity to our regulated utility businesses.

A downgrade in our credit ratings could negatively affect our ability to access capital and increase the cost of maintaining our credit facilities and any new debt.

Credit ratings assigned by Moody's, Fitch and S&P to our businesses and their financial obligations have a significant impact on the cost of capital incurred by our businesses. Although we do not expect these ratings to limit our ability to fund short-term liquidity needs or access new long-term debt, any ratings downgrade could increase our short-term borrowing costs and negatively affect our ability to fund short-term liquidity needs and access new long-term debt. See "Item 7. Management's

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Liquidity and Capital Resources - Ratings Triggers" for additional information on the impact of a downgrade in our credit rating.

Significant increases in our operation and maintenance expenses, including health care and pension costs, could adversely affect our future earnings and liquidity.

We continually focus on limiting and reducing where possible our operation and maintenance expenses. However, we expect to continue to face increased cost pressures in our operations. Increased costs of materials and labor may result from general inflation, increased regulatory requirements (especially in respect of environmental regulations), the need for higher-cost expertise in the workforce or other factors. In addition, pursuant to collective bargaining agreements, we are contractually committed to provide specified levels of health care and pension benefits to certain current employees and retirees. We provide a similar level of benefits to our management employees. These benefits give rise to significant expenses. Due to general inflation with respect to such costs, the aging demographics of our workforce and other factors, we have experienced significant health care cost inflation in recent years, and we expect our health care costs, including prescription drug coverage, to continue to increase despite measures that we have taken and expect to take to require employees and retirees to bear a higher portion of the costs of their health care benefits. In addition, we expect to continue to incur significant costs with respect to the defined benefit pension plans for our employees and retirees. The measurement of our expected future health care and pension obligations, costs and liabilities is highly dependent on a variety of assumptions, most of which relate to factors beyond our control. These assumptions include investment returns, interest rates, health care cost trends, benefit improvements, salary increases and the demographics of plan participants. If our assumptions prove to be inaccurate, our future costs and cash contribution requirements to fund these benefits could increase significantly.

We may be required to record impairment charges in the future for certain of our investments, which could adversely affect our earnings.

Under GAAP, we are required to test our recorded goodwill for impairment on an annual basis, or more frequently if events or circumstances indicate that these assets may be impaired. Although no goodwill impairments were recorded based on our annual review in the fourth quarter of 2011, we are unable to predict whether future impairment charges may be necessary.

We also review our long-lived assets, including equity investments, for impairment when events or circumstances indicate that the carrying value of these assets may not be recoverable. See Notes 9 and 18 to the Financial Statements for additional information on impairment charges taken during the reporting periods. We are unable to predict whether impairment charges, or other losses on sales of other assets or businesses, may occur in future years.

We may incur liabilities in connection with discontinued operations.

In connection with various divestitures, we have indemnified or guaranteed parties against certain liabilities and with respect to certain transactions. These indemnities and guarantees relate to, among other things, liabilities which may arise with respect to the period during which we or our subsidiaries operated the divested business, and to certain ongoing contractual relationships and entitlements with respect to which we or our subsidiaries made commitments in connection with the divestiture.

We are subject to liability risks relating to our generation, transmission and distribution businesses.

The conduct of our physical and commercial operations subjects us to many risks, including risks of potential physical injury, property damage or other financial liability, caused to or caused by employees, customers, contractors, vendors, contractual or financial counterparties and other third parties.

Our facilities may not operate as planned, which may increase our expenses or decrease our revenues and, thus, have an adverse effect on our financial performance.

Operation of power plants, transmission and distribution facilities, information technology systems and other assets and activities subjects us to a variety of risks, including the breakdown or failure of equipment, accidents, security breaches, viruses or outages affecting information technology systems, labor disputes, obsolescence, delivery/transportation problems and disruptions of fuel supply and performance below expected levels. These events may impact our ability to conduct our businesses efficiently or lead to increased costs, expenses or losses. Operation of our delivery systems below our expectations may result in lost revenue or increased expense, including higher maintenance costs which may not be recoverable from customers. Planned and unplanned outages at our power plants may require us to purchase power at then-current market prices to satisfy our commitments or, in the alternative, pay penalties and damages for failure to satisfy them.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Although we maintain customary insurance coverage for certain of these risks, no assurance can be given that such insurance coverage will be sufficient to compensate us fully in the event losses occur.

The operation of our businesses is subject to cyber-based security and integrity risk.

Numerous functions affecting the efficient operation of our businesses are dependent on the secure and reliable storage, processing and communication of electronic data and the use of sophisticated computer hardware and software systems. The operation of our generation plants, including the Susquehanna nuclear plant, and of our energy and fuel trading businesses, as well as our transmission and distribution operations are all reliant on cyber-based technologies and, therefore, subject to the risk that such systems could be the target of disruptive actions, principally by terrorists or vandals, or otherwise be compromised by unintentional events. As a result, operations could be interrupted, property could be damaged and customer information lost or stolen, causing us to incur significant losses of revenues, other substantial liabilities and damages and costs to replace or repair damaged equipment.

We are subject to risks associated with federal and state tax laws and regulations.

Changes in tax law as well as the inherent difficulty in quantifying potential tax effects of business decisions could negatively impact our results of operations. We are required to make judgments in order to estimate our obligations to taxing authorities. These tax obligations include income, property, sales and use and employment-related taxes. We also estimate our ability to utilize tax benefits and tax credits. Due to the revenue needs of the jurisdictions in which our businesses operate, various tax and fee increases may be proposed or considered. We cannot predict whether such tax legislation or regulation will be introduced or enacted or the effect of any such changes on our businesses. If enacted, any changes could increase tax expense and could have a significant negative impact on our results of operations and cash flows.

We are subject to the risk that our workforce and its knowledge base may become depleted in coming years.

PPL is experiencing an increase in attrition due primarily to the number of retiring employees. Over the next five years, 38% of PPL's workforce is projected to leave the company, with the risk that critical knowledge will be lost and that it may be difficult to replace departed personnel due to a declining trend in the number of available workers and an increase in competition for such workers.

(PPL, PPL Energy Supply and LKE)

Risk Related to Registrant Holding Companies

PPL's, PPL Energy Supply's and LKE's cash flows and ability to meet their obligations with respect to indebtedness and under guarantees, and PPL's ability to pay dividends, largely depends on the financial performance of their subsidiaries and, as a result, is effectively subordinated to all existing and future liabilities of those subsidiaries.

PPL, PPL Energy Supply and LKE are holding companies and conduct their operations primarily through subsidiaries. Substantially all of the consolidated assets of these Registrants are held by such subsidiaries. Accordingly, their cash flows and ability to meet their debt and guaranty obligations, as well as PPL's ability to pay dividends, are largely dependent upon the earnings of those subsidiaries and the distribution or other payment of such earnings in the form of dividends, distributions, loans or advances or repayment of loans and advances. The subsidiaries are separate and distinct legal entities and have no obligation to pay any amounts due from their parents or to make any funds available for such a payment. The ability of the subsidiaries of the Registrants to pay dividends or distributions to such Registrants in the future will depend on the subsidiaries' future earnings and cash flows and the needs of their businesses, and may be restricted by their obligations to holders of their outstanding debt and other creditors, as well as any contractual or legal restrictions in effect at such time, including the requirements of state corporate law applicable to payment of dividends and distributions, and regulatory requirements, including restrictions on the ability of PPL Electric, LG&E and KU to pay dividends under Section 305(a) of the Federal Power Act.

Because PPL, PPL Energy Supply and LKE are holding companies, their debt and guaranty obligations are effectively subordinated to all existing and future liabilities of their subsidiaries. Therefore, PPL's, PPL Energy Supply's and LKE's rights and the rights of their creditors, including rights of any debt holders, to participate in the assets of any of their subsidiaries, in the event that such a subsidiary is liquidated or reorganized, will be subject to the prior claims of such subsidiary's creditors. Although certain agreements to which certain subsidiaries are parties limit their ability to incur additional indebtedness, PPL, PPL Energy Supply and LKE and their subsidiaries retain the ability to incur substantial additional indebtedness and other liabilities. In addition, if PPL elects to receive distributions of earnings from its foreign

operations, PPL may incur U.S. income taxes, net of any available foreign tax credits, on such amounts. Distributions to PPL from its international projects are, in some countries, also subject to withholding taxes.

(PPL, PPL Electric, LKE, LG&E and KU)

Risks Related to Domestic Regulated Utility Operations

Our domestic regulated utility businesses face many of the same risks, in addition to those risks that are unique to the Kentucky Regulated segment and the Pennsylvania Regulated segment. Set forth below are risk factors common to both domestic regulated segments, followed by sections identifying separately the risks specific to each of these segments.

Our profitability is highly dependent on our ability to recover the costs of providing energy and utility services to our customers and earn an adequate return on our capital investments. Regulators may not approve the rates we request.

We currently provide services to our utility customers at rates approved by one or more federal or state regulatory commissions, including those commissions referred to below. While such regulation is generally premised on the recovery of prudently incurred costs and a reasonable rate of return on invested capital, the rates that we may charge our regulated generation, transmission and distribution customers are subject to authorization of the applicable regulatory authorities. There can be no assurance that such regulatory authorities will consider all of our costs to have been prudently incurred or that the regulatory process by which rates are determined will always result in rates that achieve full recovery of our costs or an adequate return on our capital investments. While our rates are generally regulated based on an analysis of our costs incurred in a base year, the rates we are allowed to charge may or may not match our costs at any given time. With respect to PPL's November 1, 2010 acquisition of LKE, each of LG&E and KU has agreed with the KPSC, subject to certain limited exceptions such as fuel and environmental cost recoveries, that no base rate increases would take effect for their Kentucky retail customers before January 1, 2013. Our regulated utility businesses are subject to substantial capital expenditure requirements over the next several years, which will require rate increase requests to the regulators. If our costs are not adequately recovered through rates, it could have an adverse affect on our business, results of operations, cash flows or financial condition.

Our domestic utility businesses are subject to significant and complex governmental regulation.

Various federal and state entities, including but not limited to the FERC, KPSC, VSCC, TRA and PUC regulate many aspects of the domestic utility operations of PPL, including:

- the rates that we may charge and the terms and conditions of our service and operations;
- financial and capital structure matters;
- siting, construction and operation of facilities;
- mandatory reliability and safety standards and other standards of conduct;
- accounting, depreciation and cost allocation methodologies;
- tax matters;
- affiliate restrictions;
- acquisition and disposal of utility assets and securities; and
- various other matters.

Such regulations or changes thereto may subject us to higher operating costs or increased capital expenditures and failure to comply could result in sanctions or possible penalties. In any rate-setting proceedings, federal or state agencies, intervenors and other permitted parties may challenge our rate requests, and ultimately reduce, alter or limit the rates we seek.

We could be subject to higher costs and/or penalties related to mandatory reliability standards.

Under the Energy Policy Act of 2005, owners and operators of the bulk power transmission system are now subject to mandatory reliability standards promulgated by the NERC and enforced by the FERC. Compliance with reliability standards may subject us to higher operating costs and/or increased capital expenditures, and violations of these standards could result in substantial penalties which may not be recoverable from customers.

Changes in transmission and wholesale power market structures could increase costs or reduce revenues.

Wholesale revenues fluctuate with regional demand, fuel prices and contracted capacity. Changes to transmission and wholesale power market structures and prices may occur in the future, are not predictable and may result in unforeseen

Past financial performance is no guarantee of future results.

effects on energy purchases and sales, transmission and related costs or revenues. These can include commercial or regulatory changes affecting power pools, exchanges or markets in which PPL participates.

Our domestic regulated businesses undertake significant capital projects and these activities are subject to unforeseen costs, delays or failures, as well as risk of inadequate recovery of resulting costs.

The domestic regulated utility businesses are capital intensive and require significant investments in energy generation (in the case of LG&E and KU) and transmission, distribution and other infrastructure projects, such as projects for environmental compliance and system reliability. The completion of these projects without delays or cost overruns is subject to risks in many areas, including:

- approval, licensing and permitting;
- land acquisition and the availability of suitable land;
- skilled labor or equipment shortages;
- construction problems or delays, including disputes with third party intervenors;
- increases in commodity prices or labor rates;
- contractor performance;
- environmental considerations and regulations;
- weather and geological issues; and
- political, labor and regulatory developments.

Failure to complete our capital projects on schedule or on budget, or at all, could adversely affect our financial performance, operations and future growth if such expenditures are not granted rate recovery by our regulators.

Risks Specific to Kentucky Regulated Segment

(*PPL, LKE, LG&E and KU*)

The costs of compliance with, and liabilities under, environmental laws are significant and are subject to continuing changes.

Extensive federal, state and local environmental laws and regulations are applicable to LG&E's and KU's generation business, including its air emissions, water discharges and the management of hazardous and solid waste, among other business-related activities; and the costs of compliance or alleged non-compliance cannot be predicted but could be material. In addition, our costs may increase significantly if the requirements or scope of environmental laws, regulations or similar rules are expanded or changed. Costs may take the form of increased capital or operating and maintenance expenses, monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of our key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs of their products or demand for our services.

On-going changes in environmental regulations or their implementation requirements and our compliance strategies relating thereto entail a number of uncertainties.

The environmental standards governing LG&E's and KU's businesses, particularly as applicable to coal-fired generation and related activities, continue to be subject to uncertainties due to ongoing rulemakings and other regulatory developments, legislative activities, and litigation. The uncertainties associated with these developments introduce risks to our management of operations and regulatory compliance. Environmental developments, including revisions to applicable standards, changes in compliance deadlines, and invalidation of rules on appeal may require major changes in compliance strategies, operations or assets or adjustments to prior plans. Depending on the extent, frequency and timing of such changes, the companies may be subject to inconsistent requirements under multiple regulatory programs, compressed windows for decision-making and short compliance deadlines that may require aggressive schedules for construction, permitting, and other regulatory approvals. Under such circumstances, the companies may face higher risks of unsuccessful implementation of environmental-related business plans, noncompliance with applicable environmental rules, or increased costs of implementation.

Past financial performance is no guarantee of future results.

Risks Specific to Pennsylvania Regulated Segment

(*PPL and PPL Electric*)

We may be subject to higher transmission costs and other risks as a result of PJM's regional transmission expansion plan (RTEP) process.

PJM and the FERC have the authority to require upgrades or expansion of the regional transmission grid, which can result in substantial expenditures for transmission owners. As discussed in Note 8 to the Financial Statements, we expect to make substantial expenditures to construct the Susquehanna-Roseland transmission line that PJM has determined is necessary for the reliability of the regional transmission grid. Although the FERC has granted our request for incentive rate treatment of such facilities, we cannot be certain that all costs that we may incur will be recoverable. In addition, the date when these facilities will be in service, which can be significantly impacted by delays related to public opposition or other factors, is subject to the outcome of future events that are not all within our control. As a result, we cannot predict the ultimate financial or operational impact of this project or other RTEP projects on PPL Electric.

We could be subject to higher costs and/or penalties related to Pennsylvania Conservation and Energy Efficiency Programs.

Act 129 became effective in October 2008. This law created requirements for energy efficiency and conservation programs and for the use of smart metering technology, imposed new PLR electricity supply procurement rules, provided remedies for market misconduct, and made changes to the existing Alternative Energy Portfolio Standard. The law also requires electric utilities to meet specified goals for reduction in customer electricity usage and peak demand by specified dates (2011 and 2013). Utilities not meeting these requirements of Act 129 are subject to significant penalties that cannot be recovered in rates. Numerous factors outside of our control could prevent compliance with these requirements and result in penalties to us. See "Regulatory Issues - Energy Policy Act of 2005 - Reliability Standards" in Note 15 to the Financial Statements for additional information.

Cost recovery remains subject to political risks.

Although prior initiatives have not resulted in the enactment of such legislation, the possibility remains that certain Pennsylvania legislators could introduce legislation to reinstate generation rate caps or otherwise limit cost recovery through rates for Pennsylvania utilities. If such legislation were introduced and ultimately enacted, PPL Electric could face severe financial consequences including operating losses and significant cash flow shortfalls. In addition, continuing uncertainty regarding PPL Electric's ability to recover its market supply and other costs of operating its business could adversely affect its credit quality, financing costs and availability of credit facilities necessary to operate its business.

(*PPL*)

Risks Related to International Regulated Segment

Our U.K. delivery business is subject to risks with respect to rate regulation and operational performance.

Our U.K. delivery business is rate regulated and operates under an incentive-based regulatory framework. In addition, its ability to manage operational risk is critical to its financial performance. Disruption to the distribution network could reduce profitability both directly through the higher costs for network restoration and also through the system of penalties and rewards that Ofgem has in place relating to customer service levels.

In December 2009, Ofgem completed its rate review for the five-year period from April 1, 2010 through March 31, 2015, thus reducing regulatory rate risk in the International Regulated segment until the next rate review which will be effective April 1, 2015. The regulated income of the International Regulated segment and also the RAV are to some extent linked to movements in the Retail Price Index (RPI). Reductions in the RPI would adversely impact revenues and the debt/RAV ratio.

Our U.K. distribution business exposes us to risks related to U.K. laws and regulations, taxes, economic conditions, foreign currency exchange rate fluctuations, and political conditions and policies of the U.K. government. These risks may reduce the results of operations from our U.K. distribution business.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The acquisition, financing, development and operation of projects in the U.K. entail significant financial risks including:

- changes in laws or regulations relating to U.K. operations, including tax laws and regulations;
- changes in government policies, personnel or approval requirements;
- changes in general economic conditions affecting the U.K.;
- regulatory reviews of tariffs for distribution companies;
- severe weather and natural disaster impacts on the electric sector and our assets;
- changes in labor relations;
- limitations on foreign investment or ownership of projects and returns or distributions to foreign investors;
- limitations on the ability of foreign companies to borrow money from foreign lenders and lack of local capital or loans;
- fluctuations in foreign currency exchange rates and in converting U.K. revenues to U.S. dollars, which can increase our expenses and/or impair our ability to meet such expenses, and difficulty moving funds out of the country in which the funds were earned; and
- compliance with U.S. foreign corrupt practices laws.

The WPD Midlands acquisition may not achieve its intended results, including anticipated cost savings, efficiencies and other benefits.

Although we completed the WPD Midlands acquisition with the expectation that it will result in various benefits, including a significant amount of cost savings and other financial and operational benefits, there can be no assurance regarding the extent to which we will be able to realize these cost-savings or other benefits. Achieving the anticipated benefits, including cost savings, is subject to a number of uncertainties, including whether the businesses acquired can be operated in the manner we intend. Events outside of our control, including but not limited to regulatory changes or developments in the U.K., could also adversely affect our ability to realize the anticipated benefits from the WPD Midlands acquisition. Thus, the integration process may be unpredictable, subject to delays or changed circumstances, and we can give no assurance that the acquired businesses will perform in accordance with our expectations. Additional unanticipated costs may also arise during the integration process. The integration of the WPD (East Midlands) and WPD (West Midlands) businesses may place an additional burden on our management and internal resources, and the diversion of management's attention during the integration and restructuring process could have an adverse effect on our business, financial condition and expected operating results.

The WPD Midlands acquisition exposes us to additional risks and uncertainties with respect to the acquired businesses and their operations.

The WPD Midlands acquisition will rebalance our business mix to a greater percentage of regulated operations. While we believe this should help mitigate our exposure to downturns in the wholesale power markets, it will increase our dependence on rate-of-return regulation. Although we are already exposed to risks relating to rate-of-return regulation, the WPD Midlands acquisition will increase these risks.

The acquired businesses will generally be subject to risks similar to those to which we are subject to in our pre-acquisition U.K. businesses. These include:

- There are various changes being contemplated by Ofgem to the current electricity distribution, gas transmission and gas distribution regulatory frameworks in the U.K. and there can be no assurance as to the effects such changes will have on our U.K. regulated businesses in the future, including the acquired businesses. In particular, in October 2010, Ofgem announced a new regulatory framework that is expected to become effective in April 2015 for the electricity distribution sector in the U.K. The framework, known as RIIO (Revenues = Incentives + Innovation + Outputs), focuses on sustainability, environmental-focused output measures, promotion of low carbon energy networks and financing of new investments. The new regulatory framework is expected to have a wide-ranging effect on electricity distribution companies operating in the U.K., including changes to price controls and price review periods. Our U.K. regulated businesses' compliance with this new regulatory framework may result in significant additional capital expenditures, increases in operating and compliance costs and adjustments to our pricing models.

- Ofgem has formal powers to propose modifications to each distribution license. We are not currently aware of any planned modification to any of our U.K. regulated businesses distribution licenses that would result in a material adverse change to the U.K. regulated businesses and PPL. There can, however, be no assurance that a restrictive modification will not be introduced in the future, which could have an adverse effect on the operations and financial condition of the U.K. regulated businesses and PPL.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- A failure to operate our U.K. networks properly could lead to compensation payments or penalties, or a failure to make capital expenditures in line with agreed investment programs could lead to deterioration of the network. While our U.K. regulated businesses' investment programs are targeted to maintain asset conditions over a five-year period and reduce customer interruptions and customer minutes lost over that period, no assurance can be provided that these regulatory requirements will be met.

- A failure by any of our U.K. regulated businesses to comply with the terms of a distribution license may lead to the issuance of an enforcement order by Ofgem that could have an adverse impact on PPL. Ofgem has powers to levy fines of up to 10 percent of revenue for any breach of a distribution license or, in certain circumstances, such as insolvency, the distribution license itself may be revoked. Unless terminated in the circumstances mentioned above, a distribution license continues indefinitely until revoked by Ofgem following no less than 25 years' written notice.

- We will be subject to increased foreign currency exchange rate risks because a greater portion of our cash flows and reported earnings will be generated by our U.K. business operations. These risks relate primarily to changes in the relative value of the British pound sterling and the U.S. dollar between the time we initially invest U.S. dollars in our U.K. businesses and the time that cash is repatriated to the U.S. from the U.K., including cash flows from our U.K. businesses that may be distributed as future dividends to our shareholders. In addition, our consolidated reported earnings on a U.S. GAAP basis may be subject to increased earnings translation risk, which is the result of the conversion of earnings as reported in our U.K. businesses on a British pound sterling basis to a U.S. dollar basis in accordance with U.S. GAAP requirements.

- Environmental costs and liabilities associated with aspects of the acquired businesses may differ from those of our existing business.

Risks Related to Supply Segment

(*PPL and PPL Energy Supply*)

We face intense competition in our energy supply business, which may adversely affect our ability to operate profitably.

Unlike our regulated utility businesses, our energy supply business is dependent on our ability to operate in a competitive environment and is not assured of any rate of return on capital investments through a predetermined rate structure. Competition is impacted by electricity and fuel prices, new market entrants, construction by others of generating assets and transmission capacity, technological advances in power generation, the actions of environmental and other regulatory authorities and other factors. These competitive factors may negatively impact our ability to sell electricity and related products and services, as well as the prices that we may charge for such products and services, which could adversely affect our results of operations and our ability to grow our business.

We sell our available energy and capacity into the competitive wholesale markets through contracts of varying duration. Competition in the wholesale power markets occurs principally on the basis of the price of products and, to a lesser extent, on the basis of reliability and availability. We believe that the commencement of commercial operation of new electric facilities in the regional markets where we own or control generation capacity and the evolution of demand side management resources will continue to increase competition in the wholesale electricity market in those regions, which could have an adverse effect on the prices we receive for electricity.

We also face competition in the wholesale markets for electricity capacity and ancillary services. We primarily compete with other electricity suppliers based on our ability to aggregate supplies at competitive prices from different sources and to efficiently utilize transportation from third-party pipelines and transmission from electric utilities and ISOs. We also compete against other energy marketers on the basis of relative financial condition and access to credit sources, and our competitors may have greater financial resources than we have.

Competitors in the wholesale power markets in which PPL Generation subsidiaries and PPL EnergyPlus operate include regulated utilities, industrial companies, non-utility generators and competitive subsidiaries of regulated utilities. In the past, the PUHCA significantly restricted mergers and acquisitions and other investments in the electric utility sector. Entirely new competitors, including financial institutions, have entered the energy markets as a result of the repeal of the original PUHCA in 2006. The repeal of the original PUHCA also may lead to consolidation in our industry, resulting in competitors with significantly greater financial resources than we have.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Adverse changes in commodity prices and related costs may decrease our future energy margins, which could adversely affect our earnings and cash flows.

Our energy margins, or the amount by which our revenues from the sale of power exceed our costs to supply power, are impacted by changes in market prices for electricity, fuel, fuel transportation, emission allowances, RECs, electricity transmission and related congestion charges and other costs. Unlike most commodities, the limited ability to store electric power requires that it must be consumed at the time of production. As a result, wholesale market prices for electricity may fluctuate substantially over relatively short periods of time and can be unpredictable. Among the factors that influence such prices are:

- supply and demand for electricity available from current or new generation resources;
- variable production costs, primarily fuel (and the associated fuel transportation costs) and emission allowance expense for the generation resources used to meet the demand for electricity;
- transmission capacity and service into, or out of, markets served;
- changes in the regulatory framework for wholesale power markets;
- liquidity in the wholesale electricity market, as well as general creditworthiness of key participants in the market; and
- weather and economic conditions impacting demand for or the price of electricity or the facilities necessary to deliver electricity.

We do not always hedge against risks associated with electricity and fuel price volatility.

We attempt to mitigate risks associated with satisfying our contractual electricity sales obligations by either reserving generation capacity to deliver electricity or purchasing the necessary financial or physical products and services through competitive markets to satisfy our net firm sales contracts. We also routinely enter into contracts, such as fuel and electricity purchase and sale commitments, to hedge our exposure to fuel requirements and other electricity-related commodities. However, based on economic and other considerations, we may decide not to hedge the entire exposure of our operations from commodity price risk. To the extent we do not hedge against commodity price risk, our results of operations and financial position may be adversely affected.

We are exposed to operational, price and credit risks associated with selling and marketing products in the wholesale and retail electricity markets.

We purchase and sell electricity in wholesale markets under market-based tariffs authorized by FERC throughout the U.S. and also enter into short-term agreements to market available electricity and capacity from our generation assets with the expectation of profiting from market price fluctuations. If we are unable to deliver firm capacity and electricity under these agreements, we could be required to pay damages. These damages would generally be based on the difference between the market price to acquire replacement capacity or electricity and the contract price of any undelivered capacity or electricity. Depending on price volatility in the wholesale electricity markets, such damages could be significant. Extreme weather conditions, unplanned generation facility outages, environmental compliance costs, transmission disruptions, and other factors could affect our ability to meet our obligations, or cause significant increases in the market price of replacement capacity and electricity.

Our wholesale power agreements typically include provisions requiring us to post collateral for the benefit of our counterparties if the market price of energy varies from the contract prices in excess of certain pre-determined amounts. We currently believe that we have sufficient credit to fulfill our potential collateral obligations under these power contracts. Our obligation to post collateral could exceed the amount of our facilities or our ability to increase our facilities could be limited by financial markets or other factors. See Note 7 to the Financial Statements for a discussion of PPL's credit facilities.

We also face credit risk that parties with whom we contract in both the wholesale and retail markets will default in their performance, in which case we may have to sell our electricity into a lower-priced market or make purchases in a higher-priced market than existed at the time of contract. Whenever feasible, we attempt to mitigate these risks using various means, including agreements that require our counterparties to post collateral for our benefit if the market price of energy varies from the contract price in excess of certain pre-determined amounts. However, there can be no assurance that we will avoid counterparty nonperformance risk, which could adversely impact our ability to meet our obligations to other parties, which could in turn subject us to claims for damages.

The load following contracts that PPL EnergyPlus is awarded do not provide for specific levels of load and actual load significantly below or above our forecasts could adversely affect our energy margins.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

We generally hedge our load following obligations with energy purchases from third parties, and to a lesser extent with our own generation. If the actual load is significantly lower than the expected load, we may be required to resell power at a lower price than was contracted for to supply the load obligation, resulting in a financial loss. Alternatively, a significant increase in load could adversely affect our energy margins because we are required under the terms of the load following contracts to provide the energy necessary to fulfill increased demand at the contract price, which could be lower than the cost to procure additional energy on the open market. Therefore, any significant decrease or increase in load compared with our forecasts could have a material adverse effect on our results of operations or financial position.

We may experience disruptions in our fuel supply, which could adversely affect our ability to operate our generation facilities.

We purchase fuel from a number of suppliers. Disruption in the delivery of fuel and other products consumed during the production of electricity (such as coal, natural gas, oil, water, uranium, lime, limestone and other chemicals), including disruptions as a result of weather, transportation difficulties, global demand and supply dynamics, labor relations, environmental regulations or the financial viability of our fuel suppliers, could adversely affect our ability to operate our facilities, which could result in lower sales and/or higher costs and thereby adversely affect our results of operations.

Our risk management policy and programs relating to electricity and fuel prices, interest rates, foreign currency and counterparty credit and non-performance risks may not work as planned, and we may suffer economic losses despite such programs.

We actively manage the market risk inherent in our generation and energy marketing activities, as well as our debt, foreign currency and counterparty credit positions. We have implemented procedures to monitor compliance with our risk management policy and programs, including independent validation of transaction and market prices, verification of risk and transaction limits, portfolio stress tests, sensitivity analyses and daily portfolio reporting of various risk management metrics. Nonetheless, our risk management programs may not work as planned. For example, actual electricity and fuel prices may be significantly different or more volatile than the historical trends and assumptions upon which we based our risk management calculations. Additionally, unforeseen market disruptions could decrease market depth and liquidity, negatively impacting our ability to enter into new transactions. We enter into financial contracts to hedge commodity basis risk, and as a result are exposed to the risk that the correlation between delivery points could change with actual physical delivery. Similarly, interest rates or foreign currency exchange rates could change in significant ways that our risk management procedures were not designed to address. As a result, we cannot always predict the impact that our risk management decisions may have on us if actual events result in greater losses or costs than our risk models predict or greater volatility in our earnings and financial position.

In addition, our trading, marketing and hedging activities are exposed to counterparty credit risk and market liquidity risk. We have adopted a credit risk management policy and program to evaluate counterparty credit risk. However, if counterparties fail to perform, the risk of which has increased due to the economic downturn, we may be forced to enter into alternative arrangements at then-current market prices. In that event, our financial results are likely to be adversely affected.

Our costs to comply with existing and new environmental laws are expected to continue to be significant, and we plan to incur significant capital expenditures for pollution control improvements that, if delayed, would adversely affect our profitability and liquidity.

Our business is subject to extensive federal, state and local statutes, rules and regulations relating to environmental protection. To comply with existing and future environmental requirements and as a result of voluntary pollution control measures we may take, we have spent and expect to spend substantial amounts in the future on environmental control and compliance.

In order to comply with existing and proposed federal and state environmental laws and regulations primarily governing air emissions from coal-fired plants, in 2005 PPL began a program to install scrubbers and other pollution control equipment (primarily aimed at sulfur dioxide, particulate matter and nitrogen oxides with co-benefits for mercury emissions reduction). The cost to install this equipment was approximately $1.6 billion. The scrubbers at our Montour and Brunner Island plants are now in service. Many states and environmental groups have challenged certain federal laws and regulations relating to air emissions as not being sufficiently strict. As a result, it is possible that state and federal regulations will be adopted that would impose more stringent restrictions than are currently in effect, which could require us to significantly increase capital expenditures for additional pollution control equipment.

We may not be able to obtain or maintain all environmental regulatory approvals necessary for our planned capital projects which are necessary to our business. If there is a delay in obtaining any required environmental regulatory approval or if we

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

fail to obtain, maintain or comply with any such approval, operations at our affected facilities could be halted, reduced or subjected to additional costs. Furthermore, at some of our older generating facilities it may be uneconomic for us to install necessary pollution control equipment, which could cause us to retire those units.

For more information regarding environmental matters, including existing and proposed federal, state and local statutes, rules and regulations to which we are subject, see "Environmental Matters - Domestic" in Note 15 to the Financial Statements.

We rely on transmission and distribution assets that we do not own or control to deliver our wholesale electricity. If transmission is disrupted, or not operated efficiently, or if capacity is inadequate, our ability to sell and deliver power may be hindered.

We depend on transmission and distribution facilities owned and operated by utilities and other energy companies to deliver the electricity and natural gas we sell in the wholesale market, as well as the natural gas we purchase for use in our electric generation facilities. If transmission is disrupted (as a result of weather, natural disasters or other reasons) or not operated efficiently by ISOs and RTOs, in applicable markets, or if capacity is inadequate, our ability to sell and deliver products and satisfy our contractual obligations may be hindered, or we may be unable to sell products at the most favorable terms.

The FERC has issued regulations that require wholesale electric transmission services to be offered on an open-access, non-discriminatory basis. Although these regulations are designed to encourage competition in wholesale market transactions for electricity, there is the potential that fair and equal access to transmission systems will not be available or that transmission capacity will not be available in the amounts we require. We cannot predict the timing of industry changes as a result of these initiatives or the adequacy of transmission facilities in specific markets or whether ISOs and RTOs in applicable markets will efficiently operate transmission networks and provide related services.

Despite federal and state deregulation initiatives, our supply business is still subject to extensive regulation, which may increase our costs, reduce our revenues, or prevent or delay operation of our facilities.

Our generation subsidiaries sell electricity into the wholesale market. Generally, our generation subsidiaries and our marketing subsidiaries are subject to regulation by the FERC. The FERC has authorized us to sell generation from our facilities and power from our marketing subsidiaries at market-based prices. The FERC retains the authority to modify or withdraw our market-based rate authority and to impose "cost of service" rates if it determines that the market is not competitive, that we possess market power or that we are not charging just and reasonable rates. Any reduction by the FERC in the rates we may receive or any unfavorable regulation of our business by state regulators could materially adversely affect our results of operations. See "FERC Market-Based Rate Authority" in Note 15 to the Financial Statements for information regarding recent court decisions that could impact the FERC's market-based rate authority program.

In addition, the acquisition, construction, ownership and operation of electricity generation facilities require numerous permits, approvals, licenses and certificates from federal, state and local governmental agencies. We may not be able to obtain or maintain all required regulatory approvals. If there is a delay in obtaining any required regulatory approvals or if we fail to obtain or maintain any required approval or fail to comply with any applicable law or regulation, the operation of our assets and our sales of electricity could be prevented or delayed or become subject to additional costs.

If market deregulation is reversed or discontinued, our business prospects and financial condition could be materially adversely affected.

In some markets, state legislators, government agencies and other interested parties have made proposals to change the use of market-based pricing, re-regulate areas of these markets that have previously been competitive or permit electricity delivery companies to construct or acquire generating facilities. The ISOs that oversee the transmission systems in certain wholesale electricity markets have from time to time been authorized to impose price limitations and other mechanisms to address extremely high prices in the power markets. These types of price limitations and other mechanisms may reduce profits that our wholesale power marketing and trading business would have realized under competitive market conditions absent such limitations and mechanisms. Although we generally expect electricity markets to continue to be competitive, other proposals to re-regulate our industry may be made, and legislative or other actions affecting the electric power restructuring process may cause the process to be delayed, discontinued or reversed in states in which we currently, or may in the future, operate. See "New Jersey Capacity Legislation" in Note 15 to the Financial Statements.

Changes in technology may negatively impact the value of our power plants.

A basic premise of our generation business is that generating electricity at central power plants achieves economies of scale and produces electricity at relatively low prices. There are alternate technologies to produce electricity, most notably fuel

cells, micro turbines, windmills and photovoltaic (solar) cells, the development of which has been expanded due to global climate change concerns. Research and development activities are ongoing to seek improvements in alternate technologies. It is possible that advances will reduce the cost of alternate methods of electricity production to a level that is equal to or below that of certain central station production. Also, as new technologies are developed and become available, the quantity and pattern of electricity usage (the "demand") by customers could decline, with a corresponding decline in revenues derived by generators. These alternative energy sources could result in a decline to the dispatch and capacity factors of our plants. As a result of all of these factors, the value of our generation facilities could be significantly reduced.

We are subject to certain risks associated with nuclear generation, including the risk that our Susquehanna nuclear plant could become subject to increased security or safety requirements that would increase capital and operating expenditures, uncertainties regarding spent nuclear fuel, and uncertainties associated with decommissioning our plant at the end of its licensed life.

Nuclear generation accounted for about 28% of our 2011 generation output. The risks of nuclear generation generally include:

- the potential harmful effects on the environment and human health from the operation of nuclear facilities and the storage, handling and disposal of radioactive materials;
- limitations on the amounts and types of insurance commercially available to cover losses and liabilities that might arise in connection with nuclear operations; and
- uncertainties with respect to the technological and financial aspects of decommissioning nuclear plants at the end of their licensed lives. The licenses for our two nuclear units expire in 2042 and 2044. See Note 21 to the Financial Statements for additional information on the ARO related to the decommissioning.

The NRC has broad authority under federal law to impose licensing requirements, including security, safety and employee-related requirements for the operation of nuclear generation facilities. In the event of noncompliance, the NRC has authority to impose fines or shut down a unit, or both, depending upon its assessment of the severity of the situation, until compliance is achieved. In addition, revised security or safety requirements promulgated by the NRC could necessitate substantial capital or operating expenditures at our Susquehanna nuclear plant. There also remains substantial uncertainty regarding the temporary storage and permanent disposal of spent nuclear fuel, which could result in substantial additional costs to PPL that cannot be predicted. In addition, although we have no reason to anticipate a serious nuclear incident at our Susquehanna plant, if an incident did occur, any resulting operational loss, damages and injuries could have a material adverse effect on our results of operations, cash flows or financial condition. See Note 15 to the Financial Statements for a discussion of nuclear insurance.

ITEM 1B. UNRESOLVED STAFF COMMENTS

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

None.

ITEM 2. PROPERTIES

(PPL, LKE, LG&E and KU)

Kentucky Regulated Segment

LG&E's and KU's properties consist primarily of regulated generation facilities, electric transmission and distribution assets and natural gas transmission and distribution assets in Kentucky. The electric generating capacity at December 31, 2011 was:

		LKE	LG&E		KU	
Primary Fuel/Plant (a)	Total MW Capacity (b) Summer	Ownership or Lease Interest in MW	% Ownership	Ownership or Lease Interest in MW	% Ownership	Ownership or Lease Interest in MW

Total	10,692	8,185		3,352		4,833

(a) LG&E and KU's properties are primarily located in Kentucky, with the exception of the units owned by OVEC. Clifty Creek is located in Indiana and Kyger Creek is located in Ohio.

(b) The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units, and may be revised periodically to reflect changed circumstances.

(c) TC1 and TC2 are jointly owned with Illinois Municipal Electric Agency and Indiana Municipal Power Agency. Each owner is entitled to its proportionate share of the units' total output and funds its proportionate share of capital, fuel and other operating costs. See Note 14 to the Financial Statements for additional information.

(d) LKE took care, custody and control of TC2 on January 22, 2011, and has dispatched the unit to meet customer demand since that date. See Note 15 to the Financial Statements for additional information.

(e) This unit is owned by OVEC. LKE has a power purchase agreement that entitles LKE to its proportionate share of the unit's total output and LKE funds its proportionate share of fuel and other operating costs. See Note 15 to the Financial Statements for additional information.

(f) Includes a leasehold interest. See Note 11 to the Financial Statements for additional information.

(g) There is an inlet air cooling system attributable to these units. This inlet air cooling system is not jointly owned; however, it is used to increase production on the units to which it relates, resulting in an additional 10 MW of capacity for LG&E and an additional 88 MW of capacity for KU.

For a description of LG&E's and KU's service areas, see "Item 1. Business - Background." At December 31, 2011, LG&E's transmission system included in the aggregate, 45 substations (32 of which are shared with the distribution system) with a total capacity of 7 million kVA and 916 circuit miles of lines. The distribution system included 97 substations (32 of which are shared with the transmission system) with a total capacity of 5 million kVA, 3,887 miles of overhead lines and 2,371 miles of underground wires. KU's transmission system included 133 substations (55 of which are shared with the distribution system) with a total capacity of 13 million kVA and 4,078 circuit miles of lines. The distribution system included 478

Past financial performance is no guarantee of future results.

substations (55 of which are shared with the transmission system) with transformer capacity of 7 million kVA, 14,112 miles of overhead lines and 2,265 miles of underground conduit.

LG&E's natural gas transmission system includes 4,290 miles of gas distribution mains and 386 miles of gas transmission mains, consisting of 254 miles of gas transmission pipeline, 123 miles of gas transmission storage lines, 6 miles of gas combustion turbine lines, and 3 miles of gas transmission pipeline in regulator facilities. Five underground natural gas storage fields, with a total working natural gas capacity of approximately 15 Bcf, are used in providing natural gas service to ultimate consumers. KU's service area includes an additional 11 miles of gas transmission pipeline providing gas supply to natural gas combustion turbine electrical generating units.

Substantially all of LG&E's and KU's respective real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and, in the case of LG&E, the storage and distribution of natural gas, is subject to the lien of either the LG&E 2010 Mortgage Indenture or the KU 2010 Mortgage Indenture. See Note 7 to the Financial Statements for additional information.

LG&E and KU continuously reexamine development projects based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them or pursue other options. At December 31, 2011, LG&E and KU planned to implement the following incremental capacity increases and decreases at the following plants located in Kentucky.

		LG&E		KU		
Primary Fuel/Plant	Total Net Summer MW Capacity Increase / (Decrease) (a)	% Ownership	Ownership or Lease Interest in MW	% Ownership	Ownership or Lease Interest in MW	Date of Incremental Capacity Increase / Decrease (b)
Coal						
Cane Run - Units 4-6 - (c)	(563)	100.00	(563)			2015
Green River - (c)	(163)			100.00	(163)	2015
Tyrone - (c)	(71)			100.00	(71)	2015
Total Capacity Decreases	(797)		(563)		(234)	
Natural Gas/Oil						
Cane Run - Unit 7 (d)	640	22.00	141	78.00	499	2016
Bluegrass CTs (e)	495	69.00	342	31.00	153	2012
Total Capacity Increases	1,135		483		652	
Total	338		(80)		418	

(a) The capacity of generating units is based on a number of factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changed circumstances.
(b) The expected in-service dates are subject to receipt of required approvals, permits and other contingencies.
(c) LG&E and KU anticipate retiring these units at the end of 2015. See Notes 8 and 15 to the Financial Statements for additional information.
(d) In September 2011, LG&E and KU requested approval to build this unit at the existing Cane Run site. See Note 8 to the Financial Statements for additional information.
(e) In September 2011, LG&E and KU requested approval to purchase three existing natural gas combustion units. See Note 8 to the Financial Statements for additional information.

(PPL)

International Regulated Segment

For a description of WPD's service territory, see "Item 1. Business - Background." At December 31, 2011, WPD had electric distribution lines in public streets and highways pursuant to legislation and rights-of-way secured from property owners. WPD's distribution system in the U.K. includes 1,602 substations with a total capacity of 61 million kVA, 57,472 circuit miles of overhead lines and 79,755 cable miles of underground conductors.

(PPL and PPL Electric)

Pennsylvania Regulated Segment

For a description of PPL Electric's service territory, see "Item 1. Business - Background." At December 31, 2011, PPL Electric had electric transmission and distribution lines in public streets and highways pursuant to franchises and rights-of-

way secured from property owners. PPL Electric's transmission system included 60 substations with a total capacity of 17 million kVA and 6,727 pole miles. PPL Electric's distribution system included 321 substations with a total capacity of 15 million kVA, 33,145 circuit miles of overhead lines and 7,407 cable miles of underground conductors. All of PPL Electric's facilities are located in Pennsylvania. Substantially all of PPL Electric's distribution properties and certain transmission properties are subject to the lien of the PPL Electric 2001 Mortgage Indenture.

See Note 8 to the Financial Statements for information on the construction of the Susquehanna-Roseland 500-kilovolt transmission line.

(PPL and PPL Energy Supply)

Supply Segment

PPL Energy Supply's electric generating capacity (summer rating) at December 31, 2011 was:

Primary Fuel/Plant	Total MW Capacity (a)	% Ownership	PPL Energy Supply's Ownership or Lease Interest in MW (a)	Location
Natural Gas/Oil				
Martins Creek	1,685	100.00	1,685	Pennsylvania

Renewables (e)	57	100.00	57	Pennsylvania
Renewables	8	100.00	8	Various
	65		65	
Total	14,529		10,508	

(a) The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units, and may be revised periodically to reflect changed circumstances.
(b) Facility not owned by PPL Energy Supply, but there is a tolling agreement in place through 2021.
(c) Represents the leasehold interest held by PPL Montana. See Note 11 to the Financial Statements for additional information.
(d) This unit is jointly owned. Each owner is entitled to their proportionate share of the unit's total output and funds their proportionate share of fuel and other operating costs. See Note 14 to the Financial Statements for additional information.
(e) Includes facilities owned, controlled or for which PPL Energy Supply has the rights to the output.

Amounts guaranteed by PPL Montour and PPL Brunner Island in connection with an $800 million secured energy marketing and trading facility are secured by liens on the generating facilities owned by PPL Montour and PPL Brunner Island. See Note 7 to the Financial Statements for additional information.

PPL Energy Supply continuously reexamines development projects based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. At December 31, 2011, PPL Energy Supply subsidiaries planned to implement the following incremental capacity increases.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash" for information regarding certain restrictions on the ability to pay dividends for PPL, PPL Electric, LKE, LG&E and KU.

PPL Corporation

Additional information for this item is set forth in the sections entitled "Quarterly Financial, Common Stock Price and Dividend Data," "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" and "Shareowner and Investor Information" of this report. At January 31, 2012, there were 68,702 common stock shareowners of record.

In 2011, PPL terminated the program to repurchase its common stock in open market purchases, pre-arranged trading plans or privately negotiated transactions. There were no purchases by PPL of its common stock during the fourth quarter of 2011.

PPL Energy Supply, LLC

There is no established public trading market for PPL Energy Supply's membership interests. PPL Energy Funding, a direct wholly owned subsidiary of PPL, owns all of PPL Energy Supply's outstanding membership interests. Distributions on the membership interests will be paid as determined by PPL Energy Supply's Board of Managers.

PPL Energy Supply made cash distributions to PPL Energy Funding of $316 million in 2011 and $4.7 billion in 2010. In 2010, PPL Energy Supply received cash contributions of $3.6 billion and distributed $4.7 billion to PPL Energy Funding. The cash contributions received from its parent related primarily to the funds received by PPL in June 2010 from the issuance of common stock and 2010 Equity Units. These funds were invested by a subsidiary of PPL Energy Supply until they were returned to PPL Energy Funding in October 2010 to be available to partially fund PPL's acquisition of LKE and pay certain acquisition-related fees and expenses. See Note 9 to the Financial Statements regarding the distribution, including $325 million of cash, of PPL Energy Supply's membership interests in PPL Global to PPL Energy Funding in January 2011.

PPL Electric Utilities Corporation

There is no established public trading market for PPL Electric's common stock, as PPL owns 100% of the outstanding common shares. Dividends paid to PPL on those common shares are determined by PPL Electric's Board of Directors. PPL Electric paid common stock dividends to PPL of $92 million in 2011 and $71 million in 2010.

LG&E and KU Energy LLC

There is no established public trading market for LKE's membership interests. PPL owns all of LKE's outstanding membership interests. Distributions on the membership interests will be paid as determined by LKE's Board of Directors. LKE made cash distributions to PPL of $533 million in 2011 (including $248 million from the proceeds of a note issuance) and $100 million in 2010. LKE made cash distributions to E.ON US Investments Corp. of $87 million in 2010.

Louisville Gas and Electric Company

There is no established public trading market for LG&E's common stock, as LKE owns 100% of the outstanding common shares. Dividends paid to LKE on those common shares are determined by LG&E's Board of Directors. LG&E paid common stock dividends to LKE of $83 million in 2011 and $55 million in 2010.

Kentucky Utilities Company

There is no established public trading market for KU's common stock, as LKE owns 100% of the outstanding common shares. Dividends paid to LKE on those common shares are determined by KU's Board of Directors. KU paid common stock dividends to LKE of $124 million in 2011 and $50 million in 2010.

(a) The earnings each year were affected by several items that management considers special. See "Results of Operations - Segment Results" in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for a description of special items in 2011, 2010 and 2009.

(b) See "Item 1A. Risk Factors" and Notes 6 and 15 to the Financial Statements for a discussion of uncertainties that could affect PPL's future financial condition. Also see Note 9 to the Financial Statements for a discussion of discontinued operations for activity recorded in 2011, 2010 and 2009. In addition, years 2008 and 2007 were also impacted by the sales of the Latin American and gas and propane businesses.

(c) Includes WPD Midlands activity since its April 1, 2011 acquisition date. Includes LKE activity since its November 1, 2010 acquisition date.

(d) As of each respective year-end.

(e) Year 2007 excludes amounts related to PPL's natural gas distribution and propane businesses that had been classified as held for sale at December 31, 2007.

(f) Computed using earnings and fixed charges of PPL and its subsidiaries. Fixed charges consist of interest on short- and long-term debt, amortization of debt discount, expense and premium - net, other interest charges, the estimated interest component of operating rentals and preferred securities distributions of subsidiaries. See Exhibit 12(a) for additional information.

(g) Based on diluted EPS.

(h) Based on year-end market prices.

(i) The domestic trends for 2010 reflect the expiration of the PLR contract between PPL EnergyPlus and PPL Electric as of December 31, 2009. See Note 16 to the Financial Statements for additional information.

(j) GWh are included until the transaction closing for facilities that were sold.

(k) Year 2007 includes the deliveries associated with the Latin American businesses, until the date of their sale in 2007. Year 2011 includes eight months of deliveries associated with the acquisition of WPD Midlands as volumes are reported on a one-month lag.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information provided in this Item 7 should be read in conjunction with PPL's Consolidated Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL and its business strategy. "Financial and Operational Developments" includes a review of Net Income Attributable to PPL Corporation and discusses certain events that are important to understanding PPL's results of operations and financial condition.
- "Results of Operations" provides a summary of PPL's earnings, a review of results by reportable segment and a description of key factors by segment expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL's Statements of Income, comparing 2011, 2010 and 2009.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.
- "Financial Condition - Risk Management - Energy Marketing & Trading and Other" provides an explanation of PPL's risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of PPL and that require its management to make significant estimates, assumptions and other judgments of matters inherently uncertain.

Overview

Introduction

PPL is an energy and utility holding company with headquarters in Allentown, Pennsylvania. Through subsidiaries, PPL generates electricity from power plants in the northeastern, northwestern and southeastern U.S., markets wholesale and retail energy primarily in the northeastern and northwestern portions of the U.S., delivers electricity to customers in Pennsylvania, Kentucky, Virginia, Tennessee and the U.K. and delivers natural gas to customers in Kentucky.

In 2011 and 2010, PPL completed two acquisitions.

* On April 1, 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. The consideration for the acquisition consisted of cash of $5.8 billion, including the repayment of $1.7 billion of affiliate indebtedness owed to subsidiaries of E.ON AG, and $800 million of long-term debt assumed through consolidation. WPD Midlands operates two regulated distribution networks that serve five million end-users in the Midlands area of England.

* On November 1, 2010, PPL completed the acquisition of all of the limited liability company interests of E.ON U.S. LLC from a wholly owned subsidiary of E.ON AG. Upon completion of the acquisition, E.ON U.S. LLC was renamed LG&E and KU Energy LLC (LKE). LKE is engaged in regulated utility operations through its subsidiaries, LG&E and KU. The consideration for the acquisition consisted of cash of $6.8 billion, including the repayment of $4.3 billion of affiliate indebtedness owed to subsidiaries of E.ON AG, and $800 million of debt assumed through consolidation.

See Note 10 to the Financial Statements for additional information on the acquisitions.

At December 31, 2011, PPL had:

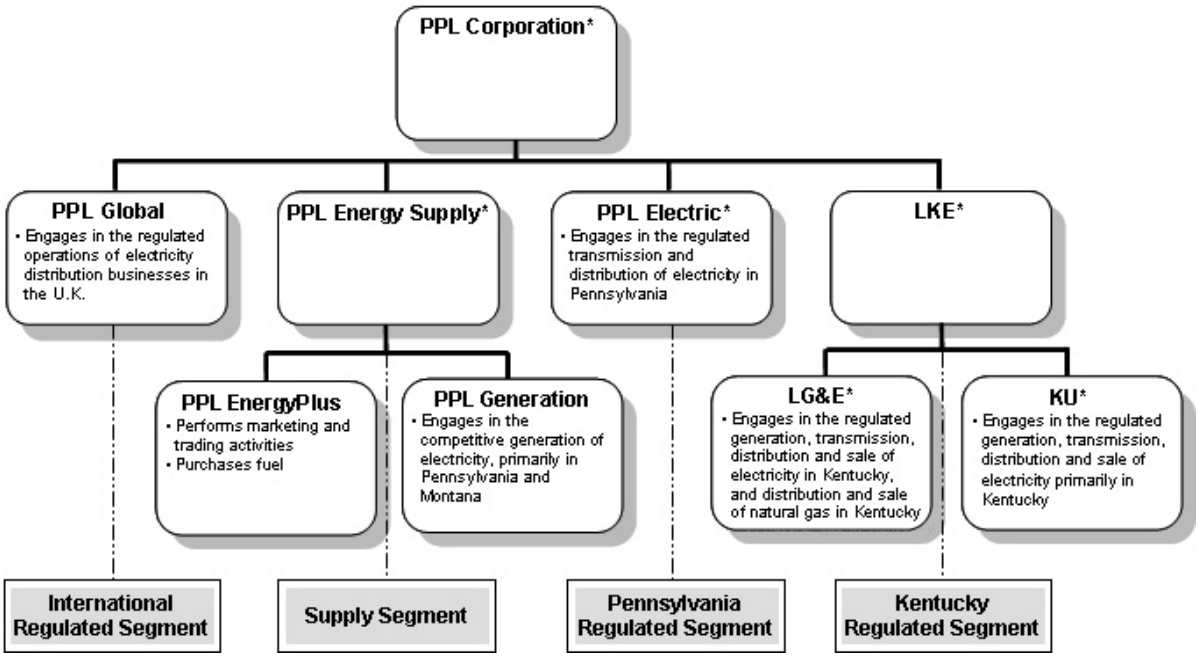
Past financial performance is no guarantee of future results.

- $12.7 billion in operating revenues (including eight months from WPD Midlands, which are recorded on a one-month lag)
- 10.5 million end-users of its utility services (including five million end-users served by the WPD Midlands companies)
- Approximately 19,000 MW of generation
- Approximately 18,000 full-time employees

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding (the parent holding company of PPL Energy Supply and PPL Global with no other material operations), to better align PPL's organizational structure with the manner in which it manages its businesses and reports segment information in its consolidated financial statements. The distribution separated the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business.

PPL's principal subsidiaries are shown below (* denotes an SEC registrant; LKE, LG&E and KU became SEC registrants effective June 1, 2011):



Business Strategy

PPL's overall strategy is to achieve stable, long-term growth in its regulated electricity delivery businesses through efficient operations and strong customer and regulatory relations, and disciplined optimization of energy supply margins while mitigating volatility in both cash flows and earnings. In pursuing this strategy, PPL acquired LKE in November 2010 and WPD Midlands in April 2011. These acquisitions have reduced PPL's overall business risk profile and reapportioned the mix of PPL's regulated and competitive businesses by increasing the regulated portion of its business and enhancing rate-regulated growth opportunities as the regulated businesses make investments to improve infrastructure and customer reliability.

The increase in regulated assets is expected to provide earnings stability through regulated returns and the ability to recover costs of capital investments, in contrast to the competitive energy supply business where earnings and cash flows are subject to commodity market volatility. Following the LKE and WPD Midlands acquisitions, approximately 70% of PPL's assets are in its regulated businesses. The pro forma impacts of the acquisitions of LKE and WPD Midlands on income from continuing operations (after income taxes) attributable to PPL for 2011 and 2010 are as follows.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

	2011				2010			
	Pro forma		Actual		Pro forma		Actual	
Regulated	$ 1,027	57%	$ 912	54%	$ 831	57%	$ 398	39%
Competitive	773	43%	773	46%	631	43%	631	61%
	$ 1,800		$ 1,685		$ 1,462		$ 1,029	

Note: Pro forma and actual amounts exclude non-recurring items identified in Note 10 to the Financial Statements.

Results for periods prior to the acquisitions of LKE and WPD Midlands are not comparable with, or indicative of, results for periods subsequent to the acquisitions.

With the purchase of WPD Midlands and the related growth of the portion of PPL's overall earnings translated from British pounds sterling, the related foreign currency risk is more substantial. The U.K. subsidiaries also have currency exposure to the U.S. dollar to the extent they have U.S. dollar denominated debt. To manage these risks, PPL generally uses contracts such as forwards, options and cross currency swaps that contain characteristics of both interest rate and foreign currency exchange contracts.

PPL's strategy for its competitive energy supply business is to optimize the value from its unregulated generation and marketing portfolio. PPL endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk.

To manage financing costs and access to credit markets, a key objective of PPL's business strategy is to maintain a strong credit profile. PPL continually focuses on maintaining an appropriate capital structure and liquidity position. In addition, PPL has adopted financial and operational risk management programs that, among other things, are designed to monitor and manage its exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Developments

Net Income Attributable to PPL Corporation

Net Income Attributable to PPL Corporation for 2011, 2010 and 2009 was $1.5 billion, $938 million and $407 million. Earnings in 2011 increased 59% over 2010 and earnings in 2010 increased 130% over 2009. These changes reflect the following after-tax impacts by segment:

	2011 vs. 2010	2010 vs. 2009
Kentucky Regulated Segment earnings	$ 195	$ 26
International Regulated Segment		
WPD Midlands earnings	281	
WPD Midlands acquisition-related costs	(192)	
Reduction in U.K. tax rate related to PPL WW	16	18
Pennsylvania Regulated Segment		
Distribution base rate increase effective January 2011	40	
Supply Segment		
Net unrealized gains/(losses) on energy-related economic activity	193	104
Losses on the monetization of certain full-requirement sales contracts in 2010	125	(125)
Litigation settlement in 2011 related to spent nuclear fuel	33	
LKE acquisition-related costs (a)	96	(98)
State valuation allowance adjustments	(101)	52
Change in "Unregulated Gross Energy Margins" (b)	(240)	608
Unallocated costs - LKE acquisition-related costs in 2010	76	(76)
Other	35	22
	$ 557	$ 531

(a) Primarily consists of an impairment charge recorded related to the sale of certain non-core generation facilities and discontinued cash flow hedges and ineffectiveness.
(b) See "Statement of Income Analysis - Margins" for additional information, including a reconciliation of this non-GAAP financial measure to operating income.

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations, as well as a discussion of each of PPL's business segments.

Acquisition of WPD Midlands

On April 1, 2011, PPL completed its acquisition of WPD Midlands. The service territories of PPL WW and WPD Midlands are contiguous and cost savings, efficiencies and other benefits are expected from the combined operation of these entities.

The cash consideration of $5.8 billion was primarily funded by borrowings under the 2011 Bridge Facility. Permanent financing was completed in the second quarter of 2011 to repay 2011 Bridge Facility borrowings, pay certain acquisition-related fees and raise additional capital for general corporate purposes. See Note 7 to the Financial Statements for additional information related to the financings.

Pursuant to WPD's previously described intention to combine the operations of PPL WW and WPD Midlands, approximately 740 employees of WPD Midlands will receive separation benefits from the companies as a new regional structure is implemented. The total separation benefits payable in connection with the reorganization are $104 million, including $58 million of severance compensation, $45 million of early retirement deficiency costs (ERDC) and $1 million in outplacement services.

In connection with the reorganization, WPD Midlands recorded $93 million of the total separation benefits in 2011, of which $48 million relates to severance compensation and $45 million relates to ERDC. Based on the expected timing of when employees will separate from the companies, WPD Midlands expects to record the remaining portion of severance compensation in 2012. The separation benefits recorded in 2011 are included in "Other operation and maintenance" on the Statement of Income. Severance compensation costs of $21 million are accrued in "Other current liabilities" and ERDC costs of $45 million reduced "Other noncurrent assets" on the Balance Sheet at December 31, 2011.

Goodwill of $2.4 billion was recorded as a result of the purchase price allocation. PPL incurred acquisition-related costs of $258 million, pre-tax, for 2011 which includes, among other items, the separation benefits discussed above, employee relocation costs, contract termination costs, advisory, accounting and legal fees, taxes and certain financing costs, including gains on hedges and foreign currency losses on the 2011 Bridge Facility.

See Note 10 to the Financial Statements for additional information related to the acquisition.

Susquehanna Turbine Blade Replacement

In April 2011, during the PPL Susquehanna Unit 2 refueling and generation uprate outage, a planned inspection of the Unit 2 turbine revealed cracks in certain of its low pressure turbine blades. Replacement of these blades was required, but was not anticipated as part of the original scope of this outage. The necessary replacement work extended the Unit 2 outage by six weeks. As a precaution, PPL Susquehanna also took Unit 1 out of service in mid-May to inspect the turbine blades in that unit. This inspection revealed cracks in blades similar to those found in Unit 2. The duration of the Unit 1 outage, in which turbine blades were replaced, was also about six weeks. The after-tax earnings impact, including reduced energy-sales margins and repair expense for both units, was $63 million.

Spent Nuclear Fuel Litigation

In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna plant. Under the settlement agreement, PPL Susquehanna received $50 million, pre-tax, for its share of claims to partially offset its expenses incurred to store spent nuclear fuel at the Susquehanna plant through September 2009, and recognized a credit to "Fuel" expense in 2011. PPL Susquehanna also will be eligible to receive payment of annual claims for allowed costs that are incurred through the December 2013 termination of the settlement agreement. In exchange, PPL Susquehanna has waived any claims against the U.S. Government for costs paid or injuries sustained related to storing spent nuclear fuel at the Susquehanna plant through December 31, 2013. See Note 15 to the Financial Statements for additional information.

Tax Rate Change

In July 2011, the U.K.'s Finance Act of 2011 was enacted. The most significant change to the law was a reduction in the U.K.'s statutory income tax rate. The statutory tax rate was changed from 27% to 26%, effective April 1, 2011 and from 26% to 25%, effective April 1, 2012. As a result of these changes, in 2011, PPL reduced its net deferred tax liabilities and recognized a $69 million deferred tax benefit to reflect both rate decreases.

Past financial performance is no guarantee of future results.

Bankruptcy of SMGT

In October 2011, SMGT, a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019 (SMGT Contract), filed for protection under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court in Montana. At December 31, 2011, damages related to SMGT accepting less power than provided in the SMGT Contract totaled approximately $11 million, all of which has been fully reserved. No assurance can be given as to the collectability of these damages.

The SMGT Contract provides for fixed volume purchases on a monthly basis at established prices. A trustee has been appointed for SMGT's estate in the bankruptcy proceeding and PPL EnergyPlus has been involved in preliminary discussions with the trustee concerning possible modifications to the SMGT Contract as part of the bankruptcy reorganization. Pursuant to a stipulation entered into by SMGT and PPL EnergyPlus, since the date of its Chapter 11 filing through January 2012, SMGT has continued to purchase electricity from PPL EnergyPlus at the price specified in the SMGT Contract, and has made timely payments for such purchases, but at lower volumes than as prescribed in the SMGT Contract. In January 2012, the trustee notified PPL EnergyPlus that SMGT would not purchase electricity under the SMGT Contract for the month of February. In addition, the trustee requested PPL EnergyPlus to leave the SMGT Contract in place to permit SMGT to purchase electricity in the event its requirements were not met by third-party providers from whom the trustee intends to purchase power on behalf of SMGT, at prices more favorable than under the SMGT Contract, for future periods. PPL EnergyPlus is evaluating the trustee's request.

At the present time, PPL cannot predict whether SMGT will be successful in its attempts to reorganize its business under Chapter 11 of the U.S. Bankruptcy Code or the extent to which the SMGT Contract may be modified as part of a successful Chapter 11 reorganization and, in either case, PPL cannot presently predict the extent to which it will be able to market to third parties any amount of power that SMGT ultimately does not continue to purchase from PPL EnergyPlus.

Storm Recovery

PPL Electric experienced several PUC-reportable storms during 2011 resulting in total restoration costs of $84 million, of which $54 million were recorded in "Other operation and maintenance" on the Statement of Income. However, a PPL subsidiary has a $10 million reinsurance policy with a third party insurer, for which a receivable was recorded with an offsetting credit to "Other operation and maintenance" on the Statement of Income. In December 2011, PPL Electric received orders from the PUC granting permission to defer qualifying storm costs in excess of insurance recoveries associated with Hurricane Irene and a late October snowstorm. Based on the PUC orders, PPL Electric recorded a regulatory asset of $25 million in December 2011. PPL Electric will seek recovery of these costs in its next general base rate proceeding.

Tax Litigation

In 1997, the U.K. imposed a Windfall Profits Tax (WPT) on privatized utilities, including WPD. PPL filed its tax returns for years subsequent to its 1997 and 1998 claims for refund on the basis that the U.K. WPT was creditable. In September 2010, the U.S. Tax Court (Tax Court) ruled in PPL's favor in a dispute with the IRS, concluding that the U.K. WPT is a creditable tax for U.S. tax purposes. As a result and with the finalization of other issues, PPL recorded a $42 million tax benefit in 2010. In January 2011, the IRS appealed the Tax Court's decision to the U.S. Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision and holding that the U.K. WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a $39 million expense in 2011. On February 27, 2012, PPL filed with the Third Circuit a petition for rehearing of its opinion on this matter.

CSAPR

In July 2011, the EPA signed the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010, and made revisions to the rule on February 7, 2012. This rule applies to PPL's Pennsylvania and Kentucky coal plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions.

In December 2011, the U.S. Court of Appeals for the District of Columbia (Court) stayed implementation of the CSAPR and left CAIR in effect pending a final resolution on the merits of the validity of the rule. Oral argument on the various challenges to the CSAPR is scheduled for April 2012, and a final decision on the validity of the rule could be issued as early as May 2012.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

With respect to the Kentucky coal-fired generating plants, the stay of the CSAPR will initially only impact the unit dispatch order. With the return of the CAIR and the Kentucky companies' significant number of sulfur dioxide allowances, those units will be dispatched with lower operating cost, but slightly higher sulfur dioxide and nitrogen oxide emissions. However, a key component of the Court's final decision, even if the CSAPR is upheld, will be whether the ruling delays the implementation of the CSAPR by one year for both Phases I and II, or instead still requires the significant sulfur dioxide and nitrogen oxide reductions associated with Phase II to begin in 2014. LG&E's and KU's CSAPR compliance strategy is based on over-compliance during Phase I to generate allowances sufficient to cover the expected shortage during the first two years of Phase II (2014 and 2015) when additional pollution control equipment will be installed. Should Phase I of the CSAPR be shortened to one year, it will be more difficult and costly to provide enough excess allowances in one year to meet the shortage projected for 2014 and 2015.

PPL's Pennsylvania coal-fired generating plants can meet both the CAIR and the proposed CSAPR sulfur dioxide emission requirements with the existing scrubbers that went in-service in 2008 and 2009. For nitrogen oxide, under both the CAIR and the proposed CSAPR, PPL would need to buy allowances or make operational changes, the cost of which is not anticipated to be significant.

See Note 15 to the Financial Statements for additional information on the CSAPR.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, LG&E and KU anticipate retiring six older coal-fired electric generating units. These units are located at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. LG&E and KU also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply.

LG&E and KU anticipate that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $800 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 8 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, LG&E and KU filed ECR plans with the KPSC requesting approval to install environmental upgrades for certain of their coal-fired plants and for recovery of the expected $2.5 billion in associated capital costs, as well as operating expenses incurred. The ECR plans detailed upgrades that will be made to certain of their coal-fired generating plants to continue to be compliant with EPA regulations. In November 2011, LG&E and KU filed a unanimous settlement agreement, stipulation, and recommendation with the KPSC. In December 2011, LG&E and KU received KPSC approval in their proceedings relating to the ECR plans. The KPSC Order approved the terms of the November 2011 settlement agreement entered into between LG&E and KU and the parties to the ECR proceedings. The KPSC Order authorized the installation of environmental upgrades at certain plants during 2012-2016 representing approximate capital costs of $2.3 billion. In connection with the approved projects, the KPSC Order allowed recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and granted CPCNs for their construction. The KPSC Order also confirmed an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans and provided for an authorized return on equity of 10.10% for the approved projects in the 2011 ECR proceedings. The KPSC Order noted KU's consent to defer the requested approval for certain environmental upgrades at its E.W. Brown generating plant, which represented approximately $200 million in capital costs. KU retained the right to operate and dispatch the E.W. Brown generating plant in accordance with applicable environmental standards and the right to request approval of the deferred projects and related costs in future regulatory proceedings. See Note 6 to the Financial Statements for additional information.

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation that would authorize the PUC to approve regulatory procedures and mechanisms to provide for more timely recovery of a utility's costs. Such alternative ratemaking procedures and mechanisms are important to PPL Electric as it begins a period of significant increasing capital investment related to the asset optimization program focused on the replacement of aging distribution assets. Those procedures and mechanisms include, but are not limited to, the use of a fully projected future test year and an automatic

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

adjustment clause to recover certain capital costs and related operating expenses. In October 2011, the legislation was passed by the Pennsylvania House of Representatives (Pennsylvania House). In January 2012, the Senate Consumer Affairs Committee adopted significant amendments to the legislation. The amended legislation authorizes the PUC to approve only two specific ratemaking mechanisms -- a fully projected future test year and a distribution system improvement charge. In addition, the amendments impose a number of conditions on the use of such a charge. In January 2012, the Pennsylvania Senate passed the amended legislation and in February 2012, the Pennsylvania House agreed to those amendments. The Governor signed the bill (Act 11 of 2012), which will become effective April 14, 2012. Utilities cannot file a petition with the PUC before January 1, 2013 requesting permission to establish the charge.

FERC Formula Rates

In March 2012, PPL Electric plans to file a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives that transferred regulatory jurisdiction of certain transmission assets from the PUC to the FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is included in "Other Noncurrent Assets - Regulatory assets" on the Balance Sheet. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

Montana Hydroelectric Litigation

In June 2011, the U.S. Supreme Court granted PPL Montana's petition to review the March 2010 Montana Supreme Court decision, which substantially affirmed the June 2008 Montana District Court decision to award the State of Montana retroactive compensation for PPL Montana's hydroelectric facilities' use and occupancy of certain Montana riverbeds. Oral argument was held in December 2011. On February 22, 2012, the U.S. Supreme Court issued a decision overturning the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, PPL Montana reversed its total loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision. PPL Montana believes the U.S. Supreme Court decision resolves certain questions of liability in this case in favor of PPL Montana and leaves open for reconsideration by Montana courts, consistent with the findings of the U.S. Supreme Court, certain other questions. The State of Montana has 30 days from February 22, 2012 to petition the U.S. Supreme Court for a rehearing. PPL Montana has concluded it is no longer probable, but it remains reasonably possible, that a loss has been incurred. While unable to estimate a range of loss, PPL Montana believes that any such amount would not be material. See Note 15 to the Financial Statements for additional information.

Ofgem Pricing Model

In October 2010, Ofgem announced a pricing model that will be effective for the U.K. electricity distribution sector, including WPD, beginning April 2015. The model, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. Key components of the model are: an extension of the price review period from five to eight years, increased emphasis on outputs and incentives, enhanced stakeholder engagement including network customers, a stronger incentive framework to encourage more efficient investment and innovation, expansion of the current Low Carbon Network Fund to stimulate innovation and continued use of a single weighted average cost of capital. At this time, management does not expect the impact of this pricing model to be significant to WPD's operating results.

Ofgem Review of Line Loss Calculation

WPD has a $170 million liability recorded at December 31, 2011, calculated in accordance with an accepted methodology, related to the close-out of line losses for the prior price control period, DPCR4. Ofgem is currently consulting on the methodology used to calculate the final line loss incentive/penalty for the DPCR4. In October 2011, Ofgem issued a consultation paper citing two potential changes to the methodology, both of which would result in a reduction of the liability; however, it is uncertain at this time whether any changes will be made. Ofgem is expected to make a decision before the end of 2012.

Results of Operations

The "Statement of Income Analysis" explains the year-to-year changes in significant earnings components, including certain income statement line items, Kentucky Gross Margins, Pennsylvania Gross Delivery Margins by component and Unregulated Gross Energy Margins by region.

On April 1, 2011, PPL completed its acquisition of WPD Midlands. As PPL is consolidating WPD Midlands on a one-month lag, consistent with its accounting policy on consolidation of foreign subsidiaries, eight months of WPD Midlands' results of operations are included in PPL's results for 2011, with no comparable amounts for 2010. When discussing PPL's results of

operations for 2011 compared with 2010, the results of WPD Midlands are isolated for purposes of comparability. WPD Midlands' results are included within "Segment Results - International Regulated Segment." See Note 10 to the Financial Statements for additional information regarding the acquisition.

On November 1, 2010, PPL completed its acquisition of LKE. LKE's results of operations are included in PPL's results for the full year of 2011, while 2010 includes LKE's operating results for the two months ended December 31, 2010. When discussing PPL's results of operations for 2011 compared with 2010 and 2010 compared with 2009, the results of LKE are isolated for purposes of comparability. LKE's results are shown separately within "Segment Results - Kentucky Regulated Segment." See Note 10 to the Financial Statements for additional information regarding the acquisition.

Tables analyzing changes in amounts between periods within "Segment Results" and "Statement of Income Analysis" are presented on a constant U.K. foreign currency exchange rate basis, where applicable, in order to isolate the impact of the change in the exchange rate on the item being explained. Results computed on a constant U.K. foreign currency exchange rate basis are calculated by translating current year results at the prior year weighted-average U.K. foreign currency exchange rate.

When comparing 2011 and 2010 with 2009, certain line items on PPL's financial statements were impacted by the Customer Choice Act, Act 129 and other related issues. Overall, the expiration at the end of 2009 of generation rate caps and the PLR contracts between PPL EnergyPlus and PPL Electric had a significant positive impact on PPL's 2010 results of operations, financial condition and cash flows.

The primary impacts of the expiration of the generation rate caps and the PLR contracts are reflected in PPL's Unregulated Gross Energy Margins. See "Statement of Income Analysis - Margins - Non-GAAP Financial Measures" for an explanation of this non-GAAP financial measure. In 2010, PPL sold the majority of its generation supply to unaffiliated parties under various wholesale and retail contracts at prevailing market rates at the time the contracts were executed. In 2009, the majority of generation produced by PPL's generation plants was sold to PPL Electric as PLR supply under predetermined capped rates.

Regarding PPL's Pennsylvania regulated electric delivery operations, the expiration of generation rate caps, the resulting competitive solicitations for power supply, the migration of customers to alternative suppliers, the Customer Choice Act and Act 129 had minimal impact on Pennsylvania Gross Delivery Margins, as approved recovery mechanisms allow for cost recovery of associated expenses, including the cost of energy provided as a PLR. However, PPL Electric's 2010 Pennsylvania Gross Delivery Margins were negatively impacted by the expiration of CTC recovery in December 2009. PPL Electric remains the delivery provider for all customers in its service territory and charges a regulated rate for its electricity delivery service. See "Statement of Income Analysis - Margins - Reconciliation of Non-GAAP Financial Measures" for additional information.

Earnings

	2011	2010	2009
Net Income Attributable to PPL Corporation	$ 1,495	$ 938	$ 407
EPS - basic	$ 2.71	$ 2.17	$ 1.08
EPS - diluted	$ 2.70	$ 2.17	$ 1.08

The changes in Net Income Attributable to PPL Corporation from year to year were, in part, attributable to the acquisition of LKE and WPD Midlands and certain items that management considers special. Details of these special items are provided within the review of each segment's earnings.

Segment Results

Net Income Attributable to PPL Corporation by segment and for "Unallocated Costs" was:

	2011	2010	2009
Kentucky Regulated (a)	$ 221	$ 26	
International Regulated (b)	325	261	$ 243
Pennsylvania Regulated	173	115	124
Supply	776	612	40
Unallocated Costs (c)		(76)	
Total	$ 1,495	$ 938	$ 407

(a) As a result of the LKE acquisition on November 1, 2010, the Kentucky Regulated segment includes two months of results in 2010.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(b) As a result of the WPD Midlands acquisition on April 1, 2011, the International Regulated segment includes eight months of WPD Midlands' results in 2011. Similar to PPL WW, WPD Midlands' results are recorded on a one-month lag.

(c) 2010 includes $22 million, after tax ($31 million, pre-tax), of certain third-party acquisition-related costs, including advisory, accounting, and legal fees associated with the acquisition of LKE that are recorded in "Other Income (Expense) - net" on the Statement of Income. 2010 also includes $52 million, after tax ($80 million, pre-tax), of 2010 Bridge Facility costs that are recorded in "Interest Expense" on the Statement of Income. These costs are considered special items by management. See Notes 7 and 10 to the Financial Statements for additional information on the acquisition and related financing.

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LKE's results from the operation of regulated electricity generation, transmission and distribution assets, primarily in Kentucky, as well as in Virginia and Tennessee. This segment also includes LKE's results from the regulated distribution and sale of natural gas in Kentucky.

Net Income Attributable to PPL Corporation includes the following results:

	2011	2010 (a)
Operating revenues	$ 2,793	$ 493
Fuel and energy purchases	1,104	207
Other operation and maintenance	751	139
Depreciation	334	49
Taxes, other than income	37	2
Total operating expenses	2,226	397
Other Income (Expense) - net	(1)	(1)
Interest Expense (b)	217	55
Income Taxes	127	16
Income (Loss) from Discontinued Operations	(1)	2
Net Income Attributable to PPL Corporation	$ 221	$ 26

(a) Represents the results of operations for the two-month period from acquisition through December 31, 2010.

(b) Includes interest expense of $70 million in 2011 and $31 million in 2010, pre-tax, related to the 2010 Equity Units and certain interest rate swaps.

The following after-tax amounts, which management considers special items, also impacted the Kentucky Regulated segment's results.

	Income Statement Line Item	2011	2010
Special items gains (losses), net of tax benefit (expense):			
Adjusted energy-related economic activity, net, net of tax of ($1), $1	Utility Revenues	$ 1	$ (1)
Other:			
LKE discontinued operations, net of tax of $1, ($2)	Disc. Operations	(1)	2
Total		$	$ 1

2012 Outlook

Excluding special items, PPL projects lower segment earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expense and higher depreciation, which are expected to be partially offset by higher margins.

Earnings beyond 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7 and Notes 6 and 15 to the Financial Statements for a discussion of the risks, uncertainties and factors that may impact future earnings.

International Regulated Segment

The International Regulated segment consists primarily of the electric distribution operations in the U.K. As a result of the WPD Midlands acquisition on April 1, 2011, the International Regulated segment includes eight months of WPD Midlands' results in 2011. Similar to PPL WW, WPD Midlands' results are recorded on a one-month lag.

Net Income Attributable to PPL Corporation includes the following results:

WPD Midlands acquisition-related costs, net of tax	(192)		n/a			n/a
Income (Loss) from Discontinued Operations			n/a		(27)	(100)
Net Income Attributable to PPL Corporation	$ 325	$ 261	25	$ 261	$ 243	7

(a) 2011 includes allocated interest expense of $38 million (pre-tax) related primarily to the 2011 Equity Units.

(b) Represents the operations of WPD Midlands since the acquisition date, recorded on a one-month lag, including revenue from external customers of $790 million (pre-tax). This amount excludes acquisition-related costs incurred by WPD Midlands.

The changes in the components of the International Regulated segment's results between these periods were due to the following factors. The segment's results are adjusted for certain items that management considers special. See additional detail of these special items in the table below. The amounts for PPL WW are presented on a constant U.K. foreign currency exchange rate basis in order to isolate the impact of the change in the exchange rate.

	2011 vs. 2010	2010 vs. 2009
PPL WW		
Utility revenues	$ 77	$ 42
Other operation and maintenance	(10)	(47)
Interest expense	(14)	(50)
Other	3	6
Income taxes	(55)	26
WPD Midlands, after-tax	240	
U.S.		
Interest expense and other	(41)	(1)
Income taxes	37	(32)
Foreign currency exchange rates, after-tax	15	14
Special items, after-tax	(188)	60
Total	$ 64	$ 18

PPL WW

- Utility revenues increased in 2011 compared with 2010, primarily reflecting the impact of the April 2011 and 2010 price increases that resulted in $76 million of additional revenue.

  Utility revenues increased in 2010 compared with 2009, reflecting the impact of the April 2010 and 2009 price increases that resulted in $52 million of additional revenue and an increase in volume that resulted in $7 million of additional revenue. These amounts were partially offset by $17 million of lower regulatory recovery due to a revised estimate of network electricity line losses.

- Other operation and maintenance expense increased in 2011 compared with 2010, primarily due to $10 million of higher pension expense resulting from an increase in amortization of actuarial losses and $9 million of higher network maintenance expense, partially offset by $8 million of internal PPL WW costs billed to WPD Midlands.

  Other operation and maintenance expense increased in 2010 compared with 2009, primarily due to $32 million of higher pension expense resulting from an increase in amortization of actuarial losses, $5 million of higher network maintenance expense and $3 million of higher direct costs.

- Interest expense increased in 2011 compared with 2010, primarily due to $11 million of higher interest expense arising from a March 2010 debt issuance and $5 million of higher interest expense related to higher inflation rates on index-linked Senior Unsecured Notes.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Interest expense increased in 2010 compared with 2009, primarily due to $25 million of higher interest expense arising from a March 2010 debt issuance and $23 million of higher interest expense related to higher inflation rates on index-linked Senior Unsecured Notes.

- Income taxes increased in 2011 compared with 2010, primarily due to a $46 million benefit recorded in 2010 for realized capital losses that offset a gain relating to a business activity sold in 1999 and $15 million due to higher pre-tax income.

  Income taxes decreased in 2010 compared with 2009, primarily due to $46 million of realized capital losses that offset a gain relating to a business activity sold in 1999 and $14 million of lower income taxes due to lower pre-tax income, partially offset by a $29 million foreign tax benefit related to the resolution of a tax dispute and foreign currency exchange losses.

U.S.

- Interest expense increased in 2011 compared with 2010, due to $34 million of interest expense on the 2011 Equity Units and $4 million on the 2011 Bridge Facility.

- Income taxes decreased in 2011 compared with 2010, primarily due to a $41 million tax benefit resulting from changes in the taxable amount of planned U.K. cash repatriations, a tax benefit of $28 million from U.K. pension plan contributions and lower income taxes due to lower pre-tax income. These tax benefits were partially offset by $24 million of favorable 2010 adjustments to uncertain tax benefits primarily related to Windfall Profits Tax and $11 million of higher income taxes on interest income related to acquisition financing.

  Income taxes increased in 2010 compared with 2009, primarily due to $60 million of income tax resulting from changes in the taxable amount of planned U.K. cash repatriations, partially offset by $23 million of adjustments to uncertain tax benefits, primarily related to Windfall Profits Tax.

Foreign Currency Exchange Rates

- Changes in foreign currency exchange rates positively impacted the segment's earnings for 2011 compared with 2010 and 2010 compared with 2009. The weighted-average exchange rates for the British pound sterling, including the effects of currency hedges, were approximately $1.60 in 2011, $1.57 in 2010 and $1.49 in 2009.

The following after-tax amounts, which management considers special items, also impacted the International Regulated segment's results.

	Income Statement Line Item	2011	2010	2009
Special items gains (losses), net of tax benefit (expense):				
Foreign currency-related economic hedges, net of tax of ($2), $0, $0 (a)	Other Income-net	$ 5	$ 1	$ 1
Sales of assets:				
Latin American business	Disc. Operations			(27)
Impairments:				
Other asset impairments, net of tax of $0, $0, $1	Other O&M			(1)
WPD Midlands acquisition-related costs:				
2011 Bridge Facility costs, net of tax of $14, $0, $0 (b)	Interest Expense	(30)		
Foreign currency loss on 2011 Bridge Facility, net of tax of $19, $0, $0 (c)	Other Income-net	(38)		
Net hedge gains, net of tax of ($17), $0, $0 (c)	Other Income-net	38		
Hedge ineffectiveness, net of tax of $3, $0, $0 (d)	Interest Expense	(9)		
U.K. stamp duty tax, net of tax of $0, $0, $0 (e)	Other Income-net	(21)		
Separation benefits, net of tax of $26, $0, $0 (f)	Other O&M	(75)		
Other acquisition-related costs, net of tax of $20, $0, $0	(g)	(57)		
Workforce reduction, net of tax of $0, $0, $1 (h)	Other O&M			(2)
Other:				
Change in U.K. tax rate (i)	Income Taxes	69	18	
Windfall profits tax litigation (j)	Income Taxes	(39)	12	
Total		$ (157)	$ 31	$ (29)

(a) Represents unrealized gains (losses) on contracts that economically hedge anticipated earnings denominated in GBP.
(b) Represents fees incurred in connection with establishing the 2011 Bridge Facility. See Note 7 to the Financial Statements for additional information.
(c) Represents the foreign currency loss on the repayment of the 2011 Bridge Facility, including a pre-tax foreign currency loss of $15 million associated with proceeds received on the U.S. dollar-denominated senior notes issued by PPL WEM in April 2011 that were used to repay a portion of PPL WEM's borrowing under the 2011 Bridge Facility. The foreign currency risk was economically hedged with forward contracts to purchase GBP, which resulted in pre-tax gains of $55 million.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(d) Represents a combination of ineffectiveness associated with closed out interest rate swaps and a charge recorded as a result of certain interest rate swaps failing hedge effectiveness testing.

(e) Tax on the transfer of ownership of property in the U.K., which is not tax deductible for income tax purposes.

(f) Primarily represents severance compensation, early retirement deficiency costs and outplacement services for employees separating from the WPD Midlands companies as a result of a reorganization to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales). Also includes severance compensation and early retirement deficiency costs associated with certain employees who separated from the WPD Midlands companies, but were not part of the reorganization.

(g) Includes $34 million, pre-tax, of advisory, accounting and legal fees which are reflected in "Other Income (Expense) - net" on the Statements of Income. Includes $37 million, pre-tax, of costs, primarily related to the termination of certain contracts, rebranding costs and relocation costs that were recorded to "Other operation and maintenance" expense on the Statements of Income, and $6 million, pre-tax, of costs associated with the integration of certain information technology assets, that were recorded in "Depreciation" on the Statements of Income.

(h) Relates primarily to enhanced pension and severance benefits as a result of a 2009 workforce reduction.

(i) The U.K.'s Finance Act of 2011, enacted in July 2011, reduced the U.K. statutory income tax rate from 27% to 26% retroactive to April 1, 2011 and will further reduce the rate from 26% to 25% effective April 1, 2012. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit during 2011 related to both rate decreases. WPD Midlands' portion of the deferred tax benefit is $35 million. The U.K.'s Finance Act of 2010, enacted in July 2010, reduced the U.K. statutory income tax rate from 28% to 27% effective April 1, 2011. As a result, WPD reduced its net deferred tax liabilities and recognized a deferred tax benefit during 2010.

(j) In 2010, the U.S. Tax Court ruled in PPL's favor in a pending dispute with the IRS concluding that the 1997 U.K. Windfall Profits Tax (WPT) imposed on all U.K. privatized utilities, including PPL's U.K. subsidiary, is a creditable tax for U.S. Federal income tax purposes. As a result, PPL recorded an income tax benefit in 2010. In January 2011, the IRS appealed the U.S. Tax Court's decision to the Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision and holding that the WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a $39 million expense in 2011. On February 27, 2012, PPL filed with the Third Circuit a petition for rehearing of its opinion on this matter.

2012 Outlook

Excluding special items, PPL projects higher segment earnings in 2012 compared with 2011, primarily driven by a full year of earnings from WPD Midlands and higher electricity delivery revenue. Partially offsetting these positive earnings factors are higher income taxes, higher operation and maintenance expense, higher depreciation, higher financing costs and a less favorable currency exchange rate.

Earnings beyond 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7 and Notes 6 and 15 to the Financial Statements for a discussion of the risks, uncertainties and factors that may impact future earnings.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment includes the regulated electric delivery operations of PPL Electric.

Net Income Attributable to PPL Corporation includes the following results:

	2011	2010	% Change	2010	2009	% Change
Operating revenues						
External	$ 1,881	$ 2,448	(23)	$ 2,448	$ 3,218	(24)

Energy purchases						
External	738	1,075	(31)	1,075	114	843
Intersegment	26	320	(92)	320	1,806	(82)
Other operation and maintenance	530	502	6	502	417	20
Amortization of recoverable transition costs			n/a		304	(100)
Depreciation	146	136	7	136	128	6
Taxes, other than income	104	138	(25)	138	194	(29)
Total operating expenses	1,544	2,171	(29)	2,171	2,963	(27)
Other Income (Expense) - net	7	7		7	10	(30)
Interest Expense	98	99	(1)	99	118	(16)
Income Taxes	68	57	19	57	79	(28)
Net Income	189	135	40	135	142	(5)
Net Income Attributable to Noncontrolling Interests (Note 3)	16	20	(20)	20	18	11
Net Income Attributable to PPL Corporation	$ 173	$ 115	50	$ 115	$ 124	(7)

The changes in the components of the Pennsylvania Regulated segment's results between these periods were due to the following factors. The segment's results are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2011 vs. 2010	2010 vs. 2009
Pennsylvania gross delivery margins	$ 66	$ 3
Other operation and maintenance	4	(49)
Depreciation	(10)	(8)
Interest Expense	1	19
Other	4	(4)
Income Taxes	(11)	23
Noncontrolling Interests	4	(2)
Special Items, after-tax		9
Total	$ 58	$ (9)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.
- Other operation and maintenance increased in 2010 compared with 2009, primarily due to $18 million in higher payroll-related costs and $20 million in higher contractor costs, primarily related to vegetation management.
- Depreciation was higher in 2011 compared with 2010 and 2010 compared with 2009, primarily due to PP&E additions as a part of ongoing efforts to replace aging infrastructure.
- Interest expense decreased in 2010 compared with 2009, primarily due to a $16 million reduction driven by lower average debt balances in 2010 compared with 2009.
- Income taxes were higher in 2011 compared with 2010, due to the $26 million impact of higher pre-tax income, partially offset by a $14 million tax benefit related to the impact of flow-through regulated tax depreciation that is primarily related to the Pennsylvania Department of Revenue interpretive guidance regarding 100% bonus depreciation.

  Income taxes were lower in 2010 compared with 2009, due to the $14 million impact of lower pre-tax income and a $7 million tax benefit relating to a favorable 2010 U.S. Tax Court ruling regarding street lighting assets.

The following after-tax amounts, which management considers special items, also impacted the Pennsylvania Regulated segment's results.

	Income Statement Line Item	2009
Special items gains (losses), net of tax benefit (expense):		
Impairments:		
Other asset impairments, net of tax of $1	Other O&M	$ (1)
Workforce reduction, net of tax of $3 (a)	Other O&M	(5)
Other:		
Change in tax accounting method related to repairs (b)	Income Taxes	(3)
Total		$ (9)

(a) Charge related to a workforce reduction, mainly consisting of enhanced pension and severance benefits.

(b) During 2009, PPL Electric received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Electric deducted the resulting IRC Sec. 481 amount on its 2008 federal income tax return and recorded a $3 million adjustment to federal and state income tax expense resulting from the reversal of prior years' state income tax benefits related to regulated depreciation.

2012 Outlook

Excluding special items, PPL projects lower segment earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expenses, higher income taxes, and higher depreciation, which are expected to be partially offset by higher delivery revenue.

In late March 2012, PPL Electric expects to file a request with the PUC seeking an increase in its distribution rates beginning in January 2013. PPL Electric cannot predict the outcome of this matter.

Earnings beyond 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7 and Notes 6 and 15 to the Financial Statements for a discussion of the risks, uncertainties and factors that may impact future earnings.

Supply Segment

The Supply segment primarily consists of the energy marketing and trading activities, as well as the competitive generation and development operations of PPL Energy Supply. In 2011, 2010 and 2009, PPL Energy Supply subsidiaries completed the sale of several businesses, which have been classified as Discontinued Operations. See Note 9 to the Financial Statements for additional information.

Net Income Attributable to PPL Corporation includes the following results:

	2011	2010	% Change	2010	2009	% Change

Income Taxes	463	228	103	228	6	3,700
Income (Loss) from Discontinued Operations	3	(19)	(116)	(19)	20	(195)
Net Income	777	613	27	613	41	1,395
Net Income Attributable to Noncontrolling Interests	1	1		1	1	
Net Income Attributable to PPL Corporation	$ 776	$ 612	27	$ 612	$ 40	1,430

(a) Includes the impact from energy-related economic activity. See "Commodity Price Risk (Non-trading) - Economic Activity" in Note 19 to the Financial Statements for additional information.

The changes in the components of the Supply segment's results between these periods were due to the following factors. The segment's results are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

	2011 vs. 2010	2010 vs. 2009
Unregulated gross energy margins	$ (405)	$ 1,039
Other operation and maintenance	(63)	(55)
Depreciation	(8)	(42)
Taxes other than income	(10)	(2)
Other Income (Expense) - net	25	(15)
Interest Expense	(12)	(8)
Other	(7)	(3)
Income Taxes	107	(270)
Discontinued operations, after-tax - excluding certain revenues and expenses included in margins	17	13
Special items, after-tax	520	(85)
Total	$ 164	$ 572

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.

- Other operation and maintenance increased in 2011 compared with 2010, primarily due to higher costs at PPL Susquehanna of $27 million, largely due to unplanned outages, the refueling outage and payroll, higher costs at eastern fossil and hydro units of $23 million, largely due to outages, and higher costs at western fossil and hydro units of $12 million, largely resulting from insurance recoveries received in 2010.

  Other operation and maintenance increased in 2010 compared with 2009, primarily due to higher costs at PPL Susquehanna of $34 million largely due to higher payroll-related costs, higher outage costs, and higher project costs.

- Depreciation increased in 2010 compared with 2009, primarily due to the $21 million impact from environmental equipment at Brunner Island that was placed in service in 2009 and early 2010.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- Other income (expense) - net was higher in 2011 compared with 2010, due to a $22 million gain on the accelerated amortization of the fair value adjustment to the debt recorded in connection with previously settled fair value hedges. The accelerated amortization was the result of the July 2011 redemption of Senior Secured Bonds.

  Other income (expense) - net was lower in 2010 compared with 2009, due to a $29 million gain recognized in 2009 related to the tender offers to purchase debt that resulted from reclassifying net gains on related cash flow hedges from AOCI into earnings, partially offset by a $15 million decrease in other-than-temporary impairment charges, primarily due to stronger returns on investments in NDT funds in 2010.

- Income taxes decreased in 2011 compared with 2010, primarily due to the $204 million impact of lower pre-tax income and a $26 million reduction in deferred tax liabilities related to a change in the Pennsylvania estimated state tax rate. These decreases were partially offset by $101 million in Pennsylvania net operating loss valuation allowance adjustments, primarily related to lower projected future taxable income, driven in part by the impact of bonus depreciation, $16 million in favorable adjustments to uncertain tax benefits recorded in 2010 and an $11 million decrease in the domestic manufacturing deduction tax benefit resulting from revised bonus depreciation estimates.

  Income taxes increased in 2010 compared with 2009, primarily due to the $348 million impact of higher pre-tax income, partially offset by a $52 million in Pennsylvania net operating loss valuation allowance adjustments, primarily related to higher projected future taxable income, $10 million in investment tax credits associated with the Holtwood and Rainbow projects, $11 million in favorable adjustments to uncertain tax benefits recorded in 2010 and $8 million of higher tax benefits from the domestic manufacturing deduction.

The following after-tax amounts, which management considers special items, also impacted the Supply segment's results.

	Income Statement Line Item	2011	2010	2009
Special items gains (losses), net of tax benefit (expense):				
Adjusted energy-related economic activity, net, net of tax of ($52), $85, $158	(a)	$ 72	$ (121)	$ (225)
Sales of assets:				
Maine hydroelectric generation business, net of tax of $0, ($9), ($16) (b)	Disc. Operations		15	22
Sundance indemnification, net of tax of $0, $0, $0	Other Income-net		1	
Long Island generation business, net of tax of $0, $0, $19 (c)	Disc. Operations			(33)
Interest in Wyman Unit 4, net of tax of $0, $0, $2	Disc. Operations			(4)
Impairments:				
Emission allowances, net of tax of $1, $6, $14 (d)	Other O&M	(1)	(10)	(19)
Renewable energy credits, net of tax of $2, $0, $0 (Note 13)	Other O&M	(3)		
Other asset impairments, net of tax of $1, $0, $2	Other O&M			(4)
Workforce reduction, net of tax of $0, $0, $4 (e)	Other O&M			(6)
LKE acquisition-related costs:				
Monetization of certain full-requirement sales contracts, net of tax of $0, $89, $0	(f)		(125)	
Sale of certain non-core generation facilities, net of tax of $0, $37, $0 (c)	Disc. Operations	(2)	(64)	
Discontinued cash flow hedges and ineffectiveness, net of tax of $0, $15, $0 (g)	Other Income-net		(28)	
Reduction of credit facility, net of tax of $0, $4, $0 (h)	Interest Expense		(6)	
Other:				
Montana hydroelectric litigation, net of tax of ($30), $22, $2	(i)	45	(34)	(3)
Litigation settlement - spent nuclear fuel storage, net of tax of ($24), $0, $0 (j)	Fuel	33		
Health care reform - tax impact (k)	Income Taxes		(8)	
Montana basin seepage litigation, net of tax of $0, ($1), $0	Other O&M		2	
Change in tax accounting method related to repairs (l)	Income Taxes			(21)
Counterparty bankruptcy, net of tax of $5, $0, $0 (m)	Other O&M	(6)		
Wholesale supply cost reimbursement, net of tax of ($3), $0, $0	(n)	4		
Total		$ 142	$ (378)	$ (293)

(a) See "Reconciliation of Economic Activity" below.
(b) Gains recorded on the sale of the Maine hydroelectric generation business. See Note 9 to the Financial Statements for additional information.
(c) Consists primarily of the initial impairment charge recorded when the business was classified as held for sale. See Note 9 to the Financial Statements for additional information.
(d) Primarily represents impairment charges of sulfur dioxide emission allowances.
(e) Relates primarily to enhanced pension and severance benefits as a result of a 2009 workforce reduction.
(f) In July 2010, in order to raise additional cash for the LKE acquisition, certain full-requirement sales contracts were monetized that resulted in cash proceeds of $249 million. See "Monetization of Certain Full-Requirement Sales Contracts" in Note 19 to the Financial Statements for additional information. $343 million of pre-tax gains were recorded to "Wholesale energy marketing" and $557 million of pre-tax losses were recorded to "Energy purchases" on the Statements of Income.
(g) As a result of the expected net proceeds from the anticipated sale of certain non-core generation facilities, coupled with the monetization of certain full-requirement sales contracts, debt that had been planned to be issued by PPL Energy Supply in 2010 was no longer needed. As a result, hedge accounting associated with interest rate swaps entered into by PPL in anticipation of a debt issuance by PPL Energy Supply was discontinued.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(h) In October 2010, PPL Energy Supply made borrowings under its Syndicated Credit Facility in order to enable a subsidiary to make loans to certain affiliates to provide interim financing of amounts required by PPL to partially fund PPL's acquisition of LKE. Subsequent to the repayment of such borrowing, the capacity was reduced, and as a result, PPL Energy Supply wrote off deferred fees in 2010.

(i) In 2009, PPL Montana adjusted its previously recorded accrual related to hydroelectric litigation, of which $5 million, pre-tax, related to prior periods. In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. In 2010, PPL Montana recorded a pre-tax charge of $56 million, representing estimated rental compensation for years prior to 2010, including interest. Of this total charge $47 million, pre-tax, was recorded to "Other operation and maintenance" and $9 million, pre-tax, was recorded to "Interest Expense" on the Statements of Income. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition. In February 2012, the U.S. Supreme Court overturned the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. Prior to the U.S. Supreme Court decision, $4 million, pre-tax, of interest expense on the rental compensation covered by the court decision was accrued in 2011. As a result of the U.S. Supreme Court decision, PPL Montana reversed its total pre-tax loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision, of which $79 million pre-tax is considered a special item because it represented $65 million of rent for periods prior to 2011 and $14 million of interest accrued on the portion covered by the prior court decision. These amounts were credited to "Other operation and maintenance" and "Interest Expense" on the Statement of Income.

(j) In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna plant. PPL Susquehanna recorded credits to fuel expense to recognize recovery, under the settlement agreement, of certain costs to store spent nuclear fuel at the Susquehanna plant. This special item represents amounts recorded in 2011 to cover the costs incurred from 1998 through December 2010.

(k) Represents income tax expense recorded as a result of the provisions within Health Care Reform which eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage.

(l) During 2009, PPL Energy Supply received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Energy Supply deducted the resulting IRC Sec. 481 amount on its 2008 federal income tax return and recorded a $21 million adjustment to federal and state income tax expense resulting from the reduction in federal income tax benefits related to the domestic manufacturing deduction and certain state tax benefits related to state net operating losses.

(m) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. The customer has continued to purchase electricity at the price specified in the supply contract, and has made timely payments for such purchases, but at lower volumes than as prescribed in the contract. As of December 31, 2011, the damage claim totaled $11 million pre-tax, which was fully reserved.

(n) In January 2012, PPL received $7 million pre-tax, related to electricity delivered to a wholesale customer in 2008 and 2009, recorded in "Wholesale energy marketing-Realized." The additional revenue results from several transmission projects approved at PJM for recovery that were not initially anticipated at the time of the electricity auctions and therefore were not included in the auction pricing. A FERC order was issued in 2011 approving the disbursement of these supply costs by the wholesale customer to the suppliers, therefore, PPL accrued its share of this additional revenue in 2011.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 19 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net."

	2011	2010	2009
Operating Revenues			
Unregulated retail electric and gas	$ 31	$ 1	$ 6
Wholesale energy marketing	1,407	(805)	(229)
Operating Expenses			
Fuel	6	29	49
Energy Purchases	(1,123)	286	(155)
Energy-related economic activity (a)	321	(489)	(329)
Option premiums (b)	19	32	(54)
Adjusted energy-related economic activity	340	(457)	(383)
Less: Unrealized economic activity associated with the monetization of certain full-requirement sales contracts in 2010 (c)		(251)	
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010	216		
Adjusted energy-related economic activity, net, pre-tax	$ 124	$ (206)	$ (383)
Adjusted energy-related economic activity, net, after-tax	$ 72	$ (121)	$ (225)

(a) See Note 19 to the Financial Statements for additional information.

(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statements of Income.

(c) See "Components of Monetization of Certain Full-Requirement Sales Contracts" below.

Components of Monetization of Certain Full-Requirement Sales Contracts

The following table provides the components of the "Monetization of Certain Full-Requirement Sales Contracts" special item.

	2010
Full-requirement sales contracts monetized (a)	$ (68)
Economic activity related to the full-requirement sales contracts monetized	(146)
Monetization of certain full-requirement sales contracts, pre-tax (b)	$ (214)
Monetization of certain full-requirement sales contracts, after-tax	$ (125)

Past financial performance is no guarantee of future results.

(a) See "Commodity Price Risk (Non-trading) - Monetization of Certain Full-Requirement Sales Contracts" in Note 19 to the Financial Statements for additional information.
(b) Includes unrealized losses of $251 million, which are reflected in "Wholesale energy marketing - Unrealized economic activity" and "Energy purchases - Unrealized economic activity" on the Statement of Income. Also includes net realized gains of $37 million, which are reflected in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statement of Income. This economic activity will continue to be realized through May 2013.

2012 Outlook

Excluding special items, PPL projects lower segment earnings in 2012 compared with 2011. The decrease is primarily driven by lower energy margins as a result of further declines in energy and capacity prices and higher fuel costs, higher operation and maintenance expenses and higher depreciation, which are partially offset by higher baseload generation.

Earnings beyond 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7 and Note 15 to the Financial Statements for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measures

The following discussion includes financial information prepared in accordance with GAAP, as well as three non-GAAP financial measures: "Kentucky Gross Margins," "Pennsylvania Gross Delivery Margins" and "Unregulated Gross Energy Margins." These measures are not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL believes that these measures provide additional criteria to make investment decisions. These performance measures are used, in conjunction with other information, internally by senior management and the Board of Directors to manage the Kentucky Regulated, Pennsylvania Regulated and Supply segment operations, analyze each respective segment's actual results compared with budget and, in certain cases, to measure certain corporate financial goals used in determining variable compensation.

PPL's three non-GAAP financial measures include:

- "Kentucky Gross Margins" is a single financial performance measure of the Kentucky Regulated segment's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expense and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. As a result, this measure represents the net revenues from the Kentucky Regulated segment's operations.

- "Pennsylvania Gross Delivery Margins" is a single financial performance measure of the Pennsylvania Regulated segment's electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance-" expense, which is primarily Act 129 costs, and in "Taxes, other than income," which is primarily gross receipts tax. These mechanisms allow for recovery of certain expenses; therefore, certain expenses and revenues offset with minimal impact on earnings. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment Utility revenue (expense)" in the table below. As a result, this measure represents the net revenues from the Pennsylvania Regulated segment's electric delivery operations.

- "Unregulated Gross Energy Margins" is a single financial performance measure of the Supply segment's competitive energy non-trading and trading activities. In calculating this measure, the Supply segment's energy revenues, which include operating revenues associated with certain Supply segment businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain Supply segment businesses that are classified as discontinued operations. This performance measure is relevant to PPL due to the volatility in the individual revenue and expense lines on the Statements of Income that

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are reflected in "PLR intersegment Utility revenue (expense)" in the table below. PPL excludes from "Unregulated Gross Energy Margins" the Supply segment's energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to PPL's three non-GAAP financial measures.

	2011					2010				
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Kentucky Gross Margins (c)	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues										
Utility	$ 2,791	$ 1,881		$ 1,620 (d)	$ 6,292		$ 2,448		$ 1,220 (d)	$ 3,668
PLR intersegment Utility revenue (expense) (e)		(26)	$ 26				(320)	$ 320		
Unregulated retail electric and gas			696	30	726			414	1	415
Wholesale energy marketing										
Realized			3,745	62 (f)	3,807			4,511	321 (f)	4,832
Unrealized economic activity				1,407 (g)	1,407				(805) (g)	(805)
Net energy trading margins			(2)		(2)			2		2
Energy-related businesses				507	507				409	409
Total Operating Revenues	2,791	1,855	4,465	3,626	12,737		2,128	5,247	1,146	8,521
Operating Expenses										
Fuel	866		1,151	(71) (h)	1,946			1,132	103 (h)	1,235
Energy purchases										
Realized	238	738	912	242 (f)	2,130		1,075	1,389	309 (f)	2,773
Unrealized economic activity				1,123 (g)	1,123				(286) (g)	(286)
Other operation and maintenance	90	108	16	2,453	2,667		76	23	1,657	1,756

Energy-related businesses			423	423
Total Operating Revenues	1,412	5,204	833	7,449
Operating Expenses				
Fuel		977	(57) (h)	920
Energy purchases				
Realized	114	2,509	2 (f)	2,625
Unrealized economic activity			155 (g)	155
Other operation and maintenance	30	30	1,358	1,418
Amortization of recoverable transition costs	304			304
Depreciation			455	455
Taxes, other than income	186		94	280
Energy-related businesses			396	396
Intercompany eliminations	(74)	70	4	
Total Operating Expenses	560	3,586	2,407	6,553
Discontinued operations		113	(113) (i)	
Total	$ 852	$ 1,731	$ (1,687)	$ 896

(a) Represents amounts excluded from Margins.
(b) As reported on the Statement of Income.
(c) LKE was acquired on November 1, 2010. Kentucky Gross Margins were not used to measure the financial performance of the Kentucky Regulated segment in 2010.
(d) Primarily represents WPD's utility revenue. 2010 also includes LKE's utility revenues for the two-month period subsequent to the November 1, 2010 acquisition.
(e) Primarily related to PLR supply sold by PPL EnergyPlus to PPL Electric.
(f) Represents energy-related economic activity, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements. For 2011, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include a net pre-tax gain of $19 million related to the amortization of option premiums and a net pre-tax loss of $216 million related to the monetization of certain full-requirement sales contracts. 2010 includes a net pre-tax gain of $32 million related to the amortization of option premiums and a net pre-tax gain of $37 million related to the monetization of certain full-requirement sales contracts. 2009 includes a net pre-tax loss of $54 million related to the amortization of option premiums.
(g) Represents energy-related economic activity, which is subject to wide swings in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements.
(h) Includes economic activity related to fuel. 2011 includes credits of $57 million for the spent nuclear fuel litigation settlement.
(i) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL's three non-GAAP financial measures, as well as the change between periods. The factors that gave rise to the changes are described below the table.

Net energy trading	(2)	2	(4)	2	17	(15)
Total	$ 2,365	$ 2,770	$ (405)	$ 2,770	$ 1,731	$ 1,039

(a) LKE was acquired on November 1, 2010. Kentucky Gross Margins were not used to measure the financial performance of the Kentucky Regulated segment in 2010.

Kentucky Gross Margins

PPL acquired LKE on November 1, 2010. Margins for 2011 are included in PPL's results without comparable amounts for 2010.

Pennsylvania Gross Delivery Margins

Distribution

The PPL Electric distribution rate case increased rates by approximately 1.6% effective January 1, 2011, which improved residential distribution margins by $68 million. Residential volume variances increased margins by an additional $4 million for 2011, compared with the same period in 2010. Weather had a $3 million unfavorable impact for residential customers for 2011 compared with 2010. Weather-related variances for PPL Electric are calculated based on a ten-year historical average. Lastly, lower demand charges and increased efficiency as a result of Act 129 programs resulted in a $5 million decrease in margins for commercial and industrial customers.

The decrease in 2010 compared with 2009 was primarily due to margins realized in 2009 related to the collection of CTC that ended in December 2009 of $37 million, partially offset by favorable recovery mechanisms for certain energy-related costs of $16 million.

Transmission

The increase in 2010 compared with 2009 was primarily due to increased investment in rate base, an increase in the cost of capital due to an increase in equity and the recovery of additional costs through the FERC formula-based rates.

Unregulated Gross Energy Margins

Eastern U.S.

The changes in Eastern U.S. non-trading margins were:

	2011 vs. 2010	2010 vs. 2009
Baseload energy, capacity and ancillaries (a)	$ (199)	$ 1,143
Coal and hydroelectric generation volume (b)	(72)	21
Impact of non-core generation facilities sold in the first quarter of 2011	(48)	
Monetization of certain deals that rebalanced the business and portfolio	(41)	(48)
Higher coal prices	(40)	(38)
Margins on the intermediate and peaking units (c)	(34)	17
Nuclear generation volume (d)	(29)	(32)
Higher nuclear fuel prices	(10)	(8)
Retail electric business	(7)	23
Full-requirement sales contracts (e)	70	(46)
Other	(1)	6
	$ (411)	$ 1,038

(a) Baseload energy and capacity prices were lower in 2011 than 2010; however, prices in 2010 for baseload generation were significantly higher than prices realized under the PLR contract with PPL Electric that expired at the end of 2009.

Past financial performance is no guarantee of future results.

(b) Volumes were lower in 2011 compared with 2010 as a result of unplanned outages, economic reductions in coal unit output and the sale of our interest in Safe Harbor Water Power Corporation. Volumes were higher in 2010 compared with 2009 as a result of planned overhauls.
(c) Lower margins in 2011 compared with 2010 were driven by lower capacity prices, partially offset by higher generation volumes in the first half of 2011. Higher margins in 2010 compared with 2009 were due to higher energy and capacity prices.
(d) Volumes were lower in 2011 compared with 2010 primarily as a result of the dual-unit turbine blade replacement outages beginning in May 2011. Volumes were lower in 2010 compared with 2009 primarily due to an unplanned outage in July 2010.
(e) Higher margins in 2011 compared with 2010 were driven by contracts monetized in 2010 and lower customer migration to alternative suppliers in 2011. Lower margins in 2010 compared with 2009 were driven by lower customer demand and higher customer migration to alternative suppliers.

Western U.S.

Western U.S. non-trading margins were higher in 2011 compared with 2010, due to higher net wholesale prices of $58 million, partially offset by lower wholesale volumes of $45 million, primarily due to economic reductions in coal unit output.

Western U.S. non-trading margins were higher in 2010 compared with 2009, primarily due to higher net wholesale prices of $11 million and higher wholesale volumes of $14 million, due to unplanned outages in 2009.

Net Energy Trading Margins

Net energy trading margins decreased during 2011 compared with 2010, as a result of lower margins on power positions of $16 million, partially offset by higher margins on gas positions of $12 million.

Net energy trading margins decreased during 2010 compared with 2009, as a result of lower margins on power and gas positions of $40 million, partially offset by higher trading margins related to FTRs of $22 million.

Utility Revenues

The changes in utility revenues were due to:

	2011 vs. 2010	2010 vs. 2009
Domestic:		
PPL Electric		
Revenue related to delivery (a)	$ 73	$ (3)
Revenue related to PLR energy supply (b)	(640)	(767)
Total PPL Electric	(567)	(770)
LKE (c)	2,300	493
Total Domestic	1,733	(277)
U.K.:		
PPL WW		
Price (d)	76	52
Volume (e)	(15)	7
Recovery of allowed revenues (f)	7	(17)
Foreign currency exchange rates	25	2
Other	8	(1)
Total PPL WW	101	43
WPD Midlands (g)	790	
Total U.K.	891	43
Total	$ 2,624	$ (234)

(a) The increase in 2011 compared with 2010 is primarily due to the January 1, 2011 increase in distribution rates. See "Pennsylvania Gross Delivery Margins" for further information.
(b) These changes in revenue had a minimal impact on earnings as the cost of supplying this energy as a PLR is passed through to the customer with no additional mark-up. These revenues are offset primarily with energy purchases in "Pennsylvania Gross Delivery Margins."
(c) Amounts in each period are not comparable. 2010 includes two months of activity as LKE was acquired in November 2010.
(d) The increase in 2011 compared with 2010 is due to price increases effective April 1, 2011 and April 1, 2010. The increase in 2010 compared with 2009 is due to price increases effective April 1, 2010 and April 1, 2009.
(e) The decrease in 2011 compared with 2010 is primarily due to the downturn in the economy and weather. The increase in 2010 compared with 2009 is primarily due to weather.
(f) Primarily due to a revised estimate of network electricity line losses.
(g) There are no comparable amounts in 2010 as WPD Midlands was acquired in April 2011. 2011 includes eight months of activity as WPD Midlands' results are recorded on a one-month lag.

Past financial performance is no guarantee of future results.

Other Operation and Maintenance

The changes in other operation and maintenance expenses were due to:

	2011 vs. 2010	2010 vs. 2009
Domestic:		
LKE (a)	$ 612	$ 139
Act 129 costs incurred (b)	26	54
Montana hydroelectric litigation (c)	(121)	48
Vegetation management costs (d)	(8)	13
Payroll-related costs - PPL Electric	4	18
Susquehanna nuclear plant costs (e)	27	34
Costs at Western fossil and hydroelectric plants (f)	12	(4)
Costs at Eastern fossil and hydroelectric plants (g)	23	(4)
Workforce reductions (h)		(22)
Impacts from emission allowances (i)	(15)	(16)
Uncollectible accounts (j)	21	6
Other	2	27
U.K.:		
PPL WW (k)	15	45
WPD Midlands (l) (m)	313	
	$ 911	$ 338

(a) Amounts in each period are not comparable. 2010 includes two months of activity as LKE was acquired in November 2010.

(b) Relates to costs associated with a PUC-approved energy efficiency and conservation plan. These costs are recovered in customer rates. There are currently 15 Act 129 programs which began in 2010 and continued to ramp up in 2011.

(c) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded a charge of $56 million, representing estimated rental compensation for the first quarter of 2010 and prior years, including interest. The portion of the total charge recorded to "Other operation and maintenance" on the Statement of Income totaled $49 million. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition. In February 2012, the U.S. Supreme Court overturned the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, PPL Montana reversed its total loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision, of which $75 million was credited to "Other operation and maintenance" on the Statement of Income.

(d) In 2010, PPL Electric increased its vegetation management around its 230- and 500-kV transmission lines in response to federal reliability requirements for transmission vegetation management.

(e) 2011 compared with 2010 was higher primarily due to $11 million of higher payroll-related costs, $10 million of higher outage costs and $8 million of higher costs from the refueling outage. 2010 compared with 2009 was higher primarily due to $10 million of higher payroll-related costs, $8 million of higher outage costs and $5 million of higher project costs.

(f) 2011 compared with 2010 was higher primarily due to $8 million of lower insurance proceeds. 2010 compared with 2009 was lower primarily due to $10 million of higher insurance proceeds.

(g) 2011 compared with 2010 was higher primarily due to plant outage costs of $13 million.

(h) Represents the charge related to the February 2009, announcement of workforce reductions that resulted in the elimination of certain management and staff positions.

(i) 2011 compared with 2010 was lower due to lower impairment charges of sulfur dioxide emission allowances. 2010 compared with 2009 was lower primarily due to lower impairment charges of sulfur dioxide emission allowances.

(j) 2011 compared with 2010 was higher primarily due to SMGT filing for protection under Chapter 11 of the U.S. Bankruptcy Code, $11 million of damages billed to SMGT were fully reserved.

(k) Both periods were higher due to higher pension costs resulting primarily from increased amortization of actuarial losses.

(l) 2011 includes $93 million of severance compensation, early retirement deficiency costs and outplacement services for employees separating from the WPD Midlands companies as a result of a reorganization to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales) and $35 million of other acquisition related costs.

(m) There are no comparable amounts in the 2010 period as WPD Midlands was acquired in April 2011. 2011 includes eight months of activity as WPD Midlands' results are recorded on a one-month lag.

Depreciation

The changes in depreciation expense were due to:

	2011 vs. 2010	2010 vs. 2009
Additions to PP&E (a)	$ 20	$ 52
LKE (b) (c)	285	49
WPD Midlands (d)	95	
U.K. foreign currency exchange rates	4	
Total	$ 404	$ 101

(a) For 2011 compared with 2010, the $20 million increase was partially due to PP&E additions as part of PPL Electric's ongoing efforts to replace aging infrastructure. For 2010 compared with 2009, $21 million of the increase was primarily due to the completion of environmental projects at Brunner Island in 2009 and 2010.

(b) For 2011 compared with 2010, $32 million of depreciation expense related to TC2, which began to dispatch in January 2011.

(c) Amounts in each period are not comparable. 2010 includes two months of activity for LKE as it was acquired in November 2010.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(d) There are no comparable amounts in 2010 for WPD Midlands as it was acquired in April 2011. 2011 includes eight months of activity for WPD Midlands, as its results are recorded on a one-month lag.

Taxes, Other Than Income

The changes in taxes, other than income were due to:

	2011 vs. 2010	2010 vs. 2009
Pennsylvania gross receipts tax (a)	$ (5)	$ (42)
Domestic property tax expense (b)	(10)	1
Domestic sales and use tax	(2)	2
Pennsylvania capital stock tax (c)	11	
LKE (d)	35	2
WPD Midlands (e)	60	
Other (f)	(1)	(5)
Total	$ 88	$ (42)

(a) The decrease in 2010 compared with 2009 was primarily due to a decrease in electricity revenue as customers chose alternative suppliers in 2010. This tax is included in "Unregulated Gross Energy Margins" and "Pennsylvania Gross Delivery Margins" above.
(b) The decrease in 2011 compared with 2010 was primarily due to the amortization of the PURTA refund. This tax is included in "Pennsylvania Gross Delivery Margins" above.
(c) The increase in 2011 compared with 2010 was due in part to the expiration of the Keystone Opportunity Zone credit in 2010 and an agreed to change in a capital stock filing position with the state.
(d) Amounts in each period are not comparable. 2010 includes two months of activity as LKE was acquired in November 2010.
(e) There are no comparable amounts in the 2010 period as WPD Midlands was acquired in April 2011. 2011 includes 8 months of activity as WPD Midlands' results are recorded on a one-month lag.
(f) The decrease in 2010 compared with 2009 primarily relates to lower WPD real estate tax expense due to reductions in tax rates.

Other Income (Expense) - net

The $35 million increase in other income (expense) - net in 2011 compared with 2010 was primarily attributable to:

- a $22 million gain on the accelerated amortization of the fair value adjustment to the debt recorded in connection with previously settled fair value hedges. The accelerated amortization was the result of the July 2011 redemption of PPL Electric's 7.125% Senior Secured Bonds due 2013;
- $29 million of net losses reclassified from AOCI into earnings in 2010 resulting from the discontinuation of interest rate swaps entered into in anticipation of a debt issuance by PPL Energy Supply;
- $7 million of increases in gains from economic foreign currency exchange contracts;
- $31 million of LKE other acquisition-related costs recorded in 2010;
- $55 million of WPD Midlands other acquisition-related costs recorded in 2011, including U.K. stamp duty tax; and
- a $57 million foreign currency loss related to the repayment of the 2011 Bridge Facility borrowing, offset by a $55 million gain on foreign currency forward contracts that hedged the repayment of such borrowings.

The $78 million decrease in other income (expense) - net in 2010 compared with 2009 was primarily attributable to:

- $29 million of net losses reclassified from AOCI into earnings in 2010 resulting from the discontinuation of interest rate swaps entered into in anticipation of a debt issuance by PPL Energy Supply;
- $31 million of LKE other acquisition-related costs recorded in 2010;
- a $29 million gain on PPL Energy Supply's tender offers to purchase up to $250 million aggregate principal amount of certain of its outstanding senior notes including net gains on related cash flow hedges that were reclassified from AOCI into earnings in 2009; and
- a $12 million increase in gains from economic foreign currency exchange contracts.

Other-Than-Temporary Impairments

Other-than-temporary impairments decreased by $15 million in 2010 compared with 2009, primarily due to stronger returns on NDT investments caused by market fluctuations within the financial markets.

Interest Expense

The changes in interest expense were due to:

	2011 vs. 2010	2010 vs. 2009
2011 Bridge Facility costs related to the acquisition of WPD Midlands (Notes 7 and 10)	$ 44	
2010 Bridge Facility costs related to the acquisition of LKE (Notes 7 and 10)	(80)	$ 80
2010 Equity Units (a)	28	31
2011 Equity Units (b)	34	
Interest expense on the March 2010 WPD (South Wales) and WPD (South West) debt issuance	11	25
Inflation adjustment on U.K. Index-linked Senior Unsecured Notes	5	23
LKE (c)	126	20
WPD Midlands (d)	154	
Hedging activities	11	15
Capitalized interest	(17)	14
Net amortization of debt discounts, premiums and issuance costs	3	13
Montana hydroelectric litigation (e)	(20)	10
Other short-term and long-term debt interest expense	11	(20)
Other	(5)	(5)
Total	$ 305	$ 206

(a) Interest related to the June 2010 issuance to support the November 2010 LKE acquisition.
(b) Interest related to the April 2011 issuance to support the April 2011 WPD Midlands acquisition.
(c) Amounts in each period are not comparable. 2010 includes two months of activity as LKE was acquired in November 2010.
(d) There are no comparable amounts in 2010 as WPD Midlands was acquired in April 2011. 2011 includes eight months of activity as WPD Midlands' results are recorded on a one-month lag. 2011 Bridge Facility costs of $23 million are included in "2011 Bridge Facility costs related to the acquisition of WPD Midlands" above.
(e) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded $7 million of interest expense on rental compensation covered by the court decision. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition. Oral argument was held in December 2011. PPL Montana continued to accrue interest expense on the rental compensation covered by the court decision. In February 2012, the U.S. Supreme Court overturned the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, PPL Montana reversed its total loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision, of which $14 million was credited to "Interest Expense" on the Statement of Income .

Income Taxes

The changes in income taxes were due to:

	2011 vs. 2010	2010 vs. 2009
Higher pre-tax book income	$ 168	$ 258
State valuation allowance adjustments (a)	101	(52)
State deferred tax rate change (b)	(26)	
Federal income tax credits	(2)	(10)
Domestic manufacturing deduction (c)	11	(8)
Federal and state tax reserve adjustments (d)	99	(55)
Federal and state tax return adjustments	(14)	(25)
U.S. income tax on foreign earnings net of foreign tax credit (e)	(59)	50
U.K. Finance Act adjustments (f)	(17)	(18)
Foreign valuation allowance adjustments (g)	(68)	215
Foreign tax reserve adjustments (g)	(141)	(17)
U.K. capital loss benefit (g)	261	(215)
Health care reform	(8)	8
LKE (h)	125	27
Depreciation not normalized (a)	(14)	
WPD Midlands (i)	(2)	
Other	14	
Total	$ 428	$ 158

(a) Reflects the impact of Pennsylvania Department of Revenue interpretive guidance issued during 2011 on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. Due to the decrease in taxable income related to bonus depreciation and a decrease in projected future taxable income, PPL recorded a $43 million state deferred income tax expense related to deferred tax valuation allowances during 2011.

Additionally, the 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

Pennsylvania H.B. 1531, enacted during 2009, increased the net operating loss limitation to 20% of taxable income for tax years beginning in 2010. During 2009, based on the projected revenue increase due to the expiration of the Pennsylvania generation rate caps in 2010, PPL recorded a $13 million state deferred income tax benefit related to the reversal of deferred tax valuation allowances for a portion of its Pennsylvania net operating losses. During 2010, PPL recorded an additional $72 million state deferred income tax benefit related to the reversal of deferred tax valuation allowances related to the future projections of taxable income over the remaining carryforward period of the net operating losses.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(b) During 2011, PPL completed the sale of certain non-core generating assets (see Note 9 to the Financial Statements for additional information). Due to changes in state apportionment resulting in the reduction in the future estimated state tax rate, PPL recorded a deferred tax benefit related to its December 31, 2011 state deferred tax liabilities.

(c) In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation eliminated the income tax benefit related to the domestic manufacturing deduction in 2011.

(d) In 1997, the U.K. imposed a Windfall Profits Tax on privatized utilities, including WPD. In September 2010, the U.S. Tax Court ruled in PPL's favor in a dispute with the IRS, concluding that the U.K. Windfall Profits Tax is a creditable tax for U.S. tax purposes. As a result and with the finalization of other issues, PPL recorded a $42 million tax benefit in 2010. In January 2011, the IRS appealed the U.S. Tax Court's decision to the U.S. Court of Appeals for the Third Circuit. In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision and holding that the Windfall Profits Tax is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a $39 million expense in 2011. On February 27, 2012, PPL filed with the Third Circuit a petition for rehearing of its opinion on this matter.

In 2010, the U.S. Tax Court ruled in PPL's favor in a dispute with the IRS, concluding that street lighting assets are depreciable for tax purposes over seven years. As a result, PPL recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes during 2010.

During 2011, 2010 and 2009 PPL recorded a $6 million, $7 million and $6 million tax benefit to federal and state income tax reserves related to stranded cost securitization.

(e) During 2011, PPL recorded a $28 million federal income tax benefit related to U.K. pension contributions.

During 2010, PPL recorded additional U.S. income tax expense resulting from increased taxable dividends and certain restructuring of U.K. entities.

(f) The U.K.'s Finance Act of 2011, enacted during 2011, included reductions in the U.K. statutory income tax rate. The statutory income tax rate was reduced from 27% to 26% retroactive to April 1, 2011 and will be reduced from 26% to 25 % effective April 1, 2012. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit of $69 million in 2011. WPD Midlands' portion of the deferred tax benefit is $34 million.

The U.K.'s Finance Act of 2010, enacted during 2010, included a reduction in the U.K. statutory income tax rate. Effective April 1, 2011, the statutory income tax rate was reduced from 28% to 27%. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit of $18 million during 2010.

(g) During 2011, WPD reached an agreement with the HM Revenue & Customs, the U.K. tax authority, related to the amount of the capital losses that resulted from prior years' restructuring in the U.K. and recorded a $147 million foreign tax benefit for the reversal of tax reserves related to the capital losses. Additionally, WPD recorded a $147 million valuation allowance for the amount of capital losses that, more likely than not, will not be realized.

During 2010, PPL recorded a $261 million foreign tax benefit in conjunction with losses resulting from restructuring in the U.K. A portion of these losses offset tax on a deferred gain from a prior year sale of WPD's supply business. WPD recorded a $215 million valuation allowance for the amount of capital losses that, more likely than not, will not be realized.

During 2009, PPL recorded a $46 million foreign tax benefit and a related $46 million tax reserve related to losses resulting from restructuring in the U.K. Additionally, PPL recorded a $29 million foreign tax benefit related to the resolution of a tax dispute and foreign currency exchange losses.

(h) Amounts in each period are not comparable. 2010 includes two months of activity as LKE was acquired in November 2010.

(i) There are no comparable amounts in 2010 as WPD Midlands was acquired in April 2011. 2011 includes eight months of activity as WPD Midlands' results are recorded on a one-month lag.

See Note 5 to the Financial Statements for additional information on income taxes.

Discontinued Operations

Income (Loss) from Discontinued Operations (net of income taxes) increased by $19 million in 2011 compared with 2010 and decreased by $10 million in 2010 compared with 2009. Both periods were impacted by after-tax impairment charges recorded in 2010 totaling $62 million related to assets associated with certain non-core generation facilities sold in 2011 that were written down to their estimated fair value (less cost to sell). The impacts of these charges were offset by the net results of certain other discontinued operations. See Note 9 to the Financial Statements for additional information.

Financial Condition

Liquidity and Capital Resources

PPL expects to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents and its credit facilities. Additionally, subject to market conditions, PPL currently plans to access capital markets in 2012.

PPL's cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- changes in electricity, fuel and other commodity prices;
- operational and credit risks associated with selling and marketing products in the wholesale power markets;
- potential ineffectiveness of the trading, marketing and risk management policy and programs used to mitigate PPL's risk exposure to adverse changes in electricity and fuel prices, interest rates, foreign currency exchange rates and counterparty credit;

- unusual or extreme weather that may damage PPL's transmission and distribution facilities or affect energy sales to customers;
- reliance on transmission and distribution facilities that PPL does not own or control to deliver its electricity and natural gas;
- unavailability of generating units (due to unscheduled or longer-than-anticipated generation outages, weather and natural disasters) and the resulting loss of revenues and additional costs of replacement electricity;
- the ability to recover and the timeliness and adequacy of recovery of costs associated with regulated utility businesses;
- costs of compliance with existing and new environmental laws and with new security and safety requirements for nuclear facilities;
- any adverse outcome of legal proceedings and investigations with respect to PPL's current and past business activities;
- deterioration in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and
- a downgrade in PPL's or its rated subsidiaries' credit ratings that could adversely affect their ability to access capital and increase the cost of credit facilities and any new debt.

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties affecting PPL's cash flows.

At December 31, PPL had the following:

	2011	2010	2009
Cash and cash equivalents	$ 1,202	$ 925	$ 801
Short-term investments (a)	16	163	
	$ 1,218	$ 1,088	$ 801
Short-term debt	$ 578	$ 694	$ 639

(a) 2010 amount represents tax-exempt bonds issued by Louisville/Jefferson County, Kentucky on behalf of LG&E that were subsequently purchased by LG&E. Such bonds were remarketed to unaffiliated investors in January 2011. See Note 7 to the Financial Statements for further discussion.

At December 31, 2011, $411 million of cash and cash equivalents and $16 million of short-term investments were denominated in GBP. If these amounts would be remitted as dividends, PPL may be subject to additional U.S. taxes, net of allowable foreign tax credits. Historically, dividends paid by foreign subsidiaries have been distributions of the current year's earnings. See Note 5 to the Financial Statements for additional information on undistributed earnings of WPD.

The changes in PPL's cash and cash equivalents position resulted from:

	2011	2010	2009
Net cash provided by operating activities	$ 2,507	$ 2,033	$ 1,852
Net cash provided by (used in) investing activities	(7,952)	(8,229)	(880)
Net cash provided by (used in) financing activities	5,767	6,307	(1,271)
Effect of exchange rates on cash and cash equivalents	(45)	13	
Net Increase (Decrease) in Cash and Cash Equivalents	$ 277	$ 124	$ (299)

Operating Activities

Net cash provided by operating activities increased by 23%, or $474 million, in 2011 compared with 2010. The increase was the net effect of:

- operating cash provided by LKE, $743 million, and WPD Midlands, $234 million;
- cash from components of working capital, $435 million, primarily related to changes in prepaid income and gross receipts taxes; partially offset by
- reduction in cash from counter party collateral, $172 million:
- lower gross energy margins, $240 million after-tax:
- proceeds from monetizing certain full-requirement sales contracts in 2010, $249 million:
- higher interest payments of $44 million; and
- increases in other operating outflows of $233 million (including $90 million of higher operation and maintenance expenses and defined benefits funding).

Net cash provided by operating activities increased by 10%, or $181 million in 2010 compared with 2009. The expiration of the long-term power purchase agreements between PPL Electric and PPL EnergyPlus at the end of 2009 enabled PPL

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

Past financial performance is no guarantee of future results.

EnergyPlus to sell power at higher market prices and had a positive impact on net income, and specifically on "unregulated gross energy margins" which increased over $600 million, after-tax, in 2010 compared with 2009, and therefore, was the primary driver to the above increase. The positive impact of additional earnings was partially offset by a reduction in the amount of counterparty collateral received and by additional defined benefit plan contributions.

A significant portion of PPL's Supply segment operating cash flows is derived from its competitive baseload generation business activities. PPL employs a formal hedging program for its baseload generation fleet, the primary objective of which is to provide a reasonable level of near-term cash flow and earnings certainty while preserving upside potential of power price increases over the medium term. See Note 19 to the Financial Statements for further discussion. Despite PPL's hedging practices, future cash flows from operating activities from its Supply segment are influenced by commodity prices and therefore, will fluctuate from period to period.

PPL's contracts for the sale and purchase of electricity and fuel often require cash collateral or other credit enhancements, or reductions or terminations of a portion of the entire contract through cash settlement, in the event of a downgrade of PPL's or its subsidiaries' credit ratings or adverse changes in market prices. For example, in addition to limiting its trading ability, if PPL's or its subsidiaries' ratings were lowered to below "investment grade" and there was a 10% adverse movement in energy prices, PPL estimates that, based on its December 31, 2011 positions, it would have had to post additional collateral of approximately $435 million with respect to electricity and fuel contracts. PPL has in place risk management programs that are designed to monitor and manage its exposure to volatility of cash flows related to changes in energy and fuel prices, interest rates, foreign currency exchange rates, counterparty credit quality and the operating performance of its generating units.

Investing Activities

The primary use of cash in investing activities in 2011 was for the acquisition of WPD Midlands. In 2010, the primary use of cash in investing activities was for the acquisition of LKE. In 2009, the primary use of cash in investing activities was for capital expenditures. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2012 through 2016.

Net cash used in investing activities was $7.9 billion in 2011 compared with $8.2 billion in 2010. The 2011 amount includes the use of $5.8 billion of cash for the acquisition of WPD Midlands, while 2010 includes $6.8 billion for the acquisition of LKE. See Note 10 to the Financial Statements for additional information regarding the acquisitions. Excluding the impact of the acquisitions, net cash used in investing activities increased by $772 million in 2011 compared with 2010. This increase reflects $890 million of higher capital expenditures and a $228 million net change in restricted cash, partially offset by $219 million of additional proceeds from the sale of certain businesses or facilities and $163 million of proceeds from the sale of investments, other than securities in the nuclear plant decommissioning trust funds. PPL received proceeds of $381 million in 2011 from the sale of certain non-core generation facilities compared with proceeds of $162 million in 2010 from the sale of the Long Island generation business and certain Maine hydroelectric generation facilities. See Note 9 to the Financial Statements for additional information on the sale of these businesses or facilities.

Net cash used in investing activities was $8.2 billion in 2010 compared with $880 million in 2009. The 2010 amount includes the use of $6.8 billion of cash for the acquisition of LKE. See Note 10 to the Financial Statements for additional information regarding this acquisition. Excluding the impact of the acquisition, net cash used in investing activities increased by $537 million in 2010 compared with 2009. This increase reflects $372 million of higher capital expenditures, $133 million net change in restricted cash and $154 million of lower proceeds from the sale of investments, other than securities in the nuclear plant decommissioning trust funds, partially offset by $81 million of additional proceeds from the sale of certain businesses or facilities. PPL received proceeds of $162 million in 2010 for the sale of the Long Island generation business and certain Maine hydroelectric generation facilities compared with proceeds of $81 million in 2009 from the sale of the majority of its Maine hydroelectric generation businesses. See Note 9 to the Financial Statements for additional information on the sale of these businesses or facilities.

Financing Activities

Net cash provided by financing activities was $5.8 billion in 2011 compared with $6.3 billion in 2010, primarily as a result of the issuances of long-term debt and equity related to the acquisition of WPD Midlands in 2011 and the acquisition of LKE in 2010. The change from 2011 to 2010 primarily reflects increased issuances of long-term debt and equity related to the acquisition of WPD Midlands in 2011.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Net cash provided by financing activities was $6.3 billion in 2010 compared with $1.3 billion of cash used in financing activities in 2009. The change from 2009 to 2010 primarily reflects increased issuances of long-term debt and equity related to the acquisition of LKE in 2010 as well as fewer retirements of long-term debt in 2010.

In 2011, cash provided by financing activities primarily consisted of net debt issuances of $4.4 billion and $2.3 billion of net proceeds from the issuance of common stock, partially offset by common stock dividends paid of $746 million and debt issuance and credit facility costs paid of $102 million.

In 2010, cash provided by financing activities primarily consisted of net debt issuances of $4.7 billion and $2.4 billion of net proceeds from the issuance of common stock, partially offset by common stock dividends paid of $566 million and debt issuance and credit facility costs paid of $175 million.

In 2009, cash used in financing activities primarily consisted of net debt retirements of $770 million and common stock dividends paid of $517 million, partially offset by $60 million of common stock sale proceeds.

See "Forecasted Sources of Cash" for a discussion of PPL's plans to issue debt and equity securities, as well as a discussion of credit facility capacity available to PPL. Also see "Forecasted Uses of Cash" for a discussion of plans to pay dividends on common and preferred securities in the future, as well as maturities of long-term debt.

Long-term Debt and Equity Securities

PPL's long-term debt and equity securities activity through December 31, 2011 was:

	Debt		Equity
	Issuances (a)	Retirements	Issuances
PPL Common Stock			$ 2,328
PPL Capital Funding Junior Subordinated Notes	$ 978		
PPL Energy Supply Senior Unsecured Notes (b)	500	$ (750)	
PPL Electric First Mortgage Bonds (c)	645	(458)	
LKE Senior Unsecured Notes	250		
LG&E and KU Capital LLC Medium Term Notes (d)		(2)	
PPL WEM Senior Unsecured Notes	959		
WPD (West Midlands) Senior Unsecured Notes	1,282		
WPD (East Midlands) Senior Unsecured Notes	967		
WPD (East Midlands) Index-linked Notes	164		
Total Cash Flow Impact	$ 5,745	$ (1,210)	$ 2,328
Assumed through consolidation - WPD Midlands acquisition:			
WPD (East Midlands) Senior Unsecured Notes (e)	$ 418		
WPD (West Midlands) Senior Unsecured Notes (e)	412		
Total Assumed	$ 830		
Non-cash Exchanges (f):			
LKE Senior Unsecured Notes	$ 875	$ (875)	
LG&E First Mortgage Bonds	535	(535)	
KU First Mortgage Bonds	1,500	(1,500)	
Total Exchanged	$ 2,910	$ (2,910)	
Net Increase	$ 5,365		$ 2,328

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.
(b) Senior unsecured notes of $250 million were redeemed at par prior to their 2046 maturity date and the remaining $500 million were retired upon maturity.
(c) Retirement reflects amount paid to redeem $400 million aggregate principal amount of first mortgage bonds prior to their 2013 maturity date.
(d) Notes were retired upon maturity.
(e) Reflects fair value adjustments resulting from the preliminary purchase price allocation. The principal amount of each issuance is £250 million, which equated to approximately $400 million at the time of closing.
(f) In April 2011, LKE, LG&E and KU each filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statements became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.

See Note 7 to the Financial Statements for additional information about long-term debt and equity securities.

Forecasted Sources of Cash

PPL expects to continue to have sufficient sources of cash available in the near term, including various credit facilities, a commercial paper program and operating leases. PPL and its subsidiaries currently plan to incur, subject to market

Past financial performance is no guarantee of future results.

conditions, up to $300 million of long-term indebtedness in 2012, the proceeds of which will be used for general corporate purposes. Additionally, PPL's cash flows will include a full year of WPD Midlands' cash flows in 2012 and forward.

Credit Facilities

At December 31, 2011, PPL's total committed borrowing capacity under credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backstop	Unused Capacity
PPL Energy Supply Credit Facilities (a)	$ 3,200		$ 630	$ 2,570
PPL Electric Credit Facilities (b)	350		1	349
LG&E Credit Facility (c)	400			400
KU Credit Facilities (c)(d)	598		198	400
Total Domestic Credit Facilities (e)	$ 4,548		$ 829	$ 3,719
PPL WW Credit Facility	£ 150	£ 111	n/a	£ 39
WPD (South West) Credit Facility (f)	210		n/a	210
WPD (East Midlands) Credit Facility (g)	300		£ 70	230
WPD (West Midlands) Credit Facility (g)	300		71	229
Total WPD Credit Facilities (h)	£ 960	£ 111	£ 141	£ 708

(a) In March 2011, PPL Energy Supply's $300 million Structured Credit Facility expired. PPL Energy Supply's obligations under this facility were supported by a $300 million letter of credit issued on PPL Energy Supply's behalf under a separate, but related $300 million 5-year credit agreement, which also expired in March 2011.

PPL Energy Supply's Syndicated Credit Facility contains a financial covenant requiring PPL Energy Supply's debt to total capitalization not to exceed 65%, as calculated in accordance with the facility, and other customary covenants.

(b) Committed capacity includes a $150 million credit facility related to an asset-backed commercial paper program through which PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary pledges these assets to secure loans of up to an aggregate of $150 million from a commercial paper conduit sponsored by a financial institution. At December 31, 2011, based on accounts receivable and unbilled revenue pledged, the amount available for borrowing under the facility was limited to $103 million. In July 2011, PPL Electric and the subsidiary extended the expiration date of the credit agreement related to the asset-backed commercial paper program to July 2012.

PPL Electric's Syndicated Credit Facility contains a financial covenant requiring PPL Electric's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility, and other customary covenants.

(c) In June 2011, LG&E and KU each amended its respective Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon the respective company's senior secured long-term debt rating rather than the senior unsecured debt rating. LG&E and KU's Syndicated Credit Facilities each contain a financial covenant requiring LG&E and KU's debt to capitalization not to exceed 70%, as calculated in accordance with the facilities, and other customary covenants.

(d) In April 2011, KU entered into a new $198 million letter of credit facility that has been used to issue letters of credit to support outstanding tax exempt bonds. The facility contains a financial covenant requiring KU's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility. KU pays customary commitment and letter of credit fees under the new facility. The facility matures in April 2014. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.

(e) In October 2011, PPL Energy Supply, PPL Electric, LG&E and KU each amended its respective Syndicated Credit Facility. The amendments included extending the expiration dates from December 2014 to October 2016. Under these facilities, PPL Energy Supply, PPL Electric, LG&E and KU each continue to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under PPL's domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 9% of the total committed capacity.

(f) In January 2012, WPD (South West) entered into a new £245 million syndicated credit facility to replace its existing £210 million syndicated credit facility. Under the new facility, WPD (South West) has the ability to make cash borrowings but cannot request the lenders to issue letters of credit. WPD (South West) pays customary commitment fees under this facility, and borrowings bear interest at LIBOR-based rates plus a margin. The facility contains financial covenants that require WPD (South West) to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facility.

(g) In April 2011, following the completion of the acquisition of WPD Midlands, WPD (East Midlands) and WPD (West Midlands) each entered into a £300 million 5-year syndicated credit facility. Under the facilities, WPD (East Midlands) and WPD (West Midlands) each have the ability to make cash borrowings and to request the lenders to issue up to £80 million of letters of credit in lieu of borrowing.

(h) At December 31, 2011, the unused capacity of WPD's committed credit facilities was approximately $1.1 billion. The commitments under WPD's credit facilities are provided by a diverse bank group with no one bank providing more than 17% of the total committed capacity.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In addition to the financial covenants noted in the table above, the credit agreements governing the above credit facilities contain various other covenants. Failure to comply with the covenants after applicable grace periods could result in acceleration of repayment of borrowings and/or termination of the agreements. PPL monitors compliance with the covenants on a regular basis. At December 31, 2011, PPL was in compliance with these covenants. At this time, PPL believes that these covenants and other borrowing conditions will not limit access to these funding sources.

See Note 7 to the Financial Statements for further discussion of PPL's credit facilities.

Commercial Paper

In October 2011, PPL Energy Supply re-activated its $500 million commercial paper program to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At December 31, 2011, PPL Energy Supply had $400 million of commercial paper outstanding at a weighted-average interest rate of approximately 0.53%.

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are currently supported by PPL Electric's Syndicated Credit Facility, which expires in October 2016, based on available capacity.

PPL Electric did not issue any commercial paper during 2011. Based on its current cash position and anticipated cash flows, PPL Electric currently does not plan to issue any commercial paper during 2012, but it may do so from time to time, subject to market conditions, to facilitate short-term cash flow needs.

In February 2012, LG&E and KU each established a commercial paper program for up to $250 million to provide an additional financing source to fund their short-term liquidity needs. Commercial paper issuances will be supported by LG&E and KU's Syndicated Credit Facilities.

2011 Bridge Facility

In March 2011, in connection with entering into the agreement to acquire WPD Midlands, PPL entered into a 364-day unsecured bridge financing of up to £3.6 billion solely to (i) fund the acquisition and (ii) pay certain fees and expenses in connection with the acquisition. On April 1, 2011, concurrent with the closing of the WPD Midlands acquisition, PPL Capital Funding borrowed an aggregate of £1.75 billion and PPL WEM borrowed £1.85 billion under the 2011 Bridge Facility. The borrowings bore interest at approximately 2.62%. See Note 10 to the Financial Statements for additional information on the acquisition.

In accordance with the terms of the 2011 Bridge Facility, PPL Capital Funding's borrowings of £1.75 billion were repaid with approximately $2.8 billion of proceeds received from PPL's issuance of common stock and 2011 Equity Units in April 2011, as discussed in "Long-term Debt and Equity Securities" below. Also in April 2011, PPL WEM repaid £650 million of its 2011 Bridge Facility borrowing. Such repayment was funded primarily with proceeds received from PPL WEM's issuance of senior notes, which is also discussed below. In May 2011, PPL WEM repaid the remaining £1.2 billion of borrowings outstanding under the 2011 Bridge Facility, primarily with the proceeds from senior notes issued by WPD (East Midlands) and WPD (West Midlands), also discussed below.

In anticipation of the repayment of a portion of the GBP-denominated borrowings under the 2011 Bridge Facility with U.S. dollar-denominated proceeds received from PPL's issuance of common stock and 2011 Equity Units and PPL WEM's issuance of U.S. dollar-denominated senior notes, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. See Note 19 to the Financial Statements for further discussion.

Operating Leases

PPL and its subsidiaries also have available funding sources that are provided through operating leases. PPL's subsidiaries lease office space, land, buildings and certain equipment. These leasing structures provide PPL additional operating and financing flexibility. The operating leases contain covenants that are typical for these agreements, such as maintaining insurance, maintaining corporate existence and timely payment of rent and other fees.

PPL, through its subsidiary PPL Montana, leases a 50% interest in Colstrip Units 1 and 2 and a 30% interest in Unit 3, under four 36-year, non-cancelable operating leases. These operating leases are not recorded on PPL's Balance Sheets. The leases place certain restrictions on PPL Montana's ability to incur additional debt, sell assets and declare dividends. At this time,

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL believes that these restrictions will not limit access to these funding sources or cause acceleration or termination of the leases. See Note 7 to the Financial Statements for a discussion of other dividend restrictions related to PPL subsidiaries.

See Note 11 to the Financial Statements for further discussion of the operating leases.

Long-term Debt and Equity Securities

PPL and its subsidiaries currently plan to incur, subject to market conditions, up to $300 million of long-term indebtedness in 2012, the proceeds of which will be used for general corporate purposes.

PPL currently plans to issue new shares of common stock in 2012 in an aggregate amount up to $350 million under its DRIP and various employee stock-based compensation and other plans.

Forecasted Uses of Cash

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, PPL currently expects to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common and preferred securities and possibly the purchase or redemption of a portion of debt securities.

Capital Expenditures

The table below shows PPL's current capital expenditure projections for the years 2012 through 2016.

	Projected				
	2012	2013	2014	2015	2016
Construction expenditures (a) (b)					
Generating facilities (c)	$ 803	$ 636	$ 607	$ 530	$ 402
Distribution facilities	1,632	1,689	1,658	1,666	1,678
Transmission facilities (d)	417	624	591	474	373
Environmental	695	963	918	730	122
Other	133	147	121	128	120
Total Construction Expenditures	3,680	4,059	3,895	3,528	2,695
Nuclear fuel (e)	159	172	170	173	174
Total Capital Expenditures	$ 3,839	$ 4,231	$ 4,065	$ 3,701	$ 2,869

(a) Construction expenditures include capitalized interest and AFUDC, which are expected to be approximately $209 million for the years 2012 through 2016.
(b) Includes expenditures for certain intangible assets.
(c) Includes approximately $700 million of currently estimable costs related to LKE's replacement of generation units due to EPA regulations not recoverable through the ECR mechanism. LKE expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.
(d) Includes approximately $100 million of currently estimable transmission costs related to LKE's replacement of generation units. LKE expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.
(e) Nuclear fuel expenditures include capitalized interest, which is expected to be approximately $25 million for the years 2012 through 2016.

PPL's capital expenditure projections for the years 2012 through 2016 total approximately $18.7 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. For the years presented, this table includes projected costs related to the planned 1,326 MW of incremental capacity increases for both PPL Energy Supply and LKE, PPL Electric's asset optimization program focused on the replacement of aging transmission and distribution assets and the PJM-approved regional transmission line expansion project. This table also includes LKE's environmental projects related to new and anticipated EPA compliance standards (actual costs may be significantly lower or higher depending on the final requirements; certain environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism). See Notes 6 and 8 to the Financial Statements for information on LG&E's and KU's ECR plans and the PJM-approved regional transmission line expansion project and the other significant development projects.

PPL plans to fund its capital expenditures in 2012 with cash on hand, cash from operations and proceeds from the issuance of common stock and debt securities.

Contractual Obligations

PPL has assumed various financial obligations and commitments in the ordinary course of conducting its business. At December 31, 2011, the estimated contractual cash obligations of PPL were:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	Total	2012	2013 - 2014	2015 - 2016	After 2016
Long-term Debt (a)	$ 17,982		$ 1,047	$ 2,110	$ 14,825
Interest on Long-term Debt (b)	14,731	$ 863	1,721	1,650	10,497
Operating Leases (c)	789	125	250	162	252
Purchase Obligations (d)	8,703	2,307	2,791	1,533	2,072
Other Long-term Liabilities Reflected on the Balance Sheet under GAAP (e) (f)	842	412	230	58	142
Total Contractual Cash Obligations	$ 43,047	$ 3,707	$ 6,039	$ 5,513	$ 27,788

(a) Reflects principal maturities only based on stated maturity dates, except for PPL Energy Supply's 5.70% REset Put Securities (REPS). See Note 7 to the Financial Statements for a discussion of the remarketing feature related to the REPS, as well as discussion of variable-rate remarketable bonds issued on behalf of PPL Energy Supply, LG&E and KU. PPL does not have any significant capital lease obligations.

(b) Assumes interest payments through stated maturity, except for the REPS, for which interest is reflected to the put date. The payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated and payments denominated in British pounds sterling have been translated to U.S. dollars at a current foreign currency exchange rate.

(c) See Note 11 to the Financial Statements for additional information.

(d) The amounts include agreements to purchase goods or services that are enforceable and legally binding and specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Primarily includes PPL's purchase obligations of electricity, coal, nuclear fuel and limestone as well as certain construction expenditures, which are also included in the Capital Expenditures table presented above. Financial swaps and open purchase orders that are provided on demand with no firm commitment are excluded from the amounts presented. In prior years, PPL included certain energy purchase obligations based on forecasted amounts to be purchased. The amounts presented herein are based on actual contract terms.

(e) The amounts include WPD's contractual deficit pension funding requirements arising from an actuarial valuation performed in March 2010. The U.K. electricity regulator currently allows a recovery of a substantial portion of the contributions relating to the plan deficit; however, WPD cannot be certain that this will continue beyond the current review period, which extends to March 31, 2015. The amounts also include contributions made or committed to be made for 2012 for PPL's and LKE's U.S. pension plans. See Note 13 to the Financial Statements for a discussion of expected contributions.

Also included in the amounts are contract adjustment payments related to the Purchase Contract component of the Equity Units. See Note 7 to the Financial Statements for additional information on the Equity Units.

(f) At December 31, 2011, total unrecognized tax benefits of $145 million were excluded from this table as PPL cannot reasonably estimate the amount and period of future payments. See Note 5 to the Financial Statements for additional information.

Dividends

PPL views dividends as an integral component of shareowner return and expects to continue to pay dividends in amounts that are within the context of maintaining a capitalization structure that supports investment grade credit ratings. In 2011, PPL declared the annualized dividend rate on its common stock at $1.40 per share. In February 2012, PPL declared an increase to its annualized dividend rate on its common stock to $1.44 per share. Future dividends will be declared at the discretion of the Board of Directors and will depend upon future earnings, cash flows, financial and legal requirements and other relevant factors at the time. As discussed in Note 7 to the Financial Statements, subject to certain exceptions, PPL may not declare or pay any cash dividend on its common stock during any period in which PPL Capital Funding defers interest payments on its 2007 Series A Junior Subordinated Notes due 2067, its 4.625% Junior Subordinated Notes due 2018, or its 4.32% Junior Subordinated Notes due 2019 or until deferred contract adjustment payments on PPL's Purchase Contracts have been paid. No such deferrals have occurred or are currently anticipated.

PPL Electric expects to continue to pay quarterly dividends on its outstanding preference securities, if and as declared by its Board of Directors.

See Note 7 to the Financial Statements for other restrictions related to distributions on capital interests for PPL subsidiaries.

Purchase or Redemption of Debt Securities

PPL will continue to evaluate its outstanding debt securities and may decide to purchase or redeem these securities depending upon prevailing market conditions and available cash.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt and preferred securities of PPL and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL and its subsidiaries are based on information provided by PPL and other

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act PPL is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL's ratings, but without stating what ratings have been assigned to PPL or its subsidiaries, or their securities. The ratings assigned by the rating agencies to PPL and its subsidiaries and their respective securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is hereby explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to PPL and its subsidiaries in 2011.

Following the announcement of the then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

Moody's affirmed all of the ratings for PPL and all of its rated subsidiaries.

S&P revised the outlook for PPL, PPL Capital Funding, PPL Energy Supply, PPL Electric, LKE, LG&E, KU, PPL WW, WPD (South West) and WPD (South Wales); affirmed the issuer and senior unsecured ratings of PPL WW; and lowered the following ratings:

- the issuer rating of PPL;
- the senior unsecured and junior subordinated ratings of PPL Capital Funding;
- the issuer and senior unsecured ratings of PPL Energy Supply;
- the issuer, senior secured, preference stock, and commercial paper ratings of PPL Electric;
- the issuer and senior unsecured ratings of LKE;
- the issuer, senior secured ratings, and short-term ratings of LG&E;
- the issuer, senior secured ratings, and short-term ratings of KU;
- the issuer and senior unsecured ratings of WPD (South West); and
- the issuer and senior unsecured ratings of WPD (South Wales).

Fitch affirmed all of the ratings for PPL, PPL Capital Funding, PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

In April 2011, Moody's and S&P took the following actions following the completion of the acquisition of WPD Midlands.

Moody's:
- lowered the issuer and senior unsecured debt ratings of WPD (East Midlands) and WPD (West Midlands);
- affirmed the short-term issuer rating of WPD (East Midlands); and
- assigned a senior unsecured rating and an outlook to PPL WEM.

S&P:
- lowered the issuer and senior unsecured debt ratings of WPD (East Midlands) and WPD (West Midlands);
- assigned issuer ratings to PPL WEM;
- raised the issuer rating of PPL WW;
- revised the outlook for PPL and all of its rated subsidiaries;
- raised the short-term ratings of LG&E, KU, WPD (East Midlands), WPD (West Midlands), PPL WEM, PPL WW, WPD (South West), WPD (South Wales) and PPL Electric; and
- affirmed all of the long-term ratings for PPL and its rated subsidiaries.

In May 2011, S&P downgraded the long-term rating of four series of pollution control bonds issued on behalf of KU by one notch in connection with the substitution of the letters of credit enhancing these four bonds.

Also in May 2011, Fitch affirmed its rating and maintained its outlook for PPL Montana's Pass Through Certificates due 2020.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In July 2011, S&P upgraded the senior secured rating for PPL Electric's first mortgage bonds following the execution of a supplemental indenture that provided for prospective amendments to PPL Electric's 2001 Mortgage Indenture, as discussed in "Long-term Debt and Equity Securities" above.

In September 2011, Moody's affirmed the following ratings:

- the issuer ratings for PPL, LG&E, and KU;
- the senior unsecured ratings for PPL Energy Supply and PPL Capital Funding; and
- all of the ratings for LKE.

Also in September 2011, S&P assigned a short-term rating to PPL Energy Supply's commercial paper program.

In October 2011, Moody's and Fitch also assigned a short-term rating to PPL Energy Supply's commercial paper program in support of PPL Energy Supply's re-opening of the program.

In October 2011, Fitch affirmed all of the ratings for PPL WW, WPD (South West), and WPD (South Wales).

In November 2011, Fitch affirmed its rating and revised its outlook to negative from stable for PPL Montana's Pass Through Certificates due 2020.

In December 2011, Fitch affirmed the Issuer Default Ratings and individual security ratings of PPL Corp. and each of its domestic subsidiaries.

In January 2012, S&P affirmed its rating and revised its outlook to stable from positive for PPL Montana's Pass Through Certificates due 2020.

Ratings Triggers

As discussed in Note 7 to the Financial Statements, certain of WPD's senior unsecured notes may be put by the holders back to the issuer for redemption if the long-term credit ratings assigned to the notes by Moody's, S&P or Fitch are withdrawn by any of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or a material adverse change to, the distribution license under which WPD (East Midlands), WPD (South West), WPD (South Wales) and WPD (West Midlands) operate. These notes totaled £3.3 billion (approximately $5.1 billion) at December 31, 2011.

PPL and PPL Energy Supply have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements, and interest rate and foreign currency instruments, which contain provisions requiring PPL and PPL Energy Supply to post additional collateral, or permit the counterparty to terminate the contract, if PPL's or PPL Energy Supply's credit rating were to fall below investment grade. See Note 19 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at December 31, 2011. At December 31, 2011, if PPL's and PPL Energy Supply's credit ratings had been below investment grade, PPL would have been required to prepay or post an additional $475 million of collateral to counterparties for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations and interest rate and foreign currency contracts.

Guarantees for Subsidiaries

PPL guarantees certain consolidated affiliate financing arrangements that enable certain transactions. Some of the guarantees contain financial and other covenants that, if not met, would limit or restrict the consolidated affiliates' access to funds under these financing arrangements, require early maturity of such arrangements or limit the consolidated affiliates' ability to enter into certain transactions. At this time, PPL believes that these covenants will not limit access to relevant funding sources. See Note 15 to the Financial Statements for additional information about guarantees.

Off-Balance Sheet Arrangements

PPL has entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management - Energy Marketing & Trading and Other

Market Risk

See Notes 1, 18, and 19 to the Financial Statements for information about PPL's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses at a given confidence level.

Commodity Price Risk (Non-trading)

PPL segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL's competitive generation assets and full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. The net fair value of economic positions at December 31, 2011 and 2010 was a net liability of $63 million and $391 million. See Note 19 to the Financial Statements for additional information on economic activity.

To hedge the impact of market price volatility on PPL's energy-related assets, liabilities and other contractual arrangements, PPL both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL's non-trading commodity derivative contracts mature at various times through 2019.

The following table sets forth the changes in net fair value of PPL's non-trading commodity derivative contracts. See Notes 18 and 19 to the Financial Statements for additional information.

	Gains (Losses)	
	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 947	$ 1,280
Contracts realized or otherwise settled during the period	(517)	(478)
Fair value of new contracts entered into during the period (a)	13	(5)
Changes in fair value attributable to changes in valuation techniques (b)		(23)
Fair value of LKE derivative contracts at the acquisition date		(24)
Other changes in fair value	639	197
Fair value of contracts outstanding at the end of the period	$ 1,082	$ 947

(a) Represents the fair value of contracts at the end of the quarter of their inception.

(b) In June 2010, PPL Energy Supply received market bids for certain full-requirement sales contracts that were monetized in early July. See Note 19 to the Financial Statements for additional information. At June 30, 2010, these contracts were valued based on the bids received (the market approach). In prior periods, the fair value of these contracts was measured using the income approach.

The following table segregates the net fair value of PPL's non-trading commodity derivative contracts at December 31, 2011 based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Source of Fair Value					
Prices quoted in active markets for identical instruments	$ 1				$ 1
Prices based on significant other observable inputs	713	$ 342	$ (1)	$ 15	1,069
Prices based on significant unobservable inputs	13	(3)	2		12
Fair value of contracts outstanding at the end of the period	$ 727	$ 339	$ 1	$ 15	$ 1,082

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties with which it has energy contracts and other factors could affect PPL's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL's trading contracts mature at various times through 2015. The following table sets forth changes in the net fair value of PPL's trading commodity derivative contracts. See Notes 18 and 19 to the Financial Statements for additional information.

	Gains (Losses)	
	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 4	$ (6)
Contracts realized or otherwise settled during the period	(14)	(12)
Fair value of new contracts entered into during the period	10	39
Other changes in fair value	(4)	(17)
Fair value of contracts outstanding at the end of the period	$ (4)	$ 4

PPL will reverse unrealized losses of approximately $2 million over the next three months as the transactions are realized.

The following table segregates the net fair value of PPL's trading commodity derivative contracts at December 31, 2011 based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Source of Fair Value					
Prices quoted in active markets for identical instruments	$ 1				$ 1
Prices based on significant other observable inputs	(18)	$ 11	$ 1		(6)
Prices based on significant unobservable inputs	1				1
Fair value of contracts outstanding at the end of the period	$ (16)	$ 11	$ 1		$ (4)

VaR Models

PPL utilizes a VaR model to measure commodity price risk in unregulated gross energy margins for its non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. PPL calculates VaR using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's conservative hedging program, PPL's non-trading VaR exposure is expected to be limited in the short term. At December 31, 2011 and December 31, 2010, the VaR for PPL's portfolios using end-of-month results for the period was as follows.

	Trading VaR		Non-Trading VaR	
	2011	2010	2011	2010
95% Confidence Level, Five-Day Holding Period				
Period End	$ 1	$ 1	$ 6	$ 5
Average for the Period	3	4	5	7
High	6	9	7	12
Low	1	1	4	4

The trading portfolio includes all speculative positions, regardless of the delivery period. All positions not considered speculative are considered non-trading. PPL's non-trading portfolio includes PPL's entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at December 31, 2011.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Interest Rate Risk

PPL and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL's debt portfolio due to changes in the absolute level of interest rates.

At December 31, 2011 and 2010, PPL's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL is also exposed to changes in the fair value of its domestic and international debt portfolios. PPL estimated that a 10% decrease in interest rates at December 31, 2011 would increase the fair value of its debt portfolio by $635 million, compared with $420 million at December 31, 2010.

PPL had the following interest rate hedges outstanding at:

	December 31, 2011			December 31, 2010		
	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)
Cash flow hedges						
Interest rate swaps (c)	$ 150	$ (3)	$ (3)	$ 500	$ (19)	$ (28)
Cross-currency swaps (d)	1,262	22	(187)	302	35	(18)
Fair value hedges						
Interest rate swaps (e)	99	4		349	20	(3)
Economic hedges						
Interest rate swaps (f)	179	(60)	(4)	179	(34)	(7)

(a) Includes accrued interest, if applicable.

(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.

(c) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any changes in the fair value of such cash flow hedges are recorded in equity. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at December 31, 2011 mature in 2022.

(d) PPL WEM, through PPL, and PPL WW use cross-currency swaps to hedge the interest payments and principal of their U.S. dollar-denominated senior notes with maturity dates ranging from May 2016 to December 2028. While PPL is exposed to changes in the fair value of these instruments, any change in the fair value of these instruments is recorded in equity and reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in both interest rates and foreign currency exchange rates.

(e) PPL utilizes various risk management instruments to adjust the mix of fixed and floating interest rates in its debt portfolio. The change in fair value of these instruments, as well as the offsetting change in the value of the hedged exposure of the debt, is reflected in earnings. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at December 31, 2011 mature in 2047.

(f) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at December 31, 2011 mature through 2033.

Foreign Currency Risk

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL's domestic operations may make purchases of equipment in currencies other than U.S. dollars. See Note 1 to the Financial Statements for additional information regarding foreign currency translation.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

PPL had the following foreign currency hedges outstanding at:

Past financial performance is no guarantee of future results.

	December 31, 2011			December 31, 2010		
	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)
Net investment hedges (b)	£ 92	$ 7	$ (13)	£ 35	$ 7	$ (5)
Economic hedges (c)	288	11	(37)	89	4	(10)

(a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
(b) To protect the value of a portion of its net investment in WPD, PPL executes forward contracts to sell GBP.
(c) To economically hedge the translation of expected income denominated in GBP to U.S. dollars, PPL enters into a combination of average rate forwards and average rate options to sell GBP. The forwards and options outstanding at December 31, 2011 have termination dates ranging from January 2012 through November 2012.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the Susquehanna nuclear plant. At December 31, 2011, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on PPL's Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its nuclear decommissioning trust policy statement. At December 31, 2011, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated $43 million reduction in the fair value of the trust assets, compared with $45 million at December 31, 2010. See Notes 18 and 23 to the Financial Statements for additional information regarding the NDT funds.

Defined Benefit Plans - Securities Price Risk

See "Application of Critical Accounting Policies - Defined Benefits" for additional information regarding the effect of securities price risk on plan assets.

Credit Risk

Credit risk is the risk that PPL would incur a loss as a result of nonperformance by counterparties of their contractual obligations. PPL maintains credit policies and procedures with respect to counterparty credit (including requirements that counterparties maintain specified credit ratings) and requires other assurances in the form of credit support or collateral in certain circumstances in order to limit counterparty credit risk. However, PPL has concentrations of suppliers and customers among electric utilities, financial institutions and other energy marketing and trading companies. These concentrations may impact PPL's overall exposure to credit risk, positively or negatively, as counterparties may be similarly affected by changes in economic, regulatory or other conditions.

PPL includes the effect of credit risk on its fair value measurements to reflect the probability that a counterparty will default when contracts are out of the money (from the counterparty's standpoint). In this case, PPL would have to sell into a lower-priced market or purchase from a higher-priced market. When necessary, PPL records an allowance for doubtful accounts to reflect the probability that a counterparty will not pay for deliveries PPL has made but not yet billed, which are reflected in "Unbilled revenues" on the Balance Sheets. PPL also has established a reserve with respect to certain receivables from SMGT, which is reflected in accounts receivable on the Balance Sheets. See Note 15 to the Financial Statements for additional information.

In 2009, the PUC approved PPL Electric's PLR procurement plan for the period January 2011 through May 2013. To date, PPL Electric has conducted ten of its 14 planned competitive solicitations.

Under the standard Supply Master Agreement (the Agreement) for the competitive solicitation process, PPL Electric requires all suppliers to post collateral if their credit exposure exceeds an established credit limit. In the event a supplier defaults on its obligation, PPL Electric would be required to seek replacement power in the market. All incremental costs incurred by PPL Electric would be recoverable from customers in future rates. At December 31, 2011, substantially all of the successful bidders under all of the solicitations had an investment grade credit rating from S&P, and were not required to post collateral

under the Agreement. There is no instance under the Agreement in which PPL Electric is required to post collateral to its suppliers.

See "Overview" in this Item 7 and Notes 15, 16, 18 and 19 to the Financial Statements for additional information on the competitive solicitations, the Agreement, credit concentration and credit risk.

Foreign Currency Translation

The value of the British pound sterling fluctuates in relation to the U.S. dollar. In 2011, changes in these exchange rates resulted in a foreign currency translation loss of $51 million, which primarily reflected a $69 million reduction to PP&E offset by a reduction of $18 million to net liabilities. In 2010, changes in these exchange rates resulted in a foreign currency translation loss of $63 million, which primarily reflected a $180 million reduction to PP&E offset by a reduction of $117 million to net liabilities. In 2009, changes in these exchange rates resulted in a foreign currency translation gain of $106 million, which primarily reflected a $225 million increase in PP&E offset by an increase of $119 million to net liabilities. The impact of foreign currency translation is recorded in AOCI.

Related Party Transactions

PPL is not aware of any material ownership interests or operating responsibility by senior management of PPL, PPL Energy Supply, PPL Electric, LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with PPL. See Note 16 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

PPL continuously evaluates potential acquisitions, divestitures and development. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options.

In April 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of WPD Midlands. In November 2010, PPL completed its acquisition of LKE. See Note 10 to the Financial Statements for additional information.

See Notes 8, 9 and 10 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Protection of the environment is a priority for PPL and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to PPL's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the cost for their products or their demand for PPL's services. See "Item 1. Business - Environmental Matters" and Note 15 to the Financial Statements for a discussion of environmental matters.

Competition

See "Competition" under each of PPL's reportable segments in "Item 1. Business - Segment Information" and "Item 1A. Risk Factors" for a discussion of competitive factors affecting PPL.

New Accounting Guidance

See Notes 1 and 24 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). PPL's senior management has reviewed these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them, with PPL's Audit Committee.

1) Price Risk Management

See "Price Risk Management" in Note 1 to the Financial Statements, as well as "Risk Management - Energy Marketing & Trading and Other" above.

2) Defined Benefits

Certain PPL subsidiaries sponsor various qualified funded and non-qualified unfunded defined benefit pension plans. Certain PPL subsidiaries also sponsor both funded and unfunded other postretirement plans. These plans are applicable to the majority of the employees of PPL. PPL and certain of its subsidiaries record an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to OCI or regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

PPL and its subsidiaries make certain assumptions regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on estimated results. Any differences between actual and estimated results are recorded in OCI or regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. These amounts in AOCI or regulatory assets and liabilities are amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- Discount Rate - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Return on Plan Assets - Management projects the long-term rates of return on plan assets based on historical performance, future expectations and periodic portfolio rebalancing among the diversified asset classes. These projected returns reduce the net benefit costs PPL records currently.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.

- Health Care Cost Trend Rate - Management projects the expected increases in the cost of health care.

In selecting a discount rate for its U.S. defined benefit plans, PPL starts with a cash flow analysis of the expected benefit payment stream for its plans. For 2010, these plan-specific cash flows were matched against a spot-rate yield curve to determine the assumed discount rate. To develop the spot-rate yield curve, the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, served as the base from which those with the lowest and highest yields were eliminated to develop an appropriate subset of bonds from which the ultimate yield curve would be built. At that time, Management believed this plan-specific cash flow matching model represented the best available tool for estimating the discount rate. Beginning in 2011, PPL utilized a new tool that enhanced this plan-specific cash flow matching methodology by primarily matching the plan-specific cash flows against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the same subset of the universe of Aa-rated corporate bonds from which those with the lowest and highest yields were eliminated, similar to the yield curve approach. Individual bonds were then selected based on the timing of each plan's cash flows and parameters were established as to the percentage of each individual

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed. This process more accurately approximated the process of settlement of the obligations, which better aligns with the objective of selecting the discount rate. At December 31, 2011, PPL decreased the discount rate for its U.S. pension plans from 5.42% to 5.06% and decreased the discount rate for its other postretirement benefit plans from 5.14% to 4.80%.

In 2011 and 2010, a similar process to the 2010 approach described above was used to select the discount rate for the U.K. pension plans, which used an iBoxx British pounds sterling denominated corporate bond index as its base. This discount rate selection methodology was not modified for the U.K. pension plans because the universe of bonds in the U.K. is not deep enough to adequately support a bond matching process. At December 31, 2011, the discount rate for the U.K. pension plans was decreased from 5.54% to 5.24% as a result of this assessment.

The expected long-term rates of return for PPL's U.S. defined benefit pension and other postretirement benefit plans have been developed using a best-estimate of expected returns, volatilities and correlations for each asset class. PPL management corroborates these rates with expected long-term rates of return calculated by its independent actuary, who uses a building block approach that begins with a risk-free rate of return with factors being added such as inflation, duration, credit spreads and equity risk. Each plan's specific asset allocation is also considered in developing a reasonable return assumption.

Based on PPL's change to a liability-driven investment strategy, PPL's U.S. defined benefit pension assets have shifted into a greater proportion of fixed-income investments. Based on this change in investment strategy, at December 31, 2011, PPL's expected return on plan assets decreased from 7.25% to 7.07% for its U.S. pension plans and decreased from 6.57% to 5.93% for its other postretirement benefit plans. The expected long-term rates of return for PPL's U.K. pension plans have been developed by PPL management with assistance from an independent actuary using a best-estimate of expected returns, volatilities and correlations for each asset class. For the U.K. plans, PPL's expected return on plan assets decreased from 7.86% to 7.17% at December 31, 2011. This decrease was primarily the result of the acquisition of WPD Midlands and its pension plan, which has a greater portion of assets invested in fixed income securities resulting in a lower rate of return.

In selecting a rate of compensation increase, PPL considers past experience in light of movements in inflation rates. At December 31, 2011, PPL's rate of compensation increase changed from 4.88% to 4.02% for its U.S. pension plans and 4.90% to 4.00% for its other postretirement benefit plans. For the U.K. plans, PPL's rate of compensation increase remained at 4.00% at December 31, 2011.

In selecting health care cost trend rates, PPL considers past performance and forecasts of health care costs. At December 31, 2011, PPL's health care cost trend rates were 8.50% for 2012, gradually declining to 5.50% for 2019.

A variance in the assumptions listed above could have a significant impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and OCI or regulatory assets and liabilities for LG&E, KU and PPL Electric. While the charts below reflect either an increase or decrease in each assumption, the inverse of this change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and OCI or regulatory assets and liabilities for LG&E, KU and PPL Electric by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption and does not include income tax effects.

At December 31, 2011, the defined benefit plans were recorded as follows.

Pension assets	$ 130
Pension liabilities	(1,327)
Other postretirement benefit liabilities	(296)

The following chart reflects the sensitivities in the December 31, 2011 Balance Sheet associated with a change in certain assumptions based on PPL's primary defined benefit plans.

		Increase (Decrease)		
Actuarial assumption	Change in assumption	Impact on defined benefit liabilities	Impact on OCI	Impact on regulatory assets
Discount Rate	(0.25)%	$ 386	$ (314)	$ 72
Rate of Compensation Increase	0.25%	59	(48)	11
Health Care Cost Trend Rate (a)	1.00%	8	(2)	6

(a) Only impacts other postretirement benefits.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In 2011, PPL recognized net periodic defined benefit costs charged to operating expense of $204 million. This amount represents a $102 million increase from 2010. This increase in expense was primarily attributable to the pension costs of the newly acquired pension plans of WPD Midlands, including separation costs, and a full year of LKE pension costs for 2011.

The following chart reflects the sensitivities in the 2011 Statement of Income (excluding income tax effects) associated with a change in certain assumptions based on PPL's primary defined benefit plans.

Actuarial assumption	Change in assumption	Impact on defined benefit costs
Discount Rate	(0.25)%	$ 23
Expected Return on Plan Assets	(0.25)%	21
Rate of Compensation Increase	0.25%	10
Health Care Cost Trend Rate (a)	1.00%	1

(a) Only impacts other postretirement benefits.

3) Asset Impairment

Impairment analyses are performed for long-lived assets that are subject to depreciation or amortization whenever events or changes in circumstances indicate that a long-lived asset's carrying value may not be recoverable. For these long-lived assets classified as held and used, such events or changes in circumstances are:

- a significant decrease in the market price of an asset;
- a significant adverse change in the manner in which an asset is being used or in its physical condition;
- a significant adverse change in legal factors or in the business climate;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of an asset;
- a current period operating or cash flow loss combined with a history of losses or a forecast that demonstrates continuing losses; or
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

For a long-lived asset classified as held and used, an impairment is recognized when the carrying amount of the asset is not recoverable and exceeds its fair value. The carrying amount is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the asset is impaired, an impairment loss is recorded to adjust the asset's carrying value to its estimated fair value. Management must make significant judgments to estimate future cash flows, including the useful lives of long-lived assets, the fair value of the assets and management's intent to use the assets. Alternate courses of action are considered to recover the carrying value of a long-lived asset, and estimated cash flows from the "most likely" alternative are used to assess impairment whenever one alternative is clearly the most likely outcome. If no alternative is clearly the most likely, then a probability-weighted approach is used taking into consideration estimated cash flows from the alternatives. For assets tested for impairment as of the balance sheet date, the estimates of future cash flows used in that test consider the likelihood of possible outcomes that existed at the balance sheet date, including the assessment of the likelihood of a future sale of the assets. That assessment is not revised based on events that occur after the balance sheet date. Changes in assumptions and estimates could result in significantly different results than those identified and recorded in the financial statements.

For a long-lived asset classified as held for sale, an impairment exists when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If the asset (disposal group) is impaired, an impairment loss is recorded to adjust the carrying amount to its fair value less cost to sell. A gain is recognized for any subsequent increase in fair value less cost to sell, but not in excess of the cumulative impairment previously recognized.

For determining fair value, quoted market prices in active markets are the best evidence. However, when market prices are unavailable, the Registrant considers all valuation techniques appropriate under the circumstances and for which market participant inputs can be obtained. Generally discounted cash flows are used to estimate fair value, which incorporates market participant inputs when available. Discounted cash flows are calculated by estimating future cash flow streams and applying appropriate discount rates to determine the present value of the cash flow streams.

See Note 18 to the Financial Statements for a discussion of impairments related to certain intangible assets in 2011.

Goodwill is tested for impairment at the reporting unit level. PPL's reporting units have been determined to be at the operating segment level. A goodwill impairment test is performed annually or more frequently if events or changes in

Past financial performance is no guarantee of future results.

circumstances indicate that the carrying value of the reporting unit may be greater than the unit's fair value. Additionally, goodwill is tested for impairment after a portion of goodwill has been allocated to a business to be disposed of.

Goodwill is tested for impairment using a two-step approach. In step one, PPL identifies a potential impairment by comparing the estimated fair value of a reporting unit with its carrying value, including goodwill, on the measurement date. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is not considered impaired. If the carrying value exceeds the estimated fair value, the second step is performed to measure the amount of impairment loss, if any.

The second step requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. That is, the estimated fair value of a reporting unit is allocated to all of the assets and liabilities of that reporting unit as if the reporting unit had been acquired in a business combination and the estimated fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the estimated fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The implied fair value of the reporting unit's goodwill is then compared with the carrying value of that goodwill. If the carrying value exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying value of the reporting unit's goodwill.

PPL tested the goodwill of its reporting units for impairment in the fourth quarter of 2011 and no impairment was recognized. Management used both discounted cash flows and market multiples, which required significant assumptions, to estimate the fair value of each reporting unit. Applying an appropriate weighting to both the discounted cash flow and market multiple valuations, a decrease in the forecasted cash flows of 10%, an increase in the discount rate by 25 basis points, or a 10% decrease in the multiples would not have resulted in an impairment of goodwill.

In 2010 and 2009, $5 million and $3 million of goodwill allocated to discontinued operations was written off.

4) Loss Accruals

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events, and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual, and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are used, as necessary, to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

No new significant loss accruals were recorded in 2011.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is "reasonably possible" that a loss has been incurred. See Note 15 to the Financial Statements for disclosure of other potential loss contingencies that have not met the criteria for accrual.

When an estimated loss is accrued, the triggering events for subsequently reducing the loss accrual are identified, where applicable. The triggering events generally occur when the contingency has been resolved and the actual loss is paid or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the reduction of certain recorded loss accruals:

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.
- Environmental and other litigation contingencies are reduced when the contingency is resolved and actual payments are made, a better estimate of the loss is determined or the loss is no longer considered probable.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, operation management and other parties.

See Note 15 to the Financial Statements for a discussion of the Montana Hydroelectric Litigation, including the reversal of an $89 million loss accrual, as a result of management's assessment of the February 2012 U.S. Supreme Court decision.

5) Asset Retirement Obligations

PPL is required to recognize a liability for legal obligations associated with the retirement of long-lived assets. The initial obligation is measured at its estimated fair value. A conditional ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. An equivalent amount is recorded as an increase in the value of the capitalized asset and allocated to expense over the useful life of the asset. Until the obligation is settled, the liability is increased, through the recognition of accretion expense in the income statement, for changes in the obligation due to the passage of time.

In the case of LG&E and KU, estimated costs of removal for all assets are recovered in rates as a component of depreciation. Since costs of removal are collected in rates prior to payment of such costs, the accrual for these costs of removal is classified as a regulatory liability. The regulatory liability is relieved as costs are incurred. The depreciation and accretion expense related to an ARO are offset with a regulatory credit on the income statement, such that there is no earnings impact. The regulatory asset created by the regulatory credit is relieved when the ARO has been settled.

See Note 21 to the Financial Statements for further discussion of AROs.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that considers estimated retirement costs in current period dollars that are inflated to the anticipated retirement date and then discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is amortized over the remaining life of the associated long-lived asset.

At December 31, 2011, AROs totaling $497 million were recorded on the Balance Sheet, of which $13 million is included in "Other current liabilities." Of the total amount, $292 million, or 59%, relates to the nuclear decommissioning ARO. The most significant assumptions surrounding AROs are the forecasted retirement costs, the discount rates and the inflation rates. A variance in any of these inputs could have a significant impact on the ARO liabilities.

The following table reflects the sensitivities related to the nuclear decommissioning ARO liability associated with a change in these assumptions as of December 31, 2011. There is no significant change to the annual depreciation expense of the ARO asset or the annual accretion expense of the ARO liability as a result of changing the assumptions. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption.

	Change in Assumption	Impact on ARO Liability
Retirement Cost	10%	$ 29
Discount Rate	(0.25)%	26
Inflation Rate	0.25%	30

6) Income Taxes

Significant management judgment is required in developing the provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. Tax positions are evaluated following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

50%. Management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, uncertain tax positions are reassessed by considering information known at the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position may be de-recognized, or the benefit of a previously recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2011, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase by as much as $43 million or decrease by up to $129 million. This change could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the creditability of foreign taxes, the timing and utilization of foreign tax credits and the related impact on alternative minimum tax and other credits, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. Management also considers the uncertainty posed by political risk and the effect of this uncertainty on the various factors that management takes into account in evaluating the need for valuation allowances. The amount of deferred tax assets ultimately realized may differ materially from the estimates utilized in the computation of valuation allowances and may materially impact the financial statements in the future. See Note 5 to the Financial Statements for income tax disclosures.

7) Regulatory Assets and Liabilities

Certain of PPL's subsidiaries are subject to cost-based rate regulation. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to other regulated entities, and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels, and is subject to change in the future. If future recovery of costs ceases to be probable, then asset write-offs would be required to be recognized in operating income. Additionally, the regulatory agencies can provide flexibility in the manner and timing of depreciation of PP&E and amortization of regulatory assets.

At December 31, 2011 and 2010, PPL had regulatory liabilities of $1.1 billion. At December 31, 2011 and 2010, PPL had regulatory assets of $1.4 billion and $1.3 billion. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices.

In March 2012, PPL Electric plans to file a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives that transferred regulatory jurisdiction of certain transmission assets from the PUC to the FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is

included in "Other Noncurrent Assets - Regulatory assets" on the Balance Sheet. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

See Note 6 to the Financial Statements for additional information on regulatory assets and liabilities.

8) Business Combinations - Purchase Price Allocation

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary, PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently referred to as WPD Midlands). In accordance with accounting guidance on business combinations, the identifiable assets acquired and the liabilities assumed were measured at fair value at the acquisition date. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The excess of the purchase price over the estimated fair value of the identifiable net assets was recorded as goodwill.

The determination and allocation of fair value to the identifiable assets acquired and liabilities assumed was based on various assumptions and valuation methodologies requiring considerable management judgment, including estimates based on key assumptions of the acquisition, and historical and current market data. Significant variables in these valuations include the discount rates, the number of years on which to base cash flow projections, as well as the assumptions and estimates used to determine cash inflows and outflows.

The fair value of the majority of PP&E was determined utilizing a discounted cash flow approach and corroborated by the RAV, which is a measure of the unrecovered value of the regulated network business in the U.K. For purposes of measuring the fair value of the majority of PP&E, PPL determined that fair value should approximate the RAV at the acquisition date because WPD Midlands' operations are conducted in a regulated environment and the regulator allows for earning a rate of return on and recovery of RAV at rates determined to be fair and reasonable. As there is no current prospect for deregulation in WPD Midlands' operating area, it is expected that these operations will remain in a regulated environment for the foreseeable future; therefore, management has concluded that the use of these assets in the regulatory environment represents their highest and best use and a market participant would measure the fair value of these assets using the regulatory rate of return as the discount rate, thus resulting in fair value approximately equal to the RAV.

The purchase price allocation resulted in goodwill of $2.4 billion that was assigned to the International Regulated segment. This reflects the expected continued growth of a rate-regulated business with a defined service area operating under a constructive regulatory framework, expected cost savings, efficiencies and other benefits resulting from a contiguous service area with WPD (South West) and WPD (South Wales) and the ability to leverage WPD (South West)'s and WPD (South Wales)'s existing management team's high level of performance in capital cost efficiency, system reliability and customer service.

See Note 10 to the Financial Statements for additional information regarding the acquisition.

Other Information

PPL's Audit Committee has approved the independent auditor to provide audit and audit-related services, tax services and other services permitted by Sarbanes-Oxley and SEC rules. The audit and audit-related services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information provided in this Item 7 should be read in conjunction with PPL Energy Supply's Consolidated Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL Energy Supply and its business strategy. "Financial and Operational Developments" includes a review of Net Income Attributable to PPL Energy Supply and discusses certain events that are important to understanding PPL Energy Supply's results of operations and financial condition.
- "Results of Operations" provides a summary of PPL Energy Supply's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL Energy Supply's Statements of Income, comparing 2011, 2010 and 2009.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Energy Supply's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.
- "Financial Condition - Risk Management - Energy Marketing & Trading and Other" provides an explanation of PPL Energy Supply's risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of PPL Energy Supply and that require its management to make significant estimates, assumptions and other judgments of matters inherently uncertain.

Overview

Introduction

PPL Energy Supply is an energy company with headquarters in Allentown, Pennsylvania. Through its subsidiaries, PPL Energy Supply is primarily engaged in the generation and marketing of electricity in two key markets - the northeastern and northwestern U.S.

In 2011, PPL Energy Supply operated in one reportable segment compared with two reportable segments in previous years - International Regulated and Supply. In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its direct parent, PPL Energy Funding, to better align PPL's organizational structure with the manner in which it manages its businesses and reports segment information in its consolidated financial statements. The distribution separated the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business. As a result, effective January 1, 2011, PPL Energy Supply operates in a single business segment. The 2010 and 2009 operating results of the International Regulated segment have been reclassified to "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income. See Note 9 to the Financial Statements for additional information on the January 2011 distribution.

Business Strategy

PPL Energy Supply's overall strategy is to achieve disciplined optimization of energy supply margins while mitigating volatility in both cash flows and earnings. More specifically, PPL Energy Supply's strategy is to optimize the value from its unregulated generation and marketing portfolio. PPL Energy Supply endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk.

To manage financing costs and access to credit markets, a key objective of PPL Energy Supply's business is to maintain a strong credit profile. PPL Energy Supply continually focuses on maintaining an appropriate capital structure and liquidity

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

position. In addition, PPL Energy Supply has financial and operational risk management programs that, among other things, are designed to monitor and manage its exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Developments

Net Income Attributable to PPL Energy Supply

Net Income Attributable to PPL Energy Supply for 2011, 2010 and 2009 was $768 million, $861 million and $246 million. Earnings in 2011 decreased 11% from 2010 and earnings in 2010 increased 250% over 2009. These changes reflect the following after-tax impacts:

	2011 vs. 2010	2010 vs. 2009
Net unrealized gains (losses) on energy-related economic activity	$ 193	$ 104
Losses on the monetization of certain full-requirement sales contracts in 2010	125	(125)
Sales of generation facilities	46	(33)
Litigation settlement in 2011 related to spent nuclear fuel storage	33	
Montana hydroelectric litigation	84	(31)
State valuation allowance adjustments	(74)	52
Change in "Unregulated Gross Energy Margins" (a)	(240)	608
Results of PPL Global	(261)	18
Other	1	22
	$ (93)	$ 615

(a) See "Statement of Income Analysis - Margins" for additional information, including a reconciliation of this non-GAAP financial measure to operating income.

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations, as well as a discussion of each of PPL's business segments.

Susquehanna Turbine Blade Replacement

In April 2011, during the PPL Susquehanna Unit 2 refueling and generation uprate outage, a planned inspection of the Unit 2 turbine revealed cracks in certain of its low pressure turbine blades. Replacement of these blades was required, but was not anticipated as part of the original scope of this outage. The necessary replacement work extended the Unit 2 outage by six weeks. As a precaution, PPL Susquehanna also took Unit 1 out of service in mid-May to inspect the turbine blades in that unit. This inspection revealed cracks in blades similar to those found in Unit 2. The duration of the Unit 1 outage, in which turbine blades were replaced, was also about six weeks. The after-tax earnings impact, including reduced energy-sales margins and repair expense for both units, was $63 million.

Spent Nuclear Fuel Litigation

In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna plant. Under the settlement agreement, PPL Susquehanna received $50 million, pre-tax, for its share of claims to partially offset its expenses incurred to store spent nuclear fuel at the Susquehanna plant through September 2009 and recognized a credit to "Fuel" expense in 2011. PPL Susquehanna will also be eligible to receive payment of annual claims for allowed costs that are incurred through the December 2013 termination of the settlement agreement. In exchange, PPL Susquehanna has waived any claims against the U.S. Government for costs paid or injuries sustained related to storing spent nuclear fuel at the Susquehanna plant through December 31, 2013. See Note 15 to the Financial Statements for additional information.

Bankruptcy of SMGT

In October 2011, SMGT, a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus expiring in June 2019 (SMGT Contract), filed for protection under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court in Montana. At December 31, 2011, damages related to SMGT accepting less power than provided in the SMGT Contract totaled approximately $11 million, all of which has been fully reserved. No assurance can be given as to the collectability of these damages.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The SMGT Contract provides for fixed volume purchases on a monthly basis at established prices. A trustee has been appointed for SMGT's estate in the bankruptcy proceeding and PPL EnergyPlus has been involved in preliminary discussions with the trustee concerning possible modifications to the SMGT Contract as part of the bankruptcy reorganization. Pursuant to a stipulation entered into by SMGT and PPL EnergyPlus, since the date of its Chapter 11 filing through January 2012, SMGT has continued to purchase electricity from PPL EnergyPlus at the price specified in the SMGT Contract, and has made timely payments for such purchases, but at lower volumes than as prescribed in the SMGT Contract. In January 2012, the trustee notified PPL EnergyPlus that SMGT would not purchase electricity under the SMGT Contract for the month of February. In addition, the trustee requested PPL EnergyPlus to leave the SMGT Contract in place to permit SMGT to purchase electricity in the event its requirements were not met by third-party providers from whom the trustee intends to purchase power on behalf of SMGT, at prices more favorable than under the SMGT Contract, for future periods. PPL EnergyPlus is evaluating the trustee's request.

At the present time, PPL cannot predict whether SMGT will be successful in its attempts to reorganize its business under Chapter 11 of the U.S. Bankruptcy Code or the extent to which the SMGT Contract may be modified as part of a successful Chapter 11 reorganization and, in either case, PPL cannot presently predict the extent to which it will be able to market to third parties any amount of power that SMGT ultimately does not continue to purchase from PPL EnergyPlus.

CSAPR

In July 2011, the EPA signed the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010, and made revisions to the rule on February 7, 2012. This rule applies to PPL Energy Supply's coal plants in Pennsylvania. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions.

In December 2011, the U.S. Court of Appeals for the District of Columbia (Court) stayed implementation of the CSAPR and left CAIR in effect pending a final resolution on the merits of the validity of the rule. Oral argument on the various challenges to the CSAPR is scheduled for April 2012, and a final decision on the validity of the rule could be issued as early as May 2012.

PPL Energy Supply's coal fired power plants can meet both the CAIR and the proposed CSAPR sulfur dioxide emission requirements with the existing scrubbers that went in-service in 2008 and 2009. For nitrogen oxide, under both the CAIR and the proposed CSAPR, PPL Energy Supply would need to buy allowances or make operational changes, the cost of which is not anticipated to be significant.

See Note 15 to the Financial Statements for additional information on the CSAPR.

Montana Hydroelectric Litigation

In June 2011, the U.S. Supreme Court granted PPL Montana's petition to review the March 2010 Montana Supreme Court decision, which substantially affirmed the June 2008 Montana District Court decision to award the State of Montana retroactive compensation for PPL Montana's hydroelectric facilities' use and occupancy of certain Montana riverbeds. Oral argument was held in December 2011. On February 22, 2012, the U.S. Supreme Court issued a decision overturning the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, PPL Montana reversed its total loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision. PPL Montana believes the U.S. Supreme Court decision resolves certain questions of liability in this case in favor of PPL Montana and leaves open for reconsideration by Montana courts, consistent with the findings of the U.S. Supreme Court, certain other questions. The State of Montana has 30 days from February 22, 2012 to petition the U.S. Supreme Court for a rehearing. PPL Montana has concluded it is no longer probable, but it remains reasonably possible, that a loss has been incurred. While unable to estimate a range of loss, PPL Montana believes that any such amount would not be material. See Note 15 to the Financial Statements for additional information.

Results of Operations

When comparing 2011 and 2010 with 2009, certain line items on PPL Energy Supply's financial statements were impacted by the expiration of the generation rate caps and the expiration of the PLR contracts between PPL EnergyPlus and PPL Electric at the end of 2009. Overall, they had a significant positive impact on PPL Energy Supply's results of operations, financial condition and cash flows during 2010.

The primary impact of the expiration of generation rate caps and these contracts is reflected in PPL Energy Supply's Unregulated Gross Energy Margins. See "Statement of Income Analysis - Margins - Non-GAAP Financial Measure" for an explanation of this non-GAAP financial measure. In 2011 and 2010, PPL Energy Supply sold the majority of its generation supply under various contracts at prevailing market rates at the time the contracts were executed. In 2009, the majority of generation produced by PPL Energy Supply's generation plants was sold to PPL Electric's customers as PLR supply under predetermined capped rates.

Earnings

Net Income Attributable to PPL Energy Supply includes the following results:

	2011	2010	% Change	2010	2009	% Change
Operating revenues	$ 6,429	$ 5,128	25	$ 5,128	$ 5,309	(3)
Fuel	1,080	1,096	(1)	1,096	920	19
Energy purchases	2,286	1,353	69	1,353	2,737	(51)
Other operation and maintenance	929	979	(5)	979	921	6
Depreciation	244	236	3	236	196	20
Taxes, other than income	71	46	54	46	29	59
Energy-related business	458	357	28	357	371	(4)
Total operating expenses	5,068	4,067	25	4,067	5,174	(21)
Other Income (Expense) - net	23	22	5	22	44	(50)
Other-Than-Temporary Impairments	6	3	100	3	18	(83)
Interest Income from Affiliates	8	9	(11)	9	2	350
Interest Expense	174	208	(16)	208	176	18
Income Taxes	445	261	70	261	3	8,600
Income (Loss) from Discontinued Operations	2	242	(99)	242	263	(8)
Net Income	769	862	(11)	862	247	249
Net Income Attributable to Noncontrolling Interests	1	1		1	1	
Net Income Attributable to PPL Energy Supply	$ 768	$ 861	(11)	$ 861	$ 246	250

The changes in the components of Net Income Attributable to PPL Energy Supply between these periods were due to the following factors. PPL Energy Supply's results are adjusted for certain items that management considers special. See additional detail of these special items in the tables below.

	2011 vs. 2010	2010 vs. 2009
Unregulated gross energy margins	$ (405)	$ 1,039
Other operation and maintenance	(65)	(44)
Depreciation	(8)	(41)
Taxes other than income	(9)	(3)
Other Income (Expense) - net	3	(1)
Interest Expense	4	(12)
Other	(3)	
Income Taxes	146	(300)
Discontinued operations - Domestic, after-tax - excluding certain revenues and expenses included in margins	16	13
Discontinued operations - International, after-tax	(261)	18
Special items, after-tax	489	(54)
Total	$ (93)	$ 615

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of margins.

- Other operation and maintenance increased in 2011 compared with 2010, primarily due to higher costs at PPL Susquehanna of $30 million, largely due to unplanned outages, the refueling outage and payroll, higher costs at eastern fossil and hydro units of $20 million, largely due to outages, and higher costs at western fossil and hydro units of $15 million, largely resulting from insurance recoveries received in 2010.

  Other operation and maintenance increased in 2010 compared with 2009, primarily due to higher costs at PPL Susquehanna of $31 million largely due to higher payroll-related costs, higher outage costs, and higher project costs.

- Depreciation increased in 2010 compared with 2009, primarily due to $21 million impact from environmental equipment at Brunner Island that was placed in service in 2009 and early 2010.

- Other income (expense) - net was lower in 2010 compared with 2009, due to a $25 million gain recognized in 2009 related to the tender offers to purchase debt that resulted from reclassifying net gains on related cash flow hedges from AOCI into earnings, partially offset by a $15 million decrease in other-than-temporary impairment charges, primarily due to stronger returns on investments in NDT funds in 2010 and a $7 million increase in interest income from affiliates, primarily due to loans to LKE subsidiaries in 2010.

- Income taxes decreased in 2011 compared with 2010, primarily due to the $196 million impact of lower pre-tax income and a $26 million reduction in deferred tax liabilities related to a change in the Pennsylvania estimated state tax rate. These decreases were partially offset by $74 million in Pennsylvania net operating loss valuation allowance adjustments, primarily related to lower projected future taxable income, driven in part by the impact of bonus depreciation, $13 million

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

in favorable adjustments to uncertain tax benefits recorded in 2010 and an $11 million decrease in the domestic manufacturing deduction tax benefit resulting from revised bonus depreciation estimates.

Income taxes increased in 2010 compared with 2009, primarily due to the $364 million impact of higher pre-tax income, partially offset by a $52 million in Pennsylvania net operating loss valuation allowance adjustments, primarily related to higher projected future taxable income, $10 million in investment tax credits associated with the Holtwood and Rainbow projects, $8 million in favorable adjustments to uncertain tax benefits recorded in 2010 and $8 million of higher tax benefits from the domestic manufacturing deduction.

Income (loss) from International discontinued operations - International, represents the results of PPL Global which was distributed to PPL Energy Supply's parent, PPL Energy Funding in January 2011. See Note 9 to the Financial Statements for additional information. Income from discontinued operations, excluding special items, decreased in 2010 compared with 2009, primarily due to:

- U.K. utility revenues increased $42 million in 2010 compared with 2009, primarily due to price increases in April 2010 and 2009, partially offset by lower regulatory recovery due to a revised estimate of network electricity losses.
- U.K. other operation and maintenance increased $47 million in 2010 compared with 2009, primarily due to higher pension expense resulting from an increase in amortization of actuarial losses.
- U.K. interest expense increased $50 million in 2010 compared with 2009, primarily due to the $23 million impact from higher inflation rates on index-linked Senior Unsecured Notes and $25 million in interest expense related to the March 2010 debt issuance.
- U.K. income taxes decreased $26 million in 2010 compared with 2009, primarily due to $45 million in realized capital losses that offset a gain relating to a business activity sold in 1999 and the $14 million impact of lower pre-tax income, partially offset by $31 million in favorable settlements of uncertain tax positions in 2009.
- U.S. income taxes increased in 2010 compared with 2009, primarily due to $60 million in changes in the taxable amount of planned U.K. cash repatriations, partially offset by $23 million in adjustments to uncertain tax benefits.

The following after-tax amounts, which management considers special items, also impacted the results.

	Income Statement Line Item	2011	2010	2009
Special items gains (losses), net of tax benefit (expense):				
Adjusted energy-related economic activity, net, net of tax of ($52), $85, $158	(a)	$ 72	$ (121)	$ (225)
Sales of assets:				
Maine hydroelectric generation business, net of tax of $0, ($9), ($16) (b)	Disc. Operations		15	22
Sundance indemnification, net of tax of $0, $0, $0	Other Income-net		1	
Long Island generation business, net of tax of $0, $0, $19 (c)	Disc. Operations			(33)
Interest in Wyman Unit 4, net of tax of $0, $0, $2	Disc. Operations			(4)
Impairments:				
Emission allowances, net of tax of $1, $6, $14 (d)	Other O&M	(1)	(10)	(19)
Renewable energy credits, net of tax of $2, $0, $0 (Note 13)	Other O&M	(3)		
Other asset impairments, net of tax of $1, $0, $2	Other O&M			(4)
Workforce reduction, net of tax of $0, $0, $4 (e)	Other O&M			(6)
LKE acquisition-related costs:				
Monetization of certain full-requirement sales contracts, net of tax of $0, $89, $0	(f)		(125)	
Sale of certain non-core generation facilities, net of tax of $0, $37, $0 (c)	Disc. Operations	(2)	(64)	
Reduction of credit facility, net of tax of $0, $4, $0 (g)	Interest Expense		(6)	
Other:				
Montana hydroelectric litigation, net of tax of ($30), $22, $2	(h)	45	(34)	(3)
Litigation settlement - spent nuclear fuel storage, net of tax of ($24), $0, $0 (i)	Fuel	33		
Health care reform - tax impact (j)	Income Taxes		(5)	
Montana basin seepage litigation, net of tax of $0, ($1), $0	Other O&M		2	
Change in tax accounting method related to repairs (k)	Income Taxes			(21)
Counterparty bankruptcy, net of tax of $5, $0, $0 (l)	Other O&M	(6)		
Wholesale supply cost reimbursement, net of tax of ($3), $0, $0	(m)	4		
Total		$ 142	$ (347)	$ (293)

(a) See "Reconciliation of Economic Activity" below.
(b) Gains recorded on the sale of the Maine hydroelectric generation business. See Note 9 to the Financial Statements for additional information.
(c) Consists primarily of the initial impairment charge recorded when the business was classified as held for sale. See Note 9 to the Financial Statements for additional information.
(d) Primarily represents impairment charges of sulfur dioxide emission allowances.
(e) Relates primarily to enhanced pension and severance benefits as a result of a 2009 workforce reduction.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(f) In July 2010, in order to raise additional cash for the LKE acquisition, certain full-requirement sales contracts were monetized that resulted in cash proceeds of $249 million. See "Monetization of Certain Full-Requirement Sales Contracts" in Note 19 to the Financial Statements for additional information. $343 million of pre-tax gains were recorded to "Wholesale energy marketing" and $557 million of pre-tax losses were recorded to "Energy purchases" on the Statements of Income.

(g) In October 2010, PPL Energy Supply made borrowings under its Syndicated Credit Facility in order to enable a subsidiary to make loans to certain affiliates to provide interim financing of amounts required by PPL to partially fund PPL's acquisition of LKE. Subsequent to the repayment of such borrowing, the capacity was reduced, and as a result, PPL Energy Supply wrote off deferred fees in 2010.

(h) In 2009, PPL Montana adjusted its previously recorded accrual related to hydroelectric litigation, of which $5 million, pre-tax, related to prior periods. In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. In 2010, PPL Montana recorded a pre-tax charge of $56 million, representing estimated rental compensation for years prior to 2010, including interest. Of this total charge $47 million, pre-tax, was recorded to "Other operation and maintenance" and $9 million, pre-tax, was recorded to "Interest Expense" on the Statements of Income. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition. In February 2012, the U.S. Supreme Court overturned the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. Prior to the U.S. Supreme Court decision, $4 million, pre-tax, of interest expense on the rental compensation covered by the court decision was accrued in 2011. As a result of the U.S. Supreme Court decision, PPL Montana reversed its total pre-tax loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision, of which $79 million pre-tax is considered a special item because it represented $65 million of rent for periods prior to 2011 and $14 million of interest accrued on the portion covered by the prior court decision. These amounts were credited to "Other operation and maintenance" and "Interest Expense" on the Statement of Income.

(i) In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna plant. PPL Susquehanna recorded credits to fuel expense to recognize recovery, under the settlement agreement, of certain costs to store spent nuclear fuel at the Susquehanna plant. This special item represents amounts recorded in 2011 to cover the costs incurred from 1998 through December 2010.

(j) Represents income tax expense recorded as a result of the provisions within Health Care Reform which eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage.

(k) During 2009, PPL Energy Supply received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Energy Supply deducted the resulting IRC Sec. 481 amount on its 2008 federal income tax return and recorded a $21 million adjustment to federal and state income tax expense resulting from the reduction in federal income tax benefits related to the domestic manufacturing deduction and certain state tax benefits related to state net operating losses.

(l) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. The customer has continued to purchase electricity at the price specified in the supply contract, and has made timely payments for such purchases, but at lower volumes than as prescribed in the contract. As of December 31, 2011, the damage claim totaled $11 million pre-tax, which was fully reserved.

(m) In January 2012, PPL received $7 million pre-tax, related to electricity delivered to a wholesale customer in 2008 and 2009, recorded in "Wholesale energy marketing-Realized." The additional revenue results from several transmission projects approved at PJM for recovery that were not initially anticipated at the time of the electricity auctions and therefore were not included in the auction pricing. A FERC order was issued in 2011 approving the disbursement of these supply costs by the wholesale customer to the suppliers, therefore, PPL accrued its share of this additional revenue in 2011.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 19 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net."

	2011	2010	2009
Operating Revenues			
Unregulated retail electric and gas	$ 31	$ 1	$ 6
Wholesale energy marketing	1,407	(805)	(229)
Operating Expenses			
Fuel	6	29	49
Energy Purchases	(1,123)	286	(155)
Energy-related economic activity (a)	321	(489)	(329)
Option premiums (b)	19	32	(54)
Adjusted energy-related economic activity	340	(457)	(383)
Less: Unrealized economic activity associated with the monetization of certain full-requirement sales contracts in 2010 (c)		(251)	
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010	216		
Adjusted energy-related economic activity, net, pre-tax	$ 124	$ (206)	$ (383)
Adjusted energy-related economic activity, net, after-tax	$ 72	$ (121)	$ (225)

(a) See Note 19 to the Financial Statements for additional information.

(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statements of Income.

(c) See "Components of Monetization of Certain Full-Requirement Sales Contracts" below.

Components of Monetization of Certain Full-Requirement Sales Contracts

The following table provides the components of the "Monetization of Certain Full-Requirement Sales Contracts" special item.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2010
Full-requirement sales contracts monetized (a)	$ (68)
Economic activity related to the full-requirement sales contracts monetized	(146)
Monetization of certain full-requirement sales contracts, pre-tax (b)	$ (214)
Monetization of certain full-requirement sales contracts, after-tax	$ (125)

(a) See "Commodity Price Risk (Non-trading) - Monetization of Certain Full-Requirement Sales Contracts" in Note 19 to the Financial Statements for additional information.
(b) Includes unrealized losses of $251 million, which are reflected in "Wholesale energy marketing - Unrealized economic activity" and "Energy purchases - Unrealized economic activity" on the Statement of Income. Also includes net realized gains of $37 million, which are reflected in "Wholesale energy marketing - Realized" and "Energy purchases - Realized" on the Statement of Income. This economic activity will continue to be realized through May 2013.

2012 Outlook

Excluding special items, PPL Energy Supply projects lower earnings in 2012 compared with 2011. The decrease is primarily driven by lower energy margins as a result of further declines in energy and capacity prices and higher fuel costs, higher operation and maintenance expenses and higher depreciation, which are partially offset by higher baseload generation.

Earnings beyond 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7 and Note 15 to the Financial Statements for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Unregulated Gross Energy Margins." "Unregulated Gross Energy Margins" is a single financial performance measure of PPL Energy Supply's competitive energy non-trading and trading activities. In calculating this measure, PPL Energy Supply's energy revenues, which include operating revenues associated with certain PPL Energy Supply businesses that are classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, which is recorded in "Taxes, other than income," and operating expenses associated with certain PPL Energy Supply businesses that are classified as discontinued operations. This performance measure is relevant to PPL Energy Supply due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant swings in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are recorded in "Wholesale energy marketing to affiliate" revenue. PPL Energy Supply excludes from "Unregulated Gross Energy Margins" energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL Energy Supply's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in this energy-related economic activity is the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in unregulated gross energy margins over the delivery period that was hedged or upon realization. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Energy Supply believes that "Unregulated Gross Energy Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage PPL Energy Supply's operations, analyze actual results compared with budget and measure certain corporate financial goals used in determining variable compensation.

Reconciliation of Non-GAAP Financial Measures

The following table reconciles "Operating Income" to "Unregulated Gross Energy Margins" as defined by PPL Energy Supply for the period ended December 31.

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

(c) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements. For 2011, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include a net pre-tax gain of $19 million related to the amortization of option premiums and a net pre-tax loss of $216 million related to the monetization of certain full-requirement sales contracts. 2010 includes a net pre-tax gain of $32 million related to the amortization of option premiums and a net pre-tax gain of $37 million related to the monetization of certain full-requirement sales contracts. 2009 includes a net pre-tax loss of $54 million related to the amortization of option premiums.

(d) Represents energy-related economic activity, which is subject to wide swings in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements.

(e) Includes economic activity related to fuel. 2011 includes credits of $57 million for the spent nuclear fuel litigation settlement.

(f) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

Unregulated Gross Energy Margins are generated through PPL Energy Supply's competitive non-trading and trading activities. PPL Energy Supply's non-trading energy business is managed on a geographic basis that is aligned with its generation fleet. The following table shows PPL Energy Supply's non-GAAP financial measure, Unregulated Gross Energy Margins, for the periods ended December 31, as well as the change between periods. The factors that gave rise to the changes are described below the table.

	2011	2010	Change	2010	2009	Change
Non-trading						
Eastern U.S.	$ 2,018	$ 2,429	$ (411)	$ 2,429	$ 1,391	$ 1,038
Western U.S.	349	339	10	339	323	16
Net energy trading	(2)	2	(4)	2	17	(15)
Total	$ 2,365	$ 2,770	$ (405)	$ 2,770	$ 1,731	$ 1,039

Unregulated Gross Energy Margins

Eastern U.S.

The changes in Eastern U.S. non-trading margins were:

	2011 vs. 2010	2010 vs. 2009
Baseload energy, capacity and ancillaries (a)	$ (199)	$ 1,143
Coal and hydroelectric generation volume (b)	(72)	21
Impact of non-core generation facilities sold in the first quarter of 2011	(48)	
Monetization of certain deals that rebalanced the business and portfolio	(41)	(48)
Higher coal prices	(40)	(38)
Margins on the intermediate and peaking units (c)	(34)	17
Nuclear generation volume (d)	(29)	(32)
Higher nuclear fuel prices	(10)	(8)
Retail electric business	(7)	23
Full-requirement sales contracts (e)	70	(46)
Other	(1)	6
	$ (411)	$ 1,038

(a) Baseload energy and capacity prices were lower in 2011 than 2010; however, prices in 2010 for baseload generation were significantly higher than prices realized under the PLR contract with PPL Electric that expired at the end of 2009.

(b) Volumes were lower in 2011 compared with 2010 as a result of unplanned outages, economic reductions in coal unit output and the sale of our interest in Safe Harbor Water Power Corporation. Volumes were higher in 2010 compared with 2009 as a result of planned overhauls.

(c) Lower margins in 2011 compared with 2010 were driven by lower capacity prices, partially offset by higher generation volumes in the first half of 2011. Higher margins in 2010 compared with 2009 were due to higher energy and capacity prices.

(d) Volumes were lower in 2011 compared with 2010 primarily as a result of the dual-unit turbine blade replacement outages beginning in May 2011. Volumes were lower in 2010 compared with 2009 primarily due to an unplanned outage in July 2010.

(e) Higher margins in 2011 compared with 2010 were driven by contracts monetized in 2010 and lower customer migration to alternative suppliers in 2011. Lower margins in 2010 compared with 2009 were driven by lower customer demand and higher customer migration to alternative suppliers.

Western U.S.

Western U.S. non-trading margins were higher in 2011 compared with 2010, due to higher net wholesale prices of $58 million, partially offset by lower wholesale volumes of $45 million, primarily due to economic reductions in coal unit output.

Western U.S. non-trading margins were higher in 2010 compared with 2009, primarily due to higher net wholesale prices of $11 million and higher wholesale volumes of $14 million, due to unplanned outages in 2009.

Net Energy Trading Margins

Net energy trading margins decreased during 2011 compared with 2010, as a result of lower margins on power positions of $16 million, partially offset by higher margins on gas positions of $12 million.

Net energy trading margins decreased during 2010 compared with 2009, as a result of lower margins on power and gas positions of $40 million, partially offset by higher trading margins related to FTRs of $22 million.

Other Operation and Maintenance

The changes in other operation and maintenance expenses were due to:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. 	2011 vs. 2010	2010 vs. 2009
Montana hydroelectric litigation (a)	$ (121)	$ 48
Susquehanna nuclear plant costs (b)	30	31
Uncollectible accounts (c)	15	3
Costs at Western fossil and hydroelectric plants (d)	15	(7)
Costs at Eastern fossil and hydroelectric plants (e)	20	(4)
Impacts from emission allowances (f)	(15)	(16)
Workforce reductions (g)		(10)
Other	6	13
Total	$ (50)	$ 58

(a) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded a charge of $56 million, representing estimated rental compensation for the first quarter of 2010 and prior years, including interest. The portion of the total charge recorded to "Other operation and maintenance" on the Statement of Income totaled $49 million. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition. In February 2012, the U.S. Supreme Court overturned the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, PPL Montana reversed its total loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision, of which $75 million was credited to "Other operation and maintenance" on the Statement of Income.

(b) 2011 compared with 2010 was higher primarily due to $11 million of higher payroll-related costs, $10 million of higher outage costs and $8 million of higher costs from the refueling outage. 2010 compared with 2009 was higher primarily due to $10 million of higher payroll-related costs, $8 million of higher outage costs and $5 million higher project costs.

(c) 2011 compared with 2010, was higher primarily due to SMGT filing for protection under Chapter 11 of the U.S. Bankruptcy Code, $11 million of damages billed to SMGT were fully reserved.

(d) 2011 compared with 2010 was higher primarily due to $11 million of lower insurance proceeds. 2010 compared with 2009 was lower primarily due to $13 million of higher insurance proceeds.

(e) 2011 compared with 2010 was higher primarily due to plant outage costs of $13 million.

(f) 2011 compared with 2010 was lower due to lower impairment charges of sulfur dioxide emission allowances. 2010 compared with 2009 was lower primarily due to lower impairment charges of sulfur dioxide emission allowances.

(g) Represents the charge related to the February 2009, announcement of workforce reductions that resulted in the elimination of certain management and staff positions.

Depreciation

Depreciation increased by $8 million in 2011 compared with 2010, primarily due to PP&E additions. Depreciation increased by $40 million in 2010 compared with 2009. Of the $40 million increase, $21 million was primarily due to the completion of environmental projects at Brunner Island in 2009 and 2010.

Taxes, Other Than Income

Taxes, other than income increased by $25 million in 2011 compared with 2010 primarily due to $16 million of higher Pennsylvania gross receipts tax expense as a result of an increase in retail electricity sales by PPL EnergyPlus. This tax is included in "Unregulated Gross Energy Margins." The increase also includes $8 million of higher Pennsylvania capital stock tax due in part to the expiration of the Keystone Opportunity Zone credit in 2010 and an agreed to change in a capital stock tax filing position with the state.

Taxes, other than income increased by $17 million in 2010 compared with 2009, primarily due to an increase in retail electricity sales by PPL EnergyPlus.

Other Income (Expense) - net

The $22 million decrease in other income (expense) - net in 2010 compared with 2009 was primarily attributable to PPL Energy Supply's $25 million gain on tender offers to purchase up to $250 million aggregate principal amount of certain of its outstanding senior notes including net gains on related cash flow hedges that were reclassified from AOCI into earnings in 2009.

Other-Than-Temporary Impairments

Other-than-temporary impairments decreased by $15 million in 2010 compared with 2009, primarily due to stronger returns on NDT investments caused by market fluctuations within the financial markets.

Interest Income from Affiliates

Interest income from affiliates increased by $7 million in 2010 compared with 2009, primarily due to loans to LKE subsidiaries, which have been fully repaid as of December 31, 2010.

Interest Expense

The changes in interest expense were due to:

	2011 vs. 2010	2010 vs. 2009
Capitalized interest	$ (16)	$ 12
Net amortization of debt discounts, premiums and issuance costs	(3)	12
Montana hydroelectric litigation (a)	(20)	10
Short-term debt interest expense	7	
Other	(2)	(2)
Total	$ (34)	$ 32

(a) In March 2010, the Montana Supreme Court substantially affirmed a June 2008 Montana District Court decision regarding lease payments for the use of certain Montana streambeds. As a result, in the first quarter of 2010, PPL Montana recorded $7 million of interest expense on rental compensation covered by the court decision. In August 2010, PPL Montana filed a petition for a writ of certiorari with the U.S. Supreme Court requesting the Court's review of this matter. In June 2011, the U.S. Supreme Court granted PPL Montana's petition. Oral argument was held in December 2011. PPL Montana continued to accrue interest expense on the rental compensation covered by the court decision. In February 2012, the U.S. Supreme Court overturned the Montana Supreme Court decision and remanded the case to the Montana Supreme Court for further proceedings consistent with the U.S. Supreme Court's opinion. As a result, PPL Montana reversed its total loss accrual of $89 million, which had been recorded prior to the U.S. Supreme Court decision, of which $14 million was credited to "Interest Expense" on the Statement of Income.

Income Taxes

The changes in income taxes were due to:

	2011 vs. 2010	2010 vs. 2009
Higher (lower) pre-tax book income	$ 134	$ 356
State valuation allowance adjustments (a)	74	(52)
State deferred tax rate change (b)	(26)	
Federal income tax credits	(2)	(10)
Domestic manufacturing deduction (c) (d)	11	(8)
Federal and state tax reserve adjustments	13	(8)
Federal and state tax return adjustments (d)	(16)	(29)
Health Care Reform (e)	(5)	5
Other	1	4
	$ 184	$ 258

(a) During 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for Federal income tax purposes. Due to the decrease in taxable income related to bonus depreciation and a decrease in projected future taxable income, PPL Energy Supply recorded $22 million in state deferred income tax expense related to deferred tax valuation allowances during 2011.

Pennsylvania H.B. 1531, enacted in October 2009, increased the net operating loss limitation to 20% of taxable income for tax years beginning in 2010. Based on the projected revenue increase related to the expiration of the generation rate caps, PPL Energy Supply recorded a $52 million state deferred income tax benefit related to the reversal of deferred tax valuation allowances over the remaining carry forward period of the net operating losses during 2010.

(b) During 2011, PPL Energy Supply completed the sale of certain non-core generating assets (see Note 9 to the Financial Statements for additional information). Due to changes in state apportionment resulting in the reduction in the future estimated state tax rate, PPL Energy Supply recorded a deferred tax benefit related to its December 31, 2011 state deferred tax liabilities.

(c) During 2010, PPL Energy Supply recorded an increase in tax benefits related to domestic manufacturing deductions due to an increase in domestic taxable income resulting from the expiration of Pennsylvania generation rate caps in 2010. In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation deduction related to bonus depreciation significantly reduced the tax benefits related to domestic manufacturing deductions during 2010 and eliminated the tax benefit in 2011.

(d) During 2011, PPL recorded $22 million in federal and state tax benefits related to the filing of the 2010 federal and state income tax returns. Of that amount, $7 million in tax benefits relate to an additional domestic manufacturing deduction resulting from revised bonus depreciation amounts.

During 2009, PPL Energy Supply received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Energy Supply deducted the resulting IRC Sec. 481 adjustment on its 2008 federal income tax return and recorded a $21 million adjustment to federal and state income tax expense resulting from the reduction in federal income tax benefits related to the domestic manufacturing deduction and certain state tax benefits related to state net operating losses.

(e) Beginning in 2013, provisions within Health Care Reform eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage. As a result, PPL Energy Supply recorded deferred income tax expense during 2010.

See Note 5 to the Financial Statements for additional information on income taxes.

Discontinued Operations

Income (Loss) from Discontinued Operations (net of income taxes) decreased by $240 million in 2011 compared with 2010 and by $21 million in 2010 compared with 2009. The decrease in 2011 compared with 2010 was primarily due to the presentation of PPL Global as Discontinued Operations as a result of the January 2011 distribution by PPL Energy Supply of its membership interest in PPL Global to its parent, PPL Energy Funding. In 2011, the results of PPL Global are no longer consolidated within PPL Energy Supply. The decrease in 2010 compared with 2009 was primarily attributable to after-tax

Past financial performance is no guarantee of future results.

impairment charges recorded in 2010 totaling $62 million related to assets associated with certain non-core generation facilities, which were sold in 2011, that were written down to their estimated fair value (less cost to sell). The impacts of these charges were offset by the net results of certain other discontinued operations. See Note 9 to the Financial Statements for additional information.

Financial Condition

Liquidity and Capital Resources

PPL Energy Supply expects to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents and its credit facilities.

PPL Energy Supply's cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- changes in electricity, fuel and other commodity prices;
- operational and credit risks associated with selling and marketing products in the wholesale power markets;
- potential ineffectiveness of the trading, marketing and risk management policy and programs used to mitigate PPL Energy Supply's risk exposure to adverse changes in electricity and fuel prices, interest rates and counterparty credit;
- reliance on transmission and distribution facilities that PPL Energy Supply does not own or control to deliver its electricity and natural gas;
- unavailability of generating units (due to unscheduled or longer-than-anticipated generation outages, weather and natural disasters) and the resulting loss of revenues and additional costs of replacement electricity;
- costs of compliance with existing and new environmental laws and with new security and safety requirements for nuclear facilities;
- any adverse outcome of legal proceedings and investigations with respect to PPL Energy Supply's current and past business activities;
- deterioration in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and
- a downgrade in PPL Energy Supply's or its rated subsidiaries' credit ratings that could adversely affect their ability to access capital and increase the cost of credit facilities and any new debt.

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties affecting PPL Energy Supply's cash flows.

At December 31, PPL Energy Supply had the following:

	2011	2010	2009
Cash and cash equivalents	$ 379	$ 661	$ 245
Short-term debt	$ 400	$ 531	$ 639

The changes in PPL Energy Supply's cash and cash equivalents position resulted from:

	2011	2010	2009
Net cash provided by operating activities	$ 776	$ 1,840	$ 1,413
Net cash provided by (used in) investing activities	(668)	(825)	(551)
Net cash provided by (used in) financing activities	(390)	(612)	(1,081)
Effect of exchange rates on cash and cash equivalents		13	
Net Increase (Decrease) in Cash and Cash Equivalents	$ (282)	$ 416	$ (219)

Operating Activities

Net cash provided by operating activities decreased by 58%, or $1.1 billion, in 2011 compared with 2010. This was primarily due to lower gross energy margins of $240 million, after-tax, proceeds from monetizing certain full-requirements sales contracts in 2010 of $249 million, a reduction in cash from counter party collateral of $172 million, increases in other operating outflows of $200 million (including higher operation and maintenance expenses and defined benefits funding of $123 million) and the loss of operating cash from PPL Global ($203 million for 2010). In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent, PPL Energy Funding. See Note 9 to the Financial Statements for additional information on the distribution.

Past financial performance is no guarantee of future results.

Net cash provided by operating activities increased by 30%, or $427 million, in 2010 compared with 2009. The expiration of the long-term power purchase agreements between PPL Electric and PPL EnergyPlus at the end of 2009 enabled PPL EnergyPlus to sell power at higher market prices and had a positive impact on net income, and specifically on "unregulated gross energy margins" which increased over $600 million, after-tax, in 2010 compared with 2009, and therefore, was the primary driver to the above increase. The positive impact of additional earnings was partially offset by a reduction in the amount of counterparty collateral received and by additional defined benefit plan contributions. In addition, changes in working capital in 2010 compared with 2009 offset the $300 million impact of cash collateral received from PPL Electric in 2009 as discussed below.

A significant portion of PPL Energy Supply's operating cash flows is derived from its baseload generation business activities. PPL Energy Supply employs a formal hedging program for its competitive baseload generation fleet, the primary objective of which is to provide a reasonable level of near-term cash flow and earnings certainty while preserving upside potential of power price increases over the medium term. See Note 19 to the Financial Statements for further discussion. Despite PPL Energy Supply's hedging practices, future cash flows from operating activities are influenced by commodity prices and therefore, will fluctuate from period to period.

PPL Energy Supply's contracts for the sale and purchase of electricity and fuel often require cash collateral or other credit enhancements, or reductions or terminations of a portion of the entire contract through cash settlement, in the event of a downgrade of PPL Energy Supply's or its subsidiary's credit ratings or adverse changes in market prices. For example, in addition to limiting its trading ability, if PPL Energy Supply's or its subsidiary's ratings were lowered to below "investment grade" and there was a 10% adverse movement in energy prices, PPL Energy Supply estimates that, based on its December 31, 2011 positions, it would have had to post additional collateral of approximately $351 million with respect to electricity and fuel contracts. PPL Energy Supply has in place risk management programs that are designed to monitor and manage its exposure to volatility of cash flows related to changes in energy and fuel prices, interest rates, foreign currency exchange rates, counterparty credit quality and the operating performance of its generating units.

Investing Activities

The primary use of cash in investing activities is capital expenditures. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2012 through 2016.

Net cash used in investing activities decreased $157 million in 2011 compared with 2010, primarily as a result of a decrease of $348 million in capital expenditures and a $219 million increase in the proceeds received from the sale of businesses, which are discussed in Note 9 to the Financial Statements. The decrease in cash used in investing activities from the above items was partially offset by an increase of $198 million related to notes receivable from affiliates and $212 million from changes in restricted cash and cash equivalents.

Net cash used in investing activities increased $274 million in 2010 compared with 2009, primarily as a result of a decrease of $154 million from proceeds from the sale of other investments, a change of $135 million from restricted cash and cash equivalents, and an increase of $102 million in capital expenditures. The increase in cash used in investing activities from the above items was partially offset by $81 million in proceeds received from the sale of businesses, which are discussed in Note 9 to the Financial Statements, and a change of $28 million in other investing activities.

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding. See Note 9 to the Financial Statements for additional information. Excluding PPL Global, PPL Energy Supply's net cash used in investing activities was $544 million and $308 million for 2010 and 2009.

Financing Activities

Net cash used in financing activities was $390 million in 2011 compared with $612 million in 2010 and $1.1 billion in 2009. The decrease from 2010 to 2011 primarily reflects lower net distributions to Member, partially offset by lower net issuances of long-term debt and the distribution of cash included in the net assets of PPL Global to PPL Energy Funding. The change from 2009 to 2010 primarily reflects more long-term debt issuances, increased contributions from and distributions to Member, and less short-term borrowings in 2010.

In 2011, cash used in financing activities primarily consisted of a $325 million distribution of cash included in the net assets of PPL Global to PPL Energy Funding, $316 million in distributions to Member, and net debt retirements of $200 million, partially offset by $461 million in contributions from Member.

In 2010, cash used in financing activities primarily consisted of $4.7 billion in distributions to Member, partially offset by $3.6 billion in contributions from Member and net debt issuances of $509 million. The distributions to and contributions

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

from Member during 2010 primarily relate to the funds received by PPL in June 2010 from the issuance of common stock and 2010 Equity Units. These funds were invested by a subsidiary of PPL Energy Supply until they were returned to its Member in October 2010 to be available to partially fund PPL's acquisition of LKE and pay certain acquisition-related fees and expenses.

In 2009, cash used in financing activities primarily consisted of $943 million in distributions to Member and net debt retirements of $177 million, partially offset by $50 million in contributions from Member.

See "Forecasted Sources of Cash" for a discussion of PPL Energy Supply's plans to issue debt securities, as well as a discussion of credit facility capacity available to PPL Energy Supply. Also see "Forecasted Uses of Cash" for information regarding maturities of PPL Energy Supply's long-term debt.

PPL Energy Supply's debt financing activity in 2011 was:

	Issuances (a)	Retirements
PPL Energy Supply Senior Unsecured Notes	$ 500	$ (750)
PPL Energy Supply short-term debt, net increase	50	
Total	$ 550	$ (750)
Net decrease	$ (200)	

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.

See Note 7 to the Financial Statements for more detailed information regarding PPL Energy Supply's financing activities in 2011.

Forecasted Sources of Cash

PPL Energy Supply expects to continue to have sufficient sources of cash available in the near term, including various credit facilities, operating leases and contributions from Member.

Credit Facilities

At December 31, 2011, PPL Energy Supply's total committed borrowing capacity under credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backup	Unused Capacity
Syndicated Credit Facility (a)	$ 3,000	$	$ 541	$ 2,459
Letter of Credit Facility	200	n/a	89	111
Total PPL Energy Supply Credit Facilities (b)	$ 3,200	$	$ 630	$ 2,570

(a) In October 2011, PPL Energy Supply amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility, PPL Energy Supply continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit. This facility contains a financial covenant requiring PPL Energy Supply's debt to total capitalization not to exceed 65%, as calculated in accordance with the facility, and other customary covenants.

(b) In March 2011, PPL Energy Supply's $300 million Structured Credit Facility expired. PPL Energy Supply's obligations under this facility were supported by a $300 million letter of credit issued on PPL Energy Supply's behalf under a separate, but related $300 million 5-year credit agreement, which also expired in March 2011.

The commitments under PPL Energy Supply's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 11% of the total committed capacity.

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to its parent, PPL Energy Funding. See Note 9 to the Financial Statements for additional information.

In addition to the financial covenants noted above, the credit agreements governing the above credit facilities contain various other covenants. Failure to comply with the covenants after applicable grace periods could result in acceleration of repayment of borrowings and/or termination of the agreements. PPL Energy Supply monitors compliance with the covenants

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

on a regular basis. At December 31, 2011, PPL Energy Supply was in compliance with these covenants. At this time, PPL Energy Supply believes that these covenants and other borrowing conditions will not limit access to these funding sources.

See Note 7 to the Financial Statements for further discussion of PPL Energy Supply's credit facilities.

Commercial Paper

In October 2011, PPL Energy Supply re-activated its $500 million commercial paper program to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At December 31, 2011, PPL Energy Supply had $400 million of commercial paper outstanding at a weighted-average interest rate of approximately 0.53%.

Operating Leases

PPL Energy Supply and its subsidiaries also have available funding sources that are provided through operating leases. PPL Energy Supply's subsidiaries lease office space, land, buildings and certain equipment. These leasing structures provide PPL Energy Supply additional operating and financing flexibility. The operating leases contain covenants that are typical for these agreements, such as maintaining insurance, maintaining corporate existence and timely payment of rent and other fees.

PPL Energy Supply, through its subsidiary PPL Montana, leases a 50% interest in Colstrip Units 1 and 2 and a 30% interest in Unit 3, under four 36-year, non-cancelable operating leases. These operating leases are not recorded on PPL Energy Supply's Balance Sheets. The leases place certain restrictions on PPL Montana's ability to incur additional debt, sell assets and declare dividends. At this time, PPL Energy Supply believes that these restrictions will not limit access to these funding sources or cause acceleration or termination of the leases.

See Note 11 to the Financial Statements for further discussion of the operating leases.

Long-term Debt Securities and Contributions from Member

PPL Energy Supply does not currently plan to issue long-term debt securities in 2012.

From time to time, PPL Energy Supply's Member, PPL Energy Funding, makes capital contributions to PPL Energy Supply. PPL Energy Supply uses these contributions for general corporate purposes.

Forecasted Uses of Cash

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, PPL Energy Supply currently expects to incur future cash outflows for capital expenditures, various contractual obligations, distributions to its Member and possibly the purchase or redemption of a portion of its debt securities.

Capital Expenditures

The table below shows PPL Energy Supply's current capital expenditure projections for the years 2012 through 2016.

	Projected				
	2012	2013	2014	2015	2016
Construction expenditures (a) (b)					
Generating facilities	$ 528	$ 357	$ 262	$ 234	$ 285
Environmental	83	90	66	49	30
Other	37	40	36	33	32
Total Construction Expenditures	648	487	364	316	347
Nuclear fuel (c)	160	172	170	173	174
Total Capital Expenditures	$ 808	$ 659	$ 534	$ 489	$ 521

(a) Construction expenditures include capitalized interest, which is expected to be approximately $134 million for the years 2012 through 2016.
(b) Includes expenditures for certain intangible assets.
(c) Nuclear fuel expenditures include capitalized interest, which is expected to be approximately $25 million for the years 2012 through 2016.

PPL Energy Supply's capital expenditure projections for the years 2012 through 2016 total approximately $3.0 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes projected costs related to the planned 191 MW of incremental capacity increases. See Note 8 to the Financial Statements for information regarding the significant development projects.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL Energy Supply plans to fund its capital expenditures in 2012 with cash on hand and cash from operations.

Contractual Obligations

PPL Energy Supply has assumed various financial obligations and commitments in the ordinary course of conducting its business. At December 31, 2011, the estimated contractual cash obligations of PPL Energy Supply were:

	Total	2012	2013 - 2014	2015 - 2016	After 2016
Long-term Debt (a)	$ 3,023		$ 1,037	$ 650	$ 1,336
Interest on Long-term Debt (b)	1,206	$ 178	300	185	543
Operating Leases (c)	709	104	218	149	238
Purchase Obligations (d)	4,010	1,014	1,217	681	1,098
Other Long-term Liabilities Reflected on the Balance Sheet under GAAP (e) (f)	74	74			
Total Contractual Cash Obligations	$ 9,022	$ 1,370	$ 2,772	$ 1,665	$ 3,215

(a) Reflects principal maturities only based on stated maturity dates, except for the 5.70% REset Put Securities (REPS). See Note 7 to the Financial Statements for a discussion of the remarketing feature related to the REPS, as well as discussion of variable-rate remarketable bonds. PPL Energy Supply does not have any significant capital lease obligations.

(b) Assumes interest payments through stated maturity, except for the REPS, for which interest is reflected to the put date. The payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated.

(c) See Note 11 to the Financial Statements for additional information.

(d) The amounts include agreements to purchase goods or services that are enforceable and legally binding and specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Primarily includes PPL Energy Supply's purchase obligations of electricity, coal, nuclear fuel and limestone as well as certain construction expenditures, which are also included in the Capital Expenditures table presented above. Financial swaps and open purchase orders that are provided on demand with no firm commitment are excluded from the amounts presented. In prior years, PPL included certain energy purchase obligations based on forecasted amounts to be purchased. The amounts presented herein are based on actual contract terms.

(e) The amounts represent contributions made or committed to be made for 2012 for PPL's and PPL Energy Supply's U.S. pension plans. See Note 13 to the Financial Statements for a discussion of expected contributions.

(f) At December 31, 2011, total unrecognized tax benefits of $28 million were excluded from this table as PPL Energy Supply cannot reasonably estimate the amount and period of future payments. See Note 5 to the Financial Statements for additional information.

Distributions to Member

From time to time, as determined by its Board of Managers, PPL Energy Supply makes return of capital distributions to its Member. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to PPL Energy Supply's parent at a book value of approximately $1.3 billion, which included $325 million of cash and cash equivalents. See Note 9 to the Financial Statements for additional information.

Purchase or Redemption of Debt Securities

PPL Energy Supply will continue to evaluate its outstanding debt securities and may decide to purchase or redeem these securities depending upon prevailing market conditions and available cash.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of PPL Energy Supply and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Energy Supply and its subsidiaries are based on information provided by PPL Energy Supply and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL Energy Supply or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL Energy Supply's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act PPL Energy Supply is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL Energy Supply's ratings, but without stating what ratings have been assigned to PPL Energy Supply or its subsidiaries, or their securities. The ratings assigned by the rating agencies to PPL Energy Supply and its subsidiaries and their respective securities may be found, without charge, on each of the

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to PPL Energy Supply and its subsidiaries in 2011.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed its ratings for PPL Energy Supply;
- S&P revised the outlook and lowered the issuer and senior unsecured ratings of PPL Energy Supply; and
- Fitch affirmed its ratings for PPL Energy Supply.

In April 2011, following the completion of PPL's acquisition of WPD Midlands, S&P revised the outlook and affirmed its ratings for PPL Energy Supply.

In May 2011, Fitch affirmed its rating and maintained its outlook for PPL Montana's Pass Through Certificates due 2020.

In September 2011, Moody's affirmed its senior unsecured debt rating and outlook for PPL Energy Supply.

Also in September 2011, S&P assigned a short-term rating to PPL Energy Supply's commercial paper program.

In October 2011, Moody's and Fitch also assigned a short-term rating to PPL Energy Supply's commercial paper program in support of PPL Energy Supply's re-opening of the program.

In November 2011, Fitch affirmed its rating and revised its outlook to negative from stable for PPL Montana's Pass Through Certificates due 2020.

In December 2011, Fitch affirmed the Issuer Default Ratings and individual security ratings of PPL Energy Supply.

In January 2012, S&P affirmed its rating and revised its outlook to stable from positive for PPL Montana's Pass Through Certificates due 2020.

Ratings Triggers

PPL Energy Supply has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate instruments, which contain provisions requiring PPL Energy Supply to post additional collateral, or permit the counterparty to terminate the contract, if PPL Energy Supply's credit rating were to fall below investment grade. See Note 19 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at December 31, 2011. At December 31, 2011, if PPL Energy Supply's credit rating had been below investment grade, PPL Energy Supply would have been required to prepay or post an additional $391 million of collateral to counterparties for both derivative and non-derivative commodity and commodity-related contracts used in its generation, marketing and trading operations and interest rate contracts.

Guarantees for Subsidiaries

PPL Energy Supply guarantees certain consolidated affiliate financing arrangements that enable certain transactions. Some of the guarantees contain financial and other covenants that, if not met, would limit or restrict the consolidated affiliates' access to funds under these financing arrangements, require early maturity of such arrangements or limit the consolidated affiliates' ability to enter into certain transactions. At this time, PPL Energy Supply believes that these covenants will not limit access to relevant funding sources. See Note 15 to the Financial Statements for additional information about guarantees.

Off-Balance Sheet Arrangements

PPL Energy Supply has entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management - Energy Marketing & Trading and Other

Market Risk

See Notes 1, 18, and 19 to the Financial Statements for information about PPL Energy Supply's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses at a given confidence level.

Commodity Price Risk (Non-trading)

PPL Energy Supply segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. The fair value of economic positions at December 31, 2011 and 2010 was a net liability of $63 million and $389 million. See Note 19 to the Financial Statements for additional information on hedge and economic activity.

To hedge the impact of market price volatility on PPL Energy Supply's energy-related assets, liabilities and other contractual arrangements, PPL Energy Supply both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL Energy Supply's non-trading commodity derivative contracts mature at various times through 2019.

The following table sets forth the changes in net fair value of PPL Energy Supply's non-trading commodity derivative contracts. See Notes 18 and 19 to the Financial Statements for additional information.

	Gains (Losses)	
	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 958	$ 1,280
Contracts realized or otherwise settled during the period	(523)	(490)
Fair value of new contracts entered into during the period (a)	13	(5)
Changes in fair value attributable to changes in valuation techniques (b)		(23)
Other changes in fair value	634	196
Fair value of contracts outstanding at the end of the period	$ 1,082	$ 958

(a) Represents the fair value of contracts at the end of the quarter of their inception.

(b) In June 2010, PPL Energy Supply received market bids for certain full-requirement sales contracts that were monetized in early July. See Note 19 to the Financial Statements for additional information. At June 30, 2010, these contracts were valued based on the bids received (the market approach). In prior periods, the fair value of these contracts was measured using the income approach.

The following table segregates the net fair value of PPL Energy Supply's non-trading commodity derivative contracts at December 31, 2011, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Source of Fair Value					
Prices quoted in active markets for identical instruments	$ 1				$ 1
Prices based on significant other observable inputs	713	$ 342	$ (1)	$ 15	1,069
Prices based on significant unobservable inputs	13	(3)	2		12
Fair value of contracts outstanding at the end of the period	$ 727	$ 339	$ 1	$ 15	$ 1,082

PPL Energy Supply sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL Energy Supply were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties with which it has energy contracts and other factors could affect PPL Energy Supply's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL Energy Supply attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL Energy Supply's trading commodity derivative contracts mature at various times through 2015. The following table sets forth changes in the net fair value of PPL Energy Supply's trading commodity derivative contracts. See Notes 18 and 19 to the Financial Statements for additional information.

	Gains (Losses)	
	2011	2010
Fair value of contracts outstanding at the beginning of the period	$ 4	$ (6)
Contracts realized or otherwise settled during the period	(14)	(12)
Fair value of new contracts entered into during the period (a)	10	39
Other changes in fair value	(4)	(17)
Fair value of contracts outstanding at the end of the period	$ (4)	$ 4

(a) Represents the fair value of contracts at the end of the quarter of their inception.

Unrealized losses of approximately $2 million will be reversed over the next three months as the transactions are realized.

The following table segregates the net fair value of PPL Energy Supply's trading commodity derivative contracts at December 31, 2011, based on whether the fair value was determined by prices quoted in active markets for identical instruments or other more subjective means.

	Net Asset (Liability)				
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Source of Fair Value					
Prices quoted in active markets for identical instruments	$ 1				$ 1
Prices based on significant other observable inputs	(18)	$ 11	$ 1		(6)
Prices based on significant unobservable inputs	1				1
Fair value of contracts outstanding at the end of the period	$ (16)	$ 11	$ 1		$ (4)

VaR Models

PPL Energy Supply utilizes a VaR model to measure commodity price risk in unregulated gross energy margins for its non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. PPL Energy Supply calculates VaR using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's conservative hedging program, PPL's non-trading VaR exposure is expected to be limited in the short term. At December 31, 2011 and December 31, 2010, the VaR for PPL Energy Supply's portfolios using end-of-month results for the period was as follows.

	Trading VaR		Non-Trading VaR	
	2011	2010	2011	2010
95% Confidence Level, Five-Day Holding Period				
Period End	$ 1	$ 1	$ 6	$ 5
Average for the Period	3	4	5	7
High	6	9	7	12
Low	1	1	4	4

The trading portfolio includes all speculative positions, regardless of the delivery period. All positions not considered speculative are considered non-trading. PPL Energy Supply's non-trading portfolio includes PPL Energy Supply's entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at December 31, 2011.

Interest Rate Risk

PPL Energy Supply and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL and PPL Energy Supply utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in PPL Energy Supply's debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL Energy Supply's debt portfolio due to changes in the absolute level of interest rates.

At December 31, 2011 and 2010, PPL Energy Supply's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL Energy Supply is also exposed to changes in the fair value of its debt portfolio. PPL Energy Supply estimated that a 10% decrease in interest rates at December 31, 2011 would increase the fair value of its debt portfolio by $53 million, compared with $198 million at December 31, 2010.

PPL Energy Supply had the following interest rate hedges outstanding at:

	December 31, 2011			December 31, 2010		
	Exposure Hedged	Fair Value, Net - Asset (a)	Effect of a 10% Adverse Movement in Rates (b)	Exposure Hedged	Fair Value, Net - Asset (a)	Effect of a 10% Adverse Movement in Rates (b)
Cash flow hedges						
Interest rate swaps (c)						
Cross-currency swaps (d)				$ 302	$ 35	$ (18)
Fair value hedges						
Interest rate swaps (e)						

(a) Includes accrued interest, if applicable.

(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.

(c) PPL and PPL Energy Supply utilize various risk management instruments to reduce PPL Energy Supply's exposure to the expected future cash flow variability of PPL Energy Supply's debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL Energy Supply is exposed to changes in the fair value of these instruments, any changes in the fair value of such cash flow hedges are recorded in equity. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. Sensitivities represent a 10% adverse movement in interest rates.

(d) Represents cross-currency swaps used by PPL WW to hedge the interest payments and principal of its U.S. dollar-denominated senior notes with maturity dates ranging from December 2017 to December 2028. In 2010, these swaps were part of PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding, effective January 2011, these swaps are no longer part of PPL Energy Supply's business. While PPL Energy Supply was exposed to changes in the fair value of these instruments, any change in the fair value of these instruments was recorded in equity and reclassified into earnings in the same period during which the item being hedged affected earnings. Sensitivity represents a 10% adverse movement in both interest rates and foreign currency exchange rates.

(e) PPL and PPL Energy Supply utilize various risk management instruments to adjust the mix of fixed and floating interest rates in PPL Energy Supply's debt portfolio. The change in fair value of these instruments, as well as the offsetting change in the value of the hedged exposure of the debt, is reflected in earnings. Sensitivities represent a 10% adverse movement in interest rates.

Foreign Currency Risk

PPL and PPL Energy Supply have adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments, as well as to protect against foreign currency translation risk of expected earnings.

Prior to 2011, PPL Energy Supply's exposure to foreign currency risk was through its investments in U.K. affiliates. In addition, PPL Energy Supply's domestic operations may make purchases of equipment in currencies other than U.S. dollars. See Note 1 to the Financial Statements for additional information regarding foreign currency translation.

PPL and PPL Energy Supply previously entered into contracts to protect the value of a portion of PPL Energy Supply's net investment in WPD and to economically hedge anticipated earnings denominated in GBP. In 2010, these contracts were included in PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding, effective January 2011, these contracts are no longer included in PPL Energy Supply's business.

At December 31, 2011, PPL Energy Supply did not have any foreign currency hedges outstanding. At December 31, 2010, PPL Energy Supply had the following foreign currency hedges outstanding:

Past financial performance is no guarantee of future results.

	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)
Net investment hedges (b)	£ 35	$ 7	$ (5)
Economic hedges (c)	89	4	(10)

(a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
(b) To protect the value of a portion of PPL Energy Supply's net investment in WPD, PPL executed forward contracts to sell GBP.
(c) To economically hedge the translation of expected income denominated in GBP to U.S. dollars, PPL entered into a combination of average rate forwards and average rate options to sell GBP.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the Susquehanna nuclear plant. At December 31, 2011, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on PPL Energy Supply's Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its nuclear decommissioning trust policy statement. At December 31, 2011, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated $43 million reduction in the fair value of the trust assets, compared with $45 million at December 31, 2010. See Notes 18 and 23 to the Financial Statements for additional information regarding the NDT funds.

Defined Benefit Plans - Securities Price Risk

See "Application of Critical Accounting Policies - Defined Benefits" for additional information regarding the effect of securities price risk on plan assets.

Credit Risk

Credit risk is the risk that PPL Energy Supply would incur a loss as a result of nonperformance by counterparties of their contractual obligations. PPL Energy Supply maintains credit policies and procedures with respect to counterparty credit (including requirements that counterparties maintain specified credit ratings) and requires other assurances in the form of credit support or collateral in certain circumstances in order to limit counterparty credit risk. However, PPL Energy Supply has concentrations of suppliers and customers among electric utilities, financial institutions and other energy marketing and trading companies. These concentrations may impact PPL Energy Supply's overall exposure to credit risk, positively or negatively, as counterparties may be similarly affected by changes in economic, regulatory or other conditions.

PPL Energy Supply includes the effect of credit risk on its fair value measurements to reflect the probability that a counterparty will default when contracts are out of the money (from the counterparty's standpoint). In this case, PPL Energy Supply would have to sell into a lower-priced market or purchase from a higher-priced market. When necessary, PPL Energy Supply records an allowance for doubtful accounts to reflect the probability that a counterparty will not pay for deliveries PPL Energy Supply has made but not yet billed, which are reflected in "Unbilled revenues" on the Balance Sheets. PPL Energy Supply also has established a reserve with respect to certain receivables from SMGT, which is reflected in accounts receivable on the Balance Sheets. See Note 15 to the Financial Statements for additional information.

See "Overview" in this Item 7 and Notes 16, 18 and 19 to the Financial Statements for additional information on credit concentration and credit risk.

Foreign Currency Translation

As noted previously, in January 2011, PPL Energy Supply distributed its interest in PPL Global to its parent, PPL Energy Funding. As a result, PPL Energy Supply no longer consolidates any foreign subsidiaries and has no foreign currency translation component within AOCI. The value of the British pound sterling fluctuates in relation to the U.S. dollar. In 2010, changes in these exchange rates resulted in a foreign currency translation loss of $63 million, which primarily reflected a $180 million reduction to PP&E offset by a reduction of $117 million to net liabilities. In 2009, changes in these exchange rates resulted in a foreign currency translation gain of $106 million, which primarily reflected a $225 million increase in

Past financial performance is no guarantee of future results.

PP&E offset by an increase of $119 million to net liabilities. The impact of foreign currency translation was recorded in AOCI.

Related Party Transactions

PPL Energy Supply is not aware of any material ownership interests or operating responsibility by senior management of PPL Energy Supply in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with PPL Energy Supply. See Note 16 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

PPL Energy Supply continuously evaluates potential acquisitions, divestitures and development projects as opportunities arise or are identified. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options.

In 2011, the final phase of the Susquehanna uprate project, a 50 MW Unit 2 uprate, was completed. In addition, incremental capacity increases of 191 MW are currently planned, primarily at existing PPL Energy Supply generating facilities. See "Item 2. Properties - Supply Segment" for additional information.

See Notes 8 and 9 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Protection of the environment is a priority for PPL Energy Supply and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to PPL Energy Supply's air emissions, water discharges and the management of hazardous and solid waste, among other areas; and the cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc., and may impact the cost for their products or their demand for PPL Energy Supply's services. See "Item 1. Business - Environmental Matters" and Note 15 to the Financial Statements for a discussion of environmental matters.

Competition

See "Competition" under the International Regulated and Supply segments in "Item 1. Business - Segment Information" and "Item 1A. Risk Factors" for a discussion of competitive factors affecting PPL Energy Supply.

New Accounting Guidance

See Notes 1 and 24 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). PPL's senior management has reviewed these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them, with PPL's Audit Committee.

1) Price Risk Management

See "Price Risk Management" in Note 1 to the Financial Statements, as well as "Risk Management - Energy Marketing & Trading and Other" above.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

2) Defined Benefits

PPL Energy Supply subsidiaries sponsor and participate in various qualified funded and non-qualified unfunded defined benefit pension plans. PPL Energy Supply subsidiaries also sponsor an unfunded other postretirement benefit plan. PPL Energy Supply records the liability and net periodic defined benefit costs of its plans and the allocated portion of those plans sponsored by PPL Services based on participation in those plans. PPL Energy Supply subsidiaries record an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to OCI. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

PPL Services and PPL Energy Supply make certain assumptions regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on estimated results. Any differences between actual and estimated results are recorded in OCI. These amounts in AOCI are amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- Discount Rate - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Return on Plan Assets - Management projects the long-term rates of return on plan assets based on historical performance, future expectations and periodic portfolio rebalancing among the diversified asset classes. These projected returns reduce the net benefit costs PPL records currently.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.

- Health Care Cost Trend Rate - Management projects the expected increases in the cost of health care.

In selecting a discount rate for their defined benefit plans, PPL Services and PPL Energy Supply start with a cash flow analysis of the expected benefit payment stream for its plans. For 2010, these plan-specific cash flows were matched against a spot-rate yield curve to determine the assumed discount rate. To develop the spot-rate yield curve, the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, served as the base from which those with the lowest and highest yields were eliminated to develop an appropriate subset of bonds from which the ultimate yield curve would be built. At that time, Management believed this plan-specific cash flow matching model represented the best available tool for estimating the discount rate. Beginning in 2011, PPL Services and PPL Energy Supply utilized a new tool that enhanced this plan-specific cash flow matching methodology by primarily matching the plan-specific cash flows against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the same subset of the universe of Aa-rated corporate bonds from which those with the lowest and highest yields were eliminated, similar to the yield curve approach. Individual bonds were then selected based on the timing of each plan's cash flows and parameters were established as to the percentage of each individual bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed. This process more accurately approximated the process of settlement of the obligations, which better aligns with the objective of selecting the discount rate. At December 31, 2011, PPL Services decreased the discount rate for its U.S. pension plans from 5.41% to 5.07% and PPL Energy Supply decreased the discount rate for its pension plan from 5.47% to 5.12%. PPL Services decreased the discount rate for its other postretirement benefit plan from 5.16% to 4.81% and PPL Energy Supply decreased the discount rate for its other postretirement benefit plan from 4.95% to 4.60%.

The expected long-term rates of return for PPL Services and PPL Energy Supply's U.S. defined benefit pension and other postretirement benefit plans have been developed using a best-estimate of expected returns, volatilities and correlations for each asset class. PPL management corroborates these rates with expected long-term rates of return calculated by its independent actuary, who uses a building block approach that begins with a risk-free rate of return with factors being added such as inflation, duration, credit spreads and equity risk. Each plan's specific asset allocation is also considered in developing a reasonable return assumption. Based on PPL's change to a liability-driven investment strategy, PPL's U.S. defined benefit pension assets have shifted into a greater proportion of fixed-income investments. Based on this change in investment strategy, at December 31, 2011, PPL Services' and PPL Energy Supply's expected return on plan assets decreased from 7.25% to 7.00% for their U.S. pension plans and decreased from 6.45% to 5.70% for PPL Services' other postretirement benefit plan.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In selecting a rate of compensation increase, PPL Energy Supply considers past experience in light of movements in inflation rates. At December 31, 2011, PPL Services and PPL Energy Supply's rate of compensation decreased from 4.75% to 4.00% for their U.S. plans.

In selecting health care cost trend rates, PPL Services and PPL Energy Supply consider past performance and forecasts of health care costs. At December 31, 2011, PPL Services' and PPL Energy Supply's health care cost trend rates were 8.50% for 2012, gradually declining to 5.50% for 2019.

A variance in the assumptions listed above could have a significant impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and OCI. While the charts below reflect either an increase or decrease in each assumption, the inverse of this change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and OCI by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption and does not include income tax effects.

At December 31, 2011, the defined benefit plans were recorded as follows.

Pension liabilities	$ (215)
Other postretirement benefit liabilities	(68)

The following chart reflects the sensitivities in the December 31, 2011 Balance Sheet associated with a change in certain assumptions based on PPL Services' and PPL Energy Supply's primary defined benefit plans.

		Increase (Decrease)	
Actuarial assumption	Change in assumption	Impact on defined benefit liabilities	Impact on OCI
Discount Rate	(0.25)%	$ 46	$ (46)
Rate of Compensation Increase	0.25%	8	(8)
Health Care Cost Trend Rate (a)	1.00%	1	(1)

(a) Only impacts other postretirement benefits.

In 2011, PPL Energy Supply was allocated and recognized net periodic defined benefit costs charged to operating expense of $35 million. This amount represents a $1 million decrease from 2010.

The following chart reflects the sensitivities in the 2011 Statement of Income (excluding income tax effects) associated with a change in certain assumptions based on PPL's and PPL Energy Supply's primary defined benefit plans.

Actuarial assumption	Change in assumption	Impact on defined benefit costs
Discount Rate	(0.25)%	$ 4
Expected Return on Plan Assets	(0.25)%	3
Rate of Compensation Increase	0.25%	1

3) Asset Impairment

Impairment analyses are performed for long-lived assets that are subject to depreciation or amortization whenever events or changes in circumstances indicate that a long-lived asset's carrying value may not be recoverable. For these long-lived assets classified as held and used, such events or changes in circumstances are:

- a significant decrease in the market price of an asset;
- a significant adverse change in the manner in which an asset is being used or in its physical condition;
- a significant adverse change in legal factors or in the business climate;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of an asset;
- a current period operating or cash flow loss combined with a history of losses or a forecast that demonstrates continuing losses; or
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

For a long-lived asset classified as held and used, an impairment is recognized when the carrying amount of the asset is not recoverable and exceeds its fair value. The carrying amount is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the asset is impaired, an impairment loss is recorded to adjust the asset's carrying value to its estimated fair value. Management must make significant judgments to

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. Past financial performance is no guarantee of future results.

estimate future cash flows, including the useful lives of long-lived assets, the fair value of the assets and management's intent to use the assets. Alternate courses of action are considered to recover the carrying value of a long-lived asset, and estimated cash flows from the "most likely" alternative are used to assess impairment whenever one alternative is clearly the most likely outcome. If no alternative is clearly the most likely, then a probability-weighted approach is used taking into consideration estimated cash flows from the alternatives. For assets tested for impairment as of the balance sheet date, the estimates of future cash flows used in that test consider the likelihood of possible outcomes that existed at the balance sheet date, including the assessment of the likelihood of a future sale of the assets. That assessment is not revised based on events that occur after the balance sheet date. Changes in assumptions and estimates could result in significantly different results than those identified and recorded in the financial statements.

For a long-lived asset classified as held for sale, an impairment exists when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If the asset (disposal group) is impaired, an impairment loss is recorded to adjust the carrying amount to its fair value less cost to sell. A gain is recognized for any subsequent increase in fair value less cost to sell, but not in excess of the cumulative impairment previously recognized.

For determining fair value, quoted market prices in active markets are the best evidence. However, when market prices are unavailable, the Registrant considers all valuation techniques appropriate under the circumstances and for which market participant inputs can be obtained. Generally discounted cash flows are used to estimate fair value, which incorporates market participant inputs when available. Discounted cash flows are calculated by estimating future cash flow streams and applying appropriate discount rates to determine the present value of the cash flow streams.

See Note 18 to the Financial Statements for a discussion of impairments related to certain intangible assets in 2011.

Goodwill is tested for impairment at the reporting unit level. PPL Energy Supply's reporting unit has been determined to be at the operating segment level. A goodwill impairment test is performed annually or more frequently if events or changes in circumstances indicate that the carrying value of the reporting unit may be greater than the unit's fair value. Additionally, goodwill is tested for impairment after a portion of goodwill has been allocated to a business to be disposed of.

Goodwill is tested for impairment using a two-step approach. In step one, PPL Energy Supply identifies a potential impairment by comparing the estimated fair value of PPL Energy Supply (the goodwill reporting unit) with its carrying value, including goodwill, on the measurement date. If the estimated fair value exceeds its carrying value, goodwill is not considered impaired. If the carrying value exceeds the estimated fair value, the second step is performed to measure the amount of impairment loss, if any.

The second step requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. That is, the estimated fair value is allocated to all of PPL Energy Supply's assets and liabilities as if PPL Energy Supply had been acquired in a business combination and the estimated fair value of PPL Energy Supply was the price paid. The excess of the estimated fair value of PPL Energy Supply over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The implied fair value of PPL Energy Supply's goodwill is then compared with the carrying value of that goodwill. If the carrying value exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying value of PPL Energy Supply's goodwill.

PPL Energy Supply tested goodwill for impairment in the fourth quarter of 2011 and no impairment was recognized. Management used both discounted cash flows and market multiples, which required significant assumptions, to estimate the fair value of PPL Energy Supply. Applying an appropriate weighting to both the discounted cash flow and market multiple valuations, a decrease in the forecasted cash flows of 10%, an increase in the discount rate by 25 basis points, or a 10% decrease in the multiples would not have resulted in an impairment of goodwill.

In 2010 and 2009, $5 million and $3 million of goodwill allocated to discontinued operations was written off.

4) Loss Accruals

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events, and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual, and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are used, as necessary, to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

No new significant loss accruals were recorded in 2011.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is "reasonably possible" that a loss has been incurred. See Note 15 to the Financial Statements for disclosure of other potential loss contingencies that have not met the criteria for accrual.

When an estimated loss is accrued, the triggering events for subsequently reducing the loss accrual are identified, where applicable. The triggering events generally occur when the contingency has been resolved and the actual loss is paid or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the reduction of certain recorded loss accruals:

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.

- Environmental and other litigation contingencies are reduced when the contingency is resolved and actual payments are made, a better estimate of the loss is determined or the loss is no longer considered probable.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, operation management and other parties.

See Note 15 to the Financial Statements for a discussion of the Montana Hydroelectric Litigation, including the reversal of an $89 million loss accrual, as a result of management's assessment of the February 2012 U.S. Supreme Court decision.

5) Asset Retirement Obligations

PPL Energy Supply is required to recognize a liability for legal obligations associated with the retirement of long-lived assets. The initial obligation should be measured at its estimated fair value. A conditional ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. An equivalent amount should be recorded as an increase in the value of the capitalized asset and allocated to expense over the useful life of the asset. Until the obligation is settled, the liability is increased, through the recognition of accretion expense in the income statement, for changes in the obligation due to the passage of time. See Note 21 to the Financial Statements for further discussion of AROs.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that considers estimated retirement costs in current period dollars that are inflated to the anticipated retirement date and then discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is amortized over the remaining life of the associated long-lived asset.

At December 31, 2011, AROs totaling $359 million were recorded on the Balance Sheet, of which $10 million is included in "Other current liabilities." Of the total amount, $292 million, or 81%, relates to the nuclear decommissioning ARO. The most significant assumptions surrounding AROs are the forecasted retirement costs, the discount rates and the inflation rates. A variance in any of these inputs could have a significant impact on the ARO liabilities.

The following table reflects the sensitivities related to the nuclear decommissioning ARO liability associated with a change in these assumptions as of December 31, 2011. There is no significant change to the annual depreciation expense of the ARO asset or the annual accretion expense of the ARO liability as a result of changing the assumptions. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption.

	Change in Assumption	Impact on ARO Liability
Retirement Cost	10%	$ 29
Discount Rate	(0.25)%	26
Inflation Rate	0.25%	30

6) Income Taxes

Significant management judgment is required in developing the provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. Tax positions are evaluated following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. Management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, uncertain tax positions are reassessed by considering information known at the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position may be de-recognized, or the benefit of a previously recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2011, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase by as much as $1 million or decrease by up to $27 million. This change could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the timing and utilization of tax credits and the related impact on alternative minimum tax, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. Management also considers the uncertainty posed by political risk and the effect of this uncertainty on the various factors that management takes into account in evaluating the need for valuation allowances. The amount of deferred tax assets ultimately realized may differ materially from the estimates utilized in the computation of valuation allowances and may materially impact the financial statements in the future. See Note 5 to the Financial Statements for income tax disclosures.

Other Information

PPL's Audit Committee has approved the independent auditor to provide audit and audit-related services, tax services and other services permitted by Sarbanes-Oxley and SEC rules. The audit and audit-related services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews. See "Item 14. Principal Accounting Fees and Services" for more information.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information provided in this Item 7 should be read in conjunction with PPL Electric's Consolidated Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL Electric and its business strategy. "Financial and Operational Developments" includes a review of Net Income Available to PPL Corporation and discusses certain events that are important to understanding PPL Electric's results of operations and financial condition.
- "Results of Operations" provides a summary of PPL Electric's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on PPL Electric's Statements of Income, comparing 2011, 2010 and 2009.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Electric's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.
- "Financial Condition - Risk Management" provides an explanation of PPL Electric's risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of PPL Electric and that require its management to make significant estimates, assumptions and other judgments of matters inherently uncertain.

Overview

Introduction

PPL Electric is an electricity delivery service provider in eastern and central Pennsylvania with headquarters in Allentown, Pennsylvania. PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that territory as a PLR under the Customer Choice Act.

Business Strategy

PPL Electric's strategy and principal challenge is to own and operate its electricity delivery business at the most efficient cost while maintaining high quality customer service and reliability. PPL Electric anticipates that it will have significant capital expenditure requirements in the future. In order to manage financing costs and access to credit markets, a key objective for PPL Electric's business is to maintain a strong credit profile. PPL Electric continually focuses on maintaining an appropriate capital structure and liquidity position.

Timely recovery of costs applicable to the replacement of aging distribution assets is required in order to maintain strong cash flows and a strong credit profile. Traditionally, such cost recovery would be pursued through periodic base rate case proceedings with the PUC. As such costs continue to increase, more frequent rate case proceedings may be required or an alternative rate making process would need to be implemented in order to achieve more timely recovery as discussed below in "Legislation - Regulatory Procedures and Mechanisms."

Transmission costs are recovered through a FERC Formula Rate mechanism which is updated annually for costs incurred and assets placed in service. Accordingly, increased costs including the replacement of aging transmission assets and the PJM-approved Regional Transmission Line Expansion Plan are recovered on a timely basis.

Financial and Operational Developments

Net Income Available to PPL Corporation

Net Income Available to PPL Corporation for 2011, 2010 and 2009 was $173 million, $115 million and $124 million. Earnings in 2011 increased 50% over 2010 and earnings in 2010 decreased 7% from 2009. These changes reflect the following after tax impacts:

	2011 vs. 2010	2010 vs. 2009
Distribution base rate increase effective in January 2011	$ 40	
Interest expense on reduced debt balances	2	$ 9
Payroll, contractor and vegetation management costs	1	(22)
Workforce reduction		5
Tax benefit related to flow-through regulated state tax depreciation	14	
Other	1	(1)
	$ 58	$ (9)

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations.

Storm Recovery

PPL Electric experienced several PUC-reportable storms during 2011 resulting in total restoration costs of $84 million, of which $54 million were recorded in "Other operation and maintenance" on the Statement of Income. Although PPL Electric has storm insurance with a PPL affiliate, the costs associated with the unusually high number of PUC-reportable storms has exceeded policy limits. Probable insurance recoveries recorded during 2011 were $26.5 million, of which $16 million were included in "Other operation and maintenance" on the Statement of Income. In December 2011, PPL Electric received orders from the PUC granting permission to defer qualifying storm costs in excess of insurance recoveries associated with Hurricane Irene and a late October snowstorm. Based on the PUC orders, PPL Electric recorded a regulatory asset of $25 million in December 2011. PPL Electric will seek recovery of these costs in its next general base rate proceeding.

PUC Investigation of Retail Market

In April 2011, the PUC opened an investigation of Pennsylvania's retail electricity market to be conducted in two phases. Phase one addressed the status of the current retail market and explored potential changes. Questions promulgated by the PUC for this phase of the investigation focus primarily on default service issues. In June 2011, interested parties filed comments and the PUC held a hearing in this phase of the investigation. In July 2011, the PUC entered an order initiating phase two of the investigation to study how best to address issues identified by the PUC as being most relevant to improving the current retail electricity market. The PUC issued a tentative order in October 2011 addressing issues associated with the timing and various other details of the EDCs' default service procurement plans. Parties filed comments to that tentative order. The PUC also held a hearing in this phase of the investigation in November 2011. In December 2011, the PUC issued a final order providing guidance to EDCs on the design of their next default service procurement plan filings. In December 2011, the PUC also issued a tentative order proposing an intermediate work plan to address issues raised in the investigation. Parties filed comments to that tentative order. PPL Electric cannot predict the outcome of the investigation.

Regional Transmission Line Expansion Plan

In 2007, PJM directed the construction of a new 150-mile, 500-kilovolt transmission line between the Susquehanna substation in Pennsylvania and the Roseland substation in New Jersey that it identified as essential to long-term reliability of the Mid-Atlantic electricity grid. PJM determined that the line is needed to prevent potential overloads that could occur on several existing transmission lines in the interconnected PJM system. PJM has directed PPL Electric to construct the portion of the Susquehanna-Roseland line in Pennsylvania and has directed Public Service Electric & Gas Company to construct the portion of the line in New Jersey, in each case by June 1, 2012. PPL Electric's estimated share of the project costs is approximately $500 million.

PPL Electric has experienced delays in obtaining necessary National Park Service approvals for the Susquehanna-Roseland transmission line and anticipates a delay of the line's in-service date to 2015. In 2011, PJM issued an updated assessment of the new line within its 2010 Regional Transmission Expansion Plan, which confirms that the line is needed to prevent overloads on other power lines in the region. PJM has developed a strategy to manage potential reliability problems until the line is built. In October 2011, the project was placed on the initial list of projects for the Rapid Response Team for Transmission (RRTT), an initiative of the White House to facilitate coordination among federal agencies to improve the overall quality and timeliness of electric transmission infrastructure permitting, review and consultation. The RRTT has reaffirmed the issuance date of the National Park Service record of decision for the project. The National Park Service has

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

stated that it will announce the preferred route for the transmission line in March 2012 with an expected Record of Decision in October 2012. PPL Electric cannot predict what additional actions, if any, PJM might take in the event of a continued delay to its scheduled in-service date for the new line. See Note 8 to the Financial Statements for additional information.

On December 30, 2011, PPL Electric filed a Petition for Declaratory Order requesting FERC to authorize incentive rates for a new 58-mile 230 kV transmission project referred to as the Northeast/Pocono Reliability Project. PPL Electric's request includes two incentives, a 100 basis point incentive adder to its return on equity of 11.68%, and inclusion of 100% prudently incurred construction work in progress costs in rate base with the incentive rate of return. These incentives are specifically tailored to address the risks and challenges PPL Electric will face in building the project. PPL Electric estimates the project costs to be approximately $180 million. In January 2012, the PUC and the Joint Consumer Advocates each filed a protest opposing PPL Electric's request. American Municipal Power, Inc. filed comments. PPL Electric filed responses to the two protests and the comments. PPL Electric cannot predict the outcome of this proceeding.

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation that would authorize the PUC to approve regulatory procedures and mechanisms to provide for more timely recovery of a utility's costs. Such alternative ratemaking procedures and mechanisms are important to PPL Electric as it begins a period of significant increasing capital investment related to the asset optimization program focused on the replacement of aging distribution assets. Those procedures and mechanisms include, but are not limited to, the use of a fully projected future test year and an automatic adjustment clause to recover certain capital costs and related operating expenses. In October 2011, the legislation was passed by the Pennsylvania House of Representatives (Pennsylvania House). In January 2012, the Senate Consumer Affairs Committee adopted significant amendments to the legislation. The amended legislation authorizes the PUC to approve only two specific ratemaking mechanisms -- a fully projected future test year and a distribution system improvement charge. In addition, the amendments impose a number of conditions on the use of such a charge. In January 2012, the Pennsylvania Senate passed the amended legislation and in February 2012, the Pennsylvania House agreed to those amendments. The Governor signed the bill (Act 11 of 2012), which will become effective April 14, 2012. Utilities cannot file a petition with the PUC before January 1, 2013 requesting permission to establish the charge.

FERC Formula Rates

In March 2012, PPL Electric plans to file a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives that transferred regulatory jurisdiction of certain transmission assets from the PUC to the FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is included in "Other Noncurrent Assets - Regulatory assets" on the Balance Sheet. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

Results of Operations

When comparing 2011 and 2010 with 2009, certain line items on PPL Electric's financial statements were impacted by the Customer Choice Act, Act 129 and other related issues. The expiration of generation rate caps, the resulting competitive solicitations for power supply, the migration of customers to alternative suppliers, the Customer Choice Act and Act 129 had minimal impact on Pennsylvania Gross Delivery Margins, as approved recovery mechanisms allow for cost recovery of associated expenses, including the cost of energy provided as a PLR. However, PPL Electric's 2010 Pennsylvania Gross Delivery Margins were negatively impacted by the expiration of CTC recovery in December 2009. PPL Electric continues to remain the delivery provider for all customers in its service territory and charges a regulated rate for the service of delivering electricity.

See "Statement of Income Analysis - Pennsylvania Gross Delivery Margins" for additional information.

Earnings

Net Income Available to PPL Corporation includes the following results:

Net Income Available to PPL Corporation	$ 173	$ 115	50	$ 115	$ 124	(7)

The changes in the components of Net Income Available to PPL Corporation between these periods were due to the following factors. PPL Electric's results are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

	2011 vs. 2010	2010 vs. 2009
Pennsylvania gross delivery margins	$ 66	$ 3
Other operation and maintenance	4	(49)
Depreciation	(10)	(8)
Interest Expense	1	19
Other	4	(4)
Income Taxes	(11)	23
Distributions on Preferred Securities	4	(2)
Special Items, after-tax		9
Total	$ 58	$ (9)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.
- Other operation and maintenance increased in 2010 compared with 2009, primarily due to $18 million in higher payroll-related costs and $20 million in higher contractor costs, primarily related to vegetation management.
- Depreciation was higher in 2011 compared with 2010 and 2010 compared with 2009, primarily due to PP&E additions as a part of ongoing efforts to replace aging infrastructure.
- Interest expense decreased in 2010 compared with 2009, primarily due to a $16 million reduction driven by lower average debt balances in 2010 compared with 2009.
- Income taxes were higher in 2011 compared with 2010, due to the $26 million impact of higher pre-tax income, partially offset by a $14 million tax benefit related to the impact of flow-through regulated tax depreciation that is primarily related to the Pennsylvania Department of Revenue interpretive guidance regarding 100% bonus depreciation.

  Income taxes were lower in 2010 compared with 2009, due to the $14 million impact of lower pre-tax income and a $7 million tax benefit relating to a favorable 2010 U.S. Tax Court ruling regarding street lighting assets.

The following after-tax amounts, which management considers special items, also impacted the results.

	Income Statement Line Item	2009
Special items gains (losses), net of tax benefit (expense):		
Impairments:		
Other asset impairments, net of tax of $1	Other O&M	$ (1)
Workforce reduction, net of tax of $3 (a)	Other O&M	(5)
Other:		
Change in tax accounting method related to repairs (b)	Income Taxes	(3)
Total		$ (9)

(a) Charge related to a workforce reduction, mainly consisting of enhanced pension and severance benefits.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(b) During 2009, PPL Electric received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Electric deducted the resulting IRC Sec. 481 amount on its 2008 federal income tax return and recorded a $3 million adjustment to federal and state income tax expense resulting from the reversal of prior years' state income tax benefits related to regulated depreciation.

2012 Outlook

Excluding special items, PPL Electric projects lower earnings in 2012 compared with 2011, primarily driven by higher operation and maintenance expenses, higher income taxes, and higher depreciation, which are expected to be partially offset by higher delivery revenue.

In late March 2012, PPL Electric expects to file a request with the PUC seeking an increase in its distribution rates beginning in January 2013. PPL Electric cannot predict the outcome of this matter.

Earnings beyond 2011 are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7 and Notes 6 and 15 to the Financial Statements for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Pennsylvania Gross Delivery Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Pennsylvania Gross Delivery Margins." "Pennsylvania Gross Delivery Margins" is a single financial performance measure of PPL Electric's Pennsylvania regulated electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Energy purchases from affiliate," "Other operation and maintenance" expense, which is primarily Act 129 costs, and "Taxes, other than income", which is primarily gross receipts tax. As a result, this measure represents the net revenues from PPL Electric's Pennsylvania regulated electric delivery operations. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Electric believes that "Pennsylvania Gross Delivery Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage PPL Electric's operations and analyze actual results to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Pennsylvania Gross Delivery Margins" as defined by PPL Electric for the period ended December 31.

	2011			2010		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	$ 1,881		$ 1,881	$ 2,448		$ 2,448
Electric revenue from affiliate	11		11	7		7
Total Operating Revenues	1,892		1,892	2,455		2,455
Operating Expenses						
Energy purchases	738		738	1,075		1,075
Energy purchases from affiliate	26		26	320		320
Other operation and maintenance	108	$ 422	530	76	$ 426	502
Depreciation		146	146		136	136
Taxes, other than income	99	5	104	129	9	138
Total Operating Expenses	971	573	1,544	1,600	571	2,171
Total	$ 921	$ (573)	$ 348	$ 855	$ (571)	$ 284

Depreciation		128	128
Taxes, other than income	186	8	194
Total Operating Expenses	2,440	523	2,963
Total	$ 852	$ (523)	$ 329

(a) Represents amounts that are excluded from Margins.
(b) As reported on the Statement of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL Electric's non-GAAP financial measure, "Pennsylvania Gross Delivery Margins" for the periods ended December 31, as well as the change between periods. The factors that gave rise to the change are described below the table.

	2011	2010	Change	2010	2009	Change
PA Gross Delivery Margins by Component						
Distribution	$ 741	$ 679	$ 62	$ 679	$ 702	$ (23)
Transmission	180	176	4	176	150	26
Total	$ 921	$ 855	$ 66	$ 855	$ 852	$ 3

Distribution

The PPL Electric distribution rate case increased rates by approximately 1.6% effective January 1, 2011, which improved residential distribution margins by $68 million. Residential volume variances increased margins by an additional $4 million for 2011, compared with the same period in 2010. Weather had a $3 million unfavorable impact for residential customers for 2011 compared with 2010. Weather-related variances for PPL Electric are calculated based on a ten-year historical average. Lastly, lower demand charges and increased efficiency as a result of Act 129 programs resulted in a $5 million decrease in margins for commercial and industrial customers.

The decrease in 2010 compared with 2009 was primarily due to margins realized in 2009 related to the collection of CTC that ended in December 2009 of $37 million, partially offset by favorable recovery mechanisms for certain energy-related costs of $16 million.

Transmission

The increase in 2010 compared with 2009 was primarily due to increased investment in rate base, an increase in the cost of capital due to an increase in equity and the recovery of additional costs through the FERC formula-based rates.

Other Operation and Maintenance

The changes in other operation and maintenance expenses were due to:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2011 vs. 2010	2010 vs. 2009
Act 129 costs incurred (a)	$ 26	$ 54
Vegetation management costs (b)	(8)	13
Payroll-related costs	4	18
Contractor-related expenses	3	7
Allocation of certain corporate support group costs	3	6
Uncollectible accounts	7	3
Ancillary charges (c)		(11)
Environmental costs	(4)	5
Workforce reduction (Note 13)		(9)
Employee benefits	(5)	(4)
Other	2	3
Total	$ 28	$ 85

(a) Relates to costs associated with a PUC-approved energy efficiency and conservation plan. These costs are recovered in customer rates. There are currently 15 Act 129 programs which began in 2010 and continued to ramp up in 2011.

(b) In 2010, PPL Electric increased its vegetation management around its 230- and 500-kV major transmission lines in response to federal reliability requirements for transmission vegetation management.

(c) Prior to 2010, these charges were assessed to load serving entities (LSE), and PPL Electric was considered the LSE. Beginning in 2010, PPL Electric incurred the bulk of these charges as part of the bundled price of PLR supply from the individual PLR generation suppliers and such costs are reflected in energy purchases.

Taxes, Other Than Income

Taxes, other than income decreased by $34 million in 2011 compared with 2010. This decrease was primarily due to $21 million of lower Pennsylvania gross receipts tax expense due to a decrease in retail electricity revenue as customers continue to select alternative suppliers in 2011. The decrease was also impacted by the amortization of a PURTA refund of $10 million in 2011. Pennsylvania gross receipts tax and the PURTA refund are included in "Pennsylvania Gross Delivery Margins."

Taxes, other than income decreased by $56 million in 2010 compared with 2009. The decrease was primarily due to lower Pennsylvania gross receipts tax expense due to a decrease in electricity revenue as customers chose alternate suppliers in 2010.

Depreciation

Depreciation increased by $10 million in 2011 compared with 2010, primarily due to PP&E additions as part of ongoing efforts to replace aging infrastructure. Depreciation increased by $8 million in 2010 compared with 2009, primarily due to PP&E additions.

Financing Costs

The changes in financing costs, which includes "Interest Expense", "Interest Expense with Affiliate" and "Distributions on Preferred Securities," were due to:

	2011 vs. 2010	2010 vs. 2009
Long-term debt interest expense (a)	$ (3)	$ (16)
Interest on PLR contract collateral (Note 16)		(2)
Distributions on preferred securities (b)	(4)	2
Recoverable transition costs		(3)
Amortization of debt issuance costs (c)	5	2
Other	(3)	
Total	$ (5)	$ (17)

(a) The decrease in 2011 compared with 2010 was due to the net impact of refinancing $400 million of long-term debt at lower interest rates and issuing $250 million of long-term debt in the third quarter of 2011. The decrease in 2010 compared with 2009 was primarily due to long-term debt retirements in the third quarter of 2009.

(b) The decrease in 2011 compared with 2010 was primarily due to preferred stock redemption in 2010.

(c) The increase in 2011 compared with 2010 was primarily due to amortization of loss on reacquired debt associated with the redemption of senior secured bonds in 2011.

Income Taxes

The changes in income taxes were due to:

	2011 vs. 2010	2010 vs. 2009
Higher (Lower) pre-tax book income	$ 26	$ (13)
Federal and state tax reserve adjustments (a)	3	(5)
Federal and state tax return adjustments (b)	(3)	(5)
Depreciation not normalized (c)	(14)	
Other	(1)	1
	$ 11	$ (22)

(a) In July 2010, the U.S. Tax Court ruled in PPL Electric's favor in a dispute with the IRS, concluding that street lighting assets are depreciable for tax purposes over seven years. As a result, PPL Electric recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes during 2010.

During 2011, 2010 and 2009 PPL Electric recorded a $6 million, $7 million and $6 million tax benefit to federal and state income tax reserves related to stranded cost securitization.

(b) During 2009, PPL Electric received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Electric deducted the resulting IRC Sec. 481 amount on its 2008 federal income tax return and recorded a $3 million adjustment to federal and state income tax expense resulting from the reversal of prior years' state income tax benefits related to regulated depreciation.

(c) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for Federal income tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

PPL Electric continues to focus on maintaining a strong credit profile and liquidity position. PPL Electric expects to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents and its credit facilities.

PPL Electric's cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- unusual or extreme weather that may damage PPL Electric's transmission and distribution facilities or affect energy sales to customers;
- the ability to recover and the timeliness and adequacy of recovery of costs associated with regulated utility businesses;
- any adverse outcome of legal proceedings and investigations with respect to PPL Electric's current and past business activities;
- deterioration in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and
- a downgrade in PPL Electric's credit ratings that could adversely affect its ability to access capital and increase the cost of credit facilities and any new debt.

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties affecting PPL Electric's cash flows.

At December 31, PPL Electric had the following:

	2011	2010	2009
Cash and cash equivalents	$ 320	$ 204	$ 485

The changes in PPL Electric's cash and cash equivalents position resulted from:

	2011	2010	2009
Net cash provided by operating activities	$ 420	$ 212	$ 294
Net cash provided by (used in) investing activities	(477)	(403)	6
Net cash provided by (used in) financing activities	173	(90)	(298)
Net Increase (Decrease) in Cash and Cash Equivalents	$ 116	$ (281)	$ 2

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Operating Activities

Net cash provided by operating activities increased by 98%, or $208 million, in 2011 compared with 2010, primarily due to changes in working capital of $322 million (including lower gross receipts tax payments, a federal income tax refund and changes in over/under collections of the generation supply and transmission service charges). These changes were partially offset by an increase in defined benefit plan contributions of $58 million and $25 million related to storm costs incurred in 2011that has been recorded as a long-term regulatory asset.

Net cash provided by operating activities decreased by 28%, or $82 million, in 2010 compared with 2009. The expiration of the generation rate caps at the end of 2009 had little impact on net income, while increased transmission revenue was almost completely offset by decreased distribution revenue. However, higher tree trimming and payroll costs and additional defined benefit plan contributions were the primary drivers to the decrease in cash provided by operating activities. Also impacting the 2010 operating cash flows was the elimination of the CTC charge of approximately $300 million that was received in 2009. This amount offsets the benefit of not paying the $300 million in cash collateral related to the long-term PLR energy supply agreements with PPL Energy Supply, which expired at the end of 2009.

Investing Activities

The primary use of cash in investing activities is capital expenditures. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2012 through 2016.

Net cash used in investing activities was $477 million in 2011 compared with to $403 million in 2010. The change from 2010 to 2011 primarily reflects an increase of $80 million in capital expenditures in 2011.

Net cash used in investing activities was $403 million in 2010 compared with cash provided by investing activities of $6 million in 2009. The change from 2009 to 2010 primarily reflects an increase of $113 million in capital expenditures in 2010 and the receipt of $300 million from an affiliate as repayment of a demand loan in 2009.

Financing Activities

Net cash provided by financing activities was $173 million in 2011 compared with net cash used in financing activities of $90 million in 2010. The change from 2010 to 2011 primarily reflects $187 million of net debt issuances in 2011 and $54 million of preferred stock redemptions in 2010.

Net cash used in financing activities was $90 million in 2010 compared with $298 million in 2009. The change from 2009 to 2010 primarily reflects no debt activity in 2010 compared with net debt retirements of $392 million in 2009, partially offset by lower net contributions from PPL of $142 million in 2010 and $54 million of preferred stock redemptions in 2010.
See "Forecasted Sources of Cash" for a discussion of PPL Electric's plans to issue debt and equity securities, as well as a discussion of credit facility capacity available to PPL Electric. Also see "Forecasted Uses of Cash" for a discussion of PPL Electric's plans to pay dividends on its common and preferred securities, as well as maturities of PPL Electric's long-term debt.

Forecasted Sources of Cash

PPL Electric expects to continue to have sufficient sources of cash available in the near term, including various credit facilities and a commercial paper program.

Credit Facilities

At December 31, 2011, PPL Electric's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a)	$ 200		$ 1	$ 199
Asset-backed Credit Facility (b)	150		n/a	150
Total PPL Electric Credit Facilities	$ 350		$ 1	$ 349

(a) In October 2011, PPL Electric amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility, PPL Electric continues to have the ability to make cash borrowings and to request the lenders to issue letters of

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

credit. The commitments under this credit facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 6% of the total committed capacity.

PPL Electric's Syndicated Credit Facility contains a financial covenant requiring PPL Electric's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility, and other customary covenants.

(b) PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary pledges these assets to secure loans of up to an aggregate of $150 million from a commercial paper conduit sponsored by a financial institution. At December 31, 2011, based on accounts receivable and unbilled revenue pledged, the amount available for borrowing under this facility was limited to $103 million. In July 2011, PPL Electric and the subsidiary extended the expiration date of the credit agreement related to the asset-backed commercial paper program to July 2012.

In addition to the financial covenants noted above, the credit agreements governing the credit facilities contain financial and various other covenants. Failure to comply with the covenants after applicable grace periods could result in acceleration of repayment of borrowings and/or termination of the agreements. PPL Electric monitors compliance with the covenants on a regular basis. At December 31, 2011, PPL Electric was in compliance with these covenants. At this time, PPL Electric believes that these covenants and other borrowing conditions will not limit access to these funding sources.

See Note 7 to the Financial Statements for further discussion of PPL Electric's credit facilities.

Commercial Paper

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are currently supported by PPL Electric's $200 million syndicated credit facility, which expires in October 2016, based on available capacity.

PPL Electric did not issue any commercial paper during 2011. Based on its current cash position and anticipated cash flows, PPL Electric currently does not plan to issue any commercial paper during 2012, but it may do so from time to time, subject to market conditions, to facilitate short-term cash flow needs.

Contributions from PPL

From time to time PPL may make capital contributions to PPL Electric. PPL Electric may use these contributions for general corporate purposes.

Long-term Debt and Equity Securities

PPL Electric currently does not plan to issue long-term debt securities in 2012.

The Economic Stimulus Package

In April 2010, PPL Electric entered into an agreement with the DOE, in which the agency is to provide funding for one-half of a $38 million smart grid project. The project will use smart grid technology to strengthen reliability, save energy and improve electric service for 60,000 Harrisburg, Pennsylvania area customers. It will also provide benefits beyond the Harrisburg region, helping to speed power restoration across PPL Electric's 29-county service territory. Work on the project is progressing on schedule, and PPL Electric is receiving reimbursements under the grant for costs incurred. The project is scheduled to be completed by the end of September 2012.

Forecasted Uses of Cash

In addition to expenditures required for normal operating activities, such as purchased power, payroll, and taxes, PPL Electric currently expects to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common and preferred securities and possibly the purchase or redemption of a portion of its debt securities.

Capital Expenditures

The table below shows PPL Electric's current capital expenditure projections for the years 2012 through 2016.

	Projected				
	2012	2013	2014	2015	2016
Construction expenditures (a) (b)					
Distribution facilities	$ 337	$ 352	$ 317	$ 275	$ 280
Transmission facilities	333	517	503	400	308
Total Capital Expenditures	$ 670	$ 869	$ 820	$ 675	$ 588

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(a) Construction expenditures include AFUDC, which is expected to be approximately $52 million for the years 2012 through 2016.
(b) Includes expenditures for intangible assets.

PPL Electric's capital expenditure projections for the years 2012 through 2016 total approximately $3.6 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. The table includes projected costs for the asset optimization program focused on the replacement of aging transmission and distribution assets, and the PJM-approved regional transmission line expansion project. See Note 8 to the Financial Statements for additional information.

PPL Electric plans to fund its capital expenditures in 2012 with cash on hand, cash from operations and equity contributions from PPL.

Contractual Obligations

PPL Electric has assumed various financial obligations and commitments in the ordinary course of conducting its business. At December 31, 2011, the estimated contractual cash obligations of PPL Electric were:

	Total	2012	2013 - 2014	2015 - 2016	After 2016
Long-term Debt (a)	$ 1,724		$ 10	$ 100	$ 1,614
Interest on Long-term Debt (b)	1,734	$ 86	169	163	1,316
Purchase Obligations (c)	424	122	135	84	83
Other Long-term Liabilities Reflected on the Balance Sheet under GAAP (d) (e)	54	54			
Total Contractual Cash Obligations	$ 3,936	$ 262	$ 314	$ 347	$ 3,013

(a) Reflects principal maturities only based on stated maturity dates. PPL Electric does not have any capital or operating lease obligations.
(b) Assumes interest payments through stated maturity.
(c) The amounts include agreements to purchase goods or services that are enforceable and legally binding and specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Primarily includes PPL Electric's purchase obligations of electricity. Open purchase orders that are provided on demand with no firm commitment are excluded from the amounts presented. In prior years, PPL Electric included certain electricity purchase obligations based on forecasted amounts to be purchased. The amounts presented herein are based on actual contract terms.
(d) The amounts represent contributions made or committed to be made for 2012 for PPL's U.S. pension plans. See Note 13 to the Financial Statements for a discussion of expected contributions.
(e) At December 31, 2011, total unrecognized tax benefits of $73 million were excluded from this table as PPL Electric cannot reasonably estimate the amount and period of future payments. See Note 5 to the Financial Statements for additional information.

Dividends

From time to time, as determined by its Board of Directors, PPL Electric pays dividends on its common stock to its parent, PPL.

As discussed in Note 7 to the Financial Statements, PPL Electric may not pay dividends on its common stock, except in certain circumstances, unless full dividends have been paid on the 6.25% Series Preference Stock for the then-current dividend period. PPL Electric does not, at this time, expect that such limitation would significantly impact its ability to declare dividends.

PPL Electric expects to continue to pay quarterly dividends on its outstanding preference securities, as declared by its Board of Directors.

Purchase or Redemption of Debt Securities

PPL Electric will continue to evaluate its outstanding debt securities and may decide to purchase or redeem these securities depending upon prevailing market conditions and available cash.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt and preferred securities of PPL Electric. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Electric are based on information provided by PPL Electric and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of PPL Electric.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in PPL Electric's credit ratings could result in higher borrowing costs and reduced access to capital markets.

As a result of the passage of the Dodd-Frank Act, PPL Electric is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to PPL Electric's ratings, but without stating what ratings have been assigned to PPL Electric or its securities. The ratings assigned by the rating agencies to PPL Electric and its respective securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

The rating agencies took the following actions related to PPL Electric in 2011.

Following the announcement of the then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed its ratings for PPL Electric;
- S&P revised the outlook and lowered the issuer, senior secured, preference stock and commercial paper ratings of PPL Electric; and
- Fitch affirmed its ratings for PPL Electric.

In April 2011, following the completion of PPL's acquisition of WPD Midlands, S&P revised the outlook for PPL Electric, raised its commercial paper rating and affirmed its issuer, senior secured and preference stock ratings.

In July 2011, S&P upgraded the senior secured rating for PPL Electric's first mortgage bonds following the execution of a supplemental indenture that provided for prospective amendments to PPL Electric's 2001 Mortgage Indenture, as discussed in "Long-term Debt Securities" above.

In December 2011, Fitch affirmed the Issuer Default Ratings and individual security ratings of PPL Electric.

Off-Balance Sheet Arrangements

PPL Electric has entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management

Market Risk

Commodity Price and Volumetric Risk - PLR Contracts

PPL Electric is exposed to market price and volumetric risks from its obligation as PLR. The PUC has approved a cost recovery mechanism that allows PPL Electric to pass through to customers the cost associated with fulfilling its PLR obligation. This cost recovery mechanism substantially eliminates PPL Electric's exposure to market price risk. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement energy supply contracts for the majority of its PLR obligations. These supply contracts transfer the volumetric risk associated with the PLR obligation to the energy suppliers.

Interest Rate Risk

PPL Electric has issued debt to finance its operations, which exposes it to interest rate risk. PPL Electric had no potential annual exposure to increased interest expense, based on a 10% increase in interest rates, at December 31, 2011 and 2010. PPL Electric estimated that a 10% decrease in interest rates at December 31, 2011 would increase the fair value of its debt portfolio by $94 million, compared with $66 million at December 31, 2010.

Credit Risk

Credit risk is the risk that PPL Electric would incur a loss as a result of nonperformance by counterparties of their contractual obligations. PPL Electric requires that counterparties maintain specified credit ratings and requires other assurances in the form of credit support or collateral in certain circumstances in order to limit counterparty credit risk. However, PPL Electric has concentrations of suppliers, financial institutions and customers. These concentrations may impact PPL Electric's overall

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. Past financial performance is no guarantee of future results.

exposure to credit risk, positively or negatively, as counterparties may be similarly affected by changes in economic, regulatory or other conditions.

In 2009, the PUC approved PPL Electric's PLR procurement plan for the period January 2011 through May 2013. To date, PPL Electric has conducted ten of its 14 planned competitive solicitations.

Under the standard Supply Master Agreement (the Agreement) for the competitive solicitation process, PPL Electric requires all suppliers to post collateral if their credit exposure exceeds an established credit limit. In the event a supplier defaults on its obligation, PPL Electric would be required to seek replacement power in the market. All incremental costs incurred by PPL Electric would be recoverable from customers in future rates. At December 31, 2011, substantially all of the successful bidders under all of the solicitations had an investment grade credit rating from S&P, and were not required to post collateral under the Agreement. There is no instance under the Agreement in which PPL Electric is required to post collateral to its suppliers.

See "Overview" in this Item 7 and Notes 15, 16, 18 and 19 to the Financial Statements for additional information on the competitive solicitations, the Agreement, credit concentration and credit risk.

Related Party Transactions

PPL Electric is not aware of any material ownership interests or operating responsibility by senior management of PPL Electric in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with PPL Electric. See Note 16 to the Financial Statements for additional information on related party transactions.

Environmental Matters

Protection of the environment is a priority for PPL Electric and a significant element of its business activities. See "Item 1. Business - Environmental Matters" and Note 15 to the Financial Statements for a discussion of environmental matters.

Competition

See "Item 1. Business - Segment Information - Pennsylvania Regulated Segment - Competition" for a discussion of competitive factors affecting PPL Electric.

New Accounting Guidance

See Notes 1 and 24 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). PPL's senior management has reviewed these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them, with PPL's Audit Committee.

1) Defined Benefits

PPL Electric participates in a qualified funded defined benefit pension plan, an unfunded non-qualified defined benefit plan and a funded defined benefit other postretirement benefit plan, sponsored by other PPL subsidiaries and administered through PPL Services. PPL Electric is allocated a significant portion of the liability and net periodic defined benefit pension and other postretirement costs of the plans sponsored by other PPL subsidiaries based on participation in those plans. PPL Electric records an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

PPL Services makes certain assumptions regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on estimated results. Any differences between actual and estimated results are recorded in regulatory assets. The amount in

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

regulatory assets is amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- Discount Rate - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Return on Plan Assets - Management projects the long-term rates of return on plan assets based on historical performance, future expectations and periodic portfolio rebalancing among the diversified asset classes. These projected returns reduce the net benefit costs PPL records currently.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.

- Health Care Cost Trend Rate - Management projects the expected increases in the cost of health care.

In selecting a discount rate for its defined benefit plans, PPL Services starts with a cash flow analysis of the expected benefit payment stream for its plans. For 2010, these plan-specific cash flows were matched against a spot-rate yield curve to determine the assumed discount rate. To develop the spot-rate yield curve, the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, served as the base from which those with the lowest and highest yields were eliminated to develop an appropriate subset of bonds from which the ultimate yield curve would be built. At that time, Management believed this plan-specific cash flow matching model represented the best available tool for estimating the discount rate. Beginning in 2011, PPL Services utilized a new tool that enhanced this plan-specific cash flow matching methodology by primarily matching the plan-specific cash flows against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the same subset of the universe of Aa-rated corporate bonds from which those with the lowest and highest yields were eliminated, similar to the yield curve approach. Individual bonds were then selected based on the timing of each plan's cash flows and parameters were established as to the percentage of each individual bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed. This process more accurately approximated the process of settlement of the obligations, which better aligns with the objective of selecting the discount rate. At December 31, 2011, PPL Services decreased the discount rate for its U.S. pension plans from 5.41% to 5.07% and decreased the discount rate for its other postretirement benefit plans from 5.16% to 4.81%.

The expected long-term rates of return for PPL Services' U.S. defined benefit pension and other postretirement benefits have been developed using a best-estimate of expected returns, volatilities and correlations for each asset class. PPL management corroborates these rates with expected long-term rates of return calculated by its independent actuary, who uses a building block approach that begins with a risk-free rate of return with factors being added such as inflation, duration, credit spreads and equity risk. Each plan's specific asset allocation is also considered in developing a reasonable return assumption. Based on PPL's change to a liability-driven investment strategy, PPL's U.S. defined benefit pension assets have shifted into a greater proportion of fixed-income investments. Based on this change in investment strategy, at December 31, 2011, PPL Services' expected return on plan assets decreased from 7.25% to 7.00% for its U.S. pension plan and decreased from 6.45% to 5.70% for its other postretirement benefit plan.

In selecting a rate of compensation increase, PPL Services considers past experience in light of movements in inflation rates. At December 31, 2011, PPL Services' rate of compensation increase decreased from 4.75% to 4.00% for its U.S. plan.

In selecting health care cost trend rates for PPL Services' other postretirement benefit plans, PPL Services considers past performance and forecasts of health care costs. At December 31, 2011, PPL Services' health care cost trend rates were 8.50% for 2012, gradually declining to 5.50% for 2019.

A variance in the assumptions listed above could have a significant impact on the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and the regulatory assets allocated to PPL Electric. While the charts below reflect either an increase or decrease in each assumption, the inverse of this change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and regulatory assets by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption and does not include income tax effects.

At December 31, 2011, the defined benefit plans were recorded as follows.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. Past financial performance is no guarantee of future results.

Pension liabilities	$ (186)
Other postretirement benefit liabilities	(53)

The following chart reflects the sensitivities in the December 31, 2011 Balance Sheet associated with a change in certain assumptions based on PPL Services' primary defined benefit plans.

		Increase (Decrease)	
Actuarial assumption	Change in assumption	Impact on defined benefit liabilities	Impact on regulatory assets
Discount Rate	(0.25)%	$ 38	$ 38
Rate of Compensation Increase	0.25%	6	6
Health Care Cost Trend Rate (a)	1.00%	1	1

(a) Only impacts other postretirement benefits.

In 2011, PPL Electric was allocated net periodic defined benefit costs charged to operating expense of $17 million. This amount represents a $3 million decrease compared with the charge recognized during 2010.

The following chart reflects the sensitivities in the 2011 Statement of Income (excluding income tax effects) associated with a change in certain assumptions based on PPL Services' primary defined benefit plans.

Actuarial assumption	Change in assumption	Impact on defined benefit costs
Discount Rate	(0.25)%	$ 3
Expected Return on Plan Assets	(0.25)%	2
Rate of Compensation Increase	0.25%	1

2) Loss Accruals

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events, and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual, and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are used, as necessary, to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

No new significant loss accruals were recorded in 2011.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is "reasonably possible" that a loss has been incurred. See Note 15 to the Financial Statements for disclosure of other potential loss contingencies that have not met the criteria for accrual.

When an estimated loss is accrued, the triggering events for subsequently reducing the loss accrual are identified, where applicable. The triggering events generally occur when the contingency has been resolved and the actual loss is paid or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the reduction of certain recorded loss accruals:

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.

- Environmental and other litigation contingencies are reduced when the contingency is resolved and actual payments are made, a better estimate of the loss is determined or the loss is no longer considered probable.

Past financial performance is no guarantee of future results.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, operation management and other parties.

3) Income Taxes

Significant management judgment is required in developing the provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. Tax positions are evaluated following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. Management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, uncertain tax positions are reassessed by considering information known at the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position may be de-recognized, or the benefit of a previously recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2011, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase by as much as $48 million or decrease by up to $63 million. This change could result from the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. See Note 5 to the Financial Statements for income tax disclosures.

4) Regulatory Assets and Liabilities

PPL Electric's electricity delivery business is subject to cost-based rate regulation. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to other regulated entities, and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels, and is subject to change in the future. If future recovery of costs ceases to be probable, then asset write-offs would be required to be recognized in operating income. Additionally, the regulatory agencies can provide flexibility in the manner and timing of depreciation of PP&E and amortization of regulatory assets.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

At December 31, 2011 and 2010, PPL Electric had regulatory assets of $729 million and $655 million. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices. At December 31, 2011 and 2010, PPL Electric had regulatory liabilities of $60 million and $32 million.

In March 2012, PPL Electric plans to file a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives that transferred regulatory jurisdiction of certain transmission assets from the PUC to the FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is included in "Other Noncurrent Assets - Regulatory assets" on the Balance Sheet. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

See Note 6 to the Financial Statements for additional information on regulatory assets and liabilities.

5) Revenue Recognition - Unbilled Revenue

Revenues related to the sale of energy are recorded when energy is delivered to customers. Because customers are billed on cycles which vary based on the timing of the actual meter reads taken throughout the month, PPL Electric records estimates for unbilled revenues at the end of each reporting period. Such unbilled revenue amounts reflect estimates of the amount of energy delivered to customers since the date of the last reading of their meters. The unbilled estimate is based on daily load models, the meter read schedule, and actual weather data. The unbilled accrual is based on estimated usage for each customer class, and the current rate schedule pricing. At December 31, 2011 and 2010, PPL Electric had unbilled revenue of $98 million and $134 million.

Other Information

PPL's Audit Committee has approved the independent auditor to provide audit and audit-related services, tax services and other services permitted by Sarbanes-Oxley and SEC rules. The audit and audit-related services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews. See "Item 14. Principal Accounting Fees and Services" for more information.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information provided in this Item 7 should be read in conjunction with LKE's Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of LKE and its business strategy. "Financial and Operational Developments" includes a review of Net Income and discusses certain events that are important to understanding LKE's results of operations and financial condition.
- "Results of Operations" provides a summary of LKE's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on LKE's Statements of Income, comparing 2011, 2010 and 2009.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LKE's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.
- "Financial Condition - Risk Management" provides an explanation of LKE's risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of LKE and that require its management to make significant estimates, assumptions and other judgments of matters inherently uncertain.

Overview

Introduction

LKE, headquartered in Louisville, Kentucky, is a limited liability company. LKE became a wholly owned subsidiary of PPL when PPL acquired all of LKE's interests from E.ON US Investments Corp. on November 1, 2010. LKE has regulated utility operations through its subsidiaries, LG&E and KU, which constitute substantially all of LKE's assets. LG&E and KU are engaged in the generation, transmission, distribution and sale of electric energy. LG&E also engages in the distribution and sale of natural gas. LG&E and KU maintain their separate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name and it serves customers in Tennessee under the KU name. Refer to "Item 1. Business - Background" for a description of LKE's business.

Business Strategy

LKE's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

A key objective for LKE is to maintain a strong credit profile through managing financing costs and access to credit markets. LKE continually focuses on maintaining an appropriate capital structure and liquidity position.

Successor and Predecessor Financial Presentation

LKE's Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010, and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, which are discussed in Note 1 to the Financial Statements. The cost bases of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down basis of accounting, which was used to record the fair value adjustments of assets and liabilities at the acquisition date. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of LKE have not changed as a result of the acquisition.

Financial and Operational Developments

Net Income

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Net Income (Loss)	$ 265	$ 47	$ 190	$ (1,542)

The operating results for 2011 and 2010 include the effect of LG&E's and KU's base rate increases, which became effective August 1, 2010, partially offset by net cost increases, which have not yet been reflected in the rates charged by LG&E and KU. The operating results for the ten months ended October 31, 2010 also include $19 million of other income associated with the establishment of regulatory assets for previously recorded losses on interest rate swaps. The operating results for 2009 include a loss on impairment of goodwill of $1,493 million, which LKE recorded based on bids received from parties interested in purchasing LKE, including PPL. In addition, net income for 2009 includes $220 million of losses from discontinued operations primarily related to the disposition of a 25-year lease and operating agreements of WKE, for the generating facilities of BREC.

See "Results of Operations" below for further discussion and analysis of the results of operations.

TC2

LKE constructed a 732 MW summer capacity coal-fired unit, TC2, which is jointly owned by LG&E and KU (combined 75%), together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25%). With limited exceptions LKE took care, custody and control of TC2 in January 2011. LG&E and KU and the construction contractor further amended the construction agreement to provide that the contractor will complete certain actions to identify and complete any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. A number of remaining issues regarding these matters are still under discussion with the contractor. See Notes 8 and 15 to the Financial Statements for additional information.

Registered Debt Exchange Offer by LKE, LG&E and KU

In April 2011, LKE, LG&E and KU each filed a Registration Statement with the SEC, related to an offer to exchange certain senior notes and first mortgage bonds issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statements became effective in June 2011, and the exchanges were completed in July 2011, with substantially all of the senior notes and first mortgage bonds being exchanged. See Note 7 to the Financial Statements and the 2011 Registration Statements for additional information.

CSAPR

In July 2011, the EPA signed the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010, and made revisions to the rule on February 7, 2012. This rule applies to the Kentucky coal plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions.

In December 2011, the U.S. Court of Appeals for the District of Columbia (Court) stayed implementation of the CSAPR and left CAIR in effect pending a final resolution on the merits of the validity of the rule. Oral argument on the various challenges to the CSAPR is scheduled for April 2012, and a final decision on the validity of the rule could be issued as early as May 2012.

With respect to LKE's Kentucky coal-fired generating plants, the stay of the CSAPR will initially only impact the unit dispatch order. With the return of the CAIR and LG&E's and KU's significant number of sulfur dioxide allowances, those units will be dispatched with lower operating cost, but slightly higher sulfur dioxide and nitrogen oxide emissions. However, a key component of the Court's final decision, even if the CSAPR is upheld, will be whether the ruling delays the implementation of the CSAPR by one year for both Phases I and II, or instead still requires the significant sulfur dioxide and nitrogen oxide reductions associated with Phase II to begin in 2014. LG&E's and KU's CSAPR compliance strategy is based on over-compliance during Phase I to generate allowances sufficient to cover the expected shortage during the first two years

Past financial performance is no guarantee of future results.

of Phase II (2014 and 2015) when additional pollution control equipment will be installed. Should Phase I of the CSAPR be shortened to one year, it will be more difficult and costly to provide enough excess allowances in one year to meet the shortage projected for 2014 and 2015.

See Note 15 to the Financial Statements for additional information on the CSAPR.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, LG&E and KU anticipate retiring six older coal-fired electric generating units. These units are located at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. LG&E and KU also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply.

LG&E and KU anticipate that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 8 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, LG&E and KU filed ECR plans with the KPSC requesting approval to install environmental upgrades for certain of their coal-fired plants along with the recovery of their expected $1.4 billion for LG&E and $1.1 billion for KU in associated capital costs, as well as operating expenses incurred. The ECR plans detailed upgrades that will be made to certain of LG&E's and KU's coal-fired generating plants to continue to be compliant with EPA regulations.

In November 2011, LG&E and KU filed a unanimous settlement agreement, stipulation and recommendation with the KPSC. In December 2011, LG&E and KU received KPSC approval in their proceedings relating to the ECR plans. The KPSC Order approved the terms of the November 2011 settlement agreement entered into between LG&E and KU and the parties to the ECR proceedings. The KPSC Order authorized the installation of environmental upgrades at certain plants during 2012-2016 representing approximate capital costs of $1.4 billion at LG&E and $900 million at KU. In connection with the approved projects, the KPSC Order allows recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and granted CPCNs for their construction. The KPSC Order also confirmed an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans and provided for an authorized return on equity of 10.10% for the approved projects in the 2011 ECR proceedings. The KPSC Order noted KU's consent to defer the requested approval for certain environmental upgrades at its E.W. Brown generating plant, which represented approximately $200 million in capital costs. KU retained the right to operate and dispatch the E.W. Brown generating plant in accordance with applicable environmental standards and the right to request approval of the deferred projects and related costs in future regulatory proceedings See Note 6 to the Financial Statements for additional information.

Storm Recovery

In August 2011, a strong storm hit LG&E's service area causing significant damage and widespread outages for approximately 139,000 customers. LG&E filed an application with the KPSC in September 2011 requesting approval of a regulatory asset recorded to defer, for future recovery, $8 million in incremental operation and maintenance expenses related to the storm restoration. An Order was received in December 2011 granting regulatory accounting treatment, while recovery of the regulatory asset will be determined within the next base rate case.

In December 2009, a major snowstorm hit KU's Virginia service area causing approximately 30,000 customer outages. During the normal 2009 Virginia Annual Information Filing (AIF), KU requested that the VSCC establish a regulatory asset and defer for future recovery $6 million in incremental operation and maintenance expenses related to the storm restoration. In March 2011, the VSCC Staff issued its report on KU's 2009 AIF stating that it considered this storm damage to be extraordinary, non-recurring and material to KU. The Staff Report also recommended establishing a regulatory asset for these costs, with recovery over a five-year period upon approval in the next base rate case. In March 2011, a regulatory asset of $6 million was established for actual costs incurred. In June 2011, the VSCC issued an Order approving the recommendations contained in the Staff Report. KU received approval in its 2011 base rate case to recover this regulatory asset over a five-year period ending October 2016.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In September 2009, the KPSC approved the deferral of a total of $101 million ($44 million and $57 million for LG&E and KU) of costs associated with a severe ice storm that occurred in January 2009 and a wind storm that occurred in February 2009. Additionally, in December 2008, the KPSC approved the deferral of a total of $26 million ($24 million and $2 million for LG&E and KU) of costs associated with high winds from the remnants of Hurricane Ike in September 2008. LG&E and KU received approval in their 2010 base rate cases to recover these regulatory assets over a ten-year period beginning August 2010.

Virginia Rate Case

In April 2011, KU filed an application with the VSCC requesting an annual increase in electric base rates for its Virginia jurisdictional customers of $9 million, or 14%. In September 2011, a settlement stipulation was reached between KU and the VSCC Staff and filed with the VSCC for consideration. In October 2011, the VSCC approved the stipulation with two modifications that were accepted by KU. The VSCC issued an Order closing the proceeding in October 2011. The approved revenue increase was $7 million annually, based on a return on equity of 10.3%, with new base rates effective November 1, 2011.

Results of Operations

As previously noted, LKE's results for the time periods after October 31, 2010 are on a basis of accounting different from its results for time periods prior to November 1, 2010. When discussing LKE's results of operations material differences resulting from the different basis of accounting will be isolated for purposes of comparability. See "Overview - Successor and Predecessor Financial Presentation" for further information.

The utility business is affected by seasonal weather. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year. Revenue and earnings are generally higher during the first and third quarters and lower during the second quarter due to weather.

The following table summarizes the significant components of net income for 2011, 2010, and 2009 and the changes therein:

Earnings

	Successor	%	Combined	Successor	Predecessor	%	Predecessor
	Year Ended December 31, 2011	Change 2011 vs. 2010	Year Ended December 31, 2010	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Change 2010 vs. 2009	Year Ended December 31, 2009
Operating Revenues	$ 2,793	3	$ 2,708	$ 494	$ 2,214	8	$ 2,501
Fuel	866	1	861	138	723	13	762
Energy purchases	238	(15)	279	68	211	(26)	379
Other operation and maintenance	751	3	727	141	586	12	647
Depreciation	334	18	284	49	235	5	271
Taxes, other than income	37	61	23	2	21	(26)	31
Total Operating Expenses	2,226	2	2,174	398	1,776	4	2,090
Loss on Impairment						(100)	1,493
Other Income (Expense) - net	(1)	(108)	12	(2)	14	(48)	23
Interest Expense	147	(16)	176	24	152		176
Income Taxes	153	14	134	25	109	63	82
Income (Loss) from Discontinued Operations (net of income taxes)	(1)	(200)	1	2	(1)	(100)	(220)
Net Income (Loss)	265	12	237	47	190	(115)	(1,537)
Noncontrolling Interest - Loss from Discontinued Operations						(100)	5
Net Income (Loss) Attributable to Member	$ 265	12	$ 237	$ 47	$ 190	(115)	$ (1,542)

The changes in the components of Net Income between these periods were due to the following factors. The results are adjusted for certain items that management considers special. See additional detail of these special items in the table below.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2011 vs. 2010	2010 vs. 2009
Margin	$ 92	$ 191
Other operation and maintenance	(5)	(67)
Depreciation	(43)	(9)
Taxes, other than income	(14)	8
Other Income (Expense) - net	(13)	(11)
Interest Expense	29	
Income Taxes	(18)	(52)
Special Items, after-tax		1,719
	$ 28	$ 1,779

- See "Statement of Income Analysis - Margin - Changes in Non-GAAP Financial Measures" for an explanation of margin.

- Other operation and maintenance increased in 2010 compared with 2009, primarily due to higher administrative and general costs of $38 million and higher steam costs of $13 million. Administrative and general costs increased in part due to acquisition-related costs of $17 million and higher bad debt costs of $6 million, partially offset by lower pension costs of $6 million.

- Depreciation expense was $32 million higher in 2011 compared with 2010, due to TC2 commencing dispatch in January 2011.

- Taxes, other than income increased in 2011 compared with 2010, primarily due to a $9 million clean coal incentive tax credit that LKE was able to apply to property tax in 2010.

- Other Income (Expense) - net decreased in 2011 compared with 2010, primarily due to $19 million of other income from the establishment of a regulatory asset for previously recorded losses on interest rate swaps in 2010.

- Interest expense decreased in 2011 compared with 2010, due to lower interest rates and lower long-term debt balances. Lower interest rates contributed $17 million of the decrease in interest expense, as the interest rates on the first mortgage bonds were lower than the rates on the loans from Fidelia Corporation and other E.ON AG affiliates, which were replaced. Lower long-term debt principal balances contributed $15 million of the decrease, as LKE's long-term debt principal balances were lower for most of 2011, compared with its long-term debt principal balances as of December 31, 2010, this was partially offset; as LKE's long-term debt principal balances increased in 2011. LKE long-term debt principal balances were $248 million higher as of December 31, 2011 compared with December 31, 2010.

- Income taxes increased in 2011 compared with 2010, primarily due to the $19 million impact of higher pre-tax income.

  Income taxes increased in 2010 compared with 2009, primarily due to the $43 million impact of higher pre-tax income.

The following after-tax amounts, which management considers special items, also impacted earnings:

		Successor		Predecessor	
	Income Statement Line Item	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Special Items, net of tax benefit (expense):					
Energy-related economic activity, net of tax of $(1), $1, $0, $0 (a)	Operating revenues	$ 1	$ (1)		$ (1)
Impairment of goodwill, net of tax of $0, $0, $0, $0	Loss on impairment				(1,493)
BREC terminated lease, net of tax of $1, ($2), $1, $124 (b)	Disc. Operations	(1)	2	$ (1)	(212)
Argentine gas distribution, net of tax of $0, $0, $0, $(8) (c)	Disc. Operations				(8)
Argentine gas distribution, net of tax of $0, $0, $0, $0 (c)	Noncontrol. Interest				(5)
Total		$	$ 1	$ (1)	$ (1,719)

(a) Represents net unrealized gains (losses) on contracts that economically hedge anticipated cash flows .

(b) Represents costs associated with a terminated lease of WKE for the generating facilities of BREC. See Note 9 to the Financial Statements for additional information.

(c) Represents an impairment loss for LKE's interest in two gas distribution companies in Argentina, which it sold in 2010. See Note 9 to the Financial Statements for additional information.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

2012 Outlook

Excluding special items, LKE projects lower earnings in 2012 compared with 2011, as revenue increases are not expected to offset expense increases, which will include increases in depreciation expense, due to more plant in service and in interest expense, due to higher average debt balances as a result of capital expenditures. Actual results will be dependent on the effects of the economy and the impact of weather on retail sales among other variables. As a result of the stay out provision established in the settlement of the PPL-LKE acquisition, LKE is generally unable to implement an increase in base rates for its two regulated utilities in Kentucky before January 1, 2013.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 7, Notes 6 and 15 to the Financial Statements and "Business," and "Risk Factors" in this Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of LKE's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from LKE's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage LKE's operations and analyze actual results compared with budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by LKE for 2011, 2010 and 2009.

	2011 Successor		
	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 2,791	$ 2	$ 2,793
Operating Expenses			
Fuel	866		866
Energy purchases	238		238
Other operation and maintenance	90	661	751
Depreciation	49	285	334
Taxes, other than income		37	37
Total Operating Expenses	1,243	983	2,226
Total	$ 1,548	$ (981)	$ 567

	Successor			Predecessor		
	Two Months Ended December 31, 2010			Ten Months Ended October 31, 2010		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 495	$ (1)	$ 494	$ 2,214		$ 2,214
Operating Expenses						
Fuel	138		138	723		723
Energy purchases	68		68	211		211
Other operation and maintenance	14	127	141	57	$ 529	586
Depreciation	7	42	49	35	200	235
Taxes, other than income		2	2		21	21
Total Operating Expenses	227	171	398	1,026	750	1,776
Total	$ 268	$ (172)	$ 96	$ 1,188	$ (750)	$ 438

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2009 Predecessor		
	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 2,502	$ (1)	$ 2,501
Operating Expenses			
Fuel	762		762
Energy purchases	379		379
Other operation and maintenance	58	589	647
Depreciation	38	233	271
Taxes, other than income		31	31
Impairment		1,493	1,493
Total Operating Expenses	1,237	2,346	3,583
Total	$ 1,265	$ (2,347)	$ (1,082)

(a) Represents amounts excluded from Margin.
(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins were higher by $92 million for 2011 compared with 2010. New KPSC rates went into effect on August 1, 2010, contributing to an additional $112 million in operating revenue over the prior year. Partially offsetting the rate increase were lower retail volumes resulting from weather and economic conditions.

Other Operation and Maintenance

Changes in other operation and maintenance expense were due to the following:

	2011 vs. 2010	2010 vs. 2009
Fuel for generation (a)	$ 11	$ 2
Steam operation (b)	10	2
Distribution maintenance (c)	8	(2)
Steam maintenance (d)	4	11
Transmission operation (e)		7
Administrative and general (f)	(1)	38
Other generation maintenance (g)	(4)	6
Other	(4)	16
Total	$ 24	$ 80

(a) Fuel handling costs are included in fuel for electric generation on the Statements of Income for the Successor's periods and are in other operation and maintenance expense on the Statements of Income for the Predecessor's periods.
(b) Steam operation costs increased in 2011 compared with 2010, primarily due to higher variable costs, the result of TC2 commencing dispatch in 2011.
(c) Distribution maintenance costs increased in 2011 compared with 2010, primarily due to amortization of storm restoration-related costs along with a hazardous tree removal project initiated in August 2010, and an increase in pipeline integrity work. This increase was partially offset by $6 million of 2009 winter storm restoration expenses being reclassified to a regulatory asset in 2011.
(d) Steam maintenance costs increased in 2010 compared with 2009, primarily due to increased generation and boiler and electric maintenance costs related to outage work.
(e) Transmission operation costs increased in 2010 compared with 2009, primarily due to a settlement agreement with a third party resulting in the establishment of a regulatory asset in 2009.
(f) Administrative and general costs increased in 2010 compared with 2009, primarily due to acquisition-related costs of $17 million incurred in 2010, higher bad debt costs of $6 million and PPL support charges of $3 million incurred for two post-acquisition months in 2010, partially offset by lower pension costs of $6 million. Bad debt costs increased in 2010 compared with 2009, due to higher billed revenues and a higher net charge-off percentage partially offset by increased late payment charges. Pension costs decreased in 2010 compared with 2009, due to favorable asset performance in 2009.
(g) Other generation maintenance costs increased in 2010 compared with 2009, primarily due to the overhaul of Paddy's Run Unit 13.

Depreciation

Changes in depreciation were due to the following:

	2011 vs. 2010	2010 vs. 2009
TC2 (dispatch began in January 2011)	$ 32	
E.W. Brown sulfur dioxide scrubber equipment (placed in-service in June 2010)	8	$ 7
Ghent Unit 2 sulfur dioxide scrubber equipment (placed in-service in May 2009)		3
Other	10	3
Total	$ 50	$ 13

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Taxes, Other Than Income

Taxes, other than income increased by $14 million in 2011 compared with 2010 primarily due to a $9 million state coal tax credit that was applied to 2010 property taxes. The remaining increase was due to higher assessments, primarily from significant property additions. Taxes, other than income decreased by $8 million in 2010 compared with 2009 primarily due to a $5 million increase in the amount of state coal tax credits applied to property tax.

Loss on Impairment

LKE did not experience impairment losses in 2011 or in 2010. In 2009, the loss on impairment of goodwill was $1,493 million. LKE recorded goodwill impairment in 2009 based on bids received from parties interested in purchasing LKE, including PPL.

Other Income (Expense) - net

Changes in other income (expense) - net were due to the following:

	2011 vs. 2010	2010 vs. 2009
Net derivative gains (losses) (a)		$ (18)
Discontinuance of AFUDC on ECR projects as a result of the FERC rate case		(4)
Depreciation expense on TC2 joint-use assets held for future use	$ 3	(3)
Losses on interest rate swaps (b)	(19)	19
Other	3	(5)
Total	$ (13)	$ (11)

(a) Net derivative gains and losses includes the unrealized gains and losses on interest rate swaps not designated as hedging instruments and the ineffective portion of interest rate swaps designated and qualifying as a cash flow hedge.

(b) Other income in 2010 resulted from the establishment of a regulatory asset for previously recorded losses on interest rate swaps, which is included in "Net derivative gains and losses" within Note 17 to the Financial Statements.

Interest Expense

The changes in interest expense were due to:

	2011 vs. 2010	2010 vs. 2009
Interest rates (a)	$ (17)	$ (20)
Long-term debt balances (b)	(15)	8
Other	3	12
Total	$ (29)	$

(a) Interest rates on senior notes and first mortgage bonds issued in November 2010 were lower than the rates on the loans from Fidelia Corporation and other E.ON AG affiliates in place through October 2010.

(b) LKE's long-term debt principal balance was $923 million lower as of December 31, 2010 compared with December 31, 2009 primarily due to an equity contribution from PPL of $1.6 billion at the time of acquisition. LKE's long-term debt principal balance was $248 million higher as of December 31, 2011 compared with December 31, 2010.

Income Taxes

Changes in income taxes were due to the following:

	2011 vs. 2010	2010 vs. 2009
Income (Loss) from continuing operations excluding non-deductible impairment loss	$ 19	$ 43
Foreign tax		4
Other		5
Total	$ 19	$ 52

Income (Loss) from Discontinued Operations (net of income taxes)

Changes in income (loss) from discontinued operations (net of income taxes) were due to the following:

	2011 vs. 2010	2010 vs. 2009
BREC terminated lease (a)	$ (2)	$ 213
Argentine gas distribution (b)		8
Total	$ (2)	$ 221

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(a) In 2009, LKE completed the disposition of WKE's 25-year lease and operating agreements for the generating facilities owned or operated by BREC.
(b) In 2009, LKE recorded an impairment loss for two gas distribution companies located in Argentina, which it sold in 2010.

Financial Condition

Liquidity and Capital Resources

LKE expects to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents and its credit facilities.

LKE's cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- changes in market prices for electricity;
- changes in commodity prices that may increase the cost of producing power or decrease the amount LKE receives from selling power;
- operational and credit risks associated with selling and marketing products in the wholesale power markets;
- unusual or extreme weather that may damage LKE's transmission and distribution facilities or affect energy sales to customers;
- reliance on transmission and distribution facilities that LKE does not own or control to deliver its electricity and natural gas;
- unavailability of generating units (due to unscheduled or longer-than-anticipated generation outages, weather and natural disasters) and the resulting loss of revenues and additional costs of replacement electricity;
- the ability to recover and the timeliness and adequacy of recovery of costs associated with regulated utility businesses;
- costs of compliance with existing and new environmental laws;
- any adverse outcome of legal proceedings and investigations with respect to LKE's current and past business activities;
- deterioration in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and
- a downgrade in LKE's or its rated subsidiaries' credit ratings that could adversely affect their ability to access capital and increase the cost of credit facilities and any new debt.

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties affecting LKE's cash flows.

At December 31, LKE had the following:

	Successor		Predecessor
	2011	2010	2009
Cash and cash equivalents	$ 59	$ 11	$ 7
Short-term investments (a)		163	
	$ 59	$ 174	$ 7
Short-term debt (b)		$ 163	

(a) Represents tax-exempt bonds issued by Louisville/Jefferson County, Kentucky, on behalf of LG&E that were purchased from the remarketing agent in 2008. Such bonds were remarketed to unaffiliated investors in January 2011. See Note 7 to the Financial Statements for additional information.
(b) Represents borrowings under LG&E's $400 million syndicated credit facility. See Note 7 to the Financial Statements for additional information.

The changes in LKE's cash and cash equivalents position resulted from:

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Net cash provided by (used in) operating activities	$ 769	$ 26	$ 488	$ (204)
Net cash provided by (used in) investing activities	(265)	(211)	(426)	(706)
Net cash provided by (used in) financing activities	(456)	167	(40)	902
Net Increase (Decrease) in Cash and Cash Equivalents	$ 48	$ (18)	$ 22	$ (8)

Auction Rate Securities

At December 31, 2011, LG&E's and KU's tax-exempt revenue bonds that are in the form of auction rate securities and total $231 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the periods ended December 31, 2011, the weighted-average rate on LG&E's and KU's auction rate bonds in total was 0.25%.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Operating Activities

Net cash provided by operating activities increased by 50%, or $255 million, in 2011 compared with 2010, primarily as a result of:

- an increase in net income adjusted for non-cash effects of $177 million (deferred income taxes and investment tax credits of $101 million, depreciation of $50 million, amortization of regulatory assets of $15 million and other noncash items of $11 million, partially offset by unrealized (gains) losses on derivatives of $14 million, defined benefit plans - expense of $13 million and loss from discontinued operations - net of tax of $1 million);
- an increase in cash inflows related to income tax receivable of $79 million primarily due to net operating losses of $40 million recorded in 2010 and the payment of $40 million received by LKE for tax benefits in 2011;
- a net decrease in working capital related to unbilled revenues of $53 million due to colder weather in December 2010 as compared with December 2009 and milder weather in December 2011 as compared with December 2010; and
- a decrease in cash outflows of $29 million due to lower inventory levels in 2011 as compared with 2010 driven by $32 million for fuel inventory purchased in 2010 for TC2 that was not used until 2011 when TC2 began dispatch, $21 million due to lower coal burn as a result of unplanned outages at LG&E's Mill Creek plant and $6 million for decreases in gas storage volumes, partially offset by $22 million for KU's E.W. Brown and Ghent plants due primarily to increases in coal prices and $7 million for increases in coal in-transit; partially offset by
- an increase in discretionary defined benefit plan contributions of $105 million made in order to achieve LKE's long-term funding requirements.

Net cash provided by operating activities increased by 352%, or $718 million, in 2010 compared with 2009, primarily as a result of:

- the absence of payments made in July 2009 of $580 million for the WKE lease and operating agreement termination;
- an increase in net income adjusted for non-cash effects of $155 million (deferred income taxes and investment tax credits of $74 million, unrealized (gains) losses on derivatives of $47 million, depreciation of $13 million and amortization of regulatory assets of $3 million, partially offset by loss on impairment of goodwill of $1,493 million, loss from discontinued operations of $224 million, defined benefit plans - expense of $19 million and other noncash items of $20 million);
- lower storm expenses of $104 million; and
- the timing of ECR collections of $53 million; partially offset by
- a net increase in working capital from accounts receivable and unbilled revenues of $107 million due to the timing of cash receipts, an increase in base rates effective August 2010, colder weather in December 2009 as compared with December 2008 and colder weather in December 2010 as compared with December 2009;
- an increase in cash refunded to customers of $55 million due to prior period over-recoveries related to the gas supply clause filings;
- an increase in cash outflows related to inventory of $44 million, primarily due to a nominal decrease in the market price of natural gas in 2010 and a significant decrease in the market price of natural gas in 2009;
- an increase in backstop energy and aluminum production credit payments of $39 million under the smelter contract;
- higher interest payments of $33 million due to an accelerated settlement with E.ON AG; and
- an increase in discretionary defined benefit plan contributions of $14 million made in order to achieve LKE's long-term funding requirements.

Investing Activities

The primary use of cash in investing activities in 2011, 2010 and 2009 was capital expenditures. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2012 through 2016.

Net cash used in investing activities decreased by 58%, or $372 million, in 2011 compared with 2010, as a result of:

- proceeds from the sale of other investments of $163 million in 2011;
- a decrease in capital expenditures of $134 million, primarily due to the completion of KU's scrubber program in 2010 and TC2 being dispatched in 2011; and

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- an increase of notes receivable from affiliates of $107 million; partially offset by
- proceeds from sales of discontinued operations of $21 million in 2010 and
- a decrease in restricted cash of $11 million.

Net cash used in investing activities decreased by 10%, or $69 million, in 2010 compared with 2009, as a result of:

- a decrease in capital expenditures of $127 million, primarily due to lower expenditures related to the construction of TC2 and major storm events that occurred in 2009, and
- proceeds from sales of discontinued operations of $21 million in 2010; partially offset by
- a decrease of notes receivable from affiliates of $61 million;
- a decrease in restricted cash of $8 million;
- proceeds on the settlement of derivatives of $7 million in 2009; and
- proceeds from the sale of assets of $3 million in 2009.

Financing Activities

Net cash used in financing activities was $456 million in 2011 compared with net cash provided by financing activities of $127 million in 2010, primarily as a result of increased distributions to PPL and reduced contributions from PPL.

In 2011, cash used in financing activities consisted of:

- distributions to PPL of $533 million, which includes $248 million using the proceeds of the long-term debt issuance noted below;
- a repayment on a revolving line of credit of $163 million;
- the payment of debt issuance and credit facility costs of $8 million; and
- the repayment of debt of $2 million; partially offset by
- the issuance of senior notes of $250 million.

Net cash provided by financing activities was $127 million in 2010 compared with $902 million in 2009. In spite of significant new debt issuances associated with the repayments to E.ON AG affiliates in connection with PPL's acquisition of LKE, the cash provided by financing in 2010 is lower as a result of new debt issuances exceeding repayments by a smaller amount and by higher distributions paid in 2010.

In the two months of 2010 following PPL's acquisition of LKE, cash provided by financing activities of the Successor consisted of:

- the issuance of senior unsecured notes and first mortgage bonds of $2,890 million after discounts;
- the issuance of debt of $2,784 million to a PPL affiliate to repay debt due to E.ON AG affiliates upon the closing of PPL's acquisition of LKE;
- an equity contribution from PPL of $1,565 million; and
- a draw on a revolving line of credit of $163 million; partially offset by
- the repayment of debt to E.ON AG affiliates of $4,319 million upon the closing of PPL's acquisition of LKE;
- the repayment of debt to a PPL affiliate of $2,784 million upon the issuance of senior unsecured notes and first mortgage bonds;
- distributions to PPL of $100 million; and
- the payment of debt issuance and credit facility costs of $32 million.

In the ten months of 2010 preceding PPL's acquisition of LKE, cash used in financing activities by the Predecessor consisted of:

- the repayment of debt to an E.ON AG affiliate of $900 million;
- distributions to E.ON US Investments Corp. of $87 million; and
- a net decrease in notes payable with affiliates of $3 million; partially offset by
- the issuance of debt of $950 million to an E.ON AG affiliate.

In 2009, cash provided by financing activities by the Predecessor consisted of:

- the issuance of debt of $1,230 million to an E.ON AG affiliate, partially offset by
- the repayment of debt to an E.ON AG affiliate of $255 million;

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- distributions to E.ON US Investments Corp. of $49 million;
- a net decrease in notes payable with affiliates of $22 million; and
- distributions to noncontrolling interests of $2 million for discontinued operations in 2009.

See "Forecasted Sources of Cash" for a discussion of LKE's plans to issue debt securities, as well as a discussion of credit facility capacity available to LKE. Also see "Forecasted Uses of Cash" for a discussion of plans to pay dividends on common securities in the future, as well as maturities of long-term debt.

LKE's long-term debt securities activity through December 31, 2011 was:

	Debt	
	Issuances	Retirement
LKE Senior Notes	$ 250	
LG&E and KU Capital LLC Medium Term Notes (a)		$ (2)
Total Cash Flow Impact	$ 250	$ (2)
Non-cash Exchanges (b)		
LKE Senior Unsecured Notes	$ 875	$ (875)
LG&E First Mortgage Bonds	535	(535)
KU First Mortgage Bonds	1,500	(1,500)
Total Exchanged	$ 2,910	$ (2,910)
Net Increase	$ 248	

(a) Notes were retired upon maturity.

(b) In April 2011, LKE, LG&E and KU each filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The registration became effective in June 2011, and the exchanges were completed in July 2011 with substantially all securities being exchanged.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Forecasted Sources of Cash

LKE expects to continue to have sufficient sources of cash available in the near term, including various credit facilities and operating cash flow. LG&E expects to remarket $194 million of tax-exempt bonds that will be put back to LG&E in 2012. In February 2012, LG&E and KU each established a commercial paper program for up to $250 million to provide an additional financing source to fund each of their short-term liquidity needs. Commercial paper issuances will be supported by the respective Syndicated Credit Facility.

Credit Facilities

At December 31, 2011, LKE's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
LKE Credit Facility with a subsidiary of PPL Energy Supply	$ 300			$ 300
LG&E Credit Facility (a) (d)	400			400
KU Credit Facilities (a) (b) (d)	598		$ 198	400
Total Credit Facilities (c)	$ 1,298		$ 198	$ 1,100

(a) In June 2011, LG&E and KU each amended its respective Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon the respective company's senior secured long-term debt rating rather than the senior unsecured debt rating.

(b) In April 2011, KU entered into a new $198 million letter of credit facility that has been used to issue letters of credit to support outstanding tax exempt bonds. KU pays customary commitment and letter of credit fees under the new facility. The facility matures in April 2014. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.

(c) Total borrowings outstanding under LKE's credit facilities decreased on a net basis by $163 million since December 31, 2010.

(d) In October 2011, LG&E and KU each amended its respective syndicated credit facilities. The amendments included extending the expiration dates from December 2014 to October 2016. Under these facilities, LG&E and KU each continue to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under LG&E's and KU's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 9% of the total committed capacity; however, the PPL affiliate provides a commitment of approximately 23% of LKE's total facilities listed above.

See Note 7 to the Financial Statements for further discussion of LKE's credit facilities.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Operating Leases

LKE and its subsidiaries also have available funding sources that are provided through operating leases. LKE's subsidiaries lease office space, gas storage and certain equipment. These leasing structures provide LKE additional operating and financing flexibility. The operating leases contain covenants that are typical for these agreements, such as maintaining insurance, maintaining corporate existence and timely payment of rent and other fees.

See Note 11 to the Financial Statements for further discussion of the operating leases.

Forecasted Uses of Cash

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, LKE currently expects to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common securities and possibly the purchase or redemption of a portion of debt securities.

Capital Expenditures

The table below shows LKE's current capital expenditure projections for the years 2012 through 2016.

	Projected				
	2012	2013	2014	2015	2016
Construction expenditures (a)					
Generating facilities (b)	$ 275	$ 279	$ 345	$ 296	$ 117
Distribution facilities	212	257	237	282	270
Transmission facilities (c)	84	107	88	74	65
Environmental	612	873	852	681	92
Other	26	42	39	51	46
Total Construction Expenditures	$ 1,209	$ 1,558	$ 1,561	$ 1,384	$ 590

(a) Construction expenditures include AFUDC, which is not expected to be significant for the years 2012 through 2016.
(b) Includes approximately $700 million of currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. LKE expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.
(c) Includes approximately $100 million of currently estimable transmission costs related to replacement generation units. LKE expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.

LKE's capital expenditure projections for the years 2012 through 2016 total approximately $6.3 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes current estimates for LKE's environmental projects related to new and anticipated EPA compliance standards. Actual costs may be significantly lower or higher depending on the final requirements and market conditions. Certain environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism.

LKE plans to fund its capital expenditures in 2012 with cash on hand, cash from operations and short-term debt.

Contractual Obligations

LKE has assumed various financial obligations and commitments in the ordinary course of conducting its business. At December 31, 2011, the estimated contractual cash obligations of LKE were:

	Total	2012	2013 - 2014	2015 - 2016	After 2016
Long-term Debt (a)	$ 4,085			$ 900	$ 3,185
Interest on Long-term Debt (b)	2,725	$ 142	$ 277	274	2,032
Operating Leases (c)	56	15	24	11	6
Coal and Natural Gas Purchase Obligations (d)	2,829	823	1,281	695	30
Unconditional Power Purchase Obligations (e)	1,011	29	60	63	859
Construction Obligations (f)	409	278	116	13	2
Pension Benefit Plan Obligations (g)	55	55			
Other Obligations (h)	24	5	10	9	
Total Contractual Cash Obligations	$ 11,194	$ 1,347	$ 1,768	$ 1,965	$ 6,114

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(a) Reflects principal maturities only based on stated maturity dates. See Note 7 to the Financial Statements for a discussion of variable-rate remarketable bonds issued on behalf of LG&E and KU. LKE does not have any significant capital lease obligations.
(b) Assumes interest payments through stated maturity. The payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated.
(c) See Note 11 to the Financial Statements for additional information.
(d) Represents contracts to purchase coal, natural gas and natural gas transportation. See Note 15 to the Financial Statements for additional information.
(e) Represents future minimum payments under OVEC power purchase agreements through June 2040. See Note 15 to the Financial Statements for additional information.
(f) Represents construction commitments, including commitments for the Ghent landfill, Ohio Falls refurbishment and the Brown SCR construction including associated material transport systems for coal combustion residuals, which are also reflected in the Capital Expenditures table presented above.
(g) Based on the current funded status of LKE's qualified pension plans, no cash contributions are required. See Note 13 to the Financial Statements for a discussion of expected contributions.
(h) Represents other contractual obligations. Purchase orders made in the ordinary course of business are excluded from the amounts presented.

Dividends

From time to time, as determined by its Board of Directors, LKE pays dividends to the sole member, PPL.

As discussed in Note 7 to the Financial Statements, LG&E's and KU's ability to pay dividends is limited under a covenant in each of their $400 million revolving line of credit facilities. This covenant restricts their debt to total capital ratio to not more than 70%.

See Note 7 to the Financial Statements for other restrictions related to distributions on capital interests for LKE subsidiaries.

Purchase or Redemption of Debt Securities

LKE will continue to evaluate purchasing or redeeming outstanding debt securities and may decide to take action depending upon prevailing market conditions and available cash.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LKE and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LKE and its subsidiaries are based on information provided by LKE and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LKE or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in LKE's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets.

In LKE's 2011 Registration Statement, LKE described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, LKE is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to LKE's ratings, but without stating what ratings have been assigned to LKE or its subsidiaries, or their securities. The ratings assigned by the rating agencies to LKE and its subsidiaries and their respective securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions.

- Moody's affirmed all of the ratings for LKE and all of its rated subsidiaries;
- S&P revised the outlook for LKE, LG&E and KU and lowered the issuer and senior unsecured ratings of LKE and the issuer, senior secured and short-term ratings of LG&E and KU; and
- Fitch affirmed all of the ratings for LKE and all of its rated subsidiaries.

In April 2011, S&P took the following actions following the completion of PPL's acquisition of WPD Midlands:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- revised the outlook for LKE and all of its rated subsidiaries;
- raised the short-term ratings of LG&E and KU; and
- affirmed all of the long-term ratings for LKE and its rated subsidiaries.

In May 2011, S&P downgraded the long-term rating of four series of pollution control bonds issued on behalf of KU by one notch in connection with the substitution of the letters of credit enhancing these four bonds.

In September 2011, Moody's affirmed the issuer ratings for LG&E and KU and all of the ratings for LKE.

In November 2011, Moody's and S&P affirmed all of their ratings for LKE and all of its rated subsidiaries.

In December 2011, Fitch affirmed all of the ratings for LKE and all of its rated subsidiaries.

Ratings Triggers

LKE and its subsidiaries have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LKE and its subsidiaries to post additional collateral, or permitting the counterparty to terminate the contract, if LKE's or the subsidiaries' credit rating were to fall below investment grade. See Note 19 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at December 31, 2011. At December 31, 2011, if LKE's or its subsidiaries' credit ratings had been below investment grade, the maximum amount that LKE would have been required to post as additional collateral to counterparties was $84 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation and marketing operations, gas supply and interest rate contracts.

Off-Balance Sheet Arrangements

LKE has entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management

Market Risk

LKE is exposed to market risk from equity instruments, interest rate instruments and commodity instruments, as discussed below. However, regulatory cost recovery mechanisms significantly mitigate those risks. See Notes 1, 18 and 19 to the Financial Statements for information about LKE's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

LG&E's and KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E and KU are subject to commodity price risk for only a small portion of on-going business operations. LKE conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve LG&E's and KU's customers. LKE managed its energy commodity risk using derivative instruments, including swaps and forward contracts. See Note 19 to the Financial Statements for additional disclosures.

The balance and change in net fair value of LKE's commodity derivative contracts for the periods ended December 31, 2011, 2010, and 2009 are shown in the table below.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	Gains (Losses)			
	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Fair value of contracts outstanding at the beginning of the period	$ (2)			$ 2
Contracts realized or otherwise settled during the period	(3)		$ 3	10
Fair value of new contracts entered into during the period			(4)	1
Other changes in fair value (a)	5	$ (2)	1	(13)
Fair value of contracts outstanding at the end of the period	$	$ (2)	$	$

(a) Represents the change in value of outstanding transactions and the value of transactions entered into and settled during the period.

Interest Rate Risk

LKE and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. LKE utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under LKE's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LKE's debt portfolio due to changes in the absolute level of interest rates.

At December 31, 2011 and 2010, LKE's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LKE is also exposed to changes in the fair value of its debt portfolio. LKE estimated that a 10% decrease in interest rates at December 31, 2011, would increase the fair value of its debt portfolio by $125 million compared with $123 million at December 31, 2010.

LKE had the following interest rate hedges outstanding at:

	December 31, 2011			December 31, 2010		
	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates
Economic hedges						
Interest rate swaps (b)	$ 179	$ (60)	$ (4)	$ 179	$ (34)	$ (7)

(a) Includes accrued interest.

(b) LKE utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LKE is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at December 31, 2011 mature through 2033.

Credit Risk

LKE is exposed to potential losses as a result of nonperformance by counterparties of their contractual obligations. LKE maintains credit policies and procedures to limit counterparty credit risk including evaluating credit ratings and financial information along with having certain counterparties post margin if the credit exposure exceeds certain thresholds. LKE is exposed to potential losses as a result of nonpayment by customers. LKE maintains an allowance for doubtful accounts based on a historical charge-off percentage for retail customers. Allowances for doubtful accounts from wholesale and municipal customers and for miscellaneous receivables are based on specific identification by management. Retail, wholesale and municipal customer accounts are written-off after four months of no payment activity. Miscellaneous receivables are written-off as management determines them to be uncollectible.

Certain of LKE's derivative instruments contain provisions that require it to provide immediate and on-going collateralization of derivative instruments in net liability positions based upon LKE's credit ratings from each of the major credit rating agencies. See Notes 18 and 19 to the Financial Statements for information regarding exposure and the risk management activities.

Past financial performance is no guarantee of future results.

Related Party Transactions

LKE is not aware of any material ownership interest or operating responsibility by senior management of LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with LKE. See Note 16 to the Financial Statements for additional information on related party transactions between LKE and affiliates.

Environmental Matters

Protection of the environment is a major priority for LKE and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to LKE's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc.; and may impact the costs for their products or their demand for LKE's services. See "Item 1. Business - Environmental Matters" and Note 15 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 24 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). LKE's senior management has reviewed these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them, with PPL's Audit Committee.

1) Revenue Recognition - Unbilled Revenue

Revenues related to the sale of energy are recorded when service is rendered or when energy is delivered to customers. Because customers of LG&E's and KU's retail operations are billed on cycles which vary based on the timing of the actual reading of their electric and gas meters, LKE records estimates for unbilled revenues at the end of each reporting period. Such unbilled revenue amounts reflect estimates of the amount of energy delivered to customers since the date of the last reading of their meters. These unbilled revenues reflect consideration of estimated usage by customer class, the effect of different rate schedules, changes in weather, and where applicable, the impact of weather normalization or other regulatory provisions of rate structures. In addition to the unbilled revenue accrual resulting from cycle billing, LKE makes additional accruals resulting from the timing of customer bills. The accrual of unbilled revenues in this manner properly matches revenues and related costs. At December 31, 2011 and 2010 LKE had unbilled revenue balances of $146 million and $170 million.

2) Price Risk Management

See "Financial Condition - Risk Management" above.

3) Defined Benefits

LKE and certain of its subsidiaries sponsor and participate in qualified funded and non-qualified unfunded defined benefit pension plans. LKE also sponsors a funded other postretirement benefit plan. These plans are applicable to the majority of the employees of LKE and its subsidiaries. LKE records an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to OCI or regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Certain assumptions are made by LKE and certain of its subsidiaries regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on estimated results. Any differences between actual and estimated results are recorded in OCI or regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. These amounts in regulatory assets and liabilities are amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- Discount Rate - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Long-term Return on Plan Assets - Management projects the long-term rates of return on plan assets based on historical performance, future expectations and periodic portfolio rebalancing among the diversified asset classes. These projected returns reduce the net benefit costs LKE records currently.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.

- Health Care Cost Trend Rate - Management projects the expected increases in the cost of health care.

In selecting a discount rate for its defined benefit plans LKE starts with a cash flow analysis of the expected benefit payment stream for its plans. In 2010, these plan-specific cash flows were matched against a spot-rate yield curve to determine the assumed discount rate. To develop the spot-rate yield curve, the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, served as the base from which those with the lowest and highest yields were eliminated to develop an appropriate subset of bonds from which the ultimate yield curve would be built. At that time, management believed this plan-specific cash flow matching model represented the best available tool for estimating the discount rate. Beginning in 2011, LKE utilized a new tool that enhanced this plan-specific cash flow matching methodology by primarily matching the plan-specific cash flows against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the same universe of Aa-rated corporate bonds from which those with the lowest and highest yields were eliminated, similar to the yield curve approach. Individual bonds are then selected based on the timing of each plan's cash flows and parameters are established as to the percentage of each individual bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed. This process more accurately approximated the process of settlement of the obligations which better aligned with the objective of selecting the discount rate. At December 31, 2011 LKE decreased the discount rate for its pension plans from 5.49% to 5.08% and decreased the discount rate for its other postretirement benefit plan from 5.12% to 4.78%.

The expected long-term rates of return for LKE's defined benefit pension plans and defined other postretirement benefit plan have been developed using a best-estimate of expected returns, volatilities and correlations for each asset class. LKE management corroborates these rates with expected long-term rates of return calculated by its independent actuary, who uses a building block approach that begins with a risk-free rate of return with factors being added such as inflation, duration, credit spreads and equity risk. Each plan's specific asset allocation is also considered in developing a reasonable return assumption. At December 31, 2011, LKE's expected return on plan assets was 7.25%.

In selecting a rate of compensation increase, LKE considers past experience in light of movements in inflation rates. At December 31, 2011, LKE's rate of compensation increase changed from 5.25% to 4.00%.

In selecting health care cost trend rates LKE considers past performance and forecasts of health care costs. At December 31, 2011, LKE's health care cost trend rates were 8.50% for 2012, gradually declining to 5.50% for 2019.

A variance in the assumptions listed above could have a significant impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and OCI or regulatory assets and liabilities for LKE. While the charts below reflect either an increase or decrease in each assumption, the inverse of the change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and OCI or regulatory assets and liabilities for LKE by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption and does not include income tax effects.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

At December 31, 2011, the defined benefit plans were recorded as follows:

Pension liabilities (a)	$ 362
Other postretirement benefit liabilities	156

(a) Amount includes current and noncurrent portions.

The following chart reflects the sensitivities in the December 31, 2011 Balance Sheet associated with a change in certain assumptions based on LKE's primary defined benefit plans.

		Increase (Decrease)		
Actuarial assumption	Change in assumption	Impact on defined benefit liabilities	Impact on OCI	Impact on regulatory assets
Discount Rate	(0.25)%	$ 51	$ (18)	$ 33
Rate of Compensation Increase	0.25%	11	(6)	5
Health Care Cost Trend Rate (a)	1%	6	(1)	5

(a) Only impacts other postretirement benefits.

In 2011, LKE recognized net periodic defined benefit costs charged to operating expense of $51 million. This amount represents a $6 million decrease from 2010. This decrease in expense was primarily attributable to the increase in the expected return on plan assets resulting from the $150 million pension contribution in January 2011.

The following chart reflects the sensitivities in the 2011 Statement of Income (excluding income tax effects) associated with a change in certain assumptions based on LKE's primary defined benefit plans.

Actuarial assumption	Change in assumption	Impact on defined benefit costs
Discount Rate	(0.25)%	$ 5
Expected Return on Plan Assets	(0.25)%	2
Rate of Compensation Increase	0.25%	2
Health Care Cost Trend Rate (a)	1%	

(a) Only impacts other postretirement benefits.

4) Asset Impairment

Impairment analyses are performed for long-lived assets that are subject to depreciation or amortization whenever events or changes in circumstances indicate that a long-lived asset's carrying value may not be recoverable. For these long-lived assets classified as held and used, such events or changes in circumstances are:

- a significant decrease in the market price of an asset;
- a significant adverse change in the extent or manner in which an asset is being used or in its physical condition;
- a significant adverse change in legal factors or in the business climate;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of an asset;
- a current-period operating or cash flow loss combined with a history of losses or a forecast that demonstrates continuing losses; or
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

For a long-lived asset classified as held and used, impairment is recognized when the carrying amount of the asset is not recoverable and exceeds its fair value. The carrying amount is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the asset is impaired, an impairment loss is recorded to adjust the asset's carrying value to its estimated fair value. Management must make significant judgments to estimate future cash flows including the useful lives of long-lived assets, the fair value of the assets and management's intent to use the assets. Alternate courses of action are considered to recover the carrying value of a long-lived asset, and estimated cash flows from the "most likely" alternative are used to assess impairment whenever one alternative is clearly the most likely outcome. If no alternative is clearly the most likely, then a probability-weighted approach is used taking into consideration estimated cash flows from the alternatives. For assets tested for impairment as of the balance sheet date, the estimates of future cash flows used in that test consider the likelihood of possible outcomes that existed at the balance sheet date, including the assessment of the likelihood of a future sale of the assets. That assessment is not revised based on events

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

that occur after the balance sheet date. Changes in assumptions and estimates could result in significantly different results than those identified and recorded in the financial statements.

For a long-lived asset classified as held for sale, impairment exists when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If the asset (disposal group) is impaired, an impairment loss is recorded to adjust the carrying amount to its fair value less cost to sell. A gain is recognized for any subsequent increase in fair value less cost to sell, but not in excess of the cumulative impairment previously recognized.

For determining fair value, quoted market prices in active markets are the best evidence. However, when market prices are unavailable, LKE considers all valuation techniques appropriate under the circumstances and for which market participant inputs can be obtained. Generally discounted cash flows are used to estimate fair value, which incorporates market participant inputs when available. Discounted cash flows are calculated by estimating future cash flow streams and applying appropriate discount rates to determine the present value of the cash flow streams.

In 2011, LKE did not recognize an impairment of any long-lived assets.

Goodwill is tested for impairment at the reporting unit level. LKE's reporting unit has been determined to be at the operating segment level. A goodwill impairment test is performed annually or more frequently if events or changes in circumstances indicate that the carrying value of the reporting unit may be greater than the unit's fair value. Additionally, goodwill is tested for impairment after a portion of goodwill has been allocated to a business to be disposed of. Goodwill is tested for impairment using a two-step approach. In step 1, LKE identifies a potential impairment by comparing the estimated fair value of LKE (the goodwill reporting unit) to its carrying value, including goodwill, on the measurement date. If the estimated fair value exceeds its carrying amount, goodwill is not considered impaired. If the carrying amount exceeds the estimated fair value, the second step is performed to measure the amount of impairment loss, if any.

The second step requires a calculation of the implied fair value of goodwill which is determined in the same manner as the amount of goodwill in a business combination. That is, the estimated fair value is allocated to all of LKE's assets and liabilities as if LKE had been acquired in a business combination and the estimated fair value of LKE was the price paid. The excess of the estimated fair value of LKE over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The implied fair value of goodwill is then compared with the carrying amount of that goodwill. If the carrying amount exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of the reporting unit's goodwill.

LKE tested goodwill for impairment in the fourth quarter of 2011 and no impairment was recognized. Management used both discounted cash flows and market multiples to estimate the fair value of LKE, which involved the use of significant estimates and assumptions. Applying an appropriate weighting to both the discounted cash flow and market multiple valuations, a decrease in the forecasted cash flows of 10%, an increase in the discount rate by 25 basis points, or a 10% decrease in the multiples would not have resulted in an impairment of goodwill.

5) Loss Accruals

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are used, as necessary to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

In 2011, no significant adjustments were made to LKE's existing contingencies. See Note 15 to the Financial Statements for commitment and contingency disclosures.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is reasonably possible that a loss has been incurred. Accounting guidance defines "reasonably possible" as cases in which "the future event or events occurring is more than remote, but less than likely to occur." See Note 15 to the Financial Statements, for disclosure of other potential loss contingencies that have not met the criteria for accrual.

When an estimated loss is accrued, the triggering events for subsequently adjusting the loss accrual are identified, where applicable. The triggering events generally occur when the contingency has been resolved and the actual loss is paid or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the adjustment of certain recorded loss accruals:

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.

- Environmental and other litigation contingencies are reduced when the contingency is resolved, LKE makes actual payments, a better estimate of the loss is determined or the loss is no longer considered probable.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, operation management and other parties.

6) Asset Retirement Obligations

LKE is required to recognize a liability for legal obligations associated with the retirement of long-lived assets. The initial obligation is measured at its estimated fair value. An equivalent amount is recorded as an increase in the value of the capitalized asset and allocated to expense over the useful life of the asset. Until the obligation is settled, the liability is increased, through the recognition of accretion expense in the Consolidated Statements of Income, for changes in the obligation due to the passage of time. The accretion and depreciation are offset with a regulatory credit on the income statement, such that there is no earnings impact. The regulatory asset created by the regulatory credit is relieved when the ARO has been settled. An ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. See Note 21 to the Financial Statements for related disclosures.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that considers estimated retirement costs in current period dollars that are inflated to the anticipated retirement date and then discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of various AROs and the related assets, are reviewed periodically to ensure that any material changes are incorporated into the estimate of the obligations. Any change to the capitalized asset is amortized over the remaining life of the associated long-lived asset.

At December 31, 2011, LKE had AROs comprised of current and noncurrent amounts, totaling $118 million recorded on the Balance Sheet. Of the total amount, $74 million, or 63%, relates to LKE's ash ponds, landfills and natural gas mains. The most significant assumptions surrounding AROs are the forecasted retirement costs, the discount rates and the inflation rates. A variance in the forecasted retirement costs, the discount rates or the inflation rates could have a significant impact on the ARO liabilities.

The following chart reflects the sensitivities related to LKE's ARO liabilities for ash ponds, landfills and natural gas mains at December 31, 2011:

	Change in Assumption	Impact on ARO Liability
Retirement Cost	10%	$ 7
Discount Rate	(0.25)%	4
Inflation Rate	0.25%	4

7) Income Taxes

Significant management judgment is required in developing LKE's provision for income taxes primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. LKE evaluates its tax positions following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization upon settlement that exceeds 50%. LKE's management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, LKE's uncertain tax positions are reassessed by considering information known at the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position maybe de-recognized, or the benefit of a previously recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2011, LKE's existing reserve exposure to either increases or decreases in unrecognized tax benefits during the next 12 months is less than $1 million. This change could result from subsequent recognition, de-recognition and/or changes in the measurement of uncertain tax positions. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. See Note 5 to the Financial Statements for related disclosures.

8) Regulatory Assets and Liabilities

LKE's subsidiaries, LG&E and KU, are cost-based rate-regulated utilities. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC, the KPSC, the VSCC and the TRA. See Note 6 to the Financial Statements for related disclosures.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to other regulated entities and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels, and is subject to change in the future. If future recovery of costs ceases to be probable, then asset write-off would be required to be recognized in operating income. Additionally, the regulatory agencies can provide flexibility in the manner and timing of the depreciation of PP&E and amortization of regulatory assets.

At December 31, 2011 and 2010, LKE had regulatory assets of $629 million and $610 million. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices. At December 31, 2011 and 2010, LKE had regulatory liabilities of $1,023 million and $1,108 million.

LOUISVILLE GAS AND ELECTRIC COMPANY

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information provided in this Item 7 should be read in conjunction with LG&E's Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of LG&E and its business strategy. "Financial and Operational Developments" includes a review of Net Income and discusses certain events that are important to understanding LG&E's results of operations and financial condition.
- "Results of Operations" provides a summary of LG&E's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on LG&E's Statements of Income, comparing 2011, 2010 and 2009.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LG&E's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.
- "Financial Condition - Risk Management" provides an explanation of LG&E's risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of LG&E and that require its management to make significant estimates, assumptions and other judgments of matters inherently uncertain.

Overview

Introduction

LG&E, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy and distribution and sale of natural gas in Kentucky. LG&E and its affiliate, KU, are wholly owned subsidiaries of LKE. LKE, a limited liability company, became a wholly owned subsidiary of PPL when PPL acquired all of LKE's interests from E.ON US Investments Corp. on November 1, 2010. Following the acquisition, both LG&E and KU continue operating as subsidiaries of LKE, which is now an intermediary holding company in PPL's group of companies. Refer to "Item 1. Business - Background" for a description of LG&E's business.

Business Strategy

LG&E's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

A key objective for LG&E is to maintain a strong credit profile through managing financing costs and access to credit markets. LG&E continually focuses on maintaining an appropriate capital structure and liquidity position.

Successor and Predecessor Financial Presentation

LG&E's Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010, and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, which are discussed in Note 1 to the Financial Statements. The cost bases of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down basis of accounting, which was used to record the fair value adjustments of assets and liabilities at the acquisition date. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of LG&E have not changed as a result of the acquisition.

Financial and Operational Developments

Net Income

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Net Income	$ 124	$ 19	$ 109	$ 95

The operating results for 2011 and 2010 include the effect of LG&E's base rate increases, which became effective August 1, 2010, partially offset by net cost increases, which have not yet been reflected in the rates charged by LG&E. The operating results for the ten months ended October 31, 2010 also include $19 million of other income associated with the establishment of regulatory assets for previously recorded losses on interest rate swaps. The operating results for 2009 were impacted by $18 million of derivative gains.

See "Results of Operations" below for further discussion and analysis of the results of operations.

TC2

LG&E and KU constructed a 732 MW summer capacity coal-fired unit, TC2, which is jointly owned by LG&E (14.25%) and KU (60.75%), together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25%). With limited exceptions, LG&E and KU took care, custody and control of TC2 in January 2011. LG&E and KU and the construction contractor further amended the construction agreement to provide that the contractor will complete certain actions to identify and complete any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. A number of remaining issues regarding these matters are still under discussion with the contractor. See Notes 8 and 15 to the Financial Statements for additional information.

Registered Debt Exchange Offer by LG&E

In April 2011, LG&E filed a Registration Statement with the SEC, related to an offer to exchange certain first mortgage bonds issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statement became effective in June 2011, and the exchange was completed in July 2011 with all of the first mortgage bonds being exchanged. See Note 7 to the Financial Statements and LG&E's 2011 Registration Statement for additional information.

CSAPR

In July 2011, the EPA signed the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010, and made revisions to the rule on February 7, 2012. This rule applies to the Kentucky coal plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions.

In December 2011, the U.S. Court of Appeals for the District of Columbia (Court) stayed implementation of the CSAPR and left CAIR in effect pending a final resolution on the merits of the validity of the rule. Oral argument on the various challenges to the CSAPR is scheduled for April 2012, and a final decision on the validity of the rule could be issued as early as May 2012.

With respect to LG&E's coal-fired generating plants, the stay of the CSAPR will initially only impact the unit dispatch order. With the return of the CAIR and LG&E's significant number of sulfur dioxide allowances, those units will be dispatched with lower operating cost, but slightly higher sulfur dioxide and nitrogen oxide emissions. However, a key component of the Court's final decision, even if the CSAPR is upheld, will be whether the ruling delays the implementation of the CSAPR by one year for both Phases I and II, or instead still requires the significant sulfur dioxide and nitrogen oxide reductions associated with Phase II to begin in 2014. LG&E's CSAPR compliance strategy is based on over-compliance during Phase I to generate allowances sufficient to cover the expected shortage during the first two years of Phase II (2014 and 2015) when additional pollution control equipment will be installed. Should Phase I of the CSAPR be shortened to one year, it will be more difficult and costly to provide enough excess allowances in one year to meet the shortage projected for 2014 and 2015.

Past financial performance is no guarantee of future results.

See Note 15 to the Financial Statements for additional information on the CSAPR.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, LG&E anticipates retiring three older coal-fired electric generating units, located at the Cane Run plant, which have a combined summer rating of 563 MW. LG&E and KU also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply.

LG&E anticipates that its share of the NGCC construction and the acquisition of the Bluegrass CTs could require up to $300 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 8 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, LG&E filed an ECR plan with the KPSC requesting approval to install environmental upgrades for certain of its coal-fired plants along with the recovery of the expected $1.4 billion in associated capital costs, as well as operating expenses incurred. The ECR plan detailed upgrades that will be made to certain of LG&E's coal-fired generating plants to continue to be compliant with EPA regulations.

In November 2011, LG&E filed a unanimous settlement agreement, stipulation and recommendation with the KPSC. In December 2011, LG&E received KPSC approval in its proceedings relating to the ECR plan. The KPSC Order approved the terms of the November 2011 settlement agreement entered into between LG&E and the parties to the ECR proceedings. The KPSC Order authorized the installation of environmental upgrades at certain plants during 2012-2016 representing approximate capital costs of $1.4 billion at LG&E. In connection with the approved projects, the KPSC Order allows recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and granted CPCN for their construction. The KPSC Order also confirmed an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans and provided for an authorized return on equity of 10.10% for the approved projects in the 2011 ECR proceedings. See Note 6 to the Financial Statements for additional information.

Storm Recovery

In August 2011, a strong storm hit LG&E's service area causing significant damage and widespread outages for approximately 139,000 customers. LG&E filed an application with the KPSC in September 2011 requesting approval of a regulatory asset recorded to defer, for future recovery, $8 million in incremental operation and maintenance expenses related to the storm restoration. An Order was received in December 2011 granting regulatory accounting treatment, while recovery of the regulatory asset will be determined within the next base rate case.

In September 2009, the KPSC approved the deferral of $44 million of costs associated with a severe ice storm that occurred in January 2009 and a wind storm that occurred in February 2009. Additionally, in December 2008, the KPSC approved the deferral of $24 million of costs associated with high winds from the remnants of Hurricane Ike in September 2008. LG&E received approval in its 2010 base rate case to recover these regulatory assets over a ten-year period beginning August 2010.

Results of Operations

As previously noted, LG&E's results for the time periods after October 31, 2010 are on a basis of accounting different from its results for time periods prior to November 1, 2010. When discussing LG&E's results of operations material differences resulting from the different basis of accounting will be isolated for purposes of comparability. See "Overview - Successor and Predecessor Financial Presentation" for further information.

The utility business is affected by seasonal weather. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year. Revenue and earnings are generally higher during the first and third quarters and lower during the second quarter due to weather.

The following table summarizes the significant components of net income for 2011, 2010, and 2009 and the changes therein:

Earnings

	Successor	% Change	Combined	Successor	Predecessor	% Change	Predecessor
	Year Ended December 31, 2011	2011 vs. 2010	Year Ended December 31, 2010	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	2010 vs. 2009	Year Ended December 31, 2009
Operating Revenues	$ 1,364	4	$ 1,311	$ 254	$ 1,057	3	$ 1,272
Fuel	350	(4)	366	60	306	12	328
Energy purchases	245	12	218	63	155	(28)	302
Other operation and maintenance	363	4	348	67	281	8	323
Depreciation	147	7	138	23	115	1	136
Taxes, other than income	18	38	13	1	12	(19)	16
Total Operating Expenses	1,123	4	1,083	214	869	(2)	1,105
Other Income (Expense) - net	(2)	(114)	14	(3)	17	(26)	19
Interest Expense	44	(4)	46	8	38	5	44
Income Taxes	71	4	68	10	58	45	47
Net Income	$ 124	(3)	$ 128	$ 19	$ 109	35	$ 95

The changes in the components of Net Income between these periods were due to the following factors. The results are adjusted for certain items that management considers special. See additional detail of this special item below.

	2011 vs. 2010	2010 vs. 2009
Margin	$ 39	$ 87
Other operation and maintenance	(10)	(23)
Depreciation	(13)	(6)
Taxes, other than income	(5)	3
Other Income (Expense) - net	(16)	(5)
Interest Expense	2	(2)
Income Taxes	(3)	(21)
Special Items	2	
	$ (4)	$ 33

The net unrealized gains (losses) on contracts that economically hedge anticipated cash flows are considered special items by management. The after-tax amounts for 2011 and for 2010 were insignificant.

- See "Statement of Income Analysis - Margin - Changes in Non-GAAP Financial Measures" for an explanation of margin.

- Other operation and maintenance increased in 2011 compared with 2010, primarily due to higher distribution maintenance costs of $8 million and higher administrative and general costs of $4 million. Distribution maintenance costs increased due to amortization of storm restoration related costs, together with a hazardous tree removal project initiated in August 2010.

  Other operation and maintenance increased in 2010 compared with 2009, primarily due to higher steam maintenance costs of $9 million, administrative and general costs of $4 million, other generation maintenance costs of $3 million, and transmission operation costs of $2 million. Steam maintenance costs increased due to higher boiler and electric maintenance costs related to outage work.

- Depreciation expense was $7 million higher in 2011 compared with 2010, due to TC2 commencing dispatch in January 2011.

- Other Income (Expense) - net decreased in 2011 compared with 2010, primarily due to $19 million of other income from the establishment of a regulatory asset for previously recorded losses on interest rate swaps in 2010.

- Income taxes increased in 2010 compared with 2009, primarily due to the $21 million impact of higher pre-tax income.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

2012 Outlook

LG&E projects lower earnings in 2012 compared with 2011, as revenue increases are not expected to offset operating expense increases, including depreciation, due to more plant in service. Actual results will be dependent on the effects of the economy and the impact of weather on retail sales among other variables. As a result of the stay out provision established in the settlement of the PPL-LKE acquisition, LG&E is generally unable to implement an increase in its base rates before January 1, 2013.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 7, Notes 6 and 15 to the Financial Statements and "Business," and "Risk Factors" in this Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of LG&E's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from LG&E's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared with budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by LG&E for 2011, 2010 and 2009.

	2011 Successor		
	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 1,363	$ 1	$ 1,364
Operating Expenses			
Fuel	350		350
Energy purchases	245		245
Other operation and maintenance	42	321	363
Depreciation	2	145	147
Taxes, other than income		18	18
Total Operating Expenses	639	484	1,123
Total	$ 724	$ (483)	$ 241

	Successor			Predecessor		
	Two Months Ended December 31, 2010			Ten Months Ended October 31, 2010		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 255	$ (1)	$ 254	$ 1,057		$ 1,057
Operating Expenses						
Fuel	60		60	306		306
Energy purchases	63		63	155		155
Other operation and maintenance	9	58	67	28	$ 253	281
Depreciation		23	23	6	109	115
Taxes, other than income		1	1		12	12
Total Operating Expenses	132	82	214	495	374	869
Total	$ 123	$ (83)	$ 40	$ 562	$ (374)	$ 188

	2009 Predecessor		
	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 1,273	$ (1)	$ 1,272
Operating Expenses			
Fuel	328		328
Energy purchases	302		302
Other operation and maintenance	35	288	323
Depreciation	10	126	136
Taxes, other than income		16	16
Total Operating Expenses	675	430	1,105
Total	$ 598	$ (431)	$ 167

(a) Represents amounts excluded from Margin.
(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins were higher by $39 million for 2011 compared with 2010. New KPSC rates went into effect on August 1, 2010, contributing an additional $48 million in operating revenue over the prior year. Partially offsetting the rate increase were lower retail volumes resulting from weather and economic conditions.

Other Operation and Maintenance

Changes in other operation and maintenance expense were due to the following:

	2011 vs. 2010	2010 vs. 2009
Fuel for generation (a)	$ 5	$ 1
Distribution maintenance (b)	8	1
Steam maintenance (c)	(5)	9
Transmission operation	1	2
Administrative and general	4	4
Other generation maintenance	(2)	3
Other	4	5
Total	$ 15	$ 25

(a) Fuel handling costs are included in fuel for electric generation on the Statements of Income for the Successor's periods and are in other operation and maintenance expense on the Statements of Income for the Predecessor's periods.
(b) Distribution maintenance costs increased in 2011 compared with 2010, primarily due to amortization of storm restoration-related costs along with a hazardous tree removal project initiated in August 2010 and an increase in pipeline integrity work.
(c) Steam maintenance costs decreased in 2011 compared with 2010, primarily due to the timing of scheduled maintenance outages and non-outage boiler maintenance.

Steam maintenance costs increased in 2010 compared with 2009, primarily due to higher boiler and electric maintenance costs related to outage work.

Depreciation

Changes in depreciation were due to the following:

	2011 vs. 2010	2010 vs. 2009
TC2 (dispatch began in January 2011)	$ 7	
Other	2	$ 2
Total	$ 9	$ 2

Taxes, Other Than Income

Taxes, other than income increased by $5 million in 2011 compared with 2010 primarily due to a $4 million state coal tax credit that was applied to 2010 property taxes. The remaining increase was due to higher assessments, primarily from significant property additions.

Other Income (Expense) - net

Changes in other income (expense) - net were due to the following:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2011 vs. 2010	2010 vs. 2009
Net derivative gains (losses) (a)		$ (18)
Losses on interest rate swaps (b)	$ (19)	19
Other	3	(6)
Total	$ (16)	$ (5)

(a) Net derivative gains and losses includes the unrealized gains and losses on interest rate swaps not designated as hedging instruments and the ineffective portion of interest rate swaps designated and qualifying as a cash flow hedge.
(b) Other income in 2010 resulted from the establishment of a regulatory asset for previously recorded losses on interest rate swaps, which is included in "Net derivative gains and losses" within Note 17 to the Financial Statements.

Interest Expense

The changes in interest expense were due to:

	2011 vs. 2010	2010 vs. 2009
Interest rates (a)	$ (7)	$ (2)
Long-term debt balances (b)	2	
Other	3	4
Total	$ (2)	$ 2

(a) Interest rates on the first mortgage bonds issued in November 2010 were lower than the rates on the loans from Fidelia Corporation in place through October 2010.
(b) LG&E's long-term debt principal balance was $213 million higher as of December 31, 2010 compared with December 31, 2009 and did not change as of December 31, 2010 compared with December 31, 2011. The higher interest expense in 2011 was the result of lower long-term debt balances for the first ten months of 2010.

Income Taxes

Changes in income taxes were due to the following:

	2011 vs. 2010	2010 vs. 2009
Higher pre-tax income		$ 21
Other	$ 3	
Total	$ 3	$ 21

Financial Condition

Liquidity and Capital Resources

LG&E expects to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents and its credit facilities.

LG&E's cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- changes in market prices for electricity;
- changes in commodity prices that may increase the cost of producing power or decrease the amount LG&E receives from selling power;
- operational and credit risks associated with selling and marketing products in the wholesale power markets;
- unusual or extreme weather that may damage LG&E's transmission and distribution facilities or affect energy sales to customers;
- reliance on transmission and distribution facilities that LG&E does not own or control to deliver its electricity and natural gas;
- unavailability of generating units (due to unscheduled or longer-than-anticipated generation outages, weather and natural disasters) and the resulting loss of revenues and additional costs of replacement electricity;
- the ability to recover and the timeliness and adequacy of recovery of costs associated with regulated utility businesses;
- costs of compliance with existing and new environmental laws;
- any adverse outcome of legal proceedings and investigations with respect to LG&E's current and past business activities;
- deterioration in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- a downgrade in LG&E's credit ratings that could adversely affect its ability to access capital and increase the cost of credit facilities and any new debt.

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties affecting LG&E's cash flows.

At December 31, LG&E had the following:

	Successor		Predecessor
	2011	2010	2009
Cash and cash equivalents	$ 25	$ 2	$ 5
Short-term investments (a)		163	
	$ 25	$ 165	$ 5
Short-term debt (b)		$ 163	

(a) Represents tax-exempt bonds issued by Louisville/Jefferson County, Kentucky, on behalf of LG&E that were purchased from the remarketing agent in 2008. Such bonds were remarketed to unaffiliated investors in January 2011. See Note 7 to the Financial Statements for additional information.
(b) Represents borrowings under LG&E's $400 million syndicated credit facility. See Note 7 to the Financial Statements for additional information.

The changes in LG&E's cash and cash equivalents position resulted from:

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Net cash provided by (used in) operating activities	$ 321	$ (8)	$ 189	$ 309
Net cash provided by (used in) investing activities	(38)	(63)	(107)	(176)
Net cash provided by (used in) financing activities	(260)	69	(83)	(132)
Net Increase (Decrease) in Cash and Cash Equivalents	$ 23	$ (2)	$ (1)	$ 1

Auction Rate Securities

At December 31, 2011, LG&E's tax-exempt revenue bonds that are in the form of auction rate securities and total $135 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the period ended December 31, 2011, the weighted-average rate on LG&E's auction rate bonds in total was 0.24%.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Operating Activities

Net cash provided by operating activities increased by 77%, or $140 million, in 2011 compared with 2010, primarily as a result of:

- a decrease in working capital related to accounts receivable and unbilled revenues of $87 million primarily due to the timing of cash receipts and colder weather in December 2010 as compared with December 2009 and milder weather in December 2011 as compared with December 2010;
- an increase in net income adjusted for non-cash effects of $33 million (the recording of a regulatory asset for previously recorded losses on interest rate swaps of $22 million, deferred income taxes and investment tax credits of $17 million, depreciation of $9 million and other noncash items of $6 million, partially offset by unrealized (gains) losses on derivatives of $14 million and defined benefit plans - expense of $3 million);
- a decrease in cash outflows of $32 million due to lower inventory levels in 2011 as compared with 2010 driven by $21 million due to lower coal burn as a result of unplanned outages at the Mill Creek plant, $8 million for fuel inventory purchased in 2010 for TC2 that was not used until 2011 when TC2 began dispatch and $6 million for decreases in gas storage volumes;
- a decrease in cash refunded to customers of $25 million due to prior period over-recoveries related to the gas supply clause filings in 2009; and
- a decrease in cash outflows related to accrued taxes of $22 million due to the timing of payments of accrued tax liabilities in 2011 and 2010; partially offset by
- an increase in discretionary defined benefit plan contributions of $44 million made in order to achieve LG&E's long-term funding requirements; and

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

Past financial performance is no guarantee of future results.

- an increase in working capital related to accounts payable of $41 million, which was driven primarily by the timing of cash payments and a decrease in natural gas purchases of $18 million in 2011 as compared with 2010 due to a decrease in combustion turbine generation as a result of the dispatch of TC2 beginning in January 2011.

Net cash provided by operating activities decreased by 41%, or $128 million, in 2010 compared with 2009, primarily as a result of:

- an increase in working capital related to accounts receivable and unbilled revenues of $101 million primarily due to the timing of cash receipts and colder weather in December 2009 as compared with December 2008 and colder weather in December 2010 as compared with December 2009;
- an increase in cash outflows related to inventory of $57 million, primarily due to a nominal decrease in the market price of natural gas in 2010 and a significant decrease in the market price of natural gas in 2009;
- an increase in cash refunded to customers of $55 million due to prior period over-recoveries related to the gas supply clause filings;
- higher interest payments of $14 million due to an accelerated settlement with E.ON AG; and
- an increase in discretionary defined benefit plan contributions of $11 million made in order to achieve LG&E's long-term funding requirements; partially offset by
- an increase in net income adjusted for non-cash effects of $80 million (unrealized (gains) losses on derivatives of $47 million, deferred income taxes and investment tax credits of $19 million, depreciation of $2 million and other noncash items of $10 million, partially offset by the recording of a regulatory asset for previously recorded losses on interest rate swaps of $22 million and defined benefit plans - expense of $9 million);
- lower storm expenses of $45 million; and
- a decrease in cash outflows related to accrued taxes of $26 million due to the timing of payments of accrued tax liabilities in 2010 and 2009.

Investing Activities

The primary use of cash in investing activities in 2011, 2010 and 2009 was capital expenditures. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2012 through 2016.

Net cash used in investing activities decreased by 78%, or $132 million, in 2011 compared with 2010, as a result of:

- proceeds from the sale of other investments of $163 million in 2011 and
- a decrease in capital expenditures of $28 million due primarily to TC2 being dispatched in 2011, partially offset by
- proceeds from the sale of assets of $48 million in 2010 and
- a decrease in restricted cash of $11 million.

Net cash used in investing activities decreased by 3%, or $6 million, in 2010 compared with 2009, as a result of:

- an increase in proceeds from the sale of assets of $45 million and
- an increase in restricted cash of $2 million in 2010, partially offset by
- an increase in capital expenditures of $34 million, primarily due to higher expenditures related to large-scale main replacements and the Ohio Falls redevelopment, partially offset by lower expenditures related to the construction of TC2 and major storm events that occurred in 2009, and
- proceeds on the settlement of derivatives of $7 million in 2009.

Financing Activities

Net cash used in financing activities was $260 million, in 2011 compared with $14 million in 2010, primarily as a result of changes in short-term debt.

In 2011, cash used in financing activities consisted of:

- a repayment on a revolving line of credit of $163 million;
- the payment of common stock dividends to LKE of $83 million;
- a net decrease in notes payable with affiliates of $12 million; and
- the payment of debt issuance and credit facility costs of $2 million.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Net cash used in financing activities was $14 million in 2010 compared with $132 million in 2009, primarily as a result of new long-term debt issued in excess of retirements, lower dividend payments and less repayment of notes payable with affiliates.

In the two months of 2010 following PPL's acquisition of LKE, cash provided by financing activities of the Successor consisted of:

- the issuance of first mortgage bonds of $531 million after discounts;
- the issuance of debt of $485 million to a PPL affiliate to repay debt due to an E.ON AG affiliate upon the closing of PPL's acquisition of LKE; and
- a draw on a revolving line of credit of $163 million; partially offset by
- the repayment of debt to an E.ON AG affiliate of $485 million upon the closing of PPL's acquisition of LKE;
- the repayment of debt to a PPL affiliate of $485 million upon the issuance of first mortgage bonds;
- a net decrease in notes payable with affiliates of $130 million; and
- the payment of debt issuance and credit facility costs of $10 million.

In the ten months of 2010 preceding PPL's acquisition of LKE, cash used in financing activities by the Predecessor consisted of:

- the payment of common stock dividends to LKE of $55 million and
- a net decrease in notes payable with affiliates of $28 million.

In 2009, cash used in financing activities by the Predecessor consisted of:

- the payment of common stock dividends to LKE of $80 million and
- a net decrease in notes payable with affiliates of $52 million.

See "Forecasted Sources of Cash" for a discussion of LG&E's plans to issue debt securities, as well as a discussion of credit facility capacity available to LG&E. Also see "Forecasted Uses of Cash" for a discussion of plans to pay dividends on common securities in the future, as well as maturities of long-term debt.

LG&E's long-term debt securities activity through December 31, 2011 was:

	Debt	
	Issuances	Retirement
Non-cash Exchanges (a)(b)		
LG&E First Mortgage Bonds	$ 535	$ (535)
Total Exchanged	$ 535	$ (535)

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.

(b) In April 2011, LG&E filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The registration became effective in June 2011, and the exchanges were completed in July 2011 with all securities being exchanged.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Forecasted Sources of Cash

LG&E expects to continue to have sufficient sources of cash available in the near term, including various credit facilities and operating cash flow. LG&E expects to remarket $194 million of tax-exempt bonds that will be put back to LG&E in 2012. In February 2012, LG&E established a commercial paper program for up to $250 million to provide an additional financing source to fund its short-term liquidity needs. Commercial paper issuances will be supported by LG&E's Syndicated Credit Facility.

Credit Facilities

At December 31, 2011, LG&E's total committed borrowing capacity under its Syndicated Credit Facility and the use of this borrowing capacity were:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a) (b)	$ 400			$ 400

(a) In June 2011, LG&E amended its Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon LG&E's senior secured long-term debt rating rather than the senior unsecured debt rating. Total borrowings outstanding under this facility decreased on a net basis by $163 million since December 31, 2010.

(b) In October 2011, LG&E amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility LG&E continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under LG&E's Syndicated Credit Facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 5% of the total committed capacity available to LG&E.

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $500 million at an interest rate based on a market index of commercial paper issues. At December 31, 2011, there was no balance outstanding. At December 31, 2010, $12 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%.

See Note 7 to the Financial Statements for further discussion of LG&E's credit facilities.

Operating Leases

LG&E also has available funding sources that are provided through operating leases. LG&E leases office space, gas storage and certain equipment. These leasing structures provide LG&E additional operating and financing flexibility. The operating leases contain covenants that are typical for these agreements, such as maintaining insurance, maintaining corporate existence and timely payment of rent and other fees.

See Note 11 to the Financial Statements for further discussion of the operating leases.

Forecasted Uses of Cash

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, LG&E currently expects to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common securities and possibly the purchase or redemption of a portion of debt securities.

Capital Expenditures

The table below shows LG&E's current capital expenditure projections for the years 2012 through 2016.

	Projected				
	2012	2013	2014	2015	2016
Construction expenditures					
Generating facilities (a)	$ 146	$ 102	$ 128	$ 123	$ 52
Distribution facilities	134	162	151	180	170
Transmission facilities (b)	27	57	34	30	25
Environmental	233	421	441	449	41
Other	14	22	20	27	25
Total Construction Expenditures	$ 554	$ 764	$ 774	$ 809	$ 313

(a) Includes approximately $200 million of currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. LG&E expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.

(b) Includes approximately $70 million of currently estimable transmission costs related to replacement generation units. LG&E expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.

LG&E's capital expenditure projections for the years 2012 through 2016 total approximately $3.2 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes current estimates for LG&E's environmental projects related to new and anticipated EPA compliance standards. Actual costs may be significantly lower or higher depending on the final requirements and market conditions. Certain environmental compliance costs incurred by LG&E in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism.

LG&E plans to fund its capital expenditures in 2012 with cash on hand, cash from operations and short-term debt.

Past financial performance is no guarantee of future results.

Contractual Obligations

LG&E has assumed various financial obligations and commitments in the ordinary course of conducting its business. At December 31, 2011, the estimated contractual cash obligations of LG&E were:

	Total	2012	2013 - 2014	2015 - 2016	After 2016
Long-term Debt (a)	$ 1,109			$ 250	$ 859
Interest on Long-term Debt (b)	875	$ 39	$ 71	73	692
Operating Leases (c)	19	6	9	3	1
Coal and Natural Gas Purchase Obligations (d)	1,722	419	732	543	28
Unconditional Power Purchase Obligations (e)	700	20	42	43	595
Construction Obligations (f)	115	61	46	7	1
Pension Benefit Plan Obligations (g)	21	21			
Other Obligations (h)	10	2	4	4	
Total Contractual Cash Obligations	$ 4,571	$ 568	$ 904	$ 923	$ 2,176

(a) Reflects principal maturities only based on stated maturity dates. See Note 7 to the Financial Statements for a discussion of variable-rate remarketable bonds issued on behalf of LG&E. LG&E does not have any significant capital lease obligations.
(b) Assumes interest payments through stated maturity. The payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated.
(c) See Note 11 to the Financial Statements for additional information.
(d) Represents contracts to purchase coal, natural gas and natural gas transportation. See Note 15 to the Financial Statements for additional information.
(e) Represents future minimum payments under OVEC power purchase agreements through June 2040. See Note 15 to the Financial Statements for additional information.
(f) Represents construction commitments, including commitments for the Ohio Falls refurbishment construction including associated material transport systems for coal combustion residuals, which are also reflected in the Capital Expenditures table presented above.
(g) Based on the current funded status of LKE's qualified pension plan, which covers LG&E employees, no cash contributions are required. See Note 13 to the Financial Statements for a discussion of expected contributions.
(h) Represents other contractual obligations. Purchase orders made in the ordinary course of business are excluded from the amounts presented.

Dividends

From time to time, as determined by its Board of Directors, LG&E pays dividends to its sole shareholder, LKE.

As discussed in Note 7 to the Financial Statements, LG&E's ability to pay dividends is limited under a covenant in its $400 million revolving line of credit facility. This covenant restricts the debt to total capital ratio to not more than 70%.

Purchase or Redemption of Debt Securities

LG&E will continue to evaluate purchasing or redeeming outstanding debt securities and may decide to take action depending upon prevailing market conditions and available cash.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LG&E. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LG&E are based on information provided by LG&E and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LG&E. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in LG&E's credit ratings could result in higher borrowing costs and reduced access to capital markets.

In LG&E's 2011 Registration Statement, LG&E described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, LG&E is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to LG&E's ratings, but without stating what ratings have been assigned to LG&E's securities. The ratings assigned by the rating agencies to LG&E and its securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Past financial performance is no guarantee of future results.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed its ratings for LG&E;
- S&P revised the outlook and lowered the issuer, senior secured and short-term ratings of LG&E; and
- Fitch affirmed its ratings for LG&E.

In April 2011, S&P took the following actions following the completion of PPL's acquisition of WPD Midlands:

- revised the outlook for LG&E;
- raised its short-term ratings of LG&E; and
- affirmed its long-term ratings for LG&E.

In September 2011, Moody's affirmed its issuer rating for LG&E.

In November 2011, Moody's and S&P affirmed their ratings for LG&E.

In December 2011, Fitch affirmed its ratings for LG&E.

Ratings Triggers

LG&E has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LG&E to post additional collateral, or permitting the counterparty to terminate the contract, if LG&E's credit rating were to fall below investment grade. See Note 19 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at December 31, 2011. At December 31, 2011, if LG&E's credit ratings had been below investment grade, the maximum amount that LG&E would have been required to post as additional collateral to counterparties was $64 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation and marketing operations, gas supply and interest rate contracts.

Off-Balance Sheet Arrangements

LG&E has entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management

Market Risk

LG&E is exposed to market risk from equity instruments, interest rate instruments and commodity instruments, as discussed below. However, regulatory cost recovery mechanisms significantly mitigate those risks. See Notes 1, 18 and 19 to the Financial Statements for information about LG&E's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

LG&E's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E is subject to commodity price risk for only a small portion of on-going business operations. LG&E conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. LG&E managed its energy commodity risk using derivative instruments, including swaps and forward contracts. See Note 19 to the Financial Statements for additional disclosures.

The balance and change in net fair value of LG&E's commodity derivative contracts for the periods ended December 31, 2011, 2010, and 2009 are shown in the table below.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	Gains (Losses)			
	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Fair value of contracts outstanding at the beginning of the period	$ (1)			$ 1
Contracts realized or otherwise settled during the period	(3)		$ 3	10
Fair value of new contracts entered into during the period			(4)	1
Other changes in fair value (a)	4	$ (1)	1	(12)
Fair value of contracts outstanding at the end of the period	$	$ (1)	$	$

(a) Represents the change in value of outstanding transactions and the value of transactions entered into and settled during the period.

Interest Rate Risk

LG&E has issued debt to finance its operations, which exposes it to interest rate risk. LG&E utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under LG&E's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LG&E's debt portfolio due to changes in the absolute level of interest rates.

At December 31, 2011 and 2010, LG&E's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LG&E is also exposed to changes in the fair value of its debt portfolio. LG&E estimated that a 10% decrease in interest rates at December 31, 2011, would increase the fair value of its debt portfolio by $27 million. This estimate is unchanged from December 31, 2010.

LG&E had the following interest rate hedges outstanding at:

	December 31, 2011			December 31, 2010		
	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates
Economic hedges						
Interest rate swaps (b)	$ 179	$ (60)	$ (4)	$ 179	$ (34)	$ (7)

(a) Includes accrued interest.

(b) LG&E utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LG&E is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. Sensitivities represent a 10% adverse movement in interest rates. The positions outstanding at December 31, 2011 mature through 2033.

Credit Risk

LG&E is exposed to potential losses as a result of nonperformance by counterparties of their contractual obligations. LG&E maintains credit policies and procedures to limit counterparty credit risk including evaluating credit ratings and financial information along with having certain counterparties post margin if the credit exposure exceeds certain thresholds. LG&E is exposed to potential losses as a result of nonpayment by customers. LG&E maintains an allowance for doubtful accounts based on a historical charge-off percentage for retail customers. Allowances for doubtful accounts from wholesale customers and miscellaneous receivables are based on specific identification by management. Retail and wholesale customer accounts are written-off after four months of no payment activity. Miscellaneous receivables are written-off as management determines them to be uncollectible.

Certain of LG&E's derivative instruments contain provisions that require it to provide immediate and on-going collateralization of derivative instruments in net liability positions based upon LG&E's credit ratings from each of the major credit rating agencies. See Notes 18 and 19 to the Financial Statements for information regarding exposure and the risk management activities.

Past financial performance is no guarantee of future results.

Related Party Transactions

LG&E is not aware of any material ownership interest or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with LG&E. See Note 16 to the Financial Statements for additional information on related party transactions between LG&E and affiliates.

Environmental Matters

Protection of the environment is a major priority for LG&E and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to LG&E's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc.; and may impact the costs for their products or their demand for LG&E's services. See "Item 1. Business - Environmental Matters" and Note 15 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 24 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). LG&E's senior management has reviewed these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them, with PPL's Audit Committee.

1) Revenue Recognition - Unbilled Revenue

Revenues related to the sale of energy are recorded when service is rendered or when energy is delivered to customers. Because customers of LG&E's retail operations are billed on cycles which vary based on the timing of the actual reading of their electric and gas meters, LG&E records estimates for unbilled revenues at the end of each reporting period. Such unbilled revenue amounts reflect estimates of the amount of energy delivered to customers since the date of the last reading of their meters. Such unbilled revenues reflect consideration of estimated usage by customer class, the effect of different rate schedules, changes in weather and where applicable, the impact of weather normalization or other regulatory provisions of rate structures. In addition to the unbilled revenue accrual resulting from cycle billing, LG&E makes additional accruals resulting from the timing of customer bills. The accrual of unbilled revenues in this manner properly matches revenues and related costs. At December 31, 2011 and 2010 LG&E had unbilled revenue balances of $65 million and $81 million.

2) Price Risk Management

See "Financial Condition - Risk Management" above.

3) Defined Benefits

LG&E sponsors and participates in qualified funded defined benefit pension plans and participates in a funded other postretirement benefit plan. These plans are applicable to the majority of the employees of LG&E. The plans LG&E participates in are sponsored by LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of certain plans to LG&E based on its participation. LG&E records an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

Certain assumptions are made by LKE and LG&E regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and

Past financial performance is no guarantee of future results.

expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on estimated results. Any differences between actual and estimated results are recorded in regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. These amounts in regulatory assets and liabilities are amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- Discount Rate - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Long-term Return on Plan Assets - Management projects the long-term rates of return on plan assets based on historical performance, future expectations and periodic portfolio rebalancing among the diversified asset classes. These projected returns reduce the net benefit costs LG&E records currently.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.

- Health Care Cost Trend Rate - Management projects the expected increases in the cost of health care.

In selecting a discount rate for their defined benefit plans LKE and LG&E start with a cash flow analysis of the expected benefit payment stream for their plans. In 2010, these plan-specific cash flows were matched against a spot-rate yield curve to determine the assumed discount rate. To develop the spot-rate yield curve, the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, served as the base from which those with the lowest and highest yields were eliminated to develop an appropriate subset of bonds from which the ultimate yield curve would be built. At that time, management believed this plan-specific cash flow matching model represented the best available tool for estimating the discount rate. Beginning in 2011, LKE and LG&E utilized a new tool that enhanced this plan-specific cash flow matching methodology by primarily matching the plan-specific cash flows against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the same universe of Aa-rated corporate bonds from which those with the lowest and highest yields were eliminated, similar to the yield curve approach. Individual bonds are then selected based on the timing of each plan's cash flows and parameters are established as to the percentage of each individual bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed. This process more accurately approximated the process of settlement of the obligations which better aligned with the objective of selecting the discount rate. At December 31, 2011, LKE decreased the discount rate for its pension plan from 5.52% to 5.12%. LG&E decreased the discount rate for its pension plan from 5.45% to 5.05%. LKE decreased the discount rate for its other postretirement benefit plan from 5.12% to 4.78%.

The expected long-term rates of return for LKE's and LG&E's defined benefit pension plans and LKE's defined other postretirement benefit plan have been developed using a best-estimate of expected returns, volatilities and correlations for each asset class. LKE and LG&E management corroborates these rates with expected long-term rates of return calculated by its independent actuary, who uses a building block approach that begins with a risk-free rate of return with factors being added such as inflation, duration, credit spreads, and equity risk. Each plan's specific asset allocation is also considered in developing a reasonable return assumption. At December 31, 2011, LKE's and LG&E's expected return on plan assets was 7.25%.

In selecting a rate of compensation increase, LKE and LG&E consider past experience in light of movements in inflation rates. At December 31, 2011, LKE's and LG&E's rate of compensation increase changed from 5.25% to 4.00%.

In selecting health care cost trend rates, LKE considers past performance and forecasts of health care costs. At December 31, 2011, LKE's health care cost trend rates were 8.50% for 2012, gradually declining to 5.50% for 2019.

A variance in the assumptions listed above could have a significant impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and regulatory assets and liabilities for LG&E. While the charts below reflect either an increase or decrease in each assumption, the inverse of the change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and regulatory assets and liabilities for LG&E by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption and does not include income tax effects.

At December 31, 2011, the defined benefit plans were recorded as follows:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Pension liabilities	$	95
Other postretirement benefit liabilities		87

The following chart reflects the sensitivities in the December 31, 2011 Balance Sheet associated with a change in certain assumptions based on LG&E's primary defined benefit plans.

		Increase (Decrease)		
Actuarial assumption	Change in assumption	Impact on defined benefit liabilities	Impact on OCI	Impact on regulatory assets
Discount Rate	(0.25)%	$ 19	$	$ 19
Rate of Compensation Increase	0.25%	2		2
Health Care Cost Trend Rate (a)	1%	1		1

(a) Only impacts other postretirement benefits.

In 2011, LG&E recognized net periodic defined benefit costs charged to operating expense of $21 million. This amount represents a $1 million increase from 2010. This increase in expense was primarily attributable to amortization of actuarial losses.

The following chart reflects the sensitivities in the 2011 Statement of Income (excluding income tax effects) associated with a change in certain assumptions based on LG&E's primary defined benefit plans.

Actuarial assumption	Change in assumption	Impact on defined benefit costs
Discount Rate	(0.25)%	$ 2
Expected Return on Plan Assets	(0.25)%	1
Rate of Compensation Increase	0.25%	
Health Care Cost Trend Rate (a)	1%	

(a) Only impacts other postretirement benefits.

4) Asset Impairment

Impairment analyses are performed for long-lived assets that are subject to depreciation or amortization whenever events or changes in circumstances indicate that a long-lived asset's carrying value may not be recoverable. For these long-lived assets classified as held and used, such events or changes in circumstances are:

- a significant decrease in the market price of an asset;
- a significant adverse change in the extent or manner in which an asset is being used or in its physical condition;
- a significant adverse change in legal factors or in the business climate;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of an asset;
- a current-period operating or cash flow loss combined with a history of losses or a forecast that demonstrates continuing losses; or
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

For a long-lived asset classified as held and used, impairment is recognized when the carrying amount of the asset is not recoverable and exceeds its fair value. The carrying amount is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the asset is impaired, an impairment loss is recorded to adjust the asset's carrying value to its estimated fair value. Management must make significant judgments to estimate future cash flows including the useful lives of long-lived assets, the fair value of the assets and management's intent to use the assets. Alternate courses of action are considered to recover the carrying value of a long-lived asset, and estimated cash flows from the "most likely" alternative are used to assess impairment whenever one alternative is clearly the most likely outcome. If no alternative is clearly the most likely, then a probability-weighted approach is used taking into consideration estimated cash flows from the alternatives. For assets tested for impairment as of the balance sheet date, the estimates of future cash flows used in that test consider the likelihood of possible outcomes that existed at the balance sheet date, including the assessment of the likelihood of a future sale of the assets. That assessment is not revised based on events that occur after the balance sheet date. Changes in assumptions and estimates could result in significantly different results than those identified and recorded in the financial statements.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

For a long-lived asset classified as held for sale, impairment exists when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If the asset (disposal group) is impaired, an impairment loss is recorded to adjust the carrying amount to its fair value less cost to sell. A gain is recognized for any subsequent increase in fair value less cost to sell, but not in excess of the cumulative impairment previously recognized.

For determining fair value, quoted market prices in active markets are the best evidence. However, when market prices are unavailable, LG&E considers all valuation techniques appropriate under the circumstances and for which market participant inputs can be obtained. Generally discounted cash flows are used to estimate fair value, which incorporates market participant inputs when available. Discounted cash flows are calculated by estimating future cash flow streams and applying appropriate discount rates to determine the present value of the cash flow streams.

In 2011, LG&E did not recognize an impairment of any long-lived assets.

Goodwill is tested for impairment at the reporting unit level. LG&E's reporting unit has been determined to be at the operating segment level. A goodwill impairment test is performed annually or more frequently if events or changes in circumstances indicate that the carrying value of the reporting unit may be greater than the unit's fair value. Additionally, goodwill is tested for impairment after a portion of goodwill has been allocated to a business to be disposed of. Goodwill is tested for impairment using a two-step approach. In step 1, LG&E identifies a potential impairment by comparing the estimated fair value of LG&E (the goodwill reporting unit) to its carrying value, including goodwill, on the measurement date. If the estimated fair value exceeds its carrying amount, goodwill is not considered impaired. If the carrying amount exceeds the estimated fair value, the second step is performed to measure the amount of impairment loss, if any.

The second step requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. That is, the estimated fair value is allocated to all of LG&E's assets and liabilities as if LG&E had been acquired in a business combination and the estimated fair value of LG&E was the price paid. The excess of the estimated fair value of LG&E over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The implied fair value of goodwill is then compared with the carrying amount of that goodwill. If the carrying amount exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of the reporting unit's goodwill.

LG&E tested goodwill for impairment in the fourth quarter of 2011 and no impairment was recognized. Management used both discounted cash flows and market multiples to estimate the fair value of LKE, which involved the use of significant estimates and assumptions. Applying an appropriate weighting to both the discounted cash flow and market multiple valuations, a decrease in the forecasted cash flows of 10%, an increase in the discount rate by 25 basis points, or a 10% decrease in the multiples would not have resulted in an impairment of goodwill.

5) Loss Accruals

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are used, as necessary to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

In 2011, no significant adjustments were made to LG&E's existing contingencies. See Note 15 to the Financial Statements for commitment and contingency disclosures.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is reasonably possible that a loss has been incurred. Accounting guidance defines "reasonably possible" as cases in which "the future event or events occurring is more than remote, but less than likely to occur." See Note 15 to the Financial Statements for disclosure of other potential loss contingencies that have not met the criteria for accrual.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

When an estimated loss is accrued, the triggering events for subsequently adjusting the loss accrual are identified, where applicable. The triggering events generally occur when the contingency has been resolved and the actual loss is paid or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the adjustment of certain recorded loss accruals:

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.

- Environmental and other litigation contingencies are reduced when the contingency is resolved, LG&E makes actual payments, a better estimate of the loss is determined or the loss is no longer considered probable.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, operation management and other parties.

6) Asset Retirement Obligations

LG&E is required to recognize a liability for legal obligations associated with the retirement of long-lived assets. The initial obligation is measured at its estimated fair value. An equivalent amount is recorded as an increase in the value of the capitalized asset and allocated to expense over the useful life of the asset. Until the obligation is settled, the liability is increased, through the recognition of accretion expense in the Statements of Income, for changes in the obligation due to the passage of time. The accretion and depreciation are offset with a regulatory credit on the income statement, such that there is no earnings impact. The regulatory asset created by the regulatory credit is relieved when the ARO has been settled. An ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. See Note 21 to the Financial Statements for related disclosures.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that considers estimated retirement costs in current period dollars that are inflated to the anticipated retirement date and then discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of various AROs and the related assets, are reviewed periodically to ensure that any material changes are incorporated into the estimate of the obligations. Any change to the capitalized asset is amortized over the remaining life of the associated long-lived asset.

At December 31, 2011, LG&E had AROs comprised of current and noncurrent amounts, totaling $57 million recorded on the Balance Sheet. Of the total amount, $34 million, or 59%, relates to LG&E's ash ponds, landfills and natural gas mains. The most significant assumptions surrounding AROs are the forecasted retirement costs, the discount rates and the inflation rates. A variance in the forecasted retirement costs, the discount rates or the inflation rates could have a significant impact on the ARO liabilities.

The following chart reflects the sensitivities related to LG&E's ARO liabilities for ash ponds, landfills and natural gas mains at December 31, 2011:

	Change in Assumption	Impact on ARO Liability
Retirement Cost	10%	$ 3
Discount Rate	(0.25)%	2
Inflation Rate	0.25%	2

7) Income Taxes

Significant management judgment is required in developing LG&E's provision for income taxes primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. LG&E evaluates its tax positions following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization upon settlement that exceeds 50%. LG&E's management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, LG&E's uncertain tax positions are reassessed by considering information known at the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position maybe de-recognized, or the benefit of a previously recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2011, LG&E had no existing reserve for unrecognized tax benefits.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. See Note 5 to the Financial Statements for related disclosures.

Regulatory Assets and Liabilities

LG&E is a cost-based rate-regulated utility. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC and the KPSC. See Note 6 to the Financial Statements for related disclosures.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to other regulated entities and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels, and is subject to change in the future. If future recovery of costs ceases to be probable, then asset write-off would be required to be recognized in operating income. Additionally, the regulatory agencies can provide flexibility in the manner and timing of the depreciation of PP&E and amortization of regulatory assets.

At December 31, 2011 and 2010, LG&E had regulatory assets of $412 million and $380 million. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices. At December 31, 2011 and 2010, LG&E had regulatory liabilities of $488 million and $534 million.

Other Information

PPL's Audit Committee has approved the independent auditor to provide audit and other services permitted by Sarbanes-Oxley and SEC rules. The audit services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews. See "Item 14. Principal Accounting Fees and Services" for more information.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information provided in this Item 7 should be read in conjunction with KU's Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of KU and its business strategy. "Financial and Operational Developments" includes a review of Net Income and discusses certain events that are important to understanding KU's results of operations and financial condition.
- "Results of Operations" provides a summary of KU's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in principal items on KU's Statements of Income, comparing 2011, 2010 and 2009.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of KU's liquidity position and credit profile. This section also includes a discussion of rating agency decisions and capital expenditure projections.
- "Financial Condition - Risk Management" provides an explanation of KU's risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of KU and that require its management to make significant estimates, assumptions and other judgments of matters inherently uncertain.

Overview

Introduction

KU, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy, in Kentucky, Virginia and Tennessee. KU and its affiliate, LG&E, are wholly owned subsidiaries of LKE. LKE, a limited liability company, became a wholly owned subsidiary of PPL when PPL acquired all of LKE's interests from E.ON US Investments Corp. on November 1, 2010. Following the acquisition, both KU and LG&E continue operating as subsidiaries of LKE, which is now an intermediary holding company in PPL's group of companies. Refer to "Item 1. Business - Background" for a description of KU's business.

Business Strategy

KU's overall strategy is to provide reliable, safe and competitively priced energy to its customers.

A key objective for KU is to maintain a strong credit profile through managing financing costs and access to credit markets. KU continually focuses on maintaining an appropriate capital structure and liquidity position.

Successor and Predecessor Financial Presentation

KU's Financial Statements and related financial and operating data include the periods before and after PPL's acquisition of LKE on November 1, 2010, and have been segregated to present pre-acquisition activity as the Predecessor and post-acquisition activity as the Successor. Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives to conform to PPL's accounting policies, which are discussed in Note 1 to the Financial Statements. The cost bases of certain assets and liabilities were changed as of November 1, 2010, as a result of the application of push-down basis of accounting, which was used to record the fair value adjustments of assets and liabilities at the acquisition date. Consequently, the financial position, results of operations and cash flows for the Successor periods are not comparable to the Predecessor periods; however, the core operations of KU have not changed as a result of the acquisition.

Financial and Operational Developments

Net Income

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Net Income	$ 178	$ 35	$ 140	$ 133

The operating results for 2011 and 2010 include the effect of KU's base rate increases, which became effective August 1, 2010, partially offset by net cost increases, which have not yet been reflected in the rates charged by KU. Retail sales volumes increased during 2010 compared with 2009 as a result of increased consumption primarily due to increased heating degree days during the first and third quarters of 2010 and increased cooling degree days during the second and third quarters of 2010.

See "Results of Operations" below for further discussion and analysis of the results of operations.

TC2

KU and LG&E constructed a 732 MW summer capacity coal-fired unit, TC2, which is jointly owned by KU (60.75%) and LG&E (14.25%), together with the Illinois Municipal Electric Agency and the Indiana Municipal Power Agency (combined 25%). With limited exceptions, KU and LG&E took care, custody and control of TC2 in January 2011. KU and LG&E and the construction contractor further amended the construction agreement to provide that the contractor will complete certain actions to identify and complete any necessary modifications to allow operation of TC2 on all fuels in accordance with initial specifications prior to certain dates, and amending the provisions relating to liquidated damages. A number of remaining issues regarding these matters are still under discussion with the contractor. See Notes 8 and 15 to the Financial Statements for additional information.

Registered Debt Exchange Offer by KU

In April 2011, KU filed a Registration Statement with the SEC, related to an offer to exchange certain first mortgage bonds issued in November 2010, in transactions not subject to registration under the Securities Act of 1933, with similar but registered securities. The 2011 Registration Statement became effective in June 2011, and the exchange was completed in July 2011 with substantially all of the first mortgage bonds being exchanged. See Note 7 to the Financial Statements and KU's 2011 Registration Statement for additional information.

CSAPR

In July 2011, the EPA signed the CSAPR, which finalizes and renames the Clean Air Transport Rule (Transport Rule) proposed in August 2010, and made revisions to the rule on February 7, 2012. This rule applies to the Kentucky coal plants. The CSAPR is meant to facilitate attainment of ambient air quality standards for ozone and fine particulates by requiring reductions in sulfur dioxide and nitrogen oxide emissions.

In December 2011, the U.S. Court of Appeals for the District of Columbia (Court) stayed implementation of the CSAPR and left CAIR in effect pending a final resolution on the merits of the validity of the rule. Oral argument on the various challenges to the CSAPR is scheduled for April 2012, and a final decision on the validity of the rule could be issued as early as May 2012.

With respect to KU's Kentucky coal-fired generating plants, the stay of the CSAPR will initially only impact the unit dispatch order. With the return of the CAIR and KU's significant number of sulfur dioxide allowances, those units will be dispatched with lower operating cost, but slightly higher sulfur dioxide and nitrogen oxide emissions. However, a key component of the Court's final decision, even if the CSAPR is upheld, will be whether the ruling delays the implementation of the CSAPR by one year for both Phases I and II, or instead still requires the significant sulfur dioxide and nitrogen oxide reductions associated with Phase II to begin in 2014. KU's CSAPR compliance strategy is based on over-compliance during Phase I to generate allowances sufficient to cover the expected shortage during the first two years of Phase II (2014 and 2015) when additional pollution control equipment will be installed. Should Phase I of the CSAPR be shortened to one year, it will be more difficult and costly to provide enough excess allowances in one year to meet the shortage projected for 2014 and 2015.

See Note 15 to the Financial Statements for additional information on the CSAPR.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Pending Bluegrass CTs Acquisition and NGCC Construction

In September 2011, KU and LG&E filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. In conjunction with this request and to meet new, stricter EPA regulations, KU anticipates retiring three older coal-fired electric generating units. These units are located at the Green River and Tyrone plants, which have a combined summer rating of 234 MW. KU and LG&E also requested approval to purchase the Bluegrass CTs, which are expected to provide up to 495 MW of peak generation supply.

KU anticipates that its share of the NGCC construction and the acquisition of the Bluegrass CTs could require up to $500 million in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery, scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012. See Note 8 to the Financial Statements for additional information.

ECR Filing - Environmental Upgrades

In June 2011, in order to achieve compliance with new and pending mandated federal EPA regulations, KU filed an ECR plan with the KPSC requesting approval to install environmental upgrades for certain of its coal-fired plants along with the recovery of the expected $1.1 billion in associated capital costs, as well as operating expenses incurred. The ECR plan detailed upgrades that will be made to certain of KU's coal-fired generating plants to continue to be compliant with EPA regulations.

In November 2011, KU filed a unanimous settlement agreement, stipulation and recommendation with the KPSC. In December 2011, KU received KPSC approval in its proceedings relating to the ECR plan. The KPSC Order approved the terms of the November 2011 settlement agreement entered into between KU and the parties to the ECR proceedings. The KPSC Order authorized the installation of environmental upgrades at certain plants during 2012-2016 representing approximate capital costs of $900 million at KU. In connection with the approved projects, the KPSC Order allows recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and granted CPCN for their construction. The KPSC Order also confirmed an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans and provided for an authorized return on equity of 10.10% for the approved projects in the 2011 ECR proceedings. The KPSC Order noted KU's consent to defer the requested approval for certain environmental upgrades at its E.W. Brown generating plant, which represented approximately $200 million in capital costs. KU retained the right to operate and dispatch the E.W. Brown generating plant in accordance with applicable environmental standards and the right to request approval of the deferred projects and related costs in future regulatory proceedings. See Note 6 to the Financial Statements for additional information.

Storm Recovery

In December 2009, a major snowstorm hit KU's Virginia service area causing approximately 30,000 customer outages. During the normal 2009 Virginia Annual Information Filing (AIF), KU requested that the VSCC establish a regulatory asset and defer for future recovery $6 million in incremental operation and maintenance expenses related to the storm restoration. In March 2011, the VSCC Staff issued its report on KU's 2009 AIF stating that it considered this storm damage to be extraordinary, non-recurring and material to KU. The Staff Report also recommended establishing a regulatory asset for these costs, with recovery over a five-year period upon approval in the next base rate case. In March 2011, a regulatory asset of $6 million was established for actual costs incurred. In June 2011, the VSCC issued an Order approving the recommendations contained in the Staff Report. KU received approval in its 2011 base rate case to recover this regulatory asset over a five-year period ending October 2016.

In September 2009, the KPSC approved the deferral of $57 million of costs associated with a severe ice storm that occurred in January 2009 and a wind storm that occurred in February 2009. Additionally, in December 2008, the KPSC approved the deferral of $2 million of costs associated with high winds from the remnants of Hurricane Ike in September 2008. KU received approval in its 2010 base rate case to recover these regulatory assets over a ten-year period beginning August 2010.

Virginia Rate Case

In April 2011, KU filed an application with the VSCC requesting an annual increase in electric base rates for its Virginia jurisdictional customers of $9 million, or 14%. In September 2011, a settlement stipulation was reached between KU and the VSCC Staff and filed with the VSCC for consideration. In October 2011, the VSCC approved the stipulation with two modifications that were accepted by KU. The VSCC issued an Order closing the proceeding in October 2011. The approved

Past financial performance is no guarantee of future results.

revenue increase was $7 million annually, based on a return on equity of 10.3%, with new base rates effective November 1, 2011.

Results of Operations

As previously noted, KU's results for the time periods after October 31, 2010 are on a basis of accounting different from its results for time periods prior to November 1, 2010. When discussing KU's results of operations material differences resulting from the different basis of accounting will be isolated for purposes of comparability. See "Overview - Successor and Predecessor Financial Presentation" for further information.

The utility business is affected by seasonal weather. As a result, operating revenues (and associated operating expenses) are not generated evenly throughout the year. Revenue and earnings are generally higher during the first and third quarters and lower during the second quarter due to weather.

The following table summarizes the significant components of net income for 2011, 2010, and 2009 and the changes therein:

Earnings

	Successor	% Change 2011 vs. 2010	Combined	Successor	Predecessor	% Change 2010 vs. 2009	Predecessor
	Year Ended December 31, 2011		Year Ended December 31, 2010	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010		Year Ended December 31, 2009
Operating Revenues	$ 1,548	2	$ 1,511	$ 263	$ 1,248	12	$ 1,355
Fuel	516	4	495	78	417	14	434
Energy purchases	112	(36)	175	28	147	(12)	199
Other operation and maintenance	362	8	336	65	271	10	306
Depreciation	186	28	145	26	119	9	133
Taxes, other than income	19	90	10	1	9	(29)	14
Total Operating Expenses	1,195	3	1,161	198	963	7	1,086
Other Income (Expense) - net	(1)	(200)	1		1	(83)	6
Interest Expense	70	(10)	78	10	68	4	75
Income Taxes	104	6	98	20	78	46	67
Net Income	$ 178	2	$ 175	$ 35	$ 140	32	$ 133

The changes in the components of Net Income between these periods were due to the following factors.

	2011 vs. 2010	2010 vs. 2009
Margin	$ 52	$ 111
Other operation and maintenance	(12)	(27)
Depreciation	(28)	(7)
Taxes, other than income	(9)	4
Other Income (Expense) - net	(2)	(5)
Interest Expense	8	(3)
Income Taxes	(6)	(31)
	$ 3	$ 42

- See "Statement of Income Analysis - Margin - Changes in Non-GAAP Financial Measures" for an explanation of margin.

- Other operation and maintenance increased in 2011 compared with 2010, primarily due to $19 million of higher steam costs, the result of increase scope of scheduled outages including those at Ghent and Green River plants, along with higher variable costs from increased generation.

  Other operation and maintenance increased in 2010 compared with 2009, primarily due to higher administrative and general costs of $13 million, higher steam costs of $6 million and higher transmission operation costs of $5 million. Administrative and general costs increased due to higher bad debt costs, higher labor costs and higher property and public liability insurance costs.

- Depreciation expense was $25 million higher in 2011 compared with 2010, due to TC2 commencing dispatch in January 2011.

- Taxes, other than income increased in 2011 compared with 2010, primarily due to a $5 million clean coal incentive tax credit that KU was able to apply to property tax in 2010.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- Income taxes increased in 2010 compared with 2009, primarily due to the $28 million impact of higher pre-tax income, primarily due to margin.

2012 Outlook

KU projects lower earnings in 2012 compared with 2011, as revenue increases are not expected to offset operating expense increases, including depreciation, due to more plant in service. Actual results will be dependent on the effects of the economy and the impact of weather on retail sales among other variables. As a result of the stay out provision established in the settlement of the PPL-LKE acquisition, KU is generally unable to implement an increase in base rates in Kentucky before January 1, 2013.

Earnings in 2012 are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 7, Notes 6 and 15 to the Financial Statements and "Business," and "Risk Factors" in this Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margin

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margin." Margin is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margin is a single financial performance measure of KU's operations. In calculating this measure, utility revenues and expenses associated with approved cost recovery tracking mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments associated with environmental regulations and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" expenses and the depreciation associated with ECR equipment is recorded as "Depreciation" expense. As a result, this measure represents the net revenues from KU's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared with budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Operating Income" to "Margin" as defined by KU for 2011, 2010 and 2009.

	2011 Successor		
	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 1,548		$ 1,548
Operating Expenses			
Fuel	516		516
Energy purchases	112		112
Other operation and maintenance	49	$ 313	362
Depreciation	48	138	186
Taxes, other than income		19	19
Total Operating Expenses	725	470	1,195
Total	$ 823	$ (470)	$ 353

	Successor			Predecessor		
	Two Months Ended December 31, 2010			Ten Months Ended October 31, 2010		
	Margin	Other (a)	Operating Income (b)	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 263		$ 263	$ 1,248		$ 1,248
Operating Expenses						
Fuel	78		78	417		417
Energy purchases	28		28	147		147
Other operation and maintenance	6	$ 59	65	29	$ 242	271
Depreciation	6	20	26	29	90	119
Taxes, other than income		1	1		9	9
Total Operating Expenses	118	80	198	622	341	963
Total	$ 145	$ (80)	$ 65	$ 626	$ (341)	$ 285

	2009 Predecessor		
	Margin	Other (a)	Operating Income (b)
Operating Revenues	$ 1,355		$ 1,355
Operating Expenses			
Fuel	434		434
Energy purchases	199		199
Other operation and maintenance	32	$ 274	306
Depreciation	30	103	133
Taxes, other than income		14	14
Total Operating Expenses	695	391	1,086
Total	$ 660	$ (391)	$ 269

(a) Represents amounts excluded from Margin.
(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins were higher by $52 million for 2011 compared with 2010. New KPSC rates went into effect on August 1, 2010, contributing an additional $64 million in operating revenues over the prior year. Partially offsetting the rate increase were lower retail volumes resulting from weather and economic conditions.

Other Operation and Maintenance

Changes in other operation and maintenance expense were due to the following:

	2011 vs. 2010	2010 vs. 2009
Fuel for generation (a)	$ 6	$ 1
Steam operation (b)	10	4
Distribution maintenance		(3)
Steam maintenance (c)	9	2
Transmission operation (d)	(1)	5
Administrative and general (e)	7	13
Other generation maintenance	(2)	3
Other	(3)	5
Total	$ 26	$ 30

(a) Fuel handling costs are included in fuel for electric generation on the Statements of Income for the Successor's periods and are in other operation and maintenance expense on the Statements of Income for the Predecessor's periods.
(b) Steam operation costs increased in 2011 compared with 2010, due to increased generation, the result of TC2 commencing dispatch in 2011.
(c) Steam maintenance costs increased in 2011 compared with 2010, due to an increase in the scope of scheduled outages including those at Ghent and Green River.
(d) Transmission operation costs increased in 2010 compared with 2009, primarily due to a settlement agreement with a third party resulting in the establishment of a regulatory asset in 2009, net of twelve months of amortization expense recorded in 2010.
(e) Administrative and general costs increased in 2011 compared with 2010, due to higher outside services costs of $2 million, higher labor costs of $1 million and higher pension costs of $1 million, partially offset by $2 million of lower bad debt costs.

Administrative and general costs increased in 2010 compared with 2009, due higher bad debt costs of to $4 million, higher labor costs of $1 million, and higher property and public liability insurance costs of $2 million. Bad debt costs increased in 2010 compared with 2009, due to higher billed revenues and a higher net charge-off percentage, partially offset by higher late payment charges.

Depreciation

Changes in depreciation were due to the following:

	2011 vs. 2010	2010 vs. 2009
TC2 (dispatch began in January 2011)	$ 25	
E.W. Brown sulfur dioxide scrubber equipment (placed in-service in June 2010)	8	$ 7
Ghent Unit 2 sulfur dioxide scrubber equipment (placed in-service in May 2009)		3
Other	8	2
Total	$ 41	$ 12

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Taxes, Other Than Income

Taxes, other than income increased by $9 million in 2011 compared with 2010 primarily due to a $5 million state coal tax credit that was applied to 2010 property taxes. The remaining increase was due to higher assessments, primarily from significant property additions.

Interest Expense

The changes in interest expense were due to:

	2011 vs. 2010	2010 vs. 2009
Interest rates (a)	$ (18)	$ (3)
Long-term debt balances (b)	8	1
Other	2	5
Total	$ (8)	$ 3

(a) Interest rates on the first mortgage bonds issued in November 2010 were lower than the rates on the loans from the Fidelia Corporations in place through October 2010.

(b) KU's long-term debt principal balance was $169 million higher as of December 31, 2010 compared with December 31, 2009 and did not change from December 31, 2010 to December 31, 2011. The higher interest expense in 2011 was the result of higher long-term debt balances for the last two months of 2010.

Income Taxes

Changes in income taxes were due to the following:

	2011 vs. 2010	2010 vs. 2009
Higher pre-tax income	$ 4	$ 28
Other	2	3
Total	$ 6	$ 31

Financial Condition

Liquidity and Capital Resources

KU expects to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents and its credit facilities. KU currently has no plans to access capital markets in 2012.

KU's cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- changes in market prices for electricity;
- changes in commodity prices that may increase the cost of producing power or decrease the amount KU receives from selling power;
- operational and credit risks associated with selling and marketing products in the wholesale power markets;
- unusual or extreme weather that may damage KU's transmission and distribution facilities or affect energy sales to customers;
- reliance on transmission and distribution facilities that KU does not own or control to deliver its electricity and natural gas;
- unavailability of generating units (due to unscheduled or longer-than-anticipated generation outages, weather and natural disasters) and the resulting loss of revenues and additional costs of replacement electricity;
- the ability to recover and the timeliness and adequacy of recovery of costs associated with regulated utility businesses;
- costs of compliance with existing and new environmental laws;
- any adverse outcome of legal proceedings and investigations with respect to KU's current and past business activities;
- deterioration in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and
- a downgrade in KU's credit ratings that could adversely affect its ability to access capital and increase the cost of credit facilities and any new debt.

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties affecting KU's cash flows.

At December 31, KU had the following:

	Successor		Predecessor
	2011	2010	2009
Cash and cash equivalents	$ 31	$ 3	$ 2

The changes in KU's cash and cash equivalents position resulted from:

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Net cash provided by operating activities	$ 438	$ 29	$ 344	$ 253
Net cash provided by (used in) investing activities	(273)	(88)	(340)	(507)
Net cash provided by (used in) financing activities	(137)	58	(2)	254
Net Increase (Decrease) in Cash and Cash Equivalents	$ 28	$ (1)	$ 2	$

Auction Rate Securities

At December 31, 2011, KU's tax-exempt revenue bonds that are in the form of auction rate securities and total $96 million continue to experience failed auctions. Therefore, the interest rate continues to be set by a formula pursuant to the relevant indentures. For the period ended December 31, 2011, the weighted-average rate on KU's auction rate bonds in total was 0.27%.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Operating Activities

Net cash provided by operating activities increased by 17%, or $65 million, in 2011 compared with 2010, primarily as a result of:

- an increase in net income adjusted for non-cash effects of $115 million (deferred income taxes and investment tax credits of $81 million and depreciation of $41 million, partially offset by defined benefit plans - expense of $2 million and other noncash items of $8 million);
- a net decrease in working capital related to unbilled revenues of $21 million due to colder weather in December 2010 as compared with December 2009, and milder weather in December 2011 as compared with December 2010; partially offset by
- an increase in discretionary defined benefit plan contributions of $30 million made in order to achieve KU's long-term funding requirements;
- the timing of ECR collections of $28 million; and
- an increase in cash outflows related to accrued taxes of $19 million due to an accrual in excess of payments made in 2010 for the 2010 tax year and the payment of the 2010 tax liability in 2011, along with payments made in 2011 over the accrual for the 2011 tax year.

Net cash provided by operating activities increased by 47%, or $120 million, in 2010 compared with 2009, primarily as a result of:

- lower storm expenses of $59 million;
- the timing of ECR collections of $48 million;
- a decrease in cash outflows related to inventory of $27 million, primarily due to a nominal change in inventory levels in 2010 and lower consumption in 2009 due to lower generation; and
- an increase in net income adjusted for non-cash effects of $8 million (depreciation of $12 million and other noncash items of $11 million, partially offset by deferred income taxes and investment tax credits of $47 million and defined benefit plans - expense of $10 million), partially offset by
- higher interest payments of $14 million due to an accelerated settlement with E.ON AG.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Investing Activities

The primary use of cash in investing activities in 2011, 2010 and 2009 was capital expenditures. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2012 through 2016.

Net cash used in investing activities decreased by 36%, or $155 million, in 2011 compared with 2010, as a result of a decrease in capital expenditures of $155 million, primarily due to the completion of KU's scrubber program in 2010 and TC2 being dispatched in 2011.

Net cash used in investing activities decreased by 16%, or $79 million, in 2010 compared with 2009, as a result of a decrease in capital expenditures of $88 million, primarily due to lower expenditures related to the construction of TC2 and major storm events that occurred in 2009, partially offset by a decrease in restricted cash of $9 million.

Financing Activities

Net cash used in financing activities was $137 million in 2011 compared with net cash provided by financing activities of $56 million in 2010, primarily as a result of less long-term debt issuances and higher dividends to LKE.

In 2011, cash used in financing activities consisted of:

- the payment of common stock dividends to LKE of $124 million;
- a net decrease in notes payable with affiliates of $10 million; and
- the payment of debt issuance and credit facility costs of $3 million.

Net cash provided by financing activities was $56 million in 2010 compared with $254 million in 2009. In spite of significant new debt issuances associated with the repayments to E.ON AG affiliates in connection with PPL's acquisition of LKE, cash provided by financing was less in 2010 due to lower increases in debt in 2010 and the payment of dividends in 2010; whereas, KU received equity contributions in 2009.

In the two months of 2010 following the acquisition, cash provided by financing activities of the Successor consisted of:

- the issuance of first mortgage bonds of $1,489 million after discounts and
- the issuance of debt of $1,331 million to a PPL affiliate to repay debt due to an E.ON AG affiliate upon the closing of PPL's acquisition of LKE, partially offset by
- the repayment of debt to an E.ON AG affiliate of $1,331 million upon the closing of PPL's acquisition of LKE;
- the repayment of debt to a PPL affiliate of $1,331 million upon the issuance of first mortgage bonds;
- a net decrease in notes payable with affiliates of $83 million; and
- the payment of debt issuance and credit facility costs of $17 million.

In the ten months of 2010 preceding PPL's acquisition of LKE, cash used in financing activities by the Predecessor consisted of:

- the payment of common stock dividends to LKE of $50 million, partially offset by
- a net increase in notes payable with affiliates of $48 million.

In 2009, cash provided by financing activities of the Predecessor consisted of:

- the issuance of debt of $150 million to an E.ON AG affiliate;
- the receipt of capital contributions of $75 million from LKE; and
- a net increase in notes payable with affiliates of $29 million.

See "Forecasted Sources of Cash" for a discussion of KU's plans to issue debt securities, as well as a discussion of credit facility capacity available to KU. Also see "Forecasted Uses of Cash" for a discussion of plans to pay dividends on common securities in the future, as well as maturities of long-term debt.

KU's long-term debt securities activity through December 31, 2011 was:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	Debt	
	Issuances	Retirement
Non-cash Exchanges (a)(b)		
KU First Mortgage Bonds	$ 1,500	$ (1,500)
Total Exchanged	$ 1,500	$ (1,500)

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.
(b) In April 2011, KU filed a 2011 Registration Statement with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The registration became effective in June 2011, and the exchanges were completed in July 2011 with all securities being exchanged.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Forecasted Sources of Cash

KU expects to continue to have sufficient sources of cash available in the near term, including various credit facilities and operating cash flow. KU currently has no plans to access capital markets in 2012. In February 2012, KU established a commercial paper program for up to $250 million to provide an additional financing source to fund its short-term liquidity needs. Commercial paper issuances will be supported by KU's Syndicated Credit Facility.

Credit Facilities

At December 31, 2011, KU's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Capacity	Borrowed	Letters of Credit Issued	Unused Capacity
Syndicated Credit Facility (a) (c)	$ 400			$ 400
Letter of Credit Facility (b)	198		$ 198	

(a) In June 2011, KU amended its Syndicated Credit Facility such that the fees and the spread to benchmark interest rates for borrowings depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.
(b) In April 2011, KU entered into a new $198 million letter of credit facility that has been used to issue letters of credit to support outstanding tax-exempt bonds. KU pays customary commitment and letter of credit fees under the new facility. The facility matures in April 2014. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than the senior unsecured debt rating.
(c) In October 2011, KU amended its Syndicated Credit Facility. The amendment included extending the expiration date from December 2014 to October 2016. Under this facility KU continues to have the ability to make cash borrowings and to request the lenders to issue letters of credit.

The commitments under KU's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 19% of the total committed capacity available to KU.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to $500 million at an interest rate based on a market index of commercial paper issues. At December 31, 2011, there was no balance outstanding. At December 31, 2010, $10 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%.

See Note 7 to the Financial Statements for further discussion of KU's credit facilities.

Operating Leases

KU also has available funding sources that are provided through operating leases. KU leases office space and certain equipment. These leasing structures provide KU additional operating and financing flexibility. The operating leases contain covenants that are typical for these agreements, such as maintaining insurance, maintaining corporate existence and timely payment of rent and other fees.

See Note 11 to the Financial Statements for further discussion of the operating leases.

Forecasted Uses of Cash

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, KU currently expects to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common securities and possibly the purchase or redemption of a portion of debt securities.

Capital Expenditures

The table below shows KU's current capital expenditure projections for the years 2012 through 2016.

	Projected				
	2012	2013	2014	2015	2016
Construction expenditures (a)					
Generating facilities (b)	$ 129	$ 177	$ 217	$ 173	$ 65
Distribution facilities	78	95	86	103	100
Transmission facilities (c)	57	49	53	43	40
Environmental	379	453	411	233	51
Other	13	21	21	24	22
Total Construction Expenditures	$ 656	$ 795	$ 788	$ 576	$ 278

(a) Construction expenditures include AFUDC, which is not expected to be significant for the years 2012 through 2016.
(b) Includes approximately $500 million of currently estimable costs related to replacement generation units due to EPA regulations not recoverable through the ECR mechanism. KU expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.
(c) Includes approximately $30 million of currently estimable transmission costs related to replacement generation units. KU expects to recover these costs over a period equivalent to the related depreciable lives of the assets through future rate proceedings.

KU's capital expenditure projections for the years 2012 through 2016 total approximately $3.1 billion. Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. This table includes current estimates for KU's environmental projects related to new and anticipated EPA compliance standards. Actual costs may be significantly lower or higher depending on the final requirements and market conditions. Certain environmental compliance costs incurred by KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism.

KU plans to fund its capital expenditures in 2012 with cash on hand, cash from operations and short-term debt.

Contractual Obligations

KU has assumed various financial obligations and commitments in the ordinary course of conducting its business. At December 31, 2011, the estimated contractual cash obligations of KU were:

	Total	2012	2013 - 2014	2015 - 2016	After 2016
Long-term Debt (a)	$ 1,851			$ 250	$ 1,601
Interest on Long-term Debt (b)	1,546	$ 65	$ 131	135	1,215
Operating Leases (c)	34	9	14	7	4
Coal and Natural Gas Purchase Obligations (d)	1,107	404	549	152	2
Unconditional Power Purchase Obligations (e)	311	9	18	20	264
Construction Obligations (f)	294	217	70	6	1
Pension Benefit Plan Obligations (g)	15	15			
Other Obligations (h)	13	3	5	5	
Total Contractual Cash Obligations	$ 5,171	$ 722	$ 787	$ 575	$ 3,087

(a) Reflects principal maturities only based on stated maturity dates. See Note 7 to the Financial Statements for a discussion of variable-rate remarketable bonds issued on behalf of KU. KU does not have any significant capital lease obligations.
(b) Assumes interest payments through stated maturity. The payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated.
(c) See Note 11 to the Financial Statements for additional information.
(d) Represents contracts to purchase coal, natural gas and natural gas transportation. See Note 15 to the Financial Statements for additional information.
(e) Represents future minimum payments under OVEC power purchase agreements through June 2040. See Note 15 to the Financial Statements for additional information.
(f) Represents construction commitments, including commitments for the Ghent landfill and Brown SCR construction including associated material transport systems for coal combustion residuals, which are also reflected in the Capital Expenditures table presented above.
(g) Based on the current funded status of LKE's qualified pension plan, which covers KU employees, no cash contributions are required. See Note 13 to the Financial Statements for a discussion of expected contributions.
(h) Represents other contractual obligations. Purchase orders made in the ordinary course of business are excluded from the amounts presented.

Dividends

From time to time, as determined by its Board of Directors, KU pays dividends to its sole shareholder, LKE.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

As discussed in Note 7 to the Financial Statements, KU's ability to pay dividends is limited under a covenant in its $400 million revolving line of credit facility. This covenant restricts the debt to total capital ratio to not more than 70%.

Purchase or Redemption of Debt Securities

KU will continue to evaluate purchasing or redeeming outstanding debt securities and may decide to take action depending upon prevailing market conditions and available cash.

Rating Agency Decisions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of KU. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of KU are based on information provided by KU and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of KU. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. A downgrade in KU's credit ratings could result in higher borrowing costs and reduced access to capital markets.

In KU's 2011 Registration Statement, KU described its then-current credit ratings in connection with, and to facilitate, an understanding of its liquidity position. As a result of the passage of the Dodd-Frank Act and the attendant uncertainties relating to the extent to which issuers of non-asset backed securities may disclose credit ratings without being required to obtain rating agency consent to the inclusion of such disclosure, or incorporation by reference of such disclosure, in a registrant's registration statement or section 10(a) prospectus, KU is limiting its credit rating disclosure to a description of the actions taken by the rating agencies with respect to KU's ratings, but without stating what ratings have been assigned to KU's securities. The ratings assigned by the rating agencies to KU and its securities may be found, without charge, on each of the respective ratings agencies' websites, which ratings together with all other information contained on such rating agency websites is, hereby, explicitly not incorporated by reference in this report.

Following the announcement of PPL's then-pending acquisition of WPD Midlands in March 2011, the rating agencies took the following actions:

- Moody's affirmed its ratings for KU;
- S&P revised the outlook and lowered the issuer, senior secured and short-term ratings of KU; and
- Fitch affirmed its ratings for KU.

In April 2011, S&P took the following actions following the completion of PPL's acquisition of WPD Midlands:

- revised the outlook for KU;
- raised its short-term ratings of KU; and
- affirmed its long-term ratings for KU.

In May 2011, S&P downgraded its long-term rating of four series of pollution control bonds issued on behalf of KU by one notch in connection with the substitution of the letters of credit enhancing these four bonds.

In September 2011, Moody's affirmed its issuer rating for KU.

In November 2011, Moody's and S&P affirmed their ratings for KU.

In December 2011, Fitch affirmed its ratings for KU.

Ratings Triggers

KU has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, and commodity transportation and storage, which contain provisions requiring KU to post additional collateral, or permitting the counterparty to terminate the contract, if KU's credit rating were to fall below investment grade. See Note 19 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at December 31, 2011. At December 31, 2011, if KU's credit ratings had been below investment grade, the maximum amount that KU would have been

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

required to post as additional collateral to counterparties was $20 million for both derivative and non-derivative commodity and commodity-related contracts used in its generation and marketing operations.

Off-Balance Sheet Arrangements

KU has entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management

Market Risk

KU is exposed to market risk from equity instruments, interest rate instruments and commodity instruments, as discussed below. However, regulatory cost recovery mechanisms significantly mitigate those risks. See Notes 1, 18 and 19 to the Financial Statements for information about KU's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, KU is subject to commodity price risk for only a small portion of on-going business operations. KU conducts energy trading and risk management activities to maximize the value of the physical assets at times when the assets are not required to serve KU's or LG&E's customers. KU managed its energy commodity risk using derivative instruments, including swaps and forward contracts. See Note 19 to the Financial Statements for additional disclosures.

The balance and change in net fair value of KU's commodity derivative contracts for the periods ended December 31, 2011, 2010, and 2009 were not significant.

Interest Rate Risk

KU has issued debt to finance its operations, which exposes it to interest rate risk. At December 31, 2011 and 2010, KU's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

KU is also exposed to changes in the fair value of its debt portfolio. KU estimated that a 10% decrease in interest rates at December 31, 2011, would increase the fair value of its debt portfolio by $72 million compared with $73 million at December 31, 2010.

KU had no interest rate hedges outstanding at December 31, 2011 and December 31, 2010.

Credit Risk

KU is exposed to potential losses as a result of nonperformance by counterparties of their contractual obligations. KU maintains credit policies and procedures to limit counterparty credit risk including evaluating credit ratings and financial information along with having certain counterparties post margin if the credit exposure exceeds certain thresholds. KU is exposed to potential losses as a result of nonpayment by customers. KU maintains an allowance for doubtful accounts based on a historical charge-off percentage for retail customers. Allowances for doubtful accounts from wholesale and municipal customers and miscellaneous receivables are based on specific identification by management. Retail, wholesale and municipal customer accounts are written-off after four months of no payment activity. Miscellaneous receivables are written-off as management determines them to be uncollectible.

Certain of KU's derivative instruments contain provisions that require it to provide immediate and on-going collateralization of derivative instruments in net liability positions based upon KU's credit ratings from each of the major credit rating agencies. See Notes 18 and 19 to the Financial Statements for information regarding exposure and the risk management activities.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Related Party Transactions

KU is not aware of any material ownership interest or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with KU. See Note 16 to the Financial Statements for additional information on related party transactions between KU and affiliates.

Environmental Matters

Protection of the environment is a major priority for KU and a significant element of its business activities. Extensive federal, state and local environmental laws and regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, among other areas, and the costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed from prior versions by the relevant agencies. Costs may take the form of increased capital or operating and maintenance expenses; monetary fines, penalties or forfeitures or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers, industrial power users, etc.; and may impact the costs for their products or their demand for KU's services. See "Item 1. Business - Environmental Matters" and Note 15 to the Financial Statements for a discussion of environmental matters.

New Accounting Guidance

See Note 24 to the Financial Statements for a discussion of new accounting guidance pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). KU's senior management has reviewed these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them, with PPL's Audit Committee.

1) Revenue Recognition - Unbilled Revenue

Revenues related to the sale of energy are recorded when service is rendered or when energy is delivered to customers. Because customers of KU's retail operations are billed on cycles which vary based on the timing of the actual reading of their electric meters, KU records estimates for unbilled revenues at the end of each reporting period. Such unbilled revenue amounts reflect estimates of the amount of energy delivered to customers since the date of the last reading of their meters. Such unbilled revenues reflect consideration of estimated usage by customer class, the effect of different rate schedules, changes in weather, and where applicable, the impact of weather normalization or other regulatory provisions of rate structures. In addition to the unbilled revenue accrual resulting from cycle billing, KU makes additional accruals resulting from the timing of customer bills. The accrual of unbilled revenues in this manner properly matches revenues and related costs. At December 31, 2011 and 2010 KU had unbilled revenue balances of $81 million and $89 million.

2) Price Risk Management

See "Financial Condition - Risk Management" above.

3) Defined Benefits

KU participates in a qualified funded defined benefit pension and a funded other postretirement benefits plan. These plans are applicable to the majority of the employees of KU and are sponsored by LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of the plans to KU based on its participation. KU records an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

Certain assumptions are made by LKE regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

estimated results. Any differences between actual and estimated results are recorded in regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. These amounts in regulatory assets and liabilities are amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- Discount Rate - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Long-term Return on Plan Assets - Management projects the long-term rates of return on plan assets based on historical performance, future expectations and periodic portfolio rebalancing among the diversified asset classes. These projected returns reduce the net benefit costs KU records currently.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.

- Health Care Cost Trend Rate - Management projects the expected increases in the cost of health care.

In selecting a discount rate for its defined benefit plans, LKE starts with a cash flow analysis of the expected benefit payment stream for its plans. In 2010, these plan-specific cash flows were matched against a spot-rate yield curve to determine the assumed discount rate. To develop the spot-rate yield curve, the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, served as the base from which those with the lowest and highest yields were eliminated to develop an appropriate subset of bonds from which the ultimate yield curve would be built. At that time, management believed this plan-specific cash flow matching model represented the best available tool for estimating the discount rate. Beginning in 2011, LKE utilized a new tool that enhanced this plan-specific cash flow matching methodology by primarily matching the plan-specific cash flows against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the same universe of Aa-rated corporate bonds from which those with the lowest and highest yields were eliminated, similar to the yield curve approach. Individual bonds are then selected based on the timing of each plan's cash flows and parameters are established as to the percentage of each individual bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed. This process more accurately approximated the process of settlement of the obligations which better aligned with the objective of selecting the discount rate. At December 31, 2011 LKE decreased the discount rate for its pension plan from 5.52% to 5.12% and decreased the discount rate for its other postretirement benefit plan from 5.12% to 4.78%.

The expected long-term rates of return for LKE's defined benefit pension and other postretirement benefit plans have been developed using a best-estimate of expected returns, volatilities and correlations for each asset class. LKE management corroborates these rates with expected long-term rates of return calculated by its independent actuary, who uses a building block approach that begins with a risk-free rate of return with factors being added such as inflation, duration, credit spreads and equity risk. Each plan's specific asset allocation is also considered in developing a reasonable return assumption. At December 31, 2011, LKE's expected return on plan assets was 7.25%.

In selecting a rate of compensation increase, LKE considers past experience in light of movements in inflation rates. At December 31, 2011, LKE's rate of compensation increase changed from 5.25% to 4.00%.

In selecting health care cost trend rates LKE considers past performance and forecasts of health care costs. At December 31, 2011, LKE's health care cost trend rates were 8.50% for 2012, gradually declining to 5.50% for 2019.

A variance in the assumptions listed above could have a significant impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and regulatory assets and liabilities allocated to KU. While the charts below reflect either an increase or decrease in each assumption, the inverse of the change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and regulatory assets and liabilities for KU by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption and does not include income tax effects.

At December 31, 2011, the defined benefit plans were recorded as follows:

Pension liabilities	$	83
Other postretirement benefit liabilities		62

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The following chart reflects the sensitivities in the December 31, 2011 Balance Sheet associated with a change in certain assumptions based on KU's primary defined benefit plans.

		Increase (Decrease)		
Actuarial assumption	Change in assumption	Impact on defined benefit liabilities	Impact on OCI	Impact on regulatory assets
Discount Rate	(0.25)%	$ 15		$ 15
Rate of Compensation Increase	0.25%	3		3
Health Care Cost Trend Rate (a)	1%	4		4

(a) Only impacts other postretirement benefits.

In 2011 and 2010, KU recognized net periodic defined benefit costs charged to operating expense of $14 million.

The following chart reflects the sensitivities in the 2011 Statement of Income (excluding income tax effects) associated with a change in certain assumptions based on KU's primary defined benefit plans.

Actuarial assumption	Change in assumption	Impact on defined benefit costs
Discount Rate	(0.25)%	$ 2
Expected Return on Plan Assets	(0.25)%	1
Rate of Compensation Increase	0.25%	1
Health Care Cost Trend Rate (a)	1%	

(a) Only impacts other postretirement benefits.

4) Asset Impairment

Impairment analyses are performed for long-lived assets that are subject to depreciation or amortization whenever events or changes in circumstances indicate that a long-lived asset's carrying value may not be recoverable. For these long-lived assets classified as held and used, such events or changes in circumstances are:

- a significant decrease in the market price of an asset;
- a significant adverse change in the extent or manner in which an asset is being used or in its physical condition;
- a significant adverse change in legal factors or in the business climate;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of an asset;
- a current-period operating or cash flow loss combined with a history of losses or a forecast that demonstrates continuing losses; or
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

For a long-lived asset classified as held and used, impairment is recognized when the carrying amount of the asset is not recoverable and exceeds its fair value. The carrying amount is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the asset is impaired, an impairment loss is recorded to adjust the asset's carrying value to its estimated fair value. Management must make significant judgments to estimate future cash flows including the useful lives of long-lived assets, the fair value of the assets and management's intent to use the assets. Alternate courses of action are considered to recover the carrying value of a long-lived asset, and estimated cash flows from the "most likely" alternative are used to assess impairment whenever one alternative is clearly the most likely outcome. If no alternative is clearly the most likely, then a probability-weighted approach is used taking into consideration estimated cash flows from the alternatives. For assets tested for impairment as of the balance sheet date, the estimates of future cash flows used in that test consider the likelihood of possible outcomes that existed at the balance sheet date, including the assessment of the likelihood of a future sale of the assets. That assessment is not revised based on events that occur after the balance sheet date. Changes in assumptions and estimates could result in significantly different results than those identified and recorded in the financial statements.

For a long-lived asset classified as held for sale, impairment exists when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If the asset (disposal group) is impaired, an impairment loss is recorded to adjust the carrying amount to its fair value less cost to sell. A gain is recognized for any subsequent increase in fair value less cost to sell, but not in excess of the cumulative impairment recognized.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

For determining fair value, quoted market prices in active markets are the best evidence. However, when market prices are unavailable, KU considers all valuation techniques appropriate under the circumstances and for which market participant inputs can be obtained. Generally discounted cash flows are used to estimate fair value, which incorporates market participant inputs when available. Discounted cash flows are calculated by estimating future cash flow streams and applying appropriate discount rates to determine the present value of the cash flow streams.

In 2011, KU did not recognize an impairment of any long-lived assets.

Goodwill is tested for impairment at the reporting unit level. KU's reporting unit has been determined to be at the operating segment level. A goodwill impairment test is performed annually or more frequently if events or changes in circumstances indicate that the carrying value of the reporting unit may be greater than the unit's fair value. Additionally, goodwill is tested for impairment after a portion of goodwill has been allocated to a business to be disposed of. Goodwill is tested for impairment using a two-step approach. In step 1, KU identifies a potential impairment by comparing the estimated fair value of KU (the goodwill reporting unit) to its carrying value, including goodwill, on the measurement date. If the estimated fair value exceeds its carrying amount, goodwill is not considered impaired. If the carrying amount exceeds the estimated fair value, the second step is performed to measure the amount of impairment loss, if any.

The second step requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. That is, the estimated fair value is allocated to all of KU's assets and liabilities as if KU had been acquired in a business combination and the estimated fair value of KU was the price paid. The excess of the estimated fair value of KU over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The implied fair value of goodwill is then compared with the carrying amount of that goodwill. If the carrying amount exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of the reporting unit's goodwill.

KU tested goodwill for impairment in the fourth quarter of 2011 and no impairment was recognized. Management used both discounted cash flows and market multiples to estimate the fair value of LKE, which involved the use of significant estimates and assumptions. Applying an appropriate weighting to both the discounted cash flow and market multiple valuations, a decrease in the forecasted cash flows of 10%, an increase in the discount rate by 25 basis points, or a 10% decrease in the multiples would not have resulted in an impairment of goodwill.

5) Loss Accruals

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are used, as necessary to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

In 2011, no significant adjustments were made to KU's existing contingencies. See Note 15 to the Financial Statements for commitment and contingency disclosures.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is reasonably possible that a loss has been incurred. Accounting guidance defines "reasonably possible" as cases in which "the future event or events occurring is more than remote, but less than likely to occur." See Note 15 to the Financial Statements for disclosure of other potential loss contingencies that have not met the criteria for accrual.

When an estimated loss is accrued, the triggering events for subsequently adjusting the loss accrual are identified, where applicable. The triggering events generally occur when the contingency has been resolved and the actual loss is paid or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the adjustment of certain recorded loss accruals:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. Past financial performance is no guarantee of future results.

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.

- Environmental and other litigation contingencies are reduced when the contingency is resolved, KU makes actual payments, a better estimate of the loss is determined or the loss is no longer considered probable.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, operation management and other parties.

6) Asset Retirement Obligations

KU is required to recognize a liability for legal obligations associated with the retirement of long-lived assets. The initial obligation is measured at its estimated fair value. An equivalent amount is recorded as an increase in the value of the capitalized asset and allocated to expense over the useful life of the asset. Until the obligation is settled, the liability is increased, through the recognition of accretion expense in the Statements of Income, for changes in the obligation due to the passage of time. The accretion and depreciation are offset with a regulatory credit on the income statement, such that there is no earnings impact. The regulatory asset created by the regulatory credit is relieved when the ARO has been settled. An ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. See Note 21 to the Financial Statements for related disclosures.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that considers estimated retirement costs in current period dollars that are inflated to the anticipated retirement date and then discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of various AROs and the related assets, are reviewed periodically to ensure that any material changes are incorporated into the estimate of the obligations. Any change to the capitalized asset is amortized over the remaining life of the associated long-lived asset.

At December 31, 2011, KU had AROs totaling $61 million recorded on the Balance Sheet. Of the total amount, $40 million, or 66%, relates to KU's ash ponds. The most significant assumptions surrounding AROs are the forecasted retirement costs, the discount rates and the inflation rates. A variance in the forecasted retirement costs, the discount rates or the inflation rates could have a significant impact on the ARO liabilities.

The following chart reflects the sensitivities related to KU's ARO liabilities for ash ponds at December 31, 2011:

	Change in Assumption	Impact on ARO Liability
Retirement Cost	10%	$ 4
Discount Rate	(0.25)%	2
Inflation Rate	0.25%	2

7) Income Taxes

Significant management judgment is required in developing KU's provision for income taxes primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. KU evaluates its tax positions following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization upon settlement that exceeds 50%. KU's management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, KU's uncertain tax positions are reassessed by considering information known at the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position maybe de-recognized, or the benefit of a previously

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

Past financial performance is no guarantee of future results.

recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2011, KU's existing reserve exposure to either increases or decreases in unrecognized tax benefits during the next 12 months is less than $1 million. This change could result from subsequent recognition, de-recognition and/or changes in the measurement of uncertain tax positions. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. See Note 5 to the Financial Statements for related disclosures.

8) Regulatory Assets and Liabilities

KU is a cost-based rate-regulated utility. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC, the KPSC, the VSCC or the TRA. See Note 6 to the Financial Statements for related disclosures.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to other regulated entities and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels, and is subject to change in the future. If future recovery of costs ceases to be probable, then asset write-off would be required to be recognized in operating income. Additionally, the regulatory agencies can provide flexibility in the manner and timing of the depreciation of PP&E and amortization of regulatory assets.

At December 31, 2011 and 2010, KU had regulatory assets of $217 million and $230 million. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices. At December 31, 2011 and 2010, KU had regulatory liabilities of $535 million and $574 million.

Other Information

PPL's Audit Committee has approved the independent auditor to provide audit, tax and other services permitted by Sarbanes-Oxley and SEC rules. The audit services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews. See "Item 14. Principal Accounting Fees and Services" for more information.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareowners of PPL Corporation

We have audited the accompanying consolidated balance sheets of PPL Corporation and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule listed in the index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits. We did not audit the 2010 financial statements of LG&E and KU Energy LLC (LKE), a wholly owned subsidiary, which statements reflect total assets of $10,719 million as of December 31, 2010, and total revenues of $493 million for the period November 1, 2010 (date of acquisition) to December 31, 2010. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for LKE, is based solely on the report of the other auditors.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and, for 2010, the report of other auditors, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of PPL Corporation and subsidiaries at December 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), PPL Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2012 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareowners of PPL Corporation

We have audited PPL Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control —Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). PPL Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in Management's Report on Internal Control over Financial Reporting at Item 9A. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As set forth in Item 9A, Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of WPD Midlands, which is included in the 2011 consolidated financial statements of PPL Corporation and subsidiaries and constituted 19% and 27% of total assets and net assets, respectively, as of December 31, 2011 and 6% and 9% of revenues and net income, respectively, for the year then ended. Our audit of internal control over financial reporting of PPL Corporation and subsidiaries also did not include an evaluation of the internal control over financial reporting of WPD Midlands.

In our opinion, PPL Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of PPL Corporation and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2011 and our report dated February 28, 2012 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

To the Board of Managers and Sole Member of PPL Energy Supply, LLC

We have audited the accompanying consolidated balance sheets of PPL Energy Supply, LLC and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of PPL Energy Supply, LLC and subsidiaries at December 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of LG&E and KU Energy LLC and subsidiaries at December 31, 2011 and the consolidated results of their operations and their cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

Report of Independent Registered Public Accounting Firm

To the Member of LG&E and KU Energy LLC

In our opinion, the accompanying consolidated balance sheet and the related consolidated statements of income, retained earnings, comprehensive income, cash flows, and capitalization present fairly, in all material respects, the financial position of LG&E and KU Energy LLC and its subsidiaries (Successor Company) at December 31, 2010 and the results of their operations and their cash flows for the period from November 1, 2010 to December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 10 to the consolidated financial statements, on November 1, 2010, PPL Corporation completed its acquisition of LG&E and KU Energy LLC and its subsidiaries. The push-down basis of accounting was used at the acquisition date.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Sole Stockholder of Louisville Gas and Electric Company

We have audited the accompanying balance sheet of Louisville Gas and Electric Company as of December 31, 2011, and the related statements of income, comprehensive income, cash flows, and equity for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Louisville Gas and Electric Company at December 31, 2011 and the results of its operations and its cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles.

COMBINED NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

General

Capitalized terms and abbreviations are explained in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

Business and Consolidation

(PPL)

PPL is an energy and utility holding company that, through its subsidiaries, is primarily engaged in: 1) the regulated generation, transmission, distribution and sale of electricity and the regulated distribution and sale of natural gas, primarily in Kentucky; 2) the regulated distribution of electricity in the U.K.; 3) the regulated transmission, distribution and sale of electricity in Pennsylvania; and 4) the competitive generation and marketing of electricity in portions of the northeastern and northwestern U.S. Headquartered in Allentown, PA, PPL's principal subsidiaries are LKE (including its principal subsidiaries, LG&E and KU), PPL Global, PPL Electric and PPL Energy Supply (including its principal subsidiaries, PPL EnergyPlus and PPL Generation).

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently referred to as WPD Midlands), from subsidiaries of E.ON AG. As PPL is consolidating WPD Midlands on a one-month lag, eight months of WPD Midlands' operating results are included in PPL's results of operations for 2011 with no comparable amounts for 2010.

On November 1, 2010, PPL acquired all of the limited liability company interests of E.ON U.S. LLC from a wholly owned subsidiary of E.ON AG. Upon completion of the acquisition, E.ON U.S. LLC was renamed LG&E and KU Energy LLC. LKE's operating results are included in PPL's results of operations for the full year of 2011, while 2010 includes LKE's operating results for the two months ended December 31, 2010.

See Note 10 for additional information regarding the acquisitions of WPD Midlands and LKE.

(PPL, LKE, LG&E and KU)

LKE is a holding company with cost-based rate-regulated utility operations through its subsidiaries, LG&E and KU, and is subject to PUHCA. LG&E and KU are engaged in the regulated generation, transmission, distribution and sale of electricity. LG&E also engages in the regulated distribution and sale of natural gas. LG&E and KU maintain their separate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name and it serves customers in Tennessee under the KU name.

(LKE, LG&E and KU)

The financial statements and accompanying footnotes of LKE, LG&E and KU have been segregated to present pre-acquisition activity as the "Predecessor" and post-acquisition activity as the "Successor." Predecessor activity covers the time period prior to November 1, 2010. Successor activity covers the time period after October 31, 2010. Certain accounting and presentation methods were changed to acceptable alternatives in the Successor financial statements to conform to PPL's accounting policies. The cost basis of certain assets and liabilities were changed as of November 1, 2010 as a result of the application of push-down accounting. Consequently, the financial position, results of operations and cash flows for the Successor period are not comparable to the Predecessor period. "Earnings reinvested" on the Balance Sheets of LG&E and KU were reset to $0 as of November 1, 2010 and only reflect earnings and dividend activity since that date. See Note 7 for information about an application filed with the FERC regarding future dividend payments related to this push-down accounting impact.

(PPL and PPL Energy Supply)

PPL Generation owns and operates a portfolio of competitive domestic power generating assets. These power plants are located in Pennsylvania and Montana and use well-diversified fuel sources including coal, uranium, natural gas, oil and water. PPL EnergyPlus sells electricity produced by PPL Generation subsidiaries, participates in wholesale market load-following auctions, and markets various energy products and commodities such as: capacity, transmission, FTRs, coal,

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

natural gas, oil, uranium, emission allowances, RECs and other commodities in competitive wholesale and competitive retail markets, primarily in the northeastern and northwestern U.S.

(PPL Energy Supply)

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding. The distribution was made based on the book value of the assets and liabilities of PPL Global with financial effect as of January 1, 2011. See Note 9 for additional information.

(PPL, PPL Energy Supply and LKE)

"Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income includes the activities of various businesses that were sold or distributed. See Note 9 for additional information. The Statements of Cash Flows do not separately report the cash flows of the Discontinued Operations, except for the LKE Predecessor period, which separately discloses these cash flows within operating, investing and financing activities, consistent with LKE's pre-acquisition accounting policy.

(PPL and PPL Electric)

PPL Electric is a cost-based rate-regulated subsidiary of PPL. PPL Electric's principal business is the regulated transmission and distribution of electricity to serve retail customers in its franchised territory in eastern and central Pennsylvania and the regulated supply of electricity to retail customers in that territory as a PLR.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The financial statements of the Registrants include each company's own accounts as well as the accounts of all entities in which the company has a controlling financial interest. Entities for which a controlling financial interest is not demonstrated through voting interests are evaluated based on accounting guidance for VIEs. The Registrants consolidate a VIE when they are determined to have a controlling interest in the VIE, and thus are the primary beneficiary of the entity. For PPL and PPL Energy Supply, see Note 22 for information regarding a consolidated VIE. Investments in entities in which a company has the ability to exercise significant influence but does not have a controlling financial interest are accounted for under the equity method. All other investments are carried at cost or fair value. All significant intercompany transactions have been eliminated. Any noncontrolling interests are reflected in the financial statements.

The financial statements of PPL, PPL Energy Supply, LKE, LG&E and KU include their share of any undivided interests in jointly owned facilities, as well as their share of the related operating costs of those facilities. See Note 14 for additional information.

(PPL)

PPL consolidates WPD, including WPD Midlands, on a one-month lag. Material intervening events, such as debt issuances that occur in the lag period, are recognized in the current period financial statements. Events that are significant but not material are disclosed.

Regulation

(PPL, PPL Electric, LKE, LG&E and KU)

PPL Electric, LG&E and KU are cost-based rate-regulated utilities for which rates are set by regulators to enable PPL Electric, LG&E and KU to recover the costs of providing electric or gas service, as applicable, and to provide a reasonable return to shareholders. Rates are generally established based on a historical test period adjusted to exclude unusual or nonrecurring items. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and liabilities is based on

Past financial performance is no guarantee of future results.

specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 6 for additional details regarding regulatory matters.

(PPL)

WPD is not subject to accounting for the effects of certain types of regulation as prescribed by GAAP. WPD operates in an incentive-based regulatory structure under distribution licenses granted by Ofgem. Electricity distribution revenues are set every five years through price controls that are not directly based on cost recovery. The price control formula that governs WPD's allowed revenue is designed to provide economic incentives to minimize operating, capital and financing costs. Ofgem completed a review in December 2009 and set distribution revenues that became effective April 1, 2010 and will continue through March 31, 2015.

Accounting Records *(PPL, PPL Electric, LKE, LG&E and KU)*

The system of accounts is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The Registrants continuously assess potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless recovery is assured.

Changes in Classification

The classification of certain amounts in the 2010 and 2009 financial statements have been changed to conform to the current presentation. The changes in classification did not affect the Registrants' net income or equity.

Comprehensive Income *(PPL, PPL Energy Supply, LKE, LG&E and KU)*

Comprehensive income, which includes net income and OCI, consists of changes in equity from transactions not related to shareowners. Comprehensive income is shown on the Statements of Comprehensive Income.

AOCI, which is presented on the Balance Sheets of PPL and included in Member's Equity on the Balance Sheets of PPL Energy Supply and LKE, consisted of the following after-tax gains (losses).

LG&E had AOCI balances of $(14) million and $(10) million at December 31, 2008 and 2009 (Predecessor periods). Changes between periods were due to $4 million of after-tax gains on qualifying derivatives. During the ten months ended October 31, 2010 (a Predecessor period), LG&E had $10 million of after-tax gains on qualifying derivatives. There were no AOCI balances at December 31, 2010 and 2011 (Successor periods).

KU had no AOCI balances at December 31, 2008 or 2009 (Predecessor periods), or at December 31, 2010 or 2011 (Successor periods). KU had $2 million of after-tax losses related to equity investees' AOCI during the ten months ended October 31, 2010 (a Predecessor period) which were eliminated with the effect of the PPL acquisition.

Earnings Per Share *(PPL)*

EPS is computed using the two-class method, which is an earnings allocation method for computing EPS that treats a participating security as having rights to earnings that would otherwise have been available to common shareowners. Share-

based payment awards that provide recipients a non-forfeitable right to dividends or dividend equivalents are considered participating securities.

Price Risk Management

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Energy and energy-related contracts are used to hedge the variability of expected cash flows associated with the generating units and marketing activities, as well as for trading purposes. Interest rate contracts are used to hedge exposures to changes in the fair value of debt instruments and to hedge exposures to variability in expected cash flows associated with existing debt instruments or forecasted issuances of debt. Foreign currency exchange contracts are used to hedge foreign currency exposures related to firm commitments, recognized assets or liabilities, forecasted transactions, net investments and foreign earnings translation. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain energy and energy-related contracts meet the definition of a derivative, while others do not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, contracts are periodically reviewed to assess whether a market mechanism has evolved which could facilitate net settlement. Certain derivative energy contracts have been excluded from the requirements of derivative accounting treatment because they meet the definition of NPNS. These contracts are accounted for using accrual accounting. All other contracts that have been classified as derivative contracts are reflected on the balance sheet at their fair value. These contracts are recorded as "Price risk management assets" and "Price risk management liabilities" on the Balance Sheets. Derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent Liabilities."

Energy and energy-related trades are assigned a strategy and accounting classification. Processes exist that allow for subsequent review and validation of the trade information. These strategies are discussed in more detail in Note 19. The accounting department provides the traders and the risk management department with guidelines on appropriate accounting classifications for various trade types and strategies. Some examples of these guidelines include, but are not limited to:

- Physical coal, limestone, lime, uranium, electric transmission, gas transportation, gas storage and renewable energy credit contracts are not derivatives due to the lack of net settlement provisions.
- Only contracts where physical delivery is deemed probable throughout the entire term of the contract can qualify for the NPNS exception.
- Physical transactions that permit cash settlement and financial transactions do not qualify for NPNS because physical delivery cannot be asserted; however, these transactions can receive cash flow hedge treatment if they lock in the future cash flows for energy-related commodities.
- Certain purchased option contracts or net purchased option collars may receive hedge accounting treatment. Those that are not eligible are marked to fair value through earnings.
- Derivative transactions that do not qualify for NPNS or hedge accounting treatment are marked to fair value through earnings.

A similar process is also followed by the treasury department as it relates to interest rate and foreign currency derivatives. Examples of accounting guidelines provided to the treasury department staff include, but are not limited to:

- Transactions to lock in an interest rate prior to a debt issuance can be designated as cash flow hedges.
- Cross-currency transactions to hedge interest and principal repayments can be designated as cash flow hedges.
- Transactions entered into to hedge fluctuations in the fair value of existing debt can be designated as fair value hedges.
- Transactions entered into to hedge the value of a net investment of foreign operations can be designated as net investment hedges.
- Derivative transactions that do not qualify for hedge accounting treatment are marked to fair value through earnings. These transactions generally include hedges of earnings translation risk associated with subsidiaries that report their financial statements in a currency other than the U.S. dollar. As such, these transactions reduce earnings volatility due solely to changes in foreign currency exchange rates.
- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Changes in the fair value of derivatives are recorded in either OCI or in current-period earnings.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the underlying nature of the hedged items.

PPL and its subsidiaries have elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL Energy Supply reflects its net realized and unrealized gains and losses associated with all derivatives that are held for trading purposes in "Net energy trading margins" on the Statements of Income.

See Notes 18 and 19 for additional information on derivatives.

(PPL and PPL Electric)

To meet its obligation as a PLR to its customers, PPL Electric has entered into certain contracts that meet the definition of a derivative. However, these contracts qualify for NPNS. See Notes 18 and 19 for additional information.

Revenue

Utility Revenue *(PPL)*

The Statements of Income "Utility" line item contains rate-regulated revenue from the following:

	2011	2010	2009
Domestic electric and gas revenue (a)	$ 4,674	$ 2,941	$ 3,218
U.K. electric revenue (b)	1,618	727	684
Total	$ 6,292	$ 3,668	$ 3,902

(a) Represents revenue from regulated generation, transmission and/or distribution in Pennsylvania, Kentucky, Virginia and Tennessee, including regulated wholesale revenue.
(b) Represents electric revenue from the operation of WPD's distribution networks. 2011 includes eight months of revenue for WPD Midlands, which are recorded on a one-month lag.

Revenue Recognition

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Operating revenues, except for "Energy-related businesses," are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all being read at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Unbilled wholesale energy revenues are recorded at month-end to reflect estimated amounts until actual dollars and MWhs are confirmed and invoiced. At that time, unbilled revenue is reversed and actual revenue is recorded.

Certain PPL subsidiaries participate primarily in the PJM RTO, as well as in other RTOs and ISOs. In PJM, PPL EnergyPlus is a marketer, a load-serving entity to its customers who have selected it as a supplier and a seller for PPL Energy Supply's generation subsidiaries. A function of interchange accounting is to match participants' MWh entitlements (generation plus scheduled bilateral purchases) against their MWh obligations (load plus scheduled bilateral sales) during every hour of every day. If the net result during any given hour is an entitlement, the participant is credited with a spot-market sale to the RTO at the respective market price for that hour; if the net result is an obligation, the participant is charged with a spot-market purchase at the respective market price for that hour. RTO purchases and sales are not allocated to individual customers. PPL Energy Supply records the hourly net sales in its Statements of Income as "Wholesale energy marketing" if in a net sales position and "Energy purchases" if in a net purchase position.

(PPL)

WPD's revenue is primarily from charges to suppliers to use its distribution system to deliver electricity to the end-user. WPD's allowed revenue is not dependent on volume delivered over the five-year price control period. However, in any fiscal period, WPD's revenue could be negatively affected if its tariffs and the volume delivered do not fully recover the allowed revenue for a given period. Any under recovery would be recovered in the next regulatory year, but would not be recorded as

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

a receivable in the current period. Any over recovery would be reflected in the current period as a liability and would not be included in revenue.

(PPL and PPL Energy Supply)

PPL Energy Supply records energy marketing activity in the period when the energy is delivered. Generally, sales that qualify as derivative instruments held for non-trading purposes are reported gross on the Statements of Income within "Wholesale energy marketing" and "Unregulated retail electric and gas." However, non-trading physical sales and purchases of electricity at major market delivery points (which is any delivery point with liquid pricing available, such as the pricing hub for PJM West), are netted and reported in the Statements of Income within "Wholesale energy marketing" or "Energy Purchases," depending on the original intent. Additionally, the bilateral sales and purchases that are designated as speculative trading activities and qualify as derivative instruments for accounting purposes are reported net on the Statements of Income within "Net energy trading margins." Spot market activity that balances PPL Energy Supply's physical trading positions is included on the Statements of Income in "Net energy trading margins."

"Energy-related businesses" revenue primarily includes revenue from the mechanical contracting and engineering subsidiaries. The mechanical contracting and engineering subsidiaries record revenue from construction contracts on the percentage-of-completion method of accounting, measured by the actual cost incurred to date as a percentage of the estimated total cost for each contract. Accordingly, costs and estimated earnings in excess of billings on uncompleted contracts are recorded within "Unbilled revenues" on the Balance Sheets, and billings in excess of costs and estimated earnings on uncompleted contracts are recorded within "Other current liabilities" on the Balance Sheets. The amount of costs and estimated earnings in excess of billings was $15 million and $9 million at December 31, 2011 and 2010, and the amount of billings in excess of costs and estimated earnings was $67 million and $70 million at December 31, 2011 and 2010.

Accounts Receivable

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition. See Note 10 for information related to the acquisitions of WPD Midlands and LKE.

(PPL, PPL Energy Supply and PPL Electric)

PPL Electric's customers may choose an alternative supplier for their generation supply. In accordance with a PUC-approved purchase of accounts receivable program, beginning in the first quarter of 2010, PPL Electric has purchased certain accounts receivable from alternative suppliers at a nominal discount, which reflects a provision for uncollectible accounts. The alternative suppliers (including PPL EnergyPlus) have no continuing involvement or interest in the purchased accounts receivable. The purchased accounts receivable are initially recorded at fair value using a market approach based on the purchase price paid and are classified as Level 2 in the fair value hierarchy. PPL Electric receives a nominal fee for administering its program. During 2011 and 2010, PPL Electric purchased $872 million and $617 million of accounts receivable from unaffiliated third parties. During 2011 and 2010, PPL Electric purchased $267 million and $215 million of accounts receivable from its affiliate, PPL EnergyPlus.

Allowance for Doubtful Accounts *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs, the age of the receivable, counterparty creditworthiness and economic conditions. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables, and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when it is known they will be received.

The changes in the allowance for doubtful accounts were:

2009 - Predecessor	3	4		4	3

(a) Primarily related to uncollectible accounts written off.
(b) Includes amounts associated with LKE activity since the November 1, 2010 acquisition date. See Note 10 for additional information related to the acquisition of LKE.
(c) Includes amounts related to the SMGT bankruptcy. See Note 15 for additional information.
(d) Includes amounts related to the June 2011, FERC approved settlement agreement between PPL and California ISO related to the sales made to the California ISO during the period October 2000 through June 2001 that were not paid to PPL subsidiaries. Therefore, the receivable and the related allowance for doubtful accounts were reversed and the settlement recorded.
(e) Primarily related to capital projects, thus the provision was recorded as an adjustment to construction work in progress.

Cash *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E, and KU)*

Cash Equivalents

All highly liquid debt instruments purchased with original maturities of three months or less are considered to be cash equivalents.

Restricted Cash and Cash Equivalents

Bank deposits and other cash equivalents that are restricted by agreement or that have been clearly designated for a specific purpose are classified as restricted cash and cash equivalents. The change in restricted cash and cash equivalents is reported as an investing activity on the Statements of Cash Flows. On the Balance Sheets, the current portion of restricted cash and cash equivalents is shown as "Restricted cash and cash equivalents" for PPL and PPL Energy Supply and included in "Other current assets" for PPL Electric, LKE, LG&E and KU while the noncurrent portion is included in "Other noncurrent assets" for all Registrants. At December 31, the balances of restricted cash and cash equivalents included the following.

Total	$ 209	$ 66	$ 145	$ 26	$ 13	$ 14	$ 29	$ 23	$ 29	$ 22

(a) Deposits posted to counterparties associated with trading activities.
(b) Cash collateral posted to counterparties related to interest rate swap contracts.
(c) Funds received by WPD, which are to be spent on approved initiatives to support a low carbon environment.
(d) Funds required by law to be held by WPD's captive insurance company to meet claims.
(e) Funds deposited with a trustee to defease PPL Electric's 1945 First Mortgage Bonds. See Note 7 for additional information.

Fair Value Measurements *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

The Registrants value certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities including investments in the NDT funds and defined benefit plans, and cash and cash equivalents. PPL and its subsidiaries use, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

The Registrants classify fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1** - quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

- **Level 2** - inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

- **Level 3** - unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, the Registrants' assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Short-term investments" ("Other current assets" if not material) on the Balance Sheets.

Past financial performance is no guarantee of future results.

Investments in Debt and Equity Securities

Investments in debt securities are classified as held-to-maturity and measured at amortized cost when there is an intent and ability to hold the securities to maturity. Debt and equity securities held principally to capitalize on fluctuations in their value with the intention of selling them in the near-term are classified as trading. All other investments in debt and equity securities are classified as available-for-sale. Both trading and available-for-sale securities are carried at fair value. The specific identification method is used to calculate realized gains and losses on debt and equity securities. Any unrealized gains and losses on trading securities are included in earnings. Through March 31, 2009, unrealized gains and losses on all available-for-sale securities were reported, net of tax, in OCI or recognized in earnings when the decline in fair value below amortized cost was determined to be an other-than-temporary impairment.

Accounting guidance effective April 1, 2009 modified the criteria for determining whether a decline in fair value of a debt security is other than temporary and whether the other-than-temporary impairment is recognized in earnings or reported in OCI. Beginning April 1, 2009, when a debt security is in an unrealized loss position and:

- there is an intent or a requirement to sell the security before recovery, the other-than-temporary impairment is recognized currently in earnings; or
- there is no intent or requirement to sell the security before recovery, the portion of the other-than-temporary impairment that is considered a credit loss is recognized currently in earnings and the remainder of the other-than-temporary impairment is reported in OCI, net of tax; or
- there is no intent or requirement to sell the security before recovery and there is no credit loss, the unrealized loss is reported in OCI, net of tax.

Equity securities were not impacted by this accounting guidance; therefore, unrealized gains and losses on available-for-sale equity securities continue to be reported, net of tax, in OCI. Earnings continue to be charged when an equity security's decline in fair value below amortized cost is determined to be an other-than-temporary impairment. See Notes 18 and 23 for additional information on investments in debt and equity securities.

Equity Method Investment *(LKE and KU)*

KU's investment in EEI is included in "Investments" on the Balance Sheets. KU owns 20% of the common stock of EEI. Through a power marketer affiliated with its majority owner, EEI sells its output to third parties. KU's investment in EEI is accounted for under the equity method of accounting and amounted to $30 million at December 31, 2011 and 2010. As part of PPL's acquisition of LKE and its subsidiaries, the purchase accounting adjustment to reflect the EEI investment at fair value was calculated using the discounted cash flow valuation method. The fair value of the investment in EEI was calculated to be $30 million. The fair value adjustment to the investment is being amortized over the expected remaining useful life of the plant and equipment at EEI, which is estimated to be over 20 years. KU's direct exposure to loss as a result of its involvement with EEI is generally limited to the value of its investment.

Cost Method Investment *(LKE, LG&E and KU)*

LG&E and KU each have an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Investments" on the LKE and KU Balance Sheets, in "Other noncurrent assets" on the LG&E Balance Sheets and in "Other investments" on the PPL Balance Sheets. LG&E and KU and ten other electric utilities are equity owners of OVEC, located in Piketon, Ohio. OVEC owns and operates two coal-fired plants, Kyger Creek Plant in Ohio and Clifty Creek Plant in Indiana, with combined nameplate generating capacities of 2,390 MW. OVEC's power is currently supplied to LG&E and KU and 11 other companies affiliated with the various owners. LG&E and KU own 5.63% and 2.5% of OVEC's common stock. Pursuant to a power purchase agreement, LG&E and KU are contractually entitled to their ownership percentage of OVEC's output, which is 134 MW for LG&E and 60 MW for KU.

LG&E and KU's combined investment in OVEC is not significant. The direct exposure to loss as a result of LG&E's and KU's involvement with OVEC is generally limited to the value of its investment; however, LG&E and KU may be conditionally responsible for a pro-rata share of certain OVEC obligations. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with the offset to a regulatory liability which are both being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition. See Notes 15 and 20 for additional discussion on the power purchase agreement.

Long-Lived and Intangible Assets

Property, Plant and Equipment

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PP&E is recorded at original cost, unless impaired. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor replacements are charged to expense as incurred. The Registrants record costs associated with planned major maintenance projects in the period in which the costs are incurred. No costs are accrued in advance of the period in which the work is performed for PPL Energy Supply or PPL Electric. LG&E and KU accrue costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. See Note 6 for additional information.

(PPL)

The original cost for the PP&E acquired in the WPD Midlands acquisition is its fair value on April 1, 2011, which approximated RAV as of the acquisition date. See Note 10 for additional information on the acquisition.

(PPL, PPL Electric, LKE and KU)

AFUDC is capitalized as part of the construction costs for cost-based rate-regulated projects for which a return on such costs is recovered after the project is placed in service. The debt component of AFUDC is credited to "Interest Expense" and the equity component is credited to "Other Income (Expense) - net" on the Statements of Income. KU has not recorded significant AFUDC as a return has been provided during the construction period for most projects.

(PPL and PPL Energy Supply)

Nuclear fuel-related costs, including fuel, conversion, enrichment, fabrication and assemblies, are capitalized as PP&E. Such costs are amortized as the fuel is spent using the units-of-production method and included in "Fuel" on the Statements of Income.

PPL Energy Supply capitalizes interest costs as part of construction costs. The following capitalized interest was excluded from "Interest Expense" on the Statements of Income.

	PPL	PPL Energy Supply
2011	$ 51	$ 47
2010	30	33
2009	44	45

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Included in PP&E on the Balance Sheets are capitalized costs of software projects that were developed or obtained for internal use. These capitalized costs are amortized ratably over the expected lives of the projects when they become operational, generally not to exceed five years. Following are capitalized software costs and the accumulated amortization.

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
PPL	$ 290	$ 98	$ 213	$ 70
PPL Energy Supply	26	21	30	20
PPL Electric	61	27	54	24
LKE	101	17	84	2
LG&E	52	9	44	1
KU	49	8	40	1

Amortization expense of capitalized software costs was as follows:

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

	2011	2010	2009
PPL	$ 39	$ 21	$ 13
PPL Energy Supply	2	3	2
PPL Electric	12	9	5

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
LKE	$ 15	$ 2	$ 12	$ 14
LG&E	8	1	7	8
KU	7	1	6	6

The amortization of capitalized software is included in "Depreciation" on the Statements of Income.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators.

Following are the weighted-average rates of depreciation at December 31.

	2011					
	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
Regulated utility plant (a)	3.03	(b)	2.49	4.54	5.11	4.17
Non-regulated PP&E - Generation	2.88	2.88				

	2010					
	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
Regulated utility plant (a)	3.27	2.31	2.27	4.70	5.40	4.10
Non-regulated PP&E - Generation	2.76	2.76				

(a) For PPL, LKE, LG&E and KU, as a result of the acquisition of LKE, the original cost for PP&E is its fair value on November 1, 2010, which approximated net book value. This fair value adjustment resulted in lowering the original cost basis of LKE's, LG&E's and KU's PP&E, thus impacting the calculation of the weighted-average depreciation rate.

(b) As a result of PPL Energy Supply's distribution of its membership interest in PPL Global in January 2011, PPL Energy Supply no longer has any regulated utility plant.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, PPL and its subsidiaries consider the expected use of the asset; the expected useful life of other assets to which the useful life of the intangible asset may relate; legal, regulatory, or contractual provisions that may limit the useful life; the company's historical experience as evidence of its ability to support renewal or extension; the effects of obsolescence, demand, competition, and other economic factors; and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL and PPL Energy Supply account for RECs as intangible assets. PPL and PPL Energy Supply buy and/or sell RECs and also create RECs through owned renewable energy generation facilities. In any period, PPL and PPL Energy Supply can be a net purchaser or seller of RECs depending on their contractual obligations to purchase or deliver RECs and the production of RECs from their renewable energy generation facilities. The carrying value of RECs created from their renewable energy generation facilities is initially recorded at zero value and purchased RECs are initially recorded based on their purchase price. When RECs are consumed to satisfy an obligation to deliver RECs to meet a state's Renewable Portfolio Standard Obligation or when RECs are sold to third parties, they are removed from the Balance Sheet at their weighted-average carrying value. Since the economic benefits of RECs are not diminished until they are consumed, RECs are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Energy purchases" on the Statements of Income. Gains and losses on the sale of RECs are included in "Other operation and maintenance" on the Statements of Income.

PPL, PPL Energy Supply, LKE, LG&E and KU account for emission allowances as intangible assets. PPL, PPL Energy Supply, LKE, LG&E and KU are allocated emission allowances by states based on their generation facilities' historical emissions experience, and have purchased emission allowances generally when it is expected that additional allowances will be needed. The carrying value of allocated emission allowances is initially recorded at zero value and purchased allowances are initially recorded based on their purchase price. LKE, LG&E, and KU emission allowances acquired in the LKE acquisition were recorded at fair value on the date of acquisition. See Note 10 for additional information on the acquisition. When consumed or sold, emission allowances are removed from the Balance Sheet at their weighted-average carrying value. Since the economic benefits of emission allowances are not diminished until they are consumed, emission allowances are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Fuel" on the Statements of Income. Gains and losses on the sale of emission allowances are included in "Other operation and maintenance" on the Statements of Income.

Asset Impairment

The Registrants review long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable. For example, certain emission allowances are expected to be sold rather than consumed. These emission allowances are tested for impairment when events or changes in circumstances, such as a decline in market prices, indicate that their carrying value may not be recoverable.

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell. See Notes 9 and 18 for a discussion of impairment charges recorded associated with long-lived assets classified as held for sale.

Goodwill is reviewed for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment after a portion of goodwill has been allocated to a business to be disposed of. PPL's reporting units are at or one level below its operating segments and represent significant businesses with discrete financial information that is regularly reviewed by segment management. If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

The goodwill recognized upon the acquisition of LKE, although entirely recorded at LG&E and KU, was assigned for impairment testing by PPL to its reporting units expected to benefit from the acquisition, which were the Kentucky Regulated segment and the Supply segment. The goodwill recognized upon the acquisition of WPD Midlands was assigned for impairment testing by PPL to its International Regulated segment. See Note 10 for additional information regarding the acquisitions.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Asset Retirement Obligations

PPL and its subsidiaries record liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased to reflect changes in the obligation due to the passage of time through the recognition of accretion expense classified within "Other operation and maintenance" on the Statements of Income. The accretion and depreciation related to LG&E's and KU's AROs are offset with a regulatory credit on the income statement, such that there is no earnings impact. The regulatory asset created by the regulatory credit is relieved when the ARO is settled.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is amortized over the remaining life of the associated long-lived asset. See Note 21 for additional information on AROs.

Compensation and Benefits

Defined Benefits *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Certain PPL subsidiaries sponsor various defined benefit pension and other postretirement plans. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to OCI or, for LG&E, KU and PPL Electric, to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

PPL uses an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 13 for a discussion of defined benefits.

Stock-Based Compensation

(PPL, PPL Energy Supply, PPL Electric and LKE)

PPL has several stock-based compensation plans for purposes of granting stock options, restricted stock, restricted stock units and performance units to certain employees as well as stock units and restricted stock units to directors. PPL grants most stock-based awards in the first quarter of each year. PPL and its subsidiaries recognize compensation expense for stock-based awards based on the fair value method. Stock options that vest in installments are valued as a single award. PPL grants stock options with an exercise price that is not less than the fair value of PPL's common stock on the date of grant. See Note 11 for a discussion of stock-based compensation. All awards are recorded as equity or a liability on the Balance Sheets. Stock-based compensation is primarily included in "Other operation and maintenance" on the Statements of Income. Stock-based compensation expense for PPL Energy Supply, PPL Electric and LKE includes an allocation of PPL Services' expense.

Other

Debt Issuance Costs *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Debt issuance costs are deferred and amortized over the appropriate term for the related debt using the interest method or another method, generally straight-line, if the results obtained are not materially different than those that would result from the interest method.

Past financial performance is no guarantee of future results.

Income Taxes

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL and its domestic subsidiaries file a consolidated U.S. federal income tax return. Prior to PPL's acquisition of LKE, LKE and its subsidiaries were included in E.ON US Investments Corp.'s consolidated U.S. federal income tax return.

Significant management judgment is required in developing the Registrants' provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and the determination of deferred tax assets, liabilities and valuation allowances.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. The Registrants use a two-step process to evaluate tax positions. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements of the Registrants in the future.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

The Registrants record valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. The Registrants consider the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If the Registrants determine that they are able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if the Registrants determine that they are not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

The Registrants defer investment tax credits when the credits are utilized and amortize the deferred amounts over the average lives of the related assets.

The Registrants recognize interest and penalties in "Income Taxes" on their Statements of Income.

See Note 5 for additional discussion regarding income taxes.

(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The income tax provision for PPL Energy Supply, PPL Electric, LKE, LG&E and KU is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if PPL Energy Supply, PPL Electric, LKE, LG&E, KU and any domestic subsidiaries each filed a separate return. Tax benefits are not shared between companies. A tax benefit inures only to the entity that gave rise to said benefit. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. PPL Energy Supply's intercompany tax payable was $50 million and $26 million at December 31, 2011 and 2010. PPL Electric's intercompany tax receivable was $22 million and $74 million at December 31, 2011 and 2010. LKE's intercompany tax receivable was $3 million and $40 million at December 31, 2011 and 2010. LG&E's intercompany tax receivable was $4 million and $4 million at December 31, 2011 and 2010. KU's intercompany tax receivable was $5 million at December 31, 2011 and the intercompany tax payable was $15 million at December 31, 2010.

(PPL, PPL Electric, LKE, LG&E and KU)

The provision for PPL, PPL Electric, LKE, LG&E and KU's deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheet in noncurrent "Regulatory assets" or "Regulatory liabilities."

Past financial performance is no guarantee of future results.

Taxes, Other Than Income *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

The Registrants present sales taxes in "Accounts Payable" and value-added taxes in "Taxes" on their Balance Sheets. These taxes are not reflected on the Statements of Income. See Note 5 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Leases

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL and its subsidiaries evaluate whether arrangements entered into contain leases for accounting purposes. See Note 11 for a discussion of arrangements under which PPL Energy Supply, LG&E and KU are lessees for accounting purposes.

(PPL and PPL Energy Supply)

PPL EnergyPlus entered into several tolling agreements whereby PPL EnergyPlus was considered the lessor for accounting purposes. See Note 9 for additional information regarding the 2010 sale of the Long Island generation business and the tolling agreements that were transferred to the purchaser upon completion of the sale.

Fuel, Materials and Supplies

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fuel, natural gas stored underground and materials and supplies are valued at the lower of cost or market using the average cost method. Fuel costs for electric generation are charged to expense as used. For LG&E, natural gas supply costs are charged to expense as delivered to the distribution system. See Note 6 for further discussion of the fuel adjustment clause and gas supply clause.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31.

	PPL		PPL Energy Supply	
	2011	2010	2011	2010
Fuel	$ 246	$ 260	$ 96	$ 97
Natural gas stored underground (a)	73	81	20	21
Materials and supplies	335	302	182	179
	$ 654	$ 643	$ 298	$ 297

	LKE		LG&E		KU	
	2011	2010	2011	2010	2011	2010
Fuel	$ 150	$ 163	$ 53	$ 68	$ 97	$ 95
Natural gas stored underground (a)	53	60	53	60		
Materials and supplies	80	75	36	34	44	41
	$ 283	$ 298	$ 142	$ 162	$ 141	$ 136

(a) The majority of LKE's and LG&E's natural gas stored underground is held to serve native load. The majority of PPL Energy Supply's natural gas stored underground is available for resale.

Guarantees *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 15 for further discussion of recorded and unrecorded guarantees.

Treasury Stock *(PPL and PPL Electric)*

PPL and PPL Electric restore all shares of common stock acquired to authorized but unissued shares of common stock upon acquisition.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Foreign Currency Translation and Transactions *(PPL)*

The GBP, which is the local currency, is the functional currency of WPD. As such, assets and liabilities are translated at the exchange rates on the date of consolidation and related revenues and expenses are translated at average exchange rates prevailing during the period included in PPL's results of operations. Adjustments resulting from translation are recorded in AOCI. The effect of translation is removed from AOCI upon the sale or substantial liquidation of the international subsidiary that gave rise to the translation adjustment.

Gains or losses relating to foreign currency transactions are recognized in "Other Income (Expense) - net" on the Statements of Income. Net transaction losses were $15 million in 2011 and insignificant in 2010 and 2009.

New Accounting Guidance Adopted *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Disclosures about an Employer's Participation in a Multiemployer Plan

Effective December 31, 2011, the Registrants retrospectively adopted accounting guidance issued to improve the transparency about an employer's participation in a multiemployer plan. The disclosures required by this guidance include the significant multiemployer plans in which an employer participates, the level of the employer's participation in these plans, the financial health of these plans and the nature of employer commitments to these plans. For plans for which users are unable to obtain additional publicly available information outside the employer's financial statements, additional disclosures are required.

The adoption of this standard resulted in additional footnote disclosure for PPL and PPL Energy Supply but did not have a significant impact on any of the Registrants. See Note 13 for disclosures related to PPL Energy Supply's participation in multiemployer plans.

Presentation of Comprehensive Income

Effective December 31, 2011, the Registrants retrospectively adopted accounting guidance that was issued to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items that are recorded in OCI. This guidance requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements where the first statement includes the components of net income and the second statement includes the components of OCI.

Regardless of whether an entity chooses to present comprehensive income in a single continuous statement or in two separate but consecutive statements, the guidance also would have required an entity to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. However, subsequent to the issuance of this new accounting guidance, this requirement that companies present reclassification adjustments for each component of OCI in both net income and OCI on the face of the financial statements was deferred for further evaluation. The deferral did not change the requirement to present items of net income, items of other comprehensive income and total comprehensive income in either one continuous statement or two separate consecutive statements.

The Registrants required to present comprehensive income have elected to present two separate consecutive statements. The adoption of this standard resulted in a change in presentation and additional footnote disclosure that did not have a significant impact on the Registrants.

2. Segment and Related Information

(PPL and PPL Energy Supply)

Since the acquisition of LKE on November 1, 2010, PPL is organized into four segments: Kentucky Regulated, International Regulated, Pennsylvania Regulated and Supply. PPL's segments are split between its regulated and competitive businesses with its regulated businesses further segmented by geographic location.

The Kentucky Regulated segment consists primarily of LKE's regulated electric generation, transmission and distribution operations, primarily in Kentucky. This segment also includes LKE's regulated distribution and sale of natural gas in Kentucky. In addition, the Kentucky Regulated segment includes certain financing activities associated with the acquisition of LKE. See Note 10 for additional information regarding the acquisition.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The International Regulated segment primarily consists of the regulated electric distribution operations in the U.K. This includes the operating results and assets of WPD Midlands since the April 1, 2011 acquisition date recorded on a one-month lag. The International Regulated segment also includes certain acquisition-related costs and financing activities associated with the acquisition of WPD Midlands. See Note 10 for additional information regarding the acquisition.

The Pennsylvania Regulated segment includes the regulated electric transmission and distribution operations of PPL Electric.

The Supply segment primarily consists of the domestic energy marketing and trading activities, as well as the competitive generation operations of PPL Energy Supply. In 2011, 2010 and 2009, PPL Energy Supply sold certain Supply segment generation facilities and businesses. See Note 9 for additional information.

"Unallocated Costs" represent one-time LKE acquisition-related costs including advisory, accounting and legal fees, certain internal costs and 2010 Bridge Facility costs.

The results of several facilities and businesses have been classified as Discontinued Operations on the Statements of Income. See Note 9 for additional information on these discontinued operations. Therefore, with the exception of "Net Income Attributable to PPL/PPL Energy Supply," the operating results from these facilities and businesses have been excluded from the income statement data tables below.

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent, PPL Energy Funding. Following the distribution, PPL Energy Supply operates in a single reportable segment, the Supply segment. PPL Energy Supply's 2010 and 2009 segment information was revised to reflect PPL Global as a Discontinued Operation. See Note 9 for additional information. The Supply segment information reported by PPL Energy Supply does not equal the Supply segment information reported by PPL because additional Supply segment functions exist at PPL. Further, certain income items, including PLR revenue and certain interest income with affiliates, exist at PPL Energy Supply but are eliminated in consolidation by PPL. Finally, certain expense items are fully allocated to the segments by PPL only.

Segment costs include direct charges, as well as an allocation of indirect corporate service costs, from PPL Services. These service costs include functions such as financial, legal, human resources and information services. See Note 16 for additional information.

Financial data for the segments are:

(a) Includes unrealized gains and losses from economic activity. See Note 19 for additional information.
(b) See Note 1 for additional information on Utility Revenue.
(c) See "PLR Contracts/Purchase of Accounts Receivable" and "NUG Purchases" in Note 16 for a discussion of the basis of accounting between reportable segments.
(d) Represents non-cash expense items that include amortization of nuclear fuel, regulatory assets, debt discounts and premiums, debt issuance costs, emission allowances and RECs.
(e) Includes interest income from affiliate(s).
(f) Includes interest expense with affiliate(s).
(g) Represents both current and deferred income taxes, including investment tax credits.
(h) Represents a non-cash expense item that is also included in "Income Taxes."
(i) For PPL Energy Supply, 2010 and 2009 were reported as Discontinued Operations. See Note 9 for additional information, including the $24 million of income tax expense recognized in 2009 by the International Regulated segment related to a correction of income tax bases for the Latin American businesses sold in 2007.
(j) In April 2011, during the PPL Susquehanna Unit 2 refueling and generation uprate outages, a planned inspection of the Unit 2 turbine revealed cracks in certain of its low pressure turbine blades. As a precaution, PPL Susquehanna also took Unit 1 out of service in mid-May to inspect that unit's turbine blades. This inspection revealed cracked blades similar to those found in Unit 2. Replacement of these blades was completed, significantly extending these outages. The after-tax earnings impact, including reduced energy sales margins and repair expense for both units was $63 million in 2011.
(k) A portion of the goodwill related to the 2010 LKE acquisition has been attributed to PPL's Supply segment.

(PPL Electric, LKE, LG&E and KU)

PPL Electric, LKE, LG&E and KU each operate within a single reportable segment.

3. Preferred Securities

Preferred Stock

(PPL)

PPL is authorized to issue up to 10 million shares of preferred stock. No PPL preferred stock was issued or outstanding in 2011, 2010, or 2009.

PPL classifies preferred securities of a subsidiary as "Noncontrolling interests" on the Balance Sheets. Dividend requirements of $16 million for 2011, $17 million for 2010 and $18 million for 2009 were included in "Net Income Attributable to Noncontrolling Interests" on the Statements of Income.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(PPL Electric)

PPL Electric is authorized to issue up to 629,936 shares of 4-1/2% Preferred Stock and 10 million shares of series preferred stock. There were 247,524 shares of 4-1/2% Preferred Stock (amounting to $25 million) and an aggregate of 257,665 shares of four series of preferred stock (amounting to $26 million) issued and outstanding at December 31, 2009.

In April 2010, PPL Electric redeemed all of its outstanding preferred stock, with a par value in the aggregate of $51 million, for $54 million including accumulated dividends. The redeemed shares are no longer outstanding and represent only the right to receive the applicable redemption price, to the extent the shares have not yet been presented for payment. The premium of $3 million is included in "Distributions on Preferred Securities" on the Statement of Income.

(LG&E)

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2011, 2010 or 2009.

(KU)

KU is authorized to issue up to 5,300,000 shares of preferred stock without par value. KU had no preferred stock issued or outstanding in 2011, 2010 or 2009.

Preference Stock

(PPL Electric)

Of the 10 million shares of Preference Stock authorized, PPL Electric had 2.5 million shares of 6.25% Series Preference Stock (Preference Shares) issued and outstanding in 2011, 2010 and 2009. The Preference Shares are held by a bank that acts as depositary for 10 million depositary shares, each of which represents a one-quarter interest in a Preference Share. Holders of the depositary shares are entitled to all proportional rights and preferences of the Preference Shares, including dividend, voting, redemption and liquidation rights, exercised through the bank acting as a depositary. The Preference Shares rank senior to PPL Electric's common stock but have no voting rights, except as provided by law, and they have a liquidation preference of $100 per share (equivalent to $25 per depositary share). The Preference Shares, which have no stated maturity date and no sinking fund requirements, have been redeemable by PPL Electric since April 6, 2011 for $100 per share (equivalent to $25 per depositary share).

Dividends on the Preference Shares are not cumulative and will be paid when, as and if declared by the Board of Directors at a fixed annual rate of 6.25%, or $1.5625 per depositary share per year. PPL Electric may not pay dividends on, or redeem, purchase or make a liquidation payment with respect to any of its common stock, except in certain circumstances, unless full dividends on the Preference Shares have been paid for the then-current dividend period.

(KU)

KU is authorized to issue up to 2,000,000 shares of preference stock without par value. KU had no preference stock issued or outstanding in 2011, 2010 or 2009.

4. Earnings Per Share

(PPL)

Basic EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding during the period. Diluted EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of shares outstanding that are increased for additional shares that would be outstanding if potentially dilutive non-participating securities were converted to common shares as calculated using the treasury stock method. In 2011, 2010 and 2009, these securities included stock options and performance units granted under incentive compensation plans. Additionally, the 2011 and 2010 Purchase Contracts associated with the 2011 and 2010 Equity Units will be dilutive under the treasury stock method if the average VWAP of PPL's common stock for a certain period exceeds approximately $30.99 and $28.80. The 2011 Purchase Contracts were excluded from the diluted EPS calculations because they did not meet this criteria during 2011. The 2010 Purchase Contracts were included in the diluted EPS calculation for 2011 as they met this criteria for a portion of that year, but were excluded from the diluted EPS calculations for 2010 because they did not meet this criteria for that year. Subject to antidilution adjustments at December 31, 2011, the maximum number of shares issuable to settle the Purchase Contracts was 101,552,245 shares, including

Past financial performance is no guarantee of future results.

86,552,565 shares that could be issued under standard provisions of the Purchase Contracts and 14,999,680 shares that could be issued under make-whole provisions in the event of early settlement upon a Fundamental Change. See Note 7 for additional information on both the 2011 and 2010 Equity Units.

Reconciliations of the amounts of income and shares of PPL common stock (in thousands) for the periods ended December 31 used in the EPS calculation are:

	2011	2010	2009
Income (Numerator)			
Income from continuing operations after income taxes attributable to PPL	$ 1,493	$ 955	$ 414
Less amounts allocated to participating securities	6	4	2
Income from continuing operations after income taxes available to PPL common shareowners	$ 1,487	$ 951	$ 412
Income (loss) from discontinued operations (net of income taxes) available to PPL	$ 2	$ (17)	$ (7)
Net income attributable to PPL	$ 1,495	$ 938	$ 407
Less amounts allocated to participating securities	6	4	2
Net income available to PPL common shareowners	$ 1,489	$ 934	$ 405
Shares of Common Stock (Denominator)			
Weighted-average shares - Basic EPS	550,395	431,345	376,082
Add incremental non-participating securities:			
Stock options and performance units	400	224	324
2010 Purchase Contracts	157		
Weighted-average shares - Diluted EPS	550,952	431,569	376,406
Basic EPS			
Available to PPL common shareowners:			
Income from continuing operations after income taxes	$ 2.70	$ 2.21	$ 1.10
Income (loss) from discontinued operations (net of income taxes)	0.01	(0.04)	(0.02)
Net Income	$ 2.71	$ 2.17	$ 1.08
Diluted EPS			
Available to PPL common shareowners:			
Income from continuing operations after income taxes	$ 2.70	$ 2.20	$ 1.10
Income (loss) from discontinued operations (net of income taxes)		(0.03)	(0.02)
Net Income	$ 2.70	$ 2.17	$ 1.08

During 2011, PPL issued 443,865 shares of common stock related to the exercise of stock options, vesting of restricted stock and restricted stock units and conversion of stock units granted to directors under its stock-based compensation plans. In addition, PPL issued 301,319 and 2,269,388 shares of common stock related to its ESOP and DRIP during 2011. See Note 12 for a discussion of PPL's stock-based compensation plans.

See Note 7 for information on the issuance of common stock and 2011 and 2010 Equity Units.

The following stock options to purchase PPL common stock and performance units were excluded from the computations of diluted EPS because the effect would have been antidilutive.

(Shares in thousands)	2011	2010	2009
Stock options	5,084	4,936	2,394
Performance units	2	45	1

5. Income and Other Taxes

(PPL)

"Income from Continuing Operations Before Income Taxes" included the following components:

	2011	2010	2009
Domestic income	$ 1,715	$ 952	$ 207
Foreign income	486	287	331
Total	$ 2,201	$ 1,239	$ 538

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes and the tax effects of net operating loss and tax

credit carryforwards. The provision for PPL's deferred income taxes for regulated assets is based upon the ratemaking principles of the applicable jurisdiction. See Notes 1 and 6 for additional information.

Net deferred tax assets have been recognized based on management's estimates of future taxable income for the U.S. and certain foreign jurisdictions in which PPL's operations have historically been profitable.

Significant components of PPL's deferred income tax assets and liabilities were as follows:

	2011	2010
Deferred Tax Assets		
Deferred investment tax credits	$ 113	$ 45
Regulatory obligations	149	205
Accrued pension costs	325	316
Accrued litigation costs	2	31
Federal loss carryforwards	305	314
State loss carryforwards	272	269
Federal tax credit carryforwards	240	169
Foreign capital loss carryforwards	578	377
Foreign loss carryforwards	7	
Foreign - pensions	74	87
Foreign - regulatory obligations	67	
Foreign - other	21	8
Contributions in aid of construction	133	152
Domestic - other	227	219
Valuation allowances	(724)	(464)
Total deferred tax assets	1,789	1,728
Deferred Tax Liabilities		
Domestic plant - net	3,465	3,010
Taxes recoverable through future rates	137	105
Unrealized gain on qualifying derivatives	331	298
Other regulatory assets	234	321
Regulatory undercollections		22
Reacquired debt costs	93	25
Foreign plant - net	975	526
Foreign - other	22	36
Domestic - other	103	95
Total deferred tax liabilities	5,360	4,438
Net deferred tax liability	$ 3,571	$ 2,710

PPL had the following loss and tax credit carryforwards.

	2011	2010	Expiration
Loss carryforwards			
Federal net operating losses (a)	$ 876	$ 799	2028-2031
Federal capital losses (a)		155	2011-2014

Federal AMT credit (a)	20	20	Indefinite
Federal foreign tax credit	12		2017-2021
Federal - other (a)	28	24	2016-2031

(a) 2010 loss and credit carryforwards associated with the acquisition of LKE. LKE's federal capital loss carryforwards were fully utilized in 2011.
(b) 2010 state net operating loss and state capital loss carryforwards associated with the acquisition of LKE are $1.0 billion and $163 million.
(c) 2011 includes $456 million of foreign capital losses associated with WPD Midlands.

Valuation allowances have been established for the amount that, more likely than not, will not be realized. The changes in deferred tax valuation allowances were:

	Balance at Beginning of Period	Additions: Charged to Income	Additions: Charged to Other Accounts	Deductions	Balance at End of Period
2011	$ 464	$ 190	$ 112 (a)	$ 42 (b)	$ 724
2010	312	221	6 (c)	75 (d)	464
2009	285	24	17 (e)	14 (f)	312

(a) Primarily related to a $101 million valuation allowance that was recorded against certain deferred tax assets as a result of the 2011 acquisition of WPD Midlands. See Note 10 for additional information on the acquisition.
(b) The reduction of the U.K. statutory income tax rate resulted in a $35 million reduction in the valuation allowance. See "Reconciliation of Income Tax Expense" below for more information on the impact of the U.K. Finance Act of 2011.
(c) A valuation allowance was recorded against certain deferred tax assets as a result of the 2010 acquisition of LKE. See Note 10 for additional information on the acquisition.
(d) Resulting from the projected revenue increase in connection with the expiration of the Pennsylvania generation rate caps in 2010, the valuation allowance related to state net operating loss carryforwards over the remaining carryforward period was reduced by $72 million (or $0.17 per share, basic and diluted).
(e) Related to the change in foreign net operating loss carryforwards, including the change in foreign currency exchange rates.
(f) Primarily from the projected revenue increase in connection with the expiration of the Pennsylvania generation rate caps in 2010, the valuation allowance related to a portion of state net operating loss carryforwards was reduced by $13 million.

PPL Global does not pay or record U.S. income taxes on the undistributed earnings of WPD, as management has determined that the earnings are indefinitely reinvested. Historically, dividends paid by WPD have been distributions from current year's earnings. WPD's long-term working capital forecasts and capital expenditure projections for the foreseeable future require reinvestment of WPD's undistributed earnings, and WPD would have to issue debt or access credit facilities to fund any distributions in excess of current earnings. Additionally, U.S. long-term working capital forecasts and capital expenditure projections for the foreseeable future do not require or contemplate distributions from WPD in excess of some portion of future WPD earnings. The cumulative undistributed earnings are included in "Earnings Reinvested" on the Balance Sheets. The amounts considered permanently reinvested at December 31, 2011 and 2010 were $1.2 billion and $837 million. If the WPD earnings were remitted as dividends, PPL Global could be subject to additional U.S. taxes, net of allowable foreign tax credits. It is not practicable to estimate the amount of additional taxes that could be payable on these foreign earnings.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income from Continuing Operations Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

	2011	2010	2009

(a) During 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for Federal income tax purposes. Due to the decrease in taxable income related to bonus depreciation and a decrease in projected future taxable income, PPL recorded $43 million in state deferred income tax expense related to deferred tax valuation allowances.

Additionally, the 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

Pennsylvania H.B. 1531, enacted in October 2009, increased the net operating loss limitation to 20% of taxable income for tax years beginning in 2010. During 2009, based on the projected revenue increase due to the expiration of the Pennsylvania generation rate caps in 2010, PPL recorded a $13 million state deferred income tax benefit related to the reversal of deferred tax valuation allowances for a portion of its Pennsylvania net operating losses. During 2010, PPL recorded an additional $72 million state deferred income tax benefit related to the reversal of deferred tax valuation allowances related to the future projections of taxable income over the remaining carryforward period of the net operating losses.

(b) During 2011, PPL recorded a $28 million federal income tax benefit related to U.K. pension contributions.

During 2010, PPL recorded additional U.S. income tax expense resulting from increased taxable dividends and certain restructuring of U.K. entities.

(c) In 1997, the U.K. imposed a Windfall Profits Tax (WPT) on privatized utilities, including WPD. PPL filed its tax returns for years subsequent to its 1997 and 1998 claims for refund on the basis that the U.K. WPT was creditable. In September 2010, the U.S. Tax Court (Tax Court) ruled in PPL's favor in a dispute with the IRS, concluding that the U.K. WPT is a creditable tax for U.S. tax purposes. As a result and with the finalization of other issues, PPL recorded a $42 million tax benefit in 2010. In January 2011, the IRS appealed the Tax Court's decision to the U.S. Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision and holding that the U.K. WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a $39 million expense in 2011. On February 27, 2012, PPL filed with the Third Circuit a petition for rehearing of its opinion on this matter.

In July 2010, the U.S. Tax Court ruled in PPL's favor in a dispute with the IRS, concluding that street lighting assets are depreciable for tax purposes over seven years. As a result, PPL recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes. The IRS did not appeal this decision.

During 2011, 2010 and 2009, PPL recorded a $6 million, $7 million and $6 million tax benefit to federal and state income tax reserves related to stranded cost securitization.

(d) During 2011, WPD reached an agreement with the HM Revenue & Customs, the U.K. tax authority, related to the amount of the capital losses that resulted from prior years' restructuring in the U.K. and recorded a $147 million foreign tax benefit for the reversal of tax reserves related to the capital losses. Additionally, WPD recorded a $147 million valuation allowance for the amount of capital losses that, more likely than not, will not be utilized.

During 2010, PPL recorded a $261 million foreign tax benefit in conjunction with losses resulting from restructuring in the U.K. A portion of these losses offset tax on a deferred gain from a prior year sale of WPD's supply business. WPD recorded a $215 million valuation allowance for the amount of capital losses that, more likely than not, will not be realized.

During 2009, PPL recorded a $46 million foreign tax benefit and a related $46 million tax reserve related to losses resulting from restructuring in the U.K. Additionally, PPL recorded a $29 million foreign tax benefit related to the resolution of a tax dispute and foreign currency exchange losses.

(e) During 2011, PPL recorded $17 million in federal and state tax benefits related to the filing of the 2010 federal and state income tax returns. Of this amount, $7 million in tax benefits relate to an additional domestic manufacturing deduction resulting from revised bonus depreciation amounts and $3 million in tax benefits relate to the flow-through impact of Pennsylvania regulated state tax depreciation.

During 2009, PPL received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL deducted the resulting IRC Sec. 481 adjustment on its 2008 federal income tax return and recorded a $24 million adjustment to federal and state income tax expense resulting from the reduction in federal income tax benefits related to the domestic manufacturing deduction and certain state tax benefits related to state net operating losses and regulated depreciation.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(f) During 2010, PPL recorded an increase in tax benefits related to domestic manufacturing deductions due to an increase in domestic taxable income resulting from the expiration of generation rate caps in 2010. In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation deduction related to bonus depreciation significantly reduced the tax benefits related to domestic manufacturing deductions during 2010 and eliminated the tax benefit in 2011.

(g) Beginning in 2013, provisions within Health Care Reform eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage. As a result, PPL recorded deferred income tax expense during 2010. See Note 13 for additional information.

(h) The U.K.'s Finance Act of 2011, enacted in July 2011, included reductions in the U.K. statutory income tax rate. The statutory income tax rate was reduced from 27% to 26% retroactive to April 1, 2011 and will be reduced from 26% to 25 % effective April 1, 2012. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit during 2011 related to both tax rate decreases.

The U.K.'s Finance Act of 2010, enacted in July 2010, included a reduction in the U.K. statutory income tax rate. Effective April 1, 2011, the statutory income tax rate was reduced from 28% to 27%. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit.

(i) During 2011 and 2010, PPL recorded a deferred tax benefit related to investment tax credits on progress expenditures related to hydroelectric plant expansions. See Note 8 for additional information.

(j) During 2011, PPL completed the sale of certain non-core generation facilities. See Note 9 for additional information. Due to changes in state apportionment resulting in the reduction in the future estimated state tax rate, PPL recorded a deferred tax benefit related to its December 31, 2011 state deferred tax liabilities.

	2011	2010	2009
Taxes, other than income			
State gross receipts	$ 140	$ 145	$ 187
State utility realty	(9)	5	5
State capital stock	18	6	6
Foreign property	113	52	57
Domestic property and other	64	30	25
Total	$ 326	$ 238	$ 280

See Note 6 for information on a settlement related to PURTA tax that was returned to PPL Electric customers.

(PPL Energy Supply)

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes and the tax effects of net operating loss and tax credit carryforwards.

Net deferred tax assets have been recognized based on management's estimates of future taxable income for the U.S. and certain foreign jurisdictions in which PPL Energy Supply's operations have historically been profitable.

Significant components of PPL Energy Supply's deferred income tax assets and liabilities were as follows:

	2011	2010
Deferred Tax Assets		
Deferred investment tax credits	$ 55	$ 33
Accrued pension costs	100	100
Accrued litigation costs	1	31
Federal loss carryforwards	1	
Federal tax credit carryforwards	58	
State loss carryforwards	78	111
Foreign capital loss carryforwards		377
Foreign - pensions		87
Foreign - other		8
Domestic - other	79	84
Valuation allowances	(72)	(408)
Total deferred tax assets	300	423
Deferred Tax Liabilities		
Domestic plant - net	1,407	1,246
Unrealized gain on qualifying derivatives	380	326
Foreign - plant		526
Foreign - other		36
Domestic other	51	52
Total deferred tax liabilities	1,838	2,186
Net deferred tax liability	$ 1,538	$ 1,763

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PPL Energy Supply had the following loss and tax credit carryforwards.

	2011	2010	Expiration
Loss carryforwards			
Federal net operating losses	$ 3		2031
State net operating losses (a)	1,198	$ 1,714	2012-2031
Foreign capital losses (a)		1,395	Indefinite
Credit carryforwards			
Federal investment tax credit	55		2031
Federal - other	3		2031

(a) During 2011, PPL Energy Supply distributed its membership interest in PPL Global to PPL Energy Funding. See Note 9 for additional information.

Valuation allowances have been established for the amount that, more likely than not, will not be realized. The changes in deferred tax valuation allowances were:

	Balance at Beginning of Period	Additions: Charged to Income	Additions: Charged to Other Accounts	Deductions	Balance at End of Period
2011	$ 408	$ 22		$ 358 (a)	$ 72
2010	255	205		52 (b)	408
2009 (c)	226	12	$ 17 (d)		255

(a) During 2011, PPL Energy Supply distributed its membership interest in PPL Global to PPL Energy Funding. See Note 9 for additional information.
(b) Resulting from the projected revenue increase in connection with the expiration of the Pennsylvania generation rate caps in 2010, the valuation allowance related to state net operating loss carryforwards over the remaining carryforward period was reduced by $52 million.
(c) Pennsylvania state legislation, enacted in 2007 and 2009, increased the net operating loss limitation. As a result, the deferred tax asset (and related valuation allowance) associated with certain of its Pennsylvania net operating loss carryforwards for all periods presented were increased to reflect the higher limitation. There was no impact on the net deferred tax asset position as a result of the legislation and related adjustments.
(d) Primarily related to the change in foreign net operating loss carryforwards including the change in currency exchange rates.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income (Loss) from Continuing Operations Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

	2011	2010	2009
Income Tax Expense (Benefit)			
Current - Federal	$ 139	$ 208	$ (137)
Current - State	(12)	78	(7)
Total Current Expense (Benefit)	127	286	(144)
Deferred - Federal	251	66	128
Deferred - State	70	(89)	31
Total Deferred Expense (Benefit)	321	(23)	159
Investment tax credit, net - federal	(3)	(2)	(12)
Total income taxes from continuing operations (a)	$ 445	$ 261	$ 3
Total income tax expense (benefit) - Federal	$ 387	$ 272	$ (21)
Total income tax expense (benefit) - State	58	(11)	24
Total income taxes from continuing operations (a)	$ 445	$ 261	$ 3

(a) Excludes current and deferred federal, state and foreign tax expense (benefit) recorded to Discontinued Operations of $3 million in 2011, $(5) million in 2010 and $66 million in 2009. Also, excludes federal, state and foreign tax expense (benefit) recorded to OCI of $(83) million in 2011, $132 million in 2010 and $338 million in 2009. The deferred tax benefit of operating loss carryforwards was insignificant for 2011, 2010 and 2009.

	2011	2010	2009
Reconciliation of Income Tax Expense

Federal and state income tax return adjustments (d)	(22)	(6)	23
Health Care Reform (e)		5	
Federal income tax credits (f)	(12)	(12)	(2)
Other	(3)	(1)	(9)
Total increase (decrease)	21	(47)	8
Total income taxes from continuing operations	$ 445	$ 261	$ 3
Effective income tax rate	36.7%	29.6%	(23.1)%

(a) During 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for Federal income tax purposes. Due to the decrease in taxable income related to bonus depreciation and a decrease in projected future taxable income, PPL Energy Supply recorded $22 million state deferred income tax expense related to deferred tax valuation allowances.

Pennsylvania H.B. 1531, enacted in October 2009, increased the net operating loss limitation to 20% of taxable income for tax years beginning in 2010. Based on the projected revenue increase related to the expiration of the generation rate caps, PPL Energy Supply recorded a $52 million state deferred income tax benefit related to the reversal of deferred tax valuation allowances over the remaining carry forward period of the net operating losses.

(b) During 2011, PPL Energy Supply completed the sale of certain non-core generation facilities. See Note 9 for additional information. Due to changes in state apportionment resulting in the reduction in the future estimated state tax rate, PPL Energy Supply recorded a deferred tax benefit related to its December 31, 2011 state deferred tax liabilities.

(c) During 2010, PPL Energy Supply recorded an increase in tax benefits related to domestic manufacturing deductions due to an increase in domestic taxable income resulting from the expiration of Pennsylvania generation rate caps in 2010. In December 2010, Congress enacted legislation allowing for 100% bonus depreciation on qualified property. The increased tax depreciation deduction related to bonus depreciation significantly reduced the tax benefits related to domestic manufacturing deductions during 2010 and eliminated the tax benefit in 2011.

(d) During 2011, PPL recorded $22 million in federal and state tax benefits related to the filing of the 2010 federal and state income tax returns. $7 million in tax benefits relate to an additional domestic manufacturing deduction resulting from revised bonus depreciation amounts.

During 2009, PPL Energy Supply received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Energy Supply deducted the resulting IRC Sec. 481 adjustment on its 2008 federal income tax return and recorded a $21 million adjustment to federal and state income tax expense resulting from the reduction in federal income tax benefits related to the domestic manufacturing deduction and certain state tax benefits related to state net operating losses.

(e) Beginning in 2013, provisions within Health Care Reform eliminated the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D Coverage. As a result, PPL Energy Supply recorded deferred income tax expense during 2010. See Note 13 for additional information.

(f) During 2011 and 2010, PPL Energy Supply recorded a deferred tax benefit related to investment tax credits on progress expenditures related to hydroelectric plant expansions. See Note 8 for additional information.

	2011	2010	2009
Taxes, other than income			
State gross receipts	$ 31	$ 15	
State realty	1		
State capital stock	12	4	$ 3
Domestic property and other	27	27	26
Total	$ 71	$ 46	$ 29

(PPL Electric)

The provision for PPL Electric's deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the PUC and the FERC. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" on the Balance Sheets.

Significant components of PPL Electric's deferred income tax assets and liabilities were as follows:

Past financial performance is no guarantee of future results.

(a) In July 2010, the U.S. Tax Court ruled in PPL Electric's favor in a dispute with the IRS, concluding that street lighting assets are depreciable for tax purposes over seven years. As a result, PPL Electric recorded a $7 million tax benefit to federal and state income tax reserves and related deferred income taxes. The IRS did not appeal this decision.

During 2011, 2010 and 2009 PPL Electric recorded a $6 million, $7 million and $6 million tax benefit to federal and state income tax reserves related to stranded cost securitization.

(b) During 2009, PPL Electric received consent from the IRS to change its method of accounting for certain expenditures for tax purposes. PPL Electric deducted the resulting IRC Sec. 481 amount on its 2008 federal income tax return and recorded a $3 million adjustment to federal and state income tax expense resulting from the reversal of prior years' state income tax benefits related to regulated depreciation.

(c) In February 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. In accordance with Corporation Tax Bulletin 2011-01, Pennsylvania allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for Federal income tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation.

	2011	2010	2009
Taxes, other than income			
State gross receipts	$ 109	$ 130	$ 187
State utility realty	(10)	5	5
State capital stock	4	2	2
Property and other	1	1	
Total	$ 104	$ 138	$ 194

See Note 6 for information on a settlement related to PURTA tax that was returned to PPL Electric customers.

(LKE)

The provision for LKE's deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the KPSC, VSCC, TRA and the FERC. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory liabilities" on the Balance Sheets.

Significant components of LKE's deferred income tax assets and liabilities were as follows:

	2011	2010
Deferred Tax Assets		
Net operating loss carryforward	$ 318	$ 319
Advanced coal and other tax credits	170	169
Regulatory liabilities and other	154	205
Accrued pension costs	67	69
Federal and state capital loss carryforward	5	60
Income taxes due from customers	30	30
Deferred investment tax credit (a)	56	10
Valuation allowances	(5)	(6)
Total deferred tax assets	795	856
Deferred Tax Liabilities		
Plant - net	986	789
Regulatory assets and other	205	241
Total deferred tax liabilities	1,191	1,030
Net deferred tax liability	$ 396	$ 174

(a) Changes in balance primarily relate to investment tax credits for TC2, which began dispatching electricity in January 2011. See discussion on TC2 below.

LKE expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

LKE had the following loss and tax credit carryforwards.

	2011	2010	Expiration
Loss carryforwards			
Federal net operating losses	$ 805	$ 799	2028-2029
Federal capital losses (a)		155	2011-2014
State net operating losses	999	1,039	2028 and 2030
State capital losses	118	163	2011-2014
Credit carryforwards			
Federal investment tax credit	125	125	2025-2028
Federal AMT credit	20	20	Indefinite
Federal - other	25	24	2016-2031

Past financial performance is no guarantee of future results.

(a) Fully utilized against capital gains generated during 2011.

Changes in deferred tax valuation allowances were:

	Balance at Beginning of Period	Additions	Deductions	Balance at End of Period
2011	$ 6		$ 1 (c)	$ 5
2010	7	$ 6 (b)	7 (d)	6
2009		7 (a)		7

(a) A valuation allowance was recorded against deferred tax assets for federal capital loss carryforwards.
(b) A valuation allowance was recorded against deferred tax assets for state capital loss carryforwards.
(c) Primarily related to the expiration of state capital loss carryforwards.
(d) Related to release of a valuation allowance associated with federal capital loss carryforwards due to the LKE acquisition by PPL.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

(LKE, LG&E and KU)

In June 2006, LG&E and KU filed a joint application with the DOE requesting certification to be eligible for $125 million in investment tax credits ($24 million to LG&E and $101 million to KU) applicable to the construction of TC2. All necessary DOE and IRS approvals were subsequently received. In September 2007, LG&E and KU received an Order from the KPSC approving the accounting of the investment tax credits, which includes full depreciation basis adjustment for the amount of the credits. The income tax impacts from recording the depreciation basis adjustment and from amortizing these credits over the life of the related property began in January 2011, when LKE began dispatching electricity from TC2 to meet customer demand. In 2011, $2 million of net tax benefits were recognized for LG&E and KU.

Unrecognized Tax Benefits *(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)*

Changes to unrecognized tax benefits were as follows:

	2011	2010
PPL		
Beginning of period	$ 251	$ 212
Additions based on tax positions of prior years	40	68
Reductions based on tax positions of prior years	(160)	(50)
Additions based on tax positions related to the current year	25	43
Reductions based on tax positions related to the current year	(4)	(2)
Settlements		(17)
Lapse of applicable statute of limitation	(10)	(8)
Acquisition of LKE		3
Effects of foreign currency translation	3	2
End of period	$ 145	$ 251
PPL Energy Supply		
Beginning of period	$ 183	$ 124
Additions based on tax positions of prior years	1	65
Reductions based on tax positions of prior years		(47)
Additions based on tax positions related to the current year		43
Reductions based on tax positions related to the current year	(1)	(3)
Settlements		(1)
Derecognize unrecognized tax benefits (a)	(155)	
Effects of foreign currency translation		2
End of period	$ 28	$ 183
PPL Electric		
Beginning of period	$ 62	$ 74
Additions based on tax positions of prior years		3
Reductions based on tax positions of prior years		(5)
Additions based on tax positions related to the current year	22	
Reductions based on tax positions related to the current year	(1)	(2)
Lapse of applicable statute of limitation	(10)	(8)
End of period	$ 73	$ 62

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(a) Represents unrecognized tax benefits derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. See Note 9 for additional information on the distribution.

LKE's, LG&E's and KU's unrecognized tax benefits and changes in those unrecognized tax benefits are insignificant at December 31, 2011 and December 31, 2010.

At December 31, 2011, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase or decrease by the following amounts. For LKE, LG&E and KU, no significant changes in unrecognized tax benefits are projected over the next 12 months.

	Increase	Decrease
PPL	$ 43	$ 129
PPL Energy Supply	1	27
PPL Electric	48	63

These potential changes could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the creditability of foreign taxes, the timing and utilization of foreign tax credits and the related impact on alternative minimum tax and other credits, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

At December 31, the total unrecognized tax benefits and related indirect effects that, if recognized, would decrease the effective tax rate were as follows. The amounts for LKE, LG&E and KU were insignificant.

	2011	2010
PPL	$ 41	$ 183
PPL Energy Supply	13	167
PPL Electric	8	13

At December 31, 2011 and 2010, the following receivable (payable) balances were recorded for interest related to tax positions. The amounts for LKE, LG&E and KU were insignificant.

	2011	2010
PPL	$ (20)	$ 7
PPL Energy Supply	2	8
PPL Electric	8	3

The following interest expense (benefit) was recognized in income taxes. The amounts for LKE, LG&E and KU were insignificant.

	2011	2010	2009
PPL	$ 27	$ (39)	$ 1
PPL Energy Supply	6	(30)	(1)
PPL Electric	(5)	(8)	(2)

PPL or its subsidiaries file tax returns in five major tax jurisdictions. The income tax provisions for PPL Energy Supply, PPL Electric, LKE, LG&E and KU are calculated in accordance with an intercompany tax sharing policy which provides that taxable income be calculated as if each domestic subsidiary filed a separate consolidated return. Based on this tax sharing agreement, PPL Energy Supply or its subsidiaries indirectly or directly file tax returns in three major tax jurisdictions, PPL Electric or its subsidiaries indirectly or directly file tax returns in two major tax jurisdictions, and LKE, LG&E and KU or their subsidiaries indirectly or directly file tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2011, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
U.S. (federal) (a)	1997 and prior	1997 and prior	1997 and prior	10/31/2010 and prior	10/31/2010 and prior	10/31/2010 and prior
Pennsylvania (state)	2004 and prior	2004 and prior	2004 and prior			
Kentucky (state)	2006 and prior			2006 and prior	2006 and prior	2006 and prior
Montana (state)	2008 and prior	2008 and prior				
U.K. (foreign) (b)	2009 and prior					

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(a) For LKE, LG&E and KU 2008 and 2009, as well as the ten month period ending October 31, 2010, remain open under the standard three year statute of limitations; however, the IRS has completed its audit of these periods under the Compliance Assurance Process, effectively closing them to audit adjustments. No issues remain outstanding.

(b) Through an indirect wholly owned subsidiary, PPL acquired WPD Midlands on April 1, 2011. PPL is obligated for the acquired companies' tax liability commencing with tax year 2011. The acquired companies are no longer subject to audit for 2007 and prior years.

Other *(PPL, PPL Energy Supply and PPL Electric)*

PPL changed its method of accounting for repair expenditures for tax purposes effective for its 2008 tax year for the Pennsylvania generation, transmission and distribution operations. The same change was made for the Montana generation operations for 2009.

In August 2011, the IRS issued Rev. Procs. 2011-42 and 2011-43. Rev. Proc. 2011-42 provides guidance regarding the use and evaluation of statistical samples and sampling estimates. Rev. Proc. 2011-43 provides a safe harbor method of determining whether the repair expenditures for electric transmission and distribution property can be currently deducted for tax purposes. If PPL adopts the safe harbor method of Rev. Proc. 2011-43, the amount of deductible versus capitalizable expenditures will likely be different from PPL's current method. PPL does not believe any resulting adjustment to unrecognized tax benefits or income tax liabilities will have a significant impact on net income.

The IRS has not issued guidance to provide a safe harbor method for repair expenditures for generation property. The IRS may assert and ultimately conclude that PPL's deduction for generation-related expenditures should be disallowed in whole or in part. PPL believes that it has provided adequate reserves for this issue.

6. Utility Rate Regulation

(PPL, PPL Electric, LKE, LG&E and KU)

As discussed in Note 1 and summarized below, PPL, PPL Electric, LKE, LG&E and KU reflect the effects of regulatory actions in the financial statements for their cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the balance sheet date. As such, the primary items classified as current are related to rate mechanisms that periodically adjust to account for over- or under-collections.

(PPL, LKE, LG&E and KU)

LG&E is subject to the jurisdiction of the KPSC and FERC, and KU is subject to the jurisdiction of the KPSC, FERC, VSCC and TRA.

LG&E's and KU's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and notes payable) including certain adjustments to exclude non-regulated investments and environmental compliance costs recovered separately through the ECR mechanism. As such, regulatory assets generally earn a return.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheets with an offsetting regulatory asset or liability. LG&E and KU recover in customer rates the cost of coal contracts, power purchases and emission allowances. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at the acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate making impact of the fair value adjustments. LG&E's and KU's customer rates will continue to reflect the original contracted prices for these contracts.

(PPL, LKE and KU)

KU's Virginia base rates are calculated based on a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities, except the levelized fuel factor, are excluded from the return on rate base utilized in the calculation of Virginia base rates; therefore, no return is earned on the related assets.

KU's rates to municipal customers for wholesale requirements are calculated based on annual updates to a rate formula that utilizes a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities are excluded from the return on rate base utilized in the development of municipal rates; therefore, no return is earned on the related assets.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(PPL and PPL Electric)

PPL Electric's distribution base rates are calculated based on a return on rate base (net utility plant plus a cash working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions). PPL Electric's transmission revenues are billed in accordance with a FERC tariff that allows for recovery of transmission costs incurred, a return on transmission-related plant and an automatic annual update. See "Transmission Formula Rate" below for additional information on this tariff. All regulatory assets and liabilities are excluded from distribution and transmission return on investment calculations; therefore, generally no return is earned on PPL Electric's regulatory assets.

(PPL, PPL Electric, LKE, LG&E and KU)

The following tables provide information about the regulatory assets and liabilities of cost-based rate-regulated utility operations.

(a) PPL Electric's generation supply charge recovery mechanism moved from an undercollected status at December 31, 2010 to an overcollected status at December 31, 2011, reflecting the impacts of changes in customer billing cycles, the timing of rate reconciliation filings, the levels of customers choosing alternative energy suppliers and other factors. Because customer rates are designed to collect the costs of PPL Electric's energy purchases to meet its PLR requirements, there is minimal impact on earnings.

(b) The December 31, 2010 balance of accumulated cost of removal of utility plant was reclassified from "Accumulated depreciation - regulated utility plant" to noncurrent "Regulatory assets" on the Balance Sheets. These costs will continue to be included in future rate proceedings.

(c) These regulatory assets and liabilities were recorded as offsets to certain intangible assets and liabilities that were recorded at fair value upon the acquisition of LKE.

Regulatory Assets and Liabilities

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

(PPL and PPL Electric)

Generation Supply Charge

The generation supply charge is a cost recovery mechanism that permits PPL Electric to recover costs incurred to provide generation supply to PLR customers who receive basic generation supply service. The recovery includes charges for generation supply (energy and capacity and ancillary services), as well as administration of the acquisition process. In addition, the generation supply charge contains a reconciliation mechanism whereby any over- or under-recovery from prior quarters is refunded to, or recovered from, customers through the adjustment factor determined for the subsequent quarter.

Universal Service Rider (USR)

PPL Electric's distribution rates permit recovery of applicable costs associated with the universal service programs provided to PPL Electric's residential customers. Universal service programs include low-income programs, such as OnTrack and Winter Relief Assistance Program (WRAP). OnTrack is a special payment program for low-income households within the federal poverty level who have difficulty paying their electric bills. This program is funded by residential customers and administered by community-based organizations. Customers who participate in OnTrack receive assistance in the form of reduced payment arrangements, protection against termination of electric service and referrals to other community programs and services. The WRAP program reduces electric bills and improves living comfort for low-income customers by providing services such as weatherization measures and energy education services. The USR is applied to distribution charges for each customer who receives distribution service under PPL Electric's residential service rate schedules. The USR contains a reconciliation mechanism whereby any over- or under-recovery from the current year is refunded to or recovered from residential customers through the adjustment factor determined for the subsequent year.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Taxes Recoverable through Future Rates

Taxes recoverable through future rates represent the portion of future income taxes that will be recovered through future rates based upon established regulatory practices. Accordingly, this regulatory asset is recognized when the offsetting deferred tax liability is recognized. For general-purpose financial reporting, this regulatory asset and the deferred tax liability are not offset; rather, each is displayed separately. This regulatory asset is expected to be recovered over the period that the underlying book-tax timing differences reverse and the actual cash taxes are incurred.

PURTA Tax

In December 2009, PPL Electric reached a settlement with the Pennsylvania Department of Revenue related to the appeal of its 1997 PURTA tax assessments that resulted in a reduction in PURTA tax. Substantially all of the regulatory liability was refunded to customers in 2011 pursuant to PUC regulations.

Act 129 Compliance Rider

In compliance with Pennsylvania's Act 129 of 2008 and implementing regulations, PPL Electric filed its energy efficiency and conservation plan in July 2009. The plan was approved by PUC Order in October 2009. The Order allows PPL Electric to recover the maximum $250 million cost of the program ratably over the life of the plan, from January 1, 2010 through May 31, 2013. The plan includes programs intended to reduce electricity consumption. The recoverable costs include direct and indirect charges, including design and development costs, general and administrative costs and applicable state evaluator costs. The rates are applied to customers who receive distribution service through the Act 129 Compliance Rider. The actual program costs are reconcilable, and any over- or under-recovery from customers will be refunded or collected at the end of the program. See below under "Regulatory Matters - Pennsylvania Activities" for additional information on Act 129.

Transmission Service Charge (TSC)

PPL Electric is charged by PJM for transmission service-related costs applicable to its PLR customers. PPL Electric passes these costs on to customers, who receive basic generation supply service through the PUC-approved TSC cost recovery mechanism. The TSC contains a reconciliation mechanism whereby any over- or under-recovery from customers is either refunded to, or recovered from, customers through the adjustment factor determined for the subsequent year.

(PPL, PPL Electric, LKE, LG&E and KU)

Defined Benefit Plans

Recoverable costs of defined benefit plans represent the portion of unrecognized transition obligation, prior service cost and net actuarial losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices. These regulatory assets and liabilities are adjusted at least annually or whenever the funded status of defined benefit plans is re-measured. Of the regulatory asset and liability balances recorded, the following costs of $44 million for PPL, $13 million for PPL Electric, $31 million for LKE, $21 million for LG&E and $10 million for KU are expected to be amortized into net periodic defined benefit costs in 2012. All costs will be amortized over the average service lives of plan participants.

Storm Costs

PPL Electric, LG&E and KU have the ability to request from the PUC, KPSC and VSCC the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer and amortize such costs for regulatory accounting and reporting purposes. Once such authority is granted, PPL Electric, LG&E and KU can request recovery of those expenses in a base rate case.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2029 for PPL Electric. Such costs are being amortized through 2035 for LG&E and 2036 for PPL, LKE and KU.

As further discussed in Note 7, in July 2011 PPL Electric redeemed Senior Secured Bonds for $458 million, plus accrued interest. The redemption premium and the unamortized financing costs of $59 million were recorded as a regulatory asset and will be amortized over the life of the replacement debt.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Accumulated Cost of Removal

LG&E and KU accrue for costs of removal through depreciation expense with an offsetting credit to a regulatory liability. The regulatory liability is relieved as costs are incurred. See Note 1 for additional information.

PPL Electric does not accrue for costs of removal. When costs of removal are incurred, PPL Electric records the deferral of costs as a regulatory asset. Such deferral is included in rates and amortized over the subsequent five-year period.

(PPL, LKE, LG&E and KU)

ECR

Kentucky law permits LG&E and KU to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Federal Clean Air Act and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from coal-fired electric generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is recovered within 12 months. LG&E and KU are authorized to receive a 10.63% return on equity for the 2005, 2006 and 2009 compliance plans and a 10.10% return on projects associated with the 2011 compliance plan.

Coal Contracts

As a result of purchase accounting associated with PPL's acquisition of LKE, LG&E's and KU's coal contracts were recorded at fair value on the Balance Sheets with offsets to regulatory assets for those contracts with unfavorable terms relative to current market prices and offsets to regulatory liabilities for those contracts with favorable terms relative to current market prices. These regulatory assets and liabilities are being amortized over the same terms as the related contracts, which expire at various times through 2016.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs from prior periods are adjusted quarterly in LG&E's rates, subject to approval by the KPSC. The gas supply clause includes a separate natural gas procurement incentive mechanism, a performance-based rate, which allows LG&E's rates to be adjusted annually to share variances between actual costs and market indices between the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are recovered within 18 months.

Fuel Adjustments

LG&E's and KU's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel for electric generation, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's and KU's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel clause and, to the extent appropriate, reestablish the fuel charge included in base rates.

KU also employs a levelized fuel factor mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs. The Virginia levelized fuel factor allows fuel recovery based on projected fuel costs for the coming year plus an adjustment for any under- or over-recovery of fuel expenses from the prior year. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are recovered within 12 months.

Interest Rate Swaps

(PPL, LKE and LG&E)

Because realized amounts associated with LG&E's interest rate swaps, including a terminated swap contract, are recoverable through rates based on an Order from the KPSC, LG&E's unrealized gains and losses are recorded as a regulatory asset or liability until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

terms of the associated debt, which matures through 2033. Amortization of the gain/loss related to the terminated swap contract is recovered through 2035 as approved by the KPSC.

(LKE and LG&E)

In the third quarter of 2010, LG&E recorded a pre-tax gain to reverse previously recorded losses of $21 million and $9 million to reflect the reclassification of its ineffective swaps and terminated swap to regulatory assets based on an Order from the KPSC in the 2010 rate case whereby the cost of LG&E's terminated swap was allowed to be recovered in base rates. Previously, gains and losses on interest rate swaps designated as effective cash flow hedges were recorded within other comprehensive income and common equity. The gains and losses on the ineffective portion of interest rate swaps designated as cash flow hedges were recorded to earnings monthly, as was the entire change in the market value of the ineffective swaps.

(PPL, LKE, LG&E and KU)

AROs

As noted in Note 1, the accretion and depreciation related to LG&E's and KU's AROs are offset with a regulatory credit on the income statement, such that there is no earnings impact. When an asset with an ARO is retired, the related ARO regulatory asset created by the regulatory credit is offset against the associated regulatory liability, PP&E and ARO liability.

DSM

DSM consists of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. LG&E's and KU's rates contain a DSM rate mechanism that provides for concurrent recovery of DSM costs and also provides an incentive for implementing DSM programs. The provision also allows LG&E and KU to recover revenues from lost sales associated with the DSM programs up to the earlier of three years or implementation of new base rates which reflect that load reduction. In addition, with the KPSC Order issued in November 2011, the DSM mechanism now includes a provision to earn a return of and on capital investment for DSM programs. The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanism.

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, LG&E's and KU's fair values of the OVEC power purchase agreement were recorded on the balance sheets with offsets to regulatory liabilities. The regulatory liabilities are being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition, and have no impact on rate making.

Regulatory Liability associated with Net Deferred Tax Assets

LG&E's and KU's regulatory liabilities associated with net deferred tax assets represent the future revenue impact from the reversal of deferred income taxes required primarily for unamortized investment tax credits. These regulatory liabilities are recognized when the offsetting deferred tax assets are recognized. For general-purpose financial reporting, these regulatory liabilities and the deferred tax assets are not offset; rather, each is displayed separately.

Regulatory Matters

Kentucky Activities *(PPL, LKE, LG&E and KU)*

Environmental Upgrades

In order to achieve compliance with new and pending federal EPA regulations including the CSAPR, National Ambient Air Quality Standards and MATS, in June 2011, LG&E and KU filed ECR plans with the KPSC requesting approval to install environmental upgrades for certain of their coal-fired plants and for recovery of the expected $2.5 billion in associated capital costs, as well as operating expenses incurred. The ECR plans detailed upgrades that will be made to certain of their coal-fired generating plants to continue to be compliant with EPA regulations. LG&E requested $1.4 billion to modernize the sulfur dioxide scrubbers at the Mill Creek generating plant as well as install fabric-filter baghouse systems for increased particulate and mercury control on all units at the Mill Creek generating plant and on Unit 1 at the Trimble County generating plant. KU requested $1.1 billion to upgrade fabric-filter baghouse systems for increased particulate and mercury control on

Past financial performance is no guarantee of future results.

all units at the E.W. Brown and Ghent generating plants and to convert a wet storage facility to a dry landfill at the E.W. Brown generating plant.

In November 2011, LG&E and KU filed a unanimous settlement agreement, stipulation and recommendation with the KPSC. In December 2011, LG&E and KU received KPSC approval in their proceedings relating to the ECR plans. The KPSC Order approved the terms of the November 2011 settlement agreement entered into between LG&E and KU and the parties to the ECR proceedings. The KPSC Order authorized the installation of environmental upgrades at certain plants during 2012-2016 representing approximate capital costs of $1.4 billion at LG&E and $900 million at KU. In connection with the approved projects, the KPSC Order allowed recovery through the ECR rate mechanism of the capital costs and operating expenses of the projects and granted CPCNs for their construction. The KPSC Order also confirmed an existing 10.63% authorized return on equity for projects remaining from earlier ECR plans and provided for an authorized return on equity of 10.10% for the approved projects in the 2011 ECR proceedings. The KPSC Order noted KU's consent to defer the requested approval for certain environmental upgrades at its E.W. Brown generating plant, which represented approximately $200 million in capital costs. KU retained the right to operate and dispatch the E.W. Brown generating plant in accordance with applicable environmental standards and the right to request approval of the deferred projects and related costs in future regulatory proceedings. See Note 15 for additional information.

IRP

IRP regulations in Kentucky require major utilities to make triennial IRP filings with the KPSC. In April 2011, LG&E and KU filed their 2011 joint IRP with the KPSC. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information. In May 2011, the KPSC issued a procedural schedule and data discovery concluded during the fourth quarter. The IRP assumes approximately 500 MW of peak demand reductions by 2017 through existing or expanded DSM or energy efficiency programs. Implementation of the major findings of the IRP is subject to further analysis and decision-making and further regulatory approvals. LG&E and KU are awaiting the KPSC Staff report, which will close this proceeding.

CPCN Filing

In September 2011, LG&E and KU filed a CPCN with the KPSC requesting approval to build a 640 MW NGCC at the existing Cane Run plant site. LG&E will own a 22% undivided interest, and KU will own a 78% undivided interest in the new NGCC. In addition, LG&E and KU also requested approval to purchase the Bluegrass CTs which are expected to provide up to 495 MW of peak generation supply. LG&E will own a 69% undivided interest, and KU will own a 31% undivided interest in the purchased assets. In conjunction with these developments, at the end of 2015, LG&E and KU anticipate retiring three coal-fired generating units at LG&E's Cane Run plant and also one coal-fired generating unit at KU's Tyrone plant and two at KU's Green River plant. These generating units represent 797 MW of combined summer capacity.

LG&E and KU anticipate that the NGCC construction and the acquisition of the Bluegrass CTs could require up to $800 million (comprised of up to $300 million for LG&E and up to $500 million for KU) in capital costs including related transmission projects. Formal requests for recovery of the costs associated with the NGCC construction and the acquisition of the Bluegrass CTs were not included in the CPCN filing with the KPSC but are expected to be included in future rate proceedings. The KPSC issued an Order on the procedural schedule in the CPCN filing that has discovery scheduled through early February 2012. A KPSC order on the CPCN filing is anticipated in the second quarter of 2012.

PPL's Acquisition of LKE

In September 2010, the KPSC approved a settlement agreement among PPL and all of the intervening parties to PPL's joint application to the KPSC for approval of its acquisition of ownership and control of LKE, LG&E and KU. In the settlement agreement, the parties agreed that LG&E and KU would commit that no base rate increases would take effect before January 1, 2013. Under the terms of the settlement, LG&E and KU retain the right to seek KPSC approval for the deferral of "extraordinary and uncontrollable costs," such as significant storm restoration costs, if incurred. Additionally, interim rate adjustments will continue to be permissible during that period for existing recovery mechanisms such as the ECR and DSM.

In connection with the approval of PPL's acquisition of LKE, LG&E and KU agreed to implement the Acquisition Savings Sharing Deferral (ASSD) methodology whereby LG&E's and KU's adjusted jurisdictional revenues, expenses, and net operating income are calculated each year. If LG&E's or KU's actual earned rate of return on common equity is in excess of 10.75%, fifty percent of the excess amount will be deferred as a regulatory liability and ultimately returned to customers. The first ASSD filing will be made by April 1, 2012 based on the 2011 calendar year. Based upon 2011 earnings and their current estimates of the outcome of an ASSD filing in 2012, LG&E and KU have not recognized any impact of the ASSD in the financial statements as of December 31, 2011. The ASSD methodology for each of LG&E's and KU's utility operations

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

Past financial performance is no guarantee of future results.

will terminate on the earlier of the end of 2015 or the first day of the calendar year during which new base rates go into effect.

Independent Transmission Operators

LG&E and KU operate under a FERC-approved open access transmission tariff. LG&E and KU contract with the Tennessee Valley Authority, to act as their transmission reliability coordinator, and Southwest Power Pool, Inc. (SPP), to function as their independent transmission operator, pursuant to FERC requirements. The contract with SPP expires on August 31, 2012. LG&E and KU have received FERC approval to transfer from SPP to TranServ International, Inc. as their independent transmission operator beginning September 1, 2012. Approval from the KPSC is required, and an application requesting approval was filed in January 2012.

Storm Costs

In August 2011, a strong storm hit LG&E's service area causing significant damage and widespread outages for approximately 139,000 customers. LG&E filed an application with the KPSC in September 2011 requesting approval of a regulatory asset recorded to defer, for future recovery, $8 million in incremental operation and maintenance expenses related to the storm restoration. An Order was received in December 2011 granting regulatory accounting treatment, while recovery of the regulatory asset will be determined within the next base rate case.

In September 2009, the KPSC approved the deferral of $44 million and $57 million for LG&E and KU of costs associated with a severe ice storm that occurred in January 2009 and a wind storm that occurred in February 2009. Additionally, in December 2008, the KPSC approved the deferral of $24 million and $2 million for LG&E and KU of costs associated with high winds from the remnants of Hurricane Ike in September 2008. LG&E and KU received approval in their 2010 base rate cases to recover these regulatory assets over a ten-year amortization period ending July 2020.

DSM/Energy Efficiency

In April 2011, LG&E and KU filed a DSM application to expand existing energy efficiency programs and implement new energy efficiency programs. Discovery and evidentiary phases concluded in September 2011. In November 2011, the KPSC approved the application as filed. The new rates were effective December 30, 2011.

Virginia Activities *(PPL, LKE and KU)*

IRP

Pursuant to a December 2008 Order, KU filed the 2011 joint IRP with the VSCC in September 2011, with certain supplemental information as required by this Order. The IRP provides historical and projected demand, resource and financial data, and other operating performance and system information and assumes approximately 500 MW of peak demand reductions by 2017 through existing or expanded DSM or energy efficiency programs. Implementation of the major findings of the IRP is subject to further analysis and decision-making and further regulatory approvals.

Virginia Fuel Factor

In February 2011, KU filed an application with the VSCC seeking approval of an increase in its fuel cost factor beginning with service rendered in April 2011. In March 2011, a hearing was held on KU's requested fuel factor, and an Order was issued approving a revised fuel factor to be in effect beginning with service rendered on and after April 1, 2011, with recovery of the regulatory asset for prior period under-recoveries over a three-year amortization period.

Storm Costs

In December 2009, a major snowstorm hit KU's Virginia service area causing approximately 30,000 customer outages. During the normal 2009 Virginia Annual Information Filing (AIF), KU requested that the VSCC establish a regulatory asset and defer for future recovery $6 million in incremental operation and maintenance expenses related to the storm restoration. In March 2011, the VSCC Staff issued its report on KU's 2009 AIF stating that it considered this storm damage to be extraordinary, non-recurring and material to KU. The Staff report also recommended establishing a regulatory asset for these costs, with recovery over a five-year period upon approval in the next base rate case. In March 2011, a regulatory asset of $6 million was established for actual costs incurred. In June 2011, the VSCC issued an Order approving the recommendations contained in the Staff report, and KU began recovering these costs over a five-year amortization period ending October 2016.

Pennsylvania Activities *(PPL and PPL Electric)*

Act 129

Act 129 requires Pennsylvania Electric Distribution Companies (EDCs) to meet specified goals for reduction in customer electricity usage and peak demand by specified dates. EDCs not meeting the requirements of Act 129 are exposed to significant penalties.

Under Act 129, EDCs must file an energy efficiency and conservation plan (EE&C Plan) with the PUC and contract with conservation service providers to implement all or a portion of the EE&C Plan. Act 129 requires EDCs to cause reduced overall electricity consumption of 1.0% by May 2011 and 3.0% by May 2013 and reduced peak demand of 4.5% for the 100 hours of highest demand by May 2013 (which will be measured during the June 2012 through September 2012 period). To date, PPL Electric has met the 2011 requirement, subject to the PUC's verification. EDCs will be able to recover the costs (capped at 2% of the EDC's 2006 revenue) of implementing their EE&C Plans. In October 2009, the PUC approved PPL Electric's EE&C Plan. The plan includes 14 programs, all of which are voluntary for customers. The plan includes a proposed rate mechanism for recovery of all costs incurred (up to a maximum of $250 million) by PPL Electric to implement the plan. Such costs include direct and indirect charges, including design, general and administrative costs and applicable state evaluator costs, and are being recovered over the period from January 1, 2010 through May 31, 2013. The costs are recovered through the Act 129 Compliance Rider from all customers who receive distribution service. The program contains a reconciliation mechanism whereby any over- or under-recovery from customers will be refunded or collected at the end of the program. In September 2010, PPL Electric filed its Program Year 1 Annual Report and Process Evaluation Report. PPL Electric also filed a petition requesting permission to modify two components of its EE&C Plan. The PUC issued its Final Order in January 2011, approving the changes proposed by PPL Electric and directing PPL Electric to re-file its plan to reflect all changes made since its initial approval. In February 2011, PPL Electric filed the changes to its plan and in May 2011, the PUC approved those changes. PPL Electric filed its Program Year 2 Annual Report and Process Evaluation Report in November 2011. In February 2012, PPL Electric filed a petition with the PUC requesting permission to implement additional changes to its EE&C Plan. Other parties have 30 days to file comments to this petition; PPL Electric has 20 days to file reply comments.

Act 129 also requires the Default Service Provider (DSP) to provide electric generation supply service to customers pursuant to a PUC-approved competitive procurement plan through auctions, requests for proposal and bilateral contracts at the sole discretion of the DSP. Act 129 requires a mix of spot market purchases, short-term contracts and long-term contracts (4 to 20 years), with long-term contracts limited to 25% of the load unless otherwise approved by the PUC. The DSP will be able to recover the costs associated with a competitive procurement plan.

Under Act 129, the DSP competitive procurement plan must ensure adequate and reliable service "at least cost to customers" over time. Act 129 grants the PUC authority to extend long-term power contracts up to 20 years, if necessary, to achieve the "least cost" standard. The PUC has approved PPL Electric's procurement plan for the period January 1, 2011 through May 31, 2013, and PPL Electric continues to procure power for its PLR obligations under that plan. In December 2010, the PUC approved PPL Electric's rate rider to recover the costs of providing default service.

Smart Meter Rider

Act 129 also requires installation of smart meters for new construction, upon the request of consumers and at their cost, or on a depreciation schedule not exceeding 15 years. Under Act 129, EDCs will be able to recover the costs of providing smart metering technology. In August 2009, PPL Electric filed its proposed smart meter technology procurement and installation plan with the PUC. All of PPL Electric's metered customers currently have smart meters installed at their service locations. PPL Electric's current advanced metering technology generally satisfies the requirements of Act 129 and does not need to be replaced. In June 2010, the PUC entered its order approving PPL Electric's smart meter plan with several modifications. In compliance with the Order, in the third quarter of 2010, PPL Electric submitted a revised plan with a cost estimate of $38 million to be incurred over a five-year period, beginning in 2009, and filed its Section 1307(e) cost recovery mechanism, the Smart Meter Rider (SMR) to recover these costs beginning January 1, 2011. In December 2010, the PUC approved PPL Electric's SMR which reflects the costs of its smart meter program plus a return on its Smart Meter investments. The SMR, which became effective January 1, 2011, contains a reconciliation mechanism whereby any over- or under-recovery from customers is either refunded to or collected from customers in the subsequent year. In August 2011, PPL Electric filed with the PUC an annual report describing the actions it is taking under its Smart Meter plan in 2011 and its planned actions for 2012. PPL Electric also submitted revised SMR charges which became effective January 1, 2012.

PUC Investigation of Retail Market

In April 2011, the PUC opened an investigation of Pennsylvania's retail electricity market to be conducted in two phases. Phase one addressed the status of the current retail market and explored potential changes. Questions promulgated by the PUC for this phase of the investigation focused primarily on default service issues. In June 2011, interested parties filed comments and the PUC held a hearing in this phase of the investigation. In July 2011, the PUC entered an order initiating phase two of the investigation to study how best to address issues identified by the PUC as being most relevant to improving the current retail electricity market. The PUC issued a tentative order in October 2011 addressing issues associated with the timing and various other details of EDCs' default service procurement plans. Parties filed comments to that tentative order. The PUC also held a hearing in this phase of the investigation in November 2011. In December 2011, the PUC issued a final order providing guidance to EDCs on the design of their next default service procurement plan filings. In December 2011, the PUC also issued a tentative order proposing an intermediate work plan to address issues raised in the investigation. Parties filed comments to that tentative order. PPL Electric cannot predict the outcome of the investigation.

Legislation - Regulatory Procedures and Mechanisms

In June 2011, the Pennsylvania House Consumer Affairs Committee approved legislation that would authorize the PUC to approve regulatory procedures and mechanisms to provide for more timely recovery of a utility's costs. Such alternative ratemaking procedures and mechanisms are important to PPL Electric as it begins a period of significant increasing capital investment related to the asset optimization program focused on the replacement of aging distribution assets. Those procedures and mechanisms include, but are not limited to, the use of a fully projected future test year and an automatic adjustment clause to recover certain capital costs and related operating expenses. In October 2011, the legislation was passed by the Pennsylvania House of Representatives. In January 2012, the Senate Consumer Affairs Committee adopted significant amendments to the legislation. The amended legislation authorizes the PUC to approve only two specific ratemaking mechanisms -- a fully projected future test year and a distribution system improvements charge. In addition, the amendments impose a number of conditions on the use of such a charge. In January 2012, the Pennsylvania Senate passed the amended legislation and in February 2012, the Pennsylvania House agreed to those amendments. The Governor signed the bill (Act 11 of 2012), which will become effective April 14, 2012. Utilities cannot file a petition with the PUC before January 1, 2013 requesting permission to establish the charge.

Storm Recovery

PPL Electric experienced several PUC-reportable storms during 2011 resulting in total restoration costs of $84 million, of which $54 million were recorded in "Other operation and maintenance" on the Statement of Income. Although PPL Electric has storm insurance with a PPL affiliate, the costs associated with the unusually high number of PUC-reportable storms has exceeded policy limits. Probable insurance recoveries recorded during 2011 were $26.5 million, of which $16 million were included in "Other operation and maintenance" on the Statement of Income. In December 2011, PPL Electric received orders from the PUC granting permission to defer qualifying storm costs in excess of insurance recoveries associated with Hurricane Irene and a late October snowstorm. Based on the PUC orders, PPL Electric recorded a regulatory asset of $25 million in December 2011. PPL Electric will seek recovery of these costs in its next general base rate proceeding.

In 2007, based on PUC approval, a regulatory asset of $12 million was established for actual costs incurred associated with severe ice storms that occurred in January 2005. Recovery began in January 2008 and will continue through August 2015.

Federal Matters

FERC Formula Rates (PPL and PPL Electric)

Transmission rates are regulated by the FERC. PPL Electric's transmission revenues are billed in accordance with a FERC-approved PJM open access transmission tariff that utilizes a formula-based rate recovery mechanism. The tariff allows for recovery of actual transmission costs incurred, a return on transmission plant placed in service and an incentive return, including a return on construction work in progress, on the Susquehanna-Roseland transmission line project. The tariff utilizes actual costs from the most recent FERC Form No. 1 to set the rate for the current year billing to customers, including a true-up to adjust for actual costs in the subsequent year's FERC Form No. 1. The annual update of the rate is implemented automatically without requiring specific approval by the FERC before going into effect. PPL Electric accrues or defers revenues applicable to any estimated true-up of this formula-based rate.

In May 2010, PPL Electric initiated the 2010 Annual Update of its formula rate. In November 2010, a group of municipal customers taking transmission service in PPL Electric's transmission zone filed a preliminary challenge to the update and, in December 2010, filed a formal challenge. In August 2011, the FERC issued an order substantially rejecting the formal

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

challenge and accepting PPL Electric's 2010 Annual Update. The group of municipal customers filed a request for rehearing of that order.

In June 2011, PPL Electric initiated the 2011 Annual Update of its formula rate. In October 2011, the group of municipal customers filed a preliminary challenge to the update. PPL Electric was not able to resolve the issues that were raised in this preliminary challenge and the group of municipal customers filed a formal challenge. PPL Electric filed a response to that formal challenge and the group of municipal customers filed an answer to that response. PPL Electric cannot predict the outcome of these two proceedings, which remain pending before the FERC.

In March 2012, PPL Electric plans to file a request with the FERC seeking recovery, over a 34-year period beginning in June 2012, of its unrecovered regulatory asset related to the deferred state tax liability that existed at the time of the transition from the flow-through treatment of state income taxes to full normalization. This change in tax treatment occurred in 2008 as a result of prior FERC initiatives that transferred regulatory jurisdiction of certain transmission assets from the PUC to FERC. A regulatory asset of $51 million related to this transition, classified as taxes recoverable through future rates, is included in "Other Noncurrent Assets - Regulatory assets" on the balance sheet. PPL Electric believes recoverability of this regulatory asset is probable based on FERC precedent in similar cases; however, it is reasonably possible that the FERC may limit the recovery of all or part of the claimed asset.

International Activities *(PPL)*

U.K. Overhead Electricity Networks

In 2002, for safety reasons, the U.K. Government issued guidance that low voltage overhead electricity networks within three meters horizontal clearance of a building should either be insulated or relocated. This imposed a retroactive requirement on existing assets that were built with lower clearances. In 2008, the U.K. Government determined that the U.K. electricity network should comply with the issued guidance. WPD estimates that the cost of compliance will be approximately $120 million. The projected expenditures in the current regulatory period, April 1, 2010 through March 31, 2015, have been included in allowed revenues, and it is expected that expenditures beyond this five-year period (including WPD Midlands expenditures) will also be included in allowed revenues. The U.K. Government has determined that WPD (South Wales) and WPD Midlands should comply by 2015 and WPD (South West) should comply by 2018.

To improve network reliability, the U.K. Government amended a regulation relating to safety and continuity of supply by adding an obligation which broadly requires, beginning January 31, 2009, network operators to implement a risk-based program to clear trees away from overhead lines. WPD estimates that the cost of compliance will be approximately $198 million over a 25-year period. The projected expenditures in the current regulatory period have been included in allowed revenues under the current price control review, and it is expected that expenditures beyond this five-year period will also be included in allowed revenues.

In addition to the above, WPD Midlands was not in compliance with earlier regulations pertaining to overhead line clearances as of the acquisition date. WPD Midlands expects to incur costs through 2015 to comply with these requirements that are not included in allowed revenues under the current price control review. In 2011, WPD Midlands recorded a liability of $68 million associated with meeting these requirements as an opening balance sheet adjustment in accordance with accounting guidance for business combinations. The balance at December 31, 2011 was $57 million.

Ofgem Review of Line Loss Calculation

WPD has a $170 million liability recorded at December 31, 2011, calculated in accordance with an accepted methodology, related to the close-out of line losses for the prior price control period, DPCR4. Ofgem is currently consulting on the methodology used to calculate the final line loss incentive/penalty for the DPCR4. In October 2011, Ofgem issued a consultation paper citing two potential changes to the methodology, both of which would result in a reduction of the liability; however, it is uncertain at this time whether any changes will be made. Ofgem is expected to make a decision before the end of 2012.

New U.K. Pricing Model

The electricity distribution subsidiaries of WPD operate under distribution licenses and price controls granted and set by Ofgem for each of the distribution subsidiaries. The price control formula that governs allowed revenue is designed to provide economic incentives to minimize operating, capital and financing costs. The price control formula is normally determined every five years. Ofgem completed its review in December 2009 that became effective April 1, 2010 and will continue through March 31, 2015.

In October 2010, Ofgem announced a pricing model that will be effective for the U.K. electricity distribution sector beginning April 2015. The model, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. Key components of the model are: an extension of the price review period from five to eight years, increased emphasis on outputs and incentives, enhanced stakeholder engagement including network customers, a stronger incentive framework to encourage more efficient investment and innovation, expansion of the current Low Carbon Network Fund to stimulate innovation and continued use of a single weighted average cost of capital. At this time, management does not expect the impact of this pricing model to be significant to WPD's operating results.

7. Financing Activities

Credit Arrangements and Short-term Debt

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Credit facilities are maintained to enhance liquidity and provide credit support, and as a backstop to commercial paper programs, when necessary. The following credit facilities were in place at:

	December 31, 2011					December 31, 2010	
	Expiration Date	Capacity	Borrowed (a)	Letters of Credit Issued and Commercial Paper Backup	Unused Capacity	Borrowed (a)	Letters of Credit Issued and Commercial Paper Backup
PPL							
WPD Credit Facilities							
PPL WW Syndicated Credit Facility (b)	Jan. 2013	£ 150	£ 111	n/a	£ 39	£ 115	n/a
WPD (South West) Syndicated Credit Facility (c)	July 2012	210		n/a	210		n/a
WPD (East Midlands) Syndicated Credit Facility (d)	Apr. 2016	300		£ 70	230	n/a	n/a
WPD (West Midlands) Syndicated Credit Facility (d)	Apr. 2016	300		71	229	n/a	n/a
Uncommitted Credit Facilities		73		3	70		£ 3
Total WPD Credit Facilities (e)		£ 1,033	£ 111	£ 144	£ 778	£ 115	£ 3
PPL Energy Supply (f)							
Syndicated Credit Facility (g) (h)	Oct. 2016	$ 3,000		$ 541	$ 2,459	$ 350

Total KU Credit Facilities		$ 598		$ 198	$ 400		$ 198

(a) Amounts borrowed are recorded as "Short-term debt" on the Balance Sheets.

(b) Under this facility, PPL WW has the ability to make cash borrowings but cannot request the lenders to issue letters of credit. PPL WW pays customary commitment fees under this facility, and borrowings bear interest at LIBOR-based rates plus a spread, depending on the company's long-term credit rating. The cash borrowing outstanding at December 31, 2011 was a USD-denominated borrowing of $178 million, which equated to £111 million at the time of borrowing and bears interest at approximately 1.05%. The interest rates at December 31, 2010 were approximately 0.94% on a USD-denominated borrowing of $181 million, which equated to £115 million at the time of borrowing.

This credit facility contains financial covenants that require PPL WW to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and a RAV that exceeds total net debt by the higher of an amount equal to 15% of total net debt or £150 million, in each case as calculated in accordance with the credit facility.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(c) Under this facility, WPD (South West) has the ability to make cash borrowings but cannot request the lenders to issue letters of credit. WPD (South West) pays customary commitment fees under this facility, and borrowings bear interest at LIBOR-based rates plus a margin.

The facility contains financial covenants that require WPD (South West) to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facility.

In January 2012, WPD (South West) entered into a new £245 million syndicated credit facility to replace its existing £210 million syndicated credit facility. Under the new facility, WPD (South West) has the ability to make cash borrowings but cannot request the lenders to issue letters of credit. WPD (South West) pays customary commitment fees under this facility, and borrowings bear interest at LIBOR-based rates plus a margin. The facility contains financial covenants that require WPD (South West) to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facility.

(d) In April 2011, following the completion of the acquisition of WPD Midlands, WPD (East Midlands) and WPD (West Midlands) each entered into a £300 million 5-year syndicated credit facility. Under the facilities, WPD (East Midlands) and WPD (West Midlands) each have the ability to make cash borrowings and to request the lenders to issue up to £80 million of letters of credit in lieu of borrowing. Each company pays customary commitment and utilization fees under its respective facility and borrowings generally bear interest at LIBOR-based rates plus a spread, depending upon the respective company's senior unsecured long-term debt rating. Each credit facility contains financial covenants that require the respective company to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before interest, income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, in each case calculated in accordance with the credit facilities. An aggregate of $7 million in fees were incurred in connection with establishing these facilities.

(e) The total amount borrowed under WPD's credit facilities equated to $178 million and approximately $181 million at December 31, 2011 and 2010. At December 31, 2011, the unused capacity of WPD's credit facilities was approximately $1.2 billion.

As a result of PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, PPL Energy Funding, the assets and liabilities of PPL Global, including the total amount borrowed under WPD's credit facilities at December 31, 2010 were removed from PPL Energy Supply's balance sheet in 2011. See Note 9 for additional information.

(f) All credit facilities at PPL Energy Supply, PPL Electric, LG&E and KU also apply to PPL on a consolidated basis for financial reporting purposes.

(g) Under this facility, PPL Energy Supply has the ability to make cash borrowings and to request the lenders to issue letters of credit. Borrowings generally bear interest at LIBOR-based rates plus a spread, depending upon the company's senior unsecured long-term debt rating. PPL Energy Supply also pays customary commitment and letter of credit issuance fees under this facility. The credit facility contains a financial covenant requiring PPL Energy Supply's debt to total capitalization not to exceed 65%, as calculated in accordance with the facility, and other customary covenants. Additionally, subject to certain conditions, PPL Energy Supply may request that the facility's capacity be increased by up to $500 million.

In October 2010, PPL Energy Supply borrowed $3.2 billion under this facility in order to enable a subsidiary to make loans to certain affiliates to provide interim financing of amounts required by PPL to partially fund PPL's acquisition of LKE. Such borrowing bore interest at 2.26% and was refinanced primarily through the issuance of long-term debt by LKE, LG&E, and KU and the use of internal funds. This borrowing and related payments were included in "Net increase (decrease) in short-term debt" on the Statement of Cash Flows.

PPL Energy Supply incurred an aggregate of $41 million of fees in 2010 in connection with establishing this facility. Such fees were initially deferred and amortized through December 2014. In connection with the reduction in the capacity from $4 billion to $3 billion in December 2010, PPL Energy Supply wrote off $10 million, $6 million after tax, of deferred fees, which was reflected in "Interest Expense" in the Statement of Income.

The borrowings outstanding at December 31, 2010 bore interest at a weighted-average rate of 2.27%.

(h) In October 2011, PPL Energy Supply, PPL Electric, LG&E and KU each amended its respective credit facility. The amendments include extending the expiration dates from December 2014 to October 2016. Under these credit facilities, PPL Energy Supply, PPL Electric, LG&E and KU each continue to have the ability to make cash borrowings and request the lenders to issue letters of credit.

(i) In March 2011, PPL Energy Supply's $300 million Structured Credit Facility expired. PPL Energy Supply's obligations under this facility were supported by a $300 million letter of credit issued on PPL Energy Supply's behalf under a separate but related $300 million 5-year credit agreement, which also expired in March 2011.

(j) Under this facility, PPL Electric has the ability to make cash borrowings and to request the lenders to issue letters of credit. Borrowings generally bear interest at LIBOR-based rates plus a spread, depending upon the company's senior secured long-term debt rating. The credit facility contains a financial covenant requiring PPL Electric's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility, and other customary covenants. PPL Electric also pays customary commitment and letter of credit issuance fees under this facility. Additionally, subject to certain conditions, PPL Electric may request that the facility's capacity be increased by up to $100 million. An aggregate of $2 million of fees were incurred in 2010 in connection with establishing this facility. Such fees were initially deferred and amortized through December 2014.

(k) PPL Electric participates in an asset-backed commercial paper program through which PPL Electric obtains financing by selling and contributing its eligible accounts receivable and unbilled revenue to a special purpose, wholly owned subsidiary on an ongoing basis. The subsidiary has pledged these assets to secure loans from a commercial paper conduit sponsored by a financial institution.

At December 31, 2011 and December 31, 2010, $251 million and $248 million of accounts receivable and $98 million and $133 million of unbilled revenue were pledged by the subsidiary under the credit agreement related to PPL Electric's and the subsidiary's participation in the asset-backed commercial paper program. Based on the accounts receivable and unbilled revenue pledged at December 31, 2011, the amount available for borrowing under the facility was limited to $103 million. PPL Electric's sale to its subsidiary of the accounts receivable and unbilled revenue is an absolute sale of assets, and PPL Electric does not retain an interest in these assets. However, for financial reporting purposes, the subsidiary's financial results are consolidated in PPL Electric's financial statements. PPL Electric performs certain record-keeping and cash collection functions with respect to the assets in return for a servicing fee from the subsidiary.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In July 2011, PPL Electric and the subsidiary extended the expiration date of the credit agreement to July 2012.

(l) All credit facilities at LG&E and KU also apply to LKE on a consolidated basis for financial reporting purposes.

(m) In June 2011, these facilities were amended such that the fees and the spreads to benchmark interest rates for borrowings depend upon the respective company's senior secured long-term debt rating rather than the senior unsecured long-term debt rating. The facilities each contain a financial covenant requiring LG&E's and KU's debt to total capitalization not to exceed 70%, as calculated in accordance with the facilities, and other customary covenants. Additionally, subject to certain conditions, LG&E and KU may request that each respective facility's capacity be increased by up to $100 million.

(n) The borrowing outstanding at December 31, 2010 bore interest at 2.27%. Such borrowing was repaid in January 2011 with proceeds received from the remarketing of certain tax-exempt bonds that were held by LG&E at December 31, 2010.

(o) In April 2011, KU entered into a letter of credit facility that has been used to issue letters of credit to support outstanding tax-exempt bonds. The facility contains a financial covenant requiring KU's debt to total capitalization not to exceed 70%, as calculated in accordance with the credit facility. KU pays customary commitment and letter of credit fees under the new facility. In August 2011, KU amended its letter of credit facility such that the fees depend upon KU's senior secured long-term debt rating rather than its senior unsecured long-term debt rating.

(PPL and PPL Energy Supply)

PPL Energy Supply maintains a $500 million Facility Agreement expiring June 2017, whereby PPL Energy Supply has the ability to request up to $500 million of committed letter of credit capacity at fees to be agreed upon at the time of each request, based on certain market conditions. At December 31, 2011, PPL Energy Supply has not requested any capacity for the issuance of letters of credit under this arrangement.

PPL Energy Supply, PPL EnergyPlus, PPL Montour and PPL Brunner Island maintain an $800 million secured energy marketing and trading facility, whereby PPL EnergyPlus will receive credit to be applied to satisfy collateral posting obligations related to its energy marketing and trading activities with counterparties participating in the facility. The credit amount is guaranteed by PPL Energy Supply, PPL Montour and PPL Brunner Island. PPL Montour and PPL Brunner Island have granted liens on their respective generating facilities to secure any amount they may owe under their guarantees, which had an aggregate carrying value of $2.7 billion at December 31, 2011. The facility expires in November 2015, but is subject to automatic one-year renewals under certain conditions. There were no secured obligations outstanding under this facility at December 31, 2011.

In October 2011, PPL Energy Supply re-activated its $500 million commercial paper program to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At December 31, 2011, PPL Energy Supply had $400 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheet, at a weighted-average interest rate of approximately 0.53%, which was used to partially fund the repayment of PPL Energy Supply's 6.40% Senior Notes upon maturity discussed below.

(PPL and PPL Electric)

PPL Electric maintains a commercial paper program for up to $200 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. PPL Electric had no commercial paper outstanding at December 31, 2011.

(PPL, LKE, LG&E and KU)

In February 2012, LG&E and KU each established a commercial paper program for up to $250 million to provide an additional financing source to fund their short-term liquidity needs. Commercial paper issuances will be supported by LG&E and KU's Syndicated Credit Facilities.

(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

See Note 16 for discussion of intercompany borrowings.

2011 Bridge Facility *(PPL)*

In March 2011, concurrently and in connection with entering into the agreement to acquire WPD Midlands, PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, entered into a 364-day unsecured £3.6 billion bridge facility to (i) fund the acquisition and (ii) pay certain fees and expenses in connection with the acquisition. During 2011, PPL incurred $44 million of fees in connection with establishing the 2011 Bridge Facility, which is reflected in "Interest Expense" on the Statement of Income. On April 1, 2011, concurrent with the closing of the WPD Midlands acquisition, PPL Capital Funding borrowed an aggregate of £1.75 billion and PPL WEM borrowed £1.85 billion under the 2011 Bridge Facility. Borrowings bore interest at approximately 2.62%, determined by one-month LIBOR rates plus a spread, based on PPL Capital Funding's

Past financial performance is no guarantee of future results.

senior unsecured debt rating and the length of time from the date of the acquisition closing that borrowings were outstanding. See Note 10 for additional information on the acquisition.

In accordance with the terms of the 2011 Bridge Facility, PPL Capital Funding's borrowings of £1.75 billion were repaid with approximately $2.8 billion of proceeds received from PPL's issuance of common stock and 2011 Equity Units in April 2011, as discussed in "Long-term Debt" below. In April 2011, PPL WEM repaid £650 million of its 2011 Bridge Facility borrowing. Such repayment was funded primarily with proceeds received from PPL WEM's issuance of senior notes, which is also discussed below. In May 2011, PPL WEM repaid the remaining £1.2 billion of borrowings then-outstanding under the 2011 Bridge Facility, primarily with the proceeds from senior notes issued by WPD (East Midlands) and WPD (West Midlands), as described below.

In anticipation of the repayment of a portion of the borrowings under the 2011 Bridge Facility with U.S. dollar proceeds received from PPL's issuance of common stock and 2011 Equity Units and PPL WEM's issuance of U.S. dollar-denominated senior notes, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. See Note 19 for additional information.

(a) Aggregate maturities of long-term debt are:
PPL - 2012, $0; 2013, $737; 2014, $310; 2015, $1,300; 2016, $810; and $14,825 thereafter.
PPL Energy Supply - 2012, $0; 2013, $737; 2014, $300; 2015, $300; 2016, $350; and $1,336 thereafter.
PPL Electric - 2012, $0; 2013, $0; 2014, $10; 2015, $100; 2016, $0; and $1,614 thereafter.
LKE - 2012, $0; 2013, $0; 2014, $0; 2015, $900; 2016, $0; and $3,185 thereafter.
LG&E - 2012, $0; 2013, $0; 2014, $0; 2015, $250; 2016, $0; and $859 thereafter.
KU - 2012, $0; 2013, $0; 2014, $0; 2015, $250; 2016, $0; and $1,601 thereafter.

None of the debt securities outstanding have sinking fund requirements.

(b) At December 31, 2011:
PPL - interest rates range from 2.125% to 6.85%, and maturities range from 2013 to 2047.
PPL Energy Supply - interest rates range from 4.60% to 6.50%, and maturities range from 2013 to 2036.
LKE - interest rates range from 2.125% to 4.375%, and maturities range from 2015 to 2021.

At December 31, 2010:
PPL - interest rates range from 2.125% to 7.00%, and maturities range from 2011 to 2047.
PPL Energy Supply - interest rates range from 5.40% to 7.00%, and maturities range from 2011 to 2046.
LKE - interest rates range from 2.125% to 3.75%, and maturities range from 2015 to 2020.

(c) Includes $99 million of notes that may be redeemed at par beginning in July 2012.

(d) Includes $300 million of 5.70% REset Put Securities due 2035 (REPSSM). The REPS bear interest at a rate of 5.70% per annum to, but excluding, October 15, 2015 (Remarketing Date). The REPS are required to be put by existing holders on the Remarketing Date either for (a) purchase and remarketing by a designated remarketing dealer or (b) repurchase by PPL Energy Supply. Therefore, the REPS are reflected as a 2015 maturity for PPL and PPL Energy Supply in (a) above. If the remarketing dealer elects to purchase the REPS for remarketing, it will purchase the REPS at 100% of the principal amount, and the REPS will bear interest on and after the Remarketing Date at a new fixed rate per annum determined in the remarketing. PPL Energy Supply has the right to terminate the remarketing process. If the remarketing is terminated at the option of PPL Energy Supply or under certain other circumstances, including the occurrence of an event of default by PPL Energy Supply under the related indenture or a failed remarketing for certain specified reasons, PPL Energy Supply will be required to pay the remarketing dealer a settlement amount as calculated in accordance with the related remarketing agreement.

In July 2011, PPL Energy Supply redeemed at par the entire $250 million aggregate principal amount of its 7.00% Senior Notes due 2046. PPL Energy Supply recorded a loss of $7 million, which is reflected in "Interest Expense" on the Statements of Income for 2011, as a result of accelerating the amortization of deferred financing fees in connection with the redemption.

In November 2011, PPL Energy Supply repaid the entire $500 million principal amount of its 6.40% Senior Notes upon maturity.

In December 2011, PPL Energy Supply issued $500 million of 4.60% Senior Notes due 2021. The bonds may be redeemed at PPL Energy Supply's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. PPL Energy Supply received proceeds of $497 million, net of discounts and underwriting fees. The net proceeds were used to repay a portion of short-term debt incurred to repay at maturity PPL Energy Supply's $500 million aggregate principal amount of 6.40% Senior Notes due November 1, 2011. The balance of the net proceeds will be used for general corporate purposes.

(e) Includes $875 million of Senior Notes issued by LKE in 2010 in private offerings to qualified institutional buyers and other transactions not subject to registration requirements under the Securities Act of 1933. In April 2011, LKE filed 2011 Registration Statements with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statements became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.

In September 2011, LKE issued $250 million of 4.375% Senior Notes due 2021. The notes were issued in a private offering to qualified institutional buyers and other transactions not subject to registration requirements under the Securities Act of 1933. In connection with the issuance, LKE entered into a registration rights agreement with representatives of the initial purchasers of the notes, pursuant to which LKE agreed to file, by late April

2012, a registration statement to exchange such notes for securities containing substantially identical terms (except for certain transfer restrictions), or in certain cases to file, by late April 2012, a registration statement covering resale of the notes. LKE also agreed, under its registration rights agreement, to (i) use its commercially reasonable efforts to cause the registration statement to be declared effective under the Securities Act by late July 2012 and (ii) upon effectiveness of the registration statement, take certain actions to promptly exchange the notes or, in the case of a registration statement covering resale of the notes, keep the registration statement effective until no later than late September 2012. Pursuant to the registration rights agreement, LKE may be required to pay liquidated damages if it does not meet certain requirements under its registration rights agreement. Liquidated damages will generally accrue with respect to the principal amount of the notes at a rate of 0.25% per annum for the first 90 days from and including the date on which a default specified under the registration rights agreement occurs, and increase by an additional 0.25% per annum thereafter, provided that the liquidated damages rate shall not at any time exceed 0.50% per annum.

Liquidated damages will cease to accrue when all registration defaults under the registration rights agreement have been cured, or if earlier, upon the redemption by the issuer or maturity of the notes.

The notes may be redeemed at LKE's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. LKE received proceeds of $248 million, net of discounts and underwriting fees. The net proceeds have been used to make a return of capital to PPL.

(f) 2011 includes $480 million of Junior Subordinated Notes that bear interest at 6.70% into March 2017, at which time the notes will bear interest at three-month LIBOR plus 2.665%, reset quarterly, until maturity. Interest payments may be deferred, from time to time, on one or more occasions for up to ten consecutive years. The notes may be redeemed at par beginning in March 2017.

2011 also includes $978 million of 4.32% Junior Subordinated Notes due 2019 that were issued in connection with PPL's issuance of the 2011 Equity Units in April 2011 and $1.15 billion of 4.625% Junior Subordinated Notes due 2018 that were issued in connection with PPL's issuance of the 2010 Equity Units in June 2010. See discussion of the Equity Units below for further information on such notes.

2010 includes $480 million of Junior Subordinated Notes that bear interest at 6.70% into March 2017, at which time the notes will bear interest at three-month LIBOR plus 2.665%, reset quarterly, until maturity. Interest payments may be deferred, from time to time, on one or more occasions for up to ten consecutive years. The notes may be redeemed at par beginning in March 2017.

2010 also includes $1.15 billion of 4.625% Junior Subordinated Notes due 2018 that were issued in connection with PPL's issuance of the 2010 Equity Units in June 2010.

(g) Represents lease financing consolidated through a VIE. See Note 22 for additional information.

(h) The 1945 First Mortgage Bonds were issued under, and secured by, the lien of the 1945 First Mortgage Bond Indenture. In December 2008, PPL Electric completed an in-substance defeasance of the 1945 First Mortgage Bonds by depositing sufficient funds with the trustee solely to satisfy the principal and remaining interest obligations on the bonds when due. The amount of funds on deposit with the trustee was $12 million at December 31, 2011 and $13 million at December 31, 2010, and is recorded as restricted cash, primarily in "Other noncurrent assets" on the Balance Sheets.

Also in December 2008, PPL Electric discharged the lien under the 1945 First Mortgage Bond Indenture, which covered substantially all electric distribution plant and certain transmission plant owned by PPL Electric.

(i) At December 31, 2011:
PPL - interest rates range from 1.625% to 6.45%, and maturities range from 2015 to 2041.
PPL Electric - interest rates range from 3.00% to 6.45%, and maturities range from 2015 to 2041.
LG&E - interest rates range from 1.625% to 5.125%, and maturities range from 2015 to 2040.
KU - interest rates range from 1.625% to 5.125%, and maturities range from 2015 to 2040.

At December 31, 2010:
PPL - interest rates range from 1.625% to 7.125%, and maturities range from 2013 to 2040.
PPL Electric - interest rates range from 4.95% to 7.125%, and maturities range from 2013 to 2039.
LG&E - interest rates range from 1.625% to 5.125%, and maturities range from 2015 to 2040.
KU - interest rates range from 1.625% to 5.125%, and maturities range from 2015 to 2040.

In July 2011, PPL Electric issued $250 million of 5.20% First Mortgage Bonds due 2041. The bonds may be redeemed at PPL Electric's option at make-whole redemption prices until the date six months prior to maturity and at par thereafter. PPL Electric received proceeds of $246 million, net of discounts and underwriting fees. The net proceeds have been or will be used for capital expenditures and other general corporate purposes.

Also in July 2011, PPL Electric redeemed the entire $400 million aggregate principal amount of its 7.125% Senior Secured Bonds due 2013 for $458 million, plus accrued interest. PPL Electric recorded a regulatory asset for the redemption premium and unamortized financing costs associated with this debt. See Note 6 for additional information.

In August 2011, PPL Electric issued $400 million of 3.00% First Mortgage Bonds due 2021. The bonds may be redeemed at PPL Electric's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. PPL Electric received proceeds of $394 million, net of discounts and underwriting fees. The net proceeds were used to repay $250 million of short-term debt and to replenish cash used to redeem the 7.125% Senior Secured Bonds due 2013 in July 2011, as discussed above.

The senior secured and first mortgage bonds issued by PPL Electric are secured by the lien of the PPL Electric 2001 Mortgage Indenture, which covers substantially all electric distribution plant and certain transmission plant owned by PPL Electric. The carrying value of PPL Electric's property, plant and equipment was approximately $3.9 billion and $3.6 billion at December 31, 2011 and 2010.

LG&E's first mortgage bonds are secured by the lien of the LG&E 2010 Mortgage Indenture, which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $2.6 billion and $2.5 billion at December 31, 2011 and December 31, 2010.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

KU's first mortgage bonds are secured by the lien of the KU 2010 Mortgage Indenture, which creates a lien, subject to certain exceptions and exclusions, on substantially all of KU's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity. The aggregate carrying value of the property subject to the lien was $4.1 billion and $4.0 billion at December 31, 2011 and December 31, 2010.

The LG&E and KU first mortgage bonds were issued in 2010 in private offerings to qualified institutional buyers and other transactions not subject to registration requirements under the Securities Act of 1933. In April 2011, LG&E and KU each filed 2011 Registration Statements with the SEC related to offers to exchange the first mortgage bonds with similar but registered securities. The 2011 Registration Statements became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.

(j) PPL Electric issued a series of its senior secured bonds to secure its obligations to make payments with respect to each series of Pollution Control Bonds that were issued by the LCIDA and the PEDFA on behalf of PPL Electric. These senior secured bonds were issued in the same principal amount, contain payment and redemption provisions that correspond to and bear the same interest rate as such Pollution Control Bonds. These senior secured bonds were issued under PPL Electric's 2001 Mortgage Indenture and are secured as noted in (i) above. $224 million of such bonds may be redeemed at par beginning in 2015. $90 million of such bonds may be redeemed, in whole or in part, at par beginning in October 2020 and are subject to mandatory redemption upon determination that the interest rate on the bonds would be included in the holders' gross income for federal tax purposes.

(k) In October 2010, LG&E and KU each issued a series of first mortgage bonds to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amount, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the LG&E 2010 Mortgage Indenture and the KU 2010 Mortgage Indenture and are secured as noted in (i) above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E and KU. The related revenue bond documents allow LG&E and KU to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2011, the aggregate tax-exempt revenue bonds issued on behalf of LG&E and KU that were in a term rate mode totaled $321 million, $294 million and $27 million for LKE, LG&E and KU. The weighted average rates on these bonds were 3.57%, 3.37% and 5.83% for LKE, LG&E and KU. At December 31, 2010, the amounts that were in a term rate mode totaled $183 million, $156 million and $27 million for LKE, LG&E and KU. The weighted average rates on these bonds were 5.31%, 5.22% and 5.83% for LKE, LG&E and KU.

At December 31, 2011, the aggregate tax-exempt revenue bonds issued on behalf of LG&E and KU that were in a variable rate mode totaled $604 million, $280 million and $324 million for LKE, LG&E and KU. The weighted average rates on these bonds were 0.23%, 0.33% and 0.15% for LKE, LG&E and KU. At December 31, 2010, the amounts that were in a variable rate mode totaled $742 million, $418 million and $324 million for LKE, LG&E and KU. The weighted average rates on these bonds were 0.45%, 0.55% and 0.38% for LKE, LG&E and KU.

Several series of the tax-exempt revenue bonds are insured by monoline bond insurers whose ratings were reduced due to exposures relating to insurance of sub-prime mortgages. Of the bonds outstanding, $231 million are in the form of insured auction rate securities, wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. During 2008, interest rates increased, and LG&E and KU experienced failed auctions when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture. As noted above, the instruments governing these auction rate bonds permit LG&E and KU to convert the bonds to other interest rate modes.

Certain variable rate tax-exempt revenue bonds totaling $348 million at December 31, 2011, are subject to tender for purchase by LG&E and KU at the option of the holder and to mandatory tender for purchase by LG&E and KU upon the occurrence of certain events. At December 31, 2010, LG&E held $163 million of such bonds, which were issued on its behalf by Louisville/Jefferson County, Kentucky and are reflected as "Short-term investments" on the Balance Sheet. In January 2011, the entire $163 million of bonds were remarketed to unaffiliated investors in a term rate mode, bearing interest at 1.90% into 2012. The proceeds from the remarketing were used to repay the borrowing under LG&E's syndicated credit facility, which is discussed above in "Credit Arrangements and Short-term Debt."

(l) The interest rate mode on all three series of bonds was converted from a commercial paper rate to a term rate of 3.00% for five years, effective in September 2010.

(m) At December 31, 2011:
PPL and PPL Energy Supply - 6.00% notes due 2020.

At December 31, 2010:
PPL - 6.00%- 7.471% notes due 2011-2020.
PPL Energy Supply - 6.00% notes due 2020.
LKE - 7.471% notes due 2011.

(n) Includes £225 million ($354 million at December 31, 2011 and $350 million at December 31, 2010) of notes that may be redeemed, in total but not in part, on December 21, 2026, at the greater of the principal value or a value determined by reference to the gross redemption yield on a nominated U.K. Government bond.

Also includes £3.7 billion ($5.8 billion) at December 31, 2011 and £1.0 billion ($1.6 billion) at December 31, 2010 of notes that may be put by the holders back to the issuer for redemption if the long-term credit ratings assigned to the Notes by Moody's, S&P or Fitch are withdrawn by any of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or a material adverse change to, the distribution licenses under which WPD's network companies operate.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In connection with the closing of the acquisition of WPD Midlands in April 2011, PPL assumed, through consolidation, £250 million of Senior Notes due 2040 (2040 Notes) previously issued by WPD (East Midlands), and £250 million of Senior Notes due 2025 (2025 Notes) previously issued by WPD (West Midlands), equating to an aggregate principal amount of approximately $800 million at the time of closing. The interest rates on the notes are subject to adjustment into June 2012 in the event of a rating change on the notes. The 2040 Notes currently bear interest at 5.75% and the 2025 Notes currently bear interest at 6.00%.

The maximum rate of interest allowable under the adjustment provisions is 6.50% for the 2040 Notes and 6.25% for the 2025 Notes. The 2025 Notes and 2040 Notes may be put by the holders back to the respective issuer for redemption if the long-term credit ratings assigned to the notes by Moody's or S&P are withdrawn by either of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or material adverse change to, the distribution license under which WPD (West Midlands) and WPD (East Midlands) operate.

In April 2011, PPL WEM issued $460 million of 3.90% Senior Notes due 2016 (2016 Notes) and $500 million of 5.375% Senior Notes due 2021 (2021 Notes). The 2016 Notes may be redeemed any time prior to maturity at PPL WEM's option at make-whole redemption prices. The 2021 Notes may be redeemed at PPL WEM's option at make-whole redemption prices until the date three months prior to maturity and at par thereafter. PPL WEM received proceeds of $953 million, net of discounts and underwriting fees, from the combined issuance of the notes. The net proceeds were used to repay a portion of PPL WEM's borrowing under the 2011 Bridge Facility as discussed above. In connection with the issuance of the senior notes, PPL WEM, through PPL, entered into cross currency interest rate swaps for the entire aggregate principal amount of each series of notes in order to hedge PPL WEM's risk of variability in the GBP functional currency equivalent cash flows related to its U.S. dollar interest and principal payments on the notes.

In May 2011, WPD (West Midlands) issued £800 million of 5.75% Senior Notes due 2032 (2032 Notes) and WPD (East Midlands) issued £600 million of 5.25% Senior Notes due 2023 (2023 Notes). WPD (West Midlands) and WPD (East Midlands) collectively received proceeds of £1.4 billion, which equated to $2.2 billion at the time of issuance, net of discounts and underwriting fees, from the combined debt issuances. A portion of the net proceeds were dividended to PPL WEM and used to repay the remaining balance of PPL WEM's borrowing under the 2011 Bridge Facility in May 2011 as discussed above. The balance of the net proceeds have been or will be used to pre-fund certain capital expenditures and for other general corporate purposes.

The 2032 Notes and the 2023 Notes may be put by the holders back to the respective issuer for redemption if the long-term credit ratings assigned to the notes by Moody's or S&P are withdrawn by either of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or material adverse change to, the distribution license under which WPD (West Midlands) and WPD (East Midlands) operate.

The change from 2010 to 2011 includes an increase of $16 million resulting from movements in foreign currency exchange rates related to the amounts that were outstanding at both December 31, 2010 and December 31, 2011.

(o) The principal amount of the notes issued by WPD (South West) is adjusted on a semi-annual basis based on changes in a specified index, as detailed in the terms of the related indentures. The adjustment to the principal amount from 2010 to 2011 was an increase of approximately £14 million ($22 million) resulting from inflation and a $4 million increase resulting from movements in foreign currency exchange rates.

These notes may be redeemed, in total by series, on December 1, 2026, at the greater of the adjusted principal value and a make-whole value determined by reference to the gross real yield on a nominated U.K. government bond. Additionally, these notes may be put by the holders back to the issuer for redemption if the long-term credit ratings assigned to the notes by Moody's, S&P or Fitch are withdrawn by any of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or a material adverse change to, the distribution license under which the issuer operates.

In June 2011, WPD (East Midlands) issued £100 million of Index-Linked Notes due 2043 (2043 Notes). The principal amount of the 2043 Notes is adjusted based on changes in a specified index, as detailed in the terms of the notes. WPD (East Midlands) received proceeds of £99 million, which equated to $163 million at the time of issuance, net of discounts and underwriting fees, from the issuance of the 2043 Notes. The majority of the net proceeds were used to repay short-term debt. Since issuance, the principal amount on the 2043 Notes has increased by approximately £2 million ($4 million) as a result of inflation.

The 2043 Notes may be put by the holders back to WPD (East Midlands) for redemption if the long-term credit ratings assigned to the notes by Moody's or S&P are withdrawn by either of the rating agencies or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or material adverse change to, the distribution license under which WPD (East Midlands) operates.

(p) As a result of PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, PPL Energy Funding, assets and liabilities of PPL Global at December 31, 2010, including total long-term debt of $2.3 billion, were removed from PPL Energy Supply's Balance Sheet in 2011. See Note 9 for additional information.

(q) Reflects adjustments made to record WPD's long-term debt at fair value at the time of acquisition of the controlling interest in WPD in 2002 and the acquisition of WPD Midlands in 2011.

(r) Reflects adjustments made to record LG&E's and KU's long-term debt at fair value at the time of acquisition of LKE in 2010.

2011 Equity Units *(PPL)*

In April 2011, in connection with the acquisition of WPD Midlands, PPL issued 92 million shares of its common stock at a public offering price of $25.30 per share, for a total of $2.328 billion. Proceeds from the issuance were $2.258 billion, net of the $70 million underwriting discount. PPL also issued 19.55 million 2011 Equity Units at a stated amount per unit of $50.00 for a total of $978 million. Proceeds from the issuance were $948 million, net of the $30 million underwriting discount. PPL

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

used the net proceeds to repay PPL Capital Funding's borrowings under the 2011 Bridge Facility, as discussed above, to pay certain acquisition-related fees and expenses and for general corporate purposes.

Each 2011 Equity Unit consists of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019 (2019 Notes).

Each 2011 Purchase Contract obligates the holder to purchase, and PPL to sell, for $50.00 a number of shares of PPL common stock to be determined by the average VWAP of PPL's common stock for the 20-trading day period ending on the third trading day prior to May 1, 2014, subject to antidilution adjustments and an early settlement upon a Fundamental Change as follows:

- if the average VWAP equals or exceeds approximately $30.99, then 1.6133 shares (a minimum of 31,540,015 shares);
- if the average VWAP is less than approximately $30.99 but greater than $25.30, a number of shares of common stock having a value, based on the average VWAP, equal to $50.00; and
- if the average VWAP is less than or equal to $25.30, then 1.9763 shares (a maximum of 38,636,665 shares).

If holders elect to settle the 2011 Purchase Contract prior to May 1, 2014, they will receive 1.6133 shares of PPL common stock, subject to antidilution adjustments and an early settlement upon a Fundamental Change.

A holder's ownership interest in the 2019 Notes is pledged to PPL to secure the holder's obligation under the related 2011 Purchase Contract. If a holder of a 2011 Purchase Contract chooses at any time no longer to be a holder of the 2019 Notes, such holder's obligation under the 2011 Purchase Contract must be secured by a U.S. Treasury security.

Each 2011 Purchase Contract also requires PPL to make quarterly contract adjustment payments at a rate of 4.43% per year on the $50.00 stated amount of the 2011 Equity Unit. PPL has the option to defer these contract adjustment payments until the 2011 Purchase Contract settlement date. Deferred contract adjustment payments will accrue additional contract adjustment payments at the rate of 8.75% per year until paid. Until any deferred contract adjustment payments have been paid, PPL may not declare or pay any dividends or distributions on, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its capital stock, subject to certain exceptions.

The 2019 Notes are fully and unconditionally guaranteed by PPL as to payment of principal and interest. The 2019 Notes initially bear interest at 4.32% and are not subject to redemption prior to May 2016. Beginning May 2016, PPL Capital Funding may, at its option, redeem the 2019 Notes, in whole but not in part, at any time, at par plus accrued and unpaid interest. The 2019 Notes are expected to be remarketed in 2014 into two tranches, such that neither tranche will have an aggregate principal amount of less than the lesser of $250 million and 50% of the aggregate principal amount of the 2019 Notes to be remarketed. One tranche will mature on or about the third anniversary of the settlement of the remarketing, and the other tranche will mature on or about the fifth anniversary of such settlement. Upon a successful remarketing, the interest rate on the 2019 Notes may be reset and the maturity of the tranches may be modified as necessary. In connection with a remarketing, PPL Capital Funding may elect with respect to each tranche, to extend or eliminate the early redemption date and/or calculate interest on the notes of a tranche on a fixed or floating rate basis. If the remarketing fails, holders of the 2019 Notes will have the right to put their notes to PPL Capital Funding on May 1, 2014 for an amount equal to the principal amount plus accrued interest.

Prior to May 2016, PPL Capital Funding may elect at one or more times to defer interest payments on the 2019 Notes for one or more consecutive interest periods until the earlier of the third anniversary of the interest payment due date and May 2016. Deferred interest payments will accrue additional interest at a rate equal to the interest rate then applicable to the 2019 Notes. Until any deferred interest payments have been paid, PPL may not, subject to certain exceptions, (i) declare or pay any dividends or distributions on, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its capital stock, (ii) make any payment of principal of, or interest or premium, if any, on, or repay, purchase or redeem any of its debt securities that upon its liquidation ranks equal with, or junior in interest to, the subordinated guarantee of the 2019 Notes by PPL as of the date of issuance and (iii) make any payments regarding any guarantee by PPL of securities of any of its subsidiaries (other than PPL Capital Funding) if the guarantee ranks equal with, or junior in interest to, the 2019 Notes as of the date of their issuance.

In the financial statements, the proceeds from the sale of the 2011 Equity Units were allocated to the 2019 Notes and the 2011 Purchase Contracts, including the obligation to make contract adjustment payments, based on the underlying fair value of each instrument at the time of issuance. As a result, the 2019 Notes were recorded at $978 million, which approximated fair value, as long-term debt. At the time of issuance, the present value of the contract adjustment payments of $123 million was recorded to other liabilities representing the obligation to make contract adjustment payments, with an offsetting reduction to additional paid-in capital for the issuance of the 2011 Purchase Contracts, which approximated the fair value of each. The liability is being accreted through interest expense over the three-year term of the 2011 Purchase Contracts. The

initial valuation of the contract adjustment payments is considered a non-cash transaction that is excluded from the Statement of Cash Flows in 2011. Costs to issue the 2011 Equity Units were primarily allocated on a relative cost basis, resulting in $25 million being recorded to "Additional paid-in capital" and $6 million being recorded to "Other noncurrent assets" on the Balance Sheet. See Note 4 for EPS considerations related to the 2011 Purchase Contracts.

2010 Equity Units *(PPL)*

In June 2010, in connection with the acquisition of LKE, PPL issued 103.5 million shares of its common stock at a public offering price of $24.00 per share, for a total of $2.484 billion. Proceeds from the issuance were $2.409 billion, net of the $75 million underwriting discount. PPL also issued 23 million 2010 Equity Units at a stated amount per unit of $50.00 for a total of $1.150 billion. Proceeds from the issuance were $1.116 billion, net of the $34 million underwriting discount.

Each 2010 Equity Unit consists of a Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in $1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018 (2018 Notes).

Each 2010 Purchase Contract obligates the holder to purchase, and PPL to sell, for $50.00 a variable number of shares of PPL common stock determined by the average VWAP of PPL's common stock for the 20-trading day period ending on the third trading day prior to July 1, 2013, subject to antidilution adjustments and an early settlement upon a Fundamental Change as follows:

- if the average VWAP equals or exceeds $28.80, then 1.7361 shares (a minimum of 39,930,300 shares);
- if the average VWAP is less than $28.80 but greater than $24.00, a number of shares of common stock having a value, based on the average VWAP, equal to $50.00; and
- if the average VWAP is less than or equal to $24.00, then 2.0833 shares (a maximum of 47,915,900 shares).

If holders elect to settle the 2010 Purchase Contract prior to July 1, 2013, they will receive 1.7361 shares of PPL common stock, subject to antidilution adjustments and an early settlement upon a Fundamental Change.

A holder's ownership interest in the 2018 Notes is pledged to PPL to secure the holder's obligation under the related 2010 Purchase Contract. If a holder of a 2010 Purchase Contract chooses at any time to no longer be a holder of the 2018 Notes, such holder's obligation under the 2010 Purchase Contract must be secured by a U.S. Treasury security.

Each 2010 Purchase Contract also requires PPL to make quarterly contract adjustment payments at a rate of 4.875% per year on the $50.00 stated amount of the 2010 Equity Unit. PPL has the option to defer these contract adjustment payments until the 2010 Purchase Contract settlement date. Deferred contract adjustment payments will accrue additional contract adjustment payments at the rate of 9.5% per year until paid. Until any deferred contract adjustment payments have been paid, PPL may not declare or pay any dividends or distributions on, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its capital stock, subject to certain exceptions.

The 2018 Notes are fully and unconditionally guaranteed by PPL as to payment of principal and interest. The 2018 Notes initially bear interest at 4.625% and are not subject to redemption prior to July 2015. Beginning July 2015, PPL Capital Funding may, at its option, redeem the 2018 Notes, in whole but not in part, at any time, at par plus accrued and unpaid interest. The 2018 Notes are expected to be remarketed in 2013 in two tranches, such that neither tranche will have an aggregate principal amount of less than the lesser of $300 million and 50% of the aggregate principal amount of the 2018 Notes to be remarketed. One tranche will mature on or about the third anniversary of the settlement of the remarketing, and the other tranche will mature on or about the fifth anniversary of such settlement. The 2018 Notes will be remarketed as subordinated, unsecured obligations of PPL Capital Funding, as PPL Capital Funding notified the trustee in September 2010 of its irrevocable election to maintain the subordination provisions of the notes and related guarantees in a remarketing. Upon a successful remarketing, the interest rate on the 2018 Notes may be reset and the maturity of the tranches may be modified as necessary. In connection with a remarketing, PPL Capital Funding may elect, with respect to each tranche, to extend or eliminate the early redemption date and/or calculate interest on the notes of a tranche on a fixed or floating rate basis. If the remarketing fails, holders of the 2018 Notes will have the right to put their notes to PPL Capital Funding on July 1, 2013 for an amount equal to the principal amount plus accrued interest.

Prior to July 2013, PPL Capital Funding may elect at one or more times to defer interest payments on the 2018 Notes for one or more consecutive interest periods until the earlier of the third anniversary of the interest payment due date and July 2015. Deferred interest payments will accrue additional interest at a rate equal to the interest rate then applicable to the 2018 Notes. Until any deferred interest payments have been paid, PPL may not, subject to certain exceptions, (i) declare or pay any dividends or distributions on, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its capital stock, (ii) make any payment of principal of, or interest or premium, if any, on, or repay, purchase or redeem any of its debt securities that upon its liquidation ranks equal with, or junior in interest to, the subordinated guarantee of the 2018 Notes by

PPL as of the date of issuance and (iii) make any payments regarding any guarantee by PPL of securities of any of its subsidiaries (other than PPL Capital Funding) if the guarantee ranks equal with, or junior in interest to, the 2018 Notes as of the date of their issuance.

In the financial statements, the proceeds from the sale of the 2010 Equity Units were allocated to the 2018 Notes and the 2010 Purchase Contracts, including the obligation to make contract adjustment payments, based on the underlying fair value of each instrument at the time of issuance. As a result, the 2018 Notes were recorded at $1.150 billion, which approximated fair value, as long-term debt. At the time of issuance, the present value of the contract adjustment payments of $157 million was recorded to other liabilities, representing the obligation to make contract adjustment payments, with an offsetting reduction to additional paid-in capital value for the issuance of the 2010 Purchase Contracts, which approximated the fair value of each. The liability is being accreted through interest expense over the three-year term of the 2010 Purchase Contracts. The initial valuation of the contract adjustment payments is considered a non-cash transaction that was excluded from the Statement of Cash Flows in 2010. Costs to issue the 2010 Equity Units were primarily allocated on a relative cost basis, resulting in $29 million being recorded to "Additional paid-in capital" and $7 million being recorded to "Other noncurrent assets" on the Balance Sheet. See Note 4 for EPS considerations related to the 2010 Purchase Contracts.

Legal Separateness *(PPL, PPL Energy Supply, PPL Electric and LKE)*

In 2001, PPL Electric completed a strategic initiative to confirm its legal separation from PPL and PPL's other affiliated companies. This initiative was designed to enable PPL Electric to substantially reduce its exposure to volatility in energy prices and supply risks through 2009 and to reduce its business and financial risk profile by, among other things, limiting its business activities to the transmission and distribution of electricity and businesses related to or arising out of the electric transmission and distribution businesses. In connection with this initiative, PPL Electric:

- obtained long-term electric supply contracts to meet its PLR obligations (with its affiliate PPL EnergyPlus) through 2009, as further described in Note 16 under "PLR Contracts/Purchase of Accounts Receivable" (also see Note 15 under "Energy Purchase Commitments" for information on current PLR supply procurement procedures);
- agreed to limit its businesses to electric transmission and distribution and related activities;
- adopted amendments to its Articles of Incorporation and Bylaws containing corporate governance and operating provisions designed to clarify and reinforce its legal and corporate separateness from PPL and its other affiliated companies; and
- appointed an independent director to its Board of Directors and required the unanimous approval of the Board of Directors, including the consent of the independent director, to amendments to these corporate governance and operating provisions or to the commencement of any insolvency proceedings, including any filing of a voluntary petition in bankruptcy or other similar actions.

In addition, in connection with the issuance of certain series of bonds, PPL Electric entered into a compliance administration agreement with an independent compliance administrator to review, on a semi-annual basis, its compliance with the corporate governance and operating requirements contained in its Articles of Incorporation and Bylaws. Such series of bonds are no longer outstanding and the compliance administration agreement has terminated, but PPL Electric continues to comply with the corporate separateness provisions in its Articles of Incorporation and Bylaws.

The enhancements to PPL Electric's legal separation from its affiliates are intended to minimize the risk that a court would order PPL Electric's assets and liabilities to be substantively consolidated with those of PPL or another affiliate of PPL in the event that PPL or another PPL affiliate were to become a debtor in a bankruptcy case. Based on these various measures, PPL Electric was able to issue and maintain a higher level of debt and use it to replace higher cost equity, thereby maintaining a lower total cost of capital. Nevertheless, if PPL or another PPL affiliate were to become a debtor in a bankruptcy case, there can be no assurance that a court would not order PPL Electric's assets and liabilities to be consolidated with those of PPL or such other PPL affiliate.

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of PPL Energy Supply, PPL Electric and LKE are each separate legal entities. These subsidiaries are not liable for the debts of PPL Energy Supply, PPL Electric and LKE. Accordingly, creditors of PPL Energy Supply, PPL Electric and LKE may not satisfy their debts from the assets of their subsidiaries absent a specific contractual

undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL Energy Supply, PPL Electric and LKE are not liable for the debts of their subsidiaries, nor are their subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of PPL Energy Supply, PPL Electric and LKE (or their other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions, Capital Contributions and Related Restrictions

(PPL)

In November 2011, PPL declared its quarterly common stock dividend, payable January 3, 2012, at 35.0 cents per share (equivalent to $1.40 per annum). In February 2012, PPL declared its quarterly common stock dividend, payable April 2, 2012, at 36.0 cents per share (equivalent to $1.44 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Neither PPL Capital Funding nor PPL may declare or pay any cash dividend or distribution on its capital stock during any period in which PPL Capital Funding defers interest payments on its 2007 Series A Junior Subordinated Notes due 2067. Subject to certain exceptions, PPL may not declare or pay any dividend or distribution on its capital stock until any deferred interest payments on its 4.625% Junior Subordinated Notes due 2018 and its 4.32% Junior Subordinated Notes due 2019 have been paid and deferred contract adjustment payments on PPL's Purchase Contracts have been paid. At December 31, 2011, no payments were deferred on either series of junior subordinated notes or the Purchase Contracts.

(PPL, PPL Electric, LKE, LG&E and KU)

PPL relies on dividends or loans from its subsidiaries to fund PPL's dividends to its common shareholders. The net assets of certain PPL subsidiaries are subject to legal restrictions. LKE primarily relies on dividends from its subsidiaries to fund its dividends to PPL. LG&E, KU and PPL Electric are subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E, KU and PPL Electric believe, however, that this statutory restriction, as applied to their circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. Also, under Virginia law, KU is prohibited from making loans to affiliates without the prior approval of the VSCC. There are no comparable statutes under Kentucky law applicable to LG&E and KU, or under Pennsylvania law applicable to PPL Electric. However, Orders from the KPSC require LG&E or KU to obtain prior regulatory consent or approval before loaning funds to PPL. At December 31, 2011, the net restricted assets of LG&E and KU were approximately $4.4 billion.

(PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The following distributions and capital contributions occurred in 2011:

	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
Dividends/distributions paid to parent/member	$ 316 (a)	$ 92	$ 533 (b)	$ 83	$ 124
Capital contributions received from parent/member	461	100			

(a) In addition to the cash distributions paid, in January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent company, PPL Energy Funding. See Note 9 for additional information.

(b) Includes $248 million return of capital made to PPL in September 2011 from proceeds of senior unsecured note issuance.

(PPL Energy Supply)

In January 2012, PPL Energy Supply distributed $200 million to its parent.

(PPL and PPL Energy Supply)

The PPL Montana Colstrip lease places certain restrictions on PPL Montana's ability to declare dividends. At this time, PPL believes that these covenants will not limit PPL's or PPL Energy Supply's ability to operate as desired and will not affect their ability to meet any of their cash obligations. WPD subsidiaries also have financing arrangements that limit their ability to pay dividends. However, PPL does not, at this time, expect that any of such limitations would significantly impact PPL's ability to meet its cash obligations.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(PPL and PPL Electric)

As discussed in Note 3, PPL Electric may not pay dividends on its common stock, except in certain circumstances, unless full dividends have been paid on the Preference Shares for the then-current dividend period. The quarterly dividend rate for PPL Electric's Preference Shares is $1.5625 per depositary share. PPL Electric has declared and paid dividends on its outstanding Preference Shares since issuance. Dividends on the Preference Shares are not cumulative and future dividends, declared at the discretion of PPL Electric's Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

(LG&E and KU)

In February 2012, LG&E and KU filed an application with FERC seeking authorization to pay dividends in the future based on retained earnings balances, which would be calculated ignoring the impact of the accounting for the acquisition by PPL. If approved, as of December 31, 2011, this would increase the balance available for dividends from LG&E by $809 million and KU by $1.4 billion. LG&E and KU do not anticipate changing their dividend practices.

8. Acquisitions, Development and Divestitures

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The Registrants continuously evaluate opportunities for potential acquisitions, divestitures and development projects. Development projects are continuously reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results. See Note 9 for information on PPL Energy Supply's distribution of its membership interest in PPL Global to its parent, PPL Energy Funding, which was presented as discontinued operations by PPL Energy Supply, and the sales of businesses that were presented as discontinued operations by PPL, PPL Energy Supply and LKE. See Note 10 for information on PPL's acquisitions of WPD Midlands and LKE.

(PPL, LKE, LG&E and KU)

Acquisition

Pending Bluegrass CTs Acquisition

In September 2011, LG&E and KU entered into an Asset Purchase Agreement with Bluegrass Generation for the purchase of the Bluegrass CTs, aggregating approximately 495 MW, plus limited associated contractual arrangements required for operation of the units, for a purchase price of $110 million. Pursuant to the Asset Purchase Agreement, LG&E and KU will jointly acquire the Bluegrass CTs as tenants in common, with LG&E as owner of a 69% undivided interest, and KU as owner of a 31% undivided interest, in the purchased assets. The purchase is subject to receipt of approvals from the KPSC, the FERC, certain permit assignments or local approvals, and other conditions. Either party can terminate the Asset Purchase Agreement should the purchase transaction fail to occur by June 30, 2012.

Development

NGCC Construction

In September 2011, LG&E and KU requested KPSC approval to build a 640 MW NGCC at the existing Cane Run plant site in Kentucky. This project is also subject to certain regulatory approvals. Once all approvals are received, construction is expected to begin in 2012 and be complete by 2016. The project, which includes building a natural gas supply pipeline, has an expected cost of approximately $580 million. See Note 6 for additional information.

In conjunction with this request and to meet new, stricter federal EPA regulations, LG&E and KU anticipate retiring six older coal-fired electric generating units at the Cane Run, Green River and Tyrone plants, which have a combined summer rating of 797 MW. The Cane Run and Green River coal units will need to remain operational until the replacement generation and associated transmission projects are completed.

TC2

In January 2011, LKE began dispatching electricity from TC2 to meet customer demand. See Note 15 for additional information regarding the construction of TC2.

(PPL and PPL Energy Supply)

Hydroelectric Expansion Projects

In 2009, in light of the availability of tax incentives and potential federal loan guarantees for renewable projects contained in the Economic Stimulus Package, PPL Energy Supply filed an application with the FERC to expand capacity at its Holtwood hydroelectric plant, which the FERC approved. The project's expected cost is $438 million. Construction continues on the project, with commercial operations scheduled to begin in 2013. At December 31, 2011, expected remaining expenditures are $196 million.

In 2009, PPL Montana received FERC approval for its request to redevelop the Rainbow hydroelectric facility at Great Falls, Montana to increase capacity by 28 MW. The project's expected cost is $207 million. Construction continues on the project, with commercial operations scheduled to begin in 2012. At December 31, 2011, expected remaining expenditures are $29 million.

PPL Energy Supply believes that it is qualified for either investment tax credits or Treasury grants for the projects at the Holtwood and Rainbow facilities. PPL Energy Supply has recognized investment tax credits and continues to evaluate whether to seek Treasury grants in lieu of the credits. During 2010, PPL Energy Supply recorded deferred investment tax credits of $52 million related to 2010 and 2009. During 2011, PPL Energy Supply recorded deferred investment tax credits of $52 million related to 2011. PPL Energy Supply anticipates recognizing an additional $54 million in tax credits for tax years 2012 and 2013. These credits reduce PPL Energy Supply's tax liability and will be amortized over the life of the related assets.

Susquehanna Uprate Project

In 2008, PPL Susquehanna received NRC approval for its request to increase the generation capacity of the Susquehanna nuclear plant. The project was completed in phases over several years. The final phase of the project, a 50 MW Unit 2 uprate, was completed in 2011. PPL Susquehanna's share of the total capacity increase was approximately 195 MW.

Bell Bend COLA

In 2008, a PPL Energy Supply subsidiary, PPL Bell Bend, LLC (PPL Bell Bend) submitted a COLA to the NRC for the proposed Bell Bend nuclear generating unit (Bell Bend) to be built adjacent to the Susquehanna plant. Also in 2008, the COLA was formally docketed and accepted for review by the NRC. PPL Bell Bend continues to respond to questions from the NRC regarding technical and site specific information provided in the initial COLA and subsequent amendments. PPL Bell Bend does not expect to complete the COLA review process with the NRC prior to 2014.

In 2008, PPL Bell Bend submitted Parts I and II of an application for a federal loan guarantee for Bell Bend to the DOE. The DOE is expected in the first half of 2012 to finalize the first nuclear loan guarantee for a project in Georgia. Eight of the ten applicants that submitted Part II applications remain active in the DOE program; however, the DOE has stated that the $18.5 billion currently appropriated to support new nuclear projects would not likely be enough for more than three projects. PPL Bell Bend submits quarterly application updates for Bell Bend to the DOE to remain active in the loan guarantee application process.

PPL Bell Bend has made no decision to proceed with construction of Bell Bend and expects that such decision will not be made for several years given the anticipated lengthy NRC license approval process. Additionally, PPL Bell Bend has announced that it does not expect to proceed with construction absent favorable economics, a joint arrangement with other interested parties and a federal loan guarantee or other acceptable financing. PPL Bell Bend is currently authorized to spend up to $162 million through 2012 on the COLA and other permitting costs (including land costs) necessary for construction. At December 31, 2011 and 2010, $131 million and $109 million of costs associated with the licensing application were capitalized and are included on the Balance Sheets in noncurrent "Other intangibles." PPL Bell Bend believes it is probable that these costs are ultimately recoverable following NRC approval of the COLA either through construction of the new nuclear unit, transfer of the COLA rights to a joint venture, or sale of the COLA rights to another party.

Susquehanna-Roseland Transmission Line *(PPL and PPL Electric)*

In 2007, PJM directed the construction of a new 150-mile, 500-kilovolt transmission line between the Susquehanna substation in Pennsylvania and the Roseland substation in New Jersey that it identified as essential to long-term reliability of the Mid-Atlantic electricity grid. PJM determined that the line is needed to prevent potential overloads that could occur on several existing transmission lines in the interconnected PJM system. PJM has directed PPL Electric to construct the portion of the Susquehanna-Roseland line in Pennsylvania and has directed Public Service Electric & Gas Company to construct the

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

portion of the line in New Jersey, in each case by June 1, 2012. PPL Electric's estimated share of the project costs is approximately $500 million.

This project is pending certain regulatory approvals. PPL Electric has identified the approximately 100-mile route for the Pennsylvania portion of the line. In February 2010, the PUC and the New Jersey Board of Public Utilities approved the project. Several parties appealed the PUC decision to the Commonwealth Court of Pennsylvania. In July 2011, the Commonwealth Court affirmed the PUC's order approving the project, and no further appeals were filed.

In addition, both companies are working with the National Park Service to obtain any approvals that may be required to route the line through the Delaware Water Gap National Recreation Area. The National Park Service record of decision for the project is scheduled to be issued on October 1, 2012. In October 2011, the project was placed on the initial list of projects for the Rapid Response Team for Transmission (RRTT), an initiative of the White House to facilitate coordination among federal agencies to improve the overall quality and timeliness of electric transmission infrastructure permitting, review and consultation. The RRTT has reaffirmed the issuance date of the National Park Service record of decision for the project. The National Park Service has stated that it will announce the preferred route for the transmission line in March 2012 with an expected Record of Decision in October 2012 . PPL Electric cannot predict the ultimate outcome or timing of the National Park Service approval.

PPL Electric anticipates the delays in the approval process will postpone the in-service date to 2015. In 2011, PJM issued an updated assessment of the new line within its 2010 Regional Transmission Expansion Plan, which confirms that the line is needed to prevent overloads on other power lines in the region. PJM has developed a strategy to manage potential reliability problems until the line is built. PPL Electric cannot predict what action, if any, PJM might take in the event of a further delay to its scheduled in-service date for the new line.

9. Discontinued Operations

(PPL and PPL Energy Supply)

Sale of Certain Non-core Generation Facilities

In March 2011, PPL Energy Supply subsidiaries completed the sale of their ownership interests in certain non-core generation facilities, which were included in the Supply segment, for $381 million. The transaction included the natural gas-fired facilities in Wallingford, Connecticut and University Park, Illinois and an equity interest in Safe Harbor Water Power Corporation, which owns a hydroelectric facility in Conestoga, Pennsylvania.

These non-core generation facilities met the held for sale criteria in the third quarter of 2010. As a result, assets with a carrying amount of $473 million were written down to their estimated fair value (less cost to sell) of $377 million at September 30, 2010, resulting in a pre-tax impairment charge of $96 million ($58 million after tax). In addition, $5 million ($4 million after tax) of allocated goodwill was written off in the third quarter of 2010. During the fourth quarter of 2010 and in connection with the completion of the sale, in 2011, PPL Energy Supply recorded insignificant losses. These charges are included in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income.

Following are the components of Discontinued Operations in the Statements of Income.

	2011	2010	2009
Operating revenues	$ 19	$ 113	$ 106
Operating expenses (a)	11	156	42
Operating income (loss)	8	(43)	64
Other income (expense) - net		2	2
Interest expense (b)	3	11	9
Income (loss) before income taxes	5	(52)	57
Income tax expense (benefit)	3	(18)	24
Income (Loss) from Discontinued Operations	$ 2	$ (34)	$ 33

(a) 2010 includes the impairments to the carrying value of the non-core generation facilities and the write-off of allocated goodwill.
(b) Represents allocated interest expense based upon debt attributable to the generation facilities sold.

Upon completion of the sale, assets primarily consisting of $357 million of PP&E and a $14 million equity method investment, which were classified as held for sale at December 31, 2010, were removed from the Balance Sheet.

Sale of Long Island Generation Business

In February 2010, PPL Energy Supply subsidiaries completed the sale of the Long Island generation business, which was included in the Supply segment. The definitive sales agreement included provisions that reduced the $135 million purchase price monthly, commencing September 1, 2009. After adjusting for these price-reduction provisions, proceeds from the sale approximated $124 million.

In the second quarter of 2009, the Long Island generation business met the held for sale criteria. As a result, at June 30, 2009, net assets held for sale were written down to their estimated fair value less cost to sell, resulting in a pre-tax impairment charge of $52 million ($34 million after tax). At both September 30 and December 31, 2009, the estimated fair value (less cost to sell) was remeasured and additional impairments totaling $10 million ($3 million after tax) were recorded. In 2010 PPL Energy Supply recorded an insignificant loss due to the price-reduction provisions. The losses recognized in the third and fourth quarters of 2009 and in 2010 did not significantly impact earnings, as such amounts were substantially offset by tolling revenues from the Long Island generation assets during the same periods. In addition, an insignificant amount of goodwill allocated to this business was written off in 2009. These amounts are included in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income. There was no significant impact on earnings in 2010 from the operation of this business or as a result of this sale.

The tolling agreements related to these plants were transferred to the new owner upon completion of the sale.

Following are the components of Discontinued Operations in the Statements of Income.

	2009
Operating revenues	$ 24
Operating expenses (a)	73
Operating income (loss)	(49)
Interest expense (b)	4
Income (loss) before income taxes	(53)
Income tax expense (benefit)	(20)
Income (Loss) from Discontinued Operations	$ (33)

(a) Includes impairment charges.
(b) Represents allocated interest expense based upon debt attributable to the Long Island generation business sold.

Sale of Maine Hydroelectric Generation Business

Sale of the Remaining Maine Hydroelectric Generation Facilities

In December 2010, a PPL Energy Supply subsidiary completed the sale of its remaining three hydroelectric facilities in Maine, which were included in the Supply segment, for $24 million. As a result of the sale, PPL Energy Supply recorded a gain of $11 million ($7 million after tax), reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the 2010 Statement of Income.

Sale of the Majority of Maine Hydroelectric Generation Business

In 2009, a PPL Energy Supply subsidiary completed the sale of the majority of its Maine hydroelectric generation business, which was included in the Supply segment, for $81 million in cash, adjusted for working capital. The assets sold in this transaction included five hydroelectric facilities and a 50% equity interest in a sixth hydroelectric facility, which had been accounted for as an equity investment, together with rights to increase energy output at these facilities upon completion of the sale of the PPL Energy Supply subsidiary's three other hydroelectric facilities in Maine (see "Sale of the Remaining Maine Hydroelectric Generation Business" above). As a result of the sale of the majority of the Maine hydroelectric generation business, PPL Energy Supply recorded a gain of $38 million ($22 million after tax), reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the 2009 Statement of Income. Additionally, in December 2010, the PPL Energy Supply subsidiary received $14 million in contingent consideration, which was tied to its completion of the sale of the three other hydroelectric facilities noted above. PPL Energy Supply accordingly recorded a gain of $14 million ($8 million after tax), reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the 2010 Statement of Income.

Following are the components of Discontinued Operations in the Statements of Income.

Past financial performance is no guarantee of future results.

	2010	2009
Operating revenues		$ 5
Operating expenses (a)	$ (25)	(34)
Operating income	25	39
Other income (expense) - net		3
Interest expense (b)		1
Income before income taxes	25	41
Income tax expense	10	17
Income from Discontinued Operations	$ 15	$ 24

(a) Includes the gains recorded on the sales.
(b) Represents allocated interest expense based upon debt attributable to the Maine hydroelectric generation business sold.

Sale of Latin American Businesses

In 2007, PPL Energy Supply completed the sale of its regulated electricity delivery businesses in Chile, El Salvador and Bolivia, which were included in the International Regulated segment. In 2009, PPL Energy Supply identified a correction to the previously computed tax bases of the Latin American businesses. The most significant adjustment related to the sale of the El Salvadoran business and was largely due to returns of capital in certain prior years that had not been reflected in the calculated tax basis. As a result, PPL Energy Supply recorded $24 million of additional income tax expense in 2009, which is reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the 2009 Statement of Income. The additional expense is not considered by management to be material to the 2009 financial statements.

Distribution of Membership Interest in PPL Global to Parent *(PPL Energy Supply)*

In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global, which represented the entire International Regulated segment, to PPL Energy Supply's parent, PPL Energy Funding. The distribution was made based on the book value of the assets and liabilities of PPL Global with financial effect as of January 1, 2011, and no gains or losses were recognized on the distribution. The purpose of the distribution was to better align PPL's organizational structure with the manner in which it manages these businesses, separating the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business. Following the distribution, PPL Energy Supply operates in a single reportable segment, and through its subsidiaries is primarily engaged in the generation and marketing of power, primarily in the northeastern and northwestern U.S.

Following are the components of Discontinued Operations in the Statements of Income.

	2010	2009
Operating revenues	$ 761	$ 716
Operating expenses	368	328
Operating income	393	388
Other income (expense) - net	4	(11)
Interest expense (a)	135	87
Income before income taxes	262	290
Income tax expense (b)	1	47
Income (Loss) from Discontinued Operations	$ 261	$ 243

(a) No interest was allocated, as PPL Global was sufficiently capitalized.
(b) 2009 includes the impact of the Latin American adjustments discussed above.

In connection with the distribution, the following assets and liabilities were removed from PPL Energy Supply's Balance Sheet in the first quarter of 2011. Except for "Cash and cash equivalents," which has been reflected as a financing activity, the remaining distribution represents a non-cash transaction excluded from PPL Energy Supply's 2011 Statement of Cash Flows.

WKE

(PPL and LKE)

WKE had a 25-year lease for and operated nine generating facilities of BREC, and a coal-fired generating facility owned by the City of Henderson, Kentucky.

In 2007, WKE entered into an agreement to terminate the lease, which closed in 2009, prior to PPL acquiring LKE. As part of the lease termination, LKE was obligated to pay a former customer, an aluminum smelter, an aluminum production payment in lieu of a lump-sum cash consent payment, as well as the difference between the electricity prices charged by WKE under the previous long-term sales contract and the electricity prices charged by the aluminum smelter's current electricity supplier. This obligation was partially mitigated by the opportunity to make off-system sales, when economic, for the contractual demand not used by the aluminum smelter. In addition, the total amount of the obligation to this smelter was limited to $82 million; any amount paid by LKE over the limit has been recorded as an interest-bearing receivable and is required to be repaid (plus interest) only if certain conditions occur by 2028. Such exposure expired in January 2011. In addition, because the former customer posted a letter of credit supporting payment to its current electricity supplier, LKE reversed a portion of the accrual associated with its guarantee of payment by the former customer. Also, WKE had a contingent obligation to another aluminum smelter, also a former customer, to make an escrow payment of approximately $4 million, which became payable and was included in the liability at December 31, 2010, and paid in January 2011. The income statement impacts are included in the Kentucky Regulated segment for PPL and are reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income. See Note 15 for additional information related to the termination of the lease. The results of operations for the 2011 and 2010 Successor periods were insignificant.

(LKE)

Following are the components of Discontinued Operations in LKE's Statements of Income.

	Predecessor	
	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Operating revenues		$ 128
Loss before taxes	$ (7)	$ (222)
Income tax benefit	3	79
Loss from discontinued operations	$ (4)	$ (143)
Gain (loss) on disposal of discontinued operations before tax	5	(114)
Income tax benefit (expense) from disposal of discontinued operations	(2)	45
Gain (loss) on disposal of discontinued operations	$ 3	$ (69)

Argentine Gas Distribution

At December 31, 2009, LKE owned interests in two gas distribution companies in Argentina: 45.9% of Distribuidora de Gas Del Centro S.A. (Centro) and 14.4% of Distribuidora de Gas Cuyana S.A. (Cuyana). These two entities served a combined customer base of approximately one million customers. The Centro investment was consolidated due to LKE's majority ownership in the holding company of Centro. The Cuyana investment was accounted for using the equity method due to the ownership influence LKE exerted on the businesses.

In November 2009, subsidiaries of LKE entered into agreements to sell their direct and indirect interests in Centro and Cuyana to E.ON Spain and a subsidiary, both affiliates of E.ON. On January 1, 2010, the parties completed the transfer of the interests for a sale price of $35 million. In December 2009, LKE recorded an impairment loss of $12 million. The impairment loss represented the difference between the carrying values of LKE's interests in Centro and Cuyana and the sales price. LKE classified the results of operations of the Argentine gas distribution companies, including the impairment loss, as discontinued operations for all periods presented effective December 31, 2009. In connection with the reorganization transaction, E.ON Spain assumed rights and obligations relating to claims and liabilities associated with the former Argentine businesses or indemnified LKE with respect to such matters.

Following are the components of Discontinued Operations in LKE's Statement of Income.

	Predecessor Year Ended December 31, 2009
Operating revenues	$ 60
Income tax expense	(8)
Noncontrolling interest	(5)
Loss from discontinued operations	$ (13)

10. Business Acquisitions

Acquisition of WPD Midlands *(PPL)*

On April 1, 2011, PPL, through its indirect, wholly owned subsidiary PPL WEM, completed its acquisition of all of the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. The consideration for the acquisition consisted of cash of $5.8 billion, including the repayment of $1.7 billion of affiliate indebtedness owed to subsidiaries of E.ON AG, and approximately $800 million of long-term debt assumed through consolidation. WPD Midlands operates two regulated distribution networks that serve five million end-users in the Midlands area of England. The acquisition increases the regulated portion of PPL's business and enhances rate-regulated growth opportunities as the regulated businesses make investments to improve infrastructure and customer reliability. Further, since the service territories of WPD (South Wales), WPD (South West) and WPD Midlands are contiguous, cost savings, efficiencies and other benefits are expected from the combined operations of these entities.

The fair value of the consideration paid for Central Networks was as follows (in billions).

Aggregate enterprise consideration	$ 6.6
Less: fair value of long-term debt outstanding assumed through consolidation	0.8
Total cash consideration paid	5.8
Less: funds used to repay pre-acquisition affiliate indebtedness	1.7
Cash consideration paid for Central Networks' outstanding ordinary share capital	$ 4.1

The total cash consideration paid was primarily funded by borrowings under the 2011 Bridge Facility on the date of acquisition. Subsequently, PPL repaid those borrowings in 2011 using proceeds from the permanent financing, including issuances of common stock and 2011 Equity Units, as well as proceeds from the issuance of debt by PPL WEM, WPD (East Midlands) and WPD (West Midlands). See Note 7 for additional information on the 2011 Bridge Facility and permanent financing.

Source: KENTUCKY UTILITIES CO, 10-K, February 28, 2012 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Purchase Price Allocation

The following table summarizes (in billions) the allocation of the purchase price of WPD Midlands to the fair value of the major classes of assets acquired and liabilities assumed.

Current assets (a)	$ 0.2
PP&E	4.9
Intangible assets	0.1
Other noncurrent assets	0.1
Current liabilities (b)	(0.4)
PPL WEM affiliate indebtedness	(1.7)
Long-term debt (current and noncurrent) (b)	(0.8)
Other noncurrent liabilities (b)	(0.7)
Net identifiable assets acquired	1.7
Goodwill	2.4
Net assets acquired	$ 4.1

(a) Includes gross contractual amount of the accounts receivable acquired of $122 million, which approximates fair value.
(b) Represents non-cash activity excluded from the 2011 Statement of Cash Flows.

The purchase price allocation resulted in goodwill of $2.4 billion that was assigned to the International Regulated segment. The goodwill is attributable to the expected continued growth of a rate-regulated business with a defined service area operating under a constructive regulatory framework, expected cost savings, efficiencies and other benefits resulting from a contiguous service area with WPD (South West) and WPD (South Wales), as well as the ability to leverage WPD (South West)'s and WPD (South Wales)'s existing management team's high level of performance in capital cost efficiency, system reliability and customer service. The goodwill is not deductible for U.K. income tax purposes.

Separation Benefits - International Regulated Segment

In connection with the acquisition, PPL completed a reorganization designed to transition WPD Midlands from a functional structure to a regional structure that will require a smaller combined support structure, reduce duplication and implement more efficient procedures. Approximately 740 employees of WPD Midlands have or will receive separation benefits from the companies as a result of the reorganization through the end of 2012.

The separation benefits, before income taxes, associated with the reorganization are as follows.

Severance compensation	$ 58
Early retirement deficiency costs (ERDC) under applicable pension plans	45
Outplacement services	1
Total separation benefits	$ 104

In connection with the reorganization, WPD Midlands recorded $93 million of the total expected separation benefits in 2011, of which $48 million relates to severance compensation and $45 million relates to ERDC. Based on the expected timing of when employees will separate from the companies, WPD Midlands expects to record the remaining portion of severance compensation in 2012. The separation benefits recorded in 2011 are included in "Other operation and maintenance" on the Statement of Income. The accrued severance compensation is reflected in "Other current liabilities" and the ERDC reduced "Other noncurrent assets" on the Balance Sheet at December 31, 2011.

The carrying amount of accrued severance was as follows.

Severance compensation	$ 48
Severance paid (a)	(27)
Accrued severance at December 31, 2011	$ 21

(a) Payments to approximately 350 employees separated.

In addition to the reorganization costs noted above, an additional $9 million was recorded in 2011 for ERDC payable under applicable pension plans and severance compensation for certain employees who separated from the WPD Midlands companies, but were not part of the reorganization. These separation benefits are also included in "Other operation and maintenance" on the Statement of Income.

Pro forma Information

WPD Midlands' operating revenues, net income and net income excluding nonrecurring acquisition-related adjustments (which are recorded on a one-month lag) included in PPL's 2011 Statement of Income and included in the International Regulated segment, are as follows.

Operating revenues	$ 790
Net Income	137
Net Income - excluding nonrecurring acquisition-related adjustments	281

The pro forma operating revenues and net income attributable to PPL, which include LKE as if the acquisition had occurred January 1, 2009 and WPD Midlands as if the acquisition had occurred January 1, 2010, are as follows.

	2011	2010
Operating Revenues - PPL consolidated pro forma (unaudited)	$ 13,140	$ 11,850
Net Income Attributable to PPL - PPL consolidated pro forma (unaudited)	1,800	1,462

The pro forma financial information presented above has been derived from the historical consolidated financial statements of PPL and LKE, which was acquired on November 1, 2010, and from the historical combined financial statements of WPD Midlands. Income (loss) from discontinued operations (net of income taxes), which was not significant for 2011 and was $(18) million for 2010, were excluded from the pro forma amounts above.

The pro forma adjustments include adjustments to depreciation, net periodic pension costs, interest expense, nonrecurring adjustments and the related income tax effects. Nonrecurring adjustments include the following pre-tax credits (expenses).

	Income Statement Line Item	2011	2010
WPD Midlands acquisition			
2011 Bridge Facility costs	Interest Expense	$ (44)	
Foreign currency loss on 2011 Bridge Facility	Other Income (Expense) - net	(57)	
Net hedge gains	Other Income (Expense) - net	55	
Hedge ineffectiveness	Interest Expense	(12)	
U.K. stamp duty tax	Other Income (Expense) - net	(21)	
Separation benefits	Other operation and maintenance	(102)	
Other acquisition-related costs	(a)	(77)	
LKE acquisition			
2010 Bridge Facility costs	Interest Expense		$ (80)
Other acquisition-related costs	Other Income (Expense) - net		(31)

(a) Primarily includes advisory, accounting and legal fees recorded in "Other Income (Expense) - net" and contract termination costs, rebranding costs and relocation costs recorded in "Other operation and maintenance."

Acquisition of LKE

(PPL)

On November 1, 2010, PPL completed the acquisition of all of the limited liability company interests of E.ON U.S. LLC from a wholly owned subsidiary of E.ON AG. Upon completion of the acquisition, E.ON U.S. LLC was renamed LG&E and KU Energy LLC (LKE). LKE is a holding company with regulated utility operations conducted through its subsidiaries, LG&E and KU. The acquisition reapportioned the mix of PPL's regulated and competitive businesses by increasing the regulated portion of its business, strengthens PPL's credit profile and enhances rate-regulated growth opportunities as the regulated businesses make investments to improve infrastructure and customer reliability.
