KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 1

Responding Witness: Robert M. Conroy

Q-1. How many different types of customer rate classes does the LFUCG currently make payments to KU under? For each type of class, please provide the following information:

- (a) The type of customer rate class;
- (b) The number of LFUCG accounts in each such class;
- (c) The total amount paid by the LFUCG for each such class during the last 12 month period; and
- (d) The total net projected impact for each such class under the proposed rate increase.

A-1. a.- c: See below.

Customer Rate Class	Number of Accounts	2014 Revenue
General Service Single Phase	248	\$ 538,964.27
General Service Three Phase	125	\$ 658,401.95
Lighting Energy Service	1	\$ 24.83
Power Service - Secondary Pf Adj	2	\$ 275,173.11
Power Service Secondary	31	\$ 1,035,700.04
Residential Service	47	\$ 5,197.42
Residential Service - All Electric	11	\$ 11,941.12
Street Lights (combined for all types)	309	\$ 5,315,989.69
Time-of-Day Secondary Service	13	\$ 1,651,057.34
Time-of-Day Service - Primary	2	\$ 1,340,919.03
Traffic Energy Service	436	\$ 92,560.00
Traffic Energy Service - WiFi Receiver	272	\$ 25,325.92
	1,497	\$10,951,254.72

- d. KU has not performed the requested analysis on a customer rate class basis. The requested information on a rate schedule basis for KU can be found in Tab 65 Schedules M-2.1, 2.2, and 2.3 of the filing requirements.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 2

Responding Witness: Robert M. Conroy

- Q-2. For each separate LFUCG account please provide a detailed analysis showing the impact of the proposed rate versus the existing rate using the most recent 12 month actual usage and billing data. Please also provide a detailed explanation of the formula that was used to obtain this information.
- A-2. KU has not performed the requested analysis on a customer-specific basis. The requested information on a rate schedule basis for KU can be found in Tab 65 Schedules M-2.1, 2.2, and 2.3 of the filing requirements.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 3

Responding Witness: Edwin R. "Ed" Staton

- Q-3. Can KU's ratepayers expect any enhancement over the current existing level of service as a result of the proposed rate increase? If so, please provide a detailed response that includes the specific benefit or benefits to be provided to each particular customer rate class.
- (a) More specifically, will the LFUCG obtain any additional benefit or benefits (level of maintenance or otherwise) as a result of the proposed increase? If so, please provide a detailed response that includes the specific benefit or benefits to be provided to each particular customer rate class.

A-3. Response to 3 and 3(a):

It is essential that KU achieve and maintain a strong financial condition to allow it to continue to provide safe, reliable service to its customers. KU has made substantial investments in its utility infrastructure during the last several years and despite efforts to offset or absorb increased costs, revenues must be increased to reflect the cost of providing service and to continue to effectively meet its service obligation both now and in the future. As a result of the requested rate increase, KU expects to be able to continue to provide safe, reliable service to its customers at levels consistent with historical performance.

Please see the testimony of Paul Thompson for a detailed discussion of KU's investments in facilities and efforts to control costs since the last rate case.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 4

Responding Witness: Edwin R. "Ed" Staton

- Q-4. Does KU have an estimate or general or specific information on how much revenue is derived from Fayette County customers? If so, please provide by customer class for each of the last 3 years as well as a comparison of the percentage of revenue that this constitutes in relation to all revenues.
- A-4. KU does not have a business reason to obtain or keep the requested customer information, and therefore cannot provide the requested response.

Each KU rate schedule applies equally to the entire 77-county KU service territory; KU does not have county-specific rates.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 5

Responding Witness: Robert M. Conroy

- Q-5. How many additional customers (and of which particular customer rate class) does KU anticipate adding within Fayette County over the next 5 years? What is the anticipated level of additional revenue to KU as result of the addition of these customers?
- A-5. KU does not estimate additional customers or revenue by specific county.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 6

Responding Witness: Robert M. Conroy

Q-6. Does the LFUCG's franchise fee apply to all tariffs for services provided in Fayette County? If not please identify each tariff for which the franchise fee does not apply.

A-6. The franchise fees apply to all tariffs with the exception of the following:

- Cable Television Attachment Charges
- Special Charges, which includes returned payment, meter test, disconnect/reconnect service, meter pulse, and meter data processing charges
- Curtailable Service Rider 10
- Curtailable Service Rider 30
- Small Capacity Cogeneration Qualifying Facilities
- Large Capacity Cogeneration Qualifying Facilities
- Net Metering
- Excess Facilities
- Redundant Capacity
- Supplemental/Stand-by Service
- Intermittent Load Rider
- Temporary/Seasonal Service Rider
- Green Energy Riders
- Economic Development Rider
- Late Payment Charges
- Line Extension
- Home Energy Assistance Program

In addition, pursuant to the franchise agreement with LFUCG, the franchise fee is not applied to those public street lights for which LFUCG is the customer.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 7

Responding Witness: Paul Gregory "Greg" Thomas

Q-7. Please provide the total number of utility poles KU has in Fayette County and the number of these poles that are located in the public rights-of-way.

A-7. KU owns 62,436 poles in Fayette County.

KU does not track the number of poles located in the public rights-of-way.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 8

Responding Witness: Robert M. Conroy / Dr. Martin J. Blake

Q-8. Does KU derive any rental or other income related to the use of or attachment to utility poles or other fixtures located within the public right-of-way? If so, please provide a detailed breakdown of the annual rents or other income received from any third parties attributable to these types of properties. If possible, further provide a breakdown within Fayette County, Kentucky.

a. Is this income considered revenue by KU; and if so, how is it allocated?

A-8. Yes. KU receives rental income from third party attachments to its poles, whether the poles are located within the public right-of-way or are located elsewhere. KU does not track pole attachment revenue by the location of the poles, and so does not have the detailed information requested.

a. Yes. Revenues received from pole attachments serve as a credit towards the cost of providing service to customers.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 9

Responding Witness: Edwin R. "Ed" Staton

Q-9. Would KU be amenable to a proposal from LFUCG as to newly installed street lights which would provide for either: (a) lights purchased, owned and maintained by LFUCG, or (b) lights purchased and owned by LFUCG but maintained by KU?

A-9.

- (a) KU offers the Lighting Energy Services ("LE") tariff which allows LFUCG to purchase and to install the entire lighting unit; pole, fixture and accessories. Under that tariff, LFUCG would only be charged for the kWh consumed.
- (b) No. KU's standard practice is to not allow mixed-use or mixed-owned facilities between the Company and its customers. Obvious reasons for this include potential safety concerns and administrative burdens.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 10

Responding Witness: Edwin R. "Ed" Staton

Q-10. Would KU be amenable to a proposal from LFUCG to acquire its existing street lights?

A-10. KU is always willing to discuss any needs, concerns or questions from its customers.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 11

Responding Witness: Paul Gregory "Greg" Thomas

- Q-11. Please provide the number (quantity), rate type, type description, and location (by street address) of each street light located in Fayette County, Kentucky for which the LFUCG currently pays a monthly tariff.
- A-11. The number of lights by size, type, and description is shown in the table below through November, 2014. See the attachment for Street addresses applicable to each light.

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 13

Responding Witness: Paul Gregory "Greg" Thomas

- Q-13. How many new public street lights were installed in Fayette County for each of the last 3 years? Please also indicate the types of lights installed and the number of these lights which replaced previously existing street lights.
- A-13. See the requested information in the table below.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 14

Responding Witness: Paul Gregory "Greg" Thomas

- Q-14. Please provide both the number and type of public street lights in Fayette County for which service or maintenance was performed in each of the last 3 years and the same information system-wide.
- a. Please provide the basis for generating the above repair or maintenance order (i.e., referral from 311, customer complaint, KU for each of the above.
- A-14. KU does not track this information by type or county. Lexington Crew Center and KU system-wide repair orders for street and other outdoor lights during the periods in question are in the table below.

	2014	2013	2012
Lexington	4,055	4,680	4,095
System-wide	19,055	20,035	19,722

- a. KU does not track repairs by reporting source. Refer to the detailed response to Question No. 16 for the basis of KU's policies and practices regarding repairs and maintenance. Street light repairs that were referred by Lexcall/311 are shown in the table below.

	2014	2013	2012
Hotline Calls	1,119	1,271	934

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 15

Responding Witness: Paul Gregory "Greg" Thomas

- Q-15. How many existing street lights are scheduled (or anticipated) to be replaced by KU in Fayette County over the next 5 years for which the LFUCG currently and/or in the future will pay a monthly tariff? Please provide the quantity of each type of light being removed and the quantity and type of light that will replace it.
- A-15. KU has no scheduled replacements of any current LFUCG street lighting fixtures.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 16

Responding Witness: Paul Gregory "Greg" Thomas

Q-16. Please explain in detail KU's current policies, procedures, practices, and/or guidelines for maintaining street lights in Fayette County and provide copies of the same.

- (a) Does KU regularly inspect individual street lights or the collective street lighting in Fayette County? Do these inspections take place only upon the receipt by KU of a complaint regarding a particular street light?
- (b) What is the average response time to replace a non-working street light in Fayette County?
- (c) Does this information differ depending upon the type of street light? If so, please provide a detailed explanation.

A-16. KU maintains its street lights and other lighting products consistent with the original KU installation standards, and in compliance with 807 KAR 5:041. Electric: Section 2 – General Requirements, Section 3 – Acceptable Standards, and Section 5 – Maintenance or Continuity of Service. A copy of these installation standards is attached.

- a. KU conducts proactive lighting patrols as part of its normal operations. These night-time patrols are integrated into KU's normally scheduled operations for outage response activities. When not responding to outages, KU's outage technicians, who are on duty 24 hours a day, 7 days a week, undertake lighting patrol and maintenance activities, among other duties that they perform daily.

STREET LIGHT PATROL/REPAIR SCHEDULE

In addition to needed street light repairs reported via the public, LFUCG, and internally, concerted patrol and repairs are performed on the following annual schedule.

MONTH	ZONE	ZIP CODE
JAN	1	40507
JAN	2	40508
FEB	3	40505
MAR	4	40502
APR	5	40511
MAY	6	40503
JUN	7	40509
JUL	8	40504
AUG	9	40517
SEPT	10	40516
SEPT	11	40513
OCT	12	40515
NOV	13	40514
DEC	14	40510

Arterials are scheduled for patrol semi-annually in May and October to identify and repair those lights along the following routes:

Man-O-War Blvd – New Circle Road

Versailles Road – Winchester Road

Harrodsburg Road – Paris Pike

Nicholasville Road – Newtown Pike

Tates Creek Road – Georgetown Road

Richmond Road – Leestown Road

KU also issues repair orders in response to light outages reported by KU employees and contractors, customers, LFUCG personnel, police, fire departments, and the general public. Outages can be reported via:

1. Website: <https://lge-ku.com/customer-service/report-streetlight-outage>

2. Residential Call Center: 1-800-981-0600

3. LexCall

Lexcall is a process for the reporting of street light outages through LFUCG's 311 call in reporting system. Daily outages are emailed to KU and then entered into the work management system from which a repair order is generated.

Relevant repair metrics are provided to LFUCG quarterly.

b. In 2014, when repairs could be completed by component replacement (bulb and/or photovoltaic control replacement), KU's average street light repair took 1.58 days.

c. No.

The Street Lighting Section of the Construction Standards Handbook is organized into three general areas, as follows:

Design

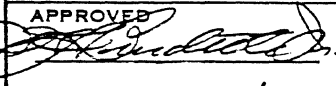

The most widely accepted reference for street light theory and design is the STREET LIGHTING MANUAL, published by the Edison Electric Institute. Our Company's guidelines for street lighting design have been based largely on material from this book: we have included such topics as comparison of light sources, selection of light distribution patterns, selection of luminaire mounting height & spacing of luminaires, and description of several types of control circuits.

Construction

When the basic design of a street light system has been decided upon, attention must be given to construction techniques. The construction drawings represent the accumulated experience of the Company's operating personnel. Drawings are provided for the variety of situations which commonly arise: standard overhead construction, ornamental overhead, underground construction, and customer outdoor lights.

Material

The items of material which appear in the Design and Construction pages of the Street Lighting Section are listed alphabetically in the remaining sheets of the Section. Information is given on material description, manufacturer, catalog number, and purchase price estimate; it is hoped that this information will serve as a guide in the preparation of purchase requisitions. Since this data is subject to frequent change, these sheets can be reprinted without the necessity for revising other drawings in the Street Lighting Section.

STREET / PRIVATE OUTDOOR LIGHTING
CONSTRUCTION MATERIAL LIST

Items included on the Street / Private Outdoor Lighting Material List have been approved for use in the Kentucky Utilities Company and Old Dominion Power Company properties and are in accord with construction standards approved to date.

This list has been tabulated in a convenient and usable form and includes all information necessary for correctly preparing requisitions. Its purpose is to assist in selecting construction material that has been tested, examined and approved as to quality and cost and which will provide the fewest stocking and handling problems. Changes will be made as required and a complete new list will be issued as the need arises.

There are a few items that have not been included in this list, such as Experimental and Special Use Items (see A-10-8.01), new items which were not available when this list was published, and of course, items that do not fulfill our construction requirements. If items are requisitioned which do not appear on this list, a complete description and catalog information must be given. Some note of comment should be shown on the requisition or attached to it explaining the reason for ordering other than approved material.

High Pressure Sodium

The high pressure sodium (HPS) Lamp is the Company's most efficient light source. An HPS lamp produces approximately 125 lumens per watt. The HPS lamp produces light by passing a current through a gas and is a member of the high intensity discharge (HID) family of lights. A ballast transformer is required to provide the correct starting and operating voltage. The Company offers the 4000, 5800, 9500, 22000, 50000 approximate lumen HPS lamps for street lighting. The HPS lamp has an average rated life of 24,000 hours and requires 3 minutes to reach full light output.

Mercury Vapor

The mercury vapor lamp belongs to the same HID family of lamps as noted above in which light is produced by the passage of an electric current through a vapor or gas. The sizes of mercury vapor lamps provided by our Company are 3500, 7000, 10000 and 20000 approximate lumens. The rated life of a mercury vapor lamp is 24,000 hours, and its efficiency is about 60 lumens per watt. A ballast transformer is required to provide the correct starting and operating voltage. Mercury lamps require approximately 5 minutes to reach full light output.

Incandescent

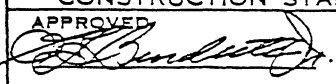

The incandescent, or filament, lamp produces light by virtue of a wire or filament heated to incandescence by the flow of electric current through it. Our Company no longer offers incandescent street lights in the following nominal sizes: 1000, 2500, 4000, 6000 and 10000 lumens. The average rated life of incandescent lamps is 6000 hours, and their efficiency in converting electrical energy into light is very low at approximately 20 lumens per watt. Incandescent light sources do not require any auxiliary equipment, such as ballasts. However, they are quite sensitive to variations in voltage. For example, an operating voltage of 10% above lamp rating would result in a loss of 70% of the normal lamp life.

Incandescent lights were used primarily in residential and rural areas, where traffic volume is relatively low.

Other Light Sources

Fluorescent lamps create light by the electrical stimulation of phosphors coated on the inside of a glass tube. Although popular for indoor lighting, fluorescent light has not proved to be economical for street lighting. Fluorescent street lighting is no longer offered by our Company.

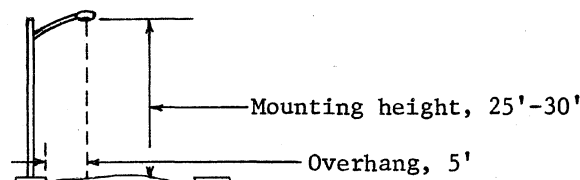

Several street lighting sources are currently available, such as metal halide and low pressure sodium, both being vapor discharge lamps. Until these sources become economically competitive and overcome their other shortcomings, they will not be offered by our Company.

CONSTRUCTION STANDARD - KENTUCKY UTILITIES CO. & OLD DOMINION POWER CO.			
APPROVED 	REVISED	STREET LIGHTING DESIGN LIGHT SOURCES	SCALE
DATE 9-26-83			DRAWING NO. A-9-2.0

Mounting Height

The mounting height of a luminaire is the distance from the surface of the road to the center of the light source. A luminaire should be mounted high enough to minimize glare to oncoming vehicles, and to provide uniform distribution of illumination on the roadway surface. The following table gives suggested mounting heights.

<u>Lamp Lumens</u>	<u>Mounting Height</u>
3500-7000	25'
9500-50000	30'

Spacing

The spacing of luminaires is a function of the desired light level on the pavement surface. The information given below has been condensed from application data provided by manufacturers, and from industry standards. It reflects the need for higher illumination levels where pedestrian and vehicle traffic is heavier.

<u>Type of Area</u>	<u>Suggested Luminaire</u>	<u>Spacing</u>
Residential	3500 L MV	150'-260'
	4000 L HPS	
	5800 L HPS	
	7000 L MV	
Collectors	9500 L HPS	110'-150'
	10000 L MV	
Downtown	20000 L MV	70'-150'
	22000 L HPS	
	50000 L HPS	

Brackets

In selecting a bracket length, the objective is to place the luminaire above the pavement, rather than the shoulder of the roadway. In most areas, a 6 ft. bracket will do the job; however, in some locations, where the supporting pole is farther back, it may be necessary to use longer brackets. In any case, the luminaire should not extend more than 5 ft. over the edge of the pavement.

CONSTRUCTION STANDARD - KENTUCKY UTILITIES CO. & OLD DOMINION POWER CO.					
APPROVED  DATE 9-26-83	REVISED <table border="1" style="width: 100%; height: 30px;"> <tr><td> </td><td> </td></tr> </table>			Street Lighting Design LUMINAIRE PLACEMENT	SCALE _____ DRAWING NO. A-9-3.0

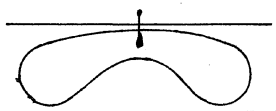

Street lighting luminaires are capable of spreading light into several distribution patterns; the design of a street lighting system includes the selection of one of these patterns. On this page are shown the several light patterns commonly used by our Company, with a description of applications. Moving the lamp socket changes the pattern.

Type II

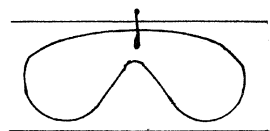

Type II - This distribution is generally applicable to luminaires located at or near the side of relatively narrow roadways.

Type III

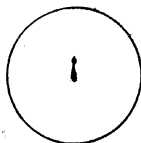

Type III - This type of distribution is intended for luminaires mounted at or near the side of medium-width roadways.

Type IV

Type IV - This type of distribution is intended for side-of-road mounting and is generally used on wide roadways.

Type V

Type V - This type of distribution has equal light output at all angles, and is used by our Company for all private outdoor light applications.

Due to varying soil conditions encountered in the field, there are two (2) manners in which U.G. street light cables can be installed. The Company representative (engineer, foreman, inspector, etc.) will determine which practice must be used in each area dependent upon local conditions.

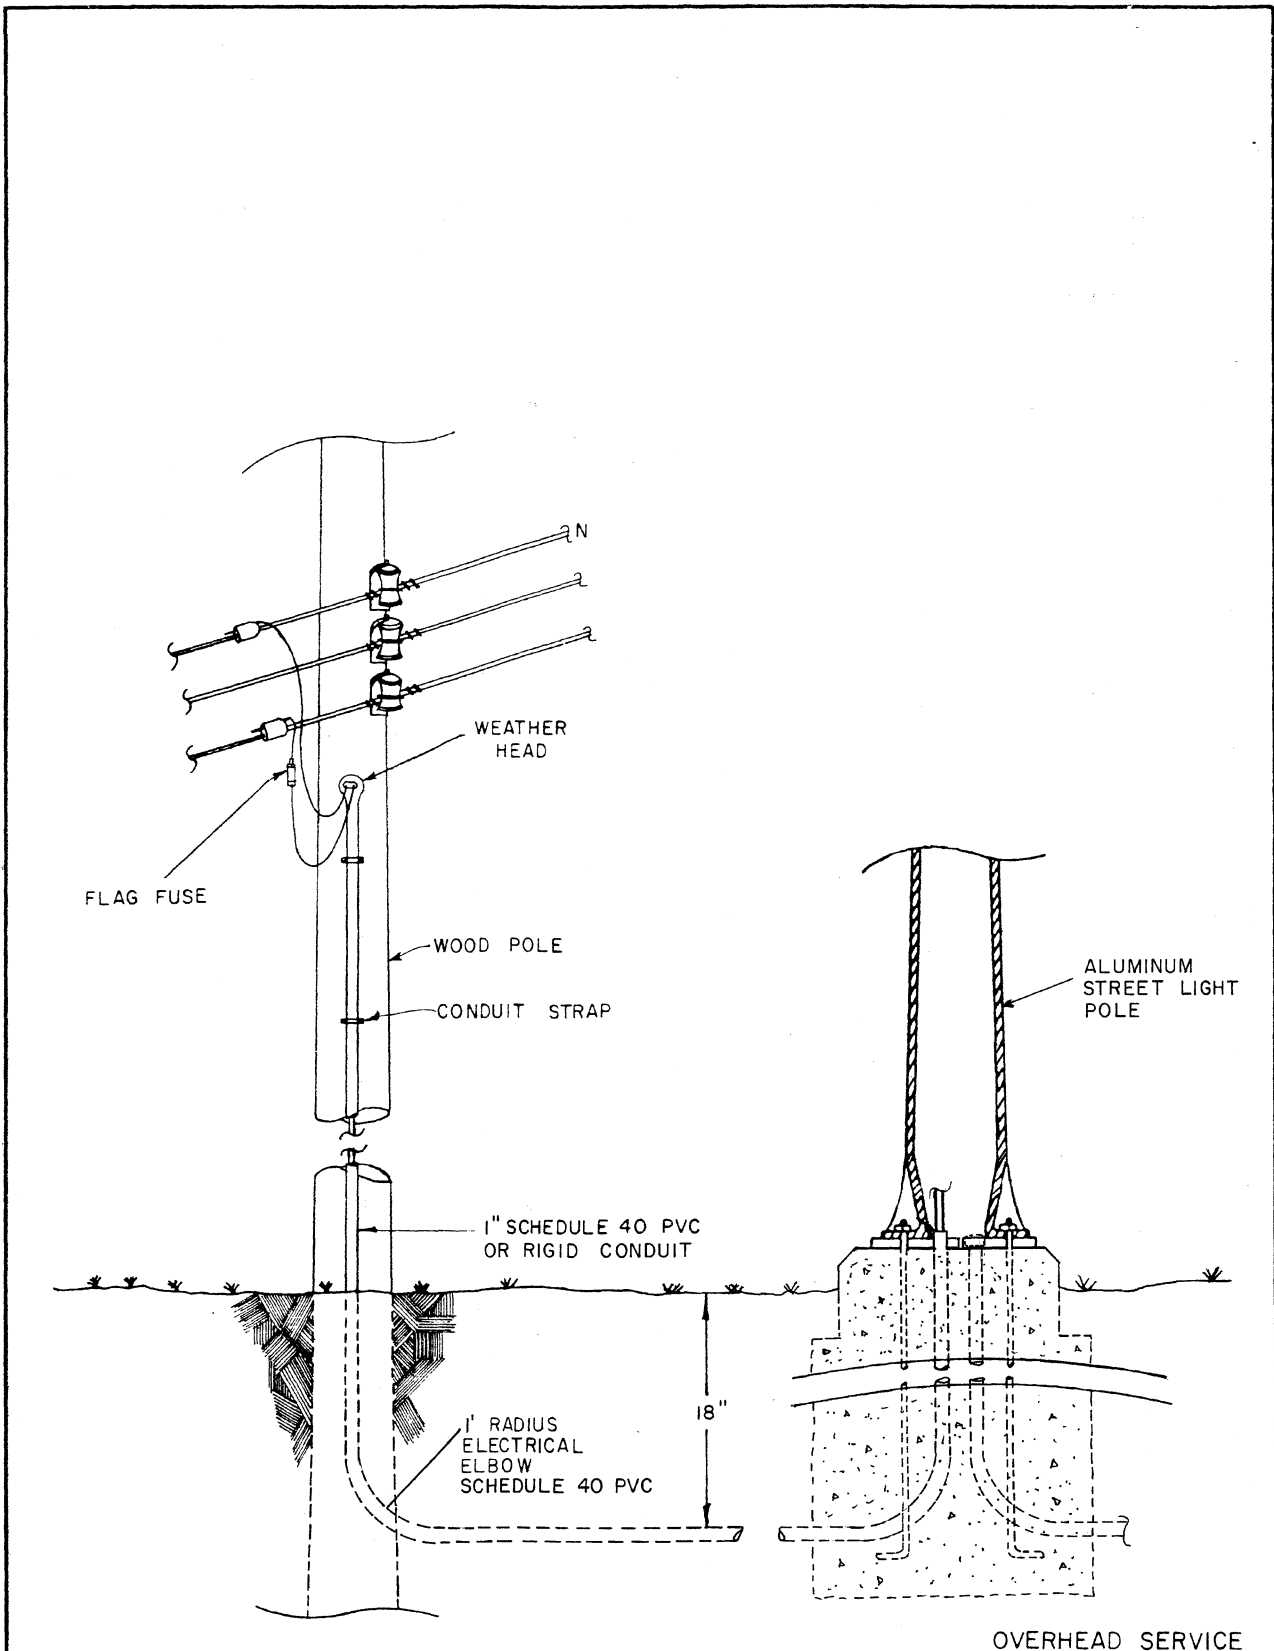

1. Cable installation in plastic duct

Cable may be installed in Schedule 40 PVC plastic duct on bottom of 18" deep trench. Trench should be reasonably smooth along bottom to avoid future stress points in duct. Care should be exercised in backfilling to see that no large, sharp rocks fall directly onto the plastic duct. Combinations of dirt, gravel and similar substances are suitable for backfill over the cut for a depth of four (4) to six (6) inches. Continue backfill to ground elevation with any available fill material.

2. Cable installation in metal conduit

Cable may be installed in galvanized steel conduit on bottom of minimum 12" deep trench if solid, shelf rock is encountered. Backfill to consist of any available fill material.

NOTES:

⚠ Package light kit includes, NEMA head, optics, lamp, photo control, 2/wire - pre-wired cable, mast arm, 5/8" mounting bolt & lag screws and grounding bolt.

⚠ Install cable guard 1/2", ground wire molding (IIN 7000913) if length along pole exceeds 2 ft. Vertical riser must be covered with cable guard even if jacketed conductor cable is used. If 3-#6al. poly is used you may use 1"x 10' cable guard U shaped PVC IIN # 1160501.

⚠ Pole and pole grounding not included in this standard.

Grounding notes:

All existing and new fixtures and mast arms must be grounded unless grounding negatively impacts safety or the reliability of the structure. Grounding of both the fixture and the mast arm can be accomplished by grounding either the fixture, the mast arm or both. In general a visible external ground is preferred.

Internal grounding can be accomplished by attaching a separate ground wire of a 3-wire cable (i.e. 12-2/C w/ground) between the pole ground and ground lug in the fixture.

For external grounding, the pole ground wire is fastened to mast arm with 3/8" x 1-1/4" carriage bolt, nut and lock washer (IIN #3003808) using a minimum of #6 bare SD Cu. Older installations with no grounding provisions can be grounded by drilling the support and using a self tapping screw and washer.

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 17

Responding Witness: Robert M. Conroy

Q-17.

A-17. The Lexington-Fayette Urban County Government's Request for Information issued on January 7, 2015 did not include a Question No. 17.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 18

Responding Witness: Paul Gregory "Greg" Thomas

- Q-18. Please describe in detail all maintenance that must be performed by KU on each type of street light to ensure that it operates properly and provide a list of each element of the required maintenance and its monthly cost.
- A-18. Normal maintenance consists of replacing the items listed in the table below as needed. The current unit costs are for materials specific to each installation and do not include associated installation costs (labor, minor materials, equipment, etc.), which are not tracked at this level of detail. Maintenance is required when KU has identified or received a report that the street light is inoperative. The most common maintenance performed on a street light is the replacement of a burned out bulb and/or replacement of an inoperative photoelectric control.

Normal Street Light Maintenance Material

Item #	Unit Description	Unit Cost
7001343	LAMP,HPS,4000L,50W	\$ 6.90
7001344	LAMP,HPS,5800L,70W	\$ 6.90
7001345	LAMP,HPS,9500L,100W	\$ 6.90
7001346	LAMP,HPS,22000L,200W	\$ 8.30
7001347	LAMP,HPS,50000L,400W	\$ 7.66
7001349	LAMP,MV,10000L,250W	\$ 5.80
7001350	LAMP,MV,20000L,400W	\$ 6.45

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 19

Responding Witness: Paul Gregory "Greg" Thomas

Q-19. Is KU able to ascertain, at any given time, the number of street lights in Fayette County that are actually in proper working order? If so, please provide a detailed explanation, and further explain:

- (a) How many street lights (on average) are actually in proper working order at any given time;
- (b) Whether the LFUCG is charged the monthly tariff rate for non-working street lights for the periods of time within which such street lights are non-operational or not working properly;
- (c) The amount of time it takes (on average) to bring such street lights into working order; and
- (d) Whether this information differs among different types of street lights. If so, please provide this information for each type of light.

A-19. No, KU cannot ascertain the number of street lights in Fayette County that are operable at any given time. However, as described in the response to Question No. 16 (a), KU proactively identifies street light outages and relies upon customers to report service problems.

- a. All lights, unless reported otherwise, are considered to be in proper working order. KU estimates it performs 3,460 street light repairs annually to LFUCG street lighting. A typical daily estimate of operable fixtures, based on the average 2014 repair time as described in Question No. 16(b) and a total of 30,100 lights, would be 99.95% $(1 - (3,460 \times 1.58) / (30,100 \times 365))$.
- b. The LFUCG pays a monthly tariff for all street lights it has requested.
- c. See the response to Question No. 16(b).
- d. See the response to Question No. 16(c).

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 20

Responding Witness: Dr. Martin J. Blake

- Q-20. How was KU's proposed monthly rate for each type of street light determined?
- (a) Please describe in detail each element of the proposed monthly rate for each type of street light (fixed costs, energy costs, maintenance costs, etc.), including the percentage of the rate attributable to each element.
 - (b) Does the number of existing street lights influence the proposed monthly rate for each type of street light (e.g. is there any use of a weighted average cost)?
 - (c) Does this differ from the existing rate elements? If so, in what regard?
 - (d) What percentage of KU's proposed monthly rate for each type of street light is comprised of maintenance?
 - (e) What percentage of KU's proposed monthly rate for each type of street light is comprised of costs associated with acquiring or installing the street light? Please provide this information for each type of street light for which the LFUCG currently pays a monthly tariff.
- A-20. In developing rates for lighting in this proceeding, KU applied the same percentage increase that was applied to other rate classes to each of the lighting rates that the Commission has approved as being just and reasonable in previous rate cases.
- a. KU does not maintain separate accounting records for each type of street light. The requested information is not available. The accounting information that is available is total cost information for the lighting rate class as a whole.
 - b. No.
 - c. See the response to part a.
 - d. See the response to part a.
 - e. See the response to part a.

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 21

Responding Witness: Christopher M. Garrett

Q-21. What depreciable life basis (if any) for each type of street light does KU utilize? Is this the standard industry basis?

A-21. KU utilizes one depreciable life established for all assets in the street lighting account. The account is depreciated at a rate of 4.00%, with an average service life of 28 years and an average remaining life of 21.2 years. The methods utilized are those typically employed within the industry.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 22

Responding Witness: Robert M. Conroy

- Q-22. Does the LFUCG continue to pay for KU's cost of installing or acquiring the street light beyond the depreciable life basis of the street light?
- A-22. LFUCG pays a monthly rate per street light based upon the type of light. The rates are segregated by fixture type, amperage, pole type, ornament style, etc. regardless of the lights' depreciable lives.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 23

Responding Witness: Robert M. Conroy

Q-23. From the perspective of the proposed rate for each type of street light, does KU propose to treat the existing street lights in Fayette County any differently than those that will in the future be installed? If so, please provide a detailed explanation.

A-23. No. KU will follow its approved tariffs for any existing and future street lights.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 24

Responding Witness: Paul Gregory "Greg" Thomas

- Q-24. Does KU anticipate utilizing new technology to capture savings potential in the installation, rehabilitation, and maintenance of street lights? Please describe in detail how KU plans to implement cost and energy saving measures (i.e. retrofitting old installations or introducing new technology)?
- A-24. KU continually evaluates new technology, such as LED lighting, but has no imminent implementation plans that deviate from current operational practices.

To acquire experience with new technologies, KU partnered with LFUCG on an informal test installation of LED lights.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 25

Responding Witness: Robert M. Conroy / Dr. Martin J. Blake

- Q-25. Is it KU's position that it could have actually justified seeking a greater rate increase for any type of street light for which the LFUCG currently pays a monthly tariff? If so, for which types of lighting? Please provide a detailed explanation of the basis for this position (for each different type of light) and provide any supporting documents or work papers.
- A-25. KU disagrees with the premise of the question. KU did not calculate a proposed revenue increase by light type. As stated in response to Question No. 20(a), KU applied the same percentage increase to all lights.

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 26

Responding Witness: Robert M. Conroy

Q-26. Has KU compared or analyzed the proposed monthly rate for each type of street light to those charged by other utilities in jurisdictions of similar size to Lexington-Fayette County, Kentucky? If so, please identify each jurisdiction to which the rates were compared or analyzed and provide the monthly rate for each type of street light in those jurisdictions.

A-26. No.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 27

Responding Witness: Paul Gregory "Greg" Thomas

- Q-27. What are KU's current policies, procedures, practices, and/or guidelines pertaining to the trimming and/or removal of street trees (and other trees effecting utility lines) in Fayette County that might potentially interfere with service?
- A-27. The Distribution Vegetation Management Program is a centralized program which encompasses right of way maintenance for KU and LG&E. The program is managed by a Forestry Manager and eight Utility Arborists. Two Utility Arborists are assigned to the Lexington Operations area, which includes Lexington and Fayette County. All arborists are certified by the International Society of Arboriculture. KU employs five professional tree contractor companies (Nelson, Phillips, Townsend, Asplundh, and Wright). Utility line clearing is undertaken to maintain safety, reliability of service, and access to the utility's facilities for maintenance and repair.

KU's Distribution Vegetation Management Program encompasses approximately 14,000 miles of right of way maintenance. The Lexington Operations area includes over 2,800 miles of right of way in Fayette and surrounding counties.

The primary focus and core value of the Program is to ensure the health and safety of our employees, business partners, and the public. Contractors and their employees will recognize and follow all laws, rules and regulations regarding public and worker safety. Any incident must be reported to the appropriate safety consultant immediately. Tree Trimming Contractors are held accountable for safety according to OSHA and Company standards. Every new contract employee must complete a safety training program within the first 30 days.

KU employs an Integrated Vegetation Management ("IVM") Program that is the process of using chemical, manual, or mechanical techniques to control undesirable vegetation and includes natural or directional pruning, environmentally safe herbicides, and tree removals.

The IVM Program includes flexibility to operate and maintain variable easement widths, differences between rural and urban service areas, applicable codes or ordinances, and the need to maintain some level of flexibility in addressing landowner requests or concerns. Schedules and priorities for tree trimming are based on vegetation growth, cycle-last trim date, reliability data, and visual inspections. Reliability centered maintenance concepts are employed in establishing tree trimming priorities.

The plan includes the application of a flexible multi-cycle strategy to address growth and tree density which will vary across the service area. The plan is to maintain a proactive trim cycle while balancing the reactive needs of worst performing circuits. KU's goal is to maintain an average trim cycle of five years or less. The plan also employs an "Enhanced Hazard Tree" program to focus on removal of off right-of-way trees.

All tree-trimming is governed by approved principles of modern arboriculture and shall adhere to International Society of Arboriculture (ISA) standards. Other standards utilized in the program include ANSI A.300, NESC, and OSHA 1910.269 as well as compliance with tree ordinances and local codes.

Each customer on the circuit receives a mailing notification letter and an automated phone call, one to two weeks prior to beginning the circuit work. The tree crew "knocks on the door" before the work begins. Permission from the property owner is obtained for tree removals. Arborists coordinate street tree work with City Foresters in urban areas. Customer complaints are investigated to resolution. A customer survey measures customer satisfaction with the tree trimming program. Customer satisfaction is included in the contractor evaluation.

Customer education about tree trimming and planting trees is provided in consumer mail inserts, participation in community events, media announcements, and on the corporate web site.

Contractors' performance is evaluated based on safety, productivity, quality, and customer satisfaction on a quarterly and annual basis.

A Vegetation Management Plan was submitted, pursuant to the Commission's Order, in Administrative Case 2006-00494, on December 19, 2007.

KU has adopted and uses the written guidelines for tree trimming as set forth in the recommendations of the International Society of Arboriculture ("ISA") as published in ANSI A300 (Part 1) and "Pruning Trees Near Electric Utility Lines." Both publications are copyrighted and may not be copied without the publisher's permission. Parties may arrange to examine the publications by contacting counsel for KU.

Question No. 28

Responding Witness: Robert M. Conroy

Q-28. Does KU allow, in any way, the non-governmental utilization of public street lights in Fayette County?

(a) If so, please provide a detailed explanation of each different type of such utilization that occurs in Fayette County, the extent of each type of utilization, the names of any parties that have agreements with KU regarding such usage in Fayette County, the amount and type of compensation or consideration (monetary or otherwise) that KU typically receives for such usage, copies of any pertinent agreements for such usage, and the total amount of compensation that KU receives for such activities

A-28. KU does not segregate lighting by government / non-government use. The Lighting Service ("LS") is available to any customer.

Question No. 29

Responding Witness: John P. Malloy

Q-29. Does KU have a timeframe for offering electronic data interchange (EDI) billing, both invoice and receipt of payment, to its Major Account customers?

A-29. KU will have the ability to send and receive EDI billing data by the end of the 1st quarter 2015. The offering will have various options for EDI protocol and will be dependent upon customers' technical ability to receive and send data. Customer implementation will require extensive testing, with the timeframe for implementation varying for each customer.

Question No. 30

Responding Witness: Kent W. Blake

Q-30. Please refer to page 2 of 3 of the Comparative Income Statement filed with your application (Filing Requirement 807 KAR 5:001 Section 16(8)(i), Tab 61).

- a. What is the explanation for the expected decrease in Public Street & Highway Lighting income between the base and test year periods?
- b. With respect to the base year period, how many different Public Street & Highway class customers exist?
- c. Approximately what percentage of the base year period income for the Public Street & Highway class customers is derived from LFUCG?

A-30.

- a. The test year period includes forecasted revenues based on planned volumes multiplied by an average tariff rate across all lighting customer classes. The base period includes monthly revenue amounts that contain actual volumes multiplied by specific individual tariffs by customer class with a different mix of actual volumes more weighted toward the higher tariff classes.
- b. The Company considers Public Street & Highway as a single class. There are 1,265 customers as noted on Filing Requirement 807 KAR 5:001 Section 16(8)(i), Tab 61.
- c. The percentage of the base period income derived for the total Company from the Public Street & Highway class customers from LFUCG is 45% for the six months actual portion of the base period. The forecast is not prepared on an individual customer basis.

Dated January 7, 2015**

Question No. 32

Responding Witness: Dr. Martin J. Blake

Q-32. Please reference Schedule M-2.3 (pages 8-12) of your application (Tab 65). Do the revenue projections that you have provided include all of the income that would be received through the application of the various demand charges that would apply to actual billings (e.g., penalties for high demand in prior months, low power factor, etc.)?

A-32. Yes. KU's demand forecast is based on historic billed demand that includes billed minimum and power factor components. Redundant capacity charges, which are based on demand rates, are included as pro forma adjustments to the demand revenues for Rates PS and TOD.

KENTUCKY UTILITIES COMPANY

CASE NO. 2014-00371

**Response to Lexington-Fayette Urban County
Government's Request for Information
Dated January 7, 2015**

Question No. 33

Responding Witness: Paul Gregory "Greg" Thomas

- Q-33. Please refer to the pre-filed testimony of Paul W. Thompson regarding the measurement of distribution performance (p. 35). What was KU's Customer Average Interruption Duration Index ("CAIDI") for 2013 and where did this place KU in the referenced benchmarking study?
- A-33. The KU (Kentucky) distribution system performance for 2013 achieved a CAIDI of 110.08 minutes, excluding major events. This improves on 2012 CAIDI by 2.31 minutes and places KU (Kentucky) CAIDI in the third quartile of the Southeastern Electric Exchange's (SEE) 2013 benchmarking study. CAIDI is calculated by dividing SAIDI by SAIFI and is negatively impacted by an improving SAIFI. KU's focus has been directed toward top quartile achievement in its SAIDI and SAIFI results. KU's (Kentucky) 2013 performance in SAIDI (82.79) and SAIFI (0.752) place the utility in the top quartile for both indices.

Question No. 34

Responding Witness: Robert M. Conroy

- Q-34. Please refer to Schedule N, page 22 of your application (Tab 66), Schedule N, page 22. Is it an accurate statement that there is no proposed increase to the Cable Television Attachment Charges? If not, what is the additional projected income from any increase in these charges and where is it accounted for in the revenue of the company?
- A-34. Yes, it is an accurate statement that there is no proposed increase to the Cable Television Attachment Charges.
